Above food prices are simple averages of prices reported. They are not perfectly comparable in all cases with price averages for earlier years. Changes in grading, trade practices, etc., occur from time to time.

(a). Rental ranges shown above are indicative of prevailing rents being paid. They should not be used as a measure of change in rents paid for the same quality of living accommodation over long periods of time.

(b). Averages include prices for cuts with bone-in. (d). Mixed—hock-off and hock-on. (e). Mixed—carton and loose. (f). Loose. (g) Estimate. (i) Mixed—California and Australia. (j) California. (k) Pure. (m) 360's. (n) Mixed—package and bulk. (p) Package. (s) Mixed—choice and fancy. (t) Tin.

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, JULY, 1950⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars ⁽²⁾
	Estab-lishments	Workers		
Strikes and Lockouts in Progress Prior to July, 1950				
MANUFACTURING—				
<i>Fur and Leather Products—</i>				
Fur factory workers, Toronto, Ont.	1	120	1,400	Commenced June 16; for a new agreement providing for increased wages and reduced hours from 42 to 35 per week, following reference to conciliation board; terminated July 14; return of workers pending further negotiations; indefinite.
<i>Textiles, Clothing, etc.—</i>				
Cotton and rayon underwear factory workers, Sherbrooke, P.Q.	1	136	2,700	Commenced May 11; for a new agreement providing for increased wages following reference to court of referees; untermi-nated.
<i>Miscellaneous Wood Products—</i>				
Furniture factory workers, Chesley, Ont.	1	14	300	Commenced June 6; for a signed agreement providing for increased wages, hospitalization plan, etc.; terminated by end of July; no settlement; in favour of employer.
Planing mill workers, Campbellton, N.B.	1	108	2,400	Commenced June 23; for a new agreement providing for increased wages, instead of proposed reduction, following reference to conciliation board; untermi-nated.
<i>Metal Products—</i>				
Washing machine factory workers, Amherst, N.S.	1	Commenced April 15; alleged discrimination in dismissal of three union officers; later information indicates strike terminated April 24; return of workers and replacement; in favour of employer.
Electrical apparatus factory workers, Vancouver, B.C.	1	14	250	Commenced May 11; for a new agreement providing for increased wages, reinstatement of job classification, payment for all statutory holidays, etc., following reference to conciliation board; untermi-nated.
Plumbing supplies factory workers, London, Ont.	2	524	3,800	Commenced May 22; for a new agreement providing for union shop, increased wages, check-off, reduced hours, pension plan, etc., following reference to conciliation board; terminated July 11 and 14; conciliation, civic, and negotiations; compromise.
Brass products factory workers, Galt, Ont.	1	36	700	Commenced June 15; for a new agreement providing for increased wages, Rand formula for union dues, payment for statutory holidays, extension of vacations with pay, following reference to conciliation board; untermi-nated.
Laundry machinery factory workers, Toronto, Ont.	1	32	650	Commenced June 16; for a new agreement providing for increased wages, extension of vacations with pay, additional union security, etc., following reference to conciliation board; untermi-nated.
Aluminum foundry workers, Etobicoke, Ont.	1	272	5,700	Commenced June 29; for a new agreement providing for increased wages and Rand formula for union dues; untermi-nated.

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars ⁽²⁾
	Estab-lishments	Workers		
Strikes and Lockouts in Progress Prior to July, 1950				
MANUFACTURING—con.				
<i>Non-Metallic Minerals, Chemicals, etc.—</i> Match factory workers, Mission, B.C.	1	24	360	Commenced June 2; for a union agreement providing for increased wages, reduced hours, union shop, sickness and accident insurance, additional paid statutory holidays, following reference to conciliation board; terminated July 20; negotiations; compromise.
TRANSPORTATION—				
<i>Steam Railways—</i> Switchmen, Vancouver, B.C.	1	(3) 6	24	Commenced June 25; affected by strike in United States for increased wages and reduced hours; terminated July 6; return of workers pending settlement; indefinite.
TRADE—				
Department store clerks, New Westminster, B.C.	1	30	500	Commenced Aug. 27, 1949; for a union agreement providing for increased wages and other changes as recommended by majority report of conciliation board; employment conditions no longer seriously affected by the end of July; indefinite.
SERVICE—				
<i>Business and Personal—</i> Hotel employees, Cornwall, Ont.	8	100	450	Commenced March 9; for a union agreement providing for increased wages, reduced hours, overtime rates, vacations with pay, following reference to conciliation board; terminated July 6; return of workers; in favour of employers.
Waitresses and dishwashers, Sudbury, Ont.	2	33	800	Commenced May 11; for union recognition and agreement providing for increased wages; un-terminated.

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars ⁽²⁾
	Estab-lishments	Workers		
Strikes and Lockouts Commencing During July, 1950				
MINING—				
Coal miners Springhill, N.S.	3	1, 175	3, 500	Commenced July 26; dispute over extra pay for duffing; terminated July 28; to be negotiated during shut-down of mines for two weeks' vacation; indefinite.
MANUFACTURING—				
<i>Rubber and Its Products—</i>				
Tire factory workers, curers and builders, New Toronto, Ont.	1	(⁴) 180	540	Commenced July 10; protesting change in piece-work rates and transfer of union steward to another shift; terminated July 12; conciliation, provincial; compromise, adjustment in rates.
<i>Textiles, Clothing, etc.—</i>				
Knitting factory workers, St. Jerome, P.Q.	1	(⁵) 504	9, 800	Commenced July 6; for implementation of award of arbitration board for increased wages in new agreement under negotiations; un-terminated.
<i>Miscellaneous Wood Products—</i>				
Sawmill workers, Nanaimo, B.C.	1	224	896	Commenced July 3; protesting re-placement of three watchmen by Corps of Commissionaires; terminated July 6; return of workers pending reference to arbitration; indefinite.
Furniture factory workers, Nicolet, P.Q.	1	57	57	Commenced July 10; for an increase in wages of 5c per hour as provided in cost-of-living-wage clause in agreement; terminated July 10; negotiations; in favour of workers.
Shingle mill workers, New Westminster, B.C.	1	50	350	Commenced July 14; for settlement of grievance (to have kiln cars brought closer to packing benches to eliminate extra work); terminated July 25; return of workers pending settlement; indefinite.
<i>Metal Products—</i>				
Can and canning equipment factory workers, Toronto and New Toronto, Ont.	3	(⁶) 564	7, 400	Commenced July 12; for a new agree-ment providing for increased wages following reference to conciliation board; un-terminated.
Electrical apparatus factory workers, welders, Peterborough, Ont.	1	12	50	Commenced July 14; against suspen-sion of four welders for refusal to do certain repair work; terminated July 21; return of workers; in favour of employer.
Steel mill ironworkers and pipefitters, Sault Ste. Marie, Ont.	1	95	400	Commenced July 16; for adjustment of work schedule on five-day week; terminated July 20; return of workers; in favour of employer.
Foundry workers, moulders, Sackville, N.B.	1	(⁷) 38	114	Commenced July 19; dispute with shop foreman over working con-ditions; provisionally terminated July 21; shutdown of plant for two weeks' vacation; indefinite.

CURRENT LABOUR CONDITIONS

This article summarizes the latest employment and labour information available at October 10, as the LABOUR GAZETTE went to press. It was prepared by the Economics and Research Branch, Department of Labour.

AT THE beginning of October, the employment situation contrasted sharply with that of a year before. There are several indications of this change, among them the contrasting trend in registrations at National Employment Service offices. In 1949, registrations on file at local employment offices began to increase after the first week in September, and climbed rapidly from that point throughout the rest of the winter. This year, registrations have been falling throughout September. On September 28, they totalled 133,100, as compared with 148,200 on September 7, and 143,000 on September 29, 1949. A number of factors are responsible for this downward trend, some of them of considerable importance for the employment situation over the next few months.

Part of the continued decline in registrations during September this year is due to the late harvest in the west. Cold wet weather throughout August and September have delayed the harvest to the point where it has been necessary to extend to the middle of October the annual excursion of harvest workers. Although frost damage reduced crop values, more harvest workers than last year were needed to take the large grain crop off the fields. In all, between 2,500 and 2,700 workers are expected to move from Ontario and Quebec into the western wheat fields this season.

Of more significance than the late harvests is the increase in labour demand in logging and manufacturing. Last year, low labour demand in these two major industry groups had an important bearing on the heavy winter unemployment, since it meant that many of those who worked in agriculture, construction and transportation during the summer had difficulty in finding winter jobs. Although employment in manufacturing last winter was not markedly below that of record postwar years, few firms were increasing their staffs, and in several important manufacturing industries such as machine tools and agricultural implements, employment and production were declining. Employment in the eastern logging industry last year was at its lowest point since the war, as pulp and paper companies reduced their log inventories because of the uncertain markets for their products.

At present, employment in the logging industry in eastern Canada has reached levels most unusual for this time of year; pulp and paper companies are restoring their depleted log inventories in answer to the heavy demand for newsprint in the United States. In most sections of the industry, the supply of workers is not sufficient to meet the demand, since at this time of year the logging industry is competing for labour with agriculture and

construction. This heavy demand for loggers is expected to continue throughout the fall and early winter, and will provide employment for many seasonal workers released from agriculture, construction and transportation as the cold weather sets in.

Both statistical and non-statistical sources of information give evidence of an increase in demand for labour in manufacturing industries, especially in the iron and steel group. The manufacturing employment index for August was 0.4 per cent above that of a year ago, and the advance over the July index was more than seasonal. Since August, the demand for labour from steel-producing and steel-using firms has continued strong. Vacancies reported by local employment offices for such occupations as skilled machinists, tool and die makers and welders are considerably higher than last year at this time, and some companies report a shortage of suitable applicants. As yet, there has been no marked increase in the demand for unskilled workers from manufacturing firms.

The main impetus behind the new demand for labour in manufacturing is the expectation of continued increases in defence spending, as defence appropriations voted in the special session of Parliament are converted into actual orders for war materials. This new defence program comes at a time of high levels of activity in most sections of the economy, when rising prices indicate a continuing strong demand both at home and abroad for most goods and services. Sales of the main consumer durables—automobiles, washing machines, stoves and refrigerators, continue to exceed those of last year. The high levels of consumer income, bolstered by rising wages and employment, have helped maintain consumer spending and the large number of new houses being built continues to create a steady demand for household appliances.

The resulting pressure on prices gives manufacturers a considerable incentive to increase their inventories of both finished goods and raw materials. This inventory accumulation has helped to stimulate employment in industries other than those immediately affected by defence orders.

For the manufacturer who uses steel as one of his main components, the incentive to place advance orders for steel is particularly strong. So heavy have been the demands on the United States steel industry that it is possible that exports of steel from the United States to Canada may be curtailed. Although the primary steel industry in Canada expanded greatly during the war, and new facilities have been added since, there are still many types of steel which must be imported because it is not economical to produce them in Canada. With new defence orders occurring at a time of strong demand for steel fabricated products, the prospect of a steel shortage is a real one.

In order to reduce the inflationary pressures in the economy, and to prevent consumer demand and defence needs from competing with each other for labour and basic materials, the Federal Government has taken measures to restrict consumer credit. Larger down payments will be required both on durable goods bought on the instalment plan, and on houses financed by the Central Mortgage and Housing Corporation.

Allowing the Canadian dollar to find its own level on world currency markets may also help to lower prices, in part by reducing the price of materials imported from the United States, and in part by making it less profitable to sell in United States markets goods which are also in demand in Canada. The price of beef has already fallen in response to the change in the value of the Canadian dollar: rising beef prices have been one of the most important factors pushing up the food prices index.

Any reduction in prices would tend to offset some of the dissatisfaction with wage rates negotiated earlier in the year between labour

(a) Estimated on basis of sample labour force survey. Only those who did not do any work in the survey week are here classified as persons without jobs. June 3, 1950 excludes Manitoba.

(b) These percentages calculated on basis of 1949 figures excluding Newfoundland and Manitoba.

(c) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

Data in this table are preliminary figures from regular reports compiled by various government agencies, including Dominion Bureau of Statistics, the Unemployment Insurance Commission, the Immigration Branch, Department of Citizenship and Immigration, and the Economics and Research Branch, Department of Labour. Detailed information can be found in the statistical appendix of the Labour Gazette.

NOTES OF CURRENT INTEREST

Measures adopted by special Session of Parliament

In addition to passing legislation to deal with the Canadian railway strike (see p. 1638), the special Session of Parliament which opened on August 29, 1950, also adopted measures required by the fighting in Korea and the increasingly grave situation reflected by that struggle. Consideration of these measures was, in fact, the original reason for the summoning of the special Session.

The first of these measures, The Canadian Forces Act, authorized the Government in Council to place Canadian forces on active service "in consequence of any action undertaken by Canada under the United Nations Charter, the North Atlantic Treaty or any other similar instrument for collective defence that may be entered into by Canada."

This Act also extended to members of such a special force the various benefits which had been applied to veterans of World War II under the following measures: the Civil Service Act, the Civil Service Superannuation Act, the Pension Act, the Unemployment Insurance Act, the Veterans Land Act, the Veterans Insurance Act, the War Service Grants Act, the Department of Veterans Affairs Act, the Veterans Rehabilitation Act, the Veterans Business and Professional Loans Act, the War Veterans Allowance Act, and the Reinstatement in Civil Employment Act.

The Hon. Brooke Claxton, Minister of National Defence, explained to the House of Commons on September 7 that "as far as is proper and possible, the position of men who enlist and take part in the work of any force designated as a special force shall be similar to that enjoyed by veterans in similar circumstances in the second World War."

The Act provided for the Governor in Council extending the benefits of the Reinstatement in Civil Employment Act and the other veterans' measures retroactively to July 5, 1950, the day on which Canadian ships were sent to Korea.

On September 8 the Rt. Hon. C. D. Howe, Minister of Trade and Commerce, introduced the Essential Materials (Defence) Act. This measure gave authority to the Governor in Council for the allocation of such essential materials and services as may be designated by the Governor in Council from time to time, and for the control of their prices, if necessary.

Explaining the need for this legislation, Mr. Howe said, in part:—

"There are two aspects of preparedness. One is military preparedness. . . . The other is economic preparedness.

"Economic preparedness means doing the things at home that give us the physical and moral strength to cope with the challenges of production and distribution and the ever-present threat of inflation.

"To achieve this we must increase output of essential goods and services, using the best initiative that Canadian business can muster, employing the scientific and technical genius which distinguish our professional people and putting to work the great skill which the Canadian labour force possesses.

"Once the essential goods and services that are needed are produced, we must make sure that they are distributed in such a manner as to do the most good. This means making sure that all essential materials and services required for the manufacture of defence supplies are available, and that enough is left to meet important civilian needs. To achieve this there is need for industry and government to co-operate, and for the government to have the appropriate authority to make the necessary arrangements.

"There is, finally, the need to avoid runaway inflation, with its distortions of the wage and price structure and the unrest it brings in its wake. Common sense and self-discipline on the part of all Canadians can go far to avoid excesses which are completely unnecessary. As I explained earlier, we have never been more prosperous. We have never had a larger supply of goods and services and a greater capacity to produce more of these goods and services. Those who are hoarding, those who are raising prices in anticipation of a controlled economy, are doing a dis-service to themselves and to the communities in which they live. In fact, by doing so they are directly contributing to a situation which may make it necessary to introduce controls that could otherwise be avoided.

"Nobody can foresee the exact course of events over the next eighteen months. I am satisfied that with the full co-operation of Canadians in all walks of life we can meet the situation as it now appears without the over-all controls we had during World War II. However, as for essential materials and services required to produce necessary defence supplies, we must be

prepared for all exigencies. That is the reason we are asking for the stand-by powers mentioned in the resolution now before the House."

In his Budget speech, the Minister of Finance, Hon. Douglas Abbott, announced several methods, short of direct price and other controls, by which the Government proposed to counter inflationary pressures. These included: a bill empowering the Government to limit the use of consumer credit, as a means of checking instalment buying; action by the Central Mortgage and Housing Corporation to limit the dollar value of its housing loans; and similar restrictions on farm improvement loans.

Tax increases announced by Mr. Abbott included a 5 per cent increase in the tax on corporation profits, and increases in the taxes on certain commodities.

Labour backs UN stand in Korea A joint statement issued by Percy R. Bengough, President of the Trades and Labour Congress of Canada, and A. R. Mosher, President of the Canadian Congress of Labour, on August 10, 1950, called for full support by all trade unionists for the decisions and actions of the United Nations Security Council to meet the Korean situation and restore world peace.

"We are pleased to see that free trade unionists throughout the world have taken the same position, and that the free nations of the world have thrown in their lot with the United Nations in the effort to preserve international law and order," the labour leaders said.

The statement said that labour "fervently desires peace," as its objective, but warned against those who "attached themselves to trade unions . . . to pose as the only friends of peace and as such the only qualified leaders of the organized workers of our country. . . . However incredible it may seem," the statement continued, "these are the very people who are in favour of the armed attack upon South Korea."

"This duplicity," the two labour leaders said, "—this campaign in favour of peace on the one hand and armed aggression on the other—must be exposed. The people who are promoting this campaign should be recognized for what they are.

"The activities of Communists and Communist sympathizers have never been sincere efforts to improve the position of working people. They have been designed in the past solely to further the interests of the Communist Party. Today these willing dupes are attempting to sow confusion among union members. . . ."

In contrast with "the steps taken by our own country, Britain, the United States and other members of the United Nations . . . to restore peace in Korea and uphold the dignity and authority of international law," the statement charged that "Communists and persons of like minds in our own country are asking our members and others to sign the phoney Stockholm Peace Pledge and to pass 'ban the A-Bomb' resolutions, hoping to keep us disarmed and leave Soviet Russia free to move in on any country whenever it suits their purpose.

"Dictatorship wherever it exists is the foe of trade unions. Dictators, whether they are fascist or communist, are intent upon world domination. They know no goal but unlimited power. They know no method of accomplishing this end but armed force and enslavement of conquered peoples.

"We as unionists know the value of peace, of freedom, and of democracy. We also know that there are times when these things have to be fought for. There can no longer be any doubt that that time has come around again."

The attitude of the Canadian labour congresses is similar to that of the American Federation of Labour and the Congress of Industrial Organizations in the United States, and the International Confederation of Free Trade Unions. A statement issued by the ICFTU urged the 50 million workers affiliated with it to uphold its stand that the war in Korea was Communist inspired and that "there is no justification for armed aggression in defiance of the United Nations."

Almost ten million jobs filled through Employment Service A total of 9,635,796 jobs had been found and filled by workers recruited by the National Employment Service in the nine-year period from July 1, 1941 (when it commenced operations), to June 29, 1950, it was announced recently by Hon. Milton F. Gregg, Minister of Labour.

The Minister made this announcement in drawing attention to the tenth anniversary of the Unemployment Insurance Act of 1940.

By the end of July, 1950, the balance in the Unemployment Insurance Fund was \$593,265,064. In the ten years the plan has been in operation \$289,384,612 had been paid out in benefits to unemployed persons up to July 31, 1950. Today there is general recognition that unemployment insurance is the strongest bulwark against unemployment, stated the Minister.

Commenting on the extension of the Commission's services to meet specific needs, the Minister said that a few years after commencement of operations it was realized that the National Employment Service, with its coast-to-coast manpower coverage, was in a position to locate key men and women for employers requiring executives and specialists, and for executive and professional personnel seeking new opportunities. In order to carry out this phase of placement operations with the utmost efficiency, a special division of the service was inaugurated to specialize on these placements. Accordingly, in August, 1945, the Executive and Professional Division began operating. In the five-year period since its inception this division has made 16,134 placements of professional or executive personnel. Of this total, 6,189 were ex-service men or women of World Wars I and II. A particular phase of the work of this division is the placement of university graduates and undergraduates each spring.

From wartime experience special efforts were found necessary for certain classes of job applicants. As a result, in September, 1945, the National Employment Service opened another division of its service, the Special Placements Division, which was designed to specialize in the placement of workers who were difficult to place due to handicaps such as physical disability, advancing age, and youthful inexperience. This division had made a total of 63,231 placements in the period from its commencement to July 14, 1950. Of this total, 47,505 were placements for men, and 15,726 were for women. Included in this total were many persons suffering from such physical disabilities as: blindness, deafness, defective vision, paralysis, heart ailments, rheumatism, amputations, lung and stomach ailments, and many other disorders.

In December, 1947, a Counselling Service was established in Toronto to deal specifically with unemployed workers in the "over-45-year-old" group. This service was designed on an experimental basis with the object of helping unemployed older workers become re-established in satisfactory employment. The counselling was based on a thorough study of the applicant's experience, personality, abilities, and hobbies. An attempt was then made to assess those qualities which offered the greatest chance of being used in commercial or industrial life. Quite frequently counselling led to an applicant discovering he had a marketable skill or ability he was not previously aware of possessing. This usually resulted in a renewal of self-confidence which in many cases enabled the applicant to go out and

find himself a suitable job. The lessons learned, and the principles established have since been used by all local offices of the National Employment Service.

**Placement of
university
graduates
in 1950**

In reviewing a report of the Executive and Professional Division of the National Employment Service on the placement of university graduates and undergraduates in 1950, Hon. Milton F. Gregg, Minister of Labour, paid tribute to the employers of Canada for their co-operation in seeing that the large class of 1950 was properly absorbed in gainful occupations.

The Minister stated that of the 17,000 graduates this year only 925 were still registered as unplaced with the National Employment Service on August 1. Many of these were not unemployed, but had taken temporary jobs while awaiting openings that would offer a career in their chosen professions, he explained.

"When one considers that the graduating class of 17,000 was one of the largest on record due to veteran enrolment, it is a tribute to the employers of Canada that only 925 remained to be suitably placed," declared Mr. Gregg.

The report showed that, of the total of 17,000 in the graduating class, about 8,500 were in the following categories: those going on to post-graduate work or colleges of education; those entering professions such as medicine, dentistry, law, theology, and the Armed Services; and those co-eds who were not seeking employment. Of the remaining 8,500, about 2,500 had employment arranged before graduation, or had found a job by their own efforts, while the remaining 6,000 had registered for jobs with the National Employment Service.

In addition to the graduating class, about 12,000 undergraduates, had registered for summer employment with the National Employment Service. By August 1 practically all who wanted work had been employed, although some were not doing the work they most desired.

The Minister pointed out that the worsening of employment conditions which occurred during last autumn and winter had occasioned some fears that difficulty might arise in finding employment for such a large class this spring. The large class of 1949 had been absorbed because there had been a backlog of opportunities still carried over from the immediate post-war years. This backlog had almost entirely been taken care of before the 1950 class came on the employment market. "However," he said, "I am happy to report that

this year's campaign has been highly successful, and has reached the expectations of all concerned."

This year's report showed that the successful outcome of the co-operation between employers and placement officials was the result of careful planning. As in previous years a detailed campaign was conducted beginning with a letter to a selected list of 9,000 firms who were deemed most likely to be interested in hiring university students. These letters were mailed last December. In addition to these letters from the Minister all employment officials were asked to bring the subject to the attention of employers and to urge that they submit their requirements as early as possible, and later a publicity campaign through the press was conducted. From all these efforts, and the co-operation of employers, information was received concerning 5,000 openings for graduates and nearly 14,000 for undergraduates.

