|        | The genus is a very natural one; and is essentially distinguished from <i>Erinus</i> and <i>Büchnera</i> by the structure of the anthers and stigma, and by the insertion of the filaments. It will contain, besides <i>Erinus Lychneidea Thun.</i> , fragrans, tristis, and africanus, of Linnæus, all natives of the Cape, and agreeing remarkably both in habit and structure. — <i>D. Mr. D. Don has, in the place cited, investigated the structure and affinities of this plant; and deems it a form of a distinct and natural genus, which he has characterised, and named *Pericallis*. To it he would refer this plant, and *Cineraria cruenta*, aurita, lactea, lanata, multiflora, populifolia, and malvifolia. The genus *Pericallis* has, he has remarked, the habit of *Tussilâgo*, the involucrem of *Othónna*, and the corolla of *Senecio*.

Generic relations: *Gaudichaud* has referred to this genus *Arbutus mucronata* *L. fl.* [Hort. Brit. No. 28626.] *pùmila* [Hort. Brit. No. 11080.], and *microphylla*. "In both [the genera] *Arbutus* and *Arctostaphylos*, the anthers have two long horns projecting from their back and the ovary is surrounded by a fleshy ring with ten angles; but in the *Pernettia mucronata* [and all the *pernettias*] the anthers have no horns, and are split into four bristle-shaped teeth at their apex, while the base of the ovary is surrounded by ten distinct scales. The genus *Pernettia* is, in reality, much more nearly allied to *Andrómæda* and *Gaulthiëria* than to *Arbutus*, particularly to *Andrómæda Myrsinites* and *Gaulthiëria serpyllifolia*, which last is certainly no *Vaccinium*. As far as habit and the structure of the flowers are concerned, *Arbutus pilosa* *Graham* [Bot. mag. 3177., Gard. mag. 8.] would also be referable to *Pernettia*; but we incline to believe that plant an *Andrómæda*." — *Dr. Lindley.*

 Dillwynia tenuiridēs Sieber. The Pulteneæ flexilis of Sweet's *Flora Australasia*, t. 35., has glaucous leaves and hairy calyxes; and is a plant entirely different from the P. flexilis Sm., which is closely allied to P. polygalifolia Ridge: but the calyx of that species is interspersed with villous hairs, its leaves are smaller, and it is altogether a more abundantly flowering plant. P. euchlia Dec. has also smaller cuneated leaves, and a remarkable ample calyx; like, as Decandolle observes, Eucallus R.Br.: and, to my view, especially like that of some Gompholobbia. (A. Cunningham in Bot. Reg., August.)

*R. Menziesii* Smith. Raised from the last parcel of seeds received by the Horticultural Society from Mr. Douglas. It is allied to *R. speciosum*, with the young branches covered with slender bristles, like those of *R. lacüstre*. The flowers appear, from the dried specimens, to be of the same colour as those of *R. speciosum*, but paler; and they are without the long-projecting crimson stamens, which give *R. speciosum* so strikingly beautiful an appearance. The plants appear to be hardy, but they have not yet flowered. (*Miscell. Bot. Reg.*, May, 1858.)

| At first sight, it has the appearance of S. fulgens Car. ; but it differs from that in most of the following particulars: — It is twice as high, while the scarlet corollas are only one third the size; and are smooth, except the upper lip, which is somewhat shaggy; the middle segment of the lower lip kidney-shaped, a great deal larger than the two lateral ones; the leaves emarginate, very rugose on the upper surface, and broader, the sinus at the base deeper, the two uppermost sessile; the spikes longer, of from 7 to 20 whorls, each composed of about 12 stalked flowers; the upper lip of the calyx ovate, acute, with a very short incurved point. |             |   |      |    |   |              |                         |

3484. *SOLLYA heterophylla* Lindl. Mr. D. Don has described this plant in Sweet's *British Flower-Garden* for March, 1834, t. 232. In the number for August, there is the following corrective note relative to it: — "Having had an opportunity of examining samples of the fruit which ripened at Mr. Knight's during the past summer, I now find that it is a berry [the genus *Sollya* was distinguished from the genus *Billardiæra*, on the assumption that the fruit of the former was a capsule; and, perhaps, on other points: the fruit of *Billardiæra* is a berry], and that its structure differs in no respect from that of *Billardiæra*; with which genus the plant must be again combined." — *D. Five species of *Tritelega* have been described by Dr. Lindley in *Bot. Reg.* t. 1293. and t. 1685. Of *T. grandiflora*, it is remarked:—"North-west America [a native of]. Formerly cultivated in the garden of the Horticultural Society, but now lost." *T. pedunculäris* Lindl., another of the species, has not, it is stated, been yet introduced; and we suppose that the two remaining species are also in this last case.

