CATALOGUE

OF

ALL THE PLANTS

INDIGENOUS, CULTIVATED IN, OR INTRODUCED TO
BRITAIN.

PART I.

THE LINNEAN ARRANGEMENT,

IN WHICH NEARLY 30,000 SPECIES ARE ENUMERATED:

WITH

THE SYSTEMATIC NAME AND AUTHORITY,
ACCENTUATION, DERIVATION OF GENERIC NAMES, LITERAL ENGLISH OF SPECIFIC NAMES,
SYNONYMES SYSTEMATIC AND ENGLISH OF BOTH GENERA AND SPECIES,

HABIT, HABITATION IN THE GARDEN, INDIGENOUS HABITATION,

POPULAR CHARACTER, HEIGHT, TIME OF FLOWERING, COLOUR OF THE FLOWER,

Mode of Propagation, Soil,

NATIVE COUNTRY, YEAR OF INTRODUCTION, AND REFERENCE TO FIGURES

PRECEDED BY

AN INTRODUCTION TO THE LINNEAN SYSTEM.

PART II.

THE JUSSIEUEAN ARRANGEMENT,

OF NEARLY 4,000 GENERA,

WITH

AN INTRODUCTION TO THE NATURAL SYSTEM, AND A GENERAL DESCRIPTION
AND HISTORY OF EACH ORDER.

~~~~~  
A NEW EDITION,

WITH SUPPLEMENTS INCLUDING ALL THE NEW PLANTS DOWN TO MARCH, 1839,  
AND WITH A NEW GENERAL INDEX TO THE WHOLE WORK.

EDITED BY J. C. LOUDON; F.L., H., G., & Z.S.

LONDON:

PRINTED FOR LONGMAN, ORME, BROWN, GREEN, AND LONGMANS,  
PATERNOSTER-ROW.

New-Street-Square.

## P R E F A C E.

THE titlepage of this Catalogue indicates how much it is in advance of all that have been hitherto published; but there are some improvements in it not there stated, and others of which it may be requisite to give some explanation.

The numeration of the species in the Linnean Arrangement, and the use of figures instead of letters in designating the varieties, are adopted with a view to facilitate the numbering of plants in gardens, of dried specimens in herbariums, of drawings, or of seeds. For the first purpose we have given an explanation of the Seton mode of cutting tallies (p. xxi.), by far the simplest and best for cutting with a knife on number sticks. The genera are numbered separately for the same purposes, and for more ready reference to the Linnean Arrangement from the Jussieucan, and to both Arrangements from the General Index. A star (\*) before either the number of a species, or that of a genus, indicates that next in alliance to it there is an additional species or genus, or several additional species or genera, in the Supplement (p. 467, to p. 490). A section (§) indicates that the name has been changed, or that the genus or species has undergone some alteration in the Supplement.

After the Natural Order two numbers are placed, as totals of species (e. g. sp. 4. — 10.); the first indicates the number of species in the Catalogue, the second the total number hitherto described by botanists. An accurate idea is thus given of what additions are to be expected to the British Hortus, in any genus of plants.

The signs used for the habits of plants (col. 3.), and those of their habitation and duration in the garden (col. 4.), explained in p. vii. viii., are improvements in botanical description by the Editor, first described in the *Encyclopædia of Gardening* in 1822, and applied in the *Encyclopædia of Plants* (1st edit. 1829). The twenty-three varieties of habit are indicated by figures of the plants themselves; as a tree for a tree, a shrub for a shrub, a climber or twiner for plants of these descriptions, a grass for a grass, a bulb for a bulb, a plant floating on water for an aquatic, &c., to recollect which requires no exertion of memory. A perennial is indicated by a triangle,  $\Delta$ , the sign of the Trinity, and therefore connected with perpetual duration or eternity, instead of the old sign,  $\mathcal{A}$ ; an annual remains a circle as before,  $\circ$ , because, among other reasons, gardeners sow patches of annual flowers in circles; and a biennial is a double circle,  $\odot$ , instead of the old sign,  $\mathcal{B}$ . The bark stove is a parallelogram,  $\square$ , which may be considered as representing the section of a hot-house closed on all sides, to maintain the greatest degree of heat; the dry stove, three sides of a parallelogram,  $\sqsupset$ , to maintain the next degree of heat; the green-house two and a half sides of a parallelogram,  $\sqsubset$ , which figure may be considered as the section of a green-house; and the frame two sides of a parallelogram,  $\_$ , which may be supposed to resemble the section of a frame or pit. This explanation will assist the reader in recollecting these signs. By combining the signs of duration with those of habitation,  $\square$ ,  $\triangle$ ,  $\square$ ,  $\triangle$ , &c., one column is made to serve the purpose of two. Thus, with these natural signs of habit, which amount to twenty-five, and of duration and habitation, which amount to nineteen, we have extended the power of this department of abridged botanical description from ten, the greatest number of signs, and these entirely arbitrary, that, we believe, has hitherto been used in botanical works, to forty-four, and these all natural or characteristic, the number employed in this Catalogue.

The systematic names are accented on a simple principle, which is explained in detail in p. viii. The derivations of the genera are given, and the specific systematic names literally translated, any explanatory words accompanying such translation being printed in Italic. Those names, whether of genera or species, which are commemorative, as *Banksia* in honour of Sir Joseph Banks, are distinguished by having the subjoined letters in Italic where the rest of the word is in Roman, and in Roman where the rest of the word is in Italic, as *Banksia*; those which have been applied to plants by the classic writers of antiquity are distinguished by having the initial letter in Italic, as *Pyrus*, where the rest of the word is in Roman, and in Roman where the rest of the word is in Italic, as *Pyrus*. All words, generic or specific, of unknown derivation, or aboriginal names, are wholly in Italic or wholly in Roman, according to the letter in which the preceding or following matter may be printed, as *Pæderia Lîngun Boj.* or *Pæderia Lîngun Boj.* This mode of indication, which occurred to the Editor in 1826, was first exemplified in the second volume of the *Gardener's Magazine*, and, with the mode of accentuation adopted in this Catalogue, is continued in that magazine, and in the *Magazine of Natural History*, not only in the scientific names of plants, but in those of animals and minerals.

Short Introductions are given to the Linnean and Jussieucan Systems, illustrated by

engravings; and this circumstance, together with the important one of all the specific names being literally translated, will, by giving the meaning of almost all the terms used in botanical description, in a great measure supersede the necessity of a grammar of botany to the young gardener. The literal translation of the specific names may be considered as, to a certain extent, teaching him the Latin language, and the etymologies of the generic names will give him the meaning of a number of Greek words. The species of every genus, where numerous, are subdivided into sections and subsections, which are shortly defined by specific characters; and so copious are the descriptive particulars after each species, that we will venture to assert that the genus to which any plant belongs being known, the specific name, in a majority of cases, may be discovered by this Catalogue without the aid of a *Species Plantarum*.

