The motions made at the December Special Term of the Supreme Court, were by Mr. Emmet, one of the Ex-Counsel of the Corporation of the City of New-York, for the confirmation of the Reports of the Commissioners of Estimate and Assessment, for opening 37th street, 39th street, 128th street, 11th avenue, and Madison avenue.

Thirty-seventh and thirty-ninth street Assessments were commenced near eight years ago, viz: in June, 1836. The Common Council have never at any time, passed any resolution for to authorize an application to the Supreme Court for the appointment of Commissioners for opening these two streets. Yet notwithstanding this, an application was made to the Supreme Court, on a petition signed by the Mayor and Clerk of the Common Council, and Commissioners were appointed on the 24th June, 1836. The Report of the Street Committee of the Board of Assistants, stating the reasons why these streets were not to be opened by Commissioners, in detail, and the affidavit of the Chairman of the Committee, stating the reason why no resolution was introduced to authorize the application to the Supreme Court, are to be found in this volume, pages 141 and 142.

Andrew Warner, one of the Commissioners of Estimate and Assessment, in the 37th street proceeding, was examined as a witness in 1841, before the Select Committee of the Senate, appointed to investigate Assessment abuses in the City of New-York, and stated that he was sworn into office on the 24th of October, 1836, as one of the Commissioners for 37th street; that the Commissioners had completed their Report twelve or eighteen months previous to that time, and that it had not been presented to the Court for confirmation; has not heard Mr. Emmet state why he has not presented the report for confirmation. The witness also stated that the Commissioners were not all in the habit of attending the meetings, but were allowed compensation, the same as if they did attend.

The Report was finished, it appears, in 1840, and lay dormant after that time near four years before it was presented for confirmation.

Notice was given for taxing the fees of the Commissioners, Counsel and Surveyors, in these cases, before William Paxson Hallett, Esq., Clerk of the Supreme Court, who had himself acted as Commissioner in several streets, where the charges had been exorbitant. The Costs, &c., were taxed at more than TEN THOUSAND DOLLARS, to be assessed upon the land.

Objections were made to the taxation of the costs by Mr. Hallett, by the Counsel for the sufferers before the Court, on the ground that Mr. Emmet divided the fees with some of the Clerks of the Supreme Court, in Assessment matters, and read from Senate document No. 86, of 1843, a Report of a Clerk of the Supreme Court, to that effect.

In thirty-ninth street, Anson G. Phelps, Esq., was assessed on a piece of ground for the opening of this street; the same piece of ground had already been assessed for the pretended opening of fortieth street, $575, and also for the pretended opening of the 1st avenue, from 28th to 42d street, the further sum of $312, besides appropriating one third of the land for the avenue. This made $887, exclusive of the 39th street assessment; the interest of these two first assessments, exceed the value of the land assessed. Had the streets and avenues been opened by one sett of competent Commissioners, as was all that was authorized by the Common Council, the assessment on this piece of ground, would not have amounted to more than a few shillings, instead of exceeding more than FOUR TIMES THE VALUE OF THE LAND.

The Counsel for the sufferers, RICHARD MOTT, Esq., on the motion for confirmation, objected to the competency of the Court to act in these matters, under that provision of the Constitution which prohibits a Judge from holding any other office or trust, and insisted, that in appointing these Commissioners of Estimate and Assessments, and confirming their Reports, the Judges did not act as a Court, but acted as Commissioners. This the Courts have all held, as did also the Hon. Select Committee of the Senate, who examined into the assessment outrages. Chief Justice SPENCER and Chief Justice SAVAGE, have both held that the power exercised by the Court in Street matters, was in the capacity of a Commissioner and not as a Court.

Mr. Mott read from the Constitution of 1777, and also of 1823; section 25 of the former, and Sec. 7 of Article 5 of the latter, on the prohibiting Judges of the Supreme Court from holding any other office or trust.

He also read the respective letters of the Judges of the Circuit Court of the U. S., for the districts of North Carolina, Maryland, and Pennsylvania, addressed to the President of the United States, in 1792, in which they refused to serve under an Act of Congress imposing duties upon them in reference to invalid pensioners, on the ground of constitutional disability. He also read a letter from the Judges of the Circuit Court of the U. States, for the district of New York, in which they consented to act as COMMISSIONERS, but not as a Court. In these cases the Judges admitted that the duties required by the Act of Congress were of a meritorious character, and they therefore regretted their inability to act, considering the duty inconsistent with their oaths of office and the Constitution of the United States. These letters are to be found in the Municipal Gazette, No. 16, of Nov 17th, 1843, page 286, in connection with the other objections urged by the Counsel in these cases.

Mr. Mott also urged the provisions of the Constitution of 1777 and 1823, in connection with the Colonial law of 1691, which are set forth and discussed, on page 199, of the Municipal Gazette.

The provisions of the Constitution refered to, are Section 41, of the Constitution of 1777, and Sec. 7, of Article 4, of the Constitution of 1823; also, Section 2, of Article 7.

This great Constitutional Question, was most ably argued by Mr. Mott, and he has gained for himself a well earned fame, in the success which has attended his efforts.

Mr. Mott also placed before the Court, such public documents as conclusively show that these assessment proceedings are notoriously of a scandalous character, and did not commend themselves to the favorable consideration of the Court.

The Counsel moving for a confirmation, indulged in the use of very abusive language against citizens who had publicly opposed these assessment abuses, but was made to take his seat, and was deservedly rebuked by the Court.

This decision will relieve citizens from the payment of arbitrary and disgraceful assessments, for sham improvements, and will also release all lands sold for such assessments. Those who have paid assessments more than six years ago, are barred by the Statutes, as the Corporation will not hesitate to plead Statute limitation.

The streets on the agricultural part of the island, will not be harmed by this decision.

Those who have sold land bordering on a street or avenue, as laid out in 1807, have, by the Act, dedicated the land in the street or avenue, to public use, whether they owned on both or only on one side of the street, as the conveyance sweeps all the land they owned in the street or avenue opposite the ground conveyed.

Those who own both sides of the street or avenue, have nothing to do but to put up fences, and the street is made without the use of Surveyor, Counsel, or Commissioner, and in those cases where the above will not apply, the several owners may negotiate or the Corporation can do so, and if no ar-

rangement can be made, they can apply to the Legislature to authorize a proceeding by Jury, as provided for in the Colonial law, in No. 1, page 4.

Real Estate has risen in New-York in consequence of this decision, and is actually increased in value more than FORTY MILLIONS OF DOLLARS thereby.

In order that some correct idea may be formed of the character of the proceedings which the Supreme Court have, by this Decision, put a stop to, we will state a few as a specimen.

First, All the streets from 42d, up to and including 57th street, were proceeded in on the resolution of Alderman Ingraham, without the scrape of a pen on a petition from any land-owner.

Second, All the streets and avenues, up to and including 42d street, not opened prior to 1836, were proceeded in without any petition from any land-owner, and without any resolution of the Common Council directing any application to the Supreme Court for the appointment of Commissioners. This batch embraced twenty-seven streets and avenues. It was the plan of the Common Council to proceed in all these streets by one Commission, instead of which eighty-one Commissioners were improperly applied for and appointed.

Third, Manhattan Square was proceeded in on the resolution of Alderman Benson. No petition from any land-owner for this nonsensical operation.

Fourth, Mount Morris Square, (Snake Hill,) was proceeded in on the resolution of Alderman Ingraham. No petition from any land-owner for this moonshine protuberance.

We could extend this, but it is unnecessary.

Again:

Ninth avenue, from 45th street to the Bloomingdale road, was proceeded in on the petition of eighteen persons, neither of whom owned a foot of the land to be assessed or awarded for.

All these streets and avenues had been surveyed, laid out, and maps made of the whole ground by the Commissioners appointed by the State in 1807.

If the Corporation found it necessary to open one of these streets, &c., the Statutes authorized them to treat with the owners for the land, and which it was their bounden duty to have done, instead of commencing their shameful crusade against private property, in laying on the land HUNDREDS OF THOUSANDS OF DOLLARS OF FEES.

We give the following as a specimen of the whole:

COUNSEL FEES AND COURT CHARGES.

Seventh Avenue,	$3,976.77
Sixth do.	3,589.77
Tenth do.	2,100.00
Second do.	2,033.55
Manhattan Square,	1,449.13
Union Square,	1,889.00
Chapel Street,	3,443.00
Art Street,	1,896.75

SURVEYOR'S FEES, PAINTING MAPS, &c.

Seventh Avenue,	$2,801.00
Sixth do.	2,480.00
Tenth do.	2,440.00
Second do.	1,700.00
Manhattan Square,	3,070.39
Union Square	596.00
Chapel Street,	749.90
Art Street,	975.00

COMMISSIONERS FEES.

Tenth Avenue,	$2,640.00
Seventh do.	4,920.00
Sixth do.	2,928.00
Second do.	2,380.00
Manhattan Square,	1,572.00
Union Square,	1,769.00
Chapel Street,	2,429.00
Art Street,	1,476.00

CLERK HIRE.

Tenth Avenue,	$600.00
Seventh do.	200.00

ROOM HIRE.

Seventh Avenue,	$410.00

These Costs and Expenses were never taxed, nor were any bills of items ever furnished the Corporation, and yet these large amounts were paid out of the Public Treasury, by officers whose duty it was to withhold the money. Such officers deserve the severest censure.

ASSESSMENT CONFISCATION.

Having given a small sample of the Expenses of Street opening *gentry*, we will now state a few cases of Assessments.

The Estate of John Duffie was assessed for opening 38th street, from the 2d to the 3d avenue, $1,289.80; for opening 38th street again, from river to river, $10; and for opening 2d avenue, $117.50. These three assessments, with the interest up to the present time and expenses, exceed $2000. This assessment is on a piece of land ninety-eight feet square, and was valued by Thos. R. Ludlum, City Surveyor, at $450 altogether; see his testimony, Senate Document No. 100, page 151. The assessment and interest already exceed four times the value of the land.

Estate of John Schuyler. This assessment is on a piece of ground on the corner of 28th street and 7th avenue, 58 feet ten inches by 98 feet 10 inches. The assessment for opening 28th street, is $1,037.05 for opening 7th avenue, is $209.98. The assessments exceed twice the value of the land.

Estate of James Amory. This estate is assessed, including interest, more than $10,000, for the pretended opening of 6th and 7th avenues and Manhattan square. The estate furnished the land for the avenues, and should not be assessed at all. None of the improvements are made.

We could go on and enumerate others, among which is the estate of Mathew Dyckman, the estate of Wm. Edgar, and the estate of Mr. Pierson.

Parents who toil hard to accumulate estates for their children, and leave the world with the satisfaction that they have provided abundantly for those they leave behind, to have their children plundered of those estates, in this way, is an outrage upon all law and order, and a violation of every principle of justice.

PAINTED STREETS.

The Select Committee appointed by the Senate of this State, to investigate Assessment Outrages in the City of New-York, say, in their Report, Document No. 100, of 1842, page 16, that:

"On that branch of the complaint as to the imposition of heavy and oppressive assessments for improvements never actually made, the Committee ascertained that a very large portion of the streets and avenues formally opened from 1836 to 1839, were not actually opened; that nothing has been done beyond making awards and assessments by the Commissioners, and the confirmation of their Reports by the Supreme Court; and that although the assessments have been collected for such improvements in many instances, and in others the lands charged are either sold or advertised to be sold for the payment of those assessments, yet the lands forming those streets and avenues remain in the same condition as they were before the taking of any proceedings for their opening; and in some cases such lands remain in the occupancy of their original owners, notwithstanding they have been paid for the same. And in numerous other instances, where the streets and avenues have been actually opened, nothing has been done towards their regulation, so as to make the same useful to the public, or available to the owners of real estate, who have paid for the same by assessments on their property.

"Out of a list of eighty-one streets and avenues, or parts of such highways, the Reports for the opening of which had been confirmed in 1837, 1838 and 1839, fifty-seven have not been in any way regulated or improved; and of the remainder, twenty-four in number, in some instances only portions thereof have been regulated a few blocks; and in others, a road has been worked through the centre of the street or avenue; and in others again, it is not deemed necessary to work such road, as the natural grade of the ground is such as to make it passable without regulation. This attempt to collect

assessments not only by voluntary payment, but by enforced sales of the lands charged, without actually opening the streets and avenues for which such assessments have been imposed, has been a strong cause for the excitement in that city on subjects of street matters. The Committee, therefore, submit this subject to the consideration of the Legislature.

"Several instances were shown to the Committee, where property had been offered for sale for the payment of assessments at two or three successive sales, without being able to get a bid, the amount of the assessments being more than the estimated value of the property. These large assessments operate against the interests of the city, for the owner will not pay the assessment or improve the property, and no person will buy it, and the Corporation cannot realize their money by a sale of the assessed premises, and the amount must be taxed upon the city; and thus the improvement of the upper part of the city, which is covered with these great assessments, must be stayed for many years, and now apparently for an indefinite period of time, unless the land should in some manner be relieved from the charge of those assessments. It did appear reasonable to the Committee that in analogy with a judgment, the lien of which ceases on real estate after the termination of ten years, the lien of those assessments should be at an end after the lapse of some definite period; what that should be, the Committee submit to the discretion of the Legislature."

COLD.

The present winter has, in many places, been very cold. My thermometer, which has a full Northern exposure, with the bulb protected from the wind, has at no time been lower than six degrees above zero.

Captain Parry, in his Arctic Expeditions, found no cold more intense than 55 degrees *below* zero. At this temperature, mercury is malleable. There are but few fluids known to us but what would become solids at a temperature of 300 degrees below zero.

I remember the celebrated cold Friday, it was a cold day indeed, and was followed by an intensely cold night. I was, during that day and night, in an encampment in a dense Northern forest. During the night, the trees kept up a continued cracking and splitting from the effects of the severity of the frost, and to such an extent that at times the noise was like the discharge of a volley of musketry. The ice over a large body of water, some miles distant, during the night cracked from one extremity to the other, with a tremendous explosion, and with a force that shook the ground on which our camp was located.

While the thermometer was at the lowest, the present winter, viz: six degrees *above* zero, I tested the water of one of the public pumps; the thermometer denoted 47 degrees, and the water of my cistern, at the same time, 36 degrees of temperature. The atmosphere of my kitchen was, near the upper ceiling, 48 degrees, and on the floor at the same time, 42 degrees.

The thermometer was invented by Sanctorios, in 1590, and was reduced to a scale by the genius of Farenheit, in 1724. We have in use four descriptions of thermometers, viz: Farenheit's, Centigrade's, Reamur's, and DeLisle's.

The boiling point of Farenheit's, is 212 degrees, Centigrade's 100 degrees, Reamur's 80 degrees and DeLisle's 0.

The freezing point of Farenheit's, is 32 degrees; Centigrade's, 0 degrees; Reamur's, 0 degrees; DeLisle, 150 degrees.

Cold is not always destructive to animal life, however intense it may be. Fish of some descriptions, when taken from the water in the severest weather in winter, and thrown upon the ice, become frozen stiff, but when put back into cold water, where the frost is extracted, they again become as active as before.

Some descriptions of vegetation is wholly destroyed by frost, while other kinds are not in the least affected by the most intense cold.

The most ponderous walls are thrown down by the frost. The smallest joint that will admit water, if seized upon by frost, will yield to the force of the expansion which the freezing of the water produces.

The marble steps of the City Hall, of New-York, are very heavy, and each flight consists of four pieces. There are, therefore, three joints. The middle joint is close, but the joint toward each end, is open about an inch, showing that the water which had penetrated the joints, had been expanded by the frost. The middle joint is made close by the same force that enlarged the others. Here are tons weight of stone moved by the freezing of less than a pint of water.

Cold air passes in veins through the atmosphere. Cold exists throughout the year a few thousand feet above our heads, and of great intensity.

The stratification of the atmosphere by cold, is very clearly illustrated by hail storms in hot weather. The hail passes in veins.

The nearer we approach the Sun in ascending into the atmosphere, the more intense we find the cold, and for aught we know, the planet Mercury, which is near the Sun, may be far colder than Georgium Sidus, which is far distant from it.

Heat and cold, under certain circumstances, and to a limited extent, we can measure, but beyond that, all is blank. The Pyromater, an instrument for measuring intense heat, is a recent invention, and a very important one, and time may unfold others, equally as important.

Cold does not penetrate the Earth to any very great extent where it is covered with snow, and much less than where it is exposed to the air.

When the cold approaches a city in which a pestilential fever rages, the infected atmosphere is at once disinfected; it is in this a physician to the sick.

The weary traveller, in the regions of country bordering on the Equator, when suffering from the heat of a vertical Sun, labors hard with a feather fan or some contrivance like it, to move a little cool air to revive his wilting frame.

Cold, where we have a surplus of it, like every thing else, we cease to value. It is a rich treasure, it is one of Nature's bounties; the sweet cold locks up in the great terrestrial store-house of Nature, the germs of vegetable and animal life.

To cold we are indebted for our chrystal bridges, vast in their extent and unequalled in their construction.

BOARD OF ASSISTANTS.

We should like to see the Board of Assistants made up of such citizens as James Kent, Jonathan Thompson, Stephen Allen, Preserved Fish, Wm. B. Crosby, John M. Bradhurst, George Newbould, Abraham Van Nest, Wm. F. Mott, Jonathan Goodhue, John Haggerty, Edward H. Pendleton, Saul Alley, John I. Palmer, Benjamin L. Swan, W. W. Fox, and Peter Schermerhorn; men full of years and full of experience, and of great purity of character. A Board composed of such men, would be a blessing to the City, and we ask where is the citizen who would not feel proud to take his stranger friend to see such a Board sitting in deliberate Council. A Board composed of these individuals, would possess more dignity, and command as much respect as any other deliberate assembly on the globe. It would be a Council of freemen, dignified by Nature, adorned by human cultivation, aud a better safe-guard to liberty and property, than the greatest standing army that was ever assembled together. It is to such men that our country has to look for safety.

The Board of Assistants, composed of such citizens, would in reality be what it purports to be, a BOARD OF ASSISTANTS.

The meetings of such a Board, in the day time, would render useless the thousand dollar chandeliers, and the crimson drapery and tinselled trappings of the Session room, for it would have the adorning of plain, sensible men, which is ornament enough.

No gold pencils need be displayed to take the eye of such men; and if a gift, they would scrutinize the motives of the doner, and the acts of the donee.

The banqueting room would find no advocates in such a Board.

Such a class of men would raise the character of what is called the "Little Board," to an elevation that would make it exceed the Roman Senate in name and fame.

THE SUPREME COURT ACTING AS STREET COMMISSIONERS.

There would be full as much propriety in making the Justices of the Supreme Court,

Canal Commissioners, as Street Commissioners.

We were much surprised in noticing in the postscript of Mr. Justice Bronson's letter to Mr. Mott, which we published on the 21st instant, that the Chief Justice dissented. Chief Justice Nelson was a member of the Convention that made the provision in the Constitution, that the Justices of the Supreme Court should hold no other office. If the Chief Justice goes on the doctrine of expediency; if he will come to New-York and consult such men as Jonathan Thompson, Robert C. Cornell, Walter Bowne, Stephen Allen, John M. Bradhurst, and others of the same standing, he will find that these assessment proceedings are very different from what they are represented to be by Ex-Commissioners of Assessment. Persons who have been the recipients of princely fees in these odious proceedings, have, it is generally believed by citizens of New-York, misrepresented these street assessments to the Chief Justice. The Chief Justice is a man of great purity of character and a most worthy citizen.

The first Street Commissioners appointed in this State, were by an Act of the Legislature, passed April 6th, 1792, for extending ROOSEVELT and FRANKFORT streets. These Commissioners were five in number, and were appointed by the Legislature. There was a peculiar feature in this Act, viz: that the Common Council should first have and obtain the consent of the owners through whose land the street should pass. The assessment to be made by the Commissioners, *after this preliminary*, was to be returned to the Common Council, under their hands and seals, and upon this, was to become a lien upon the land and a debt due the Corporation, for which they were authorized to sue for in any Court of record in this State.

This act is a very different kind of proceeding from the Act of April 9th, 1813. This was the first step taken in the appointment of Commissioners. The necessity of a jury was dispensed with in these two cases, because that the consent of the owners must be obtained before the land could be used, therefore there was no necessity for a jury. The consent of the owners was substituted.

The restraining clause of the Constitution of 1777, was well understood in those times. No attempt was made to turn the Supreme Court out of doors and make the Justices highway-masters.

The Act to which we refer, is to be found in No. 1, of the Municipal Gazette, page 5.

In the case of Elizabeth Pearson, in the Court of Chancery, in which his Honor the Chancellor gave the opinion which is to be found on page 195, there are some facts which ought to accompany that opinion.

About the year 1830 or 1831, the husband of Mrs. Pearson departed this life, leaving a wife and three children. He owned the premises situate on the north-east corner of Pearl and Centre streets, which rented for upwards of one thousand dollars per year. On this property was a mortgage in favor of some wards of the Court of Chancery, the interest of which was paid out of the rent of the premises, and also a mortgage to Mr. Stevenson. The Corporation assessed this property a large sum for extending Centre street, and for filling in and paving Centre street, and for sewers, &c. The assessments for the filling in were never signed by the Assessors as required by law, and the whole proceedings were notoriously shameful.—This property thus assessed was sold for the term of 27 years, by which means Mrs. Pearson and her children are rendered destitute and helpless. It was their whole, their only dependence, when Mr. Pearson left the world he supposed it was an abundant provision for the support of his family and the education of his children. It was so if the Corporation had not disinherited this little helpless family. But this is not all the Corporation have done to distress this oppressed family, as will be seen in the sequel.

Mrs. Pearson applied to the Assistant Vice Chancellor, Hon. Murray Hoffman, for an injunction to restrain the Corporation from executing a lease for the assessment, which he granted, requiring Mrs. Pearson to give security for the costs. A hard working mechanic of very limited means was her security. The Corporation demurred to the jurisdiction of the Court, which the Chancellor sustained, and dismissed the bill with costs.

The Corporation prosecuted the surety of Mrs. Pearson for the costs, and levied an execution upon the property of this hard-working mechanic, and he was obliged to raise out of his hard earnings about seventy dollars.

The widow and the fatherless are helpless. We forbear to comment.

The Chancellor in this opinion uses an expression which certainly must have been almost a slip of the pen in the hurry of business. In speaking of the decision of the Court for the correction of errors in the case of Messerole's children, he says "the Court *repudiated* the idea that the Court of Chancery has any power or right to interfere in such cases."

The decision to which the learned Chancellor refers was by a tolerably close vote.—If we mistake not, it was 13 to 9, and had the case been argued by the Counsel who filed the bill, it would have been the other way we are almost sure. General Bogardus filed this bill and carried it in the Court of Vice Chancellor McCoun, and in the Chancellors Court, but when it reached the Court of Errors he was near the confines of the grave, and unable to argue it. It was, however, argued by an able lawyer who knew nothing of the case until the evening before the argument.

We published the whole history of this case from papers which we obtained from Gen. Bogardus the Solicitor for the children of Mr. Messerole. The printed sheets were destroyed by fire. We will endeavor to obtain from the Executors of Gen. Bogardus the papers again, and will re-publish them. The Chancellors opinion, in that case, is well worth reading and does credit to his head as well as his heart.

Now the reason which the Chancellor assigned for taking jurisdiction and then changing his mind is certainly one which ought to have influenced him in giving costs. If he had erred, and Mrs. Pearson had been misled by this error, he should not have made her pay costs, unless the law was peremptory to compel him to do so, and if such is the law, that learned jurist ought not to have allowed a session of the legislature to pass without calling their attention to a remedy.

There is another matter in the opinion of the Chancellor in another case on the same page, which is that of restraining the Corporation being an "UNNECESSARY INCONVENIENCE TOTHE CORPORATION."

"Let justice be done" without looking to consequences.

The Chief Justice who gave a written opinion in this case in the Court for the correction of errors uses this strong language in reference to the jurisdiction of the Chancellor in these Street cases:

"I know the learned Chancellor has neither the desire or inclination to entertain it unless in obedience to a sense of duty, and the ancient jurisdiction of the Court following where the footprints of his learned and distinguised predecessors lead; and must believe that he has been *subdued and carried beyond the outer boundary of his court, by the hardship and injustice of this particular case.*"

"These *hard cases* make bad precedents in the Courts both of law and equity, and are usually found at the bottom of them."

ROBERT H. MORRIS.

Mayor Morris deserves the thanks of this community for the interest he has taken in the Tax question, and for numerous and well timed vetos.

Our citizens who pay large taxes speak in the highest terms of Mayor Morris. He is a public officer of great firmness of purpose, intelligent and honest. If he is a candidate for re-election he will no doubt be re-elected.

Alderman Breevoort, Alderman Brady, and Alderman Tillou, deserves the thanks of the tax payers for their attention to their interests.

NEW PARTIES.

Whichever party puts up the best men will succeed at the charter election.

BAR ROOM OF CITY HALL.

This appendage to the banqueting room of the Hall has been refitted with new carpets, &c. &c.

We have not heard whether they have procured gold waiters for their wine goblets.—Such a use of the public funds would be more appropriate than one half their appropriations.

DESTRUCTIVE ASSESSMENTS.

BEDFORD ROAD

AND

MR. MESSEROLE'S CHILDREN.

We give below the Speech of the venerable General Johnson, Mayor of Brooklyn, to the Common Council of that city.

The newspaper containing this Speech, was first shown us by the Hon. W. T. McCoun, Vice Chancellor, after the case of Messerole's children had been argued before him, and he remarked that he intended sending the paper to the Chancellor.

This Speech deserves to be treasured up, and we have printed an extra number of copies for extensive circulation throughout the United States, and also in England.

We deem it due to this important question to place the farewell address of the venerable Mayor of Brooklyn, who is a most excellent citizen, a man beloved and respected by all who know him, in connection with the Opinion of the worthy Chancellor of this State, in the matter of the ruinous assessment upon the estate of the infant children of Mr. Messerole, who were assessed so heavily for the Bedford Road, as to annihilate their title; and next to these, the Opinion of the Supreme Court, in which they state that the Constitution of the State has provided against the exercise of such summary street powers by that tribunal, which is the power which confirmed the Bedford Road Assessment alluded to by the Mayor and passed upon by the Chancellor.

We wish to call the attention of the reader to the first paragraph of the Opinion of the learned Chancellor, in which he says: "*that an assessment has been made upon the lands of the complainants, which must produce a total sacrifice of the property assessed, unless they can obtain relief in this Court, or by* LEGISLATIVE INTERFERENCE,"—in connection with the *quere* put by his Honor the Mayor of Brooklyn, in his Speech, when he asks: "*will the land assessed along Hamilton avenue and Bedford road, pay half the assessments? If not, are not the owners plundered, and the City also?*

Here is evidence indisputable and unquestionable as to an absolute confiscation of this estate, and we ask by whom? We answer, by a power unknown to the Constitution of the Commonwealth.

It was well said by the learned Chancellor that: "*unless they can obtain relief in this Court, or by Legislative interference,*" that the assessment must produce a total sacrifice, &c.

The Chancellor clearly saw that the Justices of the Supreme Court did not act in a judicial capacity, but merely as Road Commissioners, and therefore that they could not revive their own acts.

Among the powers possessed by the most absolute governments in Europe, there are none that can be compared in despotic character with the summary street powers which have been exercised over private property, in the State of New-York, for years past; and yet we boast of a CONSTITUTION, the purchase of BLOOD and TREASURE!

From the Long Island Star of May 7, 1838.

BROOKLYN COMMON COUNCIL.

MONDAY, April 30, 1838.

The MAYOR addressed the Board as follows, and retired, and the President, Alderman S. SMITH, took the Chair.

Gentlemen of the Common Council:

Be pleased to permit me to present a few remarks to this Board, before I leave the Chair.

When we entered upon our duties, the storm of adversity was passing over our country, sweeping away the golden visions of speculative prosperity, and leaving the blasted harvest of adversity on many fair plotted fields. Many tall trees, with gilded leaves and *paper* roots, were laid low. Our fair city has suffered by the storm, her sails were spread to every wanton lover, whom the lust of speculation brought among us. Our former cultivated farms are dotted with buildings, subject in many cases to reversions. This is a faint outline of the prospects caused by the re-action, which, in like cases, will always follow excessive speculation. Many great men, and many wise men, who had enough but wanted *more*, have been ensnared, and have fallen upon the alter of adversity.

When this city was incorporated, our deferred Market Debt was $20,000; two hundred thousand dollars were raised by loan for the erection of a City Hall; the Common Council *knew*, and our citizens *know*, that this sum was sufficient to build a Hall, equal in every respect to the Hall in the city of Albany, and to purchase a site for the building. The loan was made with this object in view. Why was it not done? Why were not the interested *schemes* of speculators, rejected by an unanimous vote, instead of one solitary NO?

The past cannot be re-called. The deed is done; but that *incubus* of folly will be felt after its votaries are no more.

No member of the Common Council, of any city of this State, can lawfully make a beneficial contract with the Board whereof he is a member; nor can *any* member of such Board enter into a contract whereby he is directly or indirectly benefitted.

In Brooklyn, the Common Council direct and the Mayor executes.

Again, Gentlemen: what authority had our Board of Aldermen, who are Trustees of the People, to lend their aid to interested men, to oppress and ruin the widow and the orphan, by opening, paving, or grading unnecessary streets? Improvements are betterments, not divestments. Were not Hamilton avenue, Myrtle avenue, and Bedford road, opened to gratify speculators *very near* the Board? Were not the assessments for opening, laid heavily on distant sections, to pay favorites *near* the Board? Will the land assessed along Hamilton avenue and Bedford road, pay half of the assessments? If not, are not the owners plundered, and the city also?

Motives produce acts which are often done before the design is seen.

The foregoing remarks are not made for individual purposes, but for the purpose of warning those who succeed us, to guard our city from the like errors.

I have now given a faint outline of our city as she was when the Board entered upon its duties, oppressed upon every side, but not disheartened. Our ship was shattered in her rigging, but her hull is sound. Our beautiful and healty city remains. We need no distant waters, we have the best in abundance below. We will be burthened a few years with taxes, still we can pay more and prosper.

We have united to stay unnecessary expenditures, and correct evils. We have preserved civil order, and promoted education. Our efficient Police has protected us from midnight fiends, and Providence from the fiery elements. Our Fire Department is improving.

On taking leave of this Board, be pleased, Gentlemen, to accept of my individual respects for your kindness and assistance during the past year; to the Clerk, Attorney, and Street Commissioner, together with all our *faithful* officers, my respects are also presented. Though we may seperate here! I hope *we* will meet hereafter, in that happy haven of rest, where no political distinctions will be known.

Alderman Underhill then offered the following Preamble and Resolution, which was read and adopted:

Whereas, the term of service in which his Honor JEREMIAH JOHNSON, has been elected to fill the arduous situation of Mayor of this city, is nearly terminated, and whereas, the connection necessarily arising between the individual filling that office and the members of this Board, give the latter ample opportunity of judging of the capability and zeal with which the duties of the Mayoralty has been performed; and whereas, this Board are deeply impressed with the conviction, that his Honor JEREMIAH JOHNSON, has on all occasions, exhibited an energy and industry in his station, no less honorable to himself than beneficial to the public; that the interest of this city, of which he has so long been a resident, have again, as they often have before, been highly promoted by his public spirit and anxious desire to promote the public weal, therefore

Resolved, That this Board do hereby tender to his Honor the MAYOR, their warmest thanks for the indefatigable zeal and untiring industry with which he has filled the duties of his office, and hereby express to him the conviction they strongly feel, that he has added another wreath to the crown he has so long deserved to wear, that of a PUBLIC BENEFACTOR.

THE CHANCELLOR.

"It is pretty evident in this case, that an assessment has been made on the lands of the complainants, which must probably produce a total sacrific of the property assessed, unless they can obtain relief, either in this Court or by Legislative interference. Judging from the facts before me, I cannot see how it was possible for the Commissioners of Estimate and Assessment, to have come to the conclusion that the lands assessed could be benefitted to the amount of about $14,000, by the contemplated improvement; even upon the principles on which they proceeded relative to the Bedford road as a public highway, already laid out and established. As I understand the case, the assessment limits only included of the complainant's lands 107 feet on each side of the Bedford road, as originally laid out by the turnpike Commissioners, and extending in length on that road about 968 feet. This would give to the complainants 76 lots of 25 feet front, and 107 feet deep, upon a street of 66 feet in width. And if the contemplated improvement was made, they would have the same number of lots of 100 feet in depth, upon an 80 feet street. These lots, at the valuation fixed upon them by the second answer of the defendants, at the time of the assessment when lands were the highest, were worth $250; making the sum of $19,000 for the lands assessed. And yet it is supposed these lots will be benefitted by the widening and extending of this street, $139.31; or about three fourth of their then estimated value, and nearly their full value one year thereafter, when the second answer was put in. It is possible, that some further benefits might accrue to these lots, by the extension of Bedford road beyond where it was already opened four rods wide, in addition to the benefit of having it fourteen feet broader in front of the lots assessed. But there is much reason to believe that the guardian ad litem who was appointed to take care of the rights of these infants, and who was himself one of the applicants for the proposed improvement, has, under the influence of mental hallucination, or otherwise, suffered their property to be assessed to about its full value, and probably much more than it is now worth; as a supposed benefit which that property was to receive from the contemplated improvement. If the whole proceedings, however, have been regular, and the Commissioners of Estimate and Assessment have merely erred in judgment, I think this Court has no jurisdiction to correct their error, or to give relief to the complainants. For there is no allegation of fraud or collusion on their part, nor on the part of the guardian ad litem, who was appointed in the mode prescribed by law to protect the rights of the complainants on that assessment, and to appeal from the decision of the Commissioners, if he believed they had done injustice to these infants.

The first objection to the regularity of the assessment is, that the Commissioners of Estimate and Assessment, have assumed that the turnpike road was not only regularly laid out, but that it was already the property of the public, so that the complainants were entitled to no compensation therefor. In this I think the Commissioners were clearly under a mistake. For the purpose of this decision, I shall take it for granted that the turnpike was properly laid out, and that the damages of the complainants for that part of their farm which was taken for the use of the Corporation were legally and constitutionally assessed, pursuant to the provisions of the general turnpike act of 1807. Still that act did not vest the title of the land in the turnpike company, even for the purposes of the road during the existence of the charter, until the actual payment of the damages which had been so assessed. The language of the Statute is, that the turnpike corporation, upon paying to the owners of the land the sum assessed and awarded by the appraisers in their inquisition, shall and may have and hold the lands to them and their successors and assigns, &c. (1 *R. L. of* 1813, §3, *p.* 231.) It is true, the statute does, by an implication, authorize the turnpike company to enter upon the land for the purpose of making their road thereon, if there is no person living on the land who is authorized to receive the damages, unless such damages shall be lawfully demanded. The title to the land, however, is still in the original owner; and the moment he demands the payment of the damages from the proper officers of the company, and the same are not paid, he may bring an action to recover the possession of the land. It is perfectly clear, therefore, that the complainants before they could be divested of their title to so much of their farm as was included in the old Bedford road, were entitled to the payment of at least the amount which was awarded to them by the appraisers, in 1828. And the opinion of Chief Justice Nelson, appears to be that they were entitled also to the benefit of the contingent right to the revision in the land, in case of the dissolution of the Corporation, or of the abandonment of the road. (*See Hooker* v. *The Utica and Minden Turnpike Company*, 12 *Wendell's Rep.* 371.) Whether the turnpike company was in existence at the time the Commissioners of Estimate and Assessment made their Report in the present case, does not distinctly appear from the pleadings; but the legal presumption is that it was, as I have not found any statute dissolving that Corporation, or authorizing it to abandon the road. It is clear, however, that if that Corporation should be legally dissolved without having paid the amount awarded to the complainants for damages, the legal title to that part of the Bedford road which is in question here, would belong absolutely to the complainants; and that such title could not be divested, for the purposes of this public street, without paying them the full value of the land, either in money or in the benefits which would thereby accrue to them by the increased value of their adjoining lands. It does not distinctly appear in this case whether the petition to the Common Council for the improvement, and the resolution of the City Corporation adopting the same, actually contemplated the taking of the lands included within the limits of the turnpike, as well as the two narrow strips on each side of the same, for the use of the Corporation as a public street. If the former was the case, then the confirmation of the report was irregular, and may still be opened; as the Commissioners have not in form appraised the damages to which the complainants, as the owners of the original site of the Bedford road through their farm, are entitled. And as I understand the recent decision of the Supreme Court *In the matter of Anthony street*, (20 *Wend. Rep.* 618,) there cannot be an absolute confirmation of the Report of Commissioners of Estimate and Assessment, so as to give any vested rights under the same, until the damages for all of the lands taken for the proposed improvement have been ascertained and settled, and are properly assessed upon the owners of those lands which will be benefitted by the improvement. If this is the correct construction of the Statute, and the resolution of the Mayor and Common Council actually contemplates the taking of the whole of the old Bedford road for the purposes of this improvement, they ought not to be permitted to proceed and enforce this assessment against the complainants personally, by virtue of the distress warrant, or by a sale of their lands which have been assessed, until the proper steps have been taken to divest their title to the whole of the lands which are to be taken for the improvement, by an assessment of the damages and an offset of the same against the supposed benefit of their adjacent lands.

I think, however, there is a more conclusive objection to the proceedings of the defendants, in this case; and that is, that the Mayor and Common Council had no legal authority to lay out and open this new street through the lands of the complainants, in one of the new wards of the city, subsequent to August, 1835; until the same had been authorized by the Commissioners appointed under the Act of the 23d of April, in that year, authorizing the appointment of Commissioners to lay out streets, avenues, and squares, in the City of Brooklyn. That Act, which took effect on the first of September after its passage, gives to the Commissioners, to be appointed by the Governor on the application of the Mayor and Common Council, the exclusive power to lay out streets, avenues and public squares, within that part of the city comprising the sixth, seventh, eighth and ninth wards, and to direct the closing of any streets, roads, highways, lanes, avenues or alleys which had not been theretofore approved of by the Mayor and Common Council. (*Laws of* 1835, *p.* 136, § 4.) The previous act of the same day amending the charter of the city of Brooklyn, which went into effect immediately, must be so construed as not to conflict with the provisions of the Act appointing these Commissioners to make a permanent

plan of this part of the city. It must therefore be construed to apply to that part of the city lying within the first five wards, and which was originally comprised within the bounds of the village Corporation; or at least, to such streets as they should think proper to lay out according to a settled plan, in the four other wards, previons to the time when the act for the appointment of Commissioners should take effect. Certainly it could not have been the intention of the Legislature that two classes of officers should have the power to lay out streets and avenues in that part of the city during the same period, and that each should proceed according to a settled plan of their own. Neither could the Mayor and Common Council continue their jurisdiction over the subject, (if their power extended to these four wards previous to the first of September,) by their neglect to apply to the Governor for the appointment of Commissioners, until after this street was laid out; if such was in fact the case. The duty for which the Commissioners were to be appointed, was in its nature exclusive, independent of the express provisions of the act upon that subject. And until they had been appointed and had authorized the opening of the street now under consideration, I am satisfied the Mayor and Common Council had no authority, after the first of September, 1835, to proceed by resolution to open the same, and to have Commissioners of Estimate and Assessment appointed pursuant to the directions of the Act of 1833.

The Vice Chancellor was therefore authorized to interfere by injunction to restrain the defendants, under color of authority, from proceeding in an illegal act, which must necessarily cast a cloud upon the complainant's title; and to set aside these unauthorized proceedings which had already taken place. (*Oakley* v. *The Trustees of Williamsburg*, 6 *Paige's Rep.* 262. *Pettit* v. *Shepherd*, 5 *Idem*, 501.) For these reasons, the order appealed from must be affirmed with costs."

IMPORTANT

ASSESSMENT DECISION.

SUPREME COURT,

February 8, 1844.

OPINION OF THE COURT.

Matter of Opening 39th street, in the City of New-York; also, 37th street; also, a New Street between the 4th and 5th avenues; also, the 11th avenue, between 32d and 47th street, and also 128th street.

Bronson, J.—The Statute in relation to the opening and laying out of streets, avenues, squares and public places, in the City of New-York, has been in operation thirty years; (2 *Revised Laws*, 342 408, §177 192;) and the question is now distinctly made, for the first time, whether we have the constitutional right to exercise the powers which the Legislature has attempted to confer upon us. But it is never too late to appeal to the fundamental law; and the question is none the less entitled to a careful examination because it touches our own authority. If, by common consent, and without having our attention called to the subject, we have heretofore taken cognizance of matters which did not rightfully belong to us, that cannot be a good reason for going on in the same way after our authority has been plainly drawn in question.

The constitution declares, (*Art.* V. §7,) that "the Justices of the Supreme Court shall hold no other office or public trust," and the question is, in what character do we act in these street cases. Although the power to appoint Commissioners of Estimate and Assessment, and to review their proceedings, is, by the words of the Statute, conferred upon the "Supreme Court," it has been fully settled that we do not act as a Court, but as Commissioners, to discharge this special trust or office. The question was considered in the *Matter of Beekman street*, (20 *John*, 269,) which was decided within a few years after the law was passed. It was there held, that our powers were derived wholly from the Statute, and were not incident to our judicial duties; that we do not act as a Court, but as Commissioners; and that the general powers and jurisdiction of the Court could not be brought into exercise. The case was likened to that of a Judge sitting as a Commissioner under the insolvent laws. The same doctrine had been laid down before this Statute was passed, under an act of the Legislature conferring similar powers upon the Albany Mayor's Court. *Stafford* v. *Mayor of Albany*, 7 *John*, 541.) It was there held, that the proceedings were not of a judicial nature; that there was no analogy between them and the judicial proceedings of a Court of Record in the progress of a cause; that the Court acted as Commissioners, and when an assessment had been confirmed, the Court was *functus officio*, and had no power to set aside the proceedings. In the *Matter of the Mayor of New-York*, (6 *Cow.* 571,) it was again affirmed that we do not act as a Court in these cases, but as Commissioners appointed by the Legislature; and this doctrine has uniformly prevailed down to the present day. (*Matter of Canal street*, 11 *Wend*, 154; *Matter of Mount Morris Square*, 2 *Hill* 14.) There have been other cases to the same effect, which, as they contained nothing new, have not been reported. The principle has been fully carried out, by refusing to set aside the proceedings in Street cases under any circumstances, on the ground that while sitting as Commissioners we had no power to re-call that which had once been done. When the parties have desired a review in a street case the Supreme Court has issued a *certiorari* to the Justices of that Court as Commissioners; and after having thus got the matter before us as a Court, and affirmed what we had previously done in another character, a writ of error has been brought in the Court of Errors. In these and all other forms in which the question has arisen, it has been uniformly held, that in executing the street law of 1813, we are but Commissioners discharging a special trust. The principle has been settled more than thirty years, and it is now quite too late to call it in question.

The same doctrine has been laid down by the Federal Judiciary. By an Act of Congress passed March 23, 1792, (2 *Bis.* 259,) the Circuit Courts of the U. S., were directed to inquire into and decide upon the claims of certain persons to be placed on the pension list. The note to *Hayburn's case*, (2 *Dall.* 409,) shows that several of those Courts declined to execute the law, on the ground that the duties which had been assigned to them were not of a judicial nature. There was no disqualifications to hold other offices, as there is under our Constitution. The Circuit Court for the District of New-York, composed of Chief Justice Jay and Judges Cushing and Duane, said the Act could only be considered as appointing Commissioners for the purposes mentioned in it, by *official* instead of *personal* description; that the Judges regarded themselves as being the Commissioners designated by the Act, and therefore as being at liberty to accept or decline that office. As the object was a benevolent one, and the Judges wished to manifest their respect for the Legislature, they accepted the trust. The Justices of this Court seem to have acted upon the same principle when they accepted the office of Street Commissioners, under the New-York law. Chief Justice Spencer, in delivering the opinion of the Court in the *Matter of Beekman street*, (20 *John*, 269,) said, "it might be a question how far the Legislature can impose such duties on the Judges." But he entirely overlooked the constitutional inhibition against holding any other office, which was substantially the same then as it is now, (*Const. of* 1777, *Art.* 25.) Since an appeal has been made to the fundamental law, it is no longer the mere question whether we will consent to accept the office, and execute the Statute. The farther inquiry is now presented, whether we have any power to act in the matter. Upon that question I cannot entertain a doubt. The Constitution having declared that the Justices of this Court shall not hold any other office or public trust, we cannot accept this appointment, however willing we may be to carry out the wishes of the Legislature. If we can execute the office of Street Commissioners for the City of New-York, the like powers may be conferred upon us in relation to any other town or county; or the duties of the office of Comptroller, Treasurer, or Sheriff, may be assigned to us; and thus the constitutional disqualification would be rendered a dead letter. For one, I can never give such a construction to the fundamental law as will amount to a practical nullification of its provisions. Indeed there is little room for construction in the case. If, in executing

ment. The motion was argued before Chief Justice NELSON, at the March Special Term, and he refused to interfere, on the ground of lapse of time, notwithstanding the application was made within six months of the confirmation of a report, which was presented and confirmed without notice. The Chief Justice also assumed to exercise what he termed the discretion of the Court, in the case. The discretion of the Court is not the will of the Judge. We have noticed this point on page 196 of this number.

The most powerful monarch in Europe never claimed as much authority over the private property of a subject, as has been exercised by the Supreme Court for years over the private property of the citizens of this City in street assessments.

We discussed some branches of this question, in the Municipal Gazettee of December, 1842.

The Court in this opinion, are so explicit with regard to the prohibitory clause of the Constitution, "that he who runs may read."

We are glad to see the doctrine of strict construction under way, and when once broached in political matters there is no difficulty in applying the principle to the piratical assessments in the City of New-York.

Re-Argument.

Mr. Emmett has served Mr. Mott with a notice of re-argument of his five street motions. His notice is entitled before the Supreme Court. What nonsense under the views here expressed by the Court. We will publish his affidavit on which he founds his notice of motion.

Another Assessment Cruelty.

The Assessment for setting curb and gutter in the 8th Avenue, amounts to $43.922-25. The assessors appointed by the Common Council to make the assessment, are the Street Commissioner, his Assistant and Clerk. The contract was made by the Street Commissioner, and the prices unreasonable.

When the Senate Committee were in session at Clinton Hall, this proceeding was brought before them, as one of the Assessment outragss. Mr. Perrine, a former Clerk in the Street Commissioner's office, was examined as a witness, he stated that: "there are no names of Assessors in any part of it, nor is it signed by any Assessors." The assessment was passed by the Board of Aldermen, Dec. 17th, 1838; by the Board of Assistants, Dec. 24th, 1838, and approved by the Mayor, Dec. 28th, 1838, although not signed by the Assessors. This is the way the public business is done. The Assessors are the same as those of Chapel street, and yet the two assessments are made upon entirely different principles; both cannot be right.

By a decision of the Supreme Court, all the Assessors must be present to make the assessment, but a majority may decide.

This is the assessment, for which the Street Commissioner sold the house and two lots belonging to Mary Stewart and her children, all their property. One of the children is sickly. The husband of Mary Stewart was a shoe-black, and he earned his money by hard labor, with which he purchased this property, and when he died he left it to his family.

The purchaser at the assessment sale of this property, on getting his lease, took possession, and put the furniture of the occupants out of doors, but he was prosecuted for forcible entry and detainer, and at once surrendered the premises, and has since brought an ejectment suit on his lease. A case has been made, and will be argued next month before a full Bench. Some charitable individual has volunteered a Counsel fee to defend the little home of the colored woman and her helpless children.

The owner of the premises had no notice of the assessment, or the sale.

The regulating the third avenue was paid out of the City Treasury, and so ought that of the eighth avenue.

Alderman NASH,

OF THE SEVENTH WARD.

On Monday evening, Alderman NASH tendered his resignation as Chairman of the Committee of Public Offices, Repairs, &c., assigning very satisfactory and substantial reasons therefor.

We have watched the movements of this member of the Common Council, with a great deal of interest; he is a plain spoken man, and when he discovers a wrong, he sets his face at once against it. He deserves the thanks of the public. We were pleased to see that he was sustained by Alderman SCOLES.

Alderman BREEVOORT,

OF THE TWELFTH WARD.

This gentleman, who is a man independent in mind as well as in property, took a bold stand in the Board of Aldermen, some time since, against the Street Commissioner. The Alderman deserves credit for acting independent of that officer, and having a mind and opinion of his own.

NOTE.—Several of the pages of this volume have been destroyed by fire. The present and last preceeding seven pages, are substitutes for those destroyed. Some of the other pages of the volume are being re-published in the same way.

The copies of the petition to the Legislature of 1843, which were on pages 241 to 244, and the re-print also, were destroyed by the torch of the incendiary, in 1843. We have re-printed these on page 254.

SUPREME COURT DECISIONS IN 1841.

At the January term of the Supreme Court the matter of the assessment for constructing a sewer in Twentieth street, on the Hudson river side of the island, was argued upon the return made to the certiorari issued in this cause, by Lewis H. Sandford, Esq., for the Relators, and Peter A. Cowdrey, Esq., for the Mayor and Common Council. The Court held the case under advisement until the October term, near the close of the year, when they *quashed the certiorari.*

At this term of the court Chief Justice Nelson delivered an opinion on denying the motion, made at the December term of 1840, for a certiorari in the matter of re-paving and re-grading Chapel and adjoining streets. This opinion, and the material facts set forth in the affidavits and papers on which the motion was founded, will be found in its order in this number.

At the April special term, Mr. Justice Cowen presiding, motions were made for writs of certiorari in the matter of the proceedings in the assessment for opening Mount Morris square and Second avenue from Twenty-eighth to Eighty-sixth street. L. H. Sandford, Esq., for the Relators, submitted very full points to the Court, which were replied to by Peter A. Cowdrey, for the Mayor, &c. The Court held these two motions under advisement until November, 1841, when he gave a very full opinion, denying the material part of the motions.

At the May term of the Court, held by the full Bench, the cause in which the People ex rel. E. Meriam and others, were relators, and also that in which James Agnew and others were relators, involving the proceedings in the assessments for repaving and regrading Chapel and adjoining streets, and of building a sewer in Chapel and Thomas streets, came on for argument on the respective returns made to the certioraris issued in these causes. Lewis H. Sandford and Wm. M. Holland, Esqs., for the Relators, and Peter A. Cowdrey, Esq., for the Mayor and Common Council. These causes were fully argued. Mr. Justice Bronson took the papers, and at the October term of 1841 delivered a brief opinion of one of the causes. The Court *quashed the certioraris.*

The motions in the matter of Art street, Seventh avenue, Ninth avenue, and Twenty-eighth street assessments for certioraris, are understood to have been disposed of by the Court in the same way as those of Mount Morris and Second avenue.

We shall review the opinions delivered by the Supreme Court in our own plain way, and we shall feel gratified if we succeed in convincing these high judicial officers that they have greatly erred in quashing the certioraris in the particular cases, and denying the writ of certioraris in others.

IN CHANCERY.

Before the Chancellor.

Timothy Wiggin, Banker, of London, in the kingdom of Great Britain, *vs.* the Mayor, &c., of New York.

THE CHANCELLOR.— The language of the bill in this case, leaves it doubtful whether the complainant at this time, is the owner of, or has any interest in any of the lots mentioned in the bill as having been assessed for this improvement; and so far as his personal liability is concerned, this court does not interfere to prevent a mere trespass upon personal rights, on personal estate, where the complainant has a perfect remedy at law. The bill instead of alleging in the usual manner, that the complainant was at a particular date and still is the owner of the lots upon which the assessment for benefit was imposed, merely states as to the first twelve lots, that he was the owner and possessor thereof, on or before the first of September, 1836, and as to the other lots, he states that he was the owner and possessor of them subsequent to the 1st of May, 1839. Neither does the verification of the bill by the complainant's agent show that the agent has any information on the subject; or that he even believes the complainant is now the owner of those lots. As this defect in the bill can probably be cured by an amendment, I shall proceed to examine the objections made to the legality and equity of the assessment, and the question whether the bill in other respects presents a proper case for the interference of this court by a preliminary injunction.

The objection that the delay of the corporation in bringing the proceedings to a close until the spring of 1840, produced injustice, by giving to the tenants of property which was to be taken for the improvement, and who had short leases thereof, compensation for a loss which they do not sustain, does not appear to be one which in any manner concerns the complainant. That appears to be a question entirely between the landlord and tenant of the property taken for the improvement. If the tenant has a beneficial lease, that is, if he has rented the property for a term of years at less than the use of the property was actually worth, he sustains damages in being deprived of the occupancy at this low rent during the remainder of his term. But that damage must necessarily go to diminish the amount which the landlord would have been entitled to receive if the property had not been under a lease; or if the rent reserved upon the lease had been the full value of the use of the lot. The proper way of assessing the damages, where two or more persons have distinct interests or estates in property taken for the improvement, is to ascertain the damage to the whole lot in the same manner as if one person alone had the entire interest therein; and then to apportion that damage among the persons interested in the lot, as landlord and tenant or otherwise, according as the interest of the one or the other will be affected by the taking of the property for the improvement. In such a case, if a tenant had a lease of the property for four or five years at a nominal rent, he would be entitled to damage for taking such interest in the property if it was taken immediately. But in that case the commissioners would not allow any thing to the landlord on account of the loss of rent for the same time. And where, in a case of that kind, the appointment had been made upon an estimate that the proceedings would probably be completed at the expiration of a year, and that the tenant would be dispossessed at that time, if by any unforseen occurrence the completion of the proceedings were procrastinated till the expiration of the lease, the landlord would sustain the whole damage by the taking of the property and the tenant nothing. But the amount of the assessment for benefit upon the property of other persons would not thereby be increased, for the benefit to their property from the making of the improvement would commence as soon as they were compelled to pay the assessment imposed therefor. In the case of *Gillespy vs. The Mayor, &c. of New York*, in the Court for the Correction of Errors, in December, 1839, I had occasion to examine the whole of the statutory provision on the subject of the apportionment of rent and damages as between landlord and tenant, where a part of the property is taken for an improvement during the continuance of the lease. And from that examination, I am satisfied that if the commissioners of estimate and assessment made their assessment in this case upon correct principles in relation to the rights of the lessees and owners of the leasehold property taken for the street, the delay in completing the proceedings could not injure the complainant so as to give him any equitable rights even as against the tenants themselves, whatever equitable claim their landlords may have against them on that account.

I am inclined to think that the commissioners erred in not assessing the property at the corner of William street in the same manner as if the contemplated widening of that street, which was subsequently abandoned, had never been thought of; as that improvement had not been directed when these commissioners were appointed to assess the damages and benefits with reference to the widening of John street merely. But if there was any error in this respect, it was a proper ground for opposing the confirmation of the report before the Supreme Court, and cannot be reviewed in this collateral manner. In the case of Messerole vs. The Mayor, &c. of Brooklyn, (In Chan. April 7, 1840,) referred to in the argument, the commissioners had not erred in judgment as to what property was to be benefitted by the contemplated improvement, and neglected to assess it on that ground; but they had by mistake left out the greatest portion of the lands which were to be taken from the complainants for the contemplated avenue—and the report showed upon its face that the court had no jurisdiction or authority to confirm the assessment—according to the decision of the Supreme Court in the case of Anthony street, (20 Wend 618.) There the court held that if the proceedings had been regular and the commissioners had only erred in judgment in fixing the amount of the damage for the lands taken, or the benefit to the other lands of the complainant, upon erroneous principles, the Court of Chancery could not interfere after the report had been properly confirmed. In this case, if the front of the lots on William street, which were not assessed would actually be benefitted by this improvement, the commissioners erred in judgment in not assessing for the benefit to the front, as well as to the rear of the lots; and the confirmation of the report should have been opposed on that ground. But, as that was not done, the confirmation of the report stopped the owners of other property which was assessed, from alleg-

rangement can be made, they can apply to the Legislature to authorize a proceeding by Jury, as provided for in the Colonial law, in No. 1, page 4.

Real Estate has risen in New-York in consequence of this decision, and is actually increased in value more than FORTY MILLIONS OF DOLLARS thereby.

In order that some correct idea may be formed of the character of the proceedings which the Supreme Court have, by this Decision, put a stop to, we will state a few as a specimen.

First, All the streets from 42d, up to and including 57th street, were proceeded in on the resolution of Alderman Ingraham, without the scrape of a pen on a petition from any land-owner.

Second, All the streets and avenues, up to and including 42d street, not opened prior to 1836, were proceeded in without any petition from any land-owner, and without any resolution of the Common Council directing any application to the Supreme Court for the appointment of Commissioners. This batch embraced twenty-seven streets and avenues. It was the plan of the Common Council to proceed in all these streets by one Commission, instead of which eighty-one Commissioners were improperly applied for and appointed.

Third, Manhattan Square was proceeded in on the resolution of Alderman Benson. No petition from any land-owner for this nonsensical operation.

Fourth, Mount Morris Square, (Snake Hill,) was proceeded in on the resolution of Alderman Ingraham. No petition from any land-owner for this moonshine protuberance.

We could extend this, but it is unnecessary.

Again:

Ninth avenue, from 45th street to the Bloomingdale road, was proceeded in on the petition of eighteen persons, neither of whom owned a foot of the land to be assessed or awarded for.

All these streets and avenues had been surveyed, laid out, and maps made of the whole ground by the Commissioners appointed by the State in 1807.

If the Corporation found it necessary to open one of these streets, &c., the Statutes authorized them to treat with the owners for the land, and which it was their bounden duty to have done, instead of commencing their shameful crusade against private property, in laying on the land HUNDREDS OF THOUSANDS OF DOLLARS OF FEES.

We give the following as a specimen of the whole:

COUNSEL FEES AND COURT CHARGES.

Seventh Avenue,	$3,976.77
Sixth do.	3,589.77
Tenth do.	2,100.00
Second do.	2,033.55
Manhattan Square,	1,449.13
Union Square,	1,889.00
Chapel Street,	3,443.00
Art Street,	1,896.75

SURVEYOR'S FEES, PAINTING MAPS, &c.

Seventh Avenue,	$2,801.00
Sixth do.	2,480.00
Tenth do.	2,440.00
Second do.	1,700.00
Manhattan Square,	3,070.39
Union Square	596.00
Chapel Street,	749.90
Art Street,	975.00

COMMISSIONERS FEES.

Tenth Avenue,	$2,640.00
Seventh do.	4,920.00
Sixth do.	2,928.00
Second do.	2,380.00
Manhattan Square,	1,572.00
Union Square,	1,769.00
Chapel Street,	2,429.00
Art Street,	1,476.00

CLERK HIRE.

Tenth Avenue,	$600.00
Seventh do.	200.00

ROOM HIRE.

Seventh Avenue,	$410.00

These Costs and Expenses were never taxed, nor were any bills of items ever furnished the Corporation, and yet these large amounts were paid out of the Public Treasury, by officers whose duty it was to withhold the money. Such officers deserve the severest censure.

ASSESSMENT CONFISCATION.

Having given a small sample of the Expenses of Street opening *gentry*, we will now state a few cases of Assessments.

The Estate of John Duffie was assessed for opening 38th street, from the 2d to the 3d avenue, $1,289.80; for opening 38th street again, from river to river, $10; and for opening 2d avenue, $117.50. These three assessments, with the interest up to the present time and expenses, exceed $2000. This assessment is on a piece of land ninety-eight feet square, and was valued by Thos. R. Ludlum, City Surveyor, at $450 altogether; see his testimony, Senate Document No. 100, page 151. The assessment and interest already exceed four times the value of the land.

Estate of John Schuyler. This assessment is on a piece of ground on the corner of 28th street and 7th avenue, 58 feet ten inches by 98 feet 10 inches. The assessment for opening 28th street, is $1,037.05 for opening 7th avenue, is $209.98. The assessments exceed twice the value of the land.

Estate of James Amory. This estate is assessed, including interest, more than $10,000, for the pretended opening of 6th and 7th avenues and Manhattan square. The estate furnished the land for the avenues, and should not be assessed at all. None of the improvements are made.

We could go on and enumerate others, among which is the estate of Mathew Dyckman, the estate of Wm. Edgar, and the estate of Mr. Pierson.

Parents who toil hard to accumulate estates for their children, and leave the world with the satisfaction that they have provided abundantly for those they leave behind, to have their children plundered of those estates, in this way, is an outrage upon all law and order, and a violation of every principle of justice.

PAINTED STREETS.

The Select Committee appointed by the Senate of this State, to investigate Assessment Outrages in the City of New-York, say, in their Report, Document No. 100, of 1842, page 16, that:

"On that branch of the complaint as to the imposition of heavy and oppressive assessments for improvements never actually made, the Committee ascertained that a very large portion of the streets and avenues formally opened from 1836 to 1839, were not actually opened; that nothing has been done beyond making awards and assessments by the Commissioners, and the confirmation of their Reports by the Supreme Court; and that although the assessments have been collected for such improvements in many instances, and in others the lands charged are either sold or advertised to be sold for the payment of those assessments, yet the lands forming those streets and avenues remain in the same condition as they were before the taking of any proceedings for their opening; and in some cases such lands remain in the occupancy of their original owners, notwithstanding they have been paid for the same. And in numerous other instances, where the streets and avenues have been actually opened, nothing has been done towards their regulation, so as to make the same useful to the public, or available to the owners of real estate, who have paid for the same by assessments on their property.

"Out of a list of eighty-one streets and avenues, or parts of such highways, the Reports for the opening of which had been confirmed in 1837, 1838 and 1839, fifty-seven have not been in any way regulated or improved; and of the remainder, twenty-four in number, in some instances only portions thereof have been regulated a few blocks; and in others, a road has been worked through the centre of the street or avenue; and in others again, it is not deemed necessary to work such road, as the natural grade of the ground is such as to make it passable without regulation. This attempt to collect

assessments not only by voluntary payment, but by enforced sales of the lands charged, without actually opening the streets and avenues for which such assessments have been imposed, has been a strong cause for the excitement in that city on subjects of street matters. The Committee, therefore, submit this subject to the consideration of the Legislature.

"Several instances were shown to the Committee, where property had been offered for sale for the payment of assessments at two or three successive sales, without being able to get a bid, the amount of the assessments being more than the estimated value of the property. These large assessments operate against the interests of the city, for the owner will not pay the assessment or improve the property, and no person will buy it, and the Corporation cannot realize their money by a sale of the assessed premises, and the amount must be taxed upon the city; and thus the improvement of the upper part of the city, which is covered with these great assessments, must be stayed for many years, and now apparently for an indefinite period of time, unless the land should in some manner be relieved from the charge of those assessments. It did appear reasonable to the Committee that in analogy with a judgment, the lien of which ceases on real estate after the termination of ten years, the lien of those assessments should be at an end after the lapse of some definite period; what that should be, the Committee submit to the discretion of the Legislature."

COLD.

The present winter has, in many places, been very cold. My thermometer, which has a full Northern exposure, with the bulb protected from the wind, has at no time been lower than six degrees above zero.

Captain Parry, in his Arctic Expeditions, found no cold more intense than 55 degrees *below* zero. At this temperature, mercury is malleable. There are but few fluids known to us but what would become solids at a temperature of 300 degrees below zero.

I remember the celebrated cold Friday, it was a cold day indeed, and was followed by an intensely cold night. I was, during that day and night, in an encampment in a dense Northern forest. During the night, the trees kept up a continued cracking and splitting from the effects of the severity of the frost, and to such an extent that at times the noise was like the discharge of a volley of musketry. The ice over a large body of water, some miles distant, during the night cracked from one extremity to the other, with a tremendous explosion, and with a force that shook the ground on which our camp was located.

While the thermometer was at the lowest, the present winter, viz: six degrees *above* zero, I tested the water of one of the public pumps; the thermometer denoted 47 degrees, and the water of my cistern, at the same time, 36 degrees of temperature. The atmosphere of my kitchen was, near the upper ceiling, 48 degrees, and on the floor at the same time, 42 degrees.

The thermometer was invented by Sanctorios, in 1590, and was reduced to a scale by the genius of Farenheit, in 1724. We have in use four descriptions of thermometers, viz: Farenheit's, Centigrade's, Reamur's, and DeLisle's.

The boiling point of Farenheit's, is 212 degrees, Centigrade's 100 degrees, Reamur's 80 degrees and DeLisle's 0.

The freezing point of Farenheit's, is 32 degrees; Centigrade's, 0 degrees; Reamur's, 0 degrees; DeLisle, 150 degrees.

Cold is not always destructive to animal life, however intense it may be. Fish of some descriptions, when taken from the water in the severest weather in winter, and thrown upon the ice, become frozen stiff, but when put back into cold water, where the frost is extracted, they again become as active as before.

Some descriptions of vegetation is wholly destroyed by frost, while other kinds are not in the least affected by the most intense cold.

The most ponderous walls are thrown down by the frost. The smallest joint that will admit water, if seized upon by frost, will yield to the force of the expansion which the freezing of the water produces.

The marble steps of the City Hall, of New-York, are very heavy, and each flight consists of four pieces. There are, therefore, three joints. The middle joint is close, but the joint toward each end, is open about an inch, showing that the water which had penetrated the joints, had been expanded by the frost. The middle joint is made close by the same force that enlarged the others. Here are tons weight of stone moved by the freezing of less than a pint of water.

Cold air passes in veins through the atmosphere. Cold exists throughout the year a few thousand feet above our heads, and of great intensity.

The stratification of the atmosphere by cold, is very clearly illustrated by hail storms in hot weather. The hail passes in veins.

The nearer we approach the Sun in ascending into the atmosphere, the more intense we find the cold, and for aught we know, the planet Mercury, which is near the Sun, may be far colder than Georgium Sidus, which is far distant from it.

Heat and cold, under certain circumstances, and to a limited extent, we can measure, but beyond that, all is blank. The Pyromater, an instrument for measuring intense heat, is a recent invention, and a very important one, and time may unfold others, equally as important.

Cold does not penetrate the Earth to any very great extent where it is covered with snow, and much less than where it is exposed to the air.

When the cold approaches a city in which a pestilential fever rages, the infected atmosphere is at once disinfected; it is in this a physician to the sick.

The weary traveller, in the regions of country bordering on the Equator, when suffering from the heat of a vertical Sun, labors hard with a feather fan or some contrivance like it, to move a little cool air to revive his wilting frame.

Cold, where we have a surplus of it, like every thing else, we cease to value. It is a rich treasure, it is one of Nature's bounties; the sweet cold locks up in the great terrestrial store-house of Nature, the germs of vegetable and animal life.

To cold we are indebted for our chrystal bridges, vast in their extent and unequalled in their construction.

BOARD OF ASSISTANTS.

We should like to see the Board of Assistants made up of such citizens as James Kent, Jonathan Thompson, Stephen Allen, Preserved Fish, Wm. B. Crosby, John M. Bradhurst, George Newbould, Abraham Van Nest, Wm. F. Mott, Jonathan Goodhue, John Haggerty, Edward H. Pendleton, Saul Alley, John I. Palmer, Benjamin L. Swan, W. W. Fox, and Peter Schermerhorn; men full of years and full of experience, and of great purity of character. A Board composed of such men, would be a blessing to the City, and we ask where is the citizen who would not feel proud to take his stranger friend to see such a Board sitting in deliberate Council. A Board composed of these individuals, would possess more dignity, and command as much respect as any other deliberate assembly on the globe. It would be a Council of freemen, dignified by Nature, adorned by human cultivation, and a better safe-guard to liberty and property, than the greatest standing army that was ever assembled together. It is to such men that our country has to look for safety.

The Board of Assistants, composed of such citizens, would in reality be what it purports to be, a BOARD OF ASSISTANTS.

The meetings of such a Board, in the day time, would render useless the thousand dollar chandeliers, and the crimson drapery and tinselled trappings of the Session room, for it would have the adorning of plain, sensible men, which is ornament enough.

No gold pencils need be displayed to take the eye of such men; and if a gift, they would scrutinize the motives of the doner, and the acts of the donee.

The banqueting room would find no advocates in such a Board.

Such a class of men would raise the character of what is called the "Little Board," to an elevation that would make it exceed the Roman Senate in name and fame.

THE SUPREME COURT ACTING AS STREET COMMISSIONERS.

There would be full as much propriety in making the Justices of the Supreme Court,

Canal Commissioners, as Street Commissioners.

We were much surprised in noticing in the postscript of Mr. Justice Bronson's letter to Mr. Mott, which we published on the 21st instant, that the Chief Justice dissented. Chief Justice Nelson was a member of the Convention that made the provision in the Constitution, that the Justices of the Supreme Court should hold no other office. If the Chief Justice goes on the doctrine of expediency; if he will come to New-York and consult such men as Jonathan Thompson, Robert C. Cornell, Walter Bowne, Stephen Allen, John M. Bradhurst, and others of the same standing, he will find that these assessment proceedings are very different from what they are represented to be by Ex-Commissioners of Assessment. Persons who have been the recipients of princely fees in these odious proceedings, have, it is generally believed by citizens of New-York, misrepresented these street assessments to the Chief Justice. The Chief Justice is a man of great purity of character and a most worthy citizen.

The first Street Commissioners appointed in this State, were by an Act of the Legislature, passed April 6th, 1792, for extending ROOSEVELT and FRANKFORT streets. These Commissioners were five in number, and were appointed by the Legislature. There was a peculiar feature in this Act, viz: that the Common Council should first have and obtain the consent of the owners through whose land the street should pass. The assessment to be made by the Commissioners, *after this preliminary*, was to be returned to the Common Council, under their hands and seals, and upon this, was to become a lien upon the land and a debt due the Corporation, for which they were authorized to sue for in any Court of record in this State.

This act is a very different kind of proceeding from the Act of April 9th, 1813. This was the first step taken in the appointment of Commissioners. The necessity of a jury was dispensed with in these two cases, because that the consent of the owners must be obtained before the land could be used, therefore there was no necessity for a jury. The consent of the owners was substituted.

The restraining clause of the Constitution of 1777, was well understood in those times. No attempt was made to turn the Supreme Court out of doors and make the Justices highway-masters.

The Act to which we refer, is to be found in No. 1, of the Municipal Gazette, page 5.

In the case of Elizabeth Pearson, in the Court of Chancery, in which his Honor the Chancellor gave the opinion which is to be found on page 195, there are some facts which ought to accompany that opinion.

About the year 1830 or 1831, the husband of Mrs. Pearson departed this life, leaving a wife and three children. He owned the premises situate on the north-east corner of Pearl and Centre streets, which rented for upwards of one thousand dollars per year. On this property was a mortgage in favor of some wards of the Court of Chancery, the interest of which was paid out of the rent of the premises, and also a mortgage to Mr. Stevenson. The Corporation assessed this property a large sum for extending Centre street, and for filling in and paving Centre street, and for sewers, &c. The assessments for the filling in were never signed by the Assessors as required by law, and the whole proceedings were notoriously shameful.—This property thus assessed was sold for the term of 27 years, by which means Mrs. Pearson and her children are rendered destitute and helpless. It was their whole, their only dependence, when Mr. Pearson left the world he supposed it was an abundant provision for the support of his family and the education of his children. It was so if the Corporation had not disinherited this little helpless family. But this is not all the Corporation have done to distress this oppressed family, as will be seen in the sequel.

Mrs. Pearson applied to the Assistant Vice Chancellor, Hon. Murray Hoffman, for an injunction to restrain the Corporation from executing a lease for the assessment, which he granted, requiring Mrs. Pearson to give security for the costs. A hard working mechanic of very limited means was her security. The Corporation demurred to the jurisdiction of the Court, which the Chancellor sustained, and dismissed the bill with costs.

The Corporation prosecuted the surety of Mrs. Pearson for the costs, and levied an execution upon the property of this hard-working mechanic, and he was obliged to raise out of his hard earnings about seventy dollars.

The widow and the fatherless are helpless. We forbear to comment.

The Chancellor in this opinion uses an expression which certainly must have been almost a slip of the pen in the hurry of business. In speaking of the decision of the Court for the correction of errors in the case of Messerole's children, he says "the Court *repudiated* the idea that the Court of Chancery has any power or right to interfere in such cases."

The decision to which the learned Chancellor refers was by a tolerably close vote.—If we mistake not, it was 13 to 9, and had the case been argued by the Counsel who filed the bill, it would have been the other way we are almost sure. General Bogardus filed this bill and carried it in the Court of Vice Chancellor McCoun, and in the Chancellors Court, but when it reached the Court of Errors he was near the confines of the grave, and unable to argue it. It was, however, argued by an able lawyer who knew nothing of the case until the evening before the argument.

We published the whole history of this case from papers which we obtained from Gen. Bogardus the Solicitor for the children of Mr. Messerole. The printed sheets were destroyed by fire. We will endeavor to obtain from the Executors of Gen. Bogardus the papers again, and will re-publish them. The Chancellors opinion, in that case, is well worth reading and does credit to his head as well as his heart.

Now the reason which the Chancellor assigned for taking jurisdiction and then changing his mind is certainly one which ought to have influenced him in giving costs. If he had erred, and Mrs. Pearson had been misled by this error, he should not have made her pay costs, unless the law was peremptory to compel him to do so, and if such is the law, that learned jurist ought not to have allowed a session of the legislature to pass without calling their attention to a remedy.

There is another matter in the opinion of the Chancellor in another case on the same page, which is that of restraining the Corporation being an "UNNECESSARY INCONVENIENCE TOTHE CORPORATION."

"Let justice be done" without looking to consequences.

The Chief Justice who gave a written opinion in this case in the Court for the correction of errors uses this strong language in reference to the jurisdiction of the Chancellor in these Street cases:

"I know the learned Chancellor has neither the desire or inclination to entertain it unless in obedience to a sense of duty, and the ancient jurisdiction of the Court following where the footprints of his learned and distinguised predecessors lead; and must believe that he has been *subdued and carried beyond the outer boundary of his court, by the hardship and injustice of this particular case.*"

"These *hard cases* make bad precedents in the Courts both of law and equity, and are usually found at the bottom of them."

ROBERT H. MORRIS.

Mayor Morris deserves the thanks of this community for the interest he has taken in the Tax question, and for numerous and well timed vetos.

Our citizens who pay large taxes speak in the highest terms of Mayor Morris. He is a public officer of great firmness of purpose, intelligent and honest. If he is a candidate for re-election he will no doubt be re-elected.

Alderman Breevoort, Alderman Brady, and Alderman Tillou, deserves the thanks of the tax payers for their attention to their interests.

NEW PARTIES.

Whichever party puts up the best men will succeed at the charter election.

BAR ROOM OF CITY HALL.

This appendage to the banqueting room of the Hall has been refitted with new carpets, &c. &c.

We have not heard whether they have procured gold waiters for their wine goblets.—Such a use of the public funds would be more appropriate than one half their appropriations.

DESTRUCTIVE ASSESSMENTS.

—

BEDFORD ROAD

AND

MR. MESSEROLE'S CHILDREN.

We give below the Speech of the venerable General Johnson, Mayor of Brooklyn, to the Common Council of that city.

The newspaper containing this Speech, was first shown us by the Hon. W. T. McCoun, Vice Chancellor, after the case of Messerole's children had been argued before him, and he remarked that he intended sending the paper to the Chancellor.

This Speech deserves to be treasured up, and we have printed an extra number of copies for extensive circulation throughout the United States, and also in England.

We deem it due to this important question to place the farewell address of the venerable Mayor of Brooklyn, who is a most excellent citizen, a man beloved and respected by all who know him, in connection with the Opinion of the worthy Chancellor of this State, in the matter of the ruinous assessment upon the estate of the infant children of Mr. Messerole, who were assessed so heavily for the Bedford Road, as to annihilate their title; and next to these, the Opinion of the Supreme Court, in which they state that the Constitution of the State has provided against the exercise of such summary street powers by that tribunal, which is the power which confirmed the Bedford Road Assessment alluded to by the Mayor and passed upon by the Chancellor.

We wish to call the attention of the reader to the first paragraph of the Opinion of the learned Chancellor, in which he says: "*that an assessment has been made upon the lands of the complainants, which must produce a total sacrifice of the property assessed, unless they can obtain relief in this Court, or by* LEGISLATIVE INTERFERENCE,"—in connection with the *quere* put by his Honor the Mayor of Brooklyn, in his Speech, when he asks: "*will the land assessed along Hamilton avenue and Bedford road, pay half the assessments? If not, are not the owners plundered, and the City also?*

Here is evidence indisputable and unquestionable as to an absolute confiscation of this estate, and we ask by whom? We answer, by a power unknown to the Constitution of the Commonwealth.

It was well said by the learned Chancellor that: "*unless they can obtain relief in this Court, or by Legislative interference,*" that the assessment must produce a total sacrifice, &c.

The Chancellor clearly saw that the Justices of the Supreme Court did not act in a judicial capacity, but merely as Road Commissioners, and therefore that they could not revive their own acts.

Among the powers possessed by the most absolute governments in Europe, there are none that can be compared in despotic character with the summary street powers which have been exercised over private property, in the State of New-York, for years past; and yet we boast of a CONSTITUTION, the purchase of BLOOD and TREASURE!

—

From the Long Island Star of May 7, 1838.

BROOKLYN COMMON COUNCIL.

MONDAY, April 30, 1838.

The MAYOR addressed the Board as follows, and retired, and the President, Alderman S. SMITH, took the Chair.

Gentlemen of the Common Council:

Be pleased to permit me to present a few remarks to this Board, before I leave the Chair.

When we entered upon our duties, the storm of adversity was passing over our country, sweeping away the golden visions of speculative prosperity, and leaving the blasted harvest of adversity on many fair plotted fields. Many tall trees, with gilded leaves and *paper* roots, were laid low. Our fair city has suffered by the storm, her sails were spread to every wanton lover, whom the lust of speculation brought among us. Our former cultivated farms are dotted with buildings, subject in many cases to reversions. This is a faint outline of the prospects caused by the re-action, which, in like cases, will always follow excessive speculation. Many great men, and many wise men, who had enough but wanted *more*, have been ensnared, and have fallen upon the alter of adversity.

When this city was incorporated, our deferred Market Debt was $20,000; two hundred thousand dollars were raised by loan for the erection of a City Hall; the Common Council *knew*, and our citizens *know*, that this sum was sufficient to build a Hall, equal in every respect to the Hall in the city of Albany, and to purchase a site for the building. The loan was made with this object in view. Why was it not done? Why were not the interested *schemes* of speculators, rejected by an unanimous vote, instead of one solitary NO?

The past cannot be re-called. The deed is done; but that *incubus* of folly will be felt after its votaries are no more.

No member of the Common Council, of any city of this State, can lawfully make a beneficial contract with the Board whereof he is a member; nor can *any* member of such Board enter into a contract whereby he is directly or indirectly benefitted.

In Brooklyn, the Common Council direct and the Mayor executes.

Again, Gentlemen: what authority had our Board of Aldermen, who are Trustees of the People, to lend their aid to interested men, to oppress and ruin the widow and the orphan, by opening, paving, or grading unnecessary streets? Improvements are betterments, not divestments. Were not Hamilton avenue, Myrtle avenue, and Bedford road, opened to gratify speculators *very near* the Board? Were not the assessments for opening, laid heavily on distant sections, to pay favorites *near* the Board? Will the land assessed along Hamilton avenue and Bedford road, pay half of the assessments? If not, are not the owners plundered, and the city also?

Motives produce acts which are often done before the design is seen.

The foregoing remarks are not made for individual purposes, but for the purpose of warning those who succeed us, to guard our city from the like errors.

I have now given a faint outline of our city as she was when the Board entered upon its duties, oppressed upon every side, but not disheartened. Our ship was shattered in her rigging, but her hull is sound. Our beautiful and healty city remains. We need no distant waters, we have the best in abundance below. We will be burthened a few years with taxes, still we can pay more and prosper.

We have united to stay unnecessary expenditures, and correct evils. We have preserved civil order, and promoted education. Our efficient Police has protected us from midnight fiends, and Providence from the fiery elements. Our Fire Department is improving.

On taking leave of this Board, be pleased, Gentlemen, to accept of my individual respects for your kindness and assistance during the past year; to the Clerk, Attorney, and Street Commissioner, together with all our *faithful* officers, my respects are also presented. Though we may seperate here! I hope *we* will meet hereafter, in that happy haven of rest, where no political distinctions will be known.

Alderman Underhill then offered the following Preamble and Resolution, which was read and adopted:

Whereas, the term of service in which his Honor JEREMIAH JOHNSON, has been elected to fill the arduous situation of Mayor of this city, is nearly terminated, and whereas, the connection necessarily arising between the individual filling that office and the members of this Board, give the latter ample opportunity of judging of the capability and zeal with which the duties of the Mayoralty has been performed; and whereas, this Board are deeply impressed with the conviction, that his Honor JEREMIAH JOHNSON, has on all occasions, exhibited an energy and industry in his station, no less honorable to himself than beneficial to the public; that the interest of this city, of which he has so long been a resident, have again, as they often have before, been highly promoted by his public spirit and anxious desire to promote the public weal, therefore

Resolved, That this Board do hereby tender to his Honor the MAYOR, their warmest thanks for the indefatigable zeal and untiring industry with which he has filled the duties of his office, and hereby express to him the conviction they strongly feel, that he has added another wreath to the crown he has so long deserved to wear, that of a PUBLIC BENEFACTOR.

THE CHANCELLOR.

"It is pretty evident in this case, that an assessment has been made on the lands of the complainants, which must probably produce a total sacrific of the property assessed, unless they can obtain relief, either in this Court or by Legislative interference. Judging from the facts before me, I cannot see how it was possible for the Commissioners of Estimate and Assessment, to have come to the conclusion that the lands assessed could be benefitted to the amount of about $14,000, by the contemplated improvement; even upon the principles on which they proceeded relative to the Bedford road as a public highway, already laid out and established. As I understand the case, the assessment limits only included of the complainant's lands 107 feet on each side of the Bedford road, as originally laid out by the turnpike Commissioners, and extending in length on that road about 968 feet. This would give to the complainants 76 lots of 25 feet front, and 107 feet deep, upon a street of 66 feet in width. And if the contemplated improvement was made, they would have the same number of lots of 100 feet in depth, upon an 80 feet street. These lots, at the valuation fixed upon them by the second answer of the defendants, at the time of the assessment when lands were the highest, were worth $250; making the sum of $19,000 for the lands assessed. And yet it is supposed these lots will be benefitted by the widening and extending of this street, $139.31; or about three fourth of their then estimated value, and nearly their full value one year thereafter, when the second answer was put in. It is possible, that some further benefits might accrue to these lots, by the extension of Bedford road beyond where it was already opened four rods wide, in addition to the benefit of having it fourteen feet broader in front of the lots assessed. But there is much reason to believe that the guardian ad litem who was appointed to take care of the rights of these infants, and who was himself one of the applicants for the proposed improvement, has, under the influence of mental hallucination, or otherwise, suffered their property to be assessed to about its full value, and probably much more than it is now worth; as a supposed benefit which that property was to receive from the contemplated improvement. If the whole proceedings, however, have been regular, and the Commissioners of Estimate and Assessment have merely erred in judgment, I think this Court has no jurisdiction to correct their error, or to give relief to the complainants. For there is no allegation of fraud or collusion on their part, nor on the part of the guardian ad litem, who was appointed in the mode prescribed by law to protect the rights of the complainants on that assessment, and to appeal from the decision of the Commissioners, if he believed they had done injustice to these infants.

The first objection to the regularity of the assessment is, that the Commissioners of Estimate and Assessment, have assumed that the turnpike road was not only regularly laid out, but that it was already the property of the public, so that the complainants were entitled to no compensation therefor. In this I think the Commissioners were clearly under a mistake. For the purpose of this decision, I shall take it for granted that the turnpike was properly laid out, and that the damages of the complainants for that part of their farm which was taken for the use of the Corporation were legally and constitutionally assessed, pursuant to the provisions of the general turnpike act of 1807. Still that act did not vest the title of the land in the turnpike company, even for the purposes of the road during the existence of the charter, until the actual payment of the damages which had been so assessed. The language of the Statute is, that the turnpike corporation, upon paying to the owners of the land the sum assessed and awarded by the appraisers in their inquisition, shall and may have and hold the lands to them and their successors and assigns, &c. (1 *R. L. of* 1813, §3, *p.* 231.) It is true, the statute does, by an implication, authorize the turnpike company to enter upon the land for the purpose of making their road thereon, if there is no person living on the land who is authorized to receive the damages, unless such damages shall be lawfully demanded. The title to the land, however, is still in the original owner; and the moment he demands the payment of the damages from the proper officers of the company, and the same are not paid, he may bring an action to recover the possession of the land. It is perfectly clear, therefore, that the complainants before they could be divested of their title to so much of their farm as was included in the old Bedford road, were entitled to the payment of at least the amount which was awarded to them by the appraisers, in 1828. And the opinion of Chief Justice Nelson, appears to be that they were entitled also to the benefit of the contingent right to the revision in the land, in case of the dissolution of the Corporation, or of the abandonment of the road. (*See Hooker* v. *The Utica and Minden Turnpike Company*, 12 *Wendell's Rep.* 371.) Whether the turnpike company was in existence at the time the Commissioners of Estimate and Assessment made their Report in the present case, does not distinctly appear from the pleadings; but the legal presumption is that it was, as I have not found any statute dissolving that Corporation, or authorizing it to abandon the road. It is clear, however, that if that Corporation should be legally dissolved without having paid the amount awarded to the complainants for damages, the legal title to that part of the Bedford road which is in question here, would belong absolutely to the complainants; and that such title could not be divested, for the purposes of this public street, without paying them the full value of the land, either in money or in the benefits which would thereby accrue to them by the increased value of their adjoining lands. It does not distinctly appear in this case whether the petition to the Common Council for the improvement, and the resolution of the City Corporation adopting the same, actually contemplated the taking of the lands included within the limits of the turnpike, as well as the two narrow strips on each side of the same, for the use of the Corporation as a public street. If the former was the case, then the confirmation of the report was irregular, and may still be opened; as the Commissioners have not in form appraised the damages to which the complainants, as the owners of the original site of the Bedford road through their farm, are entitled. And as I understand the recent decision of the Supreme Court *In the matter of Anthony street*, (20 *Wend. Rep.* 618,) there cannot be an absolute confirmation of the Report of Commissioners of Estimate and Assessment, so as to give any vested rights under the same, until the damages for all of the lands taken for the proposed improvement have been ascertained and settled, and are properly assessed upon the owners of those lands which will be benefitted by the improvement. If this is the correct construction of the Statute, and the resolution of the Mayor and Common Council actually contemplates the taking of the whole of the old Bedford road for the purposes of this improvement, they ought not to be permitted to proceed and enforce this assessment against the complainants personally, by virtue of the distress warrant, or by a sale of their lands which have been assessed, until the proper steps have been taken to divest their title to the whole of the lands which are to be taken for the improvement, by an assessment of the damages and an offset of the same against the supposed benefit of their adjacent lands.

I think, however, there is a more conclusive objection to the proceedings of the defendants, in this case; and that is, that the Mayor and Common Council had no legal authority to lay out and open this new street through the lands of the complainants, in one of the new wards of the city, subsequent to August, 1835; until the same had been authorized by the Commissioners appointed under the Act of the 23d of April, in that year, authorizing the appointment of Commissioners to lay out streets, avenues, and squares, in the City of Brooklyn. That Act, which took effect on the first of September after its passage, gives to the Commissioners, to be appointed by the Governor on the application of the Mayor and Common Council, the exclusive power to lay out streets, avenues and public squares, within that part of the city comprising the sixth, seventh, eighth and ninth wards, and to direct the closing of any streets, roads, highways, lanes, avenues or alleys which had not been theretofore approved of by the Mayor and Common Council. (*Laws of* 1835, *p.* 136, § 4.) The previous act of the same day amending the charter of the city of Brooklyn, which went into effect immediately, must be so construed as not to conflict with the provisions of the Act appointing these Commissioners to make a permanent

plan of this part of the city. It must therefore be construed to apply to that part of the city lying within the first five wards, and which was originally comprised within the bounds of the village Corporation; or at least, to such streets as they should think proper to lay out according to a settled plan, in the four other wards, previons to the time when the act for the appointment of Commissioners should take effect. Certainly it could not have been the intention of the Legislature that two classes of officers should have the power to lay out streets and avenues in that part of the city during the same period, and that each should proceed according to a settled plan of their own. Neither could the Mayor and Common Council continue their jurisdiction over the subject, (if their power extended to these four wards previous to the first of September,) by their neglect to apply to the Governor for the appointment of Commissioners, until after this street was laid out; if such was in fact the case. The duty for which the Commissioners were to be appointed, was in its nature exclusive, independent of the express provisions of the act upon that subject. And until they had been appointed and had authorized the opening of the street now under consideration, I am satisfied the Mayor and Common Council had no authority, after the first of September, 1835, to proceed by resolution to open the same, and to have Commissioners of Estimate and Assessment appointed pursuant to the directions of the Act of 1833.

The Vice Chancellor was therefore authorized to interfere by injunction to restrain the defendants, under color of authority, from proceeding in an illegal act, which must necessarily cast a cloud upon the complainant's title; and to set aside these unauthorized proceedings which had already taken place. (*Oakley* v. *The Trustees of Williamsburg*, 6 *Paige's Rep.* 262. *Pettit* v. *Shepherd*, 5 *Idem*, 501.) For these reasons, the order appealed from must be affirmed with costs."

IMPORTANT

ASSESSMENT DECISION.

SUPREME COURT,

FEBRUARY 8, 1844.

OPINION OF THE COURT.

Matter of Opening 39th street, in the City of New-York; also, 37th street; also, a New Street between the 4th and 5th avenues; also, the 11th avenue, between 32d and 47th street, and also 128th street.

BRONSON, J.—The Statute in relation to the opening and laying out of streets, avenues, squares and public places, in the City of New-York, has been in operation thirty years; (2 *Revised Laws*, 342 408, §177 192;) and the question is now distinctly made, for the first time, whether we have the constitutional right to exercise the powers which the Legislature has attempted to confer upon us. But it is never too late to appeal to the fundamental law; and the question is none the less entitled to a careful examination because it touches our own authority. If, by common consent, and without having our attention called to the subject, we have heretofore taken cognizance of matters which did not rightfully belong to us, that cannot be a good reason for going on in the same way after our authority has been plainly drawn in question.

The constitution declares, (*Art.* V. §7,) that "the Justices of the Supreme Court shall hold no other office or public trust," and the question is, in what character do we act in these street cases. Although the power to appoint Commissioners of Estimate and Assessment, and to review their proceedings, is, by the words of the Statute, conferred upon the "Supreme Court," it has been fully settled that we do not act as a Court, but as Commissioners, to discharge this special trust or office. The question was considered in the *Matter of Beekman street*, (20 *John*, 269,) which was decided within a few years after the law was passed. It was there held, that our powers were derived wholly from the Statute, and were not incident to our judicial duties; that we do not act as a Court, but as Commissioners; and that the general powers and jurisdiction of the Court could not be brought into exercise. The case was likened to that of a Judge sitting as a Commissioner under the insolvent laws. The same doctrine had been laid down before this Statute was passed, under an act of the Legislature conferring similar powers upon the Albany Mayor's Court. *Stafford* v. *Mayor of Albany*, 7 *John*, 541.) It was there held, that the proceedings were not of a judicial nature; that there was no analogy between them and the judicial proceedings of a Court of Record in the progress of a cause; that the Court acted as Commissioners, and when an assessment had been confirmed, the Court was *functus officio*, and had no power to set aside the proceedings. In the *Matter of the Mayor of New-York*, (6 *Cow.* 571,) it was again affirmed that we do not act as a Court in these cases, but as Commissioners appointed by the Legislature; and this doctrine has uniformly prevailed down to the present day. (*Matter of Canal street*, 11 *Wend*, 154; *Matter of Mount Morris Square*, 2 *Hill* 14.) There have been other cases to the same effect, which, as they contained nothing new, have not been reported. The principle has been fully carried out, by refusing to set aside the proceedings in Street cases under any circumstances, on the ground that while sitting as Commissioners we had no power to re-call that which had once been done. When the parties have desired a review in a street case the Supreme Court has issued a *certiorari* to the Justices of that Court as Commissioners; and after having thus got the matter before us as a Court, and affirmed what we had previously done in another character, a writ of error has been brought in the Court of Errors. In these and all other forms in which the question has arisen, it has been uniformly held, that in executing the street law of 1813, we are but Commissioners discharging a special trust. The principle has been settled more than thirty years, and it is now quite too late to call it in question.

The same doctrine has been laid down by the Federal Judiciary. By an Act of Congress passed March 23, 1792, (2 *Bis.* 259,) the Circuit Courts of the U. S., were directed to inquire into and decide upon the claims of certain persons to be placed on the pension list. The note to *Hayburn's case*, (2 *Dall.* 409,) shows that several of those Courts declined to execute the law, on the ground that the duties which had been assigned to them were not of a judicial nature. There was no disqualifications to hold other offices, as there is under our Constitution. The Circuit Court for the District of New-York, composed of Chief Justice Jay and Judges Cushing and Duane, said the Act could only be considered as appointing Commissioners for the purposes mentioned in it, by *official* instead of *personal* description; that the Judges regarded themselves as being the Commissioners designated by the Act, and therefore as being at liberty to accept or decline that office. As the object was a benevolent one, and the Judges wished to manifest their respect for the Legislature, they accepted the trust. The Justices of this Court seem to have acted upon the same principle when they accepted the office of Street Commissioners, under the New-York law. Chief Justice Spencer, in delivering the opinion of the Court in the *Matter of Beekman street*, (20 *John.* 269,) said, "it might be a question how far the Legislature can impose such duties on the Judges." But he entirely overlooked the constitutional inhibition against holding any other office, which was substantially the same then as it is now, (*Const. of* 1777, *Art.* 25.) Since an appeal has been made to the fundamental law, it is no longer the mere question whether we will consent to accept the office, and execute the Statute. The farther inquiry is now presented, whether we have any power to act in the matter. Upon that question I cannot entertain a doubt. The Constitution having declared that the Justices of this Court shall not hold any other office or public trust, we cannot accept this appointment, however willing we may be to carry out the wishes of the Legislature. If we can execute the office of Street Commissioners for the City of New-York, the like powers may be conferred upon us in relation to any other town or county; or the duties of the office of Comptroller, Treasurer, or Sheriff, may be assigned to us; and thus the constitutional disqualification would be rendered a dead letter. For one, I can never give such a construction to the fundamental law as will amount to a practical nullification of its provisions. Indeed there is little room for construction in the case. If, in executing

this Statute, we act as *Commissioners appointed by the Legislature*, and that point has already been settled, it is then almost too plain for discussion, that we are exercising another office or public trust than that of Justices of the Supreme Court.

If our decision can have the effect of opening the floodgates of controversy in relation to what has already been done under this Statute, I should feel great regret in not being able to arrive at a different conclusion. But I see little reason for doubt that what has already been done will stand, although we have been exercising an office which did not belong to us. It is a well settled and most salutary principle of the common law, that the acts of an officer *de facto*, so far as they concern the public or third persons, are valid, although he may not be an officer *de jure*. We held that principle plainly applicable to a case of this kind in *The People v. White*, (24 *Wend.* 520, 525;) and although the Chancellor expressed a different opinion when that case was before the Court of Errors, (*p.* 539,) I still think we were right. It is enough, however, for us to say, that the point has been settled. No rights already vested under this Statute, will be disturbed by the present decision. And as to the future, it may be presumed that the Legislature will provide some other mode of opening streets, when their attention shall be called to the subject. This law was undoubtedly passed, as it has been thus far executed, without adverting to the constitutional difficulty which lay in the way of our accepting the trust.

It follows from what has been said, that we can make no order, either one way or the other, on the motions for the confirmation of these reports.

NELSON, C. J., dissented.

(COPY.)

N. HILL, Jr.,
State Reporter.

Opinion of the Court.

This Opinion came to hand on Monday, and we lose no time in placing it before the People.

The views we expressed in the preceeding pages, were written and printed before the Opinion of the Court came to hand.

We adhere to these views notwithstanding the *dicta* of the Court as to the validity of what has been done in violation of the Constitution.

It matters not which horn of the dilemma is taken by the Court in these cases, the result is the same.

If the Justices acted as a Court, then their refusal to review these proceedings is without the shadow of an apology.

The Assessment abuses were notorious and without excuse, and there was no justifiable ground which could be urged to sustain the Court in refusing redress.

In 1840 an application was made by Mr. Fellows, in reference to the Report of the Commissioners, in the John street assessment. The motion was argued before Chief Justice NELSON, at the March Special Term, and he refused to interfere, on the ground of lapse of time, notwithstanding the application was made within six months of the confirmation of a report, which was presented and confirmed without notice. The Chief Justice also assumed to exercise what he termed the discretion of the Court, in the case. The discretion of the Court is not the will of the Judge. We have noticed this point on page 196 of this number.

The most powerful monarch in Europe never claimed as much authority over the private property of a subject, as has been exercised by the Supreme Court for years over the private property of the citizens of this City in street assessments.

We discussed some branches of this question, in the Municipal Gazettee of December, 1842.

The Court in this opinion, are so explicit with regard to the prohibitory clause of the Constitution, "that he who runs may read."

We are glad to see the doctrine of strict construction under way, and when once broached in political matters there is no difficulty in applying the principle to the piratical assessments in the City of New-York.

Re-Argument.

Mr. Emmett has served Mr. Mott with a notice of re-argument of his five street motions. His notice is entitled before the Supreme Court. What nonsense under the views here expressed by the Court. We will publish his affidavit on which he founds his notice of motion.

Another Assessment Cruelty.

The Assessment for setting curb and gutter in the 8th Avenue, amounts to $43.922-25. The assessors appointed by the Common Council to make the assessment, are the Street Commissioner, his Assistant and Clerk. The contract was made by the Street Commissioner, and the prices unreasonable.

When the Senate Committee were in session at Clinton Hall, this proceeding was brought before them, as one of the Assessment outragss. Mr. Perrine, a former Clerk in the Street Commissioner's office, was examined as a witness, he stated that: "there are no names of Assessors in any part of it, nor is it signed by any Assessors." The assessment was passed by the Board of Aldermen, Dec. 17th, 1838; by the Board of Assistants, Dec. 24th, 1838, and approved by the Mayor, Dec. 28th, 1838, although not signed by the Assessors. This is the way the public business is done. The Assessors are the same as those of Chapel street, and yet the two assessments are made upon entirely different principles; both cannot be right.

By a decision of the Supreme Court, all the Assessors must be present to make the assessment, but a majority may decide.

This is the assessment, for which the Street Commissioner sold the house and two lots belonging to Mary Stewart and her children, all their property. One of the children is sickly. The husband of Mary Stewart was a shoe-black, and he earned his money by hard labor, with which he purchased this property, and when he died he left it to his family.

The purchaser at the assessment sale of this property, on getting his lease, took possession, and put the furniture of the occupants out of doors, but he was prosecuted for forcible entry and detainer, and at once surrendered the premises, and has since brought an ejectment suit on his lease. A case has been made, and will be argued next month before a full Bench. Some charitable individual has volunteered a Counsel fee to defend the little home of the colored woman and her helpless children.

The owner of the premises had no notice of the assessment, or the sale.

The regulating the third avenue was paid out of the City Treasury, and so ought that of the eighth avenue.

Alderman NASH,

OF THE SEVENTH WARD.

On Monday evening, Alderman NASH tendered his resignation as Chairman of the Committee of Public Offices, Repairs, &c., assigning very satisfactory and substantial reasons therefor.

We have watched the movements of this member of the Common Council, with a great deal of interest; he is a plain spoken man, and when he discovers a wrong, he sets his face at once against it. He deserves the thanks of the public. We were pleased to see that he was sustained by Alderman SCOLES.

Alderman BREEVOORT,

OF THE TWELFTH WARD.

This gentleman, who is a man independent in mind as well as in property, took a bold stand in the Board of Aldermen, some time since, against the Street Commissioner. The Alderman deserves credit for acting independent of that officer, and having a mind and opinion of his own.

NOTE.—Several of the pages of this volume have been destroyed by fire. The present and last preceeding seven pages, are substitutes for those destroyed. Some of the other pages of the volume are being re-published in the same way.

The copies of the petition to the Legislature of 1843, which were on pages 241 to 244, and the re-print also, were destroyed by the torch of the incendiary, in 1843. We have re-printed these on page 254.

SUPREME COURT DECISIONS IN 1841.

At the January term of the Supreme Court the matter of the assessment for constructing a sewer in Twentieth street, on the Hudson river side of the island, was argued upon the return made to the certiorari issued in this cause, by Lewis H. Sandford, Esq., for the Relators, and Peter A. Cowdrey, Esq., for the Mayor and Common Council. The Court held the case under advisement until the October term, near the close of the year, when they *quashed the certiorari.*

At this term of the court Chief Justice Nelson delivered an opinion on denying the motion, made at the December term of 1840, for a certiorari in the matter of re-paving and re-grading Chapel and adjoining streets. This opinion, and the material facts set forth in the affidavits and papers on which the motion was founded, will be found in its order in this number.

At the April special term, Mr. Justice Cowen presiding, motions were made for writs of certiorari in the matter of the proceedings in the assessment for opening Mount Morris square and Second avenue from Twenty-eighth to Eighty-sixth street. L. H. Sandford, Esq., for the Relators, submitted very full points to the Court, which were replied to by Peter A. Cowdrey, for the Mayor, &c. The Court held these two motions under advisement until November, 1841, when he gave a very full opinion, denying the material part of the motions.

At the May term of the Court, held by the full Bench, the cause in which the People ex rel. E. Meriam and others, were relators, and also that in which James Agnew and others were relators, involving the proceedings in the assessments for repaving and regrading Chapel and adjoining streets, and of building a sewer in Chapel and Thomas streets, came on for argument on the respective returns made to the certioraris issued in these causes. Lewis H. Sandford and Wm. M. Holland, Esqs., for the Relators, and Peter A. Cowdrey, Esq., for the Mayor and Common Council. These causes were fully argued. Mr. Justice Bronson took the papers, and at the October term of 1841 delivered a brief opinion of one of the causes. The Court *quashed the certioraris.*

The motions in the matter of Art street, Seventh avenue, Ninth avenue, and Twenty-eighth street assessments for certioraris, are understood to have been disposed of by the Court in the same way as those of Mount Morris and Second avenue.

We shall review the opinions delivered by the Supreme Court in our own plain way, and we shall feel gratified if we succeed in convincing these high judicial officers that they have greatly erred in quashing the certioraris in the particular cases, and denying the writ of certioraris in others.

IN CHANCERY.

Before the Chancellor.

Timothy Wiggin, Banker, of London, in the kingdom of Great Britain, *vs.* the Mayor, &c., of New York.

THE CHANCELLOR.— The language of the bill in this case, leaves it doubtful whether the complainant at this time, is the owner of, or has any interest in any of the lots mentioned in the bill as having been assessed for this improvement; and so far as his personal liability is concerned, this court does not interfere to prevent a mere trespass upon personal rights, on personal estate, where the complainant has a perfect remedy at law. The bill instead of alleging in the usual manner, that the complainant was at a particular date and still is the owner of the lots upon which the assessment for benefit was imposed, merely states as to the first twelve lots, that he was the owner and possessor thereof, on or before the first of September, 1836, and as to the other lots, he states that he was the owner and possessor of them subsequent to the 1st of May, 1839. Neither does the verification of the bill by the complainant's agent show that the agent has any information on the subject; or that he even believes the complainant is now the owner of those lots. As this defect in the bill can probably be cured by an amendment, I shall proceed to examine the objections made to the legality and equity of the assessment, and the question whether the bill in other respects presents a proper case for the interference of this court by a preliminary injunction.

The objection that the delay of the corporation in bringing the proceedings to a close until the spring of 1840, produced injustice, by giving to the tenants of property which was to be taken for the improvement, and who had short leases thereof, compensation for a loss which they do not sustain, does not appear to be one which in any manner concerns the complainant. That appears to be a question entirely between the landlord and tenant of the property taken for the improvement. If the tenant has a beneficial lease, that is, if he has rented the property for a term of years at less than the use of the property was actually worth, he sustains damages in being deprived of the occupancy at this low rent during the remainder of his term. But that damage must necessarily go to diminish the amount which the landlord would have been entitled to receive if the property had not been under a lease; or if the rent reserved upon the lease had been the full value of the use of the lot. The proper way of assessing the damages, where two or more persons have distinct interests or estates in property taken for the improvement, is to ascertain the damage to the whole lot in the same manner as if one person alone had the entire interest therein; and then to apportion that damage among the persons interested in the lot, as landlord and tenant or otherwise, according as the interest of the one or the other will be affected by the taking of the property for the improvement. In such a case, if a tenant had a lease of the property for four or five years at a nominal rent, he would be entitled to damage for taking such interest in the property if it was taken immediately. But in that case the commissioners would not allow any thing to the landlord on account of the loss of rent for the same time. And where, in a case of that kind, the appointment had been made upon an estimate that the proceedings would probably be completed at the expiration of a year, and that the tenant would be dispossessed at that time, if by any unforseen occurrence the completion of the proceedings were procrastinated till the expiration of the lease, the landlord would sustain the whole damage by the taking of the property and the tenant nothing. But the amount of the assessment for benefit upon the property of other persons would not thereby be increased, for the benefit to their property from the making of the improvement would commence as soon as they were compelled to pay the assessment imposed therefor. In the case of *Gillespy vs. The Mayor, &c. of New York*, in the Court for the Correction of Errors, in December, 1839, I had occasion to examine the whole of the statutory provision on the subject of the apportionment of rent and damages as between landlord and tenant, where a part of the property is taken for an improvement during the continuance of the lease. And from that examination, I am satisfied that if the commissioners of estimate and assessment made their assessment in this case upon correct principles in relation to the rights of the lessees and owners of the leasehold property taken for the street, the delay in completing the proceedings could not injure the complainant so as to give him any equitable rights even as against the tenants themselves, whatever equitable claim their landlords may have against them on that account.

I am inclined to think that the commissioners erred in not assessing the property at the corner of William street in the same manner as if the contemplated widening of that street, which was subsequently abandoned, had never been thought of; as that improvement had not been directed when these commissioners were appointed to assess the damages and benefits with reference to the widening of John street merely. But if there was any error in this respect, it was a proper ground for opposing the confirmation of the report before the Supreme Court, and cannot be reviewed in this collateral manner. In the case of Messerole vs. The Mayor, &c. of Brooklyn, (In Chan. April 7, 1840,) referred to in the argument, the commissioners had not erred in judgment as to what property was to be benefitted by the contemplated improvement, and neglected to assess it on that ground; but they had by mistake left out the greatest portion of the lands which were to be taken from the complainants for the contemplated avenue—and the report showed upon its face that the court had no jurisdiction or authority to confirm the assessment—according to the decision of the Supreme Court in the case of Anthony street, (20 Wend 618.) There the court held that if the proceedings had been regular and the commissioners had only erred in judgment in fixing the amount of the damage for the lands taken, or the benefit to the other lands of the complainant, upon erroneous principles, the Court of Chancery could not interfere after the report had been properly confirmed. In this case, if the front of the lots on William street, which were not assessed would actually be benefitted by this improvement, the commissioners erred in judgment in not assessing for the benefit to the front, as well as to the rear of the lots; and the confirmation of the report should have been opposed on that ground. But, as that was not done, the confirmation of the report stopped the owners of other property which was assessed, from alleg-

street after it has been once established by them, in conformity to the map and survey and gradation first established, or of any of the old streets after they have been made to conform to such general plan.—The defendants have no legal power therefore to alter the grade of this southerly section of First street, or of the adjacent streets which have been thus regulated and graded.

The inhabitants of this village, however, are not without remedy if the interest of the public requires a correction of any mistake which the trustees may have made either in laying out streets, or in fixing the gradations thereof. For it is perfectly competent for the legislative power which directed a general plan of the village to be adopted and adhered to by the trustees, to authorize them to make such alterations in the plan as may be found necessary either in regard to this particular street, or as to the streets of the village generally. And if the legislature shall think proper to authorize such alterations, it will be for the same power to prescribe the proper mode of ascertaining who are injured by such alterations, and of compensating them for such injury.

There is no ground for the objection in this case, that the complainants have waived their rights by delay, or by any acquiescence in the proceedings of the trustees. They protested against the alteration of the grade of the street the first opportunity they had for that purpose: and they followed it up with an application to this court for redress when they found that the defendants were determined to proceed notwithstanding such protest.

The order of the Vice Chancellor must therefore be reversed, with costs, and an injunction must be granted to restrain the defendants from proceeding with the proposed alteration of the former gradation of the street as originally established by the trustees. (See 6 Paige, 262)

DECISION IN THE MATTER OF WIDENING JOHN STREET.

IN CHANCERY.

BEFORE THE CHANCELLOR.

Timothy Wiggin
vs.
The Mayor, &c., of the city of New York.

This was an application for an injunction to restrain the collection of an assessment for the widening, straightening, and improving John street, in the city of New York, between Broadway and Pearl street. From the bill it appeared that the ordinance of the Common Council authorizing and directing this improvement, was passed in February, 1836; that shortly afterwards the Supreme Court appointed commissioners of estimate and assessment, who made their report in 1838, and the same was presented to that court for confirmation, but was afterwards sent back to the commissioners for revisal and correction; that the amended report was confirmed by the court in September, 1839, and that the order for the making of the improvement was carried into effect in May, 1840. The complainant charged in his bill upon information derived from E. Meriam, that the ayes and noes were not called upon the adoption of the resolution of the Common Council, authorizing the making of the improvement; nor were the votes of the Aldermen and Assistants, and the report of the committee on streets, upon which the ordinance was founded, published in any of the newspapers employed by the corporation. Various objections were stated in the bill as to the equity and justice of the assessment upon property which was supposed by the commissioners to be benefited by the improvement, which objections are noticed in the opinion of the court. The complainant also stated in his bill that the improvement was not within the part of the city as to which a permanent map and plan were required to be made by the commissioners under the act of April, 1807, and he therefore insisted that the Common Council, as organized under the act of 1830, amending the charter of the city, had no jurisdiction or authority to widen or alter John street.

W. Hunt and L. H. Sandford, for the complainant.

Peter A. Cowdrey, for the defendants.

THE CHANCELLOR.—The language of the bill in this case, leaves it doubtful whether the complainant, at this time, is the owner of, or has any interest in any of the lots mentioned in the bill as having been assessed for this improvement; and so far as his personal liability is concerned, this court does not interfere to prevent a mere trespass upon personal rights, on personal estate, where the complainant has a perfect remedy at law.—The bill, instead of alleging in the usual manner, that the complainant was at a particular date, and still is the owner of the lots upon which the assessment for benefit was imposed, merely states as to the first twelve lots, that he was the owner and possessor thereof, on or before the first of September, 1836, and as to the other lots, he states that he was the owner and possessor of them subsequent to the first of May, 1839. Neither does the verification of the bill by the complainant's agent show that the agent has any information on the subject; or that he even believes the complainant is now the owner of those lots. As this defect in the bill can probably be cured by an amendment, I shall proceed to examine the objections made to the legality and equity of the assessment, and the question whether the bill in other respects presents a proper case for the interference of this court by a preliminary injunction.

The objection that the delay of the corporation in bringing the proceedings to a close until the spring of 1840, produced injustice, by giving to the tenants of property which was to be taken for the improvement, and who had short leases thereof, compensation for a loss which they did not sustain, does not appear to be one which in any manner concerns this complainant. That appears to be a question entirely between the landlord and tenant of the property taken for the improvement. If the tenant has a beneficial lease, that is, if he has rented the property for a term of years at less than the use of the property was actually worth, he sustains damages in being deprived of the occupancy at this low rent during the remainder of his term. But that damage must necessarily go to diminish the amount which the landlord would have been entitled to receive if the property had not been under a lease; or if the rent reserved upon the lease had been the full value of the rise of the lot. The proper way of assessing the damages, where two or more persons have distinct interests or estates in property taken for the improvement, is to ascertain the damage to the whole lot in the same manner as if one person alone had the entire interest therein; and then to apportion that damage among the persons interested in the lot, as landlord and tenant, or otherwise, according as the interest of the one or the other will be affected hy the taking of the property for the improvement. In such a case, if a tenant had a lease of the property for four or five years at a nominal rent, he would be entitled to damage for taking such interest in the property if it was taken immediately. But in that case the commissioners would not allow any thing to the landlord on account of the loss of rent for the same time. And where, in a case of that kind, the appointment had been made upon an estimate that the proceedings would probably be completed at the expiration of a year, and that the tenant would be dispossessed at that time, if by any unforeseen occurrence the completion of the proceedings were procrastinated till the expiration of the lease, the landlord would sustain the whole damage by the taking of the property and the tenant nothing. But the amount of the assessment for benefit upon the property of other persons would not thereby be increased, for the benefit to their property from the making of the improvement would commence as soon as they were compelled to pay the assessment imposed therefor. In the case of *Gillespy vs. the Mayor, &c., of New York*, in the Court for the Correction of Errors, in December, 1839, I had occasion to examine the whole of the statutory provision on the subject of the apportionment of rent and damages as between landlord and tenant, where a part of the property is taken for an improvement during the continuance of the lease. And from that examination, I am satisfied that if the commissioners of estimate and assessment, made their assessment in this case upon correct principles in relation to to the rights of the lessees and owners of the leasehold property taken for the street, the delay in completing the proceedings could not injure this complainant so as to give him any equitable rights even as against the tenants themselves, whatever equitable claim their landlords may have against them on that account.

I am inclined to think the commissioners erred in not assessing the property at the corner of William street in the same manner as if the contemplated widening of that street, which was subsequently abandoned, had never been thought of; as that improvement had not been directed when these commissioners were appointed to assess the damages and benefits with reference to the widensng of John street merely. But if there was any error in this respect, it was a proper ground for opposing the confirmation of the report before the Supreme Court, and cannot be reviewed in this collateral manner. In the case of Meserole vs. the Mayor, &c., of Brooklyn, (in Chan. April 7, 1840,) referred to on the argument, the commissioners had not erred in judgment as to what property was to be benefited by the contemplated improvement, and neglected to assess it on that ground; but they had by mistake left out the greatest portion of the lands which were to be taken from the complainants for the contemplated avenue—and the report showed upon its face that the court had no jurisdiction or authority to confirm the assessment—according to the decision of the Supreme Court in the case of Anthony street, (20 Wend., 618.) There the court held that if the proceedings had been regular, and the commissioners had only erred in judgment in fixing the amount of the damage for the lands taken, or the benefit to other lands of the complainant, upon erroneous principles, the Court of Chancery could not interfere after the report had been properly confirmed. In this case, if the front of the lots on William street, which were not assessed, would actually be benefited by this improvement, the commissioners erred in judgment in not assessing for the benefit to the front, as well as to the rear of the lots; and the confirmation of the report should have been opposed on that ground. But, as that was not done, the confirmation of the report stopped the owners of other property which was assessed, from alledging that the fronts on William street would be benefited by the improvement.

The same answer is applicable to the objection that $100 was included in the assessments for surveying and grading the triangle opposite to Cliff street under the resolution of May, 1837.

As the bill alledges that the cost of the proceeding have not yet been taxed, it cannot now be known whether the amount of the assessment will be more or less than the amount allowed for damages, and the costs and expenses of making the improvement. The mode of conducting these

proceedings, as prescribed by law, is such, that the assessments must be made and confirmed before the whole expense and costs of the proceedings can be ascertained, the commissioners, after having ascertained the damages for property taken, must necessarily proceed upon mere estimates of some of the costs, &c., which will probably be incurred thereafter in completing the proceedings. A mistake of a few dollars, therefore, one way or the other in estimating the amount of the expenses cannot vitiate the whole assessment, and take from the Supreme Court the power to confirm a report founded upon a reasonable estimate of the prospective costs. The act of April, 1839, only requires the costs and charges of commissioners, and attorney and counsel, &c., to be taxed before they are paid, and not that they should be taxed before the assessment is made and confirmed, as that could not be done. It is no objection, therefore, to the collection of the assessment, that those costs had not been taxed when this bill was filed.

The objection that the corporation, as at present organized, has not the right to lay out new streets, or to alter old ones, in that part of the city which was not embraced in the permanent plan of improvements adopted by the commissioners appointod under the act of the 3d April, 1807, is one which, if well taken, would render the whole proceeding under the ordinance for the widening of John street, absolutely void. The power to open new streets, or to alter old ones, in this part of the city, is claimed by the corporation under the second clause of the 177th section of the act of the 9th of April, 1813, to reduce the several laws relating particularly to the city of New York into one act, (2 R. S. of 1813, p. 409.) By that clause the power was expressly given to the corporation, whever, or as often as it should, in the opinion of the Mayor, Aldermen, and Commonalty, *in Common Council convened*, be necessary or desirable for the public convenience or health to lay out, form and open new streets, &c., in that part of the city, or to extend, enlarge, straighten, alter. or otherwise improve, streets, &c., already laid out, or thereafter to be laid out.

It is not pretended that previous to the act of April, 1830, to amend the charter of the city of New York, the corporation, when convened in Common Council, under the charter and the laws then in force, would not have been authorized to pass an ordinance for the making of this improvement; but this act for the amendment of the city charter directs that neither the Mayor nor the Recorder shall be a member of the Common Council after the second Tuesday of May, 1831. It also vests the legislative power of the corporation in a board of aldermen and a board of assistants, who together shall thereafter form the Common Council of the city; which boards are to meet in separate chambers, &c. And the complainant's counsel therefore insist that the Mayor, Aldermen, and Commonalty can no longer convene in Common Council, to direct the laying out a new street or the altering of an old one, as they were previously authorized to do under the act of 1813.

The conclusive answer to this objection is, that the act of 1813, gives the power to the corporation of the city, when convened in Common Council, according to the provisions of its charter, and not to the partioular officers who, at that time, represented the corporation in Common Council. And the act of 1830 having excluded the Mayor and Rocorder from the Common Council, and directed the Aldermen and Assistants to convene as a Common Council in two separate boards, the Mayor, Aldermen, and Commonalty of the city, that is the corporation under its corporate name, is convened in Common Council for all legislative purposes when the two boards convene in different chambers, and pass a resolution or ordinance, subject to the qualified veto of the Mayor. The power to pass an ordinance authorizing the opening of a new street, or the alteration of a new one, under the 177th section of the act of 1813, was strictly a legislative power given to the corporation represented in its Common Council duly convened under its charter; as much as the passage of a statute by the State Legislature, for the opening of a State road, or the alteration or enlargement of a canal, and appointing commissioners to appraise damages, &c., would be the exercise of a legislative power by the people of the State represented in their Senate and Assembly. And this legislative power, which still belongs to the Mayor, Aldermen, and Commonalty of the city of New York, under the act of 1813, which is in full force, was properly exercised by the corporation, convened in Common Council in the manner prescribed by the act of 1830.

Again: if the complainant was right in supposing that the Common Council, as at present organized, had no authority to pass an ordinance for the widening of John street, he is neither entitled to a preliminary injunction nor to any relief whatever in this court, as his defence is perfect at law.—And if the whole proceedings in relation to the opening of the street were absolutely void in law, and that fact appears upon the face of the ordinance itself, a sale for the assessment upon the complainant's lot *would not even create a cloud upon his title.* For as every person must be presumed to know the law, a proceeding which is upon its face void, does not constitute a CLOUD upon the title to real estate against which a court of equity will relieve.

This is also a sufficient answer to the objection that the ordinance was void, because it appears from the record that it was passed without calling for the ayes and noes upon the question of its adoption by the respective boards; if that neglect was, in point of law, sufficient to invalidate such an ordinance. It is not necessary, therefore, that I should expresse my opinion at this time upon the question. Whether the 7th section of the act of April, 1830, requiring the ayes and noes to be taken, and published in certain cases, applies to this case; or whether the last clause of that section applies merely to improvements which are to be paid for out of the funds of the corporation generally, or by a tax or assessment upon the citizens at large, and not to cases where the owners of property, benefited by the proposed improvement, are to bear the whole expense thereof.

As that question was not argued before me, I have not examined it. But if the provision is applicable to a case of this kind, I think it is merely directory, as to the publication of the report, and of the ayes and noes upon the question of the adoption of the ordinance for the proposed improvement. The neglect to make such publication did not, therefore, of itself, render the proceeding void, if the ordinance was not void upon the face of the records of its adoption.

There is another substantial reason why this court should not interfere in this case by injunction to prevent the corporation from collecting the assessment, but should leave the complainant to his remedy, if he has any at law. The proceedings for the making of the improvement were commenced nearly five years since, and the complainant had waited until the improvement had actually been completed several months before he or his agent attempted to interfere. This property has received the full benefit that it would receive from the improvement; which benefit the commissioners have estimated at several thousand dollars. And as property of other persons to a very large amount has been destroyed for that purpose, justice requires that it should be paid for by those who have been benefited by the improve-rather than by a general tax upon the city at large. A court of equity, therefore, at this late day will not interfere with its strong arm to cast the burthen of the improvement from those who have been benefited thereby, and upon those who have not.

It is true, the complainant alledges in his bill that his property is not benefited by the improvement. But that-allegation is not sworn to by any one, and it is, of course, contradicted by the report, under oath, of the three very respectable and intelligent commissioners by whom the assessment was made.

The application for an injunction is, therefore, denied with costs.

[From the Saratoga Sentinel—Extra of July 20, 1841.]

IN CHANCERY.
BEFORE THE CHANCELLOR.

Samuel Vandervoort
vs.
The Trustees of the village of Astoria.

J. B. SCOLES, for Complainant. G. WINTER, for Defendants.

In this case the Chancellor decid. d that injunctions to stay public improvements should not be granted *ex-parte* by Injunction Masters, out of court, where there is no immediate danger of irreparable damages being done before the defendants can have an opportunity of being heard. That the Master, in all such cases, instead of granting the injunction in the first instance, should direct an order, to show cause before the court why an injunction should not be granted.

Injunction dissolved with costs to the defendants, without reference to the denial of any matters of the bill by the answer.

IN CHANCERY.
BEFORE THE ASSISTANT VICE CHANCELLOR.

Street Assessments.

Peter G. Stuyvesant and others,
vs.
The Mayor, Aldermen, and Commonalty of the city of New York.

Opinion of Murray Hoffman, Esq., Injunction Master.

The bill is brought before me as Injunction Master. I have been obliged by my sense of duty to grant an injunction in this and several cases on the eve of the sale advertised to take place on the 27th inst. I am sensible of the inconvenience to the city from an interference at this time, and do it with unfeigned reluctance.

But I am thoroughly satisfied that a more palpable and pernicious disobedience of law has never marked the course of any corporate body, than characterizes the proceedings complained of. I have a deep-rooted conviction that ultimately the decision must be against the corporation; and I believe that jurisdiction exists in this court to compel the corporation to try the question fairly in a single action at law between them and a complaining party. I think it is within the province of this court to prevent an innocent purchaser being deluded into litigation and probable loss, and to confine the controversy to the alleged wrong-doer and the injured party. This strikes me as the plain, just, and common-sense view of the matter. There are in this bill a number of complainants, the several owners of various parcels of property. They may all be bound by the result of one action. Thus, with perfect justice to the corporation, these questions may be tried in

the most simple and satisfactory manner, and a contest with a third party averted.

There has been no opinion as yet expressed by the Chancellor upon the point of jurisdiction, and I am at liberty to act upon the assumption and my own conviction that it exists.

I may, in a case of such moment, briefly advert to the reasons which led me on a former occasion to consider the neglect of the corporation to call the ayes and noes, and make the publication prescribed by the charter of 1830 a fatal omission.

[The assistant Vice Chancellor states some facts of his opinion in the case of Codwise vs. the Corporation, which it was intended should appear in this paper, but are crowded out for want of room.]

But in the present bill a new point is taken of much consequence. The proceedings for opening Art street commenced in April 1837. The report was completed, and the advertisement announcing that it would be presented to the Court for confirmation began on the 18th day of May, 1839. The report was filed on the 5th of June, 1839, and confirmed in the ensuing August. It is stated in the bill that, from the examination of the affidavits of publication, and the advertisement, it appears that the publication was made in but three papers, and does not appear that any notice was affixed in a public place contiguous to the premises. It is charged as a fact that the advertisement was only in three papers, and that no such notice was put up.

By the ninth section of the act of 20th April, 1839, it is provided that all motions (except as before provided) made under the act thereby amended, shall be, upon giving previous notice of the trial, place, and object thereof, published for at least fourteen days in four of the public newspapers, and by copies of such notice in handbills, to be posted up for the same space of time in three conspicuous places adjacent to the property to be affected. (See section 2 for this last clause.) It admits of no doubt that a motion for the confirmation of the report of commissioners falls within the ninth section.

The act repeals the amended act as far as it is inconsistent with the provisions of the new act; and it is directed to take effect on its passage, (the 20th of April, 1839,) but it expressly provided that no part of it except the *ninth* and *twelfth* sections shall affect any proceedings under the act thereby amended, which had been commenced previously to its going into effect.

It is an irresistible inference that the ninth and twelfth sections *do affect* prior proceedings, if those sections, when applied to such proceedings, are constitutional.

Of that I cannot entertain the slightest doubt. Both the Chancellor and Supreme Court have held that the Revised Statutes are applicable to all existing cases, so far as they affect merely the forms and modes of proceedings. (*The People vs. Livingston*, 6 Wendell, 526.) Every future proceeding in the assertion of a right or prosecution of a suit is to be governed by the new statutes. In this case, if the advertisement had been begun before the 20th of April, 1839, that would have been a proceeding already commenced, and would not have been affected by the ninth section. But as it was a proceeding commenced after that date, it necessarily falls within it.

In *Aymar vs. Gault* (2 Paige, 284) the doctrine was applied to the case of an absent party. The reference under the Revised Statutes was ordered, to take proof of the claim, although the suit was commenced before they went into operation.

In *Larkin* vs. *Mann* (2 Paige, 27) the rule was applied to the partition suits previously commenced. See also *Parsons* vs. *Browne* (7 Paige, 359).

This being the law, then it is clear that the present complainants are not bound by the proceedings at all; that they are now at liberty to take every objection of fact or law which they could have taken before the Supreme Court, as well as those which they could not then have taken.

I speak on the supposition that they did not actually attend and contest the confirmation. Without saying whether this would cure the defect or not, it is plain an argument may be raised upon it. But no principle of our law is more sacred than this, that no man shall be affected in person or property without the opportunity of being heard in the proper tribunal. From necessity, perhaps, personal notice has been dispensed with in many cases; these street proceedings among the number. The party who is assessed for benefit merely (no part of his property being taken), is never summoned before the Commissioners. He has no notice of the proceedings except by that publication for 14 days which the old act prescribed, or by the publication under the new act. His property and himself are bound upon the assumption that he has seen that notice. The law therefore must be observed to a scruple. No judge has a right to say that from great publicity, or from the actual taking of one paper containing the notice, or from any thing short of the absolute fulfilment of the requisitions of the statute, the party is to be bound.

What absurdity is it to imagine that the clear command of the Legislature that notice must be given in four papers, and by posting up copies in three adjacent places, is to be fulfilled by any other mode of notice!

I pass over another most important question in this bill viz: the carrying Art-street through a part of the city included in the map of 1807. It is needless to discuss it, in the view I have already taken.

I have, however, had my doubts since the decision of the Chancellor in Vandevoort vs. The Village of Astoria whether in these cases I ought, as injunction master, to do more than grant an order to show cause. Certainly the case here is very different; the Trustees of Astoria being in the act of making the *improvement* complained of. Here it is to prevent a recovery in this mode of the sum assessed for the improvement. I have concluded, however, that it is most proper for me to grant on order to show cause, with a temporary injunction.

I doubt whether I have a right to impose *terms* upon granting an injunction. Otherwise I should direct that the injunction be on the condition of the complainants filing a written consent with the bill, or endorsed upon it, submitting to abide the decision of an action to be had in a court of law by the Corporation against one of the parties, the form and other particulars attending the bringing such action, to be settled by this Court.

Martha Amory and others,
vs.
The Mayor, Aldermen, &c.

This case is, in its leading particulars, similar to that of Stuyvesant vs. The Corporation, before noticed. It is distinctly charged as to the proceedings in relation to the 6th avenue, that when the first publication of the notice of motion to confirm the report was made the act of 20th of April, 1839, was in force the rule of confirmation being made on the 6th of June, 1839. Here also the question under the 12th section is of great importance as the costs of the opening exceeds $10,000. Some questions may arise under this section; but this at least is clear: No part of the costs can be levied upon the party or his property, nor can a sale be made to pay them until the taxation has been made. How far if this were the only neglect, it would affect the whole assessment, I need not now enquire. I am clear that it justifies an interference with the present sale, which is to raise the whole amount, including the costs, provided this court has any jurisdiction at all; a point before examined.

John Haggerty and others,
vs.
The Mayor, Aldermen, &c.

The complainants in the bill, who are numerous, seek an injunction against selling their property assessed for the improvement of John street, and advertised for sale on the 27th inst.

I refer to my opinion in the case of Stuyvesant, vs. The Corporation, for the reasons upon which I have allowed a temporary injunction. It is however peculiarly incumbent upon me in this instance, to see that the case before me is substantially different from that of Wiggins, vs. The Corporation heretofore decided by the Chancellor, and in which an injunction was refused.

In the *first* place, the delay referred to by the Chancellor in the last clause of his opinion is fully accounted for in this bill; and as the Corporation never sued at law, and never advertised until the present notice of sale, there never was an opportunity for the complainants to resist the demand or to apply to this court. I have before held that until an advertisement was begun there was no jurisdiction.

Next, in the case of *Wiggins* no proceedings to sell the property had been taken.

Again, in that case the statements on the bill did not exclude the supposition that on the record of the proceedings it may have appeared that the ayes and noes were called. That difficulty is fully met in the present case.

Again, the bill was there defective upon the point of the complainant being the actual owner of the property assessed when he filed the bill.—The present bill is in this particular unobjectionable.

And lastly, a new and very important point is here introduced. The report was brought before the Supreme Court in ————, 1838. It was sent back for correction, and the motion for final confirmation made and the rule entered in September, 1839. At that time the 12th section of the act of 20th April, 1839, was in force. The costs were never taxed under that 12th section. The amount is added to the sum assessed, and each of the complainants' property is liable for and was to pay a proportion of such costs. The sale is to raise that proportion as well as the assessments for benefit. Now the section, as I have shown in my opinion in Stuyvesant vs. The Corporation affects proceedings subsequently taken. It is wholly illegal to charge the costs upon any party until they were taxed. Notice of the taxation is directed to be given in a public manner, and certainly without such notice and taxation the parties assessed cannot be bound to pay them.

It has been decided, from reasons of convenience and in the absence of any peremptory provision of the statute, that costs may be included in the assessment, and imposed prospectively by the Commissioners; and that an inconsiderable variation in the amount taxed from the amount imposed, will not affect the validity of the proceedings, nor prevent the confirmation of the report (Wiggin vs. The Mayor, &c, in Chancery, March 6, 1841.)

But if the section prescribing a taxation applies to this John street case at all, it is apparent that no party can be called upon to pay any portion of the costs until a due taxation has been had.—Without such taxation there can be no obligations to pay, and no lien on the party's property. What will be the consequence of this, and whether it may not be corrected by a taxation now and proportionate abatement, I need not inquire. The property is advertised to be sold for a debt, some of which at least is illegally imposed upon it.

By adverting to my opinion in the case of Westervelt & Codwise vs, the Corporation, it will be seen that it is settled law that the costs of the proceedings cannot be assessed upon the property without an express statute; that in a case in Albany, an assessment was set aside for want of such statutory provision; and that in the instance of opening streets in New York, the old act admitted the addition of the costs. Now I think the case will appear very clear if we suppose that it had been part of the old act that the cost must be taxed upon notice before they could be added to the assessment for benefit. Certainly they could not be recovered until taxed. I may add that, as the Supreme Court is empowered to make rules for carrying the act into effect, all inconveniences may readily be avoided.

M. HOFFMAN, Assistant Vice Chancellor.

VOL. I.] NEW-YORK, FEBRUARY 28, 1844. [No. 12

THE ASSESSMENT COSTS.

DECISION.

The motions made at the December Special Term of the Supreme Court, were by Mr. Emmet, one of the Ex-Counsel of the Corporation of the City of New-York, for the confirmation of the Reports of the Commissioners of Estimate and Assessment, for opening 37th street, 39th street, 128th street, 11th avenue, and Madison avenue.

Thirty-seventh and thirty-ninth street Assessments were commenced near eight years ago, viz: in June, 1836. The Common Council have never at any time, passed any resolution for to authorize an application to the Supreme Court for the appointment of Commissioners for opening these two streets. Yet notwithstanding this, an application was made to the Supreme Court, on a petition signed by the Mayor and Clerk of the Common Council, and Commissioners were appointed on the 24th June, 1836. The Report of the Street Committee of the Board of Assistants, stating the reasons why these streets were not to be opened by Commissioners, in detail, and the affidavit of the Chairman of the Committee, stating the reason why no resolution was introduced to authorize the application to the Supreme Court, are to be found in this volume, pages 141 and 142.

Andrew Warner, one of the Commissioners of Estimate and Assessment, in the 37th street proceeding, was examined as a witness in 1841, before the Select Committee of the Senate, appointed to investigate Assessment abuses in the City of New-York, and stated that he was sworn into office on the 24th of October, 1836, as one of the Commissioners for 37th street; that the Commissioners had completed their Report twelve or eighteen months previous to that time, and that it had not been presented to the Court for confirmation; has not heard Mr. Emmet state why he has not presented the report for confirmation. The witness also stated that the Commissioners were not all in the habit of attending the meetings, but were allowed compensation, the same as if they did attend.

The Report was finished, it appears, in 1840, and lay dormant after that time near four years before it was presented for confirmation.

Notice was given for taxing the fees of the Commissioners, Counsel and Surveyors, in these cases, before William Paxson Hallett, Esq., Clerk of the Supreme Court, who had himself acted as Commissioner in several streets, where the charges had been exorbitant. The Costs, &c., were taxed at more than TEN THOUSAND DOLLARS, to be assessed upon the land.

Objections were made to the taxation of the costs by Mr. Hallett, by the Counsel for the sufferers before the Court, on the ground that Mr. Emmet divided the fees with some of the Clerks of the Supreme Court, in Assessment matters, and read from Senate document No. 86, of 1843, a Report of a Clerk of the Supreme Court, to that effect.

In thirty-ninth street, Anson G. Phelps, Esq., was assessed on a piece of ground for the opening of this street; the same piece of ground had already been assessed for the pretended opening of fortieth street, $575, and also for the pretended opening of the 1st avenue, from 28th to 42d street, the further sum of $312, besides appropriating one third of the land for the avenue. This made $887, exclusive of the 39th street assessment; the interest of these two first assessments, exceed the value of the land assessed. Had the streets and avenues been opened by one sett of competent Commissioners, as was all that was authorized by the Common Council, the assessment on this piece of ground, would not have amounted to more than a few shillings, instead of exceeding more than FOUR TIMES THE VALUE OF THE LAND.

The Counsel for the sufferers, RICHARD MOTT, ESQ., on the motion for confirmation, objected to the competency of the Court to act in these matters, under that provision of the Constitution which prohibits a Judge from holding any other office or trust, and insisted, that in appointing these Commissioners of Estimate and Assessments, and confirming their Reports, the Judges did not act as a Court, but acted as Commissioners. This the Courts have all held, as did also the Hon. Select Committee of the Senate, who examined into the assessment outrages. Chief Justice SPENCER and Chief Justice SAVAGE, have both held that the power exercised by the Court in Street matters, was in the capacity of a Commissioner and not as a Court.

Mr. Mott read from the Constitution of 1777, and also of 1823; section 25 of the former, and Sec. 7 of Article 5 of the latter, on the prohibiting Judges of the Supreme Court from holding any other office or trust.

He also read the respective letters of the Judges of the Circuit Court of the U. S., for the districts of North Carolina, Maryland, and Pennsylvania, addressed to the President of the United States, in 1792, in which they refused to serve under an Act of Congress imposing duties upon them in reference to invalid pensioners, on the ground of constitutional disability. He also read a letter from the Judges of the Circuit Court of the U. States, for the district of New York, in which they consented to act as COMMISSIONERS, but not as a Court. In these cases the Judges admitted that the duties required by the Act of Congress were of a meritorious character, and they therefore regretted their inability to act, considering the duty inconsistent with their oaths of office and the Constitution of the United States. These letters are to be found in the Municipal Gazette, No. 16, of Nov 17th, 1843, page 286, in connection with the other objections urged by the Counsel in these cases.

Mr. Mott also urged the provisions of the Constitution of 1777 and 1823, in connection with the Colonial law of 1691, which are set forth and discussed, on page 199, of the Municipal Gazette.

The provisions of the Constitution refered to, are Section 41, of the Constitution of 1777, and Sec. 7, of Article 4, of the Constitution of 1823; also, Section 2, of Article 7.

This great Constitutional Question, was most ably argued by Mr. Mott, and he has gained for himself a well earned fame, in the success which has attended his efforts.

Mr. Mott also placed before the Court, such public documents as conclusively show that these assessment proceedings are notoriously of a scandalous character, and did not commend themselves to the favorable consideration of the Court.

The Counsel moving for a confirmation, indulged in the use of very abusive language against citizens who had publicly opposed these assessment abuses, but was made to take his seat, and was deservedly rebuked by the Court.

This decision will relieve citizens from the payment of arbitrary and disgraceful assessments, for sham improvements, and will also release all lands sold for such assessments. Those who have paid assessments more than six years ago, are barred by the Statutes, as the Corporation will not hesitate to plead Statute limitation.

The streets on the agricultural part of the island, will not be harmed by this decision.

Those who have sold land bordering on a street or avenue, as laid out in 1807, have, by the Act, dedicated the land in the street or avenue, to public use, whether they owned on both or only on one side of the street, as the conveyance sweeps all the land they owned in the street or avenue opposite the ground conveyed.

Those who own both sides of the street or avenue, have nothing to do but to put up fences, and the street is made without the use of Surveyor, Counsel, or Commissioner, and in those cases where the above will not apply, the several owners may negotiate or the Corporation can do so, and if no ar-

rangement can be made, they can apply to the Legislature to authorize a proceeding by Jury, as provided for in the Colonial law, in No. 1, page 4.

Real Estate has risen in New-York in consequence of this decision, and is actually increased in value more than FORTY MILLIONS OF DOLLARS thereby.

In order that some correct idea may be formed of the character of the proceedings which the Supreme Court have, by this Decision, put a stop to, we will state a few as a specimen.

First, All the streets from 42d, up to and including 57th street, were proceeded in on the resolution of Alderman Ingraham, without the scrape of a pen on a petition from any land-owner.

Second, All the streets and avenues, up to and including 42d street, not opened prior to 1836, were proceeded in without any petition from any land-owner, and without any resolution of the Common Council directing any application to the Supreme Court for the appointment of Commissioners. This batch embraced twenty-seven streets and avenues. It was the plan of the Common Council to proceed in all these streets by one Commission, instead of which eighty-one Commissioners were improperly applied for and appointed.

Third, Manhattan Square was proceeded in on the resolution of Alderman Benson. No petition from any land-owner for this nonsensical operation.

Fourth, Mount Morris Square, (Snake Hill,) was proceeded in on the resolution of Alderman Ingraham. No petition from any land-owner for this moonshine protuberance.

We could extend this, but it is unnecessary.

Again:

Ninth avenue, from 45th street to the Bloomingdale road, was proceeded in on the petition of eighteen persons, neither of whom owned a foot of the land to be assessed or awarded for.

All these streets and avenues had been surveyed, laid out, and maps made of the whole ground by the Commissioners appointed by the State in 1807.

If the Corporation found it necessary to open one of these streets, &c., the Statutes authorized them to treat with the owners for the land, and which it was their bounden duty to have done, instead of commencing their shameful crusade against private property, in laying on the land HUNDREDS OF THOUSANDS OF DOLLARS OF FEES.

We give the following as a specimen of the whole:

COUNSEL FEES AND COURT CHARGES.

Seventh Avenue,	$3,976.77
Sixth do.	3,589.77
Tenth do.	2,100.00
Second do.	2,033.55
Manhattan Square,	1,449.13
Union Square,	1,889.00
Chapel Street,	3,443.00
Art Street,	1,896.75

SURVEYOR'S FEES, PAINTING MAPS, &c.

Seventh Avenue,	$2,801.00
Sixth do.	2,480.00
Tenth do.	2,440.00
Second do.	1,700.00
Manhattan Square,	3,070.39
Union Square	596.00
Chapel Street,	749.90
Art Street,	975.00

COMMISSIONERS FEES.

Tenth Avenue,	$2,640.00
Seventh do.	4,920.00
Sixth do.	2,928.00
Second do.	2,380.00
Manhattan Square,	1,572.00
Union Square,	1,769.00
Chapel Street,	2,429.00
Art Street,	1,476.00

CLERK HIRE.

Tenth Avenue,	$600.00
Seventh do.	200.00

ROOM HIRE.

Seventh Avenue,	$410.00

These Costs and Expenses were never taxed, nor were any bills of items ever furnished the Corporation, and yet these large amounts were paid out of the Public Treasury, by officers whose duty it was to withhold the money. Such officers deserve the severest censure.

ASSESSMENT CONFISCATION.

Having given a small sample of the Expenses of Street opening *gentry*, we will now state a few cases of Assessments.

The Estate of John Duffie was assessed for opening 38th street, from the 2d to the 3d avenue, $1,289.80; for opening 38th street again, from river to river, $10; and for opening 2d avenue, $117.50. These three assessments, with the interest up to the present time and expenses, exceed $2000. This assessment is on a piece of land ninety-eight feet square, and was valued by Thos. R. Ludlum, City Surveyor, at $450 altogether; see his testimony, Senate Document No. 100, page 151. The assessment and interest already exceed four times the value of the land.

Estate of John Schuyler. This assessment is on a piece of ground on the corner of 28th street and 7th avenue, 58 feet ten inches by 98 feet 10 inches. The assessment for opening 28th street, is $1,037.05 for opening 7th avenue, is $209.98. The assessments exceed twice the value of the land.

Estate of James Amory. This estate is assessed, including interest, more than $10,000, for the pretended opening of 6th and 7th avenues and Manhattan square. The estate furnished the land for the avenues, and should not be assessed at all. None of the improvements are made.

We could go on and enumerate others, among which is the estate of Mathew Dyckman, the estate of Wm. Edgar, and the estate of Mr. Pierson.

Parents who toil hard to accumulate estates for their children, and leave the world with the satisfaction that they have provided abundantly for those they leave behind, to have their children plundered of those estates, in this way, is an outrage upon all law and order, and a violation of every principle of justice.

PAINTED STREETS.

The Select Committee appointed by the Senate of this State, to investigate Assessment Outrages in the City of New-York, say, in their Report, Document No. 100, of 1842, page 16, that:

"On that branch of the complaint as to the imposition of heavy and oppressive assessments for improvements never actually made, the Committee ascertained that a very large portion of the streets and avenues formally opened from 1836 to 1839, were *not* actually opened; that nothing has been done beyond making awards and assessments by the Commissioners, and the confirmation of their Reports by the Supreme Court; and that although the assessments have been collected for such improvements in many instances, and in others the lands charged are either sold or advertised to be sold for the payment of those assessments, yet the lands forming those streets and avenues remain in the same condition as they were before the taking of any proceedings for their opening; and in some cases such lands remain in the occupancy of their original owners, notwithstanding they have been paid for the same. And in numerous other instances, where the streets and avenues have been actually opened, nothing has been done towards their regulation, so as to make the same useful to the public, or available to the owners of real estate, who have paid for the same by assessments on their property.

"Out of a list of eighty-one streets and avenues, or parts of such highways, the Reports for the opening of which had been confirmed in 1837, 1838 and 1839, fifty-seven have not been in any way regulated or improved; and of the remainder, twenty-four in number, in some instances only portions thereof have been regulated a few blocks; and in others, a road has been worked through the centre of the street or avenue; and in others again, it is not deemed necessary to work such road, as the natural grade of the ground is such as to make it passable without regulation. This attempt to collect

assessments not only by voluntary payment, but by enforced sales of the lands charged, without actually opening the streets and avenues for which such assessments have been imposed, has been a strong cause for the excitement in that city on subjects of street matters. The Committee, therefore, submit this subject to the consideration of the Legislature.

"Several instances were shown to the Committee, where property had been offered for sale for the payment of assessments at two or three successive sales, without being able to get a bid, the amount of the assessments being more than the estimated value of the property. These large assessments operate against the interests of the city, for the owner will not pay the assessment or improve the property, and no person will buy it, and the Corporation cannot realize their money by a sale of the assessed premises, and the amount must be taxed upon the city; and thus the improvement of the upper part of the city, which is covered with these great assessments, must be stayed for many years, and now apparently for an indefinite period of time, unless the land should in some manner be relieved from the charge of those assessments. It did appear reasonable to the Committee that in analogy with a judgment, the lien of which ceases on real estate after the termination of ten years, the lien of those assessments should be at an end after the lapse of some definite period; what that should be, the Committee submit to the discretion of the Legislature."

COLD.

The present winter has, in many places, been very cold. My thermometer, which has a full Northern exposure, with the bulb protected from the wind, has at no time been lower than six degrees above zero.

Captain Parry, in his Arctic Expeditions, found no cold more intense than 55 degrees *below* zero. At this temperature, mercury is malleable. There are but few fluids known to us but what would become solids at a temperature of 300 degrees below zero.

I remember the celebrated cold Friday, it was a cold day indeed, and was followed by an intensely cold night. I was, during that day and night, in an encampment in a dense Northern forest. During the night, the trees kept up a continued cracking and splitting from the effects of the severity of the frost, and to such an extent that at times the noise was like the discharge of a volley of musketry. The ice over a large body of water, some miles distant, during the night cracked from one extremity to the other, with a tremendous explosion, and with a force that shook the ground on which our camp was located.

While the thermometer was at the lowest, the present winter, viz: six degrees *above* zero, I tested the water of one of the public pumps; the thermometer denoted 47 degrees, and the water of my cistern, at the same time, 36 degrees of temperature. The atmosphere of my kitchen was, near the upper ceiling, 48 degrees, and on the floor at the same time, 42 degrees.

The thermometer was invented by Sanctorios, in 1590, and was reduced to a scale by the genius of Farenheit, in 1724. We have in use four descriptions of thermometers, viz: Farenheit's, Centigrade's, Reamur's, and DeLisle's.

The boiling point of Farenheit's, is 212 degrees, Centigrade's 100 degrees, Reamur's 80 degrees and DeLisle's 0.

The freezing point of Farenheit's, is 32 degrees; Centigrade's, 0 degrees; Reamur's, 0 degrees; DeLisle, 150 degrees.

Cold is not always destructive to animal life, however intense it may be. Fish of some descriptions, when taken from the water in the severest weather in winter, and thrown upon the ice, become frozen stiff, but when put back into cold water, where the frost is extracted, they again become as active as before.

Some descriptions of vegetation is wholly destroyed by frost, while other kinds are not in the least affected by the most intense cold.

The most ponderous walls are thrown down by the frost. The smallest joint that will admit water, if seized upon by frost, will yield to the force of the expansion which the freezing of the water produces.

The marble steps of the City Hall, of New-York, are very heavy, and each flight consists of four pieces. There are, therefore, three joints. The middle joint is close, but the joint toward each end, is open about an inch, showing that the water which had penetrated the joints, had been expanded by the frost. The middle joint is made close by the same force that enlarged the others. Here are tons weight of stone moved by the freezing of less than a pint of water.

Cold air passes in veins through the atmosphere. Cold exists throughout the year a few thousand feet above our heads, and of great intensity.

The stratification of the atmosphere by cold, is very clearly illustrated by hail storms in hot weather. The hail passes in veins.

The nearer we approach the Sun in ascending into the atmosphere, the more intense we find the cold, and for aught we know, the planet Mercury, which is near the Sun, may be far colder than Georgium Sidus, which is far distant from it.

Heat and cold, under certain circumstances, and to a limited extent, we can measure, but beyond that, all is blank. The Pyromater, an instrument for measuring intense heat, is a recent invention, and a very important one, and time may unfold others, equally as important.

Cold does not penetrate the Earth to any very great extent where it is covered with snow, and much less than where it is exposed to the air.

When the cold approaches a city in which a pestilential fever rages, the infected atmosphere is at once disinfected; it is in this a physician to the sick.

The weary traveller, in the regions of country bordering on the Equator, when suffering from the heat of a vertical Sun, labors hard with a feather fan or some contrivance like it, to move a little cool air to revive his wilting frame.

Cold, where we have a surplus of it, like every thing else, we cease to value. It is a rich treasure, it is one of Nature's bounties; the sweet cold locks up in the great terrestrial store-house of Nature, the germs of vegetable and animal life.

To cold we are indebted for our chrystal bridges, vast in their extent and unequalled in their construction.

BOARD OF ASSISTANTS.

We should like to see the Board of Assistants made up of such citizens as James Kent, Jonathan Thompson, Stephen Allen, Preserved Fish, Wm. B. Crosby, John M. Bradhurst, George Newbould, Abraham Van Nest, Wm. F. Mott, Jonathan Goodhue, John Haggerty, Edward H. Pendleton, Saul Alley, John I. Palmer, Benjamin L. Swan, W. W. Fox, and Peter Schermerhorn; men full of years and full of experience, and of great purity of character. A Board composed of such men, would be a blessing to the City, and we ask where is the citizen who would not feel proud to take his stranger friend to see such a Board sitting in deliberate Council. A Board composed of these individuals, would possess more dignity, and command as much respect as any other deliberate assembly on the globe. It would be a Council of freemen, dignified by Nature, adorned by human cultivation, aud a better safe-guard to liberty and property, than the greatest standing army that was ever assembled together. It is to such men that our country has to look for safety.

The Board of Assistants, composed of such citizens, would in reality be what it purports to be, a BOARD OF ASSISTANTS.

The meetings of such a Board, in the day time, would render useless the thousand dollar chandeliers, and the crimson drapery and tinselled trappings of the Session room, for it would have the adorning of plain, sensible men, which is ornament enough.

No gold pencils need be displayed to take the eye of such men; and if a gift, they would scrutinize the motives of the doner, and the acts of the donee.

The banqueting room would find no advocates in such a Board.

Such a class of men would raise the character of what is called the "Little Board," to an elevation that would make it exceed the Roman Senate in name and fame.

THE SUPREME COURT ACTING AS STREET COMMISSIONERS.

There would be full as much propriety in making the Justices of the Supreme Court,

Canal Commissioners, as Street Commissioners.

We were much surprised in noticing in the postscript of Mr. Justice Bronson's letter to Mr. Mott, which we published on the 21st instant, that the Chief Justice dissented. Chief Justice Nelson was a member of the Convention that made the provision in the Constitution, that the Justices of the Supreme Court should hold no other office. If the Chief Justice goes on the doctrine of expediency; if he will come to New-York and consult such men as Jonathan Thompson, Robert C. Cornell, Walter Bowne, Stephen Allen, John M. Bradhurst, and others of the same standing, he will find that these assessment proceedings are very different from what they are represented to be by Ex-Commissioners of Assessment. Persons who have been the recipients of princely fees in these odious proceedings, have, it is generally believed by citizens of New-York, misrepresented these street assessments to the Chief Justice. The Chief Justice is a man of great purity of character and a most worthy citizen.

The first Street Commissioners appointed in this State, were by an Act of the Legislature, passed April 6th, 1792, for extending ROOSEVELT and FRANKFORT streets. These Commissioners were five in number, and were appointed by the Legislature. There was a peculiar feature in this Act, viz: that the Common Council should first have and obtain the consent of the owners through whose land the street should pass. The assessment to be made by the Commissioners, *after this preliminary*, was to be returned to the Common Council, under their hands and seals, and upon this, was to become a lien upon the land and a debt due the Corporation, for which they were authorized to sue for in any Court of record in this State.

This act is a very different kind of proceeding from the Act of April 9th, 1813. This was the first step taken in the appointment of Commissioners. The necessity of a jury was dispensed with in these two cases, because that the consent of the owners must be obtained before the land could be used, therefore there was no necessity for a jury. The consent of the owners was substituted.

The restraining clause of the Constitution of 1777, was well understood in those times. No attempt was made to turn the Supreme Court out of doors and make the Justices highway-masters.

The Act to which we refer, is to be found in No. 1, of the Municipal Gazette, page 5.

In the case of Elizabeth Pearson, in the Court of Chancery, in which his Honor the Chancellor gave the opinion which is to be found on page 195, there are some facts which ought to accompany that opinion.

About the year 1830 or 1831, the husband of Mrs. Pearson departed this life, leaving a wife and three children. He owned the premises situate on the north-east corner of Pearl and Centre streets, which rented for upwards of one thousand dollars per year. On this property was a mortgage in favor of some wards of the Court of Chancery, the interest of which was paid out of the rent of the premises, and also a mortgage to Mr. Stevenson. The Corporation assessed this property a large sum for extending Centre street, and for filling in and paving Centre street, and for sewers, &c. The assessments for the filling in were never signed by the Assessors as required by law, and the whole proceedings were notoriously shameful.—This property thus assessed was sold for the term of 27 years, by which means Mrs. Pearson and her children are rendered destitute and helpless. It was their whole, their only dependence, when Mr. Pearson left the world he supposed it was an abundant provision for the support of his family and the education of his children. It was so if the Corporation had not disinherited this little helpless family. But this is not all the Corporation have done to distress this oppressed family, as will be seen in the sequel.

Mrs. Pearson applied to the Assistant Vice Chancellor, Hon. Murray Hoffman, for an injunction to restrain the Corporation from executing a lease for the assessment, which he granted, requiring Mrs. Pearson to give security for the costs. A hard working mechanic of very limited means was her security. The Corporation demurred to the jurisdiction of the Court, which the Chancellor sustained, and dismissed the bill with costs.

The Corporation prosecuted the surety of Mrs. Pearson for the costs, and levied an execution upon the property of this hard-working mechanic, and he was obliged to raise out of his hard earnings about seventy dollars.

The widow and the fatherless are helpless. We forbear to comment.

The Chancellor in this opinion uses an expression which certainly must have been almost a slip of the pen in the hurry of business. In speaking of the decision of the Court for the correction of errors in the case of Messerole's children, he says "the Court *repudiated* the idea that the Court of Chancery has any power or right to interfere in such cases."

The decision to which the learned Chancellor refers was by a tolerably close vote.—If we mistake not, it was 13 to 9, and had the case been argued by the Counsel who filed the bill, it would have been the other way we are almost sure. General Bogardus filed this bill and carried it in the Court of Vice Chancellor McCoun, and in the Chancellors Court, but when it reached the Court of Errors he was near the confines of the grave, and unable to argue it. It was, however, argued by an able lawyer who knew nothing of the case until the evening before the argument.

We published the whole history of this case from papers which we obtained from Gen. Bogardus the Solicitor for the children of Mr. Messerole. The printed sheets were destroyed by fire. We will endeavor to obtain from the Executors of Gen. Bogardus the papers again, and will re-publish them. The Chancellors opinion, in that case, is well worth reading and does credit to his head as well as his heart.

Now the reason which the Chancellor assigned for taking jurisdiction and then changing his mind is certainly one which ought to have influenced him in giving costs. If he had erred, and Mrs. Pearson had been misled by this error, he should not have made her pay costs, unless the law was peremptory to compel him to do so, and if such is the law, that learned jurist ought not to have allowed a session of the legislature to pass without calling their attention to a remedy.

There is another matter in the opinion of the Chancellor in another case on the same page, which is that of restraining the Corporation being an "UNNECESSARY INCONVENIENCE TOTHE CORPORATION."

"Let justice be done" without looking to consequences.

The Chief Justice who gave a written opinion in this case in the Court for the correction of errors uses this strong language in reference to the jurisdiction of the Chancellor in these Street cases:

"I know the learned Chancellor has neither the desire or inclination to entertain it unless in obedience to a sense of duty, and the ancient jurisdiction of the Court following where the footprints of his learned and distinguised predecessors lead; and must believe that he has been *subdued and carried beyond the outer boundary of his court, by the hardship and injustice of this particular case.*"

"These *hard cases* make bad precedents in the Courts both of law and equity, and are usually found at the bottom of them."

ROBERT H. MORRIS.

Mayor Morris deserves the thanks of this community for the interest he has taken in the Tax question, and for numerous and well timed vetos.

Our citizens who pay large taxes speak in the highest terms of Mayor Morris. He is a public officer of great firmness of purpose, intelligent and honest. If he is a candidate for re-election he will no doubt be re-elected.

Alderman Breevoort, Alderman Brady, and Alderman Tillou, deserves the thanks of the tax payers for their attention to their interests.

NEW PARTIES.

Whichever party puts up the best men will succeed at the charter election.

BAR ROOM OF CITY HALL.

This appendage to the banqueting room of the Hall has been refitted with new carpets, &c. &c.

We have not heard whether they have procured gold waiters for their wine goblets.—Such a use of the public funds would be more appropriate than one half their appropriations.

DESTRUCTIVE ASSESSMENTS.

—

BEDFORD ROAD

AND

MR. MESSEROLE'S CHILDREN.

We give below the Speech of the venerable General Johnson, Mayor of Brooklyn, to the Common Council of that city.

The newspaper containing this Speech, was first shown us by the Hon. W. T. McCoun, Vice Chancellor, after the case of Messerole's children had been argued before him, and he remarked that he intended sending the paper to the Chancellor.

This Speech deserves to be treasured up, and we have printed an extra number of copies for extensive circulation throughout the United States, and also in England.

We deem it due to this important question to place the farewell address of the venerable Mayor of Brooklyn, who is a most excellent citizen, a man beloved and respected by all who know him, in connection with the Opinion of the worthy Chancellor of this State, in the matter of the ruinous assessment upon the estate of the infant children of Mr. Messerole, who were assessed so heavily for the Bedford Road, as to annihilate their title; and next to these, the Opinion of the Supreme Court, in which they state that the Constitution of the State has provided against the exercise of such summary street powers by that tribunal, which is the power which confirmed the Bedford Road Assessment alluded to by the Mayor and passed upon by the Chancellor.

We wish to call the attention of the reader to the first paragraph of the Opinion of the learned Chancellor, in which he says: "*that an assessment has been made upon the lands of the complainants, which must produce a total sacrifice of the property assessed, unless they can obtain relief in this Court, or by* LEGISLATIVE INTERFERENCE,"—in connection with the *quere* put by his Honor the Mayor of Brooklyn, in his Speech, when he asks: "*will the land assessed along Hamilton avenue and Bedford road, pay half the assessments? If not, are not the owners plundered, and the City also?*

Here is evidence indisputable and unquestionable as to an absolute confiscation of this estate, and we ask by whom? We answer, by a power unknown to the Constitution of the Commonwealth.

It was well said by the learned Chancellor that: "*unless they can obtain relief in this Court, or by Legislative interference,*" that the assessment must produce a total sacrifice, &c.

The Chancellor clearly saw that the Justices of the Supreme Court did not act in a judicial capacity, but merely as Road Commissioners, and therefore that they could not revive their own acts.

Among the powers possessed by the most absolute governments in Europe, there are none that can be compared in despotic character with the summary street powers which have been exercised over private property, in the State of New-York, for years past; and yet we boast of a CONSTITUTION, the purchase of BLOOD and TREASURE!

—

From the Long Island Star of May 7, 1838.

BROOKLYN COMMON COUNCIL.

MONDAY, April 30, 1838.

The MAYOR addressed the Board as follows, and retired, and the President, Alderman S. SMITH, took the Chair.

Gentlemen of the Common Council:

Be pleased to permit me to present a few remarks to this Board, before I leave the Chair.

When we entered upon our duties, the storm of adversity was passing over our country, sweeping away the golden visions of speculative prosperity, and leaving the blasted harvest of adversity on many fair plotted fields. Many tall trees, with gilded leaves and *paper* roots, were laid low. Our fair city has suffered by the storm, her sails were spread to every wanton lover, whom the lust of speculation brought among us. Our former cultivated farms are dotted with buildings, subject in many cases to reversions. This is a faint outline of the prospects caused by the re-action, which, in like cases, will always follow excessive speculation. Many great men, and many wise men, who had enough but wanted *more*, have been ensnared, and have fallen upon the alter of adversity.

When this city was incorporated, our deferred Market Debt was $20,000; two hundred thousand dollars were raised by loan for the erection of a City Hall; the Common Council *knew*, and our citizens *know*, that this sum was sufficient to build a Hall, equal in every respect to the Hall in the city of Albany, and to purchase a site for the building. The loan was made with this object in view. Why was it not done? Why were not the interested *schemes* of speculators, rejected by an unanimous vote, instead of one solitary NO?

The past cannot be re-called. The deed is done; but that *incubus* of folly will be felt after its votaries are no more.

No member of the Common Council, of any city of this State, can lawfully make a beneficial contract with the Board whereof he is a member; nor can *any* member of such Board enter into a contract whereby he is directly or indirectly benefitted.

In Brooklyn, the Common Council direct and the Mayor executes.

Again, Gentlemen: what authority had our Board of Aldermen, who are Trustees of the People, to lend their aid to interested men, to oppress and ruin the widow and the orphan, by opening, paving, or grading unnecessary streets? Improvements are betterments, not divestments. Were not Hamilton avenue, Myrtle avenue, and Bedford road, opened to gratify speculators *very near* the Board? Were not the assessments for opening, laid heavily on distant sections, to pay favorites *near* the Board? Will the land assessed along Hamilton avenue and Bedford road, pay half of the assessments? If not, are not the owners plundered, and the city also?

Motives produce acts which are often done before the design is seen.

The foregoing remarks are not made for individual purposes, but for the purpose of warning those who succeed us, to guard our city from the like errors.

I have now given a faint outline of our city as she was when the Board entered upon its duties, oppressed upon every side, but not disheartened. Our ship was shattered in her rigging, but her hull is sound. Our beautiful and healty city remains. We need no distant waters, we have the best in abundance below. We will be burthened a few years with taxes, still we can pay more and prosper.

We have united to stay unnecessary expenditures, and correct evils. We have preserved civil order, and promoted education. Our efficient Police has protected us from midnight fiends, and Providence from the fiery elements. Our Fire Department is improving.

On taking leave of this Board, be pleased, Gentlemen, to accept of my individual respects for your kindness and assistance during the past year; to the Clerk, Attorney, and Street Commissioner, together with all our *faithful* officers, my respects are also presented. Though we may seperate here! I hope *we* will meet hereafter, in that happy haven of rest, where no political distinctions will be known.

Alderman Underhill then offered the following Preamble and Resolution, which was read and adopted:

Whereas, the term of service in which his Honor JEREMIAH JOHNSON, has been elected to fill the arduous situation of Mayor of this city, is nearly terminated, and whereas, the connection necessarily arising between the individual filling that office and the members of this Board, give the latter ample opportunity of judging of the capability and zeal with which the duties of the Mayoralty has been performed; and whereas, this Board are deeply impressed with the conviction, that his Honor JEREMIAH JOHNSON, has on all occasions, exhibited an energy and industry in his station, no less honorable to himself than beneficial to the public; that the interest of this city, of which he has so long been a resident, have again, as they often have before, been highly promoted by his public spirit and anxious desire to promote the public weal, therefore

Resolved, That this Board do hereby tender to his Honor the MAYOR, their warmest thanks for the indefatigable zeal and untiring industry with which he has filled the duties of his office, and hereby express to him the conviction they strongly feel, that he has added another wreath to the crown he has so long deserved to wear, that of a PUBLIC BENEFACTOR.

THE CHANCELLOR.

"It is pretty evident in this case, that an assessment has been made on the lands of the complainants, which must probably produce a total sacrific of the property assessed, unless they can obtain relief, either in this Court or by Legislative interference. Judging from the facts before me, I cannot see how it was possible for the Commissioners of Estimate and Assessment, to have come to the conclusion that the lands assessed could be benefitted to the amount of about $14,000, by the contemplated improvement; even upon the principles on which they proceeded relative to the Bedford road as a public highway, already laid out and established. As I understand the case, the assessment limits only included of the complainant's lands 107 feet on each side of the Bedford road, as originally laid out by the turnpike Commissioners, and extending in length on that road about 968 feet. This would give to the complainants 76 lots of 25 feet front, and 107 feet deep, upon a street of 66 feet in width. And if the contemplated improvement was made, they would have the same number of lots of 100 feet in depth, upon an 80 feet street. These lots, at the valuation fixed upon them by the second answer of the defendants, at the time of the assessment when lands were the highest, were worth $250; making the sum of $19,000 for the lands assessed. And yet it is supposed these lots will be benefitted by the widening and extending of this street, $139.31; or about three fourth of their then estimated value, and nearly their full value one year thereafter, when the second answer was put in. It is possible, that some further benefits might accrue to these lots, by the extension of Bedford road beyond where it was already opened four rods wide, in addition to the benefit of having it fourteen feet broader in front of the lots assessed. But there is much reason to believe that the guardian ad litem who was appointed to take care of the rights of these infants, and who was himself one of the applicants for the proposed improvement, has, under the influence of mental hallucination, or otherwise, suffered their property to be assessed to about its full value, and probably much more than it is now worth; as a supposed benefit which that property was to receive from the contemplated improvement. If the whole proceedings, however, have been regular, and the Commissioners of Estimate and Assessment have merely erred in judgment, I think this Court has no jurisdiction to correct their error, or to give relief to the complainants. For there is no allegation of fraud or collusion on their part, nor on the part of the guardian ad litem, who was appointed in the mode prescribed by law to protect the rights of the complainants on that assessment, and to appeal from the decision of the Commissioners, if he believed they had done injustice to these infants.

The first objection to the regularity of the assessment is, that the Commissioners of Estimate and Assessment, have assumed that the turnpike road was not only regularly laid out, but that it was already the property of the public, so that the complainants were entitled to no compensation therefor. In this I think the Commissioners were clearly under a mistake. For the purpose of this decision, I shall take it for granted that the turnpike was properly laid out, and that the damages of the complainants for that part of their farm which was taken for the use of the Corporation were legally and constitutionally assessed, pursuant to the provisions of the general turnpike act of 1807. Still that act did not vest the title of the land in the turnpike company, even for the purposes of the road during the existence of the charter, until the actual payment of the damages which had been so assessed. The language of the Statute is, that the turnpike corporation, upon paying to the owners of the land the sum assessed and awarded by the appraisers in their inquisition, shall and may have and hold the lands to them and their successors and assigns, &c. (1 *R. L. of* 1813, §3, *p.* 231.) It is true, the statute does, by an implication, authorize the turnpike company to enter upon the land for the purpose of making their road thereon, if there is no person living on the land who is authorized to receive the damages, unless such damages shall be lawfully demanded. The title to the land, however, is still in the original owner; and the moment he demands the payment of the damages from the proper officers of the company, and the same are not paid, he may bring an action to recover the possession of the land. It is perfectly clear, therefore, that the complainants before they could be divested of their title to so much of their farm as was included in the old Bedford road, were entitled to the payment of at least the amount which was awarded to them by the appraisers, in 1828. And the opinion of Chief Justice Nelson, appears to be that they were entitled also to the benefit of the contingent right to the revision in the land, in case of the dissolution of the Corporation, or of the abandonment of the road. (*See Hooker* v. *The Utica and Minden Turnpike Company*, 12 *Wendell's Rep.* 371.) Whether the turnpike company was in existence at the time the Commissioners of Estimate and Assessment made their Report in the present case, does not distinctly appear from the pleadings; but the legal presumption is that it was, as I have not found any statute dissolving that Corporation, or authorizing it to abandon the road. It is clear, however, that if that Corporation should be legally dissolved without having paid the amount awarded to the complainants for damages, the legal title to that part of the Bedford road which is in question here, would belong absolutely to the complainants; and that such title could not be divested, for the purposes of this public street, without paying them the full value of the land, either in money or in the benefits which would thereby accrue to them by the increased value of their adjoining lands. It does not distinctly appear in this case whether the petition to the Common Council for the improvement, and the resolution of the City Corporation adopting the same, actually contemplated the taking of the lands included within the limits of the turnpike, as well as the two narrow strips on each side of the same, for the use of the Corporation as a public street. If the former was the case, then the confirmation of the report was irregular, and may still be opened; as the Commissioners have not in form appraised the damages to which the complainants, as the owners of the original site of the Bedford road through their farm, are entitled. And as I understand the recent decision of the Supreme Court *In the matter of Anthony street*, (20 *Wend. Rep.* 618,) there cannot be an absolute confirmation of the Report of Commissioners of Estimate and Assessment, so as to give any vested rights under the same, until the damages for all of the lands taken for the proposed improvement have been ascertained and settled, and are properly assessed upon the owners of those lands which will be benefitted by the improvement. If this is the correct construction of the Statute, and the resolution of the Mayor and Common Council actually contemplates the taking of the whole of the old Bedford road for the purposes of this improvement, they ought not to be permitted to proceed and enforce this assessment against the complainants personally, by virtue of the distress warrant, or by a sale of their lands which have been assessed, until the proper steps have been taken to divest their title to the whole of the lands which are to be taken for the improvement, by an assessment of the damages and an offset of the same against the supposed benefit of their adjacent lands.

I think, however, there is a more conclusive objection to the proceedings of the defendants, in this case; and that is, that the Mayor and Common Council had no legal authority to lay out and open this new street through the lands of the complainants, in one of the new wards of the city, subsequent to August, 1835; until the same had been authorized by the Commissioners appointed under the Act of the 23d of April, in that year, authorizing the appointment of Commissioners to lay out streets, avenues, and squares, in the City of Brooklyn. That Act, which took effect on the first of September after its passage, gives to the Commissioners, to be appointed by the Governor on the application of the Mayor and Common Council, the exclusive power to lay out streets, avenues and public squares, within that part of the city comprising the sixth, seventh, eighth and ninth wards, and to direct the closing of any streets, roads, highways, lanes, avenues or alleys which had not been theretofore approved of by the Mayor and Common Council. (*Laws of* 1835, *p.* 136, § 4.) The previous act of the same day amending the charter of the city of Brooklyn, which went into effect immediately, must be so construed as not to conflict with the provisions of the Act appointing these Commissioners to make a permanent

plan of this part of the city. It must therefore be construed to apply to that part of the city lying within the first five wards, and which was originally comprised within the bounds of the village Corporation; or at least, to such streets as they should think proper to lay out according to a settled plan, in the four other wards, previons to the time when the act for the appointment of Commissioners should take effect. Certainly it could not have been the intention of the Legislature that two classes of officers should have the power to lay out streets and avenues in that part of the city during the same period, and that each should proceed according to a settled plan of their own. Neither could the Mayor and Common Council continue their jurisdiction over the subject, (if their power extended to these four wards previous to the first of September,) by their neglect to apply to the Governor for the appointment of Commissioners, until after this street was laid out; if such was in fact the case. The duty for which the Commissioners were to be appointed, was in its nature exclusive, independent of the express provisions of the act upon that subject. And until they had been appointed and had authorized the opening of the street now under consideration, I am satisfied the Mayor and Common Council had no authority, after the first of September, 1835, to proceed by resolution to open the same, and to have Commissioners of Estimate and Assessment appointed pursuant to the directions of the Act of 1833.

The Vice Chancellor was therefore authorized to interfere by injunction to restrain the defendants, under color of authority, from proceeding in an illegal act, which must necessarily cast a cloud upon the complainant's title; and to set aside these unauthorized proceedings which had already taken place. (*Oakley* v. *The Trustees of Williamsburg*, 6 *Paige's Rep.* 262. *Pettit* v. *Shepherd*, 5 *Idem*, 501.) For these reasons, the order appealed from must be affirmed with costs."

IMPORTANT

ASSESSMENT DECISION.

SUPREME COURT,

FEBRUARY 8, 1844.

OPINION OF THE COURT.

Matter of Opening 39th street, in the City of New-York; also, 37th street; also, a New Street between the 4th and 5th avenues; also, the 11th avenue, between 32d and 47th street, and also 128th street.

BRONSON, J.—The Statute in relation to the opening and laying out of streets, avenues, squares and public places, in the City of New-York, has been in operation thirty years; (2 *Revised Laws*, 342 408, §177 192;) and the question is now distinctly made, for the first time, whether we have the constitutional right to exercise the powers which the Legislature has attempted to confer upon us. But it is never too late to appeal to the fundamental law; and the question is none the less entitled to a careful examination because it touches our own authority. If, by common consent, and without having our attention called to the subject, we have heretofore taken cognizance of matters which did not rightfully belong to us, that cannot be a good reason for going on in the same way after our authority has been plainly drawn in question.

The constitution declares, (*Art.* V. §7,) that "the Justices of the Supreme Court shall hold no other office or public trust," and the question is, in what character do we act in these street cases. Although the power to appoint Commissioners of Estimate and Assessment, and to review their proceedings, is, by the words of the Statute, conferred upon the "Supreme Court," it has been fully settled that we do not act as a Court, but as Commissioners, to discharge this special trust or office. The question was considered in the *Matter of Beekman street*, (20 *John*, 269,) which was decided within a few years after the law was passed. It was there held, that our powers were derived wholly from the Statute, and were not incident to our judicial duties; that we do not act as a Court, but as Commissioners; and that the general powers and jurisdiction of the Court could not be brought into exercise. The case was likened to that of a Judge sitting as a Commissioner under the insolvent laws. The same doctrine had been laid down before this Statute was passed, under an act of the Legislature conferring similar powers upon the Albany Mayor's Court. *Stafford* v. *Mayor of Albany*, 7 *John*, 541.) It was there held, that the proceedings were not of a judicial nature; that there was no analogy between them and the judicial proceedings of a Court of Record in the progress of a cause; that the Court acted as Commissioners, and when an assessment had been confirmed, the Court was *functus officio*, and had no power to set aside the proceedings. In the *Matter of the Mayor of New-York*, (6 *Cow.* 571,) it was again affirmed that we do not act as a Court in these cases, but as Commissioners appointed by the Legislature; and this doctrine has uniformly prevailed down to the present day. (*Matter of Canal street*, 11 *Wend*, 154; *Matter of Mount Morris Square*, 2 *Hill* 14.) There have been other cases to the same effect, which, as they contained nothing new, have not been reported. The principle has been fully carried out, by refusing to set aside the proceedings in Street cases under any circumstances, on the ground that while sitting as Commissioners we had no power to re-call that which had once been done. When the parties have desired a review in a street case the Supreme Court has issued a *certiorari* to the Justices of that Court as Commissioners; and after having thus got the matter before us as a Court, and affirmed what we had previously done in another character, a writ of error has been brought in the Court of Errors. In these and all other forms in which the question has arisen, it has been uniformly held, that in executing the street law of 1813, we are but Commissioners discharging a special trust. The principle has been settled more than thirty years, and it is now quite too late to call it in question.

The same doctrine has been laid down by the Federal Judiciary. By an Act of Congress passed March 23, 1792, (2 *Bis.* 259,) the Circuit Courts of the U. S., were directed to inquire into and decide upon the claims of certain persons to be placed on the pension list. The note to *Hayburn's case*, (2 *Dall.* 409,) shows that several of those Courts declined to execute the law, on the ground that the duties which had been assigned to them were not of a judicial nature. There was no disqualifications to hold other offices, as there is under our Constitution. The Circuit Court for the District of New-York, composed of Chief Justice Jay and Judges Cushing and Duane, said the Act could only be considered as appointing Commissioners for the purposes mentioned in it, by *official* instead of *personal* description; that the Judges regarded themselves as being the Commissioners designated by the Act, and therefore as being at liberty to accept or decline that office. As the object was a benevolent one, and the Judges wished to manifest their respect for the Legislature, they accepted the trust. The Justices of this Court seem to have acted upon the same principle when they accepted the office of Street Commissioners, under the New-York law. Chief Justice Spencer, in delivering the opinion of the Court in the *Matter of Beekman street*, (20 *John*, 269,) said, "it might be a question how far the Legislature can impose such duties on the Judges." But he entirely overlooked the constitutional inhibition against holding any other office, which was substantially the same then as it is now, (*Const. of* 1777, *Art.* 25.) Since an appeal has been made to the fundamental law, it is no longer the mere question whether we will consent to accept the office, and execute the Statute. The farther inquiry is now presented, whether we have any power to act in the matter. Upon that question I cannot entertain a doubt. The Constitution having declared that the Justices of this Court shall not hold any other office or public trust, we cannot accept this appointment, however willing we may be to carry out the wishes of the Legislature. If we can execute the office of Street Commissioners for the City of New-York, the like powers may be conferred upon us in relation to any other town or county; or the duties of the office of Comptroller, Treasurer, or Sheriff, may be assigned to us; and thus the constitutional disqualification would be rendered a dead letter. For one, I can never give such a construction to the fundamental law as will amount to a practical nullification of its provisions. Indeed there is little room for construction in the case. If, in executing

ment. The motion was argued before Chief Justice NELSON, at the March Special Term, and he refused to interfere, on the ground of lapse of time, notwithstanding the application was made within six months of the confirmation of a report, which was presented and confirmed without notice. The Chief Justice also assumed to exercise what he termed the discretion of the Court, in the case. The discretion of the Court is not the will of the Judge. We have noticed this point on page 196 of this number.

The most powerful monarch in Europe never claimed as much authority over the private property of a subject, as has been exercised by the Supreme Court for years over the private property of the citizens of this City in street assessments.

We discussed some branches of this question, in the Municipal Gazettee of December, 1842.

The Court in this opinion, are so explicit with regard to the prohibitory clause of the Constitution, "that he who runs may read."

We are glad to see the doctrine of strict construction under way, and when once broached in political matters there is no difficulty in applying the principle to the piratical assessments in the City of New-York.

Re-Argument.

Mr. Emmett has served Mr. Mott with a notice of re-argument of his five street motions. His notice is entitled before the Supreme Court. What nonsense under the views here expressed by the Court. We will publish his affidavit on which he founds his notice of motion.

Another Assessment Cruelty.

The Assessment for setting curb and gutter in the 8th Avenue, amounts to $43.922-25. The assessors appointed by the Common Council to make the assessment, are the Street Commissioner, his Assistant and Clerk. The contract was made by the Street Commissioner, and the prices unreasonable.

When the Senate Committee were in session at Clinton Hall, this proceeding was brought before them, as one of the Assessment outragss. Mr. Perrine, a former Clerk in the Street Commissioner's office, was examined as a witness, he stated that: "there are no names of Assessors in any part of it, nor is it signed by any Assessors." The assessment was passed by the Board of Aldermen, Dec. 17th, 1838; by the Board of Assistants, Dec. 24th, 1838, and approved by the Mayor, Dec. 28th, 1838, although not signed by the Assessors. This is the way the public business is done. The Assessors are the same as those of Chapel street, and yet the two assessments are made upon entirely different principles; both cannot be right.

By a decision of the Supreme Court, all the Assessors must be present to make the assessment, but a majority may decide.

This is the assessment, for which the Street Commissioner sold the house and two lots belonging to Mary Stewart and her children, all their property. One of the children is sickly. The husband of Mary Stewart was a shoe-black, and he earned his money by hard labor, with which he purchased this property, and when he died he left it to his family.

The purchaser at the assessment sale of this property, on getting his lease, took possession, and put the furniture of the occupants out of doors, but he was prosecuted for forcible entry and detainer, and at once surrendered the premises, and has since brought an ejectment suit on his lease. A case has been made, and will be argued next month before a full Bench. Some charitable individual has volunteered a Counsel fee to defend the little home of the colored woman and her helpless children.

The owner of the premises had no notice of the assessment, or the sale.

The regulating the third avenue was paid out of the City Treasury, and so ought that of the eighth avenue.

Alderman NASH,

OF THE SEVENTH WARD.

On Monday evening, Alderman NASH tendered his resignation as Chairman of the Committee of Public Offices, Repairs, &c., assigning very satisfactory and substantial reasons therefor.

We have watched the movements of this member of the Common Council, with a great deal of interest; he is a plain spoken man, and when he discovers a wrong, he sets his face at once against it. He deserves the thanks of the public. We were pleased to see that he was sustained by Alderman SCOLES.

Alderman BREEVOORT,

OF THE TWELFTH WARD.

This gentleman, who is a man independent in mind as well as in property, took a bold stand in the Board of Aldermen, some time since, against the Street Commissioner. The Alderman deserves credit for acting independent of that officer, and having a mind and opinion of his own.

NOTE.—Several of the pages of this volume have been destroyed by fire. The present and last preceeding seven pages, are substitutes for those destroyed. Some of the other pages of the volume are being re-published in the same way.

The copies of the petition to the Legislature of 1843, which were on pages 241 to 244, and the re-print also, were destroyed by the torch of the incendiary, in 1843. We have re-printed these on page 254.

SUPREME COURT DECISIONS IN 1841.

At the January term of the Supreme Court the matter of the assessment for constructing a sewer in Twentieth street, on the Hudson river side of the island, was argued upon the return made to the certiorari issued in this cause, by Lewis H. Sandford, Esq., for the Relators, and Peter A. Cowdrey, Esq., for the Mayor and Common Council. The Court held the case under advisement until the October term, near the close of the year, when they *quashed the certiorari.*

At this term of the court Chief Justice Nelson delivered an opinion on denying the motion, made at the December term of 1840, for a certiorari in the matter of re-paving and re-grading Chapel and adjoining streets. This opinion, and the material facts set forth in the affidavits and papers on which the motion was founded, will be found in its order in this number.

At the April special term, Mr. Justice Cowen presiding, motions were made for writs of certiorari in the matter of the proceedings in the assessment for opening Mount Morris square and Second avenue from Twenty-eighth to Eighty-sixth street. L. H. Sandford, Esq., for the Relators, submitted very full points to the Court, which were replied to by Peter A. Cowdrey, for the Mayor, &c. The Court held these two motions under advisement until November, 1841, when he gave a very full opinion, denying the material part of the motions.

At the May term of the Court, held by the full Bench, the cause in which the People ex rel. E. Meriam and others, were relators, and also that in which James Agnew and others were relators, involving the proceedings in the assessments for repaving and regrading Chapel and adjoining streets, and of building a sewer in Chapel and Thomas streets, came on for argument on the respective returns made to the certioraris issued in these causes. Lewis H. Sandford and Wm. M. Holland, Esqs., for the Relators, and Peter A. Cowdrey, Esq., for the Mayor and Common Council. These causes were fully argued. Mr. Justice Bronson took the papers, and at the October term of 1841 delivered a brief opinion of one of the causes. The Court *quashed the certioraris.*

The motions in the matter of Art street, Seventh avenue, Ninth avenue, and Twenty-eighth street assessments for certioraris, are understood to have been disposed of by the Court in the same way as those of Mount Morris and Second avenue.

We shall review the opinions delivered by the Supreme Court in our own plain way, and we shall feel gratified if we succeed in convincing these high judicial officers that they have greatly erred in quashing the certioraris in the particular cases, and denying the writ of certioraris in others.

IN CHANCERY.

Before the Chancellor.

Timothy Wiggin, Banker, of London, in the kingdom of Great Britain, *vs.* the Mayor, &c., of New York.

THE CHANCELLOR.— The language of the bill in this case, leaves it doubtful whether the complainant at this time, is the owner of, or has any interest in any of the lots mentioned in the bill as having been assessed for this improvement; and so far as his personal liability is concerned, this court does not interfere to prevent a mere trespass upon personal rights, on personal estate, where the complainant has a perfect remedy at law. The bill instead of alleging in the usual manner, that the complainant was at a particular date and still is the owner of the lots upon which the assessment for benefit was imposed, merely states as to the first twelve lots, that he was the owner and possessor thereof, on or before the first of September, 1836, and as to the other lots, he states that he was the owner and possessor of them subsequent to the 1st of May, 1839. Neither does the verification of the bill by the complainant's agent show that the agent has any information on the subject; or that he even believes the complainant is now the owner of those lots. As this defect in the bill can probably be cured by an amendment, I shall proceed to examine the objections made to the legality and equity of the assessment, and the question whether the bill in other respects presents a proper case for the interference of this court by a preliminary injunction.

The objection that the delay of the corporation in bringing the proceedings to a close until the spring of 1840, produced injustice, by giving to the tenants of property which was to be taken for the improvement, and who had short leases thereof, compensation for a loss which they do not sustain, does not appear to be one which in any manner concerns the complainant. That appears to be a question entirely between the landlord and tenant of the property taken for the improvement. If the tenant has a beneficial lease, that is, if he has rented the property for a term of years at less than the use of the property was actually worth, he sustains damages in being deprived of the occupancy at this low rent during the remainder of his term. But that damage must necessarily go to diminish the amount which the landlord would have been entitled to receive if the property had not been under a lease; or if the rent reserved upon the lease had been the full value of the use of the lot. The proper way of assessing the damages, where two or more persons have distinct interests or estates in property taken for the improvement, is to ascertain the damage to the whole lot in the same manner as if one person alone had the entire interest therein; and then to apportion that damage among the persons interested in the lot, as landlord and tenant or otherwise, according as the interest of the one or the other will be affected by the taking of the property for the improvement. In such a case, if a tenant had a lease of the property for four or five years at a nominal rent, he would be entitled to damage for taking such interest in the property if it was taken immediately. But in that case the commissioners would not allow any thing to the landlord on account of the loss of rent for the same time. And where, in a case of that kind, the appointment had been made upon an estimate that the proceedings would probably be completed at the expiration of a year, and that the tenant would be dispossessed at that time, if by any unforseen occurrence the completion of the proceedings were procrastinated till the expiration of the lease, the landlord would sustain the whole damage by the taking of the property and the tenant nothing. But the amount of the assessment for benefit upon the property of other persons would not thereby be increased, for the benefit to their property from the making of the improvement would commence as soon as they were compelled to pay the assessment imposed therefor. In the case of *Gillespy vs. The Mayor, &c. of New York*, in the Court for the Correction of Errors, in December, 1839, I had occasion to examine the whole of the statutory provision on the subject of the apportionment of rent and damages as between landlord and tenant, where a part of the property is taken for an improvement during the continuance of the lease. And from that examination, I am satisfied that if the commissioners of estimate and assessment made their assessment in this case upon correct principles in relation to the rights of the lessees and owners of the leasehold property taken for the street, the delay in completing the proceedings could not injure the complainant so as to give him any equitable rights even as against the tenants themselves, whatever equitable claim their landlords may have against them on that account.

I am inclined to think that the commissioners erred in not assessing the property at the corner of William street in the same manner as if the contemplated widening of that street, which was subsequently abandoned, had never been thought of; as that improvement had not been directed when these commissioners were appointed to assess the damages and benefits with reference to the widening of John street merely. But if there was any error in this respect, it was a proper ground for opposing the confirmation of the report before the Supreme Court, and cannot be reviewed in this collateral manner. In the case of Messerole vs. The Mayor, &c. of Brooklyn, (In Chan. April 7, 1840,) referred to in the argument, the commissioners had not erred in judgment as to what property was to be benefitted by the contemplated improvement, and neglected to assess it on that ground; but they had by mistake left out the greatest portion of the lands which were to be taken from the complainants for the contemplated avenue—and the report showed upon its face that the court had no jurisdiction or authority to confirm the assessment—according to the decision of the Supreme Court in the case of Anthony street, (20 Wend 618.) There the court held that if the proceedings had been regular and the commissioners had only erred in judgment in fixing the amount of the damage for the lands taken, or the benefit to the other lands of the complainant, upon erroneous principles, the Court of Chancery could not interfere after the report had been properly confirmed. In this case, if the front of the lots on William street, which were not assessed would actually be benefitted by this improvement, the commissioners erred in judgment in not assessing for the benefit to the front, as well as to the rear of the lots; and the confirmation of the report should have been opposed on that ground. But, as that was not done, the confirmation of the report stopped the owners of other property which was assessed, from alleg-

cond Tuesday of May, 1831. It also vests the legislative power of the corporation in a board of aldermen and a board of assistants, who together shall thereafter form the common council of the city; which boards are to meet in separate chambers, &c. And the complainant's council therefore insists that the mayor, alderman and commonalty can no longer convene in common counsel, to direct the laying out a new street or the altering of an old one, as they were previously authorized to do under the act of 1813.

The conclusive answer to this objection is, that the act of 1813, gives the power to the corporation of the city, when convened in common council according to the provisions of its charter, and not to the particular officers who at that time represented the common council. And the act of 1830 having excluded the mayor and recorder from the common council, and directed the aldermen and assistants to convene as a common council in two separate boards, the mayor, aldermen and commonalty of the city, that is the Corporation under its corporate name, is convened in Common Council for all legislative purposes when the two boards convene in different chambers, and pass a resolution or ordinance, subject to the qualified veto of the Mayor. The power to pass an ordinance authorising the opening of a new street, or the alteration of an old one, under the 177th section of the act of 1813, was strictly a legislative power given to the Corporation represented in its common council duly convened under its charter; as much as the passage of a statute by the State Legislature, for the opening of a State road, or the alteration or enlargement of a canal, and appointing Commissioners to appraise damages, &c., would be the exercise of a legislative power by the people of the State represented in their Senate and Assembly. And this legislative power, which still belongs to the Mayor, Aldermen and Commonalty of the city of New York, under the act of 1813, which is in full force, was properly exercised by the Corporation, convened in Common Council in the manner prescribed by the act of 1830.

Again: if the complainant was right in supposing that the Common Council, as at present organized, had no authority to pass an ordinance for the widening of John street, he is neither entitled to preliminary injunction nor to any relief whatever in this court, as his defence is perfect at law. And if the whole proceedings in relation to the opening of the street were absolutely void in law, and that fact appears upon the face of the ordinance itself, a sale for the assessment upon the complainant's lot would not even create a cloud upon his title. For as every person must be presumed to know the law, a proceeding which is upon its face void, does not constitute a cloud upon the title to real estate against which a court of equity will relieve.

This is also a sufficient answer to the objection that the ordinance was void, because it appears from the record that it was passed without calling for the ayes and noes upon the question of its adoption by the respective boards; if that neglect was, in point of law, sufficient to invalidate such an ordinance. It is not necessary, therefore, that I should express my opinion at this time upon the question, whether the seventh section of the act of April, 1830, requiring the ayes and noes to be taken and published in certain cases, applies to this case; or whether the last clause of that section applies merely to improvements which are to be paid for out of the funds of the corporation generally, or by a tax or assessment upon the citizens at large, and not to cases where the owners of property benefitted by the proposed improvement are to bear the whole expense thereof.

As that question was not argued before me, I have not examined it. But if the provision is applicable to a case of this kind, I think it is merely directory, as to the publication of the report, and of the ayes and noes upon the question of the adoption of the ordinance for the proposed improvement. The neglect to make such publication, did not, therefore, of itself, render the proceeding void, if the ordinance was not void upon the face of the records of its adoption.

There is another substantial reason why this court should not interfere in this case by injunction to prevent the corporation from collecting the assessment, but should leave the complainant to his remedy, if he has any at law. The proceedings for the making of the improvement were commenced nearly five years since, and the complainant had waited until the improvement had actually been completed several months before he or his agent attempted to interfere. This property has received the full benefit that it would receive from the improvement; which benefit the commissioners have estimated at several thousand dollars. And as property of other persons to a very large amount has been destroyed for that purpose, justice requires that it should be paid for by those who have been benefitted by the improvement rather than by a general tax upon the city at large. A court of equity at this late day will not interfere with its strong arm to cast the burthen of the improvement from those who have been benefitted thereby and upon those who have not.

It is true the complainant alleges in his bill that his property has not benefitted by the improvement. But that allegation is not sworn to by any one, and it is of course contradicted by the report under oath of the three very respectable and intelligent commissioners by whom the assessment was made.