3274. UREDO.

27927 suaveolens Pers. syn. *Æcidium Cárdui* Sow., who has given a figure of it in his *Coloured Figures of English Fungi*, iii. t. 398. fig. 5.

Early in June, 1833, I observed, in a group of plants of *Cnicus arvensis* Sm. (*Cirsium arvense* Lam.), one plant of a yellow brown hue, and more luxuriant than the rest. It was the subject of a parasitic fungus abounding all over it, and with which the luxuriance was doubtless connected: and hence this luxuriance may be assumed to have been, like that of the leaves of *Anemone coronaria* (described in *G. M. iv.* 192.), a morbid one. I sent a specimen of the fungus inhabiting *Cnicus* to Mr. J. D. C. Sowerby, who identified the fungus as the *Æcidium Cárdui* above quoted. This specimen, returned by Mr. Sowerby, gave out a very sweet and grateful odour for some months; and, even now (June 11. 1834), may be, on being smelled to, perceived to be fragrant. On consulting *Hort. Brit.*, the only species which seemed to me likely to be identical with this is the *Uredo suaveolens* Pers.; and Mr. Baxter of the Oxford Botanic Garden, to whom a question on its identity has been submitted, has answered it thus:—"Persoon describes his *Uredo* suaveolens as growing on the leaves of *Cnicus arvensis* Sm.;

and I find it abundant on that plant in the neighbourhood of Oxford. Mr. Sowerby's *Æcidium Cárdui* is said to grow on the leaves of *Cnicus pratensis Willd.*, a plant which is also not very uncommon near Oxford; but on which, while in a living state, I have not at present observed any species of fungus to be parasitical. May not the word *pratensis*, in Mr. Sowerby's work, be a misprint for *arvensis*? especially as the bit of a leaf represented at t. 398. fig. 5. bears a greater resemblance to the foliage of *Cnicus arvensis* than it does to that of *C. pratensis*. Specimens of *Urëdo suavolens* of Persoon, on the leaves of *Cnicus arvensis*, from this neighbourhood, accompany this letter."—*W. Baxter, Jan. 24. 1834.* The figures of the leaf in Sowerby's figure do, as Mr. Baxter has remarked, exactly resemble the leaf of *C. arvensis*, and but little, or not at all, that of *C. pratensis*.—*J. D. June 11. 1834.*

| ARPOPHY'LLUM spicatum <i>La Llave.</i> "One of the most graceful and beautiful of the Mexican Orchidæcæ; it has recently reached England in a living state." It was found growing on trees, and is very rare even in its native country. Its flowers are pink or pale purple, and are disposed in a dense spike. The genus is very near <i>Ponèra</i> ( <i>Bot. Reg.</i> , Feb. 1839.) |                                      |                                                        |                           |                    |                 |                   |                       |                 |                       |                                  |              |               |                                                                                 |

*E. ionosmum Lindl.*, imported by Messrs. Loddiges from Essequibo, has the delicate and delicious fragrance of the violet. (*Bot. Reg.*, July, 1838.)

*E. vesicatum Lindl.* is a curious Brazilian species imported also by Messrs. Loddiges. It approaches *E. equitans* in habit; but, in the structure of both flowers and leaves, it is widely different. (*Id.*)

*E. selligerum Batem. MS.* A pretty and distinct species; a free grower, with an odour like that of the tuberose. (*Bot. Reg.* June, 1838.)

*E. (Hormidium) uniflorum Lindl.* "A Mexican plant of no beauty, with yellowish green flowers."

Under this head, Dr. Lindley gives some observations on the genus *Epidendrum*, which, he thinks, cannot be divided. For this reason, he has suppressed the genera *Aultz Sal.*, the type of which is *E. ciliare*, *Amphiglottis Sal.*, and *Encyclia Hook.*; and he thinks that the *Prosthelia* or *Epithelia* of Knowles and Westcott will not stand. Dr. Lindley, however, thinks that the present plant may form the type of a new genus, which he has named *Hormidium*. (*Bot. Reg.*, Feb. 1839.)