In the popular descriptions of the Natural Orders, the medicinal properties and economical uses are slightly noticed; and the soil, propagation, and general treatment of the different groups indicated; so that this part of the work, in our opinion the most valuable collection of botanical facts that has ever been brought into so small a space, may be considered an epitome of the history, uses, and culture of the whole vegetable kingdom. Whoever has a sufficient theoretical and practical knowledge of plants and of vegetable culture to generalise on these subjects, will find in this Natural Arrangement the rudiments of every thing that can be said or written on botany, gardening, and agriculture.

Enumerations of those species which are adapted for culture in the open air in Britain, or in corresponding climates, with an estimate of the quantity of ground which each order or tribe would occupy, are given in the Natural Arrangement, with a view to the formation of arboreta or botanic flower-gardens; but, for an explanation of this improvement, and of its value to the practical gardener, we must refer to the body of the work. (p. 491.) The same proportionate enumerations will prove useful in contriving the size of the different drawers, divisions, boxes, volumes, or pages, required for preserving a hortus siccus, or collections of drawings, of engravings, of seeds, or of specimens of woods.

The *Supplement* to the Linnean Arrangement (p. 467.) includes all the plants introduced to Britain, and figured in English botanical works, up to February, 1830; and *Additional Supplements* in continuation are intended to be printed from time to time, and sold separately, or done up with new impressions of the body of the work.

No further explanation appearing necessary in this Preface, it remains for the Editor to state that the Linnean Arrangement and its Supplement are entirely the work of Mr. GEORGE DOS; the Natural Arrangement is founded on that of Professor LINDLEY, with some additions and alterations rendered necessary by the plan of this Catalogue; and Dr. GREVILLE, the profound cryptogamist, assisted in arranging the Cryptogamia. Those who are acquainted with the present state of botany, and with the botanists of this country, will allow that three gentlemen better adapted for cooperating in producing a Catalogue like that now submitted to the public are not to be found. All that the Editor claims for himself is the plan of the work, which he certainly considers much superior to anything that has preceded it. The literal translation of the specific names, the derivations of the generic names, the indications of derivations, and, above all, the general descriptions of the Natural Orders, will, he confidently expects, be found not only of great value in determining the names of plants, and in recognising them at sight, both individually and in masses; but in assisting the botanical student and practical gardener to acquire some knowledge of their structure, physiology, analogies, affinities, properties, uses, and culture.

Bayswater, May, 1830.

J. C. L.

THE first *Additional Supplement*, enumerating all the new plants introduced to Britain, or made known there, with the scientific changes in their names, &c., up to February, 1832, is now (August, 1832) published. In it, the genera are arranged alphabetically, for more ready reference from the body of the work, and from the first *Supplement* (p. 467.); and also to save the necessity of a second index. All the genera in the body of the work, and in the first *Supplement* (p. 467.), to which there are any species added, or in which any alterations are made, in the first *Additional Supplement* (p. 577. to p. 602.), are marked with a star (\*); and the same will be done, as future *Additional Supplements* are published.

Whoever wishes to ascertain the additions and improvements made subsequently to the last *Additional Supplement* may consult the *Gardener's Magazine*; in which, under the article which will be henceforth contained in every number, entitled, "Floricultural and Botanical Notices of New Plants, and of Old Plants of Interest, supplementary to the latest Editions of the *Encyclopædia of Plants*, and of the *Hortus Britannicus*," will be found the name of every plant newly introduced or originated, and of every recent improvement in botanical nomenclature.

J. C. L.

Bayswater, August, 1832.

*Accents*.—In the first sixty-two pages the acute (´) is used to denote accented syllables merely; after p. 62. it is restrained to such vowels as are sounded short, while the grave (`) is placed over those sounded long, as *Mártha*, *Máry*. The systematic names are distinguished as classical, i. e. names applied to plants by the ancients, by the first letter being in Italic, as *A´bies*; as commemorative, by the terminating letter or letters being in Italic, as *Banksia*; and as aboriginal, or of uncertain derivation, by the whole word being in Italic, as *A´rrea*. All the other names are formed, in almost every case, from the Greek, but sometimes from the Greek and Latin.

RULES FOR PRONOUNCING BOTANICAL NAMES.

SYLLABLES.

**I**N classical words *there are as many syllables as there are vowels*; except when *u* with any other vowel follows *g*, *q*, or *s*, and when two vowels unite to form a diphthong. The diphthongs are *æ*, *æ*, *ai*, *ei*, *oi*, *ui*, *au*, *eu*, and *ou*. These seldom coalesce in final syllables. *oo*, *ee*, *ea*, and other combinations which never occur as diphthongs, in classical words, follow, in commemorative names, the pronunciation of their primitives, as *Tædia*, *Woodsia*.

VOWELS.

In this work, with the exception of the first sixty-two pages of the Linnean Arrangement, the sounds of the accented vowels are indicated by the mark placed over each, the long sound by a grave accent (`), the short by an acute (´); but, as in the abovementioned sixty-two pages the acute accent alone is employed, the following observations will be found useful in showing when the vowel is to be sounded long, and when short:—

Every accented penultimate vowel is pronounced long, when followed by a vowel or a single consonant, as *Achillea tomentosa*; but it is shortened when followed by two consonants or a double one, as *Sórbus*, *Táxus*; except when the first consonant is a mute and the second a liquid, as *A´brus*.

Every accented antepenultimate vowel, except *u*, is pronounced short, as *Helléborus*, *Húmulus*; but when succeeded by a single consonant, followed by *e* or *i* and another vowel, it is lengthened, as *Stellária*; except *i*, which is short, as *Tilia*.

A unaccented, ending a word, is pronounced like the interjection *ah*, as *Sticta (ah)*.  
*E* final, with or without a consonant preceding, always forms a distinct syllable, as *Silênê*, *A´loë*; also when the vowel is followed by a final consonant as *Trichóma-nes*, not *Tricho-manes*.

