NEW RARE AND BEAUTIFUL PLANTS SEEDS & BULBS

OFFERED RAISED OR INTRODUCED BY

W. A. MANDA

HORTICULTURAL EXPERT.

Winner of over Five Hundred Medals, Diplomas, and Money Prizes at all the leading Horticultural Exhibitions in America.

Active Member of— MASSACHUSETTS HORTICULTURAL SOCIETY, PENNSYLVANIA HORTICULTURAL SOCIETY,
 LENOX HORTICULTURAL SOCIETY, NEW JERSEY HORTICULTURAL SOCIETY,
 SOCIETY OF AMERICAN FLORISTS, NEW YORK FLORISTS' CLUB (*Ex-President*),
 PHILADELPHIA FLORISTS' CLUB,

Honorary Member of— MINNESOTA HORTICULTURAL SOCIETY, BOSTON GARDENERS' AND FLORISTS' CLUB,
 BERKSHIRE COUNTY GARDENERS' AND FLORISTS' CLUB.

*Formerly—Curator Botanical Gardens of Harvard University, Cambridge, Mass.
 Managing Partner PITCHER & MANDA (lately incorporated Stock Company).*

NOW—PROPRIETOR OF THE
UNIVERSAL HORTICULTURAL ESTABLISHMENT,
 South Orange, N. J.

INTRODUCTION.

DEAR READERS: This Catalogue contains only my **Novelties** and **Specialties**, and such other plants as are of sterling merit. Intending buyers wishing my general catalogue, or **Pocket Garden Dictionary**, of everything pertaining to **Horticulture**, will receive same on application.

If there is anything you wish and do not see in this Catalogue, send for it, and you will receive same at the lowest market price in due season.

When sending your order, kindly state if I may substitute, if sold out of any variety wanted. In doing so you will greatly help me, and I will give you equally as good sorts, which will be sure to give satisfaction.

Please send in your orders early, writing your name and address plainly; also giving mode of shipment. I would recommend *express*; if by mail, add enough money to cover postage. Kindly induce your friends to send their orders with yours, and give me ample time to fill same carefully.

On my part, I will do everything in my power to please you, giving you the best quality of goods at the lowest living prices. I do not offer premiums or other nostrums, nor do I offer anything I have no faith in.

I guarantee the safe arrival of all goods sent by express, but cannot be held responsible for anything sent by mail or freight; nor can I be held responsible for money sent in unregistered letters, or for failure or shortage of crops, stock being exhausted when order is filled, or any accidents or delays in delivery beyond my control.

Correspondence is solicited from collectors or raisers of new varieties of plants, seeds, or bulbs, with the view of purchasing or exchanging same.

If at any time you are in need of a good gardener or assistant, write me, as I can recommend you reliable men whom I know personally.

I am pleased at any time to receive visitors who are interested in plants of any description, and, as I have the largest and most varied collection of choice and rare subjects, it will repay any one, even should he come a long distance, to inspect the plant. Here you will see plants from all parts of the globe, and, among others, the unique and celebrated **George Washington Palm**, which was owned by the first **President of the United States**, and is the admiration of every visitor.

The Nurseries are situated on the Delaware, Lackawanna & Western Railroad, adjoining the depot of South Orange. There are eighty-three trains daily, so visitors will only have a few minutes to wait, trains being so frequent. There are also electric cars from Newark to South Orange, connecting with the Pennsylvania Railroad and Jersey Central Railroad every ten minutes. Taking it all in all, it is the most accessible Nursery in the country.

Trusting to hear from you and your friends who are interested in gardening, and assuring you of my best efforts to give satisfaction,

Yours respectfully,

In the future, this and other Catalogues will only be sent to customers, or those applying for same.

THOS. W. WEATHERED'S SON

erects Greenhouses complete, of every description, from largest Range, of patented iron construction, to smallest wooden Conservatory; or supplies materials for same.

A large stock of everything necessary to erect, heat or ventilate a Greenhouse always on hand.

Sash Bars, Ventilating Sash, Plates, etc., of best Cypress, in large or small quantities.

Do not build until you consult with me.

New Chrysanthemums.