- HARDENBERGIA is the name proposed by Mr. Bentham to be given to a group of six species of climbers, which he has separated from the old genus Kennedya. These six species are "all found in extra-tropical Australia: all of them are very much alike in the general appearance and colour of their flowers; and all are highly ornamental, from the great profusion of their flowers when under proper treatment. Next to the zichyas, they form the handsomest of the groups of which the old Kennedya consisted, and which are still known under that name in our gardens." The flowers are small, of a bluish pink, very numerous, and disposed on many-flowered racemes. The plant is named in honour of Frances Countess Hardenberg, sister of Baron Charles Von Hügel of Vienna; "a lady most zealous in the promotion of botany and horticulture." (*Botanist*, Sept.) 933. NARCI'SSUS. The species of this genus were studied for fifty years by the late A. H. Haworth, Esq., who published an able pamphlet, entitled *Narcissinearum Monographia*, a second edition of which appeared in 1831, in which they are distributed into sixteen genera. We here give a synopsis of them, exhibiting his genera in a sectional manner, and attach to his species the numbers of such of their synonymous species as are inserted in the body of the present work in p. 116. and 117., p. 594. of the 1st, and p. 650. of the 2d Add. OBERO'NIA recurva *Lindl.* A curious little plant, with "a pendulous raceme, scarcely more than 1 in. long, consisting of minute densely imbricated flowers." It is a native of Bombay, and is nearly allied to *O. Wightiana*, "an unpublished species from Madras." (*Bot. Reg.*, Feb., 1839.) For some particulars respecting the genus *Oberonia*, see the *Sert. Orch.*, as quoted in *Gard. Mag.* xiv. p. 288.

DONTOGLO'SSUM cordatum *Lindl.* has handsome flowers, the sepals and petals being richly clothed with brown, the lip white, and the crest purplish. Imported from Mexico. (*Bot. Reg.*, July, 1838.)

*P. lutœola* Hook. Exot. Fl. t. 105.; syn. *Dendrobium polystichum Swartz.* This plant, Dr. Lindley observes, is certainly from the West Indies; and it is by mistake, that the specimen of it in the Liverpool Botanic Garden is said to be from the East Indies, and to have been received from Dr. Wallich, as it does not appear among any of the doctor's collections. (Bot. Reg., Oct. 1838.)  
*P. zeylanica* Lindl.; syn. *Dendrobium polystichum Thouars Orch. Afr. t. 85.* In both this plant and *P. lutœola*, Dr. Lindley has observed that the disk of the labellum is covered with a fine frost-like mealiness, which is removed by the slightest touch, and which is "a curious modification of the hairs found in other plants. When undisturbed it consists of threads with egg-shaped joints, which are filled with air." The slightest touch destroys the cohesion between these joints, "so that when they

are placed on the field of the microscope, the latter appears as if covered with the eggs of some insect; it is only when they are removed from the labellum with great care, that their real articulated structure, and their analogy with such hairs as those of *Tradescantia* is made out." (*ib.*)

*PONDERA graminifolia Lindl.*; syn. *Nemaebonia graminifolia Knoeles & Westcott*. This was supposed to be a new genus; but Dr. Lindley, having carefully examined the plant in question, is convinced that it is of the same genus as *Pondera juncifolia*, described in the *Gen. et Spec. of Orchid. Plants*, p. 113. (*Bot. Reg.*, Feb. 1839.)

A TOUR IN SWEDEN IN 1838; comprising Observations on the Moral,  
Political, and Economical State of the Swedish Nation. By SAMUEL LAING,  
Esq. 8vo. 12s. cloth.

(Extract from AUTHOR'S PREFACE.)

“The calm which we have been enjoying for nearly a quarter of a century, after the storm of the French Revolution which shook the world, is perhaps the most important period that has occurred in the history of the human race. New powers, it may be said, have been granted to man during this period—new intellectual power, by the general diffusion of knowledge through the press—new physical power, by the general application of steam to machinery and movement. The changes which these mighty agencies are rapidly producing in the social condition of the lower and middle classes of every country—the circumstances in their ancient institutions, laws, and governments, which are retarding or accelerating the progress of these classes to a condition of higher moral and physical wellbeing—are objects peculiarly deserving the attention of the traveller; and it is a field in which, with the most ordinary intelligence and observation, he may be eminently useful. In Norway and Sweden such inquiries are peculiarly interesting at the present period, because these two nations, although the furthest removed from the agitation of the French Revolution, have, by a singular chance, been affected by it more permanently, and one of them more beneficially, than any others in Europe. Norway received a new and liberal constitution, and has started with the freshness of youth—a new nation, as it were, called suddenly into life from among the slumbering feudal populations of the North. Sweden received a new dynasty, and slumbers on amidst ancient institutions and social arrangements of darker ages.”

Having attempted in a former work to give a sketch of the present social condition of the Norwegian people, I have considered it necessary, in order to complete the view of the present moral, political, and economical state of the inhabitants of the Scandinavian peninsula, to undertake the following sketch of the Swedish.”

Lately published, price 14s. the 2d Edit. of

## MR. LAING'S THREE YEARS' RESIDENCE IN NORWAY.

“For minuteness of information, and amplitude of details regarding the habits, manners, customs, and general condition of the Norwegians, this work of Mr. Laing's surpasses, we think, any that has yet appeared on the same subject. We ourselves have certainly met with no work capable of affording so complete and intelligible a picture of the domestic economy, of the ordinary mode of living, and daily pursuits of this interesting people, than what is presented to us in the pages of this very entertaining volume.”—SCOTSMAN.