*I* unaccented, if final, sounds as if written *eye*, as *Spica vénti (eye)*; but, when it ends a syllable not final, it has the sound of *e*, as *Méspilus (Mespelut)*, *Smithii (Smithé-eye)*.

*Y* is subject to the same rules as *i*.

The diphthongs *æ* and *æ* conform to the rules for *e*; *ei* is generally pronounced like *eye*; the other diphthongs have the common English sounds.

In addition to the primary accent, every word of more than three syllables contains a *secondary accent*, which is regulated by the same rules. The secondary accent must always be at least two syllables before the primary accent, as in *Chélidónium*; for its place the ear is a sufficient guide, and even were it entirely omitted, still, however inharmonious, the pronunciation would not be incorrect.

CONSONANTS.

*C* and *g* are hard before *a*, *o*, and *u*, as *Córnus*, *Gálium*; soft before *e*, *i*, and *y*, as *Cetrária*, *Citrus*.  
*T*, *s*, and *c*, before *ia*, *ie*, *ii*, *io*, *iu*, and *eu*, when preceded by the accent, change their sounds, *t* and *c* into *sh*, as *Blétia*, *Fícia*; and *s* into *zh*, as *Blásia*: but, when the accent is on the first diphthongal vowel, the preceding consonant preserves its sound, as *aurantiacum*.

*Ch*, before a vowel, is pronounced like *k*, as *Chelidónium (kel)*, *Cólchicum (kolkekum)*; but in commemorative names it follows their primitives, as *Richardsonia*, in which the *ch* is soft.

*Cm*, *cn*, *ct*, *gm*, *gn*, *mm*, *tm*, *ps*, *pt*, and other uncombinable consonants, when they begin a word, are pronounced with the first letter mute, as *Ptêris (teris)*, *Cnicus (nikus)*, *Gmelina (melina)*, *Gnidia (nidia)*; in the middle of a word they separate as in English, as *Lap-sána*, *Lém-na*.

*Ph*, followed by a mute, is not sounded; but, followed by a vowel or a liquid, sounds like *f*, as *Phlêum (fium)*.

*Sch* sounds like *sh*, as *Schœnus (skenus)*; in *tl* and *zm* both letters are heard.  
*S*, at the end of a word, has its pure hissing sound, as *Dáctylis*; except when preceded by *e*, *r*, or *n*, when it sounds like *z*, as *Ribes (ez)*.  
*X*, at the beginning of a word, sounds like *z*, as *Xánthium*; in any other situation it retains its own sound, as *Táxus*, *Támarix*. (*Gardner's Magazine*, vol. v. p. 232.)

# LIST OF AUTHORITIES

FOR

## GENERIC AND SPECIFIC NAMES.

- A. & S.* *Albertini and Schweinitz*. Writers upon Fungi.
- Abel.* *Abel*. A traveller in China, and author of a Notice of Chinese plants.
- Ach.* *Acharius*. A Swedish professor, and writer upon lichens.
- Adams.* *F. Adams*. A Russian botanist, who travelled through Arctic and Eastern Siberia.
- Adan.* *Adanson*. A French systematic botanist.
- Afz.* *Afzelius*. A Swedish professor.
- Ag.* *Agardh*. A Swedish professor, and writer upon Algae, &c.
- Ait.* *Aiton*. The superintendent of the King's garden at Kew.
- Alb.* *Albertini*. A writer upon Fungi.
- All.* *Allioni*. An Italian botanist.
- Amm.* *Ammann*. An old Russian botanist.
- Ander.* *Anderson*. A London merchant; published a paper on pæonies.
- Andr.* *Andrews*. A famous botanical draughtsman.
- Andrz.* *Andrzejewski*. A Russian botanist.
- Ard.* *Arduini*. An Italian botanist.
- Asso.* *Asso*. A Spanish botanist.
- Aub.* *Aublet*. A French traveller in Guiana.
- Aud.* *Audibert*. A French cultivator.
- Balb.* *Balbis*. A French professor of botany.
- Bac.* *Bacle*. A German botanist?
- Baldw.* *Baldwin*, M. D., of Savannah in Georgia. A botanist.
- B. & W.* *Barlting*, M. D., and *Wendland*, of Göttingen, botanists.
- Banks.* *Banks*. A great traveller and patron of science.
- Barri.* *Barrelier*. A French botanist of 1714.
- Bart.* *Barton*, M. D. Formerly a professor at Philadelphia.
- Bartr.* *Bartram*. Formerly a nurseryman at Philadelphia.
- Bast.* *Bastard* or *Batard*. A writer upon the Flora of France.
- Batsch.* *Batsch*. A writer upon Fungi.
- Batt.* *Battarra*. Published a History of Fungi, 1789.
- Baug.* *J. C. Baumgarten*, M. D., of Schasburgh, in Transylvania. A botanist.
- Bauh.* *Bauhin*, brothers; professors of medicine, published 1620, 1650.
- Baum.* *J. C. Baumgarten*, M. D., of Schasburgh, in Transylvania. A botanist.
- B. C.* *Botanical Cabinet*. By Loddiges and Sons.
- Beaup.* *Beaupré*. A French botanist, mentioned in Dec Systema.
- Beauv.* *Palisot de Beauvois*. A French traveller and botanist.
- Boif.* *Duke of Bedford*. A great promoter of botany.
- Bel.* *Bellardi*. An Italian botanist.
- Benth.* *Bentham*. An English botanist, secretary to the Horticultural Society, London.
- Berg.* *Bergius*. A Swedish writer upon Cape plants.
- Berger.* *J. Bergeret*, M. D. A French botanist.
- Bernh.* *Bernhardi*. A German botanist.
- Bert.* *Bertolini*. A writer upon the Flora of Italy.
- Bes.* *Besser*. A Russian professor, resident in the Crimea.
- Bieb.* *Bieberstein*. A Russian botanist of great note.
- Biv.* *Bivona*. A Sicilian botanist.
- Blume.* *Blume*, M. D. A Dutch botanist.
- B. M.* *Botanical Magazine*. By Curtis, Sims, &c.
- Boer.* *Boerhaave*. An old Dutch botanist.
- Böhm.* *Böhmer*. A German botanical writer.
- Bois.* *Boissieu la Martiniere*, who accompanied La Peyrouse.
- Boj.* *Bojer*. A professor of botany in the Isle of France.
- Bol.* *Bolton*. An English writer on Fungi.
- Bonp.* *Bonpland*. A French traveller in South America, and botanist.
- Borc.* *Borchhausen*. A writer upon the Flora of Hesse Darmstadt.
- Bory.* *Bory de St. Vincent*. A French traveller and botanist.
- Bosc.* *Bosc*. A French botanist, and traveller in North America.
- Bouch.* *Boucher*. A writer upon the French Flora.
- Bouché.* *F. A. G. Boucher*. A French botanist.
- Bow.* *J. Bowie*. A collector of plants for Kew Gardens.
- B. R.* *Botanical Register*. By Ker and Lindley.
- Br* *Patrick Browne*, M. D. Author of Civil and Natural History of Jamaica. An Irish botanist.
- B. Rep.* *Botanical Repository*. By Andrews and others.
- Brad.* *Bradley*. An old English writer upon succulent plants.
- Bred.* *Bredemeyer*. A German.
- Brid.* *Bridel*. A German writer upon mosses.
- Brig.* *J. Brignoli*. Professor at Verona.
- Burm.* *Burmman*. A Dutch editor of other people's works.
- Broeg.* *Broegelmann*. A German botanist.
- Brong.* *A. Brongniart*. A French botanist.
- Brot.* *Brotero*. A Portuguese botanist.
- Brou.* *Broussonet*. A French botanist, and traveller in Barbary.
- Buc.* *Buchanan*. An English physician, and traveller in Nepal.
- Bul.* *Bulliard*. A French writer upon Fungi.
- Burc.* *Burchell*. An English botanist, and traveller at the Cape of Good Hope.
- Burg.* *Burgsdorf*. A German botanist.
- Bux.* *Buxbaum*, M. D. A Russian botanist; travelled through Armenia.
- Cæs.* *Cæsalpinus*. A famous old Italian botanist.
- Cam.* *Campana*. An Italian cultivator.
- Campb.* *Campdera*. A Spanish botanist.
- C. & R.* *Castagne and Robillard*. French botanists?
- Carcy.* *W. Carcy*, D. D., of Serampore.
- Carv.* *Capt. D. Carmichael*. A Scotch botanist.
- Cass.* *H. Cassini*. A French botanist.