The application for an injunction is, therefore, denied with costs.

Copy.

JOHN M. DAVISON, Register.

From the Journal of Commerce of February 9, 1842.

VICE CHANCELLOR'S COURT.

HON. W. T. MC COON, VICE CHANCELLOR.

First Circuit.

DECISION.

Edmund Frost et al. vs. The Trustees of the Village of Williamsburgh.—This was a motion for an injunction to restrain the defendants from selling certain property for non-payment of assessments. The Court said that the recent decision of the Court of Errors, in the case of Meserole vs. The Corporation of Brooklyn, reversing the order of the Chancellor and Vice Chancellor, which restrained by

injunction the defendants from selling the property of the complainants for the non-payment of assessments, for the opening of Bedford Avenue, has definitely settled the question, *that however illegal may be the proceedings of the Corporation*, the Court of Chancery has no jurisdiction or right to interfere except where the wrongful proceedings lead to the commission of irreparable injury to the freehold, or where it would involve a multiplicity of suits at law, amounting to excessive and vexatious litigation, against which the party seeking relief under the ordinary head of equity jurisdiction, is entitled to be protected.—And whenever these grounds of equitable cognizance exist, they must be particularly stated. No such ground is stated or shown to exist in the present bill, and since the decision of Meserole case vs. the Corporation of Brooklyn, the Chancellor has been obliged to dissolve injunctions and dismiss bills on demurrer in about *fire and twenty cases* against the Corporation of the City of New York, in which they were proceeding to sell for the non-payment of assessments in the matter of opening and regulating streets, under circumstances *quite as strong if not stronger*, in favor of the complainants than the present. The injunction is therefore dissolved with costs.

EQUITY COURT.

IN CHANCERY.

CHANCELLOR'S OPINIONS DELIVERED JANUARY 24th, 1842.

Garret Van Doren and others vs. the Mayor, &c. of New York.

Garret H. Striker vs. the same.

Elizabeth Pearson and others vs. the same and Walter Stevenson.—These cases came before the Chancellor upon the demurrers of the defendants, the Corporation of New York, to the bills of the complainants respectively.

The object of the bill, in each case, was to restrain the Corporation from collecting certain assessments upon property claimed by the complainants in the city of New York, or in which they were supposed to have some interest either vested or contingent; such assessments having been imposed for the purpose of laying out streets and avenues, or opening sewers, &c.; or from selling the lands assessed, or advertising the same for sale, or giving any certificate or lease to the purchaser upon the sale thereof; and for a decree declaring the assessments, and all proceedings had in relation thereto, void, &c.

R. Mott and *W. M. Holland*, for complainants in two first causes.

L. H. Sandford, for complainants in last cause.

P. A. Cowdrey, for Corporation of New-York.

THE CHANCELLOR. The objection to the assessments that the Corporation, as at present organized, under the act of April, 1830, has no power to open streets, confirm assessments, &c., was decided against the complainant, in the case of *Wiggin vs. the Mayor, Aldermen and Commonalty of the city of New York*, in March last. And I have seen no reason to change the opinion there expressed, although that case was not in a situation to enable the complainant to review the decision upon that point, by appeal; as several technical objections existed to his right to the premises, as stated in the bill. But if this objection to the right of the Common Council was well taken, it would only show that this court had no jurisdiction in these cases. For a valid legal objection, appearing upon the face of the proceedings through which the adverse party can alone claim any right to the complainant's land, is not in law a cloud upon the complainant's title which can authorize a court of equity to stay or set aside such proceedings.

That can never be considered a legal cloud which cannot for a moment obstruct the unaided rays of legal science, when they are brought to bear upon the supposed obscurity. But when the claim of the adverse party is valid upon the face of the instrument or proceeding sought to be set aside, as where the defendant has procured and put upon record a deed obtained from the complainant by fraud, or upon an usurious consideration, which requires the establishment of extrinsic facts to show the supposed conveyance to be inoperative and void, a court of equity may interfere and set it aside as a cloud upon the real title to the land. (*Simpson v. Lord Howden*, 3 My. & Craig's Rep. 97.) *It was the overlooking of that distinction, in the hurry of business*, though I had recognized and acted upon it in other cases, which led me to affirm the decision of the Vice Chancellor, in the case of *Meserole v. the Mayor and Common Council of Brooklyn*, (8 Paige's Rep. 199.) But my decision in that case was properly reversed by the Court for the Correction of Errors, at its last term in December, 1841, *although the Chief Justice who delivered the opinion concurred with me in the conclusion that the proceedings of the Corporation of Brooklyn were illegal and void.*

The same difficulty exists in relation to the objections that the ayes and noes were not called and published upon the resolutions to make the improvements and to confirm the assessments which were confirmed by the Common Council, and that the resolutions and ordinances were not duly signed by the Mayor; and to various other objections which are made to the legal validity of the assessments. All of which objections appear upon the face of the proceedings through which the Corporation must justify the enforcement of the tax by execution, *and through which the purchasers at sales of the lands of these complainants for the assessments must necessarily make title.* If the complainants are right, therefore, in supposing the proceedings void on all or any of those grounds, upon which I express no opinion, there is ***no cloud*** upon their titles.—And as their remedy at law is perfect by an action of trespass if their personal property is seized upon a distress warrant for the assessments, *and they have a perfect defence at law to any suit brought against them by purchasers at the sales which have been made, or which may hereafter be made;* if the proceedings are void, this Court has no jurisdiction to interfere for their relief. On the other hand, if the proceedings are not void, but merely irregular, the remedy of the complainants clearly is not in this Court, which has no superintending jurisdiction over the regularity of the proceedings of the Corporation of New York in these assessment cases. Indeed, as I understand the prevailing opinion in the Court for the Correction of Errors, in the case of Meserole vs. the Mayor and Common Council of Brooklyn, that Court repudiated the idea that the Court of Chancery has any power or right to interfere in such cases, in relation to any supposed error or irregularity in the assessment, or in the proceedings of the Corporation, or of the commissioners of estimate and assessment. And this Court will not subject itself to the rebuke of that tribunal by interfering in any cases of this kind, except where it is absolutely necessary for the preservation of the complainant's rights.

The demurrers are well taken, and the complainant's bill must be dismissed WITH COSTS. And the injunctions, if any have been granted in these cases, must be dissolved.

Peter G. Stuyvesant and others vs. the Mayor &c. of New York, and John Ewen, street commissioner. (And 21 other causes involving same questions.)

W. M. Holland, for the complainants.

P. A. Cowdrey, for the defendants.

The CHANCELLOR.—These cases came before me on applications for injunction to restrain the Corporation of the city of New York from proceeding to sell the lands of the respective complainants for the payment of assessments imposed upon them for various improvements in that city. Indeed, taken together, they embrace nearly every improvement in the city of New York for the last six years, either in opening, widening, or grading streets, or in constructing sewers, &c. The number of complainants whose rights are in controversy, exceeds *one hundred and seventy*, and the aggregate amount of the assessments the validity of which is contested is immense. I have therefore been obliged to look into each case to see if there was any thing contained therein to give this Court jurisdiction, and justify it in interfering by a preliminary injunction to restrain the corporation and its street surveyor, who has been made a defendant in most of the cases, from proceeding to collect the assessments by a sale of the property assessed in the usual way.

As the complainants have by law two years to redeem their property after it shall have been sold, there does not appear to be any good reason for granting preliminary injunctions at this time, even if the cases, as made by the bills, would, if unexplained, entitle them to perpetual injunctions at the final hearing. The object, therefore, of applying for injunctions at this time, must probably be to save the complainants from the payment of the extra interest, allowed by the statute from the time of the sale, in case it turns out that they are wrong in supposing that this court can interfere for their relief against the final payment of these assessments. This of itself would be a sufficient answer to these applications at this time. And for that reason I refused to continue the temporary injunctions allowed by the Vice Chancellor upon granting the orders to show cause; so that the sales might be made by the Corporation, subject to the equitable rights of the complainants, if

they had any, to relief upon the final hearing, or on the final disposition of those applications.

The conclusion, however, at which I have arrived in the case of *Van Doren and others vs. the Mayor &c. of New York*, and in the two other cases where the objection to the right to any relief whatever in this Court was raised by demurrer, renders it necessary to put the decision of these applications upon the ground that there is no necessity of preliminary injunctions, to restrain the sales for assessments, those sales not in themselves producing any damage to the complainants, but the restraining them at this time being productive of great and ***unnecessary inconvenience to the corporation***, if it shall turn out in the end that the complainants are in the wrong, either as to the facts or the law. Nor do I deem it necessary to put the decision upon the ground, that in about two thirds of these bills, several persons having no common interest in the lands assessed as belonging to them respectively, have been improperly joined in the same suit, and thereby rendered their bills multifarious. For that objection would be obviated if the defendants, instead of demurring on that ground, should answer the bills without insisting upon that objection. It is not perfectly clear, either, that these cases do not come within the principle of some of the decisions in this state, in which complainants having separate and distinct interests have been permitted to join in one bill to obtain relief which was common to all; though I think it is clear these bills in which the owners of separate and distinct lots have joined, would be considered multifarious, according to the English cases on the subject. I except however from this remark, the cases of *Turner vs. Robinson*, (1 Sim. and Stuart's Rep. 313,) decided by Sir John Leach, and disapproved of by his successor; (2 Sim. 330 note, and 3 Idem 466;) and the case of *Kensington vs. White*, in the Exchequer, (3 Price 164.)—Both of which cases appear to be inconsistent with the whole course of English decisions on the subject of multifariousness.

I put my refusal to allow the injunctions in these cases, therefore, distinctly upon the ground that there is nothing in the bill, in either case, sufficient to authorize this Court to assume jurisdiction over the subject matter of the suit or any part thereof, so far as I have been able to understand the allegations in each bill; that a general demurrer will lie in each case for want of jurisdiction; and that to entertain these bills for any purpose would be to overrule the decision of the Court for the Correction of Errors in the case of *the city of Brooklyn v. Meserole*, referred to in *Van Doren's case*, as having been decided by that Court at its late term, in December, 1841.

The application for an injunction in each and every of these causes must therefore be denied, WITH COSTS.

JUDICIAL DISCRETION.

"The judicial department has no will in any case. Judicial power, as contradistinguished from the power of the laws, has no existence. Courts are the mere instruments of the law, and can will nothing. When they are said to exercise a discretion, it is a mere legal discretion, a discretion to be exercised in discerning the course prescribed by law; and, when that is discerned, it is the duty of the court to follow it. Judicial power is never exercised for the purpose of giving effect to the will of the judge; but always for the purpose of giving effect to the will of the Legislature; or, in other words, to the will of the law."—9. *Wheaton*, 806.

That distinguished Jurist, MR. JUSTICE STORY, quotes the above, and says of it that it was finely remarked by MR. CHIEF JUSTICE MARSHALL, and appends to it, a reference to the Commentaries of the venerable EX CHANCELLOR KENT.

LEGISLATIVE POWER.

Mr. Justice Story quotes from the Federalist, No. 78, among others, a paragraph in the following words:—

"There is no position which depends upon clearer principles, than that every act of a delegated authority, contrary to the tenor of the commission under which it is exercised, is void. No legislative act, therefore, contrary to the Constitution can be valid. To deny this, would be to affirm, that the deputy is greater than his principal; that the servant is above his master; that the representatives of the people are superior to the people themselves; that men acting by virtue of powers, may do, not only what their powers do not authorize, but what they forbid."

JUDICIAL LEGISLATION.

"But the answer to these and similar objections, is, that such considerations should have weight with those whose business it is to make laws; but they should not control the opinions of those whose business it is to expound the laws."

The above is the closing sentence of a paragraph in the manuscript opinion written by JOHN SAVAGE, *late Chief Justice of the Supreme Court of the State of New York.*

It is an opinion worthy of the man.

The following is also from another manuscript opinion of this truly great man.

"Much of our difficulty arises from judicial legislation: if other laws are necessary, let the legislature pass them."

JUDICIARY.

"The Courts must declare the sense of the law; and if they should be disposed to exercise *Will* instead of *Judgment*, the consequence would equally be the substitution of their pleasure for that of the legislative body."—Federalist of No. 78, quoted by Mr. Justice Story with approbation.

CHANCELLOR'S DECISIONS.

We have given all the opinions delivered by His Honor Chancellor Walworth, in assessment cases for the last five years, in full.

It will be seen by a careful reading of these several opinions, that the decisions of the Chancellor, have fluctuated. The opinion given in the suit of Meserole and others vs. the Mayor and Common Council of Brooklyn contrasted with that given a short time afterwards, in that of Timothy Wiggin vs. the Mayor &c. of New York, are difficult to reconcile as respects the assessment being a cloud upon the title.

We do not undertake to say that the Chancellor was wrong in refusing to entertain the bill filed in the latter case, and also in the several subsequent cases disposed of by him, but we feel it our duty to say, that he erred in requiring the complainants to pay costs; inasmuch as he himself remarks, in the opinion he gave in the Van Doren case, that in deciding the Brooklyn case, in the hurry of business, he overlooked a decision. We have occasion to know that in the case of Wiggin vs. the Mayor &c., the Solicitor of Mr. Wiggin obtained from the clerk of the Chancellor at Saratoga a manuscript copy of the opinion of His Honor in the Meserole case, and it was in consequence of the tenor of that opinion that this bill was filed.

It will be borne in mind that the decision made by the Chancellor in Wiggin's case was nearly a year previous to the decision of the appeal in Meserole's case in the Court for the Correction of Errors.

The cases in which the Chancellor sustained the demurrers against the complainants, were many of them of a very aggravated character. The bills filed in these cases were full, and in several cases the complainants set forth that the applications for the appointment of commissioners were not authorized by the Common Council.

The Chancellor may have taken a correct view of these questions in the last decision, and not in the first; but the change of opinion was a difficulty, and quite a serious one, to the complainants.

These matters have passed from the courts to a Committee appointed from the Honorable the Senate of this State to investigate assessment abuses in the city of New York, and that committee have made their report. The members of that committee are distinguished members of the Court for the Correction of Errors: their report will be found in this volume.

We desire to speak of the worthy Chancellor of this State with great respect; he is a most estimable citizen, and, notwithstanding the constant toil and labor in his Court, finds time to attend the benevolent and charitable institutions, and the religious societies of the day—of the most of which he is a conspicuous and valuable member.

It is a wonder how CHANCELLOR WALWORTH accomplishes such an amount of labor. Should his labors increase with his years, when he shall have reached the constitutional barrier of this State, as to the term beyond which judicial officers of a certain grade shall be deemed incompetent, he will have worn himself out with labor.

The salary of the Chancellor of this great State is two th usand, five hundred dollars per annum, a mere pittance for such services.

When we take into view the labor imposed upon the Chancellor, the limited duration of his office, and the compensation attached to it, the wonder is that any person can be found willing to accept of the appointment.

The salary of the Chancellor should be increased to $4,500, at least, and that of the Judges of the Supreme Court to $4000.

VOL. 1. NEW YORK, APRIL 7, 1842. No. —

LEGISLATIVE POWER.

The Constitution of the United States contains this provision :—

"ARTICLE 1, § 1.—All legislative power herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives."

The Constitution of the State of New York contains these provisions.

"§ 1. *The Legislative power of this State shall be vested in a Senate and an Assembly.*"

Can the Senate and Assembly of the State of New York delegate the right or power to pass penal laws to any other body of men ?

By *Article* 1, *Sec.* 12. "Every Bill which shall have passed the Senate and Assembly, shall, before it become a law, be presented to the Governor; if he approve, he shall sign it; but if not, he shall return it with his objections to that house in which it had originated," &c. The Constitution then proceeds to say, that the objections of the Governor shall be entered "at large on their Journal, and they shall proceed to reconsider it. If after such reconsideration two thirds of the members present shall agree to pass the Bill, it shall be sent together with the objections to the other house, by which it shall likewise be reconsidered; and if approved by two thirds the members present, it shall become a law. But in all such cases, the votes in both houses shall be determined by *yeas and nays*, and the names of the persons voting for, and against the Bill, shall be entered on the Journal of each house respectively. If any bill shall not be returned by the Governor within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Legislature shall by their adjournment, prevent its return, in which case it *shall not become a law.*"

The Governor is thus vested by the Constitution with a negative upon the acts of the Legislature, but this negative is greatly qualified, inasmuch as the vote of two thirds of a bare quorum can pass a Bill after his refusal to sign in it, notwithstanding such refusal.

The Constitution provides that the members of the Senate and Assembly shall respectively be elected on a certain day, at a certain place, by persons possessing certain qualifications, and that they shall convene, &c. on a certain day, &c.

Thus the Constitution provides in what manner laws shall be enacted, and details with great precision the form and time. No Bill whatever can become a law of this State, unless enacted in the manner and form prescribed in the power thus given in the Constitution by the People, who are the Grantors of the Power.

The Constitution contains no power of substitution, no authority, or permission to the Senate and Assembly to delegate the power of making laws to any other body of men. The power is special, limited and restricted in every respect.

The Act of the Legislature of the State, passed April 7th, 1830, which is called the Amended Charter of the City of New York, contains this provision :—

"§ 1.—The Legislative power of the Corporation of the City of New York shall be vested in a Board of Aldermen and Board of Assistants, who, together, shall form the Common Council of the City."

The question then arises, can the Common Council of the City of New York pass laws? Can the Legislature of the State grant to the Common Council, or vest in that body the power to pass laws ?

To the first query, we answer in the negative, and add, that the City of New York is a part of the State of New York, and is governed by the laws of the State.

The reply to the second enquiry here propounded, is, that the Legislature of the State cannot in any manner or form, either direct or indirect, delegate the Legislative power vested in that body, that no power of substitution whatever is contained in the Constitution.

A citizen who executes a written power to another citizen to act for him, and in his name, if he intends the power thus given to be exercised by another, inserts a special clause authorizing his said agent and attorney, to substitute another, or others in his place and stead, &c.; but in the Constitution, the grantors of the power make no such provision in that instrument which contains the grant, and none can be presumed, or implied.

If the Common Council desire an ordinance to have the force of a law within the bounds of the City, that ordinance should be made into the shape of a Bill, and be acted on by the Legislature of the State, and approved by the Governor, in the manner and form prescribed by the Constitution.

The Common Council might with as much propriety pass an ordinance to regulate the rate of interest on money, as to pass an ordinance to regulate other matters than those which pertain to the management of the corporate property. The Common Council have no more right to pass an ordinance imposing a penalty on a citizen for a violation of their so-called laws, than a government of an incorporated bank has, and the passage of such ordinances are a violation of the Constitution of this State, and will be so held when taken to the high courts for adjudication, and this objection raised.

No one will for a moment doubt that there should be special laws relative to the City, but all such laws should be passed by the Legislature of the State, and not by the Common Council of the City.

The Common Council of the City of New York is not the Corporation of the City, but the powers of the Corporation are vested in the Common Council, to be exercised by that body in a certain manner, &c. And what, or who is the Corporation of New York? It is the citizens and inhabitants of New York, in whom is vested certain property which has been granted to them by the name and style of the Mayor, Aldermen and Commonalty of the City of New York, and the management of this Corporate property is committed to the Common Council and other particular officers.

The Common Council have the management of this Corporate property for the citizens and inhabitants, the same as the President and Directors of a Bank have of the capital stock which is the property of the Stockholders.

If this Corporate property consists of Market-houses, they have the right and power to say at what rate the stalls shall be leased and what hours the Market shall be opened, but they have no right to say that the citizen who owns a store shall not sell Pork, Beef, or Poultry in that store, nor can they pass any valid ordinance, making it a penalty for a citizen to sell meat on his own premises. We know that such ordinances have been passed by the Common Council, and that some of the Courts have held such ordinances valid, but such a decision would not be held valid by the Supreme Court of the United States.

There is a vast difference between the powers which may be vested by a Charter in a Political Corporation granted by an absolute government possessing unlimited power, and these which are possessed by our free Government exercising the limited and restricted powers conferred by the Constitution.

No one conversant with the provisions of our Constitution, will for one moment pretend to deny that even the Legislature of the State, is greatly restricted and limited in its power; and yet there are others, and some of them members of the common council, who pretend to say that the Common Council, a mere creature of the Legislature, can do that which the Legislatue of the State dare not attempt to do—this is, in effect, making the creature greater than the creator.

Hume, *De Lolme*, Sidney, Tucker and others, who have written much upon Legislative power, speak of it only in such cases as where its exercise is unlimited and unrestricted.

In our free country, this power is possessed by the people, and they are the grantors of power in all cases—the people are sovereign. The legislatures are mere grantees.

The Legislative power is, by able writers, said to be arbitrary, overwhelming power, and for this reason it was restricted, limited and defined in our Constitutions.

If it is necessary that municipal corporations, created by the Legislature of this State, should possess legislative power over a portion of this State, then the Constitution of the State should be amended, and this provision incorporated in that instrument; or if it is desirable that the Senate and Assembly should be authorised to delegate the legislative power vested in these bodies by the Constitution, then, in that case, a suitable clause to that effect should be embodied in that instrument.

If the Legislature were to frame a bill containing all necessary general provisions for the incorporation of all cities, towns and villages in this State, and frame a code of laws which should have a special application to the districts embraced within the chartered limits of each, it would reduce the labors of legislators greatly.

THE VETO POWER.

Much has been written and said in relation to the Veto power vested in various Executive officers.

We propose to examine those powers as now vested in the President of the United States, in the Governor of the State of New York, and in the Mayor of the City of New York.

In England, the refusal of the royal assent to a bill passed by Parliament, by the Sovereign, is absolute, and besides, the Sovereign has the power to prorogue Parliament, and even to dissolve that body and order a new election.

In France, the Constitution of 1791 provided that if the King refuse his assent to a bill passed by the Legislative Chambers, it is conclusive for that term; but if the Legislative Chambers enacted the same bill, in the same form, at two successive sessions, for two successive terms, it should become a law of the realm, notwithstanding the refusal of the royal assent.

In the colony of New York, the first Legislative Assembly which printed a journal of its proceedings, record a Veto of the Governor and Council in 1691, which was in the shape of an amendment made to a bill passed by the assembly, in relation to public improvements in the City of New York. This amendment of the Governor and Council was concurred in by the assembly, *unanimously*, and was subsequently confirmed by the King of England, and remained a law of the colony and State of New York for near a century.

The Constitution of the State of New York, adopted in 1777, contains the following provision:

"That the Governor, for the time being, the Chancellor, and the Judges of the Supreme Court, or any two of them together with the Governor, shall be, and hereby are, constituted a council to revise all bills about to be passed into laws by the Legislature; and, for that purpose, shall assemble themselves, from time to time, when the Legislature shall be convened; for which, nevertheless, they shall not receive any salary or consideration, under any pretence whatever. And that all bills which shall have passed the Senate and Assembly, shall, before they become laws, be presented to the said council for their revisal and consideration; and if, upon such revision or consideration, it should appear improper to the said council, or a majority of them, that the said bill should become a law of this State, that they return the same, together with their objections thereto, in writing, to the Senate or House of Assembly, in which soever the same shall have originated, who shall enter the objections sent down by the council, at large, in their minutes, and proceed to re-consider the said bill. But if, after such re-consideration, two thirds of the said Senate or House of Assembly, shall, notwithstanding the said objections, agree to pass the same, it shall, together with the objections be sent to the other branch of the Legislature, where it shall also be reconsidered, and, if approved of by two thirds the members present, shall become a law."

"And in order to prevent unnecessary delays—

"*Be it further ordained*, That if any bill shall not be returned by the Council within ten days after it shall have been presented, the same shall become a law, unless the Legislature shall, by their adjournment, render a return of the said bill within ten days impracticable; in which case, the bill shall be returned on the first day of the meeting of the Legislature after the said ten days."

"The Governor to convene the Senate and Assembly on extraordinary occasions; to prorogue them from time to time, provided such prorogation shall not exceed sixty days in the space of any one year."

Thus the former Constitution of this State made the Governor, Chancellor and Judges of the Supreme Court, a council of revision, and gave to the Governor the power to prorogue the Legislature that the members might return to and consult their constituents. This negative power, thus vested, was not considered objectionable, but on the contrary, when the new Constitution was adopted, in 1821, it was changed and vested solely in the Governor, but the power to prorogue the Legislature was taken away.

The vote required to pass the bill, notwithstanding the objections, under the present constitution is the same as under the former, except that it is required that the vote shall be taken by ayes and noes, and the names of the members voting for or against the bill shall be recorded. The vote required is only two thirds of the members present, which may perhaps be but a minority of each house, or a bare majority form a quorum, and it is only two thirds of this bare majority which is required.

The exercise of the Veto power by the Governor of this State is therefore only that of a qualified negative.

The Veto power of the President of the United States is also a qualified negative. The Constitution of the United States is, however, silent as to the requirement of the Veto taken on the re-consideration of a bill returned by the Executive being by a vote of two thirds the members present or two thirds the members elected.

It would seem that the safer construction would be two thirds the members elected, but we understand that the more liberal and extended construction has been adopted by Congress.

So salutary has this qualified negative, possessed by the President, been found, that, in the experience of more than half a century, the exercise of this power has not been overruled by a constitutional vote by Congress.

The Constitution of the United States is very explicit with regard to the mode in which the vote of re-consideration shall be taken, and that the votes shall be taken by ayes and noes, and recorded in the journals.

When the provisions of the Constitution were debated in the convention, it was proposed to vest the qualified negative in the President and some other department of the Government, but this was strenuously opposed and overruled, and was finally rejected by a vote of eight States against three.

There is another qualification of this negative of the President, which is, that an entire new house of Representatives are elected by the people during his term of office, which, if this exercise of the qualified negative is not satisfactory to the people, they have the opportunity of thus overruling it, and also the term of office for which the Executive himself shall have been elected, will have an end every four years. Thus the frequency of the elections gives additional qualifications to this already qualified negative.

In the amended charter of the city of New York, although (as Mr. Samuel Stevens remarks in an article under the signature of "Third Ward," published in the New York American in 1829, when the city convention were sitting) they were only framing a bill for the State Legislature to pass into a law, that body took the United States Constitution for a model whereby to form a municipal charter; and in vesting the mayor with a qualified negative upon the acts of the Common Council, they made some alterations in that provision, which were, to require the objections of the executive to be published in the newspapers, and that the vote should be that of a majority of the members *elected* to each board, and also of requiring that *at least ten days* should elapse before the board to which the act should have been returned should proceed to re-consider the same. This change of the qualified negative of the Mayor makes his veto at the present moment a nullity. The City Charter, as the act of the Legislature is called, omits to state any thing in relation to acts passed by a Common Council, the members of which whose term of office may expire during the ten days which the Mayor is allowed to consider a proceeding, and decide whether or not he will give his assent. This was an oversight, and there can be no doubt but an act remaining in the hands of the Mayor unsigned when his term of office expires, would be inoperative.

The distribution of power is one of the great principles on which all free governments are based, and we propose to discuss this subject in a future number under that head.

SACREDNESS OF PRIVATE PROPERTY.

That distinguished citizen and eminent jurist, JUDGE STORY, one of the Justices of the Supreme Court of the United States, in his admirable Commentary upon the Constitution of the United States, thus remarks:—

"The concluding clause is, that private property shall not be taken for public use without just compensation. This is an affirmance of a great doctrine established by the common law for the protection of private property. It is founded in natural equity, and is laid down by jurists as a principle of universal law. Indeed, in a free government, almost all other rights would become utterly worthless, if the government possessed an uncontrollable power over the private fortune of every citizen. One of the fundamental objects of every good government must be the due administration of justice; and how vain it would be to speak of such an administration, when all property is subject to the will or caprice of the legislature and rulers."

Mr. Justice Story cites Blackstone, Kent, Rawle, and also several cases which had been adjudicated.

The practice of the last few years in the city of New York to enforce the collection of sham-assessments for fictitious improvements, by a sale of the property pretended to be benefitted for terms of thousands of years, equal to, and in effect, selling the fee simple absolute, is taking private property for public use without just compensation, and in truth is absolute *confiscation*. It matters not to the owner whether his land is taken or his money, both are alike private property; for if he pays the assessment, in most cases he pays the value of the land in paying the assessment, and thus, in fact, re-purchases the land by redeeming it. Vast quantities of lands on the island of New York, have been assessed to such an extent that the interest of the assessment exceeds the value of the land, and also large quantities of other lands are assessed for the pretended opening of streets, avenues, and public squares, (which are not open or needed,) in greater sums than the land could be sold for.

The abuses have been so enormous, so flagrant, so high-handed, that the real estate has lost its value by the insecurity thus produced.

In the case of the streets and avenues, up to and including Forty-second street, referred to in the report of the committee from the Senate of this State, twenty-seven setts of Commissioners (in all eighty-one) were appointed to make an assessment for opening the streets and avenues in that district; whereas the committee of the common council reported in favor of but one sett, (three commissioners,) and did not, in fact, pass any resolution for an application to the Supreme Court for the appointment of even this one set.

It is time such proceedings had an end.

Anecdote of the reigning king of Prussia. —The following anecdote we cut from the columns of the Albany Daily Advertiser. It belongs to go along side of assessment matters, showing a contrast in the judicial proceedings of the courts of our State, compared with that of a kingly government.

"We have much pleasure in laying before our readers an interesting anecdote, which has been communicated to us by a gentleman recently from Berlin. Some time since an effort was made to get rid of a windmill, the close approximation of which to the royal palace rendered it in some degree a nuisance, and certainly an eye-sore. Overtures were accordingly made to the sturdy yeoman for the purchase of the obnoxious property; but whether it was that the man was possessed of a strong spirit of obstinacy, or was really deeply attached to his old family habitation, the result was that the offers, tho' tempting, were again and again refused. There are very generally some individuals attached to a court who are ready to suggest remedies, direct or indirect, for inconveniences or annoyances offered to royalty. Accordingly, upon a hint from some minion, a lawsuit was commenced against the obstinate miller for the recovery of certain sums alledged to be due for arrears of an impost on that portion of crown land which it was suggested was occupied by the mill in question. The sturdy holder of the "toll dish" was not altogether without friends or funds, and he prepared vigorously to take his stand in defence of his rights. The question came in due time before the courts of law, and the plaintiff having completely failed to establish any right on behalf of the crown, the miller obtained a verdict in his favor, with a declaration for payment of his costs in suit. This was certainly no small triumph, and merrily went round the unfurled sails of the old mill, and well pleased no doubt, was the owner with the sound, as they went whirling and whizzing under the influence of the gale, which certainly seemed to blow strongly in his favor. But he was not the first who has found that when drawn into a lawsuit, particularly with so formidable an opponent, a man is more likely to "gain a loss" than escape scot free. What with extra expenses, interruption of business, and rejoicings after the victory, the miller found himself pressed by considerable difficulties, and after in vain struggling a few months against the pressure, he at length formed a manly resolution, gained access to the monarch, and, after roughly apologizing for his having thwarted his majesty's wishes, frankly admitted that his wants alone had rendered him complient, but that he was prepared to accept the sum originally offered for the property. The king, after conversing with the miller a few minutes, hand d him a draught for a considerable amount, saying, "I think, my honest friend, you will find that sufficient to meet the emergency; if not, come and talk to me again on the subject. As to the mill, I assure you that I will have none of it. The sight of it now gives me more pleasure than it ever occasioned pain; for I see in it an object that assures me of ***a guaranty for the safety of my people, and a pledge for my own happiness by its demonstration of the existence of a power and a principle higher than the authority of the crown, and more valuable than all the privileges of royalty.***"—[London Paper.]

COMMISSIONERS OR A JURY.

Taking land for Public Avenues, Streets and Squares.

The position of the Assessment question, and the highly important opinions of Chief Justice NELSON, Justice BRONSON and Justice COWEN *of the Supreme Court.*

The Constitution of 1777 contains this provision;—

"That trial by Jury in all cases in which it hath heretofore been used in the colony of New York, shall be established and remain inviolate forever, and further, that the Legislature of this State shall at no time hereafter, institute any new court or courts, but such as shall proceed according to the course of the common law."

The act of the General Assembly of the Colony of New York, passed Oct. 1st, 1691, and confirmed by William III, May 11th, 1697, contains this provision:

"And for other ground, the Mayor, Aldermen and Common Council shall and may treat and agree with the owner and others interested therein; and if there shall be any person that shall refuse to treat in the manner aforesaid, in such case the ***Mayor and Aldermen, in their Court,*** are hereby authorized by virtue of this act, to issue out a warrant or warrants to the Sheriff of the said city, who is hereby required to empannel and return a jury before the *said Court of Mayor and Aldermen*, which Jury, upon the oath to be administered by the said court, are to enquire and assess such damages and recompense as they shall judge fit, to be awarded to the owners and others interested, according to their several and respective interests and estates in the same, as by the said Mayor, Aldermen and Common Council, shall be adjudged fit to be converted for the purposes aforesaid, and such *verdict of the Jury, and judgment of the said Court of Mayor and Aldermen thereupon*, and the payment of the said sum or sums of money so awarded and adjudged to the owner or others having estates or interest or tender or refusal thereof, shall be binding" &c. *This Colonial act was in force when the Constitution of* 1777 *was adopted.*

The trial by jury extends to property, as well as persons, and therefore the act of 1807 and 1813, authorizing the appointment of three commissioners to take land instead of a jury, is unconstitutional and void.

The Constitution of 1821 *contains these provisions:*—

"The trial by jury, in all cases in which it has been heretofore used, shall remain inviolate forever, and no new court shall be instituted, but such as shall proceed according to the course of the common law." Art. 7, § 12.

"The Governor shall nominate by message in writing, and with the consent of the Senate, shall appoint all *Judicial officers* except Justices of the peace." Art. 4, § 7.

In the decision of the Supreme Court in January, 1841, in the matter of the application of Elmendorf and others for a Certiorari to be directed to the mayor, aldermen and commonalty of the city of New York,

point skilful and competent persons Assessors to make estimates and assessments for building sewers, regulating streets, &c., and the Assessors so appointed are directed to assess the expense of the work, &c., on the owners and occupants of houses and lots deemed to be benefitted thereby, and to certify their assessments in writing to the mayor, aldermen and commonalty, in common council convened; and such assessment, when ratified or confirmed by the said Common council, shall be a lien upon the houses and lots so assessed, and in case of neglect or refusal to pay such assessment, the mayor, recorder and aldermen, or any five of them, are authorized to issue a warrant of distress under their hands and seals, which may be levied upon the goods and chattels, &c. The act of April 16th, 1816, provides further, that in case the owner or occupant, on being twice called upon, refuses or neglects to pay the assessment, his lands may be sold therefor.

Now we insist that in this, the Common council and the assessors are both acting in a *judicial capacity*, and are as much a court as the Commissioners of sewers; and the assessment, when confirmed, is in the nature of a Judgment, being made a lien upon the land, and the warrant being in substance an execution.

We think we have stated enough here to show that Commissioners of Estimate and Assessment cannot take lands for public use from any individual, without his consent, nor can they impose any assessment on adjoining owners: that whenever lands are required in the city of New York, for public use, *a jury* is the only mode of proceeding. And besides, if it should be held that commissioners could take land, such commissioners *can only be appointed by the Governor.* Thus the proceedings of commissioners *are void.*

As to Assessors, these too are *judicial* officers, and the members of the Common council also act or assume to act in a *judicial* capacity, in confirming assessments, issuing warrants, &c. These officers are *none of them appointed by the Governor*, and the Constitution is explicit on this head; it excepts Justices of the Peace, Special Justices, &c.

It is of no use to have a written Constitution, if officers who are sworn to support it will disregard its great principles and requirements.

We think that the learned Judges of the Supreme court were right in *quashing* the writs they had allowed, and in refusing those which were applied for, and that the assessments are absolutely VOID. We are aware that we differ from the learned counsel on both sides in the views now put forth, but it is our deliberate opinion, after examining the question very extensively.

We also think that it was the duty of the court to settle the question of the legality of these assessments, instead of enacting a statute of "PUBLIC INCONVENIENCE"—which enactment most assuredly is not authorized by the Constitution of the State, nor is it sanctioned by public opinion. Neither public or private inconvenience have any place in such cases. Let justice be done—let the law be strictly complied with.

Judicial powers of the Board of Aldermen and Board of Assistants, composing the Common Council of the City of New York.

The following sections of the act, Entitled "*An ACT to reduce several Laws relating particularly to the City of New York into one Act*"—passed April 9th, 1813—constitute all the provisions of the Statute authorizing the imposition of assessments on the owners or occupants of houses and lots for the class of improvements therein specified, and there is no other provisions of law which authorize any assessment to be imposed by the mayor, aldermen and commonalty for this class of improvements.

§ 175.—*And be it further enacted*, That it shall be lawful for the said mayor, aldermen and commonalty, to cause common sewers, drains and vaults, to be made in any part of the said city, and to order and direct the pitching and paving the streets thereof, and cutting into any drain or sewer, and the altering, amending, cleansing and scouring of any street, vault, sink or common sewer, within the said city; and the raising, reducing, levelling or fencing in, any vacant or adjoining lots in the said city; and to cause estimates of the expense of conforming to such regulations to be made, and a just and equitable assessment thereof among the owners or occupants of all the houses and lots intended to be benefitted thereby, in proportion, as nearly as may be, to the advantage which each shall be deemed to acquire; and the said mayor, aldermen and commonalty shall appoint such skilful and competent disinterested persons as they shall or may think proper to make every such estimate and assessment, who before they enter upon the execution of their trust, shall severally take an oath before the mayor or recorder of the said city, to make the said estimate and assessment fairly and impartially, according to the best of their skill and judgment; and the said persons, after having made such estimate and assessment, shall certify the same in writing to the said mayor, aldermen and commonalty, in common council convened, and being ratified by the said council, shall be binding and conclusive upon the owners and occupants of such lots so to be assessed respectively, and shall be a lien or charge on such lots as aforesaid; and such owners or occupants shall also respectively be liable upon demand, to pay the sum at which such houses or lots respectively shall be assessed, to such person as the said common council shall appoint to receive the same; and in default of such payment or any part thereof, it shall be lawful for the mayor, recorder and aldermen of the said city, or any five of them, of whom the mayor or recorder shall be one, by warrant under their hands and seals to levy the same by distress and sale of the goods and chattels of such owner or occupant refusing or neglecting to pay the same, rendering the overplus (if any), after deducting the charges of such distress and sale to such owner or occu-

pant, and the money, when paid or recovered, shall be applied towards making, altering, amending, pitching, paving, cleansing and scouring such streets, and making and repairing such vaults, drains and sewers as aforesaid, and raising, reducing, levelling or fencing in, such lots as aforesaid. *Provided however*, That nothing herein contained shall affect any agreement between any landlord and tenant, respecting the payment of any such charges, but they shall be answerable to each other in the same manner as if this act had never been made; and if the money so to be assessed be paid by any person, when by agreement or by law the same ought to have been borne and paid by some other person, it shall then be lawful for the person paying, to sue for, and recover the money so paid, with interest and costs, as so much money paid for the use of the person who ought to have paid the same; and the assessment aforesaid, with proof of payment, shall be conclusive evidence in such suit.

§ 176. *And be it further enacted*, That if upon completing any such regulation, it shall appear to the said mayor, aldermen and commonalty, that a greater sum of money had been *bona fide* expended in making such regulation than the sum estimated and collected aforesaid, it shall then be lawful for the said mayor, aldermen and commonalty, to cause a further assessment equal to such excess, to be made and collected in manner aforesaid; and in case the sum actually expended shall be less than the sum expressed in such estimate, and collected as aforesaid, the surplus shall forthwith be returned to the persons from whom the same were collected. or their legal representatives.—2 R. L. p. 407,

The sections above quoted contain a special power, given to a select class of persons, to make certain improvements particularly named in manner and form therein stated.

It will be noticed that this is a special power given by the Statute to a select class of persons. The mayor, aldermen and commonalty, as then known and entitled, were the mayor, recorder, aldermen and assistant aldermen of the city of New York. These public officers composed the city council, and assembled in one body in the same council chamber.

The mayor, and also the recorder of the city, were appointed by the State council of appointment—the aldermen and assistants were elected by the freeholders of the respective city wards.

In 1821 the Constitution of the State was remodelled, or rather, a new Constitution was formed, one of the provisions of which was that the mayors of cities should be appointed by the respective common councils of each. This provision, as to the city of New York, was altered in 1833 by an amendment of the State Constitution in that particular; and now it is provided that the mayor of the city of New York shall be elected annually by the People.

The recorder, by the Constitution of 1821, shall be appointed by the Governor and Senate.

By the Amended Charter of the city of New York [Session Laws of 1830, ch. 122] the legislative power of the corporation is vested in a board of aldermen and board of assistants who, together, shall form the Common council of the city.—§ 1.

By the fifteenth section, of the same act, neither the mayor nor recorder shall be members of the Common council after the second Tuesday of May, 1831.

By the 7th section, of the act as above, the boards are required to keep a journal of their proceedings and to meet in separate chambers; and, by section twelve, all acts, before they shall take effect, shall be first approved by the mayor, &c. &c.

The apportionment of judicial officers under the Constitution of 1821.

By the 7th section of Article IV. of the Constitution, the Governor shall, by message in writing, nominate, and, with the consent of the Senate, appoint all judicial officers except justices of the peace; by section 14 special justices and assistant justices of the city of the city of New York are excepted, and by sec. 1 of Art. V. the members of the court for the Correction of Errors are excepted.

We here raise two Questions, viz:—

1. *Are Assessors, who are appointed by the board of Aldermen and board of Assistants, with the Mayor's approval, Judicial officers?*

2. *Do the boards of Aldermen and Assistants, sitting in separate chambers, in ratifying Assessments made by Assessors appointed by themselves, and the Mayor also in approving such acts, act judicially?*

To the first question, we answer that the 175th section above quoted authorizes an estimate of the expense of the work, as a preliminary measure, previous to making the assessment of the expense upon the owners and occupants intended to be benefitted thereby, by skilful, competent, disinterested persons, to be appointed by the mayor, ald. and com.; and this assessment is to be made in such proportion as they deem the advantage acquired by such owner or occupant. Their estimate and assessment shall be certified in writing to the mayor, aldermen and commonalty, in Common council convened, but has no binding force until ratified by said Common council. This ratification is, therefore, to all intents and purposes, a judgment, which is by the same section made a lien upon the houses and lots of such owners and occupants, &c., and upon this ratification or judgment, a warrant of distress is authorized to issue under the hands and seals of the mayor, recorder and aldermen, or any five of them, of which the mayor or recorder are to be one; and by the act of April 12th, 1816, the mayor, aldermen and commonalty, in default of payment of such assessment, are authorized to sell or lease the houses or lots so assessed for an unlimited number of years, even to the end of time. The Constitution adopted in 1777, and which was in force when these two acts above referred to were passed, contained no limitation as to the appointment of judicial officers, or at least we have found no such provision in that instrument. At the time of the passage of these two acts the mayor and recorder were both appointed by the council of appointment, and after the adoption of the new Constitution in 1821 the recorder was appointed by the Governor and Senate as a judicial officer, and continued to be a member of the Common council; but the amended charter of April 7th, 1830, *excluded* that officer after the second Tuesday of May from a seat in the Common council, and he is now no longer a member of that body; nor does any Judicial officer hold a seat in either board composing the Common council: therefore, there is no authority under the Constitution for the Common council to act in a judicial capacity, the law of 1813 and 1816 being both abrogated by the Constitution of 1821.

The Assessors, therefore, as standing alone, are not judicial officers; but their acts, taken in connection with the proceedings of the mayor, aldermen and assistants, constitute proceedings which are, in their operation and effects or consequences, the highest exercise of judicial authority in matters pertaining to the rights of property.

The Answer to the second question has been mainly anticipated in the reply to the first question.—The Amended Charter was the result of measures growing out of complaints in the assessment made for building Canal street sewer, which was an assessment of near one hundred thousand dollars by assessors appointed under the 175th section before quoted which had been confirmed by the Common council composed of the mayor, recorder, aldermen and assistant aldermen. The dissatisfaction which this assessment produced caused applications to be made to the Common council for an amendment of the City Charter, and accordingly an application was made by that body (under the corporation seal) to the Legislature of the State. This application was accompanied by a bill, which was passed by the Legislature, conditioned to become a law if the majority of the electors of the city of New York by their vote by ballot signified their acceptance of it. This they did not do—less than 700 votes, of the whole number of voters in the city, were cast in its favor. This was in 1824.

In 1828 the Legislature, on the application of the Common council, re-enacted the same bill, with the same conditions, and it was again submitted to the electors of the city of New York, and by them again rejected.

This bill provided for the exercise of all the powers which had ever been conferred by charter or by law on the mayor, aldermen and commonalty, or the mayor, aldermen and commonalty in Common council convened, or the mayor, recorder, aldermen and assistant aldermen, thereafter to compose two boards meeting in separate chambers, with concurrent jurisdiction.

The next proceeding was the Convention which met in June, 1829, to frame a bill for the Legislature to pass into a law amending the City Charter, and here a great mistake was made in taking the Constitution of the United States for a model to frame a bill for the Legislature to pass into a law, unless we assume it to be conceded that the business of the Common council was to be confined to the affairs of the corporation as a corporation

Had the complainants in these cases derived benefits equal to the assessments, and then complained of the exercise of a power unknown to our laws, there would have been some little apology for withholding relief; but in these cases the extreme of the reverse is the case. The complainants are injured, and, notwithstanding, are called upon to pay such immense sums of money in the shape of assessments on their lands as to amount to a repurchase of their own lands for cash.

The Common council, by their solemn act, deliberately considered and unanimously adopted, admit that property has been assessed beyond its value, and they resolved that the Counsel be directed to take measures under the direction of the finance committees to obtain a review of the assessment in 1841.

This is an acknowledgment of improper proceedings by the very body who confirmed or ratified the assessments made by their own officers whom they had appointed Assessors.

In the enlightened governments of Europe we hear of no such doctrine being set up, to deprive citizens or subjects of their estates, as that of "public inconvenience," or even of public necessity. Private property, by the governments of Europe, is held sacred and inviolate, and in no case can private property be taken for public use unless the most ample compensation is first made to the owners; and such is the great and fundamental doctrine in our own land—such is the law of the Constitution—such is the will of the People!

It has been said that the owners and occupants of houses and lands which are assessed for this class of miscalled improvements receive compensation in the advantages which the property derives by its increased value. Where is the increased value in cases where the assessment imposed exceeds the value of the land deemed to be benefitted? And where, we again ask, is the compensation in other cases in which the bare interest of the assessment exceeds the value of the property assessed?

When property is offered to be leased by the Corporation for a period extending throughout all time to any person who will pay the assessment, and none can be found willing, as it were, to accept the land as a gift on such conditions,—is it not evidence of the most convincing and conclusive character that the assessment has been most shameful and unjust—that it is nothing short of an act of confiscation? Is either the letter or the spirit of the law complied with in the making of the assessment? Certainly not. The assessment is a mere arbitrary apportionment of the contract price of certain work upon a selected piece of ground by mere mathematical calculation. The assessors are required to be skilful, competent, disinterested. Why these qualifications if the assessment is a mere apportionment, a mere distribution by figures without regard to damage or benefit? Most preposterous! and yet we are told that it will be a "public inconvenience" to set aside such assessments, or to compel the Corporation to review their proceedings.

When our Government made a claim upon Mexico to make restitution and satisfaction to our citizens for the spoilations committed by her officers upon their private property, there was no such doctrine set up by the Mexican government, or its constituted authorities, as "public inconvenience"; and if it had been pleaded, it would have only aggravated the injury.

Private property is sacred in all civilized countries, and also in some of the most barbarous; and no government can long exist which does not respect, and so hold it. It is the very foundation of government, and as Mr. Justice Story very justly remarks in his admirable Commentary on the Constitution—"Indeed, in a free government, almost all other rights would become utterly worthless if the government possessed an uncontrollable power over the private fortune of every citizen."

In principle, there is no difference between taking land from a citizen and converting it to public use without compensation and taking money. Both are alike private property, and both are alike protected by the Constitution. It makes no difference to the citizen which is taken, his money or his land.

During the last war, when the American army found it necessary to destroy the dwellings and other property of our citizens, to prevent it from falling into the hands of the enemy, in all cases full and complete compensation was by our Government made to the owners. These sufferers were not told that they are compensated for the loss of property thus destroyed by the protection which is afforded by the Government to their persons and their other property.

These assessments upon private property, which have been ordered by the common council and ratified by that body, are large in amount. In some cases, a single individual has been assessed the sum of thirty thousand dollars; others ten and fifteen thousand dollars each.

Lands of citizens have thus been invaded. The soil, which before had been productive, has been covered several feet deep with gravel and sand, and a charge made for this kind of covering by the load, at a rate that actually makes it a complete confiscation. We have now before us a paper containing an advertisement by the street commissioner of a piece of land to be sold for the non-payment of an assessment which is stated to contain 165 lots, equal to about ten and a half acres. This land is situate between 115th and 124th streets and the Fifth and Eighth avenues, being near seven miles from the City Hall. The assessment is stated at sixteen thousand and sixty-three dollars, which is about one hundred dollars per lot, or sixteen hundred dollars per acre. The advertisement states that the assessment was confirmed on the 31st of May, 1837, since which time it has been on interest, at the rate of 7 per cent. per annum. This then, is on interest five years and three months, which amounts to the sum of five thousand nine hundred and three dollars and fifteen cents, which is near six hundred dollars per acre. This property was advertised to be sold for this assessment in June, 1840, and was offered for sale without getting a bid. Although this property is on one piece of

gr ound, it was advertised for sale as 165 lots. The charge for the advertisement alone was two dollars per lot, which was equal, for the piece of land, to three hundred and thirty dollars for the advertising alone!

The same land was again advertised for sale, for the same assessment, in October 1841, but could not be sold for the want of bidders.

This land belongs to the estate of a person some years since deceased.

This assessment is one of those referred to in the following proceedings of the common council.

—

From Senate Doc. No. 100, *page* 277.

Preamble and Resolutions for paying Contractors and applying to the Legislature for act to buy under sales for assessments.

Whereas, there are large amounts due several persons, contractors for building sewers, regulating streets and avenues, and paving and setting curb and gutters, and also for filling low and sunken grounds, as set forth in the original schedule, prepared by the street commissioner, and which improvements were made, and work done in pursuance of the several respective ordinances of the common council, and which were to be paid for by assessments on the property benefitted, and as soon as the amounts of said assessments were collected.

And whereas, the assessments levied in pursuance of said ordinances have been for some time confirmed, but collection of the same, only in part made, and most of them returned as unpaid and uncollectable, and the property liable thereto, and on which, the same were a lien, agreeable to the laws of the state, advertised, and offered for sale by the street commissioner, at the recent sale of property for assessments; but the amount due on said assessments could not be realized, by reason of their being no bids at such sale for said property, *the amount of said assessments being more than the present market value of said property so liable*, in consequence whereof the said contractors are still unpaid; the common council, in order to relieve them, and anticipating the collection of said assessment, and which may hereafter be made, and trusting that they may be authorized by the Legislature, to raise by tax the amount which they may so advance, and to secure themselves and city treasury, from any loss, by being authorized to purchase in at any sale, such property, for which there may be no bids; do adopt the following resolutions:

1. *Resolved*, that the counsel prepare a law, under the direction of the law committee, to be applied for, to the Legislature, authorizing the corporation to become purchasers of property which may hereafter be offered for sale, for payment of assessments agreeable to law; to refund them for any advances which may have been made by them, to contractors or others, for the improvement for which such assessments were imposed. Such law to contain all needful provisions to secure the rights of parties interested therein, and that such property be held as a trust fund to repay such advances.

2. *Resolved*, that the comptroller be authorized to pay the several contractors the amounts respectively due them, for the several improvements made in pursuance of the ordinances of the common council, in all cases where the property assessed therefor, was benefitted by such improvement, has been offered for sale, and could not be sold by reason for the want of any bid, at the recent sale of property for assessments, or in cases, in which the sale of such property has been enjoined by the Court of Chancery, such payment to be made on the first day of October next.

3. *Resolved*, that the comptroller include the estimated amount required for the above payment, in the amount of the next annual tax bill, to be applied for to the next Legislature.

4. *Resolved*, that the counsel to the corporation, under the direction of the law committee, *take measures to obtain a revision of assessments, mentioned in the annexed schedule as may be judged expedient, and agreeable to law.*

Adopted by the board of assistants, February 25, 1841.

Adopted by the board of aldermen, February 22, 1841.

Adopted by the acting mayor, February 25, 1841.

Volume 8, of the printed proceedings of the common council, printed by authority of the common council, page 121 and 122.

December 24, 1841, compared with the printed Document in vol. 8, of proceedings of common council, page 121 and 122, and correct. G. FURMAN, *Chairman.*

—

We find in the street commissioner's advertisement for the sale of lots in June, 1840, a lot 24 feet 6 inches front, by about 100 feet deep, advertised for sale for an unpaid assessment for filling in Fifth street. The assessment is one thousand eight hundred and forty-five dollars and sixteen cents—confirmed June 28th, 1830—interest to June 28, 1840, being ten years, at 7 per cent. per annum, $1291.62, which makes the amount, in all, $3136.78. This lot is on the corner of avenue B, and is hardly worth one quarter of the amount.

We notice in another case for the regulating and repaving of Chapel street, that Mr. Andrew Lockwood, who owns 14 houses of a block fronting on that street, was assessed the sum of $1480.90. Instead of being benefitted that amount, his property was actually injured more than ten thousand dollars.

Mr. Riley, in the same street, was assessed for the same proceeding $732.71, by which, instead of being benefitted that sum, his property was injured more than five thousand dollars. In fact, ten thousand dollars would not make him good for the injuries he has suffered by the proceeding.

Other citizens in the same street have also suffered largely by the same proceeding. In this case, the contract price for the repaving of the street was five times that which had been paid for repaving the same street previously, and the work of the first repaving was much better than the last.

We notice another case in the Eighth avenue. Mr. Scott was assessed on a piece of ground —— feet front, $——— for regulating this avenue. Some years since, this very property was taxed to pay for working the Third avenue, which was such a proceeding in every respect as the Eighth avenue. In this case of Mr. Scott's, the lot was sold for the assessments, and he redeemed it by paying over seven hundred dollars. In the case in which this property was sold the assessment was never signed, or certified by the assessors, and still the common council ratified it, without any examination; and the street commissioner, who was one of the assessors named in the ordinance for making the estimate and assessment, actually sold the land under these proceedings.

The assessment for building a sewer in 122d street.—This sewer is, part of it, built on piles, over a salt meadow, and above the ground which is assessed for draining. Even the bottom of the sewer is higher than the ground which is assessed, and the water cannot be got into the sewer from the surface unless it is pumped into it by hand or machinery. In this case, the sewer was actually in a state of dilapidation before the assessment was confirmed. Some of the lands assessed for the sewer are actually separated from it by an immense ledge of rocks, and the waters which fall on this ground have a contrary course from the sewer.

——o——

MEMORIALS TO THE LEGISLATURE.

The following is a copy of Six Memorials presented to the Legislature at the last session by the Hon. Gabriel Furman. The Anti-Assessment Committee deem it necessary to state, for the information of Honorable Members of the Legislature who may not be familiar with the names of the signers, that four of them are distinguished Ex-Mayors of the city of N. York, another Ex-Recorder, and another the present Recorder. Nineteen have been Members of the Board of Aldermen, twelve have been members of the Board of Assistant Aldermen and of the Corporation; ten are Presidents of Banks, twenty-eight Presidents of Insurance Offices, the Assistant Register of the Court of Chancery, the Postmaster of the city, and Collector of the Port, thirty-six of the most respectable commercial and mercantile firms in the city, and a great number of the most highly respectable citizens; — showing most clearly the state of public opinion on this most highly important question.

Robert Smith, *Chairman.*

ORABLE, THE LEGISLATURE OF THE STATE OF NEW YORK:

City of New York, most respectfully represent to your Honorable Body, that the extraordinary and
ercised by the Corporation of the City of New York, in assessing private property for what are called
estrained by Legislative enactments.
d in various public officers in Assessment matters have been greatly abused, and the consequences
the value of real estate, and render titles doubtful and insecure.
t very full exhibits of the disastrous consequences of the abuses complained of will be made to your
e subject may be taken into the serious consideration of the Legislature, and that the Legislature may
he owners of real estate, and such as in their wisdom may seem meet. And in duty bound, &c.

ASSESSMENTS.

REPORT

Of the Select Committee from the Senate of this State, appointed to investigate Assessment Abuses in the City of New York,

COMPOSED OF THE

HON. GABRIEL FURMAN,
HON. GULIAN C. VERPLANCK,
HON. JOHN B. SCOTT.

In order to present the material portions of this important Report, we have classified the subject matter of the report, and accompanied each portion with remarks and references, that the reader may be able to obtain some knowledge of this all-important subject.

The COMMITTEE say:—

"In the investigation of the matters thus committed to their charge, the Committee were occupied during almost the whole of the last autumn in the city of New York, and also in the month of December, and to the period of the meeting of the present Legislature."

Again, the Committee remark:

"On the 18th September last the Committee received a Communication from the Memorialists, on whose application the investigation was ordered, tendering to their use the commodious Lecture-room in Clinton Hall, New York, free of expense or charge to the State, which was accepted."

The Committee, after detailing certain matters as to the public officers, say that—

"In the course of their examination, the most prominent matters complained of appeared to be,

"*First*, In the manner of opening streets, avenues and public squares in the city; in the appointment of the commissioners of estimate and assessment; in the expenses of those commissioners, and the time spent in the discharge of their duties.

"*Secondly*, The imposition of heavy and oppressive assessments for improvements never actually made, except upon paper; and which assessments were frequently ruinous, being more than the value of the property assessed; and the great difficulty which owners of real estate in that city, and particularly in the upper and unimproved portions of it, experienced, from the fact of using arbitrary map numbers instead of street numbers and farm numbers.

"And, *Thirdly*, The great difficulty which the citizens had encountered in obtaining a review and correction of any errors committed by the commissioners and assessors in making any of such awards or assessments for the opening of said streets, avenues or public squares, from the fact that, although the Court of Chancery at first assumed jurisdiction of such cases on the ground that such assessments being made by a statute, a lien upon real estate was a cloud upon the title, and might, if unjust and unequitable, be removed in equity, it has since denied having cognizance of such matters; and the Supreme Court have in some instances denied a certiorari, to remove such proceedings, and others where the writ had been granted, had afterwards quashed the same and refused the parties any relief, referring them to an action at law for trespass against the individual members of the common council, or against the officers of the corporation personally, who should attempt the collection of such assessment.

"The committee will examine these several propositions which contain the substance of the long and tedious investigation through which they have progressed, and will submit to the consideration of the Legislature the conclusions to which they have arrived upon these several heads.

"*First.* The manner of opening streets, avenues and public squares, in that city, in the appointment of the commissioners of estimate and assessment, in the expenses of those commissioners, and the time spent in the discharge of their duties.

"That there have been great and serious abuses in the mode of opening streets and avenues in the city of New York, and in the expenses attending the same, cannot be doubted by any person who has examined the subject; and these evils have mainly arisen from the loose and unguarded manner in which that important branch of authority has been exercised.

"For while in England, in the city of London, in Birmingham and other places, whose proper municipal regulations would seem to require as liberal extension of power to their local corporate governments as that of New York, streets cannot be opened or widened without an act of Parliament specially passed for that purpose, upon a due examination of all the circumstances of the case; yet, in the city of New York, they are opened or widened, and that in large numbers together, by a single resolution adopted by the two boards of the common council, without any control, as was the case in opening all the streets and parts of streets not previously opened up to and including 42d street, by a resolution of April 6, 1835; and subsequently, September 12, 1836, another resolution was adopted to open all the streets from 42d street to 57th street. The reservoir on Murray's Hill, in the city of New York, is on 42d street.

"This loose practice has grown up in modern times, for the more guarded one of an application to the supreme legislative authority was in existence in that city, subsequent to 1792, when to authorize the first widening of John street an application was made to the Legislature, then in session in that city, and before either house would act upon the petition, they sent a committee to examine the ground; upon the report of which committee, they enacted that the damages to the owners whose lands were taken, should be appraised by a jury who should be composed of merchants, showing how careful they were in former legislation on this important subject.

"This appraisement is now made by three commissioners, appointed by the Supreme Court, who are generally nominated at the instance of the counsel of the corporation, although there have been instances where one of those commissioners has been selected by the court from names proposed by the corporation council, and by the opponents to the application, and another has been named by those opponents.

"It is difficult now to comprehend how the expenses in opening streets and avenues in that city could have been so VERY GREAT as they are represented to have been, but of the fact of their being so very great, there can be no doubt; it is established by the receipts of the commissioners for the same exhibited before the committee.

"In the opening of the Seventh avenue, from 21st street to 129th street, which was confirmed in February, 1839, the amount awarded to the owners for land taken for the avenue, was **$21,141 .41,** while the *FEES* and expenses amounted to the large sum of **$12,435 .70,** and if to that is added the collector's Fees for *collecting* the assessments, **$1,115.00,** it will show a total of expenses *paid* by the Owners of Land on that portion of the Seventh avenue for its *formal* opening, amounting to **$13,550.70!**

"The amount paid to the commissioners on that avenue for their services, at the rate of four dollars per day, which is the highest sum allowed by the statute, is pay for *sixteen months'* services for each commissioner, in making the estimate of the land taken for opening that avenue, and assessing that value back again upon the land on each side of the avenue; and in opening this one street, of one hundred and eight blocks of about 270 feet each, THE COMMISSIONERS WERE *EACH ENGAGED* **THREE TIMES THE WHOLE PERIOD** THAT THE LEGISLATURE *IS EMPLOYED IN LEGISLATING FOR THE STATE,*

cond Tuesday of May, 1831. It also vests the legislative power of the corporation in a board of aldermen and a board of assistants, who together shall thereafter form the common council of the city; which boards are to meet in separate chambers, &c. And the complainant's council therefore insists that the mayor, alderman and commonalty can no longer convene in common counsel, to direct the laying out a new street or the altering of an old one, as they were previously authorized to do under the act of 1813.

The conclusive answer to this objection is, that the act of 1813, gives the power to the corporation of the city, when convened in common council according to the provisions of its charter, and not to the particular officers who at that time represented the common council. And the act of 1830 having excluded the mayor and recorder from the common council, and directed the aldermen and assistants to convene as a common council in two separate boards, the mayor, aldermen and commonalty of the city, that is the Corporation under its corporate name, is convened in Common Council for all legislative purposes when the two boards convene in different chambers, and pass a resolution or ordinance, subject to the qualified veto of the Mayor. The power to pass an ordinance authorising the opening of a new street, or the alteration of an old one, under the 177th section of the act of 1813, was strictly a legislative power given to the Corporation represented in its common council duly convened under its charter; as much as the passage of a statute by the State Legislature, for the opening of a State road, or the alteration or enlargement of a canal, and appointing Commissioners to appraise damages, &c., would be the exercise of a legislative power by the people of the State represented in their Senate and Assembly. And this legislative power, which still belongs to the Mayor, Aldermen and Commonalty of the city of New York, under the act of 1813, which is in full force, was properly exercised by the Corporation, convened in Common Council in the manner prescribed by the act of 1830.

Again: if the complainant was right in supposing that the Common Council, as at present organized, had no authority to pass an ordinance for the widening of John street, he is neither entitled to preliminary injunction nor to any relief whatever in this court, as his defence is perfect at law. And if the whole proceedings in relation to the opening of the street were absolutely void in law, and that fact appears upon the face of the ordinance itself, a sale for the assessment upon the complainant's lot would not even create a cloud upon his title. For as every person must be presumed to know the law, a proceeding which is upon its face void, does not constitute a cloud upon the title to real estate against which a court of equity will relieve.

This is also a sufficient answer to the objection that the ordinance was void, because it appears from the record that it was passed without calling for the ayes and noes upon the question of its adoption by the respective boards; if that neglect was, in point of law, sufficient to invalidate such an ordinance. It is not necessary, therefore, that I should express my opinion at this time upon the question, whether the seventh section of the act of April, 1830, requiring the ayes and noes to be taken and published in certain cases, applies to this case; or whether the last clause of that section applies merely to improvements which are to be paid for out of the funds of the corporation generally, or by a tax or assessment upon the citizens at large, and not to cases where the owners of property benefitted by the proposed improvement are to bear the whole expense thereof.

As that question was not argued before me, I have not examined it. But if the provision is applicable to a case of this kind, I think it is merely directory, as to the publication of the report, and of the ayes and noes upon the question of the adoption of the ordinance for the proposed improvement. The neglect to make such publication, did not, therefore, of itself, render the proceeding void, if the ordinance was not void upon the face of the records of its adoption.

There is another substantial reason why this court should not interfere in this case by injunction to prevent the corporation from collecting the assessment, but should leave the complainant to his remedy, if he has any at law. The proceedings for the making of the improvement were commenced nearly five years since, and the complainant had waited until the improvement had actually been completed several months before he or his agent attempted to interfere. This property has received the full benefit that it would receive from the improvement; which benefit the commissioners have estimated at several thousand dollars. And as property of other persons to a very large amount has been destroyed for that purpose, justice requires that it should be paid for by those who have been benefitted by the improvement rather than by a general tax upon the city at large. A court of equity at this late day will not interfere with its strong arm to cast the burthen of the improvement from those who have been benefitted thereby and upon those who have not.

It is true the complainant alleges in his bill that his property has not benefitted by the improvement. But that allegation is not sworn to by any one, and it is of course contradicted by the report under oath of the three very respectable and intelligent commissioners by whom the assessment was made.

The application for an injunction is, therefore, denied with costs.

Copy.

JOHN M. DAVISON, Register.

From the Journal of Commerce of February 9, 1842.

VICE CHANCELLOR'S COURT.

HON. W. T. MC COON, VICE CHANCELLOR.

First Circuit.

DECISION.

Edmund Frost et al. vs. The Trustees of the Village of Williamsburgh.—This was a motion for an injunction to restrain the defendants from selling certain property for nonpayment of assessments. The Court said that the recent decision of the Court of Errors, in the case of Meserole vs. The Corporation of Brooklyn, reversing the order of the Chancellor and Vice Chancellor, which restrained by

injunction the defendants from selling the property of the complainants for the non-payment of assessments, for the opening of Bedford Avenue, has definitely settled the question, *that however illegal may be the proceedings of the Corporation*, the Court of Chancery has no jurisdiction or right to interfere except where the wrongful proceedings lead to the commission of irreparable injury to the freehold, or where it would involve a multiplicity of suits at law, amounting to excessive and vexatious litigation, against which the party seeking relief under the ordinary head of equity jurisdiction, is entitled to be protected.—And whenever these grounds of equitable cognizance exist, they must be particularly stated. No such ground is stated or shown to exist in the present bill, and since the decision of Meserole case vs. the Corporation of Brooklyn, the Chancellor has been obliged to dissolve injunctions and dismiss bills on demurrer in about *fire and twenty cases* against the Corporation of the City of New York, in which they were proceeding to sell for the non-payment of assessments in the matter of opening and regulating streets, under circumstances *quite as strong if not stronger*, in favor of the complainants than the present. The injunction is therefore dissolved with costs.

EQUITY COURT.

IN CHANCERY.

CHANCELLOR'S OPINIONS DELIVERED JANUARY 24th, 1842.

Garret Van Doren and others vs. the Mayor, &c. of New York.

Garret H. Striker vs. the same.

Elizabeth Pearson and others vs. the same and Walter Stevenson.—These cases came before the Chancellor upon the demurrers of the defendants, the Corporation of New York, to the bills of the complainants respectively.

The object of the bill, in each case, was to restrain the Corporation from collecting certain assessments upon property claimed by the complainants in the city of New York, or in which they were supposed to have some interest either vested or contingent; such assessments having been imposed for the purpose of laying out streets and avenues, or opening sewers, &c.; or from selling the lands assessed, or advertising the same for sale, or giving any certificate or lease to the purchaser upon the sale thereof; and for a decree declaring the assessments, and all proceedings had in relation thereto, void, &c.

R. Mott and *W. M. Holland*, for complainants in two first causes.

L. H. Sandford, for complainants in last cause.

P. A. Cowdrey, for Corporation of New-York.

THE CHANCELLOR. The objection to the assessments that the Corporation, as at present organized, under the act of April, 1830, has no power to open streets, confirm assessments, &c., was decided against the complainant, in the case of *Wiggin vs. the Mayor, Aldermen and Commonalty of the city of New York*, in March last. And I have seen no reason to change the opinion there expressed, although that case was not in a situation to enable the complainant to review the decision upon that point, by appeal; as several technical objections existed to his right to the premises, as stated in the bill. But if this objection to the right of the Common Council was well taken, it would only show that this court had no jurisdiction in these cases. For a valid legal objection, appearing upon the face of the proceedings through which the adverse party can alone claim any right to the complainant's land, is not in law a cloud upon the complainant's title which can authorize a court of equity to stay or set aside such proceedings.

That can never be considered a legal cloud which cannot for a moment obstruct the unaided rays of legal science, when they are brought to bear upon the supposed obscurity. But when the claim of the adverse party is valid upon the face of the instrument or proceeding sought to be set aside, as where the defendant has procured and put upon record a deed obtained from the complainant by fraud, or upon an usurious consideration, which requires the establishment of extrinsic facts to show the supposed conveyance to be inoperative and void, a court of equity may interfere and set it aside as a cloud upon the real title to the land. (*Simpson v. Lord Howden*, 3 My. & Craig's Rep. 97.) *It was the overlooking of that distinction, in the hurry of business*, though I had recognized and acted upon it in other cases, which led me to affirm the decision of the Vice Chancellor, in the case of *Meserole v. the Mayor and Common Council of Brooklyn*, (8 Paige's Rep. 199.) But my decision in that case was properly reversed by the Court for the Correction of Errors, at its last term in December, 1841, *although the Chief Justice who delivered the opinion concurred with me in the conclusion that the proceedings of the Corporation of Brooklyn were illegal and void.*

The same difficulty exists in relation to the objections that the ayes and noes were not called and published upon the resolutions to make the improvements and to confirm the assessments which were confirmed by the Common Council, and that the resolutions and ordinances were not duly signed by the Mayor; and to various other objections which are made to the legal validity of the assessments. All of which objections appear upon the face of the proceedings through which the Corporation must justify the enforcement of the tax by execution, *and through which the purchasers at sales of the lands of these complainants for the assessments must necessarily make title.* If the complainants are right, therefore, in supposing the proceedings void on all or any of those grounds, upon which I express no opinion, there is ***no cloud*** upon their titles.—And as their remedy at law is perfect by an action of trespass if their personal property is seized upon a distress warrant for the assessments, *and they have a perfect defence at law to any suit brought against them by purchasers at the sales which have been made, or which may hereafter be made;* if the proceedings are void, this Court has no jurisdiction to interfere for their relief. On the other hand, if the proceedings are not void, but merely irregular, the remedy of the complainants clearly is not in this Court, which has no superintending jurisdiction over the regularity of the proceedings of the Corporation of New York in these assessment cases. Indeed, as I understand the prevailing opinion in the Court for the Correction of Errors, in the case of Meserole vs. the Mayor and Common Council of Brooklyn, that Court repudiated the idea that the Court of Chancery has any power or right to interfere in such cases, in relation to any supposed error or irregularity in the assessment, or in the proceedings of the Corporation, or of the commissioners of estimate and assessment. And this Court will not subject itself to the rebuke of that tribunal by interfering in any cases of this kind, except where it is absolutely necessary for the preservation of the complainant's rights.

The demurrers are well taken, and the complainant's bill must be dismissed WITH COSTS. And the injunctions, if any have been granted in these cases, must be dissolved.

—

Peter G. Stuyvesant and others vs. the Mayor &c. of New York, and John Ewen, street commissioner. (And 21 other causes involving same questions.)

W. M. Holland, for the complainants.

P. A. Cowdrey, for the defendants.

The CHANCELLOR.—These cases came before me on applications for injunction to restrain the Corporation of the city of New York from proceeding to sell the lands of the respective complainants for the payment of assessments imposed upon them for various improvements in that city. Indeed, taken together, they embrace nearly every improvement in the city of New York for the last six years, either in opening, widening, or grading streets, or in constructing sewers, &c. The number of complainants whose rights are in controversy, exceeds *one hundred and seventy*, and the aggregate amount of the assessments the validity of which is contested is immense. I have therefore been obliged to look into each case to see if there was any thing contained therein to give this Court jurisdiction, and justify it in interfering by a preliminary injunction to restrain the corporation and its street surveyor, who has been made a defendant in most of the cases, from proceeding to collect the assessments by a sale of the property assessed in the usual way.

As the complainants have by law two years to redeem their property after it shall have been sold, there does not appear to be any good reason for granting preliminary injunctions at this time, even if the cases, as made by the bills, would, if unexplained, entitle them to perpetual injunctions at the final hearing. The object, therefore, of applying for injunctions at this time, must probably be to save the complainants from the payment of the extra interest, allowed by the statute from the time of the sale, in case it turns out that they are wrong in supposing that this court can interfere for their relief against the final payment of these assessments. This of itself would be a sufficient answer to these applications at this time. And for that reason I refused to continue the temporary injunctions allowed by the Vice Chancellor upon granting the orders to show cause; so that the sales might be made by the Corporation, subject to the equitable rights of the complainants, if

are said to exercise a discretion, it is a mere legal discretion, a discretion to be exercised in discerning the course prescribed by law; and, when that is discerned, it is the duty of the court to follow it. Judicial power is never exercised for the purpose of giving effect to the will of the judge; but always for the purpose of giving effect to the will of the Legislature; or, in other words, to the will of the law."—9. *Wheaton*, 806.

That distinguished Jurist, MR. JUSTICE STORY, quotes the above, and says of it that it was finely remarked by MR. CHIEF JUSTICE MARSHALL, and appends to it, a reference to the Commentaries of the venerable EX CHANCELLOR KENT.

—

LEGISLATIVE POWER.

Mr. Justice Story quotes from the Federalist, No. 78, among others, a paragraph in the following words:—

"There is no position which depends upon clearer principles, than that every act of a delegated authority, contrary to the tenor of the commission under which it is exercised, is void. No legislative act, therefore, contrary to the Constitution can be valid. To deny this, would be to affirm, that the deputy is greater than his principal; that the servant is above his master; that the representatives of the people are superior to the people themselves; that men acting by virtue of powers, may do, not only what their powers do not authorize, but what they forbid."

—

JUDICIAL LEGISLATION.

"But the answer to these and similar objections, is, that such considerations should have weight with those whose business it is to make laws; but they should not control the opinions of those whose business it is to expound the laws."

The above is the closing sentence of a paragraph in the manuscript opinion written by JOHN SAVAGE, *late Chief Justice of the Supreme Court of the State of New York.*

It is an opinion worthy of the man.

The following is also from another manuscript opinion of this truly great man.

"Much of our difficulty arises from judicial legislation: if other laws are necessary, let the legislature pass them."

—

JUDICIARY.

"The Courts must declare the sense of the law; and if they should be disposed to exercise *Will* instead of *Judgment*, the consequence would equally be the substitution of their pleasure for that of the legislative body."—Federalist of No. 78, quoted by Mr. Justice Story with approbation.

CHANCELLOR'S DECISIONS.

We have given all the opinions delivered by His Honor Chancellor Walworth, in assessment cases for the last five years, in full.

It will be seen by a careful reading of these several opinions, that the decisions of the Chancellor, have fluctuated. The opinion given in the suit of Meserole and others vs. the Mayor and Common Council of Brooklyn contrasted with that given a short time afterwards, in that of Timothy Wiggin vs. the Mayor &c. of New York, are difficult to reconcile as respects the assessment being a cloud upon the title.

We do not undertake to say that the Chancellor was wrong in refusing to entertain the bill filed in the latter case, and also in the several subsequent cases disposed of by him, but we feel it our duty to say, that he erred in requiring the complainants to pay costs; inasmuch as he himself remarks, in the opinion he gave in the Van Doren case, that in deciding the Brooklyn case, in the hurry of business, he overlooked a decision. We have occasion to know that in the case of Wiggin vs. the Mayor &c., the Solicitor of Mr. Wiggin obtained from the clerk of the Chancellor at Saratoga a manuscript copy of the opinion of His Honor in the Meserole case, and it was in consequence of the tenor of that opinion that this bill was filed.

It will be borne in mind that the decision made by the Chancellor in Wiggin's case was nearly a year previous to the decision of the appeal in Meserole's case in the Court for the Correction of Errors.

The cases in which the Chancellor sustained the demurrers against the complainants, were many of them of a very aggravated character. The bills filed in these cases were full, and in several cases the complainants set forth that the applications for the appointment of commissioners were not authorized by the Common Council.

The Chancellor may have taken a correct view of these questions in the last decision, and not in the first; but the change of opinion was a difficulty, and quite a serious one, to the complainants.

These matters have passed from the courts to a Committee appointed from the Honorable the Senate of this State to investigate assessment abuses in the city of New York, and that committee have made their report. The members of that committee are distinguished members of the Court for the Correction of Errors: their report will be found in this volume.

We desire to speak of the worthy Chancellor of this State with great respect; he is a most estimable citizen, and, notwithstanding the constant toil and labor in his Court, finds time to attend the benevolent and charitable institutions, and the religious societies of the day—of the most of which he is a conspicuous and valuable member.

It is a wonder how CHANCELLOR WALWORTH accomplishes such an amount of labor. Should his labors increase with his years, when he shall have reached the constitutional barrier of this State, as to the term beyond which judicial officers of a certain grade shall be deemed incompetent, he will have worn himself out with labor.

The salary of the Chancellor of this great State is two th usand, five hundred dollars per annum, a mere pittance for such services.

When we take into view the labor imposed upon the Chancellor, the limited duration of his office, and the compensation attached to it, the wonder is that any person can be found willing to accept of the appointment.

The salary of the Chancellor should be increased to $4,500, at least, and that of the Judges of the Supreme Court to $4000.

VOL. 1. NEW YORK, APRIL 7, 1842. No. —

LEGISLATIVE POWER.

The Constitution of the United States contains this provision :—

"ARTICLE 1, § 1.—All legislative power herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives."

The Constitution of the State of New York contains these provisions.

"§ 1. *The Legislative power of this State shall be vested in a Senate and an Assembly.*"

Can the Senate and Assembly of the State of New York delegate the right or power to pass penal laws to any other body of men ?

By *Article* 1, *Sec.* 12. "Every Bill which shall have passed the Senate and Assembly, shall, before it become a law, be presented to the Governor; if he approve, he shall sign it; but if not, he shall return it with his objections to that house in which it had originated," &c. The Constitution then proceeds to say, that the objections of the Governor shall be entered "at large on their Journal, and they shall proceed to reconsider it. If after such reconsideration two thirds of the members present shall agree to pass the Bill, it shall be sent together with the objections to the other house, by which it shall likewise be reconsidered; and if approved by two thirds the members present, it shall become a law. But in all such cases, the votes in both houses shall be determined by *yeas and nays*, and the names of the persons voting for, and against the Bill, shall be entered on the Journal of each house respectively. If any bill shall not be returned by the Governor within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Legislature shall by their adjournment, prevent its return, in which case it *shall not become a law.*"

The Governor is thus vested by the Constitution with a negative upon the acts of the Legislature, but this negative is greatly qualified, inasmuch as the vote of two thirds of a bare quorum can pass a Bill after his refusal to sign in it, notwithstanding such refusal.

The Constitution provides that the members of the Senate and Assembly shall respectively be elected on a certain day, at a certain place, by persons possessing certain qualifications, and that they shall convene, &c. on a certain day, &c.

Thus the Constitution provides in what manner laws shall be enacted, and details with great precision the form and time. No Bill whatever can become a law of this State, unless enacted in the manner and form prescribed in the power thus given in the Constitution by the People, who are the Grantors of the Power.

The Constitution contains no power of substitution, no authority, or permission to the Senate and Assembly to delegate the power of making laws to any other body of men. The power is special, limited and restricted in every respect.

The Act of the Legislature of the State, passed April 7th, 1830, which is called the Amended Charter of the City of New York, contains this provision :—

"§ 1.—The Legislative power of the Corporation of the City of New York shall be vested in a Board of Aldermen and Board of Assistants, who, together, shall form the Common Council of the City."

The question then arises, can the Common Council of the City of New York pass laws? Can the Legislature of the State grant to the Common Council, or vest in that body the power to pass laws ?

To the first query, we answer in the negative, and add, that the City of New York is a part of the State of New York, and is governed by the laws of the State.

The reply to the second enquiry here propounded, is, that the Legislature of the State cannot in any manner or form, either direct or indirect, delegate the Legislative power vested in that body, that no power of substitution whatever is contained in the Constitution.

A citizen who executes a written power to another citizen to act for him, and in his name, if he intends the power thus given to be exercised by another, inserts a special clause authorizing his said agent and attorney, to substitute another, or others in his place and stead, &c.; but in the Constitution, the grantors of the power make no such provision in that instrument which contains the grant, and none can be presumed, or implied.

If the Common Council desire an ordinance to have the force of a law within the bounds of the City, that ordinance should be made into the shape of a Bill, and be acted on by the Legislature of the State, and approved by the Governor, in the manner and form prescribed by the Constitution.

The Common Council might with as much propriety pass an ordinance to regulate the rate of interest on money, as to pass an ordinance to regulate other matters than those which pertain to the management of the corporate property. The Common Council have no more right to pass an ordinance imposing a penalty on a citizen for a violation of their so-called laws, than a government of an incorporated bank has, and the passage of such ordinances are a violation of the Constitution of this State, and will be so held when taken to the high courts for adjudication, and this objection raised.

No one will for a moment doubt that there should be special laws relative to the City, but all such laws should be passed by the Legislature of the State, and not by the Common Council of the City.

The Common Council of the City of New York is not the Corporation of the City, but the powers of the Corporation are vested in the Common Council, to be exercised by that body in a certain manner, &c. And what, or who is the Corporation of New York? It is the citizens and inhabitants of New York, in whom is vested certain property which has been granted to them by the name and style of the Mayor, Aldermen and Commonalty of the City of New York, and the management of this Corporate property is committed to the Common Council and other particular officers.

The Common Council have the management of this Corporate property for the citizens and inhabitants, the same as the President and Directors of a Bank have of the capital stock which is the property of the Stockholders.

If this Corporate property consists of Market-houses, they have the right and power to say at what rate the stalls shall be leased and what hours the Market shall be opened, but they have no right to say that the citizen who owns a store shall not sell Pork, Beef, or Poultry in that store, nor can they pass any valid ordinance, making it a penalty for a citizen to sell meat on his own premises. We know that such ordinances have been passed by the Common Council, and that some of the Courts have held such ordinances valid, but such a decision would not be held valid by the Supreme Court of the United States.

There is a vast difference between the powers which may be vested by a Charter in a Political Corporation granted by an absolute government possessing unlimited power, and these which are possessed by our free Government exercising the limited and restricted powers conferred by the Constitution.

No one conversant with the provisions of our Constitution, will for one moment pretend to deny that even the Legislature of the State, is greatly restricted and limited in its power; and yet there are others, and some of them members of the common council, who pretend to say that the Common Council, a mere creature of the Legislature, can do that which the Legislatue of the State dare not attempt to do—this is, in effect, making the creature greater than the creator.

Hume, *De Lolme*, Sidney, Tucker and others, who have written much upon Legislative power, speak of it only in such cases as where its exercise is unlimited and unrestricted.

In our free country, this power is possessed by the people, and they are the grantors of power in all cases—the people are sovereign. The legislatures are mere grantees.

less, they shall not receive any salary or consideration, under any pretence whatever. And that all bills which shall have passed the Senate and Assembly, shall, before they become laws, be presented to the said council for their revisal and consideration; and if, upon such revision or consideration, it should appear improper to the said council, or a majority of them, that the said bill should become a law of this State, that they return the same, together with their objections thereto, in writing, to the Senate or House of Assembly, in which soever the same shall have originated, who shall enter the objections sent down by the council, at large, in their minutes, and proceed to re-consider the said bill. But if, after such re-consideration, two thirds of the said Senate or House of Assembly, shall, notwithstanding the said objections, agree to pass the same, it shall, together with the objections be sent to the other branch of the Legislature, where it shall also be reconsidered, and, if approved of by two thirds the members present, shall become a law."

"And in order to prevent unnecessary delays—

"*Be it further ordained*, That if any bill shall not be returned by the Council within ten days after it shall have been presented, the same shall become a law, unless the Legislature shall, by their adjournment, render a return of the said bill within ten days impracticable; in which case, the bill shall be returned on the first day of the meeting of the Legislature after the said ten days."

"The Governor to convene the Senate and Assembly on extraordinary occasions; to prorogue them from time to time, provided such prorogation shall not exceed sixty days in the space of any one year."

Thus the former Constitution of this State made the Governor, Chancellor and Judges of the Supreme Court, a council of revision, and gave to the Governor the power to prorogue the Legislature that the members might return to and consult their constituents. This negative power, thus vested, was not considered objectionable, but on the contrary, when the new Constitution was adopted, in 1821, it was changed and vested solely in the Governor, but the power to prorogue the Legislature was taken away.

The vote required to pass the bill, notwithstanding the objections, under the present constitution is the same as under the former, except that it is required that the vote shall be taken by ayes and noes, and the names of the members voting for or against the bill shall be recorded. The vote required is only two thirds of the members present, which may perhaps be but a minority of each house, or a bare majority form a quorum, and it is only two thirds of this bare majority which is required.

The exercise of the Veto power by the Governor of this State is therefore only that of a qualified negative.

The Veto power of the President of the United States is also a qualified negative. The Constitution of the United States is, however, silent as to the requirement of the Veto taken on the re-consideration of a bill returned by the Executive being by a vote of two thirds the members present or two thirds the members elected.

It would seem that the safer construction would be two thirds the members elected, but we understand that the more liberal and extended construction has been adopted by Congress.

So salutary has this qualified negative, possessed by the President, been found, that, in the experience of more than half a century, the exercise of this power has not been overruled by a constitutional vote by Congress.

The Constitution of the United States is very explicit with regard to the mode in which the vote of re-consideration shall be taken, and that the votes shall be taken by ayes and noes, and recorded in the journals.

When the provisions of the Constitution were debated in the convention, it was proposed to vest the qualified negative in the President and some other department of the Government, but this was strenuously opposed and overruled, and was finally rejected by a vote of eight States against three.

There is another qualification of this negative of the President, which is, that an entire new house of Representatives are elected by the people during his term of office, which, if this exercise of the qualified negative is not satisfactory to the people, they have the opportunity of thus overruling it, and also the term of office for which the Executive himself shall have been elected, will have an end every four years. Thus the frequency of the elections gives additional qualifications to this already qualified negative.

In the amended charter of the city of New York, although (as Mr. Samuel Stevens remarks in an article under the signature of "Third Ward," published in the New York American in 1829, when the city convention were sitting) they were only framing a bill for the State Legislature to pass into a law, that body took the United States Constitution for a model whereby to form a municipal charter; and in vesting the mayor with a qualified negative upon the acts of the Common Council, they made some alterations in that provision, which were, to require the objections of the executive to be published in the newspapers, and that the vote should be that of a majority of the members *elected* to each board, and also of requiring that *at least ten days* should elapse before the board to which the act should have been returned should proceed to re-consider the same. This change of the qualified negative of the Mayor makes his veto at the present moment a nullity. The City Charter, as the act of the Legislature is called, omits to state any thing in relation to acts passed by a Common Council, the members of which whose term of office may expire during the ten days which the Mayor is allowed to consider a proceeding, and decide whether or not he will give his assent. This was an oversight, and there can be no doubt but an act remaining in the hands of the Mayor unsigned when his term of office expires, would be inoperative.

The distribution of power is one of the great principles on which all free governments are based, and we propose to discuss this subject in a future number under that head.

SACREDNESS OF PRIVATE PROPERTY.

That distinguished citizen and eminent jurist, JUDGE STORY, one of the Justices of the Supreme Court of the United States, in his admirable Commentary upon the Constitution of the United States, thus remarks:—

"The concluding clause is, that private property shall not be taken for public use without just compensation. This is an affirmance of a great doctrine established by the common law for the protection of private property. It is founded in natural equity, and is laid down by jurists as a principle of universal law. Indeed, in a free government, almost all other rights would become utterly worthless, if the government possessed an uncontrollable power over the private fortune of every citizen. One of the fundamental objects of every good government must be the due administration of justice; and how vain it would be to speak of such an administration, when all property is subject to the will or caprice of the legislature and rulers."

Mr. Justice Story cites Blackstone, Kent, Rawle, and also several cases which had been adjudicated.

The practice of the last few years in the city of New York to enforce the collection of sham-assessments for fictitious improvements, by a sale of the property pretended to be benefitted for terms of thousands of years, equal to, and in effect, selling the fee simple absolute, is taking private property for public use without just compensation, and in truth is absolute *confiscation*. It matters not to the owner whether his land is taken or his money, both are alike private property; for if he pays the assessment, in most cases he pays the value of the land in paying the assessment, and thus, in fact, re-purchases the land by redeeming it. Vast quantities of lands on the island of New York, have been assessed to such an extent that the interest of the assessment exceeds the value of the land, and also large quantities of other lands are assessed for the pretended opening of streets, avenues, and public squares, (which are not open or needed,) in greater sums than the land could be sold for.

The abuses have been so enormous, so flagrant, so high-handed, that the real estate has lost its value by the insecurity thus produced.

In the case of the streets and avenues, up to and including Forty-second street, referred to in the report of the committee from the Senate of this State, twenty-seven setts of Commissioners (in all eighty-one) were appointed to make an assessment for opening the streets and avenues in that district; whereas the committee of the common council reported in favor of but one sett, (three commissioners,) and did not, in fact, pass any resolution for an application to the Supreme Court for the appointment of even this one set.

It is time such proceedings had an end.

Anecdote of the reigning king of Prussia. —The following anecdote we cut from the columns of the Albany Daily Advertiser. It belongs to go along side of assessment matters, showing a contrast in the judicial proceedings of the courts of our State, compared with that of a kingly government.

"We have much pleasure in laying before our readers an interesting anecdote, which has been communicated to us by a gentleman recently from Berlin. Some time since an effort was made to get rid of a windmill, the close approximation of which to the royal palace rendered it in some degree a nuisance, and certainly an eye-sore. Overtures were accordingly made to the sturdy yeoman for the purchase of the obnoxious property; but whether it was that the man was possessed of a strong spirit of obstinacy, or was really deeply attached to his old family habitation, the result was that the offers, tho' tempting, were again and again refused. There are very generally some individuals attached to a court who are ready to suggest remedies, direct or indirect, for inconveniences or annoyances offered to royalty. Accordingly, upon a hint from some minion, a lawsuit was commenced against the obstinate miller for the recovery of certain sums alledged to be due for arrears of an impost on that portion of crown land which it was suggested was occupied by the mill in question. The sturdy holder of the "toll dish" was not altogether without friends or funds, and he prepared vigorously to take his stand in defence of his rights. The question came in due time before the courts of law, and the plaintiff having completely failed to establish any right on behalf of the crown, the miller obtained a verdict in his favor, with a declaration for payment of his costs in suit. This was certainly no small triumph, and merrily went round the unfurled sails of the old mill, and well pleased no doubt, was the owner with the sound, as they went whirling and whizzing under the influence of the gale, which certainly seemed to blow strongly in his favor. But he was not the first who has found that when drawn into a lawsuit, particularly with so formidable an opponent, a man is more likely to "gain a loss" than escape scot free. What with extra expenses, interruption of business, and rejoicings after the victory, the miller found himself pressed by considerable difficulties, and after in vain struggling a few months against the pressure, he at length formed a manly resolution, gained access to the monarch, and, after roughly apologizing for his having thwarted his majesty's wishes, frankly admitted that his wants alone had rendered him complient, but that he was prepared to accept the sum originally offered for the property. The king, after conversing with the miller a few minutes, hand d him a draught for a considerable amount, saying, "I think, my honest friend, you will find that sufficient to meet the emergency; if not, come and talk to me again on the subject. As to the mill, I assure you that I will have none of it. The sight of it now gives me more pleasure than it ever occasioned pain; for I see in it an object that assures me of *a guaranty for the safety of my people, and a pledge for my own happiness by its demonstration of the existence of a power and a principle higher than the authority of the crown, and more valuable than all the privileges of royalty.*"—[London Paper.]

COMMISSIONERS OR A JURY.

Taking land for Public Avenues, Streets and Squares.

The position of the Assessment question, and the highly important opinions of Chief Justice NELSON, Justice BRONSON and Justice COWEN *of the Supreme Court.*

The Constitution of 1777 contains this provision;—

"That trial by Jury in all cases in which it hath heretofore been used in the colony of New York, shall be established and remain inviolate forever, and further, that the Legislature of this State shall at no time hereafter, institute any new court or courts, but such as shall proceed according to the course of the common law."

The act of the General Assembly of the Colony of New York, passed Oct. 1st, 1691, and confirmed by William III, May 11th, 1697, contains this provision:

"And for other ground, the Mayor, Aldermen and Common Council shall and may treat and agree with the owner and others interested therein; and if there shall be any person that shall refuse to treat in the manner aforesaid, in such case the *Mayor and Aldermen, in their Court*, are hereby authorized by virtue of this act, to issue out a warrant or warrants to the Sheriff of the said city, who is hereby required to empannel and return a jury before the *said Court of Mayor and Aldermen*, which Jury, upon the oath to be administered by the said court, are to enquire and assess such damages and recompense as they shall judge fit, to be awarded to the owners and others interested, according to their several and respective interests and estates in the same, as by the said Mayor, Aldermen and Common Council, shall be adjudged fit to be converted for the purposes aforesaid, and such *verdict of the Jury, and judgment of the said Court of Mayor and Aldermen thereupon*, and the payment of the said sum or sums of money so awarded and adjudged to the owner or others having estates or interest or tender or refusal thereof, shall be binding" &c. *This Colonial act was in force when the Constitution of* 1777 *was adopted.*

The trial by jury extends to property, as well as persons, and therefore the act of 1807 and 1813, authorizing the appointment of three commissioners to take land instead of a jury, is unconstitutional and void.

The Constitution of 1821 *contains these provisions:*—

"The trial by jury, in all cases in which it has been heretofore used, shall remain inviolate forever, and no new court shall be instituted, but such as shall proceed according to the course of the common law." Art. 7, § 12.

"The Governor shall nominate by message in writing, and with the consent of the Senate, shall appoint all *Judicial officers* except Justices of the peace." Art. 4, § 7.

In the decision of the Supreme Court in January, 1841, in the matter of the application of Elmendorf and others for a Certiorari to be directed to the mayor, aldermen and commonalty of the city of New York,

point skilful and competent persons Assessors to make estimates and assessments for building sewers, regulating streets, &c., and the Assessors so appointed are directed to assess the expense of the work, &c., on the owners and occupants of houses and lots deemed to be benefitted thereby, and to certify their assessments in writing to the mayor, aldermen and commonalty, in common council convened; and such assessment, when ratified or confirmed by the said Common council, shall be a lien upon the houses and lots so assessed, and in case of neglect or refusal to pay such assessment, the mayor, recorder and aldermen, or any five of them, are authorized to issue a warrant of distress under their hands and seals, which may be levied upon the goods and chattels, &c. The act of April 16th, 1816, provides further, that in case the owner or occupant, on being twice called upon, refuses or neglects to pay the assessment, his lands may be sold therefor.

Now we insist that in this, the Common council and the assessors are both acting in a *judicial capacity*, and are as much a court as the Commissioners of sewers; and the assessment, when confirmed, is in the nature of a Judgment, being made a lien upon the land, and the warrant being in substance an execution.

We think we have stated enough here to show that Commissioners of Estimate and Assessment cannot take lands for public use from any individual, without his consent, nor can they impose any assessment on adjoining owners: that whenever lands are required in the city of New York, for public use, *a jury* is the only mode of proceeding. And besides, if it should be held that commissioners could take land, such commissioners *can only be appointed by the Governor.* Thus the proceedings of commissioners *are void.*

As to Assessors, these too are *judicial* officers, and the members of the Common council also act or assume to act in a *judicial* capacity, in confirming assessments, issuing warrants, &c. These officers are *none of them appointed by the Governor*, and the Constitution is explicit on this head; it excepts Justices of the Peace, Special Justices, &c.

It is of no use to have a written Constitution, if officers who are sworn to support it will disregard its great principles and requirements.

We think that the learned Judges of the Supreme court were right in *quashing* the writs they had allowed, and in refusing those which were applied for, and that the assessments are absolutely VOID. We are aware that we differ from the learned counsel on both sides in the views now put forth, but it is our deliberate opinion, after examining the question very extensively.

We also think that it was the duty of the court to settle the question of the legality of these assessments, instead of enacting a statute of "PUBLIC INCONVENIENCE"—which enactment most assuredly is not authorized by the Constitution of the State, nor is it sanctioned by public opinion. Neither public or private inconvenience have any place in such cases. Let justice be done—let the law be strictly complied with.

Judicial powers of the Board of Aldermen and Board of Assistants, composing the Common Council of the City of New York.

The following sections of the act, Entitled "*An ACT to reduce several Laws relating particularly to the City of New York into one Act*"—passed April 9th, 1813—constitute all the provisions of the Statute authorizing the imposition of assessments on the owners or occupants of houses and lots for the class of improvements therein specified, and there is no other provisions of law which authorize any assessment to be imposed by the mayor, aldermen and commonalty for this class of improvements.

§ 175.—*And be it further enacted*, That it shall be lawful for the said mayor, aldermen and commonalty, to cause common sewers, drains and vaults, to be made in any part of the said city, and to order and direct the pitching and paving the streets thereof, and cutting into any drain or sewer, and the altering, amending, cleansing and scouring of any street, vault, sink or common sewer, within the said city; and the raising, reducing, levelling or fencing in, any vacant or adjoining lots in the said city; and to cause estimates of the expense of conforming to such regulations to be made, and a just and equitable assessment thereof among the owners or occupants of all the houses and lots intended to be benefitted thereby, in proportion, as nearly as may be, to the advantage which each shall be deemed to acquire; and the said mayor, aldermen and commonalty shall appoint such skilful and competent disinterested persons as they shall or may think proper to make every such estimate and assessment, who before they enter upon the execution of their trust, shall severally take an oath before the mayor or recorder of the said city, to make the said estimate and assessment fairly and impartially, according to the best of their skill and judgment; and the said persons, after having made such estimate and assessment, shall certify the same in writing to the said mayor, aldermen and commonalty, in common council convened, and being ratified by the said council, shall be binding and conclusive upon the owners and occupants of such lots so to be assessed respectively, and shall be a lien or charge on such lots as aforesaid; and such owners or occupants shall also respectively be liable upon demand, to pay the sum at which such houses or lots respectively shall be assessed, to such person as the said common council shall appoint to receive the same; and in default of such payment or any part thereof, it shall be lawful for the mayor, recorder and aldermen of the said city, or any five of them, of whom the mayor or recorder shall be one, by warrant under their hands and seals to levy the same by distress and sale of the goods and chattels of such owner or occupant refusing or neglecting to pay the same, rendering the overplus (if any), after deducting the charges of such distress and sale to such owner or occu-

pant, and the money, when paid or recovered, shall be applied towards making, altering, amending, pitching, paving, cleansing and scouring such streets, and making and repairing such vaults, drains and sewers as aforesaid, and raising, reducing, levelling or fencing in, such lots as aforesaid. *Provided however*, That nothing herein contained shall affect any agreement between any landlord and tenant, respecting the payment of any such charges, but they shall be answerable to each other in the same manner as if this act had never been made; and if the money so to be assessed be paid by any person, when by agreement or by law the same ought to have been borne and paid by some other person, it shall then be lawful for the person paying, to sue for, and recover the money so paid, with interest and costs, as so much money paid for the use of the person who ought to have paid the same; and the assessment aforesaid, with proof of payment, shall be conclusive evidence in such suit.

§ 176. *And be it further enacted*, That if upon completing any such regulation, it shall appear to the said mayor, aldermen and commonalty, that a greater sum of money had been *bona fide* expended in making such regulation than the sum estimated and collected aforesaid, it shall then be lawful for the said mayor, aldermen and commonalty, to cause a further assessment equal to such excess, to be made and collected in manner aforesaid; and in case the sum actually expended shall be less than the sum expressed in such estimate, and collected as aforesaid, the surplus shall forthwith be returned to the persons from whom the same were collected. or their legal representatives.—2 R. L. p. 407,

The sections above quoted contain a special power, given to a select class of persons, to make certain improvements particularly named in manner and form therein stated.

It will be noticed that this is a special power given by the Statute to a select class of persons. The mayor, aldermen and commonalty, as then known and entitled, were the mayor, recorder, aldermen and assistant aldermen of the city of New York. These public officers composed the city council, and assembled in one body in the same council chamber.

The mayor, and also the recorder of the city, were appointed by the State council of appointment—the aldermen and assistants were elected by the freeholders of the respective city wards.

In 1821 the Constitution of the State was remodelled, or rather, a new Constitution was formed, one of the provisions of which was that the mayors of cities should be appointed by the respective common councils of each. This provision, as to the city of New York, was altered in 1833 by an amendment of the State Constitution in that particular; and now it is provided that the mayor of the city of New York shall be elected annually by the People.

The recorder, by the Constitution of 1821, shall be appointed by the Governor and Senate.

By the Amended Charter of the city of New York [Session Laws of 1830, ch. 122] the legislative power of the corporation is vested in a board of aldermen and board of assistants who, together, shall form the Common council of the city.—§ 1.

By the fifteenth section, of the same act, neither the mayor nor recorder shall be members of the Common council after the second Tuesday of May, 1831.

By the 7th section, of the act as above, the boards are required to keep a journal of their proceedings and to meet in separate chambers; and, by section twelve, all acts, before they shall take effect, shall be first approved by the mayor, &c. &c.

The apportionment of judicial officers under the Constitution of 1821.

By the 7th section of Article IV. of the Constitution, the Governor shall, by message in writing, nominate, and, with the consent of the Senate, appoint all judicial officers except justices of the peace; by section 14 special justices and assistant justices of the city of the city of New York are excepted, and by sec. 1 of Art. V. the members of the court for the Correction of Errors are excepted.

We here raise two Questions, viz:—

1. *Are Assessors, who are appointed by the board of Aldermen and board of Assistants, with the Mayor's approval, Judicial officers?*

2. *Do the boards of Aldermen and Assistants, sitting in separate chambers, in ratifying Assessments made by Assessors appointed by themselves, and the Mayor also in approving such acts, act judicially?*

To the first question, we answer that the 175th section above quoted authorizes an estimate of the expense of the work, as a preliminary measure, previous to making the assessment of the expense upon the owners and occupants intended to be benefitted thereby, by skilful, competent, disinterested persons, to be appointed by the mayor, ald. and com.; and this assessment is to be made in such proportion as they deem the advantage acquired by such owner or occupant. Their estimate and assessment shall be certified in writing to the mayor, aldermen and commonalty, in Common council convened, but has no binding force until ratified by said Common council. This ratification is, therefore, to all intents and purposes, a judgment, which is by the same section made a lien upon the houses and lots of such owners and occupants, &c., and upon this ratification or judgment, a warrant of distress is authorized to issue under the hands and seals of the mayor, recorder and aldermen, or any five of them, of which the mayor or recorder are to be one; and by the act of April 12th, 1816, the mayor, aldermen and commonalty, in default of payment of such assessment, are authorized to sell or lease the houses or lots so assessed for an unlimited number of years, even to the end of time. The Constitution adopted in 1777, and which was in force when these two acts above referred to were passed, contained no limitation as to the appointment of judicial officers, or at least we have found no such provision in that instrument. At the time of the passage of these two acts the mayor and recorder were both appointed by the council of appointment, and after the adoption of the new Constitution in 1821 the recorder was appointed by the Governor and Senate as a judicial officer, and continued to be a member of the Common council; but the amended charter of April 7th, 1830, *excluded* that officer after the second Tuesday of May from a seat in the Common council, and he is now no longer a member of that body; nor does any Judicial officer hold a seat in either board composing the Common council: therefore, there is no authority under the Constitution for the Common council to act in a judicial capacity, the law of 1813 and 1816 being both abrogated by the Constitution of 1821.

The Assessors, therefore, as standing alone, are not judicial officers; but their acts, taken in connection with the proceedings of the mayor, aldermen and assistants, constitute proceedings which are, in their operation and effects or consequences, the highest exercise of judicial authority in matters pertaining to the rights of property.

The Answer to the second question has been mainly anticipated in the reply to the first question.—The Amended Charter was the result of measures growing out of complaints in the assessment made for building Canal street sewer, which was an assessment of near one hundred thousand dollars by assessors appointed under the 175th section before quoted which had been confirmed by the Common council composed of the mayor, recorder, aldermen and assistant aldermen. The dissatisfaction which this assessment produced caused applications to be made to the Common council for an amendment of the City Charter, and accordingly an application was made by that body (under the corporation seal) to the Legislature of the State. This application was accompanied by a bill, which was passed by the Legislature, conditioned to become a law if the majority of the electors of the city of New York by their vote by ballot signified their acceptance of it. This they did not do—less than 700 votes, of the whole number of voters in the city, were cast in its favor. This was in 1824.

In 1828 the Legislature, on the application of the Common council, re-enacted the same bill, with the same conditions, and it was again submitted to the electors of the city of New York, and by them again rejected.

This bill provided for the exercise of all the powers which had ever been conferred by charter or by law on the mayor, aldermen and commonalty, or the mayor, aldermen and commonalty in Common council convened, or the mayor, recorder, aldermen and assistant aldermen, thereafter to compose two boards meeting in separate chambers, with concurrent jurisdiction.

The next proceeding was the Convention which met in June, 1829, to frame a bill for the Legislature to pass into a law amending the City Charter, and here a great mistake was made in taking the Constitution of the United States for a model to frame a bill for the Legislature to pass into a law, unless we assume it to be conceded that the business of the Common council was to be confined to the affairs of the corporation as a corporation

ment. The motion was argued before Chief Justice NELSON, at the March Special Term, and he refused to interfere, on the ground of lapse of time, notwithstanding the application was made within six months of the confirmation of a report, which was presented and confirmed without notice. The Chief Justice also assumed to exercise what he termed the discretion of the Court, in the case. The discretion of the Court is not the will of the Judge. We have noticed this point on page 196 of this number.

The most powerful monarch in Europe never claimed as much authority over the private property of a subject, as has been exercised by the Supreme Court for years over the private property of the citizens of this City in street assessments.

We discussed some branches of this question, in the Municipal Gazettee of December, 1842.

The Court in this opinion, are so explicit with regard to the prohibitory clause of the Constitution, "that he who runs may read."

We are glad to see the doctrine of strict construction under way, and when once broached in political matters there is no difficulty in applying the principle to the piratical assessments in the City of New-York.

Re-Argument.

Mr. Emmett has served Mr. Mott with a notice of re-argument of his five street motions. His notice is entitled before the Supreme Court. What nonsense under the views here expressed by the Court. We will publish his affidavit on which he founds his notice of motion.

Another Assessment Cruelty.

The Assessment for setting curb and gutter in the 8th Avenue, amounts to $43.922-25. The assessors appointed by the Common Council to make the assessment, are the Street Commissioner, his Assistant and Clerk. The contract was made by the Street Commissioner, and the prices unreasonable.

When the Senate Committee were in session at Clinton Hall, this proceeding was brought before them, as one of the Assessment outragss. Mr. Perrine, a former Clerk in the Street Commissioner's office, was examined as a witness, he stated that: "there are no names of Assessors in any part of it, nor is it signed by any Assessors." The assessment was passed by the Board of Aldermen, Dec. 17th, 1838; by the Board of Assistants, Dec. 24th, 1838, and approved by the Mayor, Dec. 28th, 1838, although not signed by the Assessors. This is the way the public business is done. The Assessors are the same as those of Chapel street, and yet the two assessments are made upon entirely different principles; both cannot be right.

By a decision of the Supreme Court, all the Assessors must be present to make the assessment, but a majority may decide.

This is the assessment, for which the Street Commissioner sold the house and two lots belonging to Mary Stewart and her children, all their property. One of the children is sickly. The husband of Mary Stewart was a shoe-black, and he earned his money by hard labor, with which he purchased this property, and when he died he left it to his family.

The purchaser at the assessment sale of this property, on getting his lease, took possession, and put the furniture of the occupants out of doors, but he was prosecuted for forcible entry and detainer, and at once surrendered the premises, and has since brought an ejectment suit on his lease. A case has been made, and will be argued next month before a full Bench. Some charitable individual has volunteered a Counsel fee to defend the little home of the colored woman and her helpless children.

The owner of the premises had no notice of the assessment, or the sale.

The regulating the third avenue was paid out of the City Treasury, and so ought that of the eighth avenue.

Alderman NASH,

OF THE SEVENTH WARD.

On Monday evening, Alderman NASH tendered his resignation as Chairman of the Committee of Public Offices, Repairs, &c., assigning very satisfactory and substantial reasons therefor.

We have watched the movements of this member of the Common Council, with a great deal of interest; he is a plain spoken man, and when he discovers a wrong, he sets his face at once against it. He deserves the thanks of the public. We were pleased to see that he was sustained by Alderman SCOLES.

Alderman BREEVOORT,

OF THE TWELFTH WARD.

This gentleman, who is a man independent in mind as well as in property, took a bold stand in the Board of Aldermen, some time since, against the Street Commissioner. The Alderman deserves credit for acting independent of that officer, and having a mind and opinion of his own.

NOTE.—Several of the pages of this volume have been destroyed by fire. The present and last preceeding seven pages, are substitutes for those destroyed. Some of the other pages of the volume are being re-published in the same way.

The copies of the petition to the Legislature of 1843, which were on pages 241 to 244, and the re-print also, were destroyed by the torch of the incendiary, in 1843. We have re-printed these on page 254.

SUPREME COURT DECISIONS IN 1841.

At the January term of the Supreme Court the matter of the assessment for constructing a sewer in Twentieth street, on the Hudson river side of the island, was argued upon the return made to the certiorari issued in this cause, by Lewis H. Sandford, Esq., for the Relators, and Peter A. Cowdrey, Esq., for the Mayor and Common Council. The Court held the case under advisement until the October term, near the close of the year, when they *quashed the certiorari.*

At this term of the court Chief Justice Nelson delivered an opinion on denying the motion, made at the December term of 1840, for a certiorari in the matter of re-paving and re-grading Chapel and adjoining streets. This opinion, and the material facts set forth in the affidavits and papers on which the motion was founded, will be found in its order in this number.

At the April special term, Mr. Justice Cowen presiding, motions were made for writs of certiorari in the matter of the proceedings in the assessment for opening Mount Morris square and Second avenue from Twenty-eighth to Eighty-sixth street. L. H. Sandford, Esq., for the Relators, submitted very full points to the Court, which were replied to by Peter A. Cowdrey, for the Mayor, &c. The Court held these two motions under advisement until November, 1841, when he gave a very full opinion, denying the material part of the motions.

At the May term of the Court, held by the full Bench, the cause in which the People ex rel. E. Meriam and others, were relators, and also that in which James Agnew and others were relators, involving the proceedings in the assessments for repaving and regrading Chapel and adjoining streets, and of building a sewer in Chapel and Thomas streets, came on for argument on the respective returns made to the certioraris issued in these causes. Lewis H. Sandford and Wm. M. Holland, Esqs., for the Relators, and Peter A. Cowdrey, Esq., for the Mayor and Common Council. These causes were fully argued. Mr. Justice Bronson took the papers, and at the October term of 1841 delivered a brief opinion of one of the causes. The Court *quashed the certioraris.*

The motions in the matter of Art street, Seventh avenue, Ninth avenue, and Twenty-eighth street assessments for certioraris, are understood to have been disposed of by the Court in the same way as those of Mount Morris and Second avenue.

We shall review the opinions delivered by the Supreme Court in our own plain way, and we shall feel gratified if we succeed in convincing these high judicial officers that they have greatly erred in quashing the certioraris in the particular cases, and denying the writ of certioraris in others.

IN CHANCERY.

Before the Chancellor.

Timothy Wiggin, Banker, of London, in the kingdom of Great Britain, *vs.* the Mayor, &c., of New York.

THE CHANCELLOR.— The language of the bill in this case, leaves it doubtful whether the complainant at this time, is the owner of, or has any interest in any of the lots mentioned in the bill as having been assessed for this improvement; and so far as his personal liability is concerned, this court does not interfere to prevent a mere trespass upon personal rights, on personal estate, where the complainant has a perfect remedy at law. The bill instead of alleging in the usual manner, that the complainant was at a particular date and still is the owner of the lots upon which the assessment for benefit was imposed, merely states as to the first twelve lots, that he was the owner and possessor thereof, on or before the first of September, 1836, and as to the other lots, he states that he was the owner and possessor of them subsequent to the 1st of May, 1839. Neither does the verification of the bill by the complainant's agent show that the agent has any information on the subject; or that he even believes the complainant is now the owner of those lots. As this defect in the bill can probably be cured by an amendment, I shall proceed to examine the objections made to the legality and equity of the assessment, and the question whether the bill in other respects presents a proper case for the interference of this court by a preliminary injunction.

The objection that the delay of the corporation in bringing the proceedings to a close until the spring of 1840, produced injustice, by giving to the tenants of property which was to be taken for the improvement, and who had short leases thereof, compensation for a loss which they do not sustain, does not appear to be one which in any manner concerns the complainant. That appears to be a question entirely between the landlord and tenant of the property taken for the improvement. If the tenant has a beneficial lease, that is, if he has rented the property for a term of years at less than the use of the property was actually worth, he sustains damages in being deprived of the occupancy at this low rent during the remainder of his term. But that damage must necessarily go to diminish the amount which the landlord would have been entitled to receive if the property had not been under a lease; or if the rent reserved upon the lease had been the full value of the use of the lot. The proper way of assessing the damages, where two or more persons have distinct interests or estates in property taken for the improvement, is to ascertain the damage to the whole lot in the same manner as if one person alone had the entire interest therein; and then to apportion that damage among the persons interested in the lot, as landlord and tenant or otherwise, according as the interest of the one or the other will be affected by the taking of the property for the improvement. In such a case, if a tenant had a lease of the property for four or five years at a nominal rent, he would be entitled to damage for taking such interest in the property if it was taken immediately. But in that case the commissioners would not allow any thing to the landlord on account of the loss of rent for the same time. And where, in a case of that kind, the appointment had been made upon an estimate that the proceedings would probably be completed at the expiration of a year, and that the tenant would be dispossessed at that time, if by any unforseen occurrence the completion of the proceedings were procrastinated till the expiration of the lease, the landlord would sustain the whole damage by the taking of the property and the tenant nothing. But the amount of the assessment for benefit upon the property of other persons would not thereby be increased, for the benefit to their property from the making of the improvement would commence as soon as they were compelled to pay the assessment imposed therefor. In the case of *Gillespy vs. The Mayor, &c. of New York*, in the Court for the Correction of Errors, in December, 1839, I had occasion to examine the whole of the statutory provision on the subject of the apportionment of rent and damages as between landlord and tenant, where a part of the property is taken for an improvement during the continuance of the lease. And from that examination, I am satisfied that if the commissioners of estimate and assessment made their assessment in this case upon correct principles in relation to the rights of the lessees and owners of the leasehold property taken for the street, the delay in completing the proceedings could not injure the complainant so as to give him any equitable rights even as against the tenants themselves, whatever equitable claim their landlords may have against them on that account.

I am inclined to think that the commissioners erred in not assessing the property at the corner of William street in the same manner as if the contemplated widening of that street, which was subsequently abandoned, had never been thought of; as that improvement had not been directed when these commissioners were appointed to assess the damages and benefits with reference to the widening of John street merely. But if there was any error in this respect, it was a proper ground for opposing the confirmation of the report before the Supreme Court, and cannot be reviewed in this collateral manner. In the case of Messerole vs. The Mayor, &c. of Brooklyn, (In Chan. April 7, 1840,) referred to in the argument, the commissioners had not erred in judgment as to what property was to be benefitted by the contemplated improvement, and neglected to assess it on that ground; but they had by mistake left out the greatest portion of the lands which were to be taken from the complainants for the contemplated avenue—and the report showed upon its face that the court had no jurisdiction or authority to confirm the assessment—according to the decision of the Supreme Court in the case of Anthony street, (20 Wend 618.) There the court held that if the proceedings had been regular and the commissioners had only erred in judgment in fixing the amount of the damage for the lands taken, or the benefit to the other lands of the complainant, upon erroneous principles, the Court of Chancery could not interfere after the report had been properly confirmed. In this case, if the front of the lots on William street, which were not assessed would actually be benefitted by this improvement, the commissioners erred in judgment in not assessing for the benefit to the front, as well as to the rear of the lots; and the confirmation of the report should have been opposed on that ground. But, as that was not done, the confirmation of the report stopped the owners of other property which was assessed, from alleg-

cond Tuesday of May, 1831. It also vests the legislative power of the corporation in a board of aldermen and a board of assistants, who together shall thereafter form the common council of the city; which boards are to meet in separate chambers, &c. And the complainant's council therefore insists that the mayor, alderman and commonalty can no longer convene in common counsel, to direct the laying out a new street or the altering of an old one, as they were previously authorized to do under the act of 1813.

The conclusive answer to this objection is, that the act of 1813, gives the power to the corporation of the city, when convened in common council according to the provisions of its charter, and not to the particular officers who at that time represented the common council. And the act of 1830 having excluded the mayor and recorder from the common council, and directed the aldermen and assistants to convene as a common council in two separate boards, the mayor, aldermen and commonalty of the city, that is the Corporation under its corporate name, is convened in Common Council for all legislative purposes when the two boards convene in different chambers, and pass a resolution or ordinance, subject to the qualified veto of the Mayor. The power to pass an ordinance authorising the opening of a new street, or the alteration of an old one, under the 177th section of the act of 1813, was strictly a legislative power given to the Corporation represented in its common council duly convened under its charter; as much as the passage of a statute by the State Legislature, for the opening of a State road, or the alteration or enlargement of a canal, and appointing Commissioners to appraise damages, &c., would be the exercise of a legislative power by the people of the State represented in their Senate and Assembly. And this legislative power, which still belongs to the Mayor, Aldermen and Commonalty of the city of New York, under the act of 1813, which is in full force, was properly exercised by the Corporation, convened in Common Council in the manner prescribed by the act of 1830.

Again: if the complainant was right in supposing that the Common Council, as at present organized, had no authority to pass an ordinance for the widening of John street, he is neither entitled to preliminary injunction nor to any relief whatever in this court, as his defence is perfect at law. And if the whole proceedings in relation to the opening of the street were absolutely void in law, and that fact appears upon the face of the ordinance itself, a sale for the assessment upon the complainant's lot would not even create a cloud upon his title. For as every person must be presumed to know the law, a proceeding which is upon its face void, does not constitute a cloud upon the title to real estate against which a court of equity will relieve.

This is also a sufficient answer to the objection that the ordinance was void, because it appears from the record that it was passed without calling for the ayes and noes upon the question of its adoption by the respective boards; if that neglect was, in point of law, sufficient to invalidate such an ordinance. It is not necessary, therefore, that I should express my opinion at this time upon the question, whether the seventh section of the act of April, 1830, requiring the ayes and noes to be taken and published in certain cases, applies to this case; or whether the last clause of that section applies merely to improvements which are to be paid for out of the funds of the corporation generally, or by a tax or assessment upon the citizens at large, and not to cases where the owners of property benefitted by the proposed improvement are to bear the whole expense thereof.

As that question was not argued before me, I have not examined it. But if the provision is applicable to a case of this kind, I think it is merely directory, as to the publication of the report, and of the ayes and noes upon the question of the adoption of the ordinance for the proposed improvement. The neglect to make such publication, did not, therefore, of itself, render the proceeding void, if the ordinance was not void upon the face of the records of its adoption.

There is another substantial reason why this court should not interfere in this case by injunction to prevent the corporation from collecting the assessment, but should leave the complainant to his remedy, if he has any at law. The proceedings for the making of the improvement were commenced nearly five years since, and the complainant had waited until the improvement had actually been completed several months before he or his agent attempted to interfere. This property has received the full benefit that it would receive from the improvement; which benefit the commissioners have estimated at several thousand dollars. And as property of other persons to a very large amount has been destroyed for that purpose, justice requires that it should be paid for by those who have been benefitted by the improvement rather than by a general tax upon the city at large. A court of equity at this late day will not interfere with its strong arm to cast the burthen of the improvement from those who have been benefitted thereby and upon those who have not.

It is true the complainant alleges in his bill that his property has not benefitted by the improvement. But that allegation is not sworn to by any one, and it is of course contradicted by the report under oath of the three very respectable and intelligent commissioners by whom the assessment was made.

The application for an injunction is, therefore, denied with costs.

Copy.

JOHN M. DAVISON, Register.

From the Journal of Commerce of February 9, 1842.

VICE CHANCELLOR'S COURT.

HON. W. T. Mc COON, VICE CHANCELLOR.

First Circuit.

DECISION.

Edmund Frost et al. vs. The Trustees of the Village of Williamsburgh.—This was a motion for an injunction to restrain the defendants from selling certain property for non-payment of assessments. The Court said that the recent decision of the Court of Errors, in the case of Meserole vs. The Corporation of Brooklyn, reversing the order of the Chancellor and Vice Chancellor, which restrained by

injunction the defendants from selling the property of the complainants for the non-payment of assessments, for the opening of Bedford Avenue, has definitely settled the question, *that however illegal may be the proceedings of the Corporation*, the Court of Chancery has no jurisdiction or right to interfere except where the wrongful proceedings lead to the commission of irreparable injury to the freehold, or where it would involve a multiplicity of suits at law, amounting to excessive and vexatious litigation, against which the party seeking relief under the ordinary head of equity jurisdiction, is entitled to be protected.—And whenever these grounds of equitable cognizance exist, they must be particularly stated. No such ground is stated or shown to exist in the present bill, and since the decision of Meserole case vs. the Corporation of Brooklyn, the Chancellor has been obliged to dissolve injunctions and dismiss bills on demurrer in about *five and twenty cases* against the Corporation of the City of New York, in which they were proceeding to sell for the non-payment of assessments in the matter of opening and regulating streets, under circumstances *quite as strong if not stronger*, in favor of the complainants than the present. The injunction is therefore dissolved with costs.

EQUITY COURT.

IN CHANCERY.

CHANCELLOR'S OPINIONS DELIVERED JANUARY 24th, 1842.

Garret Van Doren and others vs. the Mayor, &c. of New York.

Garret H. Striker vs. the same.

Elizabeth Pearson and others vs. the same and Walter Stevenson.—These cases came before the Chancellor upon the demurrers of the defendants, the Corporation of New York, to the bills of the complainants respectively.

The object of the bill, in each case, was to restrain the Corporation from collecting certain assessments upon property claimed by the complainants in the city of New York, or in which they were supposed to have some interest either vested or contingent; such assessments having been imposed for the purpose of laying out streets and avenues, or opening sewers, &c.; or from selling the lands assessed, or advertising the same for sale, or giving any certificate or lease to the purchaser upon the sale thereof; and for a decree declaring the assessments, and all proceedings had in relation thereto, void, &c.

R. Mott and *W. M. Holland*, for complainants in two first causes.

L. H. Sandford, for complainants in last cause.

P. A. Cowdrey, for Corporation of New-York.

THE CHANCELLOR. The objection to the assessments that the Corporation, as at present organized, under the act of April, 1830, has no power to open streets, confirm assessments, &c., was decided against the complainant, in the case of *Wiggin vs. the Mayor, Aldermen and Commonalty of the city of New York*, in March last. And I have seen no reason to change the opinion there expressed, although that case was not in a situation to enable the complainant to review the decision upon that point, by appeal; as several technical objections existed to his right to the premises, as stated in the bill. But if this objection to the right of the Common Council was well taken, it would only show that this court had no jurisdiction in these cases. For a valid legal objection, appearing upon the face of the proceedings through which the adverse party can alone claim any right to the complainant's land, is not in law a cloud upon the complainant's title which can authorize a court of equity to stay or set aside such proceedings.

That can never be considered a legal cloud which cannot for a moment obstruct the unaided rays of legal science, when they are brought to bear upon the supposed obscurity. But when the claim of the adverse party is valid upon the face of the instrument or proceeding sought to be set aside, as where the defendant has procured and put upon record a deed obtained from the complainant by fraud, or upon an usurious consideration, which requires the establishment of extrinsic facts to show the supposed conveyance to be inoperative and void, a court of equity may interfere and set it aside as a cloud upon the real title to the land. (*Simpson v. Lord Howden*, 3 My. & Craig's Rep. 97.) *It was the overlooking of that distinction, in the hurry of business*, though I had recognized and acted upon it in other cases, which led me to affirm the decision of the Vice Chancellor, in the case of *Meserole v. the Mayor and Common Council of Brooklyn*, (8 Paige's Rep. 199.) But my decision in that case was properly reversed by the Court for the Correction of Errors, at its last term in December, 1841, *although the Chief Justice who delivered the opinion concurred with me in the conclusion that the proceedings of the Corporation of Brooklyn were illegal and void.*

The same difficulty exists in relation to the objections that the ayes and noes were not called and published upon the resolutions to make the improvements and to confirm the assessments which were confirmed by the Common Council, and that the resolutions and ordinances were not duly signed by the Mayor; and to various other objections which are made to the legal validity of the assessments. All of which objections appear upon the face of the proceedings through which the Corporation must justify the enforcement of the tax by execution, *and through which the purchasers at sales of the lands of these complainants for the assessments must necessarily make title.* If the complainants are right, therefore, in supposing the proceedings void on all or any of those grounds, upon which I express no opinion, there is ***no cloud*** upon their titles.—And as their remedy at law is perfect by an action of trespass if their personal property is seized upon a distress warrant for the assessments, *and they have a perfect defence at law to any suit brought against them by purchasers at the sales which have been made, or which may hereafter be made;* if the proceedings are void, this Court has no jurisdiction to interfere for their relief. On the other hand, if the proceedings are not void, but merely irregular, the remedy of the complainants clearly is not in this Court, which has no superintending jurisdiction over the regularity of the proceedings of the Corporation of New York in these assessment cases. Indeed, as I understand the prevailing opinion in the Court for the Correction of Errors, in the case of Meserole vs. the Mayor and Common Council of Brooklyn, that Court repudiated the idea that the Court of Chancery has any power or right to interfere in such cases, in relation to any supposed error or irregularity in the assessment, or in the proceedings of the Corporation, or of the commissioners of estimate and assessment. And this Court will not subject itself to the rebuke of that tribunal by interfering in any cases of this kind, except where it is absolutely necessary for the preservation of the complainant's rights.

The demurrers are well taken, and the complainant's bill must be dismissed WITH COSTS. And the injunctions, if any have been granted in these cases, must be dissolved.

Peter G. Stuyvesant and others vs. the Mayor &c. of New York, and John Ewen, street commissioner. (And 21 other causes involving same questions.)

W. M. Holland, for the complainants.

P. A. Cowdrey, for the defendants.

The CHANCELLOR.—These cases came before me on applications for injunction to restrain the Corporation of the city of New York from proceeding to sell the lands of the respective complainants for the payment of assessments imposed upon them for various improvements in that city. Indeed, taken together, they embrace nearly every improvement in the city of New York for the last six years, either in opening, widening, or grading streets, or in constructing sewers, &c. The number of complainants whose rights are in controversy, exceeds *one hundred and seventy*, and the aggregate amount of the assessments the validity of which is contested is immense. I have therefore been obliged to look into each case to see if there was any thing contained therein to give this Court jurisdiction, and justify it in interfering by a preliminary injunction to restrain the corporation and its street surveyor, who has been made a defendant in most of the cases, from proceeding to collect the assessments by a sale of the property assessed in the usual way.

As the complainants have by law two years to redeem their property after it shall have been sold, there does not appear to be any good reason for granting preliminary injunctions at this time, even if the cases, as made by the bills, would, if unexplained, entitle them to perpetual injunctions at the final hearing. The object, therefore, of applying for injunctions at this time, must probably be to save the complainants from the payment of the extra interest, allowed by the statute from the time of the sale, in case it turns out that they are wrong in supposing that this court can interfere for their relief against the final payment of these assessments. This of itself would be a sufficient answer to these applications at this time. And for that reason I refused to continue the temporary injunctions allowed by the Vice Chancellor upon granting the orders to show cause; so that the sales might be made by the Corporation, subject to the equitable rights of the complainants, if

are said to exercise a discretion, it is a mere legal discretion, a discretion to be exercised in discerning the course prescribed by law; and, when that is discerned, it is the duty of the court to follow it. Judicial power is never exercised for the purpose of giving effect to the will of the judge; but always for the purpose of giving effect to the will of the Legislature; or, in other words, to the will of the law."—9. *Wheaton*, 806.

That distinguished Jurist, MR. JUSTICE STORY, quotes the above, and says of it that it was finely remarked by MR. CHIEF JUSTICE MARSHALL, and appends to it, a reference to the Commentaries of the venerable EX CHANCELLOR KENT.

—

LEGISLATIVE POWER.

Mr. Justice Story quotes from the Federalist, No. 78, among others, a paragraph in the following words:—

"There is no position which depends upon clearer principles, than that every act of a delegated authority, contrary to the tenor of the commission under which it is exercised, is void. No legislative act, therefore, contrary to the Constitution can be valid. To deny this, would be to affirm, that the deputy is greater than his principal; that the servant is above his master; that the representatives of the people are superior to the people themselves; that men acting by virtue of powers, may do, not only what their powers do not authorize, but what they forbid."

—

JUDICIAL LEGISLATION.

"But the answer to these and similar objections, is, that such considerations should have weight with those whose business it is to make laws; but they should not control the opinions of those whose business it is to expound the laws."

The above is the closing sentence of a paragraph in the manuscript opinion written by JOHN SAVAGE, *late Chief Justice of the Supreme Court of the State of New York.*

It is an opinion worthy of the man.

The following is also from another manuscript opinion of this truly great man.

"Much of our difficulty arises from judicial legislation: if other laws are necessary, let the legislature pass them."

—

JUDICIARY.

"The Courts must declare the sense of the law; and if they should be disposed to exercise *Will* instead of *Judgment*, the consequence would equally be the substitution of their pleasure for that of the legislative body."—Federalist of No. 78, quoted by Mr. Justice Story with approbation.

CHANCELLOR'S DECISIONS.

We have given all the opinions delivered by His Honor Chancellor Walworth, in assessment cases for the last five years, in full.

It will be seen by a careful reading of these several opinions, that the decisions of the Chancellor, have fluctuated. The opinion given in the suit of Meserole and others vs. the Mayor and Common Council of Brooklyn contrasted with that given a short time afterwards, in that of Timothy Wiggin vs. the Mayor &c. of New York, are difficult to reconcile as respects the assessment being a cloud upon the title.

We do not undertake to say that the Chancellor was wrong in refusing to entertain the bill filed in the latter case, and also in the several subsequent cases disposed of by him, but we feel it our duty to say, that he erred in requiring the complainants to pay costs; inasmuch as he himself remarks, in the opinion he gave in the Van Doren case, that in deciding the Brooklyn case, in the hurry of business, he overlooked a decision. We have occasion to know that in the case of Wiggin vs. the Mayor &c., the Solicitor of Mr. Wiggin obtained from the clerk of the Chancellor at Saratoga a manuscript copy of the opinion of His Honor in the Meserole case, and it was in consequence of the tenor of that opinion that this bill was filed.

It will be borne in mind that the decision made by the Chancellor in Wiggin's case was nearly a year previous to the decision of the appeal in Meserole's case in the Court for the Correction of Errors.

The cases in which the Chancellor sustained the demurrers against the complainants, were many of them of a very aggravated character. The bills filed in these cases were full, and in several cases the complainants set forth that the applications for the appointment of commissioners were not authorized by the Common Council.

The Chancellor may have taken a correct view of these questions in the last decision, and not in the first; but the change of opinion was a difficulty, and quite a serious one, to the complainants.

These matters have passed from the courts to a Committee appointed from the Honorable the Senate of this State to investigate assessment abuses in the city of New York, and that committee have made their report. The members of that committee are distinguished members of the Court for the Correction of Errors: their report will be found in this volume.

We desire to speak of the worthy Chancellor of this State with great respect; he is a most estimable citizen, and, notwithstanding the constant toil and labor in his Court, finds time to attend the benevolent and charitable institutions, and the religious societies of the day—of the most of which he is a conspicuous and valuable member.

It is a wonder how CHANCELLOR WALWORTH accomplishes such an amount of labor. Should his labors increase with his years, when he shall have reached the constitutional barrier of this State, as to the term beyond which judicial officers of a certain grade shall be deemed incompetent, he will have worn himself out with labor.

The salary of the Chancellor of this great State is two th usand, five hundred dollars per annum, a mere pittance for such services.

When we take into view the labor imposed upon the Chancellor, the limited duration of his office, and the compensation attached to it, the wonder is that any person can be found willing to accept of the appointment.

The salary of the Chancellor should be increased to $4,500, at least, and that of the Judges of the Supreme Court to $4000.

N. Y. MUNICIPAL GAZETTE...Extra.

Published by the ANTI-ASSESSMENT COMMITTEE, and distributed gratuitously.----Edited by E. Meriam.

VOL. 1. NEW YORK, APRIL 7, 1842. No. —

LEGISLATIVE POWER.

The Constitution of the United States contains this provision :—

"ARTICLE 1, § 1.—All legislative power herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives."

The Constitution of the State of New York contains these provisions.

"§ 1. *The Legislative power of this State shall be vested in a Senate and an Assembly.*"

Can the Senate and Assembly of the State of New York delegate the right or power to pass penal laws to any other body of men ?

By *Article* 1, *Sec.* 12. "Every Bill which shall have passed the Senate and Assembly, shall, before it become a law, be presented to the Governor; if he approve, he shall sign it; but if not, he shall return it with his objections to that house in which it had originated," &c. The Constitution then proceeds to say, that the objections of the Governor shall be entered "at large on their Journal, and they shall proceed to reconsider it. If after such reconsideration two thirds of the members present shall agree to pass the Bill, it shall be sent together with the objections to the other house, by which it shall likewise be reconsidered; and if approved by two thirds the members present, it shall become a law. But in all such cases, the votes in both houses shall be determined by *yeas and nays*, and the names of the persons voting for, and against the Bill, shall be entered on the Journal of each house respectively. If any bill shall not be returned by the Governor within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Legislature shall by their adjournment, prevent its return, in which case it *shall not become a law.*"

The Governor is thus vested by the Constitution with a negative upon the acts of the Legislature, but this negative is greatly qualified, inasmuch as the vote of two thirds of a bare quorum can pass a Bill after his refusal to sign in it, notwithstanding such refusal.

The Constitution provides that the members of the Senate and Assembly shall respectively be elected on a certain day, at a certain place, by persons possessing certain qualifications, and that they shall convene, &c. on a certain day, &c.

Thus the Constitution provides in what manner laws shall be enacted, and details with great precision the form and time. No Bill whatever can become a law of this State, unless enacted in the manner and form prescribed in the power thus given in the Constitution by the People, who are the Grantors of the Power.

The Constitution contains no power of substitution, no authority, or permission to the Senate and Assembly to delegate the power of making laws to any other body of men. The power is special, limited and restricted in every respect.

The Act of the Legislature of the State, passed April 7th, 1830, which is called the Amended Charter of the City of New York, contains this provision :—

"§ 1.—The Legislative power of the Corporation of the City of New York shall be vested in a Board of Aldermen and Board of Assistants, who, together, shall form the Common Council of the City."

The question then arises, can the Common Council of the City of New York pass laws? Can the Legislature of the State grant to the Common Council, or vest in that body the power to pass laws?

To the first query, we answer in the negative, and add, that the City of New York is a part of the State of New York, and is governed by the laws of the State.

The reply to the second enquiry here propounded, is, that the Legislature of the State cannot in any manner or form, either direct or indirect, delegate the Legislative power vested in that body, that no power of substitution whatever is contained in the Constitution.

A citizen who executes a written power to another citizen to act for him, and in his name, if he intends the power thus given to be exercised by another, inserts a special clause authorizing his said agent and attorney, to substitute another, or others in his place and stead, &c.; but in the Constitution, the grantors of the power make no such provision in that instrument which contains the grant, and none can be presumed, or implied.

If the Common Council desire an ordinance to have the force of a law within the bounds of the City, that ordinance should be made into the shape of a Bill, and be acted on by the Legislature of the State, and approved by the Governor, in the manner and form prescribed by the Constitution.

The Common Council might with as much propriety pass an ordinance to regulate the rate of interest on money, as to pass an ordinance to regulate other matters than those which pertain to the management of the corporate property. The Common Council have no more right to pass an ordinance imposing a penalty on a citizen for a violation of their so-called laws, than a government of an incorporated bank has, and the passage of such ordinances are a violation of the Constitution of this State, and will be so held when taken to the high courts for adjudication, and this objection raised.

No one will for a moment doubt that there should be special laws relative to the City, but all such laws should be passed by the Legislature of the State, and not by the Common Council of the City.

The Common Council of the City of New York is not the Corporation of the City, but the powers of the Corporation are vested in the Common Council, to be exercised by that body in a certain manner, &c. And what, or who is the Corporation of New York? It is the citizens and inhabitants of New York, in whom is vested certain property which has been granted to them by the name and style of the Mayor, Aldermen and Commonalty of the City of New York, and the management of this Corporate property is committed to the Common Council and other particular officers.

The Common Council have the management of this Corporate property for the citizens and inhabitants, the same as the President and Directors of a Bank have of the capital stock which is the property of the Stockholders.

If this Corporate property consists of Market-houses, they have the right and power to say at what rate the stalls shall be leased and what hours the Market shall be opened, but they have no right to say that the citizen who owns a store shall not sell Pork, Beef, or Poultry in that store, nor can they pass any valid ordinance, making it a penalty for a citizen to sell meat on his own premises. We know that such ordinances have been passed by the Common Council, and that some of the Courts have held such ordinances valid, but such a decision would not be held valid by the Supreme Court of the United States.

There is a vast difference between the powers which may be vested by a Charter in a Political Corporation granted by an absolute government possessing unlimited power, and these which are possessed by our free Government exercising the limited and restricted powers conferred by the Constitution.

No one conversant with the provisions of our Constitution, will for one moment pretend to deny that even the Legislature of the State, is greatly restricted and limited in its power; and yet there are others, and some of them members of the common council, who pretend to say that the Common Council, a mere creature of the Legislature, can do that which the Legislatue of the State dare not attempt to do—this is, in effect, making the creature greater than the creator.

Hume, *De Lolme*, Sidney, Tucker and others, who have written much upon Legislative power, speak of it only in such cases as where its exercise is unlimited and unrestricted.

In our free country, this power is possessed by the people, and they are the grantors of power in all cases—the people are sovereign. The legislatures are mere grantees.

less, they shall not receive any salary or consideration, under any pretence whatever. And that all bills which shall have passed the Senate and Assembly, shall, before they become laws, be presented to the said council for their revisal and consideration; and if, upon such revision or consideration, it should appear improper to the said council, or a majority of them, that the said bill should become a law of this State, that they return the same, together with their objections thereto, in writing, to the Senate or House of Assembly, in which soever the same shall have originated, who shall enter the objections sent down by the council, at large, in their minutes, and proceed to re-consider the said bill. But if, after such re-consideration, two thirds of the said Senate or House of Assembly, shall, notwithstanding the said objections, agree to pass the same, it shall, together with the objections be sent to the other branch of the Legislature, where it shall also be reconsidered, and, if approved of by two thirds the members present, shall become a law."

"And in order to prevent unnecessary delays—

"*Be it further ordained*, That if any bill shall not be returned by the Council within ten days after it shall have been presented, the same shall become a law, unless the Legislature shall, by their adjournment, render a return of the said bill within ten days impracticable; in which case, the bill shall be returned on the first day of the meeting of the Legislature after the said ten days."

"The Governor to convene the Senate and Assembly on extraordinary occasions; to prorogue them from time to time, provided such prorogation shall not exceed sixty days in the space of any one year."

Thus the former Constitution of this State made the Governor, Chancellor and Judges of the Supreme Court, a council of revision, and gave to the Governor the power to prorogue the Legislature that the members might return to and consult their constituents. This negative power, thus vested, was not considered objectionable, but on the contrary, when the new Constitution was adopted, in 1821, it was changed and vested solely in the Governor, but the power to prorogue the Legislature was taken away.

The vote required to pass the bill, notwithstanding the objections, under the present constitution is the same as under the former, except that it is required that the vote shall be taken by ayes and noes, and the names of the members voting for or against the bill shall be recorded. The vote required is only two thirds of the members present, which may perhaps be but a minority of each house, or a bare majority form a quorum, and it is only two thirds of this bare majority which is required.

The exercise of the Veto power by the Governor of this State is therefore only that of a qualified negative.

The Veto power of the President of the United States is also a qualified negative. The Constitution of the United States is, however, silent as to the requirement of the Veto taken on the re-consideration of a bill returned by the Executive being by a vote of two thirds the members present or two thirds the members elected.

It would seem that the safer construction would be two thirds the members elected, but we understand that the more liberal and extended construction has been adopted by Congress.

So salutary has this qualified negative, possessed by the President, been found, that, in the experience of more than half a century, the exercise of this power has not been overruled by a constitutional vote by Congress.

The Constitution of the United States is very explicit with regard to the mode in which the vote of re-consideration shall be taken, and that the votes shall be taken by ayes and noes, and recorded in the journals.

When the provisions of the Constitution were debated in the convention, it was proposed to vest the qualified negative in the President and some other department of the Government, but this was strenuously opposed and overruled, and was finally rejected by a vote of eight States against three.

There is another qualification of this negative of the President, which is, that an entire new house of Representatives are elected by the people during his term of office, which, if this exercise of the qualified negative is not satisfactory to the people, they have the opportunity of thus overruling it, and also the term of office for which the Executive himself shall have been elected, will have an end every four years. Thus the frequency of the elections gives additional qualifications to this already qualified negative.

In the amended charter of the city of New York, although (as Mr. Samuel Stevens remarks in an article under the signature of "Third Ward," published in the New York American in 1829, when the city convention were sitting) they were only framing a bill for the State Legislature to pass into a law, that body took the United States Constitution for a model whereby to form a municipal charter; and in vesting the mayor with a qualified negative upon the acts of the Common Council, they made some alterations in that provision, which were, to require the objections of the executive to be published in the newspapers, and that the vote should be that of a majority of the members *elected* to each board, and also of requiring that *at least ten days* should elapse before the board to which the act should have been returned should proceed to re-consider the same. This change of the qualified negative of the Mayor makes his veto at the present moment a nullity. The City Charter, as the act of the Legislature is called, omits to state any thing in relation to acts passed by a Common Council, the members of which whose term of office may expire during the ten days which the Mayor is allowed to consider a proceeding, and decide whether or not he will give his assent. This was an oversight, and there can be no doubt but an act remaining in the hands of the Mayor unsigned when his term of office expires, would be inoperative.

The distribution of power is one of the great principles on which all free governments are based, and we propose to discuss this subject in a future number under that head.

SACREDNESS OF PRIVATE PROPERTY.

That distinguished citizen and eminent jurist, JUDGE STORY, one of the Justices of the Supreme Court of the United States, in his admirable Commentary upon the Constitution of the United States, thus remarks:—

"The concluding clause is, that private property shall not be taken for public use without just compensation. This is an affirmance of a great doctrine established by the common law for the protection of private property. It is founded in natural equity, and is laid down by jurists as a principle of universal law. Indeed, in a free government, almost all other rights would become utterly worthless, if the government possessed an uncontrollable power over the private fortune of every citizen. One of the fundamental objects of every good government must be the due administration of justice; and how vain it would be to speak of such an administration, when all property is subject to the will or caprice of the legislature and rulers."

Mr. Justice Story cites Blackstone, Kent, Rawle, and also several cases which had been adjudicated.

The practice of the last few years in the city of New York to enforce the collection of sham-assessments for fictitious improvements, by a sale of the property pretended to be benefitted for terms of thousands of years, equal to, and in effect, selling the fee simple absolute, is taking private property for public use without just compensation, and in truth is absolute *confiscation.* It matters not to the owner whether his land is taken or his money, both are alike private property; for if he pays the assessment, in most cases he pays the value of the land in paying the assessment, and thus, in fact, re-purchases the land by redeeming it. Vast quantities of lands on the island of New York, have been assessed to such an extent that the interest of the assessment exceeds the value of the land, and also large quantities of other lands are assessed for the pretended opening of streets, avenues, and public squares, (which are not open or needed,) in greater sums than the land could be sold for.

The abuses have been so enormous, so flagrant, so high-handed, that the real estate has lost its value by the insecurity thus produced.

In the case of the streets and avenues, up to and including Forty-second street, referred to in the report of the committee from the Senate of this State, twenty-seven setts of Commissioners (in all eighty-one) were appointed to make an assessment for opening the streets and avenues in that district; whereas the committee of the common council reported in favor of but one sett, (three commissioners,) and did not, in fact, pass any resolution for an application to the Supreme Court for the appointment of even this one set.

It is time such proceedings had an end.

Anecdote of the reigning king of Prussia. **—The following anecdote we cut from the columns of the Albany Daily Advertiser. It belongs to go along side of assessment matters, showing a contrast in the judicial proceedings of the courts of our State, compared with that of a kingly government.**

"We have much pleasure in laying before our readers an interesting anecdote, which has been communicated to us by a gentleman recently from Berlin. Some time since an effort was made to get rid of a windmill, the close approximation of which to the royal palace rendered it in some degree a nuisance, and certainly an eye-sore. Overtures were accordingly made to the sturdy yeoman for the purchase of the obnoxious property; but whether it was that the man was possessed of a strong spirit of obstinacy, or was really deeply attached to his old family habitation, the result was that the offers, tho' tempting, were again and again refused. There are very generally some individuals attached to a court who are ready to suggest remedies, direct or indirect, for inconveniences or annoyances offered to royalty. Accordingly, upon a hint from some minion, a lawsuit was commenced against the obstinate miller for the recovery of certain sums alledged to be due for arrears of an impost on that portion of crown land which it was suggested was occupied by the mill in question. The sturdy holder of the "toll dish" was not altogether without friends or funds, and he prepared vigorously to take his stand in defence of his rights. The question came in due time before the courts of law, and the plaintiff having completely failed to establish any right on behalf of the crown, the miller obtained a verdict in his favor, with a declaration for payment of his costs in suit. This was certainly no small triumph, and merrily went round the unfurled sails of the old mill, and well pleased no doubt, was the owner with the sound, as they went whirling and whizzing under the influence of the gale, which certainly seemed to blow strongly in his favor. But he was not the first who has found that when drawn into a lawsuit, particularly with so formidable an opponent, a man is more likely to "gain a loss" than escape scot free. What with extra expenses, interruption of business, and rejoicings after the victory, the miller found himself pressed by considerable difficulties, and after in vain struggling a few months against the pressure, he at length formed a manly resolution, gained access to the monarch, and, after roughly apologizing for his having thwarted his majesty's wishes, frankly admitted that his wants alone had rendered him complient, but that he was prepared to accept the sum originally offered for the property. The king, after conversing with the miller a few minutes, hand d him a draught for a considerable amount, saying, "I think, my honest friend, you will find that sufficient to meet the emergency; if not, come and talk to me again on the subject. As to the mill, I assure you that I will have none of it. The sight of it now gives me more pleasure than it ever occasioned pain; for I see in it an object that assures me of ***a guaranty for the safety of my people, and a pledge for my own happiness by its demonstration of the existence of a power and a principle higher than the authority of the crown, and more valuable than all the privileges of royalty.***"—[London Paper.]

COMMISSIONERS OR A JURY.

Taking land for Public Avenues, Streets and Squares.

The position of the Assessment question, and the highly important opinions of Chief Justice NELSON, Justice BRONSON and Justice COWEN *of the Supreme Court.*

The Constitution of 1777 contains this provision;—

"That trial by Jury in all cases in which it hath heretofore been used in the colony of New York, shall be established and remain inviolate forever, and further, that the Legislature of this State shall at no time hereafter, institute any new court or courts, but such as shall proceed according to the course of the common law."

The act of the General Assembly of the Colony of New York, passed Oct. 1st, 1691, and confirmed by William III, May 11th, 1697, contains this provision:

"And for other ground, the Mayor, Aldermen and Common Council shall and may treat and agree with the owner and others interested therein; and if there shall be any person that shall refuse to treat in the manner aforesaid, in such case the *Mayor and Aldermen, in their Court,* are hereby authorized by virtue of this act, to issue out a warrant or warrants to the Sheriff of the said city, who is hereby required to empannel and return a jury before the *said Court of Mayor and Aldermen,* which Jury, upon the oath to be administered by the said court, are to enquire and assess such damages and recompense as they shall judge fit, to be awarded to the owners and others interested, according to their several and respective interests and estates in the same, as by the said Mayor, Aldermen and Common Council, shall be adjudged fit to be converted for the purposes aforesaid, and such *verdict of the Jury, and judgment of the said Court of Mayor and Aldermen thereupon,* and the payment of the said sum or sums of money so awarded and adjudged to the owner or others having estates or interest or tender or refusal thereof, shall be binding" &c. *This Colonial act was in force when the Constitution of* 1777 *was adopted.*

The trial by jury extends to property, as well as persons, and therefore the act of 1807 and 1813, authorizing the appointment of three commissioners to take land instead of a jury, is unconstitutional and void.

The Constitution of 1821 *contains these provisions:*—

"The trial by jury, in all cases in which it has been heretofore used, shall remain inviolate forever, and no new court shall be instituted, but such as shall proceed according to the course of the common law." Art. 7, § 12.

"The Governor shall nominate by message in writing, and with the consent of the Senate, shall appoint all *Judicial officers* except Justices of the peace." Art. 4, § 7.

In the decision of the Supreme Court in January, 1841, in the matter of the application of Elmendorf and others for a Certiorari to be directed to the mayor, aldermen and commonalty of the city of New York,

point skilful and competent persons Assessors to make estimates and assessments for building sewers, regulating streets, &c., and the Assessors so appointed are directed to assess the expense of the work, &c., on the owners and occupants of houses and lots deemed to be benefitted thereby, and to certify their assessments in writing to the mayor, aldermen and commonalty, in common council convened; and such assessment, when ratified or confirmed by the said Common council, shall be a lien upon the houses and lots so assessed, and in case of neglect or refusal to pay such assessment, the mayor, recorder and aldermen, or any five of them, are authorized to issue a warrant of distress under their hands and seals, which may be levied upon the goods and chattels, &c. The act of April 16th, 1816, provides further, that in case the owner or occupant, on being twice called upon, refuses or neglects to pay the assessment, his lands may be sold therefor.

Now we insist that in this, the Common council and the assessors are both acting in a *judicial capacity*, and are as much a court as the Commissioners of sewers; and the assessment, when confirmed, is in the nature of a Judgment, being made a lien upon the land, and the warrant being in substance an execution.

We think we have stated enough here to show that Commissioners of Estimate and Assessment cannot take lands for public use from any individual, without his consent, nor can they impose any assessment on adjoining owners: that whenever lands are required in the city of New York, for public use, *a jury* is the only mode of proceeding. And besides, if it should be held that commissioners could take land, such commissioners *can only be appointed by the Governor.* Thus the proceedings of commissioners *are void.*

As to Assessors, these too are *judicial* officers, and the members of the Common council also act or assume to act in a *judicial* capacity, in confirming assessments, issuing warrants, &c. These officers are *none of them appointed by the Governor*, and the Constitution is explicit on this head; it excepts Justices of the Peace, Special Justices, &c.

It is of no use to have a written Constitution, if officers who are sworn to support it will disregard its great principles and requirements.

We think that the learned Judges of the Supreme court were right in *quashing* the writs they had allowed, and in refusing those which were applied for, and that the assessments are absolutely VOID. We are aware that we differ from the learned counsel on both sides in the views now put forth, but it is our deliberate opinion, after examining the question very extensively.

We also think that it was the duty of the court to settle the question of the legality of these assessments, instead of enacting a statute of "PUBLIC INCONVENIENCE"—which enactment most assuredly is not authorized by the Constitution of the State, nor is it sanctioned by public opinion. Neither public or private inconvenience have any place in such cases. Let justice be done—let the law be strictly complied with.

Judicial powers of the Board of Aldermen and Board of Assistants, composing the Common Council of the City of New York.

The following sections of the act, Entitled "*An ACT to reduce several Laws relating particularly to the City of New York into one Act*"—passed April 9th, 1813—constitute all the provisions of the Statute authorizing the imposition of assessments on the owners or occupants of houses and lots for the class of improvements therein specified, and there is no other provisions of law which authorize any assessment to be imposed by the mayor, aldermen and commonalty for this class of improvements.

§ 175.—*And be it further enacted*, That it shall be lawful for the said mayor, aldermen and commonalty, to cause common sewers, drains and vaults, to be made in any part of the said city, and to order and direct the pitching and paving the streets thereof, and cutting into any drain or sewer, and the altering, amending, cleansing and scouring of any street, vault, sink or common sewer, within the said city; and the raising, reducing, levelling or fencing in, any vacant or adjoining lots in the said city; and to cause estimates of the expense of conforming to such regulations to be made, and a just and equitable assessment thereof among the owners or occupants of all the houses and lots intended to be benefitted thereby, in proportion, as nearly as may be, to the advantage which each shall be deemed to acquire; and the said mayor, aldermen and commonalty shall appoint such skilful and competent disinterested persons as they shall or may think proper to make every such estimate and assessment, who before they enter upon the execution of their trust, shall severally take an oath before the mayor or recorder of the said city, to make the said estimate and assessment fairly and impartially, according to the best of their skill and judgment; and the said persons, after having made such estimate and assessment, shall certify the same in writing to the said mayor, aldermen and commonalty, in common council convened, and being ratified by the said council, shall be binding and conclusive upon the owners and occupants of such lots so to be assessed respectively, and shall be a lien or charge on such lots as aforesaid; and such owners or occupants shall also respectively be liable upon demand, to pay the sum at which such houses or lots respectively shall be assessed, to such person as the said common council shall appoint to receive the same; and in default of such payment or any part thereof, it shall be lawful for the mayor, recorder and aldermen of the said city, or any five of them, of whom the mayor or recorder shall be one, by warrant under their hands and seals to levy the same by distress and sale of the goods and chattels of such owner or occupant refusing or neglecting to pay the same, rendering the overplus (if any), after deducting the charges of such distress and sale to such owner or occu-

pant, and the money, when paid or recovered, shall be applied towards making, altering, amending, pitching, paving, cleansing and scouring such streets, and making and repairing such vaults, drains and sewers as aforesaid, and raising, reducing, levelling or fencing in, such lots as aforesaid. *Provided however*, That nothing herein contained shall affect any agreement between any landlord and tenant, respecting the payment of any such charges, but they shall be answerable to each other in the same manner as if this act had never been made; and if the money so to be assessed be paid by any person, when by agreement or by law the same ought to have been borne and paid by some other person, it shall then be lawful for the person paying, to sue for, and recover the money so paid, with interest and costs, as so much money paid for the use of the person who ought to have paid the same; and the assessment aforesaid, with proof of payment, shall be conclusive evidence in such suit.

§ 176. *And be it further enacted*, That if upon completing any such regulation, it shall appear to the said mayor, aldermen and commonalty, that a greater sum of money had been *bona fide* expended in making such regulation than the sum estimated and collected aforesaid, it shall then be lawful for the said mayor, aldermen and commonalty, to cause a further assessment equal to such excess, to be made and collected in manner aforesaid; and in case the sum actually expended shall be less than the sum expressed in such estimate, and collected as aforesaid, the surplus shall forthwith be returned to the persons from whom the same were collected. or their legal representatives.—2 R. L. p. 407,

The sections above quoted contain a special power, given to a select class of persons, to make certain improvements particularly named in manner and form therein stated.

It will be noticed that this is a special power given by the Statute to a select class of persons. The mayor, aldermen and commonalty, as then known and entitled, were the mayor, recorder, aldermen and assistant aldermen of the city of New York. These public officers composed the city council, and assembled in one body in the same council chamber.

The mayor, and also the recorder of the city, were appointed by the State council of appointment—the aldermen and assistants were elected by the freeholders of the respective city wards.

In 1821 the Constitution of the State was remodelled, or rather, a new Constitution was formed, one of the provisions of which was that the mayors of cities should be appointed by the respective common councils of each. This provision, as to the city of New York, was altered in 1833 by an amendment of the State Constitution in that particular; and now it is provided that the mayor of the city of New York shall be elected annually by the People.

The recorder, by the Constitution of 1821, shall be appointed by the Governor and Senate.

By the Amended Charter of the city of New York [Session Laws of 1830, ch. 122] the legislative power of the corporation is vested in a board of aldermen and board of assistants who, together, shall form the Common council of the city.—§ 1.

By the fifteenth section, of the same act, neither the mayor nor recorder shall be members of the Common council after the second Tuesday of May, 1831.

By the 7th section, of the act as above, the boards are required to keep a journal of their proceedings and to meet in separate chambers; and, by section twelve, all acts, before they shall take effect, shall be first approved by the mayor, &c. &c.

The apportionment of judicial officers under the Constitution of 1821.

By the 7th section of Article IV. of the Constitution, the Governor shall, by message in writing, nominate, and, with the consent of the Senate, appoint all judicial officers except justices of the peace; by section 14 special justices and assistant justices of the city of the city of New York are excepted, and by sec. 1 of Art. V. the members of the court for the Correction of Errors are excepted.

We here raise two Questions, viz:—

1. *Are Assessors, who are appointed by the board of Aldermen and board of Assistants, with the Mayor's approval, Judicial officers?*

2. *Do the boards of Aldermen and Assistants, sitting in separate chambers, in ratifying Assessments made by Assessors appointed by themselves, and the Mayor also in approving such acts, act judicially?*

To the first question, we answer that the 175th section above quoted authorizes an estimate of the expense of the work, as a preliminary measure, previous to making the assessment of the expense upon the owners and occupants intended to be benefitted thereby, by skilful, competent, disinterested persons, to be appointed by the mayor, ald. and com.; and this assessment is to be made in such proportion as they deem the advantage acquired by such owner or occupant. Their estimate and assessment shall be certified in writing to the mayor, aldermen and commonalty, in Common council convened, but has no binding force until ratified by said Common council. This ratification is, therefore, to all intents and purposes, a judgment, which is by the same section made a lien upon the houses and lots of such owners and occupants, &c., and upon this ratification or judgment, a warrant of distress is authorized to issue under the hands and seals of the mayor, recorder and aldermen, or any five of them, of which the mayor or recorder are to be one; and by the act of April 12th, 1816, the mayor, aldermen and commonalty, in default of payment of such assessment, are authorized to sell or lease the houses or lots so assessed for an unlimited number of years, even to the end of time. The Constitution adopted in 1777, and which was in force when these two acts above referred to were passed, contained no limitation as to the appointment of judicial officers, or at least we have found no such provision in that instrument. At the time of the passage of these two acts the mayor and recorder were both appointed by the council of appointment, and after the adoption of the new Constitution in 1821 the recorder was appointed by the Governor and Senate as a judicial officer, and continued to be a member of the Common council; but the amended charter of April 7th, 1830, *excluded* that officer after the second Tuesday of May from a seat in the Common council, and he is now no longer a member of that body; nor does any Judicial officer hold a seat in either board composing the Common council: therefore, there is no authority under the Constitution for the Common council to act in a judicial capacity, the law of 1813 and 1816 being both abrogated by the Constitution of 1821.

The Assessors, therefore, as standing alone, are not judicial officers; but their acts, taken in connection with the proceedings of the mayor, aldermen and assistants, constitute proceedings which are, in their operation and effects or consequences, the highest exercise of judicial authority in matters pertaining to the rights of property.

The Answer to the second question has been mainly anticipated in the reply to the first question.—The Amended Charter was the result of measures growing out of complaints in the assessment made for building Canal street sewer, which was an assessment of near one hundred thousand dollars by assessors appointed under the 175th section before quoted which had been confirmed by the Common council composed of the mayor, recorder, aldermen and assistant aldermen. The dissatisfaction which this assessment produced caused applications to be made to the Common council for an amendment of the City Charter, and accordingly an application was made by that body (under the corporation seal) to the Legislature of the State. This application was accompanied by a bill, which was passed by the Legislature, conditioned to become a law if the majority of the electors of the city of New York by their vote by ballot signified their acceptance of it. This they did not do—less than 700 votes, of the whole number of voters in the city, were cast in its favor. This was in 1824.

In 1828 the Legislature, on the application of the Common council, re-enacted the same bill, with the same conditions, and it was again submitted to the electors of the city of New York, and by them again rejected.

This bill provided for the exercise of all the powers which had ever been conferred by charter or by law on the mayor, aldermen and commonalty, or the mayor, aldermen and commonalty in Common council convened, or the mayor, recorder, aldermen and assistant aldermen, thereafter to compose two boards meeting in separate chambers, with concurrent jurisdiction.

The next proceeding was the Convention which met in June, 1829, to frame a bill for the Legislature to pass into a law amending the City Charter, and here a great mistake was made in taking the Constitution of the United States for a model to frame a bill for the Legislature to pass into a law, unless we assume it to be conceded that the business of the Common council was to be confined to the affairs of the corporation as a corporation

Had the complainants in these cases derived benefits equal to the assessments, and then complained of the exercise of a power unknown to our laws, there would have been some little apology for withholding relief; but in these cases the extreme of the reverse is the case. The complainants are injured, and, notwithstanding, are called upon to pay such immense sums of money in the shape of assessments on their lands as to amount to a repurchase of their own lands for cash.

The Common council, by their solemn act, deliberately considered and unanimously adopted, admit that property has been assessed beyond its value, and they resolved that the Counsel be directed to take measures under the direction of the finance committees to obtain a review of the assessment in 1841.

This is an acknowledgment of improper proceedings by the very body who confirmed or ratified the assessments made by their own officers whom they had appointed Assessors.

In the enlightened governments of Europe we hear of no such doctrine being set up, to deprive citizens or subjects of their estates, as that of "public inconvenience," or even of public necessity. Private property, by the governments of Europe, is held sacred and inviolate, and in no case can private property be taken for public use unless the most ample compensation is first made to the owners; and such is the great and fundamental doctrine in our own land—such is the law of the Constitution—such is the will of the People!

It has been said that the owners and occupants of houses and lands which are assessed for this class of miscalled improvements receive compensation in the advantages which the property derives by its increased value. Where is the increased value in cases where the assessment imposed exceeds the value of the land deemed to be benefitted? And where, we again ask, is the compensation in other cases in which the bare interest of the assessment exceeds the value of the property assessed?

When property is offered to be leased by the Corporation for a period extending throughout all time to any person who will pay the assessment, and none can be found willing, as it were, to accept the land as a gift on such conditions,—is it not evidence of the most convincing and conclusive character that the assessment has been most shameful and unjust—that it is nothing short of an act of confiscation? Is either the letter or the spirit of the law complied with in the making of the assessment? Certainly not. The assessment is a mere arbitrary apportionment of the contract price of certain work upon a selected piece of ground by mere mathematical calculation. The assessors are required to be skilful, competent, disinterested. Why these qualifications if the assessment is a mere apportionment, a mere distribution by figures without regard to damage or benefit? Most preposterous! and yet we are told that it will be a "public inconvenience" to set aside such assessments, or to compel the Corporation to review their proceedings.

When our Government made a claim upon Mexico to make restitution and satisfaction to our citizens for the spoilations committed by her officers upon their private property, there was no such doctrine set up by the Mexican government, or its constituted authorities, as "public inconvenience"; and if it had been pleaded, it would have only aggravated the injury.

Private property is sacred in all civilized countries, and also in some of the most barbarous; and no government can long exist which does not respect, and so hold it. It is the very foundation of government, and as Mr. Justice Story very justly remarks in his admirable Commentary on the Constitution—"Indeed, in a free government, almost all other rights would become utterly worthless if the government possessed an uncontrollable power over the private fortune of every citizen."

In principle, there is no difference between taking land from a citizen and converting it to public use without compensation and taking money. Both are alike private property, and both are alike protected by the Constitution. It makes no difference to the citizen which is taken, his money or his land.

During the last war, when the American army found it necessary to destroy the dwellings and other property of our citizens, to prevent it from falling into the hands of the enemy, in all cases full and complete compensation was by our Government made to the owners. These sufferers were not told that they are compensated for the loss of property thus destroyed by the protection which is afforded by the Government to their persons and their other property.

These assessments upon private property, which have been ordered by the common council and ratified by that body, are large in amount. In some cases, a single individual has been assessed the sum of thirty thousand dollars; others ten and fifteen thousand dollars each.

Lands of citizens have thus been invaded. The soil, which before had been productive, has been covered several feet deep with gravel and sand, and a charge made for this kind of covering by the load, at a rate that actually makes it a complete confiscation. We have now before us a paper containing an advertisement by the street commissioner of a piece of land to be sold for the non-payment of an assessment which is stated to contain 165 lots, equal to about ten and a half acres. This land is situate between 115th and 124th streets and the Fifth and Eighth avenues, being near seven miles from the City Hall. The assessment is stated at sixteen thousand and sixty-three dollars, which is about one hundred dollars per lot, or sixteen hundred dollars per acre. The advertisement states that the assessment was confirmed on the 31st of May, 1837, since which time it has been on interest, at the rate of 7 per cent. per annum. This then, is on interest five years and three months, which amounts to the sum of five thousand nine hundred and three dollars and fifteen cents, which is near six hundred dollars per acre. This property was advertised to be sold for this assessment in June, 1840, and was offered for sale without getting a bid. Although this property is on one piece of

ground, it was advertised for sale as 165 lots. The charge for the advertisement alone was two dollars per lot, which was equal, for the piece of land, to three hundred and thirty dollars for the advertising alone!

The same land was again advertised for sale, for the same assessment, in October 1841, but could not be sold for the want of bidders.

This land belongs to the estate of a person some years since deceased.

This assessment is one of those referred to in the following proceedings of the common council.

—

From Senate Doc. No. 100, *page* 277.

Preamble and Resolutions for paying Contractors and applying to the Legislature for act to buy under sales for assessments.

Whereas, there are large amounts due several persons, contractors for building sewers, regulating streets and avenues, and paving and setting curb and gutters, and also for filling low and sunken grounds, as set forth in the original schedule, prepared by the street commissioner, and which improvements were made, and work done in pursuance of the several respective ordinances of the common council, and which were to be paid for by assessments on the property benefitted, and as soon as the amounts of said assessments were collected.

And whereas, the assessments levied in pursuance of said ordinances have been for some time confirmed, but collection of the same, only in part made, and most of them returned as unpaid and uncollectable, and the property liable thereto, and on which, the same were a lien, agreeable to the laws of the state, advertised, and offered for sale by the street commissioner, at the recent sale of property for assessments; but the amount due on said assessments could not be realized, by reason of their being no bids at such sale for said property, *the amount of said assessments being more than the present market value of said property so liable*, in consequence whereof the said contractors are still unpaid; the common council, in order to relieve them, and anticipating the collection of said assessment, and which may hereafter be made, and trusting that they may be authorized by the Legislature, to raise by tax the amount which they may so advance, and to secure themselves and city treasury, from any loss, by being authorized to purchase in at any sale, such property, for which there may be no bids; do adopt the following resolutions:

1. *Resolved*, that the counsel prepare a law, under the direction of the law committee, to be applied for, to the Legislature, authorizing the corporation to become purchasers of property which may hereafter be offered for sale, for payment of assessments agreeable to law; to refund them for any advances which may have been made by them, to contractors or others, for the improvement for which such assessments were imposed. Such law to contain all needful provisions to secure the rights of parties interested therein, and that such property be held as a trust fund to repay such advances.

2. *Resolved*, that the comptroller be authorized to pay the several contractors the amounts respectively due them, for the several improvements made in pursuance of the ordinances of the common council, in all cases where the property assessed therefor, was benefitted by such improvement, has been offered for sale, and could not be sold by reason for the want of any bid, at the recent sale of property for assessments, or in cases, in which the sale of such property has been enjoined by the Court of Chancery, such payment to be made on the first day of October next.

3. *Resolved*, that the comptroller include the estimated amount required for the above payment, in the amount of the next annual tax bill, to be applied for to the next Legislature.

4. *Resolved*, that the counsel to the corporation, under the direction of the law committee, *take measures to obtain a revision of assessments, mentioned in the annexed schedule as may be judged expedient, and agreeable to law.*

Adopted by the board of assistants, February 25, 1841.

Adopted by the board of aldermen, February 22, 1841.

Adopted by the acting mayor, February 25, 1841.

Volume 8, of the printed proceedings of the common council, printed by authority of the common council, page 121 and 122.

December 24, 1841, compared with the printed Document in vol. 8, of proceedings of common council, page 121 and 122, and correct. G. FURMAN, *Chairman.*

—

We find in the street commissioner's advertisement for the sale of lots in June, 1840, a lot 24 feet 6 inches front, by about 100 feet deep, advertised for sale for an unpaid assessment for filling in Fifth street. The assessment is one thousand eight hundred and forty-five dollars and sixteen cents—confirmed June 28th, 1830—interest to June 28, 1840, being ten years, at 7 per cent. per annum, $1291.62, which makes the amount, in all, $3136.78. This lot is on the corner of avenue B, and is hardly worth one quarter of the amount.

We notice in another case for the regulating and repaving of Chapel street, that Mr. Andrew Lockwood, who owns 14 houses of a block fronting on that street, was assessed the sum of $1480.90. Instead of being benefitted that amount, his property was actually injured more than ten thousand dollars.

Mr. Riley, in the same street, was assessed for the same proceeding $732.71, by which, instead of being benefitted that sum, his property was injured more than five thousand dollars. In fact, ten thousand dollars would not make him good for the injuries he has suffered by the proceeding.

Other citizens in the same street have also suffered largely by the same proceeding. In this case, the contract price for the repaving of the street was five times that which had been paid for repaving the same street previously, and the work of the first repaving was much better than the last.

We notice another case in the Eighth avenue. Mr. Scott was assessed on a piece of ground —— feet front, $——— for regulating this avenue. Some years since, this very property was taxed to pay for working the Third avenue, which was such a proceeding in every respect as the Eighth avenue. In this case of Mr. Scott's, the lot was sold for the assessments, and he redeemed it by paying over seven hundred dollars. In the case in which this property was sold the assessment was never signed, or certified by the assessors, and still the common council ratified it, without any examination; and the street commissioner, who was one of the assessors named in the ordinance for making the estimate and assessment, actually sold the land under these proceedings.

The assessment for building a sewer in 122d street.—This sewer is, part of it, built on piles, over a salt meadow, and above the ground which is assessed for draining. Even the bottom of the sewer is higher than the ground which is assessed, and the water cannot be got into the sewer from the surface unless it is pumped into it by hand or machinery. In this case, the sewer was actually in a state of dilapidation before the assessment was confirmed. Some of the lands assessed for the sewer are actually separated from it by an immense ledge of rocks, and the waters which fall on this ground have a contrary course from the sewer.

—o—

MEMORIALS TO THE LEGISLATURE.

The following is a copy of Six Memorials presented to the Legislature at the last session by the Hon. Gabriel Furman. The Anti-Assessment Committee deem it necessary to state, for the information of Honorable Members of the Legislature who may not be familiar with the names of the signers, that four of them are distinguished Ex-Mayors of the city of N. York, another Ex-Recorder, and another the present Recorder. Nineteen have been Members of the Board of Aldermen, twelve have been members of the Board of Assistant Aldermen and of the Corporation; ten are Presidents of Banks, twenty-eight Presidents of Insurance Offices, the Assistant Register of the Court of Chancery, the Postmaster of the city, and Collector of the Port, thirty-six of the most respectable commercial and mercantile firms in the city, and a great number of the most highly respectable citizens; — showing most clearly the state of public opinion on this most highly important question.

Robert Smith, *Chairman.*

ORABLE, THE LEGISLATURE OF THE STATE OF NEW YORK:

City of New York, most respectfully represent to your Honorable Body, that the extraordinary and ercised by the Corporation of the City of New York, in assessing private property for what are called strained by Legislative enactments.

d in various public officers in Assessment matters have been greatly abused, and the consequences the value of real estate, and render titles doubtful and insecure.

very full exhibits of the disastrous consequences of the abuses complained of will be made to your subject may be taken into the serious consideration of the Legislature, and that the Legislature may ne owners of real estate, and such as in their wisdom may seem meet. And in duty bound, &c.

N. Y. MUNICIPAL GAZETTE...Extra.

Published by the ANTI-ASSESSMENT COMMITTEE, and distributed gratuitously.----Edited by E. Meriam.

VOL. 1. NEW YORK, APRIL 9, 1842. No. —

ASSESSMENTS.

REPORT

Of the Select Committee from the Senate of this State, appointed to investigate Assessment Abuses in the City of New York,

COMPOSED OF THE

HON. GABRIEL FURMAN,
HON. GULIAN C. VERPLANCK,
HON. JOHN B. SCOTT.

In order to present the material portions of this important Report, we have classified the subject matter of the report, and accompanied each portion with remarks and references, that the reader may be able to obtain some knowledge of this all-important subject.

The COMMITTEE say:—

"In the investigation of the matters thus committed to their charge, the Committee were occupied during almost the whole of the last autumn in the city of New York, and also in the month of December, and to the period of the meeting of the present Legislature."

Again, the Committee remark:

"On the 18th September last the Committee received a Communication from the Memorialists, on whose application the investigation was ordered, tendering to their use the commodious Lecture-room in Clinton Hall, New York, free of expense or charge to the State, which was accepted."

The Committee, after detailing certain matters as to the public officers, say that—

"In the course of their examination, the most prominent matters complained of appeared to be,

"*First*, In the manner of opening streets, avenues and public squares in the city; in the appointment of the commissioners of estimate and assessment; in the expenses of those commissioners, and the time spent in the discharge of their duties.

"*Secondly*, The imposition of heavy and oppressive assessments for improvements never actually made, except upon paper; and which assessments were frequently ruinous, being more than the value of the property assessed; and the great difficulty which owners of real estate in that city, and particularly in the upper and unimproved portions of it, experienced, from the fact of using arbitrary map numbers instead of street numbers and farm numbers.

"And, *Thirdly*, The great difficulty which the citizens had encountered in obtaining a review and correction of any errors committed by the commissioners and assessors in making any of such awards or assessments for the opening of said streets, avenues or public squares, from the fact that, although the Court of Chancery at first assumed jurisdiction of such cases on the ground that such assessments being made by a statute, a lien upon real estate was a cloud upon the title, and might, if unjust and unequitable, be removed in equity, it has since denied having cognizance of such matters; and the Supreme Court have in some instances denied a certiorari, to remove such proceedings, and others where the writ had been granted, had afterwards quashed the same and refused the parties any relief, referring them to an action at law for trespass against the individual members of the common council, or against the officers of the corporation personally, who should attempt the collection of such assessment.

"The committee will examine these several propositions which contain the substance of the long and tedious investigation through which they have progressed, and will submit to the consideration of the Legislature the conclusions to which they have arrived upon these several heads.

"*First.* The manner of opening streets, avenues and public squares, in that city, in the appointment of the commissioners of estimate and assessment, in the expenses of those commissioners, and the time spent in the discharge of their duties.

"That there have been great and serious abuses in the mode of opening streets and avenues in the city of New York, and in the expenses attending the same, cannot be doubted by any person who has examined the subject; and these evils have mainly arisen from the loose and unguarded manner in which that important branch of authority has been exercised.

"For while in England, in the city of London, in Birmingham and other places, whose proper municipal regulations would seem to require as liberal extension of power to their local corporate governments as that of New York, streets cannot be opened or widened without an act of Parliament specially passed for that purpose, upon a due examination of all the circumstances of the case; yet, in the city of New York, they are opened or widened, and that in large numbers together, by a single resolution adopted by the two boards of the common council, without any control, as was the case in opening all the streets and parts of streets not previously opened up to and including 42d street, by a resolution of April 6, 1835; and subsequently, September 12, 1836, another resolution was adopted to open all the streets from 42d street to 57th street. The reservoir on Murray's Hill, in the city of New York, is on 42d street.

"This loose practice has grown up in modern times, for the more guarded one of an application to the supreme legislative authority was in existence in that city, subsequent to 1792, when to authorize the first widening of John street an application was made to the Legislature, then in session in that city, and before either house would act upon the petition, they sent a committee to examine the ground; upon the report of which committee, they enacted that the damages to the owners whose lands were taken, should be appraised by a jury who should be composed of merchants, showing how careful they were in former legislation on this important subject.

"This appraisement is now made by three commissioners, appointed by the Supreme Court, who are generally nominated at the instance of the counsel of the corporation, although there have been instances where one of those commissioners has been selected by the court from names proposed by the corporation council, and by the opponents to the application, and another has been named by those opponents.

"It is difficult now to comprehend how the expenses in opening streets and avenues in that city could have been so VERY GREAT as they are represented to have been, but of the fact of their being so very great, there can be no doubt; it is established by the receipts of the commissioners for the same exhibited before the committee.

"In the opening of the Seventh avenue, from 21st street to 129th street, which was confirmed in February, 1839, the amount awarded to the owners for land taken for the avenue, was **$21,141 .41,** while the *FEES* and expenses amounted to the large sum of **$12,435 .70,** and if to that is added the collector's Fees for *collecting* the assessments, **$1,115.00,** it will show a total of expenses *paid* by the Owners of Land on that portion of the Seventh avenue for its *formal* opening, amounting to **$13,550.70!**

"The amount paid to the commissioners on that avenue for their services, at the rate of four dollars per day, which is the highest sum allowed by the statute, is pay for *sixteen months'* services for each commissioner, in making the estimate of the land taken for opening that avenue, and assessing that value back again upon the land on each side of the avenue; and in opening this one street, of one hundred and eight blocks of about 270 feet each, THE COMMISSIONERS WERE *EACH ENGAGED* **THREE TIMES THE WHOLE PERIOD** THAT THE LEGISLATURE *IS EMPLOYED IN LEGISLATING FOR THE STATE,*

ment. The motion was argued before Chief Justice NELSON, at the March Special Term, and he refused to interfere, on the ground of lapse of time, notwithstanding the application was made within six months of the confirmation of a report, which was presented and confirmed without notice. The Chief Justice also assumed to exercise what he termed the discretion of the Court, in the case. The discretion of the Court is not the will of the Judge. We have noticed this point on page 196 of this number.

The most powerful monarch in Europe never claimed as much authority over the private property of a subject, as has been exercised by the Supreme Court for years over the private property of the citizens of this City in street assessments.

We discussed some branches of this question, in the Municipal Gazettee of December, 1842.

The Court in this opinion, are so explicit with regard to the prohibitory clause of the Constitution, "that he who runs may read."

We are glad to see the doctrine of strict construction under way, and when once broached in political matters there is no difficulty in applying the principle to the piratical assessments in the City of New-York.

Re-Argument.

Mr. Emmett has served Mr. Mott with a notice of re-argument of his five street motions. His notice is entitled before the Supreme Court. What nonsense under the views here expressed by the Court. We will publish his affidavit on which he founds his notice of motion.

Another Assessment Cruelty.

The Assessment for setting curb and gutter in the 8th Avenue, amounts to $43.922-25. The assessors appointed by the Common Council to make the assessment, are the Street Commissioner, his Assistant and Clerk. The contract was made by the Street Commissioner, and the prices unreasonable.

When the Senate Committee were in session at Clinton Hall, this proceeding was brought before them, as one of the Assessment outragss. Mr. Perrine, a former Clerk in the Street Commissioner's office, was examined as a witness, he stated that: "there are no names of Assessors in any part of it, nor is it signed by any Assessors." The assessment was passed by the Board of Aldermen, Dec. 17th, 1838; by the Board of Assistants, Dec. 24th, 1838, and approved by the Mayor, Dec. 28th, 1838, although not signed by the Assessors. This is the way the public business is done. The Assessors are the same as those of Chapel street, and yet the two assessments are made upon entirely different principles; both cannot be right.

By a decision of the Supreme Court, all the Assessors must be present to make the assessment, but a majority may decide.

This is the assessment, for which the Street Commissioner sold the house and two lots belonging to Mary Stewart and her children, all their property. One of the children is sickly. The husband of Mary Stewart was a shoe-black, and he earned his money by hard labor, with which he purchased this property, and when he died he left it to his family.

The purchaser at the assessment sale of this property, on getting his lease, took possession, and put the furniture of the occupants out of doors, but he was prosecuted for forcible entry and detainer, and at once surrendered the premises, and has since brought an ejectment suit on his lease. A case has been made, and will be argued next month before a full Bench. Some charitable individual has volunteered a Counsel fee to defend the little home of the colored woman and her helpless children.

The owner of the premises had no notice of the assessment, or the sale.

The regulating the third avenue was paid out of the City Treasury, and so ought that of the eighth avenue.

Alderman NASH,

OF THE SEVENTH WARD.

On Monday evening, Alderman NASH tendered his resignation as Chairman of the Committee of Public Offices, Repairs, &c., assigning very satisfactory and substantial reasons therefor.

We have watched the movements of this member of the Common Council, with a great deal of interest; he is a plain spoken man, and when he discovers a wrong, he sets his face at once against it. He deserves the thanks of the public. We were pleased to see that he was sustained by Alderman SCOLES.

Alderman BREEVOORT,

OF THE TWELFTH WARD.

This gentleman, who is a man independent in mind as well as in property, took a bold stand in the Board of Aldermen, some time since, against the Street Commissioner. The Alderman deserves credit for acting independent of that officer, and having a mind and opinion of his own.

NOTE.—Several of the pages of this volume have been destroyed by fire. The present and last preceeding seven pages, are substitutes for those destroyed. Some of the other pages of the volume are being re-published in the same way.

The copies of the petition to the Legislature of 1843, which were on pages 241 to 244, and the re-print also, were destroyed by the torch of the incendiary, in 1843. We have re-printed these on page 254.

SUPREME COURT DECISIONS IN 1841.

At the January term of the Supreme Court the matter of the assessment for constructing a sewer in Twentieth street, on the Hudson river side of the island, was argued upon the return made to the certiorari issued in this cause, by Lewis H. Saudford, Esq., for the Relators, and Peter A. Cowdrey, Esq., for the Mayor and Common Council. The Court held the case under advisement until the October term, near the close of the year, when they *quashed the certiorari.*

At this term of the court Chief Justice Nelson delivered an opinion on denying the motion, made at the December term of 1840, for a certiorari in the matter of re-paving and regrading Chapel and adjoining streets. This opinion, and the material facts set forth in the affidavits and papers on which the motion was founded, will be found in its order in this number.

At the April special term, Mr. Justice Cowen presiding, motions were made for writs of certiorari in the matter of the proceedings in the assessment for opening Mount Morris square and Second avenue from Twenty-eighth to Eighty-sixth street. L. H. Sandford, Esq., for the Relators, submitted very full points to the Court, which were replied to by Peter A. Cowdrey, for the Mayor, &c. The Court held these two motions under advisement until November, 1841, when he gave a very full opinion, denying the material part of the motions.

At the May term of the Court, held by the full Bench, the cause in which the People ex rel. E. Meriam and others, were relators, and also that in which James Agnew and others were relators, involving the proceedings in the assessments for repaving and regrading Chapel and adjoining streets, and of building a sewer in Chapel and Thomas streets, came on for argument on the respective returns made to the certioraris issued in these causes. Lewis H. Sandford and Wm. M. Holland, Esqs., for the Relators, and Peter A. Cowdrey, Esq., for the Mayor and Common Council. These causes were fully argued. Mr. Justice Bronson took the papers, and at the October term of 1841 delivered a brief opinion of one of the causes. The Court *quashed the certioraris.*

The motions in the matter of Art street, Seventh avenue, Ninth avenue, and Twenty-eighth street assessments for certioraris, are understood to have been disposed of by the Court in the same way as those of Mount Morris and Second avenue.

We shall review the opinions delivered by the Supreme Court in our own plain way, and we shall feel gratified if we succeed in convincing these high judicial officers that they have greatly erred in quashing the certioraris in the particular cases, and denying the writ of certioraris in others.

IN CHANCERY.

Before the Chancellor.

Timothy Wiggin, Banker, of London, in the kingdom of Great Britain, *vs.* the Mayor, &c., of New York.

THE CHANCELLOR.— The language of the bill in this case, leaves it doubtful whether the complainant at this time, is the owner of, or has any interest in any of the lots mentioned in the bill as having been assessed for this improvement; and so far as his personal liability is concerned, this court does not interfere to prevent a mere trespass upon personal rights, on personal estate, where the complainant has a perfect remedy at law. The bill instead of alleging in the usual manner, that the complainant was at a particular date and still is the owner of the lots upon which the assessment for benefit was imposed, merely states as to the first twelve lots, that he was the owner and possessor thereof, on or before the first of September, 1836, and as to the other lots, he states that he was the owner and possessor of them subsequent to the 1st of May, 1839. Neither does the verification of the bill by the complainant's agent show that the agent has any information on the subject; or that he even believes the complainant is now the owner of those lots. As this defect in the bill can probably be cured by an amendment, I shall proceed to examine the objections made to the legality and equity of the assessment, and the question whether the bill in other respects presents a proper case for the interference of this court by a preliminary injunction.

The objection that the delay of the corporation in bringing the proceedings to a close until the spring of 1840, produced injustice, by giving to the tenants of property which was to be taken for the improvement, and who had short leases thereof, compensation for a loss which they do not sustain, does not appear to be one which in any manner concerns the complainant. That appears to be a question entirely between the landlord and tenant of the property taken for the improvement. If the tenant has a beneficial lease, that is, if he has rented the property for a term of years at less than the use of the property was actually worth, he sustains damages in being deprived of the occupancy at this low rent during the remainder of his term. But that damage must necessarily go to diminish the amount which the landlord would have been entitled to receive if the property had not been under a lease; or if the rent reserved upon the lease had been the full value of the use of the lot. The proper way of assessing the damages, where two or more persons have distinct interests or estates in property taken for the improvement, is to ascertain the damage to the whole lot in the same manner as if one person alone had the entire interest therein; and then to apportion that damage among the persons interested in the lot, as landlord and tenant or otherwise, according as the interest of the one or the other will be affected by the taking of the property for the improvement. In such a case, if a tenant had a lease of the property for four or five years at a nominal rent, he would be entitled to damage for taking such interest in the property if it was taken immediately. But in that case the commissioners would not allow any thing to the landlord on account of the loss of rent for the same time. And where, in a case of that kind, the appointment had been made upon an estimate that the proceedings would probably be completed at the expiration of a year, and that the tenant would be dispossessed at that time, if by any unforseen occurrence the completion of the proceedings were procrastinated till the expiration of the lease, the landlord would sustain the whole damage by the taking of the property and the tenant nothing. But the amount of the assessment for benefit upon the property of other persons would not thereby be increased, for the benefit to their property from the making of the improvement would commence as soon as they were compelled to pay the assessment imposed therefor. In the case of *Gillespy vs. The Mayor, &c. of New York*, in the Court for the Correction of Errors, in December, 1839, I had occasion to examine the whole of the statutory provision on the subject of the apportionment of rent and damages as between landlord and tenant, where a part of the property is taken for an improvement during the continuance of the lease. And from that examination, I am satisfied that if the commissioners of estimate and assessment made their assessment in this case upon correct principles in relation to the rights of the lessees and owners of the leasehold property taken for the street, the delay in completing the proceedings could not injure the complainant so as to give him any equitable rights even as against the tenants themselves, whatever equitable claim their landlords may have against them on that account.

I am inclined to think that the commissioners erred in not assessing the property at the corner of William street in the same manner as if the contemplated widening of that street, which was subsequently abandoned, had never been thought of; as that improvement had not been directed when these commissioners were appointed to assess the damages and benefits with reference to the widening of John street merely. But if there was any error in this respect, it was a proper ground for opposing the confirmation of the report before the Supreme Court, and cannot be reviewed in this collateral manner. In the case of Messerole vs. The Mayor, &c. of Brooklyn, (In Chan. April 7, 1840,) referred to in the argument, the commissioners had not erred in judgment as to what property was to be benefitted by the contemplated improvement, and neglected to assess it on that ground; but they had by mistake left out the greatest portion of the lands which were to be taken from the complainants for the contemplated avenue—and the report showed upon its face that the court had no jurisdiction or authority to confirm the assessment—according to the decision of the Supreme Court in the case of Anthony street, (20 Wend 618.) There the court held that if the proceedings had been regular and the commissioners had only erred in judgment in fixing the amount of the damage for the lands taken, or the benefit to the other lands of the complainant, upon erroneous principles, the Court of Chancery could not interfere after the report had been properly confirmed. In this case, if the front of the lots on William street, which were not assessed would actually be benefitted by this improvement, the commissioners erred in judgment in not assessing for the benefit to the front, as well as to the rear of the lots; and the confirmation of the report should have been opposed on that ground. But, as that was not done, the confirmation of the report stopped the owners of other property which was assessed, from alleg-

cond Tuesday of May, 1831. It also vests the legislative power of the corporation in a board of aldermen and a board of assistants, who together shall thereafter form the common council of the city; which boards are to meet in separate chambers, &c. And the complainant's council therefore insists that the mayor, alderman and commonalty can no longer convene in common counsel, to direct the laying out a new street or the altering of an old one, as they were previously authorized to do under the act of 1813.

The conclusive answer to this objection is, that the act of 1813, gives the power to the corporation of the city, when convened in common council according to the provisions of its charter, and not to the particular officers who at that time represented the common council. And the act of 1830 having excluded the mayor and recorder from the common council, and directed the aldermen and assistants to convene as a common council in two separate boards, the mayor, aldermen and commonalty of the city, that is the Corporation under its corporate name, is convened in Common Council for all legislative purposes when the two boards convene in different chambers, and pass a resolution or ordinance, subject to the qualified veto of the Mayor. The power to pass an ordinance authorising the opening of a new street, or the alteration of an old one, under the 177th section of the act of 1813, was strictly a legislative power given to the Corporation represented in its common council duly convened under its charter; as much as the passage of a statute by the State Legislature, for the opening of a State road, or the alteration or enlargement of a canal, and appointing Commissioners to appraise damages, &c., would be the exercise of a legislative power by the people of the State represented in their Senate and Assembly. And this legislative power, which still belongs to the Mayor, Aldermen and Commonalty of the city of New York, under the act of 1813, which is in full force, was properly exercised by the Corporation, convened in Common Council in the manner prescribed by the act of 1830.

Again: if the complainant was right in supposing that the Common Council, as at present organized, had no authority to pass an ordinance for the widening of John street, he is neither entitled to preliminary injunction nor to any relief whatever in this court, as his defence is perfect at law. And if the whole proceedings in relation to the opening of the street were absolutely void in law, and that fact appears upon the face of the ordinance itself, a sale for the assessment upon the complainant's lot would not even create a cloud upon his title. For as every person must be presumed to know the law, a proceeding which is upon its face void, does not constitute a cloud upon the title to real estate against which a court of equity will relieve.

This is also a sufficient answer to the objection that the ordinance was void, because it appears from the record that it was passed without calling for the ayes and noes upon the question of its adoption by the respective boards; if that neglect was, in point of law, sufficient to invalidate such an ordinance. It is not necessary, therefore, that I should express my opinion at this time upon the question, whether the seventh section of the act of April, 1830, requiring the ayes and noes to be taken and published in certain cases, applies to this case; or whether the last clause of that section applies merely to improvements which are to be paid for out of the funds of the corporation generally, or by a tax or assessment upon the citizens at large, and not to cases where the owners of property benefitted by the proposed improvement are to bear the whole expense thereof.