## NATURAL PHILOSOPHY, &amp;c.—CONTINUED.

TREATISE ON THE STEAM ENGINE; Historical, Practical, and Descriptive. By JOHN FAREY, Engineer. 4to. illustrated by numerous Woodcuts, and 25 Copperplates, engraved by Wilson Lowry, from Drawings by Messrs. Farey. £ 5. 5s. bds.—Vol. II. is in the press.

AN INTRODUCTION TO GEOLOGY; intended to convey a Practical Knowledge of the Science, and comprising the most important recent Discoveries: with Explanations of the Facts and Phenomena which serve to confirm or invalidate various Geological Theories. By ROBERT BAKEWELL. 5th Edition, considerably enlarged from the 4th Edition, and with new Sections and Cuts, price One Guinea, cloth, lettered.

“A work conspicuous for attractiveness, for perspicuity, for a style generally vigorous and correct—often elegant and beautiful, and for an independence of spirit which carries the author straight forward to his object without any servile regards to previous systems. Mr. Bakewell’s work has long been our favourite elementary treatise on Geology.”—ATHENÆUM.

REPORT ON THE GEOLOGY OF CORNWALL, DEVON, AND WEST SOMERSET, by order of the Lords Commissioners of Her Majesty’s Treasury. By HENRY T. DE LA BECHE, F.R.S. &c. Director of the Ordnance Geological Survey. 1 vol. 8vo. with numerous Sections and Plans. Price 14s. cloth, lettered.

NEW SYSTEM OF GEOLOGY; in which the great Revolutions of the Earth and Animated Nature are reconciled to Modern Science and to Sacred History. By A. URE, M.D. F.R.S. 8vo. with 7 Plates and 51 Woodcuts, 21s.

“We regard this New System of Geology as one of the most valuable accessions lately made to the scientific literature of our country.”—BRANDE’S QUARTERLY JOURN.

CONVERSATIONS ON MINERALOGY. With 12 Plates, engraved by Mr. and Miss Lowry. 3d Edition, enlarged, 2 vols. 12mo. 14s. cloth.

“The plan of these Conversations is happily conceived, and it is executed with ability and taste. The author has studiously avoided all unnecessary parade of technical diction, has rendered the doctrines of crystallography more familiar than heretofore to the tyro in mineralogy, and has included some of the most recently discovered substances. We may, therefore, unhesitatingly characterize this work as one of the most desirable text books that have issued from the British press.”—MONTHLY REVIEW.

CONVERSATIONS—ON LAND AND WATER. By Mrs. MARCET. With a coloured Map, showing the Comparative Altitude of the principal Mountains of the World. In fcp. 8vo. price 5s. 6d. cloth, lettered.

“Mrs. Marcet’s ‘Conversations’ have long been regarded as the best popular introductions to the science of nature. . . . The natural way in which one part of the subject is made to lead to the other, giving the effect of a continuous discussion—the lucid and graphic distinctness of the description—and the simplicity and aptness of the illustration employed—together with the familiar and playful style, and the pertinent anecdotes introduced—combine to render the ‘Conversations on Land and Water’ a delightfully entertaining as well as instructing book for the young; nay more, the information so concisely and exquisitely conveyed may be edifying to many readers of mature age. If science were oftener taught in this homely and simple way, the pursuit of knowledge would be infinitely more engaging to old and young.”—SPECTATOR.

By the same Authoress,

CONVERSATIONS ON VEGETABLE PHYSIOLOGY; comprehending the Elements of Botany, with their Application to Agriculture. 3d Edition, revised, fcp. 8vo. with Plates, 9s. cloth lettered.

CONVERSATIONS ON NATURAL PHILOSOPHY. 8th Edition, with 22 Engravings by Lowry, 10s. 6d. boards.

CONVERSATIONS ON CHEMISTRY, in which the Elements of that Science are familiarly explained and illustrated by Experiments; with a Conversation on the Steam Engine. 2 vols. 12mo. 13th Edition, with Plates by Lowry, 14s. boards.

**BOTANY, AGRICULTURE, &c.**

By *JOHN LINDLEY, Ph. D. F.R.S. L.S. &c.*

*Professor of Botany in the London University College and in the Royal Institution.*

**SCHOOL BOTANY**; or, an Explanation of the Characters and Differences of the principal Natural Classes and Orders of Plants, belonging to the Flora of Europe, in the Botanical Classification of De Candolle. For the use of the Students preparing for their **MATRICULATION EXAMINATION** in the University of London. In one volume, fcp. 8vo. with upwards of One Hundred and Sixty Woodcuts, price 6s. cloth, lettered.