- Castag.* *L. Castagne*. A French botanist?
- Cat.* *M. Catesby*. A botanist and traveller in North America.
- Cav.* *Cavanilles*. A Spanish professor and botanist.
- C. Bauh.* *Caspar Bauhin*. A celebrated botanist of the sixteenth century.
- Cer.* *Vicente Cervantez*. A Spanish botanist and professor.
- Chair.* *Chair*. A French botanist and ecclesiastic.
- Cham.* *Chamisso*. A German traveller round the world.
- Choi.* *Choisy*. A Swiss botanist.
- Clair.* *Clairville*. A French botanist.
- Clar.* *J. Clarion*. A French botanist.
- Clem.* *S. Clemente*. A Spanish agriculturist.
- Clus.* *Clusius*. An old French botanist and traveller.
- Co. C.* *Colville's Catalogue*. Plants cultivated in Colville's nursery, Chelsea.
- Colb.* *Colebrooke*. A celebrated English writer upon Indian plants.
- Coll.* *J. F. Colladon*. A Genevese botanist.

- Com.* *Complan.* A Dutch garden botanist.  
*Corr.* *Corvaia de Serra.* A Portuguese botanist and diplomatist.  
*Cr.* *Cronst.* An Austrian botanist.  
*Cum.* *A. Cunningham.* A collector of plants for Kew Gardens.  
*Cur.* *Curtis.* An English writer upon plants.  
*Can.* *Canzon.* A Swiss writer upon Umbelliferae, whose wife burnt his herbarium.  
*Cyn.* *Cyrtis.* An Italian botanist.  
*Dan.* *Danthone.* A French botanist.  
*Dav.* *H. Davers, D. D.* A Welsh botanist.  
*D. Don.* *David Don.* Librarian to the Linnean Society.  
*Deb.* *Deboy.* A botanist of Frankfort.  
*Dev.* *DeCandolle.* A celebrated French systematic botanist.  
*Del.* *Delile.* A French professor, and traveller in Egypt.  
*Delam.* *Delany.* An English artist.  
*Delav.* *Delavert.* A French botanist.  
*Deaf.* *DeFontaines.* A French botanist, and traveller in Barbary.  
*Desp.* *Desportes.* A French botanist.  
*Desv.* *Desvossiaux.* A French botanist.  
*Desv.* *Desvoux.* A French professor of botany.  
*Dieh.* *Dieharding.* A botanist of Hostench.  
*Dieh.* *Dieckman.* An English cryptogamic botanist.  
*Die.* *Dieckrich.* A German gardener.  
*Dil.* *Dillwyn.* An English writer upon Coniferae.  
*Dit.* *Ditmar.* A Dutch botanist.  
*Domb.* *Dombey.* A French traveller in South America.  
*Dor.* *Dorthea.* A French botanist.  
*Dou.* *Douglas.* A collector of plants.  
*Douc.* *Doune.* Not known.  
*Dry.* *Dryander.* A Swedish botanist.  
*Dub.* *Dubois.* A French botanist.  
*Duch.* *Duchesne.* A French botanist or horticulturist.  
*Dufr.* *Dufresne.* A French writer upon valerians.  
*Duh.* *Duhamel.* A celebrated French physiological botanist.  
*Dum.* *Dumont Courset.* A writer upon French garden plants.  
*Dunal.* *Dunal.* A French botanist.  
*Durand.* *Durand.* A French botanist.  
*Durb.* *Durborough.* Not known.  
*Duroi.* *Du Roi.* A German writer upon plants.  
*Dut.* *Dutour.* A Belgian botanist.  
*Dural.* *Dural.* A French botanist.  
*E. B.* *English Botany.* By Sowerby and Smith.  
*Eddy.* *Eddy.* An English gardener.  
*E. F.* *English Flora.* By Sir J. E. Smith.  
*Ehren.* *Ehrenberg.* A German traveller in Arabia, &c.  
*Ehrh.* *Ehrhart.* A German botanist.  
*El.* *Ellis.* London merchant and botanist.  
*Ell.* *Elliot.* An American botanist.  
*Esp.* *Esper.* A German writer on Fungi.  
*Et.* *Ettlinger.* A German writer on Sálvia.  
*Fau.* *Faucoult.* A French botanist?  
*Feu.* *Feuillec.* A Chilian botanist.  
*Fis.* *Fischer.* A Russian botanist.  
*Fl. br.* *Flora Britannica.* By Sir James Edward Smith.  
*Fl. dan.* *Flora Danica.* By Oeder, Hornemann, and others.  
*Fl. gr.* *Flora Græca,* by Sir J. E. Smith.  
*Fl. lom.* *Flora Londinensis.* By Curtis and Hooker.  
*Fl. per.* *Flora Peruviana.* By Ruiz and Pavon.  
*Flu.* *Flügge.* A German writer upon grasses.  
*Forsk.* *Forskahl.* A Danish naturalist, and traveller in Arabia.  
*Forst.* *Forster.* A traveller in the South Seas with Captain Cook.  
*Fra.* *Frazer.* A gardener, and collector of plants in North America.  
*Frics.* *Frics.* A Swedish botanist, and writer upon Fungi.  
*Frö.* *Frölich.* A German writer upon *Gentiana*.  
*Funk.* *Funk.* A German cryptogamic botanist.  
*Gac.* *Gartner.* A celebrated German carpologist.  
*G. & A.* *Greville and Arnott.* British botanists.  
*Gau.* *Gaudin.* A Swiss botanist.  
*Gay.* *Gay.* A French botanist.  
*G. Don.* *George Don.*  
*Ger.* *Gerard.* An old French botanist.  
*Gilb.* *Gilbert.* A Lithuanian botanist.  
*Gill.* *Gillies's MSS.* Dr. Gillies, a Scotch botanist.  
*Gin.* *Gingins.* A French botanist.  
*Gled.* *Gleditsch.* A German botanist.  
*Glos.* *Glossin.* A botanist of Strasburgh.  
*Gm.* *Gmelin.* A Russian botanist, and traveller in Siberia.  
*Goeh.* *Gochnat.* A German botanist.  
*Godd.* *Goldie.* A nurseryman at Ayr, in Scotland.  
*Goldb.* *Goldbach.* A Russian botanist.  
*Good.* *Goodenough.* Bishop of Carlisle. An English botanist.  
*Gou.* *Gouan.* A French botanist.  
*Grak.* *Grakham, M. D.* Regius professor of botany at Edinburgh. An assiduous botanist.  
*Green.* *Greville.* An English botanist, and writer upon cryptogamic plants.  
*Gro.* *Gromovius.* A botanist of Leyden.  
*Guer.* *Guercent.* A French botanist.  
*Gul.* *Gildenstaedt.* A Russian botanist.  
*Gün.* *Günther.* A Silesian botanist.  
*Habl.* *Hablzel.* A Russian botanist.  
*Har.* *Hanke.* A German botanist writer.  
*Hal.* *Haller.* A Swiss botanist.  
*Hal. f.* *Haller the younger.*  
*Ham.* *Hamilton.* A Scotch botanist and traveller in the East Indies.  
*H. & H.* *Humboldt and Bonpland.* Famous travellers and botanists.  
*H. & G.* *Hooker, L. L. D., and Greville, L. L. D.* English botanists resident in Scotland.  
*H. & T.* *Hooker and Taylor.* English botanists.  
*Har.* *Hartig.* A writer on the culture of forest trees.  
*Haw.* *Haworth.* An English writer upon succulent plants.  
*Hay.* *Hayne.* A German botanist.  
*H. ber.* *Hortus Beroлинensis.*  
*H. C.* *Chelsea botanic garden.*  
*H. Cels.* *Catalogue of the plants cultivated in the garden of M. Cels.*  
*Hedw.* *Hedwig.* A German cryptogamic botanist.  
*Hei.* *Heister.* A German botanist.  
*H. er.* *Hortus Erfurtensis.* Catalogue of the plants cultivated in the botanical garden of Erfurt.  
*Her. am.* *Herb. amat.,* by DeLaune.  
*Herb.* *Herbert.* An English divine and botanist.  
*Herit.* *L'Heritier.* A French botanist.  
*Herm.* *Hermann.* Professor of botany at Leyden.  
*Heync.* *Heyne.* A writer on East Indian plants.  
*Hil.* *Auguste St. Hilaire.* A French botanist, and traveller in Brazil.  
*Hill.* *Hill.* An English compiler of botanical matters.  
*H. K.* *Hortus Kewensis.* A catalogue of the plants growing in the King's garden at Kew.  
*H. L.* *Liverpool botanic garden.*  
*Hoff.* *Haffmannsegg.* A botanist of Dresden.  
*Hofm.* *Hoffman.* A German writer upon Umbelliferae, &c.  
*Hogg.* *Hogg.* A nurseryman at New York.  
*Hok.* *Hokert.* A Swedish botanist.  
*Hol.* *Holwell.* An English botanist.  
*Holm.* *Holmskiöld.* A Danish botanist.  
*Holmsk.* *Holmskiöld.* A Danish botanist.  
*Hook.* *Hooker.* An English botanist, and professor at Glasgow.  
*Hoppe.* *Hoppe.* A German botanist, and collector of plants.  