As that question was not argued before me, I have not examined it. But if the provision is applicable to a case of this kind, I think it is merely directory, as to the publication of the report, and of the ayes and noes upon the question of the adoption of the ordinance for the proposed improvement. The neglect to make such publication, did not, therefore, of itself, render the proceeding void, if the ordinance was not void upon the face of the records of its adoption.

There is another substantial reason why this court should not interfere in this case by injunction to prevent the corporation from collecting the assessment, but should leave the complainant to his remedy, if he has any at law. The proceedings for the making of the improvement were commenced nearly five years since, and the complainant had waited until the improvement had actually been completed several months before he or his agent attempted to interfere. This property has received the full benefit that it would receive from the improvement; which benefit the commissioners have estimated at several thousand dollars. And as property of other persons to a very large amount has been destroyed for that purpose, justice requires that it should be paid for by those who have been benefitted by the improvement rather than by a general tax upon the city at large. A court of equity at this late day will not interfere with its strong arm to cast the burthen of the improvement from those who have been benefitted thereby and upon those who have not.

It is true the complainant alleges in his bill that his property has not benefitted by the improvement. But that allegation is not sworn to by any one, and it is of course contradicted by the report under oath of the three very respectable and intelligent commissioners by whom the assessment was made.

The application for an injunction is, therefore, denied with costs.

Copy.

JOHN M. DAVISON, Register.

From the Journal of Commerce of February 9, 1842.

VICE CHANCELLOR'S COURT.

HON. W. T. Mc COON, VICE CHANCELLOR.

First Circuit.

DECISION.

Edmund Frost et al. vs. The Trustees of the Village of Williamsburgh.—This was a motion for an injunction to restrain the defendants from selling certain property for non-payment of assessments. The Court said that the recent decision of the Court of Errors, in the case of Meserole vs. The Corporation of Brooklyn, reversing the order of the Chancellor and Vice Chancellor, which restrained by

injunction the defendants from selling the property of the complainants for the non-payment of assessments, for the opening of Bedford Avenue, has definitely settled the question, *that however illegal may be the proceedings of the Corporation*, the Court of Chancery has no jurisdiction or right to interfere except where the wrongful proceedings lead to the commission of irreparable injury to the freehold, or where it would involve a multiplicity of suits at law, amounting to excessive and vexatious litigation, against which the party seeking relief under the ordinary head of equity jurisdiction, is entitled to be protected.—And whenever these grounds of equitable cognizance exist, they must be particularly stated. No such ground is stated or shown to exist in the present bill, and since the decision of Meserole case vs. the Corporation of Brooklyn, the Chancellor has been obliged to dissolve injunctions and dismiss bills on demurrer in about *fire and twenty cases* against the Corporation of the City of New York, in which they were proceeding to sell for the non-payment of assessments in the matter of opening and regulating streets, under circumstances *quite as strong if not stronger*, in favor of the complainants than the present. The injunction is therefore dissolved with costs.

EQUITY COURT.

IN CHANCERY.

CHANCELLOR'S OPINIONS DELIVERED JANUARY 24th, 1842.

Garret Van Doren and others vs. the Mayor, &c. of New York.

Garret H. Striker vs. the same.

Elizabeth Pearson and others vs. the same and Walter Stevenson.—These cases came before the Chancellor upon the demurrers of the defendants, the Corporation of New York, to the bills of the complainants respectively.

The object of the bill, in each case, was to restrain the Corporation from collecting certain assessments upon property claimed by the complainants in the city of New York, or in which they were supposed to have some interest either vested or contingent; such assessments having been imposed for the purpose of laying out streets and avenues, or opening sewers, &c.; or from selling the lands assessed, or advertising the same for sale, or giving any certificate or lease to the purchaser upon the sale thereof; and for a decree declaring the assessments, and all proceedings had in relation thereto, void, &c.

R. Mott and *W. M. Holland*, for complainants in two first causes.

L. H. Sandford, for complainants in last cause.

P. A. Cowdrey, for Corporation of New-York.

THE CHANCELLOR. The objection to the assessments that the Corporation, as at present organized, under the act of April, 1830, has no power to open streets, confirm assessments, &c., was decided against the complainant, in the case of *Wiggin vs. the Mayor, Aldermen and Commonalty of the city of New York*, in March last. And I have seen no reason to change the opinion there expressed, although that case was not in a situation to enable the complainant to review the decision upon that point, by appeal; as several technical objections existed to his right to the premises, as stated in the bill. But if this objection to the right of the Common Council was well taken, it would only show that this court had no jurisdiction in these cases. For a valid legal objection, appearing upon the face of the proceedings through which the adverse party can alone claim any right to the complainant's land, is not in law a cloud upon the complainant's title which can authorize a court of equity to stay or set aside such proceedings.

That can never be considered a legal cloud which cannot for a moment obstruct the unaided rays of legal science, when they are brought to bear upon the supposed obscurity. But when the claim of the adverse party is valid upon the face of the instrument or proceeding sought to be set aside, as where the defendant has procured and put upon record a deed obtained from the complainant by fraud, or upon an usurious consideration, which requires the establishment of extrinsic facts to show the supposed conveyance to be inoperative and void, a court of equity may interfere and set it aside as a cloud upon the real title to the land. (*Simpson v. Lord Howden*, 3 My. & Craig's Rep. 97.) *It was the overlooking of that distinction, in the hurry of business*, though I had recognized and acted upon it in other cases, which led me to affirm the decision of the Vice Chancellor, in the case of *Meserole v. the Mayor and Common Council of Brooklyn*, (8 Paige's Rep. 199.) But my decision in that case was properly reversed by the Court for the Correction of Errors, at its last term in December, 1841, *although the Chief Justice who delivered the opinion concurred with me in the conclusion that the proceedings of the Corporation of Brooklyn were illegal and void.*

The same difficulty exists in relation to the objections that the ayes and noes were not called and published upon the resolutions to make the improvements and to confirm the assessments which were confirmed by the Common Council, and that the resolutions and ordinances were not duly signed by the Mayor; and to various other objections which are made to the legal validity of the assessments. All of which objections appear upon the face of the proceedings through which the Corporation must justify the enforcement of the tax by execution, *and through which the purchasers at sales of the lands of these complainants for the assessments must necessarily make title.* If the complainants are right, therefore, in supposing the proceedings void on all or any of those grounds, upon which I express no opinion, there is ***no cloud*** upon their titles.—And as their remedy at law is perfect by an action of trespass if their personal property is seized upon a distress warrant for the assessments, *and they have a perfect defence at law to any suit brought against them by purchasers at the sales which have been made, or which may hereafter be made;* if the proceedings are void, this Court has no jurisdiction to interfere for their relief. On the other hand, if the proceedings are not void, but merely irregular, the remedy of the complainants clearly is not in this Court, which has no superintending jurisdiction over the regularity of the proceedings of the Corporation of New York in these assessment cases. Indeed, as I understand the prevailing opinion in the Court for the Correction of Errors, in the case of Meserole vs. the Mayor and Common Council of Brooklyn, that Court repudiated the idea that the Court of Chancery has any power or right to interfere in such cases, in relation to any supposed error or irregularity in the assessment, or in the proceedings of the Corporation, or of the commissioners of estimate and assessment. And this Court will not subject itself to the rebuke of that tribunal by interfering in any cases of this kind, except where it is absolutely necessary for the preservation of the complainant's rights.

The demurrers are well taken, and the complainant's bill must be dismissed WITH COSTS. And the injunctions, if any have been granted in these cases, must be dissolved.

Peter G. Stuyvesant and others vs. the Mayor &c. of New York, and John Ewen, street commissioner. (And 21 other causes involving same questions.)

W. M. Holland, for the complainants.

P. A. Cowdrey, for the defendants.

The CHANCELLOR.—These cases came before me on applications for injunction to restrain the Corporation of the city of New York from proceeding to sell the lands of the respective complainants for the payment of assessments imposed upon them for various improvements in that city. Indeed, taken together, they embrace nearly every improvement in the city of New York for the last six years, either in opening, widening, or grading streets, or in constructing sewers, &c. The number of complainants whose rights are in controversy, exceeds *one hundred and seventy*, and the aggregate amount of the assessments the validity of which is contested is immense. I have therefore been obliged to look into each case to see if there was any thing contained therein to give this Court jurisdiction, and justify it in interfering by a preliminary injunction to restrain the corporation and its street surveyor, who has been made a defendant in most of the cases, from proceeding to collect the assessments by a sale of the property assessed in the usual way.

As the complainants have by law two years to redeem their property after it shall have been sold, there does not appear to be any good reason for granting preliminary injunctions at this time, even if the cases, as made by the bills, would, if unexplained, entitle them to perpetual injunctions at the final hearing. The object, therefore, of applying for injunctions at this time, must probably be to save the complainants from the payment of the extra interest, allowed by the statute from the time of the sale, in case it turns out that they are wrong in supposing that this court can interfere for their relief against the final payment of these assessments. This of itself would be a sufficient answer to these applications at this time. And for that reason I refused to continue the temporary injunctions allowed by the Vice Chancellor upon granting the orders to show cause; so that the sales might be made by the Corporation, subject to the equitable rights of the complainants, if

are said to exercise a discretion, it is a mere legal discretion, a discretion to be exercised in discerning the course prescribed by law; and, when that is discerned, it is the duty of the court to follow it. Judicial power is never exercised for the purpose of giving effect to the will of the judge; but always for the purpose of giving effect to the will of the Legislature; or, in other words, to the will of the law."—9. *Wheaton*, 806.

That distinguished Jurist, MR. JUSTICE STORY, quotes the above, and says of it that it was finely remarked by MR. CHIEF JUSTICE MARSHALL, and appends to it, a reference to the Commentaries of the venerable EX CHANCELLOR KENT.

—

LEGISLATIVE POWER.

Mr. Justice Story quotes from the Federalist, No. 78, among others, a paragraph in the following words:—

"There is no position which depends upon clearer principles, than that every act of a delegated authority, contrary to the tenor of the commission under which it is exercised, is void. No legislative act, therefore, contrary to the Constitution can be valid. To deny this, would be to affirm, that the deputy is greater than his principal; that the servant is above his master; that the representatives of the people are superior to the people themselves; that men acting by virtue of powers, may do, not only what their powers do not authorize, but what they forbid."

—

JUDICIAL LEGISLATION.

"But the answer to these and similar objections, is, that such considerations should have weight with those whose business it is to make laws; but they should not control the opinions of those whose business it is to expound the laws."

The above is the closing sentence of a paragraph in the manuscript opinion written by JOHN SAVAGE, *late Chief Justice of the Supreme Court of the State of New York.*

It is an opinion worthy of the man.

The following is also from another manuscript opinion of this truly great man.

"Much of our difficulty arises from judicial legislation: if other laws are necessary, let the legislature pass them."

—

JUDICIARY.

"The Courts must declare the sense of the law; and if they should be disposed to exercise *Will* instead of *Judgment*, the consequence would equally be the substitution of their pleasure for that of the legislative body."—Federalist of No. 78, quoted by Mr. Justice Story with approbation.

CHANCELLOR'S DECISIONS.

We have given all the opinions delivered by His Honor Chancellor Walworth, in assessment cases for the last five years, in full.

It will be seen by a careful reading of these several opinions, that the decisions of the Chancellor, have fluctuated. The opinion given in the suit of Meserole and others vs. the Mayor and Common Council of Brooklyn contrasted with that given a short time afterwards, in that of Timothy Wiggin vs. the Mayor &c. of New York, are difficult to reconcile as respects the assessment being a cloud upon the title.

We do not undertake to say that the Chancellor was wrong in refusing to entertain the bill filed in the latter case, and also in the several subsequent cases disposed of by him, but we feel it our duty to say, that he erred in requiring the complainants to pay costs; inasmuch as he himself remarks, in the opinion he gave in the Van Doren case, that in deciding the Brooklyn case, in the hurry of business, he overlooked a decision. We have occasion to know that in the case of Wiggin vs. the Mayor &c., the Solicitor of Mr. Wiggin obtained from the clerk of the Chancellor at Saratoga a manuscript copy of the opinion of His Honor in the Meserole case, and it was in consequence of the tenor of that opinion that *this* bill was filed.

It will be borne in mind that the decision made by the Chancellor in Wiggin's case was nearly a year previous to the decision of the appeal in Meserole's case in the Court for the Correction of Errors.

The cases in which the Chancellor sustained the demurrers against the complainants, were many of them of a very aggravated character. The bills filed in these cases were full, and in several cases the complainants set forth that the applications for the appointment of commissioners were not authorized by the Common Council.

The Chancellor may have taken a correct view of these questions in the last decision, and not in the first; but the change of opinion was a difficulty, and quite a serious one, to the complainants.

These matters have passed from the courts to a Committee appointed from the Honorable the Senate of this State to investigate assessment abuses in the city of New York, and that committee have made their report. The members of that committee are distinguished members of the Court for the Correction of Errors: their report will be found in this volume.

We desire to speak of the worthy Chancellor of this State with great respect; he is a most estimable citizen, and, notwithstanding the constant toil and labor in his Court, finds time to attend the benevolent and charitable institutions, and the religious societies of the day—of the most of which he is a conspicuous and valuable member.

It is a wonder how CHANCELLOR WALWORTH accomplishes such an amount of labor. Should his labors increase with his years, when he shall have reached the constitutional barrier of this State, as to the term beyond which judicial officers of a certain grade shall be deemed incompetent, he will have worn himself out with labor.

The salary of the Chancellor of this great State is two th usand, five hundred dollars per annum, a mere pittance for such services.

When we take into view the labor imposed upon the Chancellor, the limited duration of his office, and the compensation attached to it, the wonder is that any person can be found willing to accept of the appointment.

The salary of the Chancellor should be increased to $4,500, at least, and that of the Judges of the Supreme Court to $4000.

VOL. 1. NEW YORK, APRIL 7, 1842. No. —

LEGISLATIVE POWER.

The Constitution of the United States contains this provision :—

"ARTICLE 1, § 1.—All legislative power herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives."

The Constitution of the State of New York contains these provisions.

"§ 1. *The Legislative power of this State shall be vested in a Senate and an Assembly.*"

Can the Senate and Assembly of the State of New York delegate the right or power to pass penal laws to any other body of men ?

By *Article* 1, *Sec.* 12. "Every Bill which shall have passed the Senate and Assembly, shall, before it become a law, be presented to the Governor; if he approve, he shall sign it; but if not, he shall return it with his objections to that house in which it had originated," &c. The Constitution then proceeds to say, that the objections of the Governor shall be entered "at large on their Journal, and they shall proceed to reconsider it. If after such reconsideration two thirds of the members present shall agree to pass the Bill, it shall be sent together with the objections to the other house, by which it shall likewise be reconsidered; and if approved by two thirds the members present, it shall become a law. But in all such cases, the votes in both houses shall be determined by *yeas and nays*, and the names of the persons voting for, and against the Bill, shall be entered on the Journal of each house respectively. If any bill shall not be returned by the Governor within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Legislature shall by their adjournment, prevent its return, in which case it *shall not become a law.*"

The Governor is thus vested by the Constitution with a negative upon the acts of the Legislature, but this negative is greatly qualified, inasmuch as the vote of two thirds of a bare quorum can pass a Bill after his refusal to sign in it, notwithstanding such refusal.

The Constitution provides that the members of the Senate and Assembly shall respectively be elected on a certain day, at a certain place, by persons possessing certain qualifications, and that they shall convene, &c. on a certain day, &c.

Thus the Constitution provides in what manner laws shall be enacted, and details with great precision the form and time. No Bill whatever can become a law of this State, unless enacted in the manner and form prescribed in the power thus given in the Constitution by the People, who are the Grantors of the Power.

The Constitution contains no power of substitution, no authority, or permission to the Senate and Assembly to delegate the power of making laws to any other body of men. The power is special, limited and restricted in every respect.

The Act of the Legislature of the State, passed April 7th, 1830, which is called the Amended Charter of the City of New York, contains this provision :—

"§ 1.—The Legislative power of the Corporation of the City of New York shall be vested in a Board of Aldermen and Board of Assistants, who, together, shall form the Common Council of the City."

The question then arises, can the Common Council of the City of New York pass laws? Can the Legislature of the State grant to the Common Council, or vest in that body the power to pass laws ?

To the first query, we answer in the negative, and add, that the City of New York is a part of the State of New York, and is governed by the laws of the State.

The reply to the second enquiry here propounded, is, that the Legislature of the State cannot in any manner or form, either direct or indirect, delegate the Legislative power vested in that body, that no power of substitution whatever is contained in the Constitution.

A citizen who executes a written power to another citizen to act for him, and in his name, if he intends the power thus given to be exercised by another, inserts a special clause authorizing his said agent and attorney, to substitute another, or others in his place and stead, &c.; but in the Constitution, the grantors of the power make no such provision in that instrument which contains the grant, and none can be presumed, or implied.

If the Common Council desire an ordinance to have the force of a law within the bounds of the City, that ordinance should be made into the shape of a Bill, and be acted on by the Legislature of the State, and approved by the Governor, in the manner and form prescribed by the Constitution.

The Common Council might with as much propriety pass an ordinance to regulate the rate of interest on money, as to pass an ordinance to regulate other matters than those which pertain to the management of the corporate property. The Common Council have no more right to pass an ordinance imposing a penalty on a citizen for a violation of their so-called laws, than a government of an incorporated bank has, and the passage of such ordinances are a violation of the Constitution of this State, and will be so held when taken to the high courts for adjudication, and this objection raised.

No one will for a moment doubt that there should be special laws relative to the City, but all such laws should be passed by the Legislature of the State, and not by the Common Council of the City.

The Common Council of the City of New York is not the Corporation of the City, but the powers of the Corporation are vested in the Common Council, to be exercised by that body in a certain manner, &c. And what, or who is the Corporation of New York ? It is the citizens and inhabitants of New York, in whom is vested certain property which has been granted to them by the name and style of the Mayor, Aldermen and Commonalty of the City of New York, and the management of this Corporate property is committed to the Common Council and other particular officers.

The Common Council have the management of this Corporate property for the citizens and inhabitants, the same as the President and Directors of a Bank have of the capital stock which is the property of the Stockholders.

If this Corporate property consists of Market-houses, they have the right and power to say at what rate the stalls shall be leased and what hours the Market shall be opened, but they have no right to say that the citizen who owns a store shall not sell Pork, Beef, or Poultry in that store, nor can they pass any valid ordinance, making it a penalty for a citizen to sell meat on his own premises. We know that such ordinances have been passed by the Common Council, and that some of the Courts have held such ordinances valid, but such a decision would not be held valid by the Supreme Court of the United States.

There is a vast difference between the powers which may be vested by a Charter in a Political Corporation granted by an absolute government possessing unlimited power, and these which are possessed by our free Government exercising the limited and restricted powers conferred by the Constitution.

No one conversant with the provisions of our Constitution, will for one moment pretend to deny that even the Legislature of the State, is greatly restricted and limited in its power; and yet there are others, and some of them members of the common council, who pretend to say that the Common Council, a mere creature of the Legislature, can do that which the Legislatue of the State dare not attempt to do—this is, in effect, making the creature greater than the creator.

Hume, *De Lolme*, Sidney, Tucker and others, who have written much upon Legislative power, speak of it only in such cases as where its exercise is unlimited and unrestricted.

In our free country, this power is possessed by the people, and they are the grantors of power in all cases—the people are sovereign. The legislatures are mere grantees.

less, they shall not receive any salary or consideration, under any pretence whatever. And that all bills which shall have passed the Senate and Assembly, shall, before they become laws, be presented to the said council for their revisal and consideration; and if, upon such revision or consideration, it should appear improper to the said council, or a majority of them, that the said bill should become a law of this State, that they return the same, together with their objections thereto, in writing, to the Senate or House of Assembly, in which soever the same shall have originated, who shall enter the objections sent down by the council, at large, in their minutes, and proceed to re-consider the said bill. But if, after such re-consideration, two thirds of the said Senate or House of Assembly, shall, notwithstanding the said objections, agree to pass the same, it shall, together with the objections be sent to the other branch of the Legislature, where it shall also be reconsidered, and, if approved of by two thirds the members present, shall become a law."

"And in order to prevent unnecessary delays—

"*Be it further ordained*, That if any bill shall not be returned by the Council within ten days after it shall have been presented, the same shall become a law, unless the Legislature shall, by their adjournment, render a return of the said bill within ten days impracticable; in which case, the bill shall be returned on the first day of the meeting of the Legislature after the said ten days."

"The Governor to convene the Senate and Assembly on extraordinary occasions; to prorogue them from time to time, provided such prorogation shall not exceed sixty days in the space of any one year."

Thus the former Constitution of this State made the Governor, Chancellor and Judges of the Supreme Court, a council of revision, and gave to the Governor the power to prorogue the Legislature that the members might return to and consult their constituents. This negative power, thus vested, was not considered objectionable, but on the contrary, when the new Constitution was adopted, in 1821, it was changed and vested solely in the Governor, but the power to prorogue the Legislature was taken away.

The vote required to pass the bill, notwithstanding the objections, under the present constitution is the same as under the former, except that it is required that the vote shall be taken by ayes and noes, and the names of the members voting for or against the bill shall be recorded. The vote required is only two thirds of the members present, which may perhaps be but a minority of each house, or a bare majority form a quorum, and it is only two thirds of this bare majority which is required.

The exercise of the Veto power by the Governor of this State is therefore only that of a qualified negative.

The Veto power of the President of the United States is also a qualified negative. The Constitution of the United States is, however, silent as to the requirement of the Veto taken on the re-consideration of a bill returned by the Executive being by a vote of two thirds the members present or two thirds the members elected.

It would seem that the safer construction would be two thirds the members elected, but we understand that the more liberal and extended construction has been adopted by Congress.

So salutary has this qualified negative, possessed by the President, been found, that, in the experience of more than half a century, the exercise of this power has not been overruled by a constitutional vote by Congress.

The Constitution of the United States is very explicit with regard to the mode in which the vote of re-consideration shall be taken, and that the votes shall be taken by ayes and noes, and recorded in the journals.

When the provisions of the Constitution were debated in the convention, it was proposed to vest the qualified negative in the President and some other department of the Government, but this was strenuously opposed and overruled, and was finally rejected by a vote of eight States against three.

There is another qualification of this negative of the President, which is, that an entire new house of Representatives are elected by the people during his term of office, which, if this exercise of the qualified negative is not satisfactory to the people, they have the opportunity of thus overruling it, and also the term of office for which the Executive himself shall have been elected, will have an end every four years. Thus the frequency of the elections gives additional qualifications to this already qualified negative.

In the amended charter of the city of New York, although (as Mr. Samuel Stevens remarks in an article under the signature of "Third Ward," published in the New York American in 1829, when the city convention were sitting) they were only framing a bill for the State Legislature to pass into a law, that body took the United States Constitution for a model whereby to form a municipal charter; and in vesting the mayor with a qualified negative upon the acts of the Common Council, they made some alterations in that provision, which were, to require the objections of the executive to be published in the newspapers, and that the vote should be that of a majority of the members *elected* to each board, and also of requiring that *at least ten days* should elapse before the board to which the act should have been returned should proceed to re-consider the same. This change of the qualified negative of the Mayor makes his veto at the present moment a nullity. The City Charter, as the act of the Legislature is called, omits to state any thing in relation to acts passed by a Common Council, the members of which whose term of office may expire during the ten days which the Mayor is allowed to consider a proceeding, and decide whether or not he will give his assent. This was an oversight, and there can be no doubt but an act remaining in the hands of the Mayor unsigned when his term of office expires, would be inoperative.

The distribution of power is one of the great principles on which all free governments are based, and we propose to discuss this subject in a future number under that head.

SACREDNESS OF PRIVATE PROPERTY.

That distinguished citizen and eminent jurist, JUDGE STORY, one of the Justices of the Supreme Court of the United States, in his admirable Commentary upon the Constitution of the United States, thus remarks:—

"The concluding clause is, that private property shall not be taken for public use without just compensation. This is an affirmance of a great doctrine established by the common law for the protection of private property. It is founded in natural equity, and is laid down by jurists as a principle of universal law. Indeed, in a free government, almost all other rights would become utterly worthless, if the government possessed an uncontrollable power over the private fortune of every citizen. One of the fundamental objects of every good government must be the due administration of justice; and how vain it would be to speak of such an administration, when all property is subject to the will or caprice of the legislature and rulers."

Mr. Justice Story cites Blackstone, Kent, Rawle, and also several cases which had been adjudicated.

The practice of the last few years in the city of New York to enforce the collection of sham-assessments for fictitious improvements, by a sale of the property pretended to be benefitted for terms of thousands of years, equal to, and in effect, selling the fee simple absolute, is taking private property for public use without just compensation, and in truth is absolute *confiscation*. It matters not to the owner whether his land is taken or his money, both are alike private property; for if he pays the assessment, in most cases he pays the value of the land in paying the assessment, and thus, in fact, re-purchases the land by redeeming it. Vast quantities of lands on the island of New York, have been assessed to such an extent that the interest of the assessment exceeds the value of the land, and also large quantities of other lands are assessed for the pretended opening of streets, avenues, and public squares, (which are not open or needed,) in greater sums than the land could be sold for.

The abuses have been so enormous, so flagrant, so high-handed, that the real estate has lost its value by the insecurity thus produced.

In the case of the streets and avenues, up to and including Forty-second street, referred to in the report of the committee from the Senate of this State, twenty-seven setts of Commissioners (in all eighty-one) were appointed to make an assessment for opening the streets and avenues in that district; whereas the committee of the common council reported in favor of but one sett, (three commissioners,) and did not, in fact, pass any resolution for an application to the Supreme Court for the appointment of even this one set.

It is time such proceedings had an end.

Anecdote of the reigning king of Prussia. —The following anecdote we cut from the columns of the Albany Daily Advertiser. It belongs to go along side of assessment matters, showing a contrast in the judicial proceedings of the courts of our State, compared with that of a kingly government.

"We have much pleasure in laying before our readers an interesting anecdote, which has been communicated to us by a gentleman recently from Berlin. Some time since an effort was made to get rid of a windmill, the close approximation of which to the royal palace rendered it in some degree a nuisance, and certainly an eye-sore. Overtures were accordingly made to the sturdy yeoman for the purchase of the obnoxious property; but whether it was that the man was possessed of a strong spirit of obstinacy, or was really deeply attached to his old family habitation, the result was that the offers, tho' tempting, were again and again refused. There are very generally some individuals attached to a court who are ready to suggest remedies, direct or indirect, for inconveniences or annoyances offered to royalty. Accordingly, upon a hint from some minion, a lawsuit was commenced against the obstinate miller for the recovery of certain sums alledged to be due for arrears of an impost on that portion of crown land which it was suggested was occupied by the mill in question. The sturdy holder of the "toll dish" was not altogether without friends or funds, and he prepared vigorously to take his stand in defence of his rights. The question came in due time before the courts of law, and the plaintiff having completely failed to establish any right on behalf of the crown, the miller obtained a verdict in his favor, with a declaration for payment of his costs in suit. This was certainly no small triumph, and merrily went round the unfurled sails of the old mill, and well pleased no doubt, was the owner with the sound, as they went whirling and whizzing under the influence of the gale, which certainly seemed to blow strongly in his favor. But he was not the first who has found that when drawn into a lawsuit, particularly with so formidable an opponent, a man is more likely to "gain a loss" than escape scot free. What with extra expenses, interruption of business, and rejoicings after the victory, the miller found himself pressed by considerable difficulties, and after in vain struggling a few months against the pressure, he at length formed a manly resolution, gained access to the monarch, and, after roughly apologizing for his having thwarted his majesty's wishes, frankly admitted that his wants alone had rendered him complient, but that he was prepared to accept the sum originally offered for the property. The king, after conversing with the miller a few minutes, hand d him a draught for a considerable amount, saying, "I think, my honest friend, you will find that sufficient to meet the emergency; if not, come and talk to me again on the subject. As to the mill, I assure you that I will have none of it. The sight of it now gives me more pleasure than it ever occasioned pain; for I see in it an object that assures me of *a guaranty for the safety of my people, and a pledge for my own happiness by its demonstration of the existence of a power and a principle higher than the authority of the crown, and more valuable than all the privileges of royalty.*"—[London Paper.]

COMMISSIONERS OR A JURY.

Taking land for Public Avenues, Streets and Squares.

The position of the Assessment question, and the highly important opinions of Chief Justice NELSON, Justice BRONSON and Justice COWEN *of the Supreme Court.*

The Constitution of 1777 contains this provision;—

"That trial by Jury in all cases in which it hath heretofore been used in the colony of New York, shall be established and remain inviolate forever, and further, that the Legislature of this State shall at no time hereafter, institute any new court or courts, but such as shall proceed according to the course of the common law."

The act of the General Assembly of the Colony of New York, passed Oct. 1st, 1691, and confirmed by William III, May 11th, 1697, contains this provision:

"And for other ground, the Mayor, Aldermen and Common Council shall and may treat and agree with the owner and others interested therein; and if there shall be any person that shall refuse to treat in the manner aforesaid, in such case the *Mayor and Aldermen, in their Court*, are hereby authorized by virtue of this act, to issue out a warrant or warrants to the Sheriff of the said city, who is hereby required to empannel and return a jury before the *said Court of Mayor and Aldermen*, which Jury, upon the oath to be administered by the said court, are to enquire and assess such damages and recompense as they shall judge fit, to be awarded to the owners and others interested, according to their several and respective interests and estates in the same, as by the said Mayor, Aldermen and Common Council, shall be adjudged fit to be converted for the purposes aforesaid, and such *verdict of the Jury, and judgment of the said Court of Mayor and Aldermen thereupon*, and the payment of the said sum or sums of money so awarded and adjudged to the owner or others having estates or interest or tender or refusal thereof, shall be binding" &c. *This Colonial act was in force when the Constitution of* 1777 *was adopted.*

The trial by jury extends to property, as well as persons, and therefore the act of 1807 and 1813, authorizing the appointment of three commissioners to take land instead of a jury, is unconstitutional and void.

The Constitution of 1821 *contains these provisions:*—

"The trial by jury, in all cases in which it has been heretofore used, shall remain inviolate forever, and no new court shall be instituted, but such as shall proceed according to the course of the common law." Art. 7, § 12.

"The Governor shall nominate by message in writing, and with the consent of the Senate, shall appoint all *Judicial officers* except Justices of the peace." Art. 4, § 7.

In the decision of the Supreme Court in January, 1841, in the matter of the application of Elmendorf and others for a Certiorari to be directed to the mayor, aldermen and commonalty of the city of New York,

point skilful and competent persons Assessors to make estimates and assessments for building sewers, regulating streets, &c., and the Assessors so appointed are directed to assess the expense of the work, &c., on the owners and occupants of houses and lots deemed to be benefitted thereby, and to certify their assessments in writing to the mayor, aldermen and commonalty, in common council convened; and such assessment, when ratified or confirmed by the said Common council, shall be a lien upon the houses and lots so assessed, and in case of neglect or refusal to pay such assessment, the mayor, recorder and aldermen, or any five of them, are authorized to issue a warrant of distress under their hands and seals, which may be levied upon the goods and chattels, &c. The act of April 16th, 1816, provides further, that in case the owner or occupant, on being twice called upon, refuses or negiects to pay the assessment, his lands may be sold therefor.

Now we insist that in this, the Common council and the assessors are both acting in a *judicial capacity*, and are as much a court as the Commissioners of sewers; and the assessment, when confirmed, is in the nature of a Judgment, being made a lien upon the land, and the warrant being in substance an execution.

We think we have stated enough here to show that Commissioners of Estimate and Assessment cannot take lands for public use from any individual, without his consent, nor can they impose any assessment on adjoining owners: that whenever lands are required in the city of New York, for public use, *a jury* is the only mode of proceeding. And besides, if it should be held that commissioners could take land, such commissioners *can only be appointed by the Governor*. Thus the proceedings of commissioners *are void*.

As to Assessors, these too are *judicial* officers, and the members of the Common council also act or assume to act in a *judicial* capacity, in confirming assessments, issuing warrants, &c. These officers are *none of them appointed by the Governor*, and the Constitution is explicit on this head; it excepts Justices of the Peace, Special Justices, &c.

It is of no use to have a written Constitution, if officers who are sworn to support it will disregard its great principles and requirements.

We think that the learned Judges of the Supreme court were right in *quashing* the writs they had allowed, and in refusing those which were applied for, and that the assessments are absolutely VOID. We are aware that we differ from the learned counsel on both sides in the views now put forth, but it is our deliberate opinion, after examining the question very extensively.

We also think that it was the duty of the court to settle the question of the legality of these assessments, instead of enacting a statute of "PUBLIC INCONVENIENCE"—which enactment most assuredly is not authorized by the Constitution of the State, nor is it sanctioned by public opinion. Neither public or private inconvenience have any place in such cases. Let justice be done—let the law be strictly complied with.

Judicial powers of the Board of Aldermen and Board of Assistants, composing the Common Council of the City of New York.

The following sections of the act, Entitled "*An ACT to reduce several Laws relating particularly to the City of New York into one Act*"—passed April 9th, 1813—constitute all the provisions of the Statute authorizing the imposition of assessments on the owners or occupants of houses and lots for the class of improvements therein specified, and there is no other provisions of law which authorize any assessment to be imposed by the mayor, aldermen and commonalty for this class of improvements.

§ 175.—*And be it further enacted*, That it shall be lawful for the said mayor, aldermen and commonalty, to cause common sewers, drains and vaults, to be made in any part of the said city, and to order and direct the pitching and paving the streets thereof, and cutting into any drain or sewer, and the altering, amending, cleansing and scouring of any street, vault, sink or common sewer, within the said city; and the raising, reducing, levelling or fencing in, any vacant or adjoining lots in the said city; and to cause estimates of the expense of conforming to such regulations to be made, and a just and equitable assessment thereof among the owners or occupants of all the houses and lots intended to be benefitted thereby, in proportion, as nearly as may be, to the advantage which each shall be deemed to acquire; and the said mayor, aldermen and commonalty shall appoint such skilful and competent disinterested persons as they shall or may think proper to make every such estimate and assessment, who before they enter upon the execution of their trust, shall severally take an oath before the mayor or recorder of the said city, to make the said estimate and assessment fairly and impartially, according to the best of their skill and judgment; and the said persons, after having made such estimate and assessment, shall certify the same in writing to the said mayor, aldermen and commonalty, in common council convened, and being ratified by the said council, shall be binding and conclusive upon the owners and occupants of such lots so to be assessed respectively, and shall be a lien or charge on such lots as aforesaid; and such owners or occupants shall also respectively be liable upon demand, to pay the sum at which such houses or lots respectively shall be assessed, to such person as the said common council shall appoint to receive the same; and in default of such payment or any part thereof, it shall be lawful for the mayor, recorder and aldermen of the said city, or any five of them, of whom the mayor or recorder shall be one, by warrant under their hands and seals to levy the same by distress and sale of the goods and chattels of such owner or occupant refusing or neglecting to pay the same, rendering the overplus (if any), after deducting the charges of such distress and sale to such owner or occu-

pant, and the money, when paid or recovered, shall be applied towards making, altering, amending, pitching, paving, cleansing and scouring such streets, and making and repairing such vaults, drains and sewers as aforesaid, and raising, reducing, levelling or fencing in, such lots as aforesaid. *Provided however*, That nothing herein contained shall affect any agreement between any landlord and tenant, respecting the payment of any such charges, but they shall be answerable to each other in the same manner as if this act had never been made; and if the money so to be assessed be paid by any person, when by agreement or by law the same ought to have been borne and paid by some other person, it shall then be lawful for the person paying, to sue for, and recover the money so paid, with interest and costs, as so much money paid for the use of the person who ought to have paid the same; and the assessment aforesaid, with proof of payment, shall be conclusive evidence in such suit.

§ 176. *And be it further enacted*, That if upon completing any such regulation, it shall appear to the said mayor, aldermen and commonalty, that a greater sum of money had been *bona fide* expended in making such regulation than the sum estimated and collected aforesaid, it shall then be lawful for the said mayor, aldermen and commonalty, to cause a further assessment equal to such excess, to be made and collected in manner aforesaid; and in case the sum actually expended shall be less than the sum expressed in such estimate, and collected as aforesaid, the surplus shall forthwith be returned to the persons from whom the same were collected. or their legal representatives.—2 R. L. p. 407,

The sections above quoted contain a special power, given to a select class of persons, to make certain improvements particularly named in manner and form therein stated.

It will be noticed that this is a special power given by the Statute to a select class of persons. The mayor, aldermen and commonalty, as then known and entitled, were the mayor, recorder, aldermen and assistant aldermen of the city of New York. These public officers composed the city council, and assembled in one body in the same council chamber.

The mayor, and also the recorder of the city, were appointed by the State council of appointment—the aldermen and assistants were elected by the freeholders of the respective city wards.

In 1821 the Constitution of the State was remodelled, or rather, a new Constitution was formed, one of the provisions of which was that the mayors of cities should be appointed by the respective common councils of each. This provision, as to the city of New York, was altered in 1833 by an amendment of the State Constitution in that particular; and now it is provided that the mayor of the city of New York shall be elected annually by the People.

The recorder, by the Constitution of 1821, shall be appointed by the Governor and Senate.

By the Amended Charter of the city of New York [Session Laws of 1830, ch. 122] the legislative power of the corporation is vested in a board of aldermen and board of assistants who, together, shall form the Common council of the city.—§ 1.

By the fifteenth section, of the same act, neither the mayor nor recorder shall be members of the Common council after the second Tuesday of May, 1831.

By the 7th section, of the act as above, the boards are required to keep a journal of their proceedings and to meet in separate chambers; and, by section twelve, all acts, before they shall take effect, shall be first approved by the mayor, &c. &c.

The apportionment of judicial officers under the Constitution of 1821.

By the 7th section of Article IV. of the Constitution, the Governor shall, by message in writing, nominate, and, with the consent of the Senate, appoint all judicial officers except justices of the peace; by section 14 special justices and assistant justices of the city of the city of New York are excepted, and by sec. 1 of Art. V. the members of the court for the Correction of Errors are excepted.

We here raise two Questions, viz:—

1. *Are Assessors, who are appointed by the board of Aldermen and board of Assistants, with the Mayor's approval, Judicial officers?*

2. *Do the boards of Aldermen and Assistants, sitting in separate chambers, in ratifying Assessments made by Assessors appointed by themselves, and the Mayor also in approving such acts, act judicially?*

To the first question, we answer that the 175th section above quoted authorizes an estimate of the expense of the work, as a preliminary measure, previous to making the assessment of the expense upon the owners and occupants intended to be benefitted thereby, by skilful, competent, disinterested persons, to be appointed by the mayor, ald. and com.; and this assessment is to be made in such proportion as they deem the advantage acquired by such owner or occupant. Their estimate and assessment shall be certified in writing to the mayor, aldermen and commonalty, in Common council convened, but has no binding force until ratified by said Common council. This ratification is, therefore, to all intents and purposes, a judgment, which is by the same section made a lien upon the houses and lots of such owners and occupants, &c., and upon this ratification or judgment, a warrant of distress is authorized to issue under the hands and seals of the mayor, recorder and aldermen, or any five of them, of which the mayor or recorder are to be one; and by the act of April 12th, 1816, the mayor, aldermen and commonalty, in default of payment of such assessment, are authorized to sell or lease the houses or lots so assessed for an unlimited number of years, even to the end of time. The Constitution adopted in 1777, and which was in force when these two acts above referred to were passed, contained no limitation as to the appointment of judicial officers, or at least we have found no such provision in that instrument. At the time of the passage of these two acts the mayor and recorder were both appointed by the council of appointment, and after the adoption of the new Constitution in 1821 the recorder was appointed by the Governor and Senate as a judicial officer, and continued to be a member of the Common council; but the amended charter of April 7th, 1830, *excluded* that officer after the second Tuesday of May from a seat in the Commou council, and he is now no longer a member of that body; nor does any Judicial officer hold a seat in either board composing the Common council: therefore, there is no authority under the Constitution for the Common council to act in a judicial capacity, the law of 1813 and 1816 being both abrogated by the Constitution of 1821.

The Assessors, therefore, as standing alone, are not judicial officers; but their acts, taken in connection with the proceedings of the mayor, aldermen and assistants, constitute proceedings which are, in their operation and effects or consequences, the highest exercise of judicial authority in matters pertaining to the rights of property.

The Answer to the second question has been mainly anticipated in the reply to the first question.—The Amended Charter was the result of measures growing out of complaints in the assessment made for building Canal street sewer, which was an assessment of near one hundred thousand dollars by assessors appointed under the 175th section before quoted which had been confirmed by the Common council composed of the mayor, recorder, aldermen and assistant aldermen. The dissatisfaction which this assessment produced caused applications to be made to the Common council for an amendment of the City Charter, and accordingly an application was made by that body (under the corporation seal) to the Legislature of the State. This application was accompanied by a bill, which was passed by the Legislature, conditioned to become a law if the majority of the electors of the city of New York by their vote by ballot signified their acceptance of it. This they did not do—less than 700 votes, of the whole number of voters in the city, were cast in its favor. This was in 1824.

In 1828 the Legislature, on the application of the Common council, re-enacted the same bill, with the same conditions, and it was again submitted to the electors of the city of New York, and by them again rejected.

This bill provided for the exercise of all the powers which had ever been conferred by charter or by law on the mayor, aldermen and commonalty, or the mayor, aldermen and commonalty in Common council convened, or the mayor, recorder, aldermen and assistant aldermen, thereafter to compose two boards meeting in separate chambers, with concurrent jurisdiction.

The next proceeding was the Convention which met in June, 1829, to frame a bill for the Legislature to pass into a law amending the City Charter, and here a great mistake was made in taking the Constitution of the United States for a model to frame a bill for the Legislature to pass into a law, unless we assume it to be conceded that the business of the Common council was to be confined to the affairs of the corporation as a corporation

solely and exclusively, and in that case, part of the bill is superfluous.

The great error, however, has been in the enactment of the laws of 1807, 1813 and 1816, giving powers to the mayor, aldermen and commonalty in a loose and misshapen form never authorized by the Constitution.

Mr. Justice Bronson says, in the Opinion which he gave in the Chapel st. Sewer case, that he had searched in vain in the land of the common law for a precedent of a Common law certiorari to a corporation, and he might have added that no such extraordinary exercise and abuse of power, place or office was ever known in the land of the Common law in imposing assessments upon private property.

By the 26th section of the Amended Charter it is provided that no part of the charter and of the several acts of the Legislature amending the same as are not inconsistent with the provisions of this law shall be construed as repealed, &c. These Assessment laws are all inconsistent with the provisions of this Act and with the provisions of the Constitution, and are thereby and therefore repealed.

The property affected by the assessments imposed by the common council since the amended charter of 1830, and since the year 1836, is of immense amount. The assessments have been of a most extraordinary character, and the whole proceedings, from beginning to end, have been in very many cases of the most reprehensible description.

Much of the property thus assessed has been actually confiscated, the assessments having been greater than the value of the land declared to be benefitted, and in some cases the interest of the assessment actually now amounts to more than the land will sell for.

These proceedings were not called for by the owners of the property thus depredated upon, but have been got up by public officers for the purpose of giving contracts to favorites, and for the purpose of giving fees to friends.

It is said that it will be a great "public inconvenience" to set aside these assessments, but such a doctrine should never find favor in such proceedings as these assessments, which have been so justly, so loudly, and so long complained of.

"*Public inconvenience*" is the name given by certain legal functionaries to denote an outrage upon private property by the corporation, the proceeds of which the corporation or its officers may have squandered or otherwise misapplied, in any case where the victim of such aggression legally seeks indemnification for injury sustained. The plea of public inconvenience is then put in.

Strict and full justice should be done to the innocent sufferers without regard to the consequences which might press upon the city.

If the arbitrary exercise of usurped power is to be favored, and downright violation of the laws of the State, and the rights of its citizens, are to be tolerated, where is the safety to private property?

Had the complainants in these cases derived benefits equal to the assessments, and then complained of the exercise of a power unknown to our laws, there would have been some little apology for withholding relief; but in these cases the extreme of the reverse is the case. The complainants are injured, and, notwithstanding, are called upon to pay such immense sums of money in the shape of assessments on their lands as to amount to a repurchase of their own lands for cash.

The Common council, by their solemn act, deliberately considered and unanimously adopted, admit that property has been assessed beyond its value, and they resolved that the Counsel be directed to take measures under the direction of the finance committees to obtain a review of the assessment in 1841.

This is an acknowledgment of improper proceedings by the very body who confirmed or ratified the assessments made by their own officers whom they had appointed Assessors.

In the enlightened governments of Europe we hear of no such doctrine being set up, to deprive citizens or subjects of their estates, as that of "public inconvenience," or even of public necessity. Private property, by the governments of Europe, is held sacred and inviolate, and in no case can private property be taken for public use unless the most ample compensation is first made to the owners; and such is the great and fundamental doctrine in our own land—such is the law of the Constitution—such is the will of the People!

It has been said that the owners and occupants of houses and lands which are assessed for this class of miscalled improvements receive compensation in the advantages which the property derives by its increased value. Where is the increased value in cases where the assessment imposed exceeds the value of the land deemed to be benefitted? And where, we again ask, is the compensation in other cases in which the bare interest of the assessment exceeds the value of the property assessed?

When property is offered to be leased by the Corporation for a period extending throughout all time to any person who will pay the assessment, and none can be found willing, as it were, to accept the land as a gift on such conditions,—is it not evidence of the most convincing and conclusive character that the assessment has been most shameful and unjust—that it is nothing short of an act of confiscation? Is either the letter or the spirit of the law complied with in the making of the assessment? Certainly not. The assessment is a mere arbitrary apportionment of the contract price of certain work upon a selected piece of ground by mere mathematical calculation. The assessors are required to be skilful, competent, disinterested. Why these qualifications if the assessment is a mere apportionment, a mere distribution by figures without regard to damage or benefit? Most preposterous! and yet we are told that it will be a "public inconvenience" to set aside such assessments, or to compel the Corporation to review their proceedings.

When our Government made a claim upon Mexico to make restitution and satisfaction to our citizens for the spoilations committed by her officers upon their private property, there was no such doctrine set up by the Mexican government, or its constituted authorities, as "public inconvenience"; and if it had been pleaded, it would have only aggravated the injury.

Private property is sacred in all civilized countries, and also in some of the most barbarous; and no government can long exist which does not respect, and so hold it. It is the very foundation of government, and as Mr. Justice Story very justly remarks in his admirable Commentary on the Constitution—"Indeed, in a free government, almost all other rights would become utterly worthless if the government possessed an uncontrollable power over the private fortune of every citizen."

In principle, there is no difference between taking land from a citizen and converting it to public use without compensation and taking money. Both are alike private property, and both are alike protected by the Constitution. It makes no difference to the citizen which is taken, his money or his land.

During the last war, when the American army found it necessary to destroy the dwellings and other property of our citizens, to prevent it from falling into the hands of the enemy, in all cases full and complete compensation was by our Government made to the owners. These sufferers were not told that they are compensated for the loss of property thus destroyed by the protection which is afforded by the Government to their persons and their other property.

These assessments upon private property, which have been ordered by the common council and ratified by that body, are large in amount. In some cases, a single individual has been assessed the sum of thirty thousand dollars; others ten and fifteen thousand dollars each.

Lands of citizens have thus been invaded. The soil, which before had been productive, has been covered several feet deep with gravel and sand, and a charge made for this kind of covering by the load, at a rate that actually makes it a complete confiscation. We have now before us a paper containing an advertisement by the street commissioner of a piece of land to be sold for the non-payment of an assessment which is stated to contain 165 lots, equal to about ten and a half acres. This land is situate between 115th and 124th streets and the Fifth and Eighth avenues, being near seven miles from the City Hall. The assessment is stated at sixteen thousand and sixty-three dollars, which is about one hundred dollars per lot, or sixteen hundred dollars per acre. The advertisement states that the assessment was confirmed on the 31st of May, 1837, since which time it has been on interest, at the rate of 7 per cent. per annum. This then, is on interest five years and three months, which amounts to the sum of five thousand nine hundred and three dollars and fifteen cents, which is near six hundred dollars per acre. This property was advertised to be sold for this assessment in June, 1840, and was offered for sale without getting a bid. Although this property is on one piece of

ground, it was advertised for sale as 165 lots. The charge for the advertisement alone was two dollars per lot, which was equal, for the piece of land, to three hundred and thirty dollars for the advertising alone!

The same land was again advertised for sale, for the same assessment, in October 1841, but could not be sold for the want of bidders.

This land belongs to the estate of a person some years since deceased.

This assessment is one of those referred to in the following proceedings of the common council.

—

From Senate Doc. No. 100, *page* 277.

Preamble and Resolutions for paying Contractors and applying to the Legislature for act to buy under sales for assessments.

Whereas, there are large amounts due several persons, contractors for building sewers, regulating streets and avenues, and paving and setting curb and gutters, and also for filling low and sunken grounds, as set forth in the original schedule, prepared by the street commissioner, and which improvements were made, and work done in pursuance of the several respective ordinances of the common council, and which were to be paid for by assessments on the property benefitted, and as soon as the amounts of said assessments were collected.

And whereas, the assessments levied in pursuance of said ordinances have been for some time confirmed, but collection of the same, only in part made, and most of them returned as unpaid and uncollectable, and the property liable thereto, and on which, the same were a lien, agreeable to the laws of the state, advertised, and offered for sale by the street commissioner, at the recent sale of property for assessments; but the amount due on said assessments could not be realized, by reason of their being no bids at such sale for said property, *the amount of said assessments being more than the present market value of said property so liable*, in consequence whereof the said contractors are still unpaid; the common council, in order to relieve them, and anticipating the collection of said assessment, and which may hereafter be made, and trusting that they may be authorized by the Legislature, to raise by tax the amount which they may so advance, and to secure themselves and city treasury, from any loss, by being authorized to purchase in at any sale, such property, for which there may be no bids; do adopt the following resolutions:

1. *Resolved*, that the counsel prepare a law, under the direction of the law committee, to be applied for, to the Legislature, authorizing the corporation to become purchasers of property which may hereafter be offered for sale, for payment of assessments agreeable to law; to refund them for any advances which may have been made by them, to contractors or others, for the improvement for which such assessments were imposed. Such law to contain all needful provisions to secure the rights of parties interested therein, and that such property be held as a trust fund to repay such advances.

2. *Resolved*, that the comptroller be authorized to pay the several contractors the amounts respectively due them, for the several improvements made in pursuance of the ordinances of the common council, in all cases where the property assessed therefor, was benefitted by such improvement, has been offered for sale, and could not be sold by reason for the want of any bid, at the recent sale of property for assessments, or in cases, in which the sale of such property has been enjoined by the Court of Chancery, such payment to be made on the first day of October next.

3. *Resolved*, that the comptroller include the estimated amount required for the above payment, in the amount of the next annual tax bill, to be applied for to the next Legislature.

4. *Resolved*, that the counsel to the corporation, under the direction of the law committee, *take measures to obtain a revision of assessments, mentioned in the annexed schedule as may be judged expedient, and agreeable to law.*

Adopted by the board of assistants, February 25, 1841.

Adopted by the board of aldermen, February 22, 1841.

Adopted by the acting mayor, February 25, 1841.

Volume 8, of the printed proceedings of the common council, printed by authority of the common council, page 121 and 122.

December 24, 1841, compared with the printed Document in vol. 8, of proceedings of common council, page 121 and 122, and correct. G. FURMAN, *Chairman.*

—

We find in the street commissioner's advertisement for the sale of lots in June, 1840, a lot 24 feet 6 inches front, by about 100 feet deep, advertised for sale for an unpaid assessment for filling in Fifth street. The assessment is one thousand eight hundred and forty-five dollars and sixteen cents—confirmed June 28th, 1830—interest to June 28, 1840, being ten years, at 7 per cent. per annum, $1291.62, which makes the amount, in all, $3136.78. This lot is on the corner of avenue B, and is hardly worth one quarter of the amount.

We notice in another case for the regulating and repaving of Chapel street, that Mr. Andrew Lockwood, who owns 14 houses of a block fronting on that street, was assessed the sum of $1480.90. Instead of being benefitted that amount, his property was actually injured more than ten thousand dollars.

Mr. Riley, in the same street, was assessed for the same proceeding $732.71, by which, instead of being benefitted that sum, his property was injured more than five thousand dollars. In fact, ten thousand dollars would not make him good for the injuries he has suffered by the proceeding.

Other citizens in the same street have also suffered largely by the same proceeding. In this case, the contract price for the repaving of the street was five times that which had been paid for repaving the same street previously, and the work of the first repaving was much better than the last.

We notice another case in the Eighth avenue. Mr. Scott was assessed on a piece of ground —— feet front, $——— for regulating this avenue. Some years since, this very property was taxed to pay for working the Third avenue, which was such a proceeding in every respect as the Eighth avenue. In this case of Mr. Scott's, the lot was sold for the assessments, and he redeemed it by paying over seven hundred dollars. In the case in which this property was sold the assessment was never signed, or certified by the assessors, and still the common council ratified it, without any examination; and the street commissioner, who was one of the assessors named in the ordinance for making the estimate and assessment, actually sold the land under these proceedings.

The assessment for building a sewer in 122d street.—This sewer is, part of it, built on piles, over a salt meadow, and above the ground which is assessed for draining. Even the bottom of the sewer is higher than the ground which is assessed, and the water cannot be got into the sewer from the surface unless it is pumped into it by hand or machinery. In this case, the sewer was actually in a state of dilapidation before the assessment was confirmed. Some of the lands assessed for the sewer are actually separated from it by an immense ledge of rocks, and the waters which fall on this ground have a contrary course from the sewer.

——o——

MEMORIALS TO THE LEGISLATURE.

The following is a copy of Six Memorials presented to the Legislature at the last session by the Hon. Gabriel Furman. The Anti-Assessment Committee deem it necessary to state, for the information of Honorable Members of the Legislature who may not be familiar with the names of the signers, that four of them are distinguished Ex-Mayors of the city of N. York, another Ex-Recorder, and another the present Recorder. Nineteen have been Members of the Board of Aldermen, twelve have been members of the Board of Assistant Aldermen and of the Corporation; ten are Presidents of Banks, twenty-eight Presidents of Insurance Offices, the Assistant Register of the Court of Chancery, the Postmaster of the city, and Collector of the Port, thirty-six of the most respectable commercial and mercantile firms in the city, and a great number of the most highly respectable citizens; — showing most clearly the state of public opinion on this most highly important question.

Robert Smith, *Chairman.*

TO THE HONORABLE, THE LEGISLATURE OF THE STATE OF NEW YORK:

THE Undersigned, Citizens of the City of New York, most respectfully represent to your Honorable Body, that the extraordinary and arbitrary power now and heretofore exercised by the Corporation of the City of New York, in assessing private property for what are called public improvements, requires to be restrained by Legislative enactments.

The powers which have been vested in various public officers in Assessment matters have been greatly abused, and the consequences are serious to the Citizens, depreciate the value of real estate, and render titles doubtful and insecure.

The undersigned are informed that very full exhibits of the disastrous consequences of the abuses complained of will be made to your Honorable Body, and they ask that the subject may be taken into the serious consideration of the Legislature, and that the Legislature may make such provisions as will protect the owners of real estate, and such as in their wisdom may seem meet. And in duty bound, &c.

VOL. 1. NEW YORK, APRIL 9, 1842. No. —

ASSESSMENTS.

REPORT

Of the Select Committee from the Senate of this State, appointed to investigate Assessment Abuses in the City of New York,

COMPOSED OF THE

HON. GABRIEL FURMAN,
HON. GULIAN C. VERPLANCK,
HON. JOHN B. SCOTT.

In order to present the material portions of this important Report, we have classified the subject matter of the report, and accompanied each portion with remarks and references, that the reader may be able to obtain some knowledge of this all-important subject.

The COMMITTEE say:—

"In the investigation of the matters thus committed to their charge, the Committee were occupied during almost the whole of the last autumn in the city of New York, and also in the month of December, and to the period of the meeting of the present Legislature."

Again, the Committee remark:

"On the 18th September last the Committee received a Communication from the Memorialists, on whose application the investigation was ordered, tendering to their use the commodious Lecture-room in Clinton Hall, New York, free of expense or charge to the State, which was accepted."

The Committee, after detailing certain matters as to the public officers, say that—

"In the course of their examination, the most prominent matters complained of appeared to be,

"*First*, In the manner of opening streets, avenues and public squares in the city; in the appointment of the commissioners of estimate and assessment; in the expenses of those commissioners, and the time spent in the discharge of their duties.

"*Secondly*, The imposition of heavy and oppressive assessments for improvements never actually made, except upon paper; and which assessments were frequently ruinous, being more than the value of the property assessed; and the great difficulty which owners of real estate in that city, and particularly in the upper and unimproved portions of it, experienced, from the fact of using arbitrary map numbers instead of street numbers and farm numbers.

"And, *Thirdly*, The great difficulty which the citizens had encountered in obtaining a review and correction of any errors committed by the commissioners and assessors in making any of such awards or assessments for the opening of said streets, avenues or public squares, from the fact that, although the Court of Chancery at first assumed jurisdiction of such cases on the ground that such assessments being made by a statute, a lien upon real estate was a cloud upon the title, and might, if unjust and unequitable, be removed in equity, it has since denied having cognizance of such matters; and the Supreme Court have in some instances denied a certiorari, to remove such proceedings, and others where the writ had been granted, had afterwards quashed the same and refused the parties any relief, referring them to an action at law for trespass against the individual members of the common council, or against the officers of the corporation personally, who should attempt the collection of such assessment.

"The committee will examine these several propositions which contain the substance of the long and tedious investigation through which they have progressed, and will submit to the consideration of the Legislature the conclusions to which they have arrived upon these several heads.

"*First.* The manner of opening streets, avenues and public squares, in that city, in the appointment of the commissioners of estimate and assessment, in the expenses of those commissioners, and the time spent in the discharge of their duties.

"That there have been great and serious abuses in the mode of opening streets and avenues in the city of New York, and in the expenses attending the same, cannot be doubted by any person who has examined the subject; and these evils have mainly arisen from the loose and unguarded manner in which that important branch of authority has been exercised.

"For while in England, in the city of London, in Birmingham and other places, whose proper municipal regulations would seem to require as liberal extension of power to their local corporate governments as that of New York, streets cannot be opened or widened without an act of Parliament specially passed for that purpose, upon a due examination of all the circumstances of the case; yet, in the city of New York, they are opened or widened, and that in large numbers together, by a single resolution adopted by the two boards of the common council, without any control, as was the case in opening all the streets and parts of streets not previously opened up to and including 42d street, by a resolution of April 6, 1835; and subsequently, September 12, 1836, another resolution was adopted to open all the streets from 42d street to 57th street. The reservoir on Murray's Hill, in the city of New York, is on 42d street.

"This loose practice has grown up in modern times, for the more guarded one of an application to the supreme legislative authority was in existence in that city, subsequent to 1792, when to authorize the first widening of John street an application was made to the Legislature, then in session in that city, and before either house would act upon the petition, they sent a committee to examine the ground; upon the report of which committee, they enacted that the damages to the owners whose lands were taken, should be appraised by a jury who should be composed of merchants, showing how careful they were in former legislation on this important subject.

"This appraisement is now made by three commissioners, appointed by the Supreme Court, who are generally nominated at the instance of the counsel of the corporation, although there have been instances where one of those commissioners has been selected by the court from names proposed by the corporation council, and by the opponents to the application, and another has been named by those opponents.

"It is difficult now to comprehend how the expenses in opening streets and avenues in that city could have been so VERY GREAT as they are represented to have been, but of the fact of their being so very great, there can be no doubt; it is established by the receipts of the commissioners for the same exhibited before the committee.

"In the opening of the Seventh avenue, from 21st street to 129th street, which was confirmed in February, 1839, the amount awarded to the owners for land taken for the avenue, was **$21,141.41**, while the *FEES* and expenses amounted to the large sum of **$12,435.70**, and if to that is added the collector's Fees for *collecting* the assessments, **$1,115.00**, it will show a total of expenses *paid* by the Owners of Land on that portion of the Seventh avenue for its *formal* opening, amounting to **$13,550.70!**

"The amount paid to the commissioners on that avenue for their services, at the rate of four dollars per day, which is the highest sum allowed by the statute, is pay for *sixteen months'* services for each commissioner, in making the estimate of the land taken for opening that avenue, and assessing that value back again upon the land on each side of the avenue; and in opening this one street, of one hundred and eight blocks of about 270 feet each, THE COMMISSIONERS WERE *EACH ENGAGED* **THREE TIMES THE WHOLE PERIOD** THAT THE LEGISLATURE *IS EMPLOYED IN LEGISLATING FOR THE STATE,*

AND *EACH* OF *THEM* RECEIVED about THREE TIMES THE COMPENSATION that is PAID TO A LEGISLATOR FOR PASSING THE *WHOLE WINTER FROM HIS HOME* IN ATTENDING TO PUBLIC BUSINESS!!

"And in addition to that it was shown to the committee that commissioners were frequently engaged on several streets or avenues at the same time, taking their FOUR dollars per day on EACH of those improvements; and that *they* received and were *paid* that compensation in some instances where they *did not* attend to the duties of their appointment, and in others where they attended *but* once or twice.

"If the case of the Seventh avenue had been a solitary instance the committee might have supposed that it had taken place through some mistake; but they found the same principle of enormous expenses to extend throughout the whole system of street openings in that city, and that to such an amount that the surprise should be *not* that the inhabitants NOW complain of it, *but* that they had not done so at a much *earlier* period!

"The manner in which the opening of those streets was effected has been the subject matter of complaint to the committee.

"Assistant Alderman Townsend, who introduced the report in favor of opening all the streets up to and including 42d street, testified that it was his intention to have all of them opened in one proceeding, and thus save to the citizens an enormous expense; and for that reason his report did not conclude with the ordinary direction in such cases, that the corporation counsel should take the necessary legal measures to carry the same into effect. But through some misapprehension the ordinary proceedings were taken for opening each street separately by itself, and a set of commissioners appointed for each street, instead of one set for the whole series; and by that means the expenses to be paid by the owners of real estate upon the same was increased at least $95,000.

"Another and a most serious evil seems to have arisen from the circumstance of there being no fixed and settled principles used by those commissioners in making their awards and assessments.

"In some instances where individuals have furnished their full proportion of land for a street or avenue, and should in justice have been assessed only their proportion of the expenses attending the proceedings, and of any buildings which were to be removed from that street or avenue, they have been assessed some thousands of dollars beyond that amount.

The complaints which have arisen from this want of settled principle in the action of those commissioners have been very numerous, and have been urged upon the consideration of this committee with great earnestness.

"During the session of the committee in New York, Peter Lorrillard, Esq. submitted to them a communication on this subject, in which he stated that 'in many cases the injustice was so great that he had firmly made up his mind to sell all his property in this State and remove where his property would be protected and placed on an equality with other citizens; and was only prevented from so doing by reason that it would not bring the prices of 1830, thereby was forced to stay the sale, having made some sacrifice.'

"*If the citizens of New York are laboring under an erroneous impression in believing that they have been greatly oppressed and injured by the course pursued by those commissioners, that belief is, in the judgment of the committee, very extensive.*

"The committee reiterate their conviction that these errors on the part of those commissioners have mainly arisen from the want of settled rules or principles in making their awards and assessments, and that such want of settled rules or principle must always be experienced so long as those commissioners shall continue to be appointed for each individual case.

"These evils and abuses might have been obviated in a great degree, in the judgment of the committee, by having established a permanent board of commissioners, in place of appointing a set of commissioners for each improvement; which board would necessarily have an uniform principle in determining questions that arose before them; and from their knowledge of the subject, would be enabled to dispose of the same in half the time that ordinary commissioners would be necessarily engaged.

"The *second* prominent objection made before this committee, was, as to the imposition of heavy and OPPRESSIVE Assessments for Improvements never actually made, except upon paper; and which assessments were frequently ruinous, BEING MORE IN AMOUNT THAN THE VALUE OF THE PROPERTY ASSESSED.

"This point has been a very prolific subject of inquiry, and many witnesses were examined before the committee, detailing what they considered grievances arising from an abuse of the laws on this subject. Among the cases thus detailed, the committee will present the following as showing the nature of the complaints submitted to their consideration:—

"Mr. Stuart Mollan, a very respectable citizen of that city, resides in a house in Broadway, which he owns, and where he has resided for several years past, which was assessed for a sewer in 13th street; he paid the assessment when it became due, and supposed that he had thereby discharged his whole property, which he regarded as one house and lot, and which he purchased as such; but he afterwards was informed that the assessors had assessed his house and *a part* of his lot as *one* piece to himself, and the rear of his lot, and the stable on it, as *another* and distinct parcel of land, and to a person who was *not* the owner, which last piece was charged with an assessment of a few dollars. In 1838, his stable and the rear portion of his lot, were advertised and sold for that small assessment for the term of eight years, and the time for redemption had expired, and the purchaser had obtained his lease, before Mr. Mollan became apprised of the fact that it was thus assessed and sold, and he was obliged to buy out the right which the purchaser had obtained under that assessment sale, by paying $——. Mr. James Gillespie and Mr. Richard Mortimer made similar complaints.

"On that branch of the complaint as to the imposition of heavy and oppressive assessments for improvements never actually made, the committee ascertained that a very large portion of the streets and avenues FORMALLY opened from 1836 to 1839, were *not* actually opened; that nothing has been done beyond making awards and assessments by the commissioners and the confirmation of their reports by the Supreme court; and that although the assessments have been *collected* for such improvements in many instances, and in others the lands charged are either sold or advertised to be sold for the payment of those assessments, yet the lands forming those streets and avenues remain in the *same condition* as they were before the taking of any proceedings for their opening; and in some cases such lands remain in the occupancy of their original owners notwithstanding they have been paid for the same.

"And in numerous other instances where the streets and avenues have been actually opened, nothing has been done towards their regulation, so as to make the same useful to the public, or available to the owners of real estate, who have paid for the same by assessments on their property.

"Out of a list of EIGHTY-ONE STREETS and avenues, or parts of such highways, the reports for the opening of which had been confirmed in 1837, 1838 and 1839, FIFTY-SEVEN have not been in any way regulated or improved; and of the remainder, twenty-four in number, in some instances only portions thereof have been regulated a few blocks; and in others, a road has been worked through the centre of the street or avenue; and in others again, it is not deemed necessary to work such road, as the natural grade of the ground is such as to make it passable without regulation.

"This attempt to collect assessments not only by voluntary payment, but by enforced sales of the lands charged, without actually opening the streets or avenues for which such assessments have been imposed, has been a strong cause for the excitement in that city on subjects of street matters.

"The committee therefore submit this subject to the consideration of the Legislature.

"Several instances were shown to the committee where property had been offered for

sale for the payment of assessments at two or three successive sales without being able to get a bid, the amount of the assessments being more than the estimated value of the property.

"These large assessments operate against the interests of the city, for the owner will not pay the assessment or improve the property, and no person will buy it, and the corporation cannot realize their money by a sale of the assessed premises, and the amount must be taxed upon the city; and thus the improvement of the upper part of the city which is covered with these great assessments must be stayed for many years, and now apparently for an indefinite period of time, unless the land should be in some manner relieved from the charge of those assessments.

"It did appear reasonable to the committee that in analogy with a judgment, the lien of which ceases on real estate after the termination of ten years, the lien of those assessments should be at an end after the lapse of some definite period; what that should be, the committee submit to the discretion of the Legislature.

"Now the mere fact of the confirmation of the report, makes it conclusive upon all the parties assessed; and the assessment becomes a lien on the lands assessed from the date of the confirmation.

"Such however was not always the practice; for the act of 1792, required an action of debt to be brought on the assessment, although it was declared a lien and prior encumbrance so that the party assessed could test the validity and legality of the assessment on the trial of this action of debt; and the land could not be sold until judgment was obtained in that action, and an execution issued on that judgment.

"Which course or something similar to it, would afford the most expeditious course of trying the questions in relation to those assessments, and would be more equitable and just, both to the corporation and the parties assessed than to leave each individual who considers himself aggrieved to bring an action of trespass against individual members of the corporation, or its officers or agents acting under its orders, as has been recently intimated by the Supreme court.

"The matters complained of in relation to designating the lots assessed by arbitrary map numbers, although it has undoubtedly operated very injuriously to the interests of the owners of real estate in that city, and has undoubtedly in some instances operated to cause lands to be sold for the payment of assessments, which the owners would have paid, if they had known their property by that designation, has, however, been in some degree remedied, by the adoption of the street numbers and farm numbers of the same property where they existed.

"On the *third* branch of this subject, the great difficulty which the citizens have encountered in obtaining a review and correction of alleged errors committed by commissioners and assessors in making awards and assessments, in opening streets, avenues, and public squares, and in making other improvements in that city; the committee have been compelled to the belief that some remedy should be proposed and adopted.

"When these questions first arose, the Court of Chancery affirmed its jurisdiction, entertained bills of complaint, and granted injunctions to stay proceedings in the sale for those assessments, until the alleged errors could be examined, on the same ground that it always asserted its jurisdiction in case of fraudulent judgments, and that although the judgment was illegal, yet it being a lien upon real estate was a cloud upon the title, and should be removed by the intervention of a court of equity.

"So these assessments, although stated to be illegally imposed, were declared by statute to be a lien upon the lands assessed, and would appear to be equally a cloud upon the tile, and for the same reason that a judgment is so regarded, they both being equally liens upon real estate.

"But that court has since denied, that it had jurisdiction in those matters, and referred the applicants to the courts of law.

"The Supreme court also, in the first instance, seemed to entertain these complaints, and allowed writs of certiorari to issue for the purpose of bringing up the proceedings before them.

"But subsequently they intimated that such writ could only bring up the record of the commissioners' report, and not the proceedings before, or connected with it; they again held that in analogy with a writ of error the certiorari should be governed by the same limitation; although it has been previously held, by good authority, that a common law certiorari, (which was the nature of the writ in those cases,) was not subject to such limitation; and it was afterwards intimated by the same court, and with a precision that would seem to give it the authority of a decision that a certiorari could not be directed to the corporation.

"And again, the Chief Justice, in delivering an opinion, in a case of assessment, in the court for the Correction of Errors, since the decisions above referred to, held that the remedy of the parties was in action of trespass against the individual members of the corporation who enforced the collection of those assessments, or against the officers or agents of such corporation who should, under their orders, attempt the collection of such assessment.

"The committee think that the orders of the corporation, in any matter within their jurisdiction, should protect an officer under them, and that he should not be held liable to inquire into the legality of all the acts done by that corporation, but their warrant should always be his protection; and so also the members of the common council should not be held personally responsible for any error in judgment in the discharge of their duties; and this view of the case is in analogy with the doctrine heretofore held, both by the Supreme court of the United States and of this State, that an agent of the government, or of any branch of public authority known to the laws, should not be held personally responsible for any contracts or engagements which he might enter into in behalf of his principals.

"These differences of opinion on the subject of the legality of those assessments, and of the sales made for their collection, have led to much bitter feeling between many of the citizens and officers of the corporation who assert the legality of those assessments; and which controversy has been unfortunately increased from the want of some proper tribunal to settle those questions by prompt adjudication.

"It is undoubtedly to be regretted that any steps should have been taken which would unnecessarily embarrass the common council in their proceedings in relation to such sales for assessments.

"But the committee doubts whether it will be wise or politic to interfere, in any way by legal enactment, with the expression of opinion on the part of citizens, either verbally or by publication, in relation to the legality of any proceeding, on the part of the government or of the corporation, in relation to assessments or to any other matter, in which their interests or those of the public are involved.

"The true way of settling those questions will be by the courts of our State, in examining into the justice and legality of the matters complained of.

"If the people can be satisfied by the decision of any one of our higher courts, after a full and patient examination of the whole subject, that those assessments are legally imposed, there will be undoubtedly an end of those complaints, and they will acquiesce in such adjudication.

"In view of all the embarrassments which now surround this subject, and the differences of opinion which have heretofore existed in the court of Chancery and the Supreme court on the question of jurisdiction in matters relating to the opening of streets and avenues or public squares, and the assessments consequent thereon, the committee think that the Legislature should interfere and by statute law settle that jurisdiction in the Supreme court; which would be in accordance with the principles adopted by the court for the Correction of Errors in the case of the mayor and common council of the city of Brooklyn *vs.* Gertrude Meserole et. al. in December last.

"And to cover all the doubts heretofore expressed by the Supreme court in their decision in several cases which have been decided by them on assessment cases from the city of New York, the Legislature should give that court full power to examine into all the matters preceding that assessment, as well the acts of the common council, as of the commissioners of estimate and assessments; and for that purpose the certiorari should bring up all matters connected with those proceedings as well as the report of the commissioners.

"It is well known that the judges of the Supreme court in confirming those reports in street openings, do not act as a court, but as commissioners under the statute; it may therefore be well to authorize the court to examine their proceedings as commissioners.

"If it shall be thought best to extend the statutes of limitations to the common law certiorari, it should not be left to judicial de-

cision or analogy for determination, but should be ascertained by legislation.

"Under the act of 1839, the costs of the proceedings in opening streets, &c. are required to be taxed before payment.

"But the committee cannot discover any instance in which such costs have been taxed except in that of opening Cherry street, which was discontinued. Those expenses have always been heretofore paid upon a mere abstract of the report of the commissioners, containing the sums total of the awards and assessments, and of the costs of the commissioner's counsel, &c. But the street commissioner avers that since he has become acquainted with the existence of that law, no bill of such expenses has been paid without taxation; and that he had supposed that the Supreme court in passing upon the confirmation of the commissioners report, taxed and confirmed all the expenses, statements of which were appended to such report.

"To obviate all the difficulties which arise from this view of the case, or from a difference of construction which may be given to that law, it is suggested that the Supreme court, either as a court or as commissioners, should not confirm any report until after the costs have been taxed and certified in the manner required by that law.

"And while on this branch of the subject, the committee would observe that many complaints were made, that those commissioners of estimate and assessment having several streets or avenues under their charge, at one and the same time, would merely meet for a few minutes and then adjourn, charging their four dollars for a day's service.

"This objection might be obviated by requiring the commissioners to sit at least three hours on such streets, before they should be enabled to charge for a day's service.

"For the last three or four years it has been a frequent subject of complaint, that the persons assessed have not had notice of the imposition of such assessments before their property was advertised for sale for the payment thereof.

"By the act of May 14, 1840, by the second section, the commissioners and assessors were required to give notice to the owners of houses and lots affected, of their assessment, by publishing the same daily, in at least ten of the daily newspapers for ten days successively.

"And by the ninth section of that act it is provided that no land shall be sold for such assessments, unless notice of such sale shall have been published once in each week for three months, in at least ten of the daily newspapers in the city of New York.

"By the first section of the act of May 7, 1841, the notice to be given of their assessment by the commissioners and assessors was to be published in at least two daily newspapers in that city for ten days, and the second section of the act of May 14, 1840, was repealed.

"It is urged that the notice required by those acts and particularly the notice of the imposition of such assessments are not sufficient, and that it would save much expense to the citizens, and induce the payment of many assessments at an early period, if the owners of real estate had some more particular notice of the imposition of the same, than can be given by a notice in a newspaper.

"It has been suggested that a personal notice should be given to the owners of the real estate thus assessed, or to their agents, and that such notice should also be given to the person who last paid the taxes on such property; and that such personal notice should be served upon parties who claimed to be owners of such premises, but who were not the last assessed or the last who paid taxes thereon, who shall file a notice in writing in the office of the street commissioner, claiming to be such owner, and desiring that such notice should be served upon them, or upon such persons as they may designate as their agent for that purpose; and that a longer time should be allowed for the redemption of real estate, which shall have been sold for the payment of the assessments imposed thereon without such personal notice having been previously given, than is now allowed by law.

"And where notices connected with the opening of streets, avenues or public squares in the city of New York, and the assessments consequent thereon, are required by law to be published in newspapers, it would be well to specify a particular day, on which such notices should appear, to the end that owners of lands charged with such assessments, or affected by such improvements, may know when to look for notices on those subjects."

REMARKS.

FIRST—"*In the manner of opening Streets, Avenues and Public Squares in the city,*"—

It will be seen by referring to the documents accompanying the Report, page 113, that the board of aldermen and board of assistants, composing the common council of the city of New York, proceeded, on a resolution of one of the aldermen, to order an application to be made to the Supreme court for appointment of Commissioners of Estimate and Assessment to make an estimate of the expense of Opening all the streets from 42d street up to and including 57th street, and to assess the same upon the owners and occupants of land deemed by them to be benefited.

This district embraced fifteen streets, extending from the East river to the North river, and consists of a tract of farming land about three fourths of a mile wide by about one and a half mile long.

None of the citizens interested in the property to be affected by this proceeding made application for the opening of these streets; and although the resolution for opening these streets was passed on the 16th March, 1837, the land remains in the same state and condition as before: nothing whatever has been done beyond the appointment of commissioners, making the assessment, and collecting the amount by a sale of the property for the assessment.

The second proceeding which we propose to notice in this order is—

"All the streets and avenues up to and including 42d street which had not been opened by due course of law or by deeds of cession prior to the 19th day of February, 1836."

No authority was given by the Common Council, in this case, for the application to the Supreme court for the appointment of Commissioners of Estimate and Assessment, and none was intended to be given as appears by the affidavit of the Chairman of the Street Committee *(see documents accompanying the report, page* 311). Notwithstanding this want of authority, an application was made to the Supreme court and twenty-seven distinct sets of commissioners were appointed.

Thus in these two proceedings, embracing forty-two streets and avenues, not a single individual interested in the property petitioned the common council, but they were *got up* by Public Officers solely for the purpose of making FEES and COSTS to fill the pockets of Corporation Speculators, of whom they themselves were the principals.

The next proceeding we notice is that for opening the Ninth avenue from 45th street to the Bloomingdale road.

This proceeding was on petition of eighteen individuals, *none* of whom were interested a single dollar in the lands assessed, or affected by the proceedings. ☞Citizens interested in the property, however, *remonstrated*, but their opposition was DISREGARDED *by the common council.*☜ This proceeding was in 1836, more than six years ago, and the avenue still remains in the same plight and condition as before, although the assessment has been collected by coercion! Some of the lands assessed, but not *benefited*, have been sold for the term of a thousand or more years to pay the assessment—a conclusive evidence of the wickedness of the assessment, which was, in effect, a confiscation of the property.

The proceedings in relation to the opening of the Tenth, Seventh, Sixth, Fifth and Second avenues were upon petition, in which very few of the persons interested united. These avenues are in the same situation in every respect as the Ninth avenue.

Manhatten Square,

A piece of ground consisting partly of a swamp and partly of ledges of rocks, about six miles from the City Hall, was proceeded in on the resolution of a member of the common council. Commissioners of Estimate and Assessment were appointed by the Supreme court, on the application of the common council, and the assessment was made to the extent of near $50,500, and confirmed; and an attempt has been made to collect it by a sale of the property assessed. This square still remains in a state of nature, and will probably so remain for a century to come. It is of no benefit whatever to the persons assessed for the expenses of it, and many of these assessments are greater in amount than the value of the land on which the assessment is imposed, amounting therefore to actual confiscation. These proceedings were commenced six years ago, and in truth it may be said that the interest on some of these assessments will in some cases exceed the value of the land. The assessments for this Paper Square are very heavy, amounting on a single estate to more than Three Thousand Dol-

lars. Not a solitary individual interested in the property applied for these proceedings, and none of them approved the act.

Mount Morris Square.

This is a proceeding on the resolution of an alderman. The ground selected for this square is *Snake hill*, at Harlem, about seven miles from the City Hall. It is a ledge of rocks, about 80 or 100 feet high, and worthless. The cost of this proceeding is near Thirty Thousand Dollars, and it was had in 1836 or '37. Some of the assessments for the Paper Opening of this square exceed One Thousand Dollars on the property of a single individual. The proceeding was not asked for by any person interested. A public square in such a place and of such ground is the most absurd measure imaginable, and yet the property assessed has been advertised for sale to pay the assessment, but owing to the fact that some of the assessments exceeded the value of the land assessed, the property could not be sold.

Of all the proceedings which we have noticed, above FIFTY in number, the owners of the property to be affected thereby to the extent of MILLIONS OF DOLLARS, had in but *five* cases out of FIFTY any voice in the matter—in these *five*, to a very small extent only.

Such extraordinary proceedings on the part of the City Government in such matters is no where else on this globe to be met with.

The motives which the movers had in view in these cases, was to make fees and costs for public officers.

Such reckless proceedings are destructive to the rights of citizens, to the security of private property, and dangerous to civil liberty, and would be a disgrace to the most despotic and barbarous government on the earth, as they truly are to our own government and to the public bodies which have thus proceeded.

SECOND—"*In the appointment of Commissioners of Estimate and Assessment*"

The assessments for the pretended opening of the streets from 42d street, up to and including 57th street, were made by FIFTEEN distinct sets of commissioners. On five of these streets a young man, who was at that time a clerk in the street commissioner's office receiving a salary from the corporation of one thousand dollars per annum, was appointed a commissioner. This young man is a brother-in-law of the street commissioner. Another of the commissioners was a young man who was at that time in the office of the corporation office: he was appointed on two streets.

Another of the commissioners appointed on these streets was also a brother-in-law of the street commissioner, and he was also appointed a commissioner on two other streets. Another of the commissioners was also employed in, or indirectly connected with the office of the counsel of the corporation. An opinion of the balance to make up the first fifteen sets, may be formed from what is here stated.

The commissioners on the second class of streets named as embracing TWENTY-SEVEN streets and avenues below 42d street, were EIGHTY-ONE in number. In the report of the committee on streets (see Senate Document, page 100) the plan was to have but one set of commissioners, that *nineteen twentieths* of the expense usually incurred of opening streets in detail might be saved, and the committee withheld the usual resolution, that the counsel take the necessary legal measures, &c., and no such resolution was at any time passed. Twenty-seven distinct applications however were made to the court on petition signed by two officers of the corporation, who were not probably aware of the tenor of the proceedings which had been had in this matter for the appointment of as many sets of commissioners. On reference to Document No. 71 of the Board of Assistant Aldermen, of 1840, we find that the clerk in the street commissioner's office, and a brother-in-law of that officer, was appointed on two of these streets, and this is the same person who was commissioner on five of the other streets above named, and also on one other street besides. One of the clerks of the Supreme court was also appointed a commissioner on one of these streets, and this same gentleman had also been appointed a commissioner on seven other streets and avenues. A deputy clerk in the office of the Clerk of the court of Common Pleas was also appointed a commissioner on four of these streets; the same gentleman was also appointed a commissioner on three or more other streets: he is a brother of the then deputy or assistant street commissioner. One of the appraisers in the custom house was appointed a commissioner on three of these streets, he was also a commissioner on seven other streets and avenues.

The Committee of the Senate remark:—

"This appraisement is now made by three commissioners appointed by the Supreme court, who are generally nominated at the instance of the counsel of the corporation."

There are some of the gentlemen who have acted as commissioners who are qualified for the performance of the duties required of them; but the loose manner in which a great proportion of the assessments have been made and the notorious fact that much of the property assessed could not be sold even for a term of ten thousand years for the amount of the assessment and some of it not even for the interest of the assessment, is a sad commentary on their fitness, qualifications and judgment: but as we before observed, there are some exceptions—some were well qualified.

Public officers whose time is necessarily occupied in the duties of their respective offices, should not be appointed commissioners.

The appointing power we apprehend has also been misplaced. Commissioners are judicial officers, and should in compliance with the provisions of the Constitution be appointed by the Governor with the consent of the Senate; but the Constitution of 1777 and of 1821 we think clearly provides for a jury in all cases of taking land for public streets, &c. on the island of New York. The Constitution provides that the judges of the Supreme court shall not hold any other office or trust. This may be called a duty imposed by law upon the court, and if so, it is a trust to be executed by the justices of the court.

The Constitution designed that the Judiciary branch of the State Government should be distinct from and independent of the Executive and Legislative: hence the provision above noticed.

The appointing power is one that has at its command great patronage, and in this case as will be seen when we come to the next head, one of extraordinary patronage.

The exercise of this power places the court in a very peculiar predicament when called upon to review proceedings of an aggravated and extraordinary character in which the acts of their own officers are called in question. It will be seen on reference to page 278 of the documents forming the appendix of the Report of the Senate Committee appointed to investigate assessment abuses in the city of New York, that the Counsel of the corporation claims that the Commissioners of Estimate and Assessment are officers of the Supreme court.

If the Judges of the Supreme court proceed as a Court in these matters, and are not acting as *quasi* commissioners, then in that case their acts are not in conformity with the provisions of the Constitution of this State.

The appointment of the commissioners of estimate and assessment in the matter of opening streets, avenues and public squares in the city of New York has not been judiciously exercised, for these Commissioners should not have been appointed on an ex-parte application, in such important proceedings, persons whom the justices of the court did not personally know; and it is evident that they did not know many of the persons appointed: if they had possessed this knowledge they surely would not have appointed some of them.

The Honorable Senate Committee however have come to a conclusion in this matter as to the mode of the appointment, which they have expressed in the words which are above quoted.

THIRD—"*In the Expenses of these Commissioners, and the Time spent in the discharge of their Duties.*"

Under this head we have much to say.

John Keyes Paige, Esq. Clerk of the Supreme court at Albany, appeared before the Senate Committee in the senate chamber, in the Capitol of that city, and stated in evidence as follows:

"Witness never knew of any bill of items of the expenses in opening streets or avenues, or public squares in the city of New York, presented to the Supreme court for taxation when the reports of the commissioners of estimate and assessment were presented to that Court for confirmation, though it is possible when such confirmation was opposed, such bills of items may have been presented to the court with the report and other papers, and the judge may have passed upon them, but the witness never saw any such bills, and none have fallen under his observation *in his office.*"—*Senate Document, No.* 100, *page* 85.

All the Reports of Commissioners of Estimate and Assessment which have been confirmed by the Supreme court are filed in the office of the Clerk of the Court at Albany.

The witness stated also—

"There is no Abstract or Summary accompanying said reports as far as the witness has examined the same."

Robert Emmet, Esq. for many years corporation counsel, in a letter written by that gentleman to a member of the common council, which is set forth in the document accompanying the report of the Hon. Senate Committee, page 278, uses this language:

"I have received a copy of a resolution offered by you and passed by the BOARD OF ASSISTANTS on the 9th instant, requiring me to furnish that board with the items of the bill for counsel fees and court charges in the matter of opening the 7th avenue; also a bill of charges of the commissioners of estimate and assessment and the surveyor's bill in the same matter. I had determined to send back the copy of the resolution, enclosed in a short communication, to the President of the board of assistants, respectfully denying the right of that board, or of the common council, to require any such information from me; but being informed that the resolution was not drawn by you, and believing that you might not well have considered its fitness or propriety when you introduced it, I have thought it due to you to make this personal communication to yourself on this subject. A very brief statement will, I think, satisfy you that as a matter of *strict right* the common council are not entitled to make any such demand; and I can hardly suppose that any member of that body could desire that its aid should, *without right*, be made subservient to the investigation's spirit, however laudable it may be deemed, which may have suggested this resolution in any other quarter.

"The proceedings for opening the Seventh avenue were conducted and concluded under the Act of April 9th, 1813, the 189th section of which provides that the commissioners of estimate and assessment (who are appointed by, and are officers of the Supreme court) shall be entitled to receive the sum of not more than four dollars per each day actually employed by them in their duties besides all reasonable expenses and disbursements. The law directs these expenses shall be paid by the corporation and included in the assessment, by the subsequent collection of which it was intended the corporation should be reimbursed. There is no provision in the act for the taxation of these expenses, or for the regulating of them by any other rule than the discretion and good faith of the commissioners who are authorized to incur them. But even admitting them to have been extravagant in any case they could not affect the corporation, who were mere agents required by law to pay the money and refund themselves by the Collection of the Assessments; and whatever right the parties assessed may have had to inquire into the necessity or reasonableness of these expenses, or to object to them, should have been exercised while the matter was before the commissioners or the Supreme court. If the law was defective in this respect, the Legislature have endeavored to remedy it by an act passed April 20, 1839, which among other alterations requires a rigid taxation of all costs, charges and expenses in cases of this kind before they can be paid; but I know of no law which made it my duty to preserve and exhibit to the common council, or to any other party, *or even to make out a bill with items* of the costs, fees and court charges in the matter of opening the SEVENTH AVENUE, or in any other of the numerous street cases which I had charge of, and which were terminated before the Act of 1839 was passed, and I might with just as much propriety be now called upon to furnish the items of the expenses of any estimate and assessment confirmed ten years ago, or of all that have been confirmed since that time."

This communication is dated Nov. 12, 1840.

The Senate Committee in their report, page 13, remark—

"It is difficult now to comprehend how the expenses in opening streets and avenues in that city could have been so very great as they are represented to have been, but of the fact of their being so very great, there can be no doubt; it is established by the receipts of the commissioners for the same exhibited before the committee.

"In the opening of the seventh avenue, from 21st street to 129th street, which was confirmed in February, 1839, the amount awarded to the owners for land taken for the avenue, was $28,141.41, while the Fees and expenses of that opening amounted to the large sum of $12,435.70, and if to that is added the collector's fees for collecting the assessments, $1,115.00, it will show a total of expenses paid by the owners of land on that portion of the seventh avenue for its formal opening, amounting to $13,550.70.

"The amount paid to the commissioners on that avenue for their services, at the rate of four dollars per day, which is the highest sum allowed by the statute, is pay for *sixteen months*' services for each commissioner, in making the estimate of the land taken for opening that avenue, and assessing that value back again upon the land on each side of the avenue; and in opening this one street, of one hundred and eight blocks of about 270 feet each, the commissioners were each engaged three times the whole period that the Legislature is employed in legislating for the State, and each of them received about three times the compensation that is paid to a legislator for passing the whole winter from his home in attending to the public business. And in addition to that it was shown to the committee that commissioners were frequently engaged on several streets or avenues at the same time, taking their four dollars per day on *each* of those improvements; and that they received and were paid that compensation in some instances where they did *not* attend to the duties of their appointment, and in others where they attended *but* once or twice.

"If the case of the seventh avenue had been a solitary instance the Committee might have supposed that it had taken place through some mistake; but they found the same principle of enormous expenses to extend throughout the whole system of street openings in that city, and that to such an amount that the surprise should be not that the inhabitants now complain of it, but that they had not done so at a much earlier period!"

On pages 58 and 63 of the report of the Senate Committee is the following testimony:

"*Peter Perine* being called and duly sworn on the part of the Memorialists, says—was engaged as a draught-man in the street commissioner's office, from March 1837 to October 1839. Witness's duties were pretty general: he participated in almost every branch of business in the office: he computed about four fifths of all the assessments for regulating, paving, curb and gutter in streets and avenues; those assessments in which the street commissioner, assistant street commissioner and chief clerk were the regular constituted assessors. By Document No. 71 of 1840 it appears, that on the opening of the Seventh avenue the commissioners' Fees are $4,920.00, being $1,640.00 to each commissioner; which will, at $4 per day, pay for four hundred and ten days, which is, at 26 days per month, fifteen months and twenty days; room hire and contingent charges are $723; counsel Fees are stated at $3,976.77; surveyor's fees $2801. Witness has never acted as commissioner, but he would suppose *that to compute an assessment for paving or regulating a street or avenue was quite as much work, if not more, than to make an assessment for opening a street or avenue: he would think it was more work as there are many more Items.*"

This testimony of Mr. Perine's is confirmed and sustained by the following testimony of JONATHAN THOMPSON, ESQ. formerly COLLECTOR OF THE PORT OF NEW YORK, one of the most worthy and estimable citizens of this republic:—

(From Senate Doc., 100, pages 47 and 48.)

September 25, 1841.

The committee met pursuant to adjournment.

Present—Mr. FURMAN,
Mr. VERPLANCK, and
Mr. SCOTT.

Jonathan Thompson being called and duly sworn, on the part of the Memorialists, says—that formerly, between 25 and 30 years ago, the witness was personally acquainted with all the assessments of the city of New York, being the collector of the internal revenue of the United States. Afterwards, the witness in 1819 or 1820, at the request of the common council, valued all the property of the city of New York with Mr. Targee and Mr. Smith. Witness has been a commissioner upon forming and grading the Third avenue, and upon a number of other improvements. Witness knows the labor and time necessary in making out assessments, as he has spent several weeks at it, or rather months. Witness has examined the commissioners' map of Second avenue, from Twenty-ninth to Eighty-sixth streets, and also the abstract of the commissioners' report, showing the number of persons to whom awards and against whom assessments were made, in the matter of opening said Second avenue. He can only estimate the time necessary to be spent in making the estimate and assessment of said Second avenue, by comparing it with Third avenue from the Bowery road to Harlem bridge, which was six miles and a quarter in length, and on which the witness made the assessment for regulating and grading. The expenses of the commissioners on said Third avenue, (which was in May, 1819.) The assessment-roll contained

about a quire and a half of paper closely written, was as follows:

Total expense of working and regulating, - - - - -		$97,514 00
To which add:		
For advertising, - -	$ 8 00	
For surveying, - - -	244 00	
Collector 3 per cent. on $33,280 31, - - -	998 41	
Assessors for assessing, stationery, &c. - -	886 56	
Contingencies (paid to street commissioner,)	190 03	
		2,327 00
Total, - - - - -		$99,841 00

The witness produces the surveyor's bill above referred to, which is sworn to, August 3, 1820, by the affidavit of Mr. Daniel Ewen the surveyor, which is "surveying, compiling, collecting information, and drawing maps of the Third avenue, from its commencement at the Bowery to Harlem bridge, 61 days at $4 per day, $244." The assessment on the Third avenue, extended one half way to the next block same as Second avenue. The Second avenue is parallel to the Third avenue and about 500 feet distant, and there is not much difference in their situation and grounds, and he thinks it was as easy to make the maps of Second avenue as to make that of the Third avenue; in fact he thinks it was much more labor to make the map for the Third avenue, for the same distance, than it was to make that of Second avenue; it was a new thing when that of Third avenue was made, and there were many more assessments. The witness should not say there was the one tenth of the labor in making out the estimate and assessment of the Second avenue, that there was in making out the assessment which witness made out on Third avenue. The assessment which the witness referred to, as being a quire and a half of paper, on the Third avenue contained descriptions of all the property assessed. The abstract of the commissioners' report on the Second avenue is made out on two sheets of paper. The witness knows what services used to be rendered in cases of street improvements by the corporation counsel. The commissioners or assessors would make out their report or assessment-roll, and hand it to the counsel who would put it into legal form.

JONATHAN THOMPSON.

Cross examined by counsel for corporation. —The proceedings on the Third avenue, were not relating to the opening of that avenue, but relating to the regulating and grading. The witness is not aware that all such business in assessing, &c. relating to such regulating and grading, is now done by the corporation officers. The witness has understood that such proceedings would now cost a great deal more money than they did in 1820, when he thus acted; but he does not know why they should.

JONATHAN THOMPSON.

In further illustration of this matter we give below the testimony of JOHN LEONARD, ESQ. who acted as a commissioner on several streets.

(From Senate Doc. 100, p. 32, 33, 34.)

John Leonard being duly sworn, says—he was one of the commissioners of estimate and assessment, in opening Second avenue from 28th to 86th streets; was associated with Henry P. Robertson and Andrew Mills. Mr. Robertson and the witness were the only two who did any work on such estimate and assessments. Mr. Mills was there once or twice. Mr. Mills may have been there oftener than that, but he never did any thing, except to sign the report. Mr. Mills may have been there three or four times, but witness does not recollect distinctly of his being there more than twice; there was work enough for him to do, if he had attended to it, and had been capable of doing it. Mr. Mills signed the report. He made the same charge for his services that was made by the other commissioners; he received the amount of his charge from the comptroller of the city, through the witness. The witness was the chairman of the commissioners, and it was usual for the chairman to receive the whole of the compensation. Mr. Robertson's compensation was not received by the witness; but he believes it was received by his, Mr. Robertson's, assignee, Mr. Francis Fickett. The witness gave his receipt for such compensation, to the comptroller. The witness does not recollect distinctly, but thinks the report of estimate and assessment was confirmed, about August or September, 1839. The witness always made it a practice to give all the notice in relation to presenting such report, that the law required; and in order to make sure of that, the witness consulted with Mr. Emmett, the corporation counsel, who then had charge of those street proceedings. The witness does not recollect that any notice was given of presenting such report, by posting handbills in the vicinity of the contemplated improvement; nor in how many newspapers the said notice was published; that was left to the counsel of the corporation, who then had charge of the proceedings.

At the time the witness made that report, he was not aware of the existence of any law which required such notice to be posted up in handbills.

The witness thinks the amount charged by each commissioner in that case was over seven hundred and fifty dollars. The charge for room-hire was a separate charge. The allowance to the commissioners is four dollars per day. None of the fees of the commissioners or surveyors were taxed previous to being paid to the witness's knowledge. Those fees were assessed upon the property supposed to be benefited by the improvement. The fees were not paid until some time after the confirmation of the report. Mr. Robertson served the same number of days that the witness served. To make that report was a very long piece of work. From four to eight hours was generally considered a day's service; from five to six hours was the general length of time in a day. The room of the commissioners was in the witness's house. The report of the commissioners was drawn up by the witness. The witness examined the avenue so to be opened personally. The elevation of the ground on the Second avenue between Twenty-eighth and Eighty-sixth streets, was very irregular, some points very high above the city grade, and the soil rocky, and some points wet and below that grade. On some parts, it would be exceedingly difficult to reduce that avenue between those streets to the city grade, and would cost a large amount of money. The said avenue, when the commissioners went over it for the purpose of making their estimate and assessment, could not be travelled by carriages without being graded, by reason of its unequal surface. By awards, the commissioners understand the amounts due to the parties interested for the land taken. In making this assessment, the lots were estimated as to their respective value, in order to put upon each a regular per centage of the benefit to be derived. Corner lots were generally charged a third more than intermediate lots. In estimating the value of the lot, they took into consideration whether the lot was to be dug down or filled up, and upon ascertaining the value of the lots, a regular per centage was laid upon each, to the amount of the awards and expenses; so that the assessments for benefits equalled the whole amount of the awards and expenses. Such has always been the practice of the witness, and he has acted frequently as such commissioner of estimate and assessment. The witness recollects the old Kip's Bay road, which terminated near the line of the Second avenue, on a ledge or precipice of rocks, and that the same could not be travelled farther by reason of those rocks. If the witness owned land in the neighborhood of Kip's bay, he would not thank any body to open the Second avenue for his accommodation. If two commissioners done the work, it was always the practice to charge for the same compensation for the third commissioner, although he was absent. Witness always understood such to be the practice. The witness made out the bill in the case of Mr. Mills. Witness thinks he mentioned the case of Mr. Mills to Mr. Emmet the counsel of the corporation who had charge of these proceedings.

JNO. LEONARD.

(From Senate Doc. 100, pages 37 to 43.)

John Leonard, recalled on the part of the Memorialists, and he says: The witness was chairman of the commissioners of estimate and assessment on opening Second avenue from Twenty-eighth to Eighty-sixth street. At some meeting of the commissioners, witness set Mr. Andrew Mills to ascertain how many square feet was in part of a lot, and he could not do it. The witness did not attempt to make use of the services of Mr. Mills any further in that proceeding. Mr. Henry P. Robertson concurred with the witness and declined to make any further use of Mr. Mill's services in the matter of that estimate and assessment. After that abortive attempt at figuring, Mr. Mills went asleep in the commissioners' room, and done nothing more towards accomplishing the estimate or assessment. It is usual for the commissioners to draw the report in such cases, at least in all such cases the report was drawn by some one of the commissioners, where the witness was a commissioner. The witness ascertained the fees of the corporation counsel, included in the assessment from his suggestion; the counsel furnished merely the sum total of the amount of his services; the witness does not recollect any instance where he furnished items of such charge; he was merely asked how much his bill would be; it was towards the last of the

commissioners' calculations, and before preparing the report, that the corporation counsel was asked such question; the witness did not see any bill of such counsel for his services in such matter taxed or certified by any officer. Did not assess any lands for such improvement northerly of Eighty-sixth street, or southerly of Twenty-eighth street. The witness did not know that he could by law assess any lands northerly of Eighty-sixth street and southerly of Twenty-eighth street; on the contrary, witness believed that the commissioners could not legally make such assessment, and supposed the practice to be contrary. The witness thinks it would be a benefit to lands on the Second avenue, south of Twenty-eighth street, to open the said avenue to Eighty-sixth street. In the immediate vicinity of Eighty-sixth street, and above that street, the witness thinks the lands would be benefited by opening that avenue, but that would not extend far. In all cases where the witness has been a commissioner, it has been the uniform practice to limit the assessments to the end of the improvements each way. The statement produced in relation to Second avenue is signed by the the witness and the other commissioners. The sum total of assessments is $19,259.60. The aggregate amount of awards is $12,595.23¼. The expenses are,

Surveyor's bill,	$1,700 00
Appraiser's bill,	60 00
Corporation attorney, counsel and court charges,	2,033 55
Commissioner's fees,	2,280 00
Room hire, clerk hire, printing and stationery,	324 72
Collector,	300 00
Total expenses,	$6,698 27
Total amount of awards and expenses,	19,293 93

The witness arrived at the amount of surveyor's fees by the surveyor's bill, which was generally handed to the commissioners and carried back when the report was done. That bill was generally an aggregate amount. The commissioners knew the extent of the work, but they were no judges of the value of services. They received the surveyor's bill from the corporation counsel, and when they did not receive it that way they would ask the corporation counsel whether it was correct. The surveyor's bill was not audited or certified by any officer to witness's knowledge. The witness does not know who selected the surveyor. The commissioners did not select the surveyor. The first thing put in the commissioners' hands, after being qualified, was the map of the proposed improvement. The witness does not recollect who was the surveyor in case of Second avenue; he believes it was Thomas R. Ludlum. (The report of estimate and assessment in matter of opening Second avenue was confirmed on 4th September, 1839, as appears by certificate of amount of report on file with records of corporation. This forms no part of the testimony of Mr. Leonard.)

The Second avenue above Kip's Bay, runs through farms to 86th street, at the time when the estimate and assessment was made. The witness does not know how commissioners were appointed in 1835: his impression was, that Mr. Emmett usually selected or nominated them; but he does not know how it was. And he thinks there have been instances where the owners of land have interfered and nominated some. The witness does not know how it happened that Mr. Mills was appointed on that commission. He knew nothing of his own appointment until he saw the names of all three as such commissioners. The witness does not recollect particularly, any other instance in which an incompetent person was appointed a commissioner besides this Mr. Mills.

JNO. LEONARD.

September 24, 1841.

The committee met pursuant to adjournment.

Present—Mr. FURMAN,
Mr. VERPLANCK,
Mr. SCOTT.

Mr. John Leonard was recalled and examined by the Memorialists. By drawing up the report by some one of the commissioners, the witness meant that the commissioners drew up a copy or statement of their work, and the counsel of the corporation drew up the long report, which contains the descriptions of land taken. The witness cannot tell the particular number of days Mr. Mills was there; he was not there five times, and done nothing when he was there; he was a perfect cypher. The precise number of days for which the commissioners charged, upon the said Second avenue, was 190 days for each commissioner, at four dollars per day. They called it a day, when they had from three to four hours' meeting, sometimes it was six hours. The room-hire charged was $285, which includes the time the witness was employed in making the abstract of the commissioners' work for the corporation council. The witness cannot now say, how much of that $285, was apportioned to each of said charges. The balance of $324.72 is made up with clerk-hire, printing notices to the parties to come forward and show titles to the property embraced in the assessment, and stationery. The expenses as they appear upon the minutes of the commissioners, kept by the witness, are as follows, to wit:

Surveyor's bill,		$1,700 00
Attorney's bill,		2,000 00
Collector's bill,		300 00
Appraiser's bill,		60 00
(These appraisers went twice or three times to examine buildings or any damages done apart from the land. They generally have two sets, but there was three in this instance.)		
Commissioners,		2,280 00
Room rent,	$285 00	
Clerk, printing, stationery,	39 72	
		324 72
		$6,664 72

For their services upon the said Second avenue, each commissioner charged for seven months and eight days, allowing 26 working days to each month.

The witness owns the house in which he resides and in which the commissioners transacted their business. The commissioners had always a room to themselves. The witness's house is worth a rent of $800 per year. The commissioners occupied the witness's ordinary parlor or back sitting-room on the first floor. Of the number of meetings of the commissioners, one fourth was for the purpose of notifying the owners of real estate, to produce their title deeds, and in attending to hear their statements; sometimes they came pursuant to the notice, and sometimes some of them did not appear; but the commissioners were always in attendance to receive and hear their statements.

JNO. LEONARD.

Cross examined by the counsel for corporation.—After they have completed the report, the counsel attend to giving the notices. The abstract of the estimate and assessments is what the commissioners are in the habit of making out, and from that, the counsel made the report. For each day the commissioners charged four dollars; and although but one commissioner met, and no business could be done, yet the commissioners each charged four dollars, as for a day's service. The witness never charged less than four dollars per day, nor more. The appraisers were professional persons; carpenters or masons to appraise the damages upon buildings. And it has always been the practice to employ such appraisers. The commissioners could never give satisfaction to the owners, unless competent persons were employed. The clerk hire was paid to the person who done the writing, and the witness done the writing, and the charge was received by the witness. The commissioners' bills or the witness's bill, in case of Second avenue, were not verified in any way. The witness was a commissioner in the case of Twenty-ninth street, between one and two years ago, and witness has not received his compensation in that case. This case of Twenty-ninth street was the last case in which the witness was a commissioner. He does not recollect when he was appointed. The report was confirmed, witness believes, last winter.

JNO. LEONARD.

Direct examination resumed by Memorialists.—When the witness received his compensation from the comptroller for his services as such commissioner on Second avenue, at the request of the comptroller, the witness furnished a statement in round numbers, the same as contained in abstract of report. The following memoranda from the witness's book of the proceedings of the commissioners, contain the statement which the witness so furnished to the comptroller, viz:

"Called at the Comptroller's office, 24th Nov. 1839, and was requested by him to furnish a statement of the demand of the commissioners. The following was addressed to Alfred A. Smith, Esq. Comptroller.

"*New York, 26th Nov.* 1839.

"ALFRED A. SMITH, Esq. *Comptroller.*

"*Sir*,—I annex, as requested, the amount of charges as per report of the commissioners

[Continued on the next (710th) page.]

for opening Second avenue from Twenty-ninth to Eighty-sixth streets, and remain,

"Respectfully, yours,
"J. L."

Expenses as Reported.

Surveyor's bill, - - - - - -		$1,700 00
Attorney's bill estimated, - - -		2,000 00
Collector's bill estimated, - - -		300 00
Appraiser's bill, - - - - - -		60 00
Commissioner's bill, - - - -		2,280 00
Room hire $285, clerk, printing and stationery, - - - - -		324 72
		$6,664 72
John Leonard as commissioner, - - - -	$760 00	
Do. for appraisers, - -	66 00	
Do. for room hire, &c. &c.	324 72	
		$1,144 72
Henry P. Robertson, commis'ner,		760 00
Andrew Mills, do. - -		760 00
Smith, surveyor, - - -		1,700 00
		$4,364 72

No other call for a statement was made upon the witness by the comptroller, than that above stated, and it is the first of the kind that the witness ever received. The witness cannot now state without a reference to his book, whether he was paid his charges as stated above, before or after he presented that statement to the comptroller. The witness does not know of any connexion existing between the said Henry P. Robertson the commissioner, and the said Francis Fickett, alderman, in relation to the said improvement.

JNO. LEONARD.

(From Senate Doc. 100, *pages* 113, 114, 115.)

John Leonard, recalled on the part of the Memorialists, says he was one of the commissioners for opening Twenty-ninth street; his associates were Lovell Purdy and George A. Baker; they completed the assessment within a year past; Mr. Purdy and witness made the estimate and assessment; Mr. Baker attended a very few times; in the estimate of expenses, Mr. Baker was allowed the same amount for services as the witness and Mr. Purdy, and that amount assessed on the property; witness delivered the report to Mr. Emmet, the counsel; don't know whether the statement of the expenses accompanied the report when the same was deposited for examination in the county clerk's office; don't know what Mr. Emmet done after said report was so delivered to him. JNO. LEONARD.

Cross examined by street commissioner on part of corporation.—Witness was chairman of the said commissioners; Mr. Baker was notified to attend verbally; Mr. Baker attended the meetings of the commissioners about half a dozen times; witness always considered that the attendance of two commissioners was all that was necessary in the making of such estimate and assessment; and when two attended witness never waited for the third commissioner; witness always considered two sufficient, even if the third commissioner did not attend at all; witness never heard of the law that required if one of the commissioners refused or neglected to act, another should be appointed in his place; witness has read the law in relation to his duties as such commissioner, but never heard or knew that the attendance of three comissioners was indispensable; witness does not recollect of signing any memorial to the Senate complaining of the high charges of the commissioners, surveyors, &c. in the matter of opening streets; witness is shown a printed memorial, in the Municipal Gazette, to which his name is printed, but has no recollection of signing his name to it; he may have signed it, probably did sign it; he should hardly have signed it without knowing the contents; his signature may have been given on some statement having been made to him, of its contents; the commissioners allowed Mr. Baker the same compensation for attendance, although he was there but five or six times, as was allowed to witness who attended all the time; the witness done all he could to correct those erroneous charges for services not rendered, by stating the fact to the corporation counsel, after they had completed the assessment, and after the Fees of Mr. Baker were included in the assessment; Mr. Emmet, the counsel, told witness it was necessary for the commissioners to swear to their attendance, and witness and Mr. Purdy made their affidavits to their full attendance and left Mr. Baker to take care of himself. Witness does not recollect whether the law requires the commissioners to make their report to the Supreme court or whether it is to be made by the counsel, but he has always handed in the minutes of the estimate and assessment to Mr. Emmet, the counsel, and he made out the report and presented it to the Supreme court, as the witness understands; does not recollect seeing any thing in the law which recognizes the agency of corporation counsel in the matters of estimate and assessment in opening streets or avenues after the appointment of the commissioners, but the universal practice to the witness's knowledge has been to present the report after the estimate and assessment were made to Mr. Emmet, the corporation counsel, and to no other person. Witness thinks it is very likely that he told Mr. Baker that he need not attend the meetings of the commissioners of estimate and assessment as he lived a great way off; Mr. Purdy and the witness, two of the commissioners attending, witness did not tell Mr. Baker that it was unnecessary for him to attend, but that he might suit his own convenience as to attending; witness made no complaint to the counsel about Mr. Baker's not attending, but merely stated the fact, and nothing probably would have been said about it, but that Mr. Emmet, the counsel said something about a new arrangement, witness thinks as to the oath required of the commissioners as to their attendance, and then witness stated to him the fact of Mr. Baker not attending; witness knows of no law which would authorize Mr. Emmet, as corporation counsel, to control the acts of the commissioners.

JNO. LEONARD.

Direct examination resumed on the part of the Memorialists.—When witness made the return of estimate and assessment to the counsel, Mr. Emmet, he informed the witness it was necessary for each commissioner to make out a statement of his services and swear to it for himself; and the witness then sat down at the desk of Mr. Emmet and made out his statement, swore to it, and informed Mr. Purdy. Mr. Emmet never told witness that he was not the proper person for him to make the return of the estimate and assessment to, nor any body else. It is now for the first time that the witness ever heard that the commissioners were obliged to return their report of estimate and assessment to the Supreme court, and never heard of an instance where it was done by any other set of commissioners; and by way of confirming that matter, witness would state that he has been on such commissions with Murray Hoffman, the present assistant Vice-chancellor, and Thomas R. Smith*; and witness would have supposed he would have gone correctly with them, even if he had been in error before; and never did the witness ever hear Mr. Hoffman intimate that such a course was required. Mr. Emmet, the corporation counsel, never told witness that he could not control the commissioners, and witness never knew that he could control them, or that any power could control them but the law. While acting as commissioner, witness always considered Mr. Emmet as the legal adviser of the commissioners; and where there was any doubt as to the course the commissioners should pursue, and they were not clear as to the law, they resorted to him for counsel, and always got it.

JNO. LEONARD.

Cross-examination on the part of the corporation resumed.—When the commissioners presented their report to Mr. Emmet, the counsel, to be presented to the Supreme court, the witness was morally certain he would present it to that court, and witness regarded him as the proper person to present it to that court.

JNO. LEONARD.

Direct examination on the part of the Memorialists resumed.—The witness received his

* On referring to Document No. 45 of the Board of Aldermen of 1839, and Document No. 71 of the Board of Assistants of 1840, we find it stated that Mr. Hoffman was a Commissioner of Estimate and Assessment on *twelve streets*, avenues, &c. On two of these he was appointed in 1831, two in 1832, three in 1833, one in 1834, two in 1835, and two in the early part of 1836. The aggregate amount of the three Commissioners' Fees in these TWELVE STREETS is stated $7050 00, which is $2350 00 for each Commissioner, or $195 83 for each commissioner on each street. The total amount of Awards on these twelve streets exceeded NINE HUNDRED THOUSAND DOLLARS: all the commissioners' Fees therefore in the twelve streets amount to a fraction over three fourths of one per cent.; whereas, in the 2d avenue the Awards were about $12,600 00 and the commissioners' Fees were $2,280 00, or about 18 per cent. [See page 38 of the Senate Report], and in the Seventh avenue the Awards were $28,141 42 and the commissioners' Fees $4920 00 or a fraction less than 18 per cent.—both of them, however, being about twenty-two times as much as those streets Mr. Hoffman was commissioner upon. The commissioners' share of Fees in 7th avenue were $1640 00 and in 2d avenue $760 00 each against $195 83 each in Mr. Hoffman's streets.—ED.

compensation, as commissioner of estimate and assessment on the Second avenue from Twenty-ninth to Eighty-sixth street opening, in corporation bonds which had some months to run, but witness does not recollect how long. JNO. LEONARD.

Cross-examination on the part of the corporation resumed.—Witness does not know whether the costs in case of opening Twenty-ninth street have been taxed in which witness was a commissioner of estimate of assessment; witness has not yet received his fees on that street. JNO. LEONARD.

FOR SEVENTH AVENUE.

The Counsel Fees are - -	**$3977.76**
Commissioner's Fees - - -	**4920.00**
Room hire - - - - - - -	**410.00**
Surveyor's Fees - - - - -	**2801.00**

Collector - - - - - - -	**1115.00**
	$13,550.76

(From Senate Doc. 100, *pages* 119 *to* 125.*)*

Anthony L. Robertson, having been called on the part of the Memorialists, and duly sworn, says—He is a counsellor at law and resides in the city of New York; he was one of the commissioners of estimate and assessment in the opening of the Seventh avenue from Twenty-first to One hundred and twenty-ninth streets; appointed by the Supreme court on the petition of parties interested, the principal of which was the representatives of the estate of Henry Eckford, deceased, and two or three other estates, which he does not now recollect; his associates were John Harris and George W. Murray. Mr. Harris, witness thinks, gave himself the title of chairman, but witness regarded him as having no precedence among the commissioners; the meetings of the commissioners were held partly at a room belonging to Mr. Harris, in Fulton street, and partly at his house, in Harlem lane; don't recollect when he was sworn in as commissioner; witness can't tell how many days or months they were occupied in making the estimate and assessment; the number of meetings will appear from the report; the whole time that elapsed from the commencement to the finishing of the report, was from two and a half to three years. The witness, by his recollection, received for his commissioner's fees $1,400. The charge for the commissioners, as appears by document No. 45, is $4,920, which would make the fees of each commissioner 1,640; he can't account for this discrepancy; from his memory he would still state that he received for his fees $1,400; witness does not think he did attend all the meetings held at Mr. Harris' house, at Harlem, but was engaged in making calculations at his own house, upon the same parts of the avenue they were engaged upon at said meetings. Witness does not recollect whether Mr. Murray was absent from the United States a considerable part of the time while that estimate and assessment was making, but witness's impression is that he was not, as he was in the habit of seeing him frequently and would notice any long protracted absence; witness never made out any bill of the number of meetings; only made out a statement of the gross amount; he kept an account of the number of days he was employed; he has not got that account; he has either destroyed it or it is in the possession of Mr. Harris. Has occupied an office adjoining that of Mr. Emmet, former corporation counsel, and communicating with each other until within a year past; witness is acquainted with the hand-writing of Mr. Emmet, and is shown a letter dated New York, November 12, 1840, signed R. Emmet, and addressed to William Adams, Esq. assistant of the Fifth ward, and says that it is in the hand-writing of Mr. Emmet. Four thousand nine hundred and twenty dollars, at the rate of four dollars per day, is the pay of three commissioners for four hundred and ten days each; the commissioners, as is usual in such cases, made an abstract of their estimate and assessment, from which Mr. Emmet made out the report; a report was deposited in the county clerk's office by the direction of the commissioners, and signed by them; witness never saw that report afterwards, and does not know what became of it. When witness applied for his fees as commissioner he got a warrant from the street commissioner's office, from Mr. Gaines he thinks, or the comptroller; at the time of getting that warrant he deposited in the street commissioner's office an abstract of the estimate and assessments, with the expenses in gross amounts as commissioners' fees, $4,920, surveyors, $2,001, &c. the Supreme court having passed upon the accuracy of the items contained in their report, he did not consider the corporation or any of its officers authorized to question their right to the amount charged by them, they being the mere depository of moneys paid by persons assessed, to be paid to those to whom it was awarded by their report. Witness believes the expenses are stated in a paper annexed to the report, and the Supreme court passed upon that report. He has been a commissioner on other streets; he believes the amount of their charges are such as commissioners have stated in their report; they are stated in gross. The persons interested in that avenue could have ascertained the amount of expenses by deducting the amount of awards from assessments; the balance would show the amount of those expenses. To ascertain that, they must add up the items on each page, which are probably not more than three in number on each page, and are carried out on the margin for facility of reference. Thinks the report must have contained two hundred leaves, but that is a guess; it was very thick, and asked if it might not contain one thousand pages, witness says he can't tell; at a mere guess he should say there was about one thousand persons assessed. Witness thinks he saw Mr. Harris and Mr. Murray together, meeting as commissioners, two hundred times, principally at Mr. Harris's room, in Fulton street; at these meetings they were together between four and six hours.

ANTH'Y L. ROBERTSON.

The committee adjourned to November 9th, inst. at 7, P. M. to meet at the assistant vice chancellor's room, in the City Hall, in the city of New York.

November 9, 1841.

The committee met pursuant to adjournment.

Present—Mr. FURMAN,
Mr. VERPLANCK,
Mr. SCOTT.

Anthony L. Robertson, being recalled and further examined on the part of the Memorialists, says: he wishes to correct his testimony so far as to state that the commissioners met in a room in the building at the north-west corner of Wall and Nassau streets, a room of Mr. Harris's, previous to meeting in the room of Mr. Harris's in Fulton street. Being asked upon what principle he made the assessment on Seventh avenue, says it is a very difficult question to answer; does not know that any one principle was adopted; they estimated the benefits and damages according to certain rules of valuation. Being asked what were those rules, answers that considering the laws allowed them to assess to half the distance between the avenues for benefit, that a block formed by a line drawn half the distance from middle of Seventh avenue to the middle of the avenues on each side of the lines drawn through the middle of each street, and the line drawn through the middle of the Seventh avenue should have the assessments for benefit and estimate of damage exactly balanced, distributing among the parties assessed for benefit their proportionate share of the expenses connected with making the estimate and assessment, and establishing a rule for varying the rate of assessment for benefit of the land adjoining each street crossing the proposed improvement, according to the distance of such land from the line of the improvement; each 100 feet of land, as it receded from the proposed improvement, being charged with a different and regular per centage of assessment to be paid for land to be taken for said avenue; where the owners of the land adjoining the proposed improvement were not the same as the owners of land taken for the said improvement, an assessment was charged upon the owners of the adjoining land to make up a fixed sum to be allowed to the owners of the lands taken for the said improvement, at a certain price per square foot. The assessment upon each lot of 25 by 100 feet, or less, was calculated upon the basis of valuation adopted by the commissioners. The reason of taking each lot of 25 feet by 100 for the calculation of separate assessments, was, that it had been found by experience in previous assessments that lots would frequently change ownership during the progress of the assessment, whereby inconvenience would arise to different owners in paying their assessments to the corporation, and great difficulty to the officers of the corporation in making the apportionment of such assessments; it being a period in which real estate had frequently changed owners, and pieces of field ground were divided up and sold by lots of said dimensions. Upon being asked whether a large portion of the land on the Seventh avenue was not laid out in farms upon the maps, he answers that upon the map furnished to the commissioners the witness thinks the land was laid out in lots the most

of it. Being asked upon the principle he had stated how long it would take a commissioner to make the estimate and assessment on Seventh avenue, from Twenty-first to Twenty-second street, and to the centre of the block each way, he answers, that would depend upon the number of owners, the size and shape of the lots, and the distance of irregularly shaped lots from the proposed improvement, and the size and shape of lots in the line of the proposed improvement. Being asked in the worst case he could put it, how long it would take to make that estimate and assessment, he answers, that would depend somewhat upon the facility of the commissioners in making arithmetical calculations; he should think some lots would take a person of ordinary facility in such calculations, a day. The witness being asked if he viewed the ground when he made the assessment, answers, he went over the ground and took a view of it in the eye of the law, but did not go over the hedges and ditches and ponds which lay in the way. Being asked if he visited Alderman Townsend's ground, says he cannot now recollect; if there was any thing remarkable about it to call it to his recollection he might say, but he could not now state from recollection how many persons' grounds he saw. Witness recollects a gentleman, who Mr. Emmet called Mr. Townsend, calling upon witness after the report was presented, and he thinks disposed of, in relation to some assessment; he complained of his having been assessed wrongfully, in some way, and witness thinks he referred him to Mr. Harris, and told him that Mr. Harris had the papers, calculations, &c. Witness is asked if, upon the principle they made the assessment, whether, if Mr. Townsend owned from the centre of the avenue to the centre of the block, he would not have been entitled to an award instead of an assessment? He answers that he would, provided that the share of expenses charged on him did not exceed the estimate of benefit to those in his rear. They got the amount of counsel fees from Mr. Emmet; he stated to the commissioners what his charges were; did not consider the amount allowed to Mr. Emmet any more than a fair legal compensation, taking into consideration the services performed by him in the size of the report, and going to Albany to attend its confirmation.

The witness being asked what services Mr. Emmet rendered for that amount ($3,977.76), he answers preparing the petition for the appointment of commissioners (witness thinks he has seen petitions like those shown him); going to Albany, making the motion for the appointment of commissioners, advising with commissioners upon legal questions as to the ownership of lands, and as to their duties in assessing; the drafting and preparing copies of the report to be filed in the county clerk's office, and to be presented to the court; drafting and copies of advertisement of notice of presenting report for confirmation; advising with the commissioners in relation to objections, if any are presented; preparing affidavits to oppose objectors; preparing drafts and copies of final rule for confirmation of report, which included the whole report; counsel fee upon moving report for confirmation; being prepared to meet objectors, and printer's bills, with clerk's fees for filing report and entering long rule including substance of report, and which is longer than the report itself.

The surveyor was employed by the commissioners, except the one to make the map, previous to the appointment of the commissioners.

Upon being asked why so much larger sum is allowed to the collector of assessments on that Seventh avenue than on similar improvements, answers, he cannot say; there were a great many persons assessed. His impression is there was some rule for making that allowance, either the number of owners, or there was such a number of sums to be collected.

In regard to room-hire, he thinks they had some rule, and allowed the same amount that was charged and allowed for room-hire in a public house as in case of legal references in the city of New York. Mr. Harris received all the allowance of room-hire in case of Seventh avenue, as it was his room the commissioners used.

Witness has been commissioner on other improvements beside Seventh avenue; he thinks Forty-seventh street and Forty-eighth street. It was the general custom to allow each commissioner for an attendance at each meeting, although they were not all three present; but witness was never allowed for any attendance as such commissioner when he was not engaged upon business as such commissioner. Witness had no interest directly or indirectly in the Eckford estate. Mr. Tillou, who represented that estate, witness thinks, in the opening of some other street, complained of the acts of the commissioners, and wished to have some person appointed on this commission on whom they could rely; but whether it was Mr. Clinch or Mr. Tillou who suggested the witness' name as such commissioner he does not now recollect.

Witness believes Mr. Harris was engaged as a commissioner in some other streets at the same time that he was a commissioner in the Seventh avenue; witness thinks that Mr. Harris was engaged at the same time in as many as Five streets. The commissioners generally met together; but sometimes the witness met with Mr. Harris, and sometimes with Mr. Murray. Dr. Boles was the clerk of the commissioners in Seventh avenue; the witness received his pay, he thinks, as a commissioner, in a warrant on the Mechanics Bank.

The witness thinks a fair rent for the basement room which the commissioners occupied in Wall street would be $2 or $300 per annum; they were six or nine months in Fulton street; they occupied a front room in third story, three story building, worth a rent of $150 or $200 per annum; they were there the balance of the time, except the time at Mr. Harris's home in Harlæm lane, and they allowed $1 per day for room hire at his house in Harlæm lane; that charge included candles and fire. The surveyor's bill, $2,801, witness thinks, is a reasonable charge for his services, as he had to examine the register's office as to titles and make all the surveys.

ANTH'Y L. ROBERTSON.

Adjourned to November 10, 1841, at 7, P. M. at the City Hall in the city of New York, at the assistant vice-chancellor's room.

November 10, 1841.

The committee met pursuant to adjournment.

Present—Mr. FURMAN,
Mr. VERPLANCK and
Mr. SCOTT.

Anthony L. Robertson having been recalled by the Memorialists, and his examination continued. The witness examines the map for opening Seventh avenue, between Sixty-first and Sixty-third streets; he should think the commissioners had nothing to do upon the two blocks between those streets but to estimate the proportionate part of the expense, the said two blocks belonging to one owner, and being described to one owner; between Sixty-first and Sixty-seventh streets, and between Seventh and Eighth avenue, the whole land is owned by three owners, and divided into three parcels; the block between Twenty-ninth and Thirtieth streets, between Sixth and Seventh avenues, no one could have calculated the assessments in less than three days, adopting the rules that the commissioners did in that matter. The map now shown is the damage map of the Seventh avenue, showing the land taken from the avenue. Half the width of the avenue appears to have been taken from Mr. Benjamin Townsend, and he has complained of an assessment being imposed upon him instead of an award given to him.

The witness cannot now tell how the commissioners arrived at their conclusion in making that assessment, as all the minutes of the commissioners are now lost or destroyed, as witness understands from Mr. Harris, one of the commissioners; but witness supposes that the lots of Mr. Townsend and those adjoining have originally belonged to the same farm and been owned by the same person, and that by the conveyances of such adjoining lots, the land in the avenue had been dedicated as a public way so as not to entitle Mr. Townsend to any thing more than a nominal compensation for it. The land of Mr. Townsend, lying between Forty-ninth and Forty-eighth streets, is 105 feet six inches wide in the rear, and but 76 feet five inches wide in front on the Seventh avenue, so that he would be obliged to pay, according to the principles adopted by the commissioners, his proportionate share of the land lying in the avenue in front of the rear of his land so as to make a square at right angles. The land on the opposite side of the avenue from that of Mr. Townsend, extended from the Seventh avenue to the Bloomingdale road, so that there were no lots in the rear, the conveyance of which would operate as a dedication of the avenue; and that part of said land lying between Forty-ninth and Forty-eighth streets was but 40 feet and four inches wide in the rear and about 65 feet six inches wide in front on said avenue, so that the land lying in the rear of such front would be liable to pay its proportionate share of the amount allowed for the land taken for the avenue from them.

Mr. Townsend's land runs back two hundred feet from the avenue, and Smith & Moore's on the opposite side runs back from the avenue about 175 feet, so that they would pay still less of their share of the assessment than Mr. Townsend would be obliged to pay. The fact that the land on the damage map of the Seventh avenue to the centre of said avenue is marked with the name of Benjamin Townsend, is not presumptive evidence or any evidence that Mr. Townsend was the owner of that land, as the same was made by the surveyor, who might not know the legal effect of the conveyances before made. No award was made for that land marked with the name of Benjamin Townsend to any other: the presumption would be that if it belonged to any person to be awarded, it would belong to Mr. Townsend. Witness has examined the abstract of the assessments in the Seventh avenue, and there appears to be near 800 items of assessments for the opening of that avenue. The awards on that avenue are stated at $28,141 42, as appears by that abstract, which the witness has no doubt is correct. The witness assessed lots fronting on the Bloomingdale road, and he presumes upon the ground that the road was to be considered in law as closed, and that the owners on each side were entitled to take in to the centre of that road. There is but one house from Twenty-first to Fiftieth street on the Seventh avenue, and witness cannot tell whether any award was made for that house or not; and no house from Fiftieth to Seventieth street; and no house from Seventieth to Ninetieth street; none from Ninetieth to One hundred and tenth street; and none from One hundred and tenth to One hundred and twenty-ninth street; and witness does not think that one house on said avenue was awarded any thing.

ANTH'Y L. ROBERTSON.

Cross-examined by the street commissioner on the part of the corporation.—After the commissioners were appointed on the Seventh avenue, the services rendered by Mr. Emmet, he rendered as counsel of the commissioners. The commissioners are not under the control of the corporation or other officers, nor under the control of the counsel of the corporation in any way. The commissioners audit the surveyor's bill for making maps. Witness took charge of Mr. Emmet's general unfinished legal business when he was appointed counsel of the corporation, but had no connection with him in his corporation business or as connected with said reports of commissioners. Witness believes Mr. Murray was appointed commissioner on the application of parties interested, as he saw a petition for his appointment signed by parties interested in Mr. Murray's possession. Witness believes Mr. Emmet applied for three commissioners in the usual way for Mr. Harris and two other persons, and those two others were stricken off by the Supreme court, and Mr. Murray and the witness appointed in their stead. The Supreme court had done so before; Mr. Hallett and Mr. Kinney had been so appointed on other streets. When the commissioners made the allowance to the collector for collecting the assessments, the witness did not know who was to collect those assessments, and does not know to this day who is such collector. In making the awards for damages, the commissioners examined the title deeds brought to them by the parties claiming such damages. ANTH'Y L. ROBERTSON.

—

November 2, 1841.

The Committee met pursuant to adjournment.

Present—Mr. Furman,
Mr. Verplanck and
Mr. Scott.

Benjamin Townsend having been called on the part of the Memorialists and duly sworn, says: That he resides in the city of New York, and was formerly an assistant alderman of the said city; that as to the assessment for opening Seventh avenue from Twenty-first to One hundred and twenty-ninth streets, while the same was pending before the commissioners, he was sick, and remained so for about eighteen months. Some three or four years elapsed between the resolution of the common council for opening said avenue, and the confirmation of the report. He supposed it was abandoned, and heard nothing about it until he was called on for the payment of the assessment on his property. When the bill was presented, he called at the street commissioner's office, obtained names of the commissioners, and examined the maps. In examining the maps and abstract, he saw the property adjacent to his, and owned by Baltus More, awarded at $293 and some cents. The division fence between More and witness runs through the centre of the avenue; the adjoining land below witness belonged to the estate of Thomas Addis Emmet, deceased, and he was awarded $205 and some cents. Mr. Guest for adjoining land above witness, was awarded $274 and some cents; and witness was assessed $213 and some cents, and awarded nothing. Witness owned to the centres of the streets on all sides of his property, except in the rear, and more land was taken from witness for said avenue than from either said More or said Guest. Witness then made application to Mr. Murray to see his notes, and he said, if he saw the map he could tell witness how it was. Witness then carried him a map of the property of witness and that adjacent, and he then said to witness, that to tell him the truth, he knew nothing about the maps, and had no knowledge by which he could judge or estimate the value of the property; that Mr. Harris made up the assessment, and if there was any mistake in it, he presumed Mr. Harris would give explanations, and it would be corrected. Witness then called on Mr. Robertson, one of the other commissioners, who was in an office opening with folding doors into that of the then corporation counsel, Mr. Emmet, and he found Mr. Emmet and Mr. Robertson both present in that office, and witness asked Mr. Robertson in regard to that assessment, how such a mistake could be made; and witness described the situation of his property on the Seventh avenue. He answered witness, that he knew nothing about it; he was never there; he believed the avenue was some five or six miles long; that he was never on the premises; that Mr. Harris made the assessment, and witness should apply to him. Witness then asked Mr. Robertson where Mr. Harris lived, and he replied, that he lived in Harlem, and that he did not know that he kept any office in the city. Mr. Emmet observed, that Mr. Harris was frequently in the Times office, in the lower part of the same or an adjoining building; and witness wrote a note directed to Mr. Harris, and left it at the Times office, and called there once or twice, some little time afterwards, and there met Mr. Harris, and asked why he should have made such a difference in the awards and assessments for property taken for that avenue and adjacent to each other; and he told witness that the property was very accurately surveyed and examined into, and the value of the land in the awards made up by the square foot; that the land taken from the witness for the Seventh avenue was awarded at the same rate as the land taken from Mr. More and other persons for the said avenue; that his minutes of making up his report would show that fact: and that if it was not so in the report, and such award made to the witness, it had been altered by the counsel of the board; and witness then asked him what authority the counsel of the board had to alter a commissioner's report, and he answered witness, that the counsel had done so sometimes.

Witness then petitioned the common council, and in the board of aldermen it was referred to the committee of which Alderman Benson was chairman; and in the assistants, to the committee of which Assistant Alderman Underwood was the chairman; and that neither of said committees made any report. The witness attended the committee on assessments on notice, and the chairman told him that he had sent for the commissioners, and they had not attended; the witness was then dismissed, and never heard any more about it. During the last summer or fall, a special committee in aldermen, and committee of assessments in assistants, was appointed to hear complaints as witness understood; and Assistant Ald. Underwood requested witness to make out his complaint in relation to opening the Seventh avenue; and in his petition he told said committee that the maps in the street commissioner's office would show, by the location of the property, that a mistake had been made, and that it was an award due to the witness in place of an assessment against him for such opening. Witness told Mr. Underwood that Mr. Harris the commissioner had told him that his Harris's notes would show that it was an award, and that Mr. Emmet the then counsel of the board in the matter of the Seventh avenue had those notes. Mr. Underwood told witness that he had twice made application to Mr. Emmet for those notes of the commissioners, and he once promised to give them to him, but had not done so, so that Mr. Underwood could not have them to assist him in making out his report on the petition of the witness.

Witness went to Albany, and there saw the report of the commissioners in the matter of opening the Seventh avenue, on file in the

Supreme Court clerk's office, and examined the report, and looked for a bill of costs with it, but could find none accompanying it or attached to it. Witness was three or four hours in examining the said report.

Witness at the supreme court clerk's office first asked for the court records, and they handed him books as the records, but which contained opening roads in the western counties of the state, but nothing in relation to the city of New York. Witness then told the clerks that he came from the city of New York, and wanted to see about opening streets in that city; he had a list of eighteen streets, together with the names of the commissioners who served on those street openings, and the clerk showed the witness the reports for five of those streets, and told witness there were no papers relating to the other streets, but they were probably to be found in New York. About three weeks or a month afterwards witness went to that office a second time, and again asked for the same papers, and was told that he might find them in the city of New York; that they were not in that office to their knowledge. Witness then went to John E. Lovett, who had held the office for opening streets in the city of Albany for the period of nine years, as he informed witness, and the witness told him what occurred with him in the office of the supreme court clerk, and he told witness that he thought there must have been some misapprehension, but witness insisted there could have been no such misapprehension, for the matters occurred just as he related them above; that Mr. Lovett then went with witness to the clerk's office, and when there, and in the presence of the clerks, witness asked Mr. Lovett to take his (witness's) protest that those papers were not in that office. Mr. Lovett then spoke to the clerks and told them the papers were in the office, and if not they could say so; then the clerks produced the journals of the court, and then Mr. Lovett went to the cases and laid his hands upon the papers without difficulty; and witness found that only five streets out of the eighteen of which witness had the list, had been entered upon the journals or records of the court; the papers of those five streets were there; then they examined the index for four years back, and also the proceedings of the court for the different terms for four terms, and could discover nothing about any other of those streets but the five. Mr. Lovett then asked the clerk if the journal of the court contained their proceedings, and he said it did; and Mr. Lovett then asked him if there were any proceedings or transactions of the court not entered on the journal or put in the index, and the clerk replied no. Witness and Mr. Lovett informed the clerk of the deficiency as to the papers in the other streets which could not be found in the index or journals of the court, and he said the reports were probably in New York; that there might be some loose papers about the office which would show that some action had been had by the court in those other streets, but where those papers were he could not tell, and knew nothing about them.

About a fortnight after that witness received a letter from Mr. Lovett, which letter is now in the possession of Alderman Jones, in which he stated that he had spent a great deal of time in examining in the Supreme Court clerk's office, and found some papers which showed that some action had been had in some other streets, but which were not entered on the court records, but that in relation to two of those streets witness believes that no papers could be found.

Mr. Lovett also asked the clerk about the expenses attending such street openings, and he said it was eighteen cents for entering rule, eighteen cents for certified copy, and six cents for filing report. The principal clerk with whom witness and Mr. Lovett had the preceding conversations was Mr. Wendell, and he sometimes called the attention of other clerks to produce the books, whose names the witness does not know. The Seventh avenue from Twenty-first to Twenty-fourth streets, witness thinks is opened actually, but he thinks not beyond Twenty-fourth street.

The witness's property was assessed $52, for opening Mount Morris square; witness examined the assessment map in that case, and found it to contain nine blank numbers, which had no assessment carried out against them, which formed nearly a whole block which was not assessed. The Fifth avenue runs through the centre of the square; on the easterly side the property from One hundred and eighteenth street is assessed, and the property on the westerly side is not assessed at all. The lots not assessed are within the limits of the assessment district; lots beyond those lots not assessed are assessed. Mount Morris square is a cone of rock about one hundred and fifty feet above the level of Harlæm plain.

While witness was chairman of street committee in board of assistants, a resolution offered by Mr. Holden the year previous for opening all the streets on the commissioner's map, not opened up to Forty-second street, was among the unfinished business of the street committee in the street commissioner's office, and this resolution came as a matter of course before the committee of which the witness was chairman. It lay along some considerable time; the street commissioner, Mr. George B. Smith, was consulted on the subject. The committee went out and examined all the grounds; examined the water works, house of refuge and poor house, which belonged to the corporation, and covered ground of the streets. In this proceeding more than double notice was given to the owners of the land. The estates in this district had nearly all been sold out in lots, with the exception of some three or four large estates, as Mr. Eckford's, Mr. Ray's and Mr. More's. It was deemed proper on consultation with Mr. Smith, that reservation of the lands of Bellevue, the poor house, house of refuge, the water works and all grounds owned by the corporation and ceded to them by the owners. The persons who inquired of the street committee in relation to the matter, were informed that it was the intention of the corporation to reduce the expenses of street openings, and the irregular mode of assessing lots two or three times for one improvement. There was but one person who objected to these openings; it was the attorney of Mr. Eckford's estate, Mr. Tillou, but said if it was not to take place in two or three years he would not object to it. He was informed by Mr. Smith that those openings would not take place before the expiration of two or three years. Witness intended to open all those streets to Forty-second street by one general opening and by one set of commissioners, and he asked Mr. Smith what would be the saving in expense by pursuing that course, and Mr. Smith then ordered Mr. Warner, his assistant, to show witness the expense of opening streets in detail, two or three blocks at a time, and witness found the expenses much greater than he had anticipated. Witness asked how it came that the commissioners' fees were so large, and he replied that their expenses could not be much reduced. He showed witness that the commissioners were allowed not to exceed $4 per day, and asked if that was too much; witness replied he did not think it was; that it was difficult to obtain surveyors, and they were allowed $3 per day, and asked witness if that was too much, and witness replied that he did not think it was; and $1.50 per day was allowed for chain bearers. Witness asked how the court charges were so high, and Mr. Smith replied the counsel represented that he had to attend at Albany, and sometimes further west, and the court charges were sometimes very high.

On examining the amount of court charges, the street committee could not feel themselves authorized to report authorizing Mr. Emmet to make application for opening those streets, but that it should all be done at one time by the common council, or by some person whom they should authorize for that purpose. The finishing clause to a report, "that the counsel be authorized to take the necessary measures to carry the same into effect," was omitted purposely and not inserted in order to save the expense. The bill of costs of the counsel for street openings and court charges had never at that time been presented, and witness knew of no way to get it, and Mr Smith told witness he could not get it and must content himself without it. The report of the committee was left with Mr. Smith, who examined and approved of it before it was submitted to the board for action. It was afterwards presented to and adopted by the common council with one exception; the house of refuge was stricken out by the board of aldermen; it was again inserted and finally concurred in by the aldermen.

By examining maps, &c. the street committee made an estimate that the expense of opening all those streets to Forty-second st., would be five thousand dollars; that a ward map and a grade map had already been made which might be used in that improvement, would save the expense of surveying, and the great object of the committee was to save as much expense as possible to the owners of the lands to be assessed.

Mr. Henry Young called on witness and inquired why the expense of street openings was so great; it was before the report of witness, and the witness informed him of the

plan contemplated as above, and that the expense of street openings would thereafter be reduced very much.

Isaac Adriance has made a map for the Twelfth ward, which he engaged to make for one thousand dollars, and if there was any extra trouble about it, he told witness he contracted to make it for one thousand five hundred dollars; it is a full ward map, and was, after completion delivered to the assessors of the Twelfth ward to make out their assessment by; witness has examined the map, and seen his property on it.

With the exception of Forty-eighth street, witness does not know of any other street from Forty-second to Fifty-seventh street, which has been opened, for which assessments have been laid within the last six years. On recollection witness thinks Forty-sixth street, from Eighth to Ninth avenue has been opened within a fortnight past; Fifty-ninth street from Tenth avenue to North river, and no other to his knowledge. The Tenth avenue, from Seventy-first street to Kingsbridge is not opened at all. The Sixth avenue from Thirty-fourth street to One hundred and ninth street, is not opened. Manhattan square is in the same situation it was before the assessment was made, with the exception of the wood cut off it. The streets between Twenty-fifth and Forty-second streets are not opened, except two or three; Twenty-second street has recently been opened; Forty-second street is opened from Third avenue to Tenth avenue; Fortieth street is opened between Bloomingdale road and Eighth avenue, for one block, a little over 900 feet. Witness does not know how the commissioners of estimate and assessment were appointed; never heard how it was done; did not know they were appointed by the corporation; never heard of a book in the street commissioner's office in which the names of those commissioners were entered; did not before know of the existence of any such book.

The witness produces a bill for an assessment for regulating and setting curb and gutter in Eighth avenue, from Twenty-fourth to Forty-second street, on property of witness being about fifty feet front, amounting to $254 $\frac{44}{100}$, assessment, confirmed December 28, 1838, which bill he paid. The Eighth avenue previous to this regulation, was a good turnpike road from Twenty-second to Forty-second street. Between Twenty-seventh and Thirtieth street, at Strawberry-hill, the sidewalk was cut down in some places eight or ten feet, and in others two or three feet; about Twenty-eighth or Thirtieth street, the road was lowered about three feet; witness cannot be particular as to distances, he speaks merely as a traveller passing over it. There was rock and sand on the sidewalk at Strawberry-hill on the westerly side, about Twenty-seventh, Twenty-eighth and Twenty-ninth streets; the rock was blown out and taken away and sold, either as building stone or the scraps to fill in docks; the sand is the only building sand in that section of the city; it is carted as high as Fiftieth street; witness has paid one shilling a load for 400 or 500 loads of it. BENJ. TOWNSEND.

Adjourned to Nov. 3, 1841, at 7 o'clk, P. M.

November 3, 1841.

The committee met pursuant to adjournment.

Present—Mr. FURMAN,
Mr. VERPLANCK,
Mr. SCOTT.

Benjamin Townsend this day produced a letter from John E. Lovett to him, of which the following is a copy:

"*Albany, October 24th*, 1840.

"BENJAMIN TOWNSEND, Esq.

"*Dear Sir*—In compliance with your request, I have again and again gone over the books in the office of the clerk of the Supreme court in this city, in search of the rules in the cases by you specified. The clerk has in many of the cases rendered me the assistance in his power, but I find the examination to be thorough, would require a clerk at least a week to go over all the *papers*. I say the *papers*, for on inspection I find that the books do not give the facts required. I will give you an instance. I look on the printed sheet in the volume which you left me, and find 'Eighty-third street, from Third avenue to avenue A, confirmed 12th of June, 1837;' 'John Harris, Nichs. Schureman, J. Brown, commissioners.' I then examine the minutes of the court and find no such entry, then look at the volume of street reports, and find no such entry in the index. The original papers are then referred to, filed in the month of June, 1837, by the counsel for the corporation, and I find the return endorsed 'Opening avenue A from Seventy-ninth street to Eighty-sixth street,' and after that report is closed, and in the same sheet I find it entered thus: 'Also report in the case of Eighty-third street, from Third avenue to avenue A.' Commissioners as you have named them.

"This is given as an illustration of what I suppose to be the case as to the others.

"I called the attention of the clerk to this case, and he says he presumes the others will be found in the same way. But so long as the index is not the true test, I might search a week and then be no wiser than when I commenced. The clerk says he presumes that he has given certified copies of the rules confirming the reports of commissioners as stated in the printed pamphlet, though he has no means of deciding at the present time.

"I called his attention to the amount of court fees; he replies as did the deputy clerk in your presence.

"Motion is made in open court for confirmation, a rule is thereupon entered; the charges are six cents for filing each paper; entering rule eighteen cents for each folio, and eighteen cents for each folio of the certified copy of rule and copy of commissioners' report, he says that the report will often contain a thousand folios and sometimes more.

"He refers you to the copies on the files in New York, as to the length of the reports of commissioners.

"Thus I find I can get nothing at the office here, unless it be by going over all the reports filed since 1837, and now blended with the other papers in the office, for the index does not tell the whole story as is illustrated in this sheet. The clerk declines giving any certificate as to the expenses; says it will be impossible to be got at with any thing like exactness.

"Yours respectfully,
"JOHN E. LOVETT."

"*Benjamin Townsend cross-examined on the part of the corporation of New York, by street commissioner.*—Witness knew that Seventh avenue was ordered to be opened by the common council before the report of commissioners was confirmed, but did not know names of commissioners, and made no examination as to whether his property was assessed, because he was then and had been for some time previous sick and unable to attend to business.

Among the streets, witness inquired about in Supreme court and clerk's office in Albany, were the following, viz:

Eighty-fourth st., which was found right.

Second avenue from Eighty-sixth street to Eighty-ninth street.

One hundred and nineteenth street from Fourth avenue to Hudson river.

Eighty-third street from Third avenue to avenue A.

Avenue A from Seventy-sixth street to Eighty-sixth street.

One hundred and twentieth street from Fourth avenue to Hudson river.

Fifty-seventh street from East river to Hudson river.

Eighty-fourth street from Third avenue to Fifth avenue.

One hundred and twenty-fifth street from Manhattan street to Bloomingdale road.

Eighty-fifth street from Third to Fifth av.

One hundred and twenty-fourth street from old Church road to Hudson river.

Forty-ninth street from East to Hudson river.

Fifty-sixth street from East to Hudson river.

Second av. from One hundred and ninth to One hundred and Twenty-third street.

Forty-seventh street from East to Hudson river.

One hundred and twenty-second street from Third avenue to Hudson river.

Seventh avenue from Twenty-first street to One hundred and twenty-ninth street.

Fifth avenue from Forty-second street to about One hundred and twenty-ninth street.

John Harris was commissioner on all the openings of those streets and avenues, but the Fifth avenue. Witness was assessed for opening Mount Morris square $52, for 14 lots of land. Witness does not recollect whether any resolution was passed while he was a member of the common council, to apply to the Legislature to change the location of that square. The resolution for opening streets up to Forty-second street, did not contain the clause authorizing the counsel to make application for opening those streets, but the committee designed the same should be opened by one set of commissioners, in the same manner as the upper part of the city was laid out by Rutherford, Morris, &c. commissioners under the act of the Legislature. By the witness's statement, that he has known the

same property to be assessed two or three times for the same improvement, the witness does not wish to be understood as meaning to say that the same property has been assessed two or three times for the opening of the same part of a street or avenue; but that instances have occurred, where streets or avenues have been opened by two or three different proceedings, a part at a time in detail, and the same property has been assessed each time such partial opening in detail was made; but such assessments have not been made more than twice on the same property to the witness's knowledge. The intention of the street committee was to open all the streets to Forty-second street by one set of commissioners, with one court charge. There was no resolution submitted to the common council to carry out that plan of the street committee, stated in their said report, which report is as follows:

"The Street Committee to whom was referred the annexed resolution, which proposes to inquire into the expediency of opening all the streets and avenues (not already opened), up to and including Forty-second street, respectfully report: They have caused public notice to be given, of the pendency of the before mentioned Resolution, in the daily papers in order that the most extensive information should be given to all parties concerned, as in a contemplated movement of such magnitude was desirable to obtain a very general expression of public opinion.

"The only remonstrances which have been presented against opening these avenues and streets, are but from a very small number of proprietors or lessees, whose interest is either limited in amount or of very short duration, while on the contrary an almost universal opinion is loudly expressed in favor of its consummation.

"It is a well known fact that all the lands, comprised within the limits before mentioned, viz. up to Forty-second street, and indeed far beyond it, have for several years past been entirely laid out into town lots, bounded on the avenues and streets, and are at present held mostly in small parcels of a few lots, by a great variety of persons, many of whom are anxious to erect buildings, but are at present prevented from doing so, from their inability to obtain access to their property, without passing over the land of other persons, in consequence of the streets, on which their lots are bounded not being opened.

"This fact, in the opinion of the committee, has a very powerful bearing on this question, and is strongly indicative of the great expediency of an affirmative decision thereon.

"No position would appear to be better sustained by reasons of sound policy, than the constituted authorities of the city should provide, in reasonable and proper time, that every citizen be furnished with the means of access to and enjoyment of his property, and in no other way can this be effected, than by their taking this legal measure, authorized by the statutes of the State, for the opening of streets and public thoroughfares.

"The exceedingly rapid increase of our population, and the measures which have been taken to lay out and form public squares, have so much enhanced the value of lots, in their vicinity, as to render it desirable for persons of lesser means, to turn their attention to situations somewhat more removed from the denser parts of the city, where lots can be purchased at such moderate prices, as come within their means. And unless facilities by opening the streets are afforded, a very large proportion of those classes in society whose means of subsistence arise from their daily labor, will be compelled to locate themselves on the opposite shores of our rivers, instead of fixing their habitations in our immediate suburbs.

"There is, however, another very substantial reason, offered why the measures proposed, should embrace at one operation the whole extent contemplated, which is the great saving of expense which will thereby be produced. The amount involved, by proceeding in this business, with one general commission will probably not exceed one twentieth part of the cost, which must unavoidably be incurred if it be suffered to progress in detail by particular sections of individual streets; besides the much more reasonable assurance of equal justice being done to all parties, when the commissioners are placed in a situation, which will enable them to take a general and comprehensive view of the results to be produced, by opening the streets, in a large section of the city, and their relative bearing each upon the other, than in the method heretofore generally practised, of opening special pieces in detail.

"Instances are upon record of the same piece of property having been assessed a second and even a third time, for opening some portions of the street or avenue contiguous to it. Now, it is quite clear, that by substituting the general system of opening, as herein proposed, in lieu of the former practice, the expenses consequent thereon may be very much diminished, and this point is thought to be worthy of particular attention, as any mode of proceeding which will lessen the amount of assessment on the property interested, is believed to be entitled to a favorable consideration.

"The committee having fully discussed this matter, are decidedly in favor of the general proposition as contained in the resolution; yet they still think that existing circumstances render it proper to make some exceptions from its operation, and these relate to the establishment at Bellevue for the poor, the lands occupied by the managers of the House of Refuge for juvenile delinquents, and the square between the Fifth and Sixth avenues, and from Fortieth to Forty-second st., originally intended for a public cemetery, but now proposed to be occupied as a site for the distributing reservoir by the water commissioners.

"The reasons for the exceptions above mentioned are obvious, inasmuch as the opening of the avenues and streets through them will necessarily prevent the possibility of their being used for the purposes now designed.

"Besides these properties belonging entirely to the public, the streets and avenues passing through them can be opened at any time free of expense.

"In conclusion—the committee report to the board, that, in their judgment, it is expedient to open all the streets and avenues (not already opened) up to and including Forty-second street, with the exceptions above mentioned, and offer the following resolutions:

"*Resolved*, That all the streets and avenues, as laid down on the commissioner's map of the city, be opened up to and including Forty-second street, excepting

"1st. Such parts of the streets and avenues lying within the said limits as have already been opened, either by deeds of cession from the proprietors thereof, or by due course of law.

"2d. Such parts of the avenues and streets as are contained within the limits of the public establishment at Bellevue.

"3d. Such parts of Forty-first street as lie between the Fifth and Sixth avenues, it being understood this land will be required by the water commissioners for uses connected with the aqueduct.

"All which is submitted.

"BENJ. TOWNSEND,
"M. VAN SCHAICK,
"EDWARD CURTIS,
"*Committee on Streets.*"

There is a resolution contained in the said report, which is, "that all the streets and avenues as laid down on the commissioner's map of the city, be opened up to and including Forty-second street."

The idea was, that the corporation should make an inquiry into the court charges, and make one application to open all those streets and avenues, so as to save expenses; and that was the reason why the resolution did not indicate the course which the committee thus designed to pursue. They wished to give the corporation time to make the inquiries as to the amount of those court charges, which they could not obtain from Mr. Emmet, the counsel. The report does not contain any such recommendation or provision. The street commissioner was to make such inquiry, but no one was authorized or directed by that report to make such inquiry. After that report the witness or the committee made no such inquiry as to those court charges. Although the resolution contains no recommendation that those streets up to Forty-eighth be opened by one set of commissioners, but the report does contain such recommendation. (The minutes will show whether this report was adopted as well as the resolution.) The report of said street committee was drawn by the witness and revised by George B. Smith, street commissioner, but cannot say positively whether the report submitted was in the witness's hand-writing or that of Mr. Smith. There was a map of the Sixteenth ward in progress of being made at the time that report of the street committee, but he does not now recollect whether it was then ordered or not, but such map was then contemplated to be made, and was soon afterwards made. Nothing was said of such map in that report, and that the making of such map would reduce the expense of such street openings; and neither was a great deal of other information which the committee had obtained as to the saving of such expenses

inserted in that report, and the committee had their reasons for not making such statements in their report. The witness examined the map of Adriance of the Twelfth ward, so far as his (witness's) property was concerned, and found it all located upon it, and witness had previously given him such information for the purpose of being correctly assessed, as witness had been previously incorrectly assessed; and witness also gave Mr. Adriance other information as to the property and owners adjacent to that of witness. Witness pretty thoroughly examined that map, and considers it correctly a map of the Twelfth ward, showing the ownership of property, but witness believes there were some pieces of property of which Mr. Adriance could not obtain the owners' names. Witness was a member of the common council in April, 1836, and chairman of street committee in board of assistants. Witness does not recollect whether his committee made any report on change of grade in Chapel street, nor about the sewer being taken up and a new one laid down.

The cutting down at Strawberry hill, on *the Eighth avenue*, was about twelve feet, but has no particular knowledge. The avenue is one hundred feet wide, and was regulated its whole width and the curb and gutter stone set; has formed no opinion as to the amount of excavation in cubic yards done on that (Eighth) avenue. Understood that the Eighth avenue, as a country road, was graded and worked by the corporation, but never saw any profile of it, nor heard of any assessment. The witness did not, within his knowledge, report any set of grades for the streets up to and including Forty-second street; has no distinct recollection of it; he may have done so; he recollects Alderman Van Schaick introduced a resolution about a grade in that part of the city.

From witness's knowledge of and connection with the common council during the time he was a member, he believes the several members with whom he acted on committees and otherwise, performed their duties carefully and with a due regard to the interests of their constituents, to the best of their judgment. BENJ. TOWNSEND.

Direct examination resumed on the part of Memorialists.—Witness does not recollect when Mr. Emmet was removed as corporation counsel; thinks it was in 1837 or 1838. From half of 1837 to 1839, witness was sick and confined to his house most of all that time and unable to attend to business, and knows nothing about the business that took place during that period. There was a square laid down on the commissioner's map of 1807 in the vicinity of One hundred and tenth street and Sixth and Seventh avenues; witness has no distinct recollection of the change of that square for that of Mount Morris, but a conversation he had with Mr. Ingraham, who said the first square was level and valuable, and Mount Morris was rough and less valuable, and being high ground an observatory might be erected on it from which the corporation might derive some income; and that to change the location it would be necessary to apply to the legislature. The commissioners allowed about $23,000 for that of Mount Morris square, with $3,338 costs of commissioners, &c.

It is the common practice for the street committee to append to their resolution for opening streets a direction "that the counsel take the necessary legal measures for carrying the same into effect," and that every report made by the witness, as the chairman of that committee, contains that direction, except the above report for opening the said streets to and including Forty-second street. The intention of the committee was, that Mr. Emmet, the counsel, should not make application for the appointment of commissioners for opening those streets without further orders. The committee estimated that it would cost one twentieth part of the expense to open those streets by one set of commissioners as proposed by that committee. The witness had no knowledge that during his connection with the common council, any member of the common council had any interest in any contract under the common council, and had not the least suspicion of any such thing during the time the witness was in the common council. BENJ. TOWNSEND.

Cross-examination on the part of the corporation resumed.—Witness was a member of the common council when John Ewen was appointed street commissioner; never heard of Mr. Ewen making any application for that situation. Judge Ingraham recommended him to witness, then chairman of the street committee, as the most competent person he knew of for that situation; some of the democratic members, then forming the majority, objected to Mr. Ewen's appointment as being a whig, but that objection was waived in consideration of the importance of the situation. The Eighth ward from Twenty-fourth to Forty-eighth street is now one continued village, built up since the regulation of that avenue. BENJ. TOWNSEND.

Adjourned to November 4th, instant at 7, P. M.

—

The following is from the testimony of Jno. Keyes Paige, Esq. Clerk of the Supreme court at Albany.—[See Senate Document, pages 85 and 86.]

John Keyes Paige being called and duly sworn on the part of the Memorialists, says, he is clerk of the Supreme court in the city of Albany. Witness produced the report and additional report of the commissioners of estimate and assessment in the matter of opening Sixth avenue in the city of New York, which was filed in his office June 6, 1839, and appears by endorsement to have been confirmed on that day. It appears by affidavits annexed to said report, that notice of presenting said report for confirmation was published daily in the New York Evening Star and Evening Post, respectively, commencing on the 18th day of May, and continuing to the 3d day of June, 1839 inclusive, Sundays excepted; and in the New York Times and Commercial Intelligencer daily, from the 20th day of May to the 3d day of June, 1839 inclusive, Sundays excepted. There does not appear to be any evidence that said notice of presenting such report for confirmation was published in handbills, annexed to said report, or additional report. Witness never knew any bill of items of the expenses in opening streets, avenues, or public squares in the city of New York, presented to the Supreme court for taxation when the reports of the commissioners of estimate and assessment were presented to that court for confirmation, though it is possible when such confirmation was opposed, such bills of items may have been presented to the court with the report and other papers, and the judge may have passed upon them; but the witness never saw any such bills, and none have fallen under his observation in his office. There is an endorsement on this report to the following effect: "Deposited in county clerk's office 18th May, 1839."

There is a charge upon each opening street, avenue or square, for the extended rule, including the whole report of the commissioners of estimate and assessment, with a certified copy thereof, which extended rules have not yet been entered in many cases, and in making witness's return to the Comptroller he would not include the fees for the prospective services in making out such extended rule and the certified copy thereof.

Witness produced the reports of the commissioners of estimate and assessment in the opening of the Seventh avenue from Twenty-first to One Hundred and Twenty-ninth st., which is on file in his office, filed and confirmed February 9, 1839. There does not seem to be any endorsement upon it of having been filed in the county clerk's office in New York. Witness never knew a case of opening a street or avenue where the proof of publication did not accompany the presentation of the report; such proof is not attached to this report; but witness has no doubt it is upon some other paper in his office. There is no abstract or summary accompanying said reports so far as the witness has examined the same. The report of estimate and assessment in the Seventh avenue contains, as numbered, eleven hundred and ninety-six pages. Sixth avenue about nine hundred pages.

JOHN KEYES PAIGE.

—

(From Senate Doc. 100, *pages* 147 *to* 148.)

Thomas R. Ludlam having been recalled on the part of the corporation, and his direct examination resumed, says: In making out assessment lists for grading and paving streets, he has been in the habit of calling on the street commissioner, as one of the assessors, for instructions how to make the same. Witness recollects receiving a printed circular from the street commissioner as to the law of 1840, relative to assessments and putting down street numbers, or maps for opening and improving streets. Witness made out the assessment lists for regulating and paving John, Cliff and Gold streets, in 1840, and he put down the street numbers on those lists.

THOS. R. LUDLAM.

Cross-examined on the part of the Memorialists.—Witness received the pay for making the maps for opening Seventh avenue from Twenty-first to One hundred and twenty-ninth street, by warrant given him by Jacob S. Warner, assistant street commissioner.

Witness did not render to the street commissioner a bill for his services on that avenue, but did to the commissioners on that avenue, and they gave the amount of witness's bill to the street commissioner. Mr. Harris was chairman of those commissioners. Witness did not render to the commissioners a bill of items of his charge; they were perfectly satisfied with the charge without the items. Witness gave them five distinct bills, one for each section, as the same were completed. Witness's charge was made by the day, which was four dollars for six hours, including the assistant at the same price.

THOS. R. LUDLAM.

(From Senate Doc. No. 100, pages 42 to 46.)

John Ewen being duly called and sworn, on the part of the Memorialists, says—that the witness is the street commissioner of the city of New York, and has held that office since the 4th day of May, 1836. The witness produces the map of the commissioners in the matter of opening the Second avenue from Twenty-ninth to Eighty-sixth streets. That the following named petitioners, have the following number of feet of land fronting upon the said avenue, between said Twenty-eighth and Eighty-sixth streets, as stated in the annexed statement headed, "Petitioners for opening Second avenue from Twenty-ninth to Eighty-sixth street," and signed by the witness. The whole number of feet, front on each side of said Second avenue, from Twenty-ninth to Eighty-sixth streets, is about fourteen thousand, nine hundred feet.

Petitioners for opening Second avenue from, Twenty-ninth to Eighty-sixth street.

Richard Riker, 198 ft. 11 in. front on east side Second avenue; do. 199 feet 1 in. west side do.—Total, 398 ft.

W. B. Lawrence, 1,106 ft. 9 in. front on east side Second avenue; do. 935 ft. 10 in. do. west side Second avenue.—Total, 2,042 ft. 7 in.

W. B. & I. Lawrence, 177 ft. 5 in. front on east side Second avenue; do. 337 ft. 10 in. do. west side do.—Total, 515 ft. 3 in.

R. Riker and Isaac Lawrence executors of John Lawrence, 173 ft. 11 in. on 75th st. embraced in the assessments of opening Second avenue.

I. Green Pearson and W. B. Lawrence, 352 ft. 6 in. front on east side Second avenue; do. 342 ft. 10 in. do. west side do.—Total, 695 ft. 4 in.

H. W. Warner, 391 ft. 3 in. front on west side Second avenue.

Henry J. Anderson, 240 ft. front on Thirty-sixth street, embraced within the assessment of opening Second avenue.

Total number of feet, front on Second avenue, exclusive of the streets, 4,042 feet 5 in.

JOHN EWEN,
Street Commissioner.

Opening Second avenue from Twenty-ninth to Eighty-sixth street.

October 31, 1839.

Received from the street commissioner, bond A 27, for seven hundred and sixty dollars, being the amount of fees to Henry P. Robertson, in the matter of opening the Second avenue from Twenty-ninth to Eighty-sixth street.

$760.

(Signed,) FRAS. FICKETT,

December 20.

Received from the street commissioner warrant No. 3,605 for $33.55, and bonds A No. 41 and A No. 42, for $1000 each, making twenty hundred and thirty-three dollars and fifty-five cents, for attorney's fees and court charges in the above matter.

$2,033.55.

(Signed,) R. EMMETT.

December 20.

Received from the street commissioner warrant No. 3,608 for four dollars and seventy-two cents, and bond A No. 75, for seven hundred and fifty dollars, and bond A No. 76, for eleven hundred and fifty dollars, making nineteen hundred and four dollars and seventy-two cents; being in full for fees and expenses in the matter of opening the above.

$1,904.72.

(Signed,) JOHN LEONARD.
for self and A. MILLS.

December 20.

Received from the street commissioner bond A No. 77, for seventeen hundred dollars, in full for surveys and maps in the above matter.

$1,700.

Signed for EDWIN SMITH.
GARDNER A. SAGE.

The commissioners' fees, counsel fees, and other expenses on said avenue, were principally paid by Richard I. Smith, the assistant street commissioner, whose duty it is by an ordinance of the common council to apply for the warrants for these moneys, and to pay over all moneys on assessments. That ordinance is an old one of fifteen years standing. The witness paid some of the items in those during the absence of the assistant street commissioner; he paid the commissioner Robertson's fees to Mr. Fickett, who had an assignment of the same, and the expenses of the surveyor to Mr. Sage. The witness produced a copy of the original receipts for the expenses on Second avenue, on file in his, witness's, office, which are marked A, and signed G. F. The present counsel of the corporation was appointed two years last May. The notice which that counsel gave to witness's office, not to pay such bills unless taxed, was after the payment of the above bills. The bills which the witness so paid were not taxed to his knowledge. The abstract of the report signed by the commissioner, containing the aggregate amount of the expenses, awards and assessments, is the only voucher on which such payments were made; the claimants for such expenses were never in the habit of presenting any bills. Taxed bills for such proceedings have been paid in witness's office, but he cannot say that he has paid them, because it is not his duty to do so. The witness thinks such taxed bills in the case of Cherry street, Anthony street, William street and the Bloomingdale road. Witness is not certain as to Anthony or William street, or the Bloomingdale road. Such, however, is his impression. They were all cases in which the proceedings were discontinued and the report not confirmed. The witness has no knowledge of taxed bills in case where report was confirmed; his assistant has charge of that branch of the business; they might have been paid and the witness not know it. These expenses are paid upon the abstract of the commissioners' report; no bills of particulars are required further than is stated in that abstract. The witness does not know whether any bill for taxation in the matter of Seventh avenue was filed; it might be filed in his office without his knowing it; there are three or four rooms in his office.

The witness supposed that upon presenting the abstract of the report of the commissioner the expenses therein mentioned had been taxed by the Supreme court as required by law, and that the officers of the corporation had no power to withhold their payment. The first knowledge witness had such bills had not been taxed and the legal requirements complied with, he had from the present counsel of the corporation, (the witness does not recollect the time when he received such information, he recollects the circumstance,) since which the witness does not believe that any such charges have been paid without taxation. These charges are made upon the general authority of an ordinance passed some fifteen or twenty years since, and revised some three years. The ordinances were revised every three years until the passage of a law allowing them to remain in force until repealed.

The authority in question is to be found in the ordinance relating to the street commissioner and his duties. The practical routine in payment of such bills, is as follows: when such abstract is presented, it is usual for the assistant street commissioner to make a requisition upon the comptroller in writing for the amount, and in favor of the parties to whom the same is due; the requisitions are made or presented to the comptroller once in every fortnight, and the warrant is received in return from the comptroller, about one week after the requisition is made; it is made payable to the order of the party in whose favor it is drawn and is paid by the chamberlain of the city upon being presented. There is no other check upon such charges than above stated, no affidavit or auditing, the abstract of the report signed by two of the commissioners, is the only evidence that such amount is due. The warrants are drawn by the comptroller and countersigned by the mayor and the clerk of the common council, the requisition being exhibited to the mayor and clerk each time. There are no maps of the wards through which the Second avenue runs, in the office of the witness, they would be there if they existed; there was a map of part of the 16th ward, from 24th street to 40th street, but it was made after the survey of the Second avenue was made. The commissioner's map of 1807 exhibits all the streets and avenues of the city, and the boundary lines of particular properties as they existed at that time; under the law on which that map was made, a monument was placed at the inter-

section of each avenue and street. The map of the commissioners on the Second avenue, the witness thinks could not have been made from the map of 1807, because the map of 1807 is upon a small scale, and has upon it no distances and no figures, and has upon it no dimensions of the particular pieces of land. That map has the width of the streets and avenues and dimensions of the blocks, and is upon a scale of 100 feet to an inch; the elevations and depressions given by that map are not accurate, they have been tested and found inaccurate. It is only occasional that such elevations are given upon some avenue and at distances pretty wide apart; but that would have no bearing upon such map as that of the Second avenue, for such map exhibits no such elevations. The witness has been an engineer and surveyor for a considerable period, could not say what would be a fair compensation for making such a survey and map as that of Second avenue by a mere inspection of the map, because he does not know what time or labor was spent in producing it, and because he has been out of the profession for the last five years, a person now in the profession may give a better judgment. There has not been a map made for the corporation of the Twelfth ward; the witness has heard that Isaac Adriance is now engaged in making such map; and he has engaged to make it for about fifteen or sixteen hundred dollars. The witness understood such a map was directed to be made by the board of supervisors.

The witness has always understood that the counsel of the corporation draws up the reports of the commissioners on opening streets and avenues. There is no document in relation to the Second avenue but the abstract of the report in his office, a copy of the report does not come in until sometime afterwards, Mr. Emmett is to furnish a copy of the report, but has not yet done so. There are several copies of such reports on file in the witness's office. The abstract and the copy of it on the street commissioner's books, is the document by which the owner of real estate assessed for Second avenue, could find a description of his property assessed. The abstract refers to the map by the numbers of the lots. The map is kept in the street commissioner's office. There is no other document but such abstract until such copy of the report is furnished. The collectors use such map in collecting, to show owners that they are paying upon their own property. The collector's office is part of the street commissioner's office or department. Arbitrary numbers and not the street numbers are put upon those street maps, because the street numbers are more variable, but the street numbers are put on in very many cases as well as the map numbers; it is as usual to put them on as to leave them off; but there are no street numbers on the Second avenue. If there should be four assessments for opening or regulating streets, sewers, &c. would have different numbers. The same lot for each improvement would have a different, and they would all vary from the street number. If the street numbers are upon the map in the notices sent to the owners, the arbitrary or map numbers are used. The act of 1840 requires that the street numbers and the ward numbers should be placed upon the map as well as the arbitrary numbers; and that in all since the passage of that law that requisition has been complied with.

In publishing notices of sale for assessments for street openings since the act of 1840, the street numbers where they are known, are put on as well as the ward numbers, and all other numbers by which the lots are known. All the sales now advertised, are for improvements, before the law of 1840, with the exception of John street and intersecting street paving, in which case the street numbers are used in addition to the other numbers. When inquiries are made whether there be outstanding and unpaid assessments on lots in the upper part of the city it is answered by reference to an alphabetical list in a book arranged under the heads of streets, on which the property assessed is situated, and that book is called record of assessments; it states the street, the map, ward, street and farm numbers, the side of the street, between what streets, describes the property, states the assessment, and what it is for; when any payment is made upon any lots it is entered in that book, with the interest paid upon it, the total amount of assessment and interest, who paid it, and when paid, and that record will show upon reference whether there be any assessment and it is paid. There is not such book for each improvement. The lot is put down in that book, by map number, and since the law of 1840, by all the other numbers upon the map, there are columns for map numbers, ward numbers, and street numbers. Upon answering such inquiry they look first to book of lands sold for assessments, which is alphabetically arranged, and if sold, then look to book entitled "sales for assessment," which is also alphabetically arranged. If it be assessed for seven different improvements, or for seven assessments, they would examine under the street and between the streets upon which the improvement was made, and would then refer to the map. If all the assessments were upon Tenth street they would be found under the head of that street.

JOHN EWEN.

Adjourned to Sept. 25th, 1841, at 7 P. M.

We have thus given the testimony of the Commissioners, the Surveyors and the Letter of one of the Counsel of the Corporation, and also the testimony of the Clerk of the Supreme court at Albany; and to all these we have added the testimony of a distinguished citizen, Jonathan Thompson, Esq., together with that of Ex-assistant Alderman Townsend, formerly Chairman of the Street Committee of the board of Assistants, and also that of the Street Commissioner, including that of Mr. Perrine, a Clerk in the office of the street commissioner.

A careful reading of the above specified documents will be most convincing.

The Committee from the Senate, appointed to examine into these abuses, remark that—

"*It is difficult now to comprehend how the Expenses in Opening Streets and Avenues in that city could have been so very great as they are represented to have been, but of the fact of their being so very great there can be no doubt; it is established by the Receipts of the Commissioners for the same exhibited before the Committee.*"

It was asserted by Officers of the corporation that the Court Expenses and Clerks' Fees of the Supreme court were very high. In order to ascertain if such was the case we examined the official returns of the Clerk of the Supreme court at Albany, made to the State Comptroller in pursuance of a law of this State, and now on file in his office, and find by these returns that less than Ten Dollars was charged to the Counsel of the corporation of the city of New York in all the street proceedings by the Clerk of the Supreme court for a period of Two Years, commencing July 1, 1839, and ending June 30, 1841. During this period the reports of the commissioners of estimate and assessment were confirmed by the Supreme court for the opening of a GREAT number of streets, avenues and public squares, in which the court charges and counsel fees together are put down at a large sum of money.

How such proceedings should have found countenance with persons in AUTHORITY is a matter of surprise and astonishment!! but of the fact that *such* was the case our citizens have had AMPLE demonstration.

That the Commissioners should have allowed these extraordinary charges to Counsel is by no means surprising, for we find by their OWN AFFIDAVITS herein set forth that they allowed Members of their own Board large Sums of Money as a compensation for services never even pretended to have been *performed*, and assessed these large sums on the property of persons owning land near the lines of streets in which they were making an assessment for the expense of opening. The Counsel in his letter sets forth that he never made or rendered a bill of particulars in these matters, and that the law did not require it previous to April 20, 1839: and it appears from the testimony of John Ewen the Street Commissioner that no bills were filed in his office, *subsequent* even to that time, as required by the Act above referred to, although he says "it might have been done without his knowing it as he had *three or four rooms* in his office."

The following is the Provision of the section of the Act above referred to:

"§ 12. No cost or charges to the said commissioners, their attorney, counsel or others, shall be paid or allowed for any services performed under this act, or the act, hereby amended, unless the same shall be taxed by the said court, who are required to make rules to apply to the said bills of costs, the existing laws in relation to the taxation of costs, and the nature and proof of the services rendered and disbursements charged, as far as the same can be made applicable; and no unnecessary cost or charges shall be allowed. Public notice of the time and place of the taxation of costs shall be given, for the same time and in the same manner as notices are required to be given by the above ninth section; and a copy of the bill of costs, containing items and particular services performed, shall be depos-

ited in the office of the street commissioner at the time of the first publication of such notice."

Now it appears to us that this provision of the Law is clear enough to illustrate the excuse of the "three or four rooms," and that the explanation in regard to it does not help those who make it.

It appears by Mr. Perrine's testimony that the amount paid Corporation Counsel in 1839 was **$37,470.88,** to which is to be added the Counsel Fees in Thirty-fourth street, Anthony, John and William street—in all four, **$8876.30:** these four last sums were not paid within the year ☞ for the reason that the City Treasury had not funds to meet these Claims, but the amounts belong to *that year's account* and swell the aggregate to the enormous SUM of **$46,347.18:** ☜ and this is not all—much besides, is omitted. It will be seen by a comparison of this amount with the Salaries of the State officers that it exceeds the *united* salaries of the Governor, Secretary of State, Comptroller, Treasurer, Attorney General, Commissary General, Surveyor General, Chancellor, Vice Chancellor, Assistant Vice Chancellor, Chief Justice and Associate Judges of the Supreme court, eight Circuit Judges, the Mayor of the city of New York and the Recorder of the said city, added thereto!!!

The Commissioners' and Surveyors' Fees are stated in the Comptroller's report, including John street and Thirty-fourth street, at the enormous sum of **$70,633.21:** and this is not all—much besides is omitted. This sum it will be seen by estimate exceeds the sum total of the per diem Pay of One hundred and sixty-one Members of the Senate and Assembly composing the Legislature of the State of New York for an *entire* session of the longest of any one term held the last twenty years.

The aggregate amount of Counsel Fees, Surveyors' Fees and Commissioners' Fees payable that year for services of very little worth exceeded in amount the annual salary of the President of the United States, together with the salaries of all the Heads of Departments at Washington, with the whole and entire EXPENSE of the Government of the State of New Jersey for a WHOLE year, in addition thereto!!

The Surveyor's Fees in the Seventh avenue proceeding is stated at $2801.00. Mr. Ludlum, the surveyor in that proceeding, states in his examination before the Committee of the Senate that his charge for himself and assistant was $4 per day. This then is pay at that rate for 700¼ days, equal to two years, two months and fourteen days, and one fourth of a day.

The Surveyor's Fees in the Sixth avenue are stated in Document No. 71, published by authority of the Board of Assistant Aldermen in 1840 at $2480: this at $4 per day is pay for six hundred and twenty days or one year, eleven months and twenty-four days. Daniel Ewen, Esq. we are informed was the surveyor in this case.

The surveyors in the Second avenue are stated at $1700, which at $4 per day is pay for 425 days or one year, three months and twenty-two days. Gardner A. Sage, Esq., surveyor.

The Seventh avenue consisted of 108 blocks of 270 feet each; the Sixth avenue of about 96 blocks of same size; and the Second avenue of 58 blocks of like dimensions. All three of these avenues were laid out through farming land.

As to the compensation paid surveyors, the Street Commissioner who is himself a city surveyor, in his testimony herein before stated, says—

"The witness has been an engineer and surveyor for a considerable period; could not say what would be a fair compensation for making such a survey and map as that of Second avenue by a mere inspection of the map, because he does not know what time or labor was spent in producing it, and because he has been out of the profession for the last five years: a person now in the profession may give a better judgment."—[Senate Doc. 100, page 45.]

Mr. Leonard, in his testimony (Sen. Doc. 106, page 38) says—"he arrived at the amount of the surveyor's fees by the surveyor's bill, which was generally handed to the commissioners and carried back when it was done. The bill was generally an aggregate amount. The commissioners know the extent of the work, but they were no judges of the value of the services. They received the Surveyor's bill from the corporation Counsel, and when they did not receive it that way they generally asked the corporation Counsel if it was not correct. This surveyor's bill was not audited or certified by any officer to witness's knowledge. The commissioners did not select the surveyor. The first thing put in the commissioners' hands, after being qualified, was the Map of the proposed improvement."

Mr. Ludlum, in his testimony (Senate Doc. 100, page 148), says: "Witness did not render to the Commissioners a Bill of Items of his charge; they were perfectly satisfied with the charge without the items. Witness's charge was made by the day, which was four dollars for six hours, including the Assistant at the same price."

This witness's testimony relates, in this particular portion of it, to the Seventh avenue proceeding. This last named witness also says—"Witness received pay for making maps for opening Seventh avenue from 21st to 129th st. by Warrant given him by Jacob S. Warner, Assistant Street Commissioner."

In the testimony of John Ewen, Street Commissioner, on page 44 of Senate Doc. 100, he says "the Abstract of the report, signed by the Commissioner, containing the *aggregate* amount of the Expenses, awards and assessments, is the ONLY voucher on which such payments were made: the claimants for such expenses were never in the habit of presenting any bill." Again, he says "the witness supposed that, upon presenting the abstract of the report of the commissioners, the expenses therein mentioned had been taxed by the Supreme court as required by law, and that the officers of the corporation had no power to withhold their payment."

The Counsel Fees in the following stated proceedings are an illustration of the extraordinary Expenses which have been assessed upon individuals:

Seventh avenue,	$3976.77
Sixth avenue,	3580.77
Tenth avenue,	2100.00
Second avenue,	2033.55
Chapel street,	3443.00
Centre street,	2970.34
Art street,	1896.75
Thirty-fourth street,	1080.88
Fifty-third street,	1055.57
Manhatten square,	1449.13
	$23,586.76

The Commissioners' Fees in these Ten Proceedings amount to **$21,899.00.**

The Surveyors' Fees in the same Proceedings (above) amount to **$16,845.29.**

The Room-hire of the Commissioners in the Seventh avenue is put down at $410.00.

The Clerk-hire in the same proceeding is put down at $250.00.

In the Sixth avenue, the room-hire, clerk-hire, &c. is put down at $411.00; in the Tenth avenue at **$600,00;** in the Second avenue at $324.72.

The number of different proceedings in which have been paid Counsel, Commissioners and Surveyors, as appears by Document No. 71 of the Board of Assistants, since February, 1835, are stated at 116, to which are to be added several not included in that report which will swell the aggregate to near **130** different, distinct and separate Assessments, in which these enormous charges have been made, and PAID by the corporation officers WITHOUT Bill of Items, Taxation, Auditing, Approval, or any Check or *Investigation* whatever!!! with the exception of some half dozen proceedings which were discontinued; and well may the Honorable the Select Committee of the Senate say that "*the surprise should be* NOT *that the inhabitants* NOW *complain of it, but that they had not done so at a* MUCH EARLIER PERIOD!"

The *reason* the Citizens did not sooner complain will appear obvious to the reader on examining the testimony of Mr. Paige, Clerk of the Supreme court at Albany, where these proceedings were confirmed: he says these Expenses were *not* before the court. Mr. Robinson, a Commissioner in the Seventh avenue Proceedings, states in his testimony that the Expenses were *not stated* in the Report filed in the office of the Clerk of the city of New York for Inspection; that the Owners had no other means of knowing what the Expenses were, unless by adding up the amount of awards and also the amount of assessments in the report (which, we say, would probably be a day's work) and deducting the one from the other. Mr. Ewen the Street Commissioner says that the Expenses were paid on a mere Abstract, signed by the Commissioners, and set forth in an aggregate sum; that no Bills of Items were rendered—and these were paid at once, after the Report was confirmed. The Counsel of the Corporation in his Letter, which we have stated, admits that he never made a Bill of Items in the Seventh avenue case, nor in other assessments; that the commissioners &c. were Officers of the Court; that the common coun-

oil had nothing to do in these matters but to pay the Claims: and in the same letter he says that the parties should have objected to these Charges when the proceedings were before the Commissioners, or before the Court at the time of confirmation. His last excuse is in a bad shape. In the matter of 29th and 30th streets objections were made before the Commissioners, from what the parties interested learnt indirectly from one of the commissioners, that expenses were included in the assessment which had never been incurred and also before the court; but the Objections were entirely disregard by the Commissioners, and the Court which confirmed the assessment took little notice of them, although the Objections were strenuously urged.

Much of the Island of New York has been absolutely confiscated by these proceedings if they shall be adjudged legal. Thousands have been injured and hundreds have been ruined by these extraordinary measures; widows and their HELPLESS CHILDREN have been reduced to beggary; venerable citizens, whose heads have been *whitened by the frosts of more than three-score winters*, have in the evening of life been driven from their possession of competency and abundance, to the extremes of penury and of suffering. Alas! shall these things be—nay more—be tolerated—be countenanced and encouraged?—NO, NO!—there *is* VIRTUE in the people;—there *are* patriots in this land:—men who are BOLD to say, in the language of Mr. Jefferson, "SUCH IS NOT THE KIND OF GOVERNMENT WE FOUGHT FOR"!

The indignation of the public mind has kindled up—patience has been exercised until it has almost ceased to be a virtue, and now the time has arrived when Citizens feel that they are CALLED upon to take measures for the protection of Private Property, which lays at the foundation of the superstructure of Civil Liberty: for where there is no security to private property there is no liberty.

Justice has slumbered, and
It has slumbered long. Alas! alas!

There is not another civilized government on the earth where such Abuses could have been so long—so successfully—so extensively practised. The throne of the most powerful monarch in the old world would have been shaken to its foundation by such proceedings. No crowned head would have dared to have tolerated such Abuses if disposed so to do, or permitted, if so disposed.

In order to form a correct estimate of the price of the wages of labor of the Commissioners of Estimate and Assessment in the matter of the Pretended Opening of the Seventh avenue we will, as a convincing illustration, compare the total amount of COMPENSATION they received for their trifling services with the RESULTS of the labors of the Farmers of the State of Illinois where they are favored with the richest soil in the United States.

The Commissioners were three in number, and their aggregate wages are stated at Four Thousand Nine Hundred and Twenty Dollars, which is equal to the value of Forty-nine Thousand Two Hundred Bushels of Corn at the price the Illinois farmers are now selling it, which is ten cents per bushel delivered at their granaries.

The Share for each commissioner would be equal to Sixteen Thousand Four Hundred Bushels of Corn, which if they had the land furnished them rent free, and also were freed from all taxes during the time, it would require the labor of each commissioner, allowing each to cultivate ten acres and each acre to produce fifty bushels annually, near THIRTY-THREE YEARS' LABOR to earn by raising Corn the amount of wages demanded by them for making this SMALL Assessment.

The Surveyor's Fees in this proceeding of the Seventh avenue are stated at Two Thousand Eight Hundred and ONE Dollars, which is equal in amount to the value of Twenty-eight Thousand and Ten Bushels of Corn at the above estimate.

The Counsel Fees in the same proceeding are stated at Three Thousand Nine Hundred Seventy-six Dollars and Seventy-Seven Cents, which is equal to the value of Thirty-nine Thousand Seven Hundred and Sixty-seven and a half bushels of Corn at the above estimated price.

The Collector's Fees are stated at Eleven Hundred and Fifteen Dollars, which is equal in amount to the value of Eleven Thousand One Hundred and Fifty bushels of Corn at the above estimated price.

The Room-hire of the Commissioners is stated at Four Hundred and Ten Dollars; Clerk-hire at Two Hundred and Fifty Dollars. These are equal in amount to Six thousand Six hundred bushels of Corn.

The Carriage-hire is stated at Thirty Dollars, which is equal to the whole necessary expense of a person in traveling from the city of New York to the city of Louisville in Kentucky.

The aggregate amount of these Fees are $13,550.77, which, if it was all invested in Corn at ten cents per bushel, would purchase One Hundred and Thirty-five Thousand Five Hundred and Seven bushels and a half; and this quantity, to be sent to mill to be ground into meal, would require thirty-three thousand eight hundred and seventy-six horses, each carrying four bushels, and as many boys for riders, and would make a procession of one entire column reaching from the city of New York to the city of Philadelphia.

These fees, for this single street, if invested in congress land at the present price, would purchase one hundred and eight farms, of one hundred acres each, of the finest farming land.

The Counsel Fees in this one street exceed the per diem pay of a Senator for four whole years, allowing him to devote his whole time to the duties of his office as a Legislator and as a Member of the Court for the Correction of Errors—and this street is BUT ONE of more than ONE HUNDRED AND FIFTY.

The citizens who own property on the Seventh avenue are not benefited a brass farthing by all these expenses, and how such enormous sums should be paid out of the public treasury for such proceedings is not only a wonder, but a cause for alarm and distrust.

Citizens need not wonder that real estate is depressed and depreciated in value as well as in price, nor need they wonder that Taxes are consuming their substance and swallowing up their incomes: the secret is here ushered forth in FIGURES of the ***blackest face***.

We will make a further illustration. The land belonging to Assistant-alderman Townsend upon this pretended avenue extends from a line drawn through the centre of the avenue and running back therefrom 250 feet, and along the line of the avenue and parallel with it about 260 feet (see his testimony). Of course he furnished all the land required in front of his property for the half of the avenue, not only for himself but for those owners two hundred feet in the rear; he therefore was entitled to such sum as an award for damages as was proper to be assessed on the land in the rear of his for benefit, deducting therefrom the expenses of estimate; but instead of this award, he was assessed for benefit $213.00. The person who owned a less quantity of land opposite to him, and furnished less in proportion for the avenue, was awarded $293.00: the land was of the same quality as that of Mr. Townsend; and those owning land each side of him were awarded, one $205.00, the other $274.00: neither of them furnishing so much land as himself.

The estate of John Schuyler owned a small piece of land on the corner of 28th street and the 7th avenue as laid out by the Commissioners appointed in 1807 to lay out the island into streets and avenues: this piece of land is 58 feet 10 inches by 98 feet 10 inches, and was assessed for the pretended opening of the 7th avenue $209.93 for benefit. The same piece of land has been assessed for the pretended opening of 28th street the sum of $1037.05, which both together make the sum of $1347.03, which is double the entire value of the land claimed to be benefited.

The Seventh avenue was laid out and surveyed, and a large map made of it and all the streets that intersected it from 1807 to 1811, and a new survey was not necessary. Most of the land which is laid out over is farming land, and the same person owned not only the land required for the avenue, but the land on each side to the centre line running between the parallel avenue so that there was neither assessment or award to be made, as their interests were balanced, but notwithstanding, a new survey must be charged for and an immense amount of Fees imposed for *pretended* services worth less than nothing.

It may be truly said to be a mystery how these Abuses have been so long and so extensively carried on: time will develope.

Citizens who have PAID these ASSESSMENTS have RE-PURCHASED their Land at its *full value:* those who have NOT paid, attempts are made and encouraged to DIVEST of their Estates.

The finger of Scorn is pointed at such proceedings, and History will record them to tell to after-generations yet unborn.

Some persons have been disposed to put these Abuses to the account of land speculators, but the investigations made by the Hon. the Select Committee from the Senate have

[*We will continue these remarks in our next number.*]

N. Y. MUNICIPAL GAZETTE...Extra.

Published by the ANTI-ASSESSMENT COMMITTEE, and distributed gratuitously.----Edited by H. Meriam.

VOL. 1. NEW YORK, NOVEMBER 30, 1842. No. —

[Concluded from the preceding Number, page 224.]

put this excuse to flight: the Speculators in FEES are the cause. Most of these obnoxious proceedings have been consummated long, long after the speculation in real estate had terminated and ended.

Out of one hundred and fifty different proceedings there are but a very few that were petitioned for by owners, and the greater part were without a solitary petition, or any thing in the shape of a petition.

These things must all come to light: INVESTIGATIONS WILL BE CONTINUED UNTIL THE WHOLE IS DEVELOPED THAT SECURITY MAY BE PROVIDED AGAINST THE REPETITION OF THESE ABUSES IN FUTURE.

The making of an Estimate and Assessment of the Expense of OPENING a Street, avenue or public place, is a work of *very* little labor; and we believe that there are few of any of the streets, avenues or public squares on that part of the island, which were laid out by Commissioners in 1807, in which the whole business of making the Estimate and Assessment could not be done in ONE WEEK, and the same may be said of the necessary Surveys.

It appears by the Documents of the Hon. the Select Committee from the Senate, appointed to investigate Assessment Abuses in the city of New York, that John Harris was a commissioner and assessor on 21 streets &c. *(see Senate Document No. 100, page 66)*; that M. D. L. Gaines was also a commissioner on several streets as follows:

"The volume of documents shown witness is volume 16 of the Journal and Documents of the Board of Assistants of the city of New York, from May, 1840, to Nov. 9, 1840. On page 299, document No. 71, is a statement of the amount paid council, commissioners and appraisers, also room and clerk hire, &c. Witness has looked through the statement, and the name of M. D. L. Gaines appears upon the following streets as commissioner: upon Fifty-seventh street, from East to Hudson river; Fifty-ninth street, from Tenth avenue to Hudson river; Forty-fifth street, from Hudson to East river; Fifty-sixth st., from East to Hudson river; Fifty-fourth st., from Tenth avenue to East river; Thirty-third street, from Eleventh avenue to East river; Thirty-fourth street, from Eleventh avenue to East river.