**INTRODUCTION TO BOTANY.** 2d Edition, with Corrections and considerable Additions, 1 large vol. 8vo. with numerous Plates and Woodcuts, 18s. cloth.

"We have no hesitation in pronouncing the 'Introduction to Botany,' by Dr. Lindley, to be the most valuable and perfect in any language we are acquainted with."

MEDICAL GAZETTE.

"The most valuable work of the kind in our language."

BRITISH AND FOREIGN MEDICAL REVIEW.

"A work of classical excellence; most accurate, instructive, and pleasing. It is essential for every botanist to have a copy of it beside him."

MEDICO-CHIRURGICAL REVIEW.

**A NATURAL SYSTEM OF BOTANY**; or, a Systematic View of the Organization, Natural Affinities, and Geographical Distribution of the whole Vegetable Kingdom: together with the Uses of the most important Species in Medicine, the Arts, &c. 2d Edition, with numerous Additions and Corrections, and a complete List of Genera, with their Synonyms, 1 vol. 8vo. 18s. cloth.

**SYNOPSIS OF THE BRITISH FLORA**, arranged according to the Natural Orders. 2d Edition, with numerous Additions, Corrections, and Improvements, 12mo. 10s. 6d. boards.

**A KEY TO STRUCTURAL, PHYSIOLOGICAL, AND SYSTEMATIC BOTANY.** For the Use of Classes. 8vo. 4s. 6d.

**FLORA MEDICA**: or, a Botanical Account of all the most remarkable Plants applied to Medical Practice in Great Britain and other Countries. 1 vol. 8vo. price 18s. cloth, lettered.

"We feel bound to recommend it in a strong manner to the medical public. Many examples, which we might enumerate, shew how important it is that the investigation of medical plants should be taken up by some one fully qualified for the execution of so difficult a task. No one was better adapted to fulfil the object which he has professed than Dr. Lindley; and we feel confident that his work will obtain the patronage which it justly merits."—*LANCET*.

"We direct the attention of the student to the general value of the work, as an instructive guide in the acquisition of botanical knowledge,—to the correct descriptions given of medicinal plants and articles obtained therefrom,—to the great labour, research, and industry of the author,—and to the anxiety in rendering the information full, satisfactory, and precise; and we conclude by saying that the student will find in Dr. Lindley's work all that can be desired in a treatise on medical botany."

EDINBURGH MEDICAL JOURNAL.

**FIRST PRINCIPLES OF HORTICULTURE.** 2s. sewed.

**GUIDE TO THE ORCHARD AND KITCHEN GARDEN.** By G. LINDLEY, C.M.H.S. Edited by J. LINDLEY, Ph. D. F.R.S. &c. 1 large volume, 8vo. 16s. boards.

With nearly Ten Thousand Engravings on Wood. 2d Edition, corrected, 1 large vol. 8vo. £3. 13s. 6d. boards.

“The most useful and popular botanical work that has ever appeared in the English language.”—JAMESON’S PHILOSOPHICAL JOURNAL.

**HORTUS BRITANNICUS**: a Catalogue of all the Plants Indigenous to, Cultivated in, or Introduced into Britain. 8vo. 23s. 6d. in cloth.

“The beauty of its type, the excellent arrangement of its matter, the vast quantity of useful gardening information that it contains, and the careful application of the soundest principles of orthography and etymology to the accentuation and termination of the systematic names, give it a claim to be considered a classical work in the literature of gardening.”—EDWARDS’S BOTANICAL REGISTER.

**AN ENCYCLOPÆDIA OF GARDENING**; comprising the Theory and Practice of Horticulture, Floriculture, Arboriculture, and Landscape Gardening: including all the latest improvements; a General History of Gardening in all Countries; and a Statistical View of its Present State: with Suggestions for its Future Progress in the British Isles. New Edition, greatly enlarged and improved, with nearly 1000 Engravings on Wood, 1 vol. 8vo. £2. 10s.

“One of the most useful and interesting publications of modern times.”

STEWART’S PLANTER’S GUIDE.

“No gardening book so comprehensive, and containing such an immense mass of matter, has ever been submitted to the public more free from error of the pen or the press.”—MONTHLY REVIEW.

**ENCYCLOPÆDIA OF AGRICULTURE**; comprising the Theory and Practice of the Valuation, Transfer, Laying out, Improvement, and Management of Landed Property; and the Cultivation and Economy of the Animal and Vegetable Productions of Agriculture, including the latest Improvements; a General History of Agriculture in all Countries; and a Statistical View of its Present State: with Suggestions for its Future Progress in the British Isles. ## BOTANY, &amp;c.—CONTINUED.