*Horn.* *Hornemann.* A Danish botanist and professor.  
*Horns.* *Hornsusch.* A German botanist and professor.  
*Hort.* *Of the gardens.*  
*Host.* *Host.* An Austrian writer upon grapes and European plants.  
*Hout.* *Houttuyn.* A botanist of Amsterdam.  
*H. Par.* *Of the Paris garden.*  
*H. T.* *Hortus Taurinensis.* Catalogue of the plants cultivated in the botanical garden at Turin.  
*H. Tr.* *Transactions of the London Horticultural Society.*  
*Hud.* *Hudson.* An English writer upon British plants.  
*Hum.* *Humboldt.* A celebrated Prussian traveller and philosopher.  
*Hun.* *Hunter.* An English botanist.  
*Hrtm.* *Hartmann.* A botanist of Stockholm.  
*Ives.* *Ives.* An American botanist.  
*J.* *Jussieu.* A celebrated French systematic botanist.  
*Jac.* *Jacquin.* An Austrian traveller in South America, and botanist.  
*Jack.* *Jackson.* An English botanist.  
*Jughans.* *Junghans.* A botanist of Halle.

- Jon.* *Jones.* An accomplished writer upon Indian matters.
- Kam.* *Kämpfer.* A traveller in Japan.
- Kion.* Not known.
- Kit.* *Kitabel.* A Hungarian botanist.
- Kn. pr.* *Knigh's Præfæce.*
- Koch.* *Koch.* A professor at Erlang.
- Koel.* *Koeler.* A writer on German and French grasses.
- Kölle.* *Kölle.* A botanist of Erlang.
- Kon.* *König.* Several German naturalists of this name.
- Kth.* *Kunth.* A Prussian botanist.
- Kunze.* *Kunze.* A German cryptogamic botanist.
- L.* *Linnaeus.* The celebrated Swedish reformer of natural history.
- Lab.* *Labillardiere* A French botanist.
- Lag.* *Lagasca.* A Spanish botanist and professor.
- Lal.* *La Lave.* A Mexican botanist.
- Lam.* *Lamarck.* A French botanist.
- Lamb.* *A. B. Lambert, V. P. L. S.* The most liberal botanist in England. Nothing in botany can well be completed without his assistance.
- Lan.* *Langsdorff.* A Russian botanist.
- Lap.* *La Peyrouse.* A French writer upon the plants of the Pyrenees.
- Lar.* *Laroche.* A French botanist.
- Lauv.* *Lawrence (Miss).* An English flower-painter.
- Lax.* *Larman.* A German writer on Siberian plants.
- Lec.* *Lecoute.* An American botanist.
- Lech.* *Lechenault.* A French botanist.
- Led.* *Ledebour.* A botanist and traveller in Siberia.
- Lee.* *Lee.* A nurseryman at Hammersmith.
- Leers.* *Leers.* A German botanist.
- Leh.* *Lehmann.* A German botanist and professor at Hamburg.
- Lej.* *Lejeune.* A French botanist.
- Lem.* *Leman.* A botanist mentioned in Dec. Fl. Franc.
- Lep.* *Lepeschin.* A Russian botanist.
- Lepel.* *Lepelletier.* A French botanist.
- Lewis.* *Lewis.* An American traveller.
- Leys.* *Leysser.* A botanist of Halle.
- L. fil.* *Linnaeus the younger.* The son of the great Linnaeus.
- Lich.* *Lichtenstein.* A German botanist and professor.
- Light.* *Lightfoot.* A writer upon the Scottish Flora.
- Liljeb.* *Liljeblad.* A professor at Upsal.
- Lind.* *Lindern.* A French botanist.
- Lindl.* *Lindley.* An English botanist, and professor in London.
- Liv.* *Livinston.* A Scotch botanist.
- Lk.* *Link.* A Prussian botanist.
- Lk. & O.* *Link and Otto.* Prussian botanists.
- Lob.* *Lobel.* An old writer upon plants.
- La. C.* *Loddiges' Catalogue.* Catalogue of the plants cultivated in Loddiges' nursery at Hackney.
- Lock.* *Lockhart.* Superintendent of the Trinidad botanical garden.
- Lod.* *Loddiges.* English nurserymen and botanists.
- Loe.* *Loefling.* A Swedish botanist and traveller.
- Loi.* *Loiseleur Deslongchamps.* A French botanist.
- Lon.* *Londes.* A botanist of Gottingen.
- Lo. S.* *Loddiges' Supplement.*
- Lou.* *Loureiro.* A Portuguese traveller in Cochinchina.
- Loudon.* *J. C. Loudon.* Auth. of various agricultural, horticultural, and botanical works.
- L. Tr.* *Linnean Society's Transactions.*
- Lum.* *Lumnitzer.* A German botanist.
- Lunan.* *Lunan.* A writer on Jamaica plants.
- Lyell.* *Lyell.* A Scotch botanist.
- Lyng.* *Lyngbye.* A Danish writer upon cryptogamic matters.
- Lyon.* *Lyon.* A collector of American plants.
- Ma. C.* *Mackay's Catalogue.* Catalogue of the plants cultivated in Mackay's nursery at Clapton.
- M. & S.* *Mocino and Sessé.* Mexican botanists.
- Marg.* *Marcgraav.* A traveller in Brazil.
- Marsh.* *Marshall.* A writer on American trees.
- Mart.* *Martius.* A Bavarian botanist, and traveller in Brazil.
- Mas.* *Masson.* A collector of plants at the Cape, and elsewhere.
- Mayer.* *Mayer.* Several German botanists of this name.
- Med.* *Medicus.* A German botanist of the last century.
- Menz.* *Menzies.* A Scotch botanist, and traveller round the world with Vancouver.
- Merat.* *Merat.* A French botanist.
- Mert.* *Mertens.* A French botanist.
- Mey.* *Meyer.* A German botanist.
- Mich.* *Micheli.* A Florentine botanist.
- Miers.* *Miers.* A South American collector.
- Mik.* *Mikan.* A German writer on Brazilian plants.
- Mil.* *Miller.* An English gardener and botanist.
- Mir.* *Mirbel.* A French physiological botanist.
- Moc.* *Mocino.* A Mexican botanist.
- Mocn.* *Mocnch.* A German botanist.
- Mohr.* *Mohr.* A German cryptogamic writer.
- Mol.* *Molina.* An Italian writer upon the natural history of Chile.
- Mon.* *Montin.* A Swedish botanist.
- Mor.* *Morison.* An old writer on plants.
- Mord.* *Mordant de Launay.* A French botanist.
- Moret.* *Morctti.* An Italian botanist.
- Moug.* *Mougeot.* A German cryptogamic botanist.
- Muhl.* *Muhlenberg.* A North American botanist.
- Mur.* *Murray.* A German botanist.
- Mus.* *Mussin-Puschkin.* A Russian botanist and traveller in Caucasus.
- Mutis.* *Mutis.* A Spanish botanist, resident in New Grenada.
- Mr.* *Michaux.* A French botanist, and traveller in North America.
- N. & M.* *Nees and Martius.* German botanists.
- Neck.* *Necker.* A German writer upon botanical affairs.
- Nees.* *Nees v. Esenbeck.* A German botanist.
- Nest.* *Nestler.* A botanist of Strasburgh.
- Niv.* *Niven.* Once a collector of plants at the Cape.
- Noc.* *Nocca.* A professor of Pavia.
- Nois.* *Noisette.* A French nurseryman.
- Nor.* *Noronha.* A Spanish botanist who visited Madagascar.
- Nut.* *Nuttall.* A North American botanist.
- Oed.* *Oeder.* A Danish botanist.
- Oliv.* *Olivier.* A French botanist and traveller in Persia.
- Or.* *Ortega.* A Spanish botanist.
- Oth.* *Oth.* A French writer in Decandolle's Prodromus.
- Otto.* *Otto.* A Prussian gardener.
- Pall.* *Pallas.* A Russian traveller and naturalist.
- Par.* *Parmentier.* A French nurseryman.
- Patr.* *Patrin.* A Russian traveller.
- Perp.* *Perpenti.* A female Italian botanist.
- Pers.* *Persoon.* A French botanist.
- Pet.* *Petagna.* A Neapolitan botanist.
- Ph.* *Pursh.* A Prussian botanist, and traveller in North America.
- Plu.* *Plumier.* A French botanist, and traveller in the West Indies.
- Pohl.* *Pohl.* A German botanist.
- Poir.* *Poiret.* A French botanical compiler.
- Poit.* *Poiteau.* A French botanist and draughtsman.
- Pol.* *Pollini.* A professor at Verona.
- Poll.* *Pollitch.* A German writer on the plants of the Palatinate.
- Pop.* *Poppig.* A German botanist.
- Pou.* *Pourret.* A French botanist.
- Presl.* *Presl.* A Bohemian botanist.