Workers and families brought to Canada

A total of 4,489 workers with their families, consisting of 13,067 individuals, were included among the 41,000 workers who had been brought to Canada in the three-year period between June, 1947 and June, 1950, it was announced recently by Arthur MacNamara, Deputy Minister of Labour.

These figures covered only those families which came to this country as a unit and did not include families where the worker was joined by his dependents after his arrival in Canada, the Deputy Minister explained.

Mr. MacNamara pointed out that a two-fold purpose had been achieved by the admission of these new Canadians. A demand for much needed help in certain fields had been partially satisfied, and a new life, new opportunities and restored hope had been granted to many thousands of the unfortunate victims of Nazi aggression.

The vast majority of these people were brought to Canada from Displaced Persons camps, under the auspices of the International Refugee Organization which provided ocean transportation, stated the Deputy Minister.

All the members of the various families who were classified as workers signed agreements with the Department of Labour to work in specified occupations for definite periods, usually a year, Mr. MacNamara said.

The largest group, consisting of 1,294 families made up of 3,644 persons, were employed in the clothing industry as garment workers. A second large group were employed in agriculture. There were some families especially selected for farm work who are available for immediate employment.

Included in the total figures were 643 married couples without children who were employed as couples in domestic work. Also included in the total were 203 widows with 435 children. Many of these women were employed as domestics.

Release of film on problems of older workers

Hon. Milton F. Gregg, Minister of Labour, announced recently that a film on the problems of employment for the older worker entitled "Date of Birth" had been released for showings at meetings of service clubs, boards of trade and chambers of commerce, trade unions, and conventions, and to representative employer and employee groups in all major communities.

"Date of Birth" was filmed for the Department of Labour by the National Film Board and will be circulated by local office managers of the National Employment Service in co-operation with the field officers of the Film Board.

The problem of the older worker and employment is now generally recognized in Canada as a national problem not to be resolved in the near future—in some ways likely to become more difficult of solution as the consistent advance of medical science increases longevity, explained Mr. Gregg.

During the post-war years the Dominion Department of Labour, in co-operation with the National Employment Service and the Department of Veterans Affairs, has attempted an educational campaign designed to bring the facts and effects of the problem before the greatest number of responsible citizens. As no immediate solution is available, the important conclusion arrived at from the studies made by the Department and others is that as many as possible older workers must continue in gainful employment as long as possible, the Minister pointed out.

The film "Date of Birth" was designed to bring before employers and responsible citizens the true facts concerning older workers—their desirable qualities as workers, and the economic necessity of keeping employed this important segment of our population which numbers about one-third of our entire working force, said Mr. Gregg.

Death of F. A. Acland, former Deputy Minister of Labour Another link with the early years of the Department of Labour was severed by the death of Frederick Albert Acland at his home in Ottawa on September 2.

Mr. Acland was born in Bridgewater, England in 1861. Prior to coming to Canada in 1883 he had gained considerable experience as a newspaper man and in the publishing business. His first position in Canada was on the staff of the Toronto *Globe*. In 1885, he went to the United States and for the next two years worked on newspapers in a number of American cities. He then returned to Toronto as City Editor, and a little later as News Editor of *The Globe*. With the exception of two years spent in England, he continued with *The Globe* until 1907. It was while he was News Editor that he employed Mr. Mackenzie King, then a young university student, as a cub reporter. By a twist of circumstance some ten years later, Mr. King, who had been made Canada's first Deputy Minister of Labour in 1900, prevailed upon Mr. Acland to give up newspaper work and to accept the position of Secretary of the Department.

In 1908, Mr. King resigned from the Deputy Ministership to enter active political life and Mr. Acland was appointed to succeed him, continuing to serve as the administrative head of the Department until 1923. He had considerable success as a conciliator in labour-management disputes and at various times during his tenure of office, he represented Canada at international labour conferences in Paris, Geneva, London and Copenhagen.

In 1921, Mr. Acland was made King's Printer for Canada, and continued in this post after leaving the Labour Department, until 1933, when he retired. During his 26 years in the Civil Service—17 years with the Department of Labour and nine years as King's Printer, under the Secretary of State—Mr. Acland served under 16 different Ministers of the Crown.

Mr. Acland contributed an article of reminiscences which was published in the September (Anniversary) issue of the *LABOUR GAZETTE*.

Organization of trade union film committee Organization of a National Trade Union Film Committee has been announced. Its purpose will be to make available to all trade unions in Canada films and film strips suited for union use. At a meeting of the Committee held in the offices of the Canadian Film Institute, Ottawa, on

August 22, 1950, officers were appointed and a statement of policy drawn up.

Gordon G. Cushing, National Secretary-Treasurer of the Trades and Labour Congress of Canada was elected as first chairman of the Committee. He will be succeeded in subsequent periods of the year by representatives of the Canadian Congress of Labour and the Canadian and Catholic Confederation of Labour.

The Secretary-Treasurer of the Committee will be J. R. Kidd, Associate Director of the Canadian Association for Adult Education.

Other members of the Committee are: Gérard Pelletier, Editor, and Fernand Jolicoeur, Educational Director, of the Canadian and Catholic Confederation of Labour; Jack Williams, Director of Public Relations, and A. Andras, Assistant Research Director, of the Canadian Congress of Labour; L. E. Wismer, Director of Public Relations of the Trades and Labour Congress of Canada; Charles Marshall, Co-ordinator of Non-Theatrical Films of the National Film Board; and Gordon Adamson, Executive Secretary of the Canadian Film Institute. G. R. Carroll of the Industrial Relations Branch of the Department of Labour was present on invitation as an observer.

The National Trade Union Film Committee will work on the following program:—

1. Procurement of suitable labour films, produced inside or outside Canada;
2. Evaluation of labour films;
3. Encouragement and advice in the production of films and filmstrips suitable for use by organized labour;
4. Promotion of the distribution of such films and filmstrips;
5. Development of effective use of such films;
6. Provision of information and a clearing house on all aspects of the foregoing.

Labour bodies ask reimposition of price controls

During August the Canadian Congress of Labour and the Trades and Labour Congress of Canada both urged the reimposition of price controls in Canada.

A letter to the Prime Minister from Pat Conroy, Secretary-Treasurer of the CCL, said in part: "Recently a substantial number of our unions decided to forego wage increases of a direct nature with a view to bringing about stability in our economic relationships. This, of course, cannot be expected to continue, and labour cannot be asked to subject itself to either

a voluntary or an official wage control, if such control measures are introduced with price controls during a period when high prices continue to increase as they have been doing for many months.

"The most important consideration, however, in terms of the welfare of Canada is that because of the acute international situation, national security for Canada and Canadians must be ensured by adequate measures in the economic and military spheres. In the present circumstances the two fields are indivisible, and if we expect the Canadian people to stand behind the Government in a wholehearted fashion, it is important that the interests of the people at home be protected, as well as the interests of those who are now being subjected to brutal Communist aggression in Korea and elsewhere."

The views of the Trades and Labour Congress were put before the Committee, headed by Mr. Justice J. H. MacQuarrie, to study the Combines Investigation Act, by President Percy R. Bengough.

"Wages are now largely set by free negotiations," Mr. Bengough pointed out, "and, as a part of the contract between management and employees, are known usually a year in advance. There is no sound reason why prices could not be established for as long a period. Nothing would do more to stabilize our economy and to safeguard it."

Casual stevedoring in N.W. Territories now excepted employment

In its report to the Senate shortly before the prorogation of Parliament in June, the Special Committee of the Senate on Human Rights and Fundamental Freedoms recommended that Canada have a Declaration

have to be delayed until after decisions had been reached regarding the dividing lines between federal and provincial jurisdiction at the Dominion-Provincial Conferences in the autumn.

The LABOUR GAZETTE carried an article on the presentation of briefs by Canada's two leading labour organizations to the Senate Committee in the July issue, pp. 1004-1010. A summary of the findings and recommendations in the Committee report will appear in next month's LABOUR GAZETTE.

Private and public investment forecast for 1950

Capital expenditures of Canadian business and governments in 1950 on new construction, machinery and equipment are expected to be about \$105 million higher than the estimate of \$3,596 million announced earlier this year (L.G., June, 1950, p. 807). This information has been released by the Department of Trade and Commerce in a brief report announcing the results of a mid-year sample survey of investment in 1950.

The new figure of \$3,701 million is three per cent higher than the earlier estimate for 1950 and eight per cent above total capital outlays in 1949. The new estimate for construction is \$2,355 million, up 13 per cent over 1949, while estimated machinery and equipment expenditures of \$1,346 million are practically unchanged from the 1949 figure.

Investment by private business accounts for most of the increase over the earlier forecast. Manufacturing is up \$50 million, largely as a result of increases in the industries producing wood products, paper products, transportation equipment and non-metallic minerals. Mining is up \$20 million, the construction industry \$9 million and commercial services \$10 million.

About two-thirds of the increase over the first 1950 estimate of total capital expenditures is for machinery and equipment and the balance for construction. Machinery and equipment expenditures have increased by \$69 million while those for construction are up \$36 million. The forecast for residential housing construction has increased by \$23 million over the earlier estimate for 1950, mainly because of the high level of building activity and an anticipated increase in building costs.

The announcement points out that changes which occurred are not necessarily a result of real changes in investment intentions. Many of the revisions from the earlier forecast, which was based on surveys made in December, 1949, occur simply as a result of the fact that more complete information is now available.

Union's right to negotiate under Quebec Collective Agreement Act

A recent arbitration award in the dispute between LaSalle Slippers Manufacturing Company and The Shoe Workers' Syndicate of Montreal Inc., contained a decision on the union's right to negotiate, when a decree under the Quebec Collective Agreement Act is in existence.

The parties were members of associations whose previous collective agreement had been the basis of decree 3003 (L.G., Jan., 1950, p. 77).

The employer's counsel argued that the existence of the decree relieved the employer from the obligation to negotiate even with a certified bargaining agent, on the items with which the decree dealt.

Secondly, the employer claimed that the collective agreement between the Quebec Shoe Manufacturers' Association and the National Federation of Leather and Shoe Workers of Canada should be binding also on all member associations, leaving no opening for any further particular collective agreements between members of the two associations.

The president of the board of arbitration cited sections of the Collective Agreement Act, which provide that a contract for a higher wage rate than that set by the decree is valid and lawful.

These sections show, the president said, that the legislators intended to give freedom to the parties in attempting to attain more favourable working conditions, the rates of the decree being minimum rates.

To admit the second argument of the employer's counsel would mean that no collective agreement could be reached between employers and employees within the shoe industry, and in general in classes of industries governed by a decree.

A similar objection was ruled out by an arbitration board's decision of March 30, 1950, in the dispute between J. C. Wilson Ltd., and "L'Union des travailleurs du carton et papier façonnés", the opinion of the employer's counsel being that when a decree was in existence, no union could act on behalf of the employees to secure more favourable working conditions. The employer argued that an individual, but not a group of individuals, may lawfully seek a contract for wages more favourable than those provided in the decree.

In both cases it was stressed by the arbitration board that a collective agreement used as a basis for a decree was not binding on any third parties, because the decree is the binding machinery, and its life is distinct from the life of the collective agreement from which it originated.

Labour legislation handbook for union stewards

The Ontario Federation of Labour, affiliated with the Canadian Congress of Labour, has recently issued *Stewards' Handbook on Labour Legislation*. Considered by the Federation as "something of an innovation in the Canadian labour movement," the booklet brings together, in digest form, most of the labour legislation affecting workers in Ontario. It also emphasizes the "practical steps a worker must take to secure the implementation" of labour statutes. The latter, which are covered by the booklet, are the Workmen's Compensation Act, the Hours of Work and Vacations with Pay Act, the Factory, Shop and Office Building Act, the Minimum Wage Act, the Labour Relations Act and the Unemployment Insurance Act.

World-wide organization of teachers to be founded

The formation of a world-wide teachers' organization to include teachers from all but Communist-dominated countries was the principal topic for discussion at the fourth delegate assembly of the World Organization of the Teaching Profession.

Two hundred and fifty educators from 26 countries met in Ottawa from July 17 to 22 and adopted a draft constitution for the proposed confederation.

Known at present as the World Confederation of the Teaching Profession, the proposed group is intended to amalgamate the World Organization of the Teaching Profession, with 2,000,000 members, and two smaller European organizations. The latter, which have a combined membership of about 750,000, are the International Federation of Elementary School Teachers and the International Federation of Secondary School Teachers.

In November, the three organizations will send representatives to Paris where final arrangements for the new federation are to be made. With the creation of the new and larger group, the earlier organization will dissolve.

Founded in 1946, the World Organization of the Teaching Profession has striven throughout its four years to raise the status of teachers and to promote peace by international co-operation in education.

In an address to the delegates, George G. Croskery, secretary-treasurer of the Canadian Teachers' Federation, stated that federal aid to education is one of the main objectives of Canadian teachers.

Dr. W. F. Russell, president of the World Organization of the Teaching Profession, is also president of the Columbia University Teachers' College.

**Quebec
Statistical
Year Book
for 1949
issued**

The Bureau of Statistics, Province of Quebec, has recently distributed the 1949 edition of the Statistical Year Book. The thirty-fourth issue to date, the year book contains the latest figures available at the time each chapter was drafted. Among other subjects, the book contains a chapter on labour, including sections on the Quebec Department of Labour's work regarding juridical extension of collective agreements, the minimum wage commission, apprenticeship, the Quebec Labour Relations Board and labour accidents; other sections concern trade unions, strikes and lockouts and unemployment insurance. The publication, which is 591 pages, carries all information in English and French.

**Progress of
British coal
industry in
1949**

In 1949, the British coal industry's third year under public ownership, production exceeded the previous year's figure by five million tons. The total output of saleable coal was 215 million tons, just reaching the production target set of 215 to 220 million.

The National Coal Board, in its annual report for 1949, recently published by H.M. Stationery Office, attributes the increase mainly to technical improvements, greater output per man-shift at the coal face, and an increased number of faceworkers.

The financial results of the collieries and other activities showed a surplus of £9.5 million, compared with £1.7 million in 1948.

Lower production costs resulted in a saving of about £5 million. Wages costs and charges decreased mainly owing to the rise in output per man-shift. Miners' earnings increased, largely because of the piece-rate system, on an average by 1s.2d. a shift as productivity improved.

Absenteeism continued to give the Board concern. In 1949 it rose to 12.34 per cent from the 1948 figure of 11.55. Output per man-year, which had fallen to 246 tons in 1945, reached 282 tons in 1949, but was less than the 1938 figure of 290 tons, when absenteeism was only 6.44 per cent. Output per man-shift rose from 1.11 tons in 1948 to 1.16 in 1949.

Recruitment was less in 1949 than was hoped for; wastage increased, with the net result that, instead of the increase in manpower of 10,000 aimed at, there was a

decrease of 16,000. One of the main obstacles to recruitment of workers and transfer of mineworkers to the more productive coalfields was the shortage of housing accommodation. Some 15,000 houses were built and let to miners by local authorities and others during the year, but this was about 6,700 less than in 1948.

To encourage the recruitment of boys, and to improve the standard of technical knowledge and skill in the industry, a "ladder plan" was worked out during the year to ensure for young recruits a chance of systematic training for a career. The plan is expected to be in operation by October of this year.

More than 1,600 strikes and "go-slows" occurred during the year, all unofficial, and the resultant loss of coal is estimated at one-and-a-half million tons. Three big strikes were responsible for more than half the loss: one arose out of a dispute in Lancashire over "concessionary coal"; another from a wages and conditions claim lodged by the Colliery Winders' Federation of Great Britain—a union composed mainly of elements which had broken away from the NUM; and the third from a wage demand of "oncost" workers in certain areas.

Not only was slightly more time lost in 1949 through industrial disputes, but fewer overtime shifts were worked, particularly on Saturday mornings.

Accidents were lower than those recorded in the previous year; 460 deaths occurred and 2,200 serious injuries. The main cause continued to be falls of roof. During the year the Board continued to develop safety and health measures and extended its campaign for suppressing dust. By the end of 1949 pit-head baths were available for 460,000 men and more were in course of construction. Canteens were available at most pits.

**Safety
in mines
research in
Great Britain,
1948**

With the nationalization of Great Britain's coal industry in 1946, the Minister of Fuel and Power became responsible for research into methods for advancing the safety and health of miners. Progress in this work in 1948 is reviewed in the 27th Annual Report on Safety in Mines Research, published by H.M. Stationery Office.

During the year the main emphasis was on explosion control, and the report notes that in 1948 the number of deaths caused by explosions of firedamp (nine) was the lowest figure on record and that, while complete immunity has not yet been

achieved, there is no doubt that the scientific study of the causes of explosions and remedies has greatly reduced the seriousness of this hazard.

In addition to the general review of progress, the report gives more detailed accounts of research relating to coal dust explosions; mine gases; mining explosives and shotfiring; haulage, winding and wire ropes; metallurgical examination of broken and defective mine gear; supports at the coal face; dust investigation (fire hazard); testing of flame-proof and other mining equipment; and the design and development of apparatus.

The appendices contain a list of reports on research under the Safety in Mines Research and Testing Branch published during 1948, and particulars of instructional aids prepared by the Branch. Also included is a report by British delegates to the Fifth International Conference of Directors of Safety in Mines Research Stations, held in Pittsburgh, Penn., in September, 1948.

Progress towards AFL-CIO unity

Meeting in Washington on July 25 and 26, representatives of the American Federation of Labour and the Congress of Industrial Organizations continued their efforts to bring about a closer relationship between the two organizations. (L.G., April, 1950, p. 436; May, p. 613; June, p. 798).

It was agreed that at a future meeting, a chairman and secretary would be elected, and consideration would be given to the problems of jurisdictional disputes and organic unity in the labour movement.

For the immediate future, the AFL and CIO would continue to work together in the field of international relations, legislation and political action, and would oppose communist aggression and infiltration.

The AFL was represented by: President William Green; Daniel J. Tobin, International Brotherhood of Teamsters; and Daniel Tracy, International Brotherhood of Electrical Workers.

The CIO delegation was led by Vice-President Allan S. Haywood in the absence through illness of President Philip Murray, and included: Secretary-Treasurer James B. Carey; Joseph Curran, National Maritime Union; Walter Reuther, United Automobile Workers; Emil Rieve, Textile Workers' Union of America; and Frank Rosenblum, Amalgamated Clothing Workers of America.

The following joint statement was issued by the group on July 25:—

"We conducted a very friendly, co-operative and encouragingly constructive

conversation of an exploratory nature. We discussed many phases of this whole problem of the achievement of labour unity.

"We recognized the serious threat to world peace and to our country as a result of communist aggression. We vowed our complete determination to give full and united support to our government in this time of crisis. Labour in America is completely united against communist aggression and infiltration.

"The AFL-CIO unity committee, after examining our mutual problems, determined that:—

"1. We will continue to work together in the field of international relations, through the International Confederation of Free Trade Unions, as a means of strengthening democracy throughout the world.

"2. We will work together in the fields of legislation and political action, to insure the continued strengthening of our American democratic institutions.

"Following this meeting another meeting will be held at which time we will elect a chairman and secretary of this AFL-CIO unity committee, and give consideration to (1) establishing practical machinery to handle problems of jurisdictional disputes and raiding affecting unions of our two organizations, and (2) considering specific proposals for organic unity in the American labour movement."

Labour legislation in U.S.A., 1949

Improvements in workmen's compensation laws were achieved by 44 States and Hawaii during their 1949 legislative sessions, according to the Annual Digest of State and Federal Labour Legislation issued recently by the United States Labour Department's Bureau of Labour Standards.

Other important developments included the repeal or modification of acts restricting union activities; improvements in the unemployment insurance laws of over half the States; the establishment of separate agencies for the enforcement of labour laws; the adoption of statutory minimum wage rates for all workers; and the enactment of laws in several States relating to safer working conditions for employees. Advances were also made in the field of protective legislation for women and children.

Laws under which women must be paid the same rates as men for comparable work were passed in four states, making thirteen jurisdictions now having equal pay laws.

The most significant Federal legislation was the amendment to the Fair Labour Standards Act, including a provision increasing the statutory minimum wage to

75 cents an hour, and the amendment to the Federal Employees' Compensation Act liberalizing many of its provisions.

Analysis of salaries of women in U.S. Federal Service

Not more than 14 per cent of all women in the United States Civil Service receive salaries of \$3,000 or more, it is estimated by the Women's Bureau of the U.S. Department of Labour.

This estimate is based on a group study of 730 women in the upper-salary levels, recently completed by the Bureau, as part of a general study of women employed in the Federal Service.

The women in the Federal Service who have advanced to the higher-salaried occupations usually have not done so in earliest youth, it is shown. Of the 724 women in the study for whom reports on age were available, about three-fourths were 40 years of age or older; over a third were 50 or more. The wartime and post-war periods, however, gave the younger women more chances of advancement than before. The older woman appears to have a better opportunity in the professional classification rather than in the clerical or administrative.

The salary grades of the group studied—those receiving \$3,000 or more a year—fell roughly into thirds: about one-third were in the \$4,600 to \$5,400 range; one-third were below, and the remaining third above. Thirty-two received salaries of \$8,000 or more, and ten more than \$9,000, of whom four received as much as \$10,000.

The Women's Bureau noted that eight per cent of male Federal employees had salaries as high as \$8,000, as against less than one-tenth of one per cent for women employees.

The great majority of the women in the upper-salaried occupations began receiving their last-recorded salaries either during or after the war. Three-fourths of the 72 women with salaries of \$7,000 or more reached this level after the war. Over a fourth of the total group had 20 years or more of Government experience before reaching these salaries.

Most of the women had attended college; two-thirds had college degrees and over a third more than one degree. Only a sixth of the total had never attended college. In most instances, those receiving top salaries had had considerable and specialized training, with long periods of experience before entering the Government service.

The 730 women fell into two group classifications; 401 were classified as professional-scientific and 329 as clerical-administrative-fiscal. A classification by occupation showed that, in numbers, economists lead, with attorneys next, then social welfare workers, followed, in numerical order, by scientists; research workers; home economists; physicians, nurses and health specialists; educational workers; librarians; statisticians; and, lastly, editors and special writers.

ILO training scheme in India

According to the India Information Office, a scheme of "training within industry" is to be started in Delhi and Bombay under the auspices of the International

Labour Organization. The aim of the scheme is to increase the effectiveness of supervisors, managers, and other personnel employed in industries. The scheme will later be extended to other countries in Asia.

Continued from Page 1622

and management. At the present time, some unions, among them two locals of the United Automobile Workers have asked for the re-opening of the wage clauses in the long-term collective agreements just recently signed. In one case, there have been a number of wildcat strikes as a protest against the present wage rates.

IN BRIEF . . .