**ELEMENTS OF PRACTICAL AGRICULTURE:** comprehending the Cultivation of Plants; the Husbandry of Domestic Animals; and the Economy of the Farm. By DAVID LOW, Esq. F.R.S.E. Professor of Agriculture in the University of Edinburgh. 1 vol. 8vo. 2d Edition, with Alterations and Additions, and above 200 Woodcuts, 18s. cloth, lettered.

“No work on agriculture has appeared in our time which will bear a comparison with this excellent, and we would say classical work, of Professor Low. It will become the manual of practical agriculture for the British empire; and the judicious views and sound rules of our author will unquestionably prove beneficial to the agriculturalists of other countries.”—JAMESON'S EDIN. PHILOSOPHICAL JOURN.

**ELEMENTS OF AGRICULTURAL CHEMISTRY.** By Sir HUMPHRY DAVY, Bart. LL.D. F.R.S. &c. 5th Edition, with Notes by his Brother, Dr. JOHN DAVY, 8vo. 15s.

**THE CULTIVATION OF THE GRAPE VINE ON OPEN WALLS.** By CLEMENT HOARE. 8vo. New Edition, with Additions, 7s. 6d. cloth.

“Mr. Hoare has thrown more light on the subject of vine culture than any British gardener who has written on the subject.”—LOUDON'S GARDENER'S MAGAZINE.

“One of the best productions upon any horticultural subject which has been published for some years.”—ATHENÆUM.

**FIRST STEPS TO BOTANY.** By J. L. DRUMMOND, M.D. 12mo. 100 Woodcuts, 3d Edition, 9s. boards.

“This answers more completely to the proper notion of an introduction to botany than any work we have yet seen. It is truly scientific, and at the same time of an entirely popular character, replete with entertaining information, and adapted to make the study at once attractive and improving in a high degree.”—ECLECTIC REVIEW.

**CONVERSATIONS ON BOTANY.** With 22 Engravings, 12mo. 8th Edition, enlarged, 7s. 6d. plain; 12s. coloured.

Bound in fancy cloth, lettered, with ornamental gilding, price One Guinea; or with India Proof Plates, Two Guineas.

Also in fcp. 8vo. with four Engravings, from Paintings by Westall, 10s. 6d. cloth.

By the same Author,

**IRISH MELODIES:** with an Appendix, containing the Original Advertisements, and the Prefatory Letter on Music. 13th Edition, fcp. 8vo. with engraved Title and Vignette, 10s. cloth lettered.

**THE POETICAL WORKS OF ROBERT SOUTHEY, Esq.** Collected by HIMSELF. 10 vols. fcp. 8vo. with Frontispieces and Vignettes, price £2. 10s. cloth lettered.

\* \* This Edition, which the Author has arranged and revised with the same care as if it were intended for posthumous publication, includes many pieces which either have never before been collected, or have hitherto remained unpublished. Preliminary notices are affixed to the long poems,—the whole of the notes retained,—and such additional ones incorporated as the Author, since the first publication, has seen occasion to insert. The Frontispieces and Vignettes consist of views appropriate to the respective volumes.

## POETRY—CONTINUED.

THE POETICAL WORKS of LETITIA ELIZABETH LANDON (late Mrs. MACLEAN.) New Edition, 4 vols. fep. 8vo. with Portrait by M'Clise, and four other Illustrations by Howard, &c. price 28s. cloth lettered.

JAMES MONTGOMERY'S POETICAL WORKS. A complete collected Edition, comprising "The Wanderer of Switzerland," "The West Indies," "World before the Flood," "Greenland," "Pelican Island," "Songs of Zion," "Poet's Portfolio," and all his smaller Poems. 3 vols. foolscap, 18s. cloth lettered.

"We have long wished to see a uniform and cheap edition of the works of the most distinguished Christian poet who now graces the annals of our English literature. That wish is now gratified to its full extent. The volumes before us, both as to size, neatness, and price, are every thing that could be wished."—EVANGELICAL MAGAZINE.

FAMILY SHAKSPEARE; in which nothing is added to the Original Text, but those Words and Expressions are omitted which cannot with propriety be read aloud in a Family. By T. BOWDLER, Esq. F.R.S. New Edition, in 1 large volume, 8vo. with 36 Illustrations after Smirke, Howard, &c. 30s. cloth; with gilt edges, 31s. 6d. Or in large type, without Illustrations, in 8 vols. 8vo. £4. 14s. 6d. boards.

SELECT WORKS OF THE BRITISH POETS, FROM BEN JONSON TO BEATTIE. With Biographical and Critical Prefaces, by Dr. AIKIN. 1 vol. 8vo. 18s. cloth; or neatly done up, gilt edges, 20s.