- Rad.* *Raddi.* An Italian cryptogamic botanist, and traveller in Brazil.
- Raer.* *Raueschel.* A German botanist.
- Raf.* *Rafinesque Schmaltz.* A modern writer upon botanical matters.
- Ram.* *Ramond.* A French botanist.
- R. & P.* *Ruiz and Pavon.* Spanish botanists, and travellers in Peru and Chile.
- R. & S.* *Römer and Schultes.* German editors of Linnaeus's Species Plantarum.
- Rau.* *Rau.* A German botanist.
- R. Br.* *Robert Brown.* A distinguished English botanist, and traveller in New Holland.
- Rchb.* *Reichenbach.* A German botanist.
- Red.* *Redouté.* A French botanical draughtsman.
- Redow.* *Redowski.* A Russian botanical collector.
- Reich.* *Reichard.* A botanist of Frankfort.
- Reinw.* *Reinwardt.* A professor at Leyden.
- Rel.* *Relhan.* A writer upon the Flora of Cambridgehire.
- Req.* *Requien.* A French botanist.
- Retz.* *Retzius.* A German botanist.

- Reyn.* *Reyner*. A botanist of Lausanne.  
*Rh.* *Rhomb.* Author of *Hortus Malabaricus*.  
*Rh.* *Rhomb.* A French botanist.  
*Ross.* *Ross*. An Italian writer upon Oranges.  
*Rov.* *Rovinus*. A German botanist.  
*R. L.* *Robinet's Liliacées*.  
*Roh.* *Robson*. An English botanist.  
*Roch.* *Roch.* Superintendent of the garden at Pest.  
*Roen.* *Roenner*. A German botanist.  
*Rohde.* *Rohde*. A botanist of Bremen.  
*Rol.* *Rolander*. A Swedish botanist.  
*Roll.* *Rollinson*. A nurseryman near London.  
*Rose.* *Rosecr.* An English botanist, and writer upon Scitamineæ.  
*Roth.* *Roth*. A German botanical writer.  
*Roz.* *Rasburgh*. An Indian botanist.  
*Rth.* *Rothboll*. A Danish botanist.  
*Rtl.* *Rottler*. A German missionary.  
*Rud.* *Rudce.* An English writer upon botanical subjects.  
*Rudol.* *Rudolph*. A German botanist.  
*Rum.* *Rumphius*. Author of *Herbarium Ambalensis*.  
*Rus.* *Russel*. A botanist of Aleppo.  
*Sab.* *Sabine*. An English amateur of botany.  
*Sal.* *Salisbury*. An English botanist.  
*Salm.* *The Prince of Salm Dyck*. A noble German amateur.  
*S. & W.* *Schrader and Wendland*. German botanists.  
*Santi.* *Santi*. An Italian botanist.  
*Sant.* *Sant.* An Italian botanist.  
*Savig.* *Savigny*. A French botanist.  
*Schæff.* *Schæffer*. A German writer upon Fungi.  
*Schk.* *Schkuhr*. A German writer upon grasses and ferns.  
*Schl.* *Schleicher*. A Swiss plant collector.  
*Schlec.* *Schlechtendahl*. A German botanist.  
*Schmidt.* *Schmidt*. A Bohemian botanist.  
*Schott.* *Schott*. A traveller in Brazil.  
*Schous.* *Schousboe*. A writer upon the Flora of Morocco.  
*Schr.* *Schrader*. A German botanist.  
*Schrank.* *Schrank*. A Bavarian botanist.  
*Schreb.* *Schreber*. A German botanist.  
*Schu.* *Schubler*. A professor at Tübingen.  
*Schult.* *Schultes*. A Bavarian botanist.  
*Schulz.* *Schultz*. A German botanist.  
*Schum.* *Schumacher*. A Danish botanist.  
*Schw.* *Schweigger*. A German botanist, author of Flora Erlangensis.  
*Schwæ.* *Schwægrichen*. A German cryptogamic botanist.  
*Schweic.* *Schweinitz*. An American botanist.  
*Seo.* *Scopoli*. An Italian botanist.  
*Seb.* *Sebastiani*. An Italian botanist.  
*Sessé.* *Sessé*. A Mexican botanist.  
*Sib.* *Sibthorp*. An English botanist, and traveller in Greece.  
*Sieb.* *Sieber*. A botanical collector.  
*Sims.* *Sims*. An English garden botanist.  
*Sm.* *Sir J. E. Smith*. An English botanist, and purchaser of the Linnean herbarium.  
*Sin.* *Sinclair*. Nurseryman at New Cross.  
*Sol.* *Solander*. A Swedish botanist, and companion of Sir Joseph Banks in Cook's voyage round the world.  
*Sole.* *Sole*. A writer on mints.  
*Son.* *Sonnerat*. A French botanist, and traveller.  
*Sov.* *Soverby*. An English botanical draughtsman.  
*Spar.* *Sparmann*. A Swedish travelling botanist.  
*Spin.* *De Spin.* A botanist of Turin.  
*Spr.* *Sprengel*. A German botanist.  
*Stack.* *Stackhouse*. An English botanist.  
*Stech.* *Stechmann*. A writer on *Artemisia*.  
*Steph.* *Stephan*. A Russian botanist.  
*Stcr.* *Sternberg*. A noble German botanist.  
*Stcu.* *Steucl.* A German botanist.  
*Stcr.* *Stevn.* A Russian botanist.  
*Sturm.* *Sturm*. A German botanical draughtsman.  
*Suter.* *Suter*. A Swiss botanist.  
*Suert.* *Suertius*. An old writer on plants.  
*Suet.* *Suett.* An English botanist.  
*Suez.* *Suartz*. A Swedish botanist, and traveller in the West Indies.  
*Symes.* *Symes*. A writer on English plants.  
*Ten.* *Tenore*. A Neapolitan botanist.  
*Thib.* *Thibaud de Chauvalon*. A French botanist.  
*Thomas.* *Thomas*. A Swiss collector of plants.  
*Thore.* *Thore*. A French botanist.  
*Thory.* *Thory*. A French botanist.  
*Thou.* *Du Petit Thoms*. A French botanist, and traveller in Madagascar.  
*Thouin.* *Thouin*. A French botanist.  
*Thuil.* *Thuillier*. A French botanist.  
*Thun.* *Thunberg*. A Swedish botanical traveller.  
*Timm.* *Timm*. A German botanist.  
*Tinco.* *Tinco*. A professor at Palermo.  
*Tode.* *Tode*. A German writer on Fungi.  
*Torrey.* *Torrey*. An American botanist.  
*Tou.* *Tournfort*. An old French botanist, and traveller in Greece and Asia Minor.  
*Trat.* *Trattinik*. A botanist of Vienna.  
*Treat.* *Trentepohl*. A German botanist.  
*Treu.* *Trevisanus*. A German botanist.  
*Trin.* *Trinius*. A writer on grasses.  
*Turn.* *Dawson Turner*. An English writer on sea weeds.  
*Turp.* *Turp.* A French botanist and draughtsman.  
*Turra.* *Turru*. An Italian botanist.  
*Tus.* *Tussac*. A French writer on the Flora of the Antilles.  
*Uc.* *Ueria*. A botanist of Palermo.  
*Urv.* *D'Urville*. A Captain in the French navy.  
*Vail.* *Vaillant*. A French botanist and traveller.  
*Vin.* *Vandelli*. A Portuguese botanist.  
*Ven.* *Ventcuat*. A French botanist.  
*Vest.* *Vest*. An Styrian botanist.  
*Fig.* *Figuer*. A writer upon Poppies.  
*Vil.* *Villars*. A French botanist.  
*Vit.* *Vitmann*. A German botanist.  
*Viv.* *Viviani*. An Italian botanist.  
*W.* *Willdenow*. A German botanist.  
*Wahl.* *Wahlenberg*. A Swedish botanist.  
*Wal.* *Wallich*. Superintendent of the botanical garden at Calcutta.  
*Wald.* *Waldstein*. A noble German patron of botany.  
*Wallr.* *Wallroth*. A German botanist.  
*Wall.* *Walker*. A writer on the Flora of Carolina.  
*Wan.* *Wangenheim*. A German botanist.  
*W. & K.* *Waldstein and Kitzebl.* Authors of the Flora of Hungary.  
*W. & M.* *Weber and Mohr*. German botanists.  
*Wat.* *Watson*. An English writer upon trees and shrubs.  
*Web.* *Weber*. A German cryptogamist.  
*Weigl.* *Weigel*. A German botanist.  
*Weihe.* *Weihe*. A German writer on Rûbi.  
*Wein.* *Weinmann*. A German gardener, superintendent of one the royal gardens in Russia.  
*Weis.* *Weis*. A German botanist.  
*W. en.* *Willdenow's Enumeration of the Plants in the Berlin Garden*.  
*West.* *West*. An English botanist.  
*Wibel.* *Wibel*. A German botanist.  
*Wig.* *Wiggers*. A German botanist.  
*Wik.* *Wikstrom*. A Swedish botanist.  
*With.* *Withering*. An English botanist.  
*Wnl.* *Wendland*. A German garden botanist.  
*Woods.* *Woods*. An English writer on roses.  
*Woodw.* *Woodward*. An English botanist.  
