Acknowledgments

Many persons participated in the diverse activities of the 1980 census. These acknowledgments generally reflect staff during the post-census data publication process. The Bureau was guided by then Director, **Bruce Chapman**, and Deputy Director, **C. L. Kincannon**. Primary direction of the data publication program was performed by **William P. Butz**, Associate Director for Demographic Fields, assisted by **Peter A. Bounpane**, Assistant Director for Demographic Censuses, in conjunction with **Barbara A. Baller**, Associate Director for Statistical Standards and Methodology, **Howard N. Hamilton**, Acting Associate Director for Information Technology, **James D. Lincoln**, then Associate Director for Administration, and **Stanley D. Moore**, Associate Director for Field Operations. The Director's staff was assisted by **Sherry L. Courtland**, Director of the census enumeration and early processing activities was provided by **Vincent P. Barabbs**, former Director; **Daniel B. Levine**, former Deputy Director; and **George E. Hall**, former Associate Director.

Responsibility for the overall planning, coordinating, processing, and publication of the 1980 census was in the Decennial Census Division under the direction of **Stanley D. Matchett**, Chief, assisted by **Rachel F. Brown** and **Roger O. Lepage**, Assistant Division Chiefs. The following Branch Chiefs were responsible for support services: **Donald R. Datzell**, **Stephen E. Goldman**, **Judith A. McKay**, **Dennis W. Stoudt**, and **Richard R. Warren**. **William Ball**, **Imelda Severdia**, and **Jess Thompson** prepared the programs for this report.

This report was planned and its content developed in the Population Division by **Philip N. Fulton**, Chief of the Journey-to-Work and Migration Statistics Branch. The work was under the general supervision of **Roger A. Herriot**, Division Chief, **Paula J. Schneider**, Staff Assistant for Census Programs, and **Arthur J. Norton**, Assistant Division Chief. Important contributions were made by **Phillip A. Salopek**, **Richard L. Forstall**, **Edward J. Yaneck**, and **Gloria A. Swieczkowski**.

A number of advisory groups and individuals representing or affiliated with universities,

research organizations, professional associations, government agencies, and other groups assisted in determining the content of PC80-2 reports.

Administration support was provided by the Administrative Services Division, **Robert L. Kirkland**, Chief, and **William C. Fanning**, Assistant Chief.

Computer processing was performed in the Computer Operations Division, **C. Thomas DiNenna**, Chief, **James E. Steed**, **George M. Bowden**, and **Joseph J. Sferrella**, Assistant Chiefs.

Questionnaire processing procedures were developed in the Decennial Processing Staff, **James S. Werking**, then Chief, under the direction of **Harry O'Haver**, then Assistant Chief. The clerical coding and microfilming of the sample questionnaires were performed at three decennial processing locations as follows: Data Preparation Division, **Don L. Adams**, Chief; Jeffersonville Processing Office, **Robert L. Kirkland**, then Processing Manager; New Orleans Processing Office, **Robert L. Allen**, Chief; and Laguna Niguel Processing Office, **Robert N. Scheller**, Chief.

User services were provided by the Data User Services Division under the supervision of **Michael G. Garland**, Chief, **Marshall L. Turner, Jr.**, and **Paul T. Zeisset**, Assistant Chiefs.

Data collection activities were supervised in the Field Division by **Lawrence T. Love**, Chief, under the direction of **Richard Blass**, **Charles Hancock**, and **George T. Reiner**, Assistant Chiefs, with the assistance of the directors and assistant directors of the Bureau's regional offices.

Geographic programs and plans were developed in the Geography Division under the direction of **Joseph J. Knott**, **Robert W. Marx**, and **Silla G. Tomasi**, Assistant Chiefs, and **Donald I. Hirschfeld**.

Publications editing, design, composition, and printing procurement were performed by the staff of the Publications Services Division,

Raymond J. Koski, Chief; **Milton S. Andersen**, **Arlene C. Duckett**, and **Gerald A. Mann**, Branch Chiefs.

The Statistical Methods Division was largely responsible for weighting sample data and producing variance estimates. This work was supervised by **Charles D. Jones**, Chief; **Susan M. Miskura** and **Robert T. O'Reagan**, Assistant Chiefs. Important contributions were made by **David H. Diskin**, **Milton C. Fan**, **Thomas W. Harahush**, **Robert S. Jewett**, **J. Kim**, **Teressa A. Passalacqua**, **Charles E. Talbert**, **John H. Thompson**, and **Henry F. Woltman**.

The system design, technical specifications, assembly, and installation of the FOSDIC and Automated Camera Technology System were the responsibility of the Technical Services Division, **C. Thomas DiNenna**, Acting Chief, and **Robert J. Varson**, Branch Chief.

Many other persons participated in the various activities of the 1980 census. For a list of key personnel, refer to the *History of the 1980 Census of Population and Housing*, (PHC80-R2).

SUPPRESSION OF DATA FOR CONFIDENTIALITY	IV

GENERAL

This report is part of the *Subject Reports* series and presents sample data from the 1980 Census of Population on the social and economic characteristics of the population. The report provides statistics for workers 16 years old and over classified by place of residence and place of work for standard metropolitan statistical areas (SMSA's) and their constituent parts.

The abbreviated identification for this report is PC80-2 (i.e., Population Census, 1980-Volume 2) followed by a number and letter representing the specific report.

A large portion of the information compiled from the 1980 Census of Population appears in Volume 1, *Characteristics of the Population*, which focuses on data for States, standard metropolitan statistical areas, urbanized areas, counties, places, American Indian reservations, and other geographic areas. For a more complete description of the 1980 census data products, see appendix E.

Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The

changes do not, however, affect to any appreciable extent the comparability between the 1980 census data and the 1970 census data for most characteristics. Further information on comparability for specific subjects appears in appendix A.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains text (this introduction and five appendixes), a table of contents, detailed tables, and a map.

Each detailed table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title.

Appendix A describes area classifications and provides definitions and explanations for the subjects covered in this report. Appendix B explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix C presents information on the sources of error in the data and editing procedures. Appendix D contains facsimiles of the respondent instructions and 1980 census questionnaire pages. Appendix E summarizes the data dissemination program of the 1980 census.

The tables present information on selected social and economic characteristics of workers in commuting flows. Table 1 presents summary data for the United States and regions on the work-place of workers 16 years old and over classified by type of residence. Table 2 presents information for each SMSA.

In table 2, comparative data on the characteristics of workers who reside in each geographic unit of the SMSA and who worked in each unit are shown followed by information on the characteristics of workers commuting within and between each geographic unit. The geographic units recognized are:

1. Each central city of an SMSA regardless of size, each other incorporated place of 50,000 or more (census designated place of 50,000 or more in Hawaii), and each town/ township of 50,000 or more that qualifies as a census designated place (CDP). If a place extends into more than one county, the portion in each county is treated as a separate geographic unit. However, if the county portion of a place has no sample population, it is not shown as a residence area but is always shown as a workplace. The affected places are:

Charleston-North Charleston, S.C. SMSA—North Charleston city, part in Berkeley County;
Chicago, Ill. SMSA—Arlington Heights village, part in Lake County; Corpus Christi, Tex. SMSA—Corpus Christi city, part in San Patricio County;
Dallas-Fort Worth, Tex. SMSA—Garland city, part in Collin county; Plano city, part in Denton County; Grand Prairie city, part in Ellis County;
Dallas city, part in Rockwall County; Garland city, part in Rockwall County;
Jackson, Miss. SMSA—Jackson city, part in Rankin County; Kansas City, Mo.-Kans. SMSA—Independence city, Mo., part in Clay County;
Lansing-East Lansing, Mich. SMSA—Lansing city, part in Clinton County.

2. For workplace only, the central business district (CBD) of each central city and the remainder of the central city.
3. The remainder of each county containing places included in 1. above. In New England, certain counties are divided into quasi-counties to give separate treatment to the portions of the county inside and outside individual SMSA's. The component towns and cities that make up these quasi-counties are shown in tables 4 and 11 of the 1980 Census of Population, *Number of Inhabitants*, PC80-1-A, for the State in which the county is located.
4. Each additional county or county equivalent (not containing any place included in 1. above.)

In presenting data for each SMSA, table 2 gives the commuter interchange for every possible combination of these geographic units including cases where no interchange takes place. Interchanges among geographic units are summarized in terms of whole counties (quasi-counties in New England). The number of workers living in each geographic unit who worked outside the SMSA is also shown, as well as the number of commuters living outside the SMSA who worked in each of the geographic units. For each SMSA, the data are further summarized for the total workers living in the SMSA who worked in the SMSA and worked outside the SMSA, and the total workers working in the SMSA who live outside the SMSA.

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations may appear in the tables:

- A dash “—” represents zero or a percent which rounds to less than 0.1.
- Three dots “. . .” mean not applicable, or that the data are being withheld to avoid disclosure of information for individuals. (For further information on disclosure, see the section below on “Suppression of Data for Confidentiality.”)
- (NA) means not available.
- CDP is census designated place.
- SCSA is standard consolidated statistical area.
- SMSA is standard metropolitan statistical area.

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Bureau of the Census takes precautions that its published data do not disclose information about specific individuals and housing units. To accomplish this the Census Bureau suppresses data for characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression, as defined below, may take place.

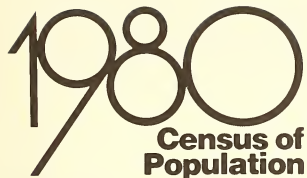

The general rules of primary suppression of sample data are as follows: estimates of total population by race and Spanish origin are never suppressed; other characteristics for persons are shown only if there are 30 or more persons in the geographic area; estimates of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown only when there are 10 or more year-round housing units in the geographic area; characteristics of families,

households, or occupied housing units are shown only if there are at least 10 occupied housing units within the geographic area; and distribution data for owners or renters are shown only where the number of owners is at least 10 and the number of renters is also at least 10. These primary suppression criteria are applied independently of one another. The comparable figures for complete-count (100-percent) data are 15 or more persons and 5 or more housing units of the specified type.

Population and occupied housing unit characteristics cross-classified by race or Spanish origin (of the householder in the case of occupied housing units) are subject to an additional level of examination. This level requires the 30-person or 10-housing-unit criterion be applied individually to each race or Spanish origin category.

Finally, complementary suppression is applied to prevent the derivation of primary suppressed data by subtraction.

In this report, for parts of places with an estimated population that is less than 30 persons, the commuting flows that originated in that part are combined with the data for the balance of the county in which that part of the place is located. The places affected by this suppression are: Appleton-Oshkosh, Wis. SMSA—Appleton city, part in Winnebago County; Chicago, Ill. SMSA—Chicago city, part in Du Page County; Schaumburg village, part in Du Page County; Dallas-Fort Worth, Tex. SMSA—Dallas city, part in Kaufman County; Greensboro-Winston-Salem-High Point, N.C. SMSA—High Point city, part in Randolph County; Houston, Tex. SMSA—Houston city, part in Montgomery County; Milwaukee, Wis. SMSA—Milwaukee city, part in Washington County; Youngstown-Warren, Ohio SMSA—Youngstown city, part in Trumbull County.