	Each.	Per doz.		Each.	Per doz.
Mrs. A. P. Meredith (Manda). A bright yellow sport of the well-known <i>Mrs. Kimball</i> . Like its parent, a vigorous grower, with stout stem and fine heavy foliage. The flowers are very double, and last a long time in perfection. A valuable acquisition.....	\$0.50	\$5.00	Midge (N. S. & S.) A fine double pure white variety, with short, stout stem and fine heavy foliage; one of the earliest varieties in cultivation.....	\$0.75	\$7.50
Elvena (J. N. M.) A pleasing shade of beautiful soft silvery pink, the finest early pink to date, broad incurved petals, extra good stem and fine heavy foliage.	.75	7.50	Merula (N. S. & S.) Very double flowers of a beautiful shade of light pink, measuring five inches in diameter and nearly as deep; fine stem and foliage.....	.75	7.50
Elainora (J. N. M.) Deep pink; reverse, clear rose; large, bold, handsome incurved flower, with good stem and fine handsome foliage; blooms in midseason...	.75	7.50	Mrs. John J. Glessner (N. S. & S.) Fine light yellow, very distinct in form, petals broad, opening in a whirl; robust grower; stout stem.....	.75	7.50
Evangeline (J. N. M.) Pure white, resembling the well-known <i>Kioto</i> in form; robust grower; good stem and foliage. One of the finest ever introduced.....	.75	7.50	Chito (N. S. & S.) Yellow ground, with fine red stripes, giving it a bronzy appearance; foliage, fine dark heavy green; fine stout stems.....	.75	7.50
Loantika (J. N. M.) Bright clear red, very early, and large petals, flat reflexed, but very full; the best early variety of this color.....	.75	7.50	Mrs. M. A. Ryerson (N. S. & S.) A fine pure white form; flowers deep; the petals are narrow and interlacing.....	.75	7.50
Leonidas (J. N. M.) Amaranth shaded maroon, very large flower, with straight flat petals, forming a bold, imposing flower; fine exhibition variety.....	.75	7.50	Sunstone (N. S. & S.) Petals hook up at the ending, showing light straw color on the reverse upper surface; bright yellow, shading to red.....	.75	7.50
Symphonia (J. N. M.) A very beautiful shade of carmine pink; reverse, soft silvery pink; incurved and very compact; dwarf grower.....	.75	7.50	Western King (N. S. & S.) Fine white, for cutting or exhibition; an incurved flower with outer petals slightly reflexing; winner of many prizes.....	.75	7.50

New Carnations.

	Each.	Per doz.		Each.	Per doz.
Lily Dean (J. N. M.) A bold, handsome pure white flower; the edges of the petals are beautifully penciled with clear pink, making it exceedingly attractive.....	\$0.25	\$2.50	Harrison's White (J. H.) A pure white sport from <i>Wm. Scott</i> , having all the characteristics and fine habits of this well-known variety.....	\$0.25	\$2.50
Maud Dean (J. N. M.) Delicate blush white, gradually deepening to the centre, making it a beautiful and attractive flower; it is also most delightfully fragrant.....	.25	2.50	Major Pingree (P. B. & S.) A fine yellow; petals penciled with red.....	.25	2.50
			Morello (H. & L.) A beautiful scarlet, with monster flowers, measuring three to four inches in diameter.....	.25	2.50

NEW HYBRID WICHURIANA ROSES,

OR THE

DOUBLE MEMORIAL ROSE.

IT gives me great pleasure to offer to the public the first Hybrids of *Rosa Wichuriana*, which are the grandest novelty of 1897. The habit of these new Roses is the same as the *Rose Wichuriana*, or *Memorial Rose*. The growth is creeping, and therefore can be used to cover the ground, stems of trees, pillars, posts, trellises, or any other purpose desired, including pot culture. They are the hardiest Roses I know of, and will stand any climate or exposure. They thrive well in the poorest soil or on a gravel bank. The foliage is finely cut, thick, of a leathery substance, bright green, shining as if varnished, not subject to mildew or any insect, but keeps its full beauty until almost Christmas. The flowers are produced in the greatest profusion, so that a two or three year old plant will produce several thousand most exquisite blossoms, which are deliciously fragrant and last a long time in perfection.

MANDA'S TRIUMPH (*Manda*).

This grand Rose is of free growth, luxuriant foliage, and produces large clusters of double pure white flowers, two inches in diameter, beautifully imbricated and well formed, very sweet scented.

UNIVERSAL FAVORITE (*Manda*).

This is the most vigorous plant of the set. The long branching shoots are covered with dense bright green foliage. The double flowers are over two inches in diameter, and of a beautiful rose color, similar to the Bridesmaid, and deliciously fragrant. A grand variety for any purpose.

SOUTH ORANGE PERFECTION (*Manda*).