*Worm.* *Wormskjold*. A Norwegian botanist.  
*Wrc.* *Wredow*. A German divine and botanist.  
*Wrede.* *Wrede*. A German botanist.  
*Wul.* *Wulfen*. A German botanist.  
*Y.* *Young*. A writer in the Linnæan Transactions.  
*Zea.* *Zea*. A Spanish botanist.  
*Zcy.* *Zeyher*. A German gardener.  
*Zuc.* *Zuccagni*. Superintendent of the botanical garden at Florence.

## METHODS OF NAMING AND NUMBERING PLANTS.

IN gardens or garden scenery where accuracy and intelligence are aimed at, all the less common plants, ligneous and herbaceous, and all the varieties of fruits, should have their names affixed to them; with the addition of their native country, year of introduction if exotic, and natural order. Larch, oak, and yew are the most durable timbers for forming tallies on which to write or paint these names. The cheapest and best description of cast-iron tally is that of Mr. Stuart Murray (*Gard. Mag.* vol. iii. p. 29.), the next best that used in the garden of the Horticultural Society. (*Gard. Mag.* vol. vi. p. 407.) For trees, shrubs, and large plants, the names may be painted on the ends of bricks, as in Messrs. Loddiges's arboretum; or, what is better, there are panelled bricks in imitation of Stuart Murray's tally, and earthenware tallies with panels, and with the names impressed by types on the clay before burning, manufactured by Peake of Tunstall near Newcastle under Lyne, and by Allardyce of Clay Hills near Aberdeen. (*Gard. Mag.* vol. vi. p. 399.)

Where plants cannot be named, they should have numbers affixed to them referring to a catalogue; and that these numbers may be generally understood, the common numerals should be made use of. These may be painted on wood, iron, or earthenware tallies. But as the common numerals require the use of the pen or pencil, gardeners have devised signs for them which may be readily cut with the knife on sticks.

## SETON'S MODE OF CUTTING NUMBERS ON STICKS

Is much the simplest, and at the same time the most comprehensive. The signs made use of are as under:—

The advantages of these marks over those in common use are, that they are shorter and more easily made by single distinct cuts; and that no number, however high, requires more marks than it would require figures written with a pen. The only way in which the memory is apt to misgive, in this scheme, is by confounding / and \, / and \, ^ and v, with each other, as a child would confound the figures 6 and 9; but this slight inconvenience will be remedied by the following key, which may be easily borne in the mind. Let us recollect that, in writing, we naturally draw a stroke from the right at top, to the left at bottom, thus /, and not in the opposite direction, thus \; now, in all the above numbers which differ from each other in the direction of the diagonal line, that which is in the direction usual in writing precedes the other, thus / \ / \ / \ / \; the other two, ^ and v, will not be confounded, on recollecting that v is the usual numeral letter for five.

As an example of application, suppose we take species 341, variety 8, the tally will be cut thus:—

The long cut (—) between the number of the species and the number of the variety is merely to separate the one from the other, and is to be considered as the sign of separation. By the use of this sign several numbers may be cut on one stick: it is a fixed rule that the number shall always read from the root or sharpened end of the tally, because it is necessary for the operator to hold that end in his hand in cutting the marks. Names written on tallies, on the contrary, should always read from the top, by which means the letters are kept at the greatest practicable distance from the soil.

### DRYING PLANTS AND FORMING A HERBARIUM.

THE best mode for gardeners, and such as have little spare time to dry specimens of plants, is to gather them when perfectly free from exterior moisture, place them between paper, and press them with bags of hot sand. In this way they dry of their natural color in a few hours. (*Mag. Nat. Hist.* vol. i. p. 196.) Or they may be dried in sand. (*Ibid.* vol. iii. p. 459.)

To fill up a space that would otherwise remain an unseemly blank, we shall here observe, that every gardener ought to dry plants and form them into a herbarium. The herbarium may be a folio volume of stout thick paper, white, if he can afford it; if not, brown; allowing in binding the thickness of a leaf for every page, in order that, when filled with specimens, it may shut close and preserve its form. Mr. Toward, who has formed one of the handsomest gardener's herbariums we have any where seen, in four thick folio volumes, uses cartridge paper, pasting to the back of each leaf a leaf of brown blotting paper, and round the margin of both surfaces of the double leaf so formed strips of cartridge paper. These strips rather more than compensate for the thickness of the dried specimens; so that when the leaves are bound up, their edges cut, and the books shut close, the external air is excluded, and the appearance as neat as that of any printed volume. (*Gard. Mag.* vol. iv. p. 436.) The specimens, as dried in sand, or between loose leaves of paper or in any old book, may be fixed to the cartridge side of the leaves of the herbarium book, according to any arrangement which may be preferred.

### DRAWING PLANTS, FLOWERS, FRUITS, &c.

EVERY gardener ought also to be able to draw plants; and this he may acquire himself by copying with a pen or pencil, without the aid of colors (for all the essential objects of drawings may be effected by lines), the outlines of the ribs, veins, and other inner lines of the different parts of the dried specimens as they lie flat before him on the paper. Having practised this for some time, he may then draw plants, flowers, and fruits from nature; beginning by washing one side of a pane of glass over with gum, holding that when dry between his eye and the plant or other object to be drawn, and then tracing the object with the point of a nail in the gum, or on it with the point of a black-lead pencil. (*Gard. Mag.* vol. vi. p. 305.) The outline of hard fruits, such as the apple and pear, may be correctly taken by dividing them into two parts, as may that of soft fruits if not too ripe. (*Gard. Mag.* vol. iv. p. 230.) Every gardener ought also to be able to draw landscapes, figures, and animals, all manner of garden implements and structures, and plans of gardens and maps of estates. This he may acquire himself by copying the various engravings in our *Encyclopædias of Gardening and Agriculture*; and for plans, maps, and landscape-scenery more particularly, by copying the elementary plate (Pl. 1. sold by itself, under the title of *Elementary Details for Pictorial Map-drawing*, for 3s. 6d.) of our *Illustrations of Landscape-Gardening and Garden Architecture*. He may afterwards draw figures and landscapes from nature, first through a gummed pane of glass, and next on paper; and finally, measure and draw from nature implements and buildings, and map gardens, parks, and farms.