"A compilation which places before us the best portions of our best poets in a very accessible form, and in the selection of which we have the benefit of the sound taste and critical abilities of a gentleman so long and so usefully known to the world of letters as Dr. Aikin. The plan of the present volume is both comprehensive and judicious."

MONTHLY REVIEW.

SELECT WORKS OF THE BRITISH POETS, FROM CHAUCER TO WITHERS. With Biographical Sketches, by ROBERT SOUTHEY, LL.D. 1 vol. 8vo. uniform with "Aikin's Poets," 30s. cloth; or with gilt edges, £1. 11s. 6d.

THE MORAL OF FLOWERS. With 24 beautifully coloured Plates, royal 8vo. 3d Edition, 30s. half-bound.

"Full of exquisite poetry."—BLACKWOOD'S MAGAZINE.

By the same Author,

THE SPIRIT OF THE WOODS. 1 vol. royal 8vo. with 26 beautifully-coloured Engravings, price 36s. half-bound.

"Cold must be the heart, and dull the eye, that feels not, sees not, at a first glance, and on the perusal of a single page, that we are indebted for this most elegant volume to the soft pencil and finer pen of a lady."—ANALYST.

"This is indeed a charming volume, and one which we think no one, unless utterly devoid of all taste for that which is tasteful, can peruse without admiring the feeling and beautiful manner in which the authoress introduces the ideas and associations that in so many instances are inseparably connected with our indigenous forest trees."

MAGAZINE OF NATURAL HISTORY.

JOANNA BAILLIE'S POEMS, &c. New DRAMAS, 3 vols. 8vo. 36s.—A SERIES OF PLAYS, in which it is attempted to delineate the stronger Passions of the Mind, 3 vols. 8vo. £1. 11s. 6d.—MISCELLANEOUS PLAYS, 8vo. 9s.—METRICAL LEGENDS, 8vo. 14s.

## RELIGION, THEOLOGY, &amp;c.

## WORKS BY THE REV. S. T. BLOOMFIELD, D.D. F.S.A.

THE GREEK TESTAMENT; with copious English Notes, Critical, Philological, and Explanatory; 3d Edition, greatly enlarged and very considerably improved, in 2 closely printed vols. 8vo.; with Map of Palestine, price £2. handsomely bound in cloth lettered.

(Dedicated to his Grace the Archbishop of Canterbury.)

"Much as had been done in the two preceding impressions, the THIRD edition is yet farther enlarged (to the extent of not less than 200 pages), and considerably improved. This third edition of the Greek Testament may justly be regarded as the most valuable for biblical students that has yet been issued from the press in this country."

HORNE'S INTRODUCTION TO THE STUDY OF THE SCRIPTURES.

COLLEGE AND SCHOOL GREEK TESTAMENT, WITH ENGLISH Notes. Second Edition, with Additions, and a New Map of Palestine, adapted to the Gospel History. One thick volume, 12mo. 10s. 6d. cl. let.

"This edition of the Greek Testament supplies a desideratum in scholastic literature. The notes (which are strictly grammatical, scholastic, and elementary) furnish to the juvenile student every requisite aid for the correct interpretation of the New Testament."—CHRISTIAN REMEMBRANCER.

"It is impossible to say how far the public are indebted to Dr. Bloomfield for these labours of his industrious pen; they will carry down his name with the highest honour to posterity. Our prayer is, that his invaluable life may long be spared, and that he may be permitted to reap the full reward of his self-sacrificing devotion to the imperishable interests of Biblical science."—EVANGELICAL MAGAZINE.

THE HISTORY OF THE PELOPONNESIAN WAR. BY THUCYDIDES.

Newly Translated into English, and accompanied with very copious Notes, Philological and Explanatory, Historical and Geographical; with Maps and Plates. 3 vols. 8vo. 45s.

"In the Notes by this translator, numerous interesting points of classical antiquities are ably discussed, and many thousands of invaluable illustrations of the obscure passages of the author are adduced from the best Greek writers of every age. As to the version, considering the all but insuperable difficulties with which the translator has had to contend, in a writer said by some great scholars to be untranslatable, we can with truth say, that he has executed his task with fidelity, taste, and judgment. Upon the whole, we can pronounce the work to be quite indispensable to all who would hope to understand the text of the greatest of historians, but most obscure of writers."

GENTLEMAN'S MAGAZINE.

THUCYDIDES. New Recension of the Text, with copious English Notes, Critical, Philological, and Explanatory; Examination Questions, &c. for the Use of Colleges and the Public Schools. 3 vols. post 8vo. £1. 7s. bds.

"We feel confident that no reader of Thucydides will fail to purchase an edition where, be their scholarship what it may, they cannot rise from its perusal without having learnt much that they did not know before, and which they cannot obtain elsewhere. . . . We will not do the tutors of colleges, and masters of public schools, the injustice to believe that they are so regardless of their own reputation and their pupil's improvement, as not to adopt the only edition of Thucydides, which this or any other country has produced, really suited for the instruction of young persons."—GENTLEMAN'S MAG.