This is a gem, growing freely close to the ground, and having multitudes of the most perfectly formed double flowers, about one and a half inches in diameter, soft blush pink at the tips, changing to white. It lasts a long time in perfection.

PINK ROAMER (*Manda*).

This is without question a Hybrid between the *Sweetbrier*, and carries these characteristics in bloom, while the growth, which is very rampant, and the luxurious foliage, partake more of the *Wichuriana*. The single flowers, which are produced in close heads, are nearly two inches in diameter, bright rich pink, with almost a white centre, which lightens up the orange-red stamens, producing an effect which, combined with fragrance, makes it one of the most valuable roses in cultivation.

Taking them together, the set of the four above varieties should be in every garden, and I am sure they will prove more valuable than the celebrated *Crimson Rambler*, as they are of a much more vigorous growth. Some shoots made last season were from fifteen to twenty feet in length, which is marvelous amongst roses.

Price of plants, 60 cents each; \$6.00 per dozen; \$35.00 per hundred; or a set of the four varieties, one of each, \$2.00.

P. S.—Any one ordering the set or more and desiring so, I will send one of the mother plants (*Rosa Wichuriana*) free of charge.

The plate on the opposite side does not do justice to these marvelous roses.

Read Press comments on the back of the plate.

Manda's Triumph

Universal Favorite

South Orange Perfection

MANDA'S
Hybrid Wichuraiana
Roses

PRESS COMMENTS.

From the **American Florist**, June 13, 1896—"W. A. Manda, South Orange, N. J., exhibited a most remarkable group of new roses, seedlings of *Rosa Wichuriana*, in foliage and habit exactly like *Wichuriana*, but the flowers of one are double white, another double pink, another shell pink, and one single pink. They are all beautiful acquisitions, lovely colors, and very fragrant. They created quite a sensation, and the Committee of Awards was requested to visit Mr. Manda and report on these beautiful novelties."

Florists' Exchange, June 13, 1896—"Mr. Manda had on exhibition some very interesting hybrids of *Rosa Wichuriana*, all showing double flowers, one especially being worthy of note—a cross between one of the hybrid perpetuals and the type, the true parentage not being known. The plant shows the floriferousness and habit of growth of *R. Wichuriana*, being even more vigorous. The flowers are white and are very symmetrical. Mr. Manda said, from a small cutting put out last July, on one branch he counted over 150 flowers, and the growth had now attained the length of eighteen feet six inches. Other hybrids shown had been fertilized by Noisette pollen, the result being some very pretty shades of color ranging from pink to white. Mr. Manda has also been crossing the Memorial rose with Meteor, Mme. Hoste, and American Beauty, and the Sweetbriar, from which he hopes to obtain good results. The thanks of the club were tendered to Mr. Manda for his excellent exhibit."

The **Florists' Exchange**, June 27—"W. A. Manda was awarded honorable mention for a very promising hybrid *Rosa Wichuriana*," "W. A. Manda, South Orange, N. J., had an interesting display of orchids and herbaceous flowers, and received from the committee of the Gardeners' Society a certificate for his new double hybrid of *Rosa Wichuriana*, previously mentioned in these columns, and which he has named 'Manda's Triumph.'"

American Gardening, June 27—"New Rose, 'Manda's Triumph,' New York Gardeners' Society's certificate of merit to W. A. Manda, South Orange, N. J."

American Florist, June 27—"Brought out several very nice exhibits, among which that of W. A. Manda was particularly prominent. A hybrid of *Rosa Wichuriana* with double white flowers and dwarf habit gave promise of becoming a valuable addition to its class.

"To W. A. Manda, (New York Gardeners' Society certificate), for new rose 'Manda's Triumph,' a hybrid from *Wichuriana* and an unknown H. P."

"Again shown and greatly admired—W. A. Manda's *Wichuriana* Hybrid, which received the award of honorable mention."

American Gardening, June 27—"Special mention must be accorded to W. A. Manda for his most interesting new hybrid rose (*R. Wichuriana* X hybrid perpetual variety). This 'Triumph' as it has been named, was described on page 374, issue of June 13. It is satisfactory to learn that the Gardeners' Society recognized its interest and made a suitable reward."

American Florist, July 18, 1896—"The New York Florists' Club has, through its Committee on Awards, given a silver medal and three certificates of merit to W. A. Manda for new roses."

The **Florists' Exchange**, July 18—"The New York Florists' Club's Committee of Awards has recommended that the club's silver medal be awarded to W. A. Manda, South Orange, N. J., for his double hybrid of *Rosa Wichuriana*."