"Fifty-seventh street was ordered to be opened by common council, March 16th, 1837, and confirmed by Supreme court June 7th, 1837, as appears by said document. Fifty-ninth street was ordered to be opened July 7, 1837, and confirmed September 5, 1837. Forty-fifth street was ordered to be opened March 16, 1837, and confirmed September 5, 1837. Forty-eighth street ordered to be opened March 16, 1837, and confirmed December 6, 1837. Fifty-sixth street ordered to be opened March 16, 1837, and confirmed December 6, 1837. Thirty-third street ordered to be opened February 19, 1836, and confirmed June 13, 1838. Thirty-fourth st. ordered to be opened February 19, 1836, and confirmed June 13, 1838.

"Witness examines Doc. No. 45; and from that it appears that the commissioner's fees in opening Fifty-seventh street was $732, and room hire and contingent expenses $121. Forty-eighth street, the commissioner's fees was $885, and room hire and contingent expenses $908. Fifty-sixth street, commissioner's fees $762, and room hire and contingent expenses $82.50. The number of days on that street between the time it was ordered to be opened by the common council and the time it was confirmed by the Supreme court, was eight months and twenty days. The commissioner's fees on Fifty-seventh, Forty-eighth and Fifty-sixth streets amount to $2,382, being $794 to each commissioner. On Fifty-ninth street the commissioner's fees are $144, and room hire and contingent expenses $10. On Thirty-second street the commissioner's fees are $912, and room hire and contingent expenses $88. On Thirty-fourth street the commissioner's fees are $1,320, and room hire and contingent expenses $156; (see Doc. 71 of Board of Assistants, p. 310, of 1840.) On Fifty-fourth street the commissioner's fees are $930, and room hire and contingent expenses $109. M. D. L. Gaines was a clerk in the street commissioner's office during the above dates, and received a salary. His salary was $1000 per annum."

MEMORIAL.

The following is a Copy of a Memorial which was presented in the Senate of this State in April 1840, and which gave rise to the Act of May 14th, 1840.

To the Honorable the Senate and Assembly of the State of New York:

Your Memorialists, citizens of the city of New York, most respectfully beg leave to represent to your Honorable Body the manifold evils and grievances which the inhabitants of this city experience in consequence of the great and arbitrary power now and heretofore exercised by the Corporation of the city of New York, its officers and servants, in imposing unnecessary, heavy and grievious burdens upon the people in the assessing of real estate, houses and lands for ruinous, unnecessary and uncalled and unasked for improvement.

Your Memorialists represent that the ancient charter of the city of New York did not vest the Corporation with any power to assess the citizens of the city for what are now miscalled improvements. The first power given the corporation in this matter was by an Act of the Legislature of 1807, and subsequently other Acts were passed. These Acts were not asked for by the People, but were granted on the application of the officers of the Corporation.

Your Memorialists herewith present public documents published by authority of the Common Council, showing the great extent to which this power has been exercised which fully sustain the charge that the powers granted have been wickedly abused.

Your Memorialists further represent that one of the officers of the Corporation has now advertised for sale at public auction near seven thousand lots for the non-payment of assessments, that many of these lots belong to widows and orphans, and in many instances to persons who are absent from the city, and in other cases to persons who have been unfortunate in business, to unsettled estates, and to others who cannot at this time, owing to the prostration of trade, pay the assessments.

Your Memorialists herewith present the list of property advertised for sale by the officers of the corporation by which it will be seen that 1145 of the lots are assessed sums less than five dollars each, 49 sums less than one dollar each, and in very many instances farming lands held in one tract and belonging to one and the same owner, have been by the assessor or commissioner sub-divided into lots of 25 feet by 100 and assessed separately small sums, by which the expenses have been enormously increased.

Your Memorialists also state that it is the practise of the Officers of the Corporation to exact exorbitant Fees and charges upon lots sold for the non-payment of assessments, viz: —Two Dollars each for advertising and Ten Dollars each lot for selling, and 40 per cent. interest on this cost, which makes Four Dollars and Eighty cents additional, and in all $16.80 on each lot, and thus on 49 lots the aggregate assessments of which amount to $39.$\frac{99}{100}$ the costs will be $823, and on 1145 lots the assessments which are less than five dollars each, the costs will be $18,410, and on 7000 lots the costs of advertising, selling and extra interest exclusive of the increased interest on the sum assessed will be $117,600, and these costs go into the pockets of officers who are paid very large salaries besides.

Your Memorialists further represent that it is the practice of Commissioners and Assessors to describe property by an arbitrary map number instead of the known street number by which the owners of property are misled in knowing that assessments have been imposed; this will be seen by the documents herewith. It very often happens that property is assessed as that of unknown owners, and many times in a wrong name; and in consequence of this practice property is often sold, and the first information the owner has of the assessment is obtained from the purchaser of the property at a sale for unpaid assessments, when he comes to take possession. By the Act of 1816, Commissioners

were authorized to extend their assessments for improving streets, &c. as far as they judge the property benefited, but no provision was made by that Act to give a notice to the distant owners of the property thus affected, by which means such owners are deprived of the opportunity of making objections to the assessments in sufficient time to be available. Another serious objection to the present system in making assessments for public improvements is to the extravagant charges made by commissioners, assessors, surveyors and corporation counsel: it will be seen by the public documents herewith, that for one street less than three thousand feet in length, this class of charges amounted to near $12-000. When property is sold at public auction for unpaid assessments, the corporation sell the property for a term of years, which in many cases is equivalent to selling the fee simple absolute. Very many of the lots so sold are purchased by Corporation Officers, who from being employed by the corporation to make surveys, collect the assessments, &c. &c., acquire information of the absence &c. of owners, and by that means possess themselves of the estate.

Your Memorialists could go further into detail of the mischiefs against which they seek to be relieved, but they deem it unnecessary.

Your Memorialists therefore, in consideration of the premises, respectfully ask your Honorable Body to pass a law to remedy the evils complained of, and also, to suspend the sales of property for unpaid assessments until the termination of the next session of the Legislature, and to make such further and other enactments in relation thereto as the Legislature in their wisdom shall deem needful and right.

And your Memorialists in duty bound, &c. &c.

The above Memorial is signed by Caleb S. Woodhull, Calvin Ballis, Thomas Lawrence, J. P. Phœnix, Abel T. Anderson, B. Deming, Robert Smith and David Graham, jun., then Members of the Common Council; also by David Banks, John Morss, Joseph Tucker, John R. Peters, Peter Sharpe, Robert Bogardus, Joseph Hoxie, Jacob Acker, R. R. Ward, John De Lamater, Gideon Tucker, Benjamin Townsend, John Shepherd, jun. and Morris Franklin, formerly Members of the Common Council; and also by Dow D. Williamson, formerly and now City Comptroller; by John Newhouse, formerly Clerk of the Board of Assistants; by Edwin Smith and Edward Doughty, City Surveyors; by William Paxon Hallet, John Harris, Forsyth Labagh and H. P. Robertson, Commissioners on Streets; by Chief Justice Jones, Judge Tallmadge, Judge Ingles; David B. Ogden, Surrogate of the county of New York; by David Hale, M. Y. Beach, W. L. Stone, M. M. Noah, Editors of daily papers published in New York; by Peter Lorillard, John M. Bradhurst, John Anthon, Gerardus Clark, Isaac Young and several hundred other HIGHLY respectable Citizens of the city of New York, *without* distinction of party.

The Abuses which were complained of, were notorious.

WILLIAM M. HOLLAND.

Alas! how frail is human life, how uncertain its duration, and oft times how unexpected its termination! The much beloved individual whose name heads this obituary notice has departed from among us. In the meridian of his life, the days of his earthly pilgrimage have ended—his labors, his toils and his sorrows in this troubled scene, have ceased—he has entered into rest.———

The event is solemn and instructive—the separation of the immortal spirit from the tenement of earth, its temporary abode, is a change of mighty moment.

When we commenced this volume Mr. Holland was in the enjoyment of health, and looked forward to the enjoyment of years yet to come with the same confidence that we all anticipate the coming years;—but ere these few brief numbers are completed—he has finished his course and departed.

Our opportunities of knowing Mr. Holland gave us a very high opinion of his WORTH—of his TALENTS. He was the biographer of the distinguished individual who filled the highest office in the gift of this Republic after the termination of the presidency of General JACKSON. We refer to the Biography of President VAN BUREN which was written by Mr. HOLLAND.

Mr. HOLLAND was for some years one of the Professors of a College in Connecticut, and was some time law partner of Governor Ellsworth.

He was one of the counsel employed by the Anti-assessment Committee to appear before the Hon. Select Committee appointed from the Honorable the Senate of the State of New York, at the session of 1841, to investigate assessment abuses in the city of New York. At their sitting in the Lecture room of Clinton Hall, some brief heads of his argument were noted down by the Chairman of the Senate Committee, and are copied from the documents accompanying their report, into this volume.

Mr. HOLLAND also appeared as Counsel for several of our most influential citizens in the argument of assessment causes before their Honors Chancellor Walworth, Vice Chancellor McCoun and Assistant Vice Chancellor Hoffman; and also before Mr. Chief Justice Nelson and Mr. Justice Cowen; and subsequently before the three Justices of the Supreme court. A notice of his argument before the Assistant Vice Chancellor is to be found in this volume.

The arguments of Mr. HOLLAND before these high judicial officers were eloquent and able, were listened to with great attention by the Court as well as the auditors, and the conviction which they carried to the understandings of those to whom they were addressed, as well as to those who were spectators, will *hereafter* make an impression and produce an effect which will reverberate from mind to mind, until the public mind shall become awakened to a right view of the importance of the doctrines and principles he discussed: and although he whose lips gave utterance to the words which were then addressed to the ear, has gone down to repose in the warm bosom of mother Earth, there to await the joyous sound of the trump of the bright and glorious morning of the Resurrection, yet his voice has gone forth on the wings of the wind, making its imprint upon mind as well as upon matter, from both of which it shall again re-imprint until it will produce an effect on minds not yet embodied in mortal flesh and show forth in after generations!

In his death the bar has lost one of its highly valued members, the country a most excellent citizen; society one of its brightest ornaments, his surviving parents a most dutiful son, and his only sister a most kind and affectionate brother.

During the last winter Mr. HOLLAND was advised by his physician to visit the island of St. Croix for the benefit of his health which appeared to be failing: he did so, and remained there some time, but finding no benefit from a change of climate he returned to this city. His health rapidly gave way, and in a few short weeks the period arrived which witnessed the final separation of his celestial and immortal spirit from its tenement of clay, to continue until the glorious morning of the resurrection when the ashes of mortality shall be clothed with immortality!

ROBERT BOGARDUS.

Among the names of Memorialists to the Legislature in April, 1841, was that of General Bogardus, and he was the first individual out of a list of about 300 persons who signed these Memorials in March and April, 1841, whose decease we are called to announce. These signers are most of them citizens advanced in years, and it is somewhat remarkable that during the then succeeding twelve months, the death of GEN. BOGARDUS was the only one which occurred amongst this great number. GENERAL BOGARDUS was extensively known and much valued. At the Procession for the funeral obsequies of President HARRISON he officiated as Grand Marshal of the day: the weather was very inclement, and he was then in feeble health—was exposed for several hours to wet and cold, and survived but a few months after. GENERAL BOGARDUS had been a member of our city councils, was for more than forty years an active and highly respectable member of the bar, and a most excellent citizen. He died at the age of about 70. Since the death of

General Bogardus we have to record the death of two others of the Memorialists.

—

JOHN RATHBONE, JR.

For many years a very successful merchant of this city, and after his retirement from active business he was chosen a Director of several of our most extensive monied institutions. He died suddenly, after a short illness. Mr. RATHBONE was highly esteemed.

—

PETER SHARPE,

Another of the Memorialists, has also departed this life. Mr. SHARPE was formerly a member of our city council, and represented the city of New York in the Congress of the United States. He has been much in public life, and was highly respected and beloved.

* * * * * * * *

Thus one after another are called away—until at length none will remain.——What a subject for meditation—for contemplation!———Yes, ere the close of the present century, few—if any—whose names are recorded in this volume—will be numbered among the living.

The earth, on the surface of which they now move, will then have received their mortal remains into its bosom as a sacred deposit.

Sublime, indeed, it is to pass forward on the wings of thought and contemplation to the glorious morning of the Resurrection of the Dead!—to that bright, shining day when our globe shall become "a new Earth and a new Heaven"! How terrific, however, must be that day which must intervene—that day when our globe shall melt with fervent heat—a heat that shall kindle up a blaze that will illuminate a comet's path with the fire of a consuming world!—Yes—that day when our globe shall fly with the velocity of a comet's speed to the boundless and unbounded regions of space, until, moving onward, it shall meet with that repelling force which shall hurl it back, revolving and re-revolving until it shall have again acquired density, and again resumed its original orbit, a new earth—a new creation! Such a view as here expressed is not inconsistent with the prophetic language of the inspired penman whose declarations are recorded in the Sacred Scriptures, nor are they inconsistent with the order of Nature as developed in the spectacle displayed in the visible Heavens of the revolutions of consuming worlds, presenting to the naked eye of astonished beholders, a world on fire leaving in its path millions of leagues of light, resulting from the mighty blaze of the unquenchable fire of our terrestrial world!

The sublime spectacles which meet the eyes of mortals is less a wonder than that we frail mortals, who are candidates for immortality, should be indifferent and unmoved spectators of such scenes, and unconcerned in such momentous realities.

What a theme for the contemplative mind to dwell upon—is that mighty reality that the human race, whose place of temporary sojourn is the earth's surface, is bounded on the one side by the regions of perpetual frost, on the other, by those of internal fire. Upward, within a few short miles, is unchanging cold, and not far distant is that point where all fluids become solids—hence our highest mountains are covered with perpetual snow:—downward as we progress into the body of our earth, the heat increases, until (in all human probability) it reaches that point where the vast centre is an ocean or lake of liquid fire:—between these two extremes, is the dwelling place of mortals—the temporary home of our race:—beneath this surface is the grave also—the temporary resting place of the ashes of mortality. We say temporary, for such they will be when compared with unending the day that will succeed the morning of the Resurrection.

Shall mortal man calmly sit down to calculate the time when the last Trump shall sound?—shall he forget the declaration uttered by the GLORIOUS MAJESTY OF HEAVEN, THE PRINCE OF THE CELESTIAL WORLD?—those words which although spoken near two thousand years ago, are yet extant. "*That hour no man knoweth,*" said the SAVIOUR of our race, the Holy Redeemer.

We speak of days—of our day—and the Sacred Historian speaks of "that day in which GOD made the Heavens and the Earth"—shall we measure the day of HIM with whom a thousand years are as one day——our day terminates in the grave.

The grave is the terrestrial couch on which the ashes of mortality repose. The grave is a SACRED PLACE—oft, it arrests the gaze of mortals—oft a momentary sojourn near its borders brings to the human mind grief mingled with sorrow, which humbles human pride. Alas—alas!—could this influence but continue, and endure, and expand, until it shall produce an EFFECT that shall protect the NARROW HOUSE from *sacrilegous hands.*——

Our city—the largest, the most populous in the Western World—is yet in its infancy. Less than two hundred and fifty years ago the Island on which it stands was the habitation of the red men of the forest. More than eight generations of our race have here lived and died—their mortal remains were consigned to the narrow house—but alas! their resting places—WHERE ARE THEY?——Gone,—gone,—and the precious ashes of mortality have been *scattered to the winds or trampled under feet.*

The dead are made to give way for the living: is this right?—is there to be no resurrection of the dead?—are we unbelievers in that sacred declaration of that blessed volume on which rests the Christian's hope?

It is not the NECESSITIES of the living that induce the violation of the place of sepulchre, but their *convenience*—a desire that the ashes of mortality and the ground in which they repose may become a surface for public streets over which the thoughtless shall harshly tread until they in their turn shall follow to the same temporary repose of those of their kindred who have preceded them, and thus "ashes to ashes, and dust to dust."

The untutored savage venerates the ashes of the dead—he treads lightly over the soil beneath which lie the ashes of his kindred—in this, his example is a lesson, that the enemy of his race might be proud to copy; but no: that people who have the pages of Revelation, shining with the bright promises of Celestial bliss, of eternal glory, placed before them, reverence not the ashes of the dead:—nay those who have the Sacred Word of the MIGHTY PRINCE OF JEHOVAH'S THRONE in his Written Volume, placed in their hands—are neither deterred by its threatenings, nor persuaded by its promises!

If we turn back and peruse the pages of Sacred history, we shall find that the place of sepulchre was a hallowed spot. Joseph of Arimathea purchased the sepulchre for the temporary resting place of the crucified Prince of Heaven; Abraham purchased the cave of Macphelah for the repose of the mortal remains of his beloved consort;—Joseph when in Egypt visited the same place of sepulchre near two centuries afterwards, there to deposit the remains of his beloved father; and when he, himself, was about to put off this earthly tabernacle, he exacted a promise from his people that they would carry his remains with them out of Egypt.

We have said of the ancient places of sepulchre in our city—where are they?—we add, of the modern places of sepulchre,—where are they?——in what manner are the latter regarded?——Shall we answer—and shall we say that one of these hallowed spots—one of the sacred depositories of the silent dead WAS offered for sale to the person who would pay a Corporation Assessment, imposed upon it, for the lowest term of years that any one would *take it for*, in consideration of paying this assessment and Expenses. We allude to ST. MARK'S CEMETERY, which was assessed for *Benefit* for the Opening of Art street, and was advertised to be sold at auction by the Street Commissioner in 1841 for the non-payment of the assessment. It was offered FOR SALE—Silence sealed the lips of the auditors.

We had hoped that the ties of consanguinity would have had an influence to protect the ashes of the dead,—but in this we were disappointed.

The Deaf and Dumb Asylum, the Asylum for the Blind, and several houses consecrated to the Worship of the TRIUNE GOD, were offered for sale for Corporation Assessments, and many of these were sold!

If the ties of CONSANGUINITY will not protect the ashes of the Dead, the Laws of the Commonwealth should.

Places of sepulchre, the silent tomb, the grave where rest the silent, should not be the objects of assessment imposition for public improvements.

Churches, or houses used for Religious Worship, should also be exempt from such imposition.

Charitable Institutions—Colleges, Academies and Schools—should likewise be exempt from such proceedings.

Perhaps it may be said that the Commissioners of Assessment and Assessors have the needful discretion in this, and the same may be said of the Court or power which confirm the report of such Commissioners or Assessors, but *discretion*, is a term without a meaning, so far as these practices are concerned—the WILL of the officers is called, *discretion!*

The LAW of the Commonwealth should determine that such Impositions shall not be made.

MEMORIALS

PRESENTED IN THE SENATE OF THIS STATE AT THE EXTRA SESSION OF THE LEGISLATURE IN AUGUST 1842.

THE following are copies of several Memorials presented to the Legislature of this State by Mr. FURMAN.—We give below the names of some of the Signers. We have mislaid a part of the list, but enough however are here stated to show the opinion entertained by the public on this question.—As no other business other than that of apportioning the State into Congressional districts was done at the Extra Session, the Memorials were not then acted upon.

TO THE HONORABLE THE LEGISLATURE OF THE STATE OF NEW YORK:

Your Memorialists most respectfully represent to your Honorable Body that the powers now and heretofore exercised by public officers in assessing private property for what are miscalled public improvements have the effect to lessen the Value of Real Estate upon the Island of New York, to render Titles doubtful and insecure, and prevent City Lots from being improved.

Your Memorialists refer your Honorable Body to the Report of the Honorable the Select Committee, appointed by the Honorable the Senate of this State at the session of 1841 to investigate Assessment Abuses in the city of New York, and to the numerous Memorials presented your Honorable Body for the details of these abuses.

Your Memorialists, in consideration of the premises, most respectfully ask your Honorable Body to repeal all Acts heretofore passed which authorize the Imposition of Assessments upon Private Property for public improvements, and to repeal the Act passed April 12th, 1816, authorizing the Mayor, Aldermen and Commonalty of the city of New York to sell or lease lands for unpaid assessments, leaving those assessments a Lien upon the land, and to be collected in an action of Debt, that the persons assessed may be able to test the legality of said assessment in a Court of Law.

Your Memorialists ask that the first and second section of the act passed May 25th, 1841, entitled "an Act in addition to the Acts respecting the Collection of Taxes and Assessments in the city and county of New York," may be repealed, and that the act passed May 6th, 1841, entitled an Act in relation to the Redemption of Land sold for Taxes or Assessments in the city of New York," may also be repealed, leaving the Act of May 14th, 1840, requiring notice to Mortgagees, in full force: so that in any case of a Sale of lands, for taxes or assessments, a Mortgagee shall not be divested of his Mortgage Security without due notice. And your Memorialists will ever pray, &c.

N. Y. MUNICIPAL GAZETTE...Extra.

Published by the ANTI-ASSESSMENT COMMITTEE, and distributed gratuitously.----Edited by E. Meriam.

VOL. 1. NEW YORK, DECEMBER 14, 1842. No. —

TAXES.

We have thought it important to place before the public at the present time the Laws now in force in relation to the Assessment and Collection of TAXES.

The aggregate Tax now imposed on the Real and Personal Estates of the citizens and inhabitants of the county of New York have reached an amount, that has alarmed the Owners of real estate.

We have but to look back through the records of a few short years to a period when the WHOLE *Annual Tax* of this city amounted to a sum about EQUAL in amount to the SIMPLE INTEREST on the amount of the Tax for the present year for 190 days.

1801,	population	60,489,	Tax	75,000
1810	"	96,276	"	120,000
1820	"	123,706	"	250,000
1830	"	202,580	"	450,000
1840	"	312,883	"	1,100,000
1842	"	340,000	"	2,000,000

We have thus stated the periods, the population, and the annual tax, by an examination of which it will be seen that, in 1801, the population was more than one sixth of its present number, and the annual tax of that year only *one twenty-sixth* as great as the tax of the present year.

TAXATION HAS OUTRUN POPULATION.

Allowing that there are 40,000 voters in our city the present tax gives an apportionment of about $50 to each voter, and to each inhabitant of the city, estimating the population at 340,000, of about $6; but this equal distribution of our tax is not made. Taxation and Representation are *not equal:* far—VERY far from it.

The causes and the consequences of our present extravagant amount of Tax is a matter, that is all-important to consider.

We think that we find in the Revised Statutes one of the causes which has led indirectly to an extravagant expenditure of public money by our Common Council and Officers of the Corporation, and we desire to call the attention of citizens who are conversant with our municpal affairs, *particularly*, to the features of the Law to which we allude.

These Provisions of the law are to be found in the 1st Vol. Rev. Stat., new Ed., p. 361 & '3.

The substantial provisions of this law makes the Mayor, Recorder and Aldermen of the city of New York Supervisors of the county of New York, and also makes the Chamberlain of the city of New York Treasurer of the county of New York.

In 1830 the Legislature passed a Law in relation to the city of New York containing the following Provision, Chapter 122:

"§ 19. *The Common Council shall not have authority to borrow any sums of Money whatever on the credit of the Corporation, except in anticipation of the Revenue of the year in which such Loan shall be made, unless authorized specially by the Legislature.*"

This restrictive provision as to the Borrowing of Money is from the pen of that distinguished citizen, STEPHEN ALLEN, a member of the City Convention, whose acquaintance with our city affairs entitle his views thus embodied to great respect, and the highest consideration.

The City Chamberlain, by virtue of his office, becoming entitled to the custody of the monies collected from the county tax as well as those arising from the City Revenue, and also those arising from the Collection of special Local Assessments, placed these three distinct funds promiscuously to the Credit of the city of New York, and the Common Council and Officers of the Corporation considered and treated all three of these DISTINCT and separate funds as the "*Revenue of the Year.*" Here is the great error: the County Taxes are not City Revenue, any more than the State mill tax.

Mr. Allen supposed that the Corporation Officers were restricted from borrowing any sum exceeding $150,000 in any one year: true, they were; but they violated this salutary provision, and actually borrowed nearly Two Millions of Dollars, and to this cause is to be attributed the present enormous tax. The Corporation have been running behind hand for near twelve years—the arrears of one year accumulating upon the previous year until at length the city is a whole year behind hand.

The Hon. ISAAC L. VARIAN, on his entering upon the duties of Mayor of the city of New York in 1839, in his first executive message to the Common Council alludes to this subject in the following words:

"The practice which has *within a few years* grown up in the Common Council, of borrowing large sums of money under that provision of the Charter which authorizes temporary loans in anticipation of the ANNUAL TAX, I consider injurious to the financial interests of the City, and not contemplated by provisions of the Charter under which it is done. By a reference to the Comptroller's report, it will be seen that during the year 1838, temporary loans, amounting to EIGHT HUNDRED THOUSAND Dollars were made by him, in addition to the sum of *Four Hundred and Eleven Thousand Nine Hundred and seventy-five Dollars and Thirty-eight Cents, borrowed from the City Aqueduct Loans, &c.*"

"*These loans could, by the Charter, only be made in anticipation* of the TAX of 1838, as the tax of 1839 was not authorized by the Legislature, and the amount so borrowed was more than the whole tax levied. Of this amount so borrowed in 1838, there still remains unpaid the sum of $204,271.27, and since the commencement of 1839 the borrowing of $300,000 has been authorized by resolution, as a temporary loan, while there remains unpaid of the tax of 1838 comparatively a small amount. Such a system, if continued, must eventually end in direct violation of the provisions of the charter, and in the accumulation of a debt which is paid from one year to another by temporary loans, and which will always be a heavy burden upon the financial department of the city."

"The provision of the charter was expressly intended to *prevent* the Common Council from incurring such debt, and to confine the expenditures of the city to its annual income; and the authority then given to borrow money in anticipation of the tax, was only intended to defray the *ordinary expenses* of the city, in cases when, from unforseen occurrences, the ordinary collection of taxes had not been made to a sufficient amount."

"Connected with this subject is another, worthy of your examination. A large amount of money is annually received by the Comptroller in trust, to be repaid to others. I refer to monies received on assessments for opening, regulating and paving Streets, the whole of which is to be repaid to contractors or other persons entitled thereto. The money however is paid into the Treasury and applied to the general purposes of the city; and when called for, it becomes necessary to provide means for its payment, by temporary loans or other expedients. The union of these funds with the general funds of the city, tends to confusion in the public accounts, and at times to place at the disposal of the public authorities large sums of money, and thereby to induce more extravagant appropriations than otherwise would be done if these monies were kept separate from the common fund, and applied solely to the purposes for which they are received by the Common Council."

This language used by this worthy public officer, deserves a careful reading. Mayor Varian was several years a member of the Common Council, and was for some time President of the Board of Aldermen. He is now a member of the Senate of the State of New York. He is, and always has been, an old fashioned Democrat, and is much beloved and highly respected by his fellow citizens.

We agree with the worthy Mayor in the loans referred to being a violation of the City Charter, but we do not concede that the "*annual tax,*" to which he refers, is a city revenue: here we claim the right to differ in opinion with His Honor,—and this difference is very material.

Some few months subsequent to this, the Common Council petitioned the State Legislature for authority to fund this accumulated debt.

On the 14th January, 1840, the following Petition to the Legislature of this State was signed by the Mayor and Clerk of the Com-

mon Council, and to which was affixed the seal of the Corporation.

"To the Honorable the Legislature of the State of New York.

"The memorial of the Mayor, Aldermen and Commonality of New York, *respectfully represent*,

"That by reason of the great expenses which they have incurred in consequence of the various improvements in the said city, they have found the ordinary revenues of the Corporation altogether inadequate to meet the demands which these expenses have produced, and that they have therefore, from time to time, been obliged to issue their bonds under their Corporate Seals, to defray some of these expenses, as a mere means of temporary relief. The amount of this floating debt on the 31st of December last, amounted to One Million Seven Hundred Thousand Four Hundred and Sixty Dollars, and can probably be reduced from anticipated sources of revenue to *One Million Three Hundred Thousand.*

"The amount to be raised by the annual tax bill will be required for the ordinary expenses that will accrue pending its collection, and will therefore furnish no relief in liquidation of the floating debt.

"Your memorialists therefore pray your honorable body will grant *to them authority* to fund such amount of the said floating debt as they may deem expedient, not exceeding *one million three hundred thousand dollars*, by the creation of a six per cent. stock, redeemable in annual instalments of one hundred thousand dollars each.

"And your memorialists will ever pray, &c.

"ISAAC L. VARIAN, Mayor.

"Thos. Bolton, Clerk Com. Council."

[seal.]

Endorsed, "Board of Aldermen, January 13th, 1840.

"The within memorial and act approved.

"Thos. Bolton, Cl'k C. C.

"Board of Assistants, Jan. 13, 1840.

"The within memorial and act unanimously approved.

"Edw. Patterson, Clerk.

"Approved. ISAAC L. VARIAN.

"January 14th, 1840.

"Presented in Senate, Jan. 17th, 1840."

The Legislature authorized the funding of $400,000. See Act in Session Laws of 1840.

The Legislature authorized the Common Council to fund $400,000 of this debt reimbursable by annual instalments of $50,000 each: one of these instalments forms a part of the present annual tax.

Had the accounts of the County Treasurer been kept separate from those of the City Chamberlain, and both separate from those of the Local Assessments for public improvements, a great check would have been interposed to extravagant expenditures. The present Chamberlain has in this followed the practise of his Predecessor.

The Mayor, Recorder and Aldermen of the city being, by virtue of their said offices, Supervisors of the county, blended the duties of the two distinct classes of officers together, and, from this mixing up of duties, they mixed up the county taxes with the city revenue and called the county taxes City Revenue; and hence the mixing up of the different, distinct and separate funds in the accounts of the city Chamberlain.

This state of things shows the necessity of separating the Duties of County Supervisors and County Treasurer from those of City officers.

The Hon. Robert H. Morris, the present able and efficient Mayor of the city of New York, agrees with us fully in the importance of separating the Office of county supervisor from those of city alderman.

The consequences of a continuance of the present high rate of taxes will drive citizens whose funds are invested mostly in personal property, from the city—these citizens will remove, to other sections of the State where they will be less burdened: those who are left behind with their property will, therefore, be compelled to pay the Taxes of those who remove in addition to their own, and both of these combined will have the effect greatly to lessen the Income from real estate, as well as to diminish the Dividends of our banks and other incorporated companies.

While speaking of Banks and other incorporated companies, we will here stop to remark that the provisions of law which authorize an assessment of tax upon the Capital Stock,—*some of the Ward Assessors insist*,—makes no provision for deducting the losses which may have diminished that capital, however heavy these losses may have been. If a bank shall have lost all of its capital stock *no* tax is to be imposed; but if they have lost ninety-nine and three quarters per cent., the remaining *quarter of one* per cent. must pay the tax of the original 100 per cent: this is inequitable and therefore oppressive and unjust—and the consequence will be, that these descriptions of stocks will be depreciated. We do not so read the law.

The business of incorporated companies, is not so productive that they should be required to pay a greater tax than individuals, in proportion to their means.

There are a variety of opinions entertained in relation to our county taxes as to the mode of assessing, respecting the persons and property to be assessed. We have conversed with great numbers of our influential citizens, and find such is the fact.

It was well remarked by President Jackson, in his celebrated Proclamation issued shortly after the nullification ordinances of South Carolina were passed by that State—

"*That human wisdom had never yet devised a system of taxation that operated with perfect equality.*" Mr. Justice Story, one of the brightest ornaments of the American Bench, in speaking of this Proclamation of President Jackson, says, "as a State paper, it is entitled to great praise."

If money funds are to be subject to excessive taxation they will be withdrawn from such districts as impose the greatest burdens in the shape of annual taxes, and if real estate is alone to pay these impositions, it will decrease in value in the same ratio as the taxes are increased in amount.

The Question is, What is to be done under such a state of things?

We think the recommendation of Gov. Morton of Massachusetts, to the Legislature of that State, the only remedy which our citizens can adopt. The recommendation of his Excellency was very laconic: "*Adopt Retrenchment as a substitute for Taxation.*" This must be done—and it can be—on a very extensive scale.

The policy which has been heretofore pursued of increasing the amount of the public property by the appropriation of the funds belonging to citizens, paid into the public treasury in the shape of taxes, is not only dangerous, but absolutely ruinous. Municipal corporations should not own a dollar of property beyond that required for public use. Such a course as has heretofore been pursued in this matter, if continued, will lead to one of the most dangerous of Monopolies;—besides, it is at variance with the spirit of our Institutions and dangerous to civil liberty.

It is true that our city has experienced its full share of the fluctuations in business operations of all kinds these few years past, but if the public officers had confined themselves to their legitimate duties, the public interests would have passed unscathed.

The question is asked, How can the taxes be reduced?

In order to reply, it is necessary first to state what constitutes the aggregate of the taxes now being collected.

The Public Officers class them as follows:

1. STATE MILL TAX.
2. CROTON TAX.
3. COUNTY TAX.

First—The State Mill Tax, the present year, amounts to $237,783.60, and is imposed upon Real Estate valued at $176,489,042.00 and Personal Estate $61,294,559.00.

The following statement is copied from the State Comptroller's report to the Legislature made in 1840 of the Valuation of the real and personal estate in all the counties and cities in this State, from which we have selected seventeen of the richest counties, in which it will be seen that the assessed value of real and personal property in these counties is less than that of the county of New York for the present year.

The statement is as follows:—

The aggregate real and personal Estate in the county of Orange in the year 1839, is assessed at		11,420,916.00
In the co. of	Duchess	18,351,797.00
" "	West Chester	10,718,797.00
" "	Albany	13,626,100.00
" "	Greene	11,569,268.00
" "	Oneida	12,138,770.00
" "	Oswego	8,549,000.00
" "	Renselaer	11,245,113.00
" "	Onondaga	16,768,635.00
" "	Ontario	11,420,916.00
" "	Kings	31,103,113.00
" "	Monroe	15,731,524.00
" "	Cuyahoga	12,569,075.00
" "	Livingston	11,246,124.00
" "	Columbia	9,878,392.00
" "	Erie	12,238,392.00
" "	Queens	10,781,650 00

These seventeen counties above named contain four times the *actual* value of taxable

property that the city of New York possesses. It is in this, that New York suffers in the mill tax: the valuation, by the assessors in this city, is four times as high as the assessors in the country would rate the same property in their respective districts, hence the citizens of the city of New York pay *A Four Mill Tax.* A Farm in the country worth ten thousand dollars is rated by the country assessors at twenty-five hundred, whereas a house and lot in the city which is worth $6,000 is rated by the city assessors at $8000.

THE REDUCTION OF THE VALUATION OF REAL AND PERSONAL ESTATE IN THE CITY OF NEW YORK SO AS TO EQUALIZE IT THROUGHOUT THE STATE WOULD REDUCE OUR MILL TAX MORE THAN $100,000.00.

Here, then, is the first Item of saving.

Second—THE CROTON INTEREST TAX. Only a portion of the interest of the Croton Debt is included in the present annual tax. We may, in round numbers, set it down at $475,000.00 or three fourths of the actual amount of the interest of the debt for one year.

The City Comptroller, in his supplementary report made out October 3d, 1842, states the Croton Debt, as then existing, as follows:

Five per cent. Stock,	$8,771,500.00.
Six per cent. Stock,	645,312.00.
Seven per cent. Stock,	2,000,000.00.

The same report states that the Croton Water Rents, up to that period, had amounted to less than $9000, a very small sum indeed.

The Croton debt is *increasing*, and will be much increased beyond the amount of indebtedness above stated: the annual tax to meet the payment of the interest will also be much increased.

The only means of decreasing the interest, is to decrease the debt by a sale of all the public property not in public use. It is said that the present time is not a good time to sell—that the price of property is low. True, the price of property is low; and it is equally true that it will be still lower.

The immediate present time, is never considered a good time to sell. We hear it remarked by citizens that 1836 was the time that the public property should have been sold; but in 1836 and 1837, the opinion was then entertained that that was not the proper time to sell. We have before us a report of a Committee of the Board of Aldermen in this very matter, which as it is quite brief, we will quote in full.

Here it is:—

"The Committee on Finance, to whom was referred the resolution directing a report to be made on the expediency of disposing of part of the unimproved real estate belonging to the Corporation, *respectfully*

"REPORT

"That there is some part of the public property, where the leases have expired and without a covenant of renewal, that might have been sold; but, in the present pressure of the money market, they think it advisable not to offer the same at the PRESENT TIME. They therefore ask to be discharged from the further consideration of said resolution.

"Respectfully submitted,

"D. P. INGRAHAM,
"EDWARD TAYLOR,
"DAVID BANKS.

"Which was adopted and ordered on file."

This Report was made April 5th, 1837.—*See Pro. Board of Ald.*, Vol. 12, page 476.

Real Estate on this Island will not increase in value while the present enormous tax is continued, coupled with a prospect of being still more onerous;—and, in addition to this, the local assessments, which are of an alarming character, are destructive to the value of real estate and operate as a cloud upon the title, whether actually assessed or only intended to be assessed, for there is but little difference between these two classes.

If the public property shall be at once disposed of, or placed in the hands of judicious business men in whom the public have confidence, to dispose of when they shall deem the proper time, and the avails of these sales be appropriated to the retiring of the Croton bonds of an equal amount as fast as collected: the debt can probably be diminished by this means three or four millions of dollars, and that sum is the whole and full value of the public property not in public use.

The next item to lessen the debt, that we propose, is, the Water Rents: let these be appropriated every quarter to the purchase of the Croton bonds in the market, and, as fast as the same are obtained, they should be cancelled by writing across the face of the obligation the word CANCELLED, in letters on an inch square, attested by the Mayor; and also the Recorder, under a seal, and let this seal be a round punch an inch in diameter: when this is done, publish a statement of the bonds, so cancelled, in a city newspaper of the most extensive circulation, specifying the date, number, denomination and name of the payee of each bond: after this, let the Bonds be filed in the office of the City Chamberlain as an evidence of payment. Such a disposition of the bonds is better than any sinking fund, and bonds thus treated may be considered *Rat-proof.*

Those gentlemen who think the Croton rents will be large, will be satisfied with the consequent rapid diminution of their tax; and other gentlemen, who are of the opinion that the water rents will not pay the cost of superintendence, repairs, &c., will not be disappointed in having to continue the payment of the Interest tax.

The further expenditures upon the Croton should be, by all means, at once discontinued—no more money should be borrowed—not another dollar.

Our city authorities will find, to their surprise, that the present onerous and extraordinary tax will be difficult to collect: after the voluntary payments shall have been completed, the very large Arrears will be found to produce great complaints and great distress. Our city authorities have gone headlong, as a few short months will plainly show. Politics have brought the city to the very verge of ruin—the acts of both political parties.

We believe the Croton is a valuable acquisition—that it would, with proper management add to the intrinsic value of real estate on this island—but it is not worth what it has cost: thus the wages of labor, in this, are greater than the value of the product of the labor, for the introduction of the Croton is the result of labor.

We find it stated in the City Comptroller's Report of the present year, page 15, that the land used for the Croton costs $364,948: the balance of the great sum which has been expended is the money paid for the wages of labor.

Such is the result in all cases where the wages of labor exceed the whole value of the product of labor.

Labor is the foundation of wealth—without labor the products of the earth, however profuse or abundant, could not be gathered.

Our Railroads, Canals, Bridges and Manufacturing establishments are the products of labor.

Labor when called into extensive requisition produces results, that, were we not witnesses of, we should be slow to credit.

The Egyptian Pyramids are proud monuments of the products of labor.

Recently the product of labor on the continent of Europe in the cultivation of grain divested that great monied corporation, the Bank of England, of its vast accumulation of precious metals.

The Wages of labor should be proportionate to the Value of its product; otherwise the employer and the employee must change places, and the balance will be on the wrong side of the account. There can be no permanency in a state of things like what we have illustrated above, nor do either party derive durable benefit.

The Croton will become an expensive concern to the people, unless they arouse and attend to the great interests which concern them:—it will be made a retreat for politicians—here they will be quartered, by the successful party, at the termination of every election:—it is the newly formed shoal on which the City craft will founder unless experienced, skilful Pilots take the helm.

The Price at which the Water is furnished to Families, is a question of paramount importance.

It is said that the question is, whether the water shall be sold, or whether it shall be given away? *This is not the true position.*

The real question is—Shall citizens be assessed more than once for the water? Shall they be compelled to pay for the water and at the same time be prohibited from using it unless on paying a second time?

Every person who either owns or rents a tenement on this Island, pays for Croton water;—if not directly, in the shape of a tax, it is paid indirectly, in the price of the rent, to the person who pays the tax;—and the payment, in either case, is the full value of the water which may be required for family use.

Citizens however would, as a matter of patriotism or public spirit, be willing to pay

five dollars each for the water for a dwelling-house, and if a tariff of this rate should be adopted, the receipts would be far greater in the aggregate, than the present oppressive demand.

The great difficulty in regard to the water rent, is, that it is a compound screw of a double twist—the citizens are made to buy, at a dear price, that which belongs to them without buying: it would be more equitable only to tax those who do not buy the water.

The Croton Tax will drive more citizens out of the city than the purity of its waters will tempt to become settlers in it.

We have heard it proposed that Commerce should be taxed to pay the interest of the Croton debt.

It is said that Foreign Merchandize should be made to pay—that it is protected from fire by the Croton—from burglars by the watchmen—that the transportation of goods over our streets wear our pavements, &c. &c.:—all this is true; but foreign commerce pays another, and a heavy tax—a duty imposed by the General Government. The State of Maryland, in 1820, passed an act requiring importers and dealers in foreign merchandize who sold goods by the bale or package to take out a license, for which they were required to pay $50: a severe penalty was provided in case they neglected, refused, or omitted to obtain such license: the importers resisted, on the ground that the act was a violation of the Constitution of the United States, and a suit was instituted to test the validity of the Act. The question was brought ultimately before the Supreme court of the United States—was fully and most ably argued: the Court gave a very elaborate opinion, and decided that the law in question was unconstitutional, and therefore void.

It is Commerce that makes a piece of ground 25 feet by 100, on the thick settled part of this island, of more value than one acre of the best land on the Mohawk flats: commerce, therefore, should be encouraged, and not discouraged.

The question as to what are the most proper objects of taxation, is one of great difficulty: it is not a new question: it has agitated nations as well as communities a long time ago. The direct taxes which were laid many years ago were much complained of, and were very unpopular.

If a direct tax should be laid for the payment of the Interest of the Croton debt, the question is—In what way can it be imposed, and on what property shall it be assessed?—The practise heretofore adopted in assessing arbitrarily for pretended Street Improvements, will not answer—that has neither the Constitution of the United States or of the State, nor has it equity or justice to support it;—it is equally a violation of all. A citizen who owns a house may not choose to use the Croton: he may prefer the water of his wells and his cisterns for the use of himself and his family, and he has a right to do so: he cannot be required to pay an assessment for the Croton. It may be said that his house is protected from fire by the Croton—and true it is; but he prefers to make insurance notwithstanding: he pays less premium, however: here then is an advantage which it is right and just he should pay for. The Croton is used in washing the streets: in this it is also an advantage, and for this the citizen should pay; but both of these will not equal the Share of the Interest of the debt incurred for the cost of constructing the works of the Croton. It is buildings and merchandize that are protected from destruction by fire by the Croton, the ground derives no such benefit. Merchandize, if belonging to non-residents, is stored in warehouses, which houses are taxed: merchandize, therefore, pays indirectly—if the Croton tax is made very onerous, goods will be stored without the bounds of the tax district.

Thus difficulties are abundant, and how shall they be remedied? We see but one way, and that is to let every person who occupies a house that is taxed to pay the interest of the Croton debt, use the water without being required to pay a second assessment: to those who use it for manufacturing purposes, make a very moderate charge, for the more the water is made use of, the better will be its quality; and the more it is used for manufacturing purposes, the greater will be the business of the city, and whatever tends to increase its prosperity, benefits directly the real estate of its Citizens upon this Island.

Citizens pay taxes cheerfully where they are reasonable in amount and equitably imposed; but when the amount becomes unreasonable from a wasteful expenditure of public money, which is the case now with regard to our county tax, there will be a dissatisfaction and this dissatisfaction will increase, and to such an extent that something must be done. The taxes which are now being collected are by voluntary payment. When the 1st of February arrives, then will come the TUG—then dissatisfaction will be increased, and it is right it should, for citizens have for a few years left public affairs to take care of themselves or in the *care* of politicians, who also take care of themselves regardless of the public interest. The Croton debt is a very serious matter—it is a very large amount, and should be in the hands of men of experience, men of ability, of men who have the confidence of the bondholders as well as the tax-payers. There should be no pipe-laying in this business—it is too vast and important a concern to place in the hands of EVERY-DAY politicians, of men of inexperience. The Salaries of the public officers who superintend the interests of the Croton should be fixed at so low a rate as to prevent the hunting up of the Offices for the sake of the FEES.

There are contingencies attending the use of the Croton which may be serious in a pecuniary point of view:—the Corporation is liable for the damages from the bursting of pipes, &c.—the Corporation possess the right of way over the streets, but not the right to the *Soil* under the streets.

The contemplated change of the members of the Board of Supervisors, that this body may be separated from the Common Council, and the office of City Chamberlain also separated from the office of County Treasurer will be one of the most effectual Checks to extravagant expenditure of public money.

This is a matter of primary importance, and care should be taken in framing a bill to provide for property qualification in the persons to be selected for County Supervisors, and they should be elected by general ticket.

That Board should be composed of our best citizens—not selected by politicians convened for the purpose but by the property holders and tax-payers.

The duty of the Board of Supervisors of the county of New York are important—they have the assessing and disbursing of more than two millions of dollars annually—two millions of dollars is the amount of interest at six per cent. per annum of more than thirty-three millions of dollars, a sum nearly equal to the whole Capital Stock of the United States Bank in its best days. Shall such great interests be confided to politicians?—

Citizens should awake to a sense of their true interests—Economy must be introduced into the administration of our public affairs, otherwise destruction of the interest of individuals will be inevitable. Moderate men have been deterred by the violence of party politics from meddling in public affairs—they have NOW learnt that public affairs will not take care of themselves. Something must be done, and—done quickly. The citizens who have interests at stake must meet together, deliberate and consult upon public affairs.

The public property not in public use is set down by the City Comptroller in his Report of January 1842, page 15, as follows:

"*Real Estate not in Use for Public Purposes.*

"At Brooklyn, Williamsburgh, Hallet's Cove and 86th street,	$ 84,500.00
"City Lots under Lease,	947,200.00
"Wharves and Piers leased, $34,000, added for increase of 1841,	1,782,000.00
"Property between 23d and 42d street,	1,260,000.00
"Property north of 42d street,	928,400.00
	$5,002,100.00

That portion of the property between 23d and 42d street, and also that portion north of 42d street, is not worth more than one fourth of the sum which it is valued as above.

In page 87 of the same Report is the following:

"Present Capital of Sinking Fund in City Stocks,	$ 828,334.00
"Arrears and Commutation of Water Lot Rents,	365,630.00
"Fire Loan Securities,	615,489.00
	$1,839,453.00

In page 240 of the Comptroller's report of October 3, 1842, is the following Statement of the City Debt in addition to the Water Debt:

"New York Five Per Cents. of 1820 and 1829,	$ 500,000.00
"Public Building Stock,	515,000.00
"Fire Loan Stock,	525,000.00
"Floating Debt Stock,	300,000.00
"Fire Indemnity Stock,	353,000.00
	$2,108,000.00

[THIS SUBJECT RESUMED IN NEXT NUMBER.]

N. Y. MUNICIPAL GAZETTE...Extra.

PUBLISHED BY THE ANTI-ASSESSMENT COMMITTEE AND DISTRIBUTED GRATUITOUSLY.

EDITED BY E. MERIAM.] NEW-YORK, DECEMBER 22, 1842. [VOL. I....NO. —

Taxes.

[CONTINUATION.]

To these sums we add TWO MILLIONS OF DOLLARS of floating Bonds and of temporary indebtedness.

$2,000,000.00 is a large sum in addition to the other indebtedness which we have already stated in the previous pages at $13,-524,812.00—swelling the aggregate to the great sum of $15,524,812.00, the annual interest of which may be set down at about $900,000.00.

It will be recollected, that the interest of the Water Debt has previous to the present time been paid out of the principal. Is this sum to be reimbursed to the principal by subsequent taxation under the act passed May 26th, 1841? This Act will be found in full in our next number.

We state the public indebtedness on temporary bonds at two millions and this is substantially accurate: the form of this indebtedness is being continually changed for political effect.

We have shown in our previous number by documents, the correctness of which cannot be questioned, that this species of indebtedness existed in 1838, 1839 and 1840, and that it was certified to the Legislature by three branches of the City Government, under the great Seal of the Corporation, as being of a specific amount on the 1st day of January, 1840, namely, $1,700,460.00, of which only $400,000 has since been funded.

At the close of 1841 it will be seen by the city Comptroller's Report, page 23, that the sum of $193,283.00 of the Taxes of the succeeding year had been collected prior to 31st December, for most of which the Ward Collectors were allowed a premium in addition to their fees.

In the same report, page 5, the balance in the City Treasury on the 31st day of December, 1841, is stated at $67,504.07: this balance would look quite well under all circumstances, bnt unfortunately we find a terrible drawback on this stated balance, as on pages 77 and 79 of the same report outstanding warrants on the Treasury are stated at $315,-209.15, which makes the Treasury actually overdraw the large sum of **$248,105.13**

Merchants do not make up their accounts in this way: they do not state a balance in bank when it has already been drawn for, and not only drawn for, *but largely overdrawn.*

The same system of stating the balance in the Treasury is adopted in the City Comptroller's Supplementary Report of October 3, 1842. In this report he states the balance in the Treasury on the 2d October, 1842, to be $152,991.54, and on the same page (240) he states the outstanding Warrants at $143,430.-96, $10,500.00 of which was the sinking fund. It would have been much more simple and proper to have stated the actual balance in the Treasury at $9,560.58, which was the real balance, but this would not strike the eye at first glance as so large as the sum chosen.

As we before remarked, the mode of stating the fiscal accounts is being continually changed for political purposes.

The worst state, or the true state of the accounts is what the Tax-paying People want to see: they want to know the worst, and then they can judge what is best to be done.

At the commencement of 1842, it will be seen by what is above stated, there were two items of indebtedness, viz.—the outstanding Checks over and above the funds on hand to meet the payment of $248,106.13, and the sum of $193,283.80 of the next year's Taxes which had been obtained in 1841, both of which amounted to $441,389.93.

The closing of the present years' accounts will embrace of next year's tax receipts over half a million of dollars, collected by voluntary payment, in which is included the *State mill tax.* The city Treasury will claim the use of this fund until the State Comptroller calls for it.

We presume that the City Comptroller will not claim that the indebtedness on temporary bonds in 1840 has since been discharged, as the petition to the Legislature which we set forth in full. states expressly that the money to be raised by annual taxes would all be required for the ordinary Expenses of the City Government.

It may be said that the stating of the accounts in the way we have narrated is a matter of policy, and that it is good policy. This we do not admit; public officers are public servants, and they should state things in a way that they can be fully understood—no other policy need be resorted to. If the public treasury is embarrassed, let those who support that treasury know the worst, and they will take the proper care that it is seasonably replenished.

We do not wish to be understood as speaking unkindly of either the present Comptroller, Mr. Williamson, or of his predecessor, Mr. Smith; they are both excellent citizens, and in speaking of the mode of stating the balances at the end of the year, we speak of the system and not of the persons who are required to carry it out. As to the present Comptroller and his predecessors we say that both have been faithful public officers. We have found them always willing and ready to aid every good measure, but neither of them were at liberty to do all they desired to do; they were both ruled by the Common Council.

It will be seen by looking at the item of Interest which is payable quarterly, viz. on the 1st of February, May, August and November, that it will amount to about $225,000 per quarter, and when the other expenditures for the Croton are completed it will amount to One Million of Dollars per annum, which will be equal to $250,000 per quarter, which gives as the sum total of the interest of the public debt for only three months a sum exactly equal to the whole annual city tax for the year 1820.

What a contrast!

As we before observed, the interest on the public debt is payable quarterly, and as the present annual tax which is now being collected will more than all be expended before the 1st of May, there will therefore be no means to pay the August and November interest without a resort to loans.

This is a matter of serious consideration, and one which requires legislative provision. We have heard it proposed by Corporation Officers that the next year's tax shall be made payable at an earlier period: this will not do. It would be better to fund a sum sufficient to pay the interest, and then take a new start and try to keep even. It is high time that the Corporation should turn over a new leaf and make a new beginning.

The Corporation Officers—some of them—insist that all the Real and Personal property on the Island of New-York is mortgaged to pay the Corporation debts, &c. Such a doctrine has no soundness. Would a mortgagee, in foreclosing a mortgage on a house and lot on this island, be required to make all the Croton bond holders parties in consequence of this public mortgage? or would the Chancellor grant an injunction to restrain an individual from removing his property beyond the limits of the State because the Croton bond holders have in their public securities a chattel mortgage?

The holders of Stock of the Corporation of the city of New-York have no other security than the public property belonging solely to said corporation.

It is said that the public faith is pledged for the redemption of the Stock. What is public faith?

The holders of various State Bonds can best answer. The credit of the city of New-York must be preserved, not by representing the existence of a pledge which has no existence, but by the most rigid economy in public expenditures—by Retrenchment on a large scale.

What would real estate on this island be worth if politicians could pledge the private property of the citizens to public creditors for visionary improvements? We answer, it would be utterly worthless.

The Constitution of the United States and of this State provide that private property shall not be taken for public use without just compensation. The exercise of judicial discretion cannot blot out this provision of the Constitution, although it may temporarily eclipse it.

The Expenditure of public money must be so decreased that there will be enough re-

main to maintain the Credit of the city, and this can only be done by the prompt payment of the interest on the bonds.

We speak with great plainness in these matters: it is a public duty so to speak—a duty to the tax-paying citizens, as well as the bond holders.

It is no wonder taxes are high—that Real Estate is depreciated: the wonder IS, that there is any thing left to tax, or that Real Estate is WORTH taxing! for it has been ASSESSED to destruction.

The case of the Estate of Sampson Benson is an illustration.

Ten and a half acres of this estate, which is a piece of salt meadow, has been assessed for "filling-in" the ENORMOUS sum of **$16,063.09!**

We find on reference to the Street Commissioner's Advertisement of 1840, this property advertised—For Sale—for this assessment for the lowest term of years that any person would take it in consideration of PAYING the assessment!

This land was advertised as 165 distinct lots: the charge for advertising was Two Dollars for each lot, which is $330.00 for the 10½ acres.

This large sum has been paid out of the city Treasury for *advertising* this small piece of Land, and NOW forms a part of the present Tax now collecting!

COMPTROLLER FLAGG would have charged for advertising this piece of land for sale for unpaid tax but—30 *cts.*

Gentle reader—Do you wonder that taxes are high?

In the Street Commissioner's advertisement of 1841 this same land is again advertised for sale for this *same* assessment. It is in this latter notice condensed.

This advertisement states that the assessment was confirmed May 31st, 1837.

The amount of the assessment is stated at $16,063.09 . Interest on this sum from that day to Dec. 31, 1842, being 5 years and 7 mo., at the rate of 7 per cent. per annum, will produce the large sum of $6277.95, and which, added to the cost of advertising and that of the assessment, produce an aggregate of $22,671.04.

We are informed by ISAAC ADRIANCE, Esq. who was one of the Executors of this estate, that this ten and a half acres was set down in the books of the Ward Collectors this year at $840.

The assessment is, therefore, rather less than *TWENTY-SEVEN times the Value of the land.*

The land formerly produced salt hay, and was for that purpose useful; but now it is covered with gravel, and is unproductive.

The Corporation applied to the Legislature last year for authority to purchase this land—with all other lands which might be advertised for sale for unpaid assessments for which no bids should be made—but the application found no favor with the Legislature.

The Corporation have no means to pay for land purchased except by a tax upon the real and personal estates of the citizens.

Citizens, are you in favor of being taxed for the purchase of this salt meadow?

What would the purchase money amount to at the end of the present century at 7 per cent. interest compounded?

Last year the Common Council paid to contractors large sums out of the proceeds of the county tax. The cause for this proceeding they state, is, that the assessments on the property of the citizens could not be collected for the reason that the amount of the assessment exceeded "the present market value of the land." (See Pro. Com. Council, Vol. 8, p. 121.) The reason assigned, although very extraordinary, is no less true; and they might have gone further and added, that in some of the cases the interest of the assessment alone exceeded the market value of land assessed.

Now suppose all these assessments should be included in the tax—what would be the consequence? surely a very great increase of the present rate. It is said that the contractors must be paid;—why then pay one contractor and not another?—if one is paid, all should be paid, and neither should have been paid a dollar until their claims had been first examined by a committee of the citizens interested in the property assessed.

We must diverge here to state that ALFRED A. SMITH, Esq. late City Comptroller, rendered to our citizens very important services by incorporating very important information in relation to assessment proceedings in detail in his annual reports. The information thus given is very important. The Anti-assessment Committee are under great obligations to Mr. Smith for most important aid in their operations, and they take pleasure in acknowledging the obligation. Mr. Smith, in the management of the fiscal concerns of the city at a period of great pecuniary embarrassment in our market, done himself credit and the public a good service: he was a faithful public officer, and is a most worthy citizen.

In the City Comptrollers's Report of 1841 we find in the same summary of Expenses of Street Openings, the Eighth avenue proceedings, and also those of the Seventh avenue which runs parallel with and about 1000 feet therefrom. These proceedings are worthy of special record here, as showing a mighty contrast.

The Eighth avenue, the report states, was opened *throughout* in 1811. See Comptroller's Report, p. 108.

In the Eighth Avenue Proceeding the FEES are stated as follows:

Counsel Fees, - - -	$ 745.45
Commissioners' Fees, -	760.68
Surveyor's Charges, - -	310.50
Appraisers' and Collectors' Charges, - - -	296.87
Incidental Expenses, -	178.37
	2,173.37

In the Seventh avenue, the Fees are stated as follows:

Counsel Fees, - -	$ 3976.77
Surveyor's Feees, - -	2801.00
Commissioners' Fees, - -	4920.00
Room hire, - - -	410.00
Clerk hire, - - -	250.00
Contingencies, - -	78.00
Collectors's Fees, - -	1115.00
	13,550.77

Difference in favor of Eighth avenue,....**$11,258.90**

The Seventh avenue—it is stated in same report, p. 122, was in 1839 opened from 21st to 129th street, a MUCH SHORTER DISTANCE than the 8th avenue.

The Commissioners' Fees in the Seventh avenue Proceeding amount to more than double all the fees and all the charges of all the officers in all the Eighth avenue proceedings!!

The *Counsel* FEES in the Seventh are ONE and TWO THIRDS more than ALL the fees and charges of all the Officers in the Eighth avenue!!

The Surveyor's Fees in the Seventh are near ONE AND ONE QUARTER more than all the charges of all the officers in the said Eighth avenue!

Here is the secret of the present high taxes.

We have another illustration—and it is well worth examining:—

In 1814 (see Comptroller's Report, p. 108) the Third av. was opened from the Bowery, corner of 7th st., to Harlem, which is also a greater distance than that of the noted Seventh avenue. The fees in this Proceeding are stated as follows:

Counsel Fees, - - -	$836.31
Commissioners' Fees, -	1187.50
Surveyor's Fees, - - -	213.00
Appraisers' and Collector's Charges, - - -	375.00
Contingent Charges, - -	350.00
	2,961.81

Difference in favor of 3d ave. compared with 7th in Expenses,.....**$10,588.86**

The Common Council claim to be Trustees of persons from whom money is received for assessments for opening streets—or that the Corporation, with the legislative power of which they are vested, is a trustee. If the position they take in this is correct, and an absolute trust is created by the act which authorizes these assessments; or a resulting trust arises by the operation of law; then in either case, the moneys arising from the assessment of every distinct improvement. is a separate and distinct trust, and should be so treated by the City Chamberlain, as well as all other public officers.

Had such a course been pursued how different would have been the state of things from what now unfortunately exists. It is well known that vast and immense sums have been paid out of the funds arising from county taxes to counsel, commissioners, surveyors, assessors, inspectors, appraisers and contractors for pretended services in assessment proceedings. Had these payments been made from each separate trust fund, the City Chamberlain would, of necessity, have been in the receipt of the money before he could have paid these claims: he would not have taken the responsibility of paying the money belonging to one trust, to satisfy claims on another.

These immense and vast sums have been paid before any collections were made from the persons assessed for the particular proceeding.

Take the Seventh Avenue assessment as an illustration :—

In February, 1839, (it is claimed) the Court confirmed the assessment—the very same month the City Chamberlain paid on the Warrants of the Mayor, Clerk of the Common Council, and Comptroller, in this single proceeding, **$3976.77** to Counsel, Surveyor **$2801.00**, and **$5643.00** to Commissioners of Estimate. By the last published statement of the Comptroller [See p. 102 of his Report of 1842] there was at that time uncollected of this extraordinary assessment $16,583.77.

The present City Chamberlain is a most excellent, most worthy citizen. The fault is not in him : it is mainly in the law that places these various funds all to the credit of the Corporation; and in our previous number the message of the Hon. Isaac L. Varian, refers to this very same matter, and was complained of by him.

The experiment now making of voluntary payment of taxes to the City Comptroller, clearly demonstrates a deep feeling of our influential citizens in the welfare of the city. They are ready and willing to come forward and support public credit by furnishing the means to discharge the public obligations, but they will require as a *sine qui non* that prudence and economy shall enter fully into the system of public expenditures.

The Anti-assessment Committee early in November addressed printed circulars to a large number of our influential citizens, informing them of the change in the collection of taxes, and that payment could be made directly to the City Comptroller without the intervention of a Collector. The first person that called at the Comptroller's office to embrace this new plan was that distinguished American Jurist the Venerable Chancellor Kent : before he had left the office, another distinguished citizen presented himself for the same purpose, the Hon. Stephen Allen, and he was followed by another, Saul Alley, Esq. The City Comptroller was not ready when the two first named gentlemen called, to receive the money for taxes, and therefore Mr. Alley was the first who paid taxes under the new system. Mr. Alley's tax was upwards of Eleven hundred dollars exclusive of the amount paid by his tenants : about $250 of this sum was for the Croton Interest.

John Targee, Esq., a democratic citizen of high standing in our community, in an hour after the circular from the Anti-assessment Committee reached his hands, presented himself at the Comptroller's office and paid his tax of near $800. James Boorman, Esq. Hon. Peter A. Jay, Wm. B. Crosby, Esq. and a great number of other citizens of high standing called and paid their taxes, which were very large in amonnt, to the Comptroller.

The acts of these gentlemen are an indication of their opinion of the new system, and we are very glad to see it sustained by the opinion of such good citizens.

We felt confident when, with the aid of the Hon. Solomon Townsend, we procured this important feature to be incorporated in the bill that the measure would be sustained hy the tax-paying citizens, but expected it would be found fault with by the Ward Collectors. The Legislature adopted this provision by a unanimous vote, on the ayes and noes being called.

The City Comptroller was at first not pleased with the change because he feared it would make him unpopular with the Collectors, but the opinions expressed by our influential citizens to him personally when paying their taxes, has induced his feelings to undergo a change, and now, we believe, he highly approves it.

We well know that Comptroller Smith was in favor of a change and in favor of the present system.

Our citizens are under great obligations to our late representative, Solomon Townsend, Esq., of the Assembiy, for valuable services in the passage of the provision of law changing the mode of collecting Taxes, and to the Hon. John B. Scott in the Senate.

In speaking of the retrenchment of City Expenses we deem it important to here give a copy of a communication published in the Evening Post recently, and remarks of the Editors of the Post thereupon. This communication was written by a citizen of high standing in this community, who was a member of the City Convention in 1829, convened for the purpose of framing a bill to amend the City Charter. The public expression of opinion by such men is a great public benefit: it is the mighty engine, mind influencing mind !

" The following communication has been sent us by a veteran democrat, who is sick of the party feuds which are mingled with our public affairs. When the charter of this city was amended, those who framed the amendment thought that they had remedied the mischief, by separating the municipal elections from the state and general elections. Since that time, however, the evil has grown worse.

' *To the Editors of the Evening Post :*

' Gentlemen—If you are not too much attached to party trammels, would you not do your subscribers and the tax-payers, some service by repeatedly calling their attention to their own vital interest, that of some different manner from the present, of the nominating the future members to our Corporation ? It cannot be but men of standing and tax-payers, might be found, to take charge of their own affairs, if it was but made general in every ward. As a beginning, I would suggest that some four or more persons from every ward, have an informal meeting, and agree on some general plan to be adopted without reference to party, to bring forward good men in each ward, and my firm conviction is, that at least one third of the present expenditures would be saved and the public infinitely benefitted. Served.' "

The means of reducing the Annual Taxes as recommended, is very easy. If our influential citizens of both political parties will meet together in a social conference and discuss these matters the result will be highly important. Many citizens feel that it is no use—that politicians will do as they please.

Not so : the intelligent citizens have an influence and a control which only needs to be exercised to be felt : it is they who can remedy the mischiefs and the evils complained of. The State Legislature is not governed by politicians—far otherwise ;—and the vote given the last three years on bills introduced into that body in relation to our city concerns fully show this.

Our city contains large numbers of citizens, whose opinions, publicly expressed, will have great influence on the public mind. These citizens must come forward and give the great public the benefit of their opinions upon our city affairs.

The time has now arrived to do this, and it should not be let pass without a united effort being made.

There are different views entertained by different persons as to the organization of our City Government. Some are in favor of departments, but we have had a lesson in these partitions which will be remembered while our city has a name. Our local assessments are a sad commentary on Departments.

The defects in our Amended Charter have now been seen and felt : its provisions which are peremptory, are sought to be deemed *directory.*

The members of our Common Council do not even regard these provisions of this law which were intended to restrain themselves from meddling with the public contracts, and hence a most severe enactment is necessary in this particular.

We will not here discuss this question, but will hereafter take it up as a distinct subject, and treat of it fully.

The sinking fund is a bubble that was counted upon to pay the city debt, the State of Illinois might with equally as much propriety create a sinking fund, and from that means satisfy the holders of the bonds of that State ; and they might say that the farms of the agriculturists of that State are holden for the payment of these bonds with as much propriety as our Corporation officers say citizens' property is holden for the payment of the Croton Bonds : *neither are holden.*

The Sinkiug fund is not what it was intended to be—its assets will not redeem the bonds due in 1850 ; the funds should only be invested in the stock they are specially to redeem, and not in other stock payable a quarter of a century afterwards.

We will refer to this portion of the subject again, and now proceed to the consideration of the next class of taxes before noticed.

Third—The County Taxes—In this class of taxes, there has been a great mistake by public officers. The Board of Supervisors of the County assess this tax, and to them alone belong the disbursement of the money so raised.

The Common Council have not the disposition of this money : the funds which the common council have the control of, is the City Revenue arising from wharves, markets, &c. &c., and that money when received by the City Chamberlain, should alone have been placed to the credit of the Corporation.

Had the various separate funds which have

been received been kept separate, this state of things now complained of, would not have happened; but so long as the fund raised for one specific purpose is applied to other purposes than that for which it was designed, there will be confusion and difficulties.

The tax act of the present year authorizes the supervisors of the city and county to assess upon the estates real and personal of the inhabitants and freeholders of the city and county of New-York the sum of $234,000 for city watch, $120,000 for lamps, and $746,000 for county contingencies, making in the aggregate One Million one Hundred Thousand Dollars.

The same act authorizes the delinquencies of the previous year, arising from either the defalcation of ward collectors or their sureties, to be assessed upon the respective wards in which the defalcation occurs.

Also the previous taxes remaining uncollected at the time the subsequent tax is imposed is included, and the amount is reassessed upon the delinquent ward, so that those who promptly pay their taxes must also pay the tax of the delinquent tax-payer.

We have in the City Comptroller's Annual Report of 1842, pages 51 to 56, under the head of "County Contingencies," some items which we will quote:—

"Refreshments for Members and Committees of the Common Council, - -	$3,941.97
"Carriage Hire, - - - - -	2,100.23
"Assistant Clerk for Contingent Expenses of Com. Council,	600.00
"Surveys for Street Commissioners Office, - - - - - -	1,131.73
"Cleaning City Hall, - - -	553.98
"Fuel for City Hall and Public Officers, - - - - - -	4,304.28
"Commissioners' and Surveyors' Fees in the matter of widening the Bloomingdale road, abandoned, - - - - - -	1,330.50
"Counsel Fees and COURT CHARGES, - - - - -	576-03
"Same in Cherry street, - - -	5,857.52
"Expenses of Deputy Comptroller and Finance Committee on a visit to Albany, - - -	364.25
"P. A. Cowdrey's Counsel Fees in quo warranto case, - - -	750.00
Under the head of "*Salaries*," p. 32.	
"Counsel of Corporation, including Clerk-hire, - - - -	4,712-72
On Page 32.	
"G. F. Tallman's taxed Counsel Fees, - - - - - - - -	3,060.76

We will continue these extracts in a future number.

These extraordinary expenditures create extraordinary taxes, and it is absolutely necessary that these expenses be retrenched: the people cannot pay them.

The interest on the permanent debt is payable quarterly, viz. on the 1st of February, May, August and November.

The interest on the public debt of the city, may for the year 1843, be set down at the round sum of One Million of Dollars. this will give quarterly payments of a quarter of a million each.

In 1820 the entire Annual Tax was but two hundred and fifty thousand dollars, a sum precisely equal to the estimated amount of the present city debt for a single quarter!

Citizens—have we come to this?—Yes! in the short space of twenty-two years, reckoning from 1820, we have reached this alarming crisis.

We find on looking back at the assessed valuation of the real and personal estate in the city of New-York, a great fluctuation during the last quarter of a century: as an illustration, we give the annual amount for several periods from 1816 to 1842, as follows:

	Population....	Real and Personal Estate.
In 1816,	95,519	$82,074,200
1821,	123,706	68,285,070
1826,	166,086	107,447,781
1831,	203,007	139,280,214
1836,	270,089	309,500,920
1842,	325,000	237,783,601

The greater or lesser assessed value has been occasioned by the speculative prices in most cases, but in some by the change, mode, manner and rate of assessment.

The price of property in this city will always be influenced more or less by general causes, but at the present time a local cause bears most heavily, viz.—the present oppressive amount of tax.

The rent of houses, stores &c. will be according to the rate of tax upon the property, or otherwise the value of the property must depreciate to correspond with the rate of taxes and price of rents.

As there are more buildings than tenants the consequence will be a decreased valuation, which of course will increase the rate of per cent of tax, and where is this to stop? —it cuts like a two-edged sword, *both ways*.

This question is one of very great importance and should at once receive the calm and deliberate consideration of our intelligent and public-spirited citizens.

New-York has passed through many chequered scenes. The great fire of 1835 devastated the lower section of the city to an extent that will be felt for a quarter of a century to come—and since that time, the local assessments for pretendod improvements, which have been equally as destructive to the unimproved part of the island--and thus, with the devouring flames on the one side, and mischievous assessments on the other, our proud city has been humbled to the dust.

The rich capitalist who reposed in confidence of the safety of his investment in stocks, was by this calamitous fire taught a lesson he little expected to learn.

The enterprising merchant who had by this disaster been reduced to poverty, was consoled by the sympathy of friends, and encouraged to hope for good luck to retrieve his losses,—but in a few short months this sympathy, like the changing of seasons, also changed. Many are the victims of a struggle to overcome what was beyond their reach: here then was a second calamity, worse to them than the first, for it was more trying, more exhausting to body—doubly so to mind, for there was no sympathy to sustain:—and thus it is, that we meet—in the same result, the wreck of fortune—what is worse, the wreck of mind.

While this delosation filled the minds of those whose estates were implicated in the consequences' another class of citizens who thought themselves in opulence, felt a double confidence in what they considered their greater security, their investments which were in lands—these the fire could not consume. Alas! six short years have passed, and—WHERE ARE THEY?—*where is their boasted security*—THEIR FAST PROPERTY?—GONE, GONE;—*swept*, as with the bosom of destruction, and buried in a heap of RUINS!—— Yes farms that had not changed hands, but have remained in the same family for near two centuries, have been wrested from the possession of the venerable proprietors with as little ceremony as the midnight robber takes the money from the pocket of his victim!!

A proceeding, called an Assessment--more destructive than a subterranean convulsion or a mountain avalanche—has poisoned the soil to its nether surface, and beyond it to the centre of gravity, and extended upward into space as far as any terrestrial habitation can reach, and left a cloud that an age will not remove.

Many of our citizens consider that the fault all lies in public officers: there is enough there, but it is not all there—far from it: the fault is in the system, and the GREAT defect is in the law.

Let the laws be repealed and new laws passed—let the system which has proved so ruinous be abandoned, and a new one arranged by our best men.

PENALTY IN THE TAX ACT.

A most extraordinary, most unexpected, most erroneous construction has been suddenly put upon the tax act of April 11th, 1842, by the learned counsel of the Corporation, and also by the worthy City Comptroller.

It is not however the first time that good men have given erroneous opinions nor is it the first time that a learned counsel thought his client right and his opponent wrong.

Erroneous opinions when they have the sanction of great names are always dangerous.

These public officers say the annual tax is due on the 31st OF DECEMBER, 1842. We say that it is not payable until the 31st day of January, 1843, and so says the law.

We are backed in this assertion by the written opinions of legal gentlemen of the highest standing.

The Comptroller has given notice that he will exact a penalty of ONE per cent. on all taxes remaining unpaid on the 1st of January: the LAW says the penalty only attaches to taxes remaining unpaid on the 1st day of February.

Which must prevail the Comptroller or the Law!——

Mr. Williamson as Receiver General of Taxes is a State officer, and he should have also consulted COMPTROLLER FLAGG and the Attorney General in this important matter of setting up so extraordinary a construction of the law. We will refer to this subject again.

N. Y. MUNICIPAL GAZETTE...Extra.

VOL. 1. NEW YORK, DECEMBER 24, 1842. No. —

LAWS OF THE STATE.

Taxes, &c.

We give in the present number the Provisions of the Revised Statutes, containing the "Regulations concerning the Assessment of Taxes on Incorporated Companies, and the Commutation and Collection thereof," together with three sections of other provisions of law applicable to this present subject. We ask of the Officers of Incorporated Companies a careful examination of these provisions.

The great change made by the great increase of Taxes makes this a matter of importance.

An Equitable assessment of Taxes should be the object of every good government, and therefore, if the operation of the present law is inequitable, it should be made Equitable by an amendment thereof.

We precede these by the Croton Tax Act of 1841 and the Tax Act of 1842, and the Act providing for Voluntary Payment to the City Comptroller instead of the Ward Collectors, and also a portion of the mill tax act.

CHAPTER 306.

AN ACT *to amend an act entitled "An act to provide for supplying the City of New York with pure and wholesome Water," passed May 2, 1834.*

[Passed May 26, 1841, by a two-third vote.]

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

The Sum of $3,500,000 may be Raised to be called Water Stock.

§ 1. It shall be lawful for the mayor, aldermen and commonalty of the city of New York to raise by loan, from time to time and in such amounts as they shall see fit, a further sum not exceeding three millions five hundred thousand dollars, by the creation of a public fund or stock, to be called "The Water Stock of the city of New York," which shall bear an interest not exceeding six per cent. per annum, and shall be redeemable at such periods as the said mayor, aldermen and commonalty shall from time to time direct, not to exceed forty years.

Certificates of Water Stock may be Issued.

§ 2. It shall be lawful for the said mayor, aldermen and commonalty to direct the issuing of certificates of the water stock of the city of New York, authorized by this act, in such nominal amounts, not less than one hundred dollars in each certificate, and in such manner and form as they may judge most expedient for the interest of the city; and they are hereby authorized to sell and dispose of such stock at public auction or at private sale, or by subscription, for such price and on such terms as they may think proper.

Bonds for Short Loans may be Issued.

§ 3. It shall be lawful for the said mayor, aldermen and commonalty, from time to time, to issue the obligations under this law in such sums as they shall deem proper, not less than two hundred and fifty dollars each; and therein expressed to be transferable only on the books of the office of the comptroller of said city, by the holder thereof in person or his attorney duly authorized in writing, for short periods, bearing an interest not exceeding seven per cent. per annum, and in anticipation of the proceeds to arise from the negotiation of the permanent stock anthorized by this law.

Moneys how to be Applied.

§ 4. The moneys to be raised by virtue of this act shall be applied and expended to and for the purpose of supplying the city with pure and wholesome water, according to the provisions of the act hereby amended; and no part of the funds created by this act, or any other fund raised for the purpose of constructing or completing the Croton aqueduct, and the works connected therewith, and distributing the water through the city, shall be diverted from such object.

Provisions of Former Laws Applicable.

§ 5. All the provisions of law heretofore passed on this subject, pledging the faith of the city of New York, and providing a sinking fund for the redemption of the stock issued by virtue thereof, are hereby made applicable to the stock issued in pursuance of this act.

Money to be Raised by Tax to Pay Interest.

§ 6. It shall be lawful for the mayor, recorder and aldermen of the city of New York, as the supervisors of the city and county of New York, of whom the mayor or recorder shall be one, from time to time and as often as they may deem it necessary, to order and cause to be raised by tax on the estates real and personal of the freeholders and inhabitants of, and situated within the said city, and to be collected, such amount of money as shall be requisite to defray the interest upon the water stock of the city of New York.

How to be Assessed and Collected.

§ 7. The said money shall be assessed and collected in the same manner as now provided by law for the assessment and collection of taxes in the city of New York.

Aqueduct to be Completed according to Plan.

§ 8. It shall be the duty of the water commissioners of the city of New York, to finish and complete the aqueduct for supplying the said city with water, down to and including the distributing reservoir at Murray's hill, according to the plan adopted by the said commissioners, and ratified by the common council of the said city, with such immaterial alterations as may be necessary, and as may be agreed upon by the said water commissioners and the said common council.

Plan of crossing Harlem river may be Changed.

§ 9. The said commissioners, by and with the consent of the said common council, shall have full power and authority to change the plan of crossing the Harlem river with arches and piers, and instead thereof to carry the water across the said river by means of inverted syphons of iron pipes, until otherwise directed by the legislature, so as not unnecessarily to interrupt the navigation of the said river. And the said commissioners are further authorized by and with the consent of the said common council, to alter the plan of constructing the reservoir at or near to Yorkville, and to complete so much of such reservoir as shall be deemed sufficient for the present purposes of such aqueduct.

All the Work necessary to Supply the City with Water to be Executed, and certain Contracts to be Assumed.

§ 10. It shall be the duty of the mayor, aldermen and commonalty of the city of New York, to execute all the work necessary for supplying the said city with water, and for distributing the same for the use of the inhabitants thereof, below the said distributing reservoir at Murray's hill; and the said mayor, aldermen and commonalty shall assume the execution and performance of the following contracts, made by the said water commissioners for work and materials to be supplied for the construction of the said aqueduct, below the said reservoir at Murray's hill; that is to say, their contract with Henry V. B. Barker, dated twentieth October, one thousand eight hundred and forty, for work to be done on the Fifth avenue, between Fortieth and Twenty-first streets; their contract with John B. Chollar and Ebenezer Jones, made the twenty-third of October, one thousand eight hundred and forty, for iron pipe; their contract with S. V. Merrick and John Town, for seven hundred tons of thirty-inch iron pipe; and also their contract with T. H. Wintersteen and David I. Myers, for five hundred tons of iron pipe; all which said contracts are deposited in the office of the comptroller of the city of New York.

REMARKS.

The above Act was passed at the close of the Session and was hurried through. We addressed to His Excellency Gov. SEWARD, a written communication on the subject of this bill before he approved it, in which we suggested that its provisions were not in accordance with those of the Constitution of the State. The lateness of the Session afforded no time for the examination of the bill by the Governor before the adjournment.

Chapter 83.

AN ACT *to enable the supervisors of the city and county of New York to raise money by tax.*—[Passed March 21, 1842.]

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

The Sum of $746,000 to be Raised by Tax—Common School Tax, &c.—Also $234,000, Watch district—Also $120,000, Lamp district—Taxes, how to be Assessed and Collected.

§ 1. The mayor, recorder and aldermen of the city and county of New York, as the supervisors of the city and county of New York, of whom the mayor or recorder shall be one, are hereby empowered, as soon as conveniently may be, after the passage of this act, to order and cause to be raised by tax on the estates real and personal, of the freeholders and inhabitants of and situate within the said city, and to be collected a sum not exceeding seven hundred and forty-six thousand dollars, to be applied towards defraying the various contingent expenses, properly chargeable to the said city and county, and such expenses as the mayor, aldermen and commonalty of the city of New York may, in any manner sustain or be put to by law; and also such further sum by a tax as aforesaid, as is required by law to be raised by tax in the said city for the support of common schools, and as may be necessary for supplying the deficiency of taxes upon any one and every one of the wards of the said city, imposed or laid during the year one thousand eight hundred and forty-one, owing to the insolvency of the collectors of the said wards, or any or either of them or their sureties, or their inability to collect the said tax; and also for defraying the whole of the expenses for assessing and collecting the taxes to be raised as aforesaid, (such deficiencies, however, to be assessed on the estates real and personal, of the freeholders and inhabitants of and situated within the wards respectively, where they shall happen, as aforesaid;) and also a further sum not exceeding two hundred and thirty-four thousand dollars by tax, on the estates real and personal, of the freeholders and inhabitants of and situated within that part of the city of New York, which may be designated by an ordinance or resolution of the common council of the said city, as the "Watch District," to be applied towards defraying the expenses of watching and guarding such part of said city; and also a further sum, not exceeding the sum of one hundred and twenty thousand dollars, by a tax on the estates, real and personal, of the freeholders and inhabitants of and situated within that part of the city of New York which may be designated by an ordinance or resolution of the said common council, as the "Lamp District," to be applied towards defraying the expenses of lighting such parts of the said city last mentioned; and also such further sum by tax as aforesaid, as may be necessary for supplying the deficiencies of taxes upon all that part of the city constituting the watch and lamp districts, during the year one thousand eight hundred and forty-one, owing to the insolvencies of the collectors of any of the wards of the said city, and their sureties, or their inability to collect the said tax; and also for defraying the expenses of assessing and collecting said taxes, such deficiencies, however, to be assessed upon the estates, real and personal, of the freeholders and inhabitants of and within the said wards respectively, where they shall happen as aforesaid, within the districts aforesaid.

§ 2. The said several sums of money shall be assessed and collected in the manner provided by law for the assessment and collection of taxes within this state, except so far as the same may be contrary to the provisions contained and referred to in the act entitled "An act respecting the collection of taxes in the city of New York," passed April 6th, 1825, and in the act to amend the same, passed April 20, 1830; also in the fourth section of the act entitled "An act to enable the mayor, aldermen and recorder of the city of New York, to raise money by tax," passed March 10th, 1820; also in the act entitled "An act authorizing a per centage to be added to unpaid taxes in the city of New York," passed the 13th of April, 1835; and also in the act entitled "An act to amend the act respecting the collection of taxes in the city of New York," passed April 13th, 1839, which said provisions, so far as they relate to the assessment and collection of all or any taxes in the city of New York, are hereby declared to be in full force and effect; and each person's tax in every separate ward of the said city shall be collected in one payment, and the money so collected, shall be paid into the hands of the treasurer or chamberlain of said city, at such times and in such manner as directed by law.—[*Laws of New York*, pages 55 and 56.]

Chapter 218.

"*An Act respecting the Collection of Taxes in the City and County of New York.*"—[Passed April 11, 1842.]

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. The Assessors annually chosen in each ward of the city of New York, shall on or before the fifth day of June next, after being chosen, proceed to assess the property in their respective wards according to law, and shall complete the assessment according to law on or before the fifteenth day of August next following, and make out one fair copy thereof to be left with one of their number on or before the twentieth day of August next following, and shall thereupon according to law give notice of having completed such assessment, and that a copy thereof is left with one of such Assessors, (naming him,) where the same may be seen and examined by any of the inhabitants from the said twentieth day of August to the tenth day of September following, both inclusive; that they will meet a the expiration of the said tenth day of September at a place in said notice to be specified to review their assessment on the application of any person conceiving himself aggrieved, and such proceedings shall thereupon take place as is by law provided. And such assessors shall sign the said assessment roll, and deliver the same on or before the twentieth day of September next ensuing to the Comptroller of the said city, who shall deliver the same to the Supervisors of the said city at their next meeting, and that for any neglect, omission, or refusal to perform the requirements of this section, the parties offending shall be liable to the penalties mentioned in the eleventh section of the Act, April 23d, 1823, "Entitled An Act for the assessment and collection of Taxes."

§ 2. The first section of the act entitled an act authorising a per centage to be added to unpaid taxes in the city of New York, passed April 13, 1835, is hereby amended, so that the said section shall read as follows: Whenever any tax of any description of the estates, real or personal, of the freeholders and inhabitants of, and situated in the city of New York, shall remain unpaid on the *first day of February* next ensuing, the time prescribed by law for the delivery of the assessment roll to the collectors in said city, it shall be lawful for the collectors whose duty it may be to collect such tax, to charge, receive, and collect in addition to the amount of such tax, one per cent. on the amount thereof, and to charge, receive, and collect upon such tax so remaining unpaid on the last day of each month, between the month of November and the time prescribed by law for the collectors in the said city to make their returns to the chamberlain or treasurer thereof, a further addition or increase of one per cent. on the amount of such tax, and such increase or per centage shall be paid over and accounted for by such collector as a part of the tax collected by him.

§ 3. The act entitled "an act to amend the acts respecting the collection of taxes in the city of New York, passed April 3d, 1839, is hereby repealed."

§ 4. *Any person who may be desirous of paying his tax or taxes previous to the first of February, shall, on paying the amount thereof, to the Comptroller of the City of New York, be allowed a deduction therefrom at the rate of six per cent. per annum.*

Chapter 114.

AN ACT *to provide for paying the debt and preserving the credit of the State.*

[Passed March 29, 1842.]

Tax of One Mill on the dollar to be Levied and Collected.

§ 1. A state tax of one mill on the dollar of the valuation of real and personal estate within this state, shall, in each and every year, until the same shall cease as hereinafter provided, be raised, collected and paid in the manner prescribed in the Revised Statutes, Part first, Chapter thirteen, "Of the assessment and collection of taxes," which tax shall be paid by the county treasurers respectively, into the treasury of this state, and the same shall be received into the treasury and held by the Treasurer of this state, for the purposes following, that is to say:

HEADS OF SECTIONS.

Part to be applied to the use of the general fund—Part for the canal purposes—Comptroller to state revenue of general fund—Payments for general fund—Stock Debt, &c.—Surplus, how to be applied—Loan for general fund—Power of commissioners of canal fund to make loans—To pay interest on debt in 1842—For Chemung canal—To pay temporary loans—To pay arrearages due contractors, &c.—For preserving the works in progress, &c.—To replace unavailable funds—Interest chargeable on canal revenues—Loans—Temporary investments of loans—U. States deposits and common school funds—Further expenditures on public works in progress suspended—Report to be made—Of revenue of canals—Of expenditures on canals—Of canal debt—Tax imposed by this act pledged to the public creditors—Privileges of banks and banking associations—This act to be sent to boards of supervisors.

TAXES ON INCORPORATIONS.

TITLE IV.

REGULATIONS CONCERNING THE ASSESSMENT OF TAXES ON INCORPORATED COMPANIES, AND THE COMMUTATION OR COLLECTION THEREOF.

SEC. 1. Monied corporations, deriving income or profit, liable to taxation.
2. Officers of such company to deliver statement annually to assessors; contents.
3. A like statement to be delivered to comptroller.
4. Forfeiture of $250 for omitting to furnish such statements.
5. If company be prosecuted therefor, terms on which suit may be discontinued.
6. Assessors to enter such companies and their property in assessment roll.
7. Value of stock of certain companies, to be inserted in assessment roll.
8. Value of stock may be reduced by affidavit.
9. Company not in the receipt of any income, not to be taxed.
10. Stock of companies to be taxed as other property of the county.
11. Certain companies may commute for their taxes.
12. Certain companies to be exempted from taxes.
13. Officers of companies claiming exemption, to make affidavit as to income, &c.
14. Affidavit required from company electing to commute.
15. Assessments on companies to be set down in fifth column of corrected roll.
16. Supervisors to send names of companies liable to taxation, to comptroller, &c.
17. Taxes on companies to be demanded of president, &c.: if not paid, how collected.
18. To be paid out of the funds of the company.
19. If collector cannot collect tax, to return same to county treasurer, &c.
20. County treasurer to certify facts to comptroller; taxes how to be credited.
21. Duty of comptroller and attorney-general, as to companies neglecting to pay.
22. Chancellor to order sequestration of property, &c. to satisfy taxes and costs.
23. Attorney-general may also recover by action at law, such tax with costs.

Companies liable to Taxation.

§ 1. All monied or stock corporations deriving an income or profit from their capital, or otherwise, shall be liable to taxation on their capital, in the manner herein after prescribed.

Officers to deliver Statements to Assessors.

§ 2. The president, cashier, secretary, treasurer, or other proper officer, of every such incorporated company, shall, on or before the first day of July in each year, make and deliver to the assessors, or one of them, of the town or ward in which such company is liable to be taxed, according to the provisions of the sixth section of the second Title of this Chapter, a written statement, specifying,

1. The real estate, if any, owned by such company, the towns or wards in which the same is situated, and the sums actually paid therefor:

2. The capital stock actually paid in and secured to be paid in, excepting therefrom the sums paid for real estate, and the amount of such capital stock held by the state, and by any incorporated literary or charitable institution: And,

3. The town or ward in which the principal office or place of transacting the financial business of such company, is situated; or if there *be [*415] no such principal office, the town or ward in which its operations are carried on, or in which it is liable to be taxed, under the provisions of this Chapter.

And to Comptroller.

§ 3. The president or other proper officer of every such company, shall also deliver to the comptroller, on or before the first day of July in each year, a written statement, containing the same matters required by the foregoing section, to be specified in the statement to be delivered to the assessors. The statements required by this and the preceding section of this Title, shall be certified under the oath of the said president or other proper officer, to be in all respects just and true.

Penalty.

§ 4. If the statements above required, or either of them, shall not be furnished by any company to the assessors and to the comptroller, within thirty days after the time above provided, the company neglecting to furnish such statements, or either of them, shall forfeit to the people of this state, for each statement omitted to be furnished, the sum of two hundred and fifty dollars: and it shall be the duty of the comptroller to furnish the attorney general with an account of all companies that shall neglect to render such lists, that he may prosecute for the penalties hereby imposed.

Suit Therefor.

§ 5. If any company, that shall be prosecuted for any such penalty, shall pay the costs of prosecution and furnish the statement required, the comptroller, if he shall be satisfied that the omission was not wilful, may, in his discretion, discontinue such suit.

Companies how Assessed.

§ 6. The assessors shall enter all incorporated companies from which such statements shall have been received by them, and the property of such companies, and the property of all other incorporated companies, liable to taxation in their respective towns, in their assessment rolls, in the following manner:

1. They shall insert in the first column of their assessment rolls, the name of each incorporated company in their respective towns or wards, liable to taxation on its capital, or otherwise: and under its name, they shall specify the amount of its capital stock paid in, and secured to be paid in; the amount paid by such company for real estate, then belonging to such company, wherever the same may be situated; and the amount of its stock, if any, belonging to the state, and to incorporated literary and charitable institutions.—[4. Paige, 401.]

2. In the second column, they shall enter the quantity of real estate owned by such company, and situated within their town or ward; and in the third column, the actual value thereof, estimated as in other cases.—[4 Paige, 394.]

3. In the fourth column, they shall enter the capital stock of every incorporated company, (excepting manufacturing and turnpike corporations, and marine insurance companies,) paid in, and secured to be paid in; after deducting the sums paid out for all real estate of *such [*416] company, wherever the same may be situated, and then belonging to it, and the amount of stock, if any, belonging to the people of this state, and to incorporated literary and charitable institutions.

Valuation of Stock.

§ 7. The assessors shall insert in the column mentioned in the preceding section, the cash value of the stock of all manufacturing and turnpike corporations, (to be ascertained by the assessor, by the sales of the stock, or in any other manner,) deducting therefrom the items mentioned in the preceding section; which value, thus ascertained, together with the value of the real estate of such corporations, shall constitute the amount on which the tax of such corporations shall be levied.

Preceding sections Extended.

§ 8. The provisions of the fifteenth section of the second Title of this Chapter, shall be, and are hereby extended to the incorporated companies in the two preceding sections named; and the president, secretary, or other proper officer, may make the affidavit required by said section.

The section referred to in Sec. 8, of this Chapter, which precedes this paragraph, is as follows:—

Affidavit of Value of Property.

*[§ 15. If any person whose real or personal estate is liable to taxation, shall at any time before the assessors shall have completed their assessments, make affidavit that the value of his real estate does not exceed a certain sum, to be specified in such affidavit; or that the value of the personal estate owned by him, after deducting his just debts, and his property invested in the stock of incorporated companies, liable under this Chapter to taxation on their capital, does not exceed a certain sum, to be specified in the affidavit, it shall be the duty of the assessors to value such real or personal estate, or both, as the case may be, at the sums specified in such affidavit, and no more.†]

Company when to be Exempted.

§ 9. If the president or other proper officer

* Our attention has been called to this Section by R. A. READING, Esq. President of the City Fire Insurance Company, as a provision which will entitle Incorporated Companies to the same deduction as private persons from the assessors' valuation;—if the assessors have been ignorant of this Provision of the Law, the Companies who are overtaxed have an equitable claim for relief, notwithstanding a neglect on their part to avail themselves of its provisions from not knowing its existence. Our citizens expect—and have a clear right so to do—that public officers should know the law and act in accordance with it. It is not the duty of assessors to swell their assessment roll by inequitable assessment. It is not equitable to require Companies to pay a tax on the portion of capital which has been lost—it is like imposing a tax on a citizen for what HE HAS NOT. We believe it is a popular maxim that every citizen is presumed to know the law, and the doctrine may have the sanction of judicial officers high in authority; but if the doctrine is erroneous, which it surely is, the higher the authority which sanctions it the greater is the danger to flow from it. Great names oftentimes give currency to very erroneous doctrines.—ED.

† Deductions may also be made for debts owing by residents of any other states in certain cases. See post, Title 7, § 27. [See 3d column next page.]

of any incorporated company named in the assessment roll, shall show, to the satisfaction of the board of supervisors, at their annual meeting, within two days from the commencement thereof, by the affidavit of such officer, to be filed with the clerk of the board, that such company is not in the receipt of any profits or income, the name of such company shall be stricken out of the assessment roll, and no tax shall be imposed upon it. And the assessment of every monied or stock corporation, authorized to make dividends on its capital, from which no such affidavit shall be received, shall be conclusive evidence, that such corporation was liable to taxation, and was duly assessed.

Stock how Assessed—Commutation.

§ 10. The capital stock of every company liable to taxation, except such part of it as shall have been excepted in the assessment roll, and by the previous sections of this Title, shall be assessed and taxed in the same manner as the other real and personal estate of the county, unless such company shall be entitled to commute under the next section, and shall elect so to do; in which case, no tax shall be imposed by the board of supervisors on the property of such company.

Commutation.

§ 11. All companies employed wholly or principally in manufacturing, and all marine insurance companies, whose nett annual income shall not exceed five per cent. on the capital stock paid in, and secured to be paid in, shall be entitled to commute for their taxes, by paying directly to the treasurer of the county in which the business of the company is transacted, five per cent. upon all such nett income made by such company during the preceding year.

Certain companies Exempt.

§ 12. All turnpike, bridge, or canal companies, whose nett annual income shall not exceed five per cent. on the capital stock paid in, and secured to be paid in, shall be exempted from taxation.

Requisites to Exemption.

*§13.[*417] To entitle any such company to the exemption aforesaid, the president and secretary, or some two officers of the company, shall make affidavit, stating the capital stock paid in, and secured to be paid in, together with the income and profits, and the total expenditures, during the preceding year, of such company; which affidavit shall be delivered to the assessors of the town, at the time of making their assessments.

§ 14. The president, or other proper officer of each company electing to commute, shall make affidavit before some officer authorized to take affidavits, stating the amount of such nett income; and on filing the same with the clerk of the board of supervisors, at their annual meeting, within two days from the commencement thereof, accompanied by the receipt of the county treasurer, acknowledging the payment of the proper commutation, such board of supervisors shall impose no tax on the property of such company.

Taxes to be Stated and Collected.

§ 15. The amount of taxes assessed on all incorporated companies liable to taxation, and not electing to commute, shall be set down by the board of supervisors, in the fifth column of the corrected assessment roll, and shall form a part of the monies to be collected by the collector.

Duty of Supervisors.

§ 16. The board of supervisors having completed the assessment, shall transmit to the comptroller, with the aggregate valuations of the real and personal estate in their county, a statement, showing the names of the several incorporated companies liable to taxation in such county; the amount of the capital stock paid in, and secured to be paid in, by each; the amount of real and personal property of each, as put down by the assessors, or by them; and the amount of taxes assessed on each. In those counties in which there is no such company, the board of supervisors shall certify such fact to the comptroller, with their returns of the aggregate valuations of real and personal estate.

Duty of Collector.

§ 17. The collector shall demand payment of all taxes assessed on incorporated companies, from the president, or other proper officer of such companies, and if not paid, shall proceed in the collection and payment thereof, in the same manner as in other cases, and shall be liable to the same penalties for the non-payment of monies collected by him. And the collector's receipt shall be evidence of the payment of such tax.

Taxes how Paid.

§ 18. Such taxes shall be paid out of the funds of the company, and shall be rateably deducted from the dividends of those stockholders whose stock was taxed, or shall be charged upon such stock, if no dividends be afterwards declared.

Proceedings if Taxes cannot be Collected.

§ 19. If the collector shall not be able to collect any tax assessed upon an incorporated company, he shall return the same to the county treasurer, and at the same time, make affidavit before the county *treasurer [*418], or some other officer authorized to administer oaths, that he had demanded payment thereof from the president, or other proper officer of the company, and that such officer had refused to pay the same, or that he had not been able to make such demand, as the case may be; and that such company had no personal property, from which he could levy such tax.

§ 20. The county treasurer shall thereupon certify such facts to the comptroller, who shall pass to the credit of such county treasurer the amount of all taxes so returned and certified, as in the cases of taxes on the lands of non-residents.

Attorney-general to file Bill in Chancery.

§ 21. The comptroller shall furnish the attorney-general, with the names of all companies refusing or neglecting to pay the taxes imposed on them, with the amount due from them respectively; and the attorney-general shall thereupon file a bill in the court of chancery, against every such company, for the discovery and sequestration of its property.

Powers of Chancellor.

§ 22. The chancellor on the filing of such bill, or on the coming in of the answer thereto, shall order such part of the property of such company to be sequestered, as he shall deem necessary for the purpose of satisfying the taxes in arrear, with the costs of prosecution; and he may also, at his discretion, enjoin such company, and the officers thereof, from any further proceedings under their act of incorporation, and may order and direct such other proceedings, as he shall deem necessary, to compel the payment of such tax and costs.

Further Remedy.

§ 23. The attorney-general may also recover such tax, with costs, from such delinquent company, by action in any court of record in this state.—(*Revised Statutes, Vol. 1, new edition, pages* 402 *to* 406.)

The following Sections are Provisions of the Law referred to in the reference in the clause of the 15th Section of Title 2, herein before set forth—

When Inhabitants are Exempt from Assessment on Debts taxed in other States.

§ 27. Whenever it shall satisfactorily appear to the assessors of any town or ward, by the oath of any inhabitant of this state, or by other proofs, that any debts due to such inhabitant, by residents in any other state, are by the laws of such state subject to taxation, and have been actually taxed in such state within twelve months preceding, it shall be the duty of such assessors to deduct the amount of such debts from the personal estate of such inhabitant.

Duty of Comptroller.

§ 28. The comptroller shall prepare instructions and forms for the execution of this act, and shall cause a sufficient number of copies thereof and of this act to be printed and distributed to the assessors, county treasurers and clerks of the boards of supervisors of the state.*

REMARKS.

The cases referred to in the Note appended to the first and second subdivisions of the Sixth Section we have examined: one is the case of the Bank of Utica *vs.* the Corporation of Utica, the other is that of the Mohawk Rail Road Company. In neither of these cases was the 8th in connection with the 15th Section referred to, or noticed: nor was there any question involved in either of these cases which made the provisions of either of these sections applicable in either case.

The question before the Chancellor, as we understood the case in which the Bank of Utica was a party, was, as to the right to tax Surplus Capital: any thing in this Opinion of the Chancellor in this case in addition to deciding the question at issue, is mere dicta, and His Honor might change this on full argument.—Ed.

NEW YORK MUNICIPAL GAZETTE.

Published by the ANTI-ASSESSMENT COMMITTEE, and Distributed Gratuitously---Edited by E. Meriam.

VOL. I.] NEW-YORK, NOVEMBER 17, 1843. [No. 16.

The present number of our paper is *larger* than any of the previous numbers. It embodies Matter of great Public Interest, and an EXTRA NUMBER of Copies have been published, for extensive circulation among public men both at home and abroad.

Our City Government is—in theory, most beautiful; but in its practical operations—the most Despotic, and the most Corrupt, of any government on the face of the globe.

It is a Municipality created by Statute, the same as a Village Corporation; but, in its operations, usurps the Powers of Sovereignty, and actually EXERCISES THEM in defiance of the Constitution and Laws of the State.

CITY CONVENTION.

In the month of May, 1829, the Citizens of New York, at an election held in the different Wards, elected by ballot Seventy Delegates (five from each ward) to form a convention to AMEND the City Charter. These delegates MET in convention in June, 1829. From the "Journal of their Proceedings," as published with the notes of CHANCELLOR KENT, are the following DOINGS:

"IN CONVENTION, JULY 23, 1829.

"Mr. John Duer offered the following additional section to come in between sections 9 and 10, as reported by the committee.

"Every law, ordinance or resolution, which shall be introduced in either Board, and also every report of a committee recommending any public improvement, or any appropriation of public monies, *shall be Published without delay in all the Newspapers employed by the Corporation.*

"Mr. M. M. Noah offered the following Amendment:

"And all Reports of committees which shall recommend any specific improvement, involving the Appropriation of Public Monies, or taxing or assessing the Citizens of said city, shall be PUBLISHED IMMEDIATELY after the adjournment of the Board, under the authority of the Common Council, in the Daily Newspapers.

"Mr. Whiting moved that the further consideration of the 9th section be, for the present, postponed.

"The Chairman having put the question on the motion for postponement, it was determined in the negative.

"Mr. Duer then moved, that the consideration of the additional section offered by him, and also of the amendment thereto, offered by Mr. Noah, be postponed.

"The Chairman having put the question on Mr. Duer's motion for postponement, the same was determined in the affirmative."

"JULY 29, 1829.

"Mr. Noah made a motion, that the committee of the whole do re-consider the 7th section of the report of the committee of fourteen; and the chairman having put the question on Mr. Noah's motion, the same was determined in the affirmative.

"On motion of Mr. Noah, the committee of the whole then proceeded to consider the the amendments of the said seventh section offered by him in convention on the 23d instant.

"Mr. Hedley made a motion to amend the amendment of Mr. Noah, by adding after the word 'Board' in the third line thereof, the words '*in one or more of the daily newspapers*,' and to strike out in the last line the words '*in the daily newspapers.*' Whereupon Mr. Noah assented to the said amendment for striking out.

"Mr. Stephen Allen made a motion to amend the amendment offered by Mr. Noah, by adding after the word '*all*' in the first line, the words '*resolutions and.*'

"And the Chairman having put the question on Mr. Allen's amendment, the same was determined in the affirmative.

"Mr. Van Buren made a motion to amend the amendment of Mr. Noah, by adding at the end thereof the words 'IN ALL THE NEWSPAPERS EMPLOYED BY THE CORPORATION.'

"Whereupon Mr. Hedley withdrew his amendment.

'Mr. John Hone made a motion to amend the said amendment of Mr. Noah, by adding at the end thereof the words '*and whenever a VOTE is taken in relation thereto*, THE AYES AND NOES SHALL BE CALLED AND PUBLISHED IN THE SAME MANNER.'

"The Chairman having put the question on Mr. Van Buren's amendment, the same was determined in the affirmative.

"The Chairman having put the Question on Mr. J. Hone's Amendment, the same was determined in the affirmative.

"The Chairman then read the 7th section as Amended, in the following words:

"SEC. 7. *The Boards shall meet in separate chambers*, and a majority of each *shall* be a quorum to do business. Each Board *shall* appoint a president from its own body, and *shall* also choose its clerk and other officers, determine the rules of its own proceedings, and be the judge of the qualifications of its own members. Each board *shall* KEEP A JOURNAL OF ITS PROCEEDINGS, and the doors of each *shall* be kept open, except when the public welfare shall require secrecy; AND ALL RESOLUTIONS AND REPORTS OF COMMITTEES WHICH SHALL RECOMMEND ANY SPECIFIC IMPROVEMENT INVOLVING THE APPROPRIATION OF PUBLIC MONIES, OR TAXING OR ASSESSING THE CITIZENS OF SAID CITY, *SHALL* BE PUBLISHED IMMEDIATELY, AFTER THE ADJOURNMENT OF THE BOARD, UNDER THE AUTHORITY OF THE COMMON COUNCIL, IN ALL THE NEWSPAPERS EMPLOYED BY THE CORPORATION; AND WHENEVER A VOTE IS TAKEN IN RELATION THERETO THE AYES AND NOES SHALL BE CALLED AND PUBLISHED IN THE SAME MANNER."

"And the Chairman having put the question on the said section as amended, the same was determined in the affirmative."

"IN CONVENTION—JULY 23D, 1829.

"MR. STEPHEN ALLEN offered to the consideration of the Convention the following Amendments to the Report of the Committee of Fourteen:

"§ Unless by virtue of a Special Act of the Legislature for that purpose, the Common Council shall not have authority to borrow, in any one year, on the credit of the Corporation, a sum exceeding * * * thousand dollars; nor for a longer period than * * * months: nor shall any loan so made be Renewed, or its Time of Payment be extended, unless the same be *funded* under an Act of the Legislature.

"Ordered, That the same do lie on the table, and be printed for the use of the members."—Page 260.

"JULY 27, 1829.

"MR. STEPHEN ALLEN made a motion that the Committee now proceed to consider the *two* additional Sections offered by him in Convention, in the sitting on the 23d inst.

"And the Chairman having put the Question on considering the said *two* Additional Sections, the same was determined in the affirmative.

"Mr. Allen moved that the blank in the third line of the first of the said section be filled with the words 'ONE HUNDRED,' and the Chairman having put the question thereon, the same was determined in the affirmative.

"Mr. Allen then moved that the blank in the 4th line be filled with the word 'TWELVE,' and the Chairman having put the question thereon, the same was determined in the affirmative.

"The Chairman then read the section in the following words:

"SEC. 23. Unless by a Special Act of the Legislature for that purpose, the Common Council shall not have authority to borrow, in any one year, on the Credit of the Corporation, a SUM exceeding One Hundred Thousand Dollars, nor for a longer period than Twelve Months; nor shall any Loan so made be renewed, or its time of payment be extended, unless the same be funded under an Act of the Legislature."

"And having put the question—Shall this Section pass? The same was determined in the affirmative."

We will not, however, give our own comments, but present the "Record" of the sad mistake in not retaining the above section in

the shape in which Mr. Allen made it; and also, of wholly disregarding the substitute—embodied in the law. *Here it is, under the Corporation* SEAL:

Official Comment!!!

"To the Honorable the Legislature of the State of New York.

"The memorial of the Mayor, Aldermen and Commonality of the City of New York, *respectfully represent*,

"That by reason of the great expenses which they have incurred in consequence of the various improvements in the said city, they have found the ordinary revenues of the Corporation altogether inadequate to meet the demands which those expenses have produced, and that they have therefore, from time to time, been obliged to issue their bonds under their Corporate Seals, to defray some of those expenses, as a mere means of temporary relief. The amount of this floating debt on the 31st of December last, amounted to **ONE MILLION SEVEN HUNDRED THOUSAND FOUR HUNDRED AND SIXTY DOLLARS**, and can probably be reduced from anticipated sources of revenue to *One Million Three Hundred Thousand.*

"The amount to be raised by the Annual Tax Bill will be required for the ordinary expenses that will accrue pending its collection, and will therefore furnish no relief in liquidation of this floating debt.

"Your memorialists therefore pray your honorable body will grant *to them authority* to fund such amount of the said floating debt as they may deem expedient, not exceeding *One million three hundred thousand dollars*, by the creation of a Six Per Cent. Stock, redeemable in annual instalments of One hundred thousand dollars each.

"And your memorialists will ever pray, &c.
"ISAAC L. VARIAN, Mayor.

"**Thomas Bolton**, Clerk of the Common Council."

[SEAL]

Endorsed, "Board of Aldermen, January 13th, 1840.

"The within memorial and act approved.

"**Thomas Bolton**, Cl'k C. C.

"Board of Assistants, Jan. 13, 1840.

"The within memorial and act unanimously approved.

"Edw. Patterson, Clerk.

"Approved. ISAAC L. VARIAN.

"January 14th, 1840.

"Presented in Senate, Jan. 17th, 1840."

—

"September 28, 1829.

"Mr. Philip Hone offered the following resolution:

"Resolved, That the committee appointed under the third resolution of the proceedings of this day, be instructed to prepare an Address to the People, explaining the provisions of the act now to be adopted, and urging their sanction to the same.

"Mr. President put the question—Shall this resolution pass? and it was determined in the affirmative."

The 30th day of October, 1829, the President and fifty-seven members of the Convention signed and published the following Address to the people, in pursuance of the foregoing resolution, explaining the provisions of the proposed new Charter, and recommending its acceptance by the people to whom it was submitted, at the then pending election:—

From the New York American of October 30, 1829.

ADDRESS

of the Convention called to amend the Charter of the City of New York.

The Convention chosen by the Electors of the city and county of New York, for the purpose of considering and proposing such Amendments to the City Charter as might seem necessary and proper, now submit to their fellow-citizens the result of their deliberations.

Elected as the Members of this Convention were, in their several wards, without reference to the former or present divisions of party, or to any local or individual interests; deeply sensible of the importance of their duties, as affecting themselves, their constituents, and their posterity, they have endeavored, to the best of their ability, faithfully to discharge the trust confided to them, by a deliberate and dispassionate investigation of the Evils actually arising from the defects of our present form of City Goverment; of the Abuses to which, in improper hands, it may be subject; and of the guards and remedies most likely to serve as efficient and permanent checks.

In the course of this examination they have become more and more impressed with the magnitude of our city interests and concerns, and of the urgent necessity of providing by every means which experience or foresight could suggest for an honest and economical administration of our large and constantly increasing city expenditures, and for a municipal government, deliberate, careful and impartial in its legislation, and firm and prudent in its executive administration. They were fully satisfied that it was unwise and dangerous to leave the whole legislative, financial, and the greater part of the executive functions of the present city government to a single board, *uniting the most incongruous powers and duties*, originally formed for the use of a small colonial city, and organised under a state of political government, of opinions, habits, and manners widely different from our own. The extent of the power and influence of our city government is manifested in the fact that their Ordinances may affect, to an unlimited extent, Real Estate to the amount of at least eighty millions of dollars, and Personal Property to the assessed value of about fifty millions; that they control an Annual Tax of about five hundred thousand dollars, paid directly or indirectly by all the Citizens, *exclusive of Local Assessments to the amount of from two to four hundred thousand more*, together with an annual aggregate expenditure of from one million to twelve hundred thousand dollars.

Of the existence of many evils of great magnitude, and of the constant danger of other and *flagrant abuses, little doubt was found to prevail in the Convention*, although, in relation to the most efficient and salutary remedies, various views and plans of reform were entertained and proposed. These were discussed and decided upon in a spirit of compromise, and, it is trusted, of candor, with a single eye to the finally agreeing upon such amendments of our Charter as might prove acceptable to a majority of our constituents, and when adopted, would *protect private rights* and promote the general prosperity.

The amendments thus agreed upon have received the final sanction and approbation of *fifty-seven members of the Convention* out of the seventy who compose it; and they now concur in recommending them to your adoption. In doing this, they have thought it proper to accompany their recommendation with a brief statement of the grounds and reasons of the several more prominent alterations of the present Charter.

The first and most fundamental of these amendments is that which proposes to divide the Common Council *into two boards*, with concurrent powers—*meeting separately*—each having a negative upon the propositions of the other—the one to consist of the Aldermen, the other of the Assistants—each to be chosen by the several wards, in the same manner, and with the same qualifications of electors and elected, as at present. The intention of this change is apparent. It is for the same reason which has dictated a similar division of power into two branches, each checking and controlling the other, in our General Government, in that of this State, and those of the other united States, as well as in the charters of the cities of Philadelphia, Baltimore, Boston, and Washington. *It is designed to prevent the hasty or careless hurrying through of measures involving important interests of the city, of individuals, upon partial representations and imperfect information, before either those Citizens interested in the subject, or the public, know that such measures were in contemplation. This has heretofore repeatedly occurred; and been a well grounded cause of serious complaint.* By requiring the successive sanctions of two separate boards, public opinion will have time to operate upon every measure, *private interest will be deliberately weighed and protected*, information will be communicated, and the careless or ignorant decisions to which all legislation is subject, if they occur in either body, may be corrected on maturer deliberation in the other.

As a still further guard against such evils, it is proposed to exclude the Mayor from the ordinary deliberations of either branch, but that *all acts of the Common Council*, when passed by both boards, shall be presented to him for his approval, which, if he does not sign, he shall return with his objections in

writing; and after an interval sufficient for the consideration not only of the Corporation but the Citizens at large, on the validity of his objections, the act or ordinance is to be reconsidered, and cannot become a law unless a majority of all the members elected to each board *shall record their names publicly in its favor.* Thus the Mayor may become a most useful sentinel, not only against corruptions and private views (should such at any time infest our city councils), but against, what is of more frequent occurrence, the inconsiderate adoption of ill-advised measures, on the authority of a Committee, or on the partial representation of interested individuals. Checks of the same or a similar nature have been provided in many of our constitutions, and experience has shown their effect to be most salutary.

In order to give greater efficiency and independence to this part of the Mayor's duty, as well as in conformity to the general spirit of our republican institutions, the Convention have passed a vote that in their opinion the Mayor ought to be elected directly by the people. The present mode of appointment, however, being fixed by the state constitution, can only be changed by constitutional amendment, ratified by the People of the state.

Under the Amended Charter, the Recorder also will cease to be a member of the Common Council. The sitting in any representative body, of a member not chosen by the people, but appointed by another power, is a relict of our colonial government wholly without parallel in this country, and not justified by any sufficient motive of utility or public policy.

To prevent Abuses which may grow out of the Personal Interest of members of the Corporation, a provision borrowed from our national and state constitutions is recommended—That no member shall, during the period for which he is elected, be appointed to any office the emoluments of which are paid by the City Treasury, or under any act of the Corporation, *or be interested directly or indirectly in any Contract the expenses of which are to be paid under such ordinance.*

When the extent and cost of our public works, and the number of Lucrative Places held under our Corporation, are considered, it is presumed no discreet Citizen will object to this precaution of wholesome jealousy.

Another guard of the City Treasury is provided by recommending that all bills or resolutions involving the appropriation of public monies or imposing burdens on the Citizens, either by general tax or local assessment, shall be immediately published in the newspapers; and whenever a vote shall be taken thereon, the Ayes and Noes shall be called, and the Names of the members, with their Votes, shall be Published.

This, it is trusted, will secure at once due publicity and notice to all concerned, and the strong influence of personal responsibility on the vote of every individual member.

The Convention believing the constant and vigilant inspection of the Citizens over all the acts and disbursements of their public servants to be by far the most efficient Safeguard of the public revenue, have, in pursuance of this principle, proposed that it be made the duty of the Common Council, to publish annually a Full and Detailed Statement of the receipts and expenditures of the year, detailing the several sources of income, and the particular heads of expense; together with the amount and terms of the loans made on the credit of the Corporation.—Thus, before the Election of every Board, there will be regularly submitted to all who contribute to the public burdens, a clear and intelligible Statement of the manner in which their money has been spent: at once affording an opportunity to correct profusion, and to withdraw confidence from injudicious or extravagant representatives.

To this, as a necessary part of the system of official accountability, it is proposed to add a provision requiring that Annual and Specific Appropriations shall be made for each distinct Branch of City Expenditure, and enjoining that no money shall be drawn out of the Treasury, except under such an authority.

The propriety and prudence of such a rule seems self-evident.

It will bring the whole Disbursements of the City annually before the corporation and their Constituents, and by showing the several Heads of Expense distinctly, will indicate the proper place and mode of reform and retrenchment, whenever they may be necessary. It will prevent the engaging in great and costly projects without duly counting the cost before-hand. Besides, every man's experience will teach him that when a limited sum of money, esteemed adequate to any given object, is set apart for it, the sum is much more likely to be used discreetly, and made to go as far as possible in effecting its end, than if it were allowed, without limit, under a general order to complete the work, or make the necessary purchases, whatever they might cost. A contrary practice, under our present system of appointing committees "with power" to carry into effect Resolutions of the Board, without any previous specific appropriation, is believed to be a source of no small part of our city debt and taxes.

The facility of contracting Debts on Long Credit, and of Borrowing Money, has been proved, by long and unvarying experience, to be the great bane not only of states and nations, but much more so, of corruptions, private and public. It is always a strong temptation to lavish expenses, and it enables the advocates of any such measure to avoid their immediate responsibility to the Taxpaying Citizens, and even, for a time, totally to conceal their profusion by throwing off the Time of Payment from year to year.

Some evidence of this may be found in our present City Debt, a considerable part of which was accumulated by corporation bonds, bearing interest, issued to meet the deficiencies of past years. To check this evil without too much shackling the financial operations of the City, it has appeared to the Convention that no more effectual mode can be adopted than the *prohibiting the Common Council from borrowing any money beyond what may be repaid from the* REGULAR *revenue during the current year*, except especially authorised by the Legislature.

Thus, accumulation of debt and interest will be prevented, and at all times the Corporation and the Citizens will know what the city owes and what it can afford.

To complete this system of economical precaution, one more measure has been thought necessary, and in the opinion of those of our body who have had most experience in our city affairs it is more essential than any other.

At present, most of the revenues of the city are expended, and its most important executive business in relation to public works, building, improvements, repairs, &c., are performed by committees of the same board which orders the work or the expenditure.

By separating these duties, by expressly confining the Corporation to the legislation of the city, the appropriation of monies, the appointment of officers, and the supervision of their accounts, and by entrusting all duties purely executive to officers arranged in proper departments, responsible to the Corporation, and liable to censure, removal, or heavier punishment for neglect or misconduct, it seems certain that greater responsibility will be ensured: for such business will be transacted by an officer *responsible to the Board, who appoint* and can remove him, and not as at present, by a Committee of the Board, responsible only to the other members, who in turns constitute other committees. Greater system and experience will generally be ensured, and that loose manner in which business is commonly transacted by men who have little or no personal interest at stake, and no risk of gain or loss of reputation by the prudent or negligent discharge of their duties, will be wholly avoided. The same reasons which so strongly recommend the old and safe republican doctrine of Specific Appropriation, also apply with equal strength to this provision.

It will be the duty of the Corporation to know before-hand how much of the public funds can be spared for any particular object: and it will be the duty of the proper officer to expend that money to the best of his ability, and under the strictest scrutiny, with fidelity and economy.

In connexion with this last separation of the Executive from the ordinary Legislative Duties, it has been judged on all accounts advisable to remove the Mayor from the meetings of the Board, and to entrust him with a Qualified Negative *on their proceedings*, the supervision of other officers, and the general executive duties of the city.

The same desire to make the management of our city concerns open and public, and to attract the general attention of our Citizens to the Official Management of their own Interests, has induced the Convention to impose on the Mayor the duty of making statements, by Message to the Corporation, of the situation of the city affairs, revenues, and property, and to recommend to them any measures for the police, health, security,

comfort, or ornament of the City, which he may deem expedient. It is needless to insist upon the incalculable value of such periodical Statements from a high public officer, on his official responsibility, (stript as they must be) of all those details which otherwise prevent the attention of all but politicians and men of leisure, and bringing the subject of public consideration immediately and clearly before every intelligent Citizen. The great attention which the speeches and messages of our governors always excite, and the important information they contain, attest the value of such a provision.

It may be added, that by making it the especial duty of the Mayor, publicly to express his Opinion upon the chief matters of city regulation, a new responsibility is imposed upon that important officer, exciting him, and almost compelling him to a minute acquaintance with all our municipal interests and concerns.

It has further been deemed necessary to separate the time of election of members of the Common Council, from that of the general election.

This is in conformity with the ancient usage of this city until within a few years, and with the present uniform practice of the rest of the state, where the supervisors and local officers are chosen by the towns early in the spring. The great respectability and popularity of the supervisors and other local officers generally, afford a strong testimony to the probable advantage of this arrangement.

Such, with some minor provisions, tending to the same ends, are the Amendments submitted to the consideration of the people of this City.

In all other respects, the Charter will remain unaltered, leaving the corporate privileges and the property of the city, and the rights of the electors and of the wards in the choice of officers, precisely as they now are.

Thus, should those amendments be accepted, all laws and ordinances must successively pass the Board of Aldermen and that of Assistants, and then receive the consideration of the Mayor. All matters of executive administration and disbursement of public monies, will be managed by experienced and responsible officers, specially charged with such business, *acting under the direction and supervision of the Mayor and Common Council. All propositions involving assessments or burdens upon individuals, will be brought to the knowledge of those interested, so as to give them a chance of being heard.* All other expenditures and appropriations of the common funds and property of the city, or to be met by city taxes, will be guarded against abuse, and regularly made public, by all the precautions which the experience of this and other cities, and the example of our state and that of the federal government could suggest.

If, therefore, these amendments are attentively and candidly considered, they will be found to be simple and consistent, keeping always in view one great object—that of preserving the principle of republican representation pure and unimpaired by excluding from the city councils all inducement to the adoption of any measure for personal objects; all temptations to waste or profusion, or abuse of power. The aim at imposing strict accountability on all officers, at preventing hasty or ill-informed decisions, and above all, at continually bringing all the measures of the city government, its management of the city revenues, and of the various interests, private and public, within its control, under the constant inspection of the people themselves. Careful and deliberate legislation, strict accountability, judicious economy, *and perfect publicity*—these are the remedies which the Convention have sought against the evils and abuses to which all wealthy city governments are subject, *of which this City has felt its share, and of which the public voice has, at different times, loudly complained.*

In the trust that the proposed amendments will accomplish these desirable ends, they are now respectfully and earnestly recommended to the adoption of the people.

On all foregoing points, the Convention were nearly unanimous; but upon the question of the term of service of the Aldermen, the members were much divided in opinion. They therefore considered it proper to submit that question to the people for their decision, on the separate vote of "one year" or "two years."

The Convention respectfully recommend to the Citizens to hold meetings in their respective wards, before the approaching election, to express their views in regard to the proposed amendments, and to take such measures as may be expedient for their adoption.

IN CONVENTION—SEPTEMBER 28, 1829.

RESOLVED, That the Members of this Convention who are present, and also those who are absent, who approve the Amendments to the City Charter, sign the same as engrossed.

Done in Convention, at the City Hall, in the city of New York, the twenty-eighth day of September, in the year One thousand eight hundred and twenty-nine, and of the independence of the United States of America, the fifty-third.

In Witness Whereof, We have hereunto subscribed our names.

Approved by the People, by their ballots at the November Election—excepting the term of two years for the Aldermen, which exception was most judicious, as experience has since shown—and the Bill agreed upon, was subsequently passed into a Law by the STATE LEGISLATURE.—Ed.

High OFFICIAL COMMENT on the foregoing SEVENTH SECTION!!

"BD. OF ASSISTANT ALDERMEN, } "DECEMBER 9TH, 1839. }

"The following resolution was offered by Mr. Graham:

"Whereas, It is provided among other things, by the SEVENTH SECTION *of the Amended Charter of the City of New York*, that 'all resolutions and reports of committees, which shall recommend any speeific improvement involving the appropriation of public monies, or taxing or assessing the Citizens of said city, shall be published immediately after the adjournment of the board, under the authority of the Common Council, in all the newspapers employed by the Corporation, and whenever a vote is taken in relation thereto, the Ayes and Noes shall be called and published in the same manner."

"And Whereas the Essential Interests of the City require a strict adherence to this salutary Resolution, Therefore

"Resolved, (if the Board of Aldermen concur,) That the Clerks of the respective Boards cause to be PUBLISHED in the Papers employed by the Corporation, as soon as possible after the Meeting at which such proceedings shall take place, all Reports and Resolutions which shall be presented, as well as ALL VOTES which shall be taken by Ayes and Noes, whereby the Appropriation of Public Monies is to be effected, or the Citizens are to be taxed or ASSESSED.

"Mr. West moved that the Resolution be laid upon the table, and the question being taken thereon, the Motion was lost by the following vote:—**Affirmative**—Messrs. Potter, West, Vandervoort, Spader, Pollock—5. **Negative**—Balis, Deming, Anderson, Howe, and Graham—5.

The Question recurring on the adoption of the resolution, the Ayes and Noes were called, and the members voted as follows: AFFIRMATIVE—Messrs. Balis, Deming, Anderson, Howe and Graham—5. NEGATIVE—Messrs. Potter, West, Vandervoort, Spader, and Pollock—5. Five voting in the affirmative and five negative, the Resolution was lost.—Vol. 15 Pro. Bd. Ass's, p. 60.

☞ We shall comment upon these matters in the subsequent pages of this number, in which we shall also give the Opinion of the learned Mr. JUSTICE BRONSON upon the Seventh Section of the Amended Charter.

ASSESSMENTS AND TAX BILLS.

PUBLIC MEETING.

The citizens are requested to attend a public meeting at the Merchants' Exchange, on Monday, March 6th, at a quarter past 2 o'clock, P. M., to take into consideration the bills recently adopted by the Common Council of the city of New York, in relation to TAXES AND ASSESSMENTS, and the collection thereof.

The provisions of the said bills are believed to be objectionable, and as far as these provisions are known, are disapproved by business men.

The object of the meeting is to remonstrate to the Legislature, against the said bills becoming laws. All persons who are opposed to the proposed bills of the Common Council becoming a law, are requested to attend.

MAYOR'S OFFICE, FEB. 27, 1843.

To the Honorable, the Common Council of the city of New York:

Gentlemen: I have received from your honorable body, for approval, a proposed Law to be presented to the Legislature of this State, for them to enact, entitled, "An act to revise and amend the several existing Laws relative to the assessments, and collection of taxes in the city of New York, and to reduce the same into one act.

This proceeding of the Common Council *is not such Legislative Act* on their part as can either require or justify the Mayor to return it with written objections, should he disapprove of any of the features of the proposed Law. Your proceedings are merely an application to the Legislature to pass a law upon the subject referred to, with a suggestion of what a majority of your honorable body deems to be required. The Legislature are not bound to adopt the draft law proposed by your body. They will, in their wisdom, make such alterations as an examination of the subject, and a sense of duty may prompt. Consequently, any citizen who may not approve of all the details of your plan, or may question the propriety of some of the principles involved in it, may present his views upon the subject to the Legislature.

Although I differ in opinion with the majority of your Honorable Body IN MANY OF THE DETAILS, AND SOME OF THE PRINCIPLES CONTAINED IN YOUR PROPOSED LAW, still, to expedite your application to the Legislature upon the subject, I have signed *your proceedings*, reserving to myself the performance of the duty to forward to the members of the Legislature such suggestions as seem to me necessary for the interest of our constituents, and for the preservation of individual rights. Respectfully,

ROBERT H. MORRIS.

PUBLIC MEETING.

A public meeting of citizens, opposed to the passage of an Act entitled "an Act to revise and amend the several existing Laws relative to the assessments, and collection of taxes in the City of New York, and to reduce the same into effect," was held pursuant to notice, at the Merchants' Exchange, in the city of New York, at half past 2 P.M.

The meeting was called to order by Chas. A. Jackson, Esq., who nominated the following gentlemen as officers:

PRESERVED FISH, Chairman,

GEORGE GRISWOLD, ABRAHAM G. THOMPSON, PETER COOPER, JONATHAN GOODHUE, PETER EMBURY, JOHN HAGGERTY, ABRAHAM VAN NEST, PETER I. NEVIUS, WILLIAM B. CROSBY, CHARLES H. RUSSELL, PETER SCHEMERHORN, SAMUEL THOMPSON, PETER LORILLARD, Jr., Vice Presidents.

WM. BILLINGS MEECH, Secretary.

The meeting having been duly organized, the call of the same was read by the Secretary.

The object of the meeting was then explained, and the objectionable features of the law commented on by B. Skidmore, Esq., who presented the following resolution, which was carried.

1st, Resolved, That this meeting remonstrate to the Legislature of the State of New York against the objectionable features of the tax and assessment bills, and that a memorial asking for amendments and further and for other provisions of the law in the premises, be coupled therewith.

Wm. Gale, Esq., then offered a memorial and remonstrance for the consideration of the meeting, and the same having been read by the Secretary, the following resolutions relative thereto were proposed, and carried unanimously.

Resolved, That the Memorial and Remonstrance be signed by the officers of this meeting, that the proceedings be published, and that a copy thereof be sent to his Excellency the Governor, the Hon. the President of the Senate, the Hon. the Speaker of the House of Assembly, and to each of the Honorable members of the Senate and Assembly from the City and County of New York.

Resolved, That a Committee proceed to Albany, and present the Remonstrance and Memorial to the Honorable the President of the Senate, or to the Honorable the Speaker of the House of Assembly, and request the presiding officer to whom the same is delivered to present the same and call for its reading, and move that it be referred to the Committee to which the tax and assessment bills from the Common Council shall have been referred, and that the Committee delegated by the meeting ask to be heard before the Honorable Committee to whom these matters shall be referred.

Resolved, That the Committee of Delegates be appointed by the President and Vice Presidents of this meeting, and such Committee to have power to add to their numbers.

The meeting then adjourned.

PRESERVED FISH, Chairman.

WM. BILLINGS MEECH, Secretary.

To the Honorable, the Legislature of the State of New York:

The undersigned take leave most respectfully to represent to your honorable body, that the Finance Committee of the Board of Aldermen on Monday, Feb. 9th, reported to that Board the printed copies of drafts of several Bills relative to Taxes and Assessments in the City and County of New-York, and to the collection thereof, which were, with slight alterations, agreed upon by a majority of the members of that Board, as the printed proceedings therewith will show; and that subsequently the said Bills were agreed to by a majority of the members of the Board of Assistants, with some amendments, as will be seen by the printed proceedings therewith; after this, the last named amendments were concurred in by the Board of Aldermen, and the said proceedings sent to His Honor the Mayor of the City, for approval; who, after an examination of the same, assented thereto conditionally, accompanying the said assent with a written message, a duplicate of which is hereto annexed, and is from under his own hand. These said bills were not published in the newspapers employed by the Corporation previous to being submitted to the two Boards, nor since, and the principles and provisions thereof are not generally known by those who are to be extensively and suddenly affected thereby.

Several influential and highly respectable citizens, who have seen the printed copies of the drafts of the bills herein before-mentioned, and examined the provisions thereof, state in their call for a public meeting, which is hereto annexed, (and which was printed in the newspapers) that some of the provisions of the said bills are believed to be objectionable, and, as far as they are known, are disapproved of by business men; they, therefore, invited citizens opposed to the provisions of the bills recently adopted by the Common Council to meet at the Merchants' Exchange for the purpose of remonstrating to the Legislature of the State against the said bills becoming laws.

In answer to said published call, citizens, irrespective of party, assembled at the Merchants' Exchange, this sixth day of March, 1843, and organised a public meeting, the proceedings of which are hereto annexed, and resolved, That this Remonstrance and Memorial to your Honorable Body, after having been read, should be signed by the officers of the meeting, and that two or more citizens, as a Committee, proceed to Albany

and deliver the said Memorial to the Honorable the President of the Senate, or to the Honorable the Speaker of the House of Assembly, and request that the same may be presented to the Legislature, read, and referred to the Committee to whom the said tax and assessment bills from the Common Council may have been referred.

The Remonstrants represent, that the real estate, situate in the City of New-York, the principal Seaport of this great and growing State, is valuable mostly in consequence of the commercial advantages which said City possesses; and whatever laws are, or shall be enacted, which impose restrictions or burdens upon trade and commerce in said City, alone and distinct from the rest of the State, is an indirect tax upon such real estate, operating in a two-fold degree, depreciating the value thereof, in the same ratio as commerce and trade are affected—also, hindering improvements and decreasing its population. The provision of one of the said bills of the said Common Council, is, that persons doing business in said City, and residing beyond its limits, shall be taxed in the said City, and not elsewhere in this State, or if they live without the bounds of this State, such citizens must pay taxes on their personal property in the State in which they reside, and also in that in which they do business, making a double tax.

This provision involves principles which are of great importance; and if it is to become a law, may lead to the passage of retaliatory laws by other States, and thus the harmony of the Union be disturbed, very much to the injury of trade and commerce as well as the manifest detriment of the public welfare.

The provision of the said bills, which requires every inhabitant, or person doing business in the City of New-York, to make an inventory or schedule of his personal property, belonging to him, or held by him as agent for others, and to return the same under oath to the assessors within a limited time, is disapproved, considered inquisitorial, arbitrary and oppressive, and will, in many cases be difficult, and in some almost impossible to comply with.

It is suggested that the present law of the State is sufficiently ample in this particular, and that it affords the assessors as much opportunity or means of ascertaining what persons are liable to be assessed for personal property as is needed. By the present law, they are authorised to assess any, and every inhabitant, for personal property, as great an amount as they believe him to be worth; and if they cannot satisfy themselves as to the amount, they can set down so large an amount as to compel the person thus assessed to reduce the same under oath, or otherwise pay the tax on the assessed property.

It is said by public officers, as the Remonstrants are informed, that many persons escape taxation on personal property who are liable to taxation; this, it is suggested, is the neglect of the assessors, and not the inadequacy of the present provisions of the law.

The provision which authorises the imposing a tax upon the personal property, merchandise, produce, funds, &c., &c., in the hand of an agent, is a new feature sought to be incorporated into the laws of the State and made applicable to this city only, involving principles of very great importance. Should this provision become a law, the effect will be *to drive business away from this City* as well money as funds, and hereafter the interest on public and other pecuniary obligations will be made payable without the bounds of the tax district.

The provision which authorises the assessors to examine any person being the head of a family, owner, clerk, servant, &c., &c., is one which seeks to establish a new Court with extraordinary powers, and such powers as are, as your Remonstrants suggest, inconsistent with the rights of a free people.

The provision which authorises the assessors to impose a *treble* tax on any arbitrary amount for a neglect to return the printed blank referred to in the section containing such provisions, is a power of an alarming character to vest in ward assessors, and such a power as would, if authorised lead, as your Remonstrants suggest, to alarming abuses.

The provision which authorises an assessment upon incorporated companies, and upon the amount of their nominal, instead of their actual capital, the Remonstrants believe is inequitable and unjust, the effect and operation being to compel monied incorporations to pay a tax upon money which they have lost.

The provision which authorises the creation of new offices, and the appointment of new officers, by the Common Council, is objectionable, and as a substitute the remonstrants suggest that the President of the Board of Water Commissioners shall be made by virtue of his said office Treasurer of the County, and authorised to receive all taxes paid voluntarily by any citizen, desirous of paying his taxes without the intervention of a Collector, and the number of Ward Collectors may be reduced from seventeen to one, and that Collector should, as the remonstrants suggest be elected by general ticket, and that the office of Collector of Arrears be abolished.

The provision which authorises the Reassessment of the delinquent tax of the previous year, which had been assessed upon real estate, and the collection of both, is objectionable, and the remonstrants suggest that a more speedy, and a more economical mode should be provided, for a collection of such tax, by a sale of so much of the property of the delinquent, as will be sufficient to produce the amount of such tax, and that the charges on such sales be no greater than those made by the State Comptroller in selling lands for State taxes.

The provision which authorises the Mayor, Aldermen, and Commonalty, to use the money raised by tax, for any purpose they may in a manner sustain, the remonstrants suggest, should be stricken out, and a provision inserted, that the monies so raised, shall be applied to the specific purposes, for which the same are authorised, and for no other purpose whatever.

It is suggested, that as the tax to pay the interest of the Croton Water debt is a large item in the annual tax bill, and being a local assessment, that the members of the Board of Water Commissioners appointed by the Governor and Senate, who are experienced public officers, of high standing, should by virtue of their said offices, be made members of the Board of Supervisors.

The remonstrants suggest that the amount of the tax asked for, should be reduced, that the Salaries and fees of public officers to be paid therefrom, should be fixed by law, that the number of public officers should be lessened, and that the duties of the Croton Water Board should be performed by the Board of Water Commissioners. The remonstrants suggest that the public work, of whatever kind it may be, should be let out by public contract, publicly advertised, and that no contract should be executed until it shall be first submitted to a board composed of the Mayor, Recorder, and Members of the Board of Water Commissioners, and approved by such Board, or a majority thereof, whose duty it may be to convene on the first Monday of every month for that purpose.

The Memoralists ask that public officers, and Members of the Common Council, may be expressly prohibited from being interested in any manner in public Contracts, express or implied either directly, or indirectly, and that if such contract be made, that the same shall be declared null and void.

The Memoralists ask that Owners, Lessees and Mortgagees may be protected from surprise and loss by assessment and tax sales and that the purchaser at such sales shall be required to give personal notice of such sale and purchase, and that such owner, lessee or mortgagee may have the same right to redeem the premises from such sale, as is now allowed by law, to owners of land sold by the State Comptroller for taxes, and that unoccupied lands may be included.

The Memorialists, ask that the Common Conncil may be expressly prohibited from borrowing money on the credit of the corporation, except to pay the interest of the public debt.

The Memorialists ask that the laws now in force, which authorise assessments upon private property, for public improvements, may be repealed.

The remonstrants suggest that the application of the Common Council for a law to authorise the Corporation to become purchasers at assessment and tax sales ought not to be granted, that it is bad as a principle, and will be worse in practice. That the Corporation have not the means of paying for such purchases except by taxing the citizens for the amount of the purchase money, that the Corporation should not be allowed to hold any real estate not required for public use, that it will be a wrong done to the owners of such lands, will lead to expensive litigation, for which the citizens must also be again taxed, and thus indirectly sanction assessment abuses of an aggravated character, and give to contractors, at exorbitant and improper prices the public money, and to public officers fees and charges for services never rendered.

The Memorialists herewith present a copy of the proceedings of the Common Council

in 1818, in relation to the cleaning of the streets, and the mode then practised in making public contracts, also a copy of resolutions for a detailed report of the contracts during the years 1836, 7, 8, 9, 40, and the copy of a resolution and the report thereupon, also of four printed notices of commissioners of estimate and assessment in the matter of opening four streets and avenues, which reports are now brought forward after a lapse of near seven years.

Your Memorialists ask that the said tax and assessment bills, may receive a full and careful examination, and the objectionable provisions may be stricken out, and that the amendments here suggested may be made, and that such other and further provisions in the premises may be also made by the Legislature as will have a tendency to lessen the county taxes, prevent abuses, decrease the patronage of the common council, define the duties of the public officers of the city, and such as the Legislature in their wisdom shall deem meet.

PRESERVED FISH, Chairman.

Minutes of the Common Council, Vol. 34—*from Nov.* 3, 1817, *to May* 17, 1818.

In Common Council, Feb. 2, 1818.

It is also recommended, that sealed proposals should be advertised for, and received till 16th inst., for the street manure of the City, for one year from 1st May next.

(Signed) G. N. BLEECKER,
Comptroller.

Feb. 16, 1818—*page* 341.

The Street Committee, to whom was referred that part of the Comptroller's Report which relates to the disposal of the street manure of this city, reported,

That they have had the subject under consideration, and propose the following resolutions:

"Resolved, That the Comptroller be directed to advertise for sealed proposals, to be received till the 2d of March, for the street manure of the Eastern and Western Districts, as at present established by a law of the corporation for two years, from the 1st of May next.

"Resolved, That he also advertise for sealed proposals, to be received as above mentioned, for the street manure of the city, for one and for two years, from 1st May next, the contractors to sweep and remove the dirt at their own expense from all the streets and public places.

For this purpose the city to be divided into six sub-districts, three in the Eastern and three in the Western, as designated by law, each sub-district to be swept and cleaned one day in the week, at the time designated by the act aforesaid.

Your committee think that a better decision can be made as to the propriety of agreeing to either of these plans, after proposals are received.

(Signed) ELDAD HOLMES,
JOHN REMMEY,
LEONARD KIP.

which was approved, and the Comptroller was directed to advertise agreeably thereto, for contracts for one or two years.

March 2, 1818—*page* 398.

The sealed proposals for the street manure received by the Comptroller were presented by him, whereupon, on motion, the lobby was cleared and the doors closed.

The sealed proposals having been opened by the President, and the propositions therein stated having been made known, it appeared that the propositions of Edward Hitchcock for the Western district, and that of William M. Hitchcock for the Eastern district were the highest, whereupon it was resolved that a lease of the street manure, for the Western district, for the period of two years, from the 1st May next be made out to Edward Hitchcock, on condition of his securing to be paid the sum of four thousand eight hundred and seventy-five dollars per annum, the streets to be swept by him, the dirt of the streets collected together and removed by him, at his own expense, agreeably to the proposals issued by the Comptroller.

It was also resolved that a lease of the street manure, for the Eastern district, for the period of two years, from 1st May next, be given to William M. Hitchcock upon the same condition as to cleaning the streets, and on his securing the payment of the sum of Four thousand Eight hundred and twenty-five dollars per annum.

The contracts were directed to be prepared and executed under the direction of the Comptroller, and the sureties to be approved by his Honor the Mayor and the Comptroller.

April 13, 1818—*Vol.* 35, *page* 150.

The Comptroller reported that the contract for the street manure had not yet been executed, owing to the necessity of an amendment to the law respecting the cleaning of streets, to embrace the regulations lately made by the Board on that subject, whereupon the same was referred to the Street committee and counsel.

May 4th, 1818.—*Page* 220.

A Member stating that he had something to communicate, which required secrecy, the lobby was cleared and the doors closed.

"The Street Committee and Counsel of the Board, to whom had been referred on 13th April last, a report of the Comptroller relative to a Contract for the Street Manure, Reported,

"That they have had a conference with Messrs. Hitchcocks, on the nature of the Law to be passed by the Corporation, and the contract to be entered into by them.

"It appears to the Committee that the Contractors formed their calculations different in some measure from that contemplated by the members of the Committee: and under all circumstances considering the price offered, the arduous duties to be performed, the convenience to the citizens from the adoption of the new mode of cleaning the streets, and the expenses which will accrue to the contractors by a faithful discharge of their duties, they would recommend to the Board, that a deduction be made of twelve hundred dollars, leaving the amount to be paid 8,500 dollars per annum.

They would also recommend that the Street Commissioner be authorised to accommodate the contractors with a suitable place or places (provided such can be furnished without expense or inconvenience to the public), for the deposit of Street manure only, from time to time, where he thinks will be suitable."

(Signed) ELDAD HOLMES,
OGDEN EDWARDS,
LEONARD KIP,
JOHN REMMEY.

Which report was agreed to.

The Counsel then presented a Law entitled "A Law to amend a Law to regulate the removal of filth and dirt from the streets in the city of New York," which was passed and the publication thereof was directed to be delayed until the 3d Monday in May inst.

The Counsel also presented the draught of a Contract with the Messrs Hitchcocks, on the subject of the Street manure, which was directed be duly executed, and the Counsel was instructed to attend to the execution of the contract on the part of the Messrs. Hitchcocks.

May 11th, 1818—*page* 227.

The Counsels presented the Contracts for the Street Manure with the Messrs Hitchcocks, agreeably to the term of their proposal, which was directed to be duly executed.

City and County of New York, *ss.*—Samuel Bodle being duly sworn, doth depose and say, that he copied the above stated proceedings from the Manuscript Book of Minutes of the Common Council in the office of the clerk of the said common council and the same is a true copy thereof as this deponent verily believes.

SAMUEL BODLE

Sworn to this 3d day of March 1843.

Before me, ROBERT H. MORRIS.
Mayor of the City of New York.

Document No. 16.

Board of Assistant Aldermen, Nov. 23, 1840.

Report of the Street Commissioner, in reply to a resolution of information required relative to contracts, expenses of street opening, counsel fees, &c. Ordered on file.

EDWARD PATTERSON, *Clerk.*

Street Commissioner's Office,
November 23d, 1840.

The undersigned, in reply to a resolution of the Board of the 9th instant, directing him to report to the Board at its next meeting a list of all the contracts made by him from May 10th, 1836, to November 1st,

1840, specifying the names of the contractors, the dates of the contracts, the prices of the various materials and work; and also, whether any other person or persons are or have been interested in any, and which of the contracts, either directly or indirectly, to the best of his knowledge, information, or belief, respectfully

REPORT:

That immediately upon the receipt of the resolution, he placed the same in the hands of the first Clerk in the department, with instructions to devote himself exclusively to the preparing of such of the information called for, as could be obtained from documents in the office. The said Clerk has proceeded in the work, but has not yet accomplished it; and judging from the progress that has been made, compared with what is yet to be done, the undersigned is of opinion that he will not have canvassed all the matter committed to him for a month to come.

The various important business of the department preclude the undersigned from detailing the services of either of the other Clerks, without vital sacrifice to important interests which admit of no delay. If, therefore, immediate possession of the information be deemed essential by the Board, the undersigned respectfully suggests the expediency of appropriating an additional Clerk to the Department.

Respectfully submitted,

JOHN EWEN,
Street Commissioner.

City and County of New York, *ss.*

Samuel Bodle, being duly sworn, doth depose and say, that the above and foregoing is a true copy of the printed proceedings in the office of the Clerk of the Board of Assistants, and that he transcribed the same therefrom. SAMUEL BODLE.

Sworn before me this 6th day of March, 1843.

ROBERT H. MORRIS,
Mayor of the City of New York.

The minutes of the Board of Assistants have been carefully examined, and no further report appears to have yet been made.

NOTICE.

The undersigned, Commissioners appointed to make an estimate and Assessment for opening Thirty-seventh street from the Hudson river to the East River, in the Sixteenth Ward of the City of New York, do hereby give notice to the owners and occupants of all houses and lots, and improved or unimproved lands, affected by the said improvement, that they have completed their estimate and assessment in the premises, which assessment embraces all the lands and premises lying between the East river and the Hudson river, and between a line running from the East river and the Hudson river, at half the distance between Thirty-sixth street and Thirty-seventh street, and a line running from the East river to the Hudson river, at half the distance between Thirty-seventh street and Thirty-eighth street; and that they have deposited a true copy or transcript of such estimate and assessment in the Clerk's office of the city of New York, for the inspection of whomsoever it may concern; and that their report of the said estimate and assessment will be presented to the Supreme Court of Judicature of this State, at the capitol in the city of Albany, on the first Tuesday in April next. And they request all persons whose interest may be effected thereby, and who may be opposed to the same, to present their objections in writing, to Abraham Dally, their Chairman, at No. 105 Monroe street, in the city of New-York, within thirty days from the date of this notice.

New York, March 1st, 1843.

ABRAHAM DALLY,
TIGHE DAVY,
ANDREW WARNER,
Commissioners.

NOTICE.

The undersigned, Commissioners appointed to make an estimate and assessment for opening the Eleventh avenue, from Thirty-third street to Forty-seventh street, in the Twelfth and Sixteenth Wards of the city of New York, do hereby give notice to the owners and occupants of all houses and lots, and improved and unimproved lands, affected by the said improvement, that they have completed their estimate and assessment in the premises, which assessment embraces all the lands and premises lying between the following limits, viz., between Thirty-second and Forty-seventh street, and a line drawn at the half distance between the Eleventh avenue and the Tenth avenue, and a line drawn at the half distance between the Eleventh avenue and the Twelfth avenue,—and that they have deposited a true copy or transcript of such estimate and assessment in the Clerk's office of the city of New York, for the inspection of whomsoever it may concern; and that their report of the said estimate and assessment will be presented to the Supreme Court of Judicature of this State, at the Capitol in the city of Albany, on the first Tuesday in April next; and they request all persons whose interest may be affected thereby, and who may be opposed to the same, to present their objections in writing to Forsyth Labah, their Chairman, at No. 14 Grand street, in the city of New-York, within thirty days from the date of this notice.

New York, March 1st, 1843.

FORSYTH LABAH,
JAMES J. MAPES,
Commissioners.

NOTICE.

The undersigned, Commissioners appointed to make an Estimate and Assessment for opening Thirty-ninth street, from the East River to the Hudson River, in the Sixteenth Ward of the city of New York, do hereby give notice that the owners and occupants of all the houses and lots, and improved or unimproved lands affected by the said improvement, that they have completed their estimate and assessment in the premises, which assessment embraces all the lands and premises lying between the East River and the Hudson River, and between a line running from the East River to the Hudson River, at half the distance between Thirty-eighth street and Thirty-ninth street, and a line running from the East River to the Hudson River, at half the distance between Thirty-ninth street and Fortieth street: And that they have deposited a true copy or transcript of such estimate and assessment in the Clerk's office of the city of New York, for the inspection of whomsoever it may concern, and that their report of the said estimate and assessment will be presented to the Supreme Court of Judicature of this State, at the capitol in the city of Albany, on the first Tuesday in April next. And they request all persons whose interests may be affected thereby, or who may be opposed to the same, to present their objections in writing to Anthony A. Jacobus, their chairman, at the office of R. Emmett, Esq., No. 45 William street, in the city of New York, within thirty days from the date of this notice.

New-York, February 28th, 1843.

ANTHONY A. JACOBUS,
AZARIAH ROSS,
OBEDIAH NEWCOMB, JR.,
Commissioners.

NOTICE.

The undersigned, Commissioners; appointed to make an estimate and assessment for opening a new street, between the Fourth and Fifth avenues, from Twenty-third street to Forty-second street, in the Twelfth and Sixteenth wards of the city of New York, do hereby give notice, to the owners and occupants of all houses and lots, and improved or unimproved lands, affected by the said improvement, that they have completed their estimate and assessment in the premises; which assessment embraces all the lands and premises lying between the following limits, viz:—a line drawn at half the distance between Twenty-second and Twenty-third streets; a line drawn at half the distance between Forty-second and Forty-third streets; a line drawn at half the distance between the said new street and the Fourth avenue, and a line drawn at half the distance between the said new street and the Fifth avenue, and that they have deposited a true copy or transcript of such estimate and assessment in the Clerk's office of the city of New York, for the inspection of whomsoever it may concern; and that their report of the said estimate and assessment will be presented to the uSpreme Court of Judicature of this State, at the Capitol, in the city of Albany, on the first Tuesday in April next. And they request all persons whose interests may be affected thereby, and who may be opposed to the same, to present their objections in writing, to Samuel Guilford, Jr., their Chairman, at No. 126 William-street, in the city of New York, within thirty days from the date of this notice.

New York, February 28th, 1843.

S. GUILFORD, Jr.,
THOMAS BUSSING,
JOSEPH N. LORD,
Commissioners.

SUPREME COURT.

Sharp and others, vs. Spier. } Opinion of the Court.

BRONSON J. As the Plaintiffs made out a perfect title to the property it is only necessary to examine the claim set up by the defendant under the assessment and sale for making a well and pump in Willow-street. The first inquiry will be whether assuming all the proceedings to have been regular, there was any legal authority for selling the land. It has become so common of late to take private property in one form or another without the consent of the owner, that Corporations are not always very careful to look at their charters, or if they are examined, the powers conferred are construed very liberally. But the right to take private property in any form without the consent of the owner is a high prerogative of sovereignty which no individual or corporation can exercise without an express grant. The power may be delegated but the delegation must plainly appear. It cannot be made out by doubtful inferences from powers relating to other subjects. Nothing short of express words or necessary implication will answer the purpose.

The village of Brooklyn was incorporated in 1816, the Charter was amended in 1824, and these laws were with some modifications reduced into one act in 1827. (Stat. 1816, p. 90—1824 p. 224—1827, p. 127.) The act of 1816 provided for levying taxes upon the freeholders and inhabitants of the whole village, but not for making assessments within any more limited district. The act of 1824 authorized the trustees to order and direct the pitching, paving, altering, amending, and cleansing of streets within the village and to cause the expense of conforming to such regulations to be assessed among the owners and occupants of the houses and lots intended to be benefitted thereby: and the trustees were authorized, by warrant under their hands and seals to levy the assessment by distress and sale of the goods and chattels of the owner or occupant who should make default in payment. (§3.) By the eighth section of that act the trustees were authorized to divide the village into well and pump districts, to provide wells and pumps, and to assess and collect the expenses of these works in the same manner as was provided in relation to street assessments by the third section of the act. Thus far it is quite clear that there is no power to sell lands for making wells and pumps. The assessments are to be collected by distress and sale of the goods and chattels of the persons assessed.

But it is said that the power to sell lands for these assessments may be found in the 7th Section of the act which provides "that whenever any tax of any description on *lands and tenements*, in the said village, shall remain unpaid," and the collector shall make affidavit "that the owners of *the premises on which the same is imposed* cannot be found, or that he has not sufficient personal estate in the village whereon the tax can be levied, the trustees may take order for advertising in a newspaper for the space of three months," thereby requiring the owners of *such lands and tenements respectively* "to pay the tax, and that in case of default," such lands and tenements will be sold: "and if, notwithstanding such notice," the tax shall not be paid, "then it shall and may be lawful for the said trustees to cause *such* lands and tenements to be sold at auction for a term of years." Now the first remark upon this section is, that it only authorizes the sale of lands for the payment of a *tax* and although it extends to a tax "of any description" still it includes nothing but a tax of some kind. Our laws have made a plain distinction between taxes, which are burdens or charges imposed upon persons or property to raise money for public purposes, and *assessments* for city and village improvements, which are not regarded as burdens, but as an equivalent or compensation for the enhanced value, which the property of the person assessed has derived from the improvement. This distinction had been made in several statutes long before Brooklyn was incorporated and was fully exemplified in the *Matter of the Mayor of New-York*, (11 *John.* 77.)—Three several churches in the City of New-York had been assessed for the supposed benefit which they would derive from enlarging Nassau-street, and they denied the legality of assessment because it had been expressly enacted that no church or place of public worship "shall be *taxed* by any laws of this state." But the objection was overruled and the exemption claimed by the churches was denied, on the ground that the assessment could not properly be regarded as a tax. This case apparently goes the whole length of deciding the one now before us. The authority is to sell for a *tax*, and the defendant shows nothing but an *assessment* for a village improvement.

In *Blecker vs. Bullon*, 3 Wend. 263, the question was upon an assessment for pitching and paving a street, and SAVAGE, C. J., said, "there is no doubt that the assessment in question was not a *tax*, that being a sum imposed, as is supposed for some public object."

I may remark here that the Charter provides in terms for laying *taxes* for various purposes and there is therefore no necessary implication that assessments were intended to be included in the word "*tax*," which is the only word in the seventh section from which the power can be inferred.

A Corporation must show a grant either in terms or by necessary implication, for all the powers which it attempts to exercise, and especially must this be done when it claims the right by taxing or otherwise to divest individuals of their property without their consent. In *Beatty vs. Knowle*, 4 Peters, 152, which was the case of a corporation sale of land for taxes, Mr. Justice MCLEAN remarked, "that a corporation is strictly limited to this exercise of those powers which are specially conferred upon it. The exercise of the corporation franchise being restrictive of individual rights, cannot be extended beyond the letter and spirit of the act of incorporation." And, he subsequently adds, "the power to impose a tax on real estate and to sell it where there is a failure to pay the tax, is a high prerogative and should never be exercised when the right is doubtful." The justice of the remark is obvious. Every statute derogatory to the rights of property or that takes away the estate of a citizen ought to be construed strictly. It should never have an equitable construction. Van Horne's lessee, *vs.* Dorrance, 3 Dall. 316.

The act of 1824 was drawn and passed long after the distinction had been taken between assessments and taxes, and those who drew and those who passed it must be supposed to know that an assessment for the benefit conferred by a village improvement was not included in the word "tax." Had the legislature intended that lands should be sold to satisfy assessments it cannot be doubted that they would have said so.

A further examination of the statute will go to confirm what has already been said. The Corporation is not empowered to sell lands in those cases where there is in fact a tax, unless it be a tax on lands and not a mere personal charge.—The words are, "whenever any tax of any description, *on lands or tenements* in the said village shall remain unpaid, the Trustees may cause such *lands and tenements* to be sold."

§ 7.—On looking at the eighth section, which authorizes an assessment for wells and pumps in connection with the third section to which the 8th refers, it will be seen that the assessment is not upon the lands, but upon "*the owners or occupants* of the houses and lots intended to be benefitted thereby, and the money is to be levied by distress and sale of the *goods and chattles* of such owner or occupant." This language does not go beyond the creation of a debt or duty upon the owner in respect of the land, which he must satisfy at the peril of losing his goods. It does not create a charge on the land.

I have not overlooked the fact that *street* assessments are by the third section of the act, made a lien or charge on the land. Whether that fact, taken in connection with the power conferred by the 7th section, will authorize a sale of land for *street* assessment we are not now called upon to determine. If the power be conceded, it does not follow that there may be a sale of lands for a *well and pump* assessment. The eighth section which relates to wells and pumps, makes no mention of the seventh which provides for a sale of lands, and it only refers to the third for the purpose of avoiding the repetition of details in relation to the mode of collecting the assessment. The substance of the provision is that assessments for wells and pumps, may be made and collected "in the same manner as is provided for assessing and collecting "street expenses" by the third section of this act." That "manner" as we have already seen, is by distress and sale of the goods and chattles of the person assessed.

These assessment sales for real or fancied improvements, sometimes fall very heavily upon the owners of city and village property. The lots which are sold are usually vacant, and consequently produce no revenue. If there were an occupant, there would of course be a person to discharge the burden. The loss resulting from a sale most commonly falls upon absent owners, who have no notice until it is too late,—upon women, who are not accustomed to watch the movements of a corporation and its officers,—and upon children, who want discretion to defend and protect their rights.

And altho' the power to sell lands without regard to age, sex or condition, has been very liberally conferred by our city and village charters, it may well be that the legislature did not in this instance deem it expedient to make such a grant. They supposed it enough that owners and occupants were made liable when they could be reached by distress and sale of their goods, and did not regard it as a very great evil if the absent owner of an unoccupied lot should escape the payment of an assessment for a well and pump which could not then and might never be of any importance to him. But whatever reason may have influenced the legislature, we feel no difficulty in saying that this land has been sold without legal authority.

The act of 1827 was in force at the time the sale was made. But as the 22d section of that act is substantially the same as the 7th section of the act of 1824, it requires no separate consideration.

We might stop here: But there are other questions in the cause which like the one already considered, were elaborately discussed at the bar, and both parties appeared to wish that we should pass upon them. I will now assume what has just been denied. That this charter confers authority to sell lands for a well and pump assessment, and then the inquiry will be whether the defendant has made out such an execution of the power as is necessary to establish his title under the sale.

In the solution of this question, it will be proper at the outset to lay down a few principles which must have an important bearing upon the result. Every statute authority in derogation of the common law to divest the title of one and convey it to another, must be strictly pursued or the title will not pass. This is a mere naked power in the corporation, and its due execution is not to be made out by intendment, it must be proved. It is not a case for presuming that public officers have done their duty; but what they have in fact done must be shewn. The recitals in the conveyance are not evidence against the owners of the property, but the fact recited, must be established by proofs *aliunde*. As the statute has not made the conveyance *primae facii* evidence of the regularity of the proceedings, the fact that they were regular must be proved, and the *onus* rests on the purchaser. He must show step by step that every thing has been done which the statute makes essential to the due execution of the power. It matters not, that it may be difficult for the purchaser to comply with such a rule. It is his business to collect and preserve all the facts and muniments upon which the validity of his title depends. (*Rex vs. Croke, Crop*, 26; *Williams vs. Peyton*, 4 *Wheaton*, 77; *Ronkendorf vs. Taylor*, 4 *Peters*, 349; *Jackson vs Shepherd*, 7 *Cowen*,

88; *Atkins vs Kinnan*, 20 *Wend*, 241; *Thatcher vs. Powell*, 6 *Wheaton*, 119; *J ckson vs. Esty*, 7 *Wend*, 148; *The People vs. The Mayor of New York*, 2 *Hill*, 9; *Matter of Mount Morris Square*, 2 *Hill*, 14.) These cases and those to which they refer, will be sufficient to justify all that has been said concerning the necessary requisite for making out a title in the defendant.

Let us now recur once more to the power. The 8th section of the act of 1824, provides that it shall be lawful for the trustees "on the application in writing of a majority of the persons owning property intended to be benefitted thereby, or whose property shall be assessed for the payment of the expenses attending the s me to divide the said village into well and pump districts." The defendant produced a petiti n having seven names subscribed to it, but he gave no evidence to show that the signatures were genuine, nor did he prove that they were owners of property within the proposed dist ict. But this is not all: The petition was signed by only *seven* individuals, and *fourteen* were assessed for the improvement. The petitioners were not a *majority* of the persons owning property intended to be benefitted. In an answer to this, it is said, that some persons were assessed whose property lay beyond the permanent district. But an as essment up n their property was expressly directed by the trustees and the inference is irresistible that they were persons "intended to be benefitted" by the improvement. Again the petition was for a well in W l low between Clark and *Pierpont* streets, and that petition was granted, but when the trustees ordered an assessment, the district was altered and bounded on one side by *Lovelane*, instead of Pierpont street. How many persons would have been assessed if the district on wh ch the petition was based had remained unaltered, we are not informed.

The fact that a majority petitioned for the improvement lies at the foundation of the whole proceeding, and unless that fac can be established, the whole is void from beginning to end. The *onus* was upon the defendant, and he has failed to furnish the proof.

The defendant insists that the petition conferred jurisdiction on the Trustees to lay out a well and pump district, &c. provided they should judge that a majority of the persons to be benefitted had signed; that by granting the pet tion and proceeding with the work, the trustees adjudicated upon the question, and determine l that a majority had petitioned, and th t this judgment of the trustees is conclusive upon all persons, so long as it remains unreversed. It is impossible to maintain that in this matter the Trustees were sitting as a court of justice with power to conclude any one by their determination. True, they were called upon to decide for themselves, whether a case had arisen in which it was proper for them to act.—But they acted upon their peril. They could not make the occasion by resolving that it existed.—They had power to proceed if a major ty petitioned, but without such a petition they had no authority wh tever. They could not create the power by resolving that they had it. In *Graves v. Otis* 2 *Hill* 466, the trustees had the necessary petition in point of numbers, and so far as any one could see on looking at the paper, all was regular. But it turned out that a material alteration had been made in the petition after two persons had signed it, and without their consent.—And as these two names were necessary to make out the requisite number, it was held that the trustees had no ju isdiction. This seems to be a hard case, and so it was, but it stands upon a principle that cannot be given up with safety to the public.

Corporations and their officers, when they interfere with the rights of individuals, and especially when they attempt to divest and transfer the title to real estate, must show that the very case has arisen in whic they were authorized to proceed. Showing that they have been misled by forgery will not aid them. Honest error cannot confer power. If the petition had been sufficient and the trustees had thus acquired jurisdiction to act, then, whether they would proceed or not, was a question addressed to their discretion, and their decision upon that question could not be reviewed in this action, nor indeed in any ot er. But without a sufficient petition they had no authority to act. There is little if any thing of a judicial nature in the proceedings of corporations to take lands, either by way of as essments or for public use. (*The People v. Mayor of New York*, 2 *Hill* 9. *Matter of Mount Morris Square*, 2 *Hill* 14.—It is the mere execution of a power.

I will now assume that the trustees acquired jurisdiction, and then the inquiry will be whether all the necessary steps have been taken to transfer the plaintiff's title to the defendant. I will not stop to inquire whether the district was properly laid out, but proceed at once to the consideration of the assessment. The expenses of the improvement were to be assessed "among the owners and occupants of all the *houses and lots* intended to be benefitted thereby." (Act of '24, §8, 3.) And there is no authority to sell except where a tax [or an assessment, as has been conceded for the purposes of this branch of the a gument] of any description on *lands* or *tenements* in the said village shall remain unpaid. In order to lay a tax on "lands or tenements," it is necessary that the particul r lands should be described. Now what was done here? Without noticing any other defects in this extraordinary document which is called an assessment, it is sufficient to say that the assessors have not even mentioned or alluded to an. "lands or tenements" from beginning to end. In several instances enough was not done to create even a personal charge. Take for example the following: "Sharp, 19.76."—What "Sharp" was intended? After the trustees had directed the assessors to aid the collector in describing the lands, in other words, to do what should have been done when the assessment was made—the trustees passed a resolution reciting that a tax was due from "Mrs. Sharpe;" but what particular lady by that name was intended was not explained. If they meant Mrs. *Mary* Sharp, who once owned the land, she died in 1823, two years before the well and pump had been thought of. At the time these proceedings were commenced, the land belonged to the seven minor grand children of Mary Sharpe, who are plaintiffs in this action. The fact that Mrs. Sharpe had been long dead, enabled the collector, to make the necessary affidavit that she could not, "upon diligent enquiry, be found in said village." Had the plaintiffs, the owners of the land been named in the assessment, there is no reason to suppose that the affidavit could have been made, or that the tax would not have been paid and the land saved. The assessment neither created a charge on the land, nor a debt or duty upon the plaintiffs.

If the defect in the assessment could be afterwards supplied it was never done. After the assessors had been required to aid the collector in describing the lands, and after the collector had made his affidavit, the trustees only made a slight approximation towards describing the land which they intended to sell. They stated that an assessment was due "from Mrs. Sharp on property in *Willow street*." In what part of Willow street, or on which side of it? and how much property? Was it one lot or ten, and what were the dimensions? It is impossible to call this a description of any property in particular. There was no description of the lot in question until we get down to the conveyance made on the sale. The owners were left in the dark until it was too late to save the land.

This leads to the mention of the last defect in the proceedings which I shall notice, to wit: that the land was not sufficiently described in the advertisement. When a tax on *lands or tenements* remains unpaid, the trustees may take order for advertising *the same*, requiring the owner of *such lands* to pay the tax, or in default, that *such lands* will be sold, and if such tax is not paid within the specified time, *such lands* may be sold (§7. The principal object in requiring the advertisement was to bring home notice to the owner that his land was to be sold if he did not pay the charge upon it. And only *such* land can be sold as has been advertised. Now what was this notice? It neither named the plaintiffs, nor did it describe the property. Among the unpaid assessments for various improvements in the village, it mentions that there was due "from Mrs. Sharpe, assessed on land in Willow street, near Clark street, containing on said Willow street thirty five feet, $19 76." The notice does not state in what part of Willow street the property was situate, except that it was "near Clark street," nor does it mention the side of the street. The plaintiffs owned property on both sides. Again, it was thirty five feet on Willow street, but the notice does not state how long the lot was the other way, or whether it was in the form of a square, a parallelogram, or a triangle. And besides, there is not only a want of description, but the notice was directly calculated to mislead the owners. It speaks of a lot thirty five feet on Willow street, and the lot sold was thirty eight feet front on that street. It mentions land "*near* Clark street," and the lot sold was *on* Clark street, by which one side of 113 feet was bounded. No one who owned this lot would imagine that he was in danger from seeing that the corporation proposed to sell a lot *near* Clark street, especially as there was nothing else in the advertisement to correct the error. It was so natural and easy to describe this as a corner lot, or a lot bounded on two sides by two streets, that it is difficult to resist the inference that the corporation either did not know what land would be sold, at the time the notice was given, or that pains were taken to mislead the owners, and throw them off their guard. But however that may be, the notice was insufficient.

On each and all of these grounds we are of opinion that the sale was void, and conferred no title on the purchaser.

We were told by the defendant's counsel that the conclusion at which we have arrived would disturb many titles. If that be so, we cannot help it. If there have been many sales for making wells and pumps in Brooklyn, I can only say that there have been many wrongs, and we have no choice but to redress such injuries when they are judicially brought before us.

New trial denied.

By SID. J. COWEN.

SUPREME COURT.

Sharp, vs. Johnson. } Opinion of the Court.

Bronson J. For some of the principles which must guide our determination, it will be sufficient to refer to the case of Sharp *vs.* Spier just decided. Although the Corporation has not been very explicit in telling us how much they intended to do, it sufficiently appears from the case that North Third Street had been previously laid out upon the village map and that at this time the Corporation attempted to accomplish two things: first to acquire the necessary lands for the purpose of opening the Street and then to assess the price of the land taken, and the other necessary expenses of opening, pitching, and regulating the Street upon other lands. A portion of the land belonging to the children and heirs of John Sharpe of whom the plaintiff is one, was taken for the Street and the residue was assessed and sold for the benefit which they were supposed to derive from the improvement. The children have thus lost all, at least for a long term of years; but if the proceedings were authorized by law, and have been properly conducted they must bear the misfortune. On the other hand it was the business of the purchaser and those claiming under him, to examine the power and regularity of the proceedings, and if their title is found defective, they will have no ground of complaint, unless it be against the Corporation.

The first question will be upon the proceedings for taking that portion of the plaintiff's land which is occupied by the Street. The Village of Williamsburgh was incorporated in April, 1827. (Stat. of 1827, p. 270.) The 24th Section of the Act provides that "the trustees of said village shall, or may, *on an application in writing of a*

majority of the persons owning the property described in any such application, and who are intended to be benefitted thereby or whose property shall be assessed for the payment of the expense attending the same, and *upon such application*, they are hereby authorized and empowered to widen and alter all public roads, streets, and highways *already laid out* in said village," "and also *to lay out and make such other roads and streets conformable to the map of said village*, as they shall think necessary or convenient for the inhabitants."

The section then goes on to provide for acquiring the necessary lands "through which such new roads or streets are to run." The section is rather a clumsy performance in the way of legislation, but from this and other provisions in the act, taken in connection with the facts disclosed by the case, I infer that a map had been made of the village prior to 1827, on which the streets had been laid down, some of which were then open, while others only appeared upon paper.—The section was intended to provide for altering the streets already made and for opening others conformable to the Map. North Third-Street had been laid out on the Map and it was now proposed to open it. That could only be done on such an application in writing as has already been mentioned. Let us now see what authority the trustees had to proceed. They had a paper signed by fourteen persons in which they '*suggest the propriety* of having the street opened.'—If this can be called an application to have the street opened, there are other difficulties which are insuperable. Although the petitioners say they are "inhabitants in and about North Third Street" they do not "suggest" that they own a single foot of land in the street or elsewhere; nor is any land described in the application as the statute requires. And then there are only fourteen petitioners while there are forty-four different assessments. And although some names appear more than once in the assessment nearly thirteen hundred feet of front on the street is set down as belonging to "unknown owners," and how many there may have been of that unfortunate class of citizens, it is impossible to say. The burden lay on the defendant of showing that the application came from "a *majority* of the persons owning the property," and he has not only failed to show it, but the evidence is nearly or quite conclusive that a majority did not apply. The trustees therefore had no authority whatever to open the street, and the plaintiff's land in the site of the street has not been taken according to law. She owns it still.

There is a further difficulty about the taking of land for the street; the 24th section provides that when the trustees shall require any land for that purpose, "*they shall give notice thereof* to the owners or proprietors of such lands or his or their agent or legal representative, to the end that reasonable satisfaction may be made for all such lands as shall be taken and employed for the use or uses aforesaid, and the said trustees may *and are required to treat* and endeavor to agree with the owners and persons interested therein, or his, or her, or their agent or legal representative; *and if* in case any such owners or proprietors, *shall refuse to treat* for a reasonable compensation for manner aforesaid, *then and in such case* the true value of the land, and damages shall be set and appraised by two Justices of the Peace of the County of Kings, by the oath of twelve freeholders," and the payment or tender of the money "shall be a full authority to the said trustees to cause the said lands to be converted for the purposes aforesaid." There is no pretence that the trusteess gave notice to the plaintiff, or to any of the other heirs of John Sharpe, or to any agent or representative of theirs, that the land was required, nor that the trustees made any attemp to treat or agree with the owners or any of them: and until that had been done, there was no authority for calling a jury. (*Rex vs Croke, Coup* 26; *Rex vs Manning*, 1 *Burr* 377; *Rex vs Mayor of Liverpool*, 4 *Burr* 2244).

But it is said that the plaintiff and the other heirs of John Sharpe, were "unknown owners," and therefore the trustess could neither give notice nor treat with them. I answer, it was the business of the trustees to find out the owners, and there is no reason to suppose that it could not have been done, and that too, with very little trouble. John Sharpe died in the City of New York, only two years before these proceedings were instituted, and he was in possession of the property at the time of his death. If it had been thought a matter of the slightest importance to follow the statute and regard the rights of owners, these heirs would have been found, instead of resolving that "notice be put upon the lands of all unknown owners." Whether a white wand was actually put upon these lands to let the owners know that they were in danger, does not appear, nor is it a matter of any importance.—When the statute says, you shall give notice to and treat with the owner, it cannot be satisfied by sticking up a notice on the land. That is not a sufficient ambassador; let it be granted that these "unknown owners" could not have been found, even if a dilligent enquiry had been instituted—and what then? It does not follow that their land might be taken: the difficulty of complying with a statute does not repeal it: the trustees were acting under a naked power; if the power was too strait for practical utility they should have asked a new grant; or, if they did not choose to do that, they should have answered the petitioners "we have no authority to take any man's land for a street until after we have given him notice, and endeavored to treat with him."

Whether an application to these heirs would have been likely to result in a treaty or not, can be a matter of no importance. It would at least have served the purpose of giving them notice, and then their land might have been saved.—When lands are to be taken under a statute authority in derogation of the common law, every requisite of the statute having the semblance of benefit to the owner must be strictly complied with. (*Atkins vs. Kinnan*, 20 *Wend*, 241.) Although this doctrine may have been often disregarded by city and village corporations, we think it both good law and good morals. The legislature has not been careful in protecting the rights of the land owner: on the contrary, a wide door has been opened for taking private property without the consent of the owner, whenever his neighbors happen to think that the public interest required him to sell, none of the barriers which remain ought to be thrown down.

Williamsburgh is a road district, and the trustees have all the power within the village which formerly belonged to the commissioners of highways of the town of Bushwick. (§ 17.) But that does not bring the case within the decision in *Graves vs. Otis*, 2 *Hill*, 466, for the street was not laid out, nor the damages ascertained in the manner prescribed by the act relating to the highways on Long-Island. (Stat. 1830, p. 5., § 47—53.) The trustees evidently proceeded or rather professed to proceed under the 24th section of their charter.

There is still another difficulty with this attempt to take land for the street. The justices and jury valued the land and damages by *blocks*, one of 420 feet front, the second 460 feet, the third 510 feet, the fourth 460 feet, and the fifth without saying how many feet front "running measure" there was in it. The first block was valued at three dollars per foot, the second at $2 75, the third at $2 50, and the fourth and fifth at two dollars per foot front. Now as the land decreased in value from the starting point to the other end of the street, it is morally certain that all of the *lots* in the same block were not of equal value, and consequently the owner of one lot either got too much, or the owner of another lot got too little. We do not understand the case of *Coles vs. The Trustees of Williamsburgh*, (10 *Wend*, 659) as sanctioning this valuation. The justices and the jury should have proceeded by *lots* instead of blocks.

We come now to the assessments which were made to pay the expenses of opening, pitching and regulating the street, and under which the lot in question was sold.

The trustees of the village have authority to direct "the pitching, regulating and paving the streets thereof, and also the "altering, amending and cleansing of any street." (§21.)—But "no street" shall be pitched, paved, altered or amended, *unless the same shall be requested in writing by a majority of the persons owning the property intended to be benefitted thereby*, or whose property shall be assessed for the payment of the expenses attending the same." (§22.) And the 24th section, which gives authority to "lay out and make" streets, contains, as we have already seen, a like restriction upon the powers of the trustees. The petition, such as it was, on which the trustees acted, has already been noticed on another branch of the case. There is no evidence that a majority of the land owners requested this improvement, and it is enough that the fact was not proved. But there is in addition very satisfactory evidence that the fact did not exist. The trustees acted without authority, and their proceedings were consequently void.

Although this is enough to dispose of the case, some of the other questions discussed at the bar ought perhaps to be briefly noticed. As to the lands taken for the street, the expenses were to be "assessed *among and upon the owners* and occupants of the *several houses and lots* intended to be benefitted." (§25.) And the other expenses were to be assessed "*among the owners* or occupants *of all the houses and lots* to be benefitted thereby." The two provisions are substantially alike, though there is a slight difference in words. The property on the street had been surveyed and divided into lots of twenty feet front long before, and the lots were undoubtedly owned by different individuals. It appears at least that the plaintiff owned one such lot in a block of 429 feet front on the street. Now what was done? The assessors were not furnished with a map or any information concerning who was to be assessed; but they were sent out with a tape line to discover as well as they could both lands and owners. They measured and assessed by blocks, instead of lots, though as to some of the blocks, they put down the names of several individuals as the owners of separate parcels. But when they came to the plaintiff's land, her lot of twenty five feet front was lumped with other lands amounting in all to 4 09 feet front, and the whole set down to "unknow owners." The Clerk of the Corporation testifies that the assessment was not made in the usual mode, which was to assess by *lots* instead of blocks, which were specified in the assessment. But independently of this departure from the usage it is impossible to maintain such an assessment as was made here. Where the lands in a city or village have been surveyed and laid out into lots, the owners should be assessed by lots, and each owner should be assessed by himself, and in respect of his particular land. (*The King v. the Trustees of Norwich*, 5 *Ad. & Ellis*, 563.) It may well be that every lot in the same block is not of equal value. And besides, the assessment must be so made that each owner may know what is his particular burden, and be able to discharge it, without calling in the aid of others. If this 429 feet front was properly assessed in one body, the corporation was not obliged to receive less than the whole charge imposed upon it, and thus the plaintiff might have been compelled to pay the assessment upon other persons or lose her own land.—The statute does not authorise an assessment upowners generally, but says it shall be made "among" the owners; and to make the matter still more clear, it provides that the assessment shall be among the owners of "the *several* houses and lots." The assessors might just as well have put down all the land in the street in one lump as to do what they have done. There was an utter failure to comply with the requirement of the statute in this particular. The power has not been pursued, and the sale consequently conferred no title on the purchaser.

The assessment was vicious in another respect. The only authority to sell is where there is a tax "on lands or tenements." (§26.) If the word "tax" includes a street assessment, it must still be an assessment on "*lands* or tenements.'—

Here we have nothing but one line of the boundary of any land. The assessors have assessed certain sums on a given number of feet front, without saying whether the land extended back one foot or a hundred—whether it goes quite through to the next street or only part of the way. If they had referred to the map, and mentioned lots as there laid down, that would have answered. But neither map nor lots are mentioned. I do not mean to censure the assessors. They did perhaps the best they could with a tape line, and they had no other guide.

When the assessment is completed, the trustees are required to give fourteen days' notice that the same will be ratified and confirmed within one month, unless satisfactory objections are made, (§21, 25.) It does not appear that any notice was given. And here I will repeat that the burden of showing that the power has been duly executed lies on the purchaser, and without proving it his title is good for nothing.

The trustees are not authorised to sell any land until the collector has made the affidavit that the owner cannot be found; or if found, that he has not sufficient personal estate in the village to pay the tax. (§26.) No such affidavit was produced, nor was its absence accounted for, even if it ever existed. If every thing else had been regular, the absence of an affidavit would have been fatal to the sale.

I am weary with pointing out defects in these proceedings, and will go no further. I ought, however, to say, that by assuming, as has been done, that the corporation might under any circumstances sell lands for the payment of an assessment, it must not be inferred that we are of opinion that the power exists. There is no power to sell lands except for a *tax*, (§26) and although these street assessments are made a lien on the land, (§21, 25) it does not follow that the corporation can sell the land without first going into chancery and obtaining the aid of that court to enforce the lien. My impression is that the lien cannot be enforced at law, but upon that point we give no opinion, either one way or the other.

The lot was unoccupied at the time the suit was commenced, and the defendant claimed title to it by virtue of the Corporation Sale. The action was therefore well brought against him. 2 R. S., 304 §4. *Edwards vs. the Farmer's Loan Company*, 21 *Wend*, 467. The school children found the lot vacant and used it for a play-ground, but that neither made them nor the lady who kept the school occupants of the lot, so that an action of ejectment could have been brought against them. It is therefore a matter of no importance to enquire whether the Judge was right or wrong in his charge upon this branch of the case. He was charging upon a mere abstract proposition, when the facts of the case did not make it necessary to say anything, and if he was wrong it would be no ground for granting a new trial.

A part of the outside stair case of the school-house was on this lot but the attention of the Judge was not called to that fact. And besides, the exception only goes to the charge in which the Judge spoke of the whole lot. The question was whether Miss Lapelye was to be deemed the occupant, not because she used the stair case, but because the children she instructed used the lot as a play-ground.

New trial denied.

ASSESSMENT CASES.

Opinions of the Supreme Court.

We have here given the opinions of the Supreme Court in two Assessment cases. These opinions are of great and vital importance, and will go far to relieve the apprehensions of our citizens in relation to the safety of the title to landed estates. These views are in accordance with the opinions of Henry Brougham, who recently in the House of Lords moved an address to the Queen on the subject of the too great exercise of power by the Corporation of London. Lord Brougham (who is an honor to the House of Peers instead of the seat in that body being an honor to Henry Brougham) will press this subject on the other side of the atlantic. The Supreme Court of the United States have held the same doctrine, as also has every independent judiciary. The force given to the Statutes by Mr. Justice Bronson is that which governs the true construction of the Constitution of the United States. The construction set up by some of the officers of the Corporation of New-York, that a Statute *which says a thing shall be done*, is "Directory" and not mandatory, has been a source of great mischief. If the law means anything it means what it says and a common sense construction is the true construction. We know that our citizens will take great pleasure in perusing these opinions and we have published an extra number in order to give them a wide circulation among our own citizens, Governors of States, Mayors of Cities, Judicial Officers in our own country and abroad.

We sent a copy of these opinions to that most excellent and best worthy citizen, the venerable Jonathan Thompson, formerly Collector of the port of New-York, for perusal, after which we called upon that distinguished individual to ascertain his opinion of the decision of the Court.—Mr. Thompson expressed himself highly pleased with the decision of the Court, and remarked that it would be highly approved by the good men of our State—it would be a great safeguard to fast property and give confidence to the people.

These opinions are in the two causes which were tried in the Circuit Court of Kings County in 1841. Judge Kent, the son of the distinguished ex-chancellor of that name, presiding.

In the hand-bill issued by the Anti-Assessment Committee at the sale for sham assessments in October and November, 1841, it was stated as follows:—

"Two causes have been tried in the Circuit Court held in Kings County, in September, in relation to assessments; one was an assessment sale in Williamsburgh in 1827, and the other was an assessment sale in Brooklyn in 1829. The purchasers were in possession of the property under an assessment lease. The owners brought ejectmen suits against the purchasers; the purchasers were unable to show regularity of proceedings on the part of the Corporation, and the suits were decided against the purchasers and in favor of the owners, although the property had been improved by the purchasers, Judge Kent, who tried these causes, gave a charge in the following words:—

'The proceedings given in evidence on the part of the defendant do not show any authority in the Trustees of Williamsburgh to execute the Certificates of Sale or lease, and these papers do not, nor does either of them, operate to vest out of the Plaintiffs any interest in the premises in question, or any right of possession thereof as against the plaintiff.'

"The Chancellor stated in his Court, on Monday the 1st inst., that purchasers at assessment sales, in order to establish a title under a corporation lease for assessments, must show that the proceedings of the Corporation have been regular throughout, that the ayes and noes have been taken in the Common Council, and added, that the lease is only evidence of the regularity of the sale *and not of the other proceedings*, and that unless the Corporation in all respects complied with the law, the lease is void.

"This information is given by the Anti-Assessment Committee for the good of the purchasers as well as the assessed."

This hand-bill was laid before the Legislature by the Majestie of the Corporation of New-York as a sort of a Bill of Impeachment against the Anti-Assessment Committee, but it was of no avail, for that committee were under the protection of the Constitution in this necessary act and duty.

These views of Chancellor Walworth with regard to the ayes and noes, are sustained by the Supreme Court in a recent opinion given by Judge Bronson, which we shall publish in full in our next sheet, we here make an extract from it as follows:—

SUPREME COURT.

In the matter of the opening 37th and 39th streets, and Madison Avenue and Eleventh Avenue in the city of New-York:—

"The report and resolution of the Committee recommending the opening of these Streets were not published pursuant to the act of 1830, nor were the ayes and noes called when the resolution to open the Streets was adopted by the Common Council, Stat. 1830, p. 226 and 7. **These are plain violations of the amended Charter,** and it is not improbable that they in some form affect the proceedings of the Corporation. (*See matter of Mount Morris Square, 2 Hill 20. Sharp vs. Spear and Sharp vs. Johnson, 4 Hill 76 and 92.*)" The Mount Morris case was published in a previous number of this volume and the two other cases above referred to will be found in this sheet. This decision is in conformity with that of that great equity judge, the Hon. Murray Hoffman, assistant Vice Chancellor.

The two first of these opinions were delivered at the January term of the Supreme Court, and the last at the May term.

A check is here given to the land piracy and the street robbery system, which has for some time disgraced the city of New-York.

Memorials have been presented in the Board of Aldermen, by Alderman Tillou, a distinguished member of the Common Council of New York, asking that body to postpone the Sale of Assessments until 1844, on the ground that most of the improvements for which these odious assessments have been imposed, are not made, and that the assessments include a large amount costs &c., (about $160,000, including interest.) for services not rendered, and suggested that the Common Council should discountenance proceedings of such aggravated character. These memorials are signed by Jonathan Thompson, William B. Crosby, Peter Schermerhorn, Robert C. Cornell, Peter Cooper, John Haggerty, James McBride, Abraham G. Thompson, William W. Fox, John Morss, Gerardus Clark, Bustis Skidmore, John H. Tallman, Joseph Tucker, Martin E. Thompson, John M. Dodd, James Fellows, John R. Livingston, Lawrence Ackerman, Thomas Riley, Samuel Thomson, Jacob Drake, Jno. M. Bradhirst, Chairman of the Citizens' Committee delegated by the meeting at the Merchants' Exchange to attend upon the Legislature, and by Robert Smith, Chairman of the Anti-Assessment Committe, and great numbers of others.

ASSESSMENTS.

1814.

The following memorial, we copy from the New York Evening Post, of February 1st, 1814, which paper was sent us by ARTHUR BRONSON Esq. It points out the assessment mischiefs which have since been experienced with great accuracy, and it is a matter of astonishment that the Legislature did not, on the presentation of this memorial, repeal the law!!! Had they done so, millions in money, and more in morals, would have been saved. We introduce this memorial here as a sort of Preamble to what follows it.

"TO THE HON. THE LEGISLATURE OF THE STATE OF NEW YORK, IN SENATE AND ASSEMBLY CONVENED.

"THE MEMORIAL

"Of the Subscribers, inhabitants of the city of New York, respectfully showeth,

"That many of the provisions contained in that part of an act passed by your honorable body, on the 9th April, 1813, entitled 'an Act to Reduce several Laws relating particularly to the City of New York, into one act' authorising the 'Opening and Laying Out Streets, &c.' are in the opinion of your memorialists, dangerous to the security of real estate in the said city, subversive of Constitutional and Legal Rights, which are secured to every Citizen in the enjoyment of his Property, and alarming in the highest degree, on account of the PRECEDENT thereby established of the possibility of wresting by force of law, the hitherto well ascertained privileges of the individual, and placing them at the disposal of any person or persons without his consent.

"These positions, your memorialists hope to convince your honorable body, are but too well founded, and will appear but too evidently to result from an examination of the Provisions contained in the said law, relative to the opening and laying out streets, &c. in the city of New York.

"By the 178th section, the corporation of the city are authorised, upon their own mere motion, to direct and order any street, or public place to be laid out and opened, or extended, enlarged, or improved, &c. and to apply to the Supreme court for the appointment of Commissioners of Estimate and Assessment, for the purpose of valuing the property required, and of estimating the benefit, and advantage, or loss and damage to the respective parties interested, to a certain extent, who are to report their proceeding to the said supreme court without unnecessary delay, and who are to state in such report the names of the owners, and a description of their ground as far as the same shall be ascertained by them, and when the owners and parties, or their respective estates and interests are not known, or not fully known to the said commissioners, they are not bound to make the Necessary Inquiries, but to report in *general terms*, without specifying the names or estates or interests of the Owners in such cases. This Report, when made, is to be confirmed by the said supreme court, unless upon hearing objections it shall be *referred back* to the said *commissioners;* and when confirmed, is to be final and conclusive upon all persons whomsoever, and when so confirmed, the Corporation are to be seized in fee of all the lands mentioned in the said report, and may take possession of the same for the purpose of opening streets, &c. To the said Regulations and Provisions, your memorialists do object, as most unreasonable, and as liable to the greatest ABUSE and VIOLATION of the Rights of Property. Your memorialists would humbly suppose, that before the corporation ought to have the power of commencing proceedings for opening a street, whereby Private Property is to be INVADED, the owners of that property ought, at least, to be apprised of the measure, that they might have an opportunity of defending their just rights, in regard to matter so immediately interesting to themselves. But the contrary of this is the case, and the corporation are vested with an absolute, unqualified, and irresponsible control, in the origination of measures so vitally affecting the rights of their constituents.

"But if the manner of originating these measures is objectionable, the prosecution of them as regulated by the law in question, is, if possible, infinitely more so. The commissioners, when appointed, are vested with the power of reporting the names of owners, the extent and description of their estates, and the value of the property to be taken. *How* and in *what manner* their inquiries are to be conducted, is not specified. No time or place of meeting is pointed out. The Parties interested have not the privilege of appearing before them to give proof, by the testimony of witnesses, of the extent and value of their property; but the commissioners may, in the most absolute and arbitrary manner, reject ALL evidence (for they are not required nor authorised to hear; nor even to administer an oath) and make their report upon the most Partial and Limited View and examination of the business confided to them. Your memorialists do respectfully contend and urge upon the consideration of your honorable body, that in conferring powers so extensive, and involving questions so interesting, there ought to be the utmost caution and circumspection, to guard the powers thus conferred from being liable to abuse. Suppose, for instance, a Wrong Name should be reported as the Owner—suppose Erroneous Limits should be assigned to a particular Lot (and in how many cases may not mistakes of this kind happen, from the view above given of the operation of the Commissioners) where is to be the Remedy? The report is to be final and conclusive, and the corporation are to be absolutely seized in fee of the premises. The Rightful Owner is dispossessed and ousted of his Title, a wrongful claimant may become entitled to and receive the sum reported as the value of the premises.

"The said Section further directs, that the said Commissioners shall not allow anything for Buildings erected on any street, avenue, public square, or place laid out by the commissioners of roads, subsequently to the filling of the maps of the said commissioners. Against this provision your memorialists object, because no Time is pointed out, wherein the Lands so laid out shall be improved for the above purposes; from which it follows that the individual is placed altogether at the mercy of the corporation for the enjoyment of property thus situated; a consequence little short of practical sequestration, since the owner cannot USE his property, unless it shall suit their pleasure.