The cost-of-living index rose 1.3 points to 169.8 between August 1 and September 1, 1950. This compared with a level of 162.3 for September, 1949 and 161.0 for January, 1950 . . . On August 1, the index of payrolls in eight leading industries reached the highest point on record, and was 7.7 per cent above that of August 1 last year . . . Exports to the United States during August were valued at \$167,148,000, up nearly 45 per cent from last year's corresponding total of \$115,353,000 . . . New motor vehicle sales in August continued well above the 1949 level. There were 32,371 new vehicles sold in August, as compared with 18,561 in August last year.

LABOUR ORGANIZATION IN CANADA, 1949*

During 1949 Canadian membership in trade unions for the first time exceeded the million mark. Over 28,000 new members were enrolled during the year.

Canadian trade unions continued to increase in membership during 1949.

About one out of every three non-agricultural wage and salary workers in Canada is a union member. According to the annual survey by the Economics and Research Branch of the Department of Labour there were 1,005,639 union members at December 31, 1949, the highest recorded and almost three times the pre-war level (see Table I). Over 28,000 new members were added to the ranks of organized labour in Canada during the year. Inclusion of Newfoundland unions in the survey for the first time accounted for about 24,000 among the total membership.

More than eighty-five per cent of union members were in unions affiliated with a central labour congress. The Trades and

Labour Congress of Canada registered a gain in membership during the past year. Some decline took place in the total affiliation of the Canadian Congress of Labour. This resulted from the expulsion of certain unions from the Congress and was, in part, offset by increases in certain of the affiliated unions. The membership of trade unions by congress affiliation is shown in Table II.

The foregoing figures are based on information obtained from the headquarters of the unions. The second survey at the level of the local union covered about ninety per cent of membership and from the information supplied, estimates of the geographical, industrial and sex distributions of union memberships have been made.

TABLE I.—LOCAL UNIONS AND UNION MEMBERSHIP IN CANADA, 1911-1949

Year	Locals	Membership		Year	Locals	Membership	
		Number	Percentage change from previous year			Number	Percentage change from previous year

Unaffiliated local unions.....	39	61	4,346	16,673
	5,114	5,268	977,594	1,005,639

(1) Including one international union: The International Association of Machinists.

(2) Including one international union: The United Mine Workers of America.

(3) The 56 local or federal unions with 5,420 members which received their charters directly from the A.F.L. are included under A.F.L. and T.L.C. above as they are also affiliated with the T.L.C. The totals of all unions in Canada affiliated with the American Federation of Labour are the sum of these unions and the A.F.L.-T.L.C. unions, a total membership of 368,799 in 1949.

(4) The totals of all unions in Canada affiliated with the Congress of Industrial Organizations are the sum of these unions and the C.I.O.-C.C.L. unions, a total membership of 230,743 in 1949.

(5) The membership shown is for the affiliated unions which reported their membership to the Department.

Geographically, more than half the members continued to be in the provinces of Ontario and Quebec, with British Columbia locals having the next largest membership. The order by size of the remaining provinces is Manitoba, Alberta, Nova Scotia, Saskatchewan, Newfoundland, New Brunswick and Prince Edward Island.

Industrially, over 40 per cent of the union members were in the manufacturing industries as shown in Table III. Transportation continued to have the second largest membership, a large proportion of the workers in the industry being organized.

The number of female members reported was in advance of the 1948 figure. Some 93,000 in 1,433 locals were indicated in the 1949 survey. More than two-thirds of this number were located in Ontario and Quebec.

By city the survey indicated 56 urban communities with a membership of 2,500 or more. The list contains all the cities in Canada with a population of 50,000 or more and many smaller communities. The larger metropolitan areas of the country, such as Montreal and Toronto, of course, have the largest memberships.

The thirty-ninth edition of Labour Organization in Canada also contains in addition to further material on the subjects mentioned above, an historical sketch of trade union development, directories of active unions and of delegate organizations, their memberships and officers as well as a list of trade union publications.

* This article is an advance statement, dealing with the *Thirty-Ninth Annual Report on Labour Organization in Canada*, soon to be released by the Department of Labour.

POLICY OF UNEMPLOYMENT INSURANCE COMMISSION AGAINST EMPLOYMENT DISCRIMINATION

In the June issue of the LABOUR GAZETTE appeared an article entitled "Special Functions of the National Employment Service". This article dealt at some length with the work of the National Employment Service of the Unemployment Insurance Commission on behalf of handicapped persons, "first-jobbers", etc. It is felt that the following brief review by the Unemployment Insurance Commission of its attitude and practice with reference to discrimination of any kind against applicants might be of interest.

Under the authority of the Unemployment Insurance Act, the Unemployment Insurance Commission performs two important functions. First, it administers an employment service, national in its scope and responsible for all activities associated with filling employers' orders for workers and placing unemployed persons in suitable employment. Second, it operates a program of unemployment insurance. The Commission fixes the policy and issues the instructions which must be obeyed in its offices scattered across the breadth of Canada from St. John's, Nfld. to Victoria, B.C. There are more than 200 of these local offices in the five regions into which Canada is divided for administrative purposes.

The instructions given to all offices in respect to discrimination, are simple and direct. They read as follows:—

"No applicant seeking work will be discriminated in favour of, nor against, by reason:

(a) of his or her racial origin, religious belief or political affiliation;

(b) of whether or not he or she was engaged previously in insured employment or is a claimant for insurance benefit."

In addition it is provided that no discrimination may be exercised in favour of any friend or relative of any officer. Emphasis is directed to the fact that competence to perform the duties of the job must be given equal consideration when the vacancy is being filled. Whether the applicant is an insured person or not will have no bearing on his selection or non-selection.

Thus it will be seen that discrimination is expressly forbidden in the operations of the National Employment Service. The

function of the National Employment Service is to try to fill the employers' vacancies with the most suitable applicant regardless of race, creed or political affiliation.

The National Employment Service is constantly receiving orders from employers for workers to fill a wide variety of vacancies. Employers are, of course, free to specify the type of employees which they require. Indeed it is essential that they furnish the National Employment Service with sufficient information about their requirements and the nature of the position to be filled to enable the intelligent selection of applicants for referral. Then it becomes the function of the National Employment Service to try to satisfy the employer consistent with obedience to the general policies and instructions formulated by the Commission.

* * *

According to the Ninth Annual Report of the Unemployment Insurance Commission, covering the fiscal year ending March 31, 1950, employment suitable to their physical capacities was found for approximately 11,300 handicapped workers through the special placement facilities provided by the Employment Service. Of this number some 8,200 were men and 3,100 women. More than 4,000 of the males were disabled ex-service men, while 79 disabled ex-service women were among the females placed.

"Placement of handicapped workers offers a two-fold problem", the Report states. "The reluctance of employers to engage handicapped persons must be overcome and the capacities of workers must be carefully matched with physical requirements of jobs so that physical disabilities will not mean economic impairment."

THE RAILWAY STRIKE OF 1950

The following article describes the unsuccessful attempts to avoid the railway strike of 1950, reviews the debate in Parliament on the Bill introduced by the Government to deal with the emergency, and gives the text of the legislation which was adopted.

Canada's first nation-wide railway strike occurred on August 22, 1950, when the last of a series of attempts to mediate the differences between two groups of labour organizations representing some 125,000 non-operating railway employees and the managements of the principal Canadian railways failed to resolve their dispute over demands of the employees for wage increases, introduction of the five-day 40-hour week and other concessions, and over proposals of the railways for a ten-point revision in working rules in order to facilitate a "fair and economical" introduction of a shorter work-week.

Notwithstanding the fact that the operating crews of trains were not involved in the dispute, the strike halted practically all railway transportation within the country and also tied up telegraph services, some of the water transport services of the two major railway systems, and all hotels operated by the Canadian National Railways.

On the same day that the work stoppage began, the Prime Minister, Rt. Hon. Louis S. St. Laurent, announced that Parliament was being summoned to meet as quickly as possible to deal with the serious emergency created by the strike. The session of Parliament commenced on August 29, 1950, and, by suspension of the standing orders of the House of Commons, the Prime Minister immediately introduced Bill No. 1, entitled "An Act to provide for the Resumption of Operations of Railways and for the Settlement of the Existing Dispute with respect to Terms and Conditions of Employment between Railway Companies and their Employees". The special legislation in its preamble recognized that the vital interests of the people of Canada and the welfare and security of the nation were imperilled by the suspension of railway operations, particularly in the light of existing international conditions.

One provision required that, within forty-eight hours after the commencement of the Act, every railway company affected should resume operations and every

employee on strike should return to his duties. The Bill also established provisional terms and conditions of work for the employees and for the final adjustment of same. As part of the interim settlement, all employees affected, including railway hotel employees and water transport employees, were guaranteed an immediate increase in wage rates of four cents per hour. It was also provided that the parties to the dispute should have a period in which to resume negotiations, and that if agreements were not reached between them by such means, all issues still in dispute should be determined by arbitration, with the Governor in Council appointing the arbitrator if the parties were unable to agree upon the choice of a person to act in that capacity.

A government-sponsored amendment to the Bill, adopted during the course of debate in the House of Commons, provided that the arbitrator should decide any matter within the limits of the proposals made by the railway companies and the unions at the time negotiations were terminated between them prior to the commencement of the Act, or such proposals as were made by them afterwards, which had the effect of narrowing the limits of disagreement. This had the effect of ensuring the introduction of the five-day 40-hour week not later than September 1, 1951.

The Bill, cited as The Maintenance of Railway Operation Act, was explained to the members of the House of Commons at a sitting on Tuesday evening, August 29, by the Prime Minister and the Minister of Labour. Debate on it commenced at 11 a.m. on August 30, when it was unanimously agreed that until the Bill was disposed of, the House would sit that day without intermission. Second and third readings were given to the Bill and the House was able to suspend its sitting at 7.15 p.m. It resumed at 9.30 p.m. and members were called to the Senate Chamber at 9.45 p.m., to which the Hon. Mr. Justice Kerwin, as Deputy of His Excellency the Governor General, pro-

ceeded for the purpose of granting Royal Assent, which was given at 9.56 o'clock. On being returned, the House adjourned at 10.05 p.m.

At 10.15 p.m., nineteen minutes after The Maintenance of Railway Operation Act became law, leaders of the two union groups directed all striking workers of the railways and their ancillary services to return to work as soon as possible. The initial order was made in a trans-Canada radio broadcast. Telephone calls were also made to presidents and chairmen of local committees of the 17 unions instructing them to send their members back to their posts. Shortly after mid-night pilot trains left all main terminals carrying crews to outside points, along with company officials. Signals and protective devices were inspected along all main routes and, in the early hours of August 31, regularly scheduled trains resumed their runs. The most serious work stoppage of Canadian history was over.

Negotiations Early in August

Previous issues of the LABOUR GAZETTE have carried most of the historical detail of events in the railway dispute through the stages of conciliation procedure and up to the time of the announcement by the union groups that, in the absence of a satisfactory agreement being reached, there would be "a concerted and peaceful withdrawal from the service" at 6 a.m., Regional Standard Time, on the morning of August 22, 1950. As has already been reported, one of the groups of unions involved consisted of fifteen international unions representing some 90,000 workers employed by the Canadian National Railways, Canadian Pacific Railway Company, Toronto, Hamilton and Buffalo Railway, and the Ontario Northland Railway. The second group consisted of two national unions representing approximately 35,000 workers employed by the Canadian National Railways, Canadian Pacific Railway Company, and the Ontario Northland Railway. The names of the various unions are listed at the conclusion of this article in Schedule B of The Maintenance of Railway Operation Act. The companies affected and their subsidiaries operating ancillary services are shown below in Schedule A.

Following the fixing of a strike deadline by the unions, representatives of the railways met separately with the joint negotiating committees of the groups of unions on August 3 but no headway was made. On August 8, 1950, the union committees were asked to meet on August 10 with the Presidents of the Canadian National Railways and the Canadian Pacific Railway

Company. At this meeting on the "presidential level" the railway companies made what they called their final offer. This offer, which the companies emphasized did not apply to hotel or water transport employees, embodied the following proposals:—

- (1) Recognition by railway management of a moral obligation to implement the 40-hour week at the appropriate time.
- (2) Recognition by the unions in principle, subject to negotiation in detail, of ten amendments to existing contracts.
- (3) Either (A) a 44-hour basic work week with a 9.1 per cent increase in hourly rates so as to maintain take-home pay. (In regard to monthly-rated clerical employees there will be an understanding that a five-day actual work week may be granted by local arrangement in selected cases where the hours now actually worked are less than 44, on condition that the requirements of the service are protected up to 44 hours per week); or (B) an increase in basic wage rates approximately equivalent in expense to that involved under Plan A. This would average 8½ cents per hour for all employees but it is to be graduated in three steps so as to provide for: (i) A maximum hourly or monthly wage increase; (ii) lesser amounts in specific cases where it is necessary: (a) To avoid raising the occupational rates still further above those paid in outside industry for comparable work; (b) To widen the differential between successive positions so as to provide a reasonable incentive for advancement.

The revisions in working rules proposed by the companies were summarized as follows:—

1. All employees having less than six months' seniority to be considered probationary.
2. A revision of rules to provide that in case of staff reduction as much advance notice as possible will be given employees affected. (At present there is a specified period of notice which must be given each employee.)
3. Modify and/or incorporate rules regarding apprenticeship rates and period of application.
4. Provide for variation in starting time to meet requirements of railway service.
5. Provide for establishment of meal periods to meet requirements of railway service.
6. Modify reference to payment of time and one-half for Sunday work as such and provide for the establishment of a seventh day off duty, not necessarily Sunday.
7. Amend the vacation-with-pay provisions to conform with the reduced work week.
8. Modify overtime rules governing road service, express messengers and helpers.
9. Modify the rule presently restricting work on Sunday.

10. Modify the rule governing sleeper and dining car department employees to provide that when passenger trains consist of more than three and not exceeding eight sleepers, one conductor will be assigned, and an extra conductor will be assigned when trains exceed eight sleeping cars.

Statement by Companies, August 10

A public statement released by the Press Bureaux of the CNR and CPR indicated that the companies' offer had been made personally to the full negotiating committees of the two union groups by Mr. Donald Gordon, Chairman and President of the Canadian National Railways, on behalf of himself and Mr. W. A. Mather, president of the Canadian Pacific Railway Company. The CPR was represented at the meeting by Mr. N. R. Crump, Vice-President, as Mr. Mather was in Western Canada.

The public statement went on to say that, in making the offer for both companies, which he described as representing "the ultimate which can be expected", Mr. Gordon emphasized that "it is a final offer and no good purpose will be served in taking it as another bargaining point. If it is not accepted, then it must follow that all compromise offers in this dispute are withdrawn and the railways stand by the provisions of the agreement dated July 16, 1948, without any amendment."

The railways' statement reported at some length a "solemn warning" which Mr. Gordon had given to the union leaders of the "grave and frightening" weight of responsibility they would be assuming if they refused to accept the carriers' terms and called a strike. It then set out the following estimate of the cost of the unions' demands, if applied generally to all employees of both companies:—

- (a) The 40-hour week maintaining take-home pay, \$80,158,000.
- (b) The 40-hour week plus 7 cents an hour increase, \$110,736,000.
- (c) The 40-hour week plus 10 cents an hour increase, \$123,837,000.

On the basis of estimates made by the railways, the compensating freight rate increases to meet such figures were:—

- (a) For the 40-hour week, 24 per cent.
- (b) For the 40-hour week plus 7 cents, 34 per cent.
- (c) For the 40-hour week plus 10 cents 38 per cent.

It was admitted by the railways that there would be an "area of disagreement" about such estimates, but their statement added that "whatever the margin in dispute, no reasonable person can deny that the figures are most formidable. It seems clear that in considering all requests from the

unions, the railways are confronted with an increase in their wage bill of the order of 20-25 per cent." The railways were prepared to give full weight to the general assumption that, given sufficient time, increased productivity could offset increased wage cost, but claimed that no one had been able to demonstrate anything approaching such an increase in productivity as would offset the full demands of the unions. Inability to pay had not been made the railways' sole reason for resisting the unions' requests, and railway management not only accepted the belief that the railway worker was entitled to be paid on a comparable scale with other industry, but was satisfied that railway wages were not seriously out of line and that there were many classifications definitely above comparable wages in other industries. Mr. Gordon had emphasized that the railways did not resist the trend to a 40-hour week, but, as a service industry, they could not "on this particular point lead the parade in advance of the industries they must serve." In the United States, the 40-hour week had not been put into effect in railway operations until it had been overwhelmingly adopted in other industries.

The statement then referred to the tradition of enlightenment with moderation and restraint on both sides which had marked relations in the railway industry for many years. It then quoted Mr. Gordon as saying "management is of the opinion that this sort of attitude is not now being exhibited. We question definitely that the union representatives are bargaining in good faith. Our experience in our discussions with you leads us to believe that each suggestion made by us in an effort to effect a settlement becomes a lever for probing still further concessions. It must be remembered that we have responsibilities not only to our employees, but as well to the public at large who are entitled to railway service at reasonable cost and on a basis to meet their requirements."

Position of Unions

Later on August 10 both groups of unions notified the railways that the companies' "final offer" was not acceptable as a basis of settlement. The position of the unions, as set out in a letter addressed to the heads of the railways by Mr. F. H. Hall on behalf of the negotiating committee of the fifteen associated international unions was as follows:—

"We regret to have to advise that we can find no acceptable contribution to such a solution in either your statement or the 'final proposals' which accompanied it.

Indeed, in some particulars we find the statement both irritating and provocative, calculated to increase the difficulty of reaching an amicable settlement. We view as particularly objectionable your statement that 'we question definitely that the union representatives are bargaining in good faith.' Our reply to this is to say what has been apparent to our Committee from the outset of the proceedings, that the railways' conception of bargaining is an interminable process calculated to preserve the *status quo* to the last possible moment and deprive the employees of the improvements sought in working conditions and wages over a long period, during which workers in other industries have secured them. In this connection, it is not inappropriate to point out that the notices seeking the five-day week and the very small wage increase of seven cents an hour were served by the unions on June 16, 1949. Thus, although you allege there has been no real collective bargaining, almost fourteen months have elapsed and the issues are still unsettled.

"The requests submitted on June 16, 1949, were met with counter proposals. In making these requests the employees were certainly not blazing any trails. They had seen increasing adoption of the five-day week in other industries. The rising cost of living was reducing their already low living standards. The counter proposals would have deprived some of the employees of conditions they had enjoyed for many years. This they viewed as retaliation. To have 'bargained' on these matters by the method evidently contemplated by the Railways would have precluded the possibility of reaching any conclusions on the employees' requests until, perhaps, some time in 1951. This would be a travesty on 'collective bargaining', and calculated to undermine it as a useful procedure in industrial relations.

"Your statement makes several references to the report of the Conciliation Board. We do not think that the Conciliation Board made any useful contribution to settlement of the questions involved. Quite frankly, these organizations have for some time been dissatisfied with the manner in which such Boards are constituted. We have not found that the background, training and experience in the judicial field of some of the gentlemen who sit as Chairmen of Conciliation Boards qualifies them to deal adequately with, and decide fairly, labour disputes involving sociological and economic factors.

"Your statement admits that there will be an area of disagreement on the cost figures you have quoted. These figures are

indeed 'most formidable' as you have said. Whether they are in any sense indicative of what the cost would be is another thing entirely. In the United States, where the five-day forty-hour week has been in effect on the railways since September 1, 1949, it would appear that the early high estimates of the cost have not been borne out by experience. Both the Canadian National Railways and Canadian Pacific Railway have operations in the United States. In 1949 they gave their United States employees a wage increase of seven cents an hour, and put into effect a five-day forty-hour week, with pay for forty-eight hours. We have not been able to get the railway officers to tell us the cost of applying the five-day forty-hour week, and the assumption is warranted that it falls far below the original estimates. But in your proposals you have admitted 'Recognition by railway management of a moral obligation to implement the forty-hour week at the appropriate time.' How, at that time the cost figures would be less formidable than now we do not know.

"We are very much of the opinion that the impact of additional cost on the Canadian economy has been greatly exaggerated, and we cannot agree that to meet our demands would engender very serious inflationary pressure. It would seem to us that the views you now express in this regard are at variance with those expressed by the railways when applying for increases in freight rates. And if, as you say, public opinion is aroused on this subject it is simply because the public is ill-informed and accepts propaganda for facts and irresponsible and biased newspaper editorials as gospel truth. But we are sure that the thoughtful element of the public will support railway employees in their attempt to secure for themselves the shorter work week being enjoyed by so many workers in other industries.

"There has never been anything in the nature of a national strike on Canadian railways. Indeed, for a great number of years there has been no stoppage of work at all of any importance. This well illustrates the responsible character of the employees, and their reluctance to take extreme measures. They find the present situation most distasteful, brought about by discriminatory treatment which has become intolerable. They hope that even at this late hour a strike can be avoided.

"These unions are democratic institutions. Their leaders are in the hands of the membership. Your statement appears to imply that the 'union leaders' have authority to veto the memberships' strike vote. Such is not so.

"The proposed forty-four hour basic work week is not acceptable, nor is the alternative increase in basic wage rates.

"Hotel and water transport employees should be included in any settlement."

Commissioner's Attempt to Effect Settlement

On August 16, the Prime Minister wrote a letter to the parties on behalf of the Government of Canada asking that strike action be postponed for thirty days. He stated that the Government itself could not, under existing labour legislation, impose a settlement upon the parties, but expressed the hope that they would resume their negotiations and carry them through to a successful conclusion. If a settlement were not reached by the parties themselves prior to August 22, and strike action were postponed, the Prime Minister promised that the Government would appoint a special Commissioner to act as mediator.

In reply to this appeal, the Prime Minister was told by the leaders of the unions' negotiating committees that they could not agree to a postponement of the strike deadline. However, in their replies, they implied that they would welcome the immediate assistance of a mediator.

On August 18, 1950, Dr. W. A. Mackintosh, vice-principal of Queen's University, Kingston, Ont., was appointed by the Minister of Labour as an Industrial Inquiry Commissioner pursuant to the provisions of Section 56 of the Industrial Relations and Disputes Investigation Act, and was instructed to confer with the parties to the dispute and to endeavour to mediate the issues in dispute between them.

Dr. Mackintosh, who is recognized as one of Canada's ablest economists, was described by the Prime Minister in Parliament as a man in whom the Government had great confidence. He proceeded at once to Montreal and, in three dramatic days, made every effort to bring about a settlement.

The Hon. Mr. Gregg, Minister of Labour, made available to Dr. Mackintosh in his mediation effort the full facilities of the Department of Labour; and the Deputy Minister of Labour, Dr. Arthur MacNamara, the Director of the Industrial Relations Branch of the Department, Mr. M. M. Maclean, and one of its senior Industrial Relations Officers, Mr. J. L. MacDougall, accompanied him to Montreal as consultants. Dr. MacNamara, while not participating officially in the mediation proceedings, directed his efforts in collaboration with the mediator towards breaking the impasse which confronted the mediator

at the outset of his task, and conferred with union groups at various stages of the proceedings.