"The Committee of Awards of the New York Florists' Club visited the establishment of W. A. Manda, at South Orange, N. J., on June 15, and examined his new roses. In their report of same they recommend certificates of merit to seedling No. 2, 'a very pretty double rose, color a porcelain pink, two inches in diameter, of sweet fragrance, much like the old Sweetbriar, extremely strong grower and hardy;' to No. 3, 'a rosy pink, with a large decided white eye, single bloom, two inches in diameter, an exceedingly strong grower and hardy,' and to No. 5, 'a beautiful double little rose, one inch in diameter, of a lovely blush pink color, a very strong grower and hardy.'

"They recommended a silver medal to No. 8, 'the gem of the collection,' which might be called a double Rose *Wichuriana*, color of pure white, and intensely double, very sweet fragrance, the foliage a deep shining green, of great substance; the growth is exceedingly strong and perfectly hardy.

"The committee consists of Eugene Dailedouze, chairman; Patrick O'Mara, and Peter MacDonald."

The Gardener's Magazine, London, Eng., Nov. 9, 1896.—A season or two since Mr. W. A. Manda crossed *Rosa Wichuriana* with various other species and varieties, Eglantine, a number of the most attractive teas, American Beauty and Gen. Jacqueminot. The hybrids have, we learn from the "Garden and Forest" lately been shown at South Orange, planted out on bare sandy banks, in positions where *Rosa Wichuriana* is especially valuable and attractive. In character of foliage and habit of growth they resemble the prostrate rambling parent, but the crossing has produced a most remarkable series of free flowering plants, with handsome fragrant flowers. One attractive hybrid, has clusters of pink single flowers, which resemble in miniature the Bridesmaid. There are also several forms with double white flowers. One of these with a delicate pink hue is peculiar and distinct, the numerous small rounded petals being reflexed and perfectly imbricated, an arrangement not usual among roses. Mr. Manda has also a number of other forms, mostly pink or rose in color, and varying in shape and number of petals which he purposes naming and offering next year. These hybrids must, our contemporary believes, meet with great favor with planters, as they add brilliancy or warmth of color to a valuable rose.

AWARDS.

Manda's Triumph—Silver medal from the New York Florists' Club; Certificate from the New York Gardeners' Society; Honorable mention from Massachusetts Horticultural Society.

Universal Favorite—Certificate of Merit from the New York Florists' Club.

Pink Roamer—Certificate of Merit from the New York Florists' Club.

South Orange Perfection—Certificate of Merit from the New York Florists' Club,

NEW ROSES.

SOUVENIR DE PRESIDENT CARNOT.

Ivory white shading to a beautiful pearly pink in the centre; a fine, bold flower, very large and of exquisite form, with good stiff stem and handsome foliage. The plant is of extra vigorous growth, and very free flowering. Taking it all in all, it is one of the finest roses ever introduced. Equally good for winter forcing or outdoor culture in summer. 35 cents each; per dozen, \$3.50; per 100, \$25.00.

YELLOW RAMBLER (Aglaia).

The hardiest yellow climbing rose in cultivation. Same habits as the well-known *Crimson Rambler*. Flowers a decided yellow, borne in great clusters, lasting long in perfection. \$1.00 each; per dozen, \$10.00.

CRIMSON RAMBLER.

This superb novelty is of the Polyantha class, and of Japanese origin. The plant is of vigorous growth, making shoots eight to ten feet long. For covering trellises, or as a pillar rose, it cannot be excelled. It is also magnificent in bush form. The flowers are produced in large pyramidal trusses, and in color are of the most brilliant crimson, lasting in perfection for two weeks with their freshness of color unimpaired. 35 cents each; per dozen, \$3.50.

Fine strong two-year old plants, 75 cents each; per dozen, \$7.50.

MOSELLA.

Similar in habit and as free a grower as the well-known *Clothilde Soupert*. The outer petals are white, while the centre is a beautiful yellow; a grand bedding rose. 25 cents each; per dozen, \$2.50.

MARGARET DIXON.

This is without doubt the finest pure white *Hardy Perpetual Rose* in cultivation. Flowers are of good form, as large as *Paul Neyron*, and of a fine shiny white; very vigorous and hardy strong two-year-old plants. 75 cents each; per dozen, \$7.50.

One of each of the above five Roses for \$2.75.

ABUTILON SAVITSI.