"By the 131st Section, it is enacted, that in all cases where the premises shall be under lease, or other contract, upon the confirmation of the report of the commissioners, ALL *the Covenants, Contracts, and Engagements between Landlord and Tenant, or other contracting Parties, shall* CEASE, *determine, and be* ACTUALLY DISCHARGED.

"This provision, your memorialists are of opinion is Unconstitutional, and contrary to one of the first principles of the Social Compact. By an Article in the Constitution of the United States, it is expressly declared, that no State shall pass any Law which may *impair the Obligation of Contracts.* But what is the effect of this provision? We answer, emphatically, not *only* to impair, but to discharge absolutely, in the *terms* of the law, all the Covenants, Contracts, and Engagements of the contracting parties relative to the Premises. Under the operation of this clause, let it be inquired for a moment, what is to become of the Security of the Mortgagee or Judgment Creditor? What injustice and fraud may not be practised, not only with impunity, but with the sanction of the law? since it will be perfectly easy for the owner of such ground which may be required for such purpose, to borrow money, or incur debts, which may be prosecuted to judgment; and when the creditor feels himself perfectly safe, his Security is taken out of his hands, and the fraudulent Debtor effectually triumphs over the dupe of his intrigue and fraudulent designs. This provision may be further, and with truth, considered as ex post facto, in regard to all existing engagements of the sort last described, and therefore flagrantly unjust, and altogether inadmissible.

"But it may be contended that a Remedy for the evils and grievances above stated, is contained in the 182d Section, by which it is enacted, that the commissioners shall deposit a Transcript of their estimate and assessment, in the clerk's office of the city of New York, and shall give notice of such deposit in two newspapers printed in the said city; and that every person objecting, may within ten days after such publication, state their objections. But this, upon examination, will be found to be a very inadequate remedy. The owner of the ground required, may be absent from the city; or he may reside at a distance from the city; or he may not take either of the newspapers; or from a great variety of causes he may never hear of the publication: and as to depositing the estimate and assessment in the clerk's office of

the city of New York, it might as well, in regard to nineteen-twentieths of the inhabitants, be deposited in the capitol, in the city of Albany. It would appear to your memorialists, that the very cautious and restricted manner in which the commissioners are to act in publishing in two newspapers only, and in depositing their estimate in the clerk's office, and the short period allowed for these purposes, viz. fourteen days, afford at most but a very limited and inadequate opportunity for the parties interested, to receive any notice whatever on the subject.

"But by the 183d Section of the said Law, the corporation are allowed a term of four months within which to pay the money, although they are previously invested with the absolute ownership of the property. Your memorialists would for one moment inquire, why the corporation, any more than an individual, should acquire an absolute Title to Property before the payment of the consideration? Your memorialists are persuaded that no satisfactory answer can be given to this question.

"But as great, if not the greatest evil of which your memorialists have to complain, consists in at least the strong probability, that under the necessary and inevitable consequences of the law in question, the rightful owner will be divested of his property; and that he will be driven to the unsatisfactory remedy of suing the receiver of the money at which it was valued, by which he may incur the disappointment, in addition to the loss of his property, of having to pay the costs of a tedious and expensive law suit: for the man who would receive money *that did not belong to him*, would not hesitate at the means, however unprincipled, of securing his booty.

"The Undersigned cannot sufficiently express the injustice of such consequences as these. The corporation, who originate the measures and proceedings in question, are, in the mean time, to be secure in the Title; whereas your memorialists do apprehend that the persons who are instrumental in effecting the Transfer of Title, and for whose use it is made, ought to be held answerable, according to every principle of justice, to the real owner, for the Value of the Property; and if they pay it to a WRONG person, *it ought to be their loss*—not that of the person rightfully entitled.

"For these reasons, your memorialists do earnestly solicit that your honorable body will be pleased altogether to repeal the said law, so far as it relates to the Opening of Streets, &c. in the city of New York, and to substitute another in its stead, which shall be free from the objections above stated, or that its provisions may be so modified and amended, as to be more consonant with the rights of the individual, more calculated to restrain the possibility of injustice and hardship, and which, while it may promote the best interests of the corporation of this city, may not unduly encroach upon the most valuable interests of those whom it is liable to affect. And your memorialists will, &c."

"NEW YORK, JANUARY 20TH, 1814."

ASSESSMENTS AND TAXES.

MEMORIAL

TO THE STATE LEGISLATURE.

The following is a Copy of one of the **Sixty Memorials** which were Signed by several **thousands** of our most influential Citizens. FORTY of them were transmitted to the Hon. John B. Scott; ELEVEN to the Hon. E. Rhoades; and TWO to the Hon. A. Dixon—all of the Senate—to be presented to that body;—and the residue, to the Hon. Robert Smith, to be presented in the House of Assembly.

In order that gentlemen at a distance, to whom this publication is sent, may form an opinion of the Standing of the Memorialists in the community in which they live, we have appended a note, stating their official character, profession, &c.

"TO THE HONORABLE THE LEGISLATURE OF THE STATE OE NEW YORK:

"YOUR Memorialists, citizens of the City of New York, most respectfully REPRESENT to your Honorable Body that the great and arbitrary Power now and heretofore exercised by the Corporation of the City of New York, their officers and servants, in the imposition of fictitious and ruinous Assessments upon private property for what are miscalled public improvements, has had the effect to lessen and depreciate the Value of Real Estate; and the loose and reckless manner in which these extraordinary proceedings have been carried on has had the effect to impair Real Estate Securities, and to render Titles doubtful and insecure.

"Your Memorialists complain to your Honorable Body that the Annual Taxes imposed upon the real and personal property in the City of New York have been increased to such an extent as to have become oppressive and burdensome to the People, and will have the effect to drive men of capital out of the city, will retard its prosperity, and be a check to its improvement.

"Your Memorialists ask that such of the Public Property belonging to the Corporation of the city of New York as is not required for public use may be vested in a Select Deliberate Board of Control to be composed of judicious, experienced business men, to be selected in equal numbers from both political parties; and that such Board shall be authorised to sell and dispose of the said public property, and apply the proceeds to the payment of public debt, and thereby lessen the annual Taxes.

"Your Memorialists ask that the amount of the Annual Tax may be greatly reduced; that the Salaries of the public officers to be paid therefrom may be lessened, and the number of such officers may be decreased; and the Corporation may be prohibited from borrowing Money except on temporary loans in anticipation of the annual tax authorised specially for the payment of the interest of the public debt.

"Your Memorialists ask that the Office of Ward Collectors may be abolished, and that the Taxes may be collected at a Central Office to be established by law for that purpose.

"Your Memorialists ask that the Board of Supervisors may be constituted of persons other than the Members of the Board of Aldermen, that an additional check may be provided against the extravagant expenditure of public money by a greater distribution of political power.

"Your Memorialists ask that more adequate Restrictions may be provided to prevent Members of the Common Council from engaging either directly or indirectly in Public Contracts.

"Your Memorialists ask that all the Memorials heretofore presented to the Legislature touching the premises, and the Report and Documents of the Select Committee from the Senate appointed to investigate Assessment Abuses in the city of New York, together with the Memorials presented at the extra session, may be referred to a Special Committee; and that the Legislature may pass a law to remedy the evils complained of, and such as they in their wisdom may deem meet.—*New York, January* 1843.

"And in duty bound, &c."

Gulian C. Verplanck.

NOTE.—Mr. V. was a member of the Select Committee appointed to investigate Assessment Abuses in the City of New York in 1841.

AND SEVERAL THOUSANDS OF OTHER CITIZENS OF THE CITY OF NEW YORK.

OTHER MEMORIALS AND REMONSTRANCES.

THIRTY-TWO Memorials and Remonstrances, signed by **2,700** Citizens of the City of New York, were presented to the Senate by Mr. Dixon.

Thirty of these Memorials and Remonstrances were presented on the 5th of April, signed by 2,500 Citizens; and, on motion of Mr. Dixon, were read and referred to the Judiciary Committee. Instead of being placed on the Journals as Thirty Distinct Memorials and Remonstrances against the passage of a Bill which was in a few minutes after acted upon, viz., "the bill to authorise the Corporation to purchase Lands at their own Assessment Sales," they are all set down as One Memorial, signed by "Phelps, Dodge & Co. and 312 others, in relation to lands sold for taxes and assessments in the city of New York, &c." (See Senate Journal, page 415, in contrast with the files of the Albany Argus and Daily Advertiser of April 6th, 1843.

The Thirty-two Remonstrances contain this Section.

"The Undersigned remonstrate against the conferring of any Authority on the Corporation of the City of New York, or any of its Officers, to become Purchasers at Assessment or Tax Sales."

When this bill was reported, which was in a few minutes after the presentation of these remonstrances, Mr. PORTER, a distinguished Senator, stated, in his seat, that he for one was unwilling to act upon a bill, while so many remonstrances, and so numerously signed, would by such means, be given the go-by.

Mr. Franklin stated that the Senators from the City of New York would take the responsibility of passing this bill.

These Thirty Memorials and Remonstrances, were each and every of them, endorsed as distinct, and separate, remonstrances, and the names of one or more of the signers, and others, naming the number of others, distinctly endorsed on each, in writing. In addition to which, was stated also in writing, that the remonstrances were against the passage of the Act to authorise the Corporation to purchase lands for assessments.

On these thirty-two memorials, the names of some of our most distinguished Citizens were signed, viz.: Jonathan Thompson, Geo. Griswold, Peter Schemerhorn; Brown, Brothers & Co.; John Haggerty & Co., Joseph Sampson, Abraham G. Thompson, Abraham Van Nest, John M. Bradhurst, Goodhue & Co., Hicks & Co.; Grinnell, Minturn & Co.; Phelps, Dodge & Co.; John H. Howland, Howlands & Aspinwall, and numerous others of the highest standing and respectability, without distinction of party.

Mr. Varian was very ambitious for the passage of the Act authorising the Corporation to purchase Lands for Assessments, and he appeared to be very much opposed to the mission of the New York Committee, as soon as he was aware that the delegates were opposed to the longer continuance of the Compulsory Inspection Law.

A brother-in-law of Mr. Varian, had but a short time previous, been appointed by the Senate of which Mr. V. is a member, on the nomination of the Governor, Inspector of Pot and Pearl Ash in the City of New York—a very lucrative office. Our State Constitution provides that members of the State Legislature shall not be appointed to office during the term for which such member shall have been elected, but the appointment of a *near relative* of a member is not prohibited by the restrictive clause.

We have no objection to the gentleman appointed Inspector of Pot and Pearl Ash—we believe he is a worthy Citizen, but like many of his predecessors he had no practiaal knowledge of the *quality* of the article he was appointed to inspect;—such, at least, is the information we obtained, and as much is indicated in his letter to the Editors of the Journal of Commerce, which is stated in full in the subsequent pages of this volume.

Another clause in the Thirty-two Memorials is in the words following:

"The Undersigned ask that the Members of the Board of Water Commissioners may be made, by virtue of their said office, members of the Board of Supervisors of the County, and the President of the said Board of Water Commissioners may be made, by virtue of his said office, County Treasurer, and may be authorised to receive all taxes paid voluntarily without the intervention of a Collector."

This is also a matter of very great importance. The pioneer memorial was presented by Mr. Dixon in the Senate on the 2d March, was then read and laid on the table. This was signed by JONATHAN THOMPSON and others. On the 7th of March, Mr. Varian moved a reference of the memorial to the Judiciary Committee, which we considered an indication of his being in favor of the measure, and we cannot conceive how he could be otherwise, for the members of the Board of Water Commissioners are some of our very best Citizens. Stephen Allen, William W. Fox, Saul Alley, and Thomas T. Woodruff—gentlemen in whom the good men of both political parties have entire confidence. Had the Legislature placed these gentlemen in the Board of Supervisors, no member of that body would have attempted to place the Assessmeat Rolls in the hands of the Ward Collectors, and the payment of the tax money into the hands of the President of the Water Board, as County Treasurer, would have been the beginning of a new era of such vast importance as to have added Twenty Million of Dollars to the intrinsic value of the Real Estates of the City of New York. If such men as the Water Commissioners could have CONTROL of the Public Funds, we venture to say that no such sum as **ELEVEN HUNDRED AND SEVEN DOLLARS AND SEVENTY-FIVE CENTS**, for printing a City Comptroller's Report for 1841 of 131 pages, which was ONLY WORTH $153..75, would have been allowed; nor **FOUR HUNDRED DOLLARS** for printing the Tax Bill of 1843, which IS LESS MATTER THAN IS CONTAINED IN SIXTEEN OF THESE PAGES, and costs—with Paper, Composition and Press-work—*but sixty-eight dollars!!!* In the one case, seven prices, and in the other, six prices was paid for the job, and by officers who are continually talking about economy, but never practise it—at least, if this is a fair illustration of it, it is a very bad specimen.

SPECIAL MEETING.

TUESDAY EVENING, MARCH 7, 1843.

The OFFICERS of the PUBLIC MEETING—convened by public notice at the Merchants' Exchange, in the City of New York, on the 6th of March instant, in relation to the ASSESSMENTS AND TAX BILLS, in pursuance of a Resolution of said Meeting, empowering them to appoint a COMMITTEE OF DELEGATES to proceed to Albany,—have convened this 7th day of March, to carry said resolution into effect.

Preserved Fish, Esq., in the Chair, and William Billings Meech, Esq., appointed Secretary.

On motion of Abraham G. Thompson, Esq.—Resolved, That the proceedings of the public meeting held at the Merchant's Exchange yesterday, be read, and also the Remonstrance and Memorial of the said meeting to the Hon. the Legislature; whereupon the Secretary read the said proceedings, and also the said memorial and remonstrance, and the said memorial and remonstrance was UNANIMOUSLY approved.

On motion of Abraham G. Thompson, Esq. Resolved, That—Whereas, at a Public Meeting held at the Merchants' Exchange on the 6th of March instant, it was resolved that a Committee proceed to Albany and present the remonstrance and memorial to the Honorable the President of the Senate, or to the Hon. the Speaker of the House of Assembly, and request the presiding officer to whom the same is delivered to present the same, and to call for its reading, and move that it be referred to the Committee to which the Tax and Assessment bills from the Common Council shall have been referred, and that the Committee delegated by this meeting ask to be heard before the Honorable the Committee to whom these matters shall be referred; and resolved, "That the Committee of Delegates be appointed by the President and Vice Presidents of the Meeting, and such Committee to have power to add to their numbers"—Therefore this Meeting, in pursuance of the foregoing recited authority, appoint John M. Bradhurst, Eben Meriam, Burtis Skidmore, H. W. Field, and Peter Cooper, delegates to proceed to the City of Albany, with full power in the premises.

The motion having been seconded by Peter Embury, Esq.—The Chairman put the question, "shall the Resolution pass?" and the same was unanimously determined in the affirmative.

On motion of George Griswold, Esq., seconded by Peter Cooper, Esq.—Resolved, That Abraham G. Thompson and Peter Embury, be added to the Committee. The Chairman put the question, and the resolution was unanimously adopted.

On motion of Abraham G. Thompson, seconded by Peter Embury—Resolved, That George Griswold, William Gale, and W. B. Meech, be also added to the Committee of Delegates. The Chairman put the question, and the resolution was adopted unanimously.

On motion of Peter Embury, Esq.—

Resolved, That this meeting do now adjourn.

W. BILLINGS MEECH,
Secretary.

NOTE.—Mr. Meech set out for Albany on Wednesday morning, March 8th; Mr. Bradhuret, Mr. Cooper, Mr. Skidmore, and Mr. Meriam, followed on the 22d March.

Mr. Meech arrived in Albany on the 9th of March, and remained at the Capitol until the following Monday.

Alderman Cooper, remained in Albany one week; Messrs. Bradhuret and Skidmore, ten days; and Mr. Meriam, until five days after the Session of the Legislature had terminated.

The Committee of Delegates, on the evening of their arrival at Albany, in a body, waited upon Mr. STRONG, Chairman of the Committee on the Judiciary of the Senate; and also upon Mr. FOSTER, a member of that Committee. They also, the same evening, waited upon Mr. VARIAN, and Mr. SCOTT; and also, upon His Honor the LIEUT. GOVERNOR. The next day they waited upon Mr. DIXON, a Member of the Senate Committee on the Judiciary, whose lodgings were at some distance from the house at which the Committee took rooms. The same day they called upon HIS EXCELLENCY GOV. POUCK; upon the Secretary of State, COL. YOUNG; and upon the State Comptroller, Mr. FLAGG, with a view to make the object of their mission generally known. They also called upon Senator HUNTER, Judge BOCKEE, and several other SENATORS. A Bill, which was committed to the Committee on Finance, of the Senate, on the Memorial of the CHAIRMAN OF THE CITIZENS' COMMITTEE, Mr. BRADHURST, Judge Bockee (the Chairman of that Committee) at once called the Finance Committee together. Before this Committee, consisting of JUDGE BOCKEE and Judge PORTER, two very intelligent members of the Senate, the New York Citizens' Committee appeared, and had two hearings. The Finance Committee adopted the suggestions of the New York Citizens' Committee, and reported to the Senate two Bills in accordance therewith, which will be noticed in the next number of this volume. The Committee of Finance is one of the most important committees, and the Lieut. Governor, in selecting the Members of this, did himself great credit, and the public essential service. Judge Bockee, the Chairman, is a a Citizen of the old school order.

TAXES.

The Anti-assessment Committee call the attention of Incorporated Companies and tax-paying Citizens to the recent extraordinary proceedings in the Board of Supervisors of the County of New York. These are as follows :—

BOARD OF SUPERVISORS..OCTOBER 3, 1843.

His Honor, ROBERT H. MORRIS, Mayor of the City of New York, offered the following resolution :

"RESOLVED, That the Receiver of Taxes be requested to receive the Taxes named in the last column of the assessment-roll, from all such persons who may desire to pay their taxes before the first day of January next, and to deduct therefrom at the rate of Seven Per Cent. per annum between the day of such payment and the first day of February next, until the further order of the Board."

"Alderman WOODHULL of the second ward offered the following resolution as a substitute :

"RESOLVED, That the Comptroller cause the assessment-rolls annexed to be placed in the hands of the Collectors with all possible dispatch, and the warrants be issued to each Collector with *all possible dispatch*, and that as soon as they respectively give their bonds to be approved by the Chamberlain of the City."

On the substitute offered by Alderman WOODHULL of the 2d Ward, the following is the vote :

Affirmative—RECORDER; Aldermen CLAYTON, WOODHULL, MARTIN, EMMONS, VANDEVOORT, PURDY, BRIGGS, RAWSON, and LEE —10.

Negative—MAYOR ; Aldermen DUNNING, TILLOU, NASH, WATERMAN, BREEVOORT, SCOLES and BRADY—8.

The GENTLEMEN, who voted in the NEGATIVE, deserve thanks.

The first section of Art. 2 of the Tax Law passed April 18, 1843, is as follows :—

"ARTICLE II.

"OF THE MODE OF THE COLLECTION OF TAXES.

"SECTION 1.—The Board of Supervisors of the city and county of New York shall cause the corrected assessment-roll of each ward of the said city, *or a fair copy thereof*, to be delivered to the receiver of taxes, in the said city, on or before the 25th day of September in each year."

In the official letter of ALFRED A. SMITH Esq., City Comptroller, dated "Comptroller's Office, Sept. 27th, A. D., 1843," is the following :

"To the Hon. the Board of Supervisors—

"Gentlemen : I respectfully submit the new assessment-rolls for confirmation. *I have been unable to do so at an earlier period by the delay of several of the Assessors.*"

The Comptroller should have stated who these Assessors were, which delayed the proceedings. These Officers were *required by law* to deliver their respective assessment-rolls to the Comptroller on or before the 20th of September. The following is the provision of law :

"And such assessors shall sign the said assessment-roll, and deliver the same, on or before the twentieth day of September next ensuing, to the Comptroller of the said city, who shall deliver the same to the Supervisors at their next meeting."—Tax Act, 1842, §1.

The late Board of Supervisors, previous to the termination of the term of office of its members, and subsequent to the passage of the Tax Act, a part of which is above recited, repealed the resolution of that body giving compensation to Ward Collectors, and the late Common Council, previous to the term of office of the members expiring, created an office of Receiver of Taxes.

The section of the Tax Act of 1842, which we have quoted above, implies a meeting of the Board of Supervisors prior to Sept. 25, 1843, and the provision of the 5th subdivision of Sec. 3, Art. 1, of Chapter 12 of the Revised Statutes, in connexion with Section 17 of the same act, are thus reconcilable. See Vol. 1 R. S. and Session Laws of 1842, and Tax act of 1843 above quoted.

AN ORDINANCE

TO ESTABLISH AN OFFICE FOR THE COLLECTION OF TAXES IN THE CITY OF NEW YORK.

The Mayor, Aldermen and Commonalty in Common Council convened, do ordain as follows, viz.:

§ 1. An office is hereby established for the collection of Taxes in the City of New York pursuant to the provision of an act entitled "An Act for the Collection of Taxes in the City of New York," passed April 18th, 1843.

§ 2. The said office shall be kept in a building known as the Hall of Records.

§ 3. The Receiver of Taxes shall receive an annual Salary of Two thousand dollars, and the Deputy an annual Salary of Fifteen hundred dollars, to be paid to them respectively by the Mayor, Aldermen and Commonalty of the City of New York, by a warrant upon the Treasury of the said City on the usual quarter days.

§ 4. The receivers of taxes shall immediately after they shall have entered upon the duties of their office, appoint three clerks, who shall receive an annual Salary of Six hundred dollars each, payable on the usual quarter days.

§ 5. The receiver shall provide such books, forms and other things, as shall be necessary for conducting the business of said office, the expense of which shall, upon being allowed by the Finance Committee of both boards, be paid out of the City Treasury.

Passed Board of Aldermen, April 23d, 1843.

Passed Board of Assistants, April 27th, 1843.

Received from His Honor the Mayor, June 17th, 1843.

Without his approval, or objections thereto, the same, under the provisions of the amended charter, became *adopted*.

"BOARD OF SUPERVISORS.

"MAY 1ST, 1843.

"The Supervisor of the 15th Ward presented the following *Preamble* and Resolution, viz.:

"Whereas, by an Act of the Legislature of this State passed April 18th, 1843, *the duties* of the Collector of Taxes of the several Wards *have been abrogated*, and have devolved upon the *Receiver of Taxes* to be appointed by the Common Council, therefore

"Resolved, That the compensation allowed the Collector of Taxes of the several Wards, by virtue of a resolution of the Board of Supervisors, adopted Nov. 21st, 1840, be abolished, and the said resolution is hereby rescinded. *Referred to the Committee on the Annual Taxes.*".

"BOARD OF SUPERVISORS.

"MAY 5TH, 1843.

"The Committee on Annual Taxes to whom was referred the *Preamble* and Resolution in relation to rescinding the resolution fixing the compensation to the Collectors of the Wards, passed Nov. 21st, 1840, presented the following report in favor thereof, which was adopted, on a division, viz. ;

"*Affirmative*—The RECORDER, CHAIRMAN and SUPERVISORS of the 2d, 3d, 5th, 6th, 7th, 8th, 9th, 12th, 14th, 15th and 16th Wards—13.

"*Negative*—The MAYOR and Supervisors of the 4th, 10th, 11th and 13th Wards—5.

We copy from a valuable publication, entitled "The Manual of the Corporation of the City of New York for 1841 and 1842," compiled and published by DAVID T. VALENTINE Esq. Deputy Clerk of the Board of Aldermen. The Resolution of the Board of Supervisors passed Nov. 21st, 1840, and its repeal, referred to above, is as follows :

"At a meeting of the Board of Supervisors, Nov. 21st, 1840, the following resolutions were adopted, viz :

"*Resolved*, That from and after the passage of the resolution, the amount of compensation or Fees of the Collectors of the different Wards be fixed at the following rates—

1st	Ward	$3000	10th	Ward	$1600
2d	"	1600	11th	"	2000
3d	"	1600	12th	"	2000
4th	"	1600	13th	"	1600
5th	"	1600	14th	"	1600
6th	"	1750	15th	"	1900
7th	"	1600	16th	"	2000
8th	"	1750	17th	"	1800
9th	"	1700			

"*Resolved*, That a deduction of One hundred dollars be made for each five per cent of the amount on the Book of each Collector not paid to the City Chamberlain on the first Saturday succeeding the first day of April in each year, and in like proportion on less sums. Samuel J. Willis, Clerk."

"*Proceedings of the Joint Ballot of Board of Aldermen and Assistants.*—May 3d, 1843.

"By Alderman Balis—Resolved, That Thomas Jeremiah be and is hereby appointed receiver of taxes, pursuant to the Statute

of this State, passed April 18th, 1843, which was adopted.

"*By the same*—Resolved, That Dow D. Williamson be and is hereby appointed deputy receiver of taxes pursuant to a law of this State passed April 18th, 1843, which was adopted.

"August 2d, 1843.

"By Aldermen Hatfield—Resolved, That Henry T. Keirsted be and is hereby appointed to the office of receiver of taxes, which was adopted.

"*By the same*—Resolved, That Dow D. Williamson be and is hereby removed from the office of deputy receiver of taxes, which was adopted on a division, viz.:

"*In the affirmative*—Aldermen Martin, Tillou, Emmons, Nash, Vandevoort, Waterman, Hatfield, Brevoort, Rawson, Lee; Assistants Charlick, Williams, Pattison, Henry, Dougherty, Brown, Smith, Ward, C. I. Dodge, Jackson, Boggs, Nichols, Seaman, Pettigrew—22.

"*In the negative*—Aldermen Clayton, Dunning, Scoles, Brady; Assistants Nesbit, W. Dodge, and Oliver—7.

"*By the same*—Resolved, That Clement Guion be and is hereby appointed to the office of deputy receiver of taxes in place of Dow D. Williamson removed, which was adopted."

REMARKS.

It will be seen by the above recited proceedings in the Board of Supervisors, in the Board of Aldermen, and also in the Board of Assistants, that the members of two successive common councils, including the present, have voted upon proceedings which recognised the Tax Act of April 18th, 1843, to have been in force from the date of its passage—not by recitals, indirectly recognising it, but by particular and distinct acts in which no other question or matter was intermixed.

In the vote recorded in the Board of Supervisors on the 5th May, the Recorder; the Supervisor of the Second Ward, Alderman Woodhull; and the Supervisor of the 15th, Alderman Davies; voted in the affirmative. Here are three gentlemen of the legal profession, and one a judge, deliberately putting their opinion on record, stating distinctly and expressly that the State Legislature had abrogated *the duties* of the office of Ward Collectors of Taxes. The Mayor, on this occasion, recorded his vote on the other side: he is a member of the legal profession. The vote, it will be seen, was very strong, 13 to to 5, and not a political vote.

When the Resolution of Alderman Woodhull, Supervisor of the 2d Ward, in the Board of Supervisors, on the 3d of October, directing the Comptroller to deliver the assessment rolls to the Ward Collectors instead of the Officer designated by Law, was voted upon, the Mayor, Mr. Tillou, Mr. Waterman, and Mr. Scoles, four gentlemen of the legal profession, voted to sustain the law of April, 1843. In the meeting, in joint ballot on the 2d August, 1843, Mr. Wm. Dodge of the Third Ward and Mr. Dougherty, both gentlemen of the legal profession and members of the Board of Assistants, voted on provisions recognising the Act of April 18th, 1843, as a law in full force.

Thus we have counted up *nine lawyers*, all expressing, by their votes, their opinions as to the true construction of the law; but three of them—one on a single occasion, and two on another occasion—allowed a vote to vibrate, and to get upon the wrong side, and against the law.

The lay members of the two boards, have, with perhaps one or two exceptions, recorded their votes in full recognition of the law in force.

Gentlemen who claim to be City Lords, and who exercise more than autocratic powers, should be consistent in their public acts, as well as their votes.

We have heard it remarked, as having been stated by a Supervisor, that the provision of the Constitution which requires all officers theretofore elective, to continue to be elected, precludes the Legislature from abolishing the office of Ward Collectors. When the present Constitution was adopted, there were but ten wards in the city of New York, and ten Ward Collectors. The wards were subsequently increased to 17, and the Collectors to the same number. No person disputed the right of the Legislature to increase the number, and they can decrease the number, or they can give the right to perform the duties to any other elective officer. This they have done in Section 9, Art. 2, of the Act in question, as below, to the Sheriff and Constables, who are elective officers.

The Constitution does not, in its provisions expressed or implied, debar the tax-payer from voluntarily carrying the amount of his taxes to the City Hall and depositing it in the hands of a public officer required by law to receive the same.

The Chancellor of the State, recently, in an elaborate Opinion which he gave, referred to a Decision in the Court for the Correction of Errors, upon a question somewhat analagous to that he had in hand, and remarked that the members of the legal profession, who were members of that court, had, by their vote, expressed an opinion in favor of the construction he advocated, which he considered as an indication of the opinion of the court, from the ability and qualification of the law members, to form a correct opinion, as contrasted with the lay members.—We have here nine lawyers, all concurring in the construction we insist upon, and expressing this opinion by their vote, and we therefore may quote such high authority as the Chancellor to sustain a principle of construction. We will not, however, go with the Chancellor in this, as a sound discrimination. We remember the time when that distinguished citizen, STEPHEN ALLEN, was a member of the Court for the Correction of Errors. His opinion we valued greatly, superior, certainly, to that of many men who had been admitted to practise law. We could name another, MYNDERT VAN SCHAICK, a most worthy and excellent man. This gentleman was also a member of that court some years ago, and the resignation of his seat, for the reasons known, ought to have been emblazoned in letters of gold.

We have some worthy citizens in the Board of Supervisors, and we are very sorry to see their votes given, at the meeting of that Board on the 3d of October, on what we are sure is the wrong side. Still we are not disposed to question the motives of these gentlemen. The best men err, and differ in opinion in matters of the greatest clearness. The gentleman of the first ward, who voted hesitatingly on this question when the vote was taken, says now, that he feels that he voted right, having since examined the law. This gentleman is one of our best citizens, but we cannot agree with him in the conclusion he feels it his duty to come to, and we hope that a further examination, and a careful reading of the *whole law*, will yet convince him that he erred in his vote, and if he becomes convinced, we are confident he will act in accordance with that convincement. This is an important matter to the people—important that the majesty of the law should be sustained—important to the City Treasury. Citizens, in great numbers, have the money ready to pay their taxes, as soon as the Books are in the hands of the Receiver, and we doubt not that near a million of dollars will be paid voluntarily before the 1st of January. Last year the amount paid voluntarily prior to the 1st January, was, according to the Comptroller's report of 1843, page 82, $759,324..68. The previous year, the Collectors, during the same time, gathered but $193,283..80; and it may here be remarked, that the Collectors were stimulated by the Comptroller, for this money, collected before the 1st of January:—he allowed them a bonus of $837..31, for prompt collection, as appears by the Comptroller's report of 1843, page 33. Now for a moment look at the matter. That most excellent man, as well as most worthy public officer, OLIVER COBB Esq., Collector of the First Ward, for the time he was engaged in the performance of the duties of his office, received a compensation, as daily pay, second only to that of the President of the United States. It was more than double the pay of the Governor of this State, and treble that of the Mayor of this city, for the time being. We do not mention this with an unkind feeling toward Mr. Cobb—far otherwise;—but merely for illustration. As we observed, Mr. Cobb is a most worthy officer, and we wish all our public officers were like him, excepting the princely compensation.

The present Comptroller, in his maiden report of 1839, page 19, in reference to a general receiving office, uses this language: "*It has heretofore been proposed to establish a general receiving office for the collection of the ordinary Taxes, and of all other Assessments. The plan has been favorably thought of. For efficiency and economy it would be a manifest improvement. The amount paid to the Ward Collectors alone, for collecting the tax of* 1838, *amounted to nearly* $30,000."

We are very glad to quote the City Comptroller on the right side, as above, and shall

always be very glad of the opportunity to do so on future occasions.

Various Provisions of the LAW passed April 18th, 1843.

"ARTICLE I.

"COLLECTORS OF TAXES AND OF ARREARS OF TAXES ABOLISHED, AND A DEPARTMENT CREATED THEREFOR.

"SECTION 1. The office of collectors of taxes, as created and established by the charter of the city of New York, and by the statutes of the State, and the office of collectors of arrears of taxes in the said city, as created and established by the common council of the said city, shall cease from and after the day when this act shall take effect; and all provisions by charter, statute, ordinance, resolution or otherwise, creating such offices, and imposing or defining the duties thereof, are hereby abrogated.

§ 2. It shall be the duty of the common council of the said city, within twenty days after this act shall take effect, to establish an office for the collection of taxes in the city of New York, which shall be a branch of, and subordinate to, the department of finance of the said city, and which shall be conducted by a receiver of taxes, a deputy, and a suitable number of clerks, to be appointed as hereinafter directed, and whose duties are hereinafter prescribed.

§ 3. It shall be the duty of the common council of the city of New York, within twenty days after this act shall take effect, to appoint a suitable and discreet person, to be known as receiver of taxes in the city of New York, who shall hold his office during the pleasure of the common council, and until his successor shall be appointed, as hereinafter provided; and another person, to be known as deputy receiver of taxes in the city of New York, who shall hold his office for the like term, unless sooner in like manner removed. The said receiver of taxes shall receive an annual salary not exceeding the sum of two thousand dollars, and the said deputy receiver an annual salary not exceeding the sum of fifteen hundred dollars, to be paid to them respectively by the mayor, aldermen, and commonalty of the city of New York, on the usual quarterly days."

"ARTICLE II.

"OF THE MODE OF THE COLLECTION OF TAXES.

"SECTION 1. The board of supervisors of the city and county of New York shall cause the corrected assessment roll of each ward of the said city, or a fair copy thereof, to be delivered to the receiver of taxes in the said city, on or before the twenty-fifth day of September in each year.

"§ 2. To each assessment roll so delivered to the said receiver of taxes, a warrant under the hands and seals of the board of supervisors, or of any five or more of them, of whom the mayor and recorder shall always be one, shall be annexed, commanding such receiver to collect from the several persons named in the assessment roll, the several sums mentioned in the last column of such roll, opposite to their respective names, and to pay the same from time to time, when collected, to the chamberlain of the said city, according to the provisions of this act.

"§ 3. The said receiver, upon receiving the said assessment rolls and warrants, shall proceed to collect and receive the said taxes from the several persons assessed in the said assessment rolls in the manner hereinafter mentioned.

"§ 4. If any person who shall be assessed in any of the said assessment rolls shall desire to pay the amount of his taxes on or before the first day of January succeeding the delivery of the said assessment rolls and warrants to the said receiver, it shall be the duty of the said receiver to receive the same, and to deduct therefrom at the rate of seven per cent. per annum, between the day of such payment and the said first day of February then next succeeding.

"§ 5. If any such taxes shall remain unpaid on the first day of January, it shall be the duty of the said receiver to give public notice, by advertisement, in six or more of the public newspapers printed in the said city, that unless the same shall be paid to him at his office on or before the fifteenth day of February in each year, he will immediately after that day proceed to collect the same as provided in the next section.

"§ 6. If any such taxes shall remain unpaid on the said fifteenth day of February, it shall be the duty of the said receiver to charge, receive and collect upon such tax so remaining unpaid on that day, in addition to the amount of such tax, one per cent on the amount thereof, and to charge, receive and collect upon such tax so remaining unpaid, on the fifteenth day of each month, between the said month of February and the first day of April thereafter, a further addition or increase of one per cent upon the amount of such tax; and such increase or percentage shall be paid over and accounted for by such receiver from time to time as hereinbefore prescribed, as a part of the tax collected by him.

"§ 7. If any such tax shall remain unpaid on the first day of March after the delivery of the assessment rolls and warrants to the said receiver, the said receiver shall immediately thereafter cause notice, in writing, to be given to the person from whom the same shall be due, specifying therein the amount of such tax and the per centage which shall accrue thereon, and requiring such person to pay the same to the said receiver on or before the first day of April thereafter at his office.

"§ 8. Such notice shall be served upon such person, if he be a resident or engaged in the transaction of business within the said city, either personally or by leaving the same at his residence or place of business, as the case may be, with some person of suitable age and discretion, at least eight days before the said first day of April.

"§ 9. The said receiver shall also, immediately after the said first day of March, give public notice in at least six of the public newspapers of the said city, to be published therein respectively at least ten days, notifying all persons who shall have omitted to pay their taxes to pay the same to him at his office on or before the first day of April. Upon filing an affidavit of the service of the notice required by the seventh section of this article, as therein prescribed, in the office of the clerk of the city and county of New York, or that the person therein named could not, upon diligent search and inquiry, be found within the said city, and also upon filing an affidavit or affidavits of the due publication of the notice required by the eighth section of this article as therein prescribed, it shall be the duty of the said receiver to charge, collect, and receive upon all taxes remaining unpaid on and after the said first day of April, an interest at the rate of 12 per cent per annum, to be calculated from the day on which the said assessment rolls and warrants shall have been delivered to the said receiver. It shall also be lawful for the said receiver, if any such tax, with the interest thereon, as hereinbefore provided, shall remain unpaid on the fifteenth day of the said month of April, to issue his warrant under his hand and seal, directed to the sheriff of the city and county of New York, or any constable or marshal of said city and county, commanding him to levy the said tax, with interest thereon at the rate of twelve per cent per annum from the day of the delivery of the assessment rolls and warrants to the said receiver, to the time when the same shall be paid, by distress and sale of the goods and chattels of the person against whom the said warrant shall be issued, or of any goods and chattels in his possession, wheresoever the same shall be found within the said city, and to pay the same to the said receiver and return such warrant within thirty days after the date thereof; and no claim of property, to be made to such goods and chattels so found in the possession of the said party, shall be available to prevent a sale."

ARTICLE IV.

REPEAL OF OTHER PROVISIONS, AND TIME WHEN THIS ACT SHALL TAKE EFFECT.

"SECTION 1. The provisions of Chapter XIII. of the First Part of the Revised Statutes, regulating the collection of taxes, shall hereafter be inapplicable to the city and county of New York.

"§ 2. All former laws, acts and parts of acts, relating to the collection of taxes in the city of New York, or to the officers by whom the same shall be collected, and to the sale of property, real or personal, therefor, or to the redemption of real estate sold for taxes in the said city, and all other acts or parts of acts inconsistent herewith, are hereby repealed.

"§ 4. This act shall take effect immediately, except the provision to abolish the office of collector of taxes, which provision shall take effect on the first day of April, 1844.

REMARKS.

The reader has now the provision of the Tax Act in this matter before him, and we proceed to give these provisions that construction which the words of the law seem to warrant.

We will in the first place take the concluding section of the act, which we will state again.

§ "*This act shall take effect immediately*," (here is a comma: it then proceeds) "except *the provision* to abolish the Office of Collector of Taxes, which *provision* shall take effect on the 1st day of April, 1844."

Thus all the Act, *except* section 1 of Art. 1, took effect on the 18th day of April, 1843, and that *single* provision is excepted.

The Ward Collectors hold office, but we contend that there is *no provision of Law* to to give them any duties to perform. Special provision *is made* in that portion of the Act which took effect *immediately*, for the Collection of the Tax by OTHER OFFICERS.

Suppose the Ward Collectors execute a bond to the City Chamberlain,—will that bond be legal?

Suppose a Citizen pays his tax to a Ward Collector, may it not be said that he pays in his own wrong?

Are the Ward Collectors authorised to make an abatement of Interest for payment prior to February 14, 1844?

When the tax act passed, we supposed that its provisions were such as to make the act of doubtful construction, but subsequent examination confirms us in the opinion we now express.

It will be seen by a careful reading of the Tax Act that the following are its provisions as to the periods of payment of the tax:—

By Sec. 4 of Art. 2—Any person desirous of paying his tax prior to January 1st, shall, on paying the amount to the Receiver, be entitled to a deduction at the rate of Seven Per Cent. per annum, to be computed from the day of payment to the 1st day of Feb.

By Sec. 5, Art. 2—Any person may pay his tax to the Receiver subsequent to Jan. 1st and prior to February 15th, but he has no discount allowed.

By Sec. 6 of Art. 2—He has an extension of time from the 14th of February to the 14th of March, on paying in addition to the tax a penalty of one per cent. in lieu of interest.

By Sec. 6 of Art. 2—He may have a further extension from the 15th until the 31st of March, on paying a further penalty of one per cent. making two per cent.

By Sec. 9 of Art. 2—He may have a further indulgence to the 15th of April, on paying interest on the amount of the tax, to be reckoned from the day the assessment rolls were delivered to the Receiver until the day of payment, at the rate of 12 pr. ct. per annum.

By Sec. 9 of Art. 2—The Receiver may issue his warrant of distress to the Sheriff or Constable to levy the amount of any tax unpaid on the 15th April, or he may proceed to advertise the real estate which has been assessed, and after giving three months notice, may sell the same for such terms of years as any person will agree to take the same for, in consideration of paying such tax, and the owner has two years after this to redeem it.

We find no law whatever (in our humble opinion) to authorise Ward Collectors to demand, collect, or receive any tax.

AMENDMENTS

PROPOSED TO THE TAX ACT IN THE LEGISLATURE.

In order that an opinion may be formed of this act we give a copy of the Journal of Assembly in reference to its peregrinations in that body.

ASSEMBLY JOURNAL—PAGE 871.

"*Wednesday, April 12th*, 1843, 4 *o'clock, P. M.*—The Senate also sent for concurrence the Bill entitled 'An Act for the collection of taxes in the City of New York, which was read the first time, and by unanimous consent was also read a second time, and referred to the Committee on Internal Affairs of towns and counties."

The New York Citizens' Committee, of which JOHN M. BRADHURST Esq. is Chairman, attended the Committee on the Internal Affairs of Towns and Counties, and with that committee went through the various sections of the Bill, and prepared the following Amendments, all of which the Committee on the Internal Affairs of Towns and Counties unanimously adopted.

AMENDMENTS PROPOSED TO

ARTICLE I.

"§ 2. After word 'the' in first line, strike out the word 'Common Council,' and insert the words 'Board of Supervisors' after the word 'City.' In the same line insert the words '*and County*.'

"In the 3d and 4th line strike out after the words 'New York' the words 'which shall be a branch of, and subordinate to the department of finance of said city.'"

In Sec. 3, after the word 'the' in first line, strike out words 'Common Council' and insert in lieu the words 'Board of Supervisors:' in same line, after the word 'City' insert words '*and County*.'

In 3d line, after word 'City,' insert words '*and County*.'

In 4th line, after word 'the,' strike out words 'Common Council,' and insert words '*Board of Supervisors*.'

In 11th line, after word 'the,' strike out words 'Mayor, Aldermen and Commonalty of,' and insert in lieu thereof, the words '*Board of Supervisors*,' and in same line, after the word 'City,' insert words '*and County*.'

In Sec. 5, second line, after word 'the,' strike out words 'Common Council,' and insert in lieu thereof words '*Board of Supervisors*.

In 3d line, strike out word 'Ordinance,' and insert in lieu thereof word '*Resolution*.'

ARTICLE II.

In Sec. 4, second line, after word 'the,' strike out word 'first,' and insert in lieu thereof word '*fifteenth*.'

In 3d line, after the word 'of,' strike out the word 'January' and insert word '*February*' in lieu thereof.

In 6th line, after word 'said,' strike out word 'first,' and insert in lieu word '*fifteenth*.'

In Sec. 5, 4th line, after the word 'office,' strike out words 'on or.'

In Sec. 6, 1st line, after word 'said,' strike out word 'fifteenth,' and insert word '*sixteenth*' in lieu thereof.

In 6th line, after word 'the,' strike out word 'first' and insert word '*sixteenth*' in lieu thereof.

ARTICLE III.

Sec. 1. In 12th line, after word 'payment,' insert words '*so much of*.'

In 13th line, after word 'specified,' strike out words 'for the lowest term of years at which any person or persons shall offer to take the same in consideration of advancing' and insert in lieu the words '*as will satisfy*.'

In 21st line, after word 'auction,' strike out words 'for a term of years.'

In 28th line, after word 'purchased,' strike out words 'the term of years for which the same shall have been sold.'

In 30th line, after word 'a,' strike out word 'lease,' and insert in lieu the word '*deed*.'

In 32d line, after word 'sold,' strike out words 'or leased.'

In 36th line, after word 'New York,' strike out the following words, 'one of which shall contain a particular and detailed statement of the property to be sold for taxes, and such as is now published by the Street Commissioner in two daily newspapers or the said' and insert in lieu the words '*and a*.'

In line 40, after the word 'pamphlet,' strike out the words 'at the discretion of the said Comptroller in which case.'

In line 41, after the word 'deposited,' strike out the words 'in his office.'

In line 45, after the word 'published,' strike out words 'in one of the daily newspaper naming the same or.'

In 46th line, after word 'pamphlets,' strike out words 'as the case may be.'

Sec. 2. In 3d line, after word 'each,' strike out the word 'week' and insert in lieu thereof the word '*month*': in the same line, after word 'six,' strike out word 'weeks' and insert word '*months*': and in same line, after word 'in,' strike out word 'two' and insert word '*one*.'

In the 11th line, after word 'of,' strike out word 'fourteen' and insert in place thereof word '*twelve*.'

In 14th line, after word 'a,' strike out word 'lease' and insert word '*deed*.'

In 15th line, after word 'sold,' strike out words 'for such term of years as the same shall have been sold.'

In 16th line, after word 'such,' strike out word 'lease' and insert in place thereof the word 'deed'; and in the same line, after word 'be,' strike out the word 'conclusive' and insert the words '*prima facie*.'

In 20th line, after word 'said,' strike out word 'lease' and insert word '*deed*.'

Sec. 4. In line 6, after word 'exceeding,' strike out word 'fifteen' and insert word '*three*' in place thereof.

Sec. 9. Wherever the word 'lease' occurs in this section, strike it out and insert in its place the word '*deed*.'

Sec. 10. In 2d line, after word 'to,' strike out word 'fourteen' and insert word '*twelve*.'

In 3d line, after the words 'per annum,' strike out the following words: "but no interest shall be calculated on a less portion of time than one quarter of a year, and in all cases where the property shall be redeemed during any fractional part of a year, the interest shall be calculated so as to include the quarter in which such redemption shall be made, the time to be computed from the day of sale.'

Sec. 12. In 2d line, after word 'Comptroller,' strike out word 'sixty' and insert in lieu thereof the word '*two*.'

In 7th line, after word 'one,' strike out word 'month' and insert in lieu thereof the word '*day*.'

In Sec. 13. In 3d line, after the word 'residence,' strike out words 'if known to the Comptroller' and insert in lieu thereof the words '*as described in the memorandum*.'

In 9th line, after word 'assessed,' strike out words 'together with the term of years.'

In 11th line, after word 'expire' strike out words 'with a notice.'

In 12th line, after word 'or,' strike out word 'by' and insert word '*before*.'

In 13th line, after word 'that,' strike out word 'lease' and insert in lieu word '*deed*.'

Sec. 15. In 4th line, after word 'some,' insert words '*without charge*.'

Sec. 16. In 1st line, after word 'receive,' strike out words 'twenty-five cents' and insert in lieu thereof words '*six cents per folio*.'

Sec. 20. In 5th line, after word 'tenement,' insert words '*and also upon the owner*.'

In 12th line, after word 'the,' strike out words 'lease and advertisements' and insert word '*deed*.'

In 14th line, strike out word 'lease' and insert in lieu word '*deed*.'

In 18th line, after word 'thereto,' strike out words 'during the term of years for which such lands and tenements have been conveyed.'

Sec. 21. Line 2, after word 'and,' insert the words '*and also of the owner or*.'

Sec. 22. Strike out word 'lease' in 6th line, and insert word '*deed*' in lieu thereof.

Sec. 24. In line 4, after word 'certify,' strike out words 'to the fact' and insert words '*the same*.'

In line 7, after word 'thereto,' strike out the words 'during the term of years for which the same shall have been conveyed.'

Sec. 26. In 5th line, after word 'thereon,' strike out the words 'as the Mayor, Alderman and Commonalty of the City of New York in Common Council convened' and insert in lieu thereof the words '*as the Comptroller of the City of New York*.'

ARTICLE IV.

Sec. —. In 2d line, after word 'regulating,' strike out 'assessment and.'

Sec. 4 *to read as follows*:—This Act shall take effect on the second Tuesday of May, 1843.

REMARKS.

The above are the Amendments proposed by the New York Citizens' Committee, of which JOHN M. BRADHURST ESQ. is Chairman, to the act entitled "An Act for the Collection of TAXES in the City of New York," to the Standing Committee on Internal Affairs of Towns and Counties, and unanimously approved of by that Committee, and by them reported to the house of assembly on the 13th of April, 1843, as Amendments to the Bill, with which amendments they see no objections to the same becoming a law.

Mr. Jones, of the New York delegation, was Chairman of the Select Committee to which the Bill and Amendments were referred to report complete, and struck out all the Amendments, reporting the bill precisely as it came from the Senate.

One of the New York Committee subsequently stated to Mr. Jones that the Select Committee had, by striking out all the Amendments indiscriminately, prevented the County of New York from imposing a tax, as the 1st section of Art. 4, as it stood in the bill, repealed the Law, as far as the City and County of New York was concerned, which authorised the assessment of Taxes.

Mr. Jones examined the bill, saw this blunder, and asked unanimous consent to correct it.

We will now give the reader the reasons urged upon the Standing Committee in favor of the Amendments.

FIRST—*As to Sections* 2, 3 *and* 5, *in Article I.*—These specific Amendments would leave the matter of Taxes in the Board of Supervisors, where they belong. The tax is a County Assessment and not a Corporation Tax, and therefore the Board of Supervisors is the appropriate body, and not the common council.

ART. 2.

SECOND.—The Amendment to the fourth section allows persons voluntarily paying their taxes the deduction of interest from the time of payment to the 15th February, when the tax is payable, instead of only allowing persons paying prior to January 1st interest from the date of payment to February 1st, two weeks short of its being due; and besides, as the bill stands without the Amendment, there is no inducement held out by an abatement of interest to pay from the 1st of January to the 14th February.

The Amendment proposed to the 5th and 6th sections, corrects an ambiguity. As the Law now stands, the tax is allowed by the 5th section to be paid on the 15th February, and the next section imposes a penalty on all remaining unpaid on said day.

ART. 3.

The Amendment proposed in section 1 authorises the sale of only so much of the land as will pay the tax, instead of leasing the whole estate for a term of years, so that if a man owns a hundred lots, and these are all taxed one thousand dollars, only a sufficiency to pay the tax should be sold, and not all. Also that a detailed description of the lands shall be published in a pamphlet instead of a newspaper, and a short notice of the sale in ten daily papers, once a week for three months, which notice shall state that a detailed statement is published in a pamphlet, and state where these pamphlets are deposited for gratuitous distribution. The expense of this would not be a fifth as much as will be the cost under the present law.

The Amendment proposed to the 2d section is that the notice to redeem shall be published once a month for six months, instead of once a week for six weeks. Contrast these two provisions together, and see the very great difference. For example, a lot sold for taxes on the 2d January, 1842, would be redeemable on the 1st of January, 1844. As the law now stands notice is given, commencing on the first of February, 1843, once a week for six weeks, and this notice is out of print by the middle of August, four and a half months before the time of redemption expires. By the Amendment, a notice would be given on the first of every month from July to January, so that the owner would have four times the greater opportunity of seeing the notice in this case than the other.

The Amendment makes the deed prima facie instead of conclusive evidence of the regularity of the sale. Experience in tax and assessment sales show this to be very necessary.

The Amendment proposed to the 10th section allows the owner redeem at any time by paying the tax and expenses and 12 per cent interest, and relieves from the payment of interest from an unexpired quarter.

The Amendment to the 12th section gives to a person who may take a mortgage on real estate notice of the sale of that estate for taxes up to within one day of the time of redemption, and the present law affords no protection unless he files his memorandum sixty days before that period.

The Amendment also gives to persons who are not personally known to the Comptroller the same rights as those who are acquainted with that officer.

The Amendment to the 15th section allows the record of memorandums of mortgages in the Register's office to be examined free of charge.

The Amendment to Sec. 16 fixes the fees of the Register at six cents per folio instead of twenty-five cents per memorandum. This is necessary, as the Register charges for a memorandum containing 20 pieces of land, all of which may be on a single sheet of paper, five dollars being 25 cents for each piece of land.

The Amendment to section 20 requires notice of sale of premises to owner, and also to the occupant. These may have con-

flicting interests, and therefore both should be notified: thus the tenant could not take advantage of his landlord.

The Amendment to the 24th section allows the Comptroller to certify in a qualified sense, and not in an absolute character.

The Amendment to section 26 gives the apportionment of taxes to an officer instead of the title of a municipal corporation.

ART. 4.

The Amendment to section 1 was one of great importance. Without it the County of New York could not have imposed any tax the present year, nor hereafter, until the Legislature passed a law to that effect.

The Amendment to sec. 4 placed the act in force on the same day the new Board of Supervisors were in office under the charter of April, 1843.

P. S. Since the preceding Sheet (ending with page 260) passed through the press, the Supervisors, or Comptroller, delivered the Assessment Rolls of all the Wards to the RECEIVER—not to the Ward Collectors,—and the Receiver is now receiving the money from Citizens at his office. We understand that **17** of the Supervisors have signed the Rolls in the hands of the Receiver. We also are credibly informed that the State Attorney General, Mr. BARKER, has given a legal Opinion sustaining our Construction of the Tax Act of April 18th, 1843. We are glad to have so responsible an Endorser to our opinion. Alderman WOODHULL's resolution was an attempt to repeal a STATE LAW!!!

CONFISCATION ACT.

JOURNAL OF THE SENATE.

"MONDAY, 11 o'CLK. A. M.—*Feb'ry* 6, 1843.

"Mr. Franklin presented the memorial of MARTHA AMORY; also of JAMES MCBRIDE; also of R. V. R. SCHUYLER, of the City of New York, praying for relief from assessments; which were read and referred to a select committee, to consist of the Senators attending the Senate from the first Senate district." NOTE. *Copies of the memorials in this volume, pages* 158, 154, and 146.

Page 200.

"FRIDAY, 11 o'CLK, A. M.—*Feb'ry* 24, 1843.

"Mr. Dixon presented the memorial of JAMES G. KING, EFFINGHAM SCHEFFELIN, and others, of the city of New York, praying that public officers may be restrained by the Legislature from further proceedings in the imposition of vexatious assessments for opening streets, &c.; and praying that these matters may be investigated, and that power may be given to send for persons and papers; which was read and referred to the select committee, consisting of the Senators attending the Senate from the First Senate District."

"Mr. President presented the memorial of PHILIP MILLEDOLER, of the city of N. York, complaining of oppressive and arbitrary assessments upon his estate, and praying for relief; which was read and referred to the same select committee."

"Mr. Rhoades presented the memorial of Daniel Van Reed, of the city of New York, complaining of an assessment without notice, and praying for protection, &c.; which was read and referred to the same select committee."

"THURSDAY, 11 o'CLK. A. M.—*March* 2, 1843.

"Mr. Dixon presented the remonstrance of JONATHAN THOMPSON and others, against certain obnoxious provisions of the New York city tax bill; also a memorial asking that the members of the board of water commissioners may be members of the board of supervisors, and that the president of said board of water commissioners may be county treasurer; which were read and laid on the table."

—

"TUESDAY, 11 o'CLK., A. M.—*Mar.* 7, 1843.

"On motion of Mr. Varian,

"Ordered, That the remonstrance of JONATHAN THOMPSON and others, against certain provisions of the New York city tax bill; also the memorial, asking that the members of the board of water commissioners may be members of the board of supervisors, and that the president of said board of water commissioners may be county treasurer, now on the table, be referred to the committee on the judiciary."—Page 251.

NOTE. *This Remonstrance is set forth in a subsequent page of this number.*

Page 253.

"WEDNESDAY, 10 o'CLK, A. M.—*Mar.* 8, 1843.

"Mr. Dixon presented the memorial of GULIAN C. VERPLANCK, SAUL ALLEY, and others, on the subject of assessments and taxes, and the general concerns of the City of New York; which was read and referred to the Committee on the Judiciary."

—

Page 258.

"THURSDAY, 10 o'CLK, A. M.—*Mar.* 9, 1843.

"Mr, Dixon presented the memorial of JOHN TARGEE and others, of the city of New York, praying for an amendment of the laws of this State relative to the city of New York as to taxes, and for a reduction of the amount of the annual tax; which was read and referred to the Committee on the Judiciary."

—

Page 261.

"FRIDAY, 10 o'CLK, A. M.—*March* 10, 1843.

"Mr. Rhoades presented ELEVEN several memorials of sundry Citizens of New York, praying for a reduction of the annual taxes; also for an amendment to the assessment law; also for imposing restrictions upon the public officers of the city of New York, and for other purposes; which were read and referred to a select committee, to consist of the Senators attending the Senate from the First Senate District."

—

Page 266.

"SATURDAY, 10 o'CLK, A. M.—*Mar.* 11, 1843.

"Mr. President presented the remonstrance of sundry Citizens of the city of New York, convened by public notice at the Merchants' Exchange, New York, against certain provisions of the tax and assessment laws; also a memorial for amendments to said laws, with accompanying papers; which were read and referred to the Committee on the Judiciary."

"SATURDAY, 10 o'CLK, A. M.—*Mar.* 18, 1843.

"Mr. Franklin presented the memorial of the mayor, aldermen and commonalty of the city of New York, praying for the passage of an act to authorise the corporation of said city to purchase lands sold for taxes and assessments in certain cases, and for other purposes; which was read and referred to a select committee, to consist of the Senators attending the Senate from the First Senate District."—Page —.

REMARK.—This memorial was not signed by the Mayor of the City of New York, the Hon. Robert H. Morris. It was signed by J. R. Taylor, Clerk of the Common Council.

The previous memorials from the Corporation we have seen before the Legislature, with the signature of the Mayor uniformly affixed to them.

—

"TUESDAY, 10 o'CLK., A. M.—*Mar.* 21, 1843.

"Mr. Franklin, from the select committee, consisting of the Senators attending the Senate from the First Senate District, to whom was referred the memorial of the common council of the city of New York, relative to authorising them to purchase lands in certain cases, asked for and obtained leave to report a bill entitled 'An act to authorise the mayor, aldermen and commonalty of the city of New York to purchase lands sold for taxes and assessments in certain cases, and for other purposes;' which was read the first time, and committed to a committee of the whole.

"On motion of Mr. Franklin,

"Ordered, That the usual number of copies of said bill be printed."—Page 316.

—

"FRIDAY, 10 o'CLK., A. M.—*March* 31, 1843.

"Mr. Rhoades presented the remonstrance of JOHN M. BRADHURST, Chairman of the New York Citizens' Committee, against the passage of any act authorising the corporation of the city of New York to purchase lands for unpaid assessments and taxes, with accompanying documents, which were read and referred to the committee on the judiciary."—Page 389.

REMARK.

Mr. Rhoades moved that the Bill entitled "An act to authorise the Mayor, Aldermen and Commonalty of the City of New York to purchase lands sold for taxes and assessments in certain cases and for other purposes" be recommitted to the Committee on the Judiciary.

Mr. Varian remarked that himself and his colleague, Mr. Franklin, had both been members of the Common Council, and as they had composed a part of the Committee which had reported the Bill, he would be glad to see it take the course proposed by the Senator from the Seventh. It was so ordered. This was our understanding of the proceedings which we witnessed at that time in the Senate, and to which we will more particularly refer in the subsequent pages.

"TUESDAY, 10 o'CLK., A. M.—*April* 4, 1843.

"On motion of Mr. Scott,

"Ordered, That the committee of the whole be discharged from the further consideration of the bill entitled 'An act to authorise the mayor, aldermen and commonalty of the city of New York to purchase lands sold for taxes and assessments in certain cases, and for other purposes;' and that the same be referred to a select committee, to consist of the Senators attending the Senate from the First Senate District, to report complete."—Page 407.

NOTE. *This Bill was not in the Senate at this time: it was in the hands of the Judiciary Committee.*

"WEDNESDAY, 10, A. M.—*April* 5, 1843.

"Mr. Dixon presented the memorial of Phelps, Dodge & Co., and three hundred and twelve others, in relation to lands sold for taxes and assessments in the city of New York, &c.; which were read and referred to the committee on the judiciary."—Pg. 415.

NOTE. *We have the Albany Daily Advertiser before us, of April* 6, 1843, *in which we find the following:—*

"IN SENATE,

"WEDNESDAY—APRIL 5TH.

"By Mr. Dixon, **30** Memorials from New York, signed by **2,500** Citizens, that the Corporation may be prohibited from purchasing under sales and assessments; that the Water Commissioners may be Supervisors; that the President of that Board may be County Treasurer; that the arrears of taxes be not assessed; and that the annual tax may be reduced."

NOTE. It will be seen on referring to the files of the Senate that Mr. Dixon presented THIRTY Remonstrances against the passage of the Bill authorising the Corporation of the City of New York to purchase lands for taxes and assessments, signed by TWO THOUSAND FIVE HUNDRED persons. The Albany papers of that and the following day, in their published proceedings of the Senate, state this particularly, as by a reference to their files will appear; and the endorsements on thirty distinct memorials in the Senate show this also; and the proceedings of the Assembly as below. In the resolution passed by that house, requesting the Senate to send thirty memorials, signed by 2,500 Citizens, to the Assembly, which resolution, it will be seen, the Senate concurred in. The Clerk of the Senate, therefore, made a mistake in these important papers.

It will also be seen by the above proceedings, that the Bill authorising the Corporation to purchase lands for assessments, was not, at the time Mr. Scott made the motion to refer the same to himself and his colleagues of the city of New York, before the house, but was in the hands of the Judiciary Committee; and that committee had not, up to that time, had any meeting upon the Remonstrance, presented as above by Mr. Rhoades, on whose motion this Bill was re-committed to the Judiciary Committee.

Such a proceeding as this, was unparliamentary, and not (as we believe) in accordance with the rules of the Senate.

"Mr. Franklin, from the select committee, consisting of the Senators attending the Senate from the First Senate District, to whom was referred the bill entitled 'An act to authorise the mayor, aldermen and commonalty of the city of New York to purchase lands sold for taxes and assessments in certain cases, and for other purposes,' to consider and report complete, reported the same without amendment; which was agreed to by the Senate, and the bill ordered to be engrossed for a third reading."—Page 418.

REMARKS.

On the presentation of the report by Mr. Franklin, objections were made to the ordering of the Bill to a third reading, by Mr. Hunter, who stated that the New York Citizens' Committee had called upon him, and expressed strong objections to the passage of this bill; and that this Committee had been sent by a public meeting held at the Merchants' Exchange in the city of New York. Mr. Varian said the meeting of the merchants did not remonstrate against this bill—the meeting was called in relation to taxes.

Mr. Strong, Chairman of the Judiciary Committee, to which the Memorial and Remonstrance of the Meeting held a tthe Merchants' Exchange had been referred, handed to Mr. Hunter the said memorial, and Mr. Hunter sent the same to the Clerk's desk, and requested that the following portion of it be read, as follows:

"The Remonstrants suggest that the application of Common Council for a law to authorise the Corporation to become purchasers at Assessment and Tax sales ought not to be granted; that it is bad as a principle, and will be worse in practise. That the Corporation have not the means of paying for such purchases except by taxing the Citizens for the amount of the purchase money; that the Corporation should not be allowed to hold any real estate not required for public use; that it will be a wrong done to the Owners of such lands, will lead to expensive litigation for which the Citizens must be again taxed, and thus indirectly sanction Assessment Abuses—of an aggravated character—and give to Contractors, at exorbitant and improper prices, the public money, and to public Officers fees and charges for services never rendered.

"Preserved Fish, Chairman;
Assistant Chairmen,

Abraham Van Nest,	John Haggerty,
Peter Schemerhorn,	A. G. Thompson,
Peter Cooper,	George Griswold,
Peter Embury,	Jonathan Goodhue,
Peter Lorillard, jun.,	Charles H. Russell,
Wm. B. Crosby,	Peter I. Nevius.

"Wm. Billings Meach, Secretary."

NOTE. *While this sheet was passing through the press we addressed the following letter to the Clerk of the Senate.*

To the Clerk of the Senate.

DEAR SIR: The Citizens' Committee, of which I am a member, are reprinting so much of the Journals of the Senate and Assembly as relates to the compulsory inspection laws, to the taxes, and also to the assessments of the city of New York, which were before the Legislature at the last session.

In the Journal of Senate, of April 5, 1843, 10 o'clock, A. M., is the following:

"MR. DIXON presented the memorial of Phelps, Dodge & Co., and 312 others, in relation to lands sold for taxes and assessments in the city of New York, &c., which were read and referred to the Committee on the Judiciary."

Mr. Dixon, on that day, as you will perceive by the files of the Albany papers, of the proceedings of the Senate, presented **30** Remonstrances and Memorials of 2,500 persons, against the passage of the bill reported by Mr. Franklin a few minutes after. See page 415, Senate Journal.

You will see, by referring to your files, the **30** Memorials with such distinct endorsements on each memorial.

You will also perceive, by a resolution of the Assembly, that these same 30 remonstrances were directed to be sent to that House.—*See Senate Journal of April 14th, 1843, page* 508.

We were at a loss how to rectify this great error, in this important matter, and thought best to write to you, and ask advice.

Very respectfully,
EBEN MERIAM.

New York, October 11, 1843.

On the 17th of October we received the following Reply to the above letter from the Clerk of the Senate.

"Albany, October 15, 1843.

"DEAR SIR: I cannot now rectify any error that exists in the Journal of the Senate. This can only be done by an order from that body.

"You ask 'my advice,' though upon what precise point, I cannot clearly apprehend. If it be, as to the mode of rectifying the error to which you allude, in the reprint of the Journals which you are making, all I think you can do is by way of Note to refer to the omission alleged, and, in corroboration of your statement, make extracts from the Reports of the legislative proceedings contained in the Albany papers of that day.

Very respectfully, yours,
ISAAC R. ELWOOD.

Eben Meriam Esq., N. York City."

NOTE. At the time this Bill to authorise the Corporation of the City of New York to purchase lands at their own sales for odious and oppressive assessments imposed by their own officers was reported, a warm discussion took place. This we shall notice in full, in subsequent pages.

SENATE JOURNAL.

"On motion of Mr. Strong,

"Ordered, That the committee on the judiciary be discharged from the further consideration of the petitions in relation to the sale of land for taxes and assessments in the city of New York, and that the same be laid on the table."

"SATURDAY, 10 o'CLK, A. M.—*April* 8, 1843.

"The engrossed bill, entitled 'An act to authorise the mayor, aldermen and commonalty of the city of New York to purchase lands sold for taxes and assessments in certain cases and for other purposes,' was read the third time and passed; two-thirds of all the members elected to the Senate voting in favor thereof, as follow, to wit:

"*For the affirmative*—Messrs. Bartlett, Chamberlain, Corning, Denniston, Ely, Faulkner, FRANKLIN, Hard, Hopkins, Hunter, Lott, Mitchell, Platt, Porter, Rhoades, Ruger, SCOTT, Strong, VARIAN, Varney, Works, Wright."

—

"SATURDAY, 10 o'CLK., A. M.—*April* 8, 1843.

"Ordered, That the Clerk deliver the several bills to the Assembly, and request their concurrence in the same."—Page 456.

ASSEMBLY JOURNAL.

"SATURDAY—*April* 8, 1843.

"The Senate sent for concurrence the *bill* entitled 'An act to authorise the mayor, aldermen, and commonalty of the city of New York, to purchase lands sold for taxes and assessments in certain cases, and for other purposes;' which was read the first time, and by unanimous consent was also read the second time, and referred to the committee on the incorporation of cities and villages."—Page 820.

—

"MONDAY, 10 o'CLK., A. M.—*April* 10, 1843.

"By unanimous consent,

"The memorial of the committee appointed at a public meeting held at the Merchants' Exchange in the city of New York, remonstrating against the passage of the act authorising the mayor, aldermen and commonalty of the city of New York to purchase lands at assessment sales, together with the proceedings of said meeting, was read and referred to the committee on the incorporation of cities and villages."

NOTE. Several memorials in relation to odious and ruinous assessments had been presented in the Assembly, which will be noticed hereafter.

—

Page 880.

"THURSDAY—*April* 13, 1843.

"Mr. Redington, from the committee on the incorporation of cities and villages, to which was referred the engrossed bill from the Senate, entitled 'An act to authorise the mayor, aldermen and common council of the city of New York to purchase lands sold for taxes and assessments in certain cases and for certain purposes,' reported that the committee had examined the said bill, and saw no reason why the same should not be passed into a law."

NOTE. Here is an error.

"Ordered, That said bill be referred to a select committee, consisting of Messrs. Jones, White and Haight, to report complete.

Page 894.

"Mr. Jones, from the select committee, to which was referred the engrossed bill from the Senate, entitled 'An act to authorise the mayor, aldermen and commonalty of the city of New York to purchase lands sold for taxes and assessments in certain cases and for certain purposes,' reported that the committee had gone through with the said bill, and agreed to the same without amendment; which report was agreed to by the House, and the bill ordered to have its third reading."

NOTE. Here is an error.

—

Page 904.

"FRIDAY—*April* 14, 1843.

"On motion of Mr. Haight, and by unanimous consent,

"Resolved, That the Honorable the Senate be requested to send to this House the remonstrance of JONATHAN THOMPSON and others; of ANDREW FOSTER & SONS, and others; and THIRTY OTHER REMONSTRANCES OF 2500 CITIZENS of the city of New York *against the passage of the act authorising the Corporation to purchase lands for Assessments; and also the Remonstrance of the Meeting held at the Merchants' Exchange in the city of New York, upon the same subject, which have been received in the Senate, and referred to the judiciary committee, and which are not yet reported upon.*

"Ordered, That the Clerk deliver the said resolution to the Senate."

—

SENATE JOURNAL.

Page 508.

"FRIDAY, 10 o'clock, A. M.—*April* 14, 1843.

"A copy of a Resolution was received from the Assembly, AND READ, in the words following, to wit:

"Resolved, That the Hon. the Senate be requested to send to this House the Remonstrance of JONATHAN THOMPSON and others, ANDREW FOSTER & SONS, and others, and THIRTY OTHER REMONSTRANCES OF TWO THOUSAND FIVE HUNDRED CITIZENS of the City of New York, *against the passage of the act authorising the Corporation to purchase lands for Assessment; and also the Remonstrance of the Meeting held at the Merchants' Exchange in the city of New York, upon the same subject, which have been received in the Senate, and referred to the judiciary committee, and which are not yet acted upon.*

"Thereupon,

"Resolved, That the SENATE DO CONCUR in said resolution.

"Ordered, That the Clerk deliver a Copy of said resolution and said papers to the Assembly."

—

ASSEMBLY JOURNAL.

Page 905.

"A message from the Senate was read, informing that they have agreed to the resolution of this House, requesting the transmission of certain remonstrances to this House, and have transmitted the same accordingly."

—

Page 1016.

"TUESDAY—*April* 18, 1843.

"The engrossed bill from the Senate, entitled 'An act to authorise the mayor, aldermen and commonalty of the city of New York to purchase lands sold for taxes and assessments in certain cases and for other purposes,' was read the third time.

"Mr. Speaker put the question whether the House would agree to the final passage thereof, and less than two thirds of all the members elected to the House voting upon the said question, the same was laid upon the table.—(Ayes 77, nays 8.)

"Those who voted in the affirmative are,

"Messrs. Allen, *E. G. Baldwin*, Bentley, Booth, Bostwick, Bowdish, Brooks, Burleson, Bushnell, Cadwell, Cornell, *Daly*, Demarest, Dickinson, Farrett, Findlay, Fitzhugh, Flint, French, *Glasier*, Griffin, Griggs, J. T. Hall, Hathaway, Hawley, *Hibbard*, Hoes, Holmes, Hubbell, Hulburd, Hutchinson, *Jones*, Ketchum, Lamson, Lee, Leland, *McMurray*, Mason, Medbury, *Miller*, Monroe, Morrison, Murray, Nicoll, Niles, Palmer, *Paulding*, *Pentz*, Poucher, Richards, *Sanford*, Sheffield, L. Sherwood, T. Sherwood, Shumway, Slingerland, J. B. Smith, Soper, Sours, Speaker, Spink, Stimson, Stratton, Teats, *Thompson*, Tower, Udall, Van Duzen, Van Schaack, Vary, Walton, S. Warren, *White*, Wright, Youngs, Zoller.

"Those who voted in the negative are,

"Messrs. BABCOCK, DEWEY, FULLER, KENYON, MCGRAW, SPENCER, E. STRONG, A. STRONG.

—

Page 1022.

"The House then (3 o'clock p. m.) proceeded to the further consideration of the question on the final passage of the engrossed bill from the Senate, entitled 'An act to authorise the mayor, aldermen and commonalty of the city of New York to purchase lands sold for taxes and assessments in certain cases and for other purposes,' *heretofore read the third time and laid on the table.*

Mr. Speaker put the question whether the House would agree to the final passage of the said bill, and it was determined in the affirmative—two thirds of all the members elected to this House voting in favor thereof, as follows, to wit: ayes 91, nays 3.

Those who voted in the affirmative are, Messrs. Allen, Austin, E. Baldwin, *E. G. Baldwin*, O. Benedict, T. Benedict, Bentley, Bigelow, Booth, Bostwick, Bowdish, Brooks, A. Brown, M. Brown, Buck, Burleson, Bushnell, Cadwell, Church, *Daly*, Demarest, Dickinson, Douglass, Elseffer, Emerson, Erwin, Fassett, Findlay, Fitzhugh, Flagler, Flint, French, *Glasier*, J. T. Hall, W. Hall, Hathaway, *Hibbard*, Hoes, Holmes, Hubbell, Hutchinson, Jackson, *Jones*, Kenyon, Ketchum, Lee, Leland, Lyon, McCarthy, *McMurray*, Mason, Medbury, *Miller*, Morrison, Murray, Nicoll, Niles, Osterhout, Palmer, *Paulding*, *Pentz*, Poucher, Richards, Russell, *Sanford*, Sheffield, L. Sherwood, T. Sherwood, Slingerland, Smiley, J. B. Smith, Soper, Speaker, Spink, Stimson, Stratton, A. Strong, Sweeney, Teats, *Thompson*, Tower, Udall, Vandenburgh, Wait, Walton, S. Warren, West, *White*, Wright, Youngs, Zoller.

"Those who voted in the negative are

"Messrs. HAWLEY, McGRAW, McNEAL."

NOTE. The gentlemen who voted against the passage of this bill are the

HON. GEORGE R. BABCOCK, Buffalo.

" JEDEDIAH DEWEY, JUN., Manchester Centre, Ontario County.

" JEROME FULLER, Brockport, Monroe County.

" HARVEY McGRAW, Cortlandville, Cortland County.

" DANIEL D. SPENCER, Fowlerville, Co.

" ENOCH STRONG, Perinton, Monroe County.

The names of the members absent, are the Hon. Messrs. J. C. Brown, H. Cole, Wm. Conselyea, jun., Edward Cornel, Joseph Graves, H. Hunt, Robert Haight, S. Larned, Milton McNeal, John W. Martin, J. W. Porter, George Redington, E. A. Rice, A. Ritchmeyer, S. Russell, Robert Smith, E. Suydam, D. Wales, E. F. Warren, N. K. Wheeler, R. A. Williams.

Page 1024.

"Ordered, That the Clerk deliver the said bill to the Senate, and inform them that this House has passed the same severally without amendment."

NOTE. *The Senate were at this time in Executive session in reference to the Recordership of Troy, and continued in executive session from 3 to 4 o'clock, P. M. See Journal of Ex. Session and Albany Journals of that and several succeeding days.*

SENATE JOURNAL.

"A message was received from the Assembly, informing that they had passed the bill with the following title, to wit: 'An act to authorise the mayor, aldermen and commonalty of the city of New York to purchase lands sold for taxes and assessments in certain cases and for other purposes,' without amendment.

"Ordered, That the Clerk deliver the said bill to the Governor.

Page 575.

"TUESDAY, 10 o'CLK., A. M.—*April* 18, 1843.

"Mr. Bockee offered the following resolution:

"Resolved (if the Assembly concur), That the time of the adjournment of the Legislature be extended to four o'clock, P. M.

"Mr. President put the question on agreeing to said resolution, and it was decided in the affirmative.

"The yeas and nays having been moved and seconded, were as follows:

"FOR THE AFFIRMATIVE—Messrs. Bartlett, Bockee, Chamberlain, Corning, Dixon, Ely, Faulkner, Foster, Franklin, Porter, Putnam, Rhoades, Root, Scovil, Sherwood, Works, Wright.

"IN THE NEGATIVE—Messrs. Denniston, Deyo, Dickinson, Hard, Hopkins, Lott, Mitchell, Platt, Ruger, Strong, Varian, Varney.

"Ordered, That the Clerk deliver a copy of said resolution to the Assembly."

ASSEMBLY JOURNAL.

Page 1031.

"TUESDAY, 10 o'CLK., A. M.—*April* 18, 1843.

"The Senate sent for concurrence a resolution in the words following, to wit:

"Resolved (if the Assembly concur), That the time of the adjournment of the Legislature is extended to four o'clock, P. M.

"Mr. Speaker put the question whether the House would concur in the above resolution, and it was determined in the affirmative.

"Ordered, That the Clerk return the said resolution to the Senate, and inform them that this House has concurred therein."

SENATE JOURNAL.

"TUESDAY, 10 o'CLK., A. M.—*April* 18, 1843.

Page 584.

"A copy of a resolution was received from the Assembly, informing that they had concurred in the resolution of the Senate, extending the time for adjournment until 4 o'clock, P. M."

Copy of a Document filed in the Office of the Secretary of State, and certified by that officer, under his Seal of office, in reference to the Confiscation Act.

"SECRETARY OF STATE'S OFFICE,
"TUESDAY, APRIL 18th, 1843.
"Half-past 4 o'clock, P. M.

"The undersigned—a member of a Committee appointed by a public meeting held at the Merchants' Exchange in the City of New York, on the 6th day of March, 1843, to proceed to Albany to deliver to the President of the Senate a remonstrance of said meeting against the provisions set forth or referred to in certain bills applied for by the corporation of the City of New York, or some of their officers, to the Legislature of this State, to be passed into laws; and also to appear before the Committee of either branch of the Legislature, and oppose the passage of said bills in their then shape—Remonstrates against the approval by the Governor of this State of the act entitled 'An Act to authorise the Mayor, Aldermen and Commonalty of the City of New York to purchase lands sold for taxes and assessments in certain cases and for other purposes,' on the ground and for the reason that both branches of the Legislature of this State, which had passed the said bills, did not give the same to His Excellency the Governor for his approval until past the hour which they, the said two houses, had fixed on, by a concurrent resolution, for adjournment; and that the said bill was not signed, as approved by His Excellency the Governor, until past four o'clock of this day in the afternoon; and that the bill was signed by His Excellency the Governor after the said bill became null and void, under the provisions of the twelfth section of the 1st Article of the Constitution of this State: the said bill having been signed by the Governor, in the presence of the Hon. Mr. Babcock, a member of the House of Assembly of this State, who was with another Honorable Member of the Assembly in attendance upon His Excellency as a Committee from the said House, and also against its being certified.

"EBEN MERIAM, of the Committee, and for himself individually.

"HON. SAMUEL YOUNG,
To the Secretary of State.

"Filed April 18, 1843, at ten minutes before 5 o'clock, P. M.

"ARCH'D CAMPBELL, Dep. Sec. of State.

"STATE OF NEW YORK,
Secretary's Office.

"I have compared the preceding with an original instrument in writing, on file in this office, and do certify that the same is a correct Transcript therefrom, and of the whole of said Original.

"In Testimony whereof I have hereunto affixed the Seal of this office, at the City of Albany, the twentieth day of October in the year of Our Lord, One thousand eight hundred and forty-three.

[SEAL]

S. YOUNG, SEC'RY OF STATE."

NOTE. No disrespect is intended toward His Excellency the Governor in this paper. Had he known the demerits of the Bill, he certainly would not (in our opinion) have given his assent to it.

NOTE. *Mr. Meriam was (at the time the above Document was filed) the only representative of the Citizens' Committee at Albany. The Chairman and other members having left, he remained in full charge of the business of their mission.*

SENATE JOURNAL.

Page 593.

A message was received from the Governor, informing that he had this day approved and signed the bill entitled "An act to authorise the mayor, aldermen and commonalty of the city of New York to purchase lands sold for taxes and assessments in certain cases and for other purposes."

Preamble and Resolutions for paying contractors and applying to the Legislature for act to buy under sales for assessments.

WHEREAS, there are large amounts due several persons, contractors for building sewers, regulating streets and avenues, and paving and setting curb and gutters, and also for filling low and sunken grounds, as set forth in the original schedule, prepared by the street commissioner, and which improvements were made, and work done in pursuance of the several respective ordinances of the common council, and which were to be paid for by assessments on the property benefited, and as soon as the amounts of said assessments were collected.

AND WHEREAS, the assessments levied in pursuance of said ordinances have been for some time confirmed, but collection of the same only in part made, and most of them returned as unpaid and uncollected, and the property liable thereto, and on which, the same were a lien, agreeable to the laws of the state, advertised, and offered for sale by the street commissioner, at the recent sale of property for assessments; but the amount due on said assessments could not be real-

ized, by reason of their being no bids at such sales for said property, *THE AMOUNT OF SAID ASSESSMENTS BEING MORE THAN THE PRESENT MARKET VALUE OF SAID PROPERTY SO LIABLE*, in consequence whereof the said contractors are still unpaid; the common council, in order to relieve them, and anticipating the collection of said assessment, and which may hereafter be made, and trusting that they may be authorised by the Legislature, to raise by tax the amount which they may so advance, and to secure themselves and city treasury, from any loss, by being authorised to purchase in at any sale, such property, for which there may be no bids; do adopt the following resolutions:

1. *Resolved*, That the counsel prepare a law, under the direction of the law committee, to be applied for, to the Legislature, authorising the corporation to become purchasers of property which may hereafter be offered for sale, for payment of assessments agreeably to law; to refund them for any advances which may have been made them, to contractors or others, for the improvement for which such assessments were imposed. Such law to contain all needful provisions to secure the rights of parties interested therein, and that such property be held as a trust fund to repay such advances.

2. *Resolved*, That the comptroller be authorised to pay the several contractors the amounts respectively due them, for the several improvements made in pursuance of the ordinances of the common council, in all cases where the property assessed therefor, was benefited by such improvement, has been offered for sale, and could not be sold by reason for the want of any bid, at the recent sale of property for assessments, or in cases in which the sale of such property has been enjoined by the Court of Chancery, such payment to be made on the first day of October next.

3. *Resolved*, That the comptroller include the estimated amount required for the above payment, in the amount of the next annual tax bill, to be applied for to the next Legislature.

4. *Resolved*, That the counsel to the corporation, under the direction of the law committee, **take measures to obtain a revision of assessments,** mentioned in the annexed schedule as may be judged expedient, and agreeable to law.

Passed Board of Aldermen, February 22; Assistants, Feb. 25; approved by the Acting Mayor, February 25, 1841.

Copy of a Letter addressed to Lieut. Governor DICKINSON, *President of the Senate, and by him presented to that body on the 11th of March, 1843, and now on file in the Archives of the Senate, accompanied by the Memorial of Meeting held at the Merchants' Exchange, together with the semi-Veto Message of His Honor Mayor* MORRIS.

"NEW YORK, MARCH 9TH, 1843.

"HON. D. S. DICKINSON, LT. GOVERNOR of the State of New York, and PRESIDENT OF THE SENATE; or the "HON. GEORGE R. DAVIS, SPEAKER of the House of Assembly.

"Dear Sir: At a Public Meeting (convened by public notice) held at the Merchants' Exchange on Monday, March 6th, 1843—to take into consideration the objectionable features of the Assessment and Tax Bills recently agreed upon by several members of the board of aldermen and assistant aldermen of the city of New York, and *dissented* to by his Honor the Mayor of the said city as set forth in his Message herewith sent—a Resolution was passed that this meeting remonstrate against the objectionable provisions of the Tax and Assessment Bills; and that a Memorial, asking for amendments, and further and other provisions of Law, in the premises, be coupled therewith. Whereupon, a Remonstrance and Memorial was submitted to the meeting, read and approved; and it was thereupon further resolved, that a Copy thereof be sent to His Excellency the Governor, the Hon. the President of the Senate, the Hon. the Speaker of the Assembly, and the Hon. the members of the Senate and Assembly from the city of New York; and that a Committee proceed to Albany and present the Remonstrance and Memorial to the Hon. the President of the Senate, or to the Hon. the Speaker of the Assembly, and request the presiding officer to whom the same is delivered to present the Remonstrance, Memorial and accompanying Documents to the Legislature, and *ask* for the reading of the Remonstrance and Memorial, and the Message of the Mayor, and move that all be referred to the Committee to whom the New York Tax and Assessment Bills have been referred; and that the Committee, delegated by this Meeting, ask to be heard before the Hon. the Committee to whom these matters shall be referred. It was further resolved that the President and Vice Presidents appoint such Committee, and that the committee have power to add to their numbers.

"At a subsequent meeting of the President and Vice Presidents, the following named persons were appointed such Committee, viz., JOHN M. BRADHURST, EBEN MERIAM, BURTIS SKIDMORE, H. W. FIELD, PETER COOPER, ABRAHAM G. THOMPSON, PETER EMBURY, GEORGE GRISWOLD, WILLIAM GALE, W. B. MEECH.

"At a meeting of the said Committee, the following named persons were added on the * * day of March ensuing, viz.: * * *

"It was also further ordered by said committee that the Secretary of the meeting, one of the Committee of Delegates, proceed forthwith to Albany and present this Communication, and the Remonstrance, Memorials and Documents, to the Hon. the President of the Senate, in case the Bills in question are still pending in that body; but if the bills have already passed the Senate, then to the Hon. Speaker of the House of Assembly, who is herein by the Committee here assembled, and by one of their number, in person at Albany, most respectfully requested to present the same to that Branch of the Legislature over which he presides, and ask for the reading of this, of the said Remonstrance and Memorial.

"This Committee not being in readiness to leave the city to-day for Albany, take this course to put the Legislature in possession of the paprs, and thereby prevent delay.

"The Members of this Committee, who are to proceed to Albany, will follow with as little delay as possible.

J. M. BRADHURST,
PETER EMBURY,
A. G. THOMPSON,
PETER COOPER,
BURTIS SKIDMORE,
EBEN MERIAM,
WM. BILLINGS MEECH."

COMPTROLLER'S OFFICE,
JULY 14, 1843.

To the Honorable the Board of Supervisors of the City of New York.

Gentlemen,—This being the day assigned by law for the annual inquiry into the amount of tax to be imposed on the taxable property of this city and county, I send your honorable body all the facts I have been able to collect to assist you in this matter.

Upon examination of these facts, you will perceive that the amount to be imposed by you for the current year must, under any circumstances, be larger than that imposed last year, and this, too, under laws that restrict you to the imposition of a tax for the ordinary purposes of city government, obviously far below that of former years on the same account, and which will be largely deficient in capacity to meet the actual expenditure which will be incurred in this respect under existing laws and appropriations. Over this deficiency you have no control except as a branch of the Common Council, who, informed of the difficulty and the remedy, shall feel it your duty to originate ordinances in the Board of Aldermen, calculated while yet the year is but half spent, to reduce the Corporation expenditures to the limited income you are at this meeting to provide.

You will perceive, gentlemen, that notwithstanding you are called upon by the State laws, to impose a lower tax for the ordinary expenditures of the city government than heretofore, yet the aggregate tax levied for the past year is $2,177,000.* As I have before stated, but which cannot lose any of its emphasis by being repeated, this large imposition of tax is not sufficient to cover the ordinary expenditures of the city, as now incurred and incurring under existing customs and ordinances; and unless the correcting hand of promised Reform be at once applied by the Common Council in retrenching some expenditures and postponing others, there seems to be no alternative but a stoppage of supplies at the close of the year, or the accumulation of a floating debt in the shape of unpaid bills, as the Common Council have not the power to borrow a larger amount in anticipation of its revenues than the tax which the Board of Supervisors levy.

It will undoubtedly surprise your honor-

able body, that under these circumstances the aggregate lot is to be higher. It arises from the state of the school and water taxes. Last year the aggregate of these two taxes was about $574,000. This year they may amount to nearly $790,000, being an increase of nearly $260,000. The Board of Supervisors could well inquire whether it is not in their power, under the existing laws, to compel the trustees of common schools, in their respective wards, to the alternative of leasing school houses for the present, instead of buying them.

My predecessor estimated the expenditure of the present year, for the purchase of sites, &c. for school houses, at $200,000—the estimate in the papers herewith submitted is but $70,000—all of which must be raised by tax, unless the board has power to arrest the expenditure by requiring all parties to hire school houses for the present, which, if in their power, will reduce the tax to a very small item, and accomplish all the beneficial objects intended by the school laws.

The water tax of last year was $477,615, sufficient to meet a little more than two quarters' interest. This year it must be large enough to meet the four quarters' interest, and I have estimated it at $570,000. I have enumerated the different laws affecting the taxes you are to impose, and shall communicate any additional particulars when the committee to whom this communication will be referred may desire.

Respectfully communicated,
ALFRED A. SMITH, Comptrol.

ESTIMATE OF TAXES FOR 1843.

Water tax		$570,000
Floating debt tax		50,000
Watch tax		212,000
Lamp tax		110,000
Contingent tax		688,000
State tax		230,000
School tax		220,000
Delinquencies on tax of 1842		57,000
Discount on tax	Levying Tax	16,000
Collector's fees	Levying Tax	29,000
Assessors' fees, &c.	Levying Tax	15,000
Total		$2,177,000

BOARD OF SUPERVISORS.

SEPTEM. 27TH, 1843.

The following communication, was received from the Comptroller, viz.:

COMPTROLLER'S OFFICE, SEPT. 27TH, A. D., 1843.

To the Hon. the Board of Supervisors:

Gentlemen—I respectfully submit the new assessment-rolls for confirmation. I have been unable to do so at an earlier period by the delay of several of the Assessors.

The aggregate amount of the taxable property enrolled is $227,997,090 58-100ths, being a decrease of $9,809,810 42-100ths below the enrollment of the previous year.

The aggregate amount enrolled in the
Lamp District, is - - $220,604,442 58-100
Watch District - - - - 220,723,797 58-100
Water District - - - - 217,940,097 58-100

You will be pleased to ascertain that the present tax to be levied need not be so high as was anticipated, nor so large even as that imposed last year. So great is the proposed reduction that the increased tax for water interest, and for the exemption of the 12th and part of the 16th Wards from the water tax, will not be *practically* felt in other parts of the city.

The hesitation of the Common Council at expensive projects, and its efforts for curtailing others of less notice, have had a marked effect in producing this desirable state of things. The improved laws relative to the collection of certain revenues belonging to the Common Council, long in **ABEYANCE,** have worked exceedingly well, producing results the most gratifying, and far beyond the most sanguine anticipations; I allude to the laws permitting the Corporation to indem nify themselves for awards advanced upon unpaid assessments, imposed by the Supreme Court. It is now **four years** since the Common Council first endeavored to procure the passage of this act. The vigorous and misapprehending opposition it met at every stage of its progress, delayed its passage until the **close** of the last session of the Legislature. For the few months it has been in operation, it has contributed a large accession to the city treasury, thereby enabling the government to dispense with an equal amount of tax.

Owing to the caution in expenditures and the improvement in the revenues above alluded to, the aggregate tax need not be more than $1,800,000, being $230,000 lower than that of the previous year, and about eighty-one cents to each one hundred of the assessed valuation. The credits which the several Wards are entitled to receive, will, in fifteen of the Wards, *slightly* reduce this rate; in the Fifteenth Ward they will *largely* reduce it, and in the Twelfth Ward almost annihilate it.

Respectfully communicated.
ALFRED A. SMITH,
Comptroller.

Which was directed to be published, printed as a document, and ordered on file.
SAML. J. WILLIS, Clerk.

On page 8 of the Report of Alfred A. Smith Esq., City Comptroller, for 1840, under head of "Liabilities of the City Government," is the following:—

"Assessments Bonds, $400,000..00."

On page 83 of the report of the same officer, for 1841, the amount of these bonds, *outstanding*, is stated at "$270,000."

On page 26, of the same report, the Comptroller states thus—

"The assessment bonds of the Corporation, to the amount of $270,000, have been issued in anticipation of the assessment sales to take place in March next, to meet the payment of awards to individuals for damages sustained in opening and widening streets, imposed by the Supreme Court. They were negotiated at par, bearing six and seven per cent. interest, *to be met and paid whenever and as often as the liens held by the Corporation for their redemption are realized.* Seventy thousand dollars of the issue of 1841, with the issue of the previous year, have been paid. The amount of these bonds outstanding January 1st, 1842, was $200,000..00. A specific amount of the liens is given in the appendix. The Bonds were issued under the authority of the *amended Charter*, empowering the Corporation to borrow money in anticipation of its revenue; and the State act, cited in the ordinance on the subject, passed August 1, 1840. It is believed that this is the last issue of Assessment bonds the Corporation will be required to make."

In a Communication of the City Comptroller, Alfred A. Smith Esq., for the present year, dated May 29th, 1843, to which he appends a schedule of the City Debt, he states that the Assessment Bonds outstanding on the 20th of May, 1843, amounted to $200,000..00; and subsequently he states that the means of redemption of these bonds are "arrears of assessments."

In the Communication of the City Comptroller of the 27th September, addressed to the Board of Supervisors, quoted above, he uses this language:

"The improved laws relative to the collection of certain revenues belonging to the *Common Council*, long in abeyance, have worked exceedingly well, producing results the most gratifying, and far beyond the most sanguine anticipations; I allude to the laws permitting the Corporation to indemnify themselves for awards advanced upon unpaid assessments, imposed by the Supreme Court. It is now four years since the Common Council first endeavored to procure the passage of this act. The vigorous and misapprehending opposition it met at every stage of its *progress*, delayed its passage until the **close** of the last session of the Legislature. For the few months it has been in operation, it has contributed a large accession to the City Treasury, thereby enabling the Government *to dispense with an equal amount of tax.*"

How much? Answer, 0 0 0 0!

Gentle Reader, compare the foregoing Statements of the City Comptroller together, and then compare his Schedule of Tax Items of July 14th, 1843, with the following Resolutions.

"BOARD OF SUPERVISORS,
"SEPTEMBER 27, 1843.

"The following Resolutions were called up, the blanks filled, and the same were then laid on the table and directed to be printed for the use of the members.

"SAMUEL J. WILLIS, Clerk.

"1st. Resolved, That there shall be raised by tax on the real estate situated within the City of New York, and on such persons as are or may be liable to taxation on personal property therein, and to be collected according to law, the sum of five hundred and forty-four thousand eight hundred and forty-four dollars and ninety-one cents, to be applied towards defraying the contingent expenses properly chargeable to the said City and County of New York, towards paying such expenses as the Mayor, Aldermen and Commonalty of the City of New York

may in any manner sustain or be put to by law, and for defraying the whole of the expenses for assessing and collecting the taxes to be raised as aforesaid, by virtue of, and in conformity with, the provisions of the Act of the Legislature of the State of New York, entitled 'An Act to enable the Supervisors of the City and County of New York to raise money by tax,' passed April 17, A. D. 1843.

"2d. Resolved, That there be raised by tax on the real estate situated within the said city, and on such persons as are or may be liable to taxation on personal property therein, and to be collected according to law, the sum of thirty-five thousand four hundred and four dollars and seventy-one cents, being the amount of money last appropriated by this State to the said City and County of New York, for the support and encouragement of common schools in the City of New York; and also the further sum of one hundred and thirteen thousand nine hundred and ninety-eight dollars and fifty-four cents, being the one-twentieth of one per cent. of the value of the said real and personal property in the said city liable to be assessed thereon, to be applied exclusively to the purposes of common schools in said city, pursuant to an Act of this State to extend to the City and County of New York the provisions of the general Act in relation to common schools, passed April 11th, 1842, and the law to amend the same, passed April 18th, 1843.

"3d. Resolved, That there be raised by tax on the estates, real and personal, of the freeholders and inhabitants of, and situated within the said city and county, to be collected, the sum of seven hundred and eighty dollars, for the support and education of six mutes at the New York Institution for the Instruction of the Deaf and Dumb. The said tax to be raised and collected by virtue of, and in pursuance of a law of this State entitled 'An Act extending and supplementary to certain Acts providing for the indigent deaf and dumb within this State,' passed April 15, A. D. 1825; and other Acts extending the same, passed April 30th, A. D. 1836, and May 1st, A. D. 1841.

"4th. Resolved, That there shall be raised by tax on the estates, real and personal, of the freeholders and inhabitants of and situated within the said city and county, to be collected, the sum of two hundred and eighty dollars, for payment of clothing of thirteen deaf and dumb persons, viz., Mary Hurley, Catharine Gilhooley, Frederick Swaysland, David Jones, Emily Stanton, Catharine McMourgel, Margaret and Patrick Harrington, John Fenton Rapp, John Kerrigan, Jennette Wallace, Jefferson Houston, and John Acker, and placed in said Institution for the Deaf and Dumb by the Commissioners of the Alms House; said tax to be raised and collected by virtue of, and in pursuance of the laws of this State of 1838, Chap. 244; and also the further sum of four hundred and forty dollars for payment of clothing of twenty-two blind persons, viz.,

* * * * * * *

placed in the State Institution for the Blind by the said Commissioners of the Alms House; said tax to be raised and collected by virtue of, and in pursuance of the laws of this State of 1839, Sec. 5 of Chap. 200.

"5th. Resolved, That there be raised by tax on the said estates, real and personal of the freeholders and inhabitants of, and situated within said city and county, to be collected the sum of fifty thousand dollars, to be raised and collected and applied under and by virtue of an act of this State, passed May 14th, A. D. 1840, in relation to the **OLD Floating Debt** of said city.

"6th, Resolved, That there shall be raised by tax on the estates, real and personal of the freeholders and inhabitants of and situated in the said city and county, to be collected the sum of two hundred and twenty-seven thousand nine hundred and ninety-seven dollars and seven cents, being one mill on the dollar on the valuation of the said real and personal estate, in pursuance of an act of the Legislature entitled, 'An Act to provide for paying the debt and preserving the credit of the State,' passed March 29th, A. D. 1842.

"7th. Resolved, That there be raised by tax on the estates real and personal of the freeholders and inhabitants of and situated within the water district of said city, the sum of $509,391..16, to pay the interest on the water stock of the City of New York, in pursuance of an act entitled 'An Act in relation to the Croton Water Works of the City of New York,' passed April 18th, A. D. 1843.

"8th. Resolved, That there shall be raised by tax on the estates, real and personal of the freeholders and inhabitants of and situated within the 'Watch district' of the said city, the sum of two hundred and twelve thousand dollars to be collected towards defraying the expenses of watching and guarding such district, in pursuance of an act, to enable the Supervisors of the City and County of New York, to raise money by tax, passed April 17th, A. D. 1843, and also the further sum of one hundred and ten thousand dollars, by a tax on the estates real and personal of the freeholders and inhabitants of and situated within the 'Lamp district' of the said city, to be applied towards defraying the expenses of lighting said district last mentioned, pursuant to the said last mentioned act, passed April 17th, A. D. 1843.

"9th. Resolved, That the amount of the taxes hereby imposed and directed to be levied for interest on the Water Stock, for the support of Common Schools, and for the State Tax, be carried out on the assessment books, in a column separate from all other taxes herein imposed.

"10th. Resolved, That the assessment rolls annexed, are hereby confirmed, and that the Comptroller cause the same to be completed."

REMARKS.

We have thus given the proceedings of the Senate and Assembly upon the Bill authorising the Corporation to purchase lands for assessments.

The Petition, it will be seen, was presented by Mr. Franklin in the Senate on the 18th of March; and on the 21st of March, Mr. Franklin, as Chairman of the Select Committee, composed of himself, Mr. Varian, Mr. Scott, and Mr. Lott, reported a bill, which was read the first time and committed to a Committee of the Whole, and ordered to be printed. Mr. Franklin had been a member of the Common Council of the city of New York, and so had Mr. Varian, and at a time when these assessments were, many of them, consummated. Mr. Franklin, in 1840, signed a memorial to the Legislature, which is now in the archives of the Senate, and a copy of which is in the Senate Document No. 100 of 1842, page 285, in which these assessments are characterised as uncalled for, unnecessary and ruinous, and asking the Legislature to remedy the evils complained of, and to suspend the sales for assessments. Mr. Franklin also presented the memorials of Martha Amory, James McBride and R. V. R. Schuyler, on the 6th of February, 1843, which were, on his own motion, read and referred to a Committee of which he was a member, and which he had not reported upon, although they had been in his hands more than a month. Here were three memorials which set forth abuses of an aggravated character, and copies of which are to be found in Senate Document of 1842, No. 100, pages 318 to 324 and in pages 154 to 158 of this volume.

On the second of March, Mr. Dixon presented in the Senate, the memorial of James G. King, Effingham Schieffelin, and others, complaining of assessment abuses of an aggravated character; which was read and referred to the Committee of which Mr. Franklin was Chairman.

On the 11th of March the Lieut. Governor of the State, as President of the Senate, presented in the Senate, the Memorial of a public meeting held at the Merchants' Exchange in the City of New York, on the 6th of March, over which thirteen distinguished Citizens presided as officers, viz.: Preserved Fish, Chairman; Abraham Van Nest, Peter Schemerhorn, Peter Cooper, Peter Embury, Abraham G. Thompson, George Griswold, Jonathan Goodhue, Charles H. Russell, Wm. B. Crosby, Peter J. Nevius, Peter Lorrillard jun. and John Haggerty, Assistant Chairmen. All the gentlemen named, were in their seats upon the platform, except the two latter, who subsequently signed the proceedings which are now in the Archives of the Senate, and to which we refer. A more respectable set of Officers of a public meeting cannot be found any where, and they are gentlemen about equally divided in numbers as to politics—men greatly beloved, and of deservedly very high standing in this community.

The Officers of this meeting, were by a resolution of the meeting, authorised to appoint a Committee to proceed to Albany to represent the matters contained in their remonstrance to the Legislature. The officers were duly convened on the evening of the day succeeding the day, on which the public meeting was held. A Committee of nine

gentlemen were appointed, seven of whom convened the next day and addressed a Letter to the Lieut. Governor of the State, Hon. D. S. Dickinson (President of the Senate), which he presented to the Senate, with the memorial of the public meeting signed by the Chairmen and twelve assistant Chairmen and their Secretary, which were read, and on motion of Senator Strong, referred to the Judiciary Committee. A Copy of the letter is herein before set forth.

Numerous Memorials were at various times presented in the Senate by Mr. Dixon and Mr. Rhoades, numerously signed by highly respectable Citizens of BOTH political parties, complaining of the imposition of Fictitious and Ruinous Assessments upon Private Property for what are miscalled "*public improvements*"; and of the loose and *reckless* manner in which these proceedings have been carried on. These memorials were signed by STEPHEN ALLEN and PHILIP HONE, two Citizens of high standing—men of great purity of character, and of great moral worth—both of whom had held the office of Mayor of the City of New York; —by PETER A. JAY, former Recorder of the City of New York—a man beloved by all who knew him;—by GULIAN C. VERPLANCK, a very distinguished member of the Senate—distinguished as well for his unyielding firmness and independence as for a great and highly cultivated mind. Mr. Verplanck was a member of the Committee appointed by the Senate in 1841 to investigate assessment abuses in the city of New York, but whose term of office expired before that Committee made their report to the Legislature. The memorial was also signed by near thirty gentlemen who had been members of the Common Council, and thousands of other citizens of the highest respectability, of both political parties, including the President of nearly every Bank and Insurance Company in the City. This memorial was twice published in the Journal of Commerce, one of the most respectable journals of the City of New York, and printed copies sent to all the Banks and Insurance Offices in the city. This memorial was signed by the great capitalists in the City of New York, and numerous others—gentlemen who pay immense taxes annually. Such an expression of PUBLIC OPINION, by such a multitude of most worthy Citizens, we have never before witnessed.

The worthy Chairman of the New York Citizens' Committee, JOHN M. BRADHURST, one of the best men in our land—the man who (when holding the office of Alms House Commissioner) resigned his office in preference to being longer an officer under a profligate, reckless, and most prodigal Corporation—on the 31st March presented, through SENATOR RHOADES, to the Senate a Remonstrance against the passage of the Act authorising the Corporation to purchase lands for assessments. This Remonstrance was also signed by all the members of the Citizens' Committee then in attendance at Albany, and was, on motion of Mr. Rhoades, referred to the Committee on the Judiciary: he also moved that the Bill which had been reported by Mr. Franklin be committed to the Committee on the Judiciary. The Bill was so committed. This, it will be borne in mind, was on the 31st of March. On the following Tuesday, which was the 5th day of April, Mr. Scott offered a resolution that the bill "authorising the Mayor, Aldermen and Commonalty to purchase lands sold for taxes and assessments, in certain cases, and for other purposes," be referred to a Select Committee to report complete. Such a motion as this, was not in order—the bill not being before the Senate, but in the hands of the Committee on the Judiciary. One of the New York Citizens' Committee spoke to Mr. Scott in relation to his resolution, and told him that the bill was in the hands of the Committee of the Judiciary, and he replied that the Legislature would never pass the bill, and no apprehension need be felt about it; and yet, notwithstanding this remark, he recorded his own vote, on its third reading, in favor of its passage. We cannot see how Mr. Scott can reconcile his remark, as above, with his vote. Mr. Scott has been waited upon several times, by the Citizens' Committee, and was told that this bill was a very obnoxious bill, and ought not to be for a moment entertained. We are still more surprised, in contrasting this vote of Senator Scott with the language in his correspondence with a member of the New York Citizens' Committee, which is as follows:

"CONGRESS HALL, ALBANY,
April 19th, 1843.

"HON. JOHN B. SCOTT:

"Dear Sir—The Secretary of the Merchants' Exchange Meeting in New York, held on the 6th of March ult., brought from the city of New York, to your address, forty memorials on the subject of taxes and assessments in said city.

"Will you have the goodness to say if they were received, and what disposition was made of these papers.

"Respectfully, &c.,
"EBEN. MERIAM, of the
Committee of the Merchants' Exchange Meeting."

—

"NEW YORK, MAY 23, 1843.

"DEAR SIR—When at Albany, I addressed you a note, enquiring for the petitions forwarded to you for presentation to the Legislature (40 in number), having been unable to find any mention of them in the Journals of the Senate. I am again under the necessity of renewing the enquiry. As the Committee, delegated by the public meeting held at the Merchants' Exchange, are to be convened to make a report of their proceedings, to be published to the people, your reply is needed.

"Should I not receive a reply, I shall address a communication to Mr. Meech, enclosing copies of this communication and of note addressed to you at Albany, and lay the whole before the Committee as the best information that I am able to present on the subject. "E. MERIAM, of the Citizens' Committee delegated by the Meeting at the Merchants' Exchange.

"HON. JOHN B. SCOTT."

"NEW YORK, 26TH MAY, 1843.

"E. MERIAM, ESQ.:

"Sir,—I have received yours of the 23d inst. stating when at Albany you addressed me a note enquiring for the petitions forwarded to me (40 in number) to be presented to the Legislature, and that you had been unable to find any mention of these in the Journals of the Senate.

"If you forwarded any petitions to me I did not receive them, otherwise I should have presented them, as I have always done. I took a deep interest in the subject of assessments, and if in my power to correct the evils complained of, no legislator would have done more.

"I admit you addressed to me when you was at Albany a note making some enquiry about petitions you said was forwarded to me. The reason must have been, why I did not answer it, because I did not think it necessary, as I *saw you every day*—and if you had considered it important, why you did not mention it to me, to say the least of it is very extraordinary. You was sent to Albany expressly to attend to this matter. I was pressed as you know with a great load of public business; notwithstanding I was always accessible and frank in my communications with you, and if you had called on me at Albany, or since my return, I should have been happy to give you any information in my power. I do repeat your two notes are very extraordinary in as much as I have not had one word of difference with you. If your committee instructed you to communicate only in writing, you should have informed me on the subject—and I should have told you such a course was inadmissible particularly at the close of the Session for want of time. JOHN B. SCOTT."

—

"E. MERIAM, ESQ.:

"Dear Sir—I have just received your note of 30th May enclosing a communication from Hon. John B. Scott to yourself relative to the petitions forwarded by the Committee of which I was a member, and which Mr. Scott denies having received. I am surprised at this, as I have a distinct recollection of having handed him the petitions or memorials on the morning of my arrival at Albany, with a request that he would present the same to the Legislature that day. The memorials were, I think, thirty or forty in number, forming quite a large package, and with them a letter of introduction from yourself to Mr. Scott. I am positive of this from the circumstance of my experiencing some difficulty in finding him.

"The memorials may have been mislaid, and subsequently forgotten, from his great press of business; but as to the fact that he received them, I cannot be mistaken.

"Tuesday Evening, May 30, 1843.
"Respectfully, yours,
"WM. BILLINGS MEECH."

—

"NEW YORK, 31ST MAY, 1843.

"E. MERIAM, ESQ.:

"Dear Sir—Yours of the 29th inst. and a letter from Mr. Meech of the 30th directed

to you subsequently enclosed to me. I am as much surprised at Mr. Meech's letter as he can possibly be at mine. I do not mean to say that it is all very possible he handed to me the Petitions with a request to present them to the Legislature, but I do declare unequivocally that I have no recollection of the fact. That if he handed me a bundle of papers I could not have heard, or understood they were petitions. Mr. Meech admits I was very much engaged at the time, and he had no opportunity to converse with me. I do not *know Mr. Meech personally* and do not remember seeing him at Albany, or a gentleman by that name or any letter of introduction from you. I think I am sure if I know myself, if Mr. Meech had conversed with me and called my attention to the Petitions I could not have failed to notice it. I have ever held it a sacred duty as a Representative of the People, to hear them on every subject, they may wish to bring before the Legislature.

"You will admit with me, that the great pressure of public business, Legislative, as well as Executive, last winter was such that the continual stream of thousands pouring in upon me for public office, was some excuse why I could not at all times hear every body at *the time they wished*, or treat them with the ceremony of the drawing room. I have been in the habit always of opening papers and letters on my table, and occupied at a late hour at night in reading them, and making a memorandum of every thing to be done the next day. But unaccountable as it may seem, I never saw these petitions. I cannot doubt but that this package was taken from my table or mislaid, because I cannot doubt that so respectable a gentleman as Mr. Meech is, having charge of the package, and having only one object to remember, whereas I had a great many every day, that it is most probable he is right—that he handed it to me—what he said, that *they were petitions* may also be so. I suppose you know, I am *hard of hearing in one ear* and if communication directed to me on my left side in the ordinary tone, I do not hear distinctly.

"I have written you a much longer letter than I intended, but am anxious to convince you that no neglect was intended on my part—and I have endeavored to account for a matter which I can no more conjecture than you can. I have never held but one language on the subject of assessments that great abuses have been practised, and that no one was more willing to remedy them as far as my power extended, nothing would have given greater pleasure than to have presented the petitions coming from so large a body of my fellow citizens.

"Very respectfully, yours,
"JOHN B. SCOTT."

—

"HON. JOHN B. SCOTT:

"Dear Sir—In your letter to me of May 31st, 1843, you say in speaking of the Memorials forwarded to you by Mr. Meech, you 'cannot doubt but this package was taken from my table or mislaid.'

"If the package was mislaid, you would probably have met with it ere this, and thinking it probable that you may have met with it, I take the liberty of addressing you this note to make the enquiry.

"Yours, respectfully,
"E. MERIAM, of the
New York Citizens' Committee.
"Nov. 7th, 1843."

—

When the Bill in question was ordered to a third reading there was much discussion, which we shall notice under the head of Compulsory Inspection, in subsequent pages of this volume. Mr. Varian took the lead in the discussion, and was told by the presiding officer, that Senators must confine their remarks to the question before the Senate. Mr. Varian, as appeared by the printed advertisement of sale of lots for assessments, which was then in the archives of the Senate, was pecuniarily interested in the question, as property in his name is there stated to be assessed the large sum of $1,423..00, and this property, as appears by the record of bids kept by Mr. BODLE at the Assessment Sale, was bid off to the Corporation, on the 21st of June, 1843, for the term of 1000 years, subject to redemption within two years, on payment of 7 per cent. per annum interest. We are not sure, however, that there is not some mistake about this assessment, as it is often the case, that persons are assessed large sums, without notice; and we were subsequently informed by Mr. Gale, a gentleman of high standing, that in conversation with Mr. Varian in the Street Commissioner's office, in June or July, 1843, Mr. V. stated to him, that he had been paying an assessment of a large amount. If Mr. Varian was pecuniarily interested in this question, he should not have voted on the third reading of this bill, and had he not have done so, the bill would not have passed, as his vote alone made up the constitutional number. (*See ante page* 264.) Mr. Varian, as a Citizen, is esteemed a good man, as is also Mr. Scott and Mr. Franklin; but when they express opinions on public measures in their respective capacities of Representatives of the People, these opinions can be publicly reviewed without the least impugning the motives of either of these gentlemen. The best men entertain sometimes erroneous opinions upon public measures, and although the men themselves are beloved and respected, yet that much cannot be felt for the erroneous opinion expressed by them. Had Mr. Varian been aware that he was assessed this large sum, it is presumed, his own sense of delicacy, would have induced him to have asked the Senate to have excused him from voting, and that body no doubt would have excused him. Mr. Franklin, also, is one of our most amiable citizens, a man greatly beloved—had Mr. Franklin consulted his pillow, before giving his vote, in reference to *that* vote, we are confident that his name would not have been recorded in the affirmative. But in the hurry of legislation, with a score of politicians and Corporation Officers at his elbow he had little time for that calm deliberation which, he was taught from infancy to adopt as a rule of conduct. In the Common School question, Mr. Franklin has been highly, and most deservedly commended. We have listened to his addresses in the Senate chamber upon that question, and have been enraptured by his eloquence, by the moving appeals that he made to the consciences of Senators, an appeal that caused the eyes of men whose heads were whitened by the frost of more than three score winters to glisten with emotions, which a heaving bosom had produced. In this question he has won for himself a fame that will endure longer than his mortal frame, and a repose that will be sweeter than all the political conquests ever achieved could have produced.

On the repeal of the compulsory inspection law he also maintained the dignity of the man, and sustained that of the Senator.

Mr. Varian is a man venerable in years—he was for some time member of the Common Council, and two years mayor of the city of New-York, and he was elected to the Senate by a large vote.

In the last year of his mayorality he was (after an excited election) brought to a bed of sickness, which came near terminating his mortal life. We would not wish to utter a thought that would pain the feelings of that venerable man, far from it, but in speaking of a public measure and of the part he took in that measure, public duty requires of us as much as we have said.

Of Mr. Scott, we have to say that he is considered a most excellent citizen. He was a member of the Select Committee of the Senate appointed to investigate assessment abuses in the city of New-York. The report made by that Committee is stated in this volume. Mr. Scott for many years held the office of Judge of the Marine Court. He has been much conversant with public affairs. On the vote being taken on the School question, Mr. Scott did not record his vote—he was absent from his seat—many good persons censured Mr. Scott for this absence.—We were in the Senate chamber at the time the discussion was pending, and when the Vote was taken. We did not blame Mr. Scott then, for his absence, nor do we now, and we have heard Mr. Franklin, when speaking of Mr. Scott, as connected with this particular question, say as much.

It is unpleasant, we repeat, in speaking of these three Senators in connection with the bill authorising the Mayor, &c., to buy lands for assessment to withold the approbation which had they voted and acted differently, we should have been glad to have given them, but nevertheless, we will not condemn the men, but merely the act. The opinions of some of our best, most worthy citizens, upon this act, subsequent to its passage was expressed to the Common Council, and is to be found in chronological order in these pages and connected with these remarks, and before its passage, of the measure, *the foregoing* Memorials and Remonstrances are sufficient, without any addition. The difficulty is that with our public men, politics have too much influence, and overpower their judgments. The Bill in question involved principles, big

with consequences, which we shall notice in the sequel.

This Bill after the discussion in the Senate on ordering it to a third reading was left wholly to its chance by the Citizens Committee, the declarations of Mr. Franklin, that the New-York Senators would take upon themselves the responsibility of the passage of this bill, was an announciation without precedent in the annals of Legislation, and the New-York Committee after this left the Senate Chamber while the bill was passing in that body.

On the 8th of April this bill came to the house of Assembly for their concurrence and was by the Speaker referred to a standing Committee. Mr. D. R. Floyd Jones of the Assembly, from the city of New-York, applied to the Chairman of that Committee to report the bill back again to the house *instanter*, as we are credibly informed—which the Chairman declined doing. The standing Committee of which Mr. Redington of St. Lawrence county was chairman, was convened, and the Senate bill, authorising the Mayor, Aldermen, &c., to purchase lands at assessment and tax sales, laid before them.

"AN ACT

"To authorise the Mayor, Aldermen, and Commonalty of the city of New-York to purchase lands for taxes and assessments in certain cases, and for other purposes.

"*The People of the State of New-York, represented in Senate and Assembly do enact as follows:*

"SECTION 1. It shall be lawful for the comptroller of the city of New-York, at any sale of lands for taxes in the said city, and for the street commissioner of the said city, at any sale of lands for assessments in the said city, held pursuant to law, to bid in, for the mayor, aldermen, and commonalty of the said city, every lot of land and premises by them put up, for which no person shall offer to bid; and certificates of such sale shall be made *by the said comptroller and the street commissioner*, in the several cases of such sale for taxes or assessments, which shall describe the lands purchased, and specify the term of years for which the same shall have been sold, and the time when the said mayor, aldermen, and commonalty will be entitled to a lease of such lands and premises. Such purchases shall be subject to the same right of redemption as purchases by individuals; and if the lands sold shall not be redeemed, *or shall not have been assigned as hereinafter provided*, the said comptroller, in sales for taxes, and the said street commissioner in sales for assessments, shall execute a lease therefor by virtue of the authority in them vested by this act, to the said mayor, aldermen, and commonalty, in the same form and with the same effect as in the cases of leases to individuals, as now authorized by law.

"§ 2. It shall be the duty of the said comptroller, in all cases of purchases of land by the said mayor, aldermen, and commonalty for taxes, and of the said street commissioner, in all cases of purchases of land by the said mayor, aldermen, and commonalty for assessments, *to assign any and all such purchases to any person who shall, at any time within one year from the time when such purchases were made*, offer to take the same, upon their paying to the said comptroller and street commissioner respectively, for the use of the said mayor, aldermen, and commonalty, the purchase money, with *seven per cent interest thereon.*

"§ 3. The person receiving the assignments mentioned in the next preceding section, shall be entitled, upon the redemption of the property to receive the amount paid by them to the said mayor, aldermen, and commonalty, with interest from the time of such payment, *at the same rate and in the same manner as if they had purchased the property at a sale for taxes or assessments.*

"§ 4. In all cases of lands and premises purchased by the mayor, aldermen, and commonalty for taxes or assessments, *in which the same shall not have been assigned, as provided in the second section of this act*, any person may redeem the same previous to the time when the mayor, aldermen, and commonalty, shall be entitled to a lease of such lands and premises, by paying, in the manner provided by law, for the use of the said mayor, aldermen and commonalty, the purchase money, with seven per cent thereon, together with any expense which shall have accrued since the sale.

"§ 5. In all cases where mortgagees of real estate sold for taxes and assessments in the city of New-York, their personal representatives, or owners, lessees, or persons otherwise interested in any lands or tenements so sold, shall file in the register's office of the said city a memorandum of such mortgage or property, pursuant to the act entitled "An act in relation to the redemption of lands sold for taxes or assessments in the city of New-York," passed May 6th, 1841, and of the act entitled "An act in addition to the acts respecting the collection of taxes and assessments in the city and county of New-York," passed May 25th 1841, the street commissioner shall cause the notice of such sale required by said acts to be given to such persons, by sending to them, in the manner therein provided, a printed list describing all the property sold for assessments or taxes, and remaining unredeemed. Such description shall name the street or avenue on which the property may be situated, the side of the street or avenue, and between what streets or avenues, with the map or street numbers of the property, and in whose name assessed, together with the term of of years and the amount for which the same shall have been sold, and the day or days on which the time limited for the redemption of the property will expire, with a notice that unless the property shall be redeemed on or by such days by the payment of the sums for which the same was sold, with all interest and expenses allowed by law, that leases will be given to the purchasers in accordance with the statute in such case made and provided; and it shall not be necessary for the street commissioner to give any other or further notice to the person aforesaid, than is herein contained.

—

The following amendments were proposed to the bill in case the Standing Committee should report in favor of its passage, by the New-York Citizens Committee:

AMENDMENTS.

"§ 7. This act shall not be construed to alter or change the term of time during which lands may be redeemed from assessments or tax sales to any shorter period than heretofore provided by law, whether the certificates of sale have been assigned or not, nor to legalise or confirm any assessment not made in accordance to the laws of this State, anything herein before contained to the contrary in any wise notwithstanding.

"§ 8. The moneys authorised to be raised by tax on the estate, real or personal, of the inhabitants and freeholders of the city and county of New-York, shall in no case be used, appropriated or applied to purchase of any lands sold for taxes or assessments in the said city.

"§ 9, This act shall not be construed to authorise the purchase of any lands for unpaid assessments in any case where the improvement was not made on the petition of the majority of the owners of the land affected thereby: nor shall it authorise the purchase of any lands which are assessed more than ten times the actual value of such land; nor in any case where the fees alone of the officers exceed ten thousand dollars for one single improvement; nor in any case where the members of the Common Council of the city of New-York were interested directly or indirectly in the contract work; nor in any case where the Mayor, Aldermen and Commonalty of the city of New-York have not complied with the provisions of the statute under which the proceedings were had; nor in any case where the fees or charge for advertising such property for sale for such such assessment exceed the actual value of the land; nor in any other case where the fees of any one of the officers which are assessed in part thereon exceeded fifty thousand dollars per annum.

—

The Committee, as we understood reported in favor of the two first sections of the amendments. Mr. White says in favor of only one of them. One of the amendments we are certain of being reported with the bill, and two we feel very confident were included, but it is sufficiet for our present purpose, that one was reported with the bill.

In the Assembly Journal page we find the following record:

Page 880.

"Thursday, April 13, 1843.

"Mr. Redington from the committee on the incorporation of cities and villages, to which was referred the engrossed bill from the Senate, entitled an 'Act to authorise the mayor, aldermen and common council of the city of New-York to purchase lands sold for taxes and assessments in certain cases and for other purposes,' reported that the

committee had examined the said bill, and saw no reason why the same should not be passed into a law."

"Ordered that the said bill be referred to a select committee, consisting of Mess. Jones, White and Haight, to report complete."

This record of the report of the committee is incorrect as will be seen by the letter of Mr. White which was written in reply to the following:

"New-York, 26th Oct. 1843.

"Hon. Edward H. White

"Member of the Standing Committee on the Incorporation of Cities and Villages, of the House of Assembly, of the session of 1843.

"Dear Sir:—On the 8th of April, last, as appears by the printed Journals of the Assembly a bill from the Senate, was received, entitled "An act to authorise the Mayor, Aldermen and Commonalty of the City of New-York to purchase lands sold for taxes and assessments, in certain cases and for other purposes" and referred to the Standing Committee on the Incorporation of Cities and Villages. I attended before that Committee, as a member of the New-York Citizens' Committee, and proposed amendments to the bill, which were in part adopted by your committee, and as I understood, unanimously, and by that Committee reported with the bill to the house, with a recommendation in favor of the passage of the bill with the amendments.

Am I right as to my understanding as to adoption of the amendments by your Committee, and of the report of the amendment with the bill to the house.

"Yours Respectfully,

"E. Meriam."

"We shall feel obliged by your reply, and the bearer will call at your counting-room for it, this afternoon, or at any other time more convenient for yourself.

—

"New-York, Oct. 28th, 1843.

"Dear Sir:—When the bill authorising the Corporation of the City of New-York to purchase property sold by them for assessments was referred to the Committee on the "Incorporation of cities and villages," of which I was a member, I advocated several amendments to the bill and succeeded in securing the adoption of one, to the effect, that the fund arrising from our ordinary taxation should not be appropriated to the payment of such purchases, and the Bill so amended was reported to the House by Mr. Redington. It was thus referred to a select committee to report complete; that committee consisted of Mr. D. R. F. Jones, Mr. Haight and myself. Mr. Jones on observing the amendment remarked that the Bill was a Senate Bill—that we were within two days of the adjournment—that if the amendment was adopted the Bill must be sent back to the Senate, for which there was not time, and as the Bill was an important one, the amendment must be stricken out; in those views Mr. Haight coincided, and they being a majority of the Select Committee the Bill was reported complete without the amendment. Respectfully yours,

"Edwd. Haydock White."

"E. Meriam, Esq."

—

The following is the correspondence with Mr. Jones in reference to the proceedings in the Assembly touching this bill:

"New-York, Oct. 25th, 1843.

"Dear Sir—I find in the Assembly Journal pg. 894, as follows:

"Mr. Jones from the Select Committee, to which was referred the engrossed bill from the Senate, entitled "An act to authorize the Mayor, Aldermen, and Commonalty of the City of New-York to purchase lands for taxes and assessments in certain cases, and for other purposes," reported that the Committee had gone through the said bill, and agreed to the same without amendments; which report was agreed to by the House, and the bill ordered to its third reading."

"Will you have the goodness to inform me if this recital in the Journal is correct.

"I will direct the bearer to call at your office this evening and if you will favor us with a reply we shall feel greatly obliged.

"E. Meriam, of the Committee deputed to proceed to Albany in relation to Assessments and taxes.

"Hon. D. R. F. Jones.

—

"New-York, Oct. 25, 1843.

"E. Meriam, Esq.

"Dear Sir—I have this moment received your letter enquiring whether the recital of the report of the Select Committee upon the Bill to which you refer as contained in the Assembly Journal p. 894, is correct.

"Let me say in reply. That I well recollect making a report upon the Bill referred to, from a Select Committee to which it was referred for the purpose of being reported complete, immediately subsequent (if I am not mistaken) to the report made thereon by the Standing Committee which had it in charge—and think I made the report as set forth in the Journal. When, however, we take into consideration the hurry of legislation always prevailing at the close of the session and the vast amount of business in which as Chairman of the Judiciary Committee, I was necessarily involved in, it will not be thought strange that I should not recollect with perfect distinctness all the particulars attending the report and disposition of the Bill referred to. I believe however the report in the Journal is correct.

"Very respectfully, &c.,

"D. R. Floyd Jones."

—

"New-York, 3d Nov. 1843.

"Dear Sir—When Mr. Redington, Chairman of the Standing Committee on the Incorporation of cities and villages reported the bill authorising the Mayor, Aldermen, &c., to purchase at their own assessment sales, I was standing at his side. He reported the Bill with amendments. The next morning I went with him to the Clerks desk to examine the bill, and he expressed great surprise on being informed by the Clerk that the amendments had been struck out, and added that he had been in his seat all the previous day and had not heard of motion being made to refer the Bill to a Select Committee to report complete. Will you be so good as to inform us on whose motion this bill was referred to a select committee to report complete.

"The bearer will call for an answer.

"Yours respectfully,

"E. Meriam, of the New-York Citizens' Committee.

"Hon. D. R. F. Jones."

—

"New-York, Nov. 3d, 1843.

"E. Meriam, Esq.

"Dear Sir—In reply to your letter received this morning I have to say that as I am am named in the Journal as Chairman of the select Committee to which was referred the Bill "To authorise the Mayor, &c., to purchase lands &c.," it is very probable that the motion to refer to a Select Committee was made by myself. Very respectfully,

"D. R. Floyd Jones."

—

Had the unanimous consent of the House been asked to refer the bill to a Select Committee to report complete it would not, we are confident have been granted, and no other of course proceeding than this, was in order, under the rules of the House.

We are not so conversant with all the nice details of the rules of the two houses which compose our state legislature, and for this reason we deemed the proper course to make enquiry. We therefore addressed a brief note to a highly intelligent citizen who had been four years a distinguished member of the Senate of this making enquiry as to the rules. We received a reply of which the following is a copy:

"Dear Sir—You ask me the question—"When a bill is reported in the Assembly, which has been received from the Senate, and referred to a Standing Committee and such committee report the bill back to the house with amendments. What course does the bill then take under the rules? Can such bill be referred subsequently to a Select Committee" to report complete "without any motion being made by a member to that effect?"

"My answer to your question, is—When a bill is reported by a Standing Committee, either with or without amendments, the ordinary course of business in the Assembly, under the rules, is, that the bill with the proposed amendments, is placed upon the "general orders"; and cannot be moved from thence, or referred to a select committee "to report complete," except upon motion of a member; which motion can only be made when *motions, resolutions, and notices* are in order, unless by unanimous consent of all the members present, or permission being asked, or upon a motion and vote taken to lay all the previous orders of business upon the table, with the view of taking up that of "motions, resolutions and notices."—Some Sessions, towards the close, when the House is much pressed with business, and

their general orders are very large, the Assembly appoints a Select Committee of nine members who are empowered to examine the Clerk's list of the general orders, and to designate such bills as in their judgment should be taken off that list, and referred to be reported complete.

The business of this Select Committee of nine is confined to reporting such bills as originate in the House, either with or without amendments proposed, where there is no dispute about the bill, or where the amendments are not objected to—and also such bills as come from the Senate and present no objectionable features. Money bills—bills of general moment, or those involving contested questions, are not, or at least should not be disposed of in this manner. This proceeding is for the purpose of expediting the minor business of the House, and is applied to bills principally of a private character, which although of great moment to those immediately interrested, are of little importance to the public generally. When this committee have determined what bills are proper to be removed from the general orders, they report the same to the House. Their report is generally adopted as a whole; but any member, who is opposed to one or more of the bills thus reported by them, may ask for a division, and the question is then taken upon one or more of :he bills separately as may be desired.

On adopting the report of this Committee of nine, the Speaker then refers the bills mentioned in it, to the appropriate Committees, with instructions to consider and report complete. The Committee thus instructed may report the bill as complete either with or without the amendments proposed by the previous Standing Committee as they may think fit. Their report of the bill as complete must be made to the house when reports are in order, and upon its adoption by the House, the bill is either ordered to be engrossed for a third reading, if originating in the Assembly, or the amendments ordered to be engrossed if any are made to a bill coming from Senate, and the bill if coming from the Senate is ordered to a third reading.

In no other way than one of those above indicated can a bill reported in the Assembly, and placed upon the General Orders, be properly taken off, and reported complete, and passed to a third reading. The Senate have no such course of proceeding as that of the Committee of 9—all bills there must be taken off the General Orders by special motion and referred to a Committee to report complete. If no such motion be made, the bill remains upon the General Orders, until it is reached either as general or special order, and passed by the Committee of the Whole, upon whose reports, if adopted, it is either ordered to a third reading, or to be engrossed for a third reading.

" Trusting that the above may contain al the information you desire—

" I am, Sir,

" Yours very respectfully,

" G. Furman."

Brooklyn, Oct. 27, 1843.

Previous to the bill being received from the Hon. the Senate, authorising the Mayor, Aldermen, and Commonalty, to purchase lands, at their own assessment sales, several memorials asking relief from assessment abuses of an aggravated character had been presented in the Assembly, as will appear by the following extracts from the Assembly Journal:

" *Assembly Journal.*

Page 268.

" Thursday, February 9, 1843.

" The memorial of Joseph Alexander of the city of New-York, complaining of various public officers, in relation to the arbitrary and oppressive assessments for the the pretended opening of Manhattan square, was read and referred to the committee on grievances.

—

Page 274.

" Friday, February 10, 1843.

" The petition of Mrs. Winifred Mott, for relief in the matter of the proceedings of various public officers in relation to an oppressive an arbitrary assessment for the pretended opening of the ninth avenue in the city of New-York, was read, and referred to the committee on grievances.

—

Page 352.

" Tuesday February 21, 1843.

" The Memorial of Cornelius Bogert, agent of Sampson Benson, in relation to an assessment imposed on a piece of salt meadow, was read, and referred to the committee on grievances.

" The memorial of John H. Talman, in relation to an assessment upon his property, for the pretended opening of Manhattan square, was read, and referred to the committee on grievances.

" The memorial of John Morss and others, with public documents annexed, in relation the Chapel-sreet assessments in the city of New-York, was read, and referred to the committee on the judiciary.

" The memorial of Martha Amory complaining of certain judgments of the Supreme Court being a lien upon real estate, and that the proceedings were without notice, and therefore ex parte, was read, and referred to the committee on the judiciary.

—

Page 369.

" Friday, February 24, 1843.

" The memorial of George Wolf, for relief from assessments for the pretended opening of the Forty-sixth street and the Third avenue; the memorial of Burtis Skidmore and others in relation to the surveyor's fees in the matter of the assessment for repairing Spring-street, accompanied by a printed report; and the memorial of T. & V. Kirby, complaining of certain proceedings of public officers in the matter of the pretended opening of Manhattan square in the city of New York, were severally read, and referred to the committee on grievances.

—

Page 487.

" Thursday, March 9, 1843.

" The memorial of Jacob Aims, George B. Smith, Edward Doughty, and one hundred and ninety others, complaining of the great and arbitrary powers exercised by the corporation of the city of New-York, in the imposition of fictitious and ruinous assessments, and also of the alarming increase of city taxes, and of other evils, and asking for a reference of the subject to a special committee, and for the passage of a law to remedy the evils, was read.

" Mr. E. G. Baldwin moved its reference to a select committee.

" Mr. Jones moved that it be referred to the committee on grievances.

" Mr. Speaker put the question whether the House would agree to the said motion of Mr. Jones, and it was determined in the affirmative.

—

Page 521.

" Monday, March 21, 1843.

" The several memorials of Peter Schemerhorn, John D. Wolfe, John Haggerty, Theodore Sedgwick, William Jay, and others, of the city of New-York, for an amendment of the laws of the State relative to said city, as to taxes and assessments, and for a reduction of the annual taxes, was read and referred to the committee on grievances.

—

Page 661.

" Wednesday, March 29, 1843.

" The memorial of James Riker and others, for relief from arbitrary assessments for Chapel-street, in the city of New York, accompanied by public documents, was read referred to the committee on grievances.

The memorial of Mrs. Martha Amory, noticed above, was referred to the committee of which Mr. D. R. F. Jones was chairman, and upon which the Journal of the Assembly show no report to have been made. This memorial is set forth in full on pg. 154 of this volume.

The Committee on Grievances, of which Mr. Haight was chairman, to which several memorials had been referred, were convened, and the New-York Citizens' Committee, attended before them.

The first memorial which came up in that Committee was that of Mr. Benson.

This is the assessment imposed upon a piece of salt meadow about six miles from the City Hall, which the memorialist states is assessed 26 times the value of the land, and the memorialist adds, moreover, that the interest of the assessment, for eight months, exceeds the value of the property assessed, and that the expense of advertising this piece of land for sale for this aseessment was nearly half the value of the land.

After the Committee on Grievances, had examined this matter and heard the New-York Citizens Committee on the subject of this Assessment, the Chairman replied that they were satisfied of the enormous abuses, and would report in favor of relief without further examination.

The members of the New-York Citizens' Committee, which attended before the Committee on Grievances, were Mr. Bradhurst,

Alderman Cooper, Mr. Skidmore and Mr. Meriam.

The Session of the Legislature being near its close, this committee did not complete their report.

We have here shown the record of Remonstrances against the passage of the act in question, such as are rarely, if ever found in legislative proceedings to such an overwhelming extent. In fact we may plainly say, that in no record of a legislative body, is to be found such a disgregard of public opinion as indicated in the journals by the passage of this act, an act containing the most odious provisions, and besides is without a single redeeming paragraph. The members, had they understood its bearing, never would have voted for it.

Then take into view the total disregard both to the rules of the Senate, in Mr. Scott's resolution, and also in the Assembly, of a reference to a select committee to report complete.

It seems to us that this proceeding should receive at the hands of the next Legislature, a serious investigation, by an impartial committee of both houses composing that body.

The Bill, when Mr. Scott's resolution was offered in the Senate, on the 4th of April was not before that body, but was in the hands of the committee on the judiciary.—Mr. Scott's bill therefore was not in order, nor was it in accordance with the rules of the Senate.

The reference to a Select Committee in the house of Assembly is a most unaccountable proceeding and has nothing to sustain it in the Assembly Journals, in accordance with the rules of the House, as are here shown.

On the last day of the session, this bill came up, and was read a third time, not two thirds of the members voting in favor of the bill, it was not then passed, but it was again called up, as appears by the journals of the House, in the confusion of the adjournment, and passed.

The New-York Citizen's committee had abandoned the opposition to the bill in the Assembly on learning that the amendments and the bill were, as detailed, separated. A lobby was in attendance to press the passage of this bill, composed of Alfred A. Smith, Esq., X City comptroller, John Ewen, Street Commissioner and several other persons.—Smith stated that the sinking fund belonging tc this city, was to be used to purchase at these sales.

The two houses composing the Legislature, by a concurrent resolution had fixed, the termination of the present session at 12 o'clock, M., on the 18th of April. On that day a little prior to 12 o'clock, M., the Senate passed a resolution, extending the Session to 4 o'clock P. M., which resolulution was concurred in by the House.

The Journals of neither house show any prolongation of the session beyond that time, and both houses had agreed to adjourn at that time under that provision of the Constitution which says "neither house shall adjourn without the consent of the other."

If the session could be continued by members setting in their seats, it might also be continued by their standing in the Hall of the Capitol. There was not a quorum of the houses in their respective seats after 4 o'clock, and if there had been, this fact would not extend their session, without a previous rescinding of their rules, or a repeal of the rosolution passed terminating the session, or the passage of a new resoulution, prior to 4 o'clock, P. M., of that day to alter or change the hour fixed.

At the time this bill was sent to the Governor, authorising the mayor, &c.. to purchase lands for assessments, the term of the session, as fixed by the concurrent resolution of the two houses, had already expired, the bill not having been signed, or approved, or sent for approval, was therefore, a nulity, and the subsequent action of the Governor did not resuscitate it.

The Constitution provides that if the Governor approve a bill he shall sign it, if not, he shall return it within ten days, with his objections to the house in which it originated, unless the Legislature by their adjournment prevent its return, in which case it shall not become a law.

We give the following:

Extracts from the Constitution.

"ART. 1, SEC. 3—Each house shall determine the rules of its own proceedings."

"SEC. 4—Each house shall keep a journal of its proceedings, and publish the same."

"Neither house shall without the consent of the other, adjourn for more than two days."

"SEC. 12—Every bill which shall have passed the senate and assembly, shall, before it become a law, be presented to the governor: if he approve, he shall sign it; but if not, he shall return it with his objections to that house in which it shall have originated; who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration, two thirds of the members present shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered; and if approved by two thirds of the members present, it shall become a law. But in all such cases, the votes of both houses shall be determined by yeas and nays, and the names of the persons voting for, and against, the bill, shall be entered on the journal of each house respectively. If any bill shall not be returned by the governor within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it, unless the legislature shall by their adjournment, prevent its return; in which case it shall not bea law."

It is urged by some gentlemen, whose opinions are entitled to great consideration, that the words "unless the Legislature shall by their adjournment prevent its return" applies only to bills which the executive disapproves, and such disapproved bill the constitution says "in which case it shall not be a law."

This is a constitutional question of great moment, and when we shall have here made a passing remark, as to the bill in question, and stated some official proceedings we will, attempt to discuss it:

This bill involves principles which are fundamental. It is a bill to legalize to a colourable extent a direct violation of the constitution of the State and had his Excellency compared this bill with the report of the select committee appointed by the Senate to investigate assessment abuses, with the advertisement of sale, and with memorial sent him by the meeting at the Merchant's Exchange and all these with the constitution, we think he would not have signed it.

The protection of private property is a matter of no small importance—a government, under the administration of which, private property is not protected, is a shadow without a substance.

This Bill authorises a public officer to bid off land at a public sale in the name of a political corporation and to execute leases therefor, for a term of years equalling the fee simple absolute, and for an assessment imposed by that self same corporation, notoriously of an illegal character and which had been reported most unfavorably upon by a committee of the Senate appointed to investigate these very assessment abuses.

We said notoriously illegal. We should have said notoriously infamous—unequalled in the annals of any proceedings of the kind on the face ef the globe.

"BOARD OF ALDERMEN.

"MONDAY, MAY 29, 1843.

"Memorial of ROBERT SMITH, JONATHAN THOMPSON, ROBERT C. CORNELL, ANSON G. PHELPS, JOHN HAGGARTY, and others, for a postponement of the assessment sale, to June 1844; and also asking that the Common Council will discountenance the sale of property for improvements not made, and for the payment of fees and costs for services not rendered,—which was read, and referred.

THE MEMORIAL.

"*To the Honorable the Common Council of the City of New-York:*

"The undersigned, Citizens of the City of New York, most respectfully take leave to represent to the Common Council, that the Street Commissioner of the City of New York has advertised for sale several thousand lots of land, to be sold at public auction on the 12th June, for unpaid assessments.

"The undersigned represent, that very many of the assessments are for improvements not made, or needed, and that the assessments include a very large amount of fees and expenses for services not rendered, and which fees and expenses have not been taxed, or audited, or approved by proper officers.

"Your Memorialists represent, that it would be more unjust to enforce the payment of such fees and expenses by a sale of lands of those who are in no way benefitted thereby.

"Your Memorialists represent, that the abuses in the imposition of most of the assessments, for which the lots are advertised, are of an aggravated character, and should receive no countenance from the Common Council of the City of New York.

"Your Memorialists, therefore, in consideration of the premises, respectfully ask, that the sale be postponed 12 months, and that the Common Council will act upon the subject at once, that the owners of property may not be kept in suspense.

"And as in duty bound, &c.

"New-York, May, 1843.

"Memorial of sundry citizens for relief, in the matter of the assessment for the removal of the former sewer in Chapel-street, and the destruction of the pavement and grade of said street, and for a postponement of the sale for assessment until the matter shall be settled by the Supreme Court, and for a reference to a special committee.

"Memorial of MARTAA AMORY, widow of James Amory, for relief from three onerous assessments of upwards of eight thousand dollars, for the pretended opening of Manhattan square, seventh avenue, and sixth avenue, in which no improvements have been made, and in which the fees of the officers exceed thirty thousand dollars, and for the payment of which her property is advertised for sale—read and referred.

—

From the Journal of Commerce.

"BOARD OF ALDERMEN—JUNE 7TH.

"Memorial of William B. Crosby, Abraham G. Thompson, Peter Schermerhorn, James McBride, and others, asking that the assessment sale be postponed till June 1844, on the ground that MOST of the IMPROVEMENTS for which the Assessments have been IMPOSED, have NEVER been made, and that FEES and expenses to an IMMENSE AMOUNT are included in the Assessment for services NEVER PERFORMED or required; and also asking that the Common Council will discountenance proceedings of such an aggravated character as the proceedings here complained of.

"Memorial of John M. Bradhurst, Peter Cooper, W. W. Fox, John Morss, and others, for the same.

"Memorial of Peter Embury, Samuel Ward, Duncan P. Campbell, Samuel Marsh, and others for the same.

"Also several memorials from other citizens, of the like tenor.

"Memorial of persons interested in the property in Chapel and adjoining streets, damaged by the destruction of the former sewer, and placing the new sewer so high in the ground as to deluge the cellars instead of draining them.

"Memorial of Benjamin A. Benson, complaining that a piece of Salt Meadow has been assessed $16,053..63; that the annual INTEREST of the Assessment exceeds the VALUE of the Property; and that the assessment, interest and expenses in the aggregate, exceed TWENTY-SEVEN times the VALUE of the Property assessed; and remonstrating against the sinking fund, or the money raised by county being used to purchase this property at the sale; and asking that the assessment may be cancelled in consequence of no benefit being derived, and because the proceedings were ILLEGAL and therefore void."

—

"BOARD OF ALDERMEN.

"JUNE 26, 1843.

"Alderman Lee in the chair.

"From the Comptroller on the subject of purchasing property for unpaid assessments with a resolution appropriating $240,000 for that purpose—referred.

—

"BOARD OF ALDERMEN,

"JULY 3D, 1843.

"Report from the special committee, in favor of purchasing lands sold for non-payment of assessments, and recommending the appropriation of $240,000, therefor.

There were five remonstrances against this appropriation. After considerable discussion in which Ald. Waterman and Tillou took the principal part, the report was adopted, the motion to refer back having been lost.

The vote upon this appropriation is as follows:

IN THE AFFIRMATIVE—Alderman *Woodhull*, Dunning, *Emmans*, Nash, *Vandervoort*, *Waterman*, *Hatfield*, *Rawsm*, *Lee*—9.

IN THE NEGATIVE—Alderman MARTIN, TILLOU, (President) PURDY, BREEVORT, SCOLES, BRADY—6.

NOTE.—Mr. Emmons was a collector of Assessments, and being therefore interested, should not have voted.

The following is a copy of the Remonstrance:

"To the Common Council of the City of New York:

"The undersigned represent that they are informed that an application has been made by the City Comptroller to the Board of Aldermen, for an appropriation of Two hundred and forty thousand dollars to pay for land bid off at the Assessment sale.

"The undersigned remonstrate against any appropriation whatever of the money of the people for such **UNWORTHY PURPOSES**, against the increase of city debt, against the increase of county taxes, against the attempt to increase the amount of public property not absolutely necessary for public use, and ask the Common Council to discountenance the odious assessment abuses which are notoriously of an aggravated character.

"The undersigned dissapprove of the application to the Legislature for the passage of a law to authorize the Corporation to become purchasers at assessment sales, **AND OF THE MEANS AND REPRESENTATIONS MADE TO PROCURE THE PASSAGE OF THE SAID ACT**, and they believe that the law is disapproved by the good men of all parties in the city.

"And your Memorialists, &c.

This Remonstrance was signed by WILLIAM B. CROSSBY, JONATHAN THOMPSON, ROBERT C. CORNELL, WILLIAM W. FOX, GEORGE GRISWOLD, JNO. HAGGERTY, BROWN, BROTHERS, & Co., JOHN M. BRADHURST, ROBERT SMITH, BURTIS SKIDMORE, JAMES FELLOWS, JOHN ANTHON, ABRAHAM G. THOMPSON, and numerous other citizens of the highest standing and respectability.

—

Here follows the official admission of the Street Commissioner of the loose manner in which assessments have been made in the city of New-York.

"The Street Commissioner, to whom was referred the annexed Petition of Martha Amory for relief from several assessments.

Respecfully reports:—That he has examined in detail the several assessments upon the property of the Petitioner's late husband, as set forth in her memorial, with a view to discover whether any and what relief could be granted to her in the premises.

The undersigned feels satisfied from such examinations, that errors have been committed by the Commissioners in making their estimates and assessments in the matters of opening the 6th and 7th avenues,—and in the former case, very greatly to the prejudice of the property referred to.

The other assessment compalined of, for the opening of Manhattan square, although perhaps an injudicious proceeding, and accomplished at great cost, arising principally from a fictitious and over-valuation of the land taken for the square, during a period of great speculation in unproductive real estate, presents in her case nothing remarkable. The property is assessed for said square, or about 304 lots of lands, the sum of four hundred and forty-one dollars.

In the matter of opening the seventh avenue, the estate of Amory is awarded on lots 162 and 163 for land taken for the avenue, the sum of $304 68. The estate is assessed for benefits in the same matter, on lot No. 500 situated between 68th and 70th streets and within about a hundred feet of the avenue, $1,116 94; on lot No. 504, situated between 70th and 71st streets, and within about thirty feet of the avenue, $714 61; and on lot No. 508, situated between 71st and 72d streets, and extending into the avenue, $1,069 46. A portion of this last named assessment is for the part of the ground extending into the avenue, and taken for the same, which belonged to the estate, but for which an award of $392 05 was made to the Corporation under a presumption that it belonged to the city. The ground belonging to the estate of Amory on this avenue was formerly a part of the common lands, and was purchased by Amory from the corporation. The conveyance to him included all the land which the Corporation possessed in the avenue at that place, it

being the westerly boundary of the common lands. The Corporation would not be entitled to an award for the land in the avenue, even if had not been formerly conveyed to Amory; the Supreme Court having long since determined that where land is conveyed as bounding upon a street or avenue, the grantor by such Act virtually appropriates the land belonging to him in the street or avenue in front of the land so conveyed.—The Corporation therefore having wrongfully received this award, it is undoubtedly proper that it should be passed to the credit of the estate to which it belongs. The sum of the assessments against the estate of Amory over and above the award in its favor, on this avenue, by the assessment, is $2,596 33; which being credited with the award of $392 05 erroneously made to the Corporation, will be reduced to $2,595 33.* This is undoubtedly a very erroneous assessment upon about 186 unproductive lots of land for the mere purpose of divesting the owners of land in the avenue, of the fee, and placing it in the Corporation in trust for public use; and like most other assessments made during a period of high speculation in unproductive real estate, is excessive, as before stated, from an over valuation of the land taken for the avenue, which has caused a corresponding assessment for benefit upon the lands in this vicinity. The sum allowed on a lot of land in this vicinity as nearly as can be ascertained from an examination of the assessments, is about $300; which is probably more than three times its value for any purposes whatever.

The valuation of the land taken in the opening of the 6th avenue appears to have been estimated at a still higher rate,—the sum of about $400 per lot having been allowed by the Commissioners for the rocks and swamps in that vicinity; and it is against the assessment for the opening of this avenue, that the Petitioner has the greatest cause of complaint, not only from the over valuation referred to, but from gross errors as the undersigned believes, on the par tof the Commissioners in making their assessments, which errors he will attempt to explain.

The Estate of Amory embraces a number of blocks of land on each side of the sixth avenue, between 65th street and 73d street, which formerly constituted a part of the common land street, sixty feet in width, laid out anterior to the laying out of the present avenue; its Eastern side corresponding with the present Easterly side of the avenue, leaving a space between its Westerly side and the Westerly side of the avenue, of forty feet in width.

In some cases the Corporation, in conveying to Amory, bounded him on each side of this old street, by which he received a conveyance of a forty feet strip of land in the avenue, between the line of the old sixty feet street and the Westerly line of the avenue. In other cases the Corporation in conveying to Amory, bounded him by the lines of the avenue, but reserved in the conveyance the forty feet, a piece in front between the Westerly side of the old commonlands street and the Westerly side of the avenue, for the avenue, intending thereby to furnish the entire avenue between the premises conveyed, for avenue purposes. In the former case, where the forty feet space in the avenue was conveyed to Amory, the Estate has been awarded on that side of the avenue, as damages over benefits for this strip of land taken for the avenue, the sum of $601, and assessed on the land on the opposite side for benefits, the sum of $603, by which the benefit and damage is but equal; and in this case the estate has no cause of complaint, as the ground on each side of the avenue belonging to it should furnish the avenue between; but in the other case where the ground in the avenue had already been furnished to the Estate by the Corporation, there being no award for the land in the avenue, there should be no assessment upon the adjoining property, except for its proportional part of the expense. There has been assessed upon the block on the Westerly side of the avenue between 69th and 70th street, the sum of £595, and on the easterly side of the avenue directly opposite, the sum of $603; also upon the block on the Easterly side of the avenue between 71st and 72d streets, where the entire avenue also had been furnished, and for the land in which no ward has been made in the proceedings, the sum of $599, when **all that the Commissioners could have properly charged upon these blocks would have been their proportional part of the expeses, which would have been about $55 upon the three blocks, instead of the sum of $1801 charged in the assessment.**

From the foregoing statement of facts, elicited from an examination of the several assessments referred to, it appears that the Estate of the Petitioner's late husband has been importunely and largely assessed, growing out of the following reasons, 1st, a high valuation of the property taken for the several improvements. 2d. The allowance to the Corporation of an award for land actually belonging to the Estate. 3d. Palpable errors in imposing upon the property large assessments for opening the 6th avenue, in cases where no land was required, or paid for in part of the property assessed.

In the case of the erroneous award, it is clearly evident that the Common Council has the power, and that it is its duty, to make the correction,—the Corporation having received the benefit of the award, and the law making provisions for such corroction; but it is extremely doubtful whether the Corporation can be made liable for any errors whatever in these assessments, however palpaple such errors may appear, or however onerous they may prove to the individuals upon whom they may fall; or whether the Common Council has legitimately the power to grant relief. The Corporation has had no agency in making or confirming these assessments, and is not entrusted by law with the power of reconsidering or making any corrections in them. The power exercised by the Corporation in those street openings is purely legislative, in directing the opening of any avenue, street, or public square, either by themselves, or on the petition of persons interested. In such case the Commissioners of estimate and assessment are appointed by the Supreme Court, and their report of the assessment is confirmed by the Court. The Corporation has no right to intefere and object to any assessment made upon the property of an individual; but the right to present such objections, either to the Commissioners before confirmation, or to the Court when their report is presented for that purpose, belongs to such individuals, who must suffer the consequences of a neglect to perform such duty. In the case under consideration, if a representative from the Estate had gone forward and examined the assessments when they were advertised for that purpose, it can hardly be doubted but that upon the errors being pointed out to the Commissioners they would have been corrected by them, or if not by them, by the Court on the presentation of the report of the Comissioners for confirmation. It does not seem to the undersigned that the Corporation, from a mere exercise of a Legislative power in these matters by a law of the State, can be made answerable for any evil consequences to individuals under proceedings growing out of such lawful acts, any more than the State should be liable for the evils which may fall upon individuals by the failure of Corporations whose charters were granted by the Legislature. If the Corporation be not liable for these errors, then it is perhaps questionable whether the power of granting relief by imposing a tax upon our citizens can be legally exercised by the Corporation. As this subject is important, not only in reference to the case under consideration, but to others which will undoubtedly come up, and as the undersigned is incompetent to give an opinion in regard to these important legal questions which ought to influence the action of the Common Council, he recommends that the subject be referred to the counsel of the Corporation for that purpose.

The cases of Joseph R. Stuyvesant and Benjamin Townsend are alluded to in the petition, in which the Common Council relieved them from an erroneous assessment; The former in opening of Eleventh street, and the latter in the opening of the 7th Avenue. The undersigned had the honor of writing those reports for Committees on assessments. The ground assumed in these reports in granting relief, was, that it was better that the misfortnne should be borne by the mass of citizens composing the community, than it should be visited upon a single citizen.

If this doctrine should in all coses be car-

*If the first sum is right, this should be $2,204 28.—[Jour. Commerce]

ried out, it would have a tendency to relieve individuals from the responsibility of looking after their own interests in these matters, and cause the responsibility to rest with the public. The equity of the case would seem to be, that the Commissioners should pay for these gross blunders.

In regard to the sums charged for fees by the Commissioners and others, complained of in the petition, the undersigned will state, that they have been the subject of investigation by a select committee of the Senate of this State, appointed in 1841 to investigate alleged abuses in assessments during the recess of the Legislature; the result of which may be ascertained by an examination of their report and the accompanying testimony. The undersigned will state in conclusion, that the opening of these avenues and that of Manhattan square, was ordered by the Common Council previously to his being in office, and during the time of his predecessor, George B. Smith, Esq.—That he had occasion to examine the several documents connected therewith, during the investigation of the select committee, and that the petition for opening the Seventh Avenue was signed by a large number of influental citizens, some of them no doubt having no interest in the property, who in their petition endorse the principles set forth in the report of the Committee on Streets for opening the 6th avenue, and express their belief that the masses are in favor of a general opening of the avenues and streets, and that the course recommended in the report of the Committee on Streets in relation to the opening of the 6th Avenue, was the only one to advance the City in wealth and consequence.

The undersigned submits for adoption the following resolutions:

Resolved, That the foregoing Report of the Street Commissioner be referred to the Counsel of the Corporation for his opinion as to the liability of the Corporation for the errors in the assessments therein referred to; and in case the Corporation should not be liable for such errors, whether or not the Common Council may legally exercise the power to relieve the petitioner by the payment of money out of the City Treasury.

JOHN EWEN, Street Commissioner.
Street Commiss'rs Office, July 31st, 1843.

REMARKS.

We give next in order, the Petition of MRS. MARTHA AMORY, upon which the above report of the Street Commissioner has been made. We are at all times most happy to quote this autocratic officer on the right side in assessment matters, and much regret that he does not more often, afford us this opportunity. We do not agree with him in the doctrines he advances in the report, but in his statement of the injustice of the assessments we are with him. The Counsel of the Corporation, has not yet reported upon the reference of the memorial made to him, although it is now near four months since the reference, and during that time the Street Commissioner has sold this property for this very assessment, and the Mayor, Aldermen, and Commonalty are the purchasers under this very Confiscation Act, for the term of 1000 years, which heads this renotice of proceedings, passed or claimed to have been passed April 18th, 1843.

Here is the Memorial:

"Memorial of Martha Amory, widow of the late Jas. Amory, deceased.

"To the Honorable the Mayor and Common Council of the city of New York:

"Your Petitioner, MARTHA AMORY, widow of James Amory, late of the city of New-York, deceased, takes leave most respectfully to represent that the estate of her deceased Husband, situated in the 12th Ward of the city of New-York, and in that part of the Island of New-York appropriated to the purpose of Agriculture and farming, has been assessed the very large sum of **$3,133 00,** for the opening of Manhattan Square. Sixth Avenue, and Seventh Avenue, and that these improvements, *so called* have *not* been made, nor are the opening of these avenues and square called for by public convenience, or public necessity, either now, or heretofore.

"The undersigned, states, that it appears by the appendix to the city comptrollers report, for the year 1843, Pg. 122, that the counsels fees in these proceedings, is stated at the large sum of **$9,015 67.** The surveyor's fees, at **$3,351 39,** and the commissioners fees at **$9,420 00,** and the contingent expenses to **$1,280 00.** The collectors fees are stated at **$3,153 00,** which include the appraisers fees of twenty-five dollars, making an aggregate of **Thirty-one thousand two hundred and twenty dollars and six cents,** for the accuracy of which, she refers to the receipts taken by the Street Commissioner for the respective amounts, to the Surveyor, Counsel and Commissioners.

Your petitioners represents that these costs, and expenses, were not presented to the Supreme Court, at any time, and that the same were not taxed by any officer authorised by law to tax the same, and the **amount is of startling magnitude,** in the case of the counsel, amounting to a greater sum than the salaries of the entire Branch of the Justices of the Supreme Court, for the whole year, and equal to the salary of the Mayor of New-York for three years, the fees of the Surveyor at the rate of four dollars per day, are equal to the pay for **twenty hundred eighty-seven days,** and upwards, which allowing six working days to a week, is pay for about six years, nine months, an amount of time which needs no illustration. The Commissioners fees, at the rate of four dollars per day, for each of the three commissioners, is for that of the seventh avenue, pay for four hundred and ten days, *each;* for the sixth avenue, for two hundred and four days; and for Manhattan square, one hundred and thirty one days, *each;* making an aggregate of time, of seven hundred and eighty-five working days, equal to two years and six months, and upwards, more than half of which time, was charged for in the assessments of the seventh avenue.

Your Petitioner refers to the returns made to the Comptroller of this State, by the Clerks of the Supreme Court, for the years 1839 and 1840, for the amount of expenses incurred in that court, for the proceedings in relation to the Sixth avenue, and suggests, that an estimate may be made of the expenses incurred in the other cases from what is there stated to have been charged, or paid, in this particular case, which is stated at but *a few shillings.*

"Your petitioner refers to the non compliance with requirements of the law of April 20th, 1839, inthe nontaxation of the costs in the assessments for the opening of the sixth avenue, and to the fact, that an attempt is now making to collect those very costs, by a sale of the premises assessed, notwithstanding this bold violation of the Statute.

"Your petitioners refers to the records of the respective Boards, composing the Common Council, for the fact, that in adopting the reports of the Committee, recommending the opening of these avenues, and square, and passing the resolution directing the same to be opened, that the same were not published, as required by the seventh section of chapter 122 of the laws of 1830, nor were the *ayes and noes* called, or published, as required by the provisions of said section, which the Honorable the Supreme Court of this State, say in an opinion delivered in that Court, on the 13th May instant, is "a plain violation of the amended charter;" and also to the Veto Message of his Hon. Mayor Morris, known as document No 9, of the board of Aldermen, of 1841.

"Your petitioner states that the application to the Supreme Court for the appointment of Commissioners of estimate and assessment, was *exparte*, and without notice, and the persons appointed, are not such as the persons interested in the property affected in their property affected by their acts, would approve of, and that in all these cases for which the estate of her deceased Husband, has been assessed, *she had no notice whatever of the proceedings until after the confirmation of the reports.*

"Your Petitioner believes and therefore states the fact to be, that a majority of the owners of property did not petition for the said contemplated improvement and was ignorant of the proceedings she complains of being in Progress.

"Your Petitioner, therefore, in consideration of the premises, and the fact that the Estate in question has been in no manner benefitted, asks the Common Council to discontinue all further proceedings to collect the said Assessments on any part of them.

"Your Petitioner refers to the case of Joseph R. Stuyvesant and also that of Benjamin Townsend in which the Common Council relieved the sufferers.

"Your Petitioner respectfully suggests

hat if your predecessors in office have done wrong in the premises, that their acts should not be consummated by the present Common Council, by a sale of the premises assessed, and moreover insists, that the residue of the estate of her deceased Husband, should not be taxed to raise the monies to pay the corporation bids upon that which is advertised for sale, and thus attempted to be indirectly confiscated.

"Your Petitioner states that the amount of the annual rental of the premises assessed does not exceed $1800 00. The amount of the present assessment including the interest is **$10,516 64,** and add to this the annual tax, as paid the last year, it will make an aggregate of interest on assessments of $1,000. Comparison of these taxes, is an illustration which needs no argument of words, to make plain to the most common understanding.

"Your Petitioner asks that justice and equity may be done in the premises, and she looks to the Mayor and Common Council of the city, for such immediate relief, as will relieve her anxiety, and save her from vexatious and expensive litigation and trouble.

"And in duty bound, &c,

"MARTHA AMORY."

"NEW-YORK, MAY 26TH, 1843."

REMARKS.

The Street Commissioner in his Report says:

"The equity of the case would seem to be, that the Commissioners should pay for these gross blunders."

MRS. AMORY applied to the HON. MURRAY HOFFMAN, Assistant Vice Chancellor and obtained an injunction against the Corporation restraining them from collecting the assessments. The opinion of that excellent judicial officer is as follows:

In Chancery, { *Martha Amory, vs. The Mayor, Aldermen, and Comonalty of the city of New-York.*

"This case is in its leading particulars, similar to that of Stuyvesant, vs. the Corporation, before noticed. It is distinctly charged as to the proceedings in relation to the Sixth Avenue, that when the first publication of the notice of motion to confirm the report was made the act of 20th April, 1839, was in force the rule of confirmation being made on the 6th of June, 1839. Here also the question under the 12th section is of great importance as the costs of the opening exceeds $10,000. Some questions may arise under this section; but this at least is clear: *no part of the costs can be levied upon the party or his property, nor can a sale be made to pay them until the taxation has been made.*

The case of Stuyvesant to which the assistant Vice Chancellor refers is to be found on page 179 of this volume.

In that opinion the Assistant Vice Chancellor uses this language.

"But I am thoroughly satisfied that a more palpable and pernicious disobedience of law has never marked the course of any corporate body, than characterises the proceedings complained of. I have a deep rooted conviction that ultimately the decision must be against the Corporation, and I believe the jurisdiction vested in this Court to compel the Corporation to try the question fairly in a single action at law between them and the complaining party. I think it is within the province of this Court to prevent an innocent purchaser being deluded into litigation and probable loss, and to confine the controversy to the alleged wrong doer and the injured party. This strikes me as the plain common sense view of the case."

This opinion of the most worthy and excellent Assistant Vice Chancellor, is worthy of himself, and will be commended by every intelligent jurist in the land.

The Chancellor dissolved the injunctions granted by Assistant Vice Chancellor Hoffman. The Chancellors opinion is to be found on page 195, of this volume, and he also required the complainants to pay the costs.

The Select Committee appointed to ievestigate assessment abuses in the city of New-York by the Honorable the Senate of this State in 1841, in their report, Senate Document No. 100. of 1842 page 18, — say:

"When these questions first arose, the Court of Chancery affirmed its jurisdiction, entertained bills of complaint, and granted injunctions to stay proceedings in the sale for those assessments, until the alledged errors could be examined, on the same ground that it always asserted its jurisdiction in case of fraudulent judgments, and that although the judgment was illegal, yet it being a lien upon real estate was a **cloud** upon the title and should be removed by the intervention of a Court of Equity. So these assessments, although stated to be illegally imposed, were declared by Statute to be a lien upon the lands assessed, and would appear to be equally a **cloud** upon the title, and for the same reason that a judgment is so regarded, they both being equally liens upon real estate. But that Court has since denied that it had jurisdiction in those matters and referred the applications to the Courts of law."

In page 164 of this volume is the opinion of CHANCELLOR WALWORTH *in assessment cases which will well repay an attentive perusal.*

The Street Commissioner next proceeds to say, in his report, that:

"In regard to the sums charged for fees by the Commissioners and others, complained of in the petition, the undersigned will state that they have been the subject of investigation by a Select Committee of the Senate of this State, appointed in 1841, to investigate alledged assessment abuses during the recess of the Legislature; the result of which may be ascertained by an examination of their reports and the accompanying testimony."

The street Commissioner has done right in referring to this report and the accompanying testimony. We will give copious extracts from the Report which is known as printed "Senate Document No. 100, of April 9th, 1842."

Extract from Report of Select Committee p. 13.

"In the opening of the SEVENTH AVENUE from 21st street to 129th street, which was confirmed in February, 1839, the amount awarded to the owners for the land taken for the avenue, was $28,141,41, while the fees and expenses of that opening amounted to the large sum of **$12,435,70**—and if to that is added the collectors fees for collecting the assessments $1,115,00, it will show a total of expenses paid by the owners of land on that portion of the Seventh Avenue for its FORMAL opening, amounting to $13,550,70."

The Committee remark in same page:

"The amount paid to the Commissioners on that avenue for their services, at the rate of four dollars per day, which is the highest sum allowed by the Statute, is pay for **sixteen months services** for each Commissioner, in making the estimate of the land taken for opening that avenue; and assessing that value back again upon the land each side of the avenue; and in opening this one street, of one hundred and eight blocks, of about 270 feet each, the Commissioners were each engaged three times the whole period that the legislature is employed in legislating for the State, and each of them received about three times the compensation that is paid to a legislator for passing the whole winter from his home in attending to the public business."

"And in addition to that it was shown to the Committee that Commissioners were frequently engaged on several streets or avenues at the same time taking their four dollars per day on each of those improvements; and that they received and were paid that compensation in some instances where they did not attend to the duties of their appointment, and in others, where they attended but once or twice."

"If the case of the SEVENTH Avenue had been a solitary instance, the committee might have supposed that it had taken place through some mistake; but they found the same principle of ENORMOUS EXPENSES to extend throughout the whole system of street openings in that city, and that to such an amount *that the surprise should be not that the inhabitants now complain of it, but that they had not done so at a much earlier period.*"

Extracts from the testimony of John Leonard, Esq, *given before the Select Committee from the senate, pg.* 32.

"Was one of the Commissioners of estimate and assessment in opening second avenue from 28th st. to 86th street, was associated with Henry P. Robertson aed Andrew Mills. Mr. Robertson and the witness were the only two who did any work on such estimate and assessments. Mr. Mills was there once or twice. Mr. Mills may have been there oftener than that but he never did any thing except to sign the report. Mr. Mills may have been there three or four times, but witness does not recollect distinctly of his being

there more than twice, there was work for him to do, if he had attended to it and been capable of doing it. Mr. Mills signed the Report. He made the same charge for his services as was made by the other Commissioners."

Again the witness states on pg. 33 *of the testimony,*

"The witness thinks the amount charged by each commissioner in that case was over $700—being about seven hundred and fifty dollars. The chargefor room hire was a separate charge. Those fees were assessed upon the property supposed to be benefitted by the improvement."

On pg. 39 *of the testimony the witness states:*

"The witness cannot tell the particular number of days Mr. Mills was there; he was not there five times and done nothing when he was there, he was a perfect cypher. The precise number of days for which the Commissioners charged, upon the said second avenue was 190 days for each commissioner, at four dollars per day."

On page 119 *from the testimony of* Andrew Warner, Esq.

"The witness also officiated as a Commissioner on several other streets and avenues; his associates did not in every instance attend the meetings of the Commissioners for making such estimates and assessments, but there were always two present, those absent were allowed the same compensation as those present, and their fees made up in the general assessment in the usual way."

Extract from testimony of Anthony L. Robertson, Esq., *page* 119.

"Witness does not think he did attend all the meetings held at the Mr. Harris' house at Harlem, but was engaged in making calculations at his own house, upon the same parts of the avenue they were engaged upon at said meeting. Pg. 123. Witness has been Commissioner on other improvements beside Seventh avenue; he thinks 47th street, and and 48th street. It was the general custom to allow each commissioners for an attendance at each meeting although they were not all three present."

Extract from the testimony of Jonathan Thompson, Esq. *pg.* 47.

"That formerly between 25 and 30 years ago the witness was personally acquainted with all the assessments of the city of New-York, being the Collector of the internal revenue of the United States. Afterwards the witness, in 1819 or 1820, at the request of the common council valued all the property of the city of New-York with Mr. Targee and Mr. Smith. Witness has been a commissioner upon forming and grading the third avenue, and upon a number of other improvements. Witness knows the labor and time necessary in making out assessments, as he has spent several weeks at it, or rather months. Witness has examined the Commissioners map of the second avenue, from 29th to 86th streets and also the abstract of the Commissioners report, showing the number of persons to whom awards, and against whom assessments were made in the matter of opening the said second avenue. He can only estimate the time necessary to be spent in making the estimate and assessment of said second avenue by comparing it with third avenue from the Bowery road to Harlem Bridge, which was six miles and a quarter in length, and on which the witness made the assessment for regulating and grading.—The expenses of the Commissioners on said third avenue which was in May 1819, the assessment roll contained about a quire and a half paper closely written was as follows:

"Total expense for working and regulating,		$97,514,00
"For advertising,	8,00	
" Surveying	244,00	
" Collector, three per cent, 33,280,31	998,41	
" Assessors for assessing stationary, &c.	886,56	
" Contingencies paid st. commissioner,	190,03	2,327,00
" Total		$99,841,00

"The witness produces the Surveyor's bill above referred to, which is sworn to August 3d, 1820, by the affidavit of Mr. Daniel Ewen the Surveyor which is surveying, compiling, collecting information, and drawing maps of the third avenue from its commencement at the Bowery to Harlem bridge, 61 days at $4 per day—$244,00. The assessment on third avenue extended one half way to the next block same as 2d avenue.—The second avenue is paralel to the 3d avenue and about *500 feet distant and there is not much differrence in the situations and ground, and he thinks it was as easy to make the maps of 2d avenue as to make that of the third avenue. In fact, he thinks it was much more labor to make the map for the third avenue for the same distance than it was to make that of the 2d avenue, it was a new thing when that of the 3d avenue was made and there were many more assessments.—The witness should not say there was one tenth of the labor in making out the estimate and asessment of the 2d avenue that there was in making out the assessment which witness made out on third avenue. The assessment which the witness referred to as being a quire and a half of paper, on third avenue contained descriptions of all the property assessed. The abstract of the Commissioners report on the 2d avenue is made out on two sheets of paper. The witness knows what services used to be rendered in cases of street improvements by the Corporation Counsel. The Commissioners or Assessors would make out their report or assessment roll and hand it the Counsel who would put it into legal form."

Extract from the testimony of John Leonard, Esq. *pg.* 38.

"The Statement produced in relation to the second avenue is signed by the witness and the other commissioners. The sum total of Assessments is $19,259,60. The aggregate amount of awards is $12,595,23½. The expenses are

" Surveyor's Bill,	$1,700 00
" Appraiser's bill,	60 00
" Corporation attorney, counsel, and court charges,	2033 55
" Commissioner's fees,	2280 00
" Room hire, clerk hire, printing and stationery,	324 72
" Collector,	300 00
" Total expenses,	$6,698 27"

The number of blocks on the 2d *avenue assessment is but* 58, *while those of the third avenue are more than double that number.*

Extract from Senate Document No. 100, *p.* 298.

"The Commissioners for making the estimate of the expense of opening the 7th avenue have included in their estimates some expenses of a most extraordinary character, viz:

Commissioner's fees	$4,920 00
Room hire for do.	410 00
Carriage hire,	30 00
Clerk hire,	250 00
Stationery, &c. &c.,	48 00
Counsel fees,	3,977 77
Surveyor's fees,	2,801 00
Collector's fees,	1,115 00
•Total,	$13,550 77

The City Comptrollers Report for 1841, *pg.* 108 *to* 113 *affords an illustration of that portion of the Mr. Thompson's testimony, in which he says:*

"She witness knows what services used to be rendered in cases of Street improvements by corporation counsel.

City Comptroller's Report 1841, *pg.* 108.

"Opening 8th avenue throughout."	
" Counsel fees,	745,45
" Commissioners fees,	760,68
" Surveyor's fees,	310,50
" Appraisers fees and " Collector's charges	296,87
" Incidental expenses,	178,37
	$2291,87

This avenue, is longer than the seventh avenue, of which Mrs. Amory complains of the enormous expenses, and it will be seen on comparing the expenses of the avenues, together, that the counsel fees alone in the 7th avenue exceeded the whole expense of all the officers, &c., in the 8th avenue, by more than **$1600!!**

We will take another case as a farther illustration.

City Comptroller's Report, 1841, *p.* 109.

"Tenth Avenue from 28th to 71st street.	
" Counsel fees,	338,76
" Commissioners fees,	348,00
" Surveyor's fees,	130,00
" Collector and appraisers,	130,00
" Contingent expenses,	0 75
Total,	$936,51

The Counsel fees in the seventh avenue, complained of, are more than four times the amount of the fees of Commissioners Surveyor, Counsel, Appraiser and Collector, all put together in opening the tenth avenue, from 28th to 71st street which is 43 blocks.

•Probably a typographical error.—*Ed.*

The Surveyor's fees in the seventh avenue are more than nine times the amount of the surveyors fees for opening the 8th avenue of greater length than the 7th.

The Commissioners fees, in the seventh avenue complained of, are more than six times as much as that of the Commissioners for making the estimate and assessment in opening the 8th avenue. It will be borne in mind also that the 8th avenue is the most extensive street, as opened.

The **room hire** of the commissioners in the 7th avenue proceedings, was more than all the surveyor's charges in the opening of the 8th avenue.

The proceedings in the 8th avenue, was in 1811, the 10th avenue in 1815.

In reference to the extraordinary expenses in the seventh avenue, A. L. Robertson Esq., one of the Commissioners, in his testimony, contained in Senate Document, before referred to, in pg. 120, says:

"When witness applied for his fees as Commissioner, he got a warrant from the Street Commissioners office, from Mr. Gaines, he thinks, or the comptroller; at the time of getting that warrant he deposited in the Street Commissioners office an abstract of the estimate and assessments, with the expenses in gross amounts as Commissioners fees $4920. Surveyor's $2001,* &c., the Supreme Court having passed *upon the accuracy of the items* contained in their report, he did not consider the corporation, or any of its officers authorised to question their right to the amount charged by them, they being the mere depository of moneys paid by persons assessed to be paid to those to whom it was awarded by their report. Witness believes the expenses are stated in a paper annexed to their report, and the Supreme Court passed upon that report."

The witness is evidently under a mistake as to the Supreme Court passing upon those expenses, as will be seen by the testimony of John Keyes Paige, Esq., Clerk of the Supreme Court, Senate Doc. No. 100, pg. 85.

Mr. Paige states as follows:

"Witness never knew any bill of items of expenses in opening streets or avenues or public squares in the city of New-York, presented to the Supreme Court for taxation when the reports of the Commissioners of estimate and assessment were presented to that Court for confirmation though it is possible when such confirmation was opposed, such bills of items may have been presented to the court with the report and other papers, and the judge may have passed upon them, but the witness never saw any such bills, and none have fallen under his observation in his office.

From the testimony of Benjamin Townsend Esq. formerly a member of the Common Council and Chairman of the Street Committee of the Board of Assistants. Senate Doc. No. 100, p. 94.

"Witness went to Albany, and there saw the report of the Commissioners in the matter of opening the Seventh Avenue, on file in the Supreme Court Clerks office, and examined the report, and looked for a bill of costs with it, but could find none accompanying it or attached to it. Witness was three or four days examining the said report."

Extract from the testimony of Col. John Ewen, Street Commissioner. Senate Doc. p. 44.

"The abstract of the report signed by the Commissioners containing the aggregate account of the expenses, award and assessments, *is the only voucher* on which such payments were made; the claimants for such expenses were never in the habit of presenting any bills. *Again, the witness says,* The witness supposed that upon presenting the abstract of the report of the Commissioners the expenses therein mentioned had been taxed by the Supreme Court as required by law and that the officers of the corporation had no power to withhold their payment."

Extract from a letter addressed by Robert Emmet., Esq., the counsel in these cases to a member of the Board of Assistant Aldermen, who had offered and procured to be passed in that body a resolution calling for information in the premises. See Senate Doc. No. 100, pg. 278.

"Sir I have received a copy of a resolution offered by you and passed by the board of Assistants on the 9th inst. requiring me to furnish that board with the items of the bill for Counsel fees and Court charges in the matter of opening the seventh avenue, also a bill of the charges of the commissioners of estimate and assessments, and the surveyor's bill in the same matter. I had determined to send back the copy of the resolution, enclosed in a short communication to the President of the Board of Assistants, respectfully denying the right of that Board, or of the Common Council, to require any such information from me, but being informed that the resolution was not drawn by you, and believing that you might not have well considered its fitness, or propriety, when you introduced it. I have thought it due to you to make this personal communication to yourself on the subject:

Again, Mr. Emmett says on same page 278:

"The proceedings for opening the seventh avenue, were conducted and concluded under the act of April 9th, 1813, the 189th section of which provides that the commissioners of estimate and assessment (WHO ARE THE APPOINTED BY AND ARE OFFICERS OF THE SUPREME COURT), &c.

Again the same witness says:

"But I know of no law which made it my duty to preserve and exhibit to the Common Council, or to any other party, or even to make out a bill with items of the costs fees and Court charges in the matter of opening the seventh avenue, or in any other of the numerous street cases which I had charge of," &c.

On enquiry being made, of A. L. Robertson Esq, one of the Commissioners for making the assessments for the seventh Avenue as to the means that the persons interested had of knowing what the expenses were, he states, in his testimony, pg. 120, as follows:

"The persons interested in that avenue could have ascertained the amonnt of expenses by deducting the amount of awards from assessments, the ballance would show the amount of these expenses. To ascertain that they must add up the items on each page, which are pronable not more than three in number on each page, aed carried out on the margin for the facility of reference.—Thinks the report may have contained two hundred leaves, but that is a mere guess."

Thus, we have shown that in these *immense expenses*, payment was made, without any taxation, or auditing, or approving, and the street commissioner says he *supposed* the costs, &c. had been taxed, by the Supreme Court. This certainly is a very poor apology for paying such immense sums of money to persons whom he knew could not have earned it, and for which he knew they had rendered no equivalent service.

There was no means of knowing how much the expenses were, except by adding up the awards and assessments page by page for two hundred leaves, four hundred pages. Is this the way of transacting public business—surely such proceeding have no parallel in the civilized world.

We will next look at the Surveyors charges and these require a little comparison.

The Surveying for the 3d avenue which was six miles and a quarter in length was 244 dollars.

The venerable JONATHAN THOMPSON, the distinguished Ex-Collector of the port of New York, one of our best citizens, in his testimony, says, he thinks it was as easy to make the map of the 2d avenue, as to make that of the third avenue for the same distance, in fact he thinks it was much more labor to make that of the third avenue for the same distance, than to make that of the second avenue.

The length of the survey on the second avenue, was only half that of the third avenue, and the Surveyor's bill for the second avenue, was $1,700,00, taking the length of the two surveys into account, it would appear that for as much work as Mr. Thompson allowed $244, the 2d avenue Commissioners allowed at the rate of $3,400,00 for, or a little less than fourteen times as much as Mr. Thompson allowed. This certainly is an extraordinary difference, but we will make another comparison. The Surveyor's fees for the 10th avenue from 28th to 71st street which is fifteen blocks less, being a little over three fourths of the distance of the 2d avenue survey was but $130 and the second avenue $1700.

We will here introduce a comparison of the expenses of the Commissioners, &c. &c., for opening 10th avenue, from 28th to 71st in 1815, with the expenses charged and paid for opening 7th avenue from 21st street to 129th street, in 1839, and compute the charges in each proceedings by the block.

SEVENTH AVENUE, has 108 blocks.

*Should be $2801, see his testimony pg. 123 of Senate Doc.

Counsel fees per block,	36,81¼
Surveyor's fees,	25,93½
Commissioners,	45,55½
Contingencies,	6,83¼
Total per block,	$115,13½

TENTH AVENUE has 43 Blocks.

Counsel fees per block,	7,87
Surveyor's fees "	3,02½
Commissioners "	8,09
Contingencies, "	0,01¾
Total per block,	$19,00¼

The expenses on the same work in 1815 cost but $22,02¼ per block, and in 1839 cost $125,45½. *Near* six hundred per cent increase including collectors fees! ! !

Mr. Leonard *in his testimony before the Senate Committee, pg.* 38, *says:*

"The witness arrived at the amount of surveyor's fees by the Surveyors bill, which was generally *an aggregate amount.* The Commissioners knew the extent of the work but were *no judges of the value of the survey.* They received the Surveyor's bill from *the Corporation Counsel,* and when they did not receive it, *that way,* they would ask the Corporation Counsel whether it was correct.—The Surveyor's bill was *not audited, or certified,* by any officer to witnesses knowledge. THE WITNESS DOES NOT KNOW WHO SELECTED THE SURVEYOR."

Col. Ewen, Street Commissioner, says in his testimony before the Senate Committee, pg. 45, *that:*

"The wintess has been an engineer and surveyor for a considerable period, could not say what would be a fair compensation for making such a survey and map as of 2d avenue by a mere inspection of the map, because he does not know what time or labor was spent in producing it, and because he has been out of the profession for the last five years, persons now in the profession may give a better judgment."

Col. Ewen is as familiar with this ground as with his own office, and during this whole five years has acted as assessor and passed upon more than one hundred surveyors bills. He has a general knowledge of the surface of the whole Island of New-York.

The remarks we have made in reference to the cost and expenses apply to the seventh avenue, for which the estate of Mrs. Amory, was most enormously, and most wrongfully assessed.

We next take the assessment for the pretended opening of the sixth avenue.

The Street Commissioner in his report, uses this language:

"The Corporation has had no agency in making or confirming these assessments, and is not entrusted by law with the power of reconsidering or making any corrections in them."

This proceeding originated with the corporation. It is true, a petition was presented, asking for this avenue to be opened, got up by persons who wanted jobs of surveying, counseling, assessing, collecting, &c. &c., but the petition was not signed by owners of three fourths of the land fronting on the avenue required by the 177th section of the act of 1813, the corporation, therefore, usurped the jurisdiction without having first legally or properly acquired it. They were therefore trespassers in the premises, and had no jurisdiction.

As to the power possessed of correcting those abuses—it is their duty to take the most rigid measures to compel the public officers to return the money to the city treasury, which they have improperly taken from it and blot out such acts from the city government.

Again, the Street Commissioner in his report says:

"The power exercised by the corporation in these street openings is purely legislative, in directing the opening of any avenue, street or public square, either by themselves, or on the petition of persons interested."

The definition of powers, are a matter of speculation. We term the act administrative and not legislative. Although we at the same time are free to admit that the Street Commissioner has opinions of some judicial officers to sustain his *dicta.*

The power is not given to a particular officer, naming such officer, but is vested in the mayor, aldermen and commonalty, a vague and loose investment. The words, Mayor, Aldermen, and Commonalty, are the title of a municipal corporation, composed of the freeholders and inhabitants of the city of New York. Some further legislative provision was necessary to enable any particular officer or class of officers to execute this power thus vested in a mere corporate body. The act itself is a disgrace to the statute book and should never have been there.

When the Charter of the City of New-York was amended in 1830, a restriction was imposed upon the Common Council in all proceedings which generated assessments, this restriction is contained in the seventh section of the act of 1830, applies to the important preliminary step of giving notice to the persons whose land is intended to be entered upon and appointed to public use, and to those persons who are to be assessed to pay for the land thus taken. This section of the charter provides: "all resolutions and reports of Committee s which shall recommend any specific improvement involving the appropriation of public money or taxing or assessing the citizens of said city, shall be published immediately after the adjournment of the board, under the authority of the Common council in all the newspapers employed by this corporation and whenever a vote is taken in relation thereto, the ayes and noes shall be called and published in the same manner." The debates in the city convention, when this section was framed, are set forth on the 241st page of this number. The kind of notice required to be given, is plainly, and clearly stated, it was first proposed to be published "*in the daily newspapers*"—then "*in one or more of the daily newspapers,*" and finally determined that notice should be given "*in all the newspapers employed by the corporation*" This is too plain to require any argument. Now let us see how this law has been complied with, by the Common Council?

In the testimony of DAVID T. VALENTINE Esq., *assistant clerk of the Board of Aldermen, before the Senate Committee, pg.* 36, *he says:*

"It has not been customary to publish the reports of the Committee on Street improvements in the corporation papers. The witness does not recollect any instance in which such reports were published in the Board of Aldermen."

Here is an officer of the corporation, who states with great plainness and frankness that this law by which alone the Corporation could acquire jurisdiction in the premises has been uniformly and grossly violated.—The evil results must fall upon the doers of the mischief. Had the citizens had notice they would have risen in mass and put a stop at once to the proceedings. Mr Valentine has been in the corporation since the adoption of the amended charter.

Again Mr. Valentine *says:*

"Since the witness has been assistant clerk of the board of aldermen it has not been the practice of that board, in all cases to take the ayes and noes on resolutions for street improvements, but during the *present year,* since the veto of MAYOR MORRIS, they have adopted that practice."

The law was passed in 1830 and it was in 1841, Eleven years after, that Mr. Valentine gives this testimony.

On the 9th of Dec. 1839 the Board of of Assistant Aldermen passed a deliberate vote that they *would not* comply with this law. *See ante pg.* 244.

The convention which assembled in 1829 to frame a bill to amend the city charter were convened almost wholly, and solely on this very point, see the discussions in the public newspapers for 1820 to 1829 and their addresses to the people on accepting the bill on the 2d page of this number and of this volume pg. 242.

The Legislature subsequently provided two other notices, viz: in the act passed April 20th 1839, amendatory of the act of 1813. In this act it is required that the commissioners shall give notice by hand bills posted up, and also in four newspapers of the intended presentation of the report of their estimate and assessment to the Supreme Court for confirmation.

It was also required that the costs and expenses should be taxed before these are allowed and paid. This law was also wholly disregarded in every particular. Even the Supreme Court confirmed assessments in the month of June 1839, after this law had taken effect, without the costs having been taxed, altho' the court was required by the act to make rules for such taxation, The Court, however made such rule in July term, but at the following September and December Special Terms confirmed Reports of Commissioners without taxation. No objections were made to the court,—and good reason why, the parties had no notice—and yet judicial officers seem to think the parties who are sufferers are precluded from relief in

setting such proceedings aside. This is an unsavored dicta to hand down to posterity.

Mr. Paige, *the Clerk of the Supreme Court*, in his testimony, pg. 86 of Senate Report, says:

"Witness produced the report and additional report of the Commissioners of estimate and assessment in the matter of opening of 6th avenue in the city of New-York, which was filed in his office June 6th 1839, and appears by endorsement to have been confirmed on that day. There does not appear to be any evidence that said notice of presenting such report or confirmation was published in handbills annexed to said report or additional report."

Mr. Leonard *in his testimony, senate report pg.* 33. *says*:

"Witness does not recollect that any notice was given of presenting such report by posting handbills in the vicinity of the contemplated improvement, nor in how many newspapers, the said notice was published, that was left to the counsel of the corporation, who then had charge of the proceedings."

"At the time witness made that report he was not aware of the existence of any law which required such notices to be posted up in handbills."

This report which the witness refers to was that of the second avenue which was presented to the court and confirmed Sept. 1839 four months after the passage of the law and two months after this very court had made a rule under it. The Court, however, say, that they do not act as a court, in these Street cases, but act as *quasi Commis*-missioner; but the Constitution, says: "*neither the Chancellor, nor justices of the Supreme Court nor any Circuit judge shall hold any other office, or trust.*" Sec. 7, art. 5. Const.

We shall be obliged to suspend our remarks, and introduce here the opinions of Mr. Justice BRONSON, Mr. Justice COWEN, and also extract from an opinion of Mr. Justice BRONSON, and Mr. Chief Justice SPENCER.

We give the opinion of Mr. Justice Bronson—delivered at the May term in 1843, of the Supreme Court.

SUPREME COURT.

In the matter of opening 39th street in the city of N. York from the east to the Hudson River.
Also, 37th street from river to river.
Also, 11th Avenue, between 32d and 47th streets.
Also, a new street between the 4th and 5th avenue from 22d, to 32d street.

BRONSON, J. The Corporation is authorised to proceed upon its own motion in opening streets laid out by the Commissioners under the act of 1807 and the want of a petition from the land owners is a matter of no consequence. 2 R. L. 408, §177.

Whether the necessity, or convenience of the public require the opening of a street, is a question belonging exclusively to the corporation. The Court has nothing to do with it. (§177 and 8.)

The Report and resolutions of the Committees recommending the opening of these streets were not published pursuant to the act of 1830 *nor were the ayes and noes called when the resolution to open the streets was adopted by the Common Council, Statute* 1830, *p.* 226, §7. *These* **are plain violations of the amended charter,** and it is not improbable that they may in some form affect the proceedings of the corporation. (See matter of Mount Morris Square.)

2 Hill 20 Sharp vs. Spear & Sharp v. Johnson 2 Hill 76 and 92). But I am of opinion that this is not the proper time to raise the question. If the ordinance for opening the streets was not duly passed the objection should have been taken on the motion for the appointment of Commissioners or a motion should afterwards have been made to set aside the appointments. The case is now before us on its merits and the only question is whether the Commissioners have made a just and equitable assessment of the loss and damage, benefit and advantage of the several persons interested in the improvements (§178) it is not unlike a motion for a new trial on a case to set aside a report of reference on the merits, when we should not entertain the question whether the action has been duly commenced.

It is said the counsel of the corporation was never instructed to take the necessary measures for opening the streets and that he has proceeded without authority. This objection also comes too late. It should have been taken when the motion was made, for the appointment of Commissioners and besides the objection seems not to be well founded in point of fact. The Common Council passed a resolution that the streets be opened and it is understood that it thereupon became the duty of the Counsel to take the necessary legal measures for carrying the resolution into effect.

