SITUATION

EU Civil Protection activities

- The EUCP Team comprised of 10 experts from 8 Participating States is present in strategic points for the emergency management: Quito and Portoviejo with Liaison Officers embedded in the National Operations Centre in Quito and working with the OSOCC in Portoviejo.
- Since 25 April, the EU structural engineers (FR, IT, UK, EUCP Teams) assessed a total number of 946 buildings including one of the biggest shopping malls in Portoviejo of 9000m², the City hall and the church of Pedernales and a hospital in Manta.
- The French water purification module has been providing drinking water in different parts of Chone since 25 April. Three other French water purification units are working in Calceta.