This is a grand novelty, and a very decided improvement on *Souv. de Bonn*. The leaves are heavily marked with a pure silvery white. The variegations are exceedingly beautiful, making it a fine decorative plant. There is no *Abutilon* that can compare with it for striking beauty. 50 cents each.

NEW CANNA, "LITTLE BILLEE."

A very dwarf variety, intermediate in color between *Queen Charlotte* and *Souv. de Antoine Crozy*; grows about three feet high. Fine as a pot plant, and equally good for bedding. 50 cents each; per dozen, \$5.00.

NEW CANNAS.

I am very pleased to offer such a grand lot of new varieties of this very popular plant for outdoor bedding; in fact, no garden should be without this collection of five sterling kinds.

CANNA, MANDA'S IDEAL.—(Manda.)

To my mind the finest and most useful *Canna* in cultivation. Naturally, it grows from two to three feet high, having small glaucous green leaves, and producing stout stems, which branch and throw up as many as a dozen large trusses of well formed flowers, which are of a rich scarlet vermilion color. It lasts for a long time in perfection, and the numerous spikes fully developed give it a dazzling appearance. A like effect is not produced by any other *Canna* in cultivation. I raised this *Canna* from seed three years ago, and have fully tested its merits from that time, and feel confident that it will be one of the best acquisitions for bedding purposes. Ready for delivery after March 1st. **Price, 75 cents each ; \$7.50 per dozen.**

CANNA, ROBERT CHRISTY.—(Manda.)

A beautiful acquisition in its color, was raised by Mr. Robert Christy, of Newport, R. I., and has captivated everybody who has seen it. Grows about four feet high, with stout stems supporting large musa-like foliage, and producing immense spikes of bright orange vermilion flowers, which is a shade unique amongst *Cannas*. Awarded **First-Class Certificate** by the *New York Florists' Club*. Ready after March 1st. **Price, 75 cents each ; \$7.50 per dozen.**

CANNA, JOHN WHITE.—(White.)

This is a distinct novelty in the way of Cannas, growing about three feet in height, with reddish stems, light green foliage, beautifully striped with white, yellow and rose, edged with red, the combination of which produces a grand effect, and on account of which it will be valuable for subtropical borders and beds, and for other purposes, where fine foliage plants are in demand. The flowers are small and of a bright red color, succeeded by red fruit, which enhances its appearance. Ready after March 1st. **Price, \$1.00 each; \$10.00 per dozen.**

CANNA, ITALIA.

One of the wonders of recent introduction, growing from six to nine feet high, with large musa-like foliage. The flower spikes produce a number of extraordinary large flowers of a beautiful scarlet color, edged with yellow, a plant that should be in every collection. **Price, \$1.00 each; \$10.00 per dozen.**

CANNA, AUSTRIA.

A companion to the above-named variety, having the same wonderful qualities of growth and flowers, with the exception that its wonderful large blooms are of a beautiful canary yellow, faintly spotted with purple. **Price, \$1.00 each; \$10.00 per dozen.**

Collection of the Five New Cannas, one of each, for \$3.75.

HARDY NOVELTIES.

ABIES FRASERII.

This exceedingly handsome native tree is so seldom seen in cultivation that I make this special notice, and would recommend it to any one planting trees. The branches are rather broad, and of a glaucous shade, combining well with the bright green of the upper surface. A very free grower, and easy to transplant. Price, 50 cents to \$1.25 each, according to size.

COREOPSIS LANCEOLATA, "HARVEST MOON."

A grand improvement on the well-known species, and one that should be in every collection of Hardy Plants. The habit and flowers are much larger and stronger. Well adapted for cutting purposes. Each, 20 cents; per dozen, \$2.00.

NEW WHITE ORIENTAL POPPY, "SILVER QUEEN."

An extraordinary variety of this showy and ornamental perennial, with extra large, showy flowers, same as the type, with the exception of the color, which is beautiful silvery white, which renders it amongst the rarest and most beautiful hardy plants in cultivation, and should be in every garden. Each, 35 cents; per dozen, \$3.50.

HEMEROCALLIS AURANTIACA MAJOR.

This is one of the finest hardy plants in cultivation, producing in the spring spikes with very large orange yellow flowers handsomer than any Lily; of the easiest culture, and a grand addition to this popular class of plants. Price, 50 cents each; \$5.00 per dozen.

RUDBECKIA FULGIDA.