Dr. Mackintosh held a preliminary joint meeting with the representatives of the parties on the morning of August 19. This was attended by the full joint negotiating committees of both groups of unions, comprised of some 26 persons, and by 11 representatives of the railways.

Later, a subcommittee representing the unions' negotiating committees was formed, composed as follows:—

International Unions

Mr. F. H. Hall, Chairman of Joint Negotiating Committee and Vice-President of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

Mr. G. R. Pawson, Secretary of Joint Negotiating Committee and Deputy President of the Commercial Telegraphers' Union.

Mr. H. Smith, President of Division No. 4, Federation of Shop Crafts, AF of L.

Mr. Robert Hewitt, Vice-President, Brotherhood of Railway Carmen of America.

Mr. W. Aspinall, Vice-President, Brotherhood of Maintenance-of-Way Employees.

Mr. W. H. Phillips, Vice-President, Order of Railroad Telegraphers.

National Unions

Mr. A. R. Mosher, National President, Canadian Brotherhood of Railway Employees and Other Transport Workers.

Mr. T. McGregor, Chairman of Joint Negotiating Committee and System Chairman of the Canadian Brotherhood of Railway Employees and Other Transport Workers.

Mr. W. J. Smith, Acting Secretary, Joint Negotiating Committee and Representative of Canadian Brotherhood of Railway Employees and Other Transport Workers.

Mr. T. J. Clark, Grand President, Brotherhood of Express Employees.

The representatives of the railway companies attending the negotiations were as follows:—

Canadian National Railways

Mr. Donald Gordon, Chairman and President.

Mr. S. F. Dingle, Vice-President.

Mr. R. C. Johnston, Asst. Vice-President Personnel.

Mr. P. E. Ayrhart, Manager, Labour Relations.

Mr. James A. MacDonald, Asst. to Mr. Gordon.

Canadian Pacific Railway Company

Mr. W. A. Mather, President.

Mr. N. R. Crump, Vice-President.

Mr. D. I. McNeill, Vice-President Personnel.

Mr. J. R. Kimpton, Asst. Vice-President Personnel.

Mr. S. M. Gossage, Asst. Manager of Personnel.

Ontario Northland Railway

Mr. A. Freeman, General Manager.

At the outset, Dr. Mackintosh explained that he had been appointed as a mediator and that he had no intention of imposing any terms of settlement upon the parties. He said that no terms of settlement had been suggested to him by any member of the Government and that any settlement arrived at through his mediation must be a negotiated one. He also referred to the seriousness of the international situation and to the effects which a railway strike would have upon the railway industry and upon the economy at large.

Intensive negotiations, conducted through separate consultations with the parties, then took place on Saturday, Sunday and Monday, August 19 to 21, and throughout the early hours of Tuesday, August 22. Various proposals and counter proposals narrowed the gap between the positions of the two sides, but failed to bridge their differences. The final session of the unions' committee broke up about 5.30 a.m., EDT, with the announcement that no settlement had been reached and that "the strike is on".

Report of Commissioner

The report made by Dr. Mackintosh to the Minister of Labour, dated August 25, 1950, was as follows:—

"On Friday, August 18, I was appointed by you a Commission to act as mediator in the two disputes between the Canadian railways and the unions representing the 'non-operating' employees of the railways.

"I proceeded immediately to Montreal and arranged to meet those representing the parties to the dispute at 10 o'clock Saturday morning. I explained to them the conception which I had of my duties as mediator and emphasized to them the magnitude, particularly in the present world circumstances, of the disaster which would be precipitated by a strike. I arranged to meet the groups separately in the hope that at a later time further joint meetings would serve a useful purpose.

"Both parties to the dispute made themselves available to me at all times and

afforded me every opportunity to carry on my duties. I was shown every personal consideration by both groups.

"In the three days and nights available to me I met both parties many times and used all the resources at my command to achieve a settlement of the dispute. In the end, I failed in my efforts.

"The dispute is unresolved and the employees are on strike. In these circumstances, it would not be helpful to make a formal report on the merits of the issues at stake nor do I understand it to be part of my duties. Indeed, it is impossible for a mediator working for a short period to assess fairly the merits of a complicated dispute. He must concentrate on obtaining a workable settlement.

"For your information, I attach copies of three documents setting out formal offers of settlement by the parties. These, in the order in which they were presented, are described by the parties as follows:—

- (1) Memorandum from the Joint Negotiating Committees of the Terms on which a Strike Can Be Avoided. (This was handed to me as a typed document.)
- (2) Memorandum (by the Railways) to the Special Commissioner. (A statement initiated by the Presidents of the two chief companies and handed to me.)
- (3) Memorandum as to Terms of Settlement. (Presented orally to me by the Joint Negotiating Committees and described by them as a "terminal offer".)

"These documents were all presented in the late hours of Monday, August 21, or the early hours of Tuesday. Only on limited points did they represent fresh offers. To a considerable degree they formalized points which had been tentatively and conditionally accepted at earlier stages.

"The work of the mediator was made extraordinarily difficult by (1) the almost complete lack of confidence between the parties to the dispute; (2) the number and variety of the unions which were attempting to bargain as one unit; (3) the very low level of effectiveness of collective bargaining in the industry; (4) the fact that the rapidly approaching menace of the strike created confusion between genuine bargaining and attempts to make statements of positions before the work stoppage took place.

"Throughout the brief period of my activities I had the most willing and helpful co-operation from the Deputy Minister of Labour and the Director of the Industrial Relations Branch and his staff.

"Faithfully yours,

(Sgd.) "W. A. MACKINTOSH."

MEMORANDUM FROM THE JOINT NEGOTIATING COMMITTEES OF THE TERMS ON WHICH A STRIKE CAN BE AVOIDED.

1. A 5-cent per hour wage increase effective September 1, 1950.
2. A 5-day 40-hour week with 48 hours' pay to be effective September 1, 1951.
3. The 5-day 40-hour week to be applied to hotel and water transport employees.
4. The aggregate amount of money for the 5-cent increase for hotel and water transport employees to be applied to those classifications, but not necessarily on a *pro rata* basis.
5. Contingent on a 2-year agreement, there shall be a cost-of-living bonus effective September 1, 1950, of one cent per hour per point rise in the Cost-of-Living Index; this to be computed half-yearly.
6. The war-saving clause to be based on Government declaration of emergency only.*
7. Ancillary questions as to Regulations, etc., and application of the 5-day 40-hour week to be agreed to in principle along the lines of the "Chicago Agreement".†
8. There should be provision for a Joint Committee and Referee as to application of the 5-day 40-hour week.
9. The Railways to withdraw their counter proposals.‡

MEMORANDUM (BY THE RAILWAYS) TO DR. W. A. MACKINTOSH, SPECIAL COMMISSIONER.

As you are aware the Railways by one concession after another have made major efforts to meet the demands of the two Union groups involved in the present dispute. These offers culminated in the proposals put before the Negotiating Committee by the Railways on August 10, copies of which are in the hands of the interested parties and yourself.

In preparing this offer we explored every avenue which seemed open to us in arriving at a contract intended to last for a period of only one year.

At your request we have now given serious consideration to the possibility of lengthening the contract period so that within a wider framework we might justifiably include provisions not appropriate for a short-term contract. With this in mind we put before you the terms on which a longer contract would be considered possible by the Railways.

* The clause referred to was one suggested by the Mediator during the course of negotiations reading as follows: "In the event that the Government of Canada officially informs the companies and Unions that the international situation has created emergency conditions which require extraordinary efforts on the part of all industries and Canadians, it is agreed that the Unions will waive penalties on overtime which would not have been deemed to be overtime under the contracts existing at the date of this agreement."

† The "Chicago Agreement" refers to the provisions of the agreement between various railways and trade unions in the United States of America, in accordance with which the 5-day 40-hour week was initiated on railways in that country on September 1, 1949.

‡ This reference was to the railways' proposals as to changes in rules.

Terms for a three-year contract

1. A four-cent per hour wage increase effective September 1, 1950; such increases to be graduated as mutually agreed.

2. A five-day 40-hour week with 48 hours' pay to be effective October 1, 1951, with provision for a transitional period of, say, nine months after that date during which penalty overtime rates shall not apply up to 48 hours per week.

3. In consideration of the *three year* contract, a cost-of-living bonus clause by which each 1 per cent rise in the cost of living above the index for October 1, 1951, will be compensated by a bonus of, say, $\frac{2}{3}$ cent per hour.

4. A clause providing that in the event that the Government of Canada officially informs the companies and unions that the international situation has created emergency conditions which require extra efforts on the part of all Canadians it is agreed that the unions will waive penalties on overtime which would not have been deemed to be overtime under the contracts existing at the date of this agreement.

5. Agreement to negotiate in good faith the amendments to existing contracts referred to in the Railways' offer of August 10, 1950, with particular reference to those rules which will facilitate a fair and economical introduction of the 40-hour week. In the event of failure to agree by the first six months of the transitional period of the 40-hour week the parties to agree to appoint a Referee whose decisions shall be binding.

6. Hotel employees and water transport employees are not to be included in the general agreement but provision will be made for a one-year agreement whereby a 2-cents per hour increase, effective September 1, 1950, shall be pooled and distributed to these employees following a review of their positions with workers doing comparable work.

MEMORANDUM (OF THE JOINT NEGOTIATING COMMITTEES OF THE UNIONS) AS TO TERMS OF SETTLEMENT.

1. A wage increase of 5 cents per hour effective September 1, 1950; this to be a flat increase of 5 cents except where otherwise mutually agreed to by the Unions and the Companies.

2. Adoption of a 5-day 40-hour week with 48 hours' pay, effective September 1, 1951.

3. Contingent on a two-year agreement, there shall be a cost-of-living bonus effective January 1, 1951, of one cent per hour per point of increase in the Cost-of-Living Index, to be computed half-yearly on the basis of the Index as at January 1, 1951.

4. In the event that the Government of Canada officially informs the Companies and Unions that the international situation has created conditions which require extraordinary efforts on the part of all industries and all Canadians, it is agreed that the Unions will waive penalties on overtime which would not have been deemed to be overtime existing at the date of this agreement.

5. There shall be provision for a Joint Committee and Referee to deal with ancillary questions in regard to the five-day forty-hour week and for developing the regulations in respect thereto.

Parliament Summoned; Further Negotiations

On the morning of the day that the strike commenced, the Prime Minister stated that the Government regretted that all efforts to settle, by collective bargaining, the labour dispute between the railways and the unions had failed and that a nationwide strike had started. He also announced, as reported above, that Parliament was being called to meet at once so that the representatives of all the people might act together in discharging their responsibilities to meet the situation.

On August 24 the Prime Minister invited the two principals of the trade unions and of the railways to meetings with himself and the Minister of Transport and the Minister of Labour in Ottawa on the following day. On August 25 these meetings were held, and at the request of the Prime Minister, the parties concerned agreed to resume direct negotiations *in camera* the same day to seek a solution.

The renewed negotiations began at 8.15 p.m. on August 25, and continued on August 26 but again ended in a stalemate at 7.30 p.m. that evening.

After the collapse of the direct negotiations, the parties issued public statements with regard to their respective positions. The railways reported that they had made a firm offer of settlement as follows:—

Four cents per hour wage increase to be effective September 1, 1950.

A 5-day 40-hour week to begin September 1, 1951.

A two-year contract to run from September 1, 1950.

An agreement "along lines indicated by the negotiating committee as satisfactory", to negotiate amendments in certain rules.

A clause dealing with payment of straight time up to 48 hours a week in the event of a national emergency.

Hotel and water transport workers, to be covered in a separate contract for one year, to be granted an increase of 2 cents per hour effective September 1, 1950.

The public statement of the unions reported that they had modified their demands. They stated that they had offered to accept a wage increase of 7 cents per hour as of June 1, 1950, instead of July 16, 1949, and to project the application of the 5-day 40-hour week as far ahead as June 1, 1951, and added to that a three-month transition period during which straight time would be payable up to 48 hours per week.

As a possible alternative, the unions proposed that there be a two-year contract with a wage increase of 5 cents per hour retroactive to January 1, 1950, with a cost-of-living bonus provision effective

immediately, under which there would be a wage increase of 1 cent per hour for each one-point rise in the cost-of-living index.

On August 27, representatives of both the unions and railway management made reports to the Prime Minister, the Minister of Transport and the Minister of Labour that their renewed negotiations had failed to result in a settlement.

Legislation Introduced by Prime Minister

When Parliament met on the afternoon of August 29, the Prime Minister asked for leave to introduce, as Bill No. 1, The Maintenance of Railway Operation Act, with the Minister of Trade and Commerce as seconder. Following a brief explanation of the Bill and a few questions by members of opposition parties, it was agreed that the ordinary rules of procedure be set aside and that leave to introduce the Bill be granted. The Bill was then read a first time.

Following certain formalities, the Prime Minister moved the second reading of the Bill and addressed the House. He stated that the purpose of the legislation was to deal with a national emergency, and it was not intended to provide in any way for any permanent procedure to handle labour relations between employers and employees. The normal procedure had been built up over a great many years and was based upon the principle of collective bargaining, which had proved its value in the national economy of Canada. However, the country was faced with a tie-up of rail transportation which, if continued over any lengthy period of time, would bring the economy of the nation to a complete standstill. The Prime Minister referred to the serious international situation and to the measures for increased national security and international co-operation required by the fighting in Korea, and the increasingly grave situation reflected by that struggle.

Continuing, the Rt. Hon. Mr. St. Laurent said:—

"Railways are an essential instrument of defence, of security and of protection in our country, and I am sure those who have the responsibilities for the management of the railways, as well as those who have the responsibilities for the decisions of the men who operate the railways realize that.

"As a matter of fact I know from actual conversation with their representatives they realize it just as keenly as we do. The men who are not working at the present time assert, as they did assert through their leaders in the statements published in our press, that they are not striking

against the government and they are not striking against the public. But the situation is such that a tie-up of transportation inevitably reflects against government—not this government, not a party government, but against government in Canada, and against the public of Canada. I know that is clearly realized and sincerely deplored by everyone in Canada, including all those in management of railways and all those normally engaged in the operation of railways.

“When this strike was announced I realized, as I am sure every hon. member of this House realizes, those who were calling the strike and those who were responding to the call were not breaking any law applicable to their case. They were doing what they thought they were justified in doing for the protection of their interests; but it has been said, and I think it is worth being borne in mind, that the insistence upon what may be normally private rights may at times amount to what becomes public wrongs. And the injury that the insistence on private rights may do to the public weal is sometimes so great that it has to be given serious consideration, because the existence and security of the state is the first and prior consideration for each one of us.”

In outlining the reasoning which had played a part in the framing of the Bill, the Prime Minister stated that it had been “very difficult for us to convince ourselves that, in any measure that was going to be a declaration by Parliament that such and such services had to be resumed in the national interest, we should include operators of the railway hotels. It appeared to us to be very difficult to ask Parliament to state that it was of such importance to the national interest of the country to have hotel operations resumed that this step, which I am sure is repugnant to all of us, of saying that so and so should do such and such, should apply to them.

“But, on the other hand, it was represented to us that all these unions had banded together for the promotion of a common cause, and that it would appear to them that any action that was taken which did not apply to all of them and to which any of them submitted, would be regarded as a betrayal of some of those who had banded together for the promotion of a common cause. That was something which it was said would appear to them to be wrong for any Parliament to ask them to do. In drawing our legislation we reluctantly came to the conclusion that that was a feeling which probably existed in the breasts of the men themselves and

which it would not be politic to attempt to override. Therefore in drawing the legislation we have not attempted to make any distinction between any of the services operated by the railway companies which were being performed by the men who had been in the process of negotiation and were now out on strike.”

Stating that the Government had shown the utmost respect for the rights of all parties, the Prime Minister declared that every possible avenue of conciliation and mediation was tried before Parliament was called upon to intervene. In the negotiations, certain matters had been recognized as inevitable on both sides, and the Prime Minister explained how these matters had been taken into account in the provisions of the Bill.

The Hon. Milton F. Gregg, Minister of Labour, then gave the members a historical account of developments connected with the dispute up to the time of the meeting of Parliament.

Leader of Opposition Speaks

Debate on the Bill commenced at 11.00 o'clock on Wednesday, August 30, in consideration of the motion for second reading. In leading off the debate, the Leader of the Opposition, Mr. Drew, summarized the economic effects of the strike which were already evident as follows:—

“I think it is impossible to overemphasize the gravity of the situation. From the Atlantic to the Pacific the normal movement of our natural products, our goods, machinery, industrial production and the daily requirements of the people in all the homes of this country, is at a standstill. In British Columbia, Vancouver Island is almost completely isolated from the mainland, except for the airlift which has been established. Fruit growers, farmers, workers in the forests, fishermen and all others are being seriously affected, and those effects become more extensive every day. So it is on the mainland of that great province. Mines, factories and other operations upon which the employment of thousands of people depend have been forced to close.

“The Prairie Provinces face a very special problem. There they see the danger of not being able to deal with their great wheat crop unless this problem is settled immediately. Nor is that the only special problem they have there, where distances make communication and transport by bus and car more difficult than in the more concentrated centres of population. In Alberta hundreds of oil wells already have been closed, causing not only a loss of fuel supplies but also of employment.

In Ontario many of the largest industries are shut down, with resulting loss of employment to thousands of men and women. Farmers are unable to ship their products, and some of the finest crops in the history of this province are going to waste. In Quebec the same situation exists. As in Ontario, the great pulp and paper mills are having immense difficulty in carrying on that business upon which so much of the economy of this country depends, as well as the employment of thousands of people.

"In the Maritimes there is severe disruption of normal activities because of the substantial dependence of so many places in those provinces upon rail service. Prince Edward Island is almost isolated from the mainland because the great railway ferry is not operating. Special hardships also are being felt in Newfoundland. Everywhere throughout Canada the people face mounting difficulties and realize that if this disruption of service continues much longer we face a disaster almost beyond imagination. . . . Just to emphasize how serious this is, may I point out that at this very time the special United Nations force has been divided into three different groups, which for a time could not be brought together by rail and for which much of the heavy equipment required could not be supplied. That is a situation we cannot regard with equanimity at a time like this, when the very survival of our way of life is threatened throughout the world."

Mr. Drew criticized the provisions for compulsory arbitration of the differences between the parties in the event of their not being able to reach a settlement by collective bargaining.* He moved an amendment, seconded by the hon. member for Hamilton West (Mrs. E. L. Fairclough), as follows:—

That Bill No. 1 be not now read the second time but that in the opinion of this House consideration should be given to a measure which would provide for the appointment of a national administrator to ensure immediate operation of the railways pending final solution of the dispute by the free process of collective bargaining.

Statement by Leader of CCF Party

The Leader of the Co-operative Commonwealth Federation, Mr. M. J. Coldwell, stated, in part:—

"The leader of the opposition (Mr. Drew) outlined the difficulties under which various

* On August 29, in an unprecedented joint statement, the Trades and Labour Congress of Canada, the Canadian Congress of Labour, the Canadian and Catholic Confederation of Labour, and the Dominion Legislative Committee of the Railway Transportation Brotherhoods, united in announcing their strong opposition to the principal of compulsory arbitration as to the terms of collective agreements.

producers are suffering at the present moment. Let me remark that not only the producers and every consumer in Canada are suffering from the great strike now in progress, but also every railroad employee involved in the strike. The loss of earnings to that great group of Canadian citizens is a serious one to every one of them. . . .

"I do not like this Bill. When I read the preamble it led me to believe that, the railway companies and the bargaining agents of the employees having appeared to agree that existing wage rates should be increased and the forty-hour week introduced, the legislation would involve a settlement along those lines. Had I stopped at the preamble, or had the preamble of this Bill constituted the law, I should say there was much to be said for what is contained in the preamble. As the Leader of the Opposition says, however, when you examine the Bill itself it contains much more than appears on the surface. The rules that have been negotiated by the men over a long period of years, and which in no way enter into this wages and hours dispute, under this Bill may be thrown into the discussion. All matters which the railways or the men care to bring before an arbitrator, if one is appointed, may be the subject of new negotiations. Even a layman who knows very little about railway rules appreciates the fact that those rules have been agreed upon, having regard to the differing circumstances within the various railway systems, over long periods of years. An attempt was made by the railway management to introduce the rules as a bargaining point but, as I understand it, as late as last Friday that feature of the discussion was eliminated by the railway companies. They recognized the impossibility of reaching a speedy agreement in relation to the railway problem if those rules—and I give this only as an example—were thrown into this discussion. . . .

"Then, of course, there is the feature of compulsory arbitration, which has been emphasized by the Leader of the Opposition. In this democratic country we have built up a labour code, a way of doing things, which in the past has worked well. I believe that if more conciliation and a less dictatorial attitude had been shown by the railway managements, collective bargaining would have achieved results and this strike would have been avoided weeks ago. . . .

"The Bill does not contain any deadline for the commencement of the forty-hour week. . . . We should remember that the railway men had come down many months from their original position as to when the forty-hour week should go into effect. The

date the men wanted was June 1, 1951, and the railways suggested September 1, 1951. The Bill does not say that the forty-hour week should go into effect at a date on or before September 1, 1951, the date furthest away. There is nothing in the Bill to that effect, and it may mean nothing to the arbitrator. I believe the Leader of the Opposition is quite right in saying that Clause 3 of the Bill contains no real guarantee, except of a temporary nature, with regard to wages.

"Again, with regard to the forty-hour week, the understanding is and was that if the forty-hour week came into effect—the railway management did not disagree with this—then the take-home pay should be the same. The Bill now before the house contains no guarantee of that. Consequently no matter how much one may want to see the railways resume operations, every member of the house should scrutinize the Bill and understand its implications. I suggest to the Government that, having regard to the debate and the objections or suggestions that are made, it should give an undertaking that the objectionable features will be eliminated in the committee stage to enable hon. members to support what purports to be the purpose of the Bill, namely, the resumption of railway transportation in this country."

Leader of Social Credit Party

The Leader of the Social Credit Party, Mr. Solon E. Low, outlined some of the hardships imposed by the railway strike upon farmers, livestock producers and fruit growers. He went on to say, in part:—

"Thousands of workers are being compelled into idleness and loss of income through enforced shutdown of industries and mines. These people do not quibble about compulsory means. They do not quibble at all about what compulsion itself means. They realize all too well, as do the farmers of Canada, that the railway management and workers, in exercising what they consider to be their sacred rights, are visiting compulsory losses, idleness and frustration upon a whole nation, and that at a time of extreme international danger. . . .

"My colleagues and I in the Social Credit group in this House have applied our minds with all the wisdom and energy that we possess, to the problem that is before us. We have concluded that we have no better means of getting our railways back into operation than through the procedure which is outlined in the Bill now under consideration. In our judgment many of the provisions of the Bill are fair and just,

and they should be effective in accomplishing the single purpose for which the Bill was drafted. In general we agree with the principle of the Bill. With certain clauses we have some reservations, because we think that they are not clear, especially as to time limits of agreements which might be decided upon by an arbitrator and imposed upon the railways and the workers, as well as some other things. In our judgment an arbitrator should not have the power to impose, let us say, five or six year agreements upon the railways or the workers, if that is not what the railways and the workers wish. We feel also, Mr. Speaker, that the arbitrator should be empowered to arbitrate only on those matters which are outstanding at this time. The arbitrator should not have the power to deal with the long-range agreements now in effect, or with those myriads of rules that have been worked out at such cost and over long periods of time. . . .