But however that may be Counsel has beeu proceeding in the matter under the eye of the Corporation for the last six or seven years and the Corporation is now here moving for the confirmation of the reports. If any such thing was necessary the proceedings of the Counsel have been adopted and ratified by the Corporation (matter Mount Morris square 2 Hill, 14,19)

The assessment in these four cases exceed the awards by sums amounting in the aggregrate to $9,000,00 and upwards this difference must have been made for the purpose of covering the charges and expenses incident to the proceedings, §185, §189, the Commissioners to receive not more than $4,00 per day each, while actually employed on the duties of their appointment besides all reasonable expenses for maps, surveys, and plans, clerk hire and the necessary expenses, disbursements, (§180) the costs and charges of the counsel for prepreparing the papers, advising the commissioners, and conducting the procedings to their final determination have usually been allowed as a part of the necessary expenses and disbursements of the Commissioners, the amendatary act of 1839 provides that no costs or charges to the said Commissioners, their attorney, counsel or others shall be paid or allowed for any services performed under this act or the act hereby amended unless the same shall be taxed (Stat. 1839 p. 185, §12). This applies to the proceedings which have already been commenced as well as those which might be commenced in future (§14). In these cases the costs and charges have not been taxed and until that is done I don't see how the reports can be confirmed. The act of 1813 declares that expenses shall be paid by the Corporation and included in the assessments, (§189) it is said that the act of 1839 only goes to the payment by the Corporation and not to the assessment. But the words are that the costs and charges shall not be paid or allowed until the same shall be taxed. If we confirm the reports the costs will be allowed against the persons assessed for benefit and in a way which will leave them no redress if the bills have been overcharged.

We think the costs should have been taxed. But it is not necessary at present to send back the reports on that ground, the motions may be suspended, until the costs can be taxed, and then if the bills have not been overcharged in the assessments the reports will be confirmed. If the bills have been overcharged, we will then consider whether the reports must go back to the commissioners, or whether the persons assessed must have justice done them in some other form.

The case of Samuel N. B. Norton was before us on a former occasion (matter of 39th street, 1 Hill 191). We then held that by selling his land and bounding the purchasers by the streets he had dedicated his remaining land on the side of the street to public use. Following that decision the Commissioners have now allowed him a nominal sum for the land in the side of the street. But there is a new fact in the case now presented. When Norton sold to Warner he took back a mortgage to secure the payment of a part of the purchase money, the mortgage since has been foreclosed in Chancery and Norton became the purchaser at the master's sale. I think the case is not materially affected by this new fact. The dedication was by deed and the land was not dedicated to Warner, but to the public, so long as the deed remained in force and the public has an interest in the question, the dedication cannot be recalled. The deed is still in force. Norton must now trace his title through Warner, and so far as I can see he stands in the same condition as any other person would who had purchased at the mortgage sale, unless the cases upon dedication by deed are reconsidered the objection by Mr. Norton cannot prevail.

We see no valid objection to the Report except that the costs and expenses of the

proceedings have not been taxed and as to that, the motions may stand over for the present as already suggested when the counsel for the coporation thinks proper to move again in the matter, he must give notice to the Counsel who has appeared for the persons objecting to the confirmation of the report. Ordered accordingly,

ROBERT EMMET, Esq.,
of Counsel for the Corporation.
RICHARD MOTT, Esq.,
of Counsel for the Objectors.

—

We next give the opinion of Mr. Justice Cowen delivered at the August Special term of the Supreme Court, reserving our review of the previous opinion of Mr. Justice Bronson until we have made some farther extracts, &c.

CONSTITUTIONAL QUESTION.

A motion was made at the June special term of the Supreme Court, in a street case, on the suggestion of the Court.

The opinion given in this matter was delivered by the learned Mr. Justice Cowen.

The Corporation have insisted that the provision of the act of 1830, requiring the ayes and noes to be taken is merely directory, and their attorney argued that the Court had so held; but Judge Cowen in his opinion says—"that question has never been decided—but he previously states that it was intimated by the court, that the ommission might seriously effect the proceedings.

The Constitution of 1777 provides that the Justices of the Supreme Court, shall hold no other office or trust except that of Delegate to Congress.

The Constitution of 1821 *contains this provision.* "Neither the Chancellor nor the Justices of the Supreme Court, nor any circuit Judge, shall hold any other office or public trust."—Art. 5. SEC. 7, Cons.

This language is too plain to admit of misconstruction, and the learned Judge well remarks, "*It is indeed difficult to see what the provision in the Constitution, against a judge holding any other office, is worth to the people of the State, if it can be avoided by turning him into a Commissioner of Highways,*" *&c.*

The Constitution vests the appointing pow- in the Governor and Senate, but here the legislature vests it in the Supreme Court;—and this patronage is exercised by one of the Justices in the appointment of 27 batches of Commissioners, (81 in number) in a single day; and these Commissioners appoint Surveyors, Attornies, Clerks, Appraisers, &c.—The extent of this patronage may be gathered from the fact, that the fees which a single batch of Commissioners (3 in number) in one proceedings awarded themselves and their *beneficiaries* was near $14,000. This is a patronage that outdoes the Governor of the State.

We dissent from the doctrine that the justices of the Supreme Court act as Commissioners, on these grounds, viz:

1st. The act of 1813, under which the appointments are made, is in these words: "It shall be lawful for the Mayor, Aldermen and Commonalty, to make application, or to cause application to be made, to the Supreme Court of Jurisdicture of his State for the appointment of Commissioners."—2 R. L. of 1813, p. 409, §178.

2d. The Court in making the appointment, enter an order or rule of Court appointing the Commissioners; and also another rule confirming the report of the Commissioners;—which is in the nature of a judgment, being a lien upon the real estate assessed;—upon which in case of non pay ment it is sold without any other form of proceeding.

3d. These appointments are made, and the reports are confirmed by a single Judge If the Judges act as commissioners, one would not form a quorum.

4th. The rules or orders entered in these proceedings are entitled "in the Supreme Court," and the Clerk of the Court enters these in the minutes with the other proceedings of the Court.

The opinion of the Judge in this matter is of very great importance, and we take great pleasure in laying it before the public; althongh the motion was denied, the mover having shown too much, and the Court, as we think, clearly intimating that the act of the legislature is unconstitutional.

—

SUPREME COURT.

In the matter of opening 37*th street, New-York.*

OPINION OF THE COURT.

COWEN J.—This case was very fully considered upon the motion to confirm the report, when we refused to act on the objections now taken, (viz: that the resolutions were not published, and the ayes and noes were not called.) The answer given on that occasion was, that the objections could not be made in answer to a motion for confirmation, but that. if available at all, they should have come in answer to the motion to appoint Commissioners, or a motion should afterwards have been made to set aside the appointment. *It was also intimated that the omission might seriously affect the proceedings.* On the footing of this suggestion, a motion is now made to set aside the whole proceedings as null and void.

It has been suggested on several occasions, that the omissions, to publish the ayes and noes, &c., was not vital, but merely the disobedience of a directory provision, though that question has never been decided, nor is it necessary now to decide it. The answer, I think, lies in the relation we hold to proceedings for opening streets. It is that of Commissioners, not a Court. An attempt was made on the argument to show the contrary. It has however been so often held that our powers are summary, those of a more special Commission, like the powers of Commissioners under the act of insolvency, that we are perhaps scarcely warranted in having the question debated.

(In the matter of Beekman street, 20 John, 269-271. In the matter of Third street, 6 Cowen, 571-2. In the matter of Canal street, 11 Wend, 154-5. In the matter of Mount Morris Square, 2 Hill, 14-19.) The principal has been carried out into its consequence by the Supreme Court often granting a writ of *certiorara*, from itself as a Court, to itself as a Commissioner.

It is not now suggested for the first time, that this Court was under no obligation to accept the Commission, that the statute imposing the duty can be sustained only on the assumption that the powers confirmed form a legitimate part of our forensic jurisdiction. The point was noticed in the matter of Beekman street, where the question of constitutional authority in the legislature is adverted to. *It is indeed difficult to see what the provision in the constitution against a Judge holding any other office is worth to the people of the State, if it can be avoided by turning him into a Commissioner of highways, a a trustree of colleges, &c,,* as the legislature have in several instances done. We have also I believe been declared members of the Police Courts in the city of New York. The office of Sheriff for that city or indeed any any county in the State, might perhaps with as much constitutional propriety have been imposed, *as some of the duties I have attended to;* and had the question been made as I admit it should have been, a reconsideration by the Legislature would probably have ensued, and the evil of interruption in the regular business of the Court been prevented. The argument however proves too much for the purposes of the mover. It goes to show that we have nothing at all to do with his case one way or the other. His counsel rely on the words of the Statute, which are that the *Supreme Court* shall act as Street Commissioners. On the words we are a *Court*, it is said, and may act as such on the matter in all repects, including the hearing of the motions to set aside proceedings on the merits, or for irregularity defect or nuility. Suppose the statute had said the *Supreme Court* shall execute process for the city and county, would it have been the less turning us *quoad hoc* into Sheriff beceuse of the title? It is difficult I apprehend to combat the argument of Spencer Ch. J. in the matter of Beekman-street, that by whatever name we may be called in the delegation of power, this cannot vary the nature of the thing, and so long as we act all, it must be as road Commissioners. It follows that we have no more authority to interfere and set aside proceedings on motion, than a Commissioner under the insolvent act. (Stafford vs. the Mayor, &c. of Albany, 7, John 541, 546-7. In the matter of Mount Morris Square, 2 Hill, 19.) There are many departments of the public business in which the lines of Constitutional power have not been so distinctly drawn as to be always kept in view.

In framing a fundamental law, general and sometimes equivocal words are used to which time and observation alone can affix such an obvions construction as shall give them their intended effect either in regulating legislative or judicial action.—

The same remark is applicable to the law dividing the powers of the Supreme Court, as such, from the summary duties which have been HASTILY CONFERRED upon it, and perhaps as hastily assumed by it,

Mixed up as these Street questions are with the hundreds of motions belonging to the Special term, we cannot when speaking of them, at all times conform our expressions to the exact difference between the general and limited duty. Our omission to do so has given occasion for the present motion. It was by no means intended, however, to trench upon the numerous cases which have defined our jnrisdiction ; nor to deny any of the consequences flowing from the definition, one of these is a clear inability to set aside street proceedings for irregularity in the exercise of the power of the Corporation.

If this be made a ground of objection at all, we think it can only be interposed by way of opposition to the appointing Commissioners. A substantive motion to set aside the proceedings, is neither given by the Statute, nor consistent with the nature of the jurisdiction which it confers.

Motion denied.

(Copy,) W. HILL, JR. State Reporter.

We make the following extracts from an opinion given by Mr. Justice Bronson in the matter of the People vs. E. F. Purdy on the question of the right of Mr. P. to sit as a Judge in the court of Sessions by virtue of his office of Alderman of the 10th Ward of the city of New-York.

" We live under a government of laws, reaching as well to the Legislature, as to the other branches of the government ; and if we wish to uphold and perpetuate free institutions, we must maintain a vigilant watch against all encroachments of power, whether arising from mistake or design, and from whatever source they may proceed."

Again, the learned Judge in another part of his opinion states :

" We are not at liberty to presume that the framers of the constitution, or the people who adopted it, did not understand the force of language."

And again—the learned Judge *remarks :*

" I will not inquire whether this provision be a good or a bad one. Whatever may be my views on that subject, I am not at liberty to set up my opinion against the declared will of the People as manifested in the Supreme law of the land."

" If we may get round this clause of the constitution because it stands in our way, or we do not like it, we may in the same manner get around any other clause in that instrument ; and thus all hope of fixing the boundaries of power by written instruments will be at an end.

In another part of the opinion of the same learned Judge, *he remarks :*

" In this way a solemn instrument, for so I think the constitution should be considered, is made to mean one thing by one man, and something else by another, until in the end it is in danger of being rendered a dead letter ; and that too, where the language is so plain and explicit, that it is imposible to make it mean more than one thing, unless we first lose sight of the instrument itself, and allow ourselves to roam at large in the boundless field of speculation. For one, I dare not venture upon such a course."

" Written constitutions of Government will soon come to be regarded as of little value, if their injunctions may thus be lightly overlooked and the experiment of setting a boundary to power will prove a failure."

In a paragraph of this opinion the learned Judge *uses this language :*

" If the clause can be so construed," (here he refers to a particular case) "it may then, I think, be set down as an absolute fact, that the English language is too poor for the framing of fundamental laws which shall limit the powers of the legislative branch of the government."

The learned Mr. Justice Cowen *in giving his opinion in the same case in which* Mr. Justice Bronson *gave the opinion from which the above is extracted, says :*

" I have thought a good deal upon the question of Legislative power discussed by Mr. Justice Bronson, and perceive difficulties in it which I had not anticipated before I heard his opinion."

We extract from the opinion of Mr. CHIEF JUSTICE SPENCER referred to in the opinions of MR. JUSTICE COWEN on pg. —, as follows :

" The powers possessed by this Court, in appointing commissioners, in reviewing their report, in referring it back to the same commissioners, or substituting new ones, and in finally confirming their report, are derived wholly from the statute. None of these powers exist independently of the *legislative delegation* of authority ; and they are *not incident to our judicial dutics.* It might be a question how far the Legislature can impose such duties on the judges ; but it does not admit of a doubt, that, if we do consent to act, we act under a limited and circumscribed authority ; and our only power to act being derived from the statute, we possess no powers but such as are expressly given ; and those powers must be exercised in the manner designated by the act. It is true, we act collectively, and in term time, and a majority present control the proceedings ; *but we act as commissioners,* and in the same way and manner as we used, individually, to do, under the insolvent act. The statute is our guide ; and we must proceed by the rules, and in the manner it prescribes, The general powers and jnrisdiction of this Court as regards the application now before us, cannot be brought into exercise."

In the month of May 1840, the Commissioners of estimate and assessment in the matter of the assessment for opening 29th street from the East, to the North River, published a notice that they hed completed their report and " deposited a true transcript thereof in the office of the clerk of the city of N.Y. for the inspection of whomsoever it might concern, and that their report of the said estimate and assessment will be presented to the Supreme Court of Jurisdicture of the State at the Capital in the city of Albany on the first Tuesday of June next, and they request all persons whose interests may be effected thereby, and who may be opposed to the same to present their objections " **in writing**" to the commissioners or either of them.

On the 27th day of May, Abel T. Anderson, and Isaac A. Johnson made objections in writing, verified by their several and respective oaths, within the time required and specified by the said commissioners in the said notice and delivered the same as directed to one of the said Commissioners. These objections were made under §182, of the act of 1813, 2, R. Laws, pg. 417.

The provision of law is in these words :

" And any person or persons whose rights may be effected thereby, and who shall object to the same, or any part thereof may, within ten days after the first publication of the said notice, state his, her or their objections to the same **in writing**, to the said Commissioners ; and the said Commissioners, or such of them as shall make such estimate and assessment, in case any objections shall be made to them and stated **in writing** as aforesaid, shall reconsider the said estimate and assessment or the parts thereof so objected to" &c.

The following are the objections.

To the Commissioners of Estimate and assessment for opening 29th street. } In the matter of opening 29th street in the 16th Ward of the city of New York.

Gentlemen,

We object to your award for damage and benefit on our property, situate on the 8th avenue and including 29th street, because—

1st. The procedings have been so long delayed, that a valuation at the present depressed prices of real estate is unjust and inequitable, inasmuch as there are no established data upon which any reasonable calculation can be grounded, and especially where the improvement is not required.

2d. That we are deprived of a piece of ground fronting 60 feet on the public avenue by 300 in depth, fairly worth in ordinary times $4000, and are charged $121 in addition, to accommodate with an opening to the 8th avenue, a piece of ground 100 feet in breadth in the rear of our property, inasmuch as the eastern 400 feet of the block can seek its outlet to the 7th avenue.

3d. Because public *necessity* does not require the opening of 29th street.

4th, Because public *convenience* does not require the opening of said street.

5th, Because the persons interested in the property assessed have not applied or petitioned for the opening of 29th street.

6th, Because the opening of 29th street has not been legally authorized by the Mayor, Aldermen, and Commonalty in Common Council convened, as your objectors are informed and believe.

7th, Because the opening of 29th street and the proceedings had in relation thereto by the Board of Aldermen and Board of Assistant Aldermen, possessing the legislative powers of the Corporation of the city of New York, your objectors have been informed, are illegal and not such as is required by the law of the state of New York and the amended charter of the city of New York.

8th, Because the Board of Aldermen and Assistant Aldermen, composing the Common Council of the city of New York, have as your objectors are informed and believe, proceeded in this matter without having first published the report of the Committees of the respective Boards, which recommended the improvement as required by law, and the charter of the city, and without complying with its provisions by calling the ayes and noes in either Board when the report was adopted, recommending, or when the resolution was passed, authorizing the improvement; and that the same was not published in the newspapers employed by the Corporation under the authority of the Common Council.

9th, Because the application by the counsel of the Mayor, Aldermen and Commonalty of the city of New York to the Supreme Court for the appointment of commissioners, was ex parte, in consequence of the informality of the proceedings of the board of Aldermen, as your objectors are informed and believe.

10th, Because the Corporation of the city of New York have no power by the charter of said city to assess private property for public improvements, and that the only power now exercised by the Common Council of the said city is conferred by statute and regulated by statute.

11th, **Because the fees of the Commissioners of estimate and assessment are, as your objectors are informed and believe, greater than are allowed by law, and that parts of days have been charged as whole days by some of the Commissioners.**

11th, Because the proceedings of the Common Council in this matter have been dilatory and expensive; the first proceedings had been completed, as your objectors are informed and believe, in the month of February, 1836, more than four years ago.

Signed, { ABEL T. ANDERSON, ISAAC A. JOHNSON.

City and county of New York, ss. Abel T. Anderson and Issac A. Johnson being duly sworn, do depose and say, that in their opinion the foregoing objections are true in substance and matter of fact.

Sworn, this 27th day of May, 1840 before me, } Signed { Abel T. Anderson Isaac A. Johnson.

WATSON VAN BENTHUYSEN,
Commissioner of Deeds.

The motion was not brought on at the June Special Term.

Ward Hunt Esq., of Utica, son-in-law of JUDGE SAVAGE late Chief Justice of the Supreme Court of this state, attended the Special Term of the Supreme Court at Albany during the whole of its session in August to oppose the motion for the confirmation of the report of the commissioners of estimate and assessment in this street, but the opposing counsel did not bring it on.

Mr. Hunt attended the September Special Term of the Supreme Court at Albany during the whole term for the purpose of opposing this motion and when everything else was disposed of, and every person but the parties, and one individual member of the bar besides, had left the court, it was moved. Mr. Hunt produced affidavits of disinterested persons as to various irregularities, &c. &c., and also the affidavit of the Chairman of the street Committee, upon the report of which, the proceedings were based, and also affidavits stating that one of the commissioners had publicly stated that fees were included in the expenses for services never rendered, and that the costs had not been taxed under the act, passed April 20, 1839; but the counsel who moved for the confirmation objected to these affidavits being read, and the Court sustained his objections.

Mr. Hunt then read the written objections above, filed with the Commisstoners, and also objected to the report as being unaccompanied by any statement of costs and expenses, and to the *non*-taxation of the costs under Sec. 12 of the act of 1839.

The Court, after hearing arguments, took the papers, and on the 5th of January followlowing, made a decision, overruling the objections. Here it is as follows:

"*In the matter of opening 29th street in the city of New York, from the East to the North River.*

"R. Emmet, for the corporation, moved the confirmation of the report of the commissioners of estimate and assessment, in the matter of opening Twenty-ninth street from the East to the North River.

"Mr. Delaplaine, on behalf of John F. Delaplaine, opposed the motion. The facts, as they were admitted on the argument, were as follows: Mr. Delaplaine owned four adjoining lots on the southerly side of the street, and most of the land in the street in front of those lots. In 1833 he sold and conveyed three of the lots, bounding the purchasers by the street. He also conveyed to the purchasers all his interest in the land in the street adjoining the three lots—the land to be subject to the use of the owners of the lots as a public street. He remained the owner of the fourth lot, and the land in the street in front of it. For the land in the street opposite this lot the commissioners allowed him $79,48, which is less than its value, and on that ground, Mr. Delaplaine objects to the report.

"W. Hunt opposed the motion for confirmation, on behalf of Abel T. Anderson and Isaac Johnson—who have been assessed for benefits—on several grounds: but there was no proof of the facts on which they relied beyond their own affidavit, that "in their opinion the objections are true in substance and matter of fact."

"R. Emmet insisted, that, being parties in interest, their affidavit was not admissible. (John and Cherry streets, 19 Wendell, 659.)

"By the Court, BRONSON, J. There is nothing in the case of Mr. Delaplaine to distinguish it, in principle, from other cases which have been before the court. (32d *street*, 19 *Wend.* 128, *and cases there cited.*) Having sold lots and bounded the purchasers by the street as it is laid down on the city map, he has adopted the map, and dedicated his land in the site of the street to the public use. He could have intended nothing less by his deeds than a declaration, that Twenty-ninth street was, and so far as he was concerned, should remain a public highway. I do not say that this dedication will extend to all his lands in the site of the street, however remote from the lots sold: but it will, I think, extend to all his lands in the same block or in other words, to the next cross street or avenue on each side of the lots sold. The parties must have contemplated an outlet both ways.

Why the commissioners allowed Mr. Delaplaine more than a nominal sum, without giving him the full value of the land, does not appear: but he cannot complain that he has got too much.

In relation to Messrs. Anderson and Johnson the objection is taken, and must prevail, that there is no legal evidence of the facts on which they rely in resisting the motion for confirmation. They are parties in interest, and not competent witnesses in their own favour. (*John and Cherry streets*, 19 *Wendell*, 659. The question of law which their counsel wished to have considered, are not, therefore properly before us.

Motion granted.

—

REMARK.

There is, in our opinion an important

omision in the published report of this case. We were in court when this motion was argued. Mr. Hunt counsel for Messrs. Anderson & Johnson, produced affidavits of persons not interested in the assessment, to sustain important objections to all the proceedings, not only to the counsel moving for the confirmation, but also to the Commissioners report, and also to the amount of fees included which affidavits stated that one of the commissioners admitted that fees were included in the assessment for services not rendered. Mr. Justice Bronson said that these affidavits could not be read if the counsel moving for confirmation objected, and he did object.

We will review this opinion in connection with that of the same learned judge in the matter of 37th street, in the subsequent pages of this number.

We extract from the 2d vol. Dalles reports *the following opinions which were given upon an act of Congress imposing particular duties upon the judges of the Supreme Court of the United States in reference to provisions, which are applicable as to the principles discussed, to the acts of the Justices of the Supreme Court acting as* COMMISSIONER *in assessments.*

"As the reasons assigned by the Judges, for declining to execute the first act of Congress involve a great constitutional question, it will not be thought improper to subjoin them, in illustration *of Hayburn's case.*

"The Circuit Court for the district of NEW YORK (consisting of JAY, Chief Justice, CUSHING, Justice, and DUANE District Judge) proceeded on the 5th of April, 1791, to take into consideration the act of Congress entitled "An act to provide for the settlement of the claims of widows and orphans barred by the limitations heretofore established, and to regulate the claims to invalid pensions;" and were, therefore, unanimously, of opinion and agreed

"That by the Constitution of the United States, the government thereof is divided into three distinct and independent branches, and that it is the duty of each to abstain from, and oppose encroachments on either.

"*That neither the Legislature or Executive branches, can constitutionally assign to the Judicial any duties, but such as are properly judicial, and to be performed in a judicial manner.*

"That the duties assigned to the Circuit Courts, by this act, are not of that description, and that the act itself does not appear to contemplate them as such; inasmuch as it subjects the decisions of these courts, made pursuant to those duties, first to the consideration and suspension of the Secretary at War, and then to the revision of the Legislature; whereas by the Constitution, neither the Secretary at War, nor any other Executive officer, nor even the legislature, are authorised to sit as a court of errors on the judicial acts or opinions of this court.

"As therefore, the business assigned to this court, by the act, is not judicial, nor directed to be performed judicially, the act can only be considered as appointing commissioners for the purposes mentioned in it, BY OFFICIAL *instead of personal descriptions.*

"That the judges of this court regard themselves as being the commissioners designated by the act, and therefore as being at liberty to accept or decline that office.

"That as the objects of this act are exceedingly benevolent, and do real honor to the humanity and justice of Congress; and as the Judges desire to manifest, on all proper occasions, and in every proper manner, their high respect for the National Legislature, they will execute this act in the capacity of commissioners.

"That as the Legislature have a right to extend the session of this court for any term, which they may think proper by law to assign, the term of five days as directed by this act, ought to be punctually observed.

"That the judges of this court will, as usual, during the session thereof, adjourn the court from day to day, or other short periods, as circumstances may render proper, and that they will, regularly, between the adjournment proceed as commissioners to execute the business of this act in the same court room or chamber.

"The Circuit court for the district of PENNSYLVANIA, (consisting of *Wilson* and *Blair*, justices, and *Peters*, District Judge) made the following representation in a letter, jointly addressed to the President of the United States, on the 18th April, 1792.

"To you it officially belongs to "take care that the laws" of the United States "be faithfully executed." Before you, therefore, we think it our duty to lay the sentiments, which, on a late painful occasion, governed us with regard to an act passed by the legislature of the union.

"The people of the United States have vested in Congress all legislative powers "granted in the constitution."

"They have vested in one Supreme court, and in such inferior courts as the Congress shall establish, "the judicial power of the United States."

"It is worthy of remark, that in Congress the whole legislative power of the United States is not invested.

An important part of that power was exercised by the people themselves, when they "ordained and established the Constitution."

"This constitution is "the Supreme Law of the Land." This supreme law "all judicial officers of the United States are bound, by oath or affirmation to support."

"*It is a principle important to freedom, that in government, the judicial should be distinct from, and independent of, the Legislative department.* To this important principle the people of the United States, in framing their constitution, have manifested the highest regard.

"They have placed their judicial power not in Congress but in "courts." They have ordained that the "judges of those courts *shall hold their offices during good behaviour*," and that "*during their continuance in office, their salaries shall not be diminished*,"

"Congress have lately passed an act, to regulate, among other things, "the claims to invalid pensions."

"Upon due consideration, we have been unanimously of opinion, that, under this act, the Circuit Court held for the Pennsylvania district could not proceed.

"1st. Because the business directed by this act *is not of a judicial nature.* It forms no part of the power vested by the Constitution in the courts of the United States; *the Circuit court must consequently, have proceeded without constitutional authority.*

"2d. Because, if, upon that business, the court had proceeded, its judgments *(for its opinions are its judgments)* might under the same act, have been revised and contracted by the legislature, and by an officer in the executive department. Such revision and control we deemed radically inconsistent with the independence of that judicial power which is vested in the courts; and consequently, with that important principle which is so strictly observed by the Constitution of the United States.

"These, Sir, are the reasons of our conduct. Be assured that, though it became necessary, it was far from being pleasant.—To be obliged to act contrary, either to the obvious directions of Congress, or to a constitutional principles, in our judgments equally obvious, excited feelings in us, which we hope never to experience again."

"The Circuit court for the district of NORTH CAROLINA, (consisting of IREDELE, Justice, and SITGREAVS, District Judge) made the following representation in a letter jointly addressed to the President of the United States, on the 8th of June, 1792.

"We the judges now attending at the Circuit court of the United States for the district of North Carolina, conceive it our duty to lay before you some important observations which have occurred to us in the consideration of an act of Congress lately passed, entitled "An act to provide for the settlement of the claims of widows and orphans barred by the limitations heretofore established, and to regulate the claims to invalid pensions.

"We beg leave to premise, that it is as much our inclination, as it is our duty, to receive with all possible respect every act of the Legislature, and that we never can find ourselves in a more painful situation than to be obliged to object to the execution of any, more especially to the execution of one founded, on the purest principles of humanity and justice, which the act in question undoubtedly is. But however lamentable a difference in opinion really may be, or with whatever difficulty we may have formed an opinion, we are under the indispensable necessity of acting according to the best dictates of our own judgment after duly weighing every consideration that can occur to us; which we have done on the present occasion.

"The extreme importance of the case, and our desire of being explicit beyond the danger of being misunderstood, will, we hope, justify us in stating our observations in

a systematic manner. We therefore, Sir, submit you the following:

"1. That the Legislative, executive and judicial departments, are each formed in a separate and independent manner; and that the ultimate basis of each is the Constitution only, *within the limits of which each department can alone justify any act of authority.*

"2. That the Legislature, among other important powers, unquestionably possess that of establishing courts in such a manner as to their wisdom shall appear best, limited by the terms of the constitution only; and to whatever extent that power may be exercised, or however severe the duty they may think proper to require, the Judges, when appointed in virtue of any such establishment, owe implicit and unreserved obedieuce to it.

"3. That at the same time such courts cannot be warranted, as we conceive, by virtue of that part of the constitution delegating judicial power, for the exercise of which any act of the Legislature is provided, in exercising (even under the authority of another act) any power not in its nature judicial, not provided for upon the terms the Constitution requires.

"4. That whatever doubt may be suggested, whether the power in question is properly of a judicial nature, yet inasmuch as the decision of the court is not made final, but may be at least suspended in its operation by the Secretary at War, if he shall have cause to suspect imposition or mistake; this subjects the decision of the court to a mode of revision which we consider to be unwarranted by the Constitution; for, though Congress may certainly establish, in instances not yet provided for, courts of appellate jurisdiction, yet such courts must consist of judges appointed in the manner the Constitution requires, and holding their offices by no other tenure than that of their good behaviour, by which terms the office of Secretary at War is not held. And we beg leave to add, with all due deference, that no decision of any court of the United Staes can, under any circumstances, in our opinion, agreeable to the Constitution, be liable to a reversion, or even suspension, by the Legislature itself, in whom no judicial power of any kind appears to be vested, but the important one relative to impeachments."

The above opinions are entitled to great consideration, and are applicable to the exercise of Street powers by the Supreme Court of this State.

The Constitution of the United States does not in express words prohibit the judges of the Courts of the United States from holding any other office, or trust—*not so with the Constitution of the State of New York.* The constitution of this State expressly declares, that:

"*Neither the Chancellor, nor Justices of the Supreme Court nor any Circuit Judge, shall hold any other office or public trust,*—Art. 5, §7, Con. 1823. The Constitution of 1777 declares:

"*That the Chancellor and Judges of the Supreme Court shall not, at the same time, hold any other office, except that of delegate to the general Congress upon special occasions,* Sec. 25 con. of 1777.

From the year 1691 to the year 1823, the Supreme Court of this State was composed of five members—the Chief Justice and any two of the judges could hold a court. By the present Constitution, the Supreme Court is now limited to three members, any *one* of which, may hold a court. This change is a bad one, and it would be better that it should be placed back again to the old order of things.

We next give the opinion of the Supreme Court of this State as to one commissioner acting without the others.

Curia, per SAVAGE, Ch. J. Two questions are raised for the consideration of the Court.

"1. Were the defendants entitled to give in evidence, that the *Locus in quo* was an highway under the plea of the general issue?

"2. If so, were the proceedings of the commissioners regular, they having never, all of them, had a previous meeting, deliberation and decision on the subject?

In trespass on land, the plea of not guilty puts in issue the facts necessary to constitute the trespass; and under it the defendant may shew title or possession in himself, or those under whom he claims. But when the act appears to be, *prima facie*, a trespass, any matter of justification, by virtue of any authority, or any easement must be pleaded, or notice given of it. (Co. *Litt.* 283. *a.* 1 *Ch. Pl.* 492. 2 *Saund.* 402 *n.* 11 *John.* 132, 7 *Mass. Rep.* 387.

The Justice was right in deciding that poseession of the premises might be shewn to be out of the plaintiff; but he erred in admitting testimony to prove an highway.—An highway is a mere *easement.* The public acquire a right of way; but the proprietor retains all his rights not incompatible with public right, and may maintain trespass for cutting timber, &c. (15 *John.* 452-3, and 491. 1. *Con.* Rep. 103.

On the second point, there is no doubt the proceedings of the commissioners were irregular. They must all be present, but a majority may decide. 1st. Cowen's Rep. 238.

We now take up the proceedings in reference to 29th street, as stated in page 284, *and also 37th street, on page* 282.

One of the Commissioners in this very proceeding, was a witness before the Hon. the Senate Committee, appointed to investigate assessment above in 1841, and the following extracts are made from his testimony:

From Senate Document No. 100, *of* 1842, *page* 113.

"John Leonard, re-called on the part of the memorialists, says: he was one of the Commissioners for opening 29th street, his assoeiates were Covell Purdy and George A. Baker; they completed the assessment within a (*the*) year past; Mr. Purdy and witness made the estimate and assessment; Mr. Baker attended a very few times; in the estimate of the expenses, Mr. Baker was allowed the same amount for services as the wit ness, and Mr. Purdy, and that amount assessed on the property; witness delivered the Report to Mr. Emmett, the Counsel; don't know whether the statement of the expenses accompanied the Report, when the same was deposited for examination in the County Clerk's office; don't know what Mr. Emmett done after said Report was delivered to him."

Again, in page 114, *the witness says:*

"The Commissioners allowed Mr. Baker the same compensation for attendance, although he was there but five or six times, as was allowed to witness, who attended all the time; the witness done all he could to arrest these erroneous charges for services not rendered, by stating the fact to the Corporation Counsel, after they had completed their assessment, and after the fees of Mr. Baker were included in the amount; Mr. Emmett, the Counsel, told witness that the Commissioners must swear to their attendance, and witness and Mr. Purdy made affidavit to their full attendance, and left Mr. Baker to take care of himself; witness made no complaint to the counsel about Mr. Baker's not attending, but merely stated the fact, and nothing probably would have been said about it, but that Mr. Emmett, the Counsel, said something about a new arrangement; witness thinks as to the oath required of the Commissioners as to their attendance, and then witness stated to him the fact of their not attending, (page 115,); witness does not know whether the costs in case of opening 29th street, have been taxed, in which witness was a Commissioner of estimate and assessment."

We have here to remark, that frequently, before the month of May, 1840, Mr. Leonard, the witness, complained to us about fees being allowed for services not rendered. One or two of these conversations, were in the office of the Street Commissioner, and prior to the motion being made for the confirmation of 29th street, Mr. Leonard stated to us, that fees were included in that assessment for services not rendered, he also made the same statements as to the second avenue assessment, which he afterwards testified to before the Senate Committee. This statement is due to Mr. Leonard.

John Ewing, Esq., *the Street Commissioner, in his testimony, Senate Doc. No*, 100, *page* 44, *says:*

"The witness does not know whether any bill for taxation in the matter of the 2*d avenue*, was filed; it might be filed in his office without his knowing it; *there are three or four rooms in his office.*"

The law as to requiring the filing a bill, &c., in the Street Commissioner's office, contains these words:

"And a copy of the bill of costs, containing items and particular services performed, *shall* be deposited in the office of the Street Commissioner, at the time of the first publication of such notice."

It is evident to our mind, that if the Commissioners of estimate and assessment, were

to place their bill of costs, &c., in the Street Commissioner's office, in one of the "*three or four rooms*," under the chair cushion of the seat of the autocratic head, that it would not be a filing of the bill in the meaning of the law. Filing is a public act, and could not be very well done in an office of a public officer, by putting the paper in some corner where the head of the office would not be likely to see it.

Mr. Justice Bronson, in his opinion in the matter of 37th street, delivered two years and a half subsequent to that in relation to 29th street, insist on the taxation of the costs before conformation; in the case of 37th street, the affidavit of *non*-taxation was made by a disinterested witness, and filed with the Commissioner of estimates, &c., as an objection to the legality of their proceedings.

We cannot see the distinction which the learned Judge discovers in these two cases, that constitute the great difference which he makes.

The Statute is plain as to the requirement, that the objections shall be *in writing*, the objectors in the matter of 29th street, done more, they verified these by their affidavits. Surely, it seems to us very clear that the Court could not consistently insist on that, which the Statutes do not require. *The objections were in conformity with the notice of the Commissioners.* Judge Bronson holds, that Statutes should be construed strictly. The Chancellor might, with as much propriety, say; that a bill filed in his Court, should not be entertained, for the reason that it was sworn to by the complainant, instead of those who had no interest in the matter.

Mr. Justice Bronson, in his opinion in the matter of opening 37th street, which we have here stated in full, says, that the omission to call the ayes and noes, and publish the same, and the omission to publish the resolutions and Report of Committees, which are preliminary proceedings in these assessments, "is a plain violation of the amended Charter." The Supreme Court have been long and continually pressed upon the point, and this is the first indication of an opinion on that question.

Shortly after the Hon. Robert H. Morris came into office, as Mayor of the City of New-York, proceedings involving assessments, were sent to him by the Common Council, for his approval.

That intelligent and independent public officer, at once endorsed the opinion of the Assistant Vice Chancellor, in this matter, and refused his assent to the proceedings, and returned to the Board of Aldermen the whole bundles together, and members of that Board, who had held seats in that body for years, and continually violated this law, voted the Mayor was right, and the Common Council and the Mayor's predecessors wrong, in this.

The aye and noe question was raised in 1839, and the objection was laughed at, as was testified to by the Assistant Clerk of the Board of Aldermen, before the Senate Committee. *See Senate Document No.* 100, *of* 1842, *page* 37.

The course Mayor Morris took in this matter, gained for him among our intelligent citizens, great approbation, and it has been verified by an increase of their votes cast for him at two successive re-elections, eacn marked by a continued increased majority.

VETO OF MAYOR MORRIS.

Document No. 9—Board of Aldermen, June 14, 1841.—The following Message was received from his Honor the Mayor, and ordered on file—Samuel J. Willis, Clerk.

Mayor's Office,
New-York, June 14, 1841.

To the Board of Aldermen of the City of New-York.

Gentlemen—I return to your body the accompanying reports and resolutions and ordinances, viz: Report of the Street Committee in favor of flagging, &c., in Seventeenth street, between Irving place and Union place. and resolution. Report of same committee in favor of paving Ninth street from avenue C to avenue D, and resolution. An ordinance to pave and regulate Washington street. An ordinance to build a sewer in Morris street. An ordinance for deepening Storm's basin. An ordinance to pave, &c., southerly sidewalk of Twenty-eighth street, between the Third and Fourth avenues. An ordinance for a well and pump in Twenty-third street.

These were originated in your Board; they have been concurred in by the Board of Assistant Aldermen; and by that body sent to me for my approbation. These direct improvements, involving an expenditure of public moneys, or requiring assessments upon citizens, and have been passed without calling or taking the ayes and noes in either brance of the Municipal Legislature. For this omission, I am constrained to withhold my approbation of them, although there is no objection to the improvements contemplated.

The seventh section of the amended Charter of the City of New-York, requires that, "all resolutions and reports of committees, which shall reccommend any specific improvement involving the appropriation of public moneys, or taxing or assessing the citizens of the said city, shall be published immediately after the adjournment of the Board, under the authority of the Common Council, in all the newspapers employed by the Corporation; *and whenever a vote is taken in relation thereto, the ayes and noes shall be called and published in the same manner.*"

Although some of the legal tribunals of the State, have decided that the omission to take the ayes and noes, upon the passage of such reports and resolutions, and ordinances, does not make them void, while others have maintained a contrary doctrine, still the directions contained in the section of the Charter referred to, are obligatory upon the Common Council, and under no circumstances should they be disregarded.

These provisions were intended to protect the interests of the citizens, by ensuring deliberation and integrity in their representatives, upon subjects involving either taxation, assessment, or an appropriation of public moneys. The authors of the section referred to, wisely determined that the most effeetual method to ensure deliberation and honest action on the part of the agent, was to compel him to record and publish his vote; thereby giving to the constituent, knowledge of the agent's acts, and exposing each agent to the animadversion of his constituents, when he voted incorrectly.

These provisions of the Charter, if strictly enforced, cannot but prove beneficial to the citizen. It cannot be denied that there are individuals, who may be elevated to office, so singularly constituted as to be influenced in their conduct, more by the fear of public censure than by an internal conviction of right, who will vote improperly, and even corruptly, if they can do so without detection and exposure.

To protect the public against the acts of such persons, and to inform the constituents of such acts of the representative, the seventh section of the amended Charter was framed. I conceive it to be the duty of all of us, strictly to enforce observance of every requirement of the City Charter, that uniformly correct precedents may be established; and we may avoid all measures which we have not a clear right to effectuate. That community is most scrupulous in its obedience to the laws, whose officers and legislators are strict in their observance of constitutional and legal requirements. Example from those in authority, is more important than their adjudications or their precepts. We therefore should not only enfore, but obey the law. The City Charter is a Constitution, which we as agents of the people, are bound to obey strictly, not only in its letter, but in its spirit.

Robt. H. Morris.

The omission to comply with this provision of the Statute, in these proceedings, has been made a subject of enquiry and reference, to the Law Committee of the Board of Assistant Aldermen, and that Committee here made a Report, which is from the pen of William Dodge, Esq., a member of that Committee, as follows:

The Committee on Laws, to whom was referred a draft of a rule proposed by Assistant Alderman W. Dodge, for the government of this Board, in these words:

"All resolutions and reports of Committees, which shall reccommend any specific improvement involving the appropriation of public monies, or taxing or assessing the citizens of this city, shall be published immediately after the adjournment of the Board, under the authority of the Common Council, in all the newspapers employed by the Corporation; and whenever a vote is taken in relation thereto, the ayes and noes shall be called and published in like manner,"

RESPECTFULLY REPORT,

That they have considered the proposed rule, with reference to the various vexed and important questions, which have arisen, by reason of the neglect of the provision of the

amended Charter on which the rule is based, and with a due regard to the obligation they have assumed "to support the Constitution of the State of New York, and faithfully to discharge the duties of the office of Assistant Aldermen, according to the best of their ability."

The citizens of this city having suffered for a number of years, from abuses which crept into the City Government, sought, in the year 1829, to remedy these evils, by calling a Convention to amend the Charter.

A Convention was accordingly formed, whose members, sixty-five in number, were elected, five from each Ward, by ballot.

On the 23d day of July, 1829, the Convention had under consideration the section of the amended Charter which has been referred to; the section originally was proposed by John Duer, Esq., and after some additions and amendments, was adopted in the form in which we now find it in our Statute Book.

It was supposed by the Convention and by the Legislature which ratified the amended Charter, that the adoption of this section would effectually prevent a multitude of abuses, which, during a series of years had been introduced and carried out with impunity, because the actions of the representatives of the people in the Common Council, were unknown beyond the Council Chamber.

That this was the opinion formed cannot be questioned, for at the close of their labors, the Convention, proud as it would seem, of the work they had performed, in their address to the people, thus allude to the subject, and eulogize what was deemed by them one of the most important advantages of the new instrument.

"Another guard to the City Treasury is provided, by recommending that all bills or resolutions, involving the appropriation of public moneys or imposing assessments, *shall be* immediately published in the newspapers; and whenever a vote shall be taken thereon, the ayes and noes *shall be* called, and the names of the members, with their votes, *shall be* published."

"This, it is trusted, will secure at once *publicity and notice* to all concerned, and the strong influence of *personal responsibility* on the vote of every individual member. All propositions involving assessments or burdens upon individuals, will be brought to the knowledge of those interested, so as to give them a chance of being heard. Careful and deliberate legislation, strict accountability, judicious economy and perfect publicity—these are the remedies which the Convention have sought, against the evils and abuses to which all wealthy City Governments are subject, of which this city has felt its share, and of which the public voice has, at different times, loudly complained."

These hopes were justly entertained by our representatives in the Convention, but they have never been fulfilled, the evils and abuses for which they fondly believed they had found a remedy, under the actions of the Common Councils since 1830, may have existed, they could have existed from the day the amended Charter became a law, up to the present moment.

These safeguards have been and are now neglected, and matters more important to many of us than the proceedings of our Legislature or of Congress, are hid from view, and transacted as if none were concerned, save the immediate actors.

That provision of the Charter framed to "secure at once publicity and notice to all concerned, and the strong influence of personal responsibility on the vote of every individual member;" that provision for the enactment of which that Convention was mainly assembled—that provision which they deem the very key-stone of the fabric, has been suffered to stand unnoticed, and treated as though it was not made to bind the Aldermen and Assistant Aldermen of the City of New York.

A disregard of this provision, has seriously affected the interests of our city. and her citizens—our citizens are taxed—their real estate, supposed to be unincumbered, is found covered by Corporation liens, year by year their substance is impaired by weighty taxes, and steadily year by year do these taxes increase, and the only notice they have of the proceedings of our City Government, is the demand of payment made by the Collector of Taxes.

The Committee cannot imagine any substantial reasons in favor of the neglect of what appears to be the positive duty of the Common Council.

It is true that several suits are now pending in our Courts and undetermined, in which the effect of this omission will be considered, and we are told that these may be successfully combatted by the Corporation, on the ground that the words of the law are directory not mandatory.

The Committee understand the distinction between words directory and words mandatory, to be this:—Words directory may be neglected, or substantially complied with without affecting the validity of a proceeding under a Statute—words mandatory require a literal compliance with them.

After an act has been performed, and it is found that some irregularity or omission has intervened, a resort may perhaps be rightly had to such a construction as will sustain a proceeding where no injustice has taken place, but the Committee cannot concede the position that an officer sworn to support the law, has the right deliberately to determine that the imperative word "shall," in a Statute, can be read to mean "may," and then act in a manner calculated to sustain the latter meaning.

Let any member of this body carefully read this portion of the Charter, and let him determine with himself, if he has any warrant, if it comports with his solemn oath, to neglect the law and to read the words "shall be published" as though they stood "may publish." No Convention would have been required to grant leave to publish—their intention must have been to compel it.

The expediency of obedience to the law, seems a question requiring no argument—the Committee can only consider that expedient which is right—to debate whether what is wrong should be done, because it may seem to promise the greatest ultimate advantage, would, it is supposed, be insulting to this Body.

As to the suits now pending, the Committee believe, that the rights and liabilities of the respective parties, are fixed and unalterable, and that no action, such as the Committee would propose, can impair any defence which the city or those who represent her, now have. nor strengthen the claims of those who assert that injustice has been done.

It may be urged that the publication demanded by the Charter, would impose an additional expense on the city—this argument partakes of the doctrine of expediency; let us, however, make the trial—the salutary effects of a compliance with the Charter, may save us thousands, while the remedy may cost a few hundreds.

Had this section of our Charter received due consideration, who can tell how many acts of imprudent legislation would have been nipped in the bud; who can tell what additional checks would have been imposed on our Executive Committees.

The reasonings, the arguments and the recommendations of Committees, would have been better digested, and if false in argument, or inexpedient in reccommendation, the public would have been able to interpose their influence; members would have been careful of expenditures, when the ayes and noes brought them face to face with the people, and it may not be asserting too much to say, that our city, which now groans under a mountain of taxes and assessments, might have rejoiced in a comparative freedom from pecuniary liability.

Urged by these considerations, the Committee feel it to be their duty not to allow this Statute longer to remain dormant, they commend it to the attention of every member of this Board, and they trust that, after due deliberation, each one will act, keeping in view his official oath, the sanctity of the law, and the interests of the whole people.

The Committee have prepared a draft of an Ordinance, which is herewith presented; they do not believe it to be perfect, and they submit it to the consideration of this Board, trusting that the co-operation of their fellow-members, and their longer experience, will bring it into a shape best adapted for practical operation.

THOMAS S. HENRY,
WILLIAM DODGE,
CHARLES A. DOUGHERTY.

New-York, August 2d, 1843.

The Report was adopted by a large vote, and sent to the Board of Aldermen for concurrence, *there it will* SLEEP, like other measures that restrain the profligacy of a Corporation, that is, in the exercise of this power, a USURPER.

The learned Judge dwells with much emphasis, on the objection made in the matter

of 37th street, as to the application for the appointment of Commissioners, being unauthorised by the Common Council. We know that the petitions, for the appointment of Commissioners, were signed by the Mayor and Clerk of the Common Council, but we presume that those gentlemen were not, either of them, aware that the report of the Street Committee, contemplated only one set of three Commissioners, instead of 27 sets of 81 Commissioners, and the Committee state the reasons to be, that "nineteen twentieths of the expense" may thereby be saved. Mr. Valentine, deputy Clerk of the Board of Aldermen, and the officer who has almost entire charge of the office of the Clerk of the Common Council, says, in his testimony before the Senate Committee, page 112 of Senate Doc. No. 100, of 1842, that:

"Witness thinks there is no record in the office of the Clerk of the Common Council, of applications to the Supreme Court, for the appointment of Commissioners, in the matter of opening streets and avenues, he has no knowledge of any such record."

This matter was brought before the Senate Committee, and in their report, they say:

"The manner in which the opening of those streets was effected, has been the subject matter of complaint to this Committee. Assistant Alderman Townsend, who introduced the report in favor of opening all the streets up to and including 42d street, testified that it was his intention to have all of them opened in one proceeding, and thus save to the citizens an enormous expense; and for that reason this report *did not* conclude with the ordinary direction in such cases, that the Counsel of the Corporation should take the necessary legal measures to carry the same into effect. But through some misapprehension, the ordinary proceedings were taken for opening each street separately by itself, instead of one set for the whole series, and by that means the expense to be paid by the owners of real estate upon the same, was increased at least ninety-five thousand dollars."

We could have added, that many of the owners of real estate, from the incompetency of the persons appointed Commissioners, or some other cause, were assessed upon their lands, beyond the value of the entire fee.

Anson G. Phelps, Esq., states in his memorial to the Legislature, *see Senate Doc. No.* 100, *page* 306, that he is the owner of a piece of land on the 1st avenue, between 39th and 40th streets, containing in all about one fifth of an acre.

The Commissioners for opening the 1st avenue, from 28th to 42d streets, assessed this land for benefit, three hundred and twelve dollars; and besides, they took 2800 square feet for the avenue, for which they made no award whatever. The Commissioners for making the assessment for 40th street, assessed this same piece of ground for benefit, five hundred and seventy-five dollars; and the Commissioners for opening 39th street, assessed the same land over, for benefit, eighteen dollars and seventy-five cents. Here are three assessments upon one and the same piece of land, in this district, which, by the report of the Street Committee, was to be opened only by one commission, in which case, the assessment on this piece of land, would not have exceeded, at the utmost, *five dollars*, but by this extraordinary proceeding of appointing 81 Commissioners instead of three, is assessed the enormous sum of $905.75, and moreover the land itself is not worth the interest of the assessments, and yet the Court are led into the belief that Commissioners of estimate and assessment, in New-York, are selected with care. Such assessments as these, are so conclusive on this point, that the Commissioners, (some of them,) were so utterly incompetent, that we will not consume the time of the reader, to discuss the danger of such proceedings.

Another.—The case of Messrs. Schuyler, owner of a lot at the corner of 28th street, on the 7th avenue. This piece of ground is 58 feet 16 inches, by 96 feet 10 inches, was assessed for benefit for the opening of 28th street, the sum of $1,039.05, and the same piece of land was again assessed, for the opening of the 7th avenue, the sum of $209,98, making, together, the sum of $1,249.03. This assessment, with the interest, exceeds the value of the land, more than $500. *See Senate Doc. No.* 100 *page*

And yet Another.—A piece of land, belonging to the estate of John Duffie, deceased, was assessed for the opening of 38th street, the sum of $1,287.80, and the same piece of ground was again assessed for opening the 2d avenue, $117.50, making, together, the large sum of $1,407.30, which, with the interest added, now exceed $2,000.

Thomas R. Ludlum, a City Surveyor, in his testimony before the Senate Committee, *see Doc. No.* 100, *page* 151, says:

"Witness thinks the lots of John Duffy, on 38th and 39th streets, in the rear of the Norsworthy estate, before spoken of, are not worth more than $50 per lot; he thinks the whole piece of ground is not worth more than $450, because it is a low, sunken piece of ground, and will require deep filling to bring it to the grade."

These three pieces of ground are all in this district, which was only to be opened by *one sett of Commissioners*, and had that been the case, the assessments on the three pieces of ground named, would not have been, in amount, equal to three months interest on the several sums now so odiously assessed.

Where is that doctrine of the Courts, that there is no wrong without a remedy?

Is the land of boasted freedom, a land that boasts of her Constitution, and her laws! alas!!!

Assistant Alderman Townsend, *in his testimony before the Senate Committee*, see Senate Doc. No. 100, page 96, states:

"Witness asked how the Court charges were so high, and Mr. Smith replied, the Counsel represented that he had to attend at Albany, and sometimes farther west, and the Court charges were sometimes very high. On examining the amount of Court charges, the Street Committee could not feel themselves authorised to report, authorising Mr. Emmet to make application for opening those streets, but that it should all be done at one time, by the Common Council, or by some person whom they should authorise for that purpose. The finishing clause to a report "that the Corporation Counsel be authorised to take the necessary measures to carry the same into effect," *was omitted purposely to save expense.* The testimony of Assistant Alderman Townsend, is stated in full, on page 216 of this volume, and the reports of the Street Committee, on page 219 of this volume.

We have had frequent conversations with Ex-Senator Mynbert Van Schaick, who was also a member of the Street Committee, which made this report, and he fully agrees with Alderman Townsend, in this matter, and is ready to come before a Committee from the Legislature, and state the proceedings.

Mr. Perrine, *in his testimony before the Senate Committee, on page* 80 *of their report*, states:

"There is a book permanently kept in the Street Commissioner's office, and witness recognises the book upon its being shown to him, which contains a list of the names of the persons for Commissioners of estimate and assessments, in opening streets, &c. They are placed in that list in the following manner. Pretty soon after the annual election, *the Aldermen call and enquire for that book*, and each Alderman inserts three names for Commissioners for the ensuing year. This list is made out each year in the same book; it is in columns; first the Ward, second the Aldermen and Assistant Aldermen, third the Commissioners."*

The Senate Committee, in their report, page 12, *in reference to Commissioners of estimate*, &c., say:

"This loose practice has grown up in modern times, for the more guarded one of an application to the Supreme Legislative authority, was in existence in that city, subsequent to 1792, when, to authorise the first widening of John street, an application was made to the Legislature, then in session in that City, and before either house could act upon the petition, they sent a Committee to examine the ground; and upon the report of which Committee, they enacted that the damages to the owners, whose lands were taken, should be appraised by a Jury, who should be composed of merchants, showing how careful they were in former legislation, on this important subject. This appointment is now made by three Commissioners, appointed by the Supreme Court, who are generally nominated at the instance of the Counsel of the Corporation, although there have been instances where one of the Commissioners has been selected by the Court, from names proposed by the Corporation Counsel, and by the opponents to the appli-

* A small book, containing about a quire of paper.

cation, and another has been named by these opponents."

The application for the appoint of Commissioner, so far as we have any knowledge of the Records, has been *exparte*. In case of reports being sent back, the opponents have objected, and we think it is to such case the Senate Committee refer, in the individual exception which they notice.

The words of the Statute are these:

"It shall be lawful for the said Mayor, Aldermen and Commonalty, to make application, or to cause application to be made, to the Supreme Court of Judicature, of this State, for the appointment of Commissioners; and it shall be lawful for said Court, to whom such application shall be made, on any such application, to nominate and appoint three discreet and disinterested persons," &c.

The Constitution, *we say, prohibits the Supreme Court of Judicature, from exercising this power—we have, herein before, quoted the Constitution, on this head.*

It is very evident, that the Justices of the Supreme Court, have been misled as to the qualifications of Commissioners of estimate and assessment, in New-York, generally, for in the 19th vol. of Wendell's Reports, we find in two street cases, in the opinion of the Court, the following:

"So many considerations of time, locality and other circumstances, enter into the estimate, that the only means of finally settling the question is, an appraisal. *That is committed by Statute, to Commissioners carefully selected by this Court,*" 19 Wendell's Reports, page 652.

"Courts seldom set aside the verdict of a Jury, on the sole ground that they may think it against the weight of evidence. And yet there is much less difficulty in such a review, than there is in the one under consideration."

"They are selected not only with reference to their integrity and general capacity for business, but on account of the knowledge which they are supposed to possess, concerning the particular duty which they are appointed to discharge."

"How then, is it possible, that we can disturb the report upon the mere questions of value, on the single ground that five, ten or even twenty reputable men, have sworn to opinions at variance with the judgment of the Commissioners." *Page* 694, 19 *Wendell.*

As a confirmation of the opinion we have above expressed, we introduce two Reports, which go to sustain us, and these Reports the Street Commissioner, in his report on the memorial of Mrs. Amory, page 276, of this number, says: "*The undersigned had the honor of writing these Reports for the Committees on Assessments.*"

—

"BOARD OF ALDERMEN."

The Committee on assessments to whom were referred the annexed petition of JOHN R. STUYVESANT of Dutchess county, *respectfully report:*

"That all the facts set forth in the Petition are verified by the Deposition of the Petitioner annexed, and the examination given the subject by the committee

"The facts are fully set forth in said Petition and deposition and papers herewith and to which the committee refer the material evils of which are as follows: The petitioner is the owner of an irregular piece of ground now fronting on the 11th street being in front on said street 38 feet 8 inches and about 98 feet 10 in. deep, extending back in a triangular shape coming to nearly a point, a little beyond half its depth, where it again widens, and connects with two small lots belonging to him which formerly fronted on Stuyvesant street, but which now have no front; Stuyvesant street having been closed by the opening of 11th street. In 1839, 11th st. was opened from the second avenue to the Dry Dock, the whole amount of the awards for opening said street amounted to $2600, the expenses $1193 97, making the aggregate sum of $3793 09, that the above mentioned property of the petitioner fronting on 11th street together with the adjoining lots as above stated and known on the map of said opening as lot No. 4, is assessed for the benefit $1072, being a little short one third the entire amount of said assessment for said improvement the lots in the immediate vicinity and adjoining the property of the petitioner and fronting on said street was assessed as appears from an examination of the assessment about $18 for every 25 feet in front and running back the usual depth, and so in that proportion 49 lots in all were assessed to make up the sum of the awards. They were assessed including the amount on the lot of the petitioner $3801. One of the Commissioners, Mr. Andrew Warner, was noticed to appear before the Committee but he did not attend. The other, Mr. Abraham Lessy was sick, or understood so to be and was not notified. To the petition there is a certificate signed and drawn up by Mr. Warner, dated 1st July 1840, stating that the facts set forth in said petition in regard to the assessment made are true, and that there is an obvious mistake made by the Commissioners stating the assessment on the property of Petitioner at $1072, and that they intended it to have been $10 72, and that the mistake arose from carrying out all the figures in the line of dollars instead of dollars and cents. Your committee state that in this manifold conclusion they arrived on the examination of the subject. The Street Commissioners felt so convinced of this being the fact when the circumstances were brought to his knowledge, he withdrew this property from the sale of property for assessments and for which it had been advertised, at the late sale of property. The petitioner at the time of the assessment and ever since has resided in Dutchess County, and had no knowledge of the assessment or of the great injustice done him until after confirmation of it, consequently had no opportunity to rectify the error, or remedy the evil. Although the Commissioners on street openings are not chosen or selected by the Common Council, or under their direction or control yet, your Committee think that an individual should not suffer so severely from their carelessness or wilful error, as the petitioner would if not relieved. The duties of the Commissioners in this case could not have been intricate or arduos and they were most amply compensated, the amount of their fees being $561. Sufficient certainly to claim attention enough to see that figures were set in their proper "line."

This being a very flagrant case the Committee are of opinion that the assessment should be rectified, That the public should sustain the loss, if it cannot be collected from those who caused it, and for that purpose offer for adoption the following resolutions:

"Resolved, That the sum of $10 72-100 be substituted for $1072, as the assessment on the property of John R. Stuyvesant for opening of 11th street, and known on a map of said opening as No 4, the said sum of $10 72-100 with the interest and costs of advertising, if any, be received in full of said assessment on said lot for said improvement instead of $1072.

"Resolved, That the Comptroller with the advice of the Counsel of the Corporation take such measures, as may be advisable for the collecting from the Commissioners in the matters of opening Eleventh street from the second avenue to the Dry Dock, such amount as may be paid out of the city treasury by reason of the error made by them in making the assessment to pay the awards and expenses for said opening.

Respectfully submitted,
EGBERT BENSON, } Com.
DAVID GRAHAM, Jr., } on

Approved by the acting Mayor, Feb. 4th 1841.

—

"BOARD OF ASSISTANTS."

The Committee on assessments to whom was referred the annexed petition of BENJAMIN TOWNSEND to be relieved from the payment of his assessment upon the Seventh avenue, Respectfully Report,

"That Mr. Townsend has been assessed in the opening of 7th avenue the sum of Two Hundred and Thirteen Dollars sixty-one cents for benefits on land situate on the easterly side of said avenue, from about the middle of the block between 48th and 49th street, to 50th street, extending back from the avenue two hundred feet, and including two lots on the northerly side of 50th street. Mr. Townsend furnished one half of the ground in the avenue in front of his property. The proprietor of the ground in the westerly side of the avenue directly opposite to the land of Mr. Townsend, and situate like his in all respects, but furnishing rather less ground for the avenue, have been awarded for damages for such land taken, over and above

the benefits derived, the sum of two hundred and ninety three dollars and nine cents and the ground in rear of this land on the block between 49th and 50th street, extending to half the distance to the eighth avenue, has been assessed two hundred and thirty dollars sixteen cents, while the land in the rear of Mr. Townsends ground, on the corresponding block extending to half the distance to the 6th avenue and comprising more ground, has been assessed but the sum of nine dollars and thirty five cents, plainly showing that there must have been a mistake on the part of the Commissioners in making up their assessments; in confirmation of which the Committee have found on examination that other estates situate on the avenue like Mr. Townsends, have been awarded for dumages instead of being assessed for benefits; and in the nature of things it must be so. By law the expense of opening an avenue is to be assessed upon the adjoining ground, extending half way to the nearest avenue on each side. The ground taken for which the assessment was laid belonged to Mr. Townsend who would be entitled to an award of damages over and above his benefits, the same as the owners of property on the other side. and the amount of the damage thus awarded to him would be placed upon those owning in his rear who have only been nominally assessed. Your Committee have no doubt but that it was the intention of the Commissioners to have awarded Mr. Townsend but by mistake in making up their assessment have assessed upon him the sum they intended to award. Mr. Townsend has conversed with Mr Harris the Chairman of the Commissioners who informed him that he was awarded at the same rate as the adjoining land and if it was not so there must have been a mistake. Your committee have endeavored to obtain the notes of the Commissioners but have learned on enquiry that they were consumed by a fire in Fulton street where Mr. Harris kept his office. The petitioner does not ask for any award, although he believes himself to be fully entitled to one, but only asks to be relieved from an assessment for the taking of his own land for the opening of the 7th avenue equal to about six lots of land, of which he has been divested without compensation.

Your Committee on a former occasion adverted to the principle which guided them in their recommendations on these subjects, it is only in a case of the most palpable error in which they can recommend any relief. Believing this case to be one of that description, and one of extreme hardship. They recommend that relief be granted to the petitioner, in part by absolving him from the payment of his assessments in the matter of which he has made complaint. They offer for adoption the following resolution,

Resolved, That Benjamin Townsend be relieved from the payment of the assessment of two hundred and thirteen dollars sixty-one cents on lots 352, 359, and 380 in the matter of the opening of the 7th avenue and that the same be charged to deficiency in the said assessment.

JOHN A. UNDERWOOD, } Com. on
ALFRED ASHFIELD. } assess.

The Committee on Assessments to whom were referred the the annexed papers from the board of Assistants in favor of relieving Benjamin Townsend, respectfully report,

That they have considered the subject therein contained and that they concur with the Committee of the Board of Assistants in their report on this subject and recommend a concurrence in the resolution adopted by that board.

EGBERT BENSON, } Com. on
RICHARD S. WILLIAMS, } assess.

Adopted by the Board of Assistants, March 14th, 1842.

Concurred in by the Board of Aldermen, May 2d 1842.

Approved by the Mayor, May 10th, 1842.

—

The Counsel of the Corporation to whom was referred the annexed Petition of Martha Amory for relief from assessments, *and the report of the Street Commissioner thereon*, Reports,

That the Petitioner complains of assessments that have been imposed upon the property of James Amory, her late husband, for the opening of the Sixth and Seventh Avenues and Manhattan Square. The grounds of these complaints are set forth at length in the Petition and in the Report of the Street Commissioner hereto annexed. They arise from the very high valuation of the lands taken for the improvements, the same being estimated, at that time, at the prices of City lots; from alledged exorbitant charges for the expenses of the proceedings and from supposed errors on the part of the Commissioners in imposing assessments upon the said James Amory for land required for the improvement in front of the land assessed and which is stated to have, in fact belonged to the said James Amory.

The question submitted to my consideration, is, whether the corporotion is liable to the party assessed for the supposed error on the part of the Commissioners in making up their assessments, or whether they may rightfully relieve the party from the payment of a supposed erroneous assessment.

Assessments for Street improvements are imposed by Commissioners, appointed by the Judges of the Supreme Court, under a law of the State. The Commissioners, after they have completed their assessment, give public notice that they will present their report for confirmation to the Supreme Court, at a specified day. On such day their report is presented and considered, all objections are heard and decided on by the Supreme Court. The decision of the Supreme Court is final and conclusive, and like a judgment, so that the assessment becomes a lien upon the land assessed, and the party assessed may be sued for it, or his goods may be distrained. On the other hand, by such confirmation, the Corporation becomes liable to pay the award, and may be sued for the same. The assessments are made for the purpose of meeting the payment of the awards and of the expenses, and should balance each other.

The corporation is not answerable for any supposed errors, on the part of the Commissioners. The Commissioners are public agents, acting under public authority, and in relation to the business of the public. Their errors, if any, are subject to correction, by the parties themselves, by a regular legal proceeding. And if the parties in interest forego such remedy, and allow a judgment to go against them, however erroneous, they cannot, upon any *legal* principle, make the Corporation of the City liable for their loss. Nor is there any *equitable* claim to relief from the City Treasury. The corporation have done the parties no wrong. There may have been errors of judgment on the part of the Commissioners; but the proceeding has been regular and according to the due course of law. If the Common Council should now yield to the the application of the Petitioner, and relieve her from the payment of the assessments complained of; who will make up the deficiency to meet the awards, which must be paid? If those who are chargeable with these assessments, had, in due time, pointed out the errors now complained of, and their complaints had been found to be just, the errors conld have been rectified by the proper tribunals, and the awards and assessments might have been equalized, so as to have left no deficiency in the Treasury.—And because the party is now too late to remedy, in a proper legal way, the errors of which she complains, shall an appeal be successfully made to the public treasury, on the award principle, which has sometimes obtained. That "it is better that the whole community should suffer a loss, than that a single individual should be left to bear it alone?"

The undersigned does not so construe the charter of the City, nor the delegated powers of the Common Council. They do not admit the principle of remedying one wrong to the Citizens by doing another wrong to the public.

With regard to the award of $392 05 supposed in the documents annexed to have been wrongfully received by the Corporation, the undersigned is of opinion that no error has been committed by the Commissioners. This award was made to the corporation because they were supposed to be the owner of a gore of land in front of lot No. 181 of the common lands, and which gore was required for the opening of the Seventh Avenue. By a reference to the conveyance of lot 181 to James Amory, it will appear that such lot was not bounded upon the Seventh Avenue, nor any intimation in the conveyance given of an intended grant of the land covered by the Seventh Avenue, which was not then opened; but on the contrary, *all the land over which the streets and avenues as laid out, might run, pass, or extend, was expressly excepted from the grant, and especially reserved to the Cor-*

poration. The Commissioners were therefore, right in making such award to the Corporation.

The undersigned is therefore of opinion that as the Common Council are not bound, and have no legal right to remedy any of the supposed errors of the Commissioners in opening the several streets, &c., referred to in the petition of Martha Amory, **the Petitioner should have leave to withdraw her Petition.**

Respectfully submitted,

P. A. COWDREY.

This report was made after the previous pages had passed through the press.

—

The Report of Mr. Cowdrey, is a most singular paper for a legal gentleman to draw up.

It will be seen by referring to the memorial of Mrs. Amory, on page 277, of this number, that the prayer of her petition, is in the following words:

"Your petitioner, therefore, in consideration of the premises, and of the fact that the estate in question, has been in no manner benefited, asks the Common Council to discontinue all further proceedings to collect the said assessments, or any part of them."

"Your petitioner asks that justice and equity may be done in the premises, and she looks to the Mayor and Common Council of the City, for such immediate relief, as will relieve her anxiety, and save her from vexatious and expensive litigation and trouble."

Now Mr. Cowdrey assumes, that the memorial of Mrs. Amory, was referred to him, and he discusses its contents. On looking at the resolution, which makes a part of the Street Commissioners Report, we do not see that this memorial was referred to Mr. Cowdrey, at all; but the Street Commissioner's Report, and the resolution, which makes a part of it, was referred to the Counsel for his opinion, as two matters, viz: 1st, "*as to the liability of the Corporation for the errors in the assessments therein referred to, and 2d, and in case the Corporation should not be liable for said errors, whether or not the Common Council may legally exercise the power to relieve the petitioner, by the payment of the amount out of the City Treasury.*"

The learned Counsel, in his report, says:

"The question submitted to my consideration, is, whether the Corporation is liable to the party assessed, for any *supposed* error on the part of the Commissioners, in making up their assessment."

"The Street Commissioner admits two errors, which amount to $2,138, and calls these '*gross blunders.*'" Why then talk of supposed error, it is certainly a waste of time.

Again, the Counsel, in his report, says:

"Assessments for Street improvements, are imposed by Judges of the Supreme Court, under a law of the State."

It appears by the testimony of Mr. Perrine, before the Senate Committee, which we have quoted on page of this number, that the Commissioners are selected from a book of names, kept in the office of the Street Commissioner, and that these names are put there by the Aldermen and Assistants of the several Wards, respectively, immediately after the election. The Corporation, therefore, indirectly select these Commissioners, and their Counsel nominates them to the Supreme Court. (*See Report of Senate Committee, Doc. No.* 100, *of* 1842,) quoted on page , of this number. The Supreme Court are not, therefore, answerable for these "*gross blunders.*" It is said by the learned Justice BRONSON, in his opinion in the matter of 37th street, that "if the ordinance for opening the streets, was not duly passed, the objection should have been taken on the motion for the appointment of Commissioners." The Counsel well knows that the requirements of the seventh section of the amended Charter, as to giving notice to the persons interested, was not complied with by the Corporation, and therefore, the application for the appointment of Commissioners, *was exparte and without notice*, and for this neglect, the Corporation, or their officers, or both, are liable.

And again, the Counsel, in his report, says:

"The Commissioners, after they have completed their assessment, give public notice that they will present their report for confirmation, to the Supreme Court, at a specified day."

Now let us see how far right the learned Counsel is, in applying this to the case of the 6th avenue, in which Mrs. Amory complains of abuse, and in which the Street Commissioner admits the Commissioners committed "*gross blunders.*"

Mr. Paige, Clerk of the Supreme Court, in his testimony before the Senate Committee, *Senate Doc. No.* 100, *of* 1842, *page* 85, *says:*

"Witness produced the Report and additional Report, of the Commissioners of estimate and assessment, in the matter of opening of 6th avenue, in the city of New-York, which was filed in his office, June 6th, 1839, and appears, by endorsement, to have been confirmed on that day. There does not appear to be any evidence that said notice of presenting such report for confirmation, was published in hand-bills annexed to said Report or additional Report."

This notice was required by the Act of April 20th, 1839, and here there was another failure, on the part of the Corporation, for they were the sole movers in the matter, and they moved in the Report, in the application for the appointment of Commissioners, for the confirmation, &c., as is here shown in all cases *exparte*, and without notice to the persons interested."

And again, the Counsel, in his Report, says:

"On such day their Report is presented and considered, and objections are heard and decided on, by the Supreme Court."

If no other party has any knowledge of the presentation of the Report, but the Corporation Counsel, who moves it, and the Commissioners, who move it, how shall the party interested make objections? and if none can be made, how can the Court consider and decide?

The Counsel in such case, takes the order of confirmation at his peril, and his client must respond.

The Counsel, further remarks:

"The decision of the Supreme Court, is final and conclusive, and like a judgment, so that the assessment becomes a lien upon the land assessed, and the party assessed may be sued for it, or his goods may be distrained."

If "*the party may be sued for it,*" it so far, is but a claim, the legality of which, would be determined on the trial of such suit, and if sustained, then the decision of the Court becomes a judgement, upon which an execution may issue—and so far, the assessment is not *conclusive*—the word "conclusive" has been construed differently from what the learned Counsel would have it, on several occasions. If the officer distrains the goods of the person assessed, for such an assessment as that of the sixth avenue, complained of, he would be liable to heavy damages in an action of trespass, and as to the assessments being a lien upon the land assessed, if it should be a CLOUD upon the title, it would be the duty of a Court of Equity, to remove it, and to grant the owner a perpetual injunction, restraining the Corporation from any proceedings to collect the assessment.

Again, the Counsel, says:

"On the other hand, by such confirmation, the Corporation becomes liable to pay the awards, and may be sued for the same. The assessments are made for the purpose of meeting the payment of the awards and of the expenses, and should balance each other."

By section 12, of the Act passed April 20th, 1839, it is provided, that "no costs or charges to the said Commissioners, their Attorney, Counsel, or others, shall be paid or allowed for any services performed under this Act, or the Act hereby amended, *unless the same shall be taxed by the said Court*, &c.

The Court could not allow, nor could the Corporation pay the expences in the 6th avenue, without violating this provision of the Statute, until the same had been taxed. Therefore, so far as the expenses are concerned, the assessment has never been consummated, as the Report, if confirmed, must be confirmed as a whole, or not at all.

The Counsel further states:

"The Corporation is not unswerable for any supposed errors, on the part of the Commissioners. The Commissioners are public agents, acting under public authority and in relation to the business of the public."

If the Commissioners are public agents, the public is answerable for the acts of such agents, if other parties are sufferers by the agents acts. If these agents meddle with private property, the owners of such private property, have not only a legal, but also an equitable and valid claim for "due compensation," as provided by the Constitution, "*and in relation to the business of the public*" there are individual and private interests involved, which are invaded in the acts of the Commissioners.

Again, the Counsel, says:

"Their errors, *if any*, are subject to correction by the parties themselves, by a regular legal proceeding. And if the parties in interest forego such remedy, and allow a judgement to go against them, however erroneous, they cannot upon any legal principle, make the Corporation of the City liable for their loss."

The words "*allow a judgment to go against them,*" the Counsel should have placed alongside the words first quoted, in which he says, "*the party assessed may be sued.*"

With regard to their errors, which in this case the Street Commissioner admits, which make the words "*if any*" very much out of place, the Counsel says, "are subject to correction by the parties themselves, by a regular legal proceeding."

What legal proceedings are regular? The opinions of the Justices of the Supreme Court, in the cases cited in pages 249 to 252 inclusive, of this number, so plainly answered, that it becomes the duty of the learned Counsel, as a public officer, to have noticed them in his Report, and thus made the Board of Aldermen acquainted with the position of the question.

Again, the Counsel proceeds:

"Nor is there any equitable claim for relief from the City Treasury."

We will not trifle with our readers so much as to discuss this sentence, after having stated what is in the preceding pages of this number.

Again, he says:

"The Corporation have done the parties no wrong."

We make the same remark as is stated in reply to the next previous quotation.

Again, he remarks:

"There may have been errors of judgment, on the part of the Commissioners; but the proceeding has been regular and according to the due course of law."

The same remark as in the reply to the two preceding quotations.

With regard to the application of the petitioner, the learned Counsel proceeds to say:

"If the Common Conncil should now yield to the application of the petitioner, and relieve her from the payment of the assessment complained of; who will make up the deficiency to meet the awards which must be paid."

What awards? we answer—to Counsel, to Commissioners, to Surveyors, &c., and while upon this portion of the Report, we will quote the resolution adopted in the Report of the Assessment Committee, in the case of Stuyvesant.

"Resolved, That the Comptroller, with the advice of the Counsel of the Corporation, take such measures as may be adviseable, for the collecting from the Commissioners, in the matter of opening 11th street, from the 2d avenue to the Dry Dock, such amount as may be paid out of the City Treasury, by reason of the error made by them, &c."

We will quote another:

"Resolved, That the Counsel of the Corporation, under the direction of the Law Committee, take measures to obtain a revision of assessment, mentioned in the annexed schedule, as may be judged expedient and agreeable to law."

This last resolution was passed by both Boards, and approved by the Acting Mayor, Jan. 25th, 1841.

Both of these resolutions have been wholly disregarded—not a step taken in either—this is the way public business is managed by the City officers.

Again, the Counsel says:

"If those who are chargeable with these assessments, had, in due time, pointed out the errors now complained of, and their complaints had been found *to be just*, the errors could have been rectified by the proper tribunals, and the awards and assessments could have been equalized so as to have left no deficiency in the Treasury."

The Counsel may call to his memory the application to the Assistant Vice Chancellor in 1841, for an injunction to restrain the Corporation from collecting this very assessment, and his own opposition to that application.

That very able and independent public officer, Assistant Vice Chancellor Hoffman, to that application very properly granted an injunction against the Corporation, to Mrs. Amory, and the opinion which he gave in the case, is this:

"But I am thoroughly satisfied that a more palpable and pernicious violation of law, has never marked the course of any corporate body, than characterises the proceedings complained of."

Mrs. Amory has twice memorialized the Legislature, and repeatedly memorialized the Common Council, and the Supreme Court have been repeatedly applied to in analagous cases, in which she considered the principles involved in her case, were involved.

Again, the Counsel says:

"And because the party is now too late to remedy, in a proper legal way, the errors of which she complains shall an appeal be successfully made to the public treasury on the *award* principle which has sometimes obtained that it is better that the whole commnunity should suffer a loss than that a single individual shoule be left to bear it alone."

The position which is here taken for a "*free city of itself*" to plead statute limitations to the claim of a widow and her fatherless children, *is too low*, to be seen by the lights with which justice illuminates the claim.

Again he says:

"The undersigned does not so construe the charter of the city, nor the delegated powers of the Common Council *they do not admit the principle of remedying one wrong to the citizen* by doing another wrong to the public"!!!!!

We quote from the Federalist No. 78 as applicable to this case, in connection with what is herein before stated, the following: "*There is no position which depend on clearer principles than that every act of a delegated authority, contrary to the tenor of the Commission under which it is exercised,* IS VOID."

If therefore these acts are in violation of the charter, and the common council have transcended the persons delegated to them—their acts are void, as is the case in the present instance. But the doctrine contained in: "they do not admit the principle of remedying one wrong to the citizen by doing another to the public." This is the quoerest doctrine that we have ever seen from the pen of a public officer. That a wrong to a citizen should not be redressed by the aggressor!!!

With regard to the award of $392, the Court for the correction of errors have settled that, in the case of Livingston, the Street Commissioner is therefore right in this, and the counsel wrong. The Commissioners should have made the award to Mrs. Amory instead of the corporation.

The Counsel with these words concludes:

"The Petitioner should have leave to withdraw her petition."

Shame, shame!!

We have thus placed in promiscuous order in this number divers matters having a bearing upon the passage of the **confiscation act** authorising the Mayor, Aldermen, and Commonalty to purchase land at their own assessment sales, for assessments for pretended improvement never made, and for pretended benefits never conferred, but before proceeding to make our remarks will first give the copy of a letter received from the Hon. John B. Scott, in reply to a letter addressed to him, a copy of which is on page 270 of this number. Mr. Scott's answer would have been placed in connection with that letter but it was not received until after that sheet had passed through the press. We now give it, and also the letter of Mr. Meech in connection with it.

We also add the copy of a letter to H. N. Wales Esq., Clerk of Assembly in reference to the passage of the act by that house authorising the Mayor, &c., to purchase at their own assessment sales, and his reply thereto. Also a letter in answer to his reply and his answer thereto. Also a third letter to that gentleman and his reply thereto.

FURTHER CORRESPONDENCE.

After the pages, upon which our letter to Hon. John B. Scott, of the 7th inst. was printed, had passed through the press, we received his reply, which we here give. It is very much to be regretted that the desire for public office should be so great that members of the Legislature are so run down with applications that they are unable to attend to the important interests of their constituents which are of far more consequence to the people. Such, however, is the case, on every change of political power in the State. These letters are not published to complain of individuals, but to bring before the citizens, the operations, results and consequences of hasty legislation and to show the great danger of our State Government becoming very deficient in its practical operations from what is contemplated by the constitution.

—

Letter from HON. JOHN B. SCOTT, to E. Meriam.

"NEW-YORK 15th Nov. 1843.

"E. MERIAM, Esq.

"Dear Sir—In answer to your note, I can only repeat the idea I always intended to convey, in my former communications—That I never received the memorials to *my knowledge*. That I have no doubt a package was delivered to me from Mr. Meech *because he says so*—but not from any recollection and I supposed I pursued my uniform course to lay letters, newspapers, packages and documents of every kind sealed or unsealed on the table until I had time to read them. I appropriated generally the time the house was in not session to 12 at night sometimes I was not able to read them all on the day received because they were so numerous. I brought with me home all papers *after reading them* I thought it of any importance to retain. I never read or saw or had any impression ever on my mind that there were such memorials in existence until I received your first communication. When I said "I cannot doubt but this package was taken from my table or mislaid," I meant nothing more but to endeavor to account for an event which I thought so extraordinary. Not that I had taken or mislaid a package which I dont know I ever had—but that it was taken or mislaid by some other person—how and in what way mislaid by servants cleaning the room, or taken by design. I know nothing more than you do. If the Packages were in the form of Newspapers then it is probable I might have neglected to read them, for I received a great many from every part of the country without having time to read them. If Mr. Meriam had called upon me immediately at Albany when you discovered they were lost, or at any time after, I was always ready to hear him and explain all in my power. No person can regret more than I, this unpleasant event. If Mr. Meriams mind is not now satisfied I despair of effecting it.

"Very respectfully yours,

"JOHN B. SCOTT."

Letter from E. Meriam to Wm. Billings Meech, Esq.

"NEW YORK, Nov. 25th 1843.

"Dear Sir—I hand you enclosed a letter which I received some days since from the the Hon. John B. Scott. I should have sent it to you sooner, but having been much engaged I had not time to compare it with your letter to me of the 30th of May last, and your respective letters of the 9th and 10th of March written from Albany after your arrival there. I have now made these comparisons and hand you the letter of Mr. Scott which letter please return to me with such remarks as you deem it calls for at your hands. Very respectfully yours,

"EBEN MERIAM."

"W. B. Meech, Esq."

Secretary of the Merchant's Exchange meeting and a member of th. Citizens Committee, delegated by that meeting to proceed to Albany in reference to the Tax and Assessment bills pending before the State Legisluture.

—

Letter from Wm. Billings Meech Esq., to E. Meriam.

"NEW YORK, Nov. 28th 1843.

"Dear Sir—Your letter of the 22d inst., enclosing Hon. John B. Scott's letter of 15th instant and asking for additional information in relation to the package of Memorials presented by myself to Mr. Scott last winter, has just reached me. In addition to my former communication on this subject I can only say that the memorials were handed to Mr. Scott a few minutes after nine o'clock of the morning of my arrival at Albany: *in the Hall of the Franklin House* at which I was informed Mr. Scott boarded. Being only acquainted with Mr. Scott by reputation, I was obliged to request the clerk of the Franklin House to point him out to me. I saw Mr. Scott at the Senate Chamber on the same day and have seen him frequently since and *he is the gentleman* to whom I handed the memorials and the letter of introduction from yourself. As I have before stated Mr. Scott appeared to be engaged at the time and I had therefore only time to observe to him, "Mr. Scott I have some petitions in relation to Assessments which *Mr. Meriam* of New York wishes you to present this morning," to which he replied "I will do so" or equivalent words.

"On the same morning and before the meeting of the Legislature all the petitions and papers (upon the same subjects) entrusted to me by the Citizens Committee reached their respective destinations and all the others were duly presented to the Legislature,

"Respectfully Yours,

"WM. BILLINGS MEECH."

"E. MERIAM, Esq."

—

Letter from E. Meriam to Hon. John B. Scott.

"Nov. 30th, 1843."

"HON. JOHN B. SCOTT.

"Dear Sir:—Your letter of the 15th came duly to hand and I should have replied to it earlier but being much engaged I was not able to bestow upon it that attention which its importance demanded.

"I have since, enclosed the letter to Mr. Meech, and have received his reply, which is here subjoined.

"In forwarding important papers to Albany the committee have been very particular. The memorials forwarded to your address, and that of the Hon. Robert Smith, and others in January, were forwarded by Express, and receipts in every instance taken, which we now have.

"Mr. Meech was despatched to Albany in March at an expense of near twenty-five dollars purposely to deliver to his Hon. the Lieut. Governor, to yourself, to Hon. Messrs. Rhodes, Dixon and R. Smith, letters and memorials.

"These memorials were of great importance, were collected together with great labor and trouble and the loss of the forty is very severe.

"When these memorials were put up to be forwarded to you, I first attempted to enclose these all in a sheet of white foolscap paper, but found it would hold but a part of them, I then divided them and put twenty in each envelope and then wrote a letter addressed to you which accompanied them. I at the same time addressed a letter to His Honor the Lieut. Governor, to the Hon. E. Rhodes, Hon. A. Dixon, and Hon. Robert Smith, to each of which one or more memorials were sent, those gentlemen each and all presented the memorials sent them.

The night prior to the morning of Mr. Meech leaving New York for Albany, I spent the entire night in preparing these communications and in endorsing the memorials which were all 61 in number and went myself with the clerk of the Committee to the Bridgeport steamboat and there met Mr. Meech and delivered the letter into his own charge.

"Mr. Meech in his letter to me dated Albany March 9th advised the committee of his safe arrival and states that he had delivered all his letters, &c.

"My object in addressing you the note of the 7th instant, was to ascertain if these memorials had since been met with, concluding that if mislaid, that they would have been found, but if they were taken from your table, all hopes of getting them again, is at an end, as those who would take them, would most undoubtedly destroy them, hence we shall be under the necessity of getting them *re*-signed.

"I was in the Senate Chamber when Mr. Franklin from your committee reported upon the same class of memorials, which had been presented by His Honor the Lieut. Governor, Mr. Rhodes, and Mr. Dixon, *and he moved to lay them on the table*, and it was then I noticed the bundle was smaller than the packages sent. I was surprised at this course of proceedings with these important memorials, and as the previous vote upon the Bill authorising the Corporation to purchase at their own assessment sales, and particularly at your own vote on that bill, and at the introduction by yourself of a res-

olution to refer it to a select Committee to report complete, while the Bill was under consideration with the Committee on the Judiciary, and had not been reported upon by that Committee.

In looking through your letter of the 15th inst., I noticed your remark "If the packages were in the form of Newspapers then it is probable I might have neglected to read them." These memorials were neatly put up in white paper and could no more be mistaken for newspapers than any other letters. You also remark: "If Mr. Meriam had called upon me immediately at Albany when you discovered they were lost and at any time after I was always ready to hear him and explain anything in my power."

"Mr. Meech, when he left N. York for Albany took with him written instructions–when the committee separated the night previous to his departure for Albany—it was arranged that Mr. Meech was to get ready for to leave town at six o'clock in the morning and myself to have all the papers he was to take with him in readiness and meet him on board the boat the next morning with the papers and with a letter of instructions.—This was done. In these instructions Mr. Meech was requested to call on the members at their rooms before the hour of meeting of the two houses in the morning after his arrival in order that the memorials might be presented that morning. He was also requested to procure the Albany Evening Journal of that day on which the memorials were presented and the Argus and Advertiser of the next day and forward them by the Express that the Committee could see what was done in the two houses with the memorials &c. He sent these papers and they came to hand, in looking over these I did not see any mention made of the presentation of the 40 memorials by Mr. Scott, I at once wrote Mr. Meech a letter of which the following is a copy:

"*New-York, March* 13, 1842.

"MR. MEECH:

"Dear Sir,—The Committee will set out to-morrow morning. We were disappointed in not hearing from you by the express on Saturday. I see by the evening Journal of Friday that Mr. Rhodes presented several memorials but I do not see that Judge Scott has presented those sent to him. Will you call on Judge Scott and make enquiry of him on the subject. Forty memorials were sent to Judge Scott which some of the memorialists are anxious should be presented.—Perhaps he may be waiting until the bills are referred to the New York delegation before he presents them, if so they will be in time, but if he declines to present them you will please ask him plainly and in that case request him to return them to you and give them to Mr. Dixon or Mr. Rhoades and ask them to present as 40 memorials. Be careful not to offend Judge Scott in relation to these memorials, say to him that I wrote to ask you if he had presented these memorials but if you know that he has presented them, do not ask him."

This letter was forwarded by express on Monday morning and a receipt taken for it. A snow storm had set in that morning and the cars did not get through until two days to Albany. In the meantime Mr. Meech had left Albany for New York. On my arrival at Albany, I called at the Express office with the receipt and received the package again and its re-delivery is marked on the face of the receipt which I have. The memorials were frequently spoken of by the Committee at Albany from the fact that no notice of the presentation of them was to be found in the newspapers, but from what you said to the Committee when they called on you they supposed you friendly to their mission and it was for that reason the subject was not mentioned. When the Legislature adjourned I called on the clerk of the Senate and examined the journals and also examined his files, and not finding the memorials in the files nor any entry of them in the Senate Journal I at once addressed you a note dated 19th April and called with it myself at your lodgings and to which I received no reply. On the 23d of May I addressed you a second note asking for a reply to my note, and this will explain, I trust, the reason of my not saying more, than here stated on the subject. You will find in the letter addressed to you, (early in January) which covered a memorial in relation to the taxing the Banks on lost capital allowing the tax books to remain in the hands of the Ward Collectors for a longer period, to prevent a large arrear tax, and declaratory of the tax law of the previous year, stated, that I should send you these memorials, and I sent you about the same time a printed copy of these memorials, with the names of some 12 or 1500 of the signers printed thereto. In looking through the printed Journals both of the Senate and Assembly you will perceive that both are erroneous in reference to the bill authorising the Corporation to purchase at their own assessment sales, and the Remonstrances against it. The Standing Committee on the incorporation of cities and villages amended the bill in the Assembly and so reported it, but the Journal has it down, as reported *without amendments*. I have been quite lengthy in my communication, but it seemed necessary. You will notice that Mr. Meech reached Albany, March 9th, and the Legislature adjourned April 18th.

Yours Respectfully,

EBEN MERIAM,

of the New York Citizens Committee.

—

Letter from E. Meriam to H. N. Wales, Esq., Clerk of Assembly:

NEW-YORK, Nov. 8th, 1843.

H. N. WALES, Esq.,
Clerk of Assembly.

"DEAR SIR,—I have above, given you the extracts from the Assembly Journal, and also herewith, a copy of a letter from the Hon. E. H. WHITE, and also a copy of a letter received by me from a very distinguished member of a former Legislature of this State, and of the Senate branch.

The bill to which these proceedings refer, is one of a very extraordinary character in the annals of legislation; and as the proceedings in the Senate, as well as the Assembly, have, with respect to it, been had without a compliance with the rules of either house, I am under the necessity of applying to you for information. I was standing alongside Mr. Redington, when he reported the bill in question, and he reported it with amendments, and I remained in the House of Assembly that entire day, and I heard of no motion of a reference to a Select Committee, to report complete, and Mr. Redington was also in his seat all that day, and he informed me that he had heard of no motion, but on enquiring at the Clerk's desk, I learned that the amendments had been struck out. The Journals of the Assembly are silent as to the bill being reported with or without the amendments, by the Standing Committee, but state that the Select Committee reported the bill *without* amendment, in which case, the amendment made by the Standing Committee, should have been with the bill, requiring engrossment.

Will you have the goodness to refer to your manuscript journal, and state to me what that says, and how this bill could be referred to a Select Committee, to report complete, without a motion.

Very respectfully,

Yours, &c.,

EBEN MERIAM,

Of the Committee of Citizens, delegated to proceed to Albany, by the Merchants' Exchange Meeting, of March 6th, 1843."

The Extracts from the Assembly Journal, referred to in the first paragraph of the above letter, are to be found on the Assembly Journal, pages 880 and 894, and page 264 of this number; and the letters referred to, on pages 272 and 273, also of this number.

—

Letter from H. N. Wales, Esq., to E. Meriam:

SCHAGHTICOKE, 15th Nov., 1843.

DEAR SIR,—Yours of 8th instant, with copies of letters from the Hon. E. H. WHITE, and another, came duly to hand. The answer to your enquiries, will be found in Mr. WHITE's letter; and if you will search the Journal, you will find parallel cases on the same page, where bills reported by a Standing Committee, were immediately committed to a Select Committee to report complete. This species of reference is very common near the close of the session, in order to save time.

The bill you refer to, went through all the *forms* necessary, and the letter of your correspondent does not touch this case, although strictly right. When a bill is reported by a Standing Committee, the question is, on agreeing with their Report, and a motion to refer, re-commit, or order immediately to a third reading, is universally practiced. Upon the Report of Mr. Redington, Mr. Jones moved its reference to a Select Committee, of which he, of course, was Chair-

man, and he reported the bill as it was passed.

Yours truly,
H. N. WALES.

E. MERIAM, ESQ., New-York.

Letter from E. Meriam, to H. N. Wales, Esq.:

"NEW-YORK, Nov. 18th, 1843.

"DEAR SIR,—I have by this morning's mail, your letter of the 15th instant. I regret that I did not see you when in town.

I hand you annexed, a copy of a letter to Hon. D. R. F. JONES, and his reply.

We wish you would examine the manuscript Journals of the Assembly, and see if they correspond with the printed copy, as the printed copy is evidently wrong.

You refer to other bills. The New-York Tax bill, which was reported at the same time, by Mr. E. Strong, was not at that time, referred to a Select Committee, to report complete, and the printed Journal is wrong in that. I was present when both of the bills were reported by the respective Standing Committees, and the next day, Mr. Palmer, who was a member of Mr. Strong's Committee, went to the Clerk's desk with me, in reference to the Tax bill, for I learned of a person at the Clerk's desk, whether yourself, or deputy, or assistant, I cannot say, that the amendments had been struck out. I watched these bills myself the whole day, on which they were reported by the Standing Committee, that objections should be made to a reference, and the merits of the bill discussed, before such reference should be had.

We will feel much obliged by your early reply.

Very respectfully,
E. MERIAM,
Of the Committee, &c.

Mr. WALES," Clerk of the Assembly.

Letter from H. N. Wales, Esq., to E. Meriam:

ALBANY, 21st Nov., 1843.

"DEAR SIR,—Yours of the 18th came to hand yesterday, and I hasten to answer it, although I have nothing new to communicate.

The printed copy of the Journal is correct and in the usual form, and tallies exactly with my recollection of the matter, and as you will discover, is corroborated by Messrs. White and Jones, the former of which was in favor of Mr. Redington's amendment. The fact of the bill having been amended by the Standing Committee, does not appear upon the Journal, because in the turmoil usually attendent upon the press of business, at the close of a Session, it is sometimes utterly impossible for the Speaker or Clerk, to understand distinctly, what or how the Chairman reports a bill, and the Clerk is compelled to examine the bill itself, in order to know whether it was reported with or without amendments. In this case, the bill passed out of our possession, before we knew what amendments, or whether any amendments had been made, and when the bill was reported back again by the Select Committee, as it was the same day, (see page 895,) we had to take the bill as we found it coming from the last Committee.

All the business of the Clerk's table, was done by myself, and all the records of the proceedings, (i.e. the Journal,) was kept by my deputy, Mr. Lott; the Committees are made by the Speaker in this manner, immediately after a motion is made to refer a bill to a Select Committee; the bill is passed up to the Speaker by the Clerk, who writes the names of the Committee upon the back of the bill, the bill is then passed into the hands of the Clerk who keeps the Journal, the blanks which he has left for the names, is filled over the bill handed by him to the Chairman named on the bill. You will, therefore, discover that it is hardly possible to make a mistake in the direction of a bill, although, as I before remarked, he may err in relation to the manner of the report, *whether with or without amendments.*

The motion, whether heard by yourself, or even if not heard by five members in the House, *was* made, and the bill *was* reported by Mr. Jones, exactly as it came from the Senate, and so passed, and no Parliamentary rule violated, *and even a motion made out of order, or an hour after* Mr. Redington reported the bill, would have been in order unless objected to, for unless objections are made, it is done by unanimous consent.

Yours truly,
H. N. WALES.

E. MERIAM, ESQ., New-York."

Letter from E. Meriam, to H. N. Wales, Esq.:

"DEAR SIR,—I have the pleasure to acknowledge the receipt of your favor of the 21st inst., and should have replied to it earlier, but I have been so much engaged, that I had not time to give it that attention, which its importance demanded.

You will perceive that we alledge three errors in the printed Journal of the Assembly.

1st, That the bill was reported by the Standing Committee, with amendments; whereas, the printed Journal states the contrary.

2d, That the Select Committee reported the bill *with amendments*, (viz: striking out the amendments of the Standing Committee,) whereas, the printed Journal has it, that that Committee reported the bill without amendments.

3d, That no motion to refer the bill to a Select Committee, was made, at the time stated in the Journal.

In your reply, noted above, as your letter of the 21st instant, you say:

'The fact of the bill having been amended by the Standing Committee, does not appear in the Journal, because the turmoil usually attendent upon the press of business, at the close of the Session, it is sometimes utterly impossible for the Speaker or Clerk, to understand distinctly, what or how the Chairman reports a bill, and the Clerk is compelled to examine the bill itself, in order to know whether it was reported *with* or *without* amendments. In this case, the bill passed out of our possession, before we knew what amendments, or whether any amendments had been made, and when the bill was reported back again by the Select Committee, as it was the same day, (see page 895,) we had to take the bill as we found it coming from the last Committee.'

You admit in this, that we were right in the first and second allegations. We have, therefore, the presumption in our favor as to the third allegation, independent of any thing else.

With regard to the *third allegation*, we have to say, that we were at Albany attending especially to this and four other bills; that one of our Committee, (the writer,) was within about fifteen feet of the Clerk's desk, when Mr. Redington reported the bill with the amendments, and a motion to refer it to a Select Committee, could not have escaped being heard. The Chairman, Mr. Redington, heard no such motion, neither did Mr. E. Strong, Mr. Hutchinson or Mr. Palmer, and all of these gentlemen were attending near the desk in reference to this and the associate bill. I was standing by the side of Mr. Redington, at the time he made the report, and any motion to make such reference would have been at once objected to.

Mr. Jones, in his letter to me of the 3d of Nov., says:

'I have to say, that as I am named in the Journal as Chairman of the Select Committee, to which was referred the bill to authorize the Mayor, &c., to purchase lands, &c., it is very probable that the motion to refer to a Select Committee, was made by myself.'

You will perceive, by the above quotation from Mr. Jones' letter to me, that he has no recollection of ever having made such a motion, or of a motion having been made by any other member. He merely says it *is* probable, because the Journal names him as Chairman, &c.

It is not our purpose to find fault with the excellent Clerk of the House of Assembly, on the contrary; when we had occasion to enquire about this bill, at the Clerk's desk, we found him both frank and obliging.

We understood Mr. Jones to make a motion to refer this bill to a Select Committee, to report complete, the day the bill was referred to the Standing Committee, and immediately upon that reference; but such a motion, at that time, was as much out of place, as if it had been made the first day of the Session, before the bill was introduced into either House.

If the mark of the names of the Select Committee, were your guide in making your entry in the Journal, could not some person other than yourself, or the Speaker, or a member of the House, have placed the names upon the bill?

Your letter details the mode of proceeding by yourself and assistant, and then remarks:

'And even a motion, made out of order, or an hour after Mr. Redington reported the bill, would have been in order, unless objected to, for unless objections are made, it is done by unanimous consent.'

If a motion was made one hour after Mr. Redington reported the bill, would not such a motion appear in the Journal, in the order of time in which it was made, and as being made subsequent to other motions, which had in fact preceded it in the actual business of the House?

You say:

'The printed copy of the Journal is correct and in the usual form, and tallies exactly with my recollection of the matter, and as you will discover, is corroborated by Messrs. White and Jones, the former of which, was in favor of Mr. Redington's amendment.'

I cannot see anything in either Mr. Jones' letters, or those of Mr. White, copies of one of each, of which, were sent you, which corroborates the Journal as printed, for Mr. White says: 'that Mr. Redington reported the bill with amendments,' and the Journal says the very reverse, and Mr. Jones is very far from being positive in either of his letters as to the correctness of the Journal; he says: 'he believes, however, the report in the Journal is correct.'

In another letter, he says:

'I have to say, that as I am named in the Journal, as Chairman of the Select Committee, to which was referred the bill to authorize the Mayor, &c., to purchase lands, &c., it is very *probable* that the motion to refer, was made by myself.'

We shall feel obliged for your early reply.

Yours truly,
E. MERIAM,
Of the New-York Citizens' Committee.
H. N. WALES, Esq.,
Clerk of Assembly."

—

Letter from H. N. Wales, Esq., to E. Meriam:

ALBANY, 30th Nov., 1843.

"MY DEAR SIR,—Yours of yesterday is at hand: I regret exceedingly that I have not made myself understood in my two former communications. I have conceded in both, that it was not only possible, but very probable, that an error might be made upon the Journal in relation to the *manner* in which a member reports a bill, for the reasons before stated, while it is almost impossible that an error of reference, and appointment of a Select Committe, can be made; the one case being the sin of omission, and the other of commission: the former being accidental, and therefore pardonable—the latter intentional and criminal, and a Clerk who would do it, perjures himself.

Since the above was written, I have been to the Secretary's office, and examined the original bill. I find upon it, in pencil, in my own hand writing, the following endorsement, in the usual form: "Select, Messrs. Jones, White and Haight," without amendment, "Table."

These endorsements mean the reference to the Select Committee: the report of said Committee, (for the bill as it then was, was without amendment,) and the result of the first vote upon the bill when there was no quorum in the House.

So much for the Record: now for my own recollection of the matter, which I have not before given you. The bill was reported by Mr. R., with an amendment, a motion *was made* by Mr. Jones to refer, &c., and the bill was reported by Mr. Jones without amendment. Not exactly understanding myself what condition the bill was in, I sent for Mr. Jones to my desk, and enquired what he meant by this report, to which he replied, that "he had struck (taken) out the amendments of Mr. R.

Now, the printed Journal does not say what you alledge "that Mr. R. reported the bill without amendment," although it ought strictly to say that it was amended. This I have explained before, and the presumption is, that my deputy never saw the bill to make his record from, until it came from Mr. Jones' hand; and finding it without amendment (as it was,) so entered the report of both Committees.

Mr. Jones actually reported the bill without amendment, as stated in the Journal, although in fact he amended it, and that was the reason I sent for him to my desk.

You say the Journal shows the motion was made immediately, when it was not. In this I think you are mistaken, my impressions are, that the motion *was made* immediately, although I do not pretend to be positive on this point; *that it was made I do know*, for no such endorsements as those alluded to, on the first page of this letter, could or would have been made without it.

This motion could have been made some little time after Mr. R.'s report, and still appear as it does; for, if the motion had been made shortly after, the deputy would very likely turn back and place it there: that it was not made long after, is very apparent, for I should think Mr. Jones' report was made in an hour or hour and a half after Mr. R.'s.

Any motion is in order *practically*, at any time, unless objected to, as the Speaker never interposes his authority in these matters, so near the close of the session.

When I said the printed Journal was correct, I meant it was in conformity to the manuscript, as you had raised that enquiry. I also stated that it was corroborated by Messrs. Jones and White, so far as relates to the reference of the bill. If any chicanery had been practised, Mr. White, who was on both Committees, would have been very likely to have ferretted it out.

I have two substantial reasons for being thus prolix in explaining this matter:—*first*, as a public officer, I feel bound to furnish any one with full answers, to any and every enquiry addressed to me in my official capacity; *second*, my reputation as a Clerk, of which I am rather chary, is in question, and I feel an interest in placing that above reproach, it being the only capital I have.

Hoping the annexed will prove satisfactory, I remain as heretofore.

Your's truly,
H. N. WALES.
E. MERIAM, Esq., New-York."

—

Letter from E. Meriam, to H. N. Wales, Esq., Clerk of Assembly:

NEW-YORK, Dec. 2d, 1843.

DEAR SIR,—Your letter of the 30th ult., came duly to hand, and I hasten to reply to it.

The whole tenor of my several letters to you, are very far from imputing any blame to the worthy Clerk of the House of Assembly.

Your frank and very full answers to our numerous enquiries, place us under obligations to you for the favors thus conferred.

It is due to yourself, from us, to point out to you, the *entree* of this monster bill into the Legislative Halls of the Commonwaalth, to mark its progress, and note its final *exit*. In the annals of legislation, there is not to be found a bill any thing to compare to this in its deformities.

In the Senate Journal, page 301, you will find the mention of a memorial, purporting to be that of the Mayor, Aldermen and Commonalty, of the City of New-York, asking for the passage of this bill.

If you refer to the files of the Senate, you will find this memorial thus endorsed, but on opening it, you will find it is signed by Joseph R. Taylor, Clerk of the Board of Aldermen, who, by virtue of suct office, was also Clerk of the Common Council.

Petitions to the Legislature from the Corporation, are uniformly signed by the Mayor, not so with this.

In Senate Journal, page 316, you will find a report of Mr. Franklin, upon this memorial, and he states it to be a memorial of the Common Council.

In the Senate Journal, page 389, you will find a record of the presentation of a remonstrance against the passage of this bill, from the 'Citizen's Committee,' and the Journal should also state, that the bill was re-committed to the Committee on the Judiciary, on the motion of Mr. Rhoades, *this is omitted.*

On page 407, of same Journal, you will find a resolution of Senator Scott, to refer this bill to a Select Committee to report complete; this resolution was not in order: the bill at that time was in the hands of the Committee on the Judiciary, and that Committee had not made their report.

In Senate Journal of April 5th, page 415, you will find it stated, that 'Mr. Dixon presented the memorial of Phelps, Dodge & Co., and 312 others, in relation to land sold for taxes and assessments, in the City of New-York, &c.'

In the Albany Daily Advertiser, of April 6th, you will find under the head of Senate proceedings, of April 5th, that it is stated that '*Mr. Dixon presented* 30 *memorials from New-York, signed by* 2,500 *citizens, that the Corporotion may be prohibited from*

purchasing under sales and assessments.'

I presume you will find the same in substance, in the Evening Journal or Argus—one or both.

You will find, on examining the Senate files, that the daily Advertiser is *right*, and the Senate Journal *wrong*, in this particular.

You will find the Senate Journal of the 5th, contradicted by the same Journal, of April 14th, page 508, and your own Journal of same day, page 904.

Now sir, this is a brief account of the track of this bill in the Senate, before it took its departure for the Assembly. With its movements in that branch of the legislature, my previous letters have made you acquainted.

On the 18th of April, the Legislature were, by concurrent resolution, to terminate the session at 12 o'clock, M. The session was, on that day, extended, to 4 o'clock, P. M., by a concurrent resolution.

Previous to 4 o'clock, the members were, many of them, packing their trunks and getting ready for home, and in the midst of this confusion, and in the absence of the Chairman of the Standing Committee, who reported the bill with amendments, it was called off, and decided to be passed, sent to the Senate, where it lay quiet during the discussion about the Recorder ship. of Troy, and finally, at past the hour of 4 o'clock, P. M., found its way into the Executive Chamber.

Now sir, with all your experience in the proceedings of legislative bodies, I think you will say with me, that its like never was before known. Sometimes this bill was moving with the rapidity of thought, and at other times it seemed to be extinct.

You have, sir, in the archives of your department, a commentary upon this bill, and although brief, is pertinent; it is the memorial of Mr. Benson, who, complains of an assessment imposed upon a piece of salt meadow, by the great officers of this very Corporation, of the city of New-York, which amounts to 26 times the value of the land, and it is to legalise this very outrage, and some others, that the officers of the Corporation of the City, asked for the passage of this act.

You have other memorials, viz: that of James McBride, John H. Tallman, Joseph Alexander, Martha Amory, and divers others. Please cast your eyes over these memorials, and you will see what this bill developes.

There is not a civilized government on the face of the whole earth, that ever exercised power to the extent which this bill reaches.

We cannot believe that there is a single member of the government of this State, that would have given this bill his support, had he first carefully examined and deliberately considered its provisions, but it went through the houses like the gust of a tornado.

I have been thus profuse, that you may have some idea of the *de*merits of the bill authorising the Mayor, Aldermen, &c., to purchase at their own sales for assessments, assessments generated, perpetrated and consummated by themselves, in spite of the protestation of their unfortunate victims, and wholly regardless of their lamentations.

The Legislature have been imposed upon in reference to this bill. Shamefully imposed upon.

The assessments for which they ask for authority to bid off the land, thus imposed upon, are, in a majority of the cases, for fictitious improvements; for the pretended opening of streets, which are still in the same state that the island of New-York was found in, when it was taken from the possession of the red men of the forest—nothing more nor less than sham assessments, and it is these, which they have the audacity to ask the Legislature to legalize.

Many, many are the individuals who have been utterly ruined by these odious and wicked assessments. Yes sir, I can point you to a venerable citizen, whose head is whitened with the frost of more than three score years, who has been made a beggar by these detestable assessments, and of him I could say to you, '*pity the sorrows of the poor old man, whose trembling limbs have borne him to your door, Oh! give relief and Heaven will bless your store.*' That man cast his eyes toward the Legislative Halls of the Commonwealth, and asked for the protection of his home, of the graves of those who gave him birth, alas! his petition was passed unnoticed, while that of the oppresser found favor; and instead of giving relief to the humble suppliant, an act was passed authorising the Corporation to take from him the ground on which the ashes of his kindred sleep.

I could point you to the widow and her helpless children, whose home has been desolated by Corporation assessments. She has petitioned, but her application was of no avail, for with the oppressor there was power, and it was intimated that relief in her case, would '*inconvenience* the Corporation.'

Had the bill in question been a meritorious bill, we would not have troubled you with enquiries as to its history and sojourn in your department, but lamentable as it surely is, it has not a redeeming feature in its whole body.

In order that you may know the importance of the amendments proposed by the 'Citizen's Committee,' to this bill, I will copy these from the New-York Journal of Commerce, of April 14th.

'§ 7. This act shall not be construed to alter or change the term of time during which lands may be redeemed from assessment or tax sales, to any shorter period than heretofore provided by law, whether the certificates of sale have been assigned or not; nor to legalise or confirm any assessment not made in accordance with the laws of this State, any thing herein before contained, to the contrary in any wise, notwithstanding.'

'§ 8. The moneys authorised to be raised by tax, on the estates, real or personal, of the inhabitants and freeholders of the City and County of New-York, shall in no case be used, appropriated or applied to the purchase of any lands sold for taxes or assessments in the said city.'

'§ 9. This act shall not be construed to authorise the purchase of any lands for unpaid assessments, in any case where the improvement was not made on the petion of a majority of the owners of the land affected thereby: nor shall it authorise the purchase of any lands which are assessed more than ten times the actual value of such land; nor in any case where the members of the Common Council of the City of New-York were interested directly or indirectly in the contract work; nor in any case where the Mayor, Aldermen and Commonalty of the City of New-York, have not complied with the provisions of the Statute, under which the proceedings were had; nor in any case where the fees or charge for advertising such property for sale, for such assessment, exceed the actual value of the land; nor in any other case, where the fees of any one of the officers, which are assessed in part thereon, exceeded fifty thousand dollars per annum.'

I will also give you an extract from a remonstrance of the public meeting held at the Merchants' Exchange, on the 6th of March, 1843, the original of which is in the Archives of the Senate, signed by Preserved Fish, Chairman, and twelve Assistant Chairmen, all of whom are men of great purity of character, and who are, in moral worth, second to none in the United States.

This meeting, in the most emphatic language, remonstrate against this odious bill, in the words following:

'The remonstrants suggest that the application of the Common Council, for a law to authorise the Corporation to become purchasers at assessment and tax sales, ought not to be granted; that it is bad as a principle, and will be worse in practice. That the Corporation have not the means of paying for such purchases, except by taxing the citizens for the amount of the purchase money; that the Corporation should not be allowed to hold any real estate, not required for public use, that it will be a wrong done to the owners of such lands, will lead to expensive litigation, for which the citizens must also be again taxed, and thus *indirectly sanction assessment abuses of an agravated character*, and give to contractors, at exorbitant and improper prices, the public money, and to public officers fees and charges *for services never rendered.*'

I give you also, an extract from 60 memorials, signed by several thousands of the best men in the City of New-York, men of both political parties, without distinction of party, and composing the greatest portion of the most respectable inhabitants of New York, some of which were presented in the Senate by Senators Rhoades and Dixon, and some presented in the Assembly, and upon one of those presented in the Assem-

bly is the signature of an old fashioned public officer George B. Smith Esq., formerly Street Commissioner of the City of New York and his assistant Mr. Doughty. These memorials were also signed by the venerable Jonathan Thompson the distinguished Ex-Collector of the Port of New York, by Stephen Allen and Phillip Hone formerly Mayors of the City of New York, by Peter A. Jay, formerly Recorder of the City of New York, and numerous others including Citizens who pay three fourths the aggregate tax of the City. This memorial is also signed by that distinguished Citizen Ex-Senator Gulian C. Verplank who was a member of the Special Committee appointed by the Hon. the Senate of the State in 1841 to investigate the assessment abuses and depredations in the city of New-York. The following is the extract :

'Your Memorialists, citizens of the city of New York, most respectfully represent to your Honorable Body, that the great and arbitrary power now and heretofore exercised by the Corporatien of the City of New York their officers and servants, in the imposition of fictitious and ruinous Assessments upon private property for what are miscalled public improvements, has had the effect to lessen and depreciate the value of real estate; and the loose and reckless manner in which these extraordinary proceedings have been carried on has had the effect to impair real estate securities, and to render titles doubtful and insecure.'

I give also the extract from 32 Remonstrances presented in the Legislature signed by about 2,700 Citizens of New York against the passage of this odious and abominable bill, as follows:

"The undersigned Remonstrate against the conferring of any authority on the Corporation of the City of New York, or any of its officers to become purchasers at assessment or tax sales."

I give also an extract from a written opinion from that distinguished Equity Judge, the Hon. Murray Hoffman, in one of these very proceedings for an assessment for which the bill in question is applied for to consummate—as follows:

"But I am thoroughly satisfied that a more palpable and pernicious disobedience of law has never marked the course of any corporate body, than characterises the proceedings complained of."

I will give you another from the memorial of the Mayor, &c. in 1841 *to the Legislature as follows:*

"But the amount of said assessments being more than the present market value of the said property so liable."

I will give you further illustrations from the Report of the Special Commitcee from the Senate appointed to investigate assessment abuses in the city of New-York in 1841. *See Senate Doc. No.* 100 *of* 1842, *pages* 13, 15, 16, 17.

"It is difficult now to comprehend how the expenses in opening streets and avenues in that city could have been so very great as they were represented to have been, but of the fact of their being so very great, there can be no doubt; it is established by the receipts of the Commissioners for the same exhibited before the committee. In the opening of the seventh avenue, from 21st street to 129th street, which was confirmed in February, 1839, the amount awarded to the owners for land taken for the avenue, was $28,241.41, while the fees and expenses of that opening amounted to the large sum of $12,435.70, and if to that is added the collector's fees for collecting the assessments $1,115.00, it will show a total of expenses paid by the owners of land on that portion of the seventh avenue for its formal opening, amounting to $13,550.70.

The amount paid to the commissioners on that avenue for their services, at the rate of four dollars per day, which is the highest sum allowed by the statute, is pay for *sixteen months*' services for each commissioner, in making the estimate of the land taken for opening that avenue, and assessing that value back again upon the land on each side of the avenue; and in opening this one street, of one hundred and eight blocks of about 270 feet each, the commissioners were each engaged three times the whole period that the Legislature is employed in legislating for the State, and each of them received about three times the compensation that is paid to a legislator for passing the whole winter from his home in attending to the public business. And in addition to that it was shown to the committee that commissioners were frequently engaged on several streets or avenues at the same time, taking their four dollars per day on each of those improvements; and that they received and were paid that compensation in some instances where they did not attend to the duties of their appointment, and in others where they attended but once or twice. If the case of the seventh avenue had been a solitary instance the committee might have supposed that it had taken place through some mistake; but they found the same principle of enormous expenses to extend throughout the whole system of street openings in that city, and that to such an amount that the surprise should be not that the inhabitants now complain of it, but that they had not done so at a much earlier period".

"If the citizens of New-York are laboring under an erroneous impression in believing that they have been greatly oppressed and injured by the course pursued by those commissioners, that belief is, in the judgment of the committee, very extensive."

"On that branch of the complaint as to the imposition of heavy and oppressive assessments for improvements never actually made, the committee ascertained that a very large portion of the streets and avenues formally opened from 1836 to 1839, were not actually opened; that nothing has been done beyond making awards and assessments by the commissioners and the confirmation of their reports by the Supreme Court; and that although the assessments have been collected for such improvements in many instances and in others the lands charged are either sold or advertised to be sold for the payment of those assessments, yet the lands forming those streets and avenues remain in the same condition as they were before the taking of any proceedings for their opening; and in some cases such lands remain in the occupancy of their original owners notwithstanding they have been paid for the same. And in numerous other instances where the streets and avenues have been actually opened, nothing has been done towards their regulation, so as to make the same useful to the public, or available to the owners of real estate, who have paid for the same by assessments on their property.

"Out of a list of eighty-one streets and avenues, or parts of such highways, the reports for the opening of which had been confirmed in 1837, 1838 and 1839, fifty-seven have not been in any way regulated or improved; and of the remainder, twenty-four in number, in some instances only portions thereof have been regulated a few blocks; and in others, a road has been worked through the centre of the street or avenue; and in others again, it is not deemed necessary to work such road, as the natural grade of the ground is such as to make it passable without regulation. This attempt to collect assessments not only by voluntary payment but by enforced sales of the lands charged, without actually opening the streets or avenues for which such assessments have been imposed, has been a strong cause for the excitement in that city on subjects of street matters. The committee therefore submit this subject to the consideration of the legislature.

"Several instances were shown to the committee where property had been offered for sale for the payment of assessments at two or three successive sales without being able to get a bid, the amount of the assessments being more than the estimated value of the property."

With regard to errors in your Journals, I have to remark that the wonder is not that these exist, but the wonder is that they are not ten times more numerous. I do not see how a clerk of the House of Assembly can know any thing about his papers. One comes to his desk to look for one paper and another for another, and instead of putting the same papers in the same order in which they found them they most likely put them some where else. We should be very slow to find fault with the clerk of the Senate or Assembly for errors, or to lay those we may find at their doors.

Legislation to be safe should be deliberate and such is the whole force of the Constitution in detailing the proceedings required to be gone through with before a bill becomes the law of the land.

The respective houses in the forming of their rules contemplate order and system but in practice oft times how widely different is the fact.

The associate bill of this of which we

complain shared the same fate, as the present one, and those who were opposed to any amendments to it by the standing committee caused all the amendments to be struck out in mass, and by so doing, nullified the whole bill, and were subsequently obliged to ask the unanimous consent of the house to put one of these very amendments back again.

Before closing this communication, allow me to call your attention to the vote recorded upon the passage of this bill, in your house, you will find this, on page 1022, of the Assembly Journal. You will perceive that it is there stated that the vote was taken after 3 o'clock P. M., the Assembly closed its session, *by concurrent resolution of both houses*, at the hour of 4, P.M., of the same day.

This bill, you are aware, is a bill requiring a vote of two thirds the members to pass it. 86 votes, were therefore necessary to pass the bill in the assembly, and the journal states the names of 91 as voting in the affirmative. It is almost certain that some of the gentlemen whose names were recorded in the affirmative, voted thus, under an impression that the Select Committee had returned the bill in the same state that Mr. Redington's committee had left it—as his report signified that much, thus, you will see the consequence of this error, and the importance of the position we assume.

At the session of the Legislature of 1842, the delegates of the anti-assessment committee from this city, found a bill which had been passed in the Senate by a vote of 22, to 3, on their arrival at Albany on the desk of the clerk of the Assembly, ready for a third reading. That bill was at that time, out of place. and Mr. Townsend, a member from this city of great energy and promptness of action, took hold of the matter and put the bill as it should be. This bill in the shape it passed the Senate authorised *two annual taxes to be collected in the city of New York, within the space of* 8 *months and* 21 *days.*— The Assembly, on Mr. Townsend's exposeing this deformity, slid the tax forward, in the order of time, to its appropriate year, and by that means, the citizens of New York were relieved of this extraordinary imposition. When this bill went back to the Senate for their concurrence in the all powerful amendment' which changed the whole character of the bill, every Senator present, recorded his vote in favor of the amendment of Mr. Townsend. This plan of collecting two taxes in one and the same year, was a deep laid scheme of the Corporation of the city of New-York to cover up the issue of floating bonds without exposing their extravagance to the tax payers. This matter you will undoubtedly remember, as it created quite a sensation in the house of Assembly at the time.

In speaking of these matters, I wish to be very explicit, in saying that we impute no blame to the worthy clerk of the house of Assembly, on the contrary, and I will add, that in a conversation which I had this day with the Hon. Robert Smith, chairman of the Anti-Assessment Committee, who was a member of the House of Assembly from the city of New York in 1843—he, Mr. Smith, spoke in the highest terms of commendation of the worthy clerk of the House of Assembly, whom I have now the honor of addressing, and this commendation is enhanced by coming as it did from the lips of a political opponent—and enhanced, also, by coming from the lips of a man of high standing in this great city, a man beloved and respected by all who know him.

There is another matter pertaining to this bill which involves important considerations.

On the Assembly Journal, pg. 904, you will find the following:

"On motion of Mr. Haight, and by unanimous consent,

Resolved, That the Hon. the Senate be requested to send to this house the remonstrance of Jonathan Thompson, and others of Andrew Foster and Sons and others; and 30 other Remonstrances of 2,500 Citizens of the City of New-York against the passage of the act authorising the Corporation to purchase lands for assessments and also the Remonstrance of the meeting held at the Merchant's Exchange in the city of New York, upon the same subject, which have been received in the Senate and referred to the Judiciary Committee, and which are not yet reported upon."

"Ordered, That the clerk deliver the said resolution to the Senate." This was April 14th.

On page 905, of the Assembly Journal you will find this entry:

"A message from the Senate was read, informing that they had agreed to the resolution of this house requesting the transmission of certain remonstrances to this house, and have transmitted the same accordingly."

These remonstrances were set up endways on your desk, during the remainder of the session, which terminated four days after, viz; on the 18th April.

When Mr. Haight asked unanimous consent to offer this resolution, Mr. Jones objected—after some discussion with the mover, Mr. Jones withdrew his objection, after this, Mr. Hibbard of New York objected, and after some parleying, he withdrew his objections.

The 30 Remonstrances which are referred to, are those that the Senate Journal, page 415 shows entered as the "memorial of Phelps, Dodge, & Co., and 312 others. in relation to lands sold for taxes and assessments in the city of New York, &c., which **were** read and referred to the Committee on the judiciary," but the Albany papers, have them as, "30 memorials from New York, signed by 2,500 ciitzens, that the corporation may be prohibited from purchasing under sales and assessments," &c.

I have indulged in some recapitulation for the reason that it seemed necessary to illustrate the subject matter.

The bill, left your house in time to reach the Exective Chamber before the termination of the session, but it lingered in the Senate waiting the termination of the secret setting which lasted till the session of the Legislature had expired, and by this means it was (as we say,) too late in reaching the Governor's hands. The present Constitution, as to the approval of the Governor of a bill which has passed the Senate and Assembly, is the re-enactment of the Constitution of 1777, with certain alterations.

The Constitution of 1777, states in the preamble of the Section, as follows:

"And whereas, laws inconsistent with the spirit of this Constitution, or with the public good, may be hastily and unadvisedly passed."

The next paragraph of the same section, states:

"And in order to prevent any unnecessary delay, be it further Ordained, That if any bill shall not be returned by the Council within ten days after it shall have been presented, the same shall be a law, *unless the Legislature shall, by their adjournment, render a return of the said bill, within ten days, impracticable, in which case, the bill shall be returned on the first day of their meeting, to the Legislature, after the expiration of the said ten days.*"

In the present Constitution, the words are:

"If any bill shall not be returned by the Governor, within ten days, (Sundays excepted,) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it, *unless the Legislature shall, by their adjournment, prevent its return, in which case it shall not be a law.*"

Now sir, allow me to give you another reference: in the Journal of the House of Assembly, of 1691, (see copy in the State Library,) and under the head of

"Die Veneris, 10 ho, A. M., Sept. 25th, 1691.

The bill for regulating the buildings, &c., read a third time and passed, and ordered to be sent up to the Commander-in-Chief and Council, for their assent.

Ordered, That Alderman Merrett, Mr. Courtland, Mr. Beeckman and Mr. Rensaleer, do carry up the two bills (*ut supra*) to the Commander-in-Chief and Council, for their assent."

"The gentlemen returned from the Fort; say they delivered the *two* bills, *(ut supra,)* and the Commander-in-Chief and Council, say, *it is very well*, they will make all speed imaginable."

"Die Jovis, 10 ho, A. M., Oct. 1st, 1691.

Upon reading the petition of the Mayor, Aldermen and Commonalty of the City of New York, together with the proviso transmitted to the House by the Commander-in-Chief and Council, for consideration; *Ordered*, that the *proviso* be annexed to said bill, and sent up to the Commander-in-Chief and Council, for their assent, &c."

This proviso was in the words following:

"Always provided, and be it further enacted, &c., That nothing herein contained,

shall be construed to change, alter, shorten, lengthen, narrow or enlarge any of the streets, al*lies*, and lanes, as they are now laid out, and remain at the publication thereof, nor to break through any person's ground, now in fence or enclosed, or to take away any persons' house or habitation, any thing herein contained, to the contrary hereof in any wise, notwithstanding."

You will find in an old volume of laws, now in the State Library, published in London about 1718, the act in question, with this *proviso*, both of which, it is therein stated, were approved by King William, May 11th, 1697, *old style*. You will, in the Constitution of 1777, in Section 35, see that this act was confirmed by that instrument, and made a law of the State of New York. It is very instructing to compare this ancient law, passed in 1691, for the protection of private property, with this modern bill in question, of 1843, for the destruction of private property, for such is the practical working of the two bills. Now, had his Excellency been allowed time to have examined this bill and remonstrances, &c., and the amendments agreed to by the Standing Committee on the incorporation of cities and villages, we have no doubt he would have returned the bill to the Senate for re-consideration. The amendments which we have before given copies of, were, two of them, reported with the bill, by Mr. Redington. Mr. White says, in his letter, that he advocated one of them, which was reported with the bill by Mr. Redington. In your letter of 30th ult., you say: 'Not exactly understanding myself, what condition the bill was in, I sent for Mr. Jones to my desk, and enquired what he meant by this report, to which he replied, that he had struck (taken) out the there amendments of Mr. R,' admitting that were more than one.

The amendment designated in this communication as §9, if attached to the bill would have nullified it, and besides, it would have exposed the features of the whole bill upon its very face, and would present a sad picture to look at a century from this, if our government should last so long, a result which is quite uncertain, when hasty legislation brings it to the very verge of despotism.

I dwell long upon this matter, because it is important, and because what is here chronicled is admonitory, our desire is not to speak unkindly of any individual, it is the promotion of public good we aim at.

Legislation is the foundation of law, and although in the revision of the Constitution, first formed, the Legislative department of the government is increased in power, yet the frequency of elections is some check upon arbitrary legislation, and the Executive has the means to check hasty legislation.

Where responsibility is divided, as it is in legislative bodies, by the increase of numbers, there is little fear of blame, as it is shared by all, and therefore heeded by none.

In order that you may form an idea of the opinions of men of standing and respectability in this community, of the provisions of the bill authorizing the Mayor, Aldermen and Commonalty, to purchase at their own assessment sales, I have here inserted the copy of a remonstrance, presented in the Board of Aldermen, on the 3d of July, 1843, by Alderman Tillou, against the appropriation of near one quarter of a million of dollars, by Alfred A. Smith, City Comptroler, for the purchase of lands to be sold for assessments. It is in the words following:

"To the Common Council of the City of New York:

"The undersigned represent that they are informed that an application has been made by the City Comptroller to the Board of Aldermen, for an appropriation of Two Hundred and Forty Thousand Dollars, to pay for land bid off at the Assessment sale.

The undersigned remonstrate against any appropriation whatever of the mony of the people for such **UNWORTHY PURPOSES.** against the increase of city debt, against the increase of county taxes, against the attempt to increase the amount of public property not absolutely necessary for public use, and ask the Common Council to discountenance the odious assessment abuses, which are notoriously of an aggravated character.

The undersigned disapprove of the application to the Legislature for the passage of a law to authorize the Corporation to become purchasers at assessment sales, AND OF THE MEANS AND REPRESENTATIONS MADE, TO PROCURE THE PASSAGE OF THE SAID ACT, and they believe that the law is disapproved by the good men of all parties in the city.

And your Memorialists, &c."

This remonstrance is signed by the venerable Jonathan Thompson, one of the most inteligent and upright men in the land, a man full of experience; and by William B. Crosby, Robert C. Cornell, William W. Fox, George Griswold, John Haggerty, Brown, Brothers & Co., John M. Bradhurst, Robert Smith, Burtis Skidmore, John Anthon, Abraham G. Thompson, James Fellows, and James A. Burtis, gentlemen of the highest standing in this community. Men, whose opinions in matters of this kind, in the community in which they live, are considered conclusive.

Alderman Tillou also presented several other remonstrances of the same tenor, at the same time.

This bill, which authorizes the Mayor, Aldermen and Commonalty, to purchase at assessment sales, indirectly, indeed I think I may say *directly* sanctions assessments which have been imposed upon private property in violation of the Constitution of this State, which is the fundamental law of the Commonwealth. Some of these assessments are claimed to have been made by officers appointed by the persons exercising the office of Justices of the Supreme Court, of this State, which the Constitution prohibits from exercising '*any other office or trust*" but such as are incident to their judicial duties. In this view of that question, I am sustained by the learned Mr. Justice Cowen, who, in a recent opinion given by that distinguished Jurist, he says:

"It is indeed, difficult to see what the provision in the Constitution, against a Judge holding any other office, is worth to the people of this State, if it can be avoided by turning him into a Commissioner of highways, a Trustee of Colleges, &c., as the Legislature have in several instances, done. They have also, I believe, been declared members of the Police Courts, in the City of New York. The office of Sheriff for that City, or indeed any County in the State, might perhaps, with as much constitutional propriety have been imposed, as some of the duties I have attended to, and had the question been made, as I admit *it should have been*, a reconsideration by the Legislature would have probably ensued, and the evil of interruption of the regular business of the Court been prevented."

Now sir, this able opinion of this learned Jurist, is precisely to the point, and besides, it is given in a case in which the assessments on these very lands, which the Mayor, Aldermen, &c., have bid off, at their own sale, under this very act, were in controversy, and had this bill been sent to his Excellency the Governor, before the adjournment of the Legislature, this very objection would have been brought to the notice of His Excellency, and we are confident, that after looking deliberately and carefully into the unconstitutionality of the bill, he would have returned it with the objection named, and the Legislature would have put the bill among the waste papers. But the Legislature having become *functus officio*, in the eye of the Constitution, it was no use to return to that body, a bill of this kind, and therefore we say, it was extinguished by the Constitution.

Another objection to this bill in its operations and principles, viz: some of the assessments imposed on the lands sought to be bid off by the Corporation under this bill, were assessed by officers appointed by the Common Council of New York, and the assessments ratified by such Common Council, which act they claim to be legislative. Now, sir, the legislative power of this State, is vested by the Constitution in a Senate and Assembly, the Senate is to be composed of freeholders elected at a certain time, for a specified term, by persons having certain qualifications, who are on a certain day to perform this duty. The Assembly is to be composed of a certain number of persons, elected for a certain term, on a certain day, &c. These persons elected, are to assemble at a certain place, on a certain day, and

these respective bodies of Senate and Assembly, are to make rules, &c., keep a journal of their proceedings, and publish the same, &c. Then the Constitution goes on to point out in what manner a bill is to be passed, &c. &c.

Here is a special power given to a select class of persons, to perform certain duties of themselves, in the proper persons of their several respective members. There is no officiating by proxy, no clause in the grant of power, authorizing any other persons, or body politic or corporate, to pass laws. Therefore, the Senate and Assembly cannot delegate their legislative powers, or any portion of them; and the legislation of the Common Council of this City, therefore, in reference to these assessments, is a violation of the Constitution of this State.

This bill, authorizing the Mayor, Aldermen, &c., to buy land for their own odious and mischievious assessments, indirectly sanctions the taking of private property without first making just compensation therefor, which is a violation of one of those great principles on which our government is founded, for without security to private property, liberty is but a name. Now sir, look at the case, complained of to your House by Mr. Benson; here is stated a most flagrant violation of the Constitution, his land assessed 26 times its worth: can you imagine a more flagrant case, and yet Mr. Benson's land, thus assessed, has been already bid off by the Mayor, Aldermen and Commonalty, under this very act, for the term of 1000 years. Sir, the English language lacks words to convey a proper expression of indignation in this case, under the circumstances.

Under this bill, the Corporation may, in a twelvemonth, assess every estate on the island of New-York, ten times the value of the estates, set them up at auction, and buy all themselves, and thus become lords of the soil.

You may search the annals of legislation, throughout the records of every legislative Assembly on the globe, for a law to be compared to this in its grant of power, and I may add that the combined powers of every written Constitution now extant, does not, in the vast aggregate, contain as much power as this *manuscript* bill.

And yet this bill has found its way through the halls of legislation—a perfect mute until the last finish—when it assumes the attitude of a devouring monster, I may say a perfect cannibal, for it gloats on human misery, which, in its origin of suffering, extinguishes mortal life.

Picture to your own mind the home of the aged, the infirm, desolated by this monster law, and then you will with me say, that it would have been better that it had never been thought of.

One of our Committee remarked, that there was but one case that could come any thing near this in comparison, and this is, that of the government of Egypt, in the days of the Pharaohs, but that case grew out of a famine: first, the government obtained all the money, next the cattle, then the land, and after this, the people themselves, for slaves. This bill consummates all of these but the last, and yet this bill is the act of the government of one of the States of the American Republic.

I cannot close this communication without first calling your attention to several memorials presented in the house of Assembly from the Chapel street sufferers in the city of New York. The citizens inhabiting a small district, were assessed near three hundred thousand dollars, some of the proceedings complained of are of a most reprehensible and shameful character. The citizens in a considerable portion of the assessed district were actually injured, including the assessment they were called upon to pay more than a quarter of a million of dollars, and it was to consummate this most disgraceful and wicked assessment that some of the officers of the corporation were anxious for the passage of this act. More than one hundred thousand dollars worth of property was advertised for sale for this odious assessment. In order that you may form some opinion of the injustice of this proceeding I will make a quotation from three, distinct and separate official reports, made by Committees of the Common Council, which are now in the archives of the Senate and Assembly.

First, for the Report of the Committee on assessments of the Board of Assistant Aldermen, known as doc. No. 9, of 1338, *as follows:*

"That the Committee devoted much time and labor in examining the subject submitted to them, that they have had before them several persons who fully set forth all the facts and circumstances connected with this subject, and have fully established the fact that the laying of the new sewer was entirely unnecessary, and consequently an expenditure without any possible good to the parties interested, who are now called upon to pay large sums of money without the least equivalent therefor."

The Report was signed by all the Committee and concluded with the following resolution:

"Resolved that the expenses of repairing chapel street be paid by the common council and that the Comptroller allow a warranty for the amount thereof."

This report was recommitted and a second unanimous report made which contains a section in the words following:

"Mr. Shepherd, the Superintendent to the building of the new sewer in Chapel Street, appeared before your committee and stated that the old sewer was as good when it was taken up as any new one could be made. It was larger than the new one now is, being six feet square, and the new one but four feet six inches in diameter, consequently was an unnecessary expense of $16,571,00 and paid, and cannot carry off near as much water as the old one."

This report concludes with the following resolution:

"Resolved that the Comptroller draw his warrant for $30,413,34, being the amount for repairing" &c.

This report was unanimous, and was again recommitted on the application of the sufferers, so as to include the sewer, and the committee on laws was also added to the reference, with the committee on assessments making a joint committee.

The Joint Committee made a report known as Document No. 22 of 1839, which more than sustains the report previously made and concludes with two resolutions in the words following:

"Resolved, That the Comptroller draw warrants in favor of the owners of property on Chapel street between Canal street and the center of the block, between Franklin and Leonard street; and also on the intersecting street intermediate, for the sums paid by them for building the new sewer and the recent regulating and paving of Chapel street and streets intersecting the same."

"Resolved, That the assessments upon property as above, which have not been paid, be remitted and that the Comptroller draw his warrant for the amount in favor of the Contractor."

This report was signed by all the Committee and was adopted by the Board by a vote of 11 to 2.

It was then sent to the other board for concurrence where it remained without having been acted upon by the management of some reckless persons belonging to the corporation.

It was property on which this assessment was imposed that the bill in question was passed to authorise the Corporation to bid off.

I forbear to comment—my pen is inadequate to express the measure of astonishment that fills my mind in comtemplating the enormities which this act is sought to cover.

I could lengthen out this detail until the recital would cover scores of reams of paper and then should only but be at the beginning.

You saw the lobby that was in attendance on the Legislature to procure the passage of this act—it is an offspring worthy of its parentage, but it is astonishing that the members of the legislature should have been so deceived.

The Legislature will be asked to investigate the passage of the bill, authorizing the Corporation to buy lands for assessments, in reference to the movements made by others in the matter, not connected with the Legislature.

I will send you a printed copy of our correspondence upon this important subject.

In the mean time,

Believe me to be, sincerely,

Your Friend,

E. Meriam,

Of the New York Citizens' Committe.

H. N. Wales,

Clerk of Assembly.

ASSESSMENTS ILLUSTRATED.

Document No. 48.

BOARD OF ALDERMEN,

DECEMBER 18, 1837.

Report of the Commitee on Assessments, in favor of confirming the assessment for filling the low grounds, between 108th and 124th streets, andbetween the 5th and 8th avenues. Laid on the table and ordered to be printed for the use of the members.

THOMAS BOLTON, Clerk.

—

The Committee on assessments, to whom was referred the annexed assessments for filling low grounds, between 110th and 111th streets,and between the 7th and 8th avenues, together with a remonstrance against the same, respectfully

REPORT:

That in pursuance of a resolution and ordinance passed by the Common Council, in March 1836, contracts were made by the Street Commissioner to fill in low or marshy grounds, as described in the ordinance, lying between 108th and 124th streets and between the 5th and 8th avenues, in which were included the filling embraced by the assessment. The filling, as will be seen by the maps attached to the assessment, comprises about thirty lots, within which was contained a pond, occupying about six lots within which received the greater proportion of the filling. The number of loads filled is 28,932, amounting to $2,972 10. The objections are from the executors of the estate of Valentine Nutter, who contend, that although the ground filled is within the limits described in the ordinance, it was not the ground intended to be filled by the report upon which the resolution and ordinance were founded; that the report had special reference to the meadow marsh, on the line of the Harlem Canal, which is stated was about the level of high water; and that consequently it could not have been supposed to apply to the land of the estate which is about nineteen feet above high water; and that although the resolution and ordinance was so drawn as to probably lead the street Commissioner into error, yet that such error ought not to prove their misfortune. They also state that they called at the Street Commissioner's office to inquire the object of this ordinance, and was there informed that it had reference only to the creek along the canal; and, that being thus unintentionally misled, they had no knowledge of the work until the time when they remonstrated, which was by accident, and that they therefore had it not in their power to offer a more seasonable remonstrance.

The Committee remark, that if such information was obtained, it must have been prior to the time of the present Street Commissioner, as he states that no such information was given by him; that he never saw the report on this subject until since the ground has been filled, it having been made, and the ordinance having been passed, before he came into the office, and that he was not aware of any objections being made until the work was nearly completed.

The Committee have had several deliberations upon this subject, and had been attended by the remonstrants, and they are constrained to say that the case is a hard one for the estate; they are, however, decidedly of opinion that the grounds in question are embraced by the ordinance and resolution, which without reference to the reports, to which they are attached, are in all cases intended as guides to executive officers, in making their contracts; and that although the report refers particularly to the marsh along the line of the canal, they cannot presume, from that circumstance, to say that it was not the intention of the Committee who made the report, to include the ground under consideration, which though not the low or marshy ground alluded to in the report, is nevertheless low ground in comparison with the ground adjacent, and was of a marshy character. Your Committee have therefore come to the conclusion that as the ground was filled, in pursuance of a resolution and ordinance of the Common Council which embraced it, and which, without reference to the report, are considered as fully expressing the intentions of the Common Council in the matters to which they relate, that the assessment ought to be confirmed, and they recommend its confirmation accordingly and offer the following resolution:

Resolved, that the assessment for filling the low ground, between 110th and 111th streets. contained in the assessment list be confirmed, and that C. S. Van Winkle be appointed Collector.

ISAAC L. VARIAN,
EDWARD TAYLOR.

—

REMARKS.

This Assessment is stated to have been upon 30 lots, which is less than two acres of farming land, situate about six miles from the City Hall, worth less than five hundred dollars.

On this piece of ground was a fancy fish pond, fed by living springs; this the Corporation, by sheer gross blundering, filled up, and also levelled the land, changing the natural surface to a Corporation surface, and a more scandalous proceeding is hardly any where else to be met with, and yet, notwithstanding, two men who ought to know better, report in favor of confirming the assessment. Such kind of proceedings are really what may be called a monument of shame to a great city, possessing men of intelligence and understanding to manage its public concerns, in a different manner from what is here illustrated in the filling up of a fish pond of a country residence.

The Corporation might, with as much propriety and as much justice, made an assessment for filling up Long Island Sound, as to have assessed this estate, in the manner here set forth. There is no safety to the title of private property, under such a state of things. If lands can thus be depradated upon, they will cease to have any value. We will refer to this again.

We presume that the ordinance to authorize *Corporation Improvements*, was signed as approved upon wrapper. When will such proceedings have an end.

—

CONSTITUTIONAL QUESTION.

Resuming this question, which we had commenced on page 274, we proceed:

The approval, by His Excellency GOVERNOR BOUCK, of the act entitled "*An act to authorize the Mayor, Aldermen vnd Commonalty of the City of New York, to purchase lands for taxes and assessments, in certain cases, and for other purposes,*" as contrasted with the refusal of the Governor and Council of the Colony of New York, in 1691, in reference to a bill entitled "An act for regulating the buildings, streets, lanes, wharfs, docks and allies, of the City of New York," shows so great a contrast, that we deem it instructive to place these together in the examination. One hundred and fifty years intervened.

In 1691, the Mayor and Aldermen of New York, petitioned the General Assembly of the Colonies, for the passage of a bill which they presented, in relation to street improvements. Two members of the Common Council of New York, at that time, were members of the Assembly, the bill was passed in the Assembly in precisely the form and shape in which the Mayor and Aldermen of New York asked; a committee was appointed to carry the bill to the Governor and Council, consisting of Alderman Merritt, Mr. Courtland, Mr. Beeckman and Mr. Rensaleer. The committee returned and reported to the Assembly, that they had delivered the bill to the Governor and Council, and that they said "*it is very well, they will make all speed imaginable.*" This was on the 25th of September; on the 1st of October, the Governor and Council returned the bill to the Assembly, with a *proviso* in the words following:

"*Always provided, and be it further enacted, &c., That nothing herein contained, shall be construed to change, alter, shorten, lengthen, narrow or enlarge, any of the streets, allies and lanes, within this city, as they are now laid out and remain, at the publication thereof, nor to break through any person's grounds now in fence or enclosed, or to take away any person's house or habitation, any thing herein contained to the contrary hereof, in any wise, notwithstanking.*"

Upon reading the petition of the Mayor, Aldermen and Commonalty of the City of New York, together with the *proviso* transmitted to the House by the Commander-in-Chief, for consideration.

Ordered, That Alderman Meritt, Aldermen Kipp, Mr. Van Schaick and Mr. Whitehead, do carry up the said bill and *proviso*, &c."

Here is seen, calm, deliberate examination of a bill, passed by the Assembly by an unanimous vote, and a bill against which no remonstrance had been presented, but the

Governor and Council refused their assent to the bill, and returned it with a *proviso* which would protect private property. The Assembly reconsider the bill, pass it with the amendment suggested by the Governor and Council, and again send it to the Governor and Council for their assent, and this assent to the amended bill was given. On the 11th of May 1697, the King gave to this bill his Royal assent, and it became a law of the colony, and remained on the Statute Book near one hundred years. It was recognized and confirmed by the Constitution of 1777, but was repealed in 1787 by the Legislature.

This is the first exercise of the *Veto* power of the Colonial Government of New York.

Now let us state the approval by His Excellency Gov. Bouck, of the bill which authorizes the Corporation of New York, to buy lands for assessments.

This bill was petitioned for by the Clerk of the Common Council of the City of New York, but the petition is endorsed as that of the Mayor, Aldermen and Commonalty of the City of New York. The petition is presented by an Ex-member of the Common Council of the same city, and referred to a Committee of which he is Chairman, and another Ex-member of the Common Council, a member. In two days after this Committee report the bill presented from the Clerk of the Common Council, and in this report, the Committee state the petition to be a petition of the "Common Council."

As we have given the various proceedings in reference to this bill, in the Senate and Assembly, in the preceding pages, we will at once proceed to discuss the approval of this bill by His Excellency the Governor.

The Constitution allows the Executive ten days to examine a bill which the Legislature have passed through the respective branches, and this is a short time to examine an important bill, considering the other labors constantly pressing upon the Governor. It has been the practice, both in the National and State Legislature, near the close of the Session, to send important bills to the Executive, in bundles, and so numerous and so lengthy, that that officer must be very industrious even to read the bills that he is required to sign and return to the Legislature.

The framers of the Constitution, had a great object in view, in the framing the clause giving the Governor a qualified negative upon the acts of the Legislature, viz:

To check hasty and inconsiderate legislation.

In contrasting the provisions of the Constitution of 1777, with those of the present Constitution, we find this difference, which constitutes a great distinction.

In the former Constitution, the Executive had the power to prorogue the Legislature, and send the members home to their constituents, *this was a guard against, and a restraint upon, arbitrary legislation.* Under the former Constitution, a bill passed by the Legislature, must, before it could become a law, be submitted to the Council of Revision, composed of the Governor, the Justices of the Supreme Court and Chancellor, or the Governor and any two of the officers last above named; if the bill was not approved by them, it must be returned with the objections, within ten days, to that House in which it had originated: these objections must be entered at large upon their Journal, and then that House must proceed to consider the objections, and also reconsider the said bill! If, after such reconsideration, *two thirds of that House* agree to pass it, notwithstanding the objections, then they shall send it to the other House with the objections, and if two thirds of all the members *present* in that House, agree to pass it, notwithstanding the objections, then it shall be a law.

In the former Constitution, the preamble to the clause, declares the purpose, and it is in these words:

"*And whereas, laws inconsistent with the spirit of the Constitution, or with the public good, may be hastily and unadvisedly passed.*"

An additional paragraph, in the same section, says:

"*And in order to prevent any unnecessary delays;*

"*Be it further ordained, that if any bill shall not be returned by the Council, within ten days after it shall have been presented, the same shall be a law, unless the Legislature shall, by their adjournment, render a return of the said bill, within ten days, impracticable; in which case, the bill shall be returned on the first day of the meeting of the Legislature, after the expiration of the said ten days.*"

The present Constitution contains this clause:

"*If any bill shall not be returned by the Governor, within ten days, (Sundays excepted,) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it, unless the Legislature shall, by their adjournment, prevent its return; in which case, it shall not be a law.*"

We have here, in the various provisions which we have quoted, the mischief suggested and the remedy provided, and although in the present Constitution, the preamble suggesting the mischief, is omitted, yet the provision providing a remedy, is given with great particularity, and a marked difference is to be seen by comparing the provisions in the two Constitutions together as to the force of a bill remaining in the hands of the Executive, after the adjournment of the Legislature. Under the former Constitution, it could be returned on the first day of the next Session, but under the present Constitution, a bill under such circumstances, is prohibited from becoming a law.

The Constitution makes no provision for a bill being signed, under any circumstances, by the Executive, after the Legislature have adjourned, and its provisions imply that all bills, whether approved or disapproved, shall be returned to the House in which such bill originated, and the practice has been uniform as to the return of all bills.

If we look back to the Colonial Government for a commencement of this system, we shall find in the Journal of Assembly, of 1691, (which is the first printed Journal extant in the Colony,) as follows:

"Die Jovis, 10 ho., A. M., October 1, 1691.

"*Ordered, That Alderman Merritt, Alderman Kipp, Mr. Van Schaick, and Mr. Whitehead, do carry up the said bill and proviso, and acquaint the Commander-in-Chief and Council, that the House waits their commands, when to attend the publication of acts passed this Session.*"

The practice in these early times, was to assemble the people together, in front of the Government House, by the ringing of three bells, on which occasion, the Governor and Council, and Members of Assembly, attended, and the acts passed, were publicly read, this was termed the publication, here was deliberation and caution.

The provision of the Constitution, which allows the Executive ten days, exclusive of Sundays, has no force in cases like the one in question, where the Legislature are actually adjourned before the bill is sent for the approval of the Executive; for, instead of ten days, he was not allowed ten minutes. Surely, those who are to frame laws, should be more careful of keeping within the provisions of the great fundamental law, which is the foundation upon which our Statutes rest.

The qualified negative possessed by the Executive of the United States, is expressed in the same words as that of the Executive of this State, and the provision of our State Constitution is copied from that of the United States Constitution, except that our Constitution specifies that the vote of two thirds, shall be of the members *present*, whereas, that of the Constitution of the United States, designates that it shall be two thirds of the House, &c.

The qualified negative of the President, is a subject which has excited intense interest, and not on the ground that it is insufficient to correct hasty legislation, but with a view to restrain arbitrary legislation. One of the great political parties, wish to make the negative more qualified, and only allow it to correct hasty legislation, while the other party insist that the existing provision should be retained to restrain arbitrary legislation.

Hasty legislation could be corrected by a majority vote.

A very important bill was passed by both branches of the Legislature of the State of New York, near the close of the Session of the Legislature of 1842, in reference to the sales of lands to pay assessments. This bill was passed by both Houses, by a unanimous vote, and was sent to His Excellency Gov. Seward, for his approval. One of the delegates of the Anti-Assessment Committee, was at Albany at the time the bill reached the Executive Chamber, and he at once represented to His Excellency, that the bill contained provisions which ought not to be-

come a law. These representations were reduced to writing, and placed in the hands of the Executive. The gentleman who was in attendance upon the Legislature, to procure its passage, learnt that objections in writing were in the hands of the Executive, and he called on Gov. SEWARD. His Excellency gave him the written objections, and the gentleman called on the Delegate of the Anti-Assessment Committee, with them, and urged their withdrawal, but not succeeding, he applied again to the GOVERNOR, and stated, that if an opportunity could be afforded him, he would convince the Executive that the objections to the bill becoming a law, were not well founded. His Excellency appointed to hear both parties, at his residence, that evening; both gentlemen attended, and the matter was discussed at great length, and resulted in the refusal of approval of the bill, unless an alteration was made in its provisions, which was decided on. His Excellency returned the bill to the Senate and also to the Assembly, with a special message, making a suggestion as to the alteration, which was unanimously agreed to by both Houses. Had this bill been sent to him after the Legislature had adjourned, he could not have bestowed this labor and time upon it.

The negative vested in the Executive department of most governments, is absolute; but in the Government of the United States, it is greatly qualified, and besides, the frequency of elections, add an additional qualification. We have discussed the Veto power in the previous pages of this volume, to which the reader is referred.

A strict construction of our Constitution, is insisted upon by our high Judicial officers. We have, previously, quoted Judge Bronson's opinion, on page 284, of this number, in a particular case, and we now quote the opinions of two other Senators, in the same case, delivered in the Court for the Correction of Errors, which we ask the reader to apply in this case—as follows:

We also quote,

SENATOR RUGER,

"To maintain the Constitution, is our first duty; and if the Legislature has, for any cause, encroached upon that sacred instrument, or if an erroneous construction has been given to it, we are imperatively called upon to declare its meaning, and to assert its supremacy. Nothing can be more dangerous to our free institutions, or to the rights of the people, than to encourage doubtful interpretations of the Constitution, contrary to its more plain and natural import, as understood by the great body of its readers. The view taken of this question, by Mr. Justice Bronson, should be attentively read by every individual in our State, who considers the Constitution worth preserving."—4, Hill 418.

The Senate and Assembly, are required, by the provisions of the Constitution, to make rules for the government of their respective Houses, to keep Journals, and publish the same. They have done all this, and none of these Journals show that this bill was sent to His Excellency, the Governor, after 4 o'clock, although such is the fact. The concurrent resolution, which limited the Session to 4 o'clock, P. M., of the 18th of April, stands upon both the Journals of the Senate and Assembly, unrepealed, and this, of itself, is conclusive as to the period of the termination of the Session.

There is nothing to justify a presumption of an extension of the Session, until that resolution should be first rescinded.

our Hon-
port the
s fees in
Supreme
the re-

ports of commissioners of estimate and assessments, for the opening of streets, avenues and public squares in the city of New York, subsequent to April 20, 1839, specifying each proceeding, the charges made in each, to whom and when paid, I beg leave respectfully to

REPORT:

That I have examined the minutes of the Supreme Court in this city, and find that proceedings have been had in the said court in the matter of confirming the report of commissioners in two cases only, to wit: one relative to widening Anthony-street from Hudson-street to Orange street, and extending it from Orange-street to Chatham-street, in the fifth and sixth wards of this city; and another relative to the widening of William st. from Maiden lane to Frankfort street, and extending it from Frankfort street to Chatham street, in the second and fourth wards of this city; which proceedings were had on the twenty-fifth day of May, 1839, and no account of the fees and court charges therefor was kept; it being more than a month before the law of 1839, requiring an account to be kept, went into effect. Said charges were made to Robert Emmet, Esq. and paid by him, but I cannot say when."

—

Report of J. K. Paige Clerk, Supreme Court Albany.

"SUPREME COURT CLERK'S OFFICE,
Albany, 6th March 1843.

To the Hon. the Senate:

The Clerk of the Supreme Court at Albany, respectfully reports:

That he does not understand what is intended by the term "court charges" contained in said resolution, and in relation to which he is required to report. All, therefore, that he can state on this subject is, that no "*court charges*" appear on any of the files or records in this office, in the matter of confirming reports of estimate and assessment.

The 'clerk's fees' for services rendered in this office since the 20th April, 1839, are as follows:

1839		
June 5.	Entering rule, opening a new street in 12th ward—confirming report of commissioners, fol. 33, and certified copy ½ fees	$5.94
" "	Entering rule, opening Art.—street—confirming report, fol. 3, and copy. ½ fees,	81
" "	Do. 85 street—appointment of com'rs, fol. 6, $1.08, and copy ½ fees, $0.54,	1.62
" "	Do. Avenue A—appointment of com'rs, fol. 9, $1.62, and copy ½ fees, $0.81,	2.43
" "	Do. 18th street—appointment of com'rs,	

		fol. 5, $0,90, and copy. ½ fees, $.45,	1.35
"	"	Do. 97th street—appointment of com'rs, fol. 5, $0.90, ½ fees for copy,	1.35
			—— $13.50
"	"	Art street, extended rule to confirm, fol. 454, ½ fees,	40.86
"	"	Certified copy of the same, ½ fees.	40.86
June term.		Filing 37 term papers in these cases,	2.22
			—— 83.94
			$97.44

The above charges of $97.44 were made to G. F. Tallman, Esq., the Attorney, and the amount was paid by him to John K. Paige, Clerk, &c., on the 12th day of February, 1840.

1839.		Mount Morris Square entering rule suspending confirmation of report and copy ½ fees,	$0.27
June 6.			
"	"	123d and 131st streets and 12th avenue, report and copy ½ fees,	27
"	"	39th street—entering rule, suspending confirmation of report, and copy ½ fees,	27
"	"	Avenue A.—rule confirming report & copy do.	81
"	"	Sixth Avenue do.	81
"	"	83, 84, and 85th streets entering rule to confirm report and copy ½ fees.	81
"	"	90th street, do.	81
"	"	94th, do do	81
"	"	36th, do do	81
"	"	1st avenue, do	81
"	"	12th street, do	81
June term.		Filing 83 papers in the above	4.98
			$12.27

The above amount of $12.27 was charged to the attorney, and has not been paid. A part of the business, of June term 1839, in extending the rules for confirmation in the above cases, and copies of same is not completed; and the amount to be charged for the same, cannot be stated until the number of folios is ascertained. The fees for entering the rules are eighteen cents for each folio, and the same for copies.

By an arrangement between the attorney and the clerk, the attorney is allowed to retain one-half the clerk's fees, for entering the extended rules and copies, to defray the expenses of having them written out to furnish to the clerk. The attorney is then charged with the remaining half of the clerk's fees allowed by law.

1839.			
Sept. 3.		John Street—entering rule to confirm and copy,	$0.36
"		Filing 34 papers in same,	1.36
"	4	30th street entering rule to refer back and copy,	36
		Filing 36 term papers,	1.44
"		Anthony st., entering rule to discontinue,	12
"		William street, entering rule to discontinue,	12
		Filing 28 papers in same,	1.12
"		2d avenue—filing 11 papers,	44
"	4.	Anthony and William streets certified copies of rules	24
"	4.	Mount Morris Square—filing 9 papers	36
Dec.	4.	11th avenue, 12th avenue, 123d street and 131st street—entering rule, vacating and discontinuing proceedings and copy,	36
1840.			
June	3.	Cherry street—entering rule to suspend motion to confirm report and copy,	24
"	"	29th street, do.	24
"	"	30th street, do.	24
"	"	39th street, do.	24
"	"	12th street, entering rule to confirm and copy	24
		Filing 7 term papers,	28
			—— $7.76

The above sum of $7.76, was charged to Robert Emmet, Esq., the Attorney and was by him paid to John K. Paige, clerk, &c., on the 4th day of September, 1840.

1840.			
Aug.	7.	Cherry street—entering rule to confirm and copy	$0.24
"	"	29th street, do.	24
"	"	30th street, do.	24
"	"	39th street, do.	24
	7.	Cherry street—entering rule to discontinue proeecdings and copy,	24
		Filing one term paper,	04
			—— $1.24

The above sum of $1.24, was charged to Robert Emmet, Esq. the Attorney, and became payable on the 1st day of January, 1841, and the same not having been paid in the office, was in the month of April, 1841, transmitted to the Clerk of the Supreme Court in the city of New York for collection, pursuant to the act of 1839, sec. 13, chap. 288, and by the books of this office, it does not appear that the same has been paid.

1841.			
Jan.	4.	39th street—entering rule to refer back report and copy	$0.30
"		30th street—do. to confirm report and copy,	30
"		29th street—do.	30
			—— $0.90

The above 90 cents was charged to the attorney, and became payable on the 1st of July, 1841, and not being paid, was in the month of October, transmitted as before for collection, and it does not appear that the same has been paid.

" JNO. KEYES PAIGE, Clerk.

Extract from the testimony of John Ewen Street Commissioner, from Senate Doc. No. 100 of 1842 pg. 43.

Opening Second avenue from Twenty-ninth to Eighty-sixth street.

October 31st, 1839.

" Received from the street commissioner, bond A 27, for seven hundred and sixty dollars being the amount of fees to Henry P. Robertson, in the matter of opening the Second avenue from twenty ninth to Eighty-sixth street.

$760.

(Signed,) FRAS. FICKETT.

December 20.

" Received from the street commissioner warrant 3,605 for $33.55, and bonds A No. 41 and A No. 42, for $1000 each, making twenty hundred and thirty-three dollars and fifty-five cents, for attorney's fees and court charges in the above matter.

$2.033.55.

(Signed) R. EMMETT.

December 20.

" Received from the street commissioner warrant No. 3,608 for four dollars and seventy-two cents, and bond A. No. 75, for seven hundred and fifty dollars, and bond A No. 76 for eleven hundred and fifty dollars, making nineteen hundred and four dollars and seventy-two cents; being in full for fees and expenses in the matter of opening the above.

$1.904.72.

(Signed,) JOHN LEONARD, for self and A. MILLS.

December 20.

" Received from the street commissioner bond A No. 77, for seventen hundred dollars in full for surveys and maps in the above matter.

$1,700.

Signed for EDWIN SMITH.
GARDNER A. SAGE.

" The commissioners' fees, counsel fees, and other expenses on said avenue, were principally paid by Richard I. Smith, the assistant street commissioner, whose duty it is by an ordinance of the common council to apply for the warrants for these moneys, and to pay over all moneys on assessments. That ordinance is an old one of fifteen years standing. The witness paid some of the items in those during the absence of the assistant street commissioner; he paid the commissioner Robertson's fees to Mr. Fickett, who had an assignment of the same and the expenses of the surveyor to Mr. Sage. The witness produced a copy of the original receipts for the expenses on Second avenue, on file in his, witness's, office, which are marked A, and signed G. F.—The present counsel of the corporation was appointed two years last May. The notice which that counsel gave to witness's office, not to pay such bills unless taxed, was after the payment of the above bills. The bills which the witness so paid were not taxed to his knowleege. The abstract of the report signed by the commissioner, containing the

aggregate amount of the expenses, awards and assessments, is the only voucher on which such payments were made; the claimants for such expenses were never in the habit of presenting any bills. Taxed bills for such proceedings have been paid in witness's office, but he cannot say that he has paid them, because it is not his duty to do so.—The witness thinks such taxed bills in the case of Cherry street, Anthony street, William street and the Bloomingdale road.—Witness is not certain as to Anthony or William street, or the Bloomingdale road.—Such however, is his impression. They were all cases in which the proceedings were discontinued and the report not confirmed. The witness has no knowledge of taxed bills in case where report was confirmed; his assistant has charge of that branch of the business: they might have been paid and the witness not know it. These expenses are paid upon the abstract of the commissioners' report; no bills of particulars are required further than is stated in that abstract. The witness does not know whether any bill for taxation in the matter of the Second avenue was filed; it might be filed in his office without his knowing it; there are three or four rooms in his office."

"The witness supposed that upon presenting the abstract of the report of the commissioner the expenses therein mentioned had been taxed by the Supreme Court as required by law, and that the officers of the corporation had no power to withold their payment. The first knowledge witness had such bills had not been taxed and the legal requirements complied with, he had from the present counsel of the corporation, (the witness does not recollect the time when he received such information, he recollects the circumstance,) since which the witness does not believe that any such charges have been paid without taxation. These charges are made upon the general authority of an ordinance passed some fifteen or twenty years since, and revised some three years. The ordinances were revised every three years until the passage of a law allowing them to remain in force until repealed.

REMARKS.

It will be seen by a comparison of the proceedings before the Senate Committee that, in the matter of the 2d avenue, the Attorney's fees and Court Charges amounted to $2.033.55, and by the returns made by Mr. Paige, Clerk of the Supreme Court, he says that he knows nothing about Court charges, and specified but one item of Clerk's fees in the matter of the 2d avenue, and this of only 44 cents.

Mr. Paige also states that the rules which belong to the the June term of 1839, were on the 6th of March 1843, near four years after, not yet entered. It is a matter of utter astonishment, that such important proceedings as these, which involve millions of dollars, should be thus managed.

The records of the Supreme Court of this State, to be thus unmade, years after the proper time, in fact that this record is wholly omitted, not only in this case, but in vast numbers of others, is a matter of perfect wonder. Surely, when this matter comes to the knowledge of the Supreme Court, we think that they will take measures in the premises. This report of the Clerk of the Supreme Court, sustains the view which Alderman Townsend took of these matters, in his examination before the Senate Committee, in 1841.

—

BOARD OF ASSISTANTS.

FILLING UP THE EARTH TO A DEAD LEVEL.

"To The Honorable,
The Common Council:

"The undersigned respectfully remonstrate against the proposition to fill up the low grounds, between 4th avenue and 8th avenue, because we are in favor of opening the Harlem Canal, from river to river, and the excavation of the same will serve to fill said grounds; but we do not object to the filling of the low grounds, near the route of the Canal, between 4th avenue and 108th street, to about 116th street, to prevent stagnant water from injuring the neighborhood.

Jno. R. Peters,
R. Stebbins,
William Wagstaff,
John Brower, by J. R. P.,
Jacob Brower, by J. R. P.,
Samuel Stebbins, Jr., by R. Stebbins,
O. Holmes, by R. Stebbins.
New York, February 8th. 1836."

The Committee to whom was referred the several petitions for the opening of the Canal or Sewer, from the North to the East river, between 108th and 127th streets,

Respectfully

REPORT,

"That the regulation of that portion of the City, lying between 109th and 113th sts., and extending westerly to the 8th avenue, which has been adopted by the Common Council, is based upon the proposition of making a Canal or Sewer, to carry off the surface water from the centre of the island, without a resort to high filling in that neighborhood, which would be, not only destructive to the property from the expense, but almost impossible from a deficiency of earth to fill up the same.

Your Committee are convinced of the necessity of some measure of this kind, to carry off the water, whenever the land shall have been graded for City purposes. In consequence of the opposition of some, largely interested in a portion of the land, adjoining the route of the proposed Canal or Sewer, they have postponed a decision on this part of the subject, with a view of obtaining additional information, and procuring some estimates of the expense of the proposed Canal.

In the meantime, however, they deem it necessary, that measures should immediately be adopted for the removal of a very serious evil, connected with this subject. The land through which the proposed Canal or Sewer was to run, was low ground, nearly, if not quite on a level with low-water-mark, so that formerly, the salt water at every tide would flow over the same. Since the avenue has been filled up over the same, and the working of the roads, as well as the improvments in regulating portions of the ground in that neighborhood, the ordinary water courses have become obstructed, and the flow of the salt water over the same, in a great measure, prevented. The consequence has been, that the accumulation of stagnant water, and the consequent decay of vegetable matter, has rendered this low ground a source of disease to those living in that neighboorhood, and during the past season to a very great extent. This your Committee believe, can be remedied, by filling up the same to the height of three feet. The law of the Legislature, authorizes the Common Council to order this done, independent of the regulation which has been adopted, and your Committee deem it to be the imperative duty of the Common Council, to take the necessary measures to preserve the health and lives of the citizens, even at some expense to individuals. But the course which the Committee propose in this matter, cannot be productive, in the end, of any injury to the owners of the land, inasmuch as the filling of three feet, will not raise the ground above the regulation, and the expense must be incurred in a short time, to bring the ground to a proper grade; nor will it interfere with the proposed Sewer or Canal, should it be found necessary to construct the same.

The Committee have had this measure advertised for objections, in the usual manner. They have received but one remonstrance, which is hereto annexed, and which is made, not from objection to the proposed filling, so much as from fear that it may prevent action on the subject of the Canal itself.

Believing this measure to be both expedient and necessary, your Committee offer the following resolutions, for the adoption of the Common Council.

Resolved, if the Board of Aldermen concur, That all the low and marshy ground lying between the fifth avenue and the eighth avenue, and between one hundred and eighth street and one hundred and twenty-fourth street, be filled up with good and wholesome earth, to the heighth of three feet above the present surface, that the same be done at the expense of the owners of the land so filled up and benefitted, according to the provisions of the Statute, in such case made and provided, and the Street Commissioner is hereby directed, to prepare and present the Ordinance proper for that purpose.

D. P. INGRAHAM,
A. STEWART,
JOHN V. GREENFIELD,
Committee on
Roads and Canals."

BOARD OF ALDERMEN,

FEBRUARY 29, 1836.

Present—ISAAC L. VARIAN, Esq., President.

"The Street Committee, to whom was referred the report, &c., of the Board of Assistants, to fill up the low grounds between the 5th and 8th avenues, from 108th to 124th street, presented the following report of concurrence.

The Street Committee, to whom was referred the report from the other Board, on the proposition to fill up the low grounds between the 5th and 8th avenues, from 108th to 124th street,

Respectfully

REPORT,

That your Committee have examined the within report, and are fully satisfied of the expediency of filling up the low grounds in the section of the island above named, and therefore recommend a concurrence in the resolution adopted by the Board of Assistant Aldermen on this subject, which is as follows:

Resolved, That all that low or marshy ground, lying between the fifth avenue and the eighth avenue, and between 108th street and 124th street, be filled up with good and wholesome earth, to the heighth of three feet above the present surface; that the same be done at the expense of the owners of the land so filled up and benefitted, according to the provisions of the Statute, in such case made and provided, and the Street Commissioner is hereby directed to prepare and present the Ordinance necessary for that purpose.

FRANCIS FICKETT,
SAMUEL PURDY,
EDWARD TAYLOR.

Which was adopted, and ordered to be sent to His Honor the Mayor, for approval."

REMARKS.

The above are the proceedings of the Common Council, which are the foundation of the assessment complained of, by the Executor of the Estate of Valentine Nutter, and upon which, Isaac, L. Varian and Edward Taylor, made the report, which is set forth in full, on page 304, of this number. We ask the reader to compare these proceedings with that report. Such ridiculous proceedings were never before known among men, who lay claim to the least share of common sense.

The present Street Commissioner, came into office on the 4th of May, 1836, and these proceedings were approved by Mr. Lawrence, the Mayor of the City of New York, in March, 1836.

The work must, therefore, have been done under the general superintendence of the present Street Commissioner.

The filling up of a fancy fish pond, at a country seat, under such proceedings, is a wonder of wonders.

The foregoing proceedings are the foundation of the measures subsequently carried into effect for making an assessment upon a salt meadow, to the amount of sixteen thousand and sixty three dollars, belonging to the estate of Sampson Benson.

The property assessed, was about ten and a half acres of salt meadow, worth less than one thousand dollars.

Under the same proceeding, the fancy fish pond, part of the estate of Valentine Nutter, deceased, was filled up at an expense of near $3,000.

Is there a Government on the face of the Globe, which boasts of a written Constitution, and a written code of Laws, that would for one single moment, attempt to justify such proceedings? We answer yes, and refer to the report signed by Messrs. Varian and Taylor, which Report is set forth on page 304.

These assessments were made by assessors, who were appointed by the Common Council, from among their own officers. The Street Commissioner, his Assistants and Clerk, were the assessors who made the assessments.

The Committee on Roads and Canals, in their Report, (see page 308,) in reference to this Salt Meadow, state, "*that formerly the salt water at every tide, would flow over the same.*"

Thus we have an admission, that public health did not require the filling of these salt meadows, and it might, with as much propriety, be urged that "BOREAS," in sweeping over them, generated miasma, as that salt water generated disease.

The Committee, however, admit, that the Corporation have filled up avenues over these meadows, and by that means, they say, "*the ordinary water courses have become obstructed, and the flow of the salt water over the same, is, in a great measure, prevented.*"

What an admission this, to base such proceedings as these upon! Proceedings, did we say? we might, with propriety, give them another name.

A stream of water, running through two tracts of land, belonging to different owners, which should be dammed up by the proprietor of one tract, so as to overflow the land of the other, would make the person causing the obstruction, liable for all damages arising from such overflow. This is well settled law.

In this case, the Corporation are liable, clearly so; and every decision of competent, intelligent Courts, have been in accordance with this principle.

None but ignorant public officers will hold any other doctrine.

The history of the World, from the period of the birth day of our great common ancestor, does not furnish a case which equals in absurdity, these proceedings, here under consideration.

These assessments are imposed upon the lands of the owners of the salt meadows, and of the fancy fish pond, for alledged BENEFITS conferred upon the property, and the interest on the amount of the assessment, for eight months, exceeds the whole value of the land, after this so called improvement, is made. What an absurdity! What a perversion of language, to call such a proceeding an improvement. Yet these proceedings, it is urged by some, are tolerated by public officers, who claim to be intelligent.

These proceedings are of too flagrant a character, to comment upon; and we are obliged to restrain our pen in the very commencement of our setting ont in these remarks. The law, under which these proceedings were had, should be forthwith repealed.

ORGANIZATION OF THE CITY GOVERNMENT.

This subject has been recently discussed among intelligent citizens, but not for the first time.

We leave off the use of the term "reorganize," and use the more appropriate word "organize."

It matters not what form of government we have, what laws are enacted to restrain the exercise of power; ignorant men will not understand them, and bad men will not obey them.

In New England, an individual would not be permitted to superintend a District School, without having first passed an examination before the Pastor of the Parish, as to his fitness; but in our City Government, men who could not pass muster at even such an examination, are placed in public office, the discharge of the duties of which, require a far more cultivated mind.

It is from this one cause, that our City has suffered greatly.

Our City Government, as to its powers, is precisely that of a Village Corporation, and nothing more.

The State is a Sovereignity, and not the City. The City Charter is mere Statute Law, passed by the State Legislature.

Some gentleman, in speaking of the powers exercised by the Common Council, in assessment matters, treat the City Charter as a Constitution. This is not a proper view to take of it. It is not a Constitution.

Assessments are imposed by the Common Council, in pursuance of some express Statute law, and the power might as well be conferred upon the Coroner of the County, as upon the members of the two Boards, composing the Common Council. Whichever perform the duties, authorized by the law, must keep within the letter of the law, otherwise their acts are void, and they become trespassers, and are liable to prosecution.

The amended Charter, as chapter 122, of the Session Laws of the State, of 1830, is called, is in practice, a dead letter.

There is not a single section in that Act, that has not been violated thousands of times, and where is the remedy? None. The members of the Common Council, or at least, one branch of it, by virtue of the office of Alderman, set as Judges upon the Bench of Criminal Courts, and form a ma-

jority of the members of those Courts. This we have no hesitation in saying, is a violation of the Constitution, opinions to the contrary, notwithstanding.

If the Act of 1830, cannot be enforced, of what use is it, to enact a new law to restrain the members of the Common Council and officers of the Corporation, from acting wrong.

There was a strong desire manifested, prior to 1830, to elect Aldermen for longer terms. Experience has shown that the members who have been in the Common Council, longest, have been those whose acts have met with little public commendation. *Re*-elections have not been the result of public approval, but of party management.

It becomes the people to arouse from their slumbers, and stand forth for the preservation of the Constitution and the Laws.

If our influential citizens would join in a public recommendation to the people, of suitable persons as candidates for the Common Council, it would be the best mode of proceeding. There will be no difficulty in getting men of honest purpose, to serve in the two Boards, provided a list is made up without reference to party, containing the names of thirty-four persons, as Aldermen and Assistants of the seventeen wards Take such a list to Jonathan Goodhue, of the 1st Ward, and say to that gentleman, "Sir, will you consent to become a candidate for Alderman, if the other thirty-three gentlemen, whose names are on the list will, each and all, also consent to be candidates?" and no doubt that this appeal to the patriotism of Mr. Goodhue, would receive an affirmative reply. Next, James Donaldson, for the Assistant. Then the 2d Ward, and here is Abraham G. Thompson, for Alderman, and William Gale, for Assistant. After this, the 3d Ward, and here is John Anthon, for Alderman, and John D. Wolfe, for Assistant. After this, the 4th Ward, and here is John Targee, for Alderman, and Richard S. Williams, for Assistant. We could continue our list for the seventeen Wards, giving to the Whigs, the Whig Wards, and to the Democrats the Democratic Wards; and where the vote is doubtful, give one to each party. Let the meetings of the respective Boards take place on the 1st and 3d Monday, in each month, in the day time. Of the Aldermen, the first Monday, and the Assistants the third Monday. The Comptroller's office should be placed under the supervision of Saul Alley or Robert C. Cornell; and the Street Commissioner's office under the control of Burtis Skidmore.

Select JONATHAN THOMPSON, or JOHN M. BRADHURST, for Mayor of the City, if Mr. MORRIS will not serve longer; make STEPHEN ALLEN, County Treasurer; create a Board, to dispose of the public property not in public use, and place PRESERVED FISH, at the head of it, and we venture to say, that taxes would decrease faster than they have ever increased.

If the independent party expect to succeed, they must select such men as are named above. Men in whom the public have confidence, and who will do their duty without fear or favor.

Our citizens are disgusted with politics and politicians, they have no confidence in either of the two political parties; both parties have been tried, and both have abused the confidence which has been reposed in them, and have brought the City to a deplorable state.

The Street Contract, for example, was made by the Whig party, when largely in the majority, and a more shameful proceeding is scarcely to be found, unless we take up the assessment plundering, or the price paid for printing the City Comptroller's Report, of 1841, and these are a match for any thing.

Look at the nocturnal sittings of the two Boards, composing the Common Council, and to their feastings in the "tea room." The office of the Clerk of the Common Council, is made a sort of bar room of, where loungers may be seen at almost all hours of the day and evening.

This is not the way in which an important public office should be kept.

In Governments, system and order are the verry foundation on which the superstructure rests, without this, government is a mass of confusion, and the acts flowing from it, will be as loose as those of our own City Government are found to be.

Take for example, the public Corporation Bonds, which amounts to millions of dollars. The Assistant Clerk of the Common Council, was examined before a Committee of the Hon. the Senate of this State, as to any record existing in the office of the Clerk of these Bonds, which are signed by the Clerk of the Common Council, and his answer is to be found in Senate Document, No. 100, of 1842, page 105, and is as follows:

"*The Clerk of the Common Council, signs various Bonds, but witness has cognizance of the matter. There is no record in the office of the Clerk of the Common Council, of Bonds signed by that Clerk.*"

These Bonds amounted to more than twenty-five millions of dollars. Did any body ever hear of such a loose way of transacting financial concerns, of great magnitude?

MEMORIALS TO THE COMMON COUNCIL.

In the month of May, 1843, a Memorial, signed by John M. Bradhurst, and others, was presented in the Board of Aldermen, asking for an investigation into the charges for public printing, and that the public printing be hereafter done by public contract. No Report has yet been made upon this Memorial, although the members of that dignified body, have already sat out half their term of office.

The City Comptroller, the head of the City Treasury, should be called upon to report the why and wherefore of his paying $1107.75 for printing his report for 1841, for the printing of which $153.75 would be a fair price.

The City Comptroller owes it to his office to make a full statement in reference to this expense.

RESOLUTIONS.

In 1840 a resolution was passed by the Board of Assistants calling upon the Street Commissioner to report a list of all the contracts made by him, specifying the names of the contractors, the dates of the contracts the prices of the various materials and work, and also whether any other persons are or have been interested either directly or indirectly, to the best of his knowledge, information or belief.

On the 23d Nov. 1840, he made a report which is to be found on page 247 of this number, in which he says "that immediately upon the receipt of the resolution, he placed the same in the hands of the first clerk in the department, with instructions to devote himself exclusively to the preparing of such information called for as could be obtained from documents in the office. The said clerk has proceeded in the work, but he has not yet accomplished it; and judging from the progress that has been made, compared with what is yet to be done, the undersigned is of opinion that he will not have canvassed all the matter committed to him, for a month to come."

This report it will be seen was made three years ago, and where is the information which the first clerk was devoting himself exclusively to preparing and which would require but another month?

A statement of the prices of the work and the name of the contractors, would be an exhibit that would astonish the citizens but it will not be made, such proceedings, on the part of public officers, should be investigated.

CLEANING STREETS.

It will be seen by the proceedings set forth on page 247, that in 1818 the sum of $8,500 per annum was paid for the street dirt by Messrs. Edward and William M. Hitchcock, and they also swept the streets and removed the dirt at their own expense. Contrast this with the present wateful expenditure.

PUBLIC PRINTING & STATIONERY.

In 1830 the public printing and stationery of the Common Council was but $2327.09. See City Comptrollers report of 1830, pg. 27

In 1840 the same items of expenditure cost $23.800.55. See City Comptrollers report of 1840, page 93.

In 1830 the printing and stationery of the departments, &c., was $4299.62. In 1840 the same class of expenditures was increased to $22.682.44.

WATCHMEN'S WAGES.

In 1830 the wages of the Watchmen were but $86.592.27. See Comptrollers report of 1830, page 31.

In 1840 the Watchmen's wages were $231.942.59. See City Comptrollers report of 1840, page 81.

PAVING STREETS.

In 1819 the expense of repaving Chapel street was but 8 cents per square yard. In 1836, 40 cents was paid for the same work.

CROTON WATER.

The change which the introduction of the Croton Water into the city of New York will cause, will be very great.

The water arising from rain and snow will be left to accumulate in the earth, and added to this, the water from waste waters of the Croton, will so much increase the water with which the ground will be saturated, that the sub-cellars will be spoiled in many sections of the city, and the common cellars and basements, will also, in many locations, be rendered useless.

It has been suggested that a remedy may be had by placing sewers in the streets. We would enquire what use will a sewer be to a sub-cellar, and what use will a sewer be to any cellar unless the top of the sewer is placed lower in the ground than the bottom of the apartments to be drained. The Chapel and Thomas Street sewers are evidence conclusive in these matters.

The wells are the drains to the waters beneath the surface, and if the water of these reservoirs is not used, the ground will become wet.

Cisterns have been made bottomless, and others suffered to overflow. These add to the accumulation of water in the ground, and the consequences yet to result from this change, will be found very disastrous.

STREETS AND AVENUES.

The avenues in that portion of the Island of New York laid out by the Commissioners appointed to lay out certain parts of the Island into streets and avenues in pursuance of an act of the Legislature of this State, possed in 1807, are as follows:

Spaces between the avenues south of 23d-st.

D	and	C	676	feet.
C	"	B	676	"
B	"	A	666	"
A	"	1	613	"
1	"	2	650	"
2	"	3	610	"
3	"	4	920	"
4	"	5	920	"
5	"	6	920	"
6	"	7	800	"
7	"	8	800	"
8	"	9	800	"
9	"	10	800	"
10	"	11	800	"
11	"	12	800	"

Spaces between the avenues north of 23d st.

C	and	B	646	feet.
B	"	A	636	"
A	"	1	603	"
1	"	2	650	"
2	"	3	610	"
3	"	4	920	"
4	"	5	920	"
5	"	6	920	"
6	"	7	800	"
7	"	8	800	"
8	"	9	800	"
9	"	10	800	"
10	"	11	800	"
11	"	12	800	"

All the avenues are 100 feet wide except south of 23d street, where avenues A and C are 80 feet feet, and avenues B and D each 60 feet. We are inclined to think that avenue D has been widened.

All the streets named below are 60 feet wide, except

14	42	79	106	135
23	57	86	116	145
34	72	96	125	155

These 15 streets, named above, are each 100 feet wide.

The blocks between

1st	and	3d	streets	are	each	211 feet	11 inch.
3	"	5	"	"		192 "	1 "
5	"	6	"	"		194 "	1½ "
6	"	7	"	"		181 "	9 "
7	"	8	"	"		195 "	
8	"	9	"	"		187 "	10 "
9	"	10	"	"		184 "	6¼ "
10	"	11	"	"		189 "	7 "
11	"	16	"	"		206 "	6 "
16	"	21	"	"		184 "	
21	"	42	"	"		197 "	6 "
42	"	71	"	"		200 "	10 "
71	"	86	"	"		204 "	4 "
86	"	96	"	"		201 "	5 "
96		125	"	"		201 "	10 "
north of 125			"	"		199 "	10 "

The monuments on avenues A. B. C. and D., 1, 2, 3, and 4, stand in the angle of the north-westerly corners.

The monuments on avenues 5, 6, 7, 8, 9, 10, 11 and 12, stand in the angle of the north easterly corners.

All the above distances are horizontal measure of a medium temperature.

The above statement is copied from what is called the red card, published by the corporation.

Madison avenue, and Lexington avenue two fancy streets, have since been laid out.

It will be seen by the above tables of distances, how the Surveyor's bills average per acre. We take for illustration, the surveying of the 7th avenue from 21st, to 129th street.

From a line drawn through the middle of the blocks half way between the 7th and 8th avenues, to a line drawn through the middle of the blocks half way between the 7th and the 6th avenues, is 900 feet. From the northerly line of 21st street, to the southerly line of 129th street is 28,628 feet. For this piece of ground the surveyor received for a *re*-survey, (it having been already surveyed and a map made of it for the Commissioners in 1807), two thousand eight hundred and one dollars, which at four dollars per day, is pay for 700¼ working days—allowing six working days to a week, it makes 116 weeks, and 4¼ days, which is equal to two years and three months, solid time. If the Government of the United States had paid at this rate for surveying the public lands, where would it have found money enough to pay the surveyor's bill? The expense of the survey alone at the Seventh avenue rates, would have exceeded the public debts of all the governments on the face of the whole earth, and if paid in silver coin, would require all the ships that float upon the whole surface of the waters, in all and every portion of the globe, to stow it away, and if put out at compound interest for two hundred years, at seven per cent, would exceed in amount the value of all the property upon the face of the earth. So much for the survey of the notorious seventh avenue.

The Senate Committee when they examined the expenses upon this avenue, state that they should have supposed the charges were a mistake, but a further examination developed the same extravagant charges throughout all the street openings in the city, and that to such an extent, that the wonder is not, that the people now complain, but the wonder is, that they had not complained before.

FENCING VACANT LOTS.

The practice of putting board fences around uncultivated ground, by the order of corporation officers, is one which ought to be prohibited by law. Owners of lands, which are for the produce of them, not worth fencing, are continually called upon to pay for these public fences, put up at extravagant prices to give jobs to favorites, and these fences are generally but temporary, and are often carried away the very first winter after being put up.

PATCHING PAVEMENTS.

There is no law to authorise the collections of the bills for patching pavements.—The only law in existence in relation to making an assessment for paving is the 175th and 176th sections of the act of April 9th 1813, page 407–8, of the 2d volume of the Revised Laws of 1813.

Some reckless public officers have imposed on the citizens in this matter and they deserve to be puuished, and severely too, for such imposition.

UNDERMINING BUILDINGS.

It has been the practice of late, to make deep sub cellars, and if a building upon the

immediately adjoining lot, has a foundation which is only the usual depth, the excavation will take away its support. This kind of proceeding, in our opinion, clearly lays the excavator liable to all damages, some judicial dicta, to the contrary, notwithstanding.

Where two farms adjoin each other, and a stream of water runs through both, any obstruction of that stream by one, which would inundate the land of the other, would make the obstructor liable for all damages.

The doctrine, that a man can dig a pit alongside of his neighbors house, and bring it down, because he owns the ground in which the pit is dug, is absurd. It may, with as much propriety, be urged, that he could burn a coal pit alongside his neighbor's dwelling, because he owns the ground upon which the pit is sunk.

Sub-cellars have found a check in the introduction of the Croton. These appendages to modern dwellings, will become useless, and more, they will become nuisances, if the surface waters on the Island of New York, continue to accumulate for a year to come, as they have done for a year past.

Suppose that the owner of a lot of ground filled with rock, should choose to excavate that rock by the use of gunpowder, and this rock should join his neighbors dwelling, will be contended that he could explode this rock by gunpowder, and blow up his neighbors house, without being answerable for damages. Surely not, and where, then, is the difference between an excavation, and an explosion, that result alike in the destruction of the property of others.

In 1691, a bill was introduced into the Colonial Legislature, of the Province of New York, in reference to buildings in the City of New York. Such a law is now needed.

It may be said, that a man may build his house as high as he pleases, none can hinder him. We think otherwise, and believe that an individual, who should rear his house so high as to endanger the lives of his neighbors, by the great heighth of the structure, would be answerable for the damages which a downfall might occasion to others.

PAVING ON LOOSE SAND.

Chapel, and the adjoining streets, was repaved in 1836. Previous to the putting on the pavement, the street was raised three feet, and the paving stones laid upon the loose filling. What sagacity!

BUILDING SEWERS.

Some persons have imagined, that a new plan of building Sewers, has been discovered; but we apprehend that experience will prove that the application of this new plan, to all sorts of localities, indiscriminately, is a great error.

The new fashioned Sewers, are of circular orm. If a Sewer of this shape is entered at any other place than the top, it will be like attempting to fill a barrel by perforating the side of it. Such Sewers are only fit for the conduits of surface water, and in that case, the work should be as tight as a Croton water pipe, otherwise the leaks will produce inundations.

Sewers, which are intended to drain water from wet grounds, should have a broad surface at the bottom. The Expansion should be in width and not in heighth, and the size of the Sewer, in both cases, should be proportionate to the volume of water the Sewer is to collect, and the Sewer should increase in size, in proportion as the length of the distance it extends to, receives additional water.

Sewers generate mephetic gases, and should never be made unless absolutely necessary.

REVIEW OF THE OPINIONS OF JUDICIAL OFFICERS, IN ASSESSMENT CASES.

We intended to have given a review in this number, but it requires the appropriation of more time than we are at present able to spare. We will, therefore, defer it to a future number.

NEW PARTIES.

Measures have been taken to organize a new party, and the recent election shows most clearly, that if they had selected suitable persons as candidates, they would have succeeded. The Whigs and the Locofoco's, as political parties, have, in the City, as to its local concerns, lost the confidence of the People. The Democrats have allowed the Locofoco's to have rule, and their party will be overthrown, unless they move at once to counteract their measures. The Whigs have allowed a set of political office hunters to break them down, and unless they rally and bring forward better men, to fill important public offices, they will not succeed. Look at the street cleaning contract, and the continuance of the assessment abuses, and their miserable appointments to public office. Good men, capable and honest, irrespective of party, can be elected to office, and none others should be permitted to hold office.

TAXATION.

We were present, a few days ago, during a discussion between a landlord and his tenant. The landlord offered the tenant a renewal of his lease, on condition that the tenant would pay the City and County Taxs, the tenant was unwilling to pay so high a rent, as the Taxes amounted annually to about two hundred dollars more than the rent of the premises is worth. Comment is needless.

WARD COLLECTORS.

In the early part of this month, we were furnished by Alderman Brady, Supervisor of the 15th Ward, with a copy of a communication, addressed by the Corporation Counsel, to A. A. Smith, Esq., City Comptroller, and by that gentleman delivered to the Board of Supervisors.

"A. A. Smith, Esq., Comptroller.

"Sir,—I find the provisions of the Revised Statutes, for the issuing of a warrant to the Collectors, are declared, by Act of April 18th, 1843, to be *no longer* applicable to the City of New York. However difficult it may be to determine what is meant by not abolishing the office of Collector, until April, 1844, it is perfectly certain that *all power* is taken away of conferring any authority upon them by *warrant* of the Board of Supervisors."

PETER A. COWDREY."

Contrast this opinion with the ridiculous vote of the Board of Supervisors, of Oct. 3d, 1843, as set forth on page 257, of this number.

Thus we are sustained in our construction of the Tax Act, by the Counsel of the Corporation.

RECEIVER OF TAXES.

Much complaint has been made by our citizens, of the practice of the Receiver of Taxes, to compute the interest to be deducted from Taxes, for advance payment upon each separate item, instead of taking the sum total at the foot of the bill, as every business man would prefer. We were shown one bill with ninety-nine items in it, which had ninety-nine calculations of interest, instead of one. This practice increases the trouble ninety-nine fold, and the expense in the same ratio. It is like a hardware merchant, selling an assorted bill of merchandize, at a discount of five per cent. for cash, and deducting the discount from the amount of each item, instead of the whole bill.

CHAPEL STREET ASSESSMENT.

Several months ago, Mrs. Woodard petitioned the Common Council for redress, for the damages done to her house, at the corner of White and Chapel streets. The Memorial was referred to the Street Commissioner. This Memorial was accompanied by several public documents. No report has yet been made upon it.

THAT SALT MEADOW.

Mr. Benson memorialized the Common Council, some months ago, relative to the assessment upon his Salt Meadow. No report has been made upon this Memorial.

It is said that the Common Council can do some things, as well as others.

VOL. I.] NEW-YORK, FEBRUARY 21, 1844. [No. 17

MOST IMPORTANT DECISION.

THE

CONSTITUTION,

THE GREAT CHARTER OF CIVIL LIBERTY,

THE FUNDAMENTAL LAW OF THE

COMMONWEALTH,

SAFE!

The Supreme Court of the State of New York, after hearing argument of ROBERT EMMET, Esq., for the Corporation of the City of New-York, and RICHARD MOTT, Esq., for the persons whose estates were under assessment sequestration; and after mature deliberation and advisement, have decided that the Justices of the Supreme Court of this State, have no right, under the Constitution, to discharge the office of Street Commissioners in comfirming the Reports of Commissioners of Estimate and Assessment, or in nominating and appointing such Commissioners, and refused to confirm five street Reports moved for by Mr. Emmett.