This is decidedly the brightest and most showy amongst the hardy plants in cultivation, and of the easiest culture possible. It will thrive in any situation, preferring a sunny exposure. The plant is compact and bushy, producing numerous stems with hundreds of heads of flowers, the rays of the flowers being a dazzling orange yellow, while the disk is of a deep rich velvety maroon brown. This combination of color makes it one of the most striking objects in a flower garden. Price, 20 cents each; \$2.00 per dozen.

DOUBLE RUDBECKIA, "GOLDEN GLOW."

(Rudbeckia laciniata fl. pl.)

This is a desirable hardy plant, growing four to five feet high, the stems being laden with numerous double yellow flowers, in size and general appearance resembling a *Cactus Dahlia*. Price, 20 cents each; \$2.00 per dozen.

HARDY PINK, "MAY."

This is a very desirable *hardy pink*. Flowers as large as any Carnation, deeply fringed, of fine rosy-pink color and true clove-scented. Price, 25 cents each; \$2.50 per dozen.

One of each of the above Hardy Novelties for only \$1.85.

NOVELTIES IN FLOWER SEEDS.

New Cosmos.

This popular plant has been so greatly improved that I am able to offer ten new kinds, besides four of former introduction. The flowers are very large, beautifully fringed, and oddly shaped, and have a wide range in color.

- Giant Red.** Flowers perfect form, measuring four and one-half to five inches across; rich crimson.
- Giant Pink.** Flowers same size as the above of a beautiful soft pink color.
- Giant White.** Extraordinarily large pure white flowers.
- Marguerite.** Flowers medium size, petals deeply lacinated or fringed, resembling Marguerites, very distinct, of various colors.
- Camellaeiflora.** Large flowers, with overlapping petals of great substance, resembling single Camellia.

Tints of Dawn. Distinct type, variously formed flowers, with ground flaked or flushed with delicate pink.

Pink Maroon Ring. The name describes the color of the very large and well formed flowers.

Single Dahlia Red. Flowers very large, resembling a single Dahlia, of the richest crimson color.

White Fringed. Flowers very large, perfectly formed, and beautifully fringed.

Manda's Mixture of the above varieties, containing all types.

Price, 25 cents per package; the collection of Ten sorts for.....\$2.00

Antirrhinum Majus Grandiflorum.

This is a wonderful improvement upon the old-fashioned variety, with very large spikes and flowers, very useful for cutting. The following four kinds are the only sorts offered as yet:

Delila. Carmine with yellow and white throat.

Luteum. Pure yellow variety, large flowers.

Delicate Rose. Beautiful shaded flowers.

Choice Mixture. Great variety of remarkable colors.

Price, per package, 25 cents; the Four kinds for 75 cents.

New Single Flowering Asters.

To the æsthetic eye this will be a welcome addition to our summer flowering plants. They form fine bushes, which are literally covered with flowers, and last a long time in perfection either on the plant or as a cut flower. I have these in six separate colors, White, Pink, Brilliant Rose, Dark Red, Light Blue and Dark Blue, also in Choice Mixture.

Price, 15 cents each. Collection of 7 packets for \$1.00.

Gloxinia Hybrida Gigantea (B.)

This is a strain of wonderful large flowers, measuring four to five inches across, and has all the beautiful colors for which this plant is celebrated.

Price, per packet, 50 cents.

Myosotis Alpestris Stricta Rosea.

A distinct variety, forming a pillar-like plant, covered with beautiful rose-colored flowers.

Price, per package, 35 cents.

New Sweet Pea, Red Riding-Hood.

This is the very appropriate name given to this most distinct variety. The form is entirely new, the standard being sacrificed to the wings and keel, both of which are abnormally developed. Very vigorous of growth, with long, stiff stems. Flowers a beautiful rosy color, produced in great abundance.

Price, 15 cents per package.

Dwarf Sweet Pea, Cupid.

A beautiful dwarf form introduced last year; grows about five inches high, and yet this tiny plant is literally covered with perfectly formed blossoms of the purest white. (*Numerous complaints were received last year about the poor germination of the seed, but this year I am able to secure the seed in bulk and put it up in my own packets, and I am satisfied that it will give better results.*)

Price, per packet, 15 cents.

JAPANESE NOVELTIES AND SPECIALTIES.

Having made special arrangements with some of the most celebrated Japanese gardeners and raisers of new plants, I have secured a limited quantity of the latest novelties in the following classes of plants, for which Japan is so famous. The supply being limited, I offer them in sets only. Strong plants ready for delivery on arrival from Japan, and orders filled strictly in rotation. All these plants are perfectly hardy, and will thrive in any ordinary garden, but prefer a somewhat sheltered situation, and once planted will come up year after year and make a grand display.