"We do not think this Bill should set any undesirable precedents. It deals solely with the present crisis, and is designed to do one main and all-important thing—get the trains moving in the interests of all Canadians, in the interests of a strong Canada in this time of grave international stress. And although there are in our judgment shortcomings in some of the clauses of the bill, we feel disposed at the present time to support it in principle."

Sub-Amendment Moved

At a later stage in the debate, the hon. member for Winnipeg North Centre (Mr. Stanley Knowles) moved a sub-amendment, seconded by the hon. member for Cape Breton South (Mr. Clarence Gillis), as follows:—

That the following words be added to the amendment at the end thereof:

Provided that the administrator be instructed to grant immediately the maximum concessions made by the companies during negotiations, and that further negotiations with reference to the present dispute relate only to the questions of (a) a wage increase greater than four cents an hour; (b) the implementing of the forty-hour week for forty-eight hours' pay at a date earlier than September 1, 1951; and (c) the check-off of trade union dues.

After a considerable amount of further debate, the sub-amendment introduced by Mr. Knowles was negatived by a vote of 229 to 13, and the amendment introduced by Mr. Drew was negatived by a vote of 186 to 56.

In closing the debate on second reading the Prime Minister said that he did not

think it was necessary to make any amendment to the Bill to ensure to the workers that any arbitrator would not make an award that would be less favourable to them than the proposals that were in existence at the time the negotiations broke off on Saturday night, August 26. He then went on to say:—

“But we all appreciate that it will be desirable not only to have the men obey the law but also to have them go back to their jobs with a feeling of security that they are getting a fair deal. For that purpose the Government will be prepared to have an amendment introduced at the committee stage to limit the field of determination to that which remained the gap between the parties when the negotiations were broken off, subject, of course, to any further narrowing that the parties may themselves have brought about by their further negotiations at the time an arbitrator is appointed.”

Government Amendment

Upon request, and with the unanimous consent of the House the Prime Minister read the text of the amendment which the Government was prepared to make to the Bill, and the motion for second reading carried by a vote of 192 to 47.

The House then went into committee and the Rt. Hon. Mr. C. D. Howe, Minister of Trade and Commerce, proposed the amendment which had been promised by the Prime Minister. It read:—

That clause 5 of Bill be amended by inserting as subsection (3) the following subsection and renumbering subsections (3) (4) and (5) as subsections (4) (5) and (6):

(3) In deciding any matter under this section, the arbitrator shall decide the matter within the limits of the proposals that he determines were made by the railway companies and the unions in respect of that matter at the time negotiations were terminated between them on the twenty-sixth day of August, nineteen hundred and fifty, or were made by either of them after the commencement of this Act at any time before the matter came before him and which narrow these limits, but the arbitrator by his decision shall not provide for a reduction in a rate of wages established pursuant to Section 3.

Other Amendments

Another minor amendment was moved by the member for Vancouver-Quadra (Mr. H. C. Green), extending from 15 to 30 days the period for collective bargaining between the parties. This amendment was agreed to without division.

The amendment introduced by the Rt. Hon. Mr. Howe was agreed to, following

clarification by the Prime Minister as to the duties and responsibilities which would devolve upon the arbitrator, if one were appointed, in respect of hotel and water transport employees and the proposals of the railways for changes in rules.

After the Bill was reported out of committee, the Prime Minister moved its third reading. At this stage, the Leader of the Opposition moved, seconded by the hon. member for Eglinton (Mr. D. M. Fleming), as follows:—

That Bill No. 1 be not now read a third time but that it be referred back to the committee of the whole for the purpose of striking out Section 5 of the Bill.

The House divided on the amendment of Mr. Drew, which was negated by a vote of 175 to 49. The Bill then passed on division.

Economic and other Effects of the Strike

It is still too early at the time of writing to gauge anything more than the broad economic effects of the strike. Even in regard to lay-offs resulting from the rail tie-up, only preliminary figures are available. In general it seems clear that the over-all impact of the strike was not as great as was anticipated, and that the ingenuity of Canadians in all phases of business activity played an important part in lessening the hardships that might have accrued.

While tension mounted as the special mediator, Dr. Mackintosh, pressed his efforts in day and night negotiations, each edition of the newspapers and every radio bulletin reflected the anxiety of the nation, in alternating moods of hope and apprehension, with such phrases as “the fateful hour is at hand”. Pre-strike predictions included dire warnings such as one that “the lives of almost everyone will be immediately and, for the most part, adversely affected if the railway strike goes into effect”. On the day the work stoppage began, a metropolitan daily in Central Canada announced that “shortages of meat and other perishable foods are forecast if the strike lasts more than a day or so”. The mayor of one municipality in Northern Ontario declared that its population of 29,000 “will starve within a week unless the strike is lifted.” On August 26 a reputable newsman, apparently misled by statements as to lay-offs that might occur if the strike were prolonged, reported that there were “around 500,000” Canadians idle as a direct result of the strike, and that if it were not settled within a week “this figure will soar to 750,000.”

In actuality, the adversities imposed by the strike fell short of such calamitous forebodings. Nevertheless, the hardships that were experienced were very real, and before work was resumed it appeared that the breaking point in the ability of the managements of many industries to continue production was not far away. This was indicated by the cumulative totals of actual industrial lay-offs and the large number of potential lay-offs reported in the press and through the National Employment Service.

As early as August 19, the Employment Office in St. John's, Newfoundland, reported that 700 track labourers had been laid off in anticipation of the strike. Smaller numbers of track labourers were also reported to have been laid off in other parts of Canada.

The embargoing of goods by the railways affected began as early as midnight on Thursday, August 17, after which time no shipment of livestock or perishable goods was accepted by the companies. Drastic curtailment in rail service commenced on August 21 when the railway managements cancelled many trains in advance of the strike deadline because they would not be able to complete their runs if a last-minute settlement were not reached. An embargo on the acceptance of express traffic was imposed at noon on August 21 by Canadian express companies and by the Railway Express Agency in the United States. Telegraph companies refused to accept night letters the same day. The Post Office stopped accepting parcels for other than local delivery and all but first-class mail was refused unless prepaid at airmail rates.

Trains which were in motion at the time of the strike deadline at 6 a.m., Regional Standard Time, on August 22 continued to a terminal or other convenient point. In the larger centres, baggage room personnel delayed their walk-out to handle the baggage of trains arriving after 6 a.m. Within two or three hours all stations, big and little, were deserted. By arrangement between the railway managements and the unions representing both operating and non-operating employees, single engines were kept in readiness with steam up at certain points in order to take care of emergencies, and small maintenance crews remained at their posts in order to take care of perishable commodities and to provide protection.

To meet the crisis, bus companies and airlines expanded their services to handle travellers, commuters and tourists to the full extent possible. The Canadian Automotive Transport Association announced that every available truck across Canada

would be pressed into service transporting foods, medical supplies and other freight. Many cities had drawn up strike plans in advance, and some of them appointed emergency co-ordinators to see that supply routes were arranged for essential needs. District co-ordinators of the automotive transport organizations worked with municipal officials to ensure the swift movement of bread, milk and other perishable foods. Among numerous notable instances of makeshift arrangements, it was reported in the press that a furniture van carried medical supplies from Toronto to Winnipeg, and that in the Niagara Peninsula brewery trucks were pressed into service to transport peaches to market. Commuters brought bicycles into use and car pools reminiscent of the war years were revived. Passengers debarking from ocean liners at Quebec City were taken to Montreal in cars and buses.

Hotels operated by the Canadian National Railways endeavoured to carry on to the extent that facilities and non-striking personnel would permit, and some guests remained in residence, climbing stairs to their rooms and making their own beds.

A factor in the maintenance of public morale was the maintenance of full service by newspapers and other media for the dissemination of news. The Canadian Broadcasting Corporation continued its network services without interruption, using leased wires of the railway telegraph service, although certain normal program "reversals" and "switches" had to be eliminated.

On the stock exchanges, which continued to operate on leased wires, mild selling pressure was at first experienced but the markets recovered quickly despite the strike.

Vancouver Island and Prince Edward Island were cut off from the mainland almost entirely, and were dependent upon aeroplanes, barges and small boats for food supplies. The Pictou ferry continued to serve Prince Edward Island and before the end of the strike the main railway ferry was permitted to resume operations.

The stoppage of work by the striking railway unions affected the coastal shipping operations of the British Columbia Coast Steamship Service of the CPR and Canadian National Steamships. The isolation of the coastal communities, with their populations of some 15,000 persons, was made complete on August 25 when about 250 unlicensed crew members of coastal vessels operated by Union Steamships Limited went on strike in connection with a dispute between the company and the Seafarers' International Union of North

America. The coastal steamship services of the two railways were also involved in the SIU dispute, but it had no relation to the main railway controversy. An emergency air transportation system was organized to help meet the predicament of the coastal towns and villages.

In another instance of isolation, the town of Atikokan, Ont., about 100 miles west of the Lakehead, appealed for aid on behalf of its 3,000 residents when their supplies of fresh meat, sugar, milk and flour became seriously depleted. A "mercy train" was authorized by the unions' strike committee and was sent to the town with 119,000 pounds of food from Port Arthur.

Nothing in the nature of serious food shortages occurred in any centres of population served by highways and, in fact, mobility through other forms of travel was maintained at a remarkably high level. As an illustration of this, new attendance records were established even during the railway strike at the Canadian National Exhibition in Toronto, which commenced on August 25.

In the industrial field, the best information available at the time of writing indicates that some 47,000 railway employees, composed mainly of workers in the running trades, were thrown out of work by the strike and about 23,225 employees of other industries by reason of lay-offs caused by lack of transportation. The lay-off figures are limited to cases involving over 25 employees. They were obtained through special reports secured from local offices of the National Employment Service, and more than eighty per cent of the lay-offs have been confirmed since the end of the strike. In general, the lay-offs occurred primarily in industries which depend upon a steady supply of bulky raw materials and, secondly, in industries where lack of storage facilities quickly creates a serious problem. Some industrial plants which, under the first impact of the strike, believed that they could not carry on found that they were able to improvise arrangements which enabled them to keep their working force intact and busy. As an example, the management of a large meat packing house in Toronto laid off some of its employees the first day of the strike, but the next day was able to re-hire its entire staff on the basis of a reduced work-week and a regrouping of its personnel. Lay-offs in the meat packing industry were much larger in the West than in Eastern Canada, and, although full information is not yet available, it appears probable that this had a

direct connection with the fact that a good deal of livestock in the West is shipped by railway, whereas in the East a greater percentage usually is shipped by truck and further consignments could be diverted to truck haulage.

An indication that lack of storage facilities was an influential factor in the lay-offs reported is seen in the fact that a large number of these occurred in industries, such as a plant manufacturing breakfast foods, in which the finished product is shipped out quickly after manufacturing. On the other hand, ingenuity played a part in keeping in production other undertakings with similar storage problems. For example, a large lay-off was forestalled in a paper plant in Northern Ontario by taking over the local hockey arena for storage facilities.

Another factor tending to mitigate the effects of the strike was that there is usually an upswing in manufacturing activity during August, and the average plant had an incentive to continue production at as high a level as possible during the strike period in order to meet the demands of markets later in the year. Consequently, every opportunity appears to have been taken by industry to keep plants going and working forces intact. Added to this, the renewal of direct negotiations at the request of the Prime Minister on August 25 and 26, and the confidence that the strike could not last long, created by the calling of Parliament, apparently persuaded many firms to postpone lay-offs as long as possible.

No authentic evidence is yet available as to the total number of industries which may have reduced their working hours temporarily, and no research has yet been possible as to other economic effects such as the spoilage of food from lack of refrigeration facilities or the depreciation of other goods.

Within 48 hours after the beginning of the strike, the picture as to lay-offs resulting therefrom, involving more than 25 persons, was estimated as follows:—

	Workers
Coal Mining: Nova Scotia	3,000
Alberta	4,000
Metal Mining: Sudbury	2,250
Munitions: Quebec City	500
Chemical Products: Parry Sound ..	200
Glass Manufacturing: Hamilton ..	100
Meat Packing: Winnipeg	100
Flour Milling: Port Colborne	100

Subsequent reports from local Employment Offices as to lay-offs involving more than 25 workers form the basis of the following table covering the whole strike period:—

Lay-offs of Non-railway Workers as a Result of Railway Strike

Industry	Atlantic	Quebec	Ontario	Prairies	Pacific	Canada
Logging					45	45
Coal Mining	3,615			4,150	590	8,355
Metal Mining		75	3,000		415	3,490
Manufacturing:						
Food Products	1,260		1,420	1,360	40	4,080
Wood Products		400			180	580
Textiles		45	120	30		195
Paper Products	155		425		15	595
Iron and Steel	50	540	1,500	175		2,265
Chemicals	190	215	330	155	150	1,040
Petroleum Products				45		45
Non-metallic Minerals	325	625	325	40	35	1,350
Non-ferrous Metals				40		40
Electrical Apparatus		65	35			100
Construction and Maintenance.....	60			70		130
Transportation and Communications		120	90	360	380	950
Trade				130		130
Service					40	40
Total	5,655	2,085	7,245	6,555	1,890	23,430

The following table gives the most complete information presently available as to the numbers of workers on the railways and ancillary services who were on strike or laid off because of the strike, together with those who remained at work. Although the table is for August 28, it is considered to represent fairly accurately the situation that existed throughout the entire strike period.

Preliminary Estimate of Number of Railway Workers on Strike, Laid off and Still at Work, August 28, 1950

	CNR	CPR	Other railways	Total
Number on Strike:				
Railway Transportation	73,000	47,000 ¹	3,000	123,000
Hotels	1,650			1,650
Water Transportation	350	700		1,050
Total on Strike.....	75,000	47,700	3,000	125,700
Number Laid Off:				
Running Trades	16,500	16,000 ²		32,500
Sleeping and Dining Car Staffs.....		2,000		2,000
Extra Gangs	4,000	3,000		7,000
Water Transportation		1,300		1,300
Other railways—miscellaneous			3,500	3,500
Total Laid Off.....	20,500	22,300	3,500	46,300
Number at Work:				
Hotels	500	4,100		4,600
Others	8,000	8,900		16,900
Other railways—miscellaneous			5,500	5,500
Total at Work.....	8,500	13,000	5,500³	27,000
Grand Total	104,000	83,000	12,000	199,000

¹ Includes 4,600 express employees engaged by a subsidiary company.

² Includes some smaller groups of employees such as yardmasters, signalmen, news agents, restaurant employees and communications personnel, numbering in all around 2,000.

³ The principal railways, among some fifteen operating are the New York Central, The Algoma Central, the Pacific Great Eastern and the Sydney and Lousburg.

Text of the Maintenance of Railway Operation Act

An Act to provide for the Resumption of Operations of Railways and for the Settlement of the Existing Dispute with respect to Terms and Conditions of Employment between Railway Companies and their Employees.

Whereas the operation of railways and subsidiary services serving the country as a whole has been suspended by reason of a failure of the railway companies and the bargaining agents of non-operating, and certain other employees of the companies to reach agreement as to certain terms and conditions of employment;

And whereas the vital interests of the people of Canada and the welfare and security of the nation are imperilled by the suspension of operation of the railways, particularly in existing international conditions;

And whereas the railway companies and the bargaining agents of the employees appear to have agreed that existing wage rates should be increased, and the forty-hour week introduced but appear to have been unable to agree as to the amount and effective date of the wage increase or the date at which the forty-hour week would be effective and the terms and conditions upon which it would be introduced;

And whereas it is essential to protect the interests of the people of Canada and the welfare and security of the nation that operation of the railways be resumed immediately and that for this purpose provision be made for provisional terms and conditions of employment of employees and for the final settlement thereof;

Now therefore His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:—

1. This Act may be cited as *The Maintenance of Railway Operation Act*.

2. Within forty-eight hours after the commencement of this Act every railway company shall resume operation of the railway and subsidiary services the operation of which is suspended by reason of the strike now existing and every employee who is now on strike shall return to the duties of his employment with the railway company by which he is employed.

3. The terms of each collective agreement to which this Act applies are provisionally amended forthwith by increasing by four cents per hour each rate of wages established by or pursuant to the agreement.

4. (1) Subject to amendment of its terms and conditions in accordance with this Act, the term of each collective agreement to which this Act applies is extended to include the period beginning on the commencement of this Act and ending on the day on which a new collective agreement entered into between the parties thereto in amendment or revision thereof comes into effect, or on which the arbitrator by a decision under this Act fixes the term of a collective agreement to be entered into in amendment or revision thereof, whichever is the earlier.

(2) The terms and conditions of a collective agreement mentioned in subsection one, amended as provided in this Act, shall be effective and binding on the parties thereto for the period therein mentioned notwithstanding anything contained in *The Indus-*

trial Relations and Disputes Investigation Act or in the agreement and that Act shall apply in respect of the agreement as so amended as if the period during which the agreement was extended by this section were the term of the agreement.

5. (1) If within thirty days after the commencement of this Act, or such longer period as may be fixed by the Governor in Council at the joint request of a railway company and a union, agreement has not been reached between them either as to the terms of a collective agreement in revision or amendment of a collective agreement to which this Act applies or as to an arbitrator to decide such terms, the Governor in Council shall appoint an arbitrator to decide all matters not then agreed upon between them that appear to the arbitrator necessary to be decided for conclusion of such a collective agreement, including the fixing of a term during which the collective agreement shall operate and, subject to subsection two, the fixing of a day or days, whether before or after the decision of the arbitrator, to which the terms of the collective agreement may be retroactive.

(2) The arbitrator shall, with all convenient dispatch, determine and decide from time to time the matters that have not been agreed upon mentioned in subsection one, and if the arbitrator decides that rates of wages fixed by or pursuant to a collective agreement to which this Act applies shall be increased other than by reason of a reduction in the number of hours of work required to be performed each week, the increased rates of wages shall be retroactive to a day not later than the day on which the employees return to work pursuant to this Act.

(3) In deciding any matter under this section, the arbitrator shall decide the matter within the limits of the proposals that he determines were made by the railway companies and the unions in respect of that matter at the time negotiations were terminated between them on the twenty-sixth day of August, nineteen hundred and fifty, or were made by either of them after the commencement of this Act at any time before the matter came before him and which narrow these limits, but the arbitrator by his decision shall not provide for a reduction in a rate of wages established pursuant to section three.

(4) Where the arbitrator has decided any matter not agreed upon between a railway company and a union mentioned in subsection one, the railway company and the union shall give effect to the decision and shall conclude a collective agreement for that purpose and until they do so the collective agreement to which this Act applies to which they are parties shall be deemed for the purposes of *The Industrial Relations and Disputes Investigation Act* to have been amended, *mutatis mutandis*, to give effect to the decision and to have effect, notwithstanding anything in that Act, for the term fixed by the arbitrator, but nothing in this section shall be deemed to limit or restrict the rights of parties to the agreement to agree to vary or amend any of the terms of the agreement as so amended and to give effect thereto.

(5) The arbitrator may establish the procedure to be followed for the purposes of the arbitration.

(6) The arbitrator shall, for the purposes of the arbitration, have all the powers conferred on a conciliation board under sections thirty-three and thirty-four of *The Industrial Relations and Disputes Investigation Act* for the purpose of conciliation proceedings.

6. No person acting on behalf of a railway company shall refuse to permit, or authorize or direct another person to refuse to permit an employee who has gone on strike before the commencement of this Act to return to the performance of the duties of his employment with the railway company or discharge, or authorize or direct another person to discharge such an employee by reason of the employee having gone on strike.

7. Each person who at the beginning of the strike of employees now existing was authorized on behalf of a union to bargain collectively with a railway company for the revision or amendment of a collective agreement to which this Act applies, shall forthwith give notice to the members of the union that any declaration, authorization or direction to go on strike, declared, authorized, or given to them before the commencement of this Act has become invalid by reason of the coming into force of this Act.

8. In this Act

- (a) "arbitrator" means an arbitrator appointed under section five;
- (b) "collective agreement to which this Act applies" means a collective agreement between a railway company and a union the revision or amendment of which was the subject of negotiations between the railway company and the union on the twenty-first day of August, nineteen hundred and fifty, under the provisions of *The Industrial Relations and Disputes Investigation Act*;
- (c) "employee" means an employee of a railway company bound by a collective agreement to which this Act applies, or on whose behalf such a collective agreement has been entered into between the railway company and a union representing the employee;
- (d) "railway company" means a company, commission or association listed in Schedule A;
- (e) "union" means a trade union listed in Schedule B; and
- (f) other words and expressions have the same meaning as in *The Industrial Relations and Disputes Investigation Act*.

SCHEDULE A

Canadian Pacific Railway Company
 Dominion Atlantic Railway Company
 Esquimalt and Nanaimo Railway Company
 Quebec Central Railway Company
 Canadian Pacific Express Company
 Eastern Abattoirs Limited, Montreal, Que.
 New Brunswick Cold Storage Company Limited, Saint John, N.B.

Canadian National Railways
 Canadian National Railway Company
 Montreal and Southern Counties Railway Company
 Niagara, St. Catharines and Toronto Railway Company
 Thousand Islands Railway Company
 Canadian National Telegraph Company
 Canadian National Steamship Company Limited
 Canadian National Transportation Limited, Port Arthur, Ont.
 Northern Alberta Railway Company
 Montreal Stockyards Company
 Toronto Terminals Railway Company
 The Public Markets Limited, St. Boniface, Man.
 Ontario Northland Transportation Commission
 The Toronto, Hamilton and Buffalo Railway Company
 The Railway Association of Canada
 Vancouver Hotel Company Limited.

SCHEDULE B

Commercial Telegraphers' Union of North America
 Brotherhood of Railroad Signalmen of America
 International Brotherhood of Electrical Workers
 Canadian Brotherhood of Railway Employees and Other Transport Workers
 Brotherhood of Express Employees
 The Order of Railroad Telegraphers
 Brotherhood of Maintenance of Way Employees
 Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees
 International Brotherhood of Blacksmiths, Drop Forgers and Helpers
 International Association of Machinists
 United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada
 Brotherhood of Railway Carmen of America
 International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America
 Sheet Metal Workers' International Association
 International Moulders and Foundry Workers' Union of North America
 International Brotherhood of Firemen and Oilers, Power Plant Employees, Roundhouse and Railway Shop Labourers
 Hotel and Restaurant Employees and Bartenders' International Union.

CANADIAN CO-OPERATIVES CONTINUE TO EXPAND

Canadian co-operatives recorded a membership of close to a million and a quarter persons in 1949, and did a business of over a billion dollars.