The following is a copy of a letter addressed by the Honorable GREEN C. BRONSON, one of the Justices of the Supreme Court, to RICHARD MOTT, Esq., of New-York, the Counsel who so ably argued this great Constitutional Question before the Court:

"ALBANY, Feb. 12th, 1844.

"SIR:

"Your letter, of the 10th instant, is received. In consequence of a division of opinion among the Judges, the Street Cases were not decided until near the close of last week. Two of the Judges held that they had no right, under the Constitution, to discharge the office of Street Commissioners, and therefore, declined making any order on the motion to confirm the Reports.

The Opinion of the majority, is in the hands of the Reporter.

Respectfully yours,

GREEN C. BRONSON.

"R. MOTT, Esq.

"P. S.—The Chief Justice dissented, but has not, I believe, written an Opinion. He probably *will*."

The grounds upon which the parties opposing the confirmation of the Report of the Commissioners, relied, is to be found in No. 16, of this volume.

This is by far the most important decision ever made by the Courts of our State; it is a decision that goes far, far beyond the mere matter of dollars and cents; it is a decision that affects the great principles of Civil Liberty, that sustains the foundation upon which rest the whole superstructure of our Government.

The doctrine of strict construction of the great Charter of Freedom, of the fundamental law of the Commonwealth, is here sustained and exemplified.

Written Constitutions have long since ceased to be regarded as they ought; their doctrines have been trampled under feet and disregarded: yes, the Liberty which was purchased with the blood of the patriots of the Revolution, was being held for nought. This decision, *which covers the Court with glory*, has reinstated the pages of that sacred instrument, and they now shine with glowing lustre.

Hundreds of families which had been reduced to poverty, to want, and to suffering, by acts of Municipal Assessment Depredators, have, by this decision, been raised to affluence, to ease, to competency.

We know of one case where a veteran citizen, whose

"Grey hairs were going down in sorrow to the grave,"

has been, by this decision, raised as it were, to life. Yes, the patrimonial estate of that venerable man, which had been improved by his family for more than one hundred and fifty years, and on which sleep in silence the ashes of his kindred, has been by this decision, snatched from the *sacriligous hands* that were making merchandize of the ashes of mortality, who in this case, were raising their impious hands in defiance of the laws of the ruler of the Universe, in defiance of the laws of the land, and the Constitution of the Commonwealth.

The lonely widow and her fatherless children, have been gladdened by this blessed decision of the Court; the tear of joy which is the gem of gratitude, gushed from the fountains of the bosom warmed by the glow of sweet satisfaction, that this promulgation of Justice and Equity has created.

The humble occupant of the cold garret, shivering at every chilling blast of the whistling wind, will now be able to obtain the comforts of the warm fire-side, and to exchange the bed of straw, the scanty meal, and a thin covering, for a comfortable couch, a plentiful table, and a dwelling in which the cold, cold wind, will not intrude its chilling, freezing blasts.

The patriot who mourned over the subversion of law, and the trampling under feet the Constitution, will rejoice in this event.

Never, never have we before known a decision to give such general satisfaction among the good, the virtuous, the best men of our city, as this has done.

Many of our readers abroad, are not aware that most of the Assessments complained of, are for fictitious improvements, for the pretended opening of Streets, Avenues and Public Squares, that exist only upon a painted map, the mere making of which was charged at thousands of dollars, and this expense assessed upon land.

The farm of the venerable sufferer, of whom we made mention, was assessed for one of these Phantom Streets, about four thousand dollars, and the interest and expenses have now risen to near eight thousand dollars, and for this imposition the farm was sold for the term of one thousand years, and yet the improvement was never made. What an impious act, to thus sport with futurity. Some lands have been sold for the term of two millions of years. Who dare look beyond the boundaries of time with such a title, based upon such proceedings? We should think the public depredators would not dare to lay their heads upon their pillows, with such a load upon their minds, as an act like this must make, that their lonely hours would be haunted by spectres, and their very dreams filled with midnight "horrors."

When the cold wind whistles past their princely dwellings, it bears on its wings the moaning of their victims, the sobs of the tender offspring pining in want, the children's cry for bread. Can a monster depredator sleep in such an atmosphere, can he look beyond the end of years without dread, without a chill of horror pervading his mortal frame?

Kind reader, this is not imagination—it is sad, mournful reality. We can point to the grave of a citizen once in affluence, who was loaded and goaded with assessments until he became exhausted, and was at last driven to a bed of sickness and to death.

What cruelty—what injustice—and we must add, what wickedness!

We hear of movements to amend the Constitution, this is not a work for politicians; their tinkering of the Charter of Liberty, will be the destruction of that instrument. Let the doctrines of the Constitution be respected by those who have, under the solemnity of an oath, promised to support it. This will be the most important amendment which can be made, an amendment that will, of all others, be the most satisfactory to the people.

The question is asked, what will be the result of this decision to the City? We answer. By the Assessors return, there is estimated to be upwards of one hundred and

sixty millions in value of real Estate, in the City of New York; this is increased in value by this decision, twenty-five per cent., here then, is a gain of more than forty millions of dollars by this decision of the Court.

The lands purchased by the Corporation at their own Assessment sales, under the Confiscation Act, of April 18th, 1843, will remain with the legitimate owners, and the moneys of the Sinking Fund which were appropriated to this unhallowed use, have been sunk forever.

Some persons talk of the Public Treasury being called upon to make restitution to the sufferers. The City might, with as much propriety, take the goods in the Police office, which have been rescued from the hands of the midnight robber, sell them, and put the avails into the Public Treasury, instead of returning the plundered property to the owners, as to seek to keep the price of the lands of the widow and the fatherless, that have been depredated upon by Municipal freebooters.

In no other country, civilized or savage, was there such abuses practiced and submitted to for years, as has been the case with these assessment depredations. Citizens by scores were ruined by these nefarious proceedings, and hundreds upon hundreds brought to poverty, to want, and to suffering. But thanks to the Supreme Court, a stop has at last been put to these depredations, which have made our City Government a bye word and a reproach among the people and throughout the land.

Men venerable in years, whose heads where whitened by the frost of near four score winters, plead with the despots for the little home purchased with the toils of a long life, might be spared to them. Yes, and the emotions of their bosoms forced the tear of grief down the furrowed check, but it was in vain, their remonstrances, their objections, and their entreaties, were all in vain.

The up-turnings of the eye of such a victim, has a force that will reach the remotest region of the celestial world.

The furrowed check of a veteran victim, moistened by the tear of suffering; the silver locks; the tottering frame, with only strength to bear it to the tyrant's door, is a mournful, sad, and heart moving spectacle.

The odious, the shameful Street Assessments in New-York, have for years been the act of the despot, and our City Government has been a perfect despotism, and more tyranical than the most barbarous government on the Earth.

These Reports, which were moved for by Mr. Emmett, are the Reports of the Commissioners for opening 37th, 39th and 128th streets, also 11th avenue, and a fancy street called Madison avenue. They were appointed near eight years ago. In the 39th street Report, a piece of land belonging to Anson G. Phelps, Esq., is assessed. This piece of land is not worth $200, and has already been assessed for the pretended opening of 40th street, $575, and for the pretended opening of the first avenue, $312, besides taking one-third of the land for the avenue. The land is not worth the interest of the assessment. This is a specimen of the proceedings which this decision of the Court has put a stop to.

SENATE COMMITTEE.

The Senate Committee, appointed to investigate Assessment abuses, in the City of New-York, in their Report to the Legislature, say:

"*It is well known that the Judges of the Supreme Court, in confirming these Reports, do not act as a Court, but as Commissioners under the Statute.*"

This Committee consisted of the Hon. Gabriel Furman, Hon. Gulian C. Verplanck, and Hon. John B. Scott.

STRICT CONSTRUCTION.

This is a doctrine on which depends the existence of this Government as a Republic.

The Constitution was designed to fix boundaries to the exercise of Executive, Legislative and Judiciary power; to seperate each from the other in such a way, as that the Executive branch shall be a check upon the Legislative, and the Judiciary a check upon both.

The experience of mankind has taught them that power is of an encroaching nature, and that in Governments, unless regulated and restrained, it becomes so concentrated as to be destructive.

The little time our Republic has been in being, is sufficient to demonstrate the danger of allowing one department of the Government, to usurp the powers which belong to the others.

The Legislative department is reaching forward and endeavoring to bring within its grasp all the other departments, and when that shall be accomplished, we shall behold a Legislative despotism, more tyranical and more despotic than any Monarchy that ever existed upon the face of the globe.

The moment the Legislative controls the Executive department, the Judiciary power is prostrated, and the balances are destroyed.

Constitutions are instruments framed with care, with deliberation and patient consideration, and are destined to be the guide book of Executive, Legislative and Judiciary Officers, and which they, each and all, under the solemnity of an oath, are bound to obey, support, and maintain.

In the forming of the Constitution of the United States, the design was to restrain arbitrary, as well as to check hasty legislation.

That provision of the Constitution of the United States, which requires a two third vote to pass a bill which has been disapproved by the Executive, is one which is not misunderstood, and so plain that it cannot be evaded, and therefore those who are in favor of what they call liberal construction, wish to qualify this provision to that extent that will make it useless and destroy the whole of the checks and balances of power. The moment this is accomplished, our Government ceases to be a Republic.

It matters not whether the whole powers of the Government are vested in one man, or in one body of men, for where it is vested in a single branch, composed of numerous members, the responsibility of their acts is so divided, that there exists no responsibility.

In the former Constitution of this State, Judiciary Officers of the Government were associated with the Executive in the approving of laws, and that provision of the Constitution which vests them with this power, recites in the Preamble the object, viz: to prevent the passing of unconstitutional acts. The Executive of this State, under that Constitution, was vested with an absolute control over the Legislature in the power he possessed of proroguing that body. This was a restraint upon arbitrary legislation.

The Judiciary department, in this arrangement, had the power of preventing a violation of the Constitution, by returning such bills as should be passed, that were repugnant to the fundamental law; and if the Legislature persisted, the Executive had the power to suspend their proceedings. The remedy here was preventative.

The present Constitution separates the Judiciary wholly and altogether from the Executive and also from the Legislative, and declares in express and unequivocal terms, that cannot be misunderstood, if there is any force in the English language or meaning in plain words that the Justices shall hold no other office or trust.

Expediency is the great canker which is eating up the Constitution, and it has become so prevalent as to be truly alarming. Politicians and speculators are making inroads upon the Constitution to answer their own present selfish ends. These two classes forget their children who they are thus cutting off from the rich possession which they themselves inherited from the patriots of the Revolution, the fathers of the Constitution.

The Judiciary is that branch of the Government which is vested by the Constitution with the interpretation of the Fundamental Law, but in the case under consideration, the provision of the Fundamental Law is so clear, so emphatic, and so positive, that it interprets itself.

The multitude of laws which now encumber the Statutes, "darken Counsel by words," and very many of them are nulities, from the fact that their provisions are not within the rule, and therefore repugnant to the Fundamental Law of the Commonwealth.

The great Law Giver has, in the Statute of Sinai, given to man an example; that Statute is brief and ample, and has not undergone any amendment or change.

OBITUARY.

ESEK COWEN.

One of the Justices of the Supreme Court of Judicature, of the State of New-York, has departed this life.

On Sabbath evening, Feb. 11th, at eight o'clock, his earthly pilgrimage terminated, his age was fifty-eight years.

He died at Albany, after an illness of four days.

Both Houses of the Legislature adjourned on the anouncement of his death, and each appointed a Committee to take order for his funeral.

The death of public men at the seat of the National and State Governments, have been very frequent of late years. These dealings of Providence are solemn and admonitory.

On the 65th page of this volume, we recorded the death of six individuals, who had held the office of President of this Republic, each and all marked by circumstances calculated to impress the human mind with the fact that GOD overrules the doings of men

WASHINGTON, JEFFERSON, ADAMS, MONROE, MADISON, and HARRISON, are the names of those whose exit has each been marked by peculiar circumstances.

The decision of the great Constitutional Question, which is here noticed, was among the last of the Judicial Acts of him whose name heads this Obituary notice, and of his useful life. He has left in this his written testimony in favor of the great doctrines of the Charter of Civil Liberty, a legacy to the People of this State, A RICH BEQUEST.

Judge COWEN was endowed by Nature with a great mind, which he cultivated with diligence, with care, and with success.

His place upon the Bench cannot easily be filled. It is a serious, a solemn act, to select a man to fill a station which makes him the guardian of the CHARTER OF FREEDOM.

Politicians hanker for place, for power; not for the sake of the good they may do, but for the sake of the patronage it places at their command, of the power with which it clothes them.

There are but few men in our State, who are qualified for the seat which Death has made vacant, in the Bench of the Supreme Court of this Commonwealth.

PETER A. JAY,
AND
PETER LORILLARD.

These two distinguished citizens, of the City of New-York, were in the year 1843, numbered with those who have rested from their labors. They both lived to a good old age, beloved and respected.

They were among those who sustained the Anti-Assessment Committee, in their public labors, and their names are appended to all their Memorials to the Legislature.

The bills which were submitted to the Legislature by this Committee, on behalf of the Citizens of the City of New-York, were, before they were placed before the Legislature, submitted to the supervision of Mr. Jay.

The bill that was discussed before the Hon. the Select Committee of the Senate, appointed to investigate Assessment Abuses, in the City of New-York, at their last sitting at Clinton Hall, was drawn up under the advice of Mr. Jay. The draft of the bill was placed in the hands of Mr. Jay, for a careful, and deliberate examination, and after that the proof sheets of the printed copy, and in both he made but a single alteration, and that only to correct a clerical error.

The approval of such men, is the greatest commendation a bill like that could have. The approval of a man who had capacity, integrity, and experience, and withal a noble patriotism, a love of Liberty, a respect for the Constitution, and a reverence for its great doctrines, is a rich commendation.

Mr. Lorillard, who, although not a member of the legal profession, was nevertheless, learned in the school of experience. By a life of industry and economy, he amassed a princely fortune; he had an interest in the prosperity of the City of great pecuniary magnitude, and a still greater one in the blessings of a good Government, the benefits of which were to be enjoyed by the beloved children which he left behind, who are the inheritors of his virtues as well as his estates.

Mr. Lorillard was practically conversant with all those provisions of law which affected private property, and he had become convinced that the barriers for the protection of private property had been broken down, and it was at the mercy of a set of lawless mercenaries.

During the Session of the Hon. the Select Committee of the Senate, appointed by the Legislature, to investigate Assessment Abuses in the City of New-York, Mr. LORILLARD addressed them a written communication, which that Committee regarded of so much importance, that they made it a part of their Report to the Legislature, and it is to be found on page 14 of their Report, Senate Document No. 100, of 1842. The Committee say that: "During the Session of the Committee in New-York, Peter Lorillard, Esq., submitted to them a communication on this subject, in which he stated that '*in many cases the injustice was so great, that he had firmly made up his mind to sell all his property in this State, and remove to where his property would be protected and placed on an equality with that of other citizens; and was only prevented from so doing by reason that it would not bring the prices of* 1830, *thereby he was forced to stop the sale, having made some sacrifice.*' If the Citizens of New-York are laboring under an erroneous impression in believing that they have been greatly oppressed and injured by the course pursued by these Commissioners, that belief is, *in the judgment of the Committee, very extensive.*"

The Committee, in another part of their Report, say:

"If the case of the Seventh avenue had been a solitary instance, the Committee might have supposed that it had taken place through some mistake; but they found the same principle of ENORMOUS expenses to extend throughout the whole system of Street Openings in that City, and that to such an amount, that their surprise should not be that the inhabitants now complain of it, but that they had not done so at a much earlier period."

Mr. JAY remarked that the power exercised by the Corporation, in Street Assessments, was greater than that of the Parliament of England.

Mr. JAY was one of that family whose great name was associated with the history of our Government. He was a man of great purity of character.

OBITUARY.

LEMUEL SKIDMORE.

On Friday evening Feb. 16th, the individual whose name heads this obituary notice, departed this life, at the age of 89 years.—He passed calmly down the current of life, and in peace of mind finished his earthly course.

He looked forward with calm composure to the end, retaining his mental faculties till he fell asleep in death.

He lived to see almost a century of time pass away, was highly respected and beloved and died full of hope.

He was the father of Mr. Burtis Skidmore, one of the most active members of the Anti-Assessment Committee.

ALBANY, Tuesday Feb. 13, 1844.

The funeral of the late MR. JUSTICE COWEN, took place this morning. Shortly before 10 o'clock, the Senate and Assembly met in their respective Chambers, and thence proceeded to the American Hotel, where the corpse lay. Having received the body, they returned to the Capitol, where the Clergy, the members of the Bar, the Corporation of Albany, and a large number of citizens had assembled. The coffin having been brought into the Hall of the Capitol, and the State Officers, Judges of the Supreme Court and members of the Legislature, arranged on either side, the service for

the dead was read by the Rev. Mr. Kip, in an appropriate and impressive manner. This ceremony concluded, the body was placed in the hearse and a procession formed, in the following order:

1. The Clergy. 2. The Hearse.
3. The Pall Bearers—Messrs. Bartlit and Varney, of the Senate—Messrs. Sweeney and Edwards, of the Assembly.
4. The Judges of the Supreme Court.
5. The relatives and friends of the deceased.
6. The Joint Committee of the Senate and Assembly.
7. The Governor and State Officers.
8. The Senate, preceeded by its officers.
9. The Assembly, preceeded by its officers.
10. The Corporation of Albany.
11. The Members of the Bar.
12. Citizens and strangers.

The procession, imposing alike in its numbers and appearance, passed from the Capitol down State street, and up Broadway to the confines of the City. At this point the remains of the deceased were taken to Saratoga Springs for interment. Having paid the last tribute of respect to the memory of JUDGE COWEN, the procession returned to the Capitol, and then dispersed.

MONUMENTS IN CITIES.

Monuments in Cities, in our latitude, are but temporary structures. Cities are of but limited duration.

Monuments erected upon some towering mountain top, that holds close converse with the clouds, meets the eyes of distant gazers; the place, the height, the loneliness of its position, give it impressions and a character which a monument in a crowded city cannot command.

A monument in some secluded grove, arrests the eyes of the passer by, and at once makes an impression upon his mind, almost as durable as life. But in a crowded city, thousands pass within the very shadow of a monument without being aware of its existence, or taking the least notice of this mute memento.

Much has been said of erecting a Monument in the City of New-York, to the memory of GEORGE WASHINGTON. There is a monument of this great man in Pearl street, near Pine street. A house which the Father of the Republic occupied, stands in that thronged street, unnoticed, a monument of the forgetfulness of things connected with the life of the great PATRIOT.

If the citizens wish to have a monument of GEORGE WASHINGTON in New-York, let them purchase that house, and appropriate it to some good and useful purpose.

A monument like this, would have a charm that all the polish that could be given to a marble pillar, could not impart.

It is not a monument of architecture that is wanted, but a monument of the virtues of a statesman and a patriot.

APPROVAL OF THE DECISIONS OF THE COURT.

The memorials which are shortly to be presented to the Legislature in relation to odious and outrageous assessments, and the abuse and usurpation of power by the officers of the Corporation and their protegees, are signed by Jonathan Thompson, John M. Bradhurst, Philip Hone, Abraham Van Nest, William B. Crosby, Peter Cooper, Peter Schermerhorn, Peter Embury, George Griswold, Jonathan Goodhue, James Lenox, Philip Milldollar, James G. King, Gulian C. Verplanck, Robert C. Cornell, James Brown, John Haggerty, Abraham G. Thompson, Edward Prime, James Boorman, James Monroe, John Authon, Andrew Foster, Sam'l S. Howland, James Lovett, Jacob Aims, Anson G. Phelps, William C. Rhinlander, Benjamin L. Swan, Edmund H. Pendleton, John R. Murray, Jonathan Sturges, David Hadden, Robert Jaffray, Charles H. Russell & Co., Woolsey & Woolsey, Arthur Bronson, Hendrick & Brothers, Peter Harmony, Charles Clinton, John B. Lawrence, Samuel Ward, James Donaldson, Elisha Riggs, Peter Lorillard, Jr. Samuel Thomson, John G. Coster, James McBride, George Ireland, John D. Wolfe, Silas Brown, Henry Breevoort and numerous other citizens of the highest standing and respectability in the city of New York; gentlemen who pay immense sums in taxes, and whose opinions and influence where they are known, will outweigh those of assessment depredators.

NEW PARTIES.

The abuses which have been practised by public officers, in the City of New-York, for years past, under both political parties, have been so great, that our citizens have become indignant.

The party which we term the ABOROGINES, would no doubt carry the City by an overwhelming vote, if they select the best men as candidates for office, in equal proportion from both political parties. Half Whigs and half Democrats.

In our last number, we named two most excellent men, as candidates for the Mayoralty. Other gentlemen of high standing have been spoken of, among which is HUGH MAXWELL, SAUL ALLEY, WM. B. CROSBY, and JOHN ANTHON. Either of these gentlemen would discharge the duties of the office to the entire satisfaction of the people. All of these gentlemen possess great firmness of purpose and decision of character, are intelligent, honest and capable. Among the persons spoken of for the Common Council, we heard the names of Daniel Lord, Shivers Parker, John Penfold, James K. Hamilton, Thomas T. Woodruff, Samuel Roome, James I. Jones, Theodore Sedgewick, Abraham Van Nest, Jacob Aims, Thomas Jeremiah, Edgar Harriot, Peter I. Nevius, John Levenidge, Edward Prime, John J. Boyd, Henry Breevoort, F. R. Tillou, W. D. Murphy, Peter Cooper, George B. Smith, Anson G. Phelps, W. B. Brady, and James Fellows.

The fact is, that which ever party puts up the best men, will succeed. The People are tired of Corporation abuses, and they are determined to have the public business managed better than it has been for years past.

LABOR AND REST.

Nature, in the great system of economy, has provided periods of rest, which are marked down in the successive changes of night and day, of winter and summer, of seed time and harvest.

The Sabbath of rest, is among the first in the order of time, and co-eval with man's existence as a living soul.

The entering into rest, was the subsequent provision of the source of all good. That rest which remains for the virtuous of the family of man.

What we term death, is the suspension, and not the extinction of life, for the soul of man is immortal, and destined to endure as long as eternity exists—forever.

The Solar day is that of a given portion of the time the Earth is revolving upon its axis, the primitive day was constituted of the evening and the morning. We reckon time from midnight to midnight, the French from meridian to meridian.

Animated Nature rests from the labors and from the cares of the Solar day, with but few exceptions, among which is that of the Lion, the Wolf, &c. Night, is this period of rest. This rest takes the last of the evening and the first of the morning.

The Sabbath of rest is a less frequent repose, but not the less necessary. It is a rest of the body, a period of reflection, of meditation and of contemplation for the mind. It is a rest which the Ruler of the Universe has marked with great particularity, and in reference to which he has made a special command, which was announced amid the thunders of the skies, and the fire of the high Heavens.

The Sabbath is a holy time, secular labors have no place on that day, and if indulged in are never blessed.

The Vegetable kingdom has its periods of rest, and these are regular, limited and restricted.

In our latitude, the cold is the sweet singer which puts vegetation to sleep, to rest. The Solar Orb, the great luminary of our portion of the firmament, in his own fixed time, awakens vegetation, and it comes forth dressed in all the beauties of Spring, in all the rich and varied adornings of Nature.

The rest which remains for the human family at the close of the evening of mortal existence, at the termination of animal life, is the sleep that precedes the glorious morning of the resurrection of the ashes of mortality.

Man makes preparation for his daily rest with more sincerity than he prepares for the rest on the Sabbath, or for the entering into rest. The glories, the blessings, the fruits of the latter, are dependent under the will of Heaven, upon the improvement of the two former.

MAMMOTH CAVE.

The entrance to this vast subterranean territory is in the county of Edmonson, State of Kentucky, on the southerly side of Green River, and distant therefrom about four hundred yards.

The entrance is North latitude 37° 10′, West longitude from Washington City, 9° 15′. The entrance to this nether territory is 94 miles from Nashville in Tenn., 125 miles from Lexington, and 99 miles from Louisville, Ky. The nearest places of note are distant as follows: Dripping Springs 9 miles; Pruits Knob, 8 miles; Horse Well miles; Bear Wallow miles; Bells Tavern 7 miles; Mumfordsville 15 miles. The mouth of the cave is about north east from the Dripping Springs, and about north west from Pruit's Knob.

The Mammoth Cave extends under a range of Knobs which border what is called the Green River or Kentucky Barrens.—Formerly, these Barrens were destitute of timber, but were covered with grass and flowers which grew spontaneous and with great luxuriance. Since that section of the State has become thickly settled, the fires which every year overrun the surface consuming the dry grass, &c., have been prevented, and now the surface is covered with a young growth of timber consisting of oak, hickory, and chesnut. It was the custom in former times for settlers who had located themselves upon the barrens, as early in the fall season as that the grass began to get dry, to burn over a small district around their plantations in order to keep off the fire when the barrens should get enveloped in one general conflagration. It sometimes happened that the Barrens become ignited at an earlier period than usual, and in such cases settlers were obliged to set what are called the back fires—burning over small districts, so that when the great body of flames come sweeping over the Barrens with a roar of wind, increased by the augmentation of heat and flame, that a boundary should there be set to it, as the flames would be thus deprived of food to feed upon. A fire on the barrens I once witnessed. It was a beautiful moonlight evening. I was travelling on horseback on one section of these higland prairies, the fire in its spread outstripped that of the horse on which I was riding, but as its track was some distance from me, and the wind in my favor, I felt no apprehension from its effects. Fires of this description are frequently caused by persons who are flitting and who encamp for the night, building fires for the purpose of cooking, and which are spread by the wind. The term flitting is used in this country to denote persons moving from one section of the country to another. It sometimes happens that fires are set for the purpose of driving deer into what are called the "deer runs" where the hunters station themselves to shoot them down as they pass. The Barrens were a great resort for deer, rabbits, &c. It seldom happens that fires are set by persons for the mere sport of seeing a bonfire, which in such a country would be malicious mischief. Crimes are rare in countries where the products of nature are more than adequate to the wants of man. The Barrens are a limestone formation and the soil when brought under cultivation is found to be very productive.

The best of tobacco is grown upon the barrens and some cotton It is somewhat singular that this section of country should at once produce such a profuse growth of oak, hickory and chesnut, and I know no other way to account for it than to refer back to the Mosaic account of the commencement of vegetation in which the sacred historian states that the primitive seeds were of themselves in the earth. The Knobs are a range of hills which border the waters of Green River on the one side and the barrens on the other, and are a sort of a winrow made on the subsidence of the waters of the great deluge. I have been thus particular in describing the surface around the entrance to the cave, before taking the reader below the surface.

The entrance to the Cave is at the foot of a knob, by a gradual descent of about seventy feet. At the bottom of this descent, which is so easy that oxen pass down it without trouble, is the opening to the greatest known Cavern. The opening is in the solid rock, and is about 10 feet wide, and about eight feet high. In winter, a strong current of air rushes into the Cave, and during the hot summer weather, the current of air changes and rushes out of the Cave, equally strong. This change of current of air, is owing to the temperature of the atmosphere upon the Earth's surface. When the weather is warm, the surface atmosphere air is more rarified than the air of the Cave, and then the current blows out of the Cave; but when the atmosphere outside becomes cold, the air in the Cave is more rarified, and then a change takes place and the wind blows into the Cave. At the mouth of the Cave there is water dripping from above, and it is to this cause that I attribute the present entrance to the Cave being made. This spot is not the original inlet to the Cave, for it is evident, on a careful examination, that the roof of the Cave broke in at this place, and that one end of the roof fell, while the other maintained its position, like one end of a wooden floor settling down while the other kept its place; and it is this slope which forms the visitors' path into the subterraneous chambers. Near the mouth of the Cave is a pit of water, of some fifty or sixty feet deep, made by the continued wear from falling water, for centuries. After passing the front thirty or forty feet, the Cave gradually widens to the width of from thirty to fifty feet, and increases in height to about sixteen or twenty feet. The sides and roof are of solid rock, and the floor, which is of the same solid material, is overlaid by a strata of sand and earth, to the depth of from three to six feet. This dirt has been the accumulation of time. Much of the surface of the walls have a thick white incrustation, like a thick coat of whitewash, and some of these surfaces are black, and some a mixture of black and white, yet each color was distinct and separate, no amalgation visible. The Cave is dark, perfectly dark, and here silence reigns in all the majesty of Nature's grandeur, shrouded with the curtains of the blackest darkness. The atmosphere within these nether chambers is perfectly dry, and the temperature that of 59 degrees of Farenheit's scale. There is a peculiar sensation experienced by visitors after entering the Cave and breathing its atmosphere for a few minutes; whether it has its origin mentally or physically, or both, I am unable to determine. I have experienced this feeling on every visit within the Cave, although these visits were very numerous, and many of them protracted. There are various evidences of the dryness of the atmosphere in the Cave, which illustrate the uniformity of this peculiar quality of the air at long periods of time. Of these I will mention three. The Cave was extensively worked for Saltpetre from 1810 to 1814, during which time oxen were used in the Cave for transporting the earth to the Hoppers for lixiviation. These oxen were fed on corn and corn blades. The corn cobs now remain in the Cave about a mile from the mouth, in a state of perfect preservation. Wooden Conduits, (logs bored,) were used for conveying water from the mouth of the Cave to the Hoppers, to lixiviate the Earth, and the same mode of conveyance was resorted to, to convey the nitrate solution from the Hoppers to the mouth of the Cave, from whence it was raised by pumps, into the iron pans in which the chrystilization was affected. These logs, after thirty years exposure to the atmosphere of the Cave, are perfectly sound and dry. In excavating the earth in the Cave for the purpose of lixiviation, pieces of cane torches were found embedded in the dirt in great abundance, and in a perfect state of preservation. Combustion goes on well in the Cave, lamps burn free, and the light given by this means is, as to proportionate yield, greater than in surface atmospheric air.

On my first visit to the Mammoth Cave, in 1813, I saw a relic of ancient times, which requires a minute description. This description is from a memorandum made in the Cave at that time.

"In the digging of Saltpetre earth, in the Short Cave, some little distance from the Mammoth Cave, a flat rock was met with by the workmen, a little below the surface of the earth in the Cave, and about a quarter of a mile from the Cave's mouth; this stone was raised, was about four feet wide and as many long: beneath it was a square excavation about three feet deep, and as many in length and width. In this small nether subterranean chamber, sat in solemn silence, one of the human species, a female, with her wardrobe and ornaments placed at her side. The body was in a state of perfect preservation, and sitting erect. The arms were folded up, and the hands were laid across the bosom; around the two wrists was wonud a small cord, designed probably, to keep

them in the posture in which they were first placed. Around the body, and next thereto, was wrapped two deer skins. These skins appeared to have been dressed in some mode different from what is now practised by any people, of whom I have any knowledge. The hair of the skins was cut off very near the surface. The skins were ornamented with the imprints of vines and leaves, which were sketched with a substance perfectly white. Outside of these two skins was a large square sheet, which was either wove or knit. This fabric was the inner bark of a tree, which I judged from appearance, to be that of the Linn tree. In its texture and appearance, it resembled the South Sea Island Cloth or Matting, this sheet enveloped the whole body and the head. The hair on the head was cut off within an eighth of an inch of the skin, except near the neck, where it was an inch long. The color of the hair was dark red; the teeth were white and perfect. I discovered no blemish upon the body, except a wound between two ribs near the back bone; one of the eyes had also been injured. The finger and toe nails were perfect, and quite long. The features were regular. I measured the length of one of the bones of the arm with a string, from the elbow to the wrist joint, and they equalled my own in length, viz: ten and a half inches. From the examination of the whole frame, I judged the figure to be that of a very tall female, say eight feet ten inches in height. The body, at the time it was first discovered, weighed but fourteen pounds, and was perfectly dry; an exposure to the atmosphere on being moved to the Mammoth Cave, it gained in weight by absorbing dampness, four pounds. Many persons have expressed surprise that a human body of great size should weigh so little, as many human skeletons of nothing but bone, exceed this weight. Recently some experiments have been made in Paris, which have demonstrated the fact of the human body being reduced to ten pounds, by being exposed to a heated atmosphere for a long period of time. The color of the skin was dark, not black; the flesh was hard and dry upon the bones. At the side of the body lay a pair of moccasins, a knapsack, and an indispensable or reticule. I will describe these in the order in which I have named them. The moccasins were made of wove or knit bark, like the wrapper I have described. Around the top there was a border to add strength and perhaps as an ornament. These were of middling size, denoting feet of small size. The shape of the moccasins differ but little from the deer skin moccasins worn by Northern Indians. The knapsack was of wove or knit bark, with a deep strong border around the top, and was about the size of knapsacks used by soldiers. The workmanship of it was neat, and such as would do credit as a fabric, to a manufacturer of the present day. The reticule was also made of knit or wove bark. The shape was much like a horseman's valise, opening its whole length on the top. On the sides of the opening and a few inches from it, were two rows of loops, one row on each side. Two cords were fastened to one end of the reticule at the top, which passed through the loop on one side and then on the other side, the whole length, by which it was laced up and secured. The edges of the top of the reticule were strengthened with deep fancy borders. The articles contained in the knapsack and reticule were quite numerous, and are as follows: one head cap, made of wove or knit bark, without any border, and of the shape of the plainest night cap; seven head dresses, made of the quills of large birds, and put together somewhat in the same way that feather fans are made, except that the pipes of the quills are not drawn to a point, but are spread out in straight lines with the top. This was done by perforating the pipe of the quill in two places and running two cords through these holes, and then winding around the quills and the cord, fine thread, to fasten each quill in the place designed for it. These cords extended some length beyond the quills on each side, so that on placing the feathers erect on the head, the cords could be tied together at the back of the head. This would enable the wearer to present a beautiful display of feathers standing erect and extending a distance above the head, and entirely surrounding it. These were most splendid head dresses, and would be a magnificent ornament to the head of a female at the present day. Several hundred strings of beads; these consisted of a very hard brown seed, smaller than hemp seed, in each of which a small hole had been made, and through this hole a small three corded thread, similar in appearance and texture to siene twine: these were tied up in bunches, like a merchant ties up coral beads, when he exposes them for sale. The red hoofs of fawns, on a string, supposed for to be worn around the neck, as a necklace; these hoofs were about twenty in number, and may have been emblematic of Innocence; the claw of an Eagle, with a hole made in it, through which a cord was passed, so that it could be worn pendent from the neck; the jaw of a Bear, designed to be worn in the same manner as the Eagle's claw, and supplied with a cord to suspend it around the neck; two rattlesnake skins, one of these had fourteen rattles upon it, these were neatly folded up; some vegetable colors done up in leaves; a small bunch of deer sinews, resembling cat gut in appearance; several bunches of thread and twine, two and three threaded, some of which was nearly white; seven needles, some of these were of horn and some were of bone: they were smooth and appeared to have been much used. These needles had each a knob or whirl on the top, and at the other end were brought to a point like a large sail needle. They had no eyelits to receive a thread. The top of one of these needles was handsomely scolloped; a hand-piece, made of deer-skin, with a hole through it for the thumb, and designed probably to protect the hand in the use of the needle, the same as thimbles are now used; two whistles about eight inches long, made of cane, with a joint about one third the length: over the joint is an opening extending to each side of the tube of the whistle, these openings were about three fourths of an inch long and a quarter of an inch wide, and had each a flat reed placed in the opening. These whistles were tied together with a cord wound around both.

I have been thus minute in describing the mute witness from the days of other times, and the articles which were deposited within her earthen house. Of the race of people to whom she belonged when living, we know nothing, and as to conjecture, the reader who gathers from these pages this account, can judge of the matter as well as those who saw the remnant of mortality in the subterranean chambers in which she was entombed. The cause of the preservation of her body, dress and ornaments, are no mystery. The dry atmosphere of the cave, with the nitrate of lime, with which the earth that covers the bottom of these nether palaces is so highly impregnated, preserves animal flesh, and it will neither putrify or decompose when confined to its unchanging action. Heat and moisture are both absent in the cave, and it is these two agents, acting together, which produce both animal and vegetable decomposition and putrefaction.

In the ornaments, &c., of this mute witness of ages gone, we have record of olden time, which, in the absence of a written record, we may draw some conclusions from. In the various articles which constituted her ornaments there were no metalic substances. In the make of her dress there is no evidence of the use of any other machinery than the bone and horn needles. The beads are of a substance of the use of which for such purposes, we have no account among people of whom we have any written record. She hand no warlike arms. By what process the hair upon her head was cut short, or by what process the deer skins were shorn we have no means of conjecture. These articles afford us the same means of judging of the nation of which she belonged, and of their advances in the arts, that future generations will have in the exhumation of a tenant of one of our modern tombs with the funeral shroud, &c., in a state of like preservation, with this difference, that with the present inhabitants of this section of the globe, but few articles of ornament are deposited with the body. The features of this ancient member of the human family much resembled those of a tall, handsome American woman. The forehead was high, and the head well formed.

I have already travelled over several pages of paper, and have proceeded not one mile in this Cavern of gigantic dimensions. I will proceed in the cave. The Saltpetre hoppers are placed at a distance from the mouth of the cave, which we reckoned to be one mile. The Cave at this place is large, and branches off in different directions.—The Saltpetre hoppers are constructed in the same manner as ash leaches are made, and the earth is lixiviated with water precisely in the same way that ashes are leached to make

pot and pearl ash. The fluid which is obtained by lixiviaition of the earth is mixed with fixed alkilies, and evaporated to the chrystalizing point, and thus Salpetre is obtained. The dirt yields from 3 to 5 lbs. of nitrate of lime to the bushel, requiring a large proportion of fixed alkali to produce the required chrystalzation, and when left in the cave becomes reimpregnated in three years. When saltpetre bore a high price, immense quantities were manufactured at the mammoth cave, but the return of peace brought the saltpetre from the East Indies in competition with the American, and drove that of the produce of our country entirely from the market. An idea may be formed of the great extent of the manufacture of saltpetre at this cave, from the fact that the contract for the supply of fixed alkali alone for the cave, for the year 1814, was twenty thousand dollars. In the excavations of the earth for the supply of the vats, immense quantities of remains of cane torches and old moccasins were found imbedded in the dirt. There was also found imbedded in earth near the mouth of the cave, a human jaw bone, of gigantic size. The inside of this bone would pass over the outside of that of an ordinary sized man. The workmen employed in the cave, were blacks, and were sometimes to the number of 70. They worked by artificial light from iron lamps, in which lard was burned. The stranger visiter, on passing up the cave and coming in sight of this sable group with their burning lamps, displaying their white shining ivory teeth and glistening eyes, would feel a sensation that the reader can as easily imagine as I can describe. During the whole time this cave was wrought in for saltpetre, there was no case of sickness among the numerous workmen. They all enjoyed excellent and uninterrupted health, and preferred this employment to that of labor outside.

No wild animals have ever been known to enter the cave. Bats are numerous in some of its extensive apartments in winter, and so numerous, that it is a wonder where they all come from, or how they all find their way to this great head quarters. These bats hang in clusters like bees in swarming and sometimes manifest displeasure by a twitering noise when a human being invades their apartments with a lighted taper. There are some crickets in the cave, such as are seen about kitchen fire-places in the fall season of the year. These are of a light flesh color. Some few rats and mice are occasionally seen in the cave. These comprise all of the animated creation which now inhabit this nether territory. In the River of the cave, which I shall hereafter notice, are fish of three species, one of which are destitute of the organs of sight. On passing the Saltpetre hoppers, the visitor ascends what is called the mountain, an ascent of about 20 or 30 feet, and at the top finds himself at the west end of the "Haunted Room." There is in the name of this apartment something to excite curiosity in the stranger visiter, and this is increased when looking forward in this magnificent apartment, his light reaches one object after another about the height of a human being, the heads of which have become coated with the smoke of the lamps of the workmen, and this, increased by the peculiar appearance which the feeble light produces upon the surface of the most distant, which are half enveloped in darkness. These objects when first seen look like groupes of men standing before you, but on a closer inspection are found to be figures formed by the operation of water percolating slowly through the rock which forms the roof, making what are called stalagmites. The commencement and progress of these formations are illustrated in the formation of icickles from the eaves of houses. The water in falling from the eaves, when it reaches the ground congeals, and if the supply of the fluid continues to fall the lower concretion will meet the upper and that which is pendant will form a pillar. The haunted room is about half a mile in length and contains great numbers of stalacites and stalagmites, and other concretions. One of these is called the bell. It is a hollow stalacite of large size, which is pendant from the upper ceiling or roof, and is shaped much like a hornet's nest. When this stone is struck, the sound from it may be heard in distant parts of the room. Hence its name. Another large concretion, is a stone much in the shape of an arm chair. This is a ponderous stone of great compactness. It is a solid piece of fluor spar. It was called "Wilkins' arm-chair," in honor of Charles Wilkins, Esq., one of the former proprietors of the cave.—Mr. Wilkins is a brother of the Hon. William Wilkins, American Minister to the Russian Court. In some parts of the haunted room there is much echo from sound, a voice or sound, is reverberated, and this first gave the apartment the startling name. This room is from 50 to 100 feet wide, and from 10 to 16 feet high. Its walls are covered with white incrustations. The visitor after passing the numerous concretions arrives at a place called the "sand-hill," down which he descends a gradual slope about forty feet, and at the foot of this hill, on his left, is an opening of about six feet wide and twenty feet high, through the solid rock, in a winding way leads him to the "Pond Room," so called. This opening is a wonder, a great curiosity. The indented surface of the wall on one side are in a corresponding shape with the projection of the wall exactly opposite, and have to the accurate and careful observer the appearance of having been once united together. On one side is to be seen a column with its swells and its mouldings, and on the other side, exactly opposite to it, is to be seen indentations of the same shape and form in the rock, and one would suppose that this had been the mould in which the pillar was cast, but on looking upward to the roof it is seen that its form is that of an arch. Here then is the action of some methodical arrangement in the very rocks, although enveloped in thick darkness. This passage is about thirty yards long, and before reaching the pond room, a deep pit is passed on the right. A stranger without a guide, would not be a safe traveller through this narrow way. On arriving in the pond room, the visitor takes to the left, and travels the northern portion of the room. This part of the room is paralell with the haunted room, but its lower surface is about 50 feet lower than than that of the haunted room. On the middle of the floor of the room is to be seen a pile of black looking stones which look like large cobble stones covered over with a dingy concretion, having somewhat the appearance of Blacksmith's cinders. To this place, some visitors gave the name of "Vulcan's Workshop." A little distance further on, in the same direction, is a small pond of clear water, as transparent as air. This pond is about three feet in diameter and nearly circular. The bottom is smooth rock and the water when examined by torch light appears to be about two inches deep. A gentleman from Massachusetts in company with some visitors attempted to jump across this pond and not being able to accomplish the undertaking by a few inches was exceedingly alarmed in finding himself knee deep in water. The depth of the water was thus deceptive from the great transparency of the fluid. This water may be termed *pure*. It has been in a state of perfect quietude, probably for centuries, so that all earthy particles, held in suspension, have become precipitated to the bottom by time, and now coats the surface of the rock which forms this subterranean basin. The pond room is in this section of it, about 12 to 14 feet high, and 30 or 40 feet wide. The floor, sides, roof, &c., are solid rock, and without any earthy covering on the lower surface.—The visitor retracing his steps back to the narrow passage through which he entered this apartment, arrives at the commencement of that part of the pond room, which lies to the right of the passage. Here in a short distance he hears the sound of falling water, and soon beholds a body of water falling through a circular opening in the ceiling into a pit of great depth in the floor. This body of water is about the size of a barrel and fills the aperture through which it falls. It is a splendid water fall, but has but few charms to the eye of a visitor —in this vast subterranean apartment. Returning the way I came, I retraced my steps until I again saw the light of day. Just before reaching the mouth of the cave and when I passed entirely without and began to ascend the hill into the surface air, I experienced a singular feeling. About the center of my body and entirely around it seemed to be affected so much as to be distinctly felt. I cannot describe the sensation—it was not in the least painful or unpleasant, but it was singular and peculiar in the extreme, and I have heard the same remark made by others, but I have never heard it accounted for. During this visit I travelled about seven miles in the cave going and returning, according to the distances noted by the guide. The cave, as I before observed, is perfectly dark. The guide carried two torches, myself and companions each, carried one.

These torches we held so near the floor

as to have a light to our path, which should be a lamp to our feet. In this visit I had an opportunity of learning something of the laws which govern light, and also sound. On entering apartments, the roof of which were high, we were obliged to wait some minutes before the light from our lamps would illuminate the apartment sufficiently for us to see the roof. Sound is not increased by being confined, but depends much on the state and temperature of the atmosphere. I remarked that the atmosphere in this Cave is pure, and respiration is easy. The atmosphere of the Cave remains unchanged throughout the year, and at 59 degrees of Farenheit. In summer weather, this is called cool, in winter weather, it would be denominated warm and comfortable. Thus it is that our judgment misleads us in forming opinions of heat and cold, unless we have recourse to some standard scale of measurement, less liable to err than our own feelings.

I have traversed various sections of the Cave frequent and often, at all hours of the day and of the night, and during all kinds of weather, fair and foul. In the distant parts of the Cave, night and day and rain and sunshine, are all alike. There all is dry weather and all is night's darkness. I will speak generally of it, when I have first given particular details. I have not been at the Cave since the manufacture of Saltpetre was suspended there, near the close of the war. At that time I furnished the carbonated alkalies with which the Saltpetre fluids were chrystalized. My knowledge of the Cave is extensive, and from personal observation made at various times, although more than a quarter of a century ago, yet notwithstanding the lapse of time. my recollection of this woundrous place is quite distinct. In the early part of 1838, the land called the Mammoth Cave tract, containing 1,610 acres, running ahout one mile on Green river, was sold by Hyman Gratz, Esq., of Philadelphia, one of the former proprietors, to F. Gorin, Esq., of Glasgow, Kentucky. This tract embraces the mouth of the Mammoth Cave, and with it the title to the Cave or io its entrance passes. Mr. Gorin erected a large Hotel at the Cave, capable of accomodating thirty or forty persons. In a letter which I received from that gentleman, dated Glasgow, July 18th, 1839, he remarks: that within a short time, new discoveries of numerous apartments have been made in the Cave, which are in the aggregate greater in extent than all the Cave previously known. A river of great extent had been discovered, and also a dome of great heighth. Mr. Gorin has since disposed of the Cave tract, &c., to Dr. John Croghan, of Locust Grove, near Louisville, Kentucky. I have received from a scientific gentleman of high standing, several lengthy letters in reference to the Cave as now known, and the particulars of various discoveries recently made in it, which I will give in detail and in chronological order. My correspondent, in his letter to me of June 24th, 1841, remarks: "The discoveries made in the Mammoth Cave the last two years are, in the estimation of many, better worth seeing than all the Cave, as previously known. They consist of numerous branches and avenues; domes of great size and beauty. Until recently no person had explored the Cave in which the "Bottomless Pit" is situate, beyond the Pit; now, the most extensive and interesting part of the Cave (as now known,) is beyond the Pit. For this discovery we are indebted to a gentleman of Georgetown, Kentucky, named Stevenson. He ascertained that the Pit was nothing but a chasm of great depth extending across the Cave, and therefore got a ladder of sufficient length to reach across. On this ladder, this daring man, the guide, and some two or three others, crossed this deep and frightful chasm, and on reaching the opposite bank, found themselves in a cave of considerable size, which, after exploring it to the distance of about two miles, brought them, to their utter astonishment and delight, to the celebrated river of the Cave, unknown until the last two years. In order to gratify the numerous visitors with a view of this deeply interesting section of the Cave, the proprietor has had a large and strong bridge, with suitable rail-ways, erected over the "Bottomless Pit." Rocks have been removed so as to render walking pleasant in the different avenues; stair steps have been placed where required; boats are in readiness for those who feel inclined to take aquatic excursions, and Bengal lights can be had by such as wish to witness the sublime spectacle which is exhibited by an illumination of the various domes. The river is three miles from the mouth of the Cave; where you first strike it, it is not very wide, but of a considerable depth. It is in this river that fish without eyes have been found. It was the opinion of Professor Davidson, of Transylvania University, (who wrote a pamphlet concerning the Cave,) that these fish had eyes and were blinded by light, or in other words, that the apparent want of eyes, arose from the sudden stimulus of light. This is not the case. A professor of the Louisville Institute, anatomized the head of one of these fish, and says there is no indication of there being such an organ. The improvements within the Cave commence about half a mile from the mouth, in that branch known as the great "Bat Room," but now as "Audubon's Avenue," named by the proprietor after his old friend, the celebrated Ornithologist. There are two regular guides at the Cave. The best guide is Stephen, he has made many discoveries, and although he has acted as a guide for a number of years, he takes great pleasure in accompanying visitors and penetrating its most remote ramifications. No later than November last, he, when acting as cicerone for a German gentleman, made one of the most interesting discoveries of the Cave. This visiter was quite an enthusiast in respect to the Cave, and as anxious to make discoveries as Stephen was to gratify him. They penetrated the Cave to within half a mile of the river, when Stephen pointed out to him an opening, not exceeding four feet square; they entered this, and after going a short distance, found themselves in a Cave of considerable size, which seemed to take a direction in the course of the Cavern's mouth. After walking about one mile in this branch, their progress was suddenly arrested by an abrupt, indeed perpendicular descent of the rock on which they stood. All beyond, above, and below, was perfect darkness. At a distance they heard the fall of water, but no idea had they of the space before, of the depth below, or of the heighth above them. They returned and reported the character of their discovery. No attempt was made to descend this precipice for a month, when some gentlemen from the adjoining County, determined on making the effort. A strong rope was obtained, and upon reaching the spot, the guide consented to be let down into this dark and unexplored region.

This was done, and he did not descend more than thirty feet before he exclaimed "I am on the side of a hill!" Untying the rope he descended the hill from seventy to one hundred feet, and was enraptured by the appearance of a magnificent dome of great width and heighth, and a cataract tumbling from its top. Having gratified himself in beholding this splendid spectacle he ascended the hill to the point from whence he embarked, and the other guide manifesting a desire to join him was let down by the visitors. They continued ascending the hill, (not without much difficulty) to its summit, and there beheld the most awfully grand and sublime sight of this famous cavern. The top of the hill is quite level, embracing an area of about one acre in extent. The bottom is of rock, having innumerable indentations about the size of a large tea cup and lined with chrystals of carbonate of lime. A few feet from the wall of this spacious hall are staglamite columns (the number I have forgotten) of the most gigantic size and altitude. The distance to the ceiling above is **280** feet as measured by Mr. Lee, civil engineer. This fact in regard to the elevation of the ceiling and the locality of the great hall was subsequently ascertained by finding in this spot never before trodden by man, an *iron lamp!!* The astonishment of the guide, as well as that of all the party in beholding this lamp can be easily imagined, and to this day they would have been ignorant of its history but for the accidental circumstance of an old man being at the cave who thirty years ago was engaged as a miner in the manufacture of saltpetre for Wilkins and Gratz. Upon seeing the lamp he said the place where it was found was directly under the little bat room pit, a fact which surprised all, that during the years 1810 to 1814, Wilkins of Lexington, and Gratz of Philadelphia, were extensively engaged in the cave, manufacturing saltpetre and a Mr. Gatewood informed Mr. W. that he thought the richest saltpetre earth was under the little bat room pit. The depth of this pit was then unknown. Mr. Wilkins therefore got a rope 45 feet long, to the end

of which he tied with a string this identical lamp. In letting the rope down, the string caught fire, and down fell the lamp. Mr. Wilkins made an offer of two dollars to any one of the workmen who would descend the pit and bring the lamp up. His offer was accepted by a man, called in consideration of his diminutive size, "Little Dave." Little Dave had the rope tied securely round his waist and was let down, holding a torch in his hand, its entire length; he was then pulled back by the workmen, and so alarmed was the poor fellow, that it was with difficulty he could articulate.

"Dave remarked that no sum could tempt him to try again for the lamp, and related the most marvellous account of what he saw. He was suspended at a heighth above the level below, of 240 feet. Such is a history of the lamp, as related by old man Holten. To ascertain if his views in respect to the place where the lamp was found, was correct, the guides went to the spot, where they found it, and persons at the pit above could be heard by those below, and sticks thrown down were brought out. From the mouth of the Cave to this pit, the distance does not exceed a mile, yet to reach the grand apartment immediately under it, the visitor will have to perform a circuit of at least three miles. Foreigners who have visited this section of the Cave, have declared that a view of it alone, would compensate them for a trip across the Atlantic. The discoveries recently made in the Cave, greatly exceed in extent all that was known when you was at the Cave. A gentleman of unquestionable veracity, and one who has ample opportunities for acquiring correct information, having resided there and in its vicinity, thirty years, gives it as his opinion, that there is not less than two hundred square miles of Cave." (I presume my correspondent has reference to Mr. Gatewood.) "The Cave is abundant in minerals, such as the sulphate of lime or gypsum; Epsom and Glauber salts; nitrous earth; chalk; sand; flint; pebbles; red and grey ochre; calcareous spar; chalcedony; chrystalized carbonate of lime; Oolite; chrystals of quarts, &c. &c. The echo in various branches of the Cave, is very extraordinary. On the river it is the greatest. On one part of it, I was told, that talking in the ordinary way, produced a reverbation which was rather unpleasant to the hearer."

I extract from a second letter of my correspondent, dated October 23d, 1841, as follows: "The 'Bottomless Pit' has been sounded, and is but **170** feet deep. The river can be reached by two routes, one is by crossing the bridge, which extends over the bottomless pit, and proceeding thence through the winding way and other avenues, and the other is by going through 'Penseco avenue' and 'Bunyans' way,' which leads to the bottom of the bottomless pit, and thence on to the river. There is water in the bottomless pit. The route to the river from 'Penseco avenue,' through 'Bunyan's way' and the bottomless pit, is much lower than that by the winding way, and consequently more wet and disagreeable. The imprint of children's footsteps have been seen in several sections of the Cave, and in the earth dug up in the Gothic avenue were the remains of Cane torches, bundles of faggots, moccasins, &c. The lower jaw bone of the immense skeleton found in the Cave, is in the possession of a gentleman of Tennessee, and I am in hopes of procuring it from him. The skeleton of this supposed giant, was re-intered by Mr. Miller, more than thirty years ago, between the mouth of the Cave and the first hoppers. Efforts will be made to find the spot and disinter it. The Cave has been explored according to the estimate of the guides, thirteen miles in a direct line, which is the limit to their explorations in a cave or avenue beyond the Rocky Mountains. How much farther they could have gone in this Cave, I know not. From the mouth of the Cave to the river is three miles, from thence to the landing on the third river, one mile, and from thence by the pass of *Ell ghor* to 'Cleaveland's avenue,' four miles, and from the ladder you ascend to get to 'Cleaveland's avenue' from 'Croghan's Hall,' two miles. The Cave to which I allude, as a limit to the guide's discoveries in this quarter, is to the right of 'Cleaveland's avenue,' (if I am rightly informed,) and about half a mile from 'Croghan's Hall." Only a part of this distance has been measured, the remaining portion is computed, from the time occupied in reaching particular points, and judging according to this rule, I think the distances not much exaggerated. In going to 'Cleaveland's avenue,' the visitor passes a number of Caves, one of which is named 'Silliman,' in honor of the distinguished Professor of Yale College.

"The Cave continues beyond its mouth in an opposite direction, and at some very remote period the Cave was broken in at this place. The ancient mouth of the Mammoth Cave, is a quarter of a mile from its present one. The mouth of 'Dixon's Cave' was originally that of the Mammoth. 'Dixon's Cave' is, so far as it goes, of immense size. Laborers digging for Saltpetre earth, at its extremity, have been heard within ten feet of the Mammoth Cave. The proprietor intends to connect them at some future period. The river within the Cave has not been explored; it is influenced by Green river only, when the latter is very high, the river in the Cave rising occasionally when Green river does not. The river within the Cave, rises to the height of thirty or forty feet perpendicular. Mr. Craig, of Philadelphia, and Mr. Patten, of Louisville, (the discoverers of 'Cleaveland's avenue,) ascertained that Stephen labored under a mistake in supposing that the river terminated in a lake. The supposed lake is only an expansion of the river. There are but few varieties of fish in the Cave, the cat-fish is the most abundant, and is (as I remarked in a previous communication,) perfectly white and destitute of eyes. One of the laws of sensation is verified as respects this fish, viz: that the loss of one sense increases the vigor and acuteness of the others. These fish are regardless of the greatest degree of light, but the least agitation of the water alarms them, hence the difficulty of catching them. A small fish, denominated sun fish, a species of perch, is found in the river, but principally, if I mistake not, only during the summer months. The rivers of the Cave have no fixed names. One of them is called the river Styx, and the third and largest, the Echo river, from the extraordinary echo heard on its waters; it is literally deafening. Messrs. Craig and Patten, who took soundings in the river, ascertained the average depth to be eight feet. Sulphate of lime is found in the main Cave, two miles from its mouth; it is also to be seen in some of the other branches. Glauber salts is found in that branch of the Cave, called 'Salts Room.' Epsom salts is found in large quantities, in the Cave, and in different parts of it; large piles of it are seen in 'Cleaveland's avenue,' and here also it is seen beautifully chrystalized. During the month of August last, Messrs. Craig and Patten, of whom I have before made mention, spent two weeks at the Cave, and were, during a great part of that time, making explorations beyond the river. The most interesting discovery which they made, was 'Cleaveland's avenue,' named in honor of Professor Cleaveland, of Bowdoin College. It is on an average, seventy feet wide, twelve to fifteen feet high, and two miles in length. The ground on which the visitor walks, and the sides and ceilings of this avenue, is encrusted with every variety of formation, and generally perfectly white. It is truly a beautiful, a gorgeous spectacle! Visitors who have but half a dozen lamps, can form but an imperfect idea of this splendid avenue. They see it only in detached parts, and can only admire these singularly handsome formations pendant from the ceiling. It is when illuminated at different points with Bengal lights, by means of which you can have an extensive survey of the entire scene, that you can properly appreciate the splendor of this avenue. When thus illuminated, a spectacle is exhibited to the view of the beholder, which for brilliancy has possibly no parallel, and which it is impossible for language to describe. It is much to be regretted that this avenue is at so remote a distance within the Cave. To reach it the visitor has to travel on a very long and rugged way, and persons unaccustomed to exercise, become so exhausted by the time they reach there, that the sensation of fatigue destroys every thing like enjoyment; but, apart from this consideration, he who could behold this magnificent avenue, incrusted as it is with its rare and beautiful formations, without experiencing the highest order of admiration and delight, must indeed be devoid of capacity to enjoy the beauties and sublimities of Nature's works. Since the explorations of Messrs. Craig and Patten, two of the Professors of Bardstown College have visited the Cave, and made some discoveries in the *transfluvian* (if I may be allowed the expression,) section of the Cave.

I have not seen them: I am told, however, they are exceedingly interesting. One is a small but beautifully arched avenue, leading to what they have named 'St. Mary's Chapel," a perfectly white room, about twenty feet in diameter; the other is called the 'Holy Sepulchre,' which is remote from 'St. Mary's Chapel,' upwards of two miles. The 'Holy Sepulchre' is difficult of access; it abounds with the most beautiful stalactites, in one part of it there is, to all appearance, a fresh dug grave of the usual size of an adult grave. As characteristic of the spot, the Priests named this place the 'Holy Sepulchre.'"

In a third letter from my correspondent, dated April 21st, 1842, he remarks: "Much the most interesting and extensive section of the Cave, is beyond the river, and the specimens obtained from this recently discovered quarter, are as rare as they are beautiful. The proprietor of the Cave sent a few of them to Doctor Locke, Professor of Geology and Chemistry, in the College of Ohio. Doctor Locke states, they are unlike anything yet discovered, equally beautiful for the cabinet of the amateur and interesting to the geological philosopher. Doctor Locke has given the name of *Oulophitites*, signifying the curled leaf stone, to some of the specimens sent him from 'Cleaveland's avenue.'"

In another letter from my correspondent, dated July 26, 1842, he states: "Mr. Allen and Mr. Campbell, artists of great merit, have been for sometime engaged in taking views of the Cave. The painting of the 'Stalagmite Hall,' the 'Church,' the great 'Domes,' the 'Bandit's Hall,' the river scenery, &c., will be peculiarly interesting. The work, which will be a large one, containing descriptions of the Cave generally, and particularly of the scenes represented, will be written by some competent writer, and it, as well as the engravings, will be published in England or Scotland."

I have received two letters from my correspondent, dated in 1843, in which he speaks of the lectures of Doctor Locke, delivered at Cincinnatti, on the Mammoth Cave, having been fully attended, and that these lectures afford much minute and valuable information to the Cave and its minerals, &c., &c. When the Cave was first worked for Saltpetre, there was a chamber then known by the name of the 'Deserted Chamber,' the floor of which was covered with loose dry sand, in which were the imprints of children's feet. An imprint of a human footstep in an apartment situate like this, would remain forever in the sand, unless disturbed by being obliterated by visitors. Some of these tracks measured but four inches in length.

In traversing the Cave, the visitor is able to determine, by the sound of his footsteps, when he passes an apartment still below him. Persons who have been accustomed to travelling on railroads, will have noticed the change in the sound at the time when the cars pass on an earthen, a stone or wooden road, and more especially if there is any hollow beneath. It was the custom formerly, in the Cave, for a visitor when traversing the Cave with guides, when turning into another apartment from that in which he had been travelling, to make the mark of an Arrow pointing the way he had come, in case he should be confused as to his way. The instructions to the guides always were, to make a final halt in case the lamps should, from any cause give out, and there wait until the people at the mouth of the Cave should go for them. A person in the dark would be as apt to take the wrong end of the road as the right one, and therefore the only safe way is to keep still. Locofoco's were not in common use when the Cave was worked for Saltpetre, 30 years ago. At the time the Cave was wrought, the workmen computed the main Cave to be thirteen miles in length. Distances were computed by the watch, and it is probable that these were overrated. A dozen miles under the earth is a long way to travel, and when it is considered that every inch of the way has to be scrutinized with care, it is a task to travel thirteen miles, and not a small one either. Formerly there was a waggon way in the Cave one mile long, and oxen travelled over this way two or three years, until it became a good road. I have read a great number of accounts, given by various visitors of the Cave, since I was there, and I have preserved many of these, and among them is one published in the Lexington, Kentucky Intelligencer, in 1834, which is very accurate, and from which I extract the following:

"The writer of this article has recently visited this Cave, and proposes to give such a description of it, as the limited time allowed him to explore will permit.

"Our company consisted of the writer, two ladies, the guide Mr. Gatewood, and two servants, one of whom acted in the capacity of guide from the Inn. Our first descent after leaving the house, was down an abrupt precipice, into a ravine, or rather a basin, the bottom of which extends to the opposite side of the Cave, and some distance in front. It is mostly covered with a growth of oaks and small under shrubbery. A narrow winding foot-path conducted us to the mouth of the Cave, near which are the ruins of several furnaces, constructed many years since, and employed in the manufacture of Saltpetre, and about fifty iron kettles, used for the same purpose. Before entering the Cave, we had to descend another deep precipice, about thirty feet. Standing upon this we felt a cold atmospheric current rushing from the cavern, which, with the damp, dark entrance below, (the water dropping from the rocks,) rendered the prospect so inhospitable and comfortless as almost to chill the curiosity, and forbid a further descent. After descending this precipice our guide lighted the lamps, the rush of air being too strong at the summit to descend with them burning, and with a slight inclination of the head, and shuddering sensations, we passed under the immense masses of overhanging crags, into a narrow winding avenue, leading to the high arched rooms of the main cavern. This avenue extends a quarter of a mile, and was first rendered passable by visitors in an erect position, by the Saltpetre manufacturers, whose improvements, if they may be so called, extend a mile into the Cave. A waggon road was constructed by them this distance, and the wooden pipe for the conveyance of water from the mouth of the Cave to the Hoppers, and much other machinery made use of by the manufacturers, still remain as they were left twenty years ago. As we passed along this road, we also observed the ruts formed by the waggon wheels, and the tracks made by the oxen employed in the Cave, which in many places are perfect and apparently as new as if made yesterday. At the end of the avenue, we passed through a small door, formed by the construction of an artificial well across the Cave, and after gradually ascending and descending some ten or twenty feet over what is called the 'rocky mountain,' the cavern widens into a lofty and capacious room, the arched ceiling of which, is seventy feet from the floor, and the width a hundred yards.

The roof or arch of the Cave here, resembles the appearance of a hazy sky dimly lighted by the moon, an alteration of light and shade occasionally deepening into blackness. This room extends perhaps one hundred and fifty yards in length, when the walls contract again and the Cave and its rooms continue comparatively narrow until we entered what is called the 'Cathedral,' which is another stupendous arch, such as Nature alone, in one of her mightiest convulsions, could form. The roof of the cavern here, is upwards of a hundred feet from the floor, and the width, including a recess on one side, must be an eighth of a mile. The rocks composing the walls have a brown appearance, but much of the room here, as in many other parts of the Cavern, are of a chalky whiteness. The name 'Cathedral,' was given to this part of the Cave, from the circumstance of a religious meeting having been held in it a short time since. A rudely constructed pulpit is still standing, and the seats for the accommodation of the audience remain as they were originally placed. Our guide stated that a large multitude attended the meeting, and that the room being lighted by a hundred lamps, presented a splendid and sublime appearance. Near this, which is about a mile from the entrance, we were startled by what resembled the report of a cannon. After recovering from our surprize, we ascertained that the almost stunning noise, which was reverberated in long and loud echoes from various parts of the Cave, was produced by a small stone thrown by our guide against a log trough, formerly used for feeding oxen. We had travelled but a short distance from this, before the ladies signified their wish to return, and dismissing them with one of our guides and many particular instructions, we decided, as we had time to visit but a small part of the Cavern, to take one of its most interesting branches, about half a mile beyond us, first

explored last year, and after examing some portions of it, to return to the mouth.

"We left the main Cave on our right hand, and creeping through a narrow winding avenue a short distance, in which we descended about seventy-five feet, we entered a room of the usual width and heighth of the main Cave, extending a quarter of a mile. At the end of this we again turned to our right, and experienced considerable difficulty in making our way in safety through narrow apertures, down a descent of one hundred feet more. Here we found ourselves in another large Cavern, the roof and walls of which are white and chalky. In travelling half a mile, we came to a part of this Cave, called 'The Deserted Chamber.' It received this name, from the prints of human feet in the sand on one side of it, which are as perfect as if made yesterday. These impressions extend some distance, and appear to have been made by a female leading a small child. The sand here is moist, which is unusual in the Cave, and is undergoing the process of petrefaction.

"We pursued our route a quarter of a mile further, sometimes being compelled to stoop, when we came to a pit seventy feet in depth, by measurement. The diameter of its mouth is about ten or fifteen feet. We held our lamps in a position to obtain a view of its walls some distance downward, which are perpendicular, and appear as regular as if they were the work of art. Near this pit in the floor of the Cave, is a fine cool spring, from which all drank freely. We continued our walk a short distance over a smooth sandy floor, to what has been named the "Bottomless Pit,' a name applied with much propriety. It extends quite across the Cave in front, leaving a narrow passage into another branch of it on the left, never yet explored, and is about thirty feet in diameter at its mouth. Its walls, as far as could be seen, are much the same as those of the pit described above.

"Our forward progress was here interrupted, for although we could see the continuation of the Cavern beyond the chasm just described, it would have been madness to have attempted to reach it. We therefore retraced our steps nearly a quarter of a mile, and entered without difficulty another branch of the Cave, the floor of which, the distance we followed it, (about one mile) was principally composed of loose masses of flint rock. The curiosity that first attracted our particular admiration in this Cavern, was the 'Dome of Washington,' a magnificent dome having the shape of a Bishop's mitre, about fifteen feet at the base, and seventy-five feet in height. We entered this dome by descending ten feet through a small door on the left of the Cave. Its form at the base is nearly round, and its walls have all the regularity of construction and perfection of design, characteristic of the nicest masonry. Leaving this by the same door we entered it, and pursuing our forward course a few hundred yards farther, we arrived at the entrance to the 'Dome Spring' on our right hand. This dome is larger at the base, and loftier than the one just described, and excited a full measure of wonder and admiration, both for its perfection of form and construction, and a spaciousness of dimensions. Its shape is that of a regular cone, about twenty feet in diameter at the base, and one hundred or one hundred and twenty feet from the floor to the apex. A fine cool spring of the most limpid liquid we ever beheld, gushes from the wall, and covers about one half of the floor. From this fountain in one of the lowest recesses of Nature, we again refreshed ourselves; and leaving the dome by the same door that we entered it, (the only one) we travelled nearly a half a mile to the 'White Chambers.' These apartments derive their name from the beautiful whiteness of their walls and roof, they being frosted over with a bright chrystaline substance, about half an inch in thickness, large flakes of which we peeled from the rocks without difficulty. The effect of even the two small lamps we carried with us, upon the walls and roof, was admirable. A large number of lights would have made the spectacle splendid.

"The limited time allotted us by the appointment for making our observation in the Cavern, having more than expired, we were obliged to set out on our return to the mouth of the main Cave, where we expected to meet the ladies, whose parting from us was above mentioned. This the writer did with regret, for the little, the comparatively very small portion of this stupendous and almost limitless vault of Nature, which he had seen, excited a curiosity greatly increased from what had been felt before entering it, treading its 'devious ways' and exploring its alternately gloomy and gorgeous recesses. Our first object now was, to re-enter the main Cave; this we did, not by retracing our steps, but by turning into another branch of the Cavern on the left hand, a short distance from the 'White Chambers;' and after pursuing it a few hundred yards, ascending in rapid succession steep precipices and crags, until we found ourselves once more in the spacious range of rooms we had left previous to our entering the first branch. It should be remarked, that we left the main Cavern on the right-hand side, and we returned to it through an aperture, on the left-hand side; proving, that in our rambles below, we had passed directly under the main Cave: our re-entrance to it was about a quarter of a mile beyond or more, distant from the mouth, than where we had left it. Having arrived at the mouth of the branch at which we at first departed from the main Cave, the writer suffered the guide and servant to go in search of his hat, which for convenience, he had parted with in one of the narrow passages at some distance. The sensations of utter loneliness produced by being left in the high arched and gloomy room where he stood, were more oppressive, not to say overwhelming, than he ever before felt or expects to feel in any other situation than that in which he was placed. The solitude and silence were perfect, awful, profound, appalling; words cannot describe, the nerves and senses alone can realize them. The guide and servant having returned, and the road before us being unobstructed, without accident we soon reached the mouth of the Cavern, where we found the remainder of our company in waiting for us.

"The above is a hasty and in many respects imperfect description of the writer's own observations while in the Mammoth Cave. The distance he travelled in the Cave, was thought to be about five miles. The portion of the Cavern he saw, is probably as interesting as other parts of it, but he scarcely made a beginning toward a complete examination. Indeed, the extent of the Cave, with its unnumbered branches and ramifications, is almost interminable, and months, perhaps years might be employed in exploring those parts of it that have never yet been seen. The main Cave, in which the writer travelled about a mile and a half, extends twelve miles, where it forks, forming two main Caves. One of these forks only has been explored to its termination. The distance from the mouth to this point, is said by some, to be twenty miles. The other fork has been explored an equal distance, but no one yet has had sufficient perseverance to trace it to its end. The branches from the main Cave the whole distance, are frequent, and the branches from the branches are still more frequent, presenting a map, resembling the profile of a large tree, with trunk, large branches, smaller branches and twigs. The floor and walls of the Cave, are generally dry and dusty. The atmosphere is temperate, pure and invigorating. It is said that animal substances placed in the Cave, never become putrescent. The bodies of several aborogines, retaining in great perfection their general shape and features, in a state of petrifaction, have been discovered in the Cave, and are now preserved in some museum of the country. Some of the rooms of the Cavern were also used as cemeteries by the original population of the country; the bones and the other remains, together with the grave clothes in which the bodies were enveloped and interred, in a state of good preservation, having been discovered by the Saltpetre manufacturers, when making their excavations. The cloth, however, which was formed by the weaving or braiding together of narrow slips of bark, was soon decomposed after exposure to the light. No inconvenience is experienced by remaining in the Cavern any length of time, but on the contrary its atmosphere is regarded by those residing in the vicinity, as being highly conducive to health. In conclusion, the writer cannot but remark, that he regards the Mammoth Cave as not only the most interesting, but one of the, if not emphatically the most wonderful of all natural curiosities yet discovered"

The Cave has been at one time inhabited, but to what extent it is impossible to say. In one of the very distant apartments, in 1811, were to be seen such evidences as established conclusively the fact. The time is not far distant, when a full, detailed, and particular account of this Cave will be published, and then the public will have an op-

portunity of forming an opinion of its vastness, of its localities, and of its magnificence. It is impossible to convey to the reader, with the pen, any thing like a proper description of the appearance of the distant apartments of the Cave. The Cave must be seen to be admired. A full description would, in the mind of a distant reader, seem more like an account of an enchanted Castle, than a reality. The inhabitant of the Torrid Zone, whose knowledge of natural things is confined to his own latitude, would find it difficult to believe that "Boreas," in a single winter's night, in this latitude, should cover one of our deep lakes with a chrystal bridge, formed of that acquaeous fluid, of which he drinks to quench his thirst. Yet such is the reality. A January night, of 1844, has witnessed the formation of ice on a broad surface of water of sufficient strength, to be travelled on for miles! an ice bridge!! a chrystal cover!!!

Travelers who wish to visit the cave, will find it a pleasant place to pass a few weeks. I know of no place to compare with it. A most excellent hotel is kept at the cave for the accommodation of visitors. After the previous pages had passed through the press, I perceived that I had left the distances of the Bear Wallow and also of the Horse Well from the cave, blank. The Bear-Wallow, is 15 miles, and the Horse-well is 12 miles from the mouth of the cave. Pruits Knob, of which I have made mention, is 250 feet high.

The sense of smell I am inclined to believe is not retained in the cave. I speak of this as my own experience.

I have never seen any wild animal of any kind at the cave, nor are there any snakes in this subterranean territory.

The solar light is not seen in the cave.—How necessary this is to the sustenance of animal life, is not determined. Where the solar heat is most intense on the various sections of the surface of our globe human life is the most brief. In high northern latitudes where there is but little comparative solar heat, human life is protracted, and good health enjoyed.

The Green River, or Kentucky Barrens are a limestone formation. Much of the water in this section of the State, runs under the surface of the ground. The horse well of which I have spoken, is a pit about 30 or 40 feet deep, judging from my recollection, having but once examined it, and that more than 25 years ago. It is now on the side, and was formerly in the great road leading from Lexington to Nashville. The path is now made a little distance from it.—Formerly a traveler having a led horse broke in at this place, and he was only saved by clinging to the horse he was leading. At the bottom of the pit is a little run of water. Brush are thrown around this, as a kind of hedge to keep travellers from falling into it. The Bear-Wallow is a pond where the bears were seen to wallow when the country was first settled, and their practice in this suggested to the settlers the plan of making artificial ponds to collect water for their cattle. To accomplish this a hedge is built around a sink hole or natural indentation in the earth. In this several hogs are placed. These animals tramp over the ground and as the rain falls make a sort of puddling of the surface. Thus it is qualified to hold water like a dish and large ponds are to be seen in great numbers on the Barrens made in this way.

The Mammoth Cave is a wonder of wonders. When or how it was formed, none but him who formed the hills, can understand. It is the work of Nature, and probably had its begining when the mighty Deluge, of ancient time, had its end. The stratas of the earth, doubtless, were such as were soluble in the aqueous fluid that buried the face of our globe beneath the mighty waters.

The lightning's fire—the roar of the thunder of the raging tempest—came not here. While the reverberations of peal on peal of deafening thunder shakes the windows of terestical habitations built upon the outer surface, and make the inmates tremble with dread emotion—here, here all is silent, calm, and tranquil. The fury of the whirlwind, the germ of the tornadoes blast, comes not within the subterranean chambers. No angry clouds lighted up with the coruscations of the lightning's fire, and shaken by the detonations of the terrific thunder, invade this nether palace. He who has heard the raging tempest, and seen cloud piled on cloud raving with madening fury, who has heard the moaning wind howling at every blast, in all its solemn emphasis of expression, can here, in calm composure measure in his mind the mighty contrast.

The scorching rays of the summer sun, the stiffening cold of the freezing wind—come not here—here, all is equal, even temperature, and unchanging.

The sickning blasts of pestilential winds come not within these nether chambers—here all is healthful.

No mephetic air loads the atmosphere of these chrystal chambers—for here the atmosphere is tempered by the warmth of the bosom of mother earth, which is unchanging, and like as the moistened clay, extracts the poison of the viper's bite, so here all air is purified. It is life to breathe such an atmosphere—it is medicine to the body to partake of such ærial refreshment, and medicine to the mind to contemplate the beauties and the harmonies of nature in these chrystal chambers where silence and solitude are sweetened by the hand which framed the world.

The earthquake, the thunder of the nether world has here a solemn, a sublime, and awful echo. These walls tremble, and totter when the silence of its chambers are broken by the moaning of the earthquake's roar.—Poor mortal man, when standing within these massive walls would quick remember GOD in such a moment—the aspirations of his soul would be eloquence of devotion breathing the language of prayer, in look, thought and deed.

Day and night are both alike to the sojourner in the halls of the most distant apartments of this nether territory—for here is a darkness that may be felt—may be seen—although darknees is transparent—and yet it is thick darkness which cover these shining walls frosted and irradiated by the hand of nature, as with a garment.

In this gigantic cavern, is the silence of solitude—a solitude that is grand, imposing and solemn—"a silence that is perfect, profound, and overwhelming." I have at the hour of midnight, stood upon the pinnacle of a majestic mountain, towering in the clouds, with upturned eyes, contemplating in calm and solemn silence the starry firmament, the celestial worlds which spangle the mighty vault of Heaven, and then casting my eyes downward and beyond the mountains base, upon the great terestial carpet chequered with its endless variety, illuminated by light thrown from that great lunar reflector placed near a quarter of a million of miles above my head—and I have also at the hour of midnight stood within the distant halls of this vast subterranean palace, holding in my hand a lighted taper, which at every pulsation of my heart, cast its rays upon myriads of shining points in this great subterranean vault which glittered and sparkled in the embrace of its unsual visiter; every motion introduced other points, reflecting their shining sides in rich profusion, and in both cases a feeling pervaded my bosom that language cannot describe. The splendor, the grandeur, the magnificence of the the works of nature when thus presented to the human mind in the silence of solitude—in the calmness of quiet—in the solemnity of awful reality, kindle in the bosom, emotions that glow with a sensation that humbles human pride, and raises the aspirations of the soul to the homage of adoration. Why should the majestic towering walls of this nether palace be decorated with brilliant mineral frotsings, its countless millions of shining gems, sparkling with almost living light, and these subterranean surfaces be thus irradiated, far, far beyond the decorations of the most magnificent palace of any earthly potentate? Who can answer?—The eyeless fish sport in the crystal waters of the pools of this nether palace—for their use are these decorated walls—these crystal gems. Yes, vain man, these are the only occupants—and this reality should be humbling to thy vanity. These ornaments are as useful to these eyless fish, as most of the ornaments with which mankind decorates their persons, are to bearer.

In 1810 and 1811, the earthquakes which were so severe at New Madrid, upon the Mississippi, were felt at the Cave. The Miners were at work at the Cave during one of these shocks, and they were greatly alarmed, and it was sometime before they could be persuaded to return. In a letter from my correspondent, dated May 21st, 1843, in speaking of the earthquake felt at the West and South, in 1843, he says: "The Earthquake produced no impression at the Cave."

E. MERRIAM.

AMERICAN SALT.

To the President and Board of Managers of the American Institute.

Gentlemen:

The manufacture of Salt, in the United States, has become to be a business of great pecuniary importance to those engaged in the preparation of this necessary of life, and the supply of this article to the consumer, at a reasonable price and of good quality, is a matter of great importance as regards the public at large.

It will be seen by a reference to the report made to the Legislature of the State of New York, by Rial Wright, Esq., the State Superintendent of the Onondago Salines, that the duty imposed upon the manufacture of Salt, at Onondago, by the Legislature of this State, from 1817 to the 1st of January, 1844, has amounted to the large sum of two million nine hundred and thirty thousand four hundred and fifty-eight dollars and six cents, which money has been collected from the manufacturers and paid into the State Treasury.

The policy of collecting a local tax of such great magnitude, from the citizens of a particular district, is a question of grave character. The justice of the monopoly of the manufacture of Salt, or that which is equivalent to monopolizing its manufacture by the State, is one of still more important bearing.

The Government of China have a Salt monopoly, and from the avails of it predicate the supply of the means for the payment of the Opium indemnity to the English government, which has, in defiance of every principle which ought to govern a christian nation, forced this noxious drug upon an almost defenceless people of China.

I have visited the Salines at Onondago, and examined the works for the evaporation of the salt waters raised from the wells there sunk in the earth. These consist of two kinds. The first and best, is those constructed for the evaporation and chrystilization by solar heat. The second, are the works in which large potash kettles are used for boiling down the salt water by the heat of wood fires.

The vats used for solar evaporation, are placed on wood frame work about three feet above the ground, and are furnished with sliding covers to protect the basin from rain and snow. These are well calculated for the purpose intended, but I am of opinion that if the covers were placed higher, so as to allow drying winds to pass underneath the roofs, that the evaporating process would be hastened. If a greater body of salt water was placed in the evaporater, I think the salt produced would have more solidity.

This mode of making Salt is decidedly the best, and I think the most profitable. The heat is the product of Nature, and costs nothing. All the expense to the manufacturer is the attendance upon the salt-field, and the interest of the cost of the evaporators, and the cost of the ground upon which these works are placed.

The manufacture of Salt by boiling down the brine in potash kettles, is a rude mode of performing the operation, and unless the supply of brine is inexhaustible, is one of great waste of that fluid. The furnaces are rudely constructed and generally consist of two rows of potash kettles, set lip to lip, under which wood of large size is burned as fuel, without the appendage of a grate.

The kettles are of great thickness, and when thoroughly heated, become red-hot; this great heat causes the Salt as it chrystalizes and falls to the bottom, to vitrify and cake upon the kettles, impairing the pans and wasting the salt, as well as three fourths of the heat. If the kettle is three inches thick at the bottom, and the caking four inches, then there is a body of seven inches in thickness to heat through, which will require the consumption of as much fuel as would with proper management, evaporate six times the quantity of brine. I have had much experience in the evaporation and chrystalization of fluids holding solids in solution, and this experience, I trust, qualifies me to form an opinion in these matters. In the selection of fuel to be burned in furnaces, care should be taken that it is dry and "split fine." If the furnace is of great length, which is the case with salt kettles, and the wood dry and "split fine," and burnt upon a grate, the flame will reach the bottom of the furthermost kettle, and if care is taken to place the bottom of the kettle so near the surface of the hearth of the furnace as to confine the heat to the kettles, the back kettles will boil nearly as rapidly as the front kettles. All furnaces should have hearths of great thickness of brick, and the shape of these should be made to correspond with the shape of the bottom of the kettles, by which means the heat is confined to the surface of the bottom and sides of the kettles equally, and where it is most needed. Bricks retain heat a long time, and if a course of a foot and a half thick is placed under a kettle, these when once heated will retain the heat for a long time, while on the contrary, if no such hearth is made and the earth left uncovered, all the dampness in the ground must be evaporated by the heat which is designed to boil the kettles, and this portion is thus wasted. I have tried both plans of heating kettles; by fire made upon grates, and by fire made upon the ground, and so perfectly well satisfied am I of the advantage in the use of grates, that whenever a grate becomes destroyed, I have at once stopped boiling until the grate could be repaired.

In the setting of iron kettles in brick furnaces, I have found, from many years experience, that kettles should be suspended in the furnace walls by ears or by the rim, so that the residue of the kettle should not be cramped in the expansion which results from heat, as is the case when the brick masonry is made to touch the sides of the kettle. Pans set in the way I suggest, suspended, will be found to crack less frequently than those set in close work. In the placing of grates under kettles, care should be taken to have the bars well supported by strong cast-iron bearers. The grate-bars should be of cast-iron, and made deep and strong. For example, if a grate bar is four feet long, it should be four inches deep, two inches wide at top and one inch wide at bottom. At each end and also in the middle, for three inches in length, the grate-bar should be four inches deep, and two and a half inches wide at top and bottom. This shape, it will be seen, would make the bars keep their place, and leave an opening between each bar on the top, of an inch wide, for the ashes to fall through, and for the air to pass up to support combustion. This plan would enable the furnace tender to burn all the coal of the wood, instead of having these accumulate at the mouth of the furnace to make a dead heat. The furnace should be furnished with an iron door, with hinges and latch, the same as a stove, and this should be kept shut while the fire is burning. Kettles should not be more than sixteen inches from the floor of the grate, nor more than eight inches from the floor of the hearth, beyond the grate.

In the evaporation of salt water, there are three items of expense: 1st, cost of kettles and furnace; 2d, the expense of fuel; and 3d, the cost of labor to attend the fires and pans. I will examine these items in the order in which I have stated them.

1st, *The cost of Kettles and Furnace.*—The kettles are heavy and clumsy, and contain as much iron as will make four good kettles of the same size, and require twice as much fuel to boil them as is required to boil kettles of one fourth the thickness. The workmen frequently crack these heavy kettles, and then they are sent to a blacksmith to be mended with bar-iron clamps. I have had a great number of large iron kettles repaired, and my practice has been, to take a piece of heavy boiler-iron, and shape it to the surface of the inside of the kettle to be mended, and then to bore holes in the iron plate and kettle and put them together by screws on the inside of the kettle. This is a cheap and a very efficient way of mending kettles. I have frequently known kettles to be impaired by the use of heavy iron spuds by the workmen. The spuds which I have found the most useful, were of a chisel shape, about one foot long, with a socket; into this socket I inserted a wooden handle. The socket should be large enough to receive the whole handle without having to taper it to a point, which should be fastened by an iron bolt or screw, through the socket and the handle. For ladles, I have used the imported frying pans, first having them rounded in the bottom by a blacksmith, and then having the handle shaped so as to fit the side of the kettle. In the construction of furnaces, care should be taken to allow the rim of the kettle to project above the brick work, by this means the dirt on the top of the brick furnace, will be prevented from getting inside of the pan. Where the heat is not too great, I have had a covering of boards or plank fastened on the top of the furnace. Where the kettles are circular, pieces of

cast-iron should be made to fit in between the rims of the kettles; these would cover in the furnace, keep the kettles in their places, and be a great aid to the mason in setting pans. The expense of these pieces would be trifling; they should be one and a half inches thick to give them strength, and should fit so exact as to set between the kettles, and if that portion running to a point could not be supported below, a staple might be cast in the piece to catch up the rim of the kettles. These plates to go on top the furnace.

2d, *The cost of Fuel.*—Where wood is burned on the ground in the mouth of a large furnace, it is wasted. The heat which is generated at the mouth of the furnace, is greater than is needed, and the surplus is lost, and besides much of the salt is vitrified and ruined. If this wood was well split and dried, it would burn free and make a clear flame, and the heat of this with a good draft, would be sufficient for a long range of kettles.

3d, *The Labor.*—Strict attention to the fires, and also to the kettles, is necessary. Among the furnaces which I examined while at the Salines, I was very strongly impressed with the opinion, that they were managed with less labor than was needful for an economical use of fuel and for the safety of the kettles.

The water at the Onondago Salines, contains some few impurities, which are held in solution, and which are deposited on being left quiescent for a little time. It is not fully saturated with salt; it may be said to be about three fourths saturated.

The last time I visited the Salines, I brought home with me a bottle of the water, which, by the hydrometer used there, tested 78 degrees, 100 being the point of saturation. By my scale standard, it stands at 525; rain-water being 470. This water I subjected to a temperature of six degrees above zero; no earthy precipitate resulted from this change of temperature. I next placed it in a porcelain evaporator, over the surface of which was a sheet-iron cylinder, through which a current of heated air was passed until the brine was all evaporated, and the salt chrystalized. The yield was 110. The salt made in this way is most beautiful, and is free from vitrification or caking. The experiment satisfied me that this was the most economical mode of applying heat to a saline fluid for the purpose of producing chrystalization, and that it is far preferable to any other mode, except solar heat, for making Salt.

In the calcining of the salts of ashes, for the purpose of depriving these salts of the coloring matter, I have made use of two modes, one by a reverbatory furnace, where the flames were confined to the surface of the salts; the other by heating iron cauldrons to a red heat, and stirring the salts with iron rakes until they become calcined. In the result of these two processes, there was no difference as to the quality of the calcined alkilies, but in the expense of fuel and labor there was a great difference. In the reverbatory furnace I constructed, I was particular to keep the centre of the arch within fourteen inches of the surface of the hearth, the arch was fourteen feet between the abutments. It was made of fire brick, made in a hand mould, and the brick were made of an exact bevel with the rise of the arch and laid without mortar. It would be difficult, if not impossible, to make an arch of common brick, stand, with so small a rise. This shape of the arch and the hearth confined the flames to the salts designed to be calcined, and the process was therefore easy, quick and effectual, and without loss of heat. Had this arch been twenty-eight inches rise in the centre, instead of fourteen, the fuel required would have been four-fold, and the length of time required for the calcination would have been double. The mode in which application of heat is made, is therefore the great desideratam in the making of salt, as the cost of the fixtures depend entirely upon the manner the heat is to be applied. A wooden vessel is equally as good as an iron one, if the evaporation is to be by a rarified atmosphere. In this mode of evaporating Saline fluids, there is no uncertainty, there is no risk, it is a business which is capable of mathematical demonstration. It requires but little capital to commence business, and but little capital to carry it on, and it is therefore one of public utility, and for that reason should be made known for general benefit.

The waters of the Salt Springs, in the United States, which I have examined, differ greatly in quality, and therefore require different modes of operation, both as to evaporation and chrystalization.

I have some of the waters of the deep well at Montezuma, and also of the well recently sunk on the borders of the Cayuga marshes. These waters are both of the same specific gravity, and are full saturation, but differ widely in quality. By my scale of density, they both range 560.

There can be little doubt, I think, that the source from whence the waters of the Onondago wells derive their saline properties, is the fossil salt. My reasons for this conclusion, I stated to you in my communication, in October, 1842, but the extent of this supply is a matter of loose conjecture. Many of the salt wells, in various sections of the world, have gradually freshened by the exhaustion of the salt rock which fed the water. The State, I think, should not allow the brine of these Springs to be wasted, as much of it has been for years past. The safe course will be to use it with economy, and induce the manufacturers to make their salt of the best quality, and to accomplish this, the best way is, to remit the duty.

The saline waters of the deep well at Montezuma, are very transparent. I have a bottle of this water in my cabinet, which was, when first received, about two years ago, of great clearness, but since that time, although closely corked up, has deposited a light fibrous precipitate, of a chromate hue. The addition of a little sulphuric acid to this water solidifies it, and makes it quite opaque and hard.

William P. Milnor, Esq., in the absence of Mr. Findlay, from Saltville, Va., has addressed me a letter under date of February 1st, 1844, in which he states, that a bottle of the water of their wells which he has put up to forward to me, tested by the hydrometer 23 degrees, and was, when raised from the well, of a temperature of 51 degrees of Farenheit's scale. The hydrometer is graduated at 25 degrees for water fully saturated with salt, and 0 for fresh water. It is, therefore, within two degrees of full saturation. The specific gravity of the Saltville saline waters are, I think, as great as cold water will take up of salt under any circumstances.

Mr. Milnor states, in the letter which I have noticed, that one of the stratas of salt passed in sinking the shaft in the Saltville mines, was nearly white; others have a beautiful rose tint. He has forwarded to me a box of specimens, containing as follows, viz: "specimens of salt rock, numbered from one to five of the first strata, from seven to thirteen of the other stratas, from fourteen to twenty of blue and red clay, No. 21 of plaster, No. 22, blue and red clay, No. 23 plaster raised from the same valley, five miles north-east of the mines, No. 24, red clay borings from the Artesian well, from which the water sent me was raised; No. 25, salt formed on iron steam pipe; No. 26, salt formed in back kettles; No. 27, salt formed on sides of cistern; No. 28, salt from leakage, and some other specimens to fill up the box, not numbered. Also, a piece of blocking or rimming formed on the kettles.

These specimens will be useful in comparing with the stratifications and salt of other salines, although, in my remarks addressed to you on the 29th of December, 1843, I mentioned some salt mines where the sulphate of lime was absent, and others where liquid petroleum was found intermixed with the salt. In the Artesian well at Saltville, there is a most abundant supply of water at the depth of 214 feet, and this well is but forty feet from the shaft sunk in the mine to the dept of 404 feet. It would be difficult to mine this salt so near such a body of water, and besides, I do not see what is to be gained by the process of mining, while fuel remains plenty to evaporate the water now obtained from the well at the mines, which is abundant and of as great specific gravity as they could obtain by dissolving the salt rock in cold water. The well water is the least troublesome. I am induced to make this remark, for the reason, that persons who are engaged in sinking salt-wells, are apt to make extra exertion to find the fossil salt, which if they succeeded in, they would not be gainers thereby, unless that the salt waters should be weak.

The State Superintendant of the Onondago Salines, Rial Wright, Esq., has recently made a report to the Legislature, in which he states that the quantity of salt made at the Onondago Salines, in 1843, at 3,127-500 bushels, of which 318,105 bushels are coarse solar salt, and 76,531 bushels ground or dairy salt. This is fully equal to

half the quantity imported into the United States, in 1843.

Mr. Wright states, in his report, that there has been paid into the State Treasury, for duties on Salt made at these Salines, from 1817 to 1844, the large sum of **$2,930,458.06.** This money has been applied to pay the expense of making the great Erie Canal. Common fine salt was forwarded to the City of New York, in 1843, from these salines, and sold for one dollar per barrel, including the cask; a barrel contains five bushels, The Legislature, at the last session, passed an Act remitting the State duty on all Salt which should be transported to certain points, hence they were enabled to send salt to the City of New York, and sell it for $1 per barrel!

Mr. Wright gives a statement of the Salt imported into the United States, in 1842, and of the places from which it was received.

By this statement, it appears that the quantity received from England, was 3,300,749 bushels, costing 18 cents per bushel, amounting to $607,761, while the value of that year's import, altogether, was only $841,572. The salt received from England was fine salt, and of that kind which was sold at Syracuse, in 1842, for four and five cents per bushel.

The amount of duties on salt imported into the United States, in 1842, was $494,299.44, this divided among every man, woman and child, will make an apportionment of a little more than two cents each, which is less than the usual price of a glass of grog, for every inhabitant.

There is much said by persons engaged in Commerce, as to the quality of American Salt, and I have been surprised at the ignorance which prevails in relation to the anticeptic properties of Salt. Salt is one of those bounties of Nature, the same as water, it is distributed over the whole Earth in such districts as may be needed, but in most of the deposits it is interminxed with earthy materials, which make it necessary to dissolve the fossil salt, and evaporate the solution before it can be used.

In sections of the globe which are heated by a vertical Sun, the evaporation of salt water is rapid, and the product of salt great and the quality good. In the West Indies, which are in low latitudes, the salt made in this way is of an excellent quality, and of rapid chrystalization. The quantity of salt made in the United States is greater than that imported from abroad.

In the Southern section of the United States, but small quantities of salt are used for curing meat. Pork which is cured for smoking, is frequently packed in a gum trough or a wooden box, and a little salt sprinkled over it, and after laying a few days is removed to the smoke house, where it remains until required for use. The right possessed by the State to impose a duty on the Salt made at the Onondago Salines, is a very doubtful one. The Salt Springs are a grant from the Onondago Nation to the State, for the use of the Indian and white man forever. Is not the duty a contravention of the grant? Is it good policy to lay a heavy duty on articles of necessity?

It is the province of government to encourage industry, to patronise it, and the most feasible means should be used to this end.

If the United States admit foreign salt duty free, and the State of New York retain a duty on the salt made at the Salines, the Onondago Salt works must stop, and the capital invested in the works be sunk. If Congress admits foreign salt free of duty, the State government should remove the tax upon the manufacture of domestic salt, and encourage the salt makers to better the quality of the salt, by giving them a bounty for a very superior article. It is preposterous for a State government to undertake to make money by the salt duty. It is a poor way of levying a tax.

It is not the business of a State government to make money out of the people, but on the contrary, it is its duty to benefit the people by throwing open every access to the bounties of Nature.

In our own continent, Nature has placed the Saline deposits in the interior of the country, where they are most needed. What a display of the wisdom and goodness of the Creator.

Lime has been used in the brine at the Syracuse Salines, for clarifying it. I cannot see that any good can result from this mixture. The salt water which I obtained at Syracuse, when last there, I corked up tight as soon as it was taken from the well, and no earthy matter has appeared in it. I am, therefore inclined to the opinion, that there is no earthy matter held in suspension by the water; but there may be some property acquired from the atmosphere by the water, which is held in solution, and even give it a floculent appearance. If the object in using lime is to precipitate particles suspended in the water, the same result may be accomplished by using wood ashes that have been completely or thoroughly lixiviated, or white sand will produce the same result without imparting to the water any bad quality. The change of temperature causes floculent substances held by fluids in suspension to precipitate, and particles which have greater specific gravity than the water, will, in obedience to the laws of gravity, find the bottom. A steel needle will float upon the surface of rain water as long as the needle remains dry and the water is quiescent, but the instant that the water is disturbed, or the needle becomes moistened, it goes at once to the bottom.

I have applied cold water to heated solutions to produce a quick and rapid precipitation of earthy substances held in suspension, by pouring a pail of cold water over the surface carefully, so that it should cover the surface of the heated fluid. The precipitation commences at once.

Solutions of great specific gravity are not disturbed by pouring water carefully upon the surface. I have made the experiment frequently by using a glass vessel and pouring a colored fluid upon the surface of a transparent one, which enabled me to see the mixing up and the extent of the union.

Caustic alkalies, on exposure to the atmosphere, absorb carbonic acid, and more rapid in warm, than in cold weather. At the temperature of zero, I think, no absorption will take place.

The waters of Salina may have affinities for properties of an atmosphere rarified by solar heat, and undoubtedly do have, otherwise I should be unable to account for the difference in the brine I confined in a tight bottle, for a year or more, from that exposed in the vats at Salina.

Some few years since, the quality of Curracoa salt was quite inferior, and the manufacturers found that poor salt met with so difficult a sale, that they were under the necessity of making it good, or keeping it on hand.

The State government have the entire control of the Onondago Salines, and it is the duty of that government to see that every pound of salt is of good quality. The barrel for packing bad salt, and the transportation, are both the same as that for good salt, and the difference to the consumer between a good and a bad article, is very great. The State officers look at the increase of quantity annually made, instead of the increase of the quality. Here is the great error. It is not a business of dollars and cents with this great State, but the making of a good salt for the use of the people.

In the packing of provisions, bad water is often used to make the pickle. This is a matter which is rarely taken into account, although it is a very important consideration, and this evil is often charged upon the salt.

Salt water is an excellent preservative of wood. The pipes in which the water is conveyed at the Salines, are almost indestructable.

Salt thrown on ice walks, is as effective to melt the ice, as so much burning coals.

A pump which is frozen in winter, can be freed of the ice in a short time, by throwing into it a few quarts of fine salt.

In the evaporation of salt water by a heated atmosphere, the chrystalization need not be disturbed until the process is completed, and in this process, chrystals already formed, thrown into the fluid, hasten the process.

There are salt Lakes in some parts of the Russian dominions in Asia, that become incrusted by the salt in hot weather, and as fast as this becomes of greater weight, it breaks in pieces and falls to the bottom, and one strata after another is then formed, and thus continue accumulating on the bottom during the whole of the warm season. When the rains set in, the earth, clay, &c., is washed into the lake, this also is precipitated to the bottom, and forms a strata over salt which had previously sunk and protects it from dissolving, and thus every year is deposited a strata of salt and a strata of earth, until, in the course of ages, the lake will be

filled up, and beneath the surface will be a salt mine thus formed.

That the stratas which lay beneath the surface, in the region of Onondago, have undergone a great change, cannot be doubted; when or how this change has been affected, we are unable to conjecture, for the reason, that beyond two hundred and fifty years ago, the history of this region is a perfect blank, not a vestige of history to mark the past, that is intelligible to our race.

The Salines of Onondago, are one of the great bounties of Nature, destined for the free use of the inhabitants. Why then, should the State Government restrict the gift, and put a turnpike gate upon the focations of the earth. The Indians, the wild, uncultivated Sons of the forest, have set an example that is better than this, an example that should be followed, however humble the teacher; a state to fill their coffers by taxing salt, it is absurd. Salt should be as free as Nature has made it.

The salt rock of Cardonna, in Catalonia, Spain, near the mountain of Mountsarrat, is a homogeneal mass without any appearance of strata or seam, and is raised near five hundred feet above the earth, and is about three miles in circumference. The depth is unknown, the colors are white red and light blue, is free from sulphat of lime.

At Poza, near Burgos, in Castile, a mine of Sal-gem exists in the mouth of a vast crater and embedded in it is pummice stone, puzzolana, and other volcanic productions.

In La Mancha, at Almengranville, there is a mass of rock similar to that of Cardonna, about six hundred feet in circumference, mixed with sulphate of lime, and covered with the same stone mixed with red quartz, above this sileceous pudding stone, and still above, carbonate of lime.

There are mines of salt at Valtierria in the kingdom of Navarre, near the Ebro, in a chain of hills at an elevation above the sea. This is enclosed in sulphat of lime.

In the district of Mount Blanc, near St. Maurice, is the Salt rock of Arbonne, in so elevated a position as to be near the region of perpetual snow. The salt is extracted from a gypseous rock which being saturated with water, leaves a porous matter which is very light.

The Cheshire mines, in England, are near the surface. The first strata is about 120 feet from the surface. The stratas which cover this saline deposite is red clay, coarse grained sand stone, blue clay, sulphate of lime, and indurated clay.

The salt is, in some places, red, and in others transparent. I have in my cabinet a specimen of this sal-gem as clear and transparent as the purest flint glass. These are the most productive mines in the world. Thestratas of salt are wavy, vary in thickness, and are alternated with stratas of clay.

The mines of Tyrol, are in a very high mountain, about two leagues from the city of Halle, on the river Inn. The sal-gem forms an irregular mass including fragments of the schist, the *wacke* of Werner. This forms the base of the mountain.

The salt mines of Wieliczka, near Cracow, and those of Bochnia are very ancient, having been worked for more than six centuries.—The ground which cover them is composed of stratas of sand, marl, pebbles, and marl in which are large blocks of salt mixed with clay. These mines are about 800 feet deep The salt is in some stratas, brown, and in others, redish, and in some transparent.—There are springs of fresh water in these mines. In some parts of these mines hydrogen gas collects and takes fire.

The mines on the south east part of the Carpathian chain, are numerous, and in general near the surface. Some of these in Transylvania are at times exposed to the rain, and persons are appointed to cover the soil with turf when washed bare by the rain.—These mines contain large quantities of liquid petroleum.

Near Ockna in Moldavia, there is a hill of rock salt, in many parts of which the salt is exposed to view.

In Paraid, in Transylvania, there is a valley, the bottom and sides of which, are pure salt. Walls of this mineral exist here two hundred feet high.

In the salt mines of Marmarosch, water has been found included in the substance of the salt rock.

Near Astracan, the mine of Iletzki, is near the surface, and rests upon a bed of hard clay. The soil above is sandy, and is full of holes containing salt water.

In Siberia, there is a mine of salt rock on the bank of the Kaptendoi.

The country near the Caspian Sea is so impregnated with salt that near Gourief, the fog and dew which settles upon the clothes of the inhabitants and upon plants, are saline.

The Mungal Tartars lixiviate the earth and by this means obtain supplies of salt.

In China, they have mines of salt; so with Thibet, Great Tartary and Hindostan and many sections of Persia.

The Isle of Ormus at the mouth of the Persian Gulf, appears a solid rock of salt.

In Peru salt rock is found in hard masses in the most elevated sections of the country.

The stratas which overlay the salt mines of Visechna, on the south west of the carpathean mountains, are 1st, a strata of vegetable mould; 2, stiff yellow clay; 3, grey and yellow clay mixed with spots and veins of sand and ochre; 4, greyish blue clay; 5 fine white sand; 6, black fat bituminous clay immediately covering the bed of salt.

The arctic land expedition, under Capt. Franklin, discovered numerous springs of salt water in N. lat. 60°, W. long. 113°.

The needle chrystals which I received from Mr. Mead, which he obtained from the salt welll on the borders of the Cayuga marshes, I placed in a crucible, which I heated to redness. Some of these chrystals sepated at one end into very thin plates, with smooth and even surfaces, and so thin that one hundred of them would not make an inch. The chrystals lost all their transparency by a red heat, became opaque, and with little pressure could be reduced to an impalpable powder. The water I submitted to evaporation by a rarified atmosphere. One pint of the specific gravity, 2,240, yielded 620 of dry salt, holding in combination other earths. This is as far as my examinations have extended with this water. The Montezuma water, on being evaporated to 1200 of my scale of density, and then exposed to a temperature of six degrees above zero, rapidly liquified. It holds much magnesium conbined with lime in solution.

The great importance of making salt of a superior quality, in the United States, requires from the State some more effectual means of operation than hitherto brought into use. The employment of a competent person to visit the Salines, Salt-mines and Salteries, throughout the world, would enable them to profit by the experience of others. Experience is the best schoolmaster. Theory is only imaginations, but it sometimes hits right.

Should I, before your next annual Fair, obtain any information on this subject, which may be useful to the public, I will lay it before you.

E. MERIAM,
No. 47 Orange street.

BROOKLYN, Feb. 10, 1844.

THE MAMMOTH CAVE.

In my notice on page 317, of the entrance to this Cave, there is a typographical error. It should read about four feet wide, instead of about ten feet wide. In speaking of the depth of the Pit at the mouth of the Cave, there should be a transposing of the paragraph; the Pit is fifty or sixty feet, and contains water, and not a Pit of water, fifty or sixty feet deep.

The Mammoth Cave contains nitrous earth sufficient to supply the whole population of the globe with Saltpetre. Government allows Saltpetre to be imported duty free, and thus stop the Mammoth Cave Saltpetre works, while at the same time, it lays heavy duties on various articles for the protection of other manufacturers. It is true that much of the Saltpetre is put to a bad use, viz: used for to make powder, to destroy human life, still the government does not act upon that principle, but admit it free for the reason that it is made into gun powder.

The furnaces, kettles, hoppers, bear-pipes, water-pipes, calcining and evaporating furnaces, at the Mammoth Cave works, have been idle about twenty eight years, and wholly on account of the admission of foreign Saltpetre duty free. If Government is to derive revenue from duties imposed on imports, let that duty be uniform and equal. Let it be so permanent, that money invested in manufactures, shall not be sunk to the owner by a vascillating Tariff. Men will not embark in manufactures on such uncertainty, and therefore, a shifting Tariff is a public evil.

VOL. I.] NEW-YORK, MARCH 9, 1844. [No. 18

PUBLIC MEETING
IN THE CONFISCATED DISTRICT.

We copy from the New-York Courier and Enquirer, of the 29th ult., the proceedings of a Public Meeting, held in the 12th Ward of the City of New-York.

JACOB HARSEN, ESQ., who was called to the Chair, is a descendant of one of the oldest families on this island, and himself and the other members of the ancestors family own a farm on the island, five miles from the City Hall, which still retains the same ancient boundaries which were affixed to it by the first patent granted in 1686. In addition to this entire farm of near one hundred acres, this ancient family own very large parcels of real estate within the improved parts of the city, and on other parts of the island, which, taken together, make the next real estate in importance, in superficial surface, to that of John Jacob Astor.

In publishing the proceedings of this Meeting, we feel a delicacy from the fact, that we are named in the proceedings.—There is an individual whose name is not mentioned in these proceedings, who has rendered immense services to the Public, as to Taxes and Assessments; an individual whose firmness of purpose, whose industry, perseverance and public spirit, entitles him to the thanks of the citizens, far and near. That individual is BURTIS SKIDMORE, of the 5th Ward. Mr. Skidmore has, on all occasions, and at all times, boldly denounced the odious assessment abuses which have been so long and so successfully practiced in New-York; and when the public depredators appeared in the presence of public Committees, he has had the independence to say to them * * * * thou art the man.

Mr. Skidmore's plainness of speech, his decision of character, and his singleness of purpose, entitle him to the highest commendation.

—

(From the New-York Courier and Enquirer of Feb. 29th, 1844.

Twelfth Ward.

At a large and highly respectable meeting of the Tax Payers and inhabitants of the Twelfth Ward, held at the Hotel of Andrew Howe, at Harlem, on Saturday, the 24th of February, 1844, JACOB HARSEN was appointed Chairman, and MARCELLUS EELLS, Secretary.

The object of the meeting being stated, to wit: the reduction of the Taxes of the Twelfth Ward, and the necessity of an application being made to the State Legislature, to relieve the inhabitants thereof from charges which are not considered rightly County charges, but ought properly to be paid by the City Proper, in contradistinction to the County, it was determined that a petition be forwarded to the Legislature stating the grounds of complaint, and requesting them to interpose their power when the Common Council should ask for their annual Tax Law, to do justice to the upper or agricultural Ward.

It was resolved by the meeting, that a Committee be appointed to prepare the Petition, select some suitable person to appear before the Legislature and advocate the right of the Ward to the relief sought for; and that the Committee raise money to defray the expenses attending the same.

It was Resolved, That Messrs. Harsen, Eells, Alvord and Hall, be a Committee for that purpose.

The subject of burdensome assessments, attending the opening of avenues, streets, and squares, by the Common Council, was brought before the meeting, and information given of the recent DECISION of the Supreme Court, declaring that they have no constitutional power to act in the matter of opening streets, and therefore declining to confirm the assessments of Commissioners, for opening five certain streets, was received with great gratification.

A letter received by the Chairman, in relation to a ruinous assessment upon Mrs. Pearson, on property in Centre street, whereby she was deprived of her support, and with her three children reduced from comfort and independence, to depend upon the charity of friends, was also read.

The following letter, from Hiram Parker to the Chairman, was also read and ordered to be published in the proceedings of this meeting.

"DEAR SIR,—I observe by notices that there is to be a meeting of Tax Payers, to be held at the Hotel of Andrew How, on Saturday next, in relation to taxes and assessments, and to concert measures to relieve the Twelfth Ward from the burdens which for several years past have borne heavily upon it. I shall, in all probability, be in Boston at that time, and shall not therefore be present. I have been an agent for the purchase and sale of real estate, in this city, for fifteen years past, and I can assure you that the great objection which has been made by men of capital, to investing their money or loaning it on lands in the Twelfth Ward, has been in consequence of the heavy taxes and ruinous assessments.

"And I am glad to find that the Supreme Court has finally declared said law unconstitutional, whereby one of the most despotic and arbitrary laws that has ever been made, is rendered a dead letter in our Statute book; and that no road, avenue or street, can hereafter be opened, except under the laws prevailing previous to 1807. And I sincerely congratulate you and the meeting that hereafter the rights of property will be respected.

The whole credit of producing this new state of things is, I understand, owing to E. Meriam, the Editor of the "New-York Municipal Gazette," and Richard MOTT, Counsellor at Law, who, it is said, have labored for the last three years in the cause, with untiring industry and unabated zeal. I therefore enclose you twenty-five dollars, to be handed over to them as an acknowledgement of the favor I feel for their valuable services in redeeming the Twelfth Ward from the iron-grasp of oppression.

"With sentiments of great regard and esteem, I am, gentlemen, your obliged friend, HIRAM PARKER."

P. S. On the strength of the aforesaid decision I will re-open the Harlem Land Office, corner of 125th street and 4th avenue, on the first day of May next, and I am happy to inform you that since the good news has been proclaimed, many good improvements in the way of building are in anticipation at Harlem, and will no doubt be commenced early in the spring. All persons wishing to dispose of, or purchase property in Harlem or its vicinity, will confer a special favor by leaving their diagrams of property or applications to purchase with Mr. Thomas Hope, corner of 125th street ahd 6th avenue.

H. P.

Whereupon the following preamble and resolutions were presented by Mr. Marcellus Eels and unanimously adopted:

Whereas, the Supreme Court of Judicature of the State of New-York on the 8th day of February inst., refused to give countenance to the odious proceedings sought to be confirmed for opening five several streets and avenues on the Island of New-York, on the ground that they have no constitutional power to act in the matter.

And whereas such refusal and decision of the Court will have the effect greatly to increase the value of real estate upon this Island, and particularly in this ward, which is used chiefly for agricultural purposes, and will also have the effect to render greater security to landed property, and relieve the owner from the fear of depredations of public officers connected with the corporation of the city of New-York, who have been foraging upon land-holders for years past, and will put a final stop to a system of land piracy which has brought reproach upon the City Government, disgrace and shame upon its officers, and ruin, distress, and embarrassment upon land holders.

And whereas, two Justices of the Supreme

Court, viz: the Honorable Esek Cowen and the Honorable Greene C. Bronson, have boldly and independently stood up for the great and fundamental law of the commonwealth, *The Constitution of the State*, for its doctrines, for its safeguards to property, for that division of the powers of Government which makes each department a check upon the others.

Therefore, Resolved, that the said Court are entitled to the thanks of this meeting, to the thanks of every good citizen, and to the approbation of the good and virtuous throughout our land, for boldly refusing to perform duties imposed upon them, contrary to the Constitution of the State, which were of an arbitrary, anti-republican, and despotic character. And that in the death of Judge Cowen the public have sustained the loss of an upright Judge, an able expounder of the laws, and of a shield between the people and unconstitutional legislation.

Resolved, That this meeting highly approve of the proceedings of the Anti-Assessment Committee of the City of New-York, in their bold and persevering resistance of the illegal proceedings of the Corporation of the City of New-York and their officers, in the assessment abuses and outrages, and also in their labors for the reduction of the Taxes of the City.

Resolved, That this meeting recommend to all good citizens to unite together to resist the arbitrary exercise of usurped power, by the Corporation of the City of New-York, and its officers, by all legal means, thereby handing down to posterity the rights and liberties purchased by the blood of our ancestors.

Resolved, That the thanks of this meeting, and of the land-holders of this Ward, be presented to Mr. Meriam, Editor of the "Municipal Gazette," and Counsellor Mott, for the zeal and industry which they have evinced in exposing the iniquities and abuses of the Assessment Law, and of successfully presenting before the Courts of our State, the illegalities of the proceedings under the law, and the unconstitutionality thereof.

JACOB HARSEN,
Chairman.

Marcellus Eells,
Secretary.

"New-York,
February 29th, 1844.

"Dear Sir:

"I was informed by Richard Mott, Esq., that he had some money which he received from a Public Meeting, held in the 12th Ward, over which you presided as Chairman, which he was directed to give one half of to me, in the matter of assessment proceedings. I am obliged to you for that expression of approval, but I must in duty to myself, and in duty to the cause, which is not one of dollars and cents, decline any pecuniary compensation whatever from any citizen, as a reward for any services I may have already rendered, or may hereafter render individual sufferers in assessment matters.

With great respect,
your obedient servant,
E. MERIAM.

To Jacob Harsen, Esq.,
Chairman of the 12th Ward Public Meeting, convened in reference to Taxes and Assessments."

THE DECISION

Of the Supreme Court as to the right of the Justices of that Court to act as Street Commissioners!

When we received the copy of the OPINION of the Supreme Court, in the five Street Cases, we placed it at once in the hands of the Printer,, at the same time giving him a few hastily drawn up comments upon it, which were printed with it.

We now take the opportunity to examine this Opinion more leisurely, and also to make some remarks.

The Opinion is from the pen of Mr. Justice Bronson, and is worthy of its author. There is a frankness and boldness of language in it which is highly creditable to the Court, and which commends it to the good opinion of every candid mind.

It is a noble trait in the character of a Judge, to evince a willingness to relinquish power. Public men, as well as private citizens, are tenacious of power, and they most commonly hold on to it to the last moment; not so in the present case—the moment the Court were convinced that the power they had exercised was not sanctioned, but prohibited by the Constitution, they at once relinquished it.

In the Chapel Street questions, which involved important principles, the Court decided against us. Judge Bronson wrote the Opinion of the Court in that case, and in reviewing it on page 200 of this number, we admit that the Court were right and that we were wrong, although at the time the decision was made we were differently impressed.

Some Public Officers boast that they intend to proceed in assessment sales, notwithstanding the Decision of the Supreme Court. Such persons will incur penalties that will be enforced, which will teach them to feel that the taking an oath to support the Constitution is not a mere sham, and the vexatious proceedings of staining the titles of lands and of attempting to extort money from the owners by these sham sales, will be followed up so close that these gentry will learn that obedience to the laws is the duty of every public officer, and if he wilfully violates it, the law will make him culpable.

Any proceedings of the Corporation Officers under these assessments, after the DECISION, will make them personally and individually liable.

We think that measure ought to be taken to put under sequestration the moneys of the assessment depredators, and if that money has been invested, to follow the investment. The principle here suggested is an ancient doctrine, and we believe is now practised.

Some of the moneys which the assessment depredators have taken have been, we are informed, invested in lands. These lands should be at once put under sequestration.

The appointment by the Supreme Court of Commissioners to make estimates of the benefits and advantages of opening streets, avenues and public squares, of extending, altering and widening streets, and also of the damage and injury thereby caused, and to assess such damages, injury, &c., upon property in certain arbitrary districts, deemed by such Commissioners to be benefitted; and the confirmation of the Reports of such Commissioners by the Supreme Court, has been decided by that Court to be unconstitutional.

The pages of this volume abundantly show, that while the Court have in these matters acted without authority and in violation of the Constitution, that the Common Council have acted in downright violation of the law, even if the law had not been a violation of the Constitution; that they have disregarded all its provisions, and bid defiance to the people and to the Courts; oppressed the one, and indirectly threatened the other that if they decided against them, that they should either lose their offices or have their salaries cut so low as to starve them out. Again, these proceedings of the Commissioners, their Surveyors and their Lawyers, have been of a most odious, most shameful character, unequalled in these respects in any similar proceedings any where in the civilized world. We are informed that one of the officers of the Corporation seeks to sustain these assessments. A Public officer who would thus act under all the circumstances, will be severely censured by the community, and will find no one whose opinion is entitled to the least respect, to sustain him. We have not room to discuss this DECISION in this number, but will do so at length in a future number. The subject is vastly important not only as respects the Present, but the Future.

REPORT

Of the Finance Committee of the Common Council.

It appears by this Report, of Feb. 26th, 1844, that the sum of $912,034.85 is wanted for Contingent Expenses, $266,000 for City Watch, and $120,887.36 for Lamps, making $1,298,922.21 for the year 1845. For the year 1844 the Supervisors on the 3d of October, 1843, assessed as follows: for Contingent Expenses $544,844.91, for City Watch $212,000, for Lamps $110,000; making in all $866,844.91.

The sum demanded for next year, is an increase over this of $433,077.30, which is an increase of a fraction less than 50 p. c.

What destruction! what ruin! what waste! what profligacy! what incompetency and mis-management!!

Distressing Scene.

The destruction of human life by the explosion of one of the newly invented weapons of death, on board of the Ship of War Princeton, has clothed the seat of government in the habiliments of mourning.

In our paper of the 21st ult., we noticed, under the obituary record, the sudden death of Judge Cowen, at the seat of our State Government, and then remarked that:

"*The death of public men at the seat of the National and State Governments, have been very frequent of late years. These dealings of Providence are solemn and admonitory. On the 65th page of this volume we recorded the death of six individuals, who had held the office of President of this Republic, and each and all marked by circumstances calculated to impress the human mind with the fact that GOD overrules the doings of men.*"

That number of this paper we forwarded to the President of the United States, to Judges of the Supreme Court of the United States to heads of departments, and to the members of Congress from this State, and to distinguished members of Congress from other States, and these reached the seat of government but a little while before this mournful event took place.

In the exit of four individuals who had been President of this Republic, the death of each occured on the 4th day of the month, and three of them on the 4th day of July. The death of a fifth occurred six days before the 4th of July.

Two of these individuals died on the 4th of July, 1826, one on the 4th of July 1831, one died in 1836, and another in 1841.—A period of time marked by a revolving of five years, intervened, viz: 1826, 1831, 1836, and 1841.

Each of these individuals took the oath of office and entered upon its duties on the 4th day of the month.

President Tyler assumed an office made vacant by death. In June 1843, President Tyler and his Cabinet made a tour to New England to celebrate the completion of a monument upon a field of blood. This tour was terminated by the sudden death of one of his Cabinet, Mr. Legare.

On the 28th of February, 1844, President Tyler and a portion of his Cabinet proceeded on a tour of pleasure on board the Princeton Ship of War, and while the President was drinking a toast to the engine of destruction, that machine exploded and killed two of the members of his Cabinet and several other individuals.

These doings of death are admonitory. There is a peculiarly marked providence in reference to these events which seem to indicate, that war is not that glorious occupation that is blest of Heaven.

Our nation is prone to train up too great a portion of its population, to the profession of arms. Men thus educated are ambitious of employment—ambitious of fame—and some of these very causes, will involve our country in wars.

The steam frigates which have been constructed for the more certain work of death, have been unfortunate. The Fulton was blown up. The Missouri was destroyed by fire. The Princeton has done worse, and one of the others in using her anchors, destroyed numbers of her men.

Public men have been peculiarly and singularly admonished. If any thing can awaken in the minds a remembrance of their mortality, it would seem that the melancholy events which they have so frequently and so recently been made spectators of, would humble their pride, subdue their angry passion, and lead them to cultivate a desire for harmony, peace, and the public welfare.

Unless our public men pursue a course far different from that which has for years past characterised their public councils, our country will be visited with judgments that will shake our government to its foundation.

MISCELLANEOUS.

Written May 25th, 1843.

Birds.

These feathered songsters are less numerous in our forests than formerly, and for the reason that they are now more hunted and destroyed.

Among those of our race who are less favored with advantages and blessings, these innocent creatures are suffered to live in peace, and to chant their sweet notes among the green branches unmolested. The song of the sweet singer of the wood, on a bright morning in Spring, is medicine to the mind, and leads men to contemplate the harmonies of Nature with pleasant delight and cheerfulness of heart.

Parents who permit their children to make sport in the destruction of these sweet creatures harden the hearts of their dear offspring, and do their better feelings an injury which time never effaces.

Birds are useful as well as entertaining. These feathered songsters were not made in vain, nor were they created for wanton destruction; and these little creatures are confiding in exact proportion as they are well treated.

In some parts of our country the law prohibits the destruction of birds, and it is to be regretted that it is not so here; but it is still more to be regretted that there should be necessity for such a law.

—

The Ant.

The Ant, like the Bee, is a pattern of industry. The Ant possesses what is termed instinct, which approaches so near to intelligence, that it requires more than human learning to draw the line of distinction.

In strength they are unequalled; and as to their powers of sight, are found to see equally as well in the darkest night as in the brightest day.

They appear to have a strict regard for the rights of private property, and discovery with them, appears to constitute the legal as well as the equitable title.

I have spent hours in watching the movements and labors of a little community of Ants, and have felt instructed by their example, and humbled by their teachings.

These insects (a portion of them,) take wing in Summer. I have noticed them at an early hour in the morning waiting for the Sun to appear above the horizon, and as soon as its rays had warmed the atmosphere, these insects quit their terrestrial tenements and made the atmosphere their home. What a change! the work of chance, shall we say? No; chance never wrought the transparent and gilded wing of this despised insect, nor is it in the power of man to accomplish such a work. It is the work of Him who made the mountains and the Sun.

—

Written June 6th, 1843.

The Worm.

The despised and hated worm is appearing on the trees, and satisfying the cravings of hunger by feeding on the leaves of that vegetation which Nature has provided for its support. Ere a little while this unwelcome visitor will unwind its slender thread, and descend to the earth preparatory to its entering on another stage of existence, and shall we follow it through that stage, and witness its change to that of the brilliant butterfly of the morning, see it take wing and sport among the gay flowers? What a volume of instruction in these brief pages of Nature, teaching man a lesson of humility calculated to moderate his pride, and put his vanity beneath the earth he moves upon. How beautiful, how rich, how splendid is the plumage of this sportive insect. Its mornings are few and cheerful, its journey of life is one of peculiar brevity, yet nevertheless, it retires preparatory to its last change with a system of preparation that would, in the life of a human being, make one of the brightest ornaments that could adorn his brow.

Written June 13th, 1843.

The hated and despised worm inhabits the ocean, the atmosphere, the earth we tread upon, and is the last companion of mortal flesh in its terrestrial bed. The worm which now frequent our trees, which seem to have a superabundance of foliage, I have never met with in a single instance, in very extensive wilderness journeys. They seem to be found only near the abodes of men.

For what purpose worms were created, is beyond the reach of human learning to investigate, or the wisdom of man to determine. Thus it is, that the smallest things are beyond our comprehension.

In one of the large rivers of India, the British Government expended large sums of money and vast labor, to clear the mouth of a great body of flood wood which had been accumulating for ages, and which completely obstructed its navigation, but found the work could not be accomplished by human labor, and gave up the undertaking. The follow-

ing year this body of wood was attacked by an army of worms, and in the short space of a few weeks these despised laborers accomplished this great work, so that the first rise of water the channel was freed of its obstruction. What a result this, to humble human pride!

An unsheathed ship in some latitudes in the Pacific Ocean, would, in a single night, be completely riddled by the worms, and these mechanics are so methodical in their labors that every perforation is made with mathematical precision.

The Silk-worms which feed upon the mulberry, are a most industrious community, manufacturing all the silk used throughout the world.

The Glow-worm is another of the beauties of Nature. Where is the attentive observer, who, in surveying this brilliant and splendid worm, will, in his considerate moments, say this was made in vain?

During the last summer I found a worm in my yard about three inches in length, and as large in circumference as my little finger. I placed it in a glass flask and examined it; it was of a brown color, had sixteen feet and but one eye, which was in the centre and nearly on the top of its head, and this eye was large and very bright.

I have placed most of the descriptions of worms which are found on our trees, under glass vessels, and noticed them every day until they were supplied with the wings of a butterfly, when I at once ceased to withhold from them that liberty which is the rich bequest of Nature, and they soared above my head, to look down upon me, a humble worm of the dust.

There is a species of worm abundantly to be found amidst the habitations of men, at all seasons of the year, and in all climates. Its poison may be said to almost infect our atmosphere, and penetrates the palace of the prince with the same facility that it does the cottage of the peasant; like the enchanting serpent, it has a mysterious charm. This worm feeds not only upon mortal flesh, but also upon immortal mind. Millions of our race have fallen victims to its insidious poison—it has filled our prisons and our poor houses with its deluded victims, and our world with human suffering, wretchedness, misery and crime. Total adstinence is a sure preventive of the poisonous effects of this worm. It is known as the "*Worm of the Still.*"

—

Written July 15, 1843.

The Butterfly.

A few days since I noticed a worm slowly making up the house wall, and near by it a spider was closely watching its movements. I took a small brush stick and gently moved the spider to a distance, and this industrious insect scampered away, full speed. The next day I noticed the worm had fixed its head under a projection in the wall, and in the course of twenty-four hours when I examined it again, it had changed its appearance and become what the boys call a butterfly's egg. I removed it carefully, and with a wafer hung it to a piece of paper in a closet, in the same position in which it had suspended itself. I opened the closet regularly every morning for nearly two weeks to examine it. This morning, on opening the closet, I found it a beautiful large butterfly. I left the closet door open and also opened the room windows into the garden, and this little stranger worm, in its new state of existence, took its flight, and is now sporting among the flowers with great apparent enjoyment and satisfaction. Two weeks ago I saved the despised worm from the net which the spider was spreading with great ingenuity for its destruction, and in two short weeks it passed that change allotted to it by Nature, and is now soaring above my head. How instructing this brief lesson; how consoling, how animating this display of "the change." A reality—a demonstration—an illustration, that a change is not death; and although we cannot understand how, why or wherefore, yet, nevertheless, it is a reality, a certainty.

—

The Volcanic Mountain,

In Rabun County, Geo.

I have advices from my correspondent, A. W. Norris, Esq., of Clayton, in said county, of the 15th instant, giving the particulars of the phenomenon attending the convulsions of that volcanic mountain, which is in his immediate neighborhood. The smoke which issues from the crevices in the rocks, is very dense and black. The fire has been seen to rise from ten to twelve feet above the summit of the mountain. These discharges are not regular, but occasional; sometimes once a month—then intermitted—and again at intervals of two or three months. These discharges are seen in the day time, and also in the night. My correspondent adds that there is something uncommonly strange about the interior of this mountain. Rabun County, or most of it, is high table land; the agricultural part of it is elevated above tide about 1800 feet. The Blue Ridge is the range of mountains which passes through this county, and which is here volcanic. Rabun County is in lat. 34 deg. 55m., lon. W. C. 6 deg. 24 m. W. The immense pile of mountains which load the surface of the Earth's crust for a great distance through this part of the continent, is enough to produce convulsion, encrusting as it does the great gasometers of inflammable air.

This is the Volcanic Mountain of which the newspapers some few months ago gave an account. The information given by my correspondent may be relied upon for its accuracy.

—

The Great Gasometer in use.

I have received from my correspondent, at Kanhawa Salines, Virginia, a paper containing the following highly interesting statement:

"The Kanhawha Salt Region.—We have said before that the subterranean wonders of the upper Kanhawha Valley, were not half explored, and every day proves that there are not only mysteries, but treasures of wealth, of which the preceding generation had no conception. When a year or so ago, Mr. Tompkins turned the *gas* that forced up the water under the kettles to aid in converting the brine into salt, thereby saving one half of the fuel, it was thought to be a vast stride in the march of improvement and discovery, but now Messrs. Worth & English, at their new furnace, have actually attained the Irishman's desideratum in the proposed purchase of two stoves—*they save all the fuel.* The gas has sufficient power to force a column of water, three inches in diameter, from the depth of a thousand feet to the height of about fifty feet above the surface of the earth. It is turned under the furnace, ignited, and boils the water till it is brought to the state for chrystalization, and then conveyed to the cisterns for evaporation. Thus 350 bushels of Salt, of the first quality, are made per day, without one particle of other fuel than gas. At these works but one cistern is yet erected, and they are able to use only one half of the water that is forced up. Another is in progress of erection. When completed, all the water will be used, and seventy or eighty barrels of Salt manufactured daily without coal, wood, or the rays of the Sun."

In 1842, I gave in the Journal of Commerce, an account of the sinking of this well to the depth of above one-fifth of a mile, of the *gas*, and of the intention of the owner to use it for fuel. He has now accomplished that operation successfully.

This gas when set on fire at night, illuminates the whole surrounding valley. How wondrous, how inconceivably grand! beneath this local surface, a mighty, a vast gasometer, containing inflamable air sufficient, if not covered by water when ignited, to shake the whole American continent. I take pleasure in communicating this wonderful and this useful matter to the public.

—

The Mayoralty.

From present appearances, the three political parties, viz: the Whigs, the Loco Focos, and the Aborogines, will nominate light candidates for the Mayoralty. If they do, the Anti-Assessment Committee, which is composed of Democrats and old-fashioned Whigs, who do not go the whole hog for Party, will nominate an independent candidate for the Mayoralty.

—

Public Credit.

The right of a majority of voters to encumber the private property of a citizen with a public mortgage, we will discuss hereafter. Seven years from 1836 has elapsed, and another convulsion is generating!

NEW YORK MUNICIPAL GAZETTE.

Published by the ANTI-ASSESSMENT COMMITTEE, and Distributed Gratuitously---Edited by E. Meriam.

VOL. I.] NEW-YORK, MARCH 25, 1844. [No. 19

REMONSTRANCE
Against the Public Mortgage.

TO THE HONORABLE THE LEGISLATURE OF THE STATE OF NEW-YORK:

The undersigned, Citizens of the City of New-York, most respectfully represent to the Legislature, that a Memorial is in circulation in the City of New-York, asking the Legislature to pass a Law to authorise the Corporation of the City of New-York to subscribe to the Capital Stock of the New-York and Erie Rail Road Company, the large sum of THREE MILLIONS OF DOLLARS, and that the project shall be determined by vote, by ballot, at the Charter Election.

The undersigned call the attention of your Honorable Body to the provision of the Constitution, which is the fundamental law of the Commonwealth, which you are to consider your rule, and the grant of the limited powers with which you are vested.

The protection of private property is one of the great doctrines of the fundamental law, and lays at the very foundation of civil liberty. The taking of private property for public use is allowed upon only one condition, which is that of making just compensation to the owner; but the proceeding contemplated by the proposed Loan of Public Credit, is to take private property for private use; to take the private property of one citizen and give it to another, or to take private property of the citizens inhabiting a local district, and give it to the Stockholders of a Railroad Company, of another local district.

The Corporation of the city of New-York is already indebted to individuals a greater amount than their corporate property is worth; and the doctrine that the private property of citizens residing in a local district is to be encumbered by a public mortgage without their consent, is one of so dangerous a character, and so erroneous in principle, that the undersigned trust the Legislature will not give it the color of existence by any Public endorsement.

It is contended by some, that the Croton Water Debt is a lien or public mortgage upon the property of the citizens of the Island of New-York, but the undersigned suggest that this principle has never been recognised by the high Judicatores of the land, for in such a case, no mortgage could be foreclosed in the City of New-York, without making every one of the Croton Bond Holders parties defendants to such suit, they having a certain interest therein.

The recent unfortunate occurrence, in a City of an adjoining State, is so fresh in the recellection of the members of your Honorable Body, that it is deemed unnecessary to recapitulate the particulars of that unfortunate affair.

The undersigned suggest that Municipal Corporations are not that class of organizations which are intended to carry on tradebanking, or dealing in stocks, but are intended solely as a mere administrative functionary, for the executing of the State Laws in a local district.

In the principles involved in the organization of the local Corporate Government of the City of New-York, there is no difference from that of a Village Corporation, except in the greater aggregate of its population.

The undersigned suggest, that if an application was made to your Honorable Body, for the passage of a Law to compel an individual to subscribe to the Stock of the Erie Rail Road Company, that the doctrine would be looked upon as so absurd and of such an arbitrary and despotic character, that you would not for one moment entertain the application.

In the present case, it is an attempt to ask that same thing to be done indirectly which you would not permit to be done directly; that although you would not compel the particular individual to subscribe, yet said Memorialists ask you to compel other individuals to subscribe at his expense, and that such subscription shall be a lien upon his land.

The undersigned take leave to call the attention of the members of your Honorable Body, to the grant of limited power contained in the Constitution, and to the important fact that no clause is embodied in that instrument which authorises the Senate and Assembly to delegate the Legislative power of your Honorable Body, to any other class of citizens.

This power is a special power, limited, restricted and so plainly expressed, that there is no room or place for doubtful construction.

The undersigned suggest, that if the doctrine is to be sustained that the Senate and Assembly can delegate the legislative power with which they are specially vested by the Constitution, which is the general power of Attorney from the People, who in this land of freedom are the Sovereigns, then there is no necessity of the annual meeting of the Legislature, as this expense and trouble may be saved by delegating to any number of individuals the Legislative power of one portion of the State, and to certain other persons, the legislative power of the residue of the Commonwealth.

The members of your Honorable Body must be aware that the strict construction of the Constitution, which is the Charter of Civil Liberty, is the only true and safe construction, and if that safe rule continues to be departed from in future, as it has in times past, the experiment of self government by a free people, will prove a failure, and mankind will become disheartened and prevented from a future effort to better the condition of human government.

The undersigned suggest, that in case your Honorable Body should deem it within your legitimate power to grant the prayer of the said Memorialists, who ask for the loan of Public Credit, that an amendment be made to the bill, providing that the tax to be levied annually to pay the interest of the Loan, be assessed wholly upon the land of such Memorialists, and that the principal of the Debt be a lien and incumbrance upon their real estate, and that the Bill and the names of the said Memorialists, be recorded ed in the office of Register of Deeds, in the City and County of New-York, that whenever their real estate is alienated, that the purchaser may have adequate notice of the public mortgage upon the premises.

The undersigned remonstrate against any power being granted to the Corporation to borrow money or incur pecuniary liability, and ask that a Law may be passed to vest the Public property not in Public use, now belonging to the Corporation of the City of New-York, in a Special Board of Control, to sell and convey, and to apply the proceeds to the immediate extinguishment and cancelling of so much of the Public Debt, as its avails are adequate to discharge.

The undersigned remonstrate against the Memorial here complained of, and trust that the disastrous consequences which have already resulted from loaning the Credit of this State to incorporated companies, may be a warning and admonition in the present instance, and that the embarrassments which have fallen to the lot of sister States in this Republic, from the lending of the pledge of the Public faith to further the objects of speculation, and the censure which the members of this Confederacy have incurred abroad, and the suffering which private individuals who have loaned the earnings of a life of industry, the only dependence of old age, have experienced, may have its solemn admonition in the Councils of the Legislative Halls of this great Commonwealth, and lead the members of the Legislative Chambers to such a result, as shall tend to perpetuate the blessings of Civil Liberty, and avert the catastrophe which a disregard of written Constitutions bring upon the People.

The undersigned urge upon your consideration the suggestion, that the application of the gentlemen petitioners for the Loan of the THREE MILLIONS of Public Credit, involves a principle which cannot be settled by a vote of the citizens of a local dis-

trict. That the consumating such a vote is not within the rule laid down in the fundamental law, for the amendment of the Constitution of the State.

The undersigned desire to call the attention of the Legislature to manifestos issued by the Patriots of the Revolution, in which they hold that doctrine to be obnoxious which tax the People against their consent. The varying the form in the present case, as contemplated by the Memorial complained of, is merely a varying the form without varying the substance; the results are the same in both cases, applying the circumstances thereto.

The undersigned could enlarge upon this subject, but they deem it unnecessary. &c.

City of New-York, March 8th, 1844.
And your Memorialists,

Jonathan Thompson, Jonathan Goodhue, Walter Bowne, Wm. B. Crosby, John D. Wolfe, Hickson W. Field, A. G. Thompson, Henry Grinnell, Hicks & Co., S. B. Collins, Burtis Skidmore, Isaac Jones, Anthony Lamb, Henry Andrew, E. K. Collins, Richard Mott, Robert Jaffray, David Graham, Jr., Henry Young, Peter Schermerhorn, John Anthon, Daniel Parish, Robert Hyslop, Jacob Drake, George Ireland, Lyman Denison, J. J. Janeway, Henry Brevoort, Horace Holden, J. B. Varnum, Woolsey & Woolsey, John H. Tallman, R. Whiley, C. V. S. Roosevelt, Abraham Schermerhorn, M. Bruen, and numerous others of high standing.

MISCELLANEOUS.

Æreolites---Meteoric Stones.

The fall of Meteoric Stones from the atmosphere, have been so frequent and so well authenticated, that the phenomena almost ceases to excite surprise.

I do not recollect to have noticed in the Sacred Record, any particular mention of the fall of ærolites from the atmosphere. Mention is made in the book of Joshua of the great destruction of human life by "great stones which fell from Heaven," but these are subsequently, in the same verse, called hail stones, and immediately after an extraordinary phenomenon is stated, that of the suspension of the diurnal revolution of the solar orb, and also of the satellite of our Earth, and such cause would, in all probability, produce such a result, and was, for aught we know, the very means designed by the Almighty to produce the result there made manifest. The Book of Jashur, which is referred to in Joshua, as containing an account of this event, is not found in the sacred volume, and therefore we are without the additional light which that record would afford us. In the present aspect of our terrestrial globe, it is, I think, clearly evident, that the primitive poles have been changed for the present arctic and antarctic, and this event may have produced that change, as the time which the Sun and Moon stood still was nearly a whole day. From the present appearance of our planet, we should be led to look for the position of the primitive poles at the Isthmus of Panama and the Straits of Java.

M. Arago, the celebrated French Astronomer, in 1842 communicated to the Academy of Science of Paris, an account of an ærolite which fell in the district of Mount Blanc. The stone fell in the day time, about one o'clock. P. M., attended by loud detonations, resembling the sound of several pieces of ordinance discharged in quick succession. The stone was by the explosion, broken into fragments, and numbers of these were collected and examined. The largest weighed about fourteen pounds.

In June last the same distinguished gentleman communicated to the same academy an account of the fall of an ærolite in one of the departments of the German States. That stone fell about seven o'clock in the evening, and was heard by great numbers of persons for a distance of near fifteen miles, making a musical sound as it passed through the air, which he termed the music of the spheres. Shortly before this ærolite reached the earth, it exploded with a loud detonation. One of the largest of the pieces was seen to fall in a piece of meadow ground, and was immediately sought for and found, having penetrated the earth until it came in contact with a strata of hard sand. When taken out it was still warm.

When Sir John Herschell was at the Cape of Good Hope, an ærolite was seen to pass through the atmosphere about mid-day, by great numbers of persons, near Capetown and its vicinity, for a distance of sixty miles and to explode, scattering its fragments in every direction. Some of these fell on the rocks, and were again broken; others fell in soft ground, and sunk to the depth of some inches. Many of these fragments were at once collected, and when first found were soft, but became hard on getting cold.

Some few years since, an ærolite fell upon a dwelling house in Germany, and passed entirely through it into the cellar. Fortunately no person was injured. This occurred in the day time.

In one of the three first instances I have mentioned, the fragments were found over a surface of about two miles in width and fifteen miles in length; in another, about one mile and a half in width and six in length. The velocity of the ærolite and its explosive force, were thus both developed; and some idea may also be formed of the inclination of its path to that of the Earth.

Some few years since, a large shower of stones fell in the State of Tennessee. These were collected in great numbers.

Aikens collected together accounts of the fall of meteoric stones, as follows:

"On the 29th of April, 1803, a shower of stones weighing from eighteen pounds to one quarter of an ounce, and supposed to be two or three thousand in number, fell in the neighborhood of l'Aigle, in Normandy, on a space of about six miles long and two broad.

"On the 4th of July a stone struck a house at East Norton, with an explosion, by which the house was much damaged.

"On the 8th Sept., a stone fell near Apt, in the country of Avignon.

"On the 18th December, a stone fell on a barn, in a small village in Germany, and broke the rafters of the roof.

"On the 5th of April, 1804, a stone fell at Possie, about three miles from Glasgow.

"On the 15th March, 1806, one fell at Valace in the *aroundisement* of Alais, in France."

Brande has the following:

"The first tolerably accurate narration of the fall of meteoric stones, relates to that of Ensisheim, near Basle, upon the Rhine. The account which is deposited in the Church, runs thus:—A. D. 1492, Wednesday, 7th of November, there was a loud clap of thunder, and a child saw a stone fall from Heaven; it struck in a field of wheat and did no harm, but made a hole there. The noise it made was heard at Lucerne, Tilling and other places; on Monday, King Maximilian ordered the stone to be brought to the Castle, and after having conversed about it with the noblemen, said the people of Ensisheim should hang it up in their Church, and His Excellency strictly forbade any body to take anything from it. His Excellency, however, took two pieces himself, and sent another to Duke Sigismond, of Austria. This stone weighed 225 pounds."

King Maximilian decided wisely in directing this ærolite to be hung up in the church in the immediate vicinity of its descent upon the earth. The worshipper of the Creator of the Universe, would have a witness before him, a witness of the unsearchable works of the Almighty, for although the Globe has been inhabited about six thousand years, mankind are as ignorant of the origin of these ærial wanderers, as at any time since the creation of Adam. Man rarely calls to mind that the atmosphere above his head is the path-way of wandering rocks.

I proceed with my quotations:

"In 1627, 27th November, the celebrated Garsondi, saw a burning stone fall on Mount Vasin, in Provence; he found its weight to be 59 pounds.

"In 1672, a stone fell near Verona, 300 pounds in weight.

"And Sucas, when at Sarissa in 1706, describes the falling of a stone, with a loud hissing noise, and smelling of sulphur.

"In 1753, de Pelaude witnessed this extraordinary phenomena, near Port de Vesle.

"In 1768, no less than three stones fell in different parts of France.

"In 1790 there was a shower of stones near Agen, witnessed by several respectable persons.

"And on the 18th of December, 1795, a stone fell near Major Topham's house, in Yorkshire; it was seen by a ploughman

and two other persons, who immediately dug it out of a hole it had buried itself in ; it weighed 56 pounds."

Professor WEBSTER, in his Manual of Chemistry, refers to the Edinburgh Philosophical Journal, (Vol. 1, *p.* 22,) for an account of meteoric stones which have fallen from the Heavens, from the earliest period down to 1819; I have not that work in my Chemical Library to refer to.

Professor HENRY, in his work on Chemistry, refers to the Annals de Chemie, for January 1846, for an account of a meteoric stone which fell near Ganges, which by the analyses of Vanquelin, yielded neither sulphur nor nickle, the iron being also oxydidir, contrary to all former cases of the kind.

AIKEN, in his Chemical Dictionary, remarks thus :

" It is remarkable that all the stones, at whatever period or in whatever part of the world they may have fallen, on being analysed, are found to contain the same substances combined."

The atmosphere exhibits its various phenomenon, but we have very limited means of investigation.

The motion of meteoric bodies are generally so rapid that their path is not traceable, or the inclination of their orbits ascertained.

If heavy bodies accumulate in the atmosphere, under the influence of the laws of chemical affinity or attraction, they would it is presumed, at once become obedient to the laws of gravity, unless they should have acquired a velocity in the first formation which hould over-power the force of great specific gravity. This is illustrated in the motion of an iron ball discharged from a piece of ordinance, the velocity overpowers the gravity.

Atmospheric Stones have by some, been supposed to be thrown from volcanoes in the Moon, but M. Arago has recently expressed the opinion that the Moon has no atmosphere, and if such be the fact, it is difficult to conceive of a burning volcano, without air to sustain combustion.

Gelatinous bodies have frequently fallen from the atmosphere, but I have never met with an analysis of these ærial precipitates. Some few years since, during a violent snow storm in Russia, a vast number of insects of a nondescript species, fell upon the earth and were collected. When taken to the fire it was found that the heat killed them.

Ice and snow form in the atmosphere, and various gases may by various atmospheric agents, become instantly condensed, and form solid bodies.

Meteoric Iron is found in various sections of the Globe, and the Copper Rock which passed through New York not long since, for Washington, is perhaps an ærolite. It is not as heavy as some bodies of Iron which have been found in Africa, in a pure metallic state. The atmosphere is sometimes, in a local district, filled with iron in an oxidized state, blown from the earth's surface by the winds.

ASSESSMENT AND TAX

Memorial.

TO THE HON. THE LEGISLATURE OF THE STATE OF NEW-YORK:

The undersigned, Citizens of the City of New-York, most respectfully represent to your Honorable body that the Bill reported by the Committee on the judiciary in the Senate, on the 10th of April last, and known as Senate bill No. 66, is disapproved of by intelligent citizens in that provision which requires a schedule, and oath, to be filled up and returned to the assessors between the 1st and 10th day of May in each year, under a penalty of a treble tax for non compliance is considered, by your memorialists, vexatious and inquisitorial and your memorialists most respectfully remonstrate against the said provision becoming a law.

Your Memorialists refer your Honorable Body to the Memorial and remonstrance of the meeting held at the Merchants Exchange on the 6th of March last, which was presented in the Senate on the 11th of the same month, by the Hon. D. S. Dickinson, Lieut. Governor of the State of New-York, and President of the Senate, which Memorial is signed by Preserved Fish, Chairman, Abraham G. Thompson, George Griswold, Jonathan Goodhue, Peter I. Nevius, Abraham Van Nest, Peter Cooper, William B. Crosby, Peter Lorillard Jr., Charles H. Russell, Peter Embury, Peter Schermerhorn, and John Haggerty, Assistant Chairmen, and W. B. Meech, Secretary, and ask that the said Memorial and Remonstrance may receive the early attention of the Honorable the Legislature at the present session.

Your Memorialists ask that the Memorials presented in the Senate, by the Hon. E. Rhoades, and the Hon. Abraham Dixon, in the Assembly, by the Hon. Robert Smith and others, at the last session of the Legislature, a copy of which is annexed hereto, may also at the same time receive the attention of the Legislature.

Your Memorialists ask that the thirty-two Remonstrances presented in the Senate at the last session by Mr. Dixon against the passage of the act authorising the corporation to purchase at assessment and tax sales, against the passage of the law requiring a schedule and oath and providing a penalty of a treble tax for non compliance, asking that the Water Commissioners may be made Supervisors, and the President of the Water Commissioners may be made County Treasurer, and remonstrating against the increase of the City Tax, and against the re-assessment of the arrear tax may receive the early attention of your Honorable Body.

Your Memorialists ask that the law passed at the last session authorising the Corporation to purchase at assessment and tax sales *may be repealed*, and that the passage of the said act may be examined into by a Committtee of your Honorable Body.

The undersigned ask that the amount authorised to be raised for the City Watch, may be limited to Two Hundred Thousand Dollars; for lighting the city to One Hundred Thousand Dollars; to cleaning the streets of said city, to Fifty Thousand Dollars ; and for the support of the Alms House to Two Hundred Thousand Dollars, and that the money so raised, shall be appropriated to the specific purpose for which it is so raised, and for no other purpose whatever.

The undersigned ask that the fees of the Coroner of the City and County of New York shall be paid into the City Treasury and that he be paid an annual salary of Fifteen Hundred Dollars per annum and no more.

The undersigned ask that so much of the interest of the Croton Debt, as the receipts for water annually, fall short of paying, may be assessed upon the owners and also upon the occupants of all houses and lots within the district where the water pipes are laid for supplying water for the extinguishment of fires and for the use of the inhabitants, and also that the expense of the City Watch and of lighting the streets, aad of cleaning the streets may each be assessed in the same manner in the respective districts where the money is expended.

The undersigned ask, that the State Mill Tax may be commuted to One Hundred Thousand Dollars, being, as your Memorialists are informed, about the proportion of this City and County, as compared with the amount of taxable property, as is now paid by the other Counties of this State, and that such Tax be assessed upon the estate, real and personal, of the inhabitants and freeholders, of the said City and County of New York.

Your Memorialists ask, that the Tax for the support of the Poor of the said City, and all the other Taxes, except the cleaning of the Streets, of the Watch, Lamps and Croton interest, may be assessed upon the estate, real and personal, of the inhabitants and freeholders, of the City and County of New York.

Your Memorialists ask, that the Water Commissioners may be made members of the Board of Supervisors, and that said Water Commissioners may be vested with the entire control of the Croton Water, and that the appointment of other Boards by the Common Council, either from their own body, or of other persons, may be prohibited by law.

Your Memorialists ask, that the Assessors of the several and respective Wards, may be elected for longer terms, viz: one Assessor for the term of two years, and one Assessor for the term of three years, that they thereby may have the benefit of experience to qualfy them the better, for the performance of their duties: that the present Assessors may be allowed to hold office, until the second Tuesday of April, 1845, and that the Assessors be required by law, to furnish each person assessed for Taxes, at the time the assessment is made, with the amount of the assessed value of his real or personal estate, or both, as put down by such Assessors, by delivering to such persons, a printed form, filled up with his name and the

amount of the assessed value of his real, and also his personal estate; and stating, also, in said notice, that the Assessors will meet at the City Hall, on the following Saturday, and every Saturday during the months of May, June and July, from the hour of ten in the morning, to the hour of two o'clock, P. M., for the purpose of hearing objections. In case such notice cannot be served personally, it shall be left at the place of business of the person assessed, with some person in charge thereof, or at the dwelling house of such person, with a member of his family, of suitable age and discretion.

Your Memorialists ask, that the Assessors shall be required to assemble at the City Hall, every Saturday, during the months of May, June and July, in each year, for the purpose of affording citizens, owning property in the several Wards, an opportunity of examining their several and respective assessments.

Your Memorialists ask, that the receiver of Taxes may be required by law, to compute the interest to be deducted upon the aggregate amount of the Tax, where there is more than one item, instead of each separate item, and thereby save both expense and trouble to the Tax payers.

Your Memorialists ask, that this Memorial may be referred to a Select Committee, to be composed of one member from each Senate district, and that they may be heard before said Commtttee, by the Delegates who are the bearers of this Memorial to the Legislature.

Your Memorialists remonstrate against the payment of the annual Tax, at an earlier day than that now fixed by law, and against any attempt of the Common Council, to collect two Taxes in one year, and ask that the allowance of discount for advance payment, may be made for all moneys paid prior to the 15th day of February, and that in all cases where real estate is sold for non-payment of Taxes, that so much only as may be sufficient to pay the Tax, may be sold, and no more, and that the expenses of advertisement of sale, and notice of redemption, and all other charges, may be limited to the rates charged by the State Comptroller, in selling Lands for Taxes.

Your Memorialists ask, that all the Corporation Bonds, now outstanding, be required by law, to be registered in the office of the Clerk of the Common Council, within thirty days, and that such Register be open to the inspection of any citizen who may desire to see the same.

And in duty bound, &c., your Memorialists, &c., &c.

Jonathan Thompson, James Brown, Robert C. Cornell, Philip Milldollar, Benjamin L. Swan, Wm. B. Crosby, Peter Schermerhorn, Jonathan Goodhue, Edmund H. Pendleton, Abraham G. Thompson, Joseph Sampson, James Roosevelt, Burtis Skidmore, James W. Beekman, Adam Treadwell, John R. Murray, James Monroe, Wm. H. Aspinwall, John H. Tallman, Stewart Brown, Wm. Gale, A. B. Cox, John Haggerty, Jonathan Sturges, Joseph Foulke & Sons, Robert L. Stuart, Wm. Tucker, William C. Rhinlander, John M. Bradhurst, J. Smyth Rogers, Gulian C. Verplanck, Peter Harmony, Jacob Aims, Arthur Bronson, Charles March, George Ireland, Wm. H. Falls, R. L. Maitland, J. R. Leavitt, Hendricks & Brothers, J. L. Bowne, John B. Anderson, John Milhau, Josiah Macy & Son, Robert Buloid & Co., L. & V. Kirby, Fearing & Hall, N. M. Beckwith, George C. Thorburn, and numerous other citizens of the highest standing and respectability.

City Comptroller's Report.

This document has at length made its appearance. The Report covers four and one third months of time of the Whig, and seven and two thirds months of the Democratic Administration of the City Government, making together one fiscal year.

We have carefully examined this Report. It present a sad recital of expenditures, some of which we notice here, thus:

"*Paid expenses attending application to the Legislature, for passage of new Tax Collection Law, and revision of Assessment Law, &c.,*	$1,007.63

See page 36.

We are at a loss to account for this enormous expenditure. The Citizens' Committee, five of which attended at Albany to oppose this new Tax-Collection Law, expended less than $200 altogether. One of the Citizens' Committee remained more than a month at Albany, and the others were each of them there several days. We should like to see the items of this expenditure, for it must contain some bonuses, and these should be known. It is impossible that this sum could have been expended for travelling charges and hotel bills.

On page 50, is as follows:

Paid for printing Manual of Corporation,	$826.75

This is a most exorbitant price for a very small book.

On page 43:

Paid for Printing sales list and advertising, in 1842,	$3,491.00

On page 25:

Paid for advertising sale of unpaid Assessments,	1,461.00
Paid for advertising list of property to be redeemed,	1,851.98
	$6,803.98

This work could have been all done for less than $1000.

On page 36:

Paid for refreshments for members and Committees of Common Council,	$4,988.75

This is more than $150 for each member of the Common Council, and is equal to an expense of near one hundred dollars per week for the "Banquetting Room."

On the same page:

Carriage hire, C. C.,	$2,911.74

On the same page again:

Refreshments for Board of Supervisors and County Court,	$447.34

On the same page, also:

Paid for Contingent Expenses of Street Commissioner's office,	$200!!

On page 40, 41 and 51:

Paid District Attorney for prosecuting forfeited recognizances,	$5,675.41
Salary of District Attorney and Clerk,	$3,500.00
Acting District Attorney,	320.00
Printing and Stationary of District Attorney,	272.54
	$9,767.95

This is a pretty round sum to one officer.

On page 59:

Paid for Profile, &c., of Chapel street Sewer!!!	$728.71

This item is charged to *Street Expenses.* We should like to see the bill of particulars for this most monstrous charge, and the names of the beneficiaries. It is more than one fourth of the 7th avenue survey. Do. 6th avenue survey.

The whole expense of Printing, Stationary and Advertising, is stated at $48,015.80.

NEW YORK MUNICIPAL GAZETTE.

Published by the ANTI-ASSESSMENT COMMITTEE, and Distributed Gratuitously---Edited by E. Meriam.

VOL. I.] NEW-YORK, MARCH 29, 1844. [No. 20

PUBLIC FERRIES.

Public Ferries are designed for public convenience. The more easy, the more cheap the intercourse between different districts, and the greater the facilities, the greater the advantages. Good roads facilitate intercourse, and the same with bridges and ferries.

Roads which are public highways, are made at the expense of the public, so are all the public bridges. There are some bridges and turnpike roads which belong to incorporated companies. These are constructed at the expense of such companies, and they are permitted to take toll to compensate for the use of these facilities and the capital invested in the construction. The policy of granting such monopolies, and the right to take private property for their use, we are much disposed to question.

Cheap ferries depend upon the same principles as to public policy, as cheap postage. The poor man finds a dear ferry a heavy tax, and it sometimes operates on him as a hindrance or non-intercourse.

Our remarks here are intended to apply to the public ferries which the Corporation of New-York claim as a property, as a vested right.

We will take what is called the Fulton Ferry, which connects the Island of New-York with Long Island, to illustrate our position.

The Fulton ferry extends from Fulton street in New-York, across the East river, which is an arm of the sea, to Fulton street, Brooklyn, and both intersect the East river and thus all three are cross roads.

Both the streets and the river are public highways. The Corporation of New-York claim this ferry under a patent or charter from Gov. Dongan, dated in 1686, (*see Ante. page* 35,) also, under a patent from Gov. Cornbury, dated in 1708, (*see Ante. page* 39,) and also under a patent or charter from Gov. Montgomery, dated in 1730, (*see Ante. page* 50).

The patent of Dongan was made when the Duke of York was proprietor of the Colony, but before the patent reached England for his confirmation, the Duke of York had become King James II., and the title of proprietor had become merged in the crown. He refused to confirm the charter of Dongan. William and Mary shortly after came in possession of the crown. These sovereigns were applied to by the Corporation to confirm the patent, but they refused, (*see Ante. page* 38). On the 11th of May, 1697, the King confirmed a severe Act against the Corporation of New-York, (*see Ante. page* 38). The patent of Gov. Cornbery was in the reign of Queen Ann, and that sovereign refused to confirm the grant. The patent of Cornberry provided that persons living near the water, might ferry themselves and property over in their own boats. The patent of Montgomery was in the reign of George II. That sovereign refused to confirm this patent or charter. The patent of Montgomery recites that the patents of Dongan and Cornbery were doubted, (*see Ante. page* 50), because of being made in the Governors own names, instead of being made in the names of the reigning Kings and Queens, and that very patent containing this recital, shared the same fate of its predecessors. In 1732 the Colonial Legislature passed an Act to confirm the Charter. The Colonial Legislature subsequently threatened to repeal the charter, but it was let alone.

In 1830 the Revised Statutes repealed the Colonial Act of 1732, and also the Act against the Corporation of New-York, signed by the King in 1697. We do not find any record of the Act of 1732 ever having been confirmed by the King as a public Act. The Constitutions of 1777 and 1823, confirm all charters granted by the King or predecessors. These charters were not of that class. They were grants of the Governors for the time being, for their own term of administering the government.

All political power was demolished by the Revolution. The Colonial Laws not repealed by the State Legislature, were kept in force and recognised by the Constitution until 1830, when the general repealing clause in the Revised Statutes, swept all Acts which had not been repealed by their titles, from the Statute Book.

The East river *is an arm of the sea*, and the control of it belongs to the United States. It is navigable water.

In 1787 (*see Ante. page* 31,) the Legislature of the State of New-York granted to John Fitch, of Bucks County, Pa., the exclusive right of navigating the waters of this State by vessels or boats, propelled by fire or steam, for the term of fifty years. This Act was declared to be unconstitutional by the Supreme Court of the United States, in the suit of Livingston and Fulton.

This grant included the Fulton ferry. The Olive Branch is one of the ferry boats that ply between New-York Island and Long Island. The North America is a ferry or passage boat, and plies between New-York and Albany. Other boats of the same kind, ply between New-York and New Haven, New-York and New Brunswick, and the Great Western between New-York and Bristol, England. All these are public ferries, and the Corporation of New-York have as much right to one as the other, and no exclusive right or estate in either.

The Corporation of New-York is a mere public functionary, to execute the laws of the State in a local district. The City Government is not a sovereignty, but on the contrary a mere organization like that of a country village or County Supervisors.

If the Corporation of the City of New York should lease to a company, Broadway, and allow them to collect toll from every passenger or vehicle passing through it, the lease would be worthless and the toll would be an extortion, but the Broadway stages take up passengers and carry them through this route and they take stage fare for the service rendered. This fare is not regulated by law, but by competition. The carman carries merchandise over this street and charges for the labor, but in this he is regulated by the Corporation. This is wrong, any man has a right to a fair price for cartage, and what his employer agrees to give him. It may be answered that regulations are necessary, and this we admit, but the Legislature of the State, which has alone the power of making laws, and not the Corporation, which is made by the law, and is a creature of the law. The State Legislature have not the power of delegating this power, specially given them by the Constitution, (*see Ante. page* 197).

The East river and Fulton streets in New-York and Brooklyn, are all as much public highways as Broadway, and the Corporation have no control over either.

A deed of Fulton street in New-York, in fee to a citizen, from the Corporation, would not be worth a straw, that body has no right in it whatever; when the street ceases to be used for a public highway, the use goes to the adjoining owners of land bounding in the centre of the street.

It may be said that the Corporation own the wharves; they own the timber, &c., which has been placed in the East river, the same as the County Supervisors own a public bridge over a navigable water, not otherwise.

NOMINATIONS FOR THE CITY.

It is gratifying to see among the names of the candidates, so many who are held high in public estimation. We see among the names of the candidates, many whose names appear on the Anti-Assessment Memorials in this volume.

The Democrats have done themselves great credit in their nomination for Mayor. Our good friend John M. Bradhurst, Chairman of the Citizens' Committee, presided as Chairman of the Convention which made this nomination. Mr. John I. Codington is the gentleman nominated. A most excellent citizen and upright man, and one who, if elected, will no doubt discharge the duties

of the office to the advantage of the City, and with credit to himself.

Mr. James Harper has been nominated for Mayor by the American party. Those who know him well speak very highly of him.

Mr. Morris Franklin has been nominated by the Whig party for the Mayoralty. Mr. Franklin has, in the School Question, done himself great credit, and won by his labors in that good cause, a fame far brighter and better than political favor. In the Assessment Question he has been against us, in the Common Council, and also in the Legislature. We regret sincerely and truly that so good a man and so worthy a citizen, should have in this, so far travelled out of the right way. We have always supposed that politics misled him; we still think so. In every thing but in the Assessment Question opposition, we wish him well. Mr. Franklin is a member of the Society of Friends, and should he be elected, we hope he will take counsel from the former associates of his father, sometime since deceased, instead of politicians, for such counsel would gain him an abiding popularity of increasing brightness.

Mr. Wm. Gale has been nominated by the American party, for Alderman of the 2d Ward. Mr. Gale was one of the Delegates appointed by the Meeting held at the Merchant's Exchange, in 1843, to proceed to Albany in relation to Taxes and Assessments. Mr. Gale is a good man and worthy citizen, and if elected will make a most excellent Magistrate.

Mr. Richard L. Schieffilin, of the fifteenth Ward, is nominated by the American party for Alderman of that Ward. Mr. Schieffilin is a most excellent citizen and a sound lawyer, and if elected will be a very great acquisition to the Common Council.

Mr. E. G. Drake has been nominated by the same party for Alderman of the fifth Ward. Mr. Drake comes up to the requirements of Mr. Jefferson, capable and honest, and if elected will faithfully do his duty. He is a most worthy citizen.

Mr. John Brouwer is named as a candidate for Alderman of the first Ward. Mr. Brouwer will make an excellent Magistrate. It is a most excellent selection.

All the gentlemen we have named for Aldermen, are thorough-going Anti-Assessment men, their names will be found on the numerous Memorials to the Legislature in reference to Assessments and Taxes, which are set forth in this volume.

We hope none other than Anti-Assessment citizens will be elected to the Common Council. Men who will not only talk but act, and the four gentlemen we have last named come up to this standard.

Mr. Cozens is nominated by the American party, for Alderman of the third Ward. This is a most excellent nomination. The office will be honored in the man.

Charles Henry Hall has been nominated by the same party in the twelfth Ward. We have seen much of Mr. Hall at Albany, and we think highly of him. His experience as a business man, will make him a useful member of the Common Council. Mr. Hall has rendered most important services to his Ward at the last session of the Legislature, and to his personal services alone is due the credit of saving the citizens of that Ward from most oppressive and arbitrary taxation. Mr. Hall is now at Albany attending to the interest of his Ward. He is a worthy man and a good citizen.

Mr. Alonzo A. Alvord is a candidate for Assistant Alderman of the 12th Ward. Mr. Alvord is a most excellent man, he was among the earliest actors in the Anti-Assessment Committee. He is a business man, capable and honest, and will be a great acquisition to the Board of Assistants.

Some of the gentlemen we have named are Democrats, and some are Whigs, but it is of no importance which party claims them, they are good men and capable, and will act independent of party.

Whole hog Whigs, and blue Loco's, are neither of them right, but the old fashioned Whigs and Democrats there is no fear of, either of these will do right. The party which we call the Aborigines, are made up of all sorts, and we hope that they have but few politicians. The party lines are now being broken, and we are glad to see any measure started which will bring the old fashioned Whigs and the old fashioned Democrats, back to their seats again.

INCREASED TAX.

The Corporation have decided upon an application to the Legislature, for authority to raise this year $266,000 for City Watch, also $120,887.36 for Lamps, and also $912,-34.85 for Contingent Expenses. These three items swell the amount to the enormous sum of $1,298,922.21, which is the largest sum ever asked of the Legislature.

The laws now in force, authorize the assessing of the Croton Interest, the Floating Debt, the Mill Tax, &c.

The Supervisors, on the 3d of October last, assessed but $212,000 for City Watch, also $110,000 for Lamps, and also $544,-844.91 for Contingent Expenses, making in all $866,844.91.

This sum is more than Two Hundred Thousand Dollars too much, and now the Common Council ask the Legislature for the large sum of $432,077.30, over and above what the Supervisors deemed sufficient last year.

The Common Council last year only asked for $212,000 for the Watch, $110,000 for the Lamps, and $668,000 for Contingent Expenses; making in all $990,000. This year the Common Council ask for an increase of that sum of $308,922.21. See Session Laws of 1843, page 170.

The Citizens last year opposed that amount at Albany, but Mr. Varian resisted the application. The Board of Supervisors, however, put him right in this, and reduced the tax $123,125.09.

In 1830, the whole City Tax authorised, was but $450,000, and the population was more than 200,000; now the population is but 340,000, and they ask for near $1,300,-000, independent of the Mill Tax and the Croton Interest and Common Schools.

The Corporation Officers do not show any thing at all to account for the increase of the Tax Bill this year, over last year, and in the absence of such information, will the Legislature authorise the increase?

It is evident from the showing of the Corporation, that the money raised is much of it squandered. The Printing Expenses are a true index. We could point to salaries in which the public are paying more money than appears upon the face of the papers.

CONSTITUTIONAL QUESTION.

The veteran sufferer on the 9th avenue, whom the Corporation of New-York have attempted to plunder of his patrimonial estate for a sham assessment now amounting to near Ten Thousand Dollars, for the pretended opening of a paper street, has obtained the professional aid of that great Constitutional Lawyer, the Hon. DANIEL WEBSTER, to argue his cause, with RICHARD MOTT, Esq., at the May Term of the Supreme Court, in New-York.

This is the case in which six intelligent Jurors, on the trial of the cause in the Circuit Court, refused to yield, and nobly sustained the Constitution and the law.

SALARIES OF JUDGES.

The Legislature should at once disconnect the Courts from the Corporation. The Corporation pay the salaries of the Judges of the Superior Court, Court of Common Pleas, and Court of Sessions. These salaries should be paid by the State. The Corporation and their officers are often parties in these Courts, and therefore should not have the power to fix the pay of the Judges or withhold their pay.

SALE OF LANDS FOR ASSESSMENTS.

The Memorial of the Corporation to the Legislature, and the Comptroller's Report of 1843, show that the boast in reference to the act authorising the Corporation to purchase lands for assessments, lessening the tax, is dished.

TAX BILL

Proposed by the Common Council of New-York, the present year, to be passed into a law by the Legislature:

"AN ACT

To enable the Supervisors of the City of New-York, to raise Money by Tax.

The People of the State of New-York, represented in the Senate and Assembly, do enact as follows:

SEC. 1. The Mayor, Recorder, and Aldermen of the City of New-York, as the Supervisors of the City and County of New-York, of whom the Mayor or Recorder shall be one, are hereby empowered, as soon as conveniently may be after the passage of this Act, to order and caused to be raised by tax on the estates, real and personal, of the free-

holders and inhabitants of, and situated within the City and County of New-York, and to be collected according to law, a sum not exceeding nine hundred and twelve thousand and thirty-four dollars and eighty-five cents, to be applied towards defraying the various contingent expenses properly chargeable to the said City and County, and such expenses as the Mayor, Aldermen and Commonalty of the City of New-York, may in any manner sustain, or be put to by law; and also a further sum not exceeding two hundred and sixty-six thousand dollars by tax on the estates, real and personal, of the freeholders and inhabitants of, and situated within that part of the City of New-York which is or may be designated by an ordinance or resolution of the Common Council of said City, "as the Watch District," to be applied towards defraying the expenses of watching and guarding such parts of the said City, and also a further sum not exceeding one hundred and twenty —— thousand, eight hundred and eighty-seven dollars and thirty-six cents, by tax on the estates, real and personal, of the freeholders and inhabitants of, and situated within that part of the City of New-York, which is or may be designated by an ordinance or resolution of the Common Council of said City, as the "Lamp District," to be applied towards defraying the expenses of the lighting such parts of the said City last mentioned."

—

TAX ACT OF 1843.

"AN ACT *to enable the Supervisors of the City and County of New-York, to raise Money by Tax.*

Passed April 17, 1843.

The People of the State of New-York, represented in Senate and Assembly, do enact as follows:

SEC. 1. The Mayor, Recorder, and Aldermen of the City of New-York, as the Supervisors of the City and County of New-York, of whom the Mayor or Recorder shall be one, are hereby empowered, as soon as conveniently may be after the passage o this Act, to order and cause to be raised by tax on the real estate situated within the said city, and on such persons as are or may be, by law, liable to taxation on personal property therein, and to be collected according to law, a sum not exceeding six hundred and sixty-eight thousand dollars, to be applied towards defraying the various contingent expenses properly chargeable to the said city and county, and such expenses as the Mayor, Aldermen, and Commonalty of the City of New-York, may in any manner sustain, or be put to by law; and also such further sum, by a tax as aforesaid, as is or may be required by law to be raised by tax in the said city for the support of common schools, and as may be necessary for supplying the deficiency of taxes upon any one and every one of the wards of the said city, imposed or laid during the year one thousand eight hundred and forty-two, owing to the insolvency of the collectors of the said wards, or any or either of them, or their sureties, or their inability to collect the said tax, and also for defraying the whole of the expenses for assessing and collecting the taxes to be raised as aforesaid (such deficiencies to be assessed upon such estates throughout the said city, and upon persons who are or may be by law, taxable for personal property therein;) and also a further sum, not exceeding two hundred and twelve thousand dollars, by taz on the real estate situated within that part of the City of New-York, which is or may be designated by an ordinance or resolution of the Common Council of said City, as the "Watch District," and on such persons as are or may be by law, liable to taxation on personal property in the said city and within the said district, towards defraying the expenses of watching and guarding such part of the said city; and also a further sum not exceeding the sum of one hundred and ten thousand dollars, by a tax on the real estate situated within that part of the City of New-York, which is or may be designated by an ordinance or resolution of the Common Council of the said City, as the "Lamp District," and on such persons as are or may be by law, liable to taxation on personal property in the said city, and within the said district and within the said city, to be applied towards defraying the expenses of lighting such parts of the said city last mentioned; and also such further sum by tax as aforesaid as may be necessary for supplying the deficiencies of taxes upon all that part of the city constituting the lamp and watch districts, during the year one thousand eight hundred and forty-two, owing to the insolvencies of the collectors of any of the wards of the said city, within the said districts respectively, and their sureties, or their inability to collect the said tax, and also for defraying the expenses of assessing and collecting said taxes: such deficiencies to be assessed upon the estates and persons liable to taxation within the said districts respectively."—*Session Laws of* 1838, *p.* 170.

—

REMARKS.

It will be seen by a comparison of the Act of the last session, with the Bill proposed at the present session, authorising the annual tax, that but $990,000 was authorised to be raised. The Bill now proposed provides for the raising of near $1,300,000. It will be seen by referring to the resolutions of the Board of Supervisors, passed October 3d, 1843, that under the Act authorising the raising of $990,000, they deemed it only necessary to raise $866,844.91. The Board of Supervisors in this, raised more than was necessary, for by the Comptroller's Report it will be seen that it was much of it improperly expended. More than $800 for a Corporation Manual, upwards of a thousand dollars to lobby members at Albany, near $5,500 for refreshments for the Banqueting Room at the City Hall, near $3,000 for carriage hire, more than $48,000 for Printing, Stationary, Books and Advertising. Will the State Legislature encourage such expenses by authorising the money to be wrung from the hard earning of the people, to support such profligacy.

The Common Council or officers of the Corporation, do not show any reasons whatever why the amount of the tax bill this year should be increased over last year, nor any reason why the amount assessed last year was not enough. The Tax Bill this year should be diminished as much below what it was last year, as the Board of Supervisors decreased the tax, and in addition to the difference between the amount in the Act last year and the amount in the bill this year which will reduce the amount to the sum of $743,719.82, instead of near $1,300,000.

There is no doubt but the Supervisors will avail themselves of the power contained in the Tax Act of April 17, 1843, to assess the difference between the amount assessed by the Supervisors and the amount authorised by that Act, and we think such an execution of the power a proper one, hence it is necessary that that sum should be deducted, or the amount should be prohibited from being raised in addition to the amount now asked for.

The Tax in 1822, as we have frequently before observed, that was authorised to be raised, was but $250,000, with a population of $140,000, and in 1830 but $450,000 with a population of 202,000; a greater sum is only needed as the population has increased, say $700,000, for, adding the population of 1822, to the population of 1830, we have the aggregate of the present population, say 342,000; add the tax of the two years together and we have $700,000, and from this deduct the excess in last year's law; and we have $576,874.91, which is as much as ought to be raised. The Croton Water, Mill Tax, and School and Floating Debt Tax, are independent of these.

The City departments are badly managed, and should be at once purified by placing other men in the place of the present incumbents, but these substitutes should not be politicians. Take such men as John M. Bradhurst, Saul Alley, Tallman J. Waters, Burtis Skidmore, and men of that stamp, and taxes will go down to almost nothing, and abuses and impositions will vanish like a bad atmosphere when the thermometer is fifty degrees below zero. It is the rottenness of the departments which is the bane of the City Government, the corruption and profligacy.

THE ANNUAL TAX BILL.

The New-York annual Tax Bill was presented in the Senate on Friday morning, and referred to the Judiciary Committee, reported upon by that Committee on Saturday morning, when Mr. Scott, of New-York, at once moved it be ordered to a third reading, it was so ordered, read a third time, and passed.

This is very hasty legislation, *hot haste.* Mr. Scott knew, if he had any knowledge at all of this bill, that it was not of that character which required it to be hurried through the Senate in this way. The interest of the

Public Debt is not to be paid out of this bill, and no good cause exists for this hasty proceeding.

GULIAN C. VERPLANCK.

New-York sustained an immense loss in the retirement of GULIAN C. VERPLANCK, from the Senate of this State. Mr. Verplanck understood our city interests, he is a man of enlarged views, strong discriminating mind, and possesses that firmness of purpose and decision of character, that well qualifies him for the duties of a Legislator. We have no hesitation in saying, that had he remained in the Senate until now, New-York city would have paid one million less taxes, and as much less in assessments. A Corporation lobby could not approach that man. All the advantages which the City of New-York has derived from legislation in taxes and assessments for the time Mr. Verplanck was in the Senate, it is indebted to Mr. Verplanck for. We should have been glad to have seen his name sent to the Senate of the United States for the Judge-ship, made vacant by the death of Judge Thompson.

Chancellor WALWORTH has been nominated to fill that vacancy. This gentleman is well qualified in every other respect except what we call a constitutional disqualification, *see Municipal Gazette, No.* 16, *page* 287, reciting the 25th section of the former Constitution of this State, and section 7, of Art 5, of the present Constitution. We will notice this hereafter.

Judge SAVAGE, late Chief Justice of this State, is well qualified for the vacant seat on the bench of the Supreme Court of the United States. Judge Savage is one of the best men in our country, and we should be glad to see him made Governor of this State.

MEETING AT TAMMANY HALL.

At the meeting held by the Democratic party at Tammany Hall, last week, the abuses of the Corporation officers, and members of the Common Council, were denounced in strong terms, and measures adopted for reinforcing the negative of the Mayor upon the acts of the Common Council, and to give to that officer the nomination of persons for public office, &c. This is right. We presume this measure originated with John M. Bradhurst and Saul Alley, both of whom are old fashioned citizens, men of pure minds, and each, and both, possessing that firmness and independence of opinion and action, so necessary to constitute useful citizens. There is great need of re-organizing the City Government, for it is, as now constituted, a PETTY DESPOTISM.

CITY COMPTROLLER'S REPORT.

The mode of making up this Report is very bad. Take for example, the balance in the Treasury on the 31st of December, 1843, stated on page 67 at $144,654.72, and against this balance is unpaid outstanding checks to the amount of $228,586.76, the Treasury was therefore over-drawn on that day $83,932.04; the shortest way of stating it would have been to have said over-drawn, $83,932.04.

A merchant would not count a balance in bank, when his account was already overdrawn.

In addition to the over-draw, the Treasury had received of the Tax of 1844, in 1843, the large sum of $739,245.84 to aid them in their deficiencies of 1843, see page 21. They had also in Revenue Bonds, outstanding on 31st December, 1843, $260,000.00; all these make a sum of $1,083,177,88, in addition to the moneys of the Sinking Fund, used for ordinary expenses.

BILL OF RIGHTS.

"§1. No authority can, under any pretence whatsoever, be exercised over the citizens of this State, but such as is or shall be derived from and granted by the people of this State.

"§2. No tax, duty, aid or imposition whatsoever, except such as may be laid by law of the United States, can be taken or levied within this State, without the grant and assent of the people of this State, by their representatives in Senate and Assembly; and no citizen of this State can be by any means compelled to contribute to any gift, loan tax, or other like charge, not laid or imposed by a law of the United States, or by the Legislature of this State.

"§19. It is the right of the Citizens of this State to petition the Governor, or either House of the Legislature; and all commitments and prosecutions for such petitioning, is illegal."

Revised Statutes New-York, Vol. 1, *Ch.* 4, *pg*, 83, *new edition.*

MANUFACTURING SALT.

In a letter of my correspondent, Wm. P. Milnor, Esq., of Saltville, of March 15th, 1844, he remarks:

"Messrs. Findley, Mitchell and Co., are now altering and repairing their large steam furnace, which. when completed, will closely resemble the one lately erected at Onondaga, by Messrs. Ives, Spencer & Nolton, as described by them in Dr. Wrights' report."

This report of Dr. Wright, which my correspondent refers to, is that of the superintendent of the Onondaga Salines, to the Legislature, in January, 1844, which I forwarded to these gentlemen immediately on receipt of it. It is thus the public are benefitted by the improvements which the manufacturers make. Messrs. Ives, Spencer & Nolton, deserve thanks for communicating this information to the Superintendent, and Dr. Wright for communicating it to the Legislature.

UNITED STATES SALINE.

I have a letter from my correspondent, JOHN STICKNEY, Esq., of Shawneetown, Illinois, dated 2d March, 1844, which states that coal is abundant on the Saline Creek. The water produces a bushel of salt to 80 gallons. The salt wells now used is but 125 feet deep. About 100,000 bushels of salt is made here annually. The Government reserve is now reduced to forty acres, or one sixteenth of a section. The United States Government own these Salines, and rent them out to the salt makers.

VOLCANIC MOUNTAIN IN GEORGIA.

I have a letter from my correspondent Wm. P. Milnor, Esq., of Saltville, Washington County, Virginia dated, March 15th, 1844, which contains the following statement in relation to the volcanic mountain in Georgia.

"Immediately after the receipt of yours of the 15th January in which you make enquiry respecting a report of the existence of a volcanic mountain, in Rabun County, Georgia. I wrote to that place, and am indebted to Mr. James Bleckly, of Clayton, for the following: Mr. B. has never visited the mountain, his information is gathered from persons residing near and who have seen it. It is situated 15 or 20 miles from Clayton, in the midst of the GOLD region of that section of the country."

"Upon various occasions it has been observed 'to produce small lights similar to a burning heap of charcoal.' Upon one occasion, at night, the entire mountain for a short time appeared one burning mass, 'shining most brilliantly' and enabling those within view of it to distinguish most distinctly the trees, rocks, &c., upon its summit."

"On the morning after 'a low rumbling noise was heard' coming from the body of the mountain' resembling the noise which would be produced by loose boards drawn in the bed of a wagon.' At other times smoke has been seen issuing through the fissures in the rocks, and flames have been noticed in daylight, emitted to the height of 10 or 12 feet. Such is the amount of Mr. B.'s communication. I regret it is not in my power to render a more extensive description. Should I learn any thing further of interest connected with the subject, it shall be communicated to you."

My correspondent resides in the region of country through which this range of mountains pass. Washington County, Virginia, borders on the States of North Carolina, and Tennessee. It is the extreme South Western County of the State of Virginia. Saltville is between the Cumberland and Clinch mountains.

There are numerous burning, hot, and warm springs in the country in which this range of mountains are, and also vast subterranean storehouses of inflamable gas.

How wonderful is every thing around us, above us, below us. The bellowing of the Earth, the moaning and raging of the wind, the crash of thunder, the lightnings' fire, the earthquake's terrific heaving, are wonderfully grand and sublime.

A volcanic mountain in the United States, would be a wonderful phenomenon. I think little need be apprehended from the convulsions of that in Rabun County.

NEW YORK MUNICIPAL GAZETTE.

Published by the ANTI-ASSESSMENT COMMITTEE, and Distributed Gratuitously---Edited by E. Meriam.

VOL. I.] NEW-YORK, APRIL 4, 1844. [No. 21

ASSESSMENT AND TAXATION.

The Pittsfield Sun mentions a case recently decided in Berkshire, Mass., in which Hendrick Eastland sued and claimed damages of the Assessors of Egremont, *for neglecting to tax him.* The principles contained in the charge of Judge Williams are of importance :

"Judge Williams instructed the Jury that in the assessment of Taxes, Assessors were liable only for want of integrity and fidelity on their own part, according to chap. 7, sec. 44, of the Revised Statutes, that if they *knew* the plaintiff was an inhabitant of Egremont, they were responsible for not taxing him, or if they were ignorant of the fact, and did not use due diligence to acquire correct information in regard to the plaintiff's residence, they were also liable; that it was the duty of the Assessors to take reasonable pains to ascertain who were, and who were not, taxable in their respective towns; to tax those who were properly liable, and to omit those who were not, and their neglect or refusal in either of these respects, would be a violation of integrity and fidelity.

The jury returned a verdict for the plaintiff of $100 damages."—*Journal of Commerce, March* 30, 1844.

The above decision is in accordance with the views we expressed, *Ante. page* 111 and 115, and is applicable to the New-York City Assessors.

From the Journal of Commerce, April 22, 1843.

ASHES.

There has been from time to time a good deal of trouble, in consequence of the discrepancy between the inspection of Ashes here and at Boston. In Boston the same Inspector has been in office for a long series of years. He was put in, not because he knew how to call votes and inspect elections and make up a party, but because he was a man of practical science in the matters of the office, and in the wise policy of that State, he has been kept in office for the same reason during all the ups and downs of party. However respectable as citizens our own Inspectors may have been during the same period, they have generally been appointed on account of their skill in the science of politics, rather than that of chemistry. Under such circumstances, the Boston inspection, every one will say, is much more likely to be correct than our own, and we have heard of some cases in which ours has appeared in a way signally ridiculous, without any comparison with others. Ashes have been sent in a perfectly pure state to try the inspection, and have been marked down; in fact it seems to be understood, that if ashes are to secure the brand of first sort, they must not be perfectly pure. A discussion has lately sprung up between the New-York and Boston inspections, in consequence of a house in Boston having sent sixty-nine barrels of pearl ashes from that market to this, which were all branded firsts there, but here,

10	Firsts,
42	Seconds,
14	Thirds,
3	Condemned.

The reduction in the market value by this reduction of the grade, was about five hundred dollars, or one third of the whole value of the shipment. The matter was referred back to the Boston Inspector, and we find his Letter, addressed to the merchants here, hoping that the matter may be discussed until the evil is corrected, wherever it may be.

INSPECTION OFFICE OF POT AND PEARL ASHES,
Boston, April 17, 1843.

"I have examined the parcels of Pearl Ash sent me, and which you state were taken from lots branded by me 1st sort. I am perfectly willing to endorse my opinion heretofore given upon the same lots, and upon a careful revision of my decision, after examining the samples by solution, &c., I find them free from impurities, or sufficiently so to pass them 1st sort. The only substance which is ever mixed with Pearl Ash, which adulterates it and of course diminishes its value, is what is commonly called by the workmen neutral salts or Sulphat of Potass; this is easily detected, because the pure Alkali is readily soluble in cold water, while the Sulphat of Potass is precipitated; in this way I judge of the relative value of the different casks, and not by sight. Now these samples do not contain this substance but in a minute proportion, and are what I have always called, and should to day, in similar cases, pronounce 1st sort. In regard to that which is branded "condemned," I acknowledge it does not look so white as the others; this however, is owing to its purity and strength, not pearling easily, but being disposed to melt like Potash, and is occasioned by its being made from recently burned ashes, which have not imbibed the carbonic acid from the atmosphere. Pearl Ash like this is constantly used by the glass manufacturers in this vicinity, and is considered by them more valuable, because it is stronger and contains no impurity.

I will state, in confirmation of my opinion, that hundreds of casks of Pearl Ash, from the same sources, particularly that from O. A. Bryant, who is a large maker, and whose Ash your Inspector calls 3d sort, have been used for several years back in this vicinity, and no complaints have been made. The two Glass Manufactories use about eight hundred casks per year, all of my inspection, and their mode of using it requires them to subject it to a strict analysis, by boiling it all over again and separating the impurities from the pure alkali. Surely if I was in the habit of making such *wholesale* mistakes as this, detection and exposure would sometime follow, but it is never the case. The manufacturers of Saleratus also, in this vicinity, have been satisfied with the quality of this same Pearl Ash, from the same manufacturers, so much so as to buy it without inspection.

As no complaints are made of my inspection, which has stood the test of *twenty years*, I would candidly submit to you to decide, whose opinion, under these circumstances, you would be inclined to adopt, mine, after an experience of twenty years, tested and approved by all who use the article in this vicinity, or that of the New-York Inspector, of recent appointment, and of course of very limited experience. I think he must have taken but a bird's eye view of the Pearl Ash, without attempting to ascertain its intrinsic value.

All the Pearl Ash of which you have sent me parcels, will sell readily as 1st sort, is returned to this market.

All the Ash received at this office, passes under my personal Inspection, not having any one in my employ in whose opinion I can entirely trust.

I think, upon a review of the case, you will be satisfied that the mistake lies at the door of your Inspector, and not at that of your humble servant,

S. D. TOWNSEND,
Inspector of Pot and Pearl Ash,
for the State of Massachusetts."

From the Journal of Commerce, April 26, 1843.

OFFICE FOR THE INSPECTION OF POT AND PEARL ASHES.

NEW-YORK, April 22d, 1843.

Gentlemen,—In answer to an Editorial article in your Journal of Saturday last, as well as the "letter" appended of Mr. S. D. Townsend, inspector of pot and pearl ashes, Boston, in relation to the inspection of sixty-nine barrels of pearl ashes in my office, which had been previously inspected in Boston, I would remark as follows:

You say that the letter appended was addressed to the merchants of this city. You should have said to Messrs. —— & Co., New-York—and instead of sixty-nine barrels of first sort pearls, you should have said forty-nine barrels first sort, and twenty barrels of second sorts. From the manner you have been pleased to express yourself in relation to the Boston inspector's letter, it

would appear that it was intended as a circular to the New-York merchants, when in fact it was published unauthorized by the author. The ashes after inspection, were shown to Mr. ——— and his agent, and compared with the New-York inspection, and by them pronounced a very inferior lot of ashes.—They were also shown to a gentleman from Boston, largely engaged in the manufacture of saleratus, who expressed great surprise that such ashes should have been inspected First sort in Boston, and took with him a sample on his return.

You also say that there was a depreciation of five hundred dollars by the New-York inspection. I presume that this is correct, and the loss must have fallen on the purchasers in this city; a fact that in the sequel you will discover is one of the strongest arguments in favor of the existing inspection laws.

The other parts of your Editorial, I consider of such a character as to require no comment from *myself.* Those who are acquainted with the previous character, (under the late inspector) that ashes of New-York maintained, are best able to judge of the justice of your remark respecting it.

In reference to the communication of the Boston inspector, and of the rules laid down by him, as his guide in the inspection of pearl ashes generally, I beg leave to offer some remarks, and make known the principles, in determining the grade of pearl ashes submitted to my inspection.

The Pearl Ashes above alluded to were faulty in consequence of not being perfected in the "the pearling process," as well as from objectionable color, to such an extent as to render it inadmissible to classify them otherwise than as they were by me, and which I feel fully authorised in saying is in strict conformity with the standard of inspection in this City, and which has prevailed for many years; the accuracy of which, I believe stands undoubted by the manufacturers and consumers, (parties who may fairly be claimed as having a tolerable knowledge of the article.)

The Boston Inspector seems to be governed altogether by alkaline strength, in determining his judgment of the grade of Pearl Ash. In this point I think he commits an error, and the operation of which is likely to produce results unfavorable to the consumer as well as the manufacturer; as the former cannot have a perfect article made in view of such a standard of inspection; and the manufacture, if led astray by such a belief, must eventually suffer loss.

I am well aware that there are considerable quantities of alkaline substance sent to market under the title of Pearl Ash, a crude, imperfect article, though free from impurities, and possessing great strength of alkali, and for some purposes, as in the manufacture of glass, and whenever a strong alkaline agent, merely, is required, may answer as well as the thoroughly perfected Pearl Ashes. But will any one urge these instances as an argument that such will answer equally as well all the purposes for which genuine Pearl Ashes is required? I think not—for with as much show of reason it might be said of the vegetable or "black salts," from which Pearl Ash is produced, and which are some times used in the manufacture of glass, that they were equal to the best Pearl Ash, because in the manufacture of that article, they answer the desired end. The substance has great alkaline strength, equal if not greater than Pearl Ash; and if that principle is to be the test, why is not that article entitled to be classed on the same footing as to value as the best Pearl Ash.—The answer is obvious; it has not been wrought upon by the process necessary to place it in the alkaline position known as Pearl Ash, and until this is accomplished to a good degree of perfection, the article is more or less faulty, and must so be estimated. A large and very superior manufacturer of Pearl Ash residing in this State, states that he has frequently been compelled to reduce his pearl ashes to a solution, after they had been *baked*, in consequence of their strength being too great to admit of their pearling; thus showing very conclusively what his views are upon the properties that go to make first sort Pearl Ash.