On correctly applying, pronouncing, and spelling the names of plants; on drawing plans neatly, and being able to produce off hand a sketch of any thing; on being able to measure and value all kinds of country work; above all, on good penmanship, spelling, and writing a correct and intelligent letter, much of the success in life of a gardener depends. Without possessing these qualities, by a regular course of education at school, or determining to labour hard at self-instruction till he has possessed them, no young man in the present improving age should attempt the profession.

# HORTUS BRITANNICUS.

## PART I.

### LINNEAN ARRANGEMENT.

**T**HE main object of the artificial system of botanical arrangement is to facilitate the discovery of the names of plants. For this purpose some one organ, common to plants in general, is fixed on; and, according to certain conditions in which this organ is found, individual species are referred to their places in the system, as words, by their initial letters, are referred to their places in an alphabetical dictionary.

In the progress of artificial systems different organs have been fixed on by different botanists; but those which have been most extensively employed are the corollas by Tournefort, and the stamens and pistils by Linnæus. The system of Tournefort has been a good deal employed in France, and may be considered as the artificial system of that country; that of Linnæus has been employed in most other countries, and is justly esteemed by far the most perfect artificial system which has hitherto been produced. It is, therefore, adopted in this work.

The application of the Linnean system in practice, Sir J. E. Smith observes, is, above all other systems, easy and intelligible. Even in pursuing the study of the natural affinities of plants, this botanist affirms "that it would be as idle to lay aside the continual use of the Linnean system, as it would be for philologists and logicians to slight the convenience, and indeed necessity, of the alphabet, and to substitute the Chinese character in its stead." (*Introduct. to Bot.*) "The student of the Linnean artificial system," he elsewhere observes, "will soon perceive that it is to be understood merely as a dictionary, to make out any plant that may fall in his way." (*Gram. of Bot.*) "If we examine," says Decandolle, "the artificial systems which have been hitherto devised, we shall find the most celebrated of them, that which was proposed by Linnæus, to possess a decided superiority over all others, not only because it is consistently derived from one simple principle, but also because the author of it, by means of a new nomenclature, has given to his terms the greatest distinctness of meaning." (*Elements of the Philos. of Plants, by Decandolle and Sprengel.*) Whether or not subsequent advances in science may enable botanists to dispense with the Linnean system altogether, it is not for us to affirm; but in the mean time nothing can be more certain than that the Linnean system is the best leading arrangement for such a work as the present, in the existing state of botanical knowledge in Britain.\*

According to the Linnean system all plants are furnished with flowers, either conspicuous or inconspicuous. The plants with conspicuous flowers are arranged according to the number and position of their stamens and pistils; those with inconspicuous flowers are arranged according to the situation of the flowers on the plant, or according to other circumstances in the plant itself.

To discover the name of a plant by the Linnean system, therefore, all that is necessary for a beginner is to possess a specimen of it in flower, and to be able to know its different parts by the names given them by botanists. To discover the class, order, and genus of a plant, it is only necessary to be able to distinguish and name the different parts of the flower. These parts are: the calyx or cup (*fig. 1. a*), which is that leaf, or those leaves, by which the flower is usually enclosed when in bud, and which, when the flower is expanded, appear under it. The corolla (*corona*, a crown) is the colored leaf, or leaves, of a flower (*fig. 1. b*). The stamen (or first principle of any thing) is the thread-like process, or processes, immediately within the leaves of the corolla (*fig. 2*): it consists of two parts, the filament or thread (*a*), and the anther (*b*); this anther contains what is called the pollen, or fructifying meal (*c*). In the centre of the flower is the pistil (*fig. 3*): it consists of three parts, the germen, or rudiments of the fruit or seed (*a*), the style (*b*), and the stigma or summit (*c*), which crowns the style, and is destined to receive the fructifying pollen.

The pistil and stamen are the essential parts of a flower. The corolla or the calyx may be wanting, and yet the flower will be termed perfect, because the absence of those parts is no obstacle to reproduction. Even the style and the filament may be absent without preventing the formation or ripening of the fruit; and there are many flowers which have the anther sitting close to the corolla, &c., without a filament, and the stigma to the germen without a style; but the anther, the germen, and the stigma are essential.

The seed is contained in the pericarp, or seed-vessel, which is the germen when grown to maturity. The name of the seed-vessel varies according to its form, substance, &c.; but the word pericarp (*peri*, about, *karpon*, a fruit) is applicable to all its varieties. The receptacle is the base or medium which connects the other parts of the fructification. (*Magazine of Natural History*, vol. i. p. 233.)

The degree of knowledge conveyed by the following Table, and the preceding observations, will enable a beginner to discover at least the class and order of any plant which he may find in flower.

\* The best work in the English language for acquiring a knowledge of the Linnean System of botany is Smith's *Introduction to Botany*, 1 vol. 8vo. The best work for acquiring a knowledge of the Natural System is Lindley's *Introduction to the Natural Orders*, 1 vol. 8vo. Concise and familiar Introductions to both the Linnean and Jussieuan Systems will be found in the *Magazine of Natural History*.

FIRST GRAND DIVISION — Plants with conspicuous Flowers (Phanerogamia).

|                                                                                                                                    |                                                                                                                       | CLASSES.                                                                                                                                                                              | ORDERS.                                                                                                             |                                                                                                                                                                 |