For the first time since records have been kept, the annual volume of business transacted by Canadian co-operatives in 1949, exceeded one billion dollars, according to the eighteenth annual summary compiled and published by the Economics Division of the Federal Department of Agriculture under the title *Co-operation in Canada, 1949*. The increase over the total reported in 1948 amounted to over \$200,000,000. The marketing co-operatives reported a volume increase of approximately \$167,000,000 in 1949 and the purchasing co-operatives \$34,000,000.

Among the marketing and purchasing co-operatives there was an increase of 128 associations, or about five per cent. The number of fishermen's co-operatives that reported increased by 16, due mainly to the inclusion of Newfoundland, together with a small increase in Prince Edward Island. Service co-operatives showed a gain of 88, derived mostly from more complete coverage in Ontario and Quebec.

The membership recorded was 1,219,712 and the total business amounted to \$1,001,437,990. Newfoundland, which reported for the first time in 1949 showed a membership of 6,092 in 35 co-operatives, seven of which are fishermen's and the remainder marketing and purchasing co-operatives. The Department of Fisheries and Co-operatives in the new province is responsible for administering co-operative legislation and supervising co-operative activities. Resulting from a conference of co-operative leaders in Newfoundland held at Grand Falls in November, 1949, arrangements were completed with co-operatives in Moncton and Halifax to aid in the marketing of fish. Steps were also taken to organize a provincial co-operative union which, it is expected, will become affiliated with the Co-operative Union of Canada.

For the crop year ended July 31, 1949, the sales value of farm products marketed by co-operatives in Canada amounted to \$783,293,225, an increase of \$166,945,748 over the total reported for the preceding crop year. All farm products, with the exception of wool, fruits and vegetables, shared in the general increase. The largest increase was reported by the dairy products, livestock and grain co-operatives. Sales

values of grains increased by \$81,000,000. This increase, it is stated, was due to a rise in price of western wheat, as well as increased handlings by the three pools and the United Grain Growers.

Considered in relation to sales values, it has been calculated that during 1948-49, co-operatives handled 32.9 per cent of the main farm products which entered into commercial channels of trade, an increase of .8 per cent over the preceding year.

Merchandising

Sales of merchandise (food products, clothing, home furnishings, petroleum products, feed, fertilizers, machinery, fuel and building materials, etc.) amounted to \$191,804,630, an increase of \$33,930,585 over the previous year. The increases occurred mainly in sale of farm machinery, clothing, home furnishings, food and fuel.

Retailing

Attention is drawn in the summary, to the difficulties encountered in compiling statistics on co-operative retail sales, inasmuch as not all merchandising is carried on in what was generally regarded as "stores". It was stated, however, that the sales of food products in 769 co-operative retail stores amounted to \$48,900,000 during 1949. Clothing and home furnishings were handled by 532 outlets, but the volume in these items was small compared to feed and fertilizer sales of \$15,000,000 through 317 stores.

Wholesaling

There were eleven co-operatives mainly engaged in wholesaling farm supplies and consumer goods that reported in 1949. These eleven wholesales had 24 places of business and were owned, through federation, by 1,829 local co-operatives. Their total assets amounted to \$20,354,250. Plant value, or value of fixed assets, less allowance for depreciation amounted to \$5,010,973, an increase of \$1,000,000 over 1948.

It is pointed out in the summary that co-operative wholesaling in Canada has not, as yet, been sufficiently developed to serve

fully all local co-operatives. This was shown by a comparison of the sales figures of the local associations with those of the wholesales, the former being much greater than the latter.

Service Co-operatives

It is stated that service co-operatives are steadily increasing in number and membership. The 156 service type co-operatives that reported in 1949 had a combined membership of 58,714, and the total revenue derived from services rendered during the year amounted to \$2,500,000. Electricity co-operatives in Quebec and Alberta were helping in the extension of electric services to rural areas. In Ontario, rural medical service co-operatives were providing pre-paid hospital plans for thousands of farmers and their families. A unique co-operative in Ontario is designed to provide a restful vacation for farmer members and their families. The co-operative has acquired 85 acres of land on the shore of a lake in central Ontario. The land is being cleared and cottages will be built to provide the rural citizens of the area with a centre for rest and relaxation in the form of picnics, fishing, swimming, boating, etc.

Fishermen's Co-operatives

More than 100 fishermen's co-operatives, with a combined membership of 16,300, reported on their operations for 1949. The

total business transacted amounted to \$16,729,765. This was an increase over the previous year by reason of the inclusion of seven associations in Newfoundland, as well as ten others that reported for the first time.

Increasing interest in the co-operative marketing of fish by inland lake fishermen is evident from the incorporation of the Inland Lake Fishermen's Co-operative on Lake Erie and of a similar association by fishermen on Lake Winnipeg. In northern Saskatchewan a school to train co-operative leaders has been proposed with a view to handling the product of the commercial fisheries of the many lakes in the northern portion of the province.

Insurance

There were 410 organizations classified as farmers' mutual fire insurance companies active in Canada in 1948. The net amount of insurance at risk with these associations was reported to be over two billion dollars and losses paid in 1948 amounted to \$5,552,594.

The Co-operative Life Insurance Company, with headquarters in Regina transacted business in six provinces and was planning to extend operations to a seventh province. It reported coverage on the lives of 38,000 Canadians in 1949 and the amount of insurance in force was \$25,800,000, an increase of \$8,000,000 over 1948.

INTERNATIONAL LABOUR ORGANIZATION

112th Session of ILO Governing Body

At the 112th Session of the Governing Body of the International Labour Office, held at Geneva during June, 1950, the Canadian Government was represented by Mr. N. F. H. Berlis, Secretary, Permanent Delegation of Canada to the European Office of the United Nations; while Mr. Harry Taylor, Canadian National Carbon Company Ltd., Toronto, was present as a member of the Employers' group.

A series of questions relating to the work of the ILO were considered at this meeting. A total of 22 items were on the agenda of the session; but since many of the decisions taken were of an administrative nature, only a few, of general interest, are described here.

Studies of Labour Problems

The Governing Body instructed the International Labour Office to prepare "law and practice" reports on the following subjects so that it may then be decided whether these items should be included on the agenda for the 1952 Session of the International Labour Conference:—

(a) protection of the health of workers in dangerous trades;

(b) reduction of working hours as a result of increased productivity;

(c) employment of young persons in underground work in coal mines.

It was decided to appoint committees to deal with the following three subjects: Systems of Payment by Results; Status and Conditions of Employment of Domestic Workers; Industrial Safety and Health.

Technical Assistance

The Governing Body approved the general lines of a program describing some of the technical assistance activities which the Organization could undertake in the manpower field. These include: the establishment of a model employment office, organization of employment information institutes, occupational analyses and classi-

fication, general organization and administration of national training programs.

The Governing Body accepted an offer made by the States Members of the Organization for European Economic Co-operation which are Members of the ILO to make available to the ILO a total sum amounting to the equivalent of \$988,000 for the establishment of a special fund to be devoted to financing additional action in the field of migration. In the memorandum explaining this offer, the States Members of the OEEC expressed their appreciation of the work carried out by the Preliminary Conference on Migration held at Geneva from April 25 to May 9, 1950. The Governing Body authorized the Director-General, in the expenditure of these funds, to furnish technical assistance to emigration and immigration countries in accordance with the conclusions of this Conference.

Industrial Committees

A series of decisions was taken relative to the programs of various industrial committees of the ILO. The Petroleum Committee will hold its third session in Geneva, October 23 to November 4. The Textiles Committee will meet at Lyons, later in November. The Plantations Committee will hold its first session in Indonesia in December. During 1951, the Building, Coal, and Inland Transport Committees will meet.

Freedom of Association

The Governing Body completed the membership of the Fact-Finding and Conciliation Commission on Freedom of Association (L.G., May, 1950, p. 666) with the appointment of Sir Harold Beresford Butler, K.C.M.G., C.B. (United Kingdom), Director of the International Labour Office, 1932-1938; and the Hon. Frank J. Murray (United States of America), Associate Justice of the Massachusetts Superior Court.

Legislative Jurisdiction in Regard to Recent Conventions and Recommendations

Following the close of each Session of the International Labour Conference, it is the practice of the Department of Labour to refer any Conventions or Recommendations which have been adopted to the Department of Justice for an opinion as to

whether their subject matter lies within federal or provincial jurisdiction.

On July 11, 1950, the Deputy Minister of Justice gave an opinion in regard to the texts adopted at the 32nd Session of the International Labour Conference, held

in Geneva in 1949 (L.G., Sept., 1949, p. 1088). Of the eight Conventions adopted at this Conference, four were stated to be wholly within federal jurisdiction; the remaining Conventions, and all four of the Recommendations, were considered to be partly within federal and partly within provincial jurisdiction.

The opinion was set forth in the following letter:—

DEPARTMENT OF JUSTICE
OTTAWA

Ottawa, July 11, 1950.

The Deputy Minister,
Department of Labour,
Ottawa.

DEAR SIR:

Re: *ILO Conventions and Recommendations*

You have requested my opinion as to whether the following Conventions and Recommendations of the International Labour Conference are appropriate under the constitutional system of Canada for federal action or for action in whole or in part by the governments of the Provinces:—

Convention (No. 91) concerning vacation holidays with pay for seafarers (Revised, 1949);

Convention (No. 92) concerning crew accommodation on board ship (Revised, 1949);

Convention (No. 93) concerning wages, hours of work on board ship and manning (Revised, 1949);

Convention (No. 94) concerning labour clauses in public contracts;

Convention (No. 95) concerning the protection of wages;

Convention (No. 96) concerning fee-charging employment agencies (Revised, 1949);

Convention (No. 97) concerning migration for employment (Revised, 1949);

Convention (No. 98) concerning the application of the principles of the right to organize and to bargain collectively;

Recommendation (No. 84) concerning labour clauses in public contracts;

Recommendation (No. 85) concerning the protection of wages;

Recommendation (No. 86) concerning migration for employment (Revised, 1949);

Recommendation (No. 87) concerning vocational guidance.

I am of opinion that the Conventions numbered 91, 92, 93 and 94 are wholly within the authority of Parliament, being in relation to shipping and to labour clauses in public contracts entered into by the central authority. I am further of opinion that the Conventions numbered 95, 96, 97 and 98 and the Recommendations numbered 84, 85, 86 and 87 are partly within the authority of Parliament and partly within the authority of the Legislatures of the Provinces.

Yours truly,

(Sgd.) F. P. VARCOE,
Deputy Minister.

Proposal for International Study of Industrial Health

A committee of experts on industrial hygiene, appointed jointly by the International Labour Organization and the World Health Organization, recently recommended that ILO and WHO collaborate in a preliminary investigation of the effects of modern industrial methods on the health and life expectancy of workers.

The committee suggested that the investigation should serve as a basis for the consideration of what further action might usefully be taken on the problem. The committee's proposal arose from a suggestion contained in a memorandum submitted by the American Federation of Labour.

This recommendation was contained in a report adopted by the committee at the conclusion of a six-day meeting at the International Labour Office.

The committee reviewed the activities of the two organizations in the field of industrial hygiene, and recommended that close liaison be maintained between them to assure "that the appropriate aspects of a particular matter are dealt with by the appropriate body."

The committee expressed the view that special training of doctors and auxiliary medical personnel was required in the field of industrial health.

The meeting was attended by five members appointed by ILO and four named by WHO. Sir Joseph Bhore, Chairman of the Indian Health Survey and Development Committee, was unanimously elected as Chairman.

The committee's report will be submitted to the Governing Body of the ILO and the Executive Board of WHO.

EMPLOYEE RECREATION ACTIVITIES IN THE UNITED STATES

A recent survey of employee recreation programs in 264 United States firms lists 158 different activities carried on by the various companies. Three-fifths of the programs are administered by the employees, but 9.2 per cent of the companies make some contribution to the operating expenses.

Recreation programs for workers in the United States are the subject of a report* prepared by the National Industrial Conference Board and published in New York in December, 1949. Designed to guide management in deciding whether or not to adopt a specific policy on employee recreation, the report provides information on the organizing and financing of suitable programs.

A total of 264 plants and offices which were known to have employee recreation activities were chosen for the survey. The number of persons employed by these companies was 1,245,124 including 1,034,922 employed by 216 manufacturing companies.

The report points out that the recreation activities of a company will vary according to the geographic location of the plant or office, the availability of other recreation activities, the age, sex, background and marital status of employees, the hours of work, the length of the lunch period, and the support of employees and management. The size of the company, while a contributing factor, is not so important since activities depend, for the most part, upon initiative and planning over which the large company does not have a monopoly.

Of the 100 activities which were most popular among employees, approximately one-half were athletic or sports activities, a quarter were educational and cultural and a quarter were social. The four most popular recreations were sports—bowling, softball, golf and basketball. Immediately following in popularity were two social pastimes—picnics and Christmas parties.

Other popular activities were horseshoes, parties, baseball, social dancing, banquets, chorus or glee club, table tennis, movies, lawn tennis, bridge, photography, checkers, fishing, gun club, chess, volley ball, library, rifle shooting, excursions, badminton, swimming, theatre tickets at discount, play production, archery, band, fashion shows, pinochle, shuffleboard, pistol shooting, gar-

dening, horseback riding, square dancing, minstrel show, pool, stamp club, darts, roller skating, lectures, billiards, smokers, trap shooting, cribbage, field days, bingo, hobby show, public speaking, club, musicale revues, handball, boxing, theatre parties, ice skating, orchestra, quoits, skeet shooting, bait casting, calisthenics, skiing, sewing, hunting, dancing class, touch football, weight lifting, carnival, boating, bocce, hobby club, kittenball, scouting, dartball, flying, art class or club, euchre, hockey, beauty contests, hiking, dominoes, fencing, football, wrestling, knitting, personality course, camping, croquet, model making, operetta, track and field, leather work, bicycling club, crocheting, foreign language class, metal work, deck tennis, radio club, magazine editing.

With regard to sports, the report observed: "The sports activities found most frequently in programs of the companies in this survey are those in which a large number of employees participate, as opposed to those in which they are spectators. Baseball, for instance, ordinarily considered a game requiring professional skill, is far outranked by softball."

The children of employees play a special part in certain organized activities. It was learned that the Christmas party was the major company recreation in which children participated, the younger generation being included in this event in 84 out of the 264 companies. Other events in which the children are often included are picnics and special movie parties designed to appeal to the younger mind. During the summer, some firms open their recreation areas to children, and a few maintain summer camps which the children attend for periods of a week or more.

Recreation Facilities

The development of employee recreation programs is, in many cases, dependent upon the extent to which the facilities of agencies outside the company are used. The survey revealed that the most general type of facility utilized was athletic fields. Of the 171 companies using athletic fields, 51 per

* *Employee Recreation Activities—Administration and Cost.* Studies in Personnel Policy, No. 102. National Industrial Conference Board, Inc., 247 Park Avenue, New York 17, N.Y.

cent had their own facilities and 40 per cent used public facilities. Usually, the company bore the entire cost of maintenance.

Assembly halls utilized by two-fifths of the companies varied greatly in size, from a small basement room to large auditoriums seating hundreds of employees. About 65 per cent of the companies maintained their own halls.

According to the report, 130 companies used picnic grounds, 52 taking advantage of public facilities, 47 using their own grounds and 31 renting outside facilities. If company grounds were equipped with tables and benches, they could also provide, in favourable weather, a place for eating daily lunches and for playing table games.

Thirty-seven companies were found to be still assisting employees with the garden projects which were started during the war.

Administration

In most cases, recreation activities are managed by the employees, the report showed. In only a little over a third of the companies, the personnel department acted as the chief administrative agency. Even when that department does handle administration, the company employees may have their own recreation organizations. In some plants, the personnel branch coordinates activities that are organized by the employees, and in others participates to a greater degree in the planning.

Central employee associations administered 46 per cent of the recreation programs included in the survey. In 33 of the 121 associations, membership was automatic with commencement of employment. Activities were financed not by dues but by such means as automatic vending machines, playing or admission fees or company contributions. The remaining 88 associations charged membership dues.

Almost two-thirds of the associations were governed by boards of directors, governors or trustees, the largest group having between 5 and 9 directors. In the majority of cases, the directors were chosen annually, continuity being achieved in certain associations by having only a part of the directors elected or appointed each year.

Administration by Trade Unions

In several companies, local trade unions sponsored recreation activities for union members, but in only one did the survey find that the union handled the major part of the recreation for all employees.

The recreation headquarters of this union, the United Automobile Workers (CIO) situated in Detroit, consist of a director,

assistant director and stenographers. Specialists are employed on a part-time basis. The director is responsible for the inter-union recreational activities of the union members living in that city. Fourteen regional councils, generally made up of the recreation chairmen from the local unions in the area, manage programs in other sectors of the country where union members are concentrated.

Directors

The survey showed that a full-time recreation director (also known as recreation counsellor, recreation co-ordinator, etc.) was employed by a quarter of the companies surveyed. In 64 per cent of these companies the director, whether part-time or full-time, reported to the head of personnel; in eleven per cent he was under the supervision of the head of employee services; and in 7.4 per cent he reported to employees.

Staff Programs

In more than one-fifth of the companies, the employees ran the recreation programs without assistance from management, and in over half there was only part-time assistance from the employers.

Sports referees constituted the largest group of employed non-staff assistants, with persons assisting in musical activities the next largest. "Eighteen companies employ music directors," the report noted, "13 choral directors, seven have band directors and two have orchestra leaders."

Financing the Programs

In the great majority of recreation programs, management and workers joined in meeting the financial costs. Next to company contributions, the most important source of revenue was playing fees (bowling, pool, golf, etc.). Half of the companies used this method of financing. A considerable number relied to a certain extent on profits from automatic vending machines while others found canteen profits a good source of revenue. Through their association or club dues, employees in 42 per cent of the companies helped to pay for their recreation activities.

In many cases where the company contributed toward recreation funds, the donation was directly related to the employee contribution. This amount was set by the management as a definite proportion—ranging from 50 to 200 per cent—of the dues paid to the recreation association or of the total income of the association.

The median company expenditure for each employee was estimated as follows:—

“The median is \$10 per employee in companies having less than 500 employees, \$5 per employee in companies having 500 but less than 1,000 employees, \$2.50 in companies having between 1,000 and 5,000 employees and \$1.88 in the largest companies, those having 5,000 or more employees. The median company expenditure for the entire group of 166 companies is \$2.88 per employee.”

Over three-fourths of the companies contributed to the cost of medical and hospital treatment for employees injured during recreation periods.

Conclusion

In assessing the value of company programs, the report comments:—

“The wide appeal of recreation programs, as presently demonstrated, is shown by the fact that more than 45 per cent of the companies surveyed report that 50 per cent or more of their employees are taking part in the company programs. As the company increases in size, it becomes more

difficult to obtain a high degree of participation, even though the program is expanded in the larger organization to offer more activities to satisfy more interests. While in the group of largest companies—those with 5,000 or more employees—37 per cent have programs in which at least half of their employees participate, nearly two-thirds of the companies having less than 500 employees report that degree of participation. In most of the companies in the smallest-size category, at least 70 per cent of the employees are taking part.”

In the opinions of the various managements, a number of specific advantages resulted from organized recreation. Heading these was improvement in morale, which was mentioned by 30 per cent of the companies. Second on the list was the opportunity for employees to become better acquainted with each other and with members of the management. Other worthwhile benefits were the availability of recreation at a lower cost than the individual employee can afford, improvement in health and a chance to develop personality.

RECENT PREPAREDNESS MEASURES IN THE UNITED STATES

The sudden outbreak of war in South Korea and the tense world situation resulted in extensive measures for preparedness in the United States.

The following article summarizes the more important of these steps, as they affect the U.S. economy, and the attempt to combat inflation by voluntary means if possible.

In reviewing the position of the U.S. economy, on July 26, soon after the outbreak of the Korean war, President Truman asserted that the chief national goal in this critical period was “production and more production.” Despite a record national output of \$270 billion, Mr. Truman warned that still higher productivity objectives must be set and met.

Mr. Truman estimated that present American human and material resources should enable the country this year to add another \$8 to \$10 billion to present peak output. The administration was confident that the U.S. economy had weathered its post-war trials, and was now ready to forge ahead.

The task as laid out by the President was twofold: first, to get the greatest volume of total production possible; and secondly to emphasize the right kind of production, and the best utilization of products. This program, while not as all-absorbing of the economy's output as in World War II, would, in Mr. Truman's opinion, demand sacrifices by all Americans.

In presenting his economic review to Congress in late July, Mr. Truman asked for certain basic minimum powers as a brake against inflation. He requested control of consumer instalment credit; restraint of private real estate credit; mandatory authority for the allocation of priorities and essential materials, and a limit on the

production of non-essential civilian goods which require strategic materials; government cutbacks on projects requiring essential manpower, materials or facilities; stepped up procurements; and loans to producers of military equipment. Mr. Truman did not ask for legislation for price, wage or manpower controls, or for rationing.

Labour's Participation

Organized labour in the U.S. was quick to give its full support to the preparedness program, but asked to be allowed "genuine participation in the planning and administration of defence policy."

Early in July, representatives of labour met with W. Stuart Symington, Chairman of the National Security Resources Board to discuss labour's role in the program. As a result of this meeting, a twelve-man national policy committee was formed to consult with Mr. Symington on domestic mobilization plans. The committee will equally represent labour, industry, agriculture and the public. Labour is to be represented by CIO President Philip Murray, AFL President William Green, and Al. J. Hayes, President of the International Association of Machinists. However, those present at the meeting were not entirely satisfied, and a joint statement on labour policy in this regard was issued by William Green, AFL President, following the meeting. In his statement, Mr. Green said:—

"We pointed out to Mr. Symington that any plan for present or future mobilization of American resources must provide full and adequate representation for organized labour in the policy, planning and operational divisions of the Government agencies involved. It was also pointed out that the creation of more advisory bodies in such agencies will not meet the nation's needs, and that in the past this type of advisory structure has proved ineffective."

In the important field of industrial relations, President Green of the AFL has gone on record as saying "that we (the AFL) stand ready now, as we did in World War II when we gave the no-strike pledge, to do so whenever the President . . . advises us such action is necessary. . . ." John L. Lewis, UMW President, opposed such a proposal; and CIO President Philip Murray felt that it was premature.

Manpower

In the manpower field, U.S. employment figures were at the highest level in history during August. The Census Bureau reported employment at 62,367,000 for the

month, an increase of over one million from July.

It is still too early, the Bureau reported, for the economy to reflect the full impact of the crisis on the manpower situation. However, while no mass manpower shortage has developed, there are indications that the supply of skilled workers in certain critical industries is becoming limited. In comparison with 1940, the possible reserve of manpower which can be utilized in the near future is small. There were over 8,000,000 unemployed in 1940 compared to 2,500,000 in 1950. Commenting on this situation, the U.S. Secretary of Commerce said:—

"The economy was gradually moving toward full employment before the Korean crisis. With increasing defence preparations, it may be expected that this trend will continue at an accelerated pace."

Another complicating factor in the manpower situation is the demand of the draft. The U.S. Army had requested Selective Service to draft a total of 170,000 men by November, and in addition it is expected that over 500,000 reservists and National Guardsmen are slated for call by late fall. By the end of the year, two million men are to be in uniform. Early in September, President Truman announced a new goal of three million men for the armed services to meet American commitments in Europe and elsewhere. These figures do not include certain "smaller-than-divisional size" Reserve units called to service.