I am therefore led to the conclusion that alkaline strength alone must not be the guide in determining the quality of Pearl Ash; and that would seem to be an established point; as in this city the question of chemical analysis for the purpose of determining the alkaline strength of Pearl Ash, has never been mooted. In confirmation of this opinion, I will state that at the time the subject of the manufacture of Pot and Pearl Ash was before the Legislature of this State for the purpose of ascertaining the mode of production, as also to obtain information relative to the substances with which Pot Ashes are sometimes adulterated, as well as all other matters connected with this important branch of our exports, application was made to Professer Beck for his views; and the result of his eminent chemical *experience* in the matter, was communicated by that gentleman, in a very able and full report, submitting the results of a number of analysis of various specimens of Pot Ash made on different plans, together with much valuable information connected with the subject; but no mention was made of the analysis of Pearl Ash, shewing that the alkaline properties of Pot Ash were not alone necessary to determine their proper and just grade.

What then is the correct rule of conduct for the Inspector? It is my opinion, in the first place, to establish a true standard of what the best Pearl Ash is,—and will be if the material is right, and the process rightly performed,—and then be governed in his decision of the grade of the different parcels submitted, as they may fall short by reason of the *presence* of objectionable matter, or fault in manufacture; always making a due allowance for an unavoidable peculiar appearance characteristic of some Pearl Ash made of certain kinds of crude ashes. These views I hold to be sound, and based upon *true principles;* and they will be sustained, if necessary, by the testimony of practical and skillful manufacturers; and also verified in the experience of consumers in its diversified uses, with perhaps some few exceptions.

At any rate, such has been the governing rule in the inspection of some hundred thousands casks, occurring in a series of years, and if it is founded in error, it is passing strange that it should have remained till this late day without discovery, and that too in the face and eyes of practical and scientific men, both of our own country and Europe.

In my opinion Ashes should be classified by their *merits*, without reference to the use they are to be applied to.

Mr. Townsend seems to attach considerable weight to the declaration that Pearl Ash of his inspection gives good satisfaction to the makers of Saleratus in Boston, and that they purchase the same style of Ashes without inspection, having full confidence in their goodness for this purpose. We have no means of determining the quality of Boston Saleratus, but we are assured that the purchasers in this market make their selections with greater caution.

In regard to the manufacturers of Saleratus in our city, I am informed that they find it necessary to use the primest of first sort Pearls in order to obtain a merchantable article, and that their experience in the use of Boston first sort of Pearls (by late experiments) has not been productive of satisfactory results; and they are obliged to mix New-York "First Sorts" with them in consequence of the inferior grade of the former, and *that*, after rejecting a considerable portion from each cask of the most objectionable quality.

Mr. Townsend speaks of my inexperience as an inspector, and concludes from his being "twenty years" in office, that he must from this circumstance be the most competent judge. It is true that changes are frequently taking place in our State Appointments, but notwithstanding these changes, Deputies are always retained of practical experience. The person under whose suprvision the Ashes were inspected, has been for several years an inspector in the office, during which time he has taken part in inspecting two hundred thousand barrels. I think Mr. Townsend will admit that this far exceeds the number of barrels of Pearl Ashes that has passed through his office during his entire term—so much for experience.

With these remarks I submit this case to the impartial decision of a discerning public.

Yours, Respectfully,

T. J. STEVENS,

Inspector of Pot and Pearl Ashes.

(Copy.)

—

REMARKS.

We have here given two letters, one written by an experienced Inspector of Pot and Pearl Ashes, in Boston, the other written by a newly appointed and inexperienced In-

spector of Pot and Pearl Ashes, in the City of New-York; and also the prefatory remarks of the highly respected Editors of the Journal of Commerce.

Dr. Townsend was many years Inspector of Pot and Pearl Ashes, in Boston, and I considered him the best judge of the quality of Ashes in the United States. He wrote a Treatise upon the manufacture of Pot and Pearl Ashes, many years ago, which was highly prized by the manufacturers. The present Inspector of Ashes in Boston, we presume, is a son of Dr. Townsend. He is at any rate, his successor, and the two individuals have the experience of near half a century.

We have had very extensive experience in the manufacture of Black Salts, Pot Ash and Pearl Ash. We have also used very large quantities of all three of these alkalies, in the manufacture of Salt Petre, Glass and Soap. We therefore, claim to have some practical knowledge, which is far better than theory.

Black Salt is the crude alkali resulting from the evaporation of the leys, derived from lixivation of wood ashes, and is of very various qualities.

Pot Ash is made by melting in iron kettles, heated to a red heat, the Black Salt.

Pearl Ash is made by calcining the Black Salt in a reverbatory furnace, or iron pans.

Pot Ash is a very caustic alkali. Pearl Ash is a mild alkali, being partially saturated with carbonic acid.

In the manufacture of black bottle-glass, black salts is the best alkali which can be used, and I should prefer them to Pot Ash, for common soap. In the manufacture of white glass, Pearl Ash is preferred, and that which has been glazed is equally as good as that which is porous and white. I should, however, prefer for white glass, Pot Ash which had been dissolved and re-melted, and it will be found far more valuable.

In melting black salts into Pot Ash, the earthy matter held by the leys of the crude ashes in suspension, are retained in the first melt of the pot ash, unless these are of a combustible nature, in which case it will take fire in the melting and burn out, which combustion leaves a soot in the Pot Ash, and such Pot Ash, when moistened, shows a black surface.

What are called field ashes, are mostly used for making Pearl Ash. This kind of ashes is not so pure as house ashes, and are not often made into Pot Ash on account of the difficulty of melting the salts. The pure crude ashes made salts that are easily fused, but the field ashes become mixed with the earth the wood is burnt upon, and are therefore, impure. I have, for the manufacture of Pearl Ash, employed large gangs of hands to fell trees and burn the timber for the purpose of obtaining the ashes, and I have purchased large quantities of house ashes and made these into both Pot and Pearl Ash. I have also purchased the black salts for the same purposes, and will treat of this more at large in subsequent remarks, under another head.

Ashes in the New-York Inspection Office, are not inspected and put up as is contemplated by the law, extracts of which are as follows:

"DUTY OF INSPECTOR.

"§ 66. [Sec. 64.] It shall be the duty of every Inspector of Pot and Pearl Ashes,

1. To empty the cask containing ashes brought to him for inspection, and to examine and determine the quality of the ashes, and re-pack the same, "putting the ashes of each quality in a separate cask:

2. To brand, in plain letters and figures, on each cask containing ashes of the first quality, the words "First Sort:" of the second quality, the words "Second Sort:" and of the third quality, the words "Third Sort:" together with the words "Pot Ash" or "Pearl Ash," as the same may be; also his own name, and that of the place where the ashes are inspected; and on one head, the year when such inspection is made:

3. To weigh each cask, and to mark with a marking iron, on the branded head, the weight thereof, including tare, and the weight of the tare under the same:

4. To collect the crustings or scrapings of the barrels and casks of pot ash, unfit for inspection, having the same brand, and to weigh and put the same in some suitable cask; and to deliver to the owner or his agent, a weigh-note signed by him of such scrapings and crustings, entered on the back of the copy of the inspection bill, designating therein, the quantity taken from each lot, separately marked:

5. To brand the word "condemned" on every cask which he shall discover to contain ashes fraudulently adulterated with stone, sand, lime, or other improper substance:

6. To make and deliver to the owner or his agent, an invoice or weigh-note, under his hand, of the ashes by him inspected, containing the weight of each cask and of the tare, and distinguishing the quality thereof, in the manner before directed, and to enter the same in a book, to be kept by him for that purpose:

7. To make and enter in his book another invoice or weigh-note, in which shall be contained the original private marks and numbers, and the scrapings and crustings in each lot, and the quality, weight and tare of each barrel, and specifying, as particularly as possible, the extent and damage appearing on such inspection, *and the apparent cause thereof, whether by exposure or injury in the course of transportation, or in consequence of the original putting up of such ashes;* and to deliver, if required, a true copy of such weigh-note, to the owner of the ashes inspected, or his agent."—*1st vol. R. S., page* 540.

The law, it will be seen, contemplates a separation of the different qualities of ashes, and these are to be found in the same piece. A *batch* of Pot Ash, which is what the workmen term one, melting, may have three sorts of ashes in one lump. When the fused salts are dipped off into iron coolers, the Pot Ash is of the color of melted iron, and of about the same consistency, the quantity is generally from four to five hundred weight. If this is dipped into a single cooler, the most impure of the parcel will settle at the bottom; this sediment, as contrasted with the other stratas, is *second* or *third* sort ashes. If ashes are adulterated, the law expressly requires that they shall be branded as condemned. If ashes become damaged after being put up, the manufacturer is required to note the fact.

The law is very vague in respect to the classification of the quality of ashes. We will take for illustration, six barrels of Pot Ash, numbered from one to six: No. 1 yields 90 per cent. of free alkali; No. 2, 80; No. 3, 70; No. 4, 60; No. 5, 50; and No. 6, 40 per cent. How are each of these six parcels to be branded? If that which yields 90 per cent. is to be denominated 1st sort, that at 70, 2d sort, and that at 40, 3d sort, how shall that at 50, 60, and 80, be branded? To the home manufacturer, the Pot Ash which yields 40 per cent. free alkali, is worth four ninths the price of that which yields 90, or nearly so for some purposes, but to the exporter it is worth little or nothing, or rather to the consumer in a foreign inland country, to whom it comes taxed with all the freight, duty, cartage, &c., of that of the best quality. The English and French manufacturers send to this country a large quantity of Soda Ash. This is an alkali made from common salt. It yields from 35 to 92 per cent. free alkali, and is sold at the relative proportion of its alkaline yield by p.c., and so should Pot Ash be rated.

The quality of Pot Ash can only be determined by an experienced manufacturer of the article, or by chemical analysis. Dissolving Pot Ash and allowing the solution to stand until a precipitate is formed, will only show the insoluble earths held in suspension, and not the impurities held in solution.

I had in my employ for several years, a man by the name of Sanford, who prided that the ashes which he made, had always been branded 1st sort, and I valued his skill greatly on that account. He was a careful workman, and kept his platforms, receivers and kettles clean, and placed the crude ashes in the Hoppers so that his leaches never run foul. When his salts were in a proper state for melting, he managed his fire so well, that he never missed a good melt. Other workmen would pride themselves of the great quantity of Pot Ash they could make out of a given quantity of ashes, but their Pot Ash was the more impure.

It is never for the interest of a manufacturer to make poor Pot Ash; if the Pot Ash is not of the first quality, dissolve it, boil down and re-melt it. If the quality of the crude ashes is bad, use a greater quantity of lime in the leaches. Alkaline salts which have a jet black color, are better for calcination than for melting. Salts which make the best Pot Ash, have a bright appearance.

Mr. Stevens, in his letter to the Editors of the Journal of Commerce, which we have

quoted, says: "a manufacturer dissolved his Pot Ash because it was too strong," such a remedy is labor lost. The ashes would not become less caustic by being dissolved. If his Pearl Ash was dirty, dissolving and settling the solution, would allow the dirt to settle, but would not decrease the strength. If perchance the salts become melted in the furnace before they become calcined, then he had a Pot Ash instead of a Pearl Ash, and probably worth double for any and every purpose that the porous Pearl Ash is.

It is not the carbonic acid, combined with the alkali, which constitutes its greater value; it is the alkali divested of its coloring matter. For saleratus, the melted or glazed Pearl Ashes should be broken in pieces with a hammer, in order that the whole surface may be presented to the action of the carbonic acid gas.

I have seen great injury done to ashes by the Inspectors in the City of New-York, arising from the exposure of the casks to the rain and wet, and from inspecting Pot Ash in damp weather.

The law is very defective as to the barrels and manner of hooping the casks, &c. The following is the provision of the Statutes:

"§ 65. [Sec. 63.] All Pot and Pearl Ashes subject to such inspection, shall be put in casks of good seasoned white oak or white ash timber, well made, hooped with substantial hoops, for the distance of, at least, ten inches from each end; the staves not to be more than thirty-one, nor less than thirty inches in length, and the head of a Pot Ash barrel shall not exceed twenty inches, nor be less than nineteen inches, in diameter; and that of a Pearl Ash barrel shall not exceed twenty-three inches, nor be less than twenty-one inches, in diameter. No Inspector shall brand casks not agreeing with the description given in this section."–*R. S. v.* 1, *p.* 540.

POT ASH AND PEARL ASH.

The quality of Pot Ash depends much upon the quality of the crude ashes from which it is made, and upon the mode of manufacture.

I have found the ashes of Elm and Hickory wood, make the best Pot Ash, and when properly treated with quick lime, the alkaline salts fuse or melt with great ease.

From 400 to 500 bushels of good house ashes, will make a ton of Pot Ash.

I propose in this essay, to treat the subject in such a way as to make it intelligible to those unacquainted with the manufacture of Pot and Pearl Ashes, and useful to those who are, or may be, engaged in the manufacture of this alkaline salt.

In the manufacture of both Pot and Pearl Ash, I have had many years experience on a large scale, and in the use of Pot and Pearl Ashes, I have a like experience. In looking over the Inspection bills of the Ashes which I have purchased in the New-York market, and used in the manufacture of Soap, I find they number 1100 barrels. My practice has been in preparing the leys for use, to dissolve the Pot Ashes in iron cauldrons, about half full of boiling water. When the Pot Ash is thrown into the water, which should be on the boil at the time, the commotion is greatly increased, and unless care is taken the leys will boil over and thus waste the alkali. The Pot Ash should be constantly kept stirred with a strong iron spade, and the cauldron kept on the boil until all is dissolved. When this is finished the leys should be immediately ladled off into an iron cooler, and if it is desired to make the leys more caustic, a quantity of quick lime should be slaked and mixed with the leys by thoroughly stirring up the mixture with an iron spud. When this is completed, pour a bucket of cold water carefully over the surface, so as to condense the steam which is escaping, and a precipitate will soon commence forming at the bottom. In a short time the clarified leys will be fit to be ladled off for use. This mode of dissolving Pot Ash, detects any earthy matter held in suspension in the leys, and I have, in numerous instances, found this to be very considerable. The impurities which are held in solution are not detected by this process, but the experienced manufacturer will discover these by the taste or smell of the leys to a certain extent, and by the charge of his pan, if he works it by rule, with great accuracy. I will now make a remark that may be useful to the inexperienced in dissolving Pot Ash, it is this: In a cauldron of water not heated to the boiling point, place a barrel of Pot Ash, and it will require four times the fuel and four times the labor to dissolve it, that it does when placed in water in a state of rapid ebulition. In the breaking of large cakes of Pot Ash into smaller pieces, a gentle rapp of a hammer is ten times more effectual than the heaviest blow from an axe. The Hydrometer is the instrument used for testing the strength of alkaline solutions. This instrument only determines the specific gravity, and if an alkaline solution should be found by that instrument to denote 50 deg., the addition of a quantity of molasses, would show an increase of specific gravity but not of strength or causticy.

I have, in the use of Pot Ash, found that which was sometimes branded 3d sort, better than that which was sometimes branded 1st sort. I have in some instances, paid $10 per ton extra for Pot Ash, above the market price of that article, for the privilege of opening the ashes and making a personal examination of the qaulity, and have uniformly found that I was a gainer by this course. In one instance I purchased a lot of Pot Ash without seeing them, and on opening the ashes to dissolve them, I found although they were branded 1st sort, that they were poor 3d sorts, and at once returned the lot to the Inspector, whose name was branded upon the casks.

In the manufacture of Pot Ash I was always careful to keep the crude ashes in a building that was dry, and which had a plank instead of a ground floor, for the ashes to lie upon.

When the ashes were to be placed in the Hoppers for lixivation, I made a bed of them, like a mason does with sand and lime for mortar, opened the top and placed there as much of the unslaked lime as I judged necessary to make the leys sufficiently caustic to make the salts fuse easy. This lime I saturated with water and then covered it up with ashes. After remaining in this state until the lime was completely slacked, I took a shovel and mixed the ashes and lime well together, this done, I prepared the Hopper by leaving in it above the loose second bottom, a layer of about ten inches of leached ashes. The fresh ashes and lime mixed, were then thrown into the Hopper and stamped down a little, this being completed, the water was let on moderately, until the new ashes and lime were well saturated; after this, I allowed the whole to stand one day. The next thing to be done was to clean out the Receiver and wash off the platform, and throw the wash upon the top of the ashes in the leach, and then let on the water gradually until the leach gave out the leys. If the first running should not be clear, put the leys back upon the leach until the leys run clear. Leys thus treated are more easily evaporated, and the salts which result from the process, will be found to melt easy. In furnaces for making Pot Ash, three kettles of 90 to 100 gallons capacity each, are set in a range, and one fire heats the three kettles. When the salts are reduced to a consistency of mush, the fires should be increased until the kettles become red hot; the salts soon become of the same color, and when thoroughly melted look like melted iron. In this state it is dipped off into iron coolers, which should be made perfectly dry beforehand. In about twelve hours the whole mass becomes hard as a rock. The wood for melting fires should be very dry and split small. In the cooling, the most impure part of the mass falls to the bottom, hence the bottom of the mass will often be of one quality and the top of another, and should be packed in different casks as being of different sorts, or that which is inferior should be de dissolved and run through the leach again, as it is a losing business for the manufacturer to send inferior ashes to market, as the expense of freight and transportation are the same of the bad as of the good, and frequently amounts to so much, as that when the ashes reach the hands of the consumer, that the cost of the two qualities will be nearly equal; as for example, a barrel of 1st sort Pot Ash, put up at Buffalo, weighing five hundred weight, and worth $20, or $4 per hundred weight, and a barrel of 3d sort, put up at same place, of same weight, and worth at the usual difference in price, $13.75, or $2.75 per cwt. When these two casks reach the manufacturer in the interior of England, the difference in cost, as compared with their relative worth, will be found nearly equal. The freight duties, transportation, &c., being the same of the one as the other.

In the packing of Pot Ash, it is important that the barrels should be made of dry timber and strong enough to bear the great weight of the ashes. The barrels should

have sixteen large and strong hoops. If the stave is twenty-nine inches, which is the New-York size, there should be three spaces left instead of one, a space between each four hoops instead of between each eight hoops, that is, the cask should be hooped in the same way as a whiskey barrel, four hoops in each division. Barrels hooped in this way, when piled up in tiers, will not open at the bilge joints like barrels which have eight hoops at each end and all the space in the middle, for in such cases the whole bilge is unprotected, while in the other case only four or five inches of the bilge is left uncovered by the hoops. The barrels after being packed, should be kept dry, or otherwise the ashes will attract the moisture from the outside, dissolve, stain the cask, and become crusted, which materially depreciates the price in all foreign markets as well as our own. It is a very common practice for the Inspectors to leave barrels of ashes out of doors exposed to the weather. This is a violation of law. The ashes are greatly injured by this exposure, and more than ten times the cost of storage upon an average.

Pearl Ash is a carbonate of Pot Ash. There are two processes of calcining the alkaline salts. One which is the most common, is to perform the process in a reverbatory furnace; the other is by heating the salts to a red heat in iron cauldrons or kettles, at the same time keeping the salts constantly in motion with an iron spade, to prevent them caking on the iron and also to expose the salts to the heat and the air at the same time. The ashes calcined in a reverbatory furnace, are generally tinged with a bluish caste, and those calcined in iron kettles are tinged with a slight yellow caste. In calcining ashes, in both processes care should be taken to so moderate the heat in the commencement of the process as to prevent their becoming fused. This is done by keeping the salt constantly stirred, and keeping the fire moderate until the salts are well dried. I have made Pearl Ash by both processes. I constructed a reverbatory furnace of large size, having an arch of fourteen feet in width, with a rise of but fourteen inches in the centre. The hearth was made of fire brick, fourteen inches square and eight inches thick, and the partition between the furnace and the hearth floor, was raised three inches, and was eight inches wide of the same kind of brick; the arch was made of fire brick, moulded so as to make the arch without the use of mortar for the bevel. When the arch frame was taken out, although of great width, the crown only settled one inch. The first arch I constructed I used mortar, and when the centre was burnt out, the whole arch settled down upon the hearth. A reverbatory furnace constructed in this way, possesses the advantage of confining the flame of the fire to the surface of the salts. The grate for the wood was fourteen inches below the hearth of the oven. The furnace extended the entire length of the oven on one side, on the opposite side were flues every six inches, which met in a chimney in the centre. In this way, with dry ash wood, split fine, a sheet of flame could be spread at the same time, over the whole surface of the hearth, and the calcination was therefore a speedy operation when managed by an experienced workman. In the manufacture of Pearl Ash in iron kettles, there is one advantage which deserves particular notice. It is this, the fixtures cost but a trifle. Take for example a thirty gallon iron kettle, set it in a furnace of stone or brick, and in this put the common leys, such as are used by families for making soft soap, may be evaporated and calcined. In evaporating or boiling down the leys, care should be taken to keep the salts well stirred when they become thick as molasses, the stirring must be kept up until they are thoroughly dry, when this is attained the heat may be gradually increased until the salts become of a light greenish hue, and finally they will, by a continuance of the heat and constant stirring, become white. If it is desirous to make the Pearl ashes very good, dissolve the calcined salts in clear water, allow the solution to settle and then carefully take it off into the kettle and boil down as before, and stir off as in the first process, and a beautiful white Pearl Ash will be the result. I use no lime in the ashes for making Pearl Ash. Care should be taken when the salts become quite thick, not to have the fire so hot as to melt or fuse them, otherwise these may run down into Pot Ash.

Ashes are an abundant production, and every family can save several dollars worth every year. E. MERIAM.

From the Journal of Commerce, April 28, 1843.

NEW YORK INSPECTION LAWS.

"The operation of the New-York Inspection Laws, may be judged of by a case which I will state.

In 1818, a large lot of Pot and Pearl Ashes were shipped from New-Orleans to New-York, to be put on board a vessel for Boston, which was to come alongside and receive the ashes on board, to avoid the expense of cartage; but the house (Mr. Joseph Osborn,) to whom the ashes were forwarded for transhipment to Boston, found that the law of this State prohibited the export, unless the ashes should be first sent to the Inspection office and inspected. The Ashes were, therefore, landed, sent to the Inspectors' office, &c. These Ashes had all been manufactured by one house, and put up with great care, in the best of casks, made of kiln-dried staves. The Pearl Ashes were packed in casks so large, as that five would contain one ton. This was a size larger than the New-York law required, and the casks were consequently all condemned, and new casks of the legal size furnished, at an expense of seven dollars and fifty cents per ton for casks alone. Added to this, was cartage, inspection fees, fire risk, waste, delay, &c., &c. Besides this, much of the Pearl Ash was branded 2d and 3d sorts. The Pot Ash was in smaller casks, and no objection was made to the size, but the barrels were hooped so as to leave three spaces, instead of one, (which kept the air from crusting the ashes by confining the staves.) These hoops were many of them knocked off, and new hoops substituted at a considerable cost. After this expensive ceremony was through with, the Ashes were allowed to continue on the voyage to Boston. Shortly after they had left here, one of the manufacturers of the ashes, arrived in this city, and being furnished with the Inspector's bills, called upon that officer to enquire how it was that he had put a bad brand upon part of the ashes; and was told by him that his foreman had stated that many barrels of the Pearl Ashes were discolored, by having small pieces of red brick mixed through the Ashes, which had been broken off the pearling oven in the process of manufacturing. The manufacturer replied, that such could not be the case, for the reason that the ashes had been calcined in a reverbatory furnace, made of white crucible clay, besides which, the Ashes were all of a most superior quality, having been made in a very large establishment, where both Pots and Pearls were made, which afforded the opportunity of selecting such sorts only for Pearl Ash as would calcine without fusion, and were made in a furnace having but a fourteen inch arch, in a span of fourteen feet, so that the flame of the fire was confined to the floor of the furnace, so as to make the process of calcination perfect.

On the arrival of the ashes in Boston, the entire parcel was sent to the office of Dr. David Townsend, one of the best judges of the quality of Ashes, in the United States, and who had some years previously, published a work on the manufacture of Ashes, which was much esteemed by manufacturers.

Dr. Townsend opened this lot of Ashes, and sent for several of the dealers in Ashes, to come and examine the quality, which he pronounced, without exception, the best Ashes he had ever seen. Dr. Townsend advised the owners of the Ashes to advertise them for sale at public Auction, and to give notice in the newspapers that they would be sold in lots to suit purchasers. They were so advertised, and were all sold for home use, at from five to fifteen dollars per ton above the market price of export Ashes. Some of these Ashes came back to New-York, Philadelphia and Baltimore. The manufacturer took duplicate bills from the Inspector at Boston, with which, and the account of sales of the Ashes, he waited on the New-York Inspector, who, with great promptitude, discharged the foreman who had deceived him in the quality of the Ashes. The initials below are those of the brand of those Ashes, which a reference to the New-York and Boston Inspection Books will fully explain and show.

M. M. C."

From the Journal of Commerce, June 10, 1843.

POT AND PEARL ASHES.

There are at present in this market, about ten thousand barrels of Ashes, esti-

manufacturer, commission merchant, and shipper, and particularly to

Your friend,
CYCLOPS."

From the Journal of Commerce, July 21, 1843.

MESSRS. EDITORS :—Several weeks since you were furnished with the information that there was a very considerable difference in the prices of Ashes at Liverpool, whether from the Canadas or the United States, and that the difference was then three shillings sterling per cwt. By the steamer Great Western, a few days thereafter, this information was verified by actual quotations, Montreal Ashes being quoted at twenty-nine shillings, and New-York Ashes at from twenty-six to twenty-nine shillings. By this quotation it then appeared that some New-York Ashes brought as high price as Montreal, while some was depreciated by the before named difference of three shillings. By your quotations of yesterday, per steamer Caledonia, of date the 4th instant, Montreal Ashes maintain their price, while those from New-York have declined to twenty-four shillings, making the great difference of five shillings, or one cent and one quarter of a cent per pound. While Colonial Ashes are free of import duty, the States pay duty of nearly one half cent per pound. Thus the exporter of Ashes from this country, has to face a difference against him of nearly one cent and three quarters per pound.

The cause of this difference, in the first instance, is from the deterioration of Ashes in its manufacture ; and now that you have proof to back assertion, you may state the fact and the cause. As in the manufacture of salt, manufacturers have used lime to an extent injurious to themselves and others, so the manufacturers of Ashes have used large quantities of salt in the production of Ashes, to the injury of the exporting merchant and consumer. By adding a considerable quantity of salt, the quantity and weight is increased, while the appearance of the Ashes is not altered. The deception escapes the inspection of the merchant, and of the legally appointed Inspector, while a chemical analysis discovers the adulteration. There is now a larger quantity in the hands of the Inspector, than ever before at any one time, and now is the time for investigation and close inspection, while the deception may be traced to where it belongs. The Ashes now in hand are held on account of the manufacturers, by commission merchants, who have to render accounts, which must reach back to the very makers of the article. By the Inspector's returns, the settlements with the manufacturers must be made, and let the penalty fall where the guilt lies ; or, as there is no penalty, let the misdemeanor be properly attacked. There are probably 15,000 casks on hand to be inspected, all of which exported, will be subject to this condemnation. The difference of one cent per pound, would produce the sum of about $75,000. Perhaps but few of the makers are guilty, and nearly all of this large amount can be saved. At all events, let the guilty suffer, and let the innocent escape.

IMPORTER.

REMARKS ON THE ABOVE.

I have on my files, a Circular of Messrs. Cropper, Benson & Co., of Liverpool, England, dated 11th month, 16th, 1816, which states the price of New-York Pot Ash at £57 to £58, and Boston Pot Ash at £60 per ton at Liverpool.

I have had Pot Ashes inspected in the Montreal, Boston, and New-York Inspection Offices, and Pearl Ashes inspected in the New-York and Boston Inspection Offices, and the same quality of Ashes going from each of these different ports, to the foreign markets, would be varied in the estimated value of the purchaser by no other guide than the reputation of the Inspector's brand. This is all wrong. No Inspector's brand should be allowed to depreciate the price of an article.

E. MERIAM.

CIRCULAR.

" INSPECTOR'S OFFICE,
New-York, March 19, 1828.

" That there has existed for a number of years past, in the Inspection Offices here, the practice of cancelling old bills, and issuing new ones, (without *re-inspection*,) and altering the brands, so as to give to old and crusted, and frequently damaged Ashes, (almost in a muriatic state,) the ostensible character of freshly inspected Ashes, will not be denied by any clerk, &c., in or out of office.

" The detection of frauds in the New-York Ashes, per the Alfred at Antwerp, about the 29th of May last, and the further discovery at Havre, on the 12th of June last, (putting the others which might be named out of the question,) conclusively show the truth of my assertion, as " Aen Yrel," the sworn broker, in his protest avers, that the brands on 150 casks of Ashes, per the Helen Mar, had been falsified, 1826 being effaced by 1827. That 134 of the casks were inferior Ashes, instead of superior, and that he had allowed damages to the buyer on that principle.

" Had the names of the Inspectors implicated in these fraudulent transactions, been given to the public, an effectual stop would probably have been put to such practices for the future, but it was not done, consequently they have been continued in certain offices down to the 1st instant. Such deceptive inspection is injurious to the interest of the shipper and the consumer, (at home and in Europe, to the Inspector, (who does his duty,) and will eventually be so to the manufacturer, &c., as a diminution in the credit of our brands, will necessarily affect the price abroad and at home.

" The alteration in the brands and bills generally, have taken place (covertly) almost immediately preceding the shipment, so that detection of the frauds can only take place at the point of destination. I would there-

fore respectfully suggest, that Ashes branded (we omit names, Ed.,) 1827 1828, should be emptied out and examined, and if they are found much crusted and damaged, to a moral certainty they have not been inspected, or re-inspected at the time the "Weigh Note" is dated. Let a Notarial Act be framed, stating the per centum of unmerchantable Ashes of each inspection, which will show which Inspector has done his duty, and let the correspondent in this city, be directed to give it publicity, (in the public prints,) and a preference in future purchases, &c., to the person whose Ashes show he has acted faithfully and honestly as an umpire between the seller and purchaser, which in fact is his real capacity in the eye of the law.

"A few exposures of this kind, in the public prints, would do more to correct illegal practices here, than all the provisions in the Statutes; because it would make it the interest of an Inspector to act honestly, (if principle and law cannot induce him uniformly to do so,) but emphatically, if the Inspector was compelled to make good the damages sustained.

"Having notoriously been one of the largest purchasers and shippers of Ashes, I had reason to remember the heavy deductions made for crusted Ashes on the account sales in Europe on my account. At that time the inspection laws did not require the year of inspection to be branded on the casks. I had to depend solely on the date of the "Weigh Bill," on which (both then and now) I find no dependance should be placed.

"From the 7th of January, 1825, to the 1st of March, 1828, I have, as an Inspector, known that the shipper has been systematically imposed on by the alteration of brands and bills, and have remonstrated verbally and in writing, on its illegality (to say the least) in vain. But being notoriously poor, as a matter of course, my remonstrances have not been attended to.

"My motto is, that whoever pays for a fresh article, (immaterial what,) he is entitled to it.

"How stands the fact? An Inspector wishing to save the charge of re-inspection, adopts one of the following modes: the year 1827 is shaved or dubbed off, and 1828 is substituted; or the brand of 1828 is applied, and 1827 burnt out; or the brand with the figure eight is impressed over the seven, and the deception is perfected, merely by cancelling the old and issuing the new bills. Clerks, foremen, &c., have remonstrated against such illegal acts, but having yielded and altered the brands and bills, have imprudently committed themselves, so that they must, from necessity, sanction the acts of their superiors.

"If, however, the consumer abroad and at home, will submit quietly to the impositions I have mentioned, (after being apprized of the mode and manner of effecting them,) I of course must acquiesce.

"The discoveries which have from time to time been made, of frauds in Cottton, to the South, (see our daily prints,) have been justly reprobated; but similar frauds in Northern Inspectors, are deemed merely venial offences. I am not casuist enough to discover, that a bad article enclosed in a 'bit of bagging,' or a bad article enclosed in 'a cask,' can make any difference on principle.

"Will the Gastons, Perkins, Thompsons, Croppers, Lenoxes, Gracies, Remsens, De Rhams, De Ruyters, Thorndykes, Hones, and a host of other equally *conspicuous* merchants, both at home and abroad, say that *frauds in Cotton*, by a Southern man, is an unpardonable offence, but *frauds in Ashes*, by a Northern man, is a venial one.

"As I have, from experience, found that half way measures are always the worst when "principle is at issue," I now aver that the New-York Inspectors who have altered their brands and bills without re-inspection, (we omit names, Ed.). The charge is direct, which I can prove by their friends. The Ashes shipped since the 1st of January last, by the Henry IV., the Henry and other vessels will ensure their silence, but if they wish an inquiry, I give them a *carte blanche* as to the mode and manner.

I am, your most obedient servant,

R. R. HENRY,

Inspector of Pot and Pearl Ashes."

Note.--March 24—I have just ascertained that Ashes have recently been shipped, (uncertain where,) inspected early in 1826, altered to 1827, and also of 1827 altered to 1828, without even examination, much less actual re-inspection.

"The very agent employed to make the changes, (privately) objected, on the simple principle, that absolute injustice was done either to the shipper or consumer, abroad or at home, but from interested motives they succumbed to their superiors.

"The files of the Executive of this State will show, that remonstrances against malpractices, here and elsewhere, have been made by me officially, dated 4th March, 1825, of 6th March, 29th September, and 13th October, 1827; also to the Chamber of Commerce, dated 9th and 13th June, 1825, to which, and the Report of their Committee, Jeromus Johnson and James Boyd, Esqs., dated some time last fall, I specially refer for particulars.

"That I have protested, as a merchant and Inspector, for nearly four years past, against such secret and illegal practices, will not be denied, as I could not certify to a re-inspection having actually taken place, (if called upon either legally or equitably,) within six, twelve, eighteen, or probably twenty-four months. Will shippers not even make the inquiry on behalf of their constituents? "Are these things so?" when character is in jeopardy.

"Without the *direct interference of shippers*, even the revised law (to go into operation some time hence) will not absolutely prevent illegal inspection, as I can easily make appear. *Individual opposition*, however, to *illegal practices*, of long standing, is only productive of the *oppression of the individual*, if not his absolute *ruin*, of which I am *personally* a striking example.

R. R. HENRY."

To Messrs. Meriam & Co., New-York.

INSPECTION OF ASHES.

We have here given three entire letters, from three different Inspectors of Ashes. We have also given our own remarks, &c., and also two communications published in the Journal of Commerce, and remarks of the Editors of that paper.

We think these letters, communications, and remarks, show the absurdity of having Pot and Pearl Ashes inspected by Public Inspectors. Ashes are no more liable to adulteration, than molasses or sugar, or soap, or tea, and hundreds of other articles we could name, and as to putting up stones in the barrels, there is as little danger as there is of enclosing such deceptions in bags of cotton.

The Soda Ash which comes to our market, is not inspected, neither is the Barrilla, and both these alkalies are capable of the same adulteration as Pot and Pearl Ash, and vary more in quality. I have found, from near thirty years extensive experience, that the brand of the manufacturer is a far better reliance than the brand of the Inspector. I believe also, that the process which the casks and ashes undergo in the overhauling, examination, &c., &c., is, on an average, an injury to the maker and consumer of more than ten dollars per ton.

Compulsory inspection is a restraint upon trade. Manufacturers have not that inducement to make a good article if it is to be inspected, for in such case it is only necessary to make of it a quality to pass inspection, but if there is no inspection, the manufacturer will make his goods of the best quality, in order that they may command a ready sale and the highest price.

Eggs are an article of very extensive sale, and it is often the case that bad eggs are sold for good ones; will it be contended that this article shall be inspected.

Butter and Lard are sold without inspection, and these articles vary as much in quality as Ashes; the purchaser prefers his own opinion to that of an Inspector.

If the law requires Inspectors to be appointed, it is the duty of the appointing power, to select a person who is competent from experience, to form an opinion of the quality of the article.

The Constitution never contemplated that the appointment to office should be a political patronage. What would be said of a Chief Magistrate who would appoint a shoe maker for Port Physician? and such an appointment would be no more absurd than the appointments which have been made of Inspectors of Pearl Ash. We do not mean our remarks to apply solely to the New-York Inspector, who we believe is a worthy citizen, but to his predecessors also, who, like himself, had no experience to qualify them

for its collection was not sufficiently effective. The tax on the interest of money bonds has been more available, yielding about $15,000, and would undoubtedly have reached the estimated sum of $20,000, if the assessment had not been restricted to the actual amount of interest received within the year, allowing not only the deduction of interest paid, but also what was due and unpaid to the creditor.

"It was expected by the Committee of Finance, in its supplemental Report to the last Legislature, that the change in the mode of taxing licenses to merchants and auctioneers would produce an additional revenue of $20,000, but the result is that the amount has only increased from $90,000 to $96,000. The whole product of the taxes on licenses generally, has been diminished about three thousand dollars compared with the year 1842, an effect which is partly ascribable to the imposition of a rate upon some subjects too high for revenue, and amounting almost to prohibition. The tax on hawkers and pedlars, for example, has lessened more than one half the income from that source, and the revenue derived from exhibitors of shows, which was heretofore considerable, has dwindled to almost nothing. I recommend particularly, a reduction of the tax upon the last mentioned subject. As the law now is, every performance or exibition for reward, except lectures on literary or scientific subjects, is burthened with the onerous taxation of sixty dollars, which, if not amounting to prohibition in a majority of cases, leads directly to plausible and ingenious evasions of the law. The most innocent and beneficial recreations, such as musical concerts, sacred or otherwise, are either totally excluded, or the performers are driven to the expedient of relying upon voluntary contribution. A moderate tax would not only legalize harmless and useful exhibitions, and open a profitable source of revenue, but might be so regulated as to operate as a discouragement to every thing demoralizing and pernicious.

"I recommend also, if the policy of the Legislature be revenue and not prohibition, that the tax on pedlars and hawkers be reduced. If the policy be prohibitory, the existing tax will probably accomplish the object. The tax on deeds, probats, and administrations, appear to me to be moderate and expedient, but it is essentially necessary that the law should be so modified as to make the Clerks of Courts the exclusive collectors of the tax, rendering them accountable, precisely as they are now accountable, for the taxes on law process. I respectfully suggest also, if it be deemed proper to continue the tax on interest and income, that the law should be so amended as to render these sources of revenue more effectual and abundant. A tax on moneyed capital employed in loans or upon accruing interest, whether actually received or not, might be conveniently substituted for the present regulation; and I think it would also be advisable to abolish the distinction which exists, or is supposed to exist between bonds or notes which represent money actually loaned, and similar paper received in exchange for the sale of property.

"As it is desirable at present to guard against any diminution of the revenue, I also respectfully suggest that the tax on attorneys and physicians, should be graduated and made specific, so as not to depend on the amount of professional income. The ascertainment of income or annual receipts is in itself so difficult and uncertain, that without supposing any sufficient temptation to evade the law, it must in some instances, at least, be necessarily inoperative.

"Presuming that the general assembly, in the present condition of things, would be indisposed to reduce the State taxes, but that probably some item of taxation might be preferred to others which have been recently tried, I respectfully suggest, as worthy of consideration, a tax upon collateral inheritances, bequests and devices; a tax which has been long tried in some of our sister States, and particularly in Pennsylvania, where, without producing public dissatisfaction, it has proved highly productive to the State. It is imposed only upon the recipients of an unexpected bounty, and cannot be supposed to be a subject of just complaint.

"Whilst it gives me pleasure to concede that a very large proportion of the County Courts make good selections of Commissioners of the revenue, I have not changed my conviction that the public interests would be benefitted by placing the tenure of that important office upon a more permanent footing. The correct and faithful exercise of its duties, is at the very foundation of our revenue system, and that cannot be secured or expected in those cases where frequent changes are made of the incumbent."

PUBLIC PRINTING.

A gentleman informed us yesterday, that he called on the Anti-Assessment Printer, Mr. F. Hart, at the corner of Pine street and Broadway, with a Case, which he wished to have printed, and requested Mr. Hart to make an estimate of what he could afford to do the work for. Mr. Hart, after making the calculation, named Thirty-Four Dollars for the job. The gentleman then called on one of the Corporation Printers, to ascertain what he would do the same work for. The Corporation Printer made an estimate and named *SIXTY DOLLARS* for the job. Mr. Hart, of course, had the preference.

The City Comptroller's Report of 1841, is charged at $1,107.75. Mr. Hart would have printed that Report for one seventh that sum.

VOL. I.] NEW-YORK, APRIL 12, 1844. [No. 22

MORGAN LEWIS.

The individual whose name heads this obituary notice, departed this life on Monday morning, April 8th, at the age of ninety years. He had held the office of Governor of this State, Judge of the Supreme Court of this State, Major General of the Army of the United States, and many other important offices. The strength of body and powers of mind were continued to him to a late period in life. We have had several conversations with him during the last few years, in reference to occurrences that took place shortly subsequent to the Revolution, and were astonished at the excellence of his memory. In 1839 he signed an Anti-Assessment Memorial to the Legislature, which is now in the Archives of the Senate of this State. His signature to this Memorial is well worth examining. The hand writing is without the least evidence of old age, and is the most bold and firm penmanship of any name upon the Memorial. During the last few years of his life, his hearing became difficult, but in every other particular he retained the powers of body and mind to a suprising degree to the last, for a person who had undergone so much of the labors of public life.

Governor Lewis was an excellent man, and one of the old school gentlemen. When we met with him, his appearance and manner at once carried us back to the remembrance of venerable citizens who lived in the early days of the Republic, and who, one after another, have since passed away.

From the Journal of Commerce of March 27, 1844.

EXTRAORDINARY NARRATIVE.

The Port Hope (Canada) Gazette, furnishes the following narrative, which it conceives to be worthy of narration, as well on account of the singular nature of circumstances, as the moral which they involve:

Mr. Peter Moffat, who has for several years been in the habit of teaming between Peterboro', this place and Cobourg, states that a team of horses, which cost him about £75, were missing on the morning of the 6th September, 1842. After fruitless search and inquiries in the neighborhood, imagining they were stolen, he started towards Toronto in search of them, and from some account received on the way, was induced to go on as far as 100 miles beyond Buffalo, but in vain, and after spending six weeks in the pursuit, he returned home. A day or two afterwards, observing that the crows and dogs were frequenting a thicket near his barn, he searched it, and there, in a stream, discovered both his horses dead. As there was but little water at the time, he suspected they had been poisoned, and upon opening them a substance was found, which on examination turned out to be arsenic. But the most singular part of the story remains to be told. A person named C——b, who died shortly afterward, acknowledged on his death bed, that he and another person, named C——y, and one M——y, (C——b and M——y being also teamsters,) had poisoned the team: and Mr. Moffat states that C., on his returning home after the act, found one of his own horses hanging at the rack or manger, and soon after lost two of his cows, and that then he himself was taken ill and died; and M——y soon afterwards lost his team, either by drowning or having fallen into the river, and that he and two of his children shortly afterwards died; and that C——y, who is said to have lent himself to assist the others on this occasion, was subsequently shot dead in a broil at an inn in Peterboro'. Thus does an inscrutable Providence, sooner or later, overtake the guilty, however secret or well devised their schemes may be for a season.

☞ The Baptist Record states, that during a late revival in the Greenport Baptist Church, New-York, a Deacon of the church, named Randall, having engaged in prayer, told the Lord, that if his death could be the means of the conversion of sinners, he was willing to go. In about three minutes after he closed, he was suddenly attacked with a paralysis of his right side, and all sensation left him. He was carried home, and died after three days illness.—*Journal of Commerce.*

BIRDS.

During the Winter and thus far in the Spring, I have had as daily visitors, a flock of birds, consisting of fourteen snow birds and two ground sparrows. The sparrows and the snow birds appear to be on the most friendly terms with each other, and during their visits, which have been frequent and often, I have never noticed any want of harmony among them.

The previous winter, I had as visitors for a number of weeks, a flock of snow birds, but there were no ground sparrows among them. I provided food for this little flock, and they seemed very thankful for the attentions shown them. On the 29th of March, which was a fine day, one of the sparrows came and brought with him in company a beautiful bird of much larger size, and of rich plumage. This ærial stranger appeared both hungry and weary; he fed in the garden for several hours, during the whole of which time he was attended by the sparrow. It came so near the house as to look into one of the windows, and did not appear to be alarmed when approached. It was about 10 o'clock in the morning when it first made its appearance, and left a little before sun down, the sparrow all the time bearing it company. The sparrow returned next day and every day since, but the stranger has not again made its appearance. The sparrow deserves much credit for its hospitality and kind attentions. It was instructing to the mind to watch the little innocents. They are alive to kind treatment, and are confiding in exact proportion as they are well treated.

☞ We have received from ABRAHAM G. THOMPSON, Esq., a distinguished merchant of New-York, who some years since retired from business with a large estate, which he accumulated by a life of industry and economy, several Reports of the City Commissioners of the City of Philadelphia, of the Expenditures of that City.

Mr. Thompson made the following synopsis, for the year 1843:

EXPENDITURES OF THE CITY OF PHILADELPHIA, FOR THE YEAR 1843.

Watering Committee,		$63,171.84
COM. ON FINANCE.		
Int. on City Loan,	$117,432.75	
Exp.	29,309.92	—146,742.67
Committee on Police,		109,919.23
" Highways,		32,605.19
" City Property,		21,580.50
" Mending Streets,		3,334.56
" Repairing,		2,788.94
" Mending S. district,		6,365.36
" Paving do.		8,440.72
		$394,949.01

The Police includes the City Watch.

RIGHTS OF PROPERTY OF MARRIED WOMEN.

Judge Hertell, of New-York, has labored with great industry and perseverance, to introduce into the Statutes of the various States composing the Union, an improvement in the laws in relation to the rights of property of married women.

In the laws of descent and the distribution of property in this State, there is great need of amendment. We will state a case of which we have personal knowledge. A Mr. Smith, of Connecticut, some years ago married a rich farmer's daughter, of that State. On the marriage, the father of Mrs. Smith, gave her what is called in that State, a handsome setting out, They removed to this State, and resided in this city several years. Mr. Smith was taken suddenly ill

"§ 111. No power vested in a married woman, during her infancy, can be exercised by her, until she attains her full age."

"§ 117. If a married woman execute a power by grant, the concurrence of her husband, as a party, shall not be requisite, but the grant shall not be a valid execution of the power, unless it be acknowledged by her on a private examination, in the manner prescribed in the third chapter of this act, in relation to conveyances by married women."

"§ 130. When a married woman, entitled to an estate in fee, shall be authorised by a power to dispose of such estate during her marriage, she may, by virtue of such power, create any estate which she might create if un-married."

With regard to personal estate, the Revised Statutes allow any trusts to be created by Will or Deed, which could have been created under the Revised Laws. The only difference between the provisions of the Revised Laws and of the Revised Statutes, is that the latter have limited the duration of such trusts to two lives in being at the creation of the estate. See, Opinion of Chief Justice Savage, Ante. page 9.

With regard to the creation of trusts of real estate, to receive the rent and profits, and to apply them to *the use* of any person, the Revised Statutes have made great alteration, and so essential a change, that we have deemed it important to give in full, the manuscript Opinion of CHIEF JUSTICE SAVAGE, on this question, written since he left the Bench of the Supreme Court of this State. It will be found in number six, of this volume, page 97.

In 1837, when at Albany during the Session of the Legislature, we drew up a Bill in relation to the rights of property of married women, consisting of nine sections, which we subsequently submitted to Chief Justice Savage, and it met his approval. Judge Hertell added a Section to this Bill, it was then sent to JOHN C. SPENCER, Esq., now Secretary of the U. S. Treasury Department, and he added ten Sections more, making twenty sections; it was then reported to the Legislature by the Committee of the House of Assembly having that subject in charge, and is to be found in the printed Assembly Bills of that year, No.

POISONED SEWERS.

Exertions are making to infect the atmosphere of the whole city, by making the Public Sewers the receptacles of the discharges from night vaults. When the Yellow Fever was in New-York, in 1822, the Old Sewer from the Old Bridewell, through Warren street, or a Sewer which communicated with the drains of the houses in that street, was found to be a conduit for infection.

The Sewer in Leonard street, corner of Elm, some years since, sickened a great number of individuals in Leonard street, between Broadway and Elm street.

If the city is visited with an infectious disease, it will seize upon the atmosphere of Sewers thus used, and spread over the city with electric speed, and find its way into every habitation that has any connection with such conduits of Mephetic air. Place in one of these receptacles of destructive gases, a piece of plank painted with white lead, and it will be found stained a blue-black, and silver metal will be found to become almost instantly tarnished.

There is a great desire among Corporation officers to have Sewers put down, for the sake of giving jobs to Surveyors and Contractors.

THE ELECTION.

The result of the Election has astounded the office holders. The abuses and impositions which have been practised for years, by both political parties in power, in the Corporation, have aroused the indignation of the People to such an extent, that they were determined to drive the depredators from office.

The Democrats brought into the field as a candidate for Mayor, a man of great excellence of character, and who was wholly unexceptionable. Mr. Codington, had he been elected, would have been a Public Magistrate that politicians could not have *diddled* with. As a citizen, he is greatly beloved. The defeat of such a candidate, makes the victory of ten-*fold* force.

Very many voted for Mr. Codington, because they did not like to scratch off the name of a good man. Any other of the candidates brought forward at Tammany Hall, would not have received one quarter of the votes cast for Mr. Codington.

We perceive in the list published on Wednesday morning, the 10th instant, by the Journal of Commerce, that the new party has of the Board of Aldermen, 12 members. They have therefore, in the Board of Supervisors, 13 members, which give them the power to reduce the Taxes.

Among the candidates for re-election, of both parties, which have been defeated, were several who had, while members of the Board, been large dealers, and they had received large sums from the City Treasury. These men have been signally defeated, and the result is good.

The district in the 5th Ward, (Chapel street,) where the Anti-Assessment Banner was displayed, gave for Mr. Franklin, 116; Mr. Codington, 198; Mr. Harper, 406. This district embraces the section of the City where the Corporation officers depredated so shamefully upon Chapel street.

The new party have a great work to accomplish in the affairs of the Corporation. The Public officers, now holding office, with few exceptions, should be re-placed by the best citizens who can be found.

The Receiver of Taxes, is an important office. Oliver Cobb, of the 1st Ward, is probably the best qualified for that office of any person of whom we have a general knowledge. His experience in the collection of Taxes, should not be lost to the City. He is a good man.

Some person who has been an expert discount clerk in one of our banks, should be selected for a clerk in that department.

REMARKS

Upon the Saltville Fossil Salt Formation, in Washington County, Virginia, read by Eben Meriam before the Members of the Department of Natural History, of the Brooklyn Institute, April 11th, 1844.

Mr. Chairman and Gentlemen:

I have the pleasure to exhibit for your examination this evening, specimens of Salt Rock, red and blue Clay, Plaster, Shell Lime, black Bituminous Shale, and Slate, from the Saltville Salines, in Washington County, Virginia. Also, a bottle of Salt Water, from a well sunk at that place, in 1841, to the depth of 214 feet. Also, a sample of Salt, formed in the back kettles of the furnace heated by wood fire, and chrystalized by slow heat. Also, a sample of Salt, in large pieces, formed upon the steam pipe. Also, a piece of blocking, formed on the inside bottom of the kettle, in the process of evaporation. Also, Salt, &c., formed on the cisterns. These specimens and samples have been sent me by Alexander Findlay, Esq., of the house of Messrs. Findlay, Mitchell & Co., extensive Salt manufacturers at Saltville, Virginia, and have come to hand in good order, a distance of 700 miles, 330 of which was by wagon.

The numerous Salines in the United States, and which are only to be found in the interior of the country, derive their saline properties, without doubt, from the fossil salt embedded in the earth, and these specimens may be highly useful to the persons engaged in boring for salt water, to compare with the stratas they pass through in the sinking of the shafts. The nearness of the fossil salt, I think, may be judged pretty accurately of, from the formation of the surface, and the strength of the brine.

These specimens are interesting, from the fact that they are from the first Salt Mine discovered in the United States.

These specimens are marked and numbered, and are accompanied with a memorandum stating the positions they respectively occupied in the stratas, which there form the upper crust of the earth.

The salt water, of which the bottle exhibited is a sample, was taken from the well on the 31st of January, 1844. The temperature when raised, was 51 degrees of Farenheit, the depth of the well 214 feet. The specific gravity, as denoted by the Hydrometer, is 23 deg. The Hydrometer is graduated at 0 for fresh water, and 25 deg. for water fully saturated with salt. This salt water has no superior, and I am satisfied contains as much salt as cold water can be made to dissolve; boiling water will take up a little more.

The sample of Salt marked No. 26, is a beautiful article. The chrystals are of the Hopper shape, and are well formed, having a translucent appearance and possessing a greater portion of *chloride of sodium* than any Salt made in the United States which I have ever met with. This salt was chrystalized in the back kettles in the range, which are not heated to that degree which the kettles nearer the mouth of the furnace are subjected to. The more moderate the heat the larger the chrystals, and the more valuable the Salt.

These specimens of salt rock are numerous and of good size, the largest weighing upwards of four pounds. One parcel of these are numbered from 1 to 13 inclusive, and show the formation of the strata, commencing with a depth of 220 feet below the surface, and extending to the depth of 273 feet, in the order in which they are numbered, commencing with number one, at 220 feet, and ending with number thirteen, at 273 feet. Intermixed with the salt, is clay, plaster, and slate, in lumps and particles, showing as I think, conclusively, that the strata was a confused promiscuous mass when it became deposited in its present bed, and had been broken up from a previous deposit by some convulsive throw.

In many of the Salt mines, the stratas of salt are of a wavy structure, showing that the salt had been formed in a quiet and calm precipitating of the earthy impurities, but here it would seem, such a deposite had once taken place, but had subsequently been entirely broken up. I have dissolved some of the specimens in water. A precipitate of clay is formed in powder, but the slate and plaster are in small lumps of uneven fracture, and of every variety of shape.

From a depth of 273 feet, to the depth of 386 feet, the shaft was made by an augur. The pieces of salt rock raised from this depth, differ in appearance from the upper stratas, being more free from plaster, slate, and clay. Specimen marked number 31, is a piece of pure rock salt, and free from any earthy mixture. This piece is from the deep boring.

Specimens marked numbers 21 and 22, are plaster or gypsum, and nearly a pure sulphate of lime. The strata which immediately overlays the salt rock, is nearly forty feet in thickness of solid gypsum.

The surface is alluvium to the depth of eighteen or twenty feet. These stratas of plaster, red and blue clay, and slate, are to be found alternately, until reaching the depth of 180 feet, where the strata of forty feet of gypsum or plaster is reached, which strata reposes upon the salt rock.

The specimens marked number 14 to 20, inclusive, are of red and blue clay. These, with the plaster, form the stratas between the alluvium and the 40 feet strata of plaster, which lies directly upon the salt rock. These clay stratas are intermixed with the stratas of plaster, and occupy a position between the alluvium of 20 feet upon the surface, and the 40 feet of plaster reposing upon the salt rock, constituitng a body of 180 feet in thickness.

The other specimens I will notice after giving some quotations from the letters of my correspondent, Alexander Findlay, Esq., one of the proprietors of these mines, and some remarks thereon.

In his letter dated Saltville, Sept. 7, 1841, he says:

"About forty-five feet from the old Salt Well, and the same distance from the new one in which the salt rock was discovered, we commenced two or three weeks since to bore another hole (not having reached water in the one we were sinking, we are however, still going on with it,) which we have sunk to the depth of 125 or 130 feet; in this hole, at the distance of about 18 or 19 feet, we came to a small strata of plaster, and have since been principally in red clay, occasionally going through small stratas of plaster and slate; at about 120 feet we got into a large body of plaster and slate, which we have been in ever since. At about 150 or 200 yards north from where we are digging or boring, we come to slate, next a layer of bituminous shale, then shell lime stone. On the South, the first rock we came to was lime stone. In digging or boring we have never come to lime stone. Bituminous stone coal is found about eight or ten miles from us, but not in sufficient quantities to work. At the distance of from forty to fifty miles, a supply might be had, but it is difficult to get roads to it, that at present we would not be compensated for making them, and we use wood in the manufacture of salt."

In Mr. Findlay's letter of Nov. 8, 1841, he says:

"Since I wrote you in September, we have succeeded in getting salt water in the augur hole we had then just commenced, at the depth of 209 feet. We have at present no idea of excavating to the salt rock. The water we get is as strong or stronger than we could make it by raising the rock and dissolving it, and we think it much cheaper to raise the water."

The same gentleman, in a letter to me of April 27th, 1842, states:

"In the well we dug, and in which the salt rock is found from 180 to about 220 feet, it is nearly a solid bed of plaster. In the augur hole, from 190 to 214 feet, its greatest depth, we find stratas of plaster, then clay, sand, and slate, mixed. The slate being such as is in the salt rock sent you, and not in layers or solid masses. In this augur hole we did not strike any salt rock, nor did we bore to the depth at which we struck it in the well. We got the water, at first but a small quantity, in the clay, sand and slate strata; by pumping, the quantity of water has increased, until we have now an abundant supply to make as much salt as we can vend in our market. The water from this augur hole or well, is no doubt superior to any in the world. From the experiment that we have made, we do not see how it could yield more salt in solution. The strongest brine taken out of our kettles when boiling, and half filled with salt, and let stand until cool, stands with the Hydrometer in use, at from 22 to 22½ degrees, and the water in this well, when worked moderately and as hard

ed ; perhaps the settlers in the neighborhood did make what salt they wanted at them. At a very early date wells were dug, and have since been extensively worked. One of the oldest wells, and one of the best, having, some thirty or thirty-five years since, caved partly in. The proprietors of Saltville, about twenty-five years since, at the distance of about fifty feet from it, commenced digging a new well, which they sunk to the depth of about 110 or 115 feet, and stopped, finding the old well likely to hold out and answer their purpose. This new well was afterwards sunk to about 178 or 180 feet, and again stopped. About eighteen months since, we determined to sink still further in this well, and if possible, get salt water. We again commenced digging in plaster, mixed with blue slate, and continued in it about 40 feet, when we struck the salt rock. In this we dug about 50 feet, and have since bored about 100 feet, when we got out of the salt rock and got into slate, with small portions of plaster, which we have been in for six or seven feet."

Thus this important discovery of the fossil salt, was accidental. Nature had provided for the Buffalo, Deer, &c., the saline springs to the surface, and as the country became settled, the wells furnished the salt water for the wants of the settlers, but now he great population is provided with the mineral itself, which has been carefully treasured up against the time of need. It is thus that Nature has in readiness in the great terrestrial store, a supply for all the wants of our race, as these are developed in the progress of time. This mineral deposit, like all the saline deposits on our continent, is placed in the interior of the country, where a supply of salt from the seaboard would be expensive to the consumer. Here also, is the wood for fuel, and when this is exhausted, coal is near by, and they have only to make a good road, and this is obtained also. Not only the fossil salt is furnished, but Nature also dissolves it ready for the evaperators, and it has only to be raised from the ground and made into salt. Nature also, in the rays of the Sun, affords the solar heat by which the water can be evaporated without one cent expense of fuel. How benificent ! how bounteous, is the source of all good !

The description of the stratas which overlay the mineral salt of the Saltville mines, is very much the same as those of the Cheshire salt mines, in England. I have a drawing of the stratas of the Cheshire mines. The only difference is, that the overlays of the Cheshire mines contain some sand stone. The Cheshire mines were discovered by accident, in mining at the depth of 120 feet. I have some of the fossil salt of these mines, which I exhibited to you at a previous meeting of the members of the Institute.

The sample of plaster marked No. 23, is from a location about five miles distant from the Saltville mines.

The sample of red clay, marked No. 24, is from the Artesian well, a boring about 40 feet from the shaft, sunk in the salt rock. It is a little remarkable, that in sinking a shaft to the depth of about 400 feet, no water should be found, while in one only 40 feet distant, water should be found at the depth of 214 feet, in such abundance, as to furnish all the works, and leave a large surplus.

The sample marked No. 25, is salt formed on the steam pipe. This is as solid and of as large size as the Bonaire salt. Samples marked Nos. 27 and 28, are of saline incrustation, formed on the cisterns which contain brine. I have not examined these particularly.

Specimen marked No. 29, is shell lime stone. The marine shells which form this rock, you will perceive, are very perfect, and discover the form of each individual shell with great distinctness.

Specimen marked 30, is a small piece of shell lime stone, which has a piece of white yarn wound around it. When these specimens arrived, on opening the box I discovered this piece, and carefully unwound the thread, examining its fibre, presuming that it was the wool which it was spun from, that was the curiosity, until the whole was unwound, when I discovered the specimen was in two pieces, and that the fracture was caused by a shell which extended across the whole interior, and that the yarn thread was used to confine the pieces together.

Specimen No. 32, is black bituminous shale.

You will perceive by my quotations of Mr. Findlay's letters, the locations in which these several specimens were found. This particular description is important, and will be very interesting to those having salt springs, in forming opinions as to the nearness of the fossil salt.

Mr. Milnor writes to me from Saltville, under date of March,15th, 1844, and says :

" Messrs. Findlay, Mitchell & Co., are now altering and repairing their large steam furnace, which when completed, will closely resemble the one lately erected at Onondago, by Messrs. Ives, Spencer & Nolton, as described by them in Dr. Wright's Report."

You will see in this, the importance of Messrs. Ives, Spencer & Nolton's communication to the Superintendent of the Salines, the advantage of annexing it to his Report, and the benefit of the publication of it by the Legislature. This Report of Dr. Wright's, I forwarded to Messrs. Findlay, Mitchell & Co., of Saltville, early in February.

I shall place some of these specimens in the State Geological Cabinet, at Albany, in the course of a few days, for the benefit of persons who may desire to examine them, and also furnish a printed copy of this paper to each member of the Legislature. I shall also furnish a set of these specimens to the DEPARTMENT OF NATURAL HISTORY, OF THE BROOKLYN INSTITUTE.

EDITED BY E. MERIAM.] NEW-YORK, DEC. 11, 1844. [VOL. I....No. 23.

UNITED STATES STOCK EXEMPT FROM TAXATION.

The Supreme Court of the United States, in 1829, made a very important decision in the suit of *Weston, and others*, vs. *The City Council of Charleston, S. C.*, touching the validity of an Assessment or Tax upon United States Stock, or Loans. The opinion of the Court was delivered by Chief Justice MARSHALL, and is set forth below. There was another question involved in the suit, which was that of Jurisdiction, the proceedings having been had in a local Court to obtain a prohibition to restrain the City Council of Charleston and their officers from collecting the tax from the holders of Government Stock, which was attempted to be enforced under a city ordinance. For our present purpose we deem it only necessary to give that portion of this opinion which determines absolutely the EXEMPTION of U. S. Stock. It may be well here to remark that the different modes of making the assessment or levying the tax, does not in the opinion of the Supreme Court of the United States, alter the principle. This doctrine is laid down by the Court in the case of *Brown*, vs. *The State of Maryland*, reported, in 12, Wheaton, R. 419. The Court say:

"Is the stock issued for loans to the government of the United States, liable to be taxed by States and Corporations? Congress has power 'to borrow money on the credit of the United States.' The stock it issues is the evidence of a debt created by the exercise of this power. The tax in question is a tax upon the contract subsisting between the government and the individual. It bears directly upon that contract, while subsisting, and in full force. The power operates upon the contract the instant it is framed, and must imply a right to affect that contract. If the States and Corporations throughout the Union possess the power to tax a contract for the loan of money, what shall arrest this principle in its application to every other contract? What measure can government adopt, which will not be exposed to its influence?

"But it is unnecessary to pursue this principle, through its diversified application to all the contracts, and to the various operations of government. No one can be selected which is of more vital interest to the community, than this of borrowing money on the credit of the United States. No power has been conferred by the American people on their government, the free and unburthened exercise of which more deeply affects every member of our republic. In war, when the honor, the safety, the independence of the nation are to be defended, when all its resources are to be strained to the utmost, credit must be brought in aid of taxation, and the abundant revenue of peace and prosperity must be anticipated to supply the exigencies, the urgent demands of the moment. The people, for objects the most important, which can occur in the progress of nations, have empowered their government to make these anticipations 'to borrow money on the credit of the United States.' Can any thing be more dangerous, or more injurious, than the admission of a principle which authorises every State, and every Corporation in the Union, which possesses the right of taxation, to burthen the exercise of this power at their discretion.

"If the right to impose the tax exists, it is a right which, in its nature, acknowledges no limits. It may be carried to any extent within the jurisdiction of the state or corporation, which imposes it, which the will of each state and corporation may prescribe. A power which is given, by the whole American people, for their common good; which is to be exercised at the most critical periods for the most important purposes; on the free exercise of which the interests certainly, perhaps the liberty, of the whole may depend; may be burthened, impeded, if not arrested, by any of the organized parts of the confederacy.

"In a society, formed like ours, with one supreme government for national purposes, and numerous state governments for other purposes; in many respects independent, and in the uncontrolled exercise of many important powers, occasional interferences ought not to surprise us. The power of taxation is one of the most essential to a state, and of the most extensive in its operation. The attempt to maintain a rule, which shall limit its exercise, is undoubtedly among the most delicate and difficult duties, which can devolve on those whose province it is to expound the supreme law of the land in its application to the cases of individuals. This duty has more than once devolved on this Court. In the performance of it we have considered it, as a necessary consequence, from the supremacy of the goverment of the whole, that its action in the exercise of its legitimate powers should be free and unembarrassed by any conflicting powers in the possession of its parts; that the powers of a state, cannot rightfully, be so exercised, as to impede and obstruct the free course of those measures which the government of the United States may rightfully adopt.

"This subject was brought before the Court in the case of *M'Culloch*, vs. *The State of Maryland**, when it was thoroughly argued, and deliberately considered. The question decided in that case bears a near resemblance to that, which is involved in this. It was discussed at the bar in all its relations and examined by the Court with its utmost attention. We will not repeat the reasoning, which conducted us to the conclusion thus formed; but that conclusion was, that 'all subjects, over which the sovereign power of a state extends, are objects of taxation; but those, over which it does not extend, are upon the soundest principles exempt from taxation.' The sovereignty of a state extends to every thing which exists by its own authority, or is introduced by its permission; but not to those means, which are employed by Congress to carry into execution powers conferred on that body by the people of the United States. 'The attempt to use' the power of taxation, 'on the means employed by the government of the Union, in pursuance of the constitution, is itself an abuse; because it is the usurpation of a power, which the people of a single state cannot give.'—'The States have no power by taxation, or otherwise, to retard, impede, burthen, or in any manner control the operation of the constitutional laws, enacted by Congress to carry into execution the powers vested in the general government." We retain the opinions, which were then expressed. A contract made by the government in the exercise of its power, to borrow money on the credit of the United States, is undoubtedly independent of the will of any state, in which the individual, who lends, may reside; and is undoubtedly an operation essential to the important objects, for which the government was created. It ought, therefore, on the principles settled in the case of *M'Culloch, vs. The State of Maryland*, to be exempt from State taxation, and consequently from being taxed by corporations, deriving their power from states.

"It is admitted that the power of the government to borrow money cannot be directly opposed; and that any law, directly obstructing its operations, would be void. But a distinction is taken between direct opposition and those measures, which may consequentially affect it; that is, a law prohibiting loans to the U. States would be void; but a tax on them to any amount is allowable. It is, we think, impossible not to perceive the intimate connection, which exists between these two modes of acting on the subject. It is not the want of original power in an independent sovereign state, to prohibit loans to a foreign government, which restrains the

* 4 Wheaton, 316.

supposed to be placed in the same condition with the property acquired by an individual. The tax on government stock is thought by this Court to be a tax on the contract, a tax on the power to borrow money on the credit of the United States, and consequently to be repugnant to the constitution."

ERRONEOUS TAXES.

The State Legislature at the last session passed the following amendment to the Tax Bill. Persons who have been erroneneously assessed are entitled to relief under it as a matter of right. But the application must be made before the 20th of March, 1845.

"§ 2. The Board of Supervisors in and for the city and county of New-York, may at any meeting of said Board, at which the Mayor or Recorder shall be present, correct any erroneous assessment which may have been made by the Assessors of either of the Wards of the said city for the year 1843, and may also correct any erroneous assessment which shall hereafter be made by any such Assessors as aforesaid, provided application for such relief shall be made upon assessments in 1843, within three months after the passage of this Act, and in all other cases within the period of *six months after the assessment rolls shall have been returned as required by law*, and provided also proof is made to the satisfaction of such board of Supervisors, by the affidavit of the applicant or other legal evidence that the said erroneous assessment did not result from any neglect on the part of the person or persons applying for relief."

It will be seen that in order to be entitled to relief in the tax which has been erroneously assessed in 1844, application must be made to the Mayor, Recorder, and Aldermen, Supervisors of the city and county of New-York, within *six months* from the return of the assessment rolls which was on the 20th day of September, 1844.

The applicant must address his or her petition to the Mayor, Recorder, and Aldermen, Supervisors of the city and county of New-York.

The petitioner must make affidavit to the truth of the facts set forth in his petition, before the Mayor, or other officer authorised to administer an oath, as required by the law above quoted.

The application must be made within the time named, and such application secures the claim to relief, even should it not be acted upon by the board, until after the expiration of the term named.

BOSTON SYSTEM OF TAXATION.

The following is a copy of a letter received in October, 1843, from the Hon. MARTIN BRIMMER, Mayor of Boston, a very intelligent public officer. This letter, at the time the other letters of Mayor BRIMMER were published, on pages 108 and 109 of this Volume, was supposed by us to have con-lost. We have since met with it, and here give it to the public:

"BOSTON, Oct. 6th, 1843.

"SIR,

"I have been for some days in receipt of your favor of Sept. 23d, but I have been so much engaged as to be quite unable to give it the attention its importance demands. I am now, however more at leisure and I shall endeavor to give you the information you require in relation to the mode of assessing taxes in this city."

"Respectfully,

"Your obt. Servt.

"M. BRIMMER,

"Mayor.

"E. Meriam, Esq.

"BOSTON, Oct. 10, 1843.

"SIR,

"Your favor of Sept. 23d, was received by me at a moment when I was so much occupied that it was impossible for me to give that attention its importance demands, I shall now take up your question *seriatim*. and endeavor to give you distinct answers.

"By the laws of this State, the same rate of taxes is assessed on Real and Personal Estate. The manner of assessing taxes in this city is as follows. Three persons are annually elected by the City Council, as "PERMANENT ASSESSORS," with salaries.—Two persons are also annually elected by the City Council from each of the twelve Wards, as "Assistant Assessors," *without salary*, whose duty it is to assist the permanent assessors in taking the valuation in the several Wards, commencing on the first day of May. The Board of Assessors have power to rectify errors within six months after the Tax Bills are issued, after which time the power to abate taxes, lies with the Mayor and Aldermen.

"In answer to your first query I would repeat,

"That the same *rate* is assessed on Real and Personal Estate.

"2d Query.—When A. owns a house and lot worth $12,000 and B. has a mortgage on it for the same amount, are they both taxed in your city?

"Answer.—A. pays tax on his land, B. on his mortgage as personal estate. The $12,000 is therefore taxed twice.

"3d Query.—If A. owns a house in Boston worth $12,000 and furniture worth $12,000, how is that individual taxed?

"Answer.—The house would be taxed on $12,000, and on the furniture all over $1,000 in value, say $11,000, would be *legally* taxed. But there is usually a very liberal valuation of furniture, it is rated at one-fourth its value, an examination rarely takes place. A person is supposed to have furniture fitted to his mode of living, his fortune, and the house in which he lives.—Furniture under $1000 in value is not taxed.

"4th Query.—Is Bank Capital taxed to the Stockholder or the Institution? Do you tax occupations or professions?

"Answer.—There is a State Tax of one per ct. on bank capital paid by the Institution.

The Stockholders also pay the City and County tax. By a recent law of this State it is made the duty of the Cashiers of the several Banks, the Clerks of Insurance Offices, (except Mutual Insurance Offices) the Clerks of Manufacturing, Bridge, Turnpike and Canal Corporations, annually to make returns to the assessors of every city or town in the Commonwealth, in which any Stockholder may reside, stating the name, number of shares, and par value of said shares. Occupations and professions are not taxed *as such*, but a person is taxed for his capacity or income from his profession or business.

"5th Q.–What is the tax (of a person*) worth $12,000, in your city? and what items constitute the tax?" I am not sure that I understand this question, but if you mean to ask what would $12,000 pay, I

"Answer.—The average rate of the City and County tax is $6. The rate varies from $5.70, to $6.20, on the $1000; $12,000, whether real or personal, or income, would pay $72, more or less.

"The following is the provisions of the Revised Statutes in relation to personal estates: 'Personal estate shall for the purpose of taxation, be construed to include all goods, chattels, money and effects wheresoever they may be, all ships and vessels whether at home or abroad, *all moneys at interest due to the person to be taxed, more than they pay interest for*, and all other debts due to them more than they are indebted for, all public stocks and securities, stocks in turnpikes, bridges and all monied corporations, whether within or without the State, and also income from any profession, trade or employment, or from an annuity, unless the capital of each annuity shall be taxed in this State, and all other property returned in the last preceding valuation, for the purpose of taxation."

"By a decision of our Courts, debts payable may be deducted from debts receivable, but for no other personal property.

"I have endeavored to furnish you with a succinct account of the mode in which taxes are assessed in this city. Any further information you may require will be given with pleasure by

Your obt. Servt.

E. Meriam, Esq. M. BRIMMER."

The Anti-Assessment Committee sent a delegate to Boston in Nov. 1844, to examine into the mode of doing business in the public offices of that city.

The first Office visited was that of the Permanent Assessors, which is kept in the City Buildings.

This office is kept open every business day throughout the year, from 9 o'clock in the morning till 1 o'clock in the afternoon.

The Permanent Assessors were all in attendance and are practical and intelligent business men.

Each of the Permanent Assessors receives a salary of twelve hundred dollars per annum, and they are allowed one Clerk whose salary is four hundred dollars per annum, making the expense of the tax department $4000 per annum, exclusive of fuel and stationary.

The Permanent Assessors are authorised by law to correct any erroneous taxes within six months after the bill has been delivered to the tax payer, and are also empowered to remit and discharge any tax which the person taxed is unable to pay by reason of poverty, infirmity, or old age.

The Permanent Assessors Department is precisely such an improvement as is required in the city of New-York.

*Omitted in the letter.

POWER OF APPOINTMENT.

The Street Law of April 9, 1813 is in direct violation of the following provisions of the Constitution of 1777, so far as the power of nominating and appointing Commissioners of Estimate and Assessment is concerned.

"XXIII. That *all* officers, other than those who, by this Constitution, are directed to be otherwise appointed, shall be appointed in the manner following, to wit:

The Assembly shall, once in every year openly nominate and appoint one of the Senators from each great district, which Senators shall form a council for the appointment of the said officers, of which the Governor, for the time being, or the Lieut. Governor, or the President of the Senate, (when they shall respectively administer the government) shall be President, and have a casting voice, but no other vote; and with the advice and consent of the said council, shall appoint *all* the said officers; and that a majority of the said Council be a quorum: *and further*: The said Senators shall not be elegible to the said Council for two years successively."

"XXVII. *And be it further ordained*, That the Register and Clerk of the Court of Chancery, be appointed by the Chancellor; *The Clerks of the Supreme Court*, by the Judges of said Court."

The Commissioners of Estimate and Assessment nominated and appointed by the Judges of the Supreme Court, receive an amount of compensation, greater than all the other Executive, Judicial and Administrative Officers of this State put together!

Shall a tribunal usurping power, not only not conferred, *but absolutely prohibited* by the Constitution, be that tribunal which is to sit in judgment upon its own acts when the constitutionality of these acts are called in question?

Shall the party try his own cause, and be the judge in his own case?

Judges COWAN and BRONSON refused to act in view of the Constitutional disability, and we now add, as above, the suggestion of another constitutional prohibition.

PUBLIC PRINTING.

The Public Printing should be done by contract, and given to the owest bidder.

STREET PATCHING.

To the Hon. the Common Council:

The undersigned, Citizens of the city of New-York, most respectfully represent to your Honorable Body that great abuses have been practised for several years in extorting money from individuals for patching pavements in public streets, and vexatious suits have been commenced before some of the Justices appointed by the Common Council, who have considered the Ordinance of the Common Council paramount to the law of the State, and gave judgment accordingly. The undersigned respectfully ask your Hon. Body to repeal the Ordinance under which these abuses have been committed.

And your Memorialists, &c.

New-York, October 19th, 1844.

The above memorial is brief, strong, and well signed by the best men in the city of all

them, requiring it; further neglect or refusal was to be remedied by the employment of a paver licensed under proper regulations, by the Street Commissioner, to do the work, which was to be measured by the Street Inspector, and the bill certified by him, was made recoverable in an action of debt. These arrangements, which have been continued to the present time, appear reasonable in theory, the difficulties in practice are—the owners of property feel it an annoyance to be called upon to attend to these repairs of pavement, and within a few years the pavement over the Croton Water trenches, which is universally out of order, and the injury to the side walks, the flagging of which has been broken by fire engines drawn over them in frosty weather, furnish matter for great complaint, in addition to the alleged extortions and conspiracies of the licensed pavers and street inspectors. To obviate, if possible, the latter complaints, the undersigned, at the time of the last renewal of the pavers' licences, took pains to exclude those who did not produce certificates of good character from respectable persons, and good security was given by each of them in the sum of $200, for the faithful performance of his duties without overcharge; a statement that this had been done was inserted in all the newspapers employed by the Common Council.

Notwithstanding this, the system is most unpopular with many respectable citizens, who argue that those who have kept their streets in order for twenty years, during which the present arrangement has lasted, and in which time the streets that were most out of order at its institution, have re-paved, might now without injustice be placed on an equal footing with the owners of lots on streets recently paved, and that all the paved streets in the city, sidewalks as well as carriage-ways, should be kept in order at the public expense. The objection to this is the great addition it would make to the general tax if the present clumsy system of repairing was continued. But it is the opinion of the undersigned, that if the repairs of pavements in each ward (except 12th) were separately let by contract once a year, to be done under the direction of the Street Inspectors, and the satisfaction of the Aldermen and Assistant Aldermen of the Wards, that repairs to the pavement of the whole city including repairs with brick to side-walks, might be done for an amount not greatly exceeding that now paid for repairing the carriage-ways of the streets which have been accepted, for the contractors would watch the first break in the pavement, and mend it, which any Superintendent of pavements for the whole city, however industrious, cannot do; those who have seen how a small break in the pavement of any Omnibus route, or indeed any Street, soon widens into a gulf, will not think the foregoing estimate extravagant, if they will also reflect how little repairs would have to be done if the city were districted as herein proposed, and that by the foregoing plan the pavers' interest would be promoted by prevention rather than cure.

A reference to a Committee is asked to examine into these matters and report improvements in the system and arrangements for repairing pavements.

Respectfully sabmitted,
SAMUEL S. DOUGHTY,
Street Commissioner.

New-York, Sept. 9, 1844.

VETO.

His Honor Mayor HARPER, has done himself honor, rendered to the public a service, and to the individuals interested in the lands plundered by the 86th Street Assessment an act of Justice in withholding his asent to the proceeding referred to in the following VETO Message:

MAYOR'S OFFICE,
New-York, Nov. 30th, 1844.

To the Hon. the Board of Aldermen of the city of New-York:

Gentlemen—Pursuant to the provisions of the City Charter, I return herewith to your Board, where it originated, "A resolution for removing fences from 86th Street, between Bloomingdale Road and Hudson River," with my objections.

The opening of 86th Street, by removing the fences only, would, in my opinion, be of no benefit to the citizens, as the natural surface of the ground, near the River, is so uneven that no use could be made of the street without grading and levelling it: and if it were intended to work the street, the great expense it would require to be laid out, would, by no means, be justified by any advantage to be derived from the opening and regulating of said Street, at the present time.

As no benefit can arise from merely removing the fences, and it may lead to trespasses upon the neighboring grounds, it is believed that such removal should be delayed till some future period, when the public convenience will require and justify the removal of the fences and the regulation of the street, and the expenditure of large sums of money which will be necessary to accomplish that object.

When the time shall have arrived which will justify that expenditure, it will occupy but little time to remove the fences, and such removal and the grading of the street may go on simultaneously without any additional expense to that of grading and regulating.

The public burthens, in taxes and assessments, have been so onerous, that every operation or improvement involving expense and not imperiously demanded for public convenience, should be postponed until justified by the great benefit to be derived from it.

JAMES HARPER, Mayor.

REPORT OF THE STREET COMMISSIONER ON SEWERS.

The Street Commissioner, to whom was referred a Resolution of which the following is a copy, and which passed the Board of Assistant Aldermen on the 28th of October last, "Resolved, That the Street Commissioner report to this Board whether the sewers heretofore constructed are of sufficient capacity to discharge the filth now acmulating in them, without employing laborers to enter them and how often those labors have to be performed."

RESPECTFULLY REPORTS:

That shortly after entering upon the duties of his office in May last, notice was received by him from persons residing on those streets through and under which the principal sewers run, that the sewers were in a filthy condition and required cleaning; the measures indicated by the City Ordinances were immediately taken; and a great quantity of filth was taken out of the sewers by convicts from Blackwell's Island. The sewers which have most settled out of a right line, were of course, found to be in the worst condition, as the running of Croton and other water does not wash out the filth lying below a right line, but this washing out, though it may keep the sewers clean, saves but little, if the sewer be not carried out a sufficient distance into the river to cause the current to remove the filth; where the sewers empty into slips, the slips soon fill up, and it costs more to remove the filth from thence, than from the sewers. The sewers have been partially cleaned every summer for several years past; the amount paid the keepers of the convicts for wages, is estimated to average $750 per annum, it is not supposed that the necessity for cleaning out the sewers arises from want of sufficient capacity; for the largest—that in Canal Street, most frequently requires cleaning. Uneveness in the floor of the sewer and want of sufficient descent are the principal reasons for the necessity of resorting to manual labor. The amount paid for cleaning sewers the present year has somewhat exceeded the average before mentioned principally for the reason that certain individuals engaged in washing wool erected a bulkhead in the sewer in 18th Street near the first Avenue and inserted an iron pipe into the sewer near the top thereof, for the purpose of drawing off the water which ran in a clear and constant stream through this sewer, which is built under streets not yet improved by the erection of many houses, a great quantity of sand having been carried by heavy rains into the sewer, and being prevented from passing out by the bulkhead aforesaid, was precipitated at the bottom of the sewer where it remained and caused the sewer to be inadequate to the discharge of the water flowing into it during some of the heavy showers of the last summer. On attempting to clean out the sewer the bulkhead above mentioned was found and removed as have been several hundred loads of sand. All the information that could be obtained on this subject was immediately collected and placed in the hands of the Attorney of the Corporation, who it is understood is about to commence a prosecution against the individuals concerned in this proceeding, the effects of which might not only have been, to cost the city some hundreds of dollars in cleaning out the sewer, but by overflowing the cellars of houses on 2d Avenue and other Streets, the sewers of which discharged themselves thro' the sewer in 18th Street aforesaid, have exposed the City to the payment of damages to a great amount, as the City Ordinances do not provide penalties sufficient to prevent such misdeeds, the following Resolution is respectfully submitted.

"Resolved, That it be referred to the Committee on Laws to examine the ordinances relative to the misuse of sewers, and if in their opinion requisite, report an amendment to the same, imposing a penalty of not less than two hundred and fifty dollars on each and every person who shall obstruct or attempt to use for any manufacturing or other purpose, the sewers of the city of New-York, or the water therein without the permission of the Common Council first had and obtained.

Since writing the above, information has been received that the bulkhead above referred to, has been either wholly or in part replaced.

SAMUEL S. DOUGHTY,
Street Commissioner.

New-York, Nov. 25th, 1844.

SUPREME COURT OF MASSACHUSETTS.

The following opinion of the Supreme Court of Massachusetts and communication of the City Solicitor, was politely furnished us when at Boston a few days since by Chas. B. Wells, Esq., Superintendent of Sewers in that city.

HON, JONATHAN CHAPMAN, MAYOR.

City Solicitor's Office,
July 6, 1840.

SIR,

I have to communicate, for the information of the City Government, a decision of the Supreme Court made on the 3d inst. in the actions pending before them, on the subject of the Common Sewers and the liability of the owners of real estate to contribute to the expenses of the same.

By this decision (a copy of which is herewith transmitted) the following principal points have been settled:

1. That the city has full power to take charge of and regulate the Common Sewers.
2. That the estates of the abutters are liable to contribute to the expense.
3. That the expense must be apportioned according to the value of the *lands* independently of the *buildings* upon them; and
4. That the City Ordinance of February 13, 1834, which apportions the expense according to the valuation of *lands and buildings jointly*, as heretofore practised, is unreasonable, and void in law.

Some other points were made in the argument of the causes; but the Court did not deem it necessary to make them the subject of their adjudication.

In conformity with the above views of the Court, the actions pending, which were founded mainly upon the Ordinance and the practice under it, have been decided against the city.

The existing regulations of the City on this subject being thus adjudged to be ineffectual for the purpose intended at the time of their enactment, it remains for the City Government to determine upon such further provisions in relation to this subject, as its high importance to the public convenience and the health of the city shall in their judgment demand.

I am, Sir,
Your obedient servant,
JOHN PICKERING,
City Solicitor.

(COPY.) Opinion of the Supreme Judicial Court in the cases of Shaw (and others) —on the subject of the Common Sewers, and the City Ordinance regulating them.

Putnam, J., delivered the opinion of the Court, as follows:

By the 15th section of the Charter of the City all powers which were vested in the *Town* of Boston are vested in the Mayor and Aldermen and Common Council of the City; and they may make all needful and salutary by-laws as Towns may make, and annex penalties, not exceeding $20, for the breach of the same—which shall be in force from and after the time therein limited, without the sanction or confirmation of any court or other authority whatsoever; provided that such by-laws shall not be repugnant to the Constitution and Laws of this Commonwealth. And the City Council shall have power to lay and assess taxes—Stat. 1821, ch. 110, §. 15—8th vol. Stat. at Large, 744.

The power given to *Towns* to make by-laws is in Rev. Stat. ch. 15, sect. 13, for the managing of the prudential affairs of the town; which are however to be approved by the Court of Common Pleas.

These by-laws, if reasonable, have as full force as if they were made by the Legislature itself; and it is for the Court to decide, whether they are reasonable or not. 3 Pick. 478, Commonwealth v. Worcester. If unreasonable, they are void. 6 Pick. 191, Vandine's case.

Anciently the law provided, that a main Drain or "Common Shore" might be laid by an individual at his own expense; and that those persons, who should enter their particular drains into such a main Drain, should be obliged to pay according to the judgment of the Selectmen or a major part of them; saving to the aggrieved party a right to appeal to the Court of Sessions.—Stat. 8 Anne, ch. 2—3 Geo. III. Ancient Charters, p. 389.

And, substantially, the same provisions were contained in Stat. 1796, ch. 47, passed 20 Feb. 1797.

there had been a house built upon the lot at that time. The assessment was not made until 1838. Now we think that such an assessment is not according to the true intent and meaning of the Ordinance, even if the Ordinance itself were valid.

But is the Ordinance a reasonable and just provision? We are constrained to answer this question in the negative.

It is better without doubt, that the City should do the work; and that the Mayor and Aldermen should judge when and where a Common Sewer should be built. If it were left to the individual abutters to build the part against their respective lots, the expense might not fall equally; for some might be obliged to carry the Common Sewer through ledges and rocks at great expense, while others at a trifling cost would go through a loose soil: It is better for the City own and to construct it.

And it must be considered as reasonable, that the charge should fall upon the lots abutting; which would have the privilege of entering particular drains from the respective lots in the main Drain or Common Sewer. The right and privilege would become apurtenant to the several lots, and their value would thereby be increased, probably quite as much as the amount which should be required to be paid towards the general expenditure. Thus no loss would fall upon the owners of the land.

It might happen, that some of the owners of the vacant lots would not at present want to have a Common Sewer built; while other owners having houses on their lots would consider such an accommodation to be absolutely necessary. Let the Mayor and Aldermen, then, judge when and where the public convenience requires such main Drains.

There is as much reason to subject the owners of the land abutting to contribution to this expenditure as there is to oblige them to pave the foot ways in front of their grounds and to keep the same in repair when the City shall pave the streets adjoining.

It should be a charge upon the land; just as it is the requisition on the owners of lands abutting on streets to clear away the snow at their own expense; which has been determined to be a reasonable provision. It is a charge upon real estate thus situated, and requisite for the comfort and convenience of all the citizens.

But how shall it be apportioned? Shall the owner of the lot next to the outlet be in any event held to contribute more than the owner of the lot six hundred feet above, if the former should happen to have a house upon it, and the latter lot should be vacant? We think not. Suppose A owns a house and lot of the value of $1000, and with the house upon it it would be of the value of $10,000, next to the outlet at Charles Street; and that B has a lot of the same dimensions, 600 feet from Charles Street valued at $1000; according to the Ordinance, the contribution should be made according to the valuation of these estates in the books of the Assessors. The owner of one lot would be held to pay ten times as much as the other. The apportionment should be made upon the value of the *land* independently of the *buildings;* and should be settled in the time of the transaction; so that the City would neither gain nor lose by the work, and the rights and liabilities of the owners of the land be definitely ascertained.

It is not for the Court to prescribe the mode by which the amount of the contribution should be ascertained; but we are bound to say, that this which has been provided is unequal and unreasonable, and therefore void.

In Common Council,
February 22, 1844.

Laid on the table, and with the accompanying Report, ordered to be printed.

Attest, W. P. Gregg, Clerk C. C.

In the Board of Aldermen,
February 19, 1844.

The Committee of the Board of Aldermen, on Common Sewers, ask leave to

REPORT:

That by the present provisions of the ordinance in relation to Common Sewers, the Mayor and Aldermen are required, after deducting one quarter part of the expense of constructing or repairing any Common Sewer, to assess the remainder on persons benefitted thereby. And it is made the duty of the Superintendent, to make out bills for such assessmeuts forthwith, and of the Treasurer to cause the same to be collected. The Committee are of opinion that some alteration in the present law is expedient, both in relation to the amount to be paid by the City and also in the time prescribed for payment of the assessments by persons benefitted. The proportion now assumed by the City is one fourth of the whole expense, and this is supposed to be generally correct, but cases are often occurring, where the assessment of so large a proportion as three fourths on those benefitted must operate as a hardship, and where the collection of it will of course be effected with great difficulty and delay—nor does it seem to be always expedient to enforce the payment of assessments at once, before entries are made into the Sewers.

The principle assumed in the ordinance is, that an estate is increased in value by the facility afforded for draining, whether any use is made of the power not—and this is probably to a great extent true, it may be doubted however, whether any practical effect of the kind is at all times felt—and in the opinion of the Committee it would be frequently advisable to postpone the payment, till the value of the Sewer is realized by entries actually made, even at the risk of increasing in some degree the expense to the City—the Committee would now propose, therefore an amendment to the ordinance, by which the Mayor and Aldermen shall be empowered to alter the proportion

to be paid by the City, and to postpone the time of payment by persons benefitted.

Respectfully submitted,

THO, WETMORE,
for the Committee.

CITY OF BOSTON.

An Ordinance in addition to an Ordinance in relation to Common Sewers and Drains.

Be it ordained by the Mayor, Aldermen, and Common Council of the City of Boston, in City Council assembled, as follows:

SECT. 1. It shall be the duty of the Mayor and Aldermen, in making assessments for defraying the expense of constructing or repairing Common Sewers, pursuant to the provisions of the ordinance to which this is in addition—to deduct from the said expense, such part, and not less than one quarter part, as they may deem it expedient should be charged to and paid by the City, and to assess the remainder thereof upon the persons and estates deriving benefit from such Common Sewers, either by the entry of their particular drains therein, or any more remote means,—apportioning the assessment according to the value of the lands thus benefitted, independently of any building or improvements thereon—and also to prescribe and establish the time when the proportion of the said assessments, which is charged upon persons benefitted, shall be paid.

SECT. 2. The eleventh section of an ordinance entitled "an ordinance in relation to Common Sewers and Drains," passed June 14th, 1841, and also so much of the said ordinance as is inconsistent with the provisions of this ordinance, are hereby repealed.

In the Board of Aldermen, February 19, 1844—Read and passed.

Sent down for concurrence.

M. BRIMMER, Mayor.

March 7th, 1844, in Common Council—Passed.

SEWERS IN NEW YORK.

Sewers under the streets in the city of New York are required for two purposes, viz: 1, to carry off the surface water, and 2, to drain the ground saturated by the Croton and the clouds. The wells when constantly used drained the ground, but since the introduction of the Croton, these reservoirs have been left to accumulate.

Sewers, to be useful, should be constructed in so substantial a manner as to be durable, for they are designed to be permanent.

Sewers should have abundant capacity to receive all the surplus surface water in the heaviest storms.

Sewers should be placed so low in the ground as to drain the cellars into the top of the sewer, and then, in the event of the sewers becoming filled by rain storms, the water would not inundate the basements and cellars of dwellings.

The assessments for Sewers should be apportioned among those benefitted in proportion to such benefit.

No Sewer should be constructed until a profile is first made of all the streets of the city, and not until a permanent Board of Commissioners of Sewers and Streets shall be created by the Legislature of the State. No improper use should be made of Sewers. We shall enlarge upon this subject, and give the particulars of our examination of the Boston and Philadelphia Sewers.

CHAPEL STREET SEWER.

This sewer has been disintered by order of a Special Committee of the Board of Assistant Aldermen. At Beach street, the lower half of the Sewer was found to be but four inches thick. Opposite the property of Andrew Lockwood, between Franklin and White streets, the new sewer was found to be raised above the surface of the former sewer seventeen and a half inches, and the same opposite Franklin street; and at a previous opening, still higher up towards Leonard street, twenty-two inches. This is science in construction, which is ruinous to the property on Chapel street, and should be extensively known to prevent similar doings in other streets.

ANCIENT SEWER.

The sewer in Broad street was constructed in 1717. An act of the Colonial Assembly was passed, authorising the raising of five hundred pounds by tax on the whole county, to pay the expense. The Surveyors' bills alone for the Chapel street Sewer exceeded that sum.

CANAL STREET SEWER.

This is the best built sewer in the city of New York. The builders were Thomas T. Woodruff, Esq., a member of the State Board of Croton Water Commissioners, and Gideon Tucker, Esq. We will publish the specifications of the contract.

TAXABLE PROPERTY IN BOSTON, NEW YORK AND BROOKLYN.

The amount of Real and Personal Estate taxed in the city of Boston, in 1843, is as follows:

Real Estate,	$67,673,400	62	419,575 08
Personal Estate,	42,372,600	62	262,710 12
Total,	$110,046,000		
Polls, 20,063, at $1 50,			30,094 50
Amount of Tax,			$712,379 70

The population of Boston may be stated at 100,000 inhabitants.

The Real and Personal Estate of the city of New York, as assessed in 1844, is as follows:

Real Estate,	$171,936,591 18
Personal Estate,	35,058,944 35
Capital of Incorporated Companies,	28,964,512 45
Total,	$235,960,047 98

The population of New York may be estimated at 360,000 inhabitants.

The amount of Tax imposed by the Board of Supervisors of the City and County of New York, in 1844, is $1,981,513 11, as follows:

Watch,	$265,995 72
Lamps,	120,877 69
Water,	469,340 40
Schools,	379,542 00
State,	259,556 05
Streets,	95,393 01
Mutes and Blind,	2,494 10
County charges,	388,321 05
	$1,981,520 12

We make a difference in the footing of the items from that made by the Fiscal Department, of seven dollars and one cent. This matters not for the purposes we have in view. Our purpose is to state, with great precision, the items which compose the Tax, and in such a manner, that it can be comprehended at a single view. The rate of taxation is about 86 cents on the hundred dollars.

The valuation of Real and Personal Estate, in the City of Brooklyn, in 1844, is as follows:

Real Estate,	$20,267,363 00
Personal Estate,	3,012,866 00
Total,	$23,280,229 00

The aggregate tax is $169,789 71, of which $25,608 19 is State Tax; city watch, $8,000; cleaning streets, $2,000; lighting streets, $15,000; repairs of streets and roads, $1,700; fire department, $6,000.

Population about 43,000. Average Tax in all the wards about 73 cents on the one hundred dollars. There is a city debt on which to pay interest.

The Boston Tax includes all the public improvements, with the exception of three fourths the costs of sewers, which three fourths is assessed upon the owners of property fronting on the street where the sewer is placed. In the New York Tax, the local public improvements are excluded, and collected in the shape of an arbitrary assessment.

OPINION OF THE SUPREME COURT IN AN ASSESSMENT CASE.

We shall publish the opinion of Mr. Justice Bronson and also that of Mr. Justice Beardsley, with a **Diagram,** in our next numbers. Also Mr. Webster's argument before the Court, and our review.

A SAMPLE ASSESSMENT.

A piece of ground on the First Avenue, containing eleven thousand eight hundred and seventy-five square feet, furnished the avenue two thousand eight hundred square feet and was assessed in addition thereto on the remaining nine thousand and seventy-five square feet, the sum of three hundred and twelve dollars. The same piece of ground was again assessed for opening Fortieth Street the sum of five hundred and seventy-five dollars although no portion of ground fronts on that Street; and was again assessed for opening 39th Street, eighteen dollars and seventy-five cents,

and is fraught with the most dangerous consequences. It would place corporations above the laws, and there is reason to fear that they would soon become an intolerable unisance."

CHIEF JUSTICE SAVAGE.

It was announced in the public papers that Chief Justice Savage had been appointed to represent the State of New-York in the Senate of the United States. The announcement of the appointment gave great satisfaction to the intelligent men of both parties and no one individual in this State could have been more acceptable. Judge Savage is every way qualified to fill any office in the gift of the American People.

RECEIVER OF TAXES.

The taxes of the County of New-York are now collected at one central office at an annual expense of a less sum than was formerly paid for collecting the arrears.

Gen. Kiersted, the Receiver of Taxes, is a worthy and efficient officer and the experience which he has acquired in the office, should not be lost to the public. Experience is the best schoolmaster in such an office, and politics should never be allowed to interfere in offices of this kind.

THE TEA ROOM.

The NATIVE Common Council have done themselves credit in relieving the Tax Payers from the expense of the Tea Room and the City Government from the odium of using the apartments of the Halls of Justice for a nocturnal Banqueting Room.

CLEANING STREETS.

The Native Common Council have lately contracted out the cleaning of the public streets, in districts. The price agreed to be paid is $45,000 per annum. The streets are now in an unmentionable condition and have been for some time past. We saw less dirt in the streets of Boston during a stay of three days in that city, than is now lying in Wall Street. It is probable that the contractors have not got ready to proceed. Time will illustrate.

We measured one of the dirt-carts in the streets of Boston and found the size as follows: Length 6 feet 3 inches, width 3 feet 9 inches, depth 1 foot 9 inches. This cart was drawn by one horse. The cart body was tight.

BOOTHS AROUND THE PARK.

Mayor HARPER deserves great credit for prohibiting the erection of Booths around the Park on the 4th of July.

These temporary grogeries were a nuisance.

WASHINGTON CITY.

The votes given in the House of Representatives seem to iudicate a breaking in upon party lines by the substitution of geographical lines.

SAMUEL STEVENS.

The individual whose name heads this obituary notice departed this life on the 25th ult, at the age of 61 years.

Mr. Stevens was a meber of the bar. On the announcement of his death, the various Courts of the city, as a token of respect for his memory, adjourned.

The previcus numbers of this volume contain some of the productions of the pen of Mr. Stevens, written in 1829, during the session of the Convention which framed the Amended Charter of the city. The views he there expressed in reference to the organization of the city government, are the productions of a strong and well-stored mind, anddiscover a qualification (of the individual for almost any station in the administration of government) rarely to be met with.

Mr. Stevens' views of the organization of government were in accordance with the great and fundamental principles of civil liberty, and such views as ought to possess the minds of men called by the voice of the people to fill the Executive Chair.

Mr. Stevens was appointed President of the Board of Water Commissioners and filled that office with credit to himself and with advantage to the city; and he was also, some years since, a member of the Common Council of the city, and in 1831 was Presi. dent of the Board of Aldermen.

We have, among our unpublished papers, a communication from the pen of Samuel Stevens, on the subject of the Croton Water tax, which we shall publish, with other papers on that subject, with an ccompanying note from the writer.

In the death of Mr. Stevens, the public have sustained a loss. He was a good man, and greatly beloved.

DEPUTY SECRETARY OF STATE.

Archibald Campbell, Esq., has filled ttha office for thirty-two years, and a more worthy and capable officer cannot be found in he United States.

The Municipal Gazette will be published for six months, weekly, on Wednesdays, and distributed gratuitously. It is proposed to accompany some of the numbers with diagrams of particular assessments. Also a statement of the fees in each street, avenue, or public square, accompanied by a statement of the proceedings as originated in the Common Council, whether by petition of the persons interested, or otherwise.

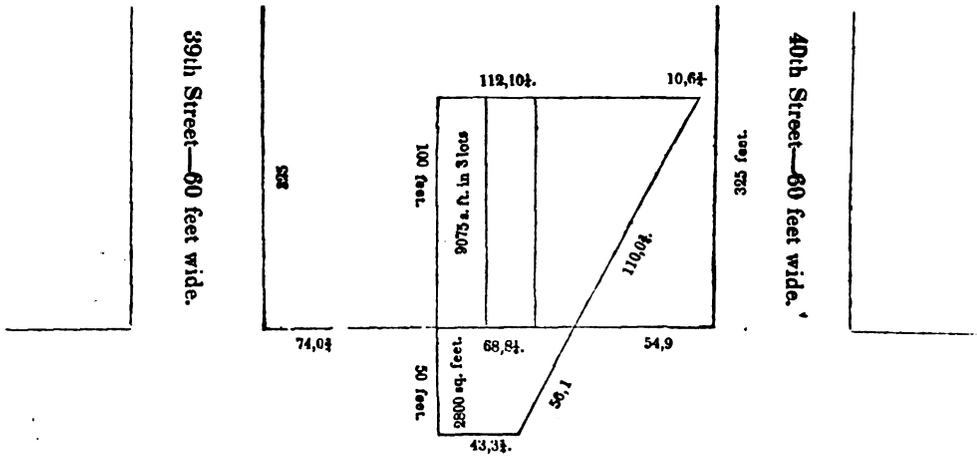
NEW-YORK MUNICIPAL GAZETTE.

PUBLISHED BY THE ANTI-ASSESSMENT COMMITTEE AND DISTRIBUTED GRATUITOUSLY.

EDITED BY E. MERIAM.] NEW-YORK, DEC. 18, 1844. [VOL. I....No. 24.

RUINOUS ASSESSMENTS ILLUSTRATED.

The accompanying Diagram shows the dimensions of a lot of ground which has been assessed more than double its value, exclusive of the interest of the assessment.



The piece of ground of which the above Dingram is an accurate description as copied from the Commissioner's Map, belongs to Anson G. Phelps, Esq. The entire piece contains 11,875 square feet, of which 2,800 is taken for the first avenue. The first avenue Commissioners assessed the remaining 9075 square feet, (besides taking the 2800 and making no award for it,) the sum of $312,00 for benefit. The Commissioners, for 40th Street assessed the 9075 square feet for benefit $575,00, although none of this ground fronts on 40th Street. The Comissioners for 39th Street assessed the same 9075 square feet, $18,75 for benefit, making the three assessments in all $905.75 The interest upon the 1st Avenue assessment in $124.03. The interest of 40th Street assessment is $242.14. The 39th Street assessment is not due, making the assessments and interest to the 17th Dec. 1844, $1271.92. The ward assessors in making the assessments for Taxes in 1844, valued this property at $450.00, which is more than it will sell for. We shall present this diagram with further remarks in our next number.

The Commissioners fees in the First Avenue assessment are stated in the written receipts at $700, besides $123.25 cents room hire, &c. This is pay for each Commissioner $233.33 1-3, and is pay for 58 1-3 working days, equal to 9 weeks and 4 1-3 days each. The ground covered by the assessment was farming land, and is only 2758 feet in length, 631 feet 6 inches in width.—The awards amount to $6621.80. Only one building was in the line of the avenue, for which the owner was awarded $15—, and $25 paid the appraisers for making this valuation! This whole assessment of the 1st Avenue could have been made in two days by competent persons.

The Commissioner's fees in 39th Street are stated at $912.00, which is $304 for each Commissioner, equal to pay for 76 working days, or 12 weeks and four days, for each and all of the three Commissioner's besides room hire, &c., $113. The ground covered by the Assessment Map is 9433 feet by 197 feet 6 in. The awards $6901.28.

The Commissioners fees in 40th Street, are stated at $840.00. This is pay for each Commissioner $280, which is compensation for 70 days services, equal to 11 weeks and 4 days, constant employment, besides $193 room hire, &c. The assessment district is of the same size as that of 39th, as above. The awards $5164.00.

The aggregate time charged by the Commissioners in the three streets is eight months and twelve and one-third days.

The Common Council never at any time passed any resolution to authorise an application to the Supreme Court for the appointment of Commissioners of these Streets, and the reports of the Street Committees which were adopted by the Common Council, and approved by the Mayor only contemplated opening all the Sts. and Avenues up to and including 42d Street by one Commission, that, (as they state in the report,) nineteen-twentieths of the expense of opening in detail may be saved, and besides there will be but one assessment on any particular lot.

We shall follow up this subject in our next.

The Surveyor's fees in 1st Avenue are $373.37. This ground had all been surveyed and maps made of it by the Commissioners appointed by the Legislature in 1807, copies of which are on file in the office of Secretary of State at Albany, and at the City Hall, New-York, to which we refer.—The same ground had also been previously resurveyed and maps made of it for avenues, &c. The pay for the Surveyor is $4 per day, including his assistant. This is compensation for 404 days and five hours, equal to eleven months eighteen days and five hours, counting twenty-six working days to the month. Had the U. S. Government Lands been charged by the Surveyors at this rate, all the money coined since the deluge would not be equal to the amount of the Surveyor's Bill.

The Attorney's fees and Court charges in 1st Avenue are $390; 39th Street $1187.74, 40th Street $553.90, in the three Streets, $2131.64. The Clerk of the Supreme Court at Albany, in his Report to the Legislature in 1843, (see Senate Documents, No. 81 of vol. 3, pg. 23 to 28,) says: "*no Court charges appear on any of the files or records of this office.*" The Attorney's fees are $363.36, short of the salary of the Chancellor of this State for a whole year.

Mr. Flagg is a practical man and has been a faithful student in the school of experience. It is a matter of surprise that none of the Representatives of the county of New-York in the Legislature have not given attention to this matter. If Stephen Allen had had a seat in the Senate, this inequality would have been equalized long ago.

THE CROTON TAX.

The Legislature in 1841 passed an act containing the following provision for assessing the interest of the Croton Debt:

"§ 6. It shall be lawful for the Mayor, Recorder and Aldermen of the city of New-York, as the Supervisors of the city and County of New-York, of whom the Mayor or Recorder shall be one, from time to time and as often as they may deem necessary, to order and cause to be raised by tax on the estates, real and personal, of the freeholders and inhabitants of, and situated within the said City, and to be collected such amount of money as shall be requisite to defray the interest upon the water stock of the city of New-York."

"§ 7. The said tax shall be assessed and collected in the same manner as now provided by law for the assessment and collection of taxes in the city of New-York."

In 1843 the Legislature passed an act amending the sixth section, which amendment is as follows:

CHAP. 231.

AN ACT in relation to the Croton Water Works in the city of New-York.

Passed April 18, 1843, by a two-third vote.

The People of the State of New-York, represented in Senate and Assembly, do enact as follows:

§ 1. It shall be lawful for the mayor, recorder and aldermen of the city of New-York, acting as the supervisors of the said city, to order and cause to be raised annually and to be collected, such amount of money as shall be requisite to defray the interest upon the "water stock of the city of New-York," by tax on the estates, real and personal, of the freeholders and inhabitants of and situated within such portions of the said city, as may have been from time to time brought into use by the regulating and grading of the streets and avenues, and the laying down therein the necessary water pipes, and that may be designated the "water district" by the mayor, aldermen and commonalty of the city of New-York, (acting as the aforesaid supervisors,) and that until such designation shall be made, the water district shall be comprised within the following limits, to wit; all of the said city which lies south of a line commencing on the west bounds of the said city opposite the middle of Twenty-third-street, running thence easterly on a straight line through the middle of said Twenty-third-street to the middle of Lexington-avenue; thence northerly through the middle of Lexington-avenue to the middle of Twenty-eighth-street; thence easterly through the middle of Twenty-eighth-street to the east bounds of said city.

§ 2. The sixth section of the act entitled "An act to provide for supplying the city of New-York with pure and wholesome water," passed May 26, 1841, is hereby repealed.

§ 3. This act shall not in any manner be construed to affect any act done, or right accrued, proceeding, suit or prosecution commenced or pending under the said sixth section of the act hereby repealed.

This authority to levy a tax as provided in the sixth section is badly expressed, although restricted in the seventh section to an annual tax. The words "from time to time," should not have been used. The section is also wrong in this: an assessment on unimproved land which is only benefitted in a trifling degree is authorised to the same extent as on buildings which are greatly benefited by the protection afforded against damage by fire. Merchandize is not taxable by this law if the owner is indebted therefor, although the merchandize is greatly benefited. The Croton Tax is as much a local assessment as that for constructing a sewer, and why not assess it on the same principle of requiring the parties enjoying the benefit to pay a tax equal to that benefit?

There seems to be an obscurity in the sixth section which we think is not removed by the seventh section. Personal estates belonging to inhabitants of the city situated without its precincts, seems not liable to this tax, although the tax is to be assessed and collected as now provided by law for the assessment and collection of taxes in the city of New-York.—The amendment is bungled and conflicts.

Bank Capital should not be taxed for the Croton, neither should personal property owned by citizens of the city of New-York which is beyond its precincts, be taxed for this local expenditure but the tax should be upon buildings, goods, wares, and merchandise to the extent of the benefit enjoyed by each, and then if there remains a sum unprovided for, that sum should be assessed the same as the other county taxes, and if it is found that the benefit exceeds the interest, the excess should be applied annually to *cancel* an equal amount of the stock at its then market value. No sinking fund should be created to loose the money and leave the Bonds unpaid at maturity. It is an exceedingly difficult matter to frame a tax bill that will operate equally, but it is not difficult to ascertain what benefits the owners of personal property have in the lesser premiums on fire risks. Merchants insure on the amount of merchandize without regard to indebtedness, and the benefit of the Croton accrues to such in the same way. We place these remarks before the people for examination and consideration, and shall continue to follow up this subject in the succeeding numbers until it is disposed of by the State Legislature.

The Streets of Boston are cleaned at an expense of about nineteen thousand dollars per annum.

MANNER OF MAKING ASSESSMENTS OF TAXES IN BOSTON.

In Boston "all goods, chattels, money and effects wheresoever they may be, all ships and vessels whether at home or abroad, all money at interest due to the person to be taxed, more than he pays interest for, and all other debts due to them more than they are indebted for, all public stocks and securities, stocks in turnpikes, bridges, and all other monied corporations, whether within, or without the State, and also income from any profession, trade or employment, or from annuity, unless the capital of such an annuity shall be taxed, and all other property," &c., are assessed by the Assessors of annual Taxes on the first day of May, being the day fixed by law. It will be readily seen that the possessor of property is taxed without regard to indebtedness, and we were informed by the Permanent Assessors that property was sometimes three times assessed. The Importer for the note of the Jobber, the Jobber for the note of the retailer, and the retailer for the goods in possession on the first day of May.

Commission Merchants are assessed for income by Commissions on Sales. A commission merchant selling one million of dollars worth of goods per annum, at a commission of five per cent. would be taxed on $50,000. An individual owning personal property to the amount of one million, producing an annual income of $50,000 is taxed on a million, or twenty times as much as the commission merchant. This is unequal.—Commercial and mercantile firms are taxed in Boston. A merchant in Boston possessing on the first day of May, in merchandize, one million of dollars for all of which he may be in debt, would rate as high on the tax list as a merchant of New-York owning a million of dollars free of debt.

The holders of United States government stock are not taxed in Boston for such stock. Other stocks are assessed at the rate the respective stocks are worth in the market on the first day of May. The office of permanent assessors in Boston is kept in a large room and very convenient for the purpose for which it is used, and the business of the office is done in a very systematic manner. We are indebted to the permanent assessors of Boston, Messrs Norwood, Sargent, and Jackson, for much valuable information, furnished us while with them.

BOSTON WHARVES.

The Wharves in Boston, with the exception of two, are private property, and some of them very productive. They are kept in such good condition that goods landed from vessels are kept clean. Each barrel of flour pays two cents wharfage, whether going out or coming in. The vessels do not pay wharfage, unless they lay an unusual time at the wharf.

STREET PAVING.

The streets in Boston are paved at the public expense, and the pavements kept in good repair. The side-walks are made by the owners of property fronting on the street.

NEW-YORK CITY FINANCES.

In order to have a right view of the fiscal concerns of the New-York Corporation we must select some point to start from. We have before us Mayor Varian's Message to the Common Council when he entered the Mayoralty in 1839, known as Document No. 1, of May, 1839, in which he complains of the Whigs for running the City in debt, and gives the figures to sustain his statements.—We copy from his message of May 14th, 1839, his own words, as follows:

"The practise which has *within a few years* grown up in the Common Council, of borrowing large sums of money under that provision of the Charter which authorises temporary loans in anticipation of the annual tax, I consider injurious to the financial interests of the city, and not contemplated by provisions of the charter under which it is done. By a reference to the Comptroller's report, it will be seen that during the year 1838, temporary loans, amounting to EIGHT HUNDRED THOUSAND DOLLARS were made by him, in addition to the sum of *Four hundred and eleven thousand, nine hundred and seventy-five dollars and thirty-eight cents*, borrowed from the City Acqueduct, &c."

"These loans could, by the Charter, only be made in anticipation of the tax of 1838, as the tax of 1839, was not authorised by the legislature, and the amount so borrowed was more than the whole tax levied. Of this amount so borrowed in 1838, there still remains unpaid the sum of $504,271.27, and since the commencement of 1839 the borrowing of $300,000, has been authorised by resolution as a temporary loan, while there remains unpaid of the tax of 1838, comparatively a small amount. Such a system, if continued, must eventually end in direct violation of the provisions of the charter, and in the accumulation of a debt, which is paid from one year to another by temporary loans, and which will always be a heavy burden upon the financial department of the city."

"The provision of the charter was expressly intended to prevent the Common Council from incurring such debt, and to confine the expenditures of the city to its annual income; and the authority then given to borrow money in anticipation of the tax, was only intended to defray the ordinary expenses of the city, in cases when, from unforseen occurrences, the ordinary collection of taxes had not been made to a sufficient amount."

"Connected with this subject is another, worthy of your examination. A large amount of money is annually received by the Comptroller in trust, to be repaid to others. I refer to monies received on assessments for opening, regulating and paving streets, the whole of which is to be repaid to contractors or other persons entitled thereto. The money however is paid into the Treasury and applied to the general purposes of the city; and when called for, it becomes necessary to provide means for its payment, by temporary loans or other expedients. The union of these funds with the general funds of the city, tends to confusion in the public accounts, and at times to place at the disposal of the public authorities large sums of money, and thereby to induce more extravagant appropriations than otherwise would be done if these monies were kept separate from the common fund, and applied solely to the purposes for which they are received by the Common Council."

This language deserves a careful reading. Mayor Varian was several years a member of the Common Council, and was for some time President of the Board of Aldermen.

The provision of the charter to which Mr. Varian refers, is in these words:

§ 19. "The Common Council shall not have authority to borrow any sums of money *whatever*, on the credit of the Corporation, except in anticipation of the revenue of the year in which such loan shall be made, unless authorised by a special Act of the Legislature." *Session laws of* 1830, *ch.* 122.

Eight months after this, as appears by the memorial below, the Mayor states to the State Legislature that this floating debt had increased to the sum of $1.700.460., and there were no means of payment. Here is his own statement, under his hand and the corporate seal, as follows:

"To the Honorable the Legislature of the State of New-York.

"The memorial of the Mayor, Aldermen and Commonalty of the City of New-York, *Respectfully represents*,

"That by reason of the great expenses which they have incurred in consequence of the various improvements in the said city, they have found the ordinary revenues of the Corporation altogether inadequate to meet the demands which these expenses have produced, and that they have therefore from time to time been obliged to issue their bonds under their Corporate Seal, to defray some of these expenses, as a means of mere temporary relief. The amount of this floating debt on the 31st of December last amounted to ONE MILLION SEVEN HUNDRED THOUSAND, FOUR HUNDRED AND SIXTY DOLLARS, and can probably be reduced from anticipated sources of revenue to *one million three hundred thousand*.

"The amount to be raised by the annual tax bill will be required for the ordinary expenses that will accrue pending its collection, and will therefore furnish no relief in liquidation of the floating debt.

"Your memorialists therefore pray your honorable body will grant *to them authority* to fund such amount of the said floating debt as they may deem expedient, not exceeding *one million three hundred thousand dollars*, by the creation of a six per cent.

incur a penalty of *one per cent. per month, to be reckoned back to the day the assessment rolls were placed in the hands of the Receiver*, which was early in October, making near *six per cent.*

The office of the Receiver of Taxes is in the basement of the puplic buildings in the rear of the City Hall. The office is conveniently fitted up, and well arranged. The Natives deserve great credit for retaining General Kiersted in office as Receiver of Taxes. He is a worthy man, and a faithful public officer. General Striker, who is being plundered of his Estate by the odious assessment system, has been appointed by the Natives, Deputy Receiver of Taxes. The grey headed men are the right persons to hold public offices. Gen. Striker is a good public officer, and the Natives have done an act of Justice in holding out the helping hand to the veteran sufferer, affording him an employment in a station which he can render service to the public and at the same time obtain the means for the support of his worthy family.

PUBLIC MEN AND PUBLIC MEASURES.

There are very many citizens who voted the American ticket at the spring election who were the advocates of an independent party who should be unmixed with the two great political parties which keep the country in a constant state of excitement, and whose patronage in the shape of appointments to office, when successful, is dealt out without stint or measure to the noisiest partisans of their own clan, without regard to ability or any other necessary qualification.

On the 29th of December, 1842, a select meeting of Citizens was called at the Stuyvesant Institute, in Broadway, which was attended by gentlemen of high standing of both political parties. It was a cold stormy night, and the snow and wind blew furiously, but notwithstanding the inclemency of the weather a very respectable number attended. Abraham Van Nest, a democrat of high standing presided, and among the members was Philip Hone, Abraham G. Thompson, Peter Schermerhorn, Jonathan Goodhue, Peter I. Nevius, Thomas T. Woodruff, Hickson W. Field, Burtis Skidmore, Saml. Stevens, Charles H. Russell, Wm. B. Astor, Peter Cooper, Peter Embury, James Fellows, Arthur Bronson, James I. Jones, John R. Murray, and gentlemen of that stamp, who neither wanted office, or the emoluments of office. A second meeting took place at the same place on the 5th of January 1843, at which Jonathan Goodhue, a whig of high standing, and a member of one of the oldest and wealthiest Commercial firms of the city, presided. This meeting, like the first, was attended by gentlemen of both political parties. Subsequent to this, a public meeting was called at the Merchant's Exchange, on the 6th of March, 1843, at which Preserved Fish presided as Chairman, and Abraham G. Thompson, Peter Cooper, Charles H. Russell, Peter Embury, Wm. B. Crosby, George Griswold, Peter Schermerhorn, Peter Lorrilard, Jr., Jonathan Goodhue, John Haggerty, Peter I. Nevius, and Abraham Van Nest, Assistant Chairmen.

It will be seen by reference to the names stated, that the meeting was anti-political; that the officers which presided were of about equal numbers of both political parties, and the gentlemen named were all in their seats. These meetings had reference to the abuses of the Corporation under the administration of both political parties, and to invoking the interference of the State Legislature in correcting these abuses, and to the selecting of suitable persons without regard to politics, as candidates for public office.

The first two meetings were convened by a printed circular from the Anti-Assessment Committee, and the last by a public call, signed by Jonathan Thompson, James McBride, Brown, Brothers & Co., C. & L. Dennison, & Co., John Anthon, Elisha Riggs, William Gale, Hickson W. Field, William and John James, and several others of that class of Citizens.

THE STATE TAX.

We have before us a Report of the State Comptroller to the Legislature of 1840, giving the aggregate valuation of the real and personal property in all the counties of this State as made by the Assessors in 1839. We have selected from the list eighteen of the wealthiest counties of the State, the taxable property of all which are stated at less than that of the county of New-York, as follows:

Orange,	11,420,916.00
Westchester;	10,718,706.00
Albany,	13,626,100.00
Genesee,	11,569,268.00
Oneida,	12,138,770.00
Oswego,	8,541,000.00
Rensaleer,	11,245,113.00
Onondago,	16,768,635.00
Ontario,	14,140,793.00
Kings,	31,103,113.00
Monroe,	15,731,524.00
Cayuga,	12,569.075.00
Livingston,	11,246,124.00
Columbia,	8,878,392.00
Erie,	12,238,630.00
Queens,	10,781,650.00
Dutchess,	18,351,797.00
Jefferson,	7,559,535.00

These eighteen counties possess more than double the actual wealth of the county of New-York, and notwithstanding pay a much less mill or State tax than is paid by New-York. The shortest way to remedy the difficulty, is for the Legislature to pass an act to authorise the State Comptroller, to adjust the New-York tax by the payment of such a sum into the State Treasnry, as is an equitable proportion.

N. YORK WATCH DEPARTMENT.

The New-York Watch Department numbers 1100 men, and costs annually about $266,000.

MILITARY FINES.

The imposition of Military Fines is an abuse of great magnitude, and may be considered a nuisance of a very odious character. We intend to examine the system in detail, and to discuss it fully.

BROADWAY.

The pavements in Broadway are continually out of order, from the great travel of omnibusses in this great thoroughfare.—There is a plan of Rail-Road on foot for Broadway, which, if carried into effect, will become a great nuisance, destroy hundreds of lives, and injure the property on the street, to a vast amount, and besides there is no right in the corporation to make such an use of the street. The Macadamized road in Broadway should be paved upon with substantial round stones, of large size, for at present, in dry weather, the dust is very annoying, and in wet weather the mud is intolerable. This piece of road is in the near neighborhood of Alderman Cozzens, and we look to that energetic public officer to remedy the complaint of a bad road which lies in the path to his seat in the Council Chamber.

THE INCREASE OF TAXABLE PROPERTY.

The Assessors' returns for 1843, amounted to $227,997,090 58, and in 1844, to $235,960,047 78, making an increase of 1844, over 1843, of $7,982,057 20. This increse is mostly in the valuation of real estate, and not in additional buildings erected. The taxable personal property in the Sixth Ward is less in 1844 than in 1843, owing to the fact, that in 1843, one individual was taxed in that ward an amount equal to about one sixth the whole personal tax of the ward who, in 1844, was taxed in the 15th Ward, having removed his residence to that Ward. In 1843, Mr. John Jacob Astor was taxed for personal property in the 8th Ward, and in 1844 in the 12th Ward. He should have been taxed in the 12th Ward in 1843. This makes a change in the amount of personal property taxable in the 8th and 12th Wards, as compared with 1843. In the 3d Ward the assessment list of personal property was increased in 1843, by assessing Henry and Daniel Parish for half a million of personal property. Mr. Henry Parish was during the whole of that and a part of the previous and succeding year, a resident of Paris, in France, and was not taxable in New York, except for real estate, and Mr. Daniel Parish was owner of a large amount of stock of the Government of the United States, which is not subject to taxation. The Farmers' Loan Company in the 1st Ward was taxed by the Supervisors at two millions capital, which that institution once possessed, but which has been reduced by losses to about one fifth that sum. The Ward Assessors assessed the Company for what they possessed at the time the tax was imposed, *which is right and proper*, but the Board of Supervisors, without the shadow of authority in the premises, from the Statute, assessed the Compaay for what it had lost!!! A Company once possessing a million, and subsequently losing nine hundred and ninety-nine thousand of the capital, would, (according to this doctrine,) be assessable for the remaining *thousand*, as for a million! What nonsense! Public officers can only exercise the powers conferred upon them by the Statute. The Supervisors are not authorised by law to make assessments, but to confirm those which the Assessors have made, and to correct those which shall be complained of as erroneous by the party agrieved. We hope the Natives will not follow in the footsteps of their predecessors, and disregard the law in this.

PUBLIC PRINTING.

The price paid for printing the Comptroller's Report of 1840, consisting of 135 pages, was $1107.75 One hundred and fifty dollars would have been a fair price for the work. This was the patronage of the Democratic Corporation. The Whigs paid four hundred dollars for printing the Tax Bill, worth only sixty-six dollars. We shall chronicle the prices paid by the Natives. The party in power is obnoxious to censure for not having months ago contracted for the public printing. We are sorry that they should have omitted this duty. We mean to lithograph the prices of public Printing, and keep them before the tax payers.

CITY DELEGATION TO THE LEGISLATURE.

The delegates elected to the Legislature, from the County of New York, are highly respectable. We notice among the names of the members that of Abraham G. Thompson, Jr., son of the venerable Jonathan Thompson, formerly a distinguished Collector of the Port of New York. He is a good son of a worthy father. We also notice the name of D. E. Wheeler, an able lawyer, and at present a member of the Board of Education. Mr. Wheeler is a man of great firmness of purpose, and the right sort of a man for the Assembly. Mr. Morison is another of the members. From our acquaintance with Mr. M., we feel assured his constituents will be honored in their representative. Mr. Oakly and Mr. Du Puy also in the delegation, are young men, worthy, intelligent, and highly respectable. The other members of the delegation we have not the pleasure of a personal acquaintance with, but those who know those gentlemen speak highly of them. Mr. Folsom is elected from the First Senatorial District, to the Senate. Mr. F. is a worthy citizen, and the district will be honored in their Senator.

John M. Bradhurst was nominated on the Democratic ticket for Assembly, but he declined the nomination. Had he accepted the nomination, he would have been elected by a large majority. He is a man of great moral worth, and of firmness of purpose. Mr. Bradhurst was Chairman of the Citizens' Committee that was delegated by the public meeting held at the Merchants' Exchange to appear before the Legislature in reference to taxes and assessments in 1843. Mr. Bradhurst's knowledge of public affairs, and the great pecuniary interest he has at stake, will impose upon him the duties of public office. He has not the right to decline. There were several names on the Democratic ticket who were in favor of assessments. These persons were in a remote minority. The Whig ticket contained some names of persons who had been active in assessments, and who were therefore objectionable. If the Democrats had put on their ticket such names as John M. Bradhurst, Saul Alley, Peter Cooper, Hickson W. Field, Thomas Jeremiah, John E. Ross, and others of like standing, they would have had no difficulty in succeeding. The party which nominates the best men to represent the City will be successful.

MAYOR HARPER.

The administration of the executive department of the City government by Mayor HARPER, is approved by the intelligent citizens of New York, and it may be truly said that he is a very popular Mayor. The good order which was preserved on the day of general election in November, witnesses the efficiency of the arrangements made by the Mayor on that occasion.

VAULT GRATES.

At this season of the year, the grates over the openings of the vaults in the side walks, are often loose, and serious accidents happen from their neglect. The supernumerary of the Ward, to wit: the Street Inspector, should be required to attend the examination of the grates, and for neglect should be made to respond for the consequences.

WATCHMEN.

Twenty four mounted Watchmen would be of more service to the City of New-York, than five hundred footmen. The expense of horses, equipments, and keeping, would not exceed in amount per annum, the pay of as many foot Watchmen. A force of this kind would be able to look after the Watchmen, and if one of these guardians of the night should be found asleep, a trumpet could be sounded to wake him up.

THE POLICE BILL.

The public mind is kept agitated by the frequent attempts of the Common Council to frame a Police Bill. The two Boards would have been far better employed in devising means to bring the assessment depredators to account for their misdeeds. The little urchins that steal wood to keep from freezing, are hunted up, while the great assessment depredators are left undisturbed.

BOSTON SEWERS.

The following is a copy of a letter received from Charles B. Wells, Esq. Superintendant of Sewers of the City of Boston, an experienced and intelligent public officer.

City of Boston.

Office of the Sup't of Common Sewers, December 10, 1844.

E. MERIAM, ESQ.

Dear Sir—The packages by Adams & Co. were duly received and distributed as per directions. Allow me Sir, to thank you for your prompt attention to my request; also your favor of the 27th ult. came duly to hand. An engagement in our Court of Common Pleas, as one of the Jurors, added to sickness in my family, must be my apology for not acknowledging your kindness before, as also the queries propounded in your last communication. Our citizens are this day to take the subject of water into consideration, and give in their votes for or against. Our annual election for City Officers, also takes place this day. I shall loose no time upon the organization of the new government, on the 1st Monday in January, of laying your remarks upon the water question, &c., before the proper officers. Your remarks seem to me to be very just, and are very conclusive in my own mind. In relation to the subject of Common Sewers, I would say that as it regards the price of building drains, it depends very much upon the depth we have to go, and whether the street is paved or *unpaved*. I should think that our 20 inch barrel drains laid in cement, from 7 to 9 feet deep, would cost from 7s. 6d. ($1 25,) to 9s. ($1 50,) per foot; a great deal depends upon the nature of the soil through which we have to dig, whether it is liable to cave off and fall into the trench. Cases have occurred where the trench has been dug three feet wide, and from the pressure from the bank, or from striking a bed of gravel below, it would cave off six feet. Much also depends upon having a dry bottom to lay the drains in. The timber drains which we lay are from two to four feet in the clear. I use the best dimension timber for the sides, for which I pay from 12s. to 14s. per M., according to the state of the market. I only use the timber drains where the tide has free inlet and outlet, and where the timber will be wet with the salt water, which of course will preserve it for many years. A plan which I have adopted to clear out some of our large drains which lie very deep, and flat, is, to make in our reservoir water-tight gates, which I shut down when the tide is in, and open at low water. This large body of water rushing, out carries with it an immense quantity of sediment and mud, and is attended with very beneficial results, at little cost.

As to the price of bricks, I am paying this season from $6 to $6 50 per thousand for a fair article of hard burnt. It takes about 50 bricks to a running foot for top and bottom of a barrel drain 20 inches in diameter. As to the cess pools or mud catchers, I explained that in our interview last month. I place them at distances of two hundred feet or thereabouts apart, and always at the intersection of drains. These I sink two or more feet below the bottom of the sewer, and top them up to a level with the pavement, with a stone curb around them, and cover the tops with oak plank. They are cleaned out twice a year or oftener, as occasion requires. In relation to the outlet of our Sewers, there is always more or less of offensive matter discharged into the docks from them, and more especially since the practice is so universal of building water closets to all the new dwellings. The gas arising from this discharge is so great as to discolor the paint of the vessels and newly painted houses. It also turns the silver and plated ware on board the vessels. I am decidedly opposed to the contents of water-closets being carried into the drains; but I see no great objection to the liquid contents of the vaults being carried off by suitable strainers attached to the vault, *provided* nothing else escapes with it. Any further information I can furnish to you or to your Committee, I will cheerfully do.

On the subject of assessing the cost of our Common Sewers, I entered fully into that subject at our interview in November last. I think of nothing more that can be said on that subject. Allow me once more to thank you for your attention in forwarding the documents.

With much respect,
I am, &c., your ob't
CHARLES B. WELLS, Sup't.

CHAPEL STREET SEWER.

The following is a copy of a remonstrance presented to the Board of Assistant Ald., June 13th, 1836, prior to any contract being made for destroying the Chapel Street Sewer, and which is now on file in the office of the Clerk of the Common Council.

"To the Honorable the Common Council of the City of New York:

"Your Memorialists, owners &c. of lots on Chapel Street, and streets intersecting the same, beg leave most respectfully to represent to your Honorable body, that they have learned with much surprise and regret, that an ordinance has been passed by the Common Council for raising and grading of Chapel Street, and for constructing a Sewer through the same.

"Your Memorialists are free to express themselves in plain but respectful language on the subject, and to remonstrate against a measure uncalled for, unnecessary, and wholly disapproved of by those interested in the property affected by it.

"Chapel Street, from Franklin to Canal Street, is in the best possible condition, wide, well paved, and well drained by a large and well constructed Sewer, which fully answers every needed purpose.

"Already have your Memorialists been repeatedly heavily assessed for improvements in Chapel Street, and now another assessment, very heavy, is laid upon them for widening Chapel Street below Leonard St., and still another is sought by this contemplated alteration here referred to, which will be worse than useless, and moreover of very great expense, and burthensome and injurious in the extreme to your Memorialists, who now look to your Honorable body for relief in the premises.

"The expense of filling, grading, paving, &c., and constructing a new Sewer will exceed fifty thousand dollars, and will fall on a very few persons, who consider it a cruel and oppressive measure.

"The damage to the property of your Memorialists will exceed one hundred thousand dollars. Their cellars and basements will be destroyed.

"Many of your Memorialists have resided in Chapel Street and Streets intersecting it ever since the present Sewer has been in use, and they are satisfied and fully convinced that it answers every needed purpose.

"The signatures to this Memorial embrace more than three fourths the persons interested in the property, which is situate on that part of the street which is designed to be altered.

"Your Memorialists have noticed an advertisement of the Street Commissioner, inviting proposals for building a Sewer in Chapel Street, about half the size of the present one, and are anxious that the same should be suspended altogether, and also that the ordinance here set forth should be repealed.

"And your Memorialists, &c.

"There are not more than five persons interested in all the property affected by this contemplated alteration, who are in favor of and more than 100 opposed to it."

"Mr. Stephens called to subscribe, (3 houses.)"

The Street Committee of the Board of Aldermen in their Report, made April 25th, 1836, in reference to re-grading of Chapel Street, say:

"There is, however, another branch of this subject, which the Committee deem it their indispensable duty to lay before this Board which relates to the Public Sewer in Chapel Street."

Again. The Committee in their report say, "*and although this branch of the subject was not specially referred to them*," &c. See proc. Bd. Ald. Vol. 10 pg. 471.

On the 27th of June 1836, the Street Committee of the Board of Assistants made the following Report:

"The Street Committee of the Board of Assistants, to whom was referred the memorial of E. Meriam and others, for a repeal of the ordinance for the raising and grading of Chapel Street, and for constructing a new sewer therein *Respectfully Report*,

That this subject has recently been before the Common Council, and was referred by them to the Street Committee of their respective Boards."

This statement of the Street Committee of the Board of Assistants as to the sewer, is plainly contradicted by the above extract from the report of the Street Committee of the Board of Assistant Aldermen.

The Committee conclude by saying:

"It would be exceedingly improper and unsafe as a precedent, and altogether unnecessary and unwise in point of fact, or in reference to its results to open anew the subject of a law, and commence a review of its merits immediately after its passage."

Again the Committee say:

"And there does not appear in reference to the object and operation of the above ordinance any good reason for repealing the same," *and then wind up by saying:* "Resolved, That it is inexpedient to grant the prayer of this memorial, and that the memorialists have leave to withdraw the same." "June 27th, 1836." See Doc. of Bd. Asst. Ald. vol. 8, pg. 57.

The following testimony taken before Ald. Tillou, of the Fifth Ward, in 1843, in which Ward Chapel Street is situate, is from Doc. No. 76 of 1844 of Bd. Ald., and illustrates our position:

SMITH BLOOMFIELD, sworn.—Constructed the sewer in Chapel Street, which existed previous to the present sewer in that street. The sewer I constructed was six feet, or six feet six inches, (I am not sure which) both wide and high, the bottom was paved with free stone flagging, lowest in the centre; a descent from each side, about six inches on the average; a little less at the end near Leonard Street; the side walls were of hammered stone, laid in courses, about two feet thick at the bottom, twenty inches at the top, sloped off to the top of the curve, to form a roof. The arch was eight inches thick of brick; the bottom was laid on timbers; first a floor laid, close together, then long stout timbers laid the whole length, as wide as the wall, to lay on; about from six inches to a foot of stone work then laid on the floor; the flagging was then laid on it, and bedded in mortar; the descent was about two inches to one hundred feet; it was about two feet to the whole length; the whole length, I think, was about 1100 feet; it tapered off in size, from Canal Street to near Leonard Street, both in width and height; it was four and a half feet high, and five feet wide at near Leonard Street; cannot recollect the precise year I built it; it was previous to 1820; it was a perfectly substantial sewer, it answered the purpose of draining the cellars excellently; I previously owned two houses, one in Chapel Street and one in North Moore Street, which I could not occupy, on account of the water; after the drain was built, the cellars were quite drained in these houses, and indeed in all the cellars adjacent. I think the sewer I built, cost about eleven thousand dollars; I think at the rate of six and a half dollars per foot, that is to say without the timber; I saw the present sewer; saw it when it was building, and saw it to-day; measured to-day the relative elevation of the bottom of the present and the bottom of the old sewer; the inside surface of the bottom of the present sewer, I find to be about twenty inches, opposite Mr. Riley's, above the inside surface of the sewer I built; when they were building this sewer I frequently passed and saw the old one opened; I recollect only one place where the bottom of the old sewer appeared to be settled, and that was a place near Canal Street; but near North Moore and Franklin Streets, it was perfectly clear; the ground on which it was built was not very good, but the heavy timbers on which it was built were used to obviate that; the ground was so near York Street, not near Franklin Street; the present sewer, in its form, is circular; the present sewer, in its shape, is most calculated to be filled up with mud; the old one not so much; it is not as large as the old one; the old one would, I should think, hold at least one-third more than the new one; in the new grade at Leonard Street, the street was raised about three feet, it tapered off towards Canal Street; never heard any complaints of the old sewer not carrying the water off to Canal Street sewer; since the new sewer was made, water has been in the cellars; in that of Mr. Lockwood, who had to cement them; in those of Mr. Tucker; have heard great complaints about it; no question at all but the cause of this is the elevation of the bottom of the new sewer; I should say, if the cellars were higher than the bottom of the sewer, that they would be dry; in heavy rains they might get some in, but they would soon get dry again, this even without lateral drains; the filling up of Chapel Street, would have no effect in driving the water into the cellars, the sewer would, if low enough, drain it off; I except one place, near Walker Street, where it is clay soil, including about one hundred feet, where it is solid land, particularly the upper side near the Park; I informed Mr. Banks, before the new sewer was made, exactly of the operation of rising the sewer on the ground, and stated to him that the effect would be to throw the water into the cellars, and at his request, I went to the Commissioner's Office to talk about it; I was never before examined as a witness before any Committee of the Corporation; I owe no assessment for the building of the sewer; I have paid all assessments for every thing that was against me; I think the old sewer could not wear out; the new sewer I think could; I mean that the present sewer is not by any means as substantsal as the old one, nor as well calculated to answer the purpose; if the present sewer was removed, and the old one built upon, the end would be answered; the present one, I think, is entirely the cause of the cellars being filled with water; I base my opinion upon the bottom of the present sewer being elevated higher than the old one; I know that Mr. Lockwood had to make a lateral sewer, a considerable length, so as to get the water out of his cellar; in heavy rains, I have no doubt, the sewer will be quite full; I think the tide ebbs and flows into the sewer at Canal Street, at very high tides, but will not affect the cellars; I do not think the present sewer is sufficient to drain the cellars, though sufficient to carry off the water; if there are lateral drains, the water will get into the cellars, unless safety valves are used.

SMITH BLOOMFIELD.

JOHN SHEPHARD, jr., being sworn, deposes as follows:

I reside at No. 155 West Broadway; am a boat builder; I am acquainted with the old sewer and the new sewer on Chapel Street; the new sewer was built on the old sewer; as near as I can recollect, they laid a stone on the gutter or centre of the bottom of the old sewer, and then laid brick end ways on the top of the stone; the bottom of the new sewer was about a foot above the bottom of the old sewer; I was inspector of the work at that time, appointed by the Street Commissioner and Alderman Banks; I was in the habit seeing the work, while the new sewer was progressing almost hourly, very frequently during every day; when they got somewhere about between Leonard Street and Riley's, near Mr. Riley's, they were

tearing away the old sewer, I stopped Mr. Ogden, and said the old sewer was a better sewer than any new one they could build; I stopped the work; he asked me if I vetoed the work, I said I did, so they knocked off the men. Mr. Ogden then went for Mr. Price, who went for the Street Commissioner, who came and enquired what the matter was. I told him the old sewer was too good to be taken up; he answered, so is the profile, so is the contract, and so the work must go on, and accordingly the work did go on; so far as my knowledge extends, throughout the whole line of the old sewer, it was substantial; far better than the new one; and I so stated to them at the time; it was said the old sewer had sunk at the bottom, I could only find it so in one or two spots, which appeared to me not to be very long but small, I should say not over two or three yards; the depression very little, cannot say precisely; I personally inspected all this; cannot remember the capacity of the old sewer; I remember it was much larger than the new sewer; cannot recollect how much, but there was a good deal of difference; the brick that lay end ways under the bottom, it strikes me, was laid on sand; the part above it was laid in mortar; at the time it was building, I had a copy of the contract; I never superintended the building of any other sewer before or since; cannot tell why sand was used at the bottom; I think the new sewer was substantially built; it would not have been, if I had not been as strict as I was; I sent off a number of loads of brick; I was never applied to for or gave any certificate as Superintendent, of the work being properly done; if I had been applied to for it, I would not have given it; I was not satisfied, because I did not think it was as good a sewer as the old one; and because the materials were not as good as required by the contract.

Previous to the building of the new sewer, I was acquainted with the condition of the cellars in the neighborhood, and along Chapel Street; I have lived in that neighborhood about twenty years; I never heard of any water being in the cellars, previous to the building of the new sewer; since the new sewer was built, the cellars have been generally very bad, some worse than others; have heard some of the families complain; Tucker's houses have had water in them, he has had a great deal of trouble; Disbrow's house in North Moore Street, and generally the cellars in the neighborhood, have water in them; I think the raising of the new sewer has caused it; the old sewer drained them; do not recollect whether there were lateral drains from the cellars to the old sewers; do not know what would have been the expense of repairing the old sewer, I should say not much, for it wanted very little done to it; I think the average height of elevation of the bottom of the new sewer above that of the old, is about a foot, might be more; there is I should judge, about three feet fall, from the bottom of the new Chapel Street sewer, to the bottom of the Canal Street sewer. The filling in and regrading, where I reside, is about two feet; it was filled up with all kinds of rubbish, some from the large fire, and in fact, with all kinds of rubbish; there has, I think, been a depreciation in the value of property in the neighborhood since the new sewer was built; that has been owing to the water running into the cellars: a house in Walker Street, two or three doors from West Broadway, has had to be raised, and the cellar filled up with earth, in consequence of the water coming into the cellar; the house belongs to Mr. Ruckle; the tenants moved out in consequence of the water being in the cellar; that house is depreciated, though how much I do not know; the house next door, I am informed, is in the same situation; I think the water was not therein previous to the new sewer, or I would have heard it; I received three dollars per day as Inspector, when the work was completed; I made no objections, then, to the contract not being performed; I have been assessed for the new sewer, for two houses I own in the neighborhood, and have paid the assessment; also, for the pavement and grading and widening the street; they come to a great deal of money, though how much I do not remember; I was perfectly willing, at the first start, to give up the three dollars per day, if they would only leave the old sewer alone; I think they were about three months building the new sewer; the fact is, it was a sad piece of work to tear the old sewer up; every body in the neighborhood seemed to be opposed to it, when it was torn up; Mr. Lockwood has, in consequence of the new sewer, had a great deal of trouble, and been at great expense, his cellars, I am informed, have had water in them, he has been draining them all the time; there was all kinds of filth brought and filled in the street; in some instances the contents of sinks; the pavement of the street before the old sewer was taken up, was as good as it is now; the contents of the sinks were not brought by the contractors, but where it came from I don't know; originally the pavement was made with the gutter in the centre, the owners of the lots paid for that pavement; then when the old sewer was built, a new pavement was made, and the owners of the adjoining lots paid for that, and now they are called on for a 3d pavement; I was not inspector for the filling in the street, had nothing to do with it; I had only to inspect the building of the sewer; there was a man employed to inspect the filling, I do not remember his name; I remember Mr. Ackerman remonstrating against the offensive substances being dumped there, and my telling him it was not my department, yet in one instance, at his request, I compelled one man to take away a load of offensive stuff he had put down: at the time I received my pay as inspector I did not make any complaint that the Contractor had not done the work, because he had done the work according to contract.

JOHN SHEPHARD.

The Joint Committee on Laws and Assessments of the Board of Assistants in 1839 made a lengthy report which is set forth in full on page 31 of this volume, which closes with the following:

"Resolved, That the Comptroller draw warrants in favor of the owners of property on Chapel Street, between Canal Street and the centre of the block, between Franklin and Leonard Streets; and also on the intersecting streets intermediate, for the sums paid by them for the building of the new sewer, and the recent regulating and paving of Chapel Street and Streets intersecting the same."

Resolved that the Assessments upon property, as above, which have not been paid be remitted and that the Comptroller draw his warrant for the amount in favor of the contractor.

DANIEL F. TIEMAN,
C. C. CROLIUS, Jr.,
FREEMAN CAMPBELL,
Committee on Assessments.

DAVID GRAHAM, Jr.,
ABEL T. ANDERSON,
M. B. HART,
Committee on Laws.

These resolutions were passed by the Board of Assistants by the followihg vote:

AFFIRMATIVE—Messrs. Sparks, Anderson, Crolius, Barnes, Campbell, Howe, Hart, Bunting, Graham, Tieman and Nash—11.

Negative—Messrs. Woodhul land Potter. 2.

This matter is now pending in the Common Council and the Chapel Street sufferers expect speedy relief from this outrage and the numerous abuses which followed it.

HON. D. S. DICKINSON.

Lieut. Gov. Dickinson has been appointed, by Gov. Bouck, United States Senator. He was some years a member of the Senate of this State, and for the present and last year President of that body by virtue of his office of Lieut. Governor,. In 1842, he was elected Lieut. Governor, although he very reluctantly consented to be a candidate. The Senate of the United States are honored in their new member, and the State of New-York will be honored in their representative. He is an estimable man, and a most worthy public officer, The public meeting held at Merchant's Exchange in the city of New-York in reference to taxes and assessments in March 1843, at which Preserved Fish, presided as Chairman, assisted by Wm. B. Crosby, Abraham Van Nest, Abraham G. Thompson, Peter Cooper, Jonathan Goodhue, Peter Embury, Chas. H. Russell, George Griswold, John Haggerty, Peter Lorrillard, Peter Schermerhorn, and Peter I. Nevius, as Assistant Chairmen, passed a resolution directing their proceedings and memorial to be forwarded to Lieut. Gov, Dickinson, President of the Senate, to present to the body over which he presided.—The Citizens of the city of New-York are under high obligations to Lieut. Gov. Dickinson for attention to their interests while in the councils of this State, and he will no doubt be equally attentive to their interests in the councils of the National Government.

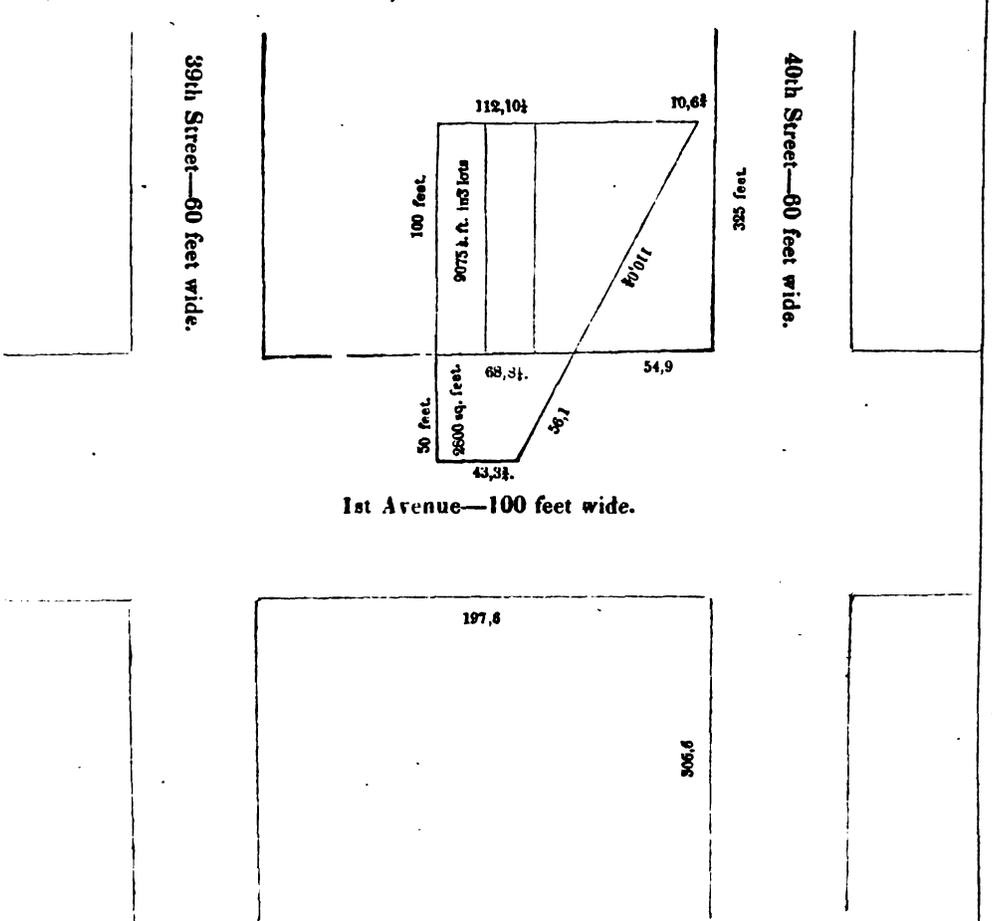
NEW-YORK MUNICIPAL GAZETTE.

PUBLISHED BY THE ANTI-ASSESSMENT COMMITTEE AND DISTRIBUTED GRATUITOUSLY.

EDITED BY E. MERIAM.] NEW-YORK, DEC. 24, 1844. [VOL. I....No. 25.

RUINOUS ASSESSMENTS ILLUSTRATED.

The accompanying Diagram shows the dimensions of a lot of ground which has been susessed more than double its value, exclusive of the interest of the assessment.



We present again the Diagram of the piece of land on the First Avenue, between 40th and 39th Streets, containing 9075 square feet, which is valued by the 16th Ward Assessors at $450, and upon which there is an assessment for opening 39th and 40th Streets and the First Avenue, including interest of $1271.92, in addition to the taking of 2800 square feet for the Avenue, for which no award was made. The assessment for the First Avenue is $312, exclusive of the 2800 feet taken; for 40th Street $575, and for 39th Street $18,75. The interest on the First Avenue assessment is $124.03; on the 40th Street Assessment $242.14, (the 39th Street Assessments not yet due) making in all $1271.92. The length of the First Avenue, exclusive of cross streets, is 2758 feet, and the width of the land embraced in the assessment district 631 feet 6 inches. There was but one building in the line of the avenue, and for this the owner was awarded $15, and the appraisers paid $25 for appraising it, which is $10 more than their award. The Commissioner's fees in the First Avenue are $700; 40th Street $840, and 39th Street $912; in all $2452. The room hire, &c. of the Commissioners in 40th Street are $193, First Avenue, $123.25; 39th Street $113; in all for room hire, &c. $431.25. The Surveyor's fees in First Avenue are $373.37; 40th Street $378.00; 39th Street $468: in all $1219.37. This ground was before surveyed the Commissioners appointed by the Legislature in 1807, and a map made of it a copy of which is on file in the City Hall, and in the office of the Secretary of State at Albany. The Attorney's fees and Court charges are for the Streets $2231.64. The ground covered hy the 40th and 39th Street assessment is 9433 feet in length and 395 feet in width. Farming Land. Had the Lands of the Government of the United States been charged for surveying at this rate all the money coined since the deluge would be insufficient to pay the surveyor's Bill.

ANOTHER.

A piece of Salt Meadow near Harlem, and between 115th and 124th Streets and the 5th and 8th avenues, containing about ten and a half acres was assessed for filling in, the large sum of $16,153.60. The Surveyor divided the ground on paper into 165 lots and the Street Commissioner advertised the ground for sale for the assessment as one hundred and sixty-five distinct pieces of ground and charged two dollars for each of the 165 paper pieces for advertising, making a bill of $330 for advertising alone. This advertisement was placed by us before the Legislature, and that Body on the 14th of May, 1840, passed a law that thereafter all land which adjoined together should be advertised as one parcel. The assessment was confirmed on the 8th of March 1839. The interest on $16,153.60 from that time to the 9th of December 1844, is $6501,80, and the advertising of it in the month of March, 1840, $330, making in all $22,985.-40. This salt meadow is estimated to be worth $80 per acre. The interest of the assessment for less than nine months exceeds the value of the land, and the whole assessment, interest and advertising, is more than twenty seven times the value of the property thus assessed.

ANOTHER.

A gore of land having a front of 98 feet on 38th St. belonging to the estate of John Duffie, was assessed for opening 37th Street from 2d to 3d Avenue $1,289.80. This assessment was confirmed March 19th, 1836. The interest of the Assessment to Dec. 19th, 1844, is $790. This same piece of ground was again assessed for opening 38th St. from river to river, eight dollars, and again assessed for opening 2d Avenne from 28th to 86th Street $117.50. The interest of the 2d Avenue assessment is $43.80; the interest of the 38th Street assessment for second opening is $2,86, making altogether of assessment and interest to Dec. 19th, 1844, on this piece of ground $2251.96. Thomas R. Ludlum, a city surveyor, was examined before the Committee appointed by the Senate to investigate assessment abuses, and he stated in reference to this land as follows:

"Witness thinks the lots of John Duffie on 38th and 39th St. in the rear of the Norsworthy estate before spoken of, are not worth more than $50 per lot. He thinks the whole piece of grouud is not worth more than $450, because it is a low sunken piece of ground and will require deep filling to bring it up to the grade." The assessment is a little more than five times the value of the land. Shall such assessments be tolerated? Shall such abuses be countenanced? Where is the force of the guarantee of the Constitution of the United States, and that of this State, that private property shall not be taken for public use without just compensation? It is said these proceedings are "JUDICIAL"!!!

CHAPEL STREET SEWER.

We present copies of further testimony of this outrage upon the citizens of the Fifth Ward, which, with that in the preceding number is more than conclusive. The efforts made to cover up this scandalous transaction have been unceasing, and now the matter must come to an issue. The citizens of Chapel Street are resolved upon having indemnity. We commence with farther testimony taken before Alderman Tillou, of the 5th Ward, in 1843, as per Document No. 76 of the Board of Aldermen of 1844, pg. 1520.

"John Hunt, sworn: I reside at No. 42 Leonard Street; am a cartman. I saw the old Chapel Street sewer taken up, and the new one laid down; can't recollect the size of the old sewer; I remember the shape of it; the bottom was flagged and pitched to the centre; square side walls, and arched over the top; the shape of the present sewer is round; I know the difference between the elevation of the bottom of the old sewer, and the bottom of the present sewer; the difference is from twenty-two to twenty-six inches, as near as I could come at it; I ascertained it to be the fact by a stick run down to the bottom of the old sewer, and standing it next, and measuring to the bottom of the new sewer, and putting it as far under as I could reach; there was a hole dug down on each side of the sewer to the bottom of the old sewer; I examined it last week; there was a piece of flagging lay in the centre of the upper sewer; am sure that piece of flagging was not part of the bottom of the old sewer, for this flag stone lay lengthways, and the flag stones of the old sewer pitch into the centre; the space dug out was between three and four feet; I examined, carefully, to ascertain the difference between the two bottoms; the distance is a little greater on the east side than on the other; I have lived in that neighborhood since 1828 or 1829; I know that the condition of the cellars, while the old sewer was used was dry; used to go often in Captain Riley's cellar, and always found it dry; I was also in the cellar, next door to Captain Riley—I was in the basement of Mrs. Flender in Thomas Street, it was perfectly dry; I know, that since the new sewer was built Captain Riley's cellar was wet every time I have seen it—so was Mrs. Flender's; sometimes six to eight inches water above the floor, so they dont pretend to use it; the new sewer stands inside the old walls; I examined the sewer the other day, at the request of Mr. Meriam and Captain Riley; I am not interested in the event of this matter; I calculate, that the cause of the water getting into the cellars is, that the bottom of the new sewer is so much higher than the old one, that the water cannot run off; I heard a great many of the neighbors complain on the west side, more than on the east side; I ascertained where the bottom of the old sewer was, by actually feeling it with my hand; I saw the new sewer when building; they first laid, on the bottom of the old sewer, a parcel of earth, then a layer of stones, then a layer of dry sand, and then built the new sewer thereon.

I saw them when grading the street, opposite Captain Riley's, it was about three feet rise, or thereabouts, above the old street; the stuff filled in was every kind of rubbish—old bricks, lath, shavins, rubbish of old buildings torn down, whatever people were a mind to fetch; was there when the street was repaved; I thought they were pretty dilatory in grading and paving; dont remember how long they took; can't say as to whether there was any damage to the property from the delay; don't remember when the grading and paving was finished.

JOHN HUNT.

—

Caleb M. Littell, being duly sworn, doth depose and say as follows, viz: I now reside at No. 5 Lispenard Street; am, by profession, a house mason; I resided at the time when the old sewer was broken up, and the new sewer built in Chapel Street, at the corner of Church and Walker Streets; I saw the old sewer when it was broken up at different places and at different times; I crossed the sewer from two to four times a day; not at one point; I frequently stopped to look at it as the workmen were at work; the condition of the old sewer, when broken up, was first rate—a good piece of work; I so told Mr. Shepherd, the Inspector of the new one; I dont think it appeared, in any of its parts to be out of repair or delapidated; the brick and mortar appeared to be as good as when put down, the mortar, better a great deal; the old sewer was larger than the new one; I did not observe that the bottom of the old was depressed or not; I noticed the building of the new sewer frequently; I observed that the new sewer was not put so low in the ground as the old sewer, nor so big in circumference; cannot say how much, but it was considerable, in size, smaller; I should think that the bottom of the new sewer was from eight to fifteen inches higher than the bottom of the old sewer; never examined particularly; this was between Leonard and Walker Streets; this was a subject of conversation between Mr. Shephard and myself; I noticed that the courses, from four to six of them on the side of the sewer, were laid dry; and it might have been on the bottom also so laid; I asked Mr. Shephard the cause of its being laid dry, without any mortar—he answered that it was to let the water soak out of the ground into the sewer—I told him it was full as natural for the water to soak out of the sewer, into the ground, as for the water to soak into the sewer; I think he said it was according to orders, or some such answer; I never heard any complaint about the cellars having water in them before the new sewer built; I have, since the new sewer was built, heard complaints; have seen people pumping water out of the cellars; the street in the new grading, was raised considerable—should think two or three feet; I am not interested in the subject matter of this reference, directly or indirectly.

CALEB M. LITTELL.

—

John A. Russell, being duly sworn, deposes as follows, viz: I now reside at No. 92 Franklin Street, in this city; am an accountant; my mother, Mary Ann Woodward, is the owner of the house and premises corner of White Street and West Broadway—the north-east corner; I was there about two months ago; the cellar and basement of the premises then had water in them, and the floor was completely rotted out; there is no drain from the house to the sewer in Chapel Street; there was one to the old sewer: has been none to the new sewer; formerly we lived in the basement before the new sewer was built; the basement was then dry; the water has been in it ever since the new sewer was built; the cellar is about five feet in the ground; the drain, when the old sewer existed, was for the convenience of females in the kitchen in throwing out wash water; was for no other purpose; am sure of that; I remember my step-father telling Mr. Shephard he was doing very wrong in taking up the old sewer; the bottom of the new sewer is higher than the bottom of the old sewer, and the water will not run out of the cellars—am sure of this; the old drain remains, but the water will not run from it into the new sewer; this is the only reason I have for stating the bottom of the new sewer to be higher than the cellar; the old drain does not go into the sewer, because the bottom of the drain is lower than the bottom of the new sewer; we have had to reduce the rent fifty dollars per annum, in consequence of the cellar having water in it—this for the last two years only; we moved away five or six years ago from the property; after this the basement stood vacant for some time; previous to the last two years, no reduction of rent was made; the persons now occupying the premises, altogether want a reduction of one hundred dollars, which we shall have to give; the property is occupied thus—the store and the cellar by one tenant, and the dwelling and basement, (the latter for cooking purposes,) by another; each tenant wants a reduction of fifty dollars; the store and cellar rents for three hundred and twenty-five dollars, the dwelling for two hundred and eighty-seven dollars and fifty cents, I think—am not positive as to the amount.

JOHN A. RUSSELL,

Sworn, June 29, 1843, before F. R. Tillou, Alderman.

—

City and County of New-York, ss.

John P. Flender, of said City, being duly sworn, says: That his late father, Thomas Flender, died seized or possessed of the houses Nos. 48 and 50 Thomas Street, in fee, and of the leasehold of the house and lot No. 49 Thomas Street, and of the house

and lot No. 44 Hudson Street, in fee, all in the city of New-York; that the property descended, on his death to his widow and children, who yet own the same. That previous to the sewer in Thomas Street, in 1836, being built the cellars of all the dwelling houses on said lots were dry, and susceptible of occupation by the persons residing therein. That after said sewer was built the water came into all of said cellars, and he has always believed, and yet believes, from the sewer; and the said cellars have been ever since, so full of water, more or less, from time to time, as to render said cellars not inhabitable, and they have all had to be partly filled with earth, above the level of the water, on an average to the height of about twenty inches. That the family of said Thomas Flender, before and since his death, continually resided in said house, No. 50 Thomas Street, and previous to said sewer being built, in the basement room of it; that since the said sewer was built, the family have not been able to occupy said basement, on account of the water that came in it, and have not since occupied it, and it has since been partly filled up with earth, as aforesaid. That from the knowledge the defendant has on the subject, and the best information he has been able to obtain, relative thereto, he verily believes that said property, (the said four houses and lots above mentioned,) have been damaged and depressed in value, by the building of said sewer, to at least five thousand dollars; that the loss of rents alone is considerable, besides the actual damage to the property; that the sewer, he believes, is badly built, and is not sufficiently large to carry the water off, and not sufficiently low in the ground to drain the cellars—but as he believes, it causes the water to run into the cellars. That the following assessments on said property have been paid, viz: for the building of the sewer, about one hundred and six dollars; for opening West Broadway, about twelve hundred dollars. Besides which, there are assessments for grading and paving and for curb and gutter stones, not yet paid by them; and to meet which, or a part of which, three of said houses and lots, for a term of years, have been sold by the Street Commissioner; that he is one of the children of said Thomas Flender.

JOHN P. FLENDER.

Sworn to this 28th October, 1843, before F. R. Tillou, Alderman.

The Assessment for the Chapel Street Sewer in 1836 and 1837, was $16,571.08, and for repaving the Street $33,613.46, both amounting to $50,184.54. The Assessment for widening Chapel Street between Leonard and Murray Streets, in 1836, was $210,810.40, making together an Assessment on a small district of over a quarter of a million of dollars. The price paid for repaving the street in 1839, was 8 cents per square yard, and the work was well done, and the contractor had a profit on his labor. In 1836, 40 cents per square yard was paid for repaving the same street, and the work so miserably done that it required repairing in less than twelve months. These facts speak for themselves. The citizens in Chapel Street had been assessed for the Canal Street Sewer placed under the Street in 1819. The proceedings in relation to the present Chapel Street Sewer, the persons interested in were ignorant of until the Street Commissioner's advertisement of May 21st, for the contract for building, appeared in one city paper, of limited circulation. The Report which recommended the sewer was not published, nor did any of the newspapers employed by the corporation publish any thing as having been done in the Board of Aldermen respecting the sewer when the report was adopted.

We shall follow up this subject and lay the facts before the people, and also before the public officers.

PUBLIC STREETS.

The New-York Streets are in the same *unmentionable* condition as when we last referred to this subject. *There is a screw loose somewhere.* The streets of St. Louis, after the subsiding of the waters of the Mississippi Deluge, could not have contained a much greater depth of alluvium than now lies upon the pavements in New-York. The frost, a few nights since, bridged the pavements by chrystalizing the mud, and for a few hours there was an earthen bridge over the paving stones. It melted again, and fortunately dissolved at the top first.—Some years ago, while travelling through the State of Kentucky, and through the town of Lexington, in the winter season, we met a Polish General entering the town on horseback, as we were leaving it by the same mode of conveyance. He inquired of us, "how far to the City?" We replied by informing him he was already in the city and upon one of its paved Streets. He expressed surprise at the information, and remarked that in his country they paved over the mud, but here the mud was over the pavement. New-York Streets are in this same plight. We saw a gentleman walking up Broadway the other day dressed in a new suit of black; a cart and horse drove along at full speed and spattered his clothes all over with a greasy mud; and we noticed a similar accident to a lady's pearl colored silk dress, in John Street.

The cleaning of the Streets should be under the Supervision of the Street Commissioner's Department and these highways kept in passable condition at least. Saturday Dec. 14th, and Monday 23d.

GRATES IN SIDEWALKS.

We notice in Monday's Journal of Commerce a paragraph stating that a Mr. Moore had recovered a verdict of two thousand dollars against the city of Lowell for injury sustained by Mrs. M., by falling into a cellar through the side-walk. The Ward Supernumeraries, called Ward Inspectors, should be required to pay better attention to the grates in the New-York side-walks.

TAX ASSESSORS.

Assessors should be elected for longer terms, say one Assessor for two years, and one Assessor for three years, and in addition to the two ward Assessors, there should be organized a permanent Board of Assessors like the Boston Permanent Assessors, noticed in the last number of this paper. A board of this description would be a great accommodation to the citizens of New-York, and a great saving to the public.

PUBLIC SEWERS IN BOSTON.

We visited the City Wharf in Boston, and had a conversation with the Wharfinger, an intelligent man. We enquired of him if any of the public sewers discharged into docks at this wharf; he replied in the affirmative, and accompanied us to the dock on the left hand side of the wharf where two sewers discharge. The tide was down, and the filth in the dock lay exposed to view. A mud scow was at work removing the accumulations, at an expense of four or five hundred dollars or more. The stores which are at the head of the dock had been painted but were black with sulphurated hydrogen gas which generates in the sewers and dock. The Wharfinger stated to us that when vessels came into the dock in the evening with a new coat of paint upon them, in the morning the Captain on coming on deck would find his new paint of another color, and very offensive, and if he had a silver watch in his cabin, that it had acquired a color of blue black also. The Wharfinger said that he did not consider the effluvia unhealthy. When sewers discharge into docks over which the wind blows at low water towards the dwellings, an unpleasant effluvia is carried into the houses to the great annoyance of the occupants. The tide rises higher in Boston than in New-York, and the mouths of the sewers at low water are open to the atmosphere. We will refer to this subject again.

LIGHTNING.

We have a Lightning Register which has been kept for two years with care, which we shall notice in the Gazette and discuss the use of Lightning Conductors of polished surfaces as compared with unpolished surfaces, and whether it is the greater breadth of surface which is preferred by the lightning or the lesser surface with a greater weight of metal in the conductor. We entertain the opinion that a tin tube 3 inches in diameter with a bright inside and outside surface is preferable for a conductor to an iron rod one inch in diameter. The one presents two surfaces both of 12 inches, the other but one of 3. Polished surfaces do not absorb heat, but reflect it, hence there is no danger of the tin conductor, which is bright, being fused by the heat of the lightning.

NEW-YORK SALINES.

The law passed in 1842, allowing a drawback of the State tribute upon Salt made at the Onondago Salines will expire shortly. The production of Salt at these Salines in the year 1843, was three million one hundred and twenty-seven thousand and five hundred bushels. This Salt now finds its way to the city of New-York, where it is sold at 20 cts. per bushel, including the cask.

In 1841 Salt was sold at the Salines as low as four cents per bushel, the purchasers paying the State duty besides. The import of Salt from foreign countries into the Port of New-York from January 1st, 1844 to Nov. 30th, 1844, inclusive--being eleven months--was 1,568,059 bushels, of 56 pounds each. In 1843, the import for the corresponding months was 1,511,609 bushels of 56 pounds each. Thus it appears that the quantity made at the State Salines is double the quantity of the import from abroad into this State. What a change.

We have a letter from our worthy correspondent, General Leonard White, of Equality, Illinois, (formerly called the United States Saline) of May 2d, 1844, in which among other things he states as follows:

"Previous to the year 1805, salt was made by the French and Indians, in small quantities, occasionally at a spring, the water of which flowed into the Saline Creek at fifty yards distant. This water, at that day, was thought to be very strong; but for many years has been suffered to flow on into the creek as it originally did without notice. It took upwards of 400 gallons of this water to make 50 lbs. of Salt. In the fall of 1804, the Government of the United States leased this place for three years for the purpose of Salt making and the object appears to be to get the greatest possible quantity made at the lowest price and to explore and extend the works as much as possible. The spring when wrought to its full extent yielded water to make 800 bushels per week. The lessees took possession in the spring season of 1805, and that same year as soon as they got into operation of making salt at the spring before mentioned, commenced digging at what is called the half moon lick four miles higher up the Saline Creek. This half moon is a sunken place of several acres, say 5 or 6, with the points on the creek, say 18 feet lower than the surface with steep banks. In this place they sunk three wells in all which they got water of double the strength of the Spring before mentioned, or nearly double, at 24 feet."

They erected their furnaces on the bank and went to work, but in the spring season when the Ohio River had a moderate rise, the back water up the Saline Creek overflowed the well and stopped their work. The idea then was to dig upon the level which would give 18 feet higher. This being done, at the same level below the same kind of water was obtained. Salt being in great demand, and a corresponding wish to supply it existed, another well say at 100 yards distant was sunk and water procured. This line of wells paralel with the creek up it, was extended until the water got so weak as to be good for nothing. This line is about 600 yards long. Another line at right angles across this one was then commenced and extended both ways as far as the water was worth working, and farther, and is, say 400 yards long. A line of several wells was then sunk down the creek below the point of the half moon, and water obtained and worked for several years, though not quite as good. This was all done in six years.—The next lease there was but little experimenting done, the manufactory was carried on to its fullest extent, the lease expiring in 1813. During the war a great demand for salt existed. *The government now seemed to change their policy*, and instead of leasing to those who would make the greatest quantity and sell the cheapest, *they wanted the most rent they could get and permitted higher prices, $1.25 the bushel, the former price having been 75 cents.* A new set of men came in and agreed to give $50,000 per annum, under the impression that the water was *inexhaustible*, and that the advance in price would enable them to pay this rent, and they would make fortunes; by this time the wood was exhausted, new lines of pipe had to be made, new wells to be sunk, old lines lengthened, new furnaces to be erected, and by the time this was done peace came and the Kenhawha Salines extended—*down came the price*—and ruined all here."

In another letter from the same correspondent, dated the 8th of May, 1844, he says:

"In 1809 I was appointed agent on the part of the United States for the works at this place, being then quite a young man, and was informed that the object of the Government was to make the greatest possible quantity of Salt, at as low a price to the consumer as possible. These were the propositions offered in the advertisements for leasing, and the leases were taken with strong covenants to made as much salt as could be made, and to sell at a given price, generally 75 cents, the first lease lower, but soon raised to that by permission of the Government. My duty consisted principally in distributing this salt among the applicants, as the demand was greater than the supply, and was a short distance off north from two to three dollars for fifty pounds."

My correspondent was a member of the Convention which framed the Constitution of the State of Illinois and was subsequently a member of the Senate of that State, and his practical knowledge in this became available to the public interest in the framing of the laws of the State in reference to these Salines.

Three dollars for fifty pounds of salt is equal to six cents per pound, which is two cents a pound more than one of the salt makers at Onondago, in 1841, obtained for a bushel of 56 lbs., subject to the State tribute of six cents per bushel.

Should it be the policy of the great State of New-York to collect a local tax upon salt? China has a tax on salt out of which they pay the British tribute!

The admonition contained in the letter of General White, by reciting the course of policy of the general government in 1813, is a lesson in the school of experience.

In a letter from my correspondent of the Kanhawha Salines, Lewis Ruffner, Esq., an extensive manufacturer of salt, he says:

"I will add that from one and a half to two millions of bushels of Salt of 50 lbs. weight is annually made here, and vended in the South and West."

In another letter from the same intelligent correspondent he remarks thus:

"I have not a doubt myself that Allum Salt can be made here of unequalled purity, to a very great advantage, and would be, should Congress give us a reasonable protective duty."

In a letter from my correspondent Alexander Findley, Esq., of Saltville, Washington County, Virginia, dated November 28th, 1844, he gives a statement of the temperature and specific gravity of the Salt Water of his Salt Wells, viz: specific gravity 23 degrees. Temperature 56 degrees, The hydrometer is graduated to 0 for fresh water, and 25 degrees for water fully saturated in the salt. The test was made on the 9th of Sep. 1844. The atmosphere on that day was 78 degrees, and fresh water 60 degrees. Mr. Findley sent me a bottle of the salt water last winter, raised from a well 214 feet deep, on the 31st of January, 1844. Specific gravity 23 degrees. Temperature 51 degrees. Mr. Findley in a letter to me of May 24th, 1843, says: "Our supply of Salt Water continues to be abundant and the specific gravity about the same, if any change, is increased. We have never required water enough to use for our manufactory to ascertain the increase of the quantity.—We have no doubt our well would supply enough to manufacture from three to five times as much as we make. We believe it cheaper to work the Salt Water than to raise the Salt Rock." The Salt Rock lies 220 feet below the surface and has been penetrated by a shaft 160 feet. In my address to the President and Managers of the American Institute, in 1842, I presented much detail in reference to the Salines and Salt Mines of the United States, in which I stated that the consumption of Salt in the United States is equal to three pecks to every inhabitant, and that the quantity of salt made in the United States exceeds the quantity imported from other countries. This address is to be found on p. 117 to 120, inclusive of this volume, and in the printed documents of the Senate of this State for 1843, vol. 3, doc. 108, p. 53 to 66 inclusive. I will refer to this subject again.

E. MERIAM.

Dec. 1844.

LONG POND, NEAR BOSTON.

The supply of water for the city of Boston is intended to be obtained from Long Pond which lies in the town of Framingham, Natick and Wayland. Ponds are subject to occasional or periodical depression. White Pond, in the southerly part of the town of Concord, 17 miles from Boston is thus influenced. White Pond contains one hundred acres. Long Pond contains 600 acres. The distance from White Pond to Long Pond, I presume, cannot be more than 6 or 8 miles. White Pond in some dry seasons is so full as to flood the bushes that surround its beach, and in some wet seasons so low that four ox-teams could pass abreast on the beach, between the water and the bushes. The cause of these changes has never been ascertained. The same state of things has been noticed with regard to the rise and fall of the waters of the great lakes. The Erie Canal was at one time in danger of becoming dry at its lake extremity, from this cause. At Chicago, during the rage for speculation in city lots, ground was laid out into lots to the shore of the lake, in the course of three or four years, the lake invaded this land, and covered it with water for two or three years, and then receded again. I made an extensive examination as to the rise and fall of waters of the Lakes in the summer of 1844, and previously. In July, 1844, I searched the northern shore of Lake Ontario for a natural object with which to make a Lakeometer, until I became convinced that any natural object would be liable to change, either from the expansion of the earth's land surface, from local causes, or from the wear of the frost, water and heat. I then sought for an artificial object and obtained one in the body of the new lighthouse, erected in 1837, upon Gull Island. This lighthouse is erected upon what was, forty years ago, an island of an acre of surface of rock. It is now a sunken ledge, covered with near two feet of water. I will refer to this subject again in the next number of the Gazette and detail my examinations and give my conclusions.

E. MERIAM.

WATER IN HEATED ROOMS.

Apartments heated by Anthracite Coal should be furnished with pure fresh water every day. The water should be placed in a clean earthen bowl. If the coal is consumed in a stove, an iron vessel filled with dry sand should be placed upon the stove, and the bowl placed in the sand. The heat of the sand will heat the bowl and evaporate the water, gradually, and this will moisten the atmosphere of the room with the vapor of pure water, and if the temperature of the room is high, the evaporation will go on from the heat of the atmosphere on the surface of the water also. A little perfumed water may be added, if it is desired to have an aroma in the atmosphere which may be respired, like that of the Rose, the Jessamine, the Lavender, &c. Putrid or dirty water evaporated in an iron or tin vessel upon a stove, is as noxious to breathe in winter, as the exhalations of a putrid pond is in the summer.

E. M.

ICY WALKS, AND DOOR STEPS.

A few quarts of fine salt thrown upon the sidewalks or door steps will at once liquify the ice. The water should be swept off before it freezes again. Salt thrown into a frozen pump will melt the ice and free the pump.

E. M.

BANK CAPITAL, TAX.

The tax upon the Capital of the Banks of the City of Boston, compared with the tax upon the Bank Capital of the city of New-York, is thus: In Boston the Banks pay a state tax of one per cent, on their capital stock annually. The Stockholder, resident in the city of Boston this year, pays a county and city Tax of 60 cents on the hundred dollars. The New-York Banks (Safety Fund) pay annually a State tax to the Safety Fund, of one-half of one per cent. on the amount of capital. The New-York city Safety Fund Banks also pay a State Tax of 11 cents on the $100, a Croton Water Tax of 21 cents on the $100, although their buildings are fire proof—a water tax of 11 cents, a lamp tax of 5 3-10 cents, a School tax of 16 cents, a street tax of 4 2-10 cents and a contingency tax of 17 cts. on the one hundred dollars, and besides, the institutions pay a charge for the registering of their notes, all of which may be set down at 86 1-10 on the one hundred dollars.

The Boston Stockholders of New-York Safety Fund Bank Stock pays $1.46 taxes to both cities, on the $100.

The New-York Stockholders of Boston Bank Stock, pay a tax to both cities of $1.86 on the $100.

MUTUAL INSURANCE COMPANIES.

These associations are not taxed in Boston. Whatever interest the associates have in the earnings in these partnerships form a part of their personal property. These earnings are a mere contingent fund, held liable to the assessed and when used to pay losses take the place of the property lost which has already been taxed. The New-York Supervisors insist on taxing Mutual Insurance Companies, but they have no law to warrant such an imposition, and moreover, these institutions were unknown here when the tax law was passed. They might as well tax the contingent fund of a bank, or tax a merchant for what profits he expects to make.

THE CROTON TAX.

The Croton Water Department should be put under the entire control of the State Commissioners, which is composed of Stephen Allen, Saul Alley, W. W. Fox, and Thomas T. Woodruff. A better organized Board could not be made in the City of New-York. All are estimable men, and men of experience, and such men as have the entire confidence of the good men of both parties. The members of the Common Council should have nothing to do with the Croton Water, for the plain reason that they lack that experience and particular knowledge of this costly concern, which is a necessary qualification to its management. Members of the Common Council come into office one year and go out the next, and they have no time to learn, and besides their attention is taken up with a thousand other things. The Aldermen are judges of the Court of Oyer and Terminer, Court of Sessions, County Court, are Supervisors of the County, and members of the Board of Health, besides having a great deal to do in every thing else. The Croton has cost a great amount of money—the work has been done on credit, and the means are to be provided to pay both the interest and the principal. It is just such an establishment as should be in the hands of the gentlemen that compose the State Board, who have both experience and talent. The benefit of the Croton should be paid for by those who enjoy the advantages. Why should Bank Capital or money loaned out on Bond and Mortgage in the State of New-Jersey, or a ship on a three years whaling voyage be taxed for the Croton? The Croton is a protection against fire to both buildings and merchandise—and how much?—that is the question. We shall follow up this subject.

PUBLIC PATRONAGE.

Public Officers reckon upon the pecuniary patronage they possess as so much political capital. For example—a public officer who can give a hundred thousand dollars patronage per annum to the public presses, can be puffed every day.

There is another class of Citizens who have patronage, and millions of it—the men of wealth, who live upon the interest of their money—the men of business, who give employmeat to a great number of individuals—these men have patronage, but that class of Citizens became alarmed at the slang of politicians in being called the silk-stocking gentry. It is the man of money, and the man of business, that put the Natives into the Common Council, and these Citizens are watching every step of the new party and setting down every misstep. They turn aside from seeing things they do not like, and hope the new party will do better next time. This is the public feeling. We see it, and hear it expressed. The Natives will obtain the support of leading men in the Whig and Democratic ranks in exact proportion as they deserve it. They can keep the power, if they will. It is an immense experiment, for good, or for evil.

PRICE OF REPAVING.

In 1820, Chapel Street was well repaved at 8 cents the square yard. In 1836, 40 cents the square yard was paid for repaving the same street, and it was badly done. What a fat job this. Shame on the public officers who paid such prices for such work.

INCREASE OF TAXES.

In 1830, the taxes of the city and county of New-York were $450.000, population 202,580. In 1844, the taxes are increased to $1,981,520.12, population about 360.000. Money is as dear in 1844, as it was in 1830. The Egyptian tax was one-fifth the income. The New-York tax is upon the principal, without regard to the income.

LOSS OF POWER.

The Mamalukes lost power in Egypt by increasing a heavy tax. The result will be the same in every civilized country.

ODIOUS ASSESSMENTS.

Attorney General Barker said to us sometime since that if the Emperor of Russia had imposed such burdens upon his people, as the Corporation of New-York had upon its Citizens in the imposition of ruinous local assessments for street improvements, that he would have lost his crown. It was a just remark. In other countries the assessment depredators would have been driven from society, and the finger of scorn pointed at them wherever they were seen.

CHANCELLOR WALWORTH.

This Equity Judge is probably the most industrious Judicial officer in this or any other country. His mental and physical labors are great, and but for his tee-totalism, would have worn out before this time. He will be an acquisition to the bench of the Supreme Court of the United States. Chancellor Walworth is a strict constructionist, and no other but strict constructionists should be upon the bench of the Supreme Court of the United States or upon any other judicial bench. His place cannot be made good.

AN ANCIENT TAX LAW.

In 1752, a bill was introduced into the General Court of the Colony of Massachusetts for the encouragement of industry.—The bill authorized bounties to be given and the amount of these to be raised by a tax upon carriages; but a carriage not used during the year, should not be taxed. The bill was directed to be published for the information of the people, and if no good objections should be made to it, to be brought forward at the next session.

FIRST AVENUE ASSESSMENT.

In our last number, on the title page, we notice an error in omitting a portion of the Surveyor's fees. The fees of the Surveyor for the 1st Avenue were $373.37; 40th Street, $378.00, and that for 39th Street, $468.00, making in all $1219.37, which is pay for 304 days and 5 hours, equal to 11 months and 18 days, and 5 hours, counting 26 working days to the month. We had it 404 days, and omitted the fees of 39th and 40th Street, in the summary.

PHILADELPHIA TAXES.

We present our readers in the present number, a letter received from the Hon. John M. Scott, Mayor of the city of Philadelphia, an intelligent public officer:

"Philadelphia, Sept. 14th, 1843.

"Dear Sir,

"I received your letter of the 8th, yesterday, on my return from a short absence.

"I will endeavor to obtain and forward to you in a few days, the documents you ask for, but it is very doubtful whether the scale of expenditure here can form a criterion for the guidance of another city, as this expenditure must depend upon the different characters of the several institutions to which it is applied, and would require great similarity of system to produce similarity of amount.

"I will make now one statement, which if well understood will throw light upon one branch of your enquiry. It refers to the city proper.

"In the city proper I own a house assessed at $12.000; which is intended to be its full valuation at a fair market price.

"Upon this house I pay the following taxes.

"State Tax, 20-100 on the $100	amounting to		$24.00
County Tax, 50-100	"	"	60.00
City Tax, 36-100	"	"	43.20
Poor Tax, 48-100,	"	"	21.60
			$148.80
"If I use the Schuylkill Water in my house, as I do, I pay for household purposes and bath,			8.00
			$156.80

"These coustitute all the taxes assessed upon that piece of property.

"I pay also to the city, to the county, and to the poor tax fund, what is called a personal tax, $2 to each fund. This is not rated upon personal property, but strictly upon the person—rated upon the trade or occupation—the lowest rate being 20-100—the highest $2.

"To the State I pay a tax upon personal property, emoluments of office, &c. which you could not understand without an accurate examination of the law.

"These taxes upon my house are, as I have said, *all* that it pays for the year 1843. The city tax pays for watching, lighting, paving, police, city government, cleansing, &c., &c., in fact for all city expenses.

"The city is included in, and forms part of the county, and therefore pays a county tax. This fund pays for roads, bridges, courts, (not including salaries of judges) damages, &c.

"Poor tax pays for the support of the poor.

"These are the taxes for the city proper. But this city proper is but a small portion of the city *apparent*. That includes corporations called Southwark, Moyamensing, Spring Garden, Penn Township, Kensington, each of which sustains its own local operations by its own taxes.

"Thus, Spring Garden—there a house value $12,000, would pay the same state tax, county tax, and poor tax, that is paid on my house—it would not pay a *city* tax, but it would pay a Spring Garden tax, laid by the authorities of the District, probably *less* than a city tax, the state of advancement of each district being the indication of the magnitude of the tax.

"In some of the districts they *pave* by assessments, upon the holders of the property in front of which the pavement is made.—Not so in the city.

"If you would pay us a visit and pass an hour with me, I would give you more information than by writing a volume.

Very Respectfully,
Your obt. servant.
J. M. SCOTT.

E. Meriam, Esq.

It will be seen by the foregoing letter that the Philadelphia taxes are assessed upon Real Estate and not upon personal property. The Supervisors of New-York impose a tax of $1,981,013.14, the present year, upon $234,360,047.98, Real and Personal Estate. The Real Estate amounts to $171,636,591,-18, and the aggregate tax if imposed upon this sum would be 115 on the 100 dollars and $138 upon $12,000 the sum which His Honor Mayor Scott takes forthe basis of his estimate. It should be borne in mind that the N. York tax does not include the expense of sewers, paving streets, opening streets, avenues and public squares, making wells and pumps, fencing vacant lots, filling low ground, &c., which together amount to an immense sum of money annually. In Philadelphia and Boston these are included in the general tax, with the exception of part of the sewers in Boston, which is paid for by the abuttors. The Croton Water in New-York is an extra charge to those who take it in their houses, and every wine glass used by Mr. Astor actually costs him two guineas, reckoning the annual Croton tax he pays and the Croton Water he uses.

PUBLIC PRINTING.

We do not hear anything said of the Public Printing being done by contract. The Natives will find that the footing of these bills will be scrutinized at the polls.

NEW-YORK CITY STOCKS.

We are enquired of as to the liability of the City Stocks to taxation? The taxes imposed in the city and county of New-York are State and County Taxes, and not a Corporation tax. The Corporation have no power to tax their own stocks or any thing else. The Supervisors assesses the taxes under an authority of the State Legislature, and Croton Water stock is assessable.

ASSESSMENT ABUSES.

We shall, in our first January number, endeavor to give that portion of the Report of the Select Committee appointed by the Honorable the Senate of the State of New-York to examine into assessment abuses in the city of New-York which relates particularly to the opening of Streets, and this may be considered as a sort of preamble to our review of the opinion of the Supreme Court recently delivered in the Striker Assessment Case. The Report of the Committee we shall accompany with Diagrams, for the information of our distant readers who are not familiar with New-York Assessments. The opinion of the Supreme Court and Mr. Websters argument are both lengthy and for that reason we shall be under the necessity of issuing a paper with double the usual number of pages, as our review of the last majority opinion of the Court will occupy several columns, and we shall place with the opinion of the Court, our review, section and section that the reader may see both in the same column, and on the same page. In this Republic, the People are Sovereigns, and it is therefore the highest tribunal in the land, and it is for this reason we come to argue the great assessment question before that great and august body.

DAILY AMERICAN CITIZEN.

A large and well conducted newspaper of the above title is published daily in the city of Albany. Terms of subscription 50 cents per month, payable in advance. The sheet is of the size of the New-York Express, except being not quite as long. Citizens who favor the American Republican interest and who are anxious to know what is going on in the Legislature during the approaching session will do well to patronize that journal. It is printed by Messrs. Stone & Henly and edited by James Stanley Smith, Esq.

STATE STOCKS.

It is asked can a State impose a tax on the Stock issued by their own officers? It would seem reasonable to presume that a State cannot pass a law to impose a tax on Stock which has been theretofore issued, for the exercise of such a power would be a violation of the contract made by the State with the taker of the loan, but a law passed prior to the issuing of the stock, taxing all personal property, would reach the property in the stock, the certificates being an evidence of debt from the borrower to the lender. Thus if the tax law was created prior to the loan, the loan is taken subject to the tax. This seems to be a common sense view of the question in our humble judgment: The State Mill Tax law was passed for the benefit of the holders of State Stock, and the title of that is as follows: "An act to provide for paying the debts and preserving the credit of the State." The tax has enhanced the value of this Stock to the holder.

In Mr. Well's letter, the cost of timber is stated at $12 to $14 per M., instead of 12s. to 14s. as we had it printed in our last number.

MAIDEN LANE SEWER.

The Sewer under Maiden Lane presents an opportunity of determining the means of relieving the cellars under the buildings in that street from water. The street at its intersection with South Street has two sewers, one above the other, but notwithstanding these, the water accumulates on the surface at the corner of Pearl, Water and Front Streets at the intersection with Maiden Lane.

George B. Smith, Esq., enquires of us how it is that the Commissioners Reports on several Streets were confirmed at the December Special Term held by Judge Bronson? We answer in the following

OFFICIAL NOTE:

"Supreme Court Clerks Office,
"Albany, Nov. 20th, 1844.

"Dear Sir,

"I am requested to inform you that the Court at its *late term* granted an order of affirmance in the New-York Street cases. The dissenting opinion of Judge Bronson will be found in the case of Striker vs. Kelly, on the constitutional question.

"I am respectfully,
"Your obt. Servant,
"Chas. Humphrey, Clerk.

"To Richard Mott, Esq.

The December Term was held subsequent to the term in which the Court decided this matter. Chief Justice Nelson, and Mr. Justice Beardsley are the only members of the Supreme Court that confirmed the Commissione'rs Reports.

PHILANTHROPY.

We notice a movement which is highly praiseworthy. The Hon. John W. Edwards, formerly a member of the Senate of this State, and formerly Recorder of the City of Hudson, and now President of the Board of Commissioners of the State Prison at Sing Sing, has called a public meeting to take measures to aid men who have served out their terms in prison with the means of obtaining employment and support on returning again to society. At this meeting Vice Chancellor McCoun presided, and that worthy citizen honored himself in the seat he filled on this occasion.

JUDICIARY PATRONAGE.

We are preparing a list of the Commissioners of Estimate and Assessment appointed by the Supreme Court with a statement of the fees of each, the room hire, &c., the Surveyor's fees, Attorney's fees and Court charges, and in order to enable the reader to make a comparison, will place along side of of that statement the Annual Expenses of various States of the Union. The constitution never contemplated giving to judicial officers the patronage of appointment, a a power far more dangerous to civil liberty than the command of the militia.

MAYOR HARPER.