"Thucydides Historia Græcæ, a doctissimo Britanno ternis voluminibus elegantissimè edita."—PROF. POPPO, of Frankfort, in *Pref. to his noble Variorum Edit. of Thucydides*, 10 vols. 8vo.

ROBINSONS GREEK AND ENGLISH LEXICON OF THE NEW TESTAMENT. Edited, with careful revision, corrections, occasional additions, and a Preface, by Dr. BLOOMFIELD. 1 vol. 8vo. 28s. cloth.

"Dr. Robinson's Lexicon, as edited by Dr. Bloomfield, hardly requires our warm and sincere praise. It must prove of great value to every student who is wise enough to procure it."—BRITISH CRITIC AND QUARTERLY THEOLOGICAL REVIEW.

"We consider this the best Lexicon of the Greek Testament that is extant. Dr. Bloomfield has proved himself a most indefatigable scholar, and his present edition deserves unbounded success."—CHURCH OF ENGLAND QUARTERLY REVIEW.

## RELIGION, THEOLOGY, &amp;c.—CONTINUED.

THE SUNDAY LIBRARY; a Selection of Sermons from eminent Divines of the Church of England, chiefly within the last Half Century. With Notes, &c. by the Rev. T. F. DIBDIN, D.D. Complete in 6 vols. small 8vo. with 6 Portraits of distinguished Prelates, 30s. cloth.

"A little library for a churchman, and a treasure for the pious among the laity."

## WORKS OF GENERAL UTILITY—CONTINUED.

**INSTRUCTIONS TO YOUNG SPORTSMEN.** By Lieut.-Col. P. HAWKER.  
8th Edition, greatly enlarged and thoroughly revised, with new Cuts of  
of Heads of Wild and Tame Swans, all his last new Coast Gear, with many  
other original subjects, and containing altogether 60 Plates and Woodcuts,  
1 vol. 8vo. 21s. cloth lettered.

“From the extent and variety of its information, this work can be viewed in no other  
light than the critical observations of a veteran and scientific Sportsman. Experience  
has been his tutor, and practice his expounder, of all the arcana of his favourite hobby,  
which he rides with confidence, derived from actual warfare in the field of his labours.  
Though addressed to the young sportsman, it must not be considered solely as the  
Mentor of the tyro; grey beards may learn wisdom from his rudiments; and we do not  
scruple in adding that the most experienced will pause at their ‘old familiar doings.’”

SPORTING MAGAZINE.

**THE GUN;** or, a Treatise on the Nature, Principle, and Manufacture of the  
various descriptions of Small Fire-Arms. By WILLIAM GREENER. 1 vol.  
8vo. Plates, 15s.

THOMAS BULL, M.D. Physician-Accoucheur to the Finsbury Midwifery  
Institution, &c. 2d Edit. greatly enlarged. Fcp. 8vo. 7s. cloth lettered.

“There is no mother that will not be heartily thankful that this book ever fell into  
her hands; and no husband who should not present it to his wife. We cannot urge its  
value too strongly on all whom it concerns.”—ECCLECTIC REVIEW.

**A COMPLETE LATIN-ENGLISH AND ENGLISH-LATIN DICTIONARY;**  
compiled from the best Sources, chiefly German. By the Rev. J. E. RIDDLE,  
M.A. Curate of Harrow; Translator and Editor of Scheller’s large Latin  
Lexicon, which has recently appeared from the Oxford University Press.  
8vo. 31s. 6d. cloth.

“An admirable Dictionary, and promises more help to the Latin student than any  
thing hitherto afforded him in this country.”—EVANGELICAL MAGAZINE.

the Duties and Responsibilities incident to the due Performance of their  
Trusts; with Forms properly filled up for every Bequest. By J. H. BRADY,  
late of the Legacy-Duty Office, Somerset House. 8vo. 6th Edition, improved  
to the latest date, 8s.

\*.\* This work contains information of a more technical nature than Mr.  
Hudson’s work, and is therefore adapted to the use of Attorneys as well as the  
Public.

**DOMESTIC DUTIES;** or, Instructions to Young Married Ladies on the  
Management of their Households, &c. &c. By Mrs. WILLIAM PARKES.  
12mo. 4th Edition, 10s. 6d. cloth, lettered.

“The volume before us is one of those practical works which are of real value and  
utility. It is a perfect VADE-MECUM for the young married lady, who may resort to it  
on all questions of household economy and etiquette. There is nothing omitted with  
which it behoves a young lady to be acquainted.”—NEW MONTHLY MAG.