JAPANESE MAPLES.

One of the finest of our garden shrubs and trees. This collection embraces fifty distinct varieties, and two specimens curiously trained, having from four to six distinct varieties grafted on their twisted stems. **Price for the entire collection, \$50.00.**

JAPANESE TREE PAEONIES.

This extraordinary collection comprises fifty most distinct varieties. The flowers are of immense size, and range in color from pure white to the darkest red, forming large bushes in a short time. **The entire collection of Fifty varieties for \$50.00.**

JAPANESE LILIES.

A complete collection of **thirty-eight** of the most beautiful lilies. They deserve general culture, and should be extensively planted. **One strong bulb of each for \$12.00; three bulbs of each for \$30.00.**

LILIUM LONGIFLORUM ALBO-MARGINATUM (The Chotaro Lily).

This is the greatest novelty in the bulb line. The flowers are as large as the well-known *Lilium Longiflorum* while the luxuriant foliage has a broad margin of silvery white, which combines well with the white flowers, giving the plant a unique appearance. Stock limited. Order early. **Thirty cents each; per dozen, \$3.00.**

JAPANESE IRIS.

This set of fifty varieties is without doubt the grandest lot of Iris ever introduced from Japan, and no garden of any size should be without them. They thrive luxuriantly in rich, damp soil, and produce a blaze of color during June and July. **One strong plant of each of the Fifty varieties for \$24.00.**

IMPERIAL JAPANESE MORNING GLORIES.

These are new types of the well-known *Morning Glory*. The vines are of a strong and robust growth, attaining a height of from 30 to 40 feet. The foliage varies greatly, some plants having yellow or silver foliage, while others are blotched and mottled, but the great charm of this wonderful introduction lies in the great beauty and gigantic size of the flowers, which often measure six inches across, and their great substance causes them to remain much longer in perfection than the ordinary type.

The colors of the flowers vary into nearly every shade imaginable, making them real wonders of nature. They are of easy culture, succeeding well in any sunny position. **Per packet, 10 cents; dozen packets, \$1.00.**

To convey to my customers the wonderful beauty of these desirable novelties, I will be pleased to send, upon request, by express, a set of hand-painted plates of these beautiful flowers, from nature, the same to be returned to me after inspection.

Full collection of Japanese Seeds, Plants and Bulbs always on hand. Prices, etc., on application.

MANDA'S IMPROVED GOLDEN-LEAVED SALVIA.

THIS is without doubt the finest introduction made amongst our popular plants for years past, for in this plant we have a contrast of color between the foliage and flowers which is simply marvelous, thus giving it a unique position as a foliage and flowering plant. It grows about one foot and a half high, and is far more dwarf and compact in its habits than *William Bedman*. Seeing it from a short distance, one would take it for the well-known *Golden Bedder Coleus*, except for the masses of brilliant scarlet-flowered spikes which loom up over the yellow foliage. The effect produced when this gem is planted en masse on a lawn is extremely fine. The **contrast** between the **golden yellow foliage**, the **scarlet flowers**, and the **green grass** gives to us the grandest combination of colors imaginable. The color of the leaves is **constant** and distinct at any stage of the plant inside or out of doors.

This plant will become very popular, as any one can grow it, and the price is within the reach of every one.

Price, each, 25 cents; per dozen, \$2.50; per 100, \$18.00.

On this and all preceding pages are the finest novelties of the year.

The balance of the Catalogue is devoted to my leading specialties.

Consult my Pocket Garden Dictionary of everything pertaining to Horticulture.

In the future, this and other catalogues will be sent to customers only.

“ Tuberous-Rooted, Single, yellow, red, rose, and white; very fine strains.....	.15	1.50	
“ Tuberous-Rooted, Single, mixed, all colors; very fine strains.....	.12	1.20	

Gladiolus.

My collection comprises many varieties of these gay colored flowers. Fine when planted in shrubbery or rose beds, as they make the plantings gay with their beautiful flowers long after their blooming season is past.

Gladiolus Collection. Three named varieties, my selection of the best varieties, \$0.25		
Gladiolus Collection. Six named varieties, my selection of the best varieties.....	.50	
Gladiolus Collection. Twelve named varieties, my selection of the best varieties, 1.00		
	Doz.	100.
Gladiolus. All colors mixed; best varieties only.....	\$0.30	\$2.00
Gladiolus. American Hybrids. Exceedingly handsome; great variety of colors....	.50	3.00
Gladiolus. Yellow varieties mixed. Some grand shades.....	.50	3.00
Gladiolus. Lemoine's Finest, mixed. Very fine strain.....	.75	5.50

	Doz.	100.
Gladiolus. White and Light mixed. Fine strains of light colors.....	\$0.50	\$3.00
Gladiolus. Pink varieties mixed. Some grand shades.....	.50	3.00

Lilies.