These service requirements are expected to have some effect on industry in that skilled workers will be among those called, and as the labour supply dwindles, management will find it more difficult to find suitable replacements.

Legislation

On September 1, the U.S. Congress passed the Defence Production Bill, which had been under discussion since July 19. The bill, as signed by President Truman is in seven sections. These deal with price and wage stabilization; priorities and allocations; authority to requisition; expansion of productive capacity and supply; settlement of labour disputes; control of consumer and real estate credit; and certain general provisions.

The bill empowers the President to seek the voluntary co-operation of industry and labour to keep down prices and stabilize wages, and, if it becomes necessary, to invoke mandatory controls on a selective basis in any industry or industries where he finds prices rising at an unreasonable rate. However, if prices in a given industry are fixed, wages must also be frozen.

If conditions should reach a very critical or chaotic stage, Mr. Truman is empowered to call for blanket price and wage controls covering all industry, and is obligated to set up an agency similar to the World War II Office of Price Administration to administer price regulations. The basic price period, should price control become necessary, is between May 24 and June 24, 1950. The bill also states that "no wage, salary or other compensation shall be stabilized at less than that paid during the period from May 24, 1950 to June 24, 1950 inclusive." Prices or rentals for real property, professional services, insurance rates and rates of utilities and public carriers are exempted from the bill's provisions. Rentals were already controlled by a separate act.

The act also gives the President authority to set up an agency equivalent to the War Labour Board of World War II, for the settlement of labour disputes. However, no action contrary to the Fair Labour Standards Act of 1938, as amended, the Taft-Hartley Act of 1947, or other applicable laws can be taken under this provision of the bill.

The other provisions of the bill give the President wide powers in other sectors of the economy, as well as providing for a joint ten man committee of the Senate and House of Representatives to keep the bill's operations under constant surveillance.

Economic Stabilization Agency

Under the powers granted him by the Defence Production Bill, President Truman on September 9, announced the creation of the Economic Stabilization Agency to curb both prices and wages by voluntary means. In setting up the new agency, Mr. Truman said:—

"If we adhere faithfully to the principles of self-restraint . . . we can lessen the need for controls. But controls will still be necessary in some cases where voluntary individual action is not enough or where the honest majority must be protected from a few chiselers. In those cases, the Government will not hesitate to use its powers."

In his statement, Mr. Truman asked for higher income taxes, an excess profits tax, harder work and longer hours, and no pay raises over and above those necessary to keep up with the cost of living. He named W. Stuart Symington, as co-ordinator of the whole program. At the same time, the President laid the basis for price controls by ordering business to keep records of prices and costs between May 24 and June 24. In closing his address, Mr. Truman said that "to the extent necessary, workers and plants will have to stop making some civilian goods and begin turning out military equipment."

THIRTEENTH ANNUAL CONVENTION OF THE QUEBEC PROVINCIAL FEDERATION OF LABOUR (TLC)

Commencing with this year the Federation will present a brief annually direct to the Minister of Labour of the Province of Quebec on matters concerning provincial labour legislation.

The thirteenth annual convention of the Quebec Provincial Federation of Labour was held in Quebec City on June 16, 17 and 18, 1950. The convention was opened by Mr. J. B. Hurens, President of the Federated Trades and Labour Council of Quebec and Lévis. After welcoming the delegates on behalf of his organization, Mr. Hurens introduced Mr. Lucien Borne, Mayor of Quebec, Mr. Raoul Trépanier, a former President of the Federation and now in the Conciliation Service of the Federal Department of Labour, and Mr. Gordon G. Cushing, General Secretary-Treasurer of the Trades and Labour Congress of Canada, who delivered the opening address and conveyed to the delegates the good wishes of Mr. Percy Bengough, President of the Congress.

Fraternal delegates to the convention were Mr. J. P. Nicol, director of the Education and Research Department of the Brotherhood of Pulp, Sulphite and Paper Mill Workers, and Mr. Harry Finch, international representative of the International Typographical Union.

Progress of Labour Organization in Quebec Province

Before discussing the various activities of the Trades and Labour Congress during the year, Mr. Cushing emphasized the fact that the workers of the Province of Quebec have made just as rapid progress as those in any other place in Canada:—

"I remember that on several occasions the Province of Quebec has been blamed

for delaying the progress of the rest of Canada, I have been attending the conventions of the Trades and Labour Congress of Canada since 1941, and I have often seen resolutions presented requesting an improvement in wages and working conditions in the Province of Quebec in order to allow other parts of the country and other workers to get ahead. I have heard a number of delegates expressing themselves this way: 'If it wasn't for the Province of Quebec, we could get better conditions than we have now'. Since I have had the opportunity of getting a closer view of the labour situation—and by that I mean from the headquarters of the Congress—I realize how unjust these assertions were. The workers in the Province of Quebec have made just as rapid progress as those in any other place in Canada, and I am convinced that they will continue to advance. The improvement in wages and working conditions has been phenomenal in many cases, and the workers of Quebec Province have no reason to be ashamed before their fellow-workers in other parts of the country when it comes to good organizations and good results. May I recall, for example, the wonderful negotiations held in Montreal this year, when the carpenters succeeded in obtaining the 40-hour week with the same take-home pay, plus an increase of \$1 a week. This gave Montreal carpenters a higher wage rate than carpenters are receiving in several parts of the sister Province of Ontario, and, in fact, in several other parts of Canada. I have also examined the health and welfare scheme set up by the Quebec District Council and the Dominion Rubber Company, and I maintain that very few unions in Canada have such a good system. All this is the result of strong unions, strong central councils and a strong provincial organization. I advise you not to forget it."

Mr. Cushing then reviewed the activities of the TLC during the year and predicted that by the time of the big national convention to be held at Montreal in September it would have a membership of 500,000.

Elections

The election of officers for the year 1950-51 resulted as follows: President, Marcel E. Franq; Secretary-Treasurer, Edouard Larose; General Vice-Presidents: R. M. Bennett and Roger Provost, Montreal; Roger D. Labrie, Three Rivers; Harry Bell, Quebec; Benoit Lavolette, St. Jérôme; René Fournier, Granby, and René Laniel, Valleyfield.

Relief Fund, Rimouski and Cabano

The Executive Council of the Quebec Provincial Federation of Labour, in its report to the conference, stated that a relief fund had been set up after the conflagrations at Rimouski and Cabano for the purpose of helping the families of workers in these two towns, which were so severely tried. The Secretariat appealed immediately to all unions affiliated with the Federation and to the General Presidents of international unions affiliated with the American Federation of Labour and reported that \$29,364.17 had been subscribed at the date of the convention.

Resolutions

Seventy-five resolutions were presented to the convention, covering such questions as Workmen's Compensation Act, unemployment insurance, Provincial Labour Code, labour relations, old age pensions, health insurance, employment conditions, family allowances, vacations with pay, rent control, etc. The convention also studied and adopted a new constitution.

Education and Research Service.—The convention authorized the executive of the Federation to set up an education and research service. The object of this service, which will have a permanent director, is to assist the organizers and negotiating agents of all groups affiliated with the Federation in obtaining information concerning the cost of living, comparative wage rates, retirement pensions, social insurance, industry's ability to pay, market conditions for products, etc.

Rent Control.—The delegates agreed unanimously to ask that rent controls be continued by the Provincial Government from April 30 next, when the Federal Government is to give up the control which it has exercised during and since the war. The delegates also urged that this provincial control be continued so long as there is a shortage of dwellings.

Workmen's Compensation.—It was also resolved that the Provincial Government be asked to amend the Workmen's Compensation Act as follows, and that it be extended to cover all workers, whatever their occupations:—

(1) compensation equal to 100 per cent of the wage loss of the victim of the accident;

(2) that the Act apply in a general way to all industrial diseases and diseases which may be attributed to the nature of the employment, whatever the disease or the employment may be;

(3) that the sanctions provided for in the Act be applied whenever an employer is responsible for delay in the payment of compensation to the claimant;

(4) that compensation be paid from the date of the accident or of the disability without any waiting period;

(5) that the Act specifically require the doctor to submit his report within a definite time limit;

(6) that the Workmen's Compensation Commission be instructed to supervise the application of preventive measures, and that a competent and sufficiently large staff be hired for that purpose;

(7) that the Act apply to all occupations and to the diseases and accidents attributable to the nature of the employment;

(8) that the Act guarantee immediate payment of compensation to any person suffering from hernia where there is a possibility that this trouble results from performance of duty.

Communism.—"In order that the labour movement may continue effectively its great struggle to safeguard the interests of the working classes," the Quebec convention adopted a resolution condemning the Communist doctrine and severely censuring Communists and "fellow-travellers" for their subversive activities.

All branches of the Federation were also advised to prevent Communists and Communist sympathizers from obtaining any key positions in the Quebec Provincial Federation of Labour.

It was also agreed that all locals would actively engage in dislodging Communist sympathizers from any confidential posts they may now hold.

Unemployment Insurance.—In regard to unemployment insurance, the members expressed disappointment at "the existing short-comings", and have asked that benefits be based on all contributions paid since its inception instead of only on the last two years' contributions. It was also urged that the law be amended in such a way as to cover all employees, regardless of the nature of their employment.

It was further declared that it is not sufficient to grant benefits to the unemployed, but that they must also be found employment. It was therefore agreed to urge the Government, through the Trades and Labour Congress of Canada, to undertake public works to a sufficient extent to provide employment to the greatest possible number of those presently unemployed.

Other Resolutions

Another important resolution was adopted in the form of a recommendation to "remedy a current condition which prevents the workers from giving their children advanced education." The Federation will ask the Provincial Government to increase in number and value the scholarships granted to workers' children.

The convention also declared itself in favour of a provincial lottery, provided that the income therefrom be applied exclusively to social services, and that its administration be entrusted to a committee of prominent citizens so that it could not be made to serve political and election purposes.

Finally, the convention discussed the question of street-car fares for workers employed at nights.

After explaining that thousands of workers have to go to and from work at times when night fares are in effect, it was unanimously agreed to urge that regular fares be maintained 24 hours a day. It was explained in support of this request that the additional income represented by night fares is insignificant in comparison with the total receipts and that it does not justify the continuance of these special rates, which result in substantial costs to the worker.

Recruiting Drive

The international labour movement in the Province of Quebec is to inaugurate an extensive recruiting drive among non-unionized labour. The workers' delegates from all Quebec industrial centres attending the thirteenth annual convention of the Quebec Provincial Federation have chosen this means of celebrating the 100th birthday of Samuel Gompers, founder and first president of the American Federation of Labour.

QPF Brief Submitted to Quebec Minister of Labour

A representative delegation of the Quebec Federation of Labour was received on June 15 in the office of the Minister of Labour, the Hon. Antonio Barrette. The delegation included members affiliated with the Federation of Labour and the Trades and Labour Congress of Canada, and officers of the Federation, and was headed by the president of the Federation, Mr. Marcel E. Franço, who presented the brief to the Minister. The Deputy Minister of Labour, Mr. Gérard Tremblay, was also present.

This presentation of a brief to the Minister of Labour is, in a way, a new procedure. Before each session of the Provincial Legislature it is customary for the Federation to present to the Prime Minister and his Cabinet a brief concerning questions on which legislative action is desired. Henceforth, the Federation will also meet with the Minister of Labour in order to discuss with him those questions relating to the administration of labour legislation within the jurisdiction of his Department.

The brief submitted by the QPF included recommendations concerning various laws such as the Labour Relations Act, Minimum Wage Act, Collective Agreement Act, Industrial Establishments Act, Employment Bureaus Act, Workmen's Compensation Act and, lastly, the Pipe Mechanics Act. The memorandum also urged publication by the Provincial Department of Labour of a *LABOUR GAZETTE*.

Labour Relations Act.—The brief declared that the Labour Relations Act of the Province of Quebec affords no protection and guarantees in no way the right of association of the workers of the Province of Quebec and that, on the other hand, it has the effect of preventing workers in using strike action when submitted to intimidation, even when reprisals are used against them, because they are members of the union of their choice.

The brief further declared that the Labour Relations Board does not take into account the fact that unions affiliated with the American Federation of Labour are mostly craft unions which can only accept workers of their craft as members.

Minimum Wage Act.—The Federation's memorandum expressed the opinion that the Minimum Wage Board is not taking into account the rising standard of living actually prevailing, and the constant development of commerce and industry in the Province of Quebec:—

"The minimum rates fixed by ordinance No. 4 are ridiculous if one notes that the rates stipulated by this ordinance are inferior even to the benefits paid by the Unemployment Insurance, and that it is far more profitable for a worker, male or female, to remain unemployed than to work at the rates stipulated by the ordinance.

"With the present industrial and economic development, it is necessary that the Government, with the collaboration of employer and employee assoc-

iations, study the present ordinances, which are administered by the Minimum Wage Board and try in each particular industry to issue a separate ordinance instead of having one general ordinance covering many industries.

"Many of our affiliated unions complain that ordinances are used in order to maintain low wages and too long hours of work.

"Thus, we believe, that the ordinances should be revised and should stipulate higher minimum wages and reduced hours of work."

Collective Agreement Act.—The brief suggested that the Collective Agreement Act be amended in order that parity committees may not compete unfairly with labour unions in the issuance of competency cards by granting them for an indefinite period of time, or by charging low fees for their issuance, less than the dues which the member has to pay to his union.

For the purpose of protecting crafts and in order that the law might be observed more effectively, the Federation recommends that the law and decrees be amended in such a way that the parity committee may order that any worker on a job be obliged to possess his competency card; that a definition of crafts be inserted in the decrees; that competency cards be granted in accordance therewith; and, finally, that apprentices on the job or unemployed be forced to register with the parity committee so that the committee in the interest of industry might be in a position to follow their progress.

Labour Relations Act.—The brief suggested, among other things, that no children of sixteen years or under should be employed in factories or workshops. "We believe that it is necessary for the intellectual development of our nation that it be compulsory for our children to go to school up to the age of sixteen, and that no exception be made to that rule even by permit. Under the present law, the granting of special permits provides means of avoiding and abusing the law."

Workmen's Compensation Act.—The Federation recommended that the legislators study the possibility of extending the scope of industrial illnesses covered by the Workmen's Compensation Act, and suggested that means be taken to force employers as well as employees to use all known safeguards to stop or, at least, diminish industrial accidents and illnesses.

This section covers proceedings under two federal statutes, the Industrial Relations and Disputes Investigation Act and the Conciliation and Labour Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board and the Industrial Relations Branch of the Department.

INDUSTRIAL RELATIONS AND CONCILIATION

The railway strike eclipsed all other labour disputes during August, but interesting developments occurred elsewhere in the field of labour-management relations.

Introduction

The railway strike which crippled transportation, telegraphs and ancillary services on a nation-wide scale from August 22 to August 30 completely overshadowed all other developments in labour-management relations during the month. As the railway dispute is reported in a feature article elsewhere in this issue, it will not be discussed in this section.

On August 4 a deadlock was reported in direct negotiations for collective agreements between the American Newspaper Guild and The Canadian Press and its radio subsidiary, Press News Limited. The union applied to the Minister of Labour for intervention and, on August 17 Mr. James H. Stitt, of Ottawa, was appointed as Conciliation Officer to endeavour to mediate the dispute between the parties. Mr. Stitt was given the status of an Industrial Inquiry Commission pursuant to the provisions of Section 56 of the Industrial Relations and Disputes Investigation Act for the purpose of carrying out his assignment. Early in September Mr. Stitt reported that he had been unable to effect a solution of the disputes and that the parties favoured the establishment of conciliation boards as the next step looking towards settlements. On September 9 the Minister of Labour established separate Boards of Conciliation and Investigation, and the parties were invited to submit nominations of persons to act thereon.

On August 3 the Minister of Labour received the unanimous report of a Board of Conciliation and Investigation appointed to deal with matters in dispute between the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and the Lakehead Terminal Elevator Association, representing ten terminal elevator companies at Fort William and Port Arthur, Ont. Later in the month the employers advised the Department that they were willing to accept the recommendations of the Board,

but on September 1 the union gave notice that the report was not acceptable and that proceedings were under way to obtain from the employees an expression of their willingness to withdraw from the service of the companies in the event of failure to reach a satisfactory settlement through further negotiations.

The dispute between the Seafarers' International Union of North America, Canadian District, and three coastal shipping companies on the West Coast, which had been submitted to the usual conciliation procedures came to a head during the month. On August 25, while the Canadian National Steamships and the British Columbia Coast Steamship Service of the Canadian Pacific Railway Company were already tied up by reason of the railway strike, the SIU began a strike against the third company involved in the dispute, namely Union Steamships Limited. When railway operations were resumed on August 31, the Seafarers' International Union decided to extend its strike to the vessels of the two railway companies. On instructions of the Minister of Labour, an officer of the Industrial Relations Branch of the Department had already been in touch with the local representatives of the parties. With his assistance and that of senior officers of the Department, an agreement was signed on the night of September 1 to the effect that the Seafarers' International Union and the three companies affected would abide by conditions of settlement similar to those provided for in the legislation adopted by Parliament in terminating the railway strike, namely, a wage increase of 4 cents per hour effective immediately and the adoption of whatever changes in working conditions might result for coastal steamship personnel which might follow from the negotiations or arbitration carried on pursuant to The Maintenance of Railway Operation Act. It was reported further that the hourly increase would

apply to overtime rates, and that the hours of work performed by deck and engine-room ratings on vessels of Canadian National Steamships and the coast steam-

ship service of the CPR would be eight hours in a spread of not more than sixteen hours. Operations were resumed immediately in accordance with the settlement.

Certification and Other Proceedings Before the Canada Labour Relations Board

The Canada Labour Relations Board met for two days during the month of August. The Board issued four certificates designating bargaining agents, rejected one application for certification, rejected one application for revocation of certification, and ordered six representation votes. During the month the Board received seven applications for certification.

Applications for Certification Granted

1. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, for a unit of employees of the Canadian Pacific Railway Company employed in the office of the auditor of freight receipts, Windsor Street Station, Montreal (L.G., Aug., 1950, p. 1169).

2. The West Coast Seamen's Union (Canada), for a unit of unlicensed personnel employed by Westward Shipping Company Limited, Vancouver, on board the vessels m.v. *Standard Service* and m.v. *B.C. Standard* (L.G., Aug., 1950, p. 1169).

3. Local 1454, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, for a unit of employees of Canada Coach Lines Limited, Hamilton, employed in its operations and maintenance divisions (L.G., Aug., 1950, p. 1169).

4. The West Coast Seamen's Union (Canada), for a unit of unlicensed personnel employed by Shell Canadian Tankers Limited, Vancouver, on board the m.v. *Western Shell* (L.G., Sept., 1950, p. 1556).

Application for Certification Rejected

The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and the Canadian Pacific Railway Company (second stewards, B.C. Coast Steamship Service) (L.G., May, 1950, p. 675). The application was rejected for the reason that the second stewards affected by the application were not considered by the Board to be employees within the meaning of the Act, their duties involving management functions.

Application for Revocation of Certification Rejected

Union Steamships Limited, Vancouver, and Division No. 59, Canadian Brotherhood of Railway Employees and Other Transport Workers (L.G., July, 1950, p. 1041). The Board rejected the application following the taking of a representation vote (L.G., Aug., 1950, p. 1169).

Representation Votes Ordered

1. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Albert G. Baker Co., Ltd., Quebec, P.Q. (L.G., June, 1950, p. 824) (Returning Officer: L. Pepin).

2. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Clarke Steamship Co., Ltd., Quebec, P.Q. (L.G., June, 1950, p. 824) (Returning Officer: L. Pepin).

3. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and W. G. McCauley, Quebec, P.Q. (L.G., June, 1950, p. 824) (Returning Officer: L. Pepin).

4. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Anglo-Canadian Pulp and Paper Mills, Ltd., Quebec, P.Q. (L.G., June, 1950, p. 824) (Returning Officer: L. Pepin).

5. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Robin Hood Flour Mills, Ltd., Quebec, P.Q. (L.G., June, 1950, p. 825) (Returning Officer: L. Pepin).

6. District Council No. 3, National Association of Marine Engineers of Canada, Inc., and Paterson Steamships Limited, Fort William (L.G., Sept., 1950, p. 1556). (Returning Officer: F. J. Ainsborough).

Following investigation of the foregoing applications and public hearings of the parties concerned in all but the last application, the Board ordered representation votes of the employees affected.

Applications for Certification Received

1. The Canadian Air Line Flight Attendants Association, on behalf of steward-

esses employed by Canadian Pacific Air Lines Limited (Investigation Officer: J. S. Gunn).

2. The National Association of Marine Engineers of Canada, Inc., on behalf of engineers employed by Provincial Steamships Limited, St. John's, Nfld., on board the vessel *Federal Trader* (Investigating Officer: J. R. Kinley).

3. The National Association of Marine Engineers of Canada, Inc., on behalf of engineers employed by Northlantic Sealers Limited, St. John's, Nfld., on board the vessel *Blue Seal* (Investigating Officer: J. R. Kinley).

4. The Canadian Brotherhood of Railway Employees and Other Transport Workers, on behalf of a unit of employees

of Island Motor Transport, Limited, Charlottetown, P.E.I. (Investigating Officer: J. R. Kinley).

5. The Canadian Merchant Service Guild, Inc., on behalf of deck officers employed by Provincial Steamships Limited, St. John's, Nfld., on board the vessel *Federal Trader* (Investigating Officer: J. R. Kinley).

6. The Canadian Merchant Service Guild, Inc., on behalf of deck officers employed by Northlantic Sealers Limited, St. John's, Nfld., on board the ss. *Blue Seal* (Investigating Officer: J. R. Kinley).

7. The National Seamen's Association of Canada, on behalf of unlicensed personnel employed by Keystone Transports Limited, Montreal, on ships operating on coastal and inland waters (Investigating Officer: L. Pepin).

Conciliation and Other Proceedings Before the Minister of Labour

Conciliation Officers Appointed

1. On August 24 the Minister appointed a Conciliation Officer to deal with a dispute between the American Newspaper Guild and The Canadian Press (Conciliation Officer: James H. Stitt).

2. On August 24 the Minister appointed a Conciliation Officer to deal with a dispute between the American Newspaper Guild and Press News Limited (Conciliation Officer: James H. Stitt).

Conciliation Board Report Received

On August 3 the Minister received the unanimous report of the Board of Conciliation and Investigation appointed to deal with matters in dispute between the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and the Lakehead Terminal Elevator Association, representing ten terminal elevator companies at Fort William and Port Arthur, Ont. (L.G., June, 1950, p. 825). The text of the report of the Board is reproduced below.

Strikes Following Board Procedure

1. On August 22 fifteen international labour unions began a strike against the Canadian National Railways, the Canadian Pacific Railway Company, the Ontario Northland Railway, and the Toronto, Hamilton and Buffalo Railway Company, following receipt of the report of the Board

of Conciliation and Investigation appointed to deal with the dispute between the parties (L.G., June, 1950, p. 826). The strike was called off on August 30 in compliance with an Act of Parliament directing the resumption of railway operations. Details of the dispute are published elsewhere in this section.

