The following information was extracted from the OSI, HQ USAF  
Summary of Positive Intelligence Activities for the Month of January  
1954, dated 18 February 1954:

"4. Unidentified Flying Object Reported over BERLIN:

"On 8 January 1954, a German resident of the American Sector of BERLIN noted an unidentified object, similar in appearance and size to a full moon, traveling in a straight path from northwest to southeast over the American Sector of BERLIN. Time of observation was 2027 hours (local time), and source observed the object for a period of approximately five (5) to seven (7) seconds, at which time it disappeared behind the surrounding buildings. Weather conditions at time of observation were clear sky, a new quarter moon, wind approximately five (5) to ten (10) miles per hour, and temperature 20° to 25°F. Source could give no identifying aerodynamic features but stated that there was no sign of exhaust trail nor could any sound be heard from the object. The object traveled in a straight line at a constant altitude and speed. Source was unable to estimate altitude of the object but stated that speed of the object appeared to be twice that of a jet fighter aircraft but much slower than the speed of a meteor."