The following are only a very few of the collection I carry, having at least a hundred varieties in stock of these well known favorites.

	Each.	Doz.
Lilium auratum (<i>The Golden Banded Lily of Japan</i>). Very fine bulbs.....	\$0.20	\$2.00
Lilium longiflorum albo-marginatum. Fine form of the longiflorum, with variegated leaves.....	.30	3.00
Lilium speciosum. Fine pink variety, with dark spots on petals.....	.20	2.00
Lilium speciosum album. Fine variety of the above flowers; pure white.....	.25	2.50
Lilium speciosum roseum. Another variety of this beautiful Lily; flowers deep rose.....	.20	2.00
Lilium tigrinum splendens. Fine red flowers; grows very easily.....	.20	2.00
Caladium esculentum (<i>Elephant's Ear</i>). Massive tropical looking foliage.....	.25	2.50
Dahlia, Mixed. The very best varieties; makes grand show.....	.15	1.50
Gloxinia, Mixed. Finest European strains; extra fine bulbs.....	.25	2.50
Hyacinthus candicans. Fine long spikes, with white flowers.....	.08	.75
Madeira Vine (<i>Climbing Mignonette</i>). A well known popular plant.....	.05	.50
Tigridia in varieties (<i>Mexican Shell Flower</i>). Finest varieties only.....	.05	.50
Tuberose, Dwarf Pearl. The dwarf double white variety.....\$4.00 per 100.	.10	.75
Tuberose, Variegated foliage. A very showy variety.....	.20	2.00
Tuberose, Albino. A grand sort, producing long branching spikes of flowers.....	.25	2.50

For other varieties, see my Pocket Garden Dictionary, pages 56 to 58.

SEEDS.

Here I make only a small selection of the most desirable *Vegetable* and *Flower Seeds*, while you will find a most complete collection of same in my **Pocket Garden Dictionary**, of everything pertaining to Horticulture, on pages 7 to 51; also the *Disclaimer* under which I offer this.

Selection of Vegetable Seeds.

Here I mention the leading kinds only, and would be pleased to make a collection that would plant a garden of *one thousand square feet* during the season for **\$2.75**; or one of *five thousand square feet* for only **\$6.75**, and give you vegetables the whole season:

Special quotations given for large quantities when planting large orchards.

For full collection, see *Pocket Garden Dictionary*, pages 96 to 99.

Landscape Gardening.

THIS is a very important subject, and one that should not be neglected or overlooked, especially when building up a new place. It means that with a **good plan** you can lay out your place to all the advantages it commands naturally, besides making and developing features where the location is disadvantageous. The **roads** and **walks** should be laid out not only to be practical, but also to be in harmony with everything adjacent.

The Proper Location of Trees and Shrubs,

with the selection of the best and most desirable kinds, is very important, for you are planting for the future, and, as it takes years for a shrub or tree to grow, you should plant only such as would be desirable and valuable when grown up. The same applies to the location of vegetable, flower, fruit, rock, or wild garden borders or flower beds.

The Grouping or Massing of either Trees, Shrubs, Plants, or Bulbs,

to produce certain effects at special seasons, either in foliage, flower or fruit, can only be successfully accomplished by having full knowledge of the habits and character of such plants.

Many unsightly corners and spaces could be not only hidden, but actually made beautiful. Thus, outside the general flower garden, barren rocks and stumps of trees can be covered with luxuriant growth.

Dry and Sandy Hills, where even grass refuses to grow,

with proper selection, can be made as beautiful as where the soil is rich, while marshes can be turned into handsome objects, and ponds covered with showy water plants. In one word, it is the knowledge of the habits of plants and their adaptability to certain locations that brings the desired success.

Locating and **designing** greenhouses, graperies, pits or frames on a place are also very important; so are the proper details in the construction of greenhouses, which are generally left to architects, who do not take into consideration the practical points of the greenhouse or conservatory.

Do not lay out your place without a Landscape Gardener

any more than you would build a house without an architect; and you cannot do better than consult

Yours truly,

Correspondence invited.

MANDA'S PALM SHOW.