2. On August 22 the Canadian Brotherhood of Railway Employees and Other Transport Workers and the Brotherhood of Express Employees began a strike against the Canadian National Railways, the Canadian Pacific Railway Company, and the Ontario Northland Railway, following receipt of the report of the Board of Conciliation and Investigation appointed to deal with the dispute between the parties (L.G., June, 1950, p. 826). The strike was called off on August 30 in compliance with an Act of Parliament directing the resumption of railway operations. Details of the dispute are published elsewhere in this section.

3. On August 25 the Seafarers International Union of North America, Canadian District, began a strike against Union Steamships Limited and on August 31 against Canadian National Steamships and the Canadian Pacific Railway Company (British Columbia Coast Steamship Service), following receipt of the report of the Board of Conciliation and Investigation appointed to deal with the dispute between the parties (L.G., Sept., 1950, p. 1557). Details of the dispute are published elsewhere in this section.

Applications for Consent to Prosecute Received

1. On August 3 the Minister received an application from the Canadian Brotherhood of Seamen for consent to prosecute the Gulf and Lake Navigation Company Limited, Montreal, and the Seafarers' International Union of North America,

Canadian Division, for alleged violations of Section 4 of the Act.

2. On August 18 the Minister received an application from one, Philippe Gagnon, for consent to prosecute the Quebec and Ontario Transportation Company Limited, Montreal, and the Seafarers' International Union of North America, Canadian Division, for alleged violation of Section 4 of the Act.

REPORT OF BOARD in dispute between

Various Terminal Elevator Companies at Fort William and Port Arthur, represented by the Lakehead Terminal Elevator Association,

and

The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

HON. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

In the matter of the Industrial Relations and Disputes Investigation Act, and of a dispute between the Lakehead Terminal Elevator Association, representing ten companies: The Canadian Consolidated Grain Company Limited; Eastern Terminal Elevator Company Limited; The Fort William Elevator Company Ltd.; Federal Grain Limited; Lakehead Terminals Limited; McCabe Grain Company Limited; The Ogilvie Flour Mills Co., Limited; N. M. Paterson & Co., Ltd.; United Grain Growers Terminals Limited; Western Grain Company Limited; Manitoba Pool Elevators and Saskatchewan Pool Terminals Limited (Employers),

and

the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Bargaining Agent).

SIR:

The Board of Conciliation and Investigation established in the above matter and composed of the Hon. Mr. Justice J. T. Beaubien, of the Court of King's Bench for the Province of Manitoba, Chairman; Mr. William A. Johnston, K.C., of the City of Winnipeg, in the Province of Manitoba, nominated by the employers; and Mr. A. J. Wickens, K.C., of the City of Moose Jaw, in the Province of Saskatchewan, nominated by the employees; held the following meetings: May 5, 1950 and May 7, 1950 at the City of Winnipeg, June 26, 1950 at Port Arthur, July 17, 1950 and July 18, 1950 at the City of Winnipeg, and July 22,

On August 3, 1950, the Acting Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with a dispute between various Terminal Elevator Companies at Fort William and Port Arthur, represented by the Lakehead Terminal Elevator Association, and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (L.G., June, 1950, p. 825).

The Board was composed of the Hon. Mr. Justice J. T. Beaubien, Winnipeg, Chairman; W. A. Johnston, K.C., Winnipeg, and A. J. Wickens, K.C., Moose Jaw, members appointed on the nominations of the employers and employees respectively.

The text of the Board's report is reproduced herewith.

1950 and July 31, 1950 at the City of Winnipeg.

The employees were represented by:—

Mr. F. H. Hall, vice-Grand President.

Mr. A. Mose, Asst. to vice-Grand President.

Mr. J. L. Pateman, General Chairman, System Board.

Mr. G. Hamilton, General Secretary-Treasurer, System Board.

Mr. H. Mead, General Chairman, CSL Board.

Mr. C. W. Hardwick, Local Chairman, Lodge 650.

Mr. C. Donald, President, Lodge 650.

Mr. C. Seaman, Secretary, Lodge 650.

Mr. F. Watson, R. Plummerton, M. McKay, D. McMillan, members negotiating committee, Lodge 650.

The employers were represented as follows:—

Mr. M. A. McPherson, K.C., of Regina, Saskatchewan, representing Manitoba Pool Elevators and Saskatchewan Pool Terminals Limited at all sittings; Mr. E. B. Pitblado, of Winnipeg, Manitoba, representing the other above-named companies at the hearings in Port Arthur; and Mr. Isaac Pitblado, K.C., and Mr. E. B. Pitblado, both of the City of Winnipeg, aforesaid, representing the other companies at the meetings in the City of Winnipeg.

At the opening of the meeting in Port Arthur on June 26, 1950, the employees' representatives stated that they withdrew all matters previously raised in this dispute with the exception of the following, namely:—

Their request for,

1. Union Shop.
2. Five-day forty-hour week at the same take-home pay as the presently existing forty-eight hour week, and
3. Wage increase of seven cents per hour after the proposed reduction in the hours of work.

1. *Union Shop*.—The evidence of both sides before the Board having established

that the relations between the employers and employees have been in the past and now are most harmonious the Board feels that no change should be made in the present form of Union representation and does not recommend a Union Shop.

2. *Five-day forty-hour week*.—After fully considering all representations made by all parties, the Board does not recommend a five-day forty-hour week.

3. *Wage Increase*.—The members of the Board being imbued with the desire that a settlement may be reached between the parties, and with that end in view recommend an increase of five (·05¢) cents per hour for hourly employees and a corresponding increase for the monthly employees.

The Board suggests that the term of contract and the date of suggested increase be settled by the parties.

All of which is respectfully submitted this 31st day of July, A.D. 1950.

(Sgd.) J. T. BEAUBIEN,
Chairman.

(Sgd.) WM. A. JOHNSTON,
Employers' Nominee.

(Sgd.) A. J. WICKENS,
Employee Nominee.

COLLECTIVE AGREEMENTS AND WAGE SCHEDULES

Recent Collective Agreements

A file of collective agreements is maintained in the Economics and Research Branch of the Department of Labour. These are obtained directly from the parties involved and through the Industrial Relations Branch of the Department. A number of those recently received are summarized below.

Agreements made obligatory under the Collective Agreement Act in Quebec and schedules under Industrial Standards Acts, etc., are summarized in separate articles following this.

Logging

BRITISH COLUMBIA COASTAL REGION.—CERTAIN LOGGING FIRMS AND INTERNATIONAL WOODWORKERS OF AMERICA.

Agreement to be in effect from June 15, 1950, to June 14, 1951, and thereafter from year to year, subject to 60 days' notice. The companies recognize the union as the sole collective bargaining agency for all eligible

employees and agree that the only certification that they will recognize during the term of the agreement is that of the union, unless ordered by due process of law to recognize some other bargaining authority.

Union security: the company will cooperate with the union in obtaining and retaining as members the eligible employees. Any employee who is now a member in good standing, or who becomes or is reinstated as a member of the union shall, as a condition of continued employment, maintain such membership in good standing throughout the term of the agreement, subject to such procedure as may be mutually satisfactory to both parties. *Check-off*: the companies agree to deduct union dues monthly and also initiation fees, back dues and assessments from the pay of employees who so authorize and to remit same to the union.

Hours: 8 per day 5 days a week, a 40-hour week, except for cookhouse and bunkhouse employees in unorganized territory, firefighters, boatmen, first-aid attendants and watchmen (time worked by cookhouse and bunkhouse employees shall be computed on a daily basis; such employees shall be entitled

to one day off in seven). *Overtime*: time and one-half shall be paid for work in excess of above hours and for work on the regular days of rest and on 7 specified holidays.

Vacations with pay will be granted employees in accordance with the provisions of the Annual Holidays Act of British Columbia. Employees with 5 or more years' continuous service will receive an additional week's vacation with pay or pay in lieu thereof. Cookhouse and bunkhouse employees in unorganized territory will receive one week after 6 months' service, provided that they shall not be entitled to more than 2 weeks in any one year, except that after 5 years' service they shall receive the additional week's vacation with pay or pay in lieu thereof.

Wages previously in effect shall be increased by 12½ cents an hour to all employees covered by this agreement, making the minimum rate for common labour (man) \$1.20½ per hour. The wage scale may, subject to mutual consent, be revised once annually. The rate for board and lodging in logging camp boarding-houses shall not exceed \$2.25 per day; where a lesser rate is in effect, that rate will prevail.

Night shift premium of 6 cents per hour will be paid for work on the second and third shifts.

Provision is made for *grievance procedure*, *seniority rights* and an *accident prevention committee*.

Mining

Metal Mining

YELLOWKNIFE, N.W.T.—THE CONSOLIDATED MINING AND SMELTING COMPANY OF CANADA, LIMITED, AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 802.

Agreement to be in effect from June 16, 1950, to June 15, 1951, and thereafter, subject to 2 months' notice. This agreement is similar to the one between the Consolidated Mining and Smelting Company, Limited, Trail, B.C., and the International Union of Mine, Mill and Smelter Workers, Local 480, summarized below, except for the following:

Hours: 8 per day, 48 per week. *Overtime*: time and one-half for work in excess of the above hours and for work on 3 specified holidays; double time for work on three other specified *paid holidays*. (The previous agreement did not provide for any paid holidays.)

Hourly wage rates for certain classes: mine—shaft miner \$1.35, timberman, raise and drift miners, barman, core hole diamond driller, steel sharpener, main hoistman \$1.30; stope miner, skip tender, mucking machine operator, pipeman \$1.25; motorman \$1.21; hand mucker, trackman, powderman, miner's helper, sampler, timber helper, nipper \$1.18; trammer, deckman, underground labourer \$1.15; surface—hand steeler, tractor driver, truck driver, assay office helper and bucker \$1.18; bucker, fireman \$1.15; labourer, dryman \$1.09; mill—repairman, roasterman \$1.30; flotation operator, solution man \$1.25; crusherman, ball mill operator \$1.21; oiler, ore sorter, mill helper \$1.15; tradesmen—dragline operator \$1.60; bulldozer operator, machinist, plumber or steamfitter \$1.35; mechanics, pipefitters, welders \$1.25 to \$1.30; blacksmiths, electricians, carpenters \$1.25 to

\$1.35; painters \$1.20 to \$1.30. The above rates represent an increase of 12 cents per hour over the previous rates.

A shift differential shall be paid as follows: afternoon shift 3 cents per hour, night shift 4 cents per hour, graveyard shift 5 cents per hour.

Transportation: the company agrees to provide transportation to the property in accordance with its present regulations; the qualifying period for one way transportation will be reduced to 200 shifts and for return transportation to 300 shifts.

Board and lodging shall be available to the employees on the basis of cost. However, as an interim measure, from June 16, 1950, to September 15, 1950, the cost to the employee shall be \$2 per day, from September 16 to October 31, 1950, \$2.50 per day; thereafter employees obtaining board and lodging shall pay the cost to the company of such board and lodging.

Provision is made for *seniority rights*, *grievance procedure* and the setting up of a *Mine and Surface Safety Committee*.

Manufacturing

Wood Products

BRITISH COLUMBIA COASTAL REGION.—CERTAIN FIRMS ENGAGED IN MANUFACTURING OF ROUGH AND DRESSED LUMBER, PLYWOOD, VENEER, BOXES, SHINGLES, DOORS, ETC. AND INTERNATIONAL WOODWORKERS OF AMERICA.

The agreement summarized above under "Logging" applies also to a number of companies engaged in manufacturing the above products.

Printing and Publishing

TORONTO, ONT.—THE TORONTO GRAPHIC ARTS ASSOCIATION, THE MASTER PRINTERS AND BOOKBINDERS ASSOCIATION OF TORONTO, THE UNION SHOP EMPLOYING PRINTERS OF TORONTO AND THE INTERNATIONAL BROTHERHOOD OF BOOKBINDERS AND BINDERY WOMEN, LOCAL 28.

Agreement to be in effect from November 1, 1949, to October 15, 1951, and thereafter from year to year, subject to notice. The employers acknowledge that the union is the agency through which journeymen and journeywomen bookbinders and apprentices are able to bargain collectively with the employers in the industry. No employee or employer is to be coerced or intimidated in any way for being a member or non-member of any union or employers' organization.

Hours: 8 per day Monday through Friday, a 40-hour week. Employees shall not be required to accept less than 8 hours' work on any week day or shift except where a short shift has been arranged or for Saturday morning work, or except in case of emergency. *Overtime*: time and one-half for the first 3 hours in excess of the regular shift in any one day and double time thereafter and for work on Sundays and on 8 specified *paid holidays*.

Vacations with pay: after one year's regular service with the company one week, after 2 years' service 2 weeks (the previous agreement provided for 2 weeks after 3 years' service). Employees with less than one year's service shall receive 2 per cent of their total earnings.

Minimum hourly wage rates: effective from November 1, 1949, to October 15, 1950—journeymen bookbinders \$1.60, journeywomen bookbinders 85 cents; effective from October 16, 1950, to October 15, 1951—journeymen bookbinders \$1.67½, journeywomen bookbinders 89½ cents. When employees through old age or other disabilities or inefficiency are unable to earn the standard rate of wages a lower rate may be paid with the prior approval of the Joint Arbitration Committee. Apprentice rates shall range from 35 per cent of journeymen's rate for male apprentices in first 6 months to 90 per cent in tenth 6 months, and for female apprentices from 60 per cent of journeywomen's rate during first 6 months to 90 per cent during sixth 6 months. *Night shift premium:* night shift workers shall receive a premium of 15 per cent of the day rate; where 3 shifts are worked 2 of them shall be considered night shift work.

Provision is made for *grievance procedure*.

TORONTO, ONT.—THE TORONTO GRAPHIC ARTS ASSOCIATION, THE MASTER PRINTERS AND BOOKBINDERS ASSOCIATION OF TORONTO, THE UNION SHOP EMPLOYING PRINTERS OF TORONTO, THE TORONTO TYPOGRAPHIC COMPOSITION ASSOCIATION AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL 10.

Agreement to be in effect from November 1, 1949, to October 15, 1951, and thereafter from year to year, subject to notice. This agreement is similar to the one between The Toronto Graphic Arts Association, The Master Printers and Bookbinders Association of Toronto and the International Printing Pressmen and Assistants' Union, Local 10, summarized in the *LABOUR GAZETTE*, May, 1948, p. 484, with the following changes:

Preferential hiring: the provision that in press rooms where the majority of the group composed of journeymen pressmen, apprentice pressmen, press assistants and apprentices are not members of the union in good standing the employer will give consideration to any satisfactory employee suggested by the union has been omitted.

Vacations with pay provisions are changed so that the second week is now granted employees after 2 years' service instead of after 5 as provided in the agreement referred to above or after 3 years' service as provided in the agreement which expired October 31, 1949.

Minimum hourly wage rates were increased 15 cents as of November 1, 1948, and another 10 cents as of November 1, 1949, the effective date of this agreement. An additional increase of 7½ cents, to become effective October 16, 1950, is provided in the agreement. The following are the rates in effect from November 1, 1949, to October 15, 1950: job pressmen \$1.57, cylinder pressmen \$1.60, press assistant (feeder) \$1.35; two colour cylinder pressmen \$1.65, with extra cylinder when used \$1.70; on rotary presses—pressmen \$1.60 to \$1.73; press assistants \$1.35 to \$1.44; first pressmen \$1.73 to \$1.89; second pressmen \$1.60 to \$1.68; on Claybourne presses, 4 or 5 colour—first pressmen \$1.90, second pressmen \$1.60, assistants \$1.35; 2 colour—pressmen \$1.75, assistants \$1.35; on Rotogravure presses—pressmen \$1.75, assistants \$1.45. As mentioned above, the above rates will be increased 7½ cents per hour effective October 16, 1950. Rate for appren-

tices—from 39 per cent of journeyman cylinder pressmen's rate during the first 6 months to 73 per cent during the eighth 6 months; beginning fifth year press assistants' scale; rate for apprentice pressmen (when appointed as such)—from 85 per cent of journeyman cylinder pressmen's rate during the first 6 months to 95 per cent during the eighth six months; beginning fifth year pressmen's scale.

Manufacturing

Metal Products

ST. JOHN'S, Nfld.—CERTAIN INDIVIDUALS AND FIRMS ENGAGED IN THE AUTOMOBILE INDUSTRY AND INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, WAREHOUSEMEN AND HELPERS OF AMERICA, LOCAL 855 (THE TRANSPORT AND OTHER WORKERS UNION).

Agreement to be in effect from March 25, 1950, to December 31, 1950, and thereafter from year to year, subject to 30 days' notice. The employers recognize the union during the term of this agreement as the sole collective bargaining agency for all eligible employees. However, certain employees (office workers, collectors, foremen, gas pump operators, etc.) whether members of the union or not, shall not be covered or affected by this agreement. An employer shall not discriminate against any employee because of union activities conducted outside of working hours; the union shall not intimidate or coerce employees into membership.

Hours: not more than 9 nor less than 5 in any one day, a maximum of 54 hours per week, except that tire servicemen, battery servicemen, lubricators and washers may be required to work 60 hours per week. *Overtime:* work in excess of the above hours shall be paid for at time and one-half before midnight and double time after midnight and for work performed on Sundays and on 4 specified *paid holidays*, except that tire servicemen, battery servicemen, lubricators and washers shall be paid time and one-half for any work in excess of 60 hours per week.

Vacations with pay: employees shall be entitled to one week after one year's continuous service.

Sick leave with pay not exceeding a total of 6 working days in any 12 months' period shall be granted after one year's continuous service.

Hourly wage rates: mechanics, body repair men, painters, welders, machinists—first class \$1, second class 90 cents, third class 85 cents, apprentices 30 cents with increases of 5 cents per hour every 6 months until the third class mechanic's rate of 85 cents is reached, provided their ability as adjudged by the employer warrants such increase; tire servicemen, battery servicemen, lubricators and washers 50 to 70 cents. No employee covered by this agreement shall engage in any work of a nature likely to be in competition with his employer.

Provision is made for *seniority rights and safety and health* of employees.

TORONTO, ONT.—THE JAMES MORRISON BRASS MANUFACTURING COMPANY LIMITED AND UNITED STEELWORKERS OF AMERICA, LOCAL 2946.

Agreement to be in effect from January 26, 1950, to May 31, 1951, and thereafter from year to year, subject to notice.

Union security: all employees who are presently members of the union or who join the union during the life of this agreement shall remain members for the duration of the agreement; new employees shall become members of the union within 60 days of their being employed.

Check-off: the company agrees to deduct monthly dues from the pay of all union members who so authorize. Any employee who was not a member of the union prior to June 1, 1947, may remain out of the union, but he shall authorize the company to deduct from his pay union dues in the amount of \$2 per month. The company shall remit all moneys so deducted to the union.

Hours: 8 per day Monday through Friday (except when night shift terminates early Saturday morning), a 40-hour week. *Overtime:* for production workers—time and one-half for the first two hours in excess of 8 hours per shift and for the first 4 hours on Saturday, double time thereafter and for work performed on Sundays and on all statutory holidays, 6 of which are *paid holidays* (the previous agreement provided for 4 paid holidays); for maintenance workers—time and one-half for all work in excess of 8 hours in any one shift and for work on Saturdays, Sundays and holidays. Any necessary overtime in taking of inventory shall be a matter of discussion between management and the union committee with the understanding that it shall be paid for at no less than time and one-half.

Vacations with pay: two weeks for all employees; those with one or more years' continuous service shall receive pay equal to their earnings at the time of vacation. Employees with less than one year's service shall receive pay equal to one twenty-fourth of their two weeks' earnings at that time for each one-half month's service previous to the vacation period.

Hourly wage rates for certain classes: bench hands 90 and 97 cents, core wire cutter, dial finisher, dipper (acid), night watchman, seating machine operator, trucker, wrappers and packers 90 cents; fireman, milling machine operator, spray paint 93 cents; casting cleaner, factor shipper 97 cents; core machine operator, machine moulder, polisher, seating machine hand \$1.01; core maker \$1.05 and \$1.09, engine lathe hand \$1.09 and \$1.17, fitter 97 cents to \$1.13, Goss automatic operator 93 and 97 cents, instrument maker 90 cents to \$1.05, labourer 90 and 93 cents, milling machine hand 97 cents to \$1.09, moulder \$1.05 to \$1.17, tool maker \$1.09 and \$1.21, tube maker 90 cents to \$1.09, turret lathe operator 90 and 93 cents, turret lathe hand 97 cents and \$1.05, turret lathe set up man \$1.13; carpenter, plater, spinner (metal) \$1.09; boring mill, Fox lathe hand \$1.17; pattern maker (wood) \$1.21. The above rates represent an increase of 16 cents per hour in the base rate and an across the board increase of 5 cents per hour over the rates previously in effect.

Off-shift differential: a premium of 10 cents per hour will be paid for any shift other than the regular day shift.

Provision is made for *seniority rights, grievance procedure* and the *health and safety* of employees.

TRAIL, B.C.—THE CONSOLIDATED MINING AND SMELTING COMPANY OF CANADA LTD., AND INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 480.

Agreement to be in effect from June 1, 1950, to May 31, 1951, and thereafter, subject to 2 months' notice. The company recognizes the union as the exclusive bargaining agent for all eligible employees. There shall be no intimidation or discrimination either by the company or the union because of membership or non-membership in the union.

Check-off: the company agrees to deduct union dues and assessments monthly from the pay of employees who so authorize and to remit same to the union; such authorization may be revoked at any time.

Hours: the regular working week shall constitute 40 or 42 hours or the equivalent.

Overtime: time and one-half shall be paid for work in excess of 8 hours in any one day and for work performed by an employee on his regularly assigned days off duty; double time for work on 6 specified *paid holidays*.

Vacations with pay: after one year's service one week, after 2 years' service 2 weeks and after 25 years' service 3 weeks (this last provision is a new one). Employees with less than one year's service shall be entitled to a vacation not exceeding one week with pay amounting to 2 per cent of wages earned during the previous year. For each period of 30 consecutive days an employee is absent from work during the year, without proper cause, there shall be deducted from the vacation pay to which he would otherwise be entitled one-twelfth of such pay.

Hourly wage rates: steam engineer, second class \$1.55, third class \$1.43; toolmaker \$1.51; journeyman tradesman \$1.47; painter \$1.43; repairman, chief operator, special \$1.43, first class \$1.39, second class \$1.35; operator, special \$1.31, first class \$1.27, second class \$1.23; helper \$1.19; plant labourer \$1.15; labourer \$1.11. These rates are 6 cents per hour higher than the rates previously in effect. An employee after 15 years' service shall be paid a minimum of the plant labourer's rate.

Shift differential: 4 cents per hour on afternoon shift and 8 cents per hour on night shift.

Provision is made for the maintenance of a *Labour-Management Production Committee*, the setting up of a *Safety and Industrial Hygiene Committee*, *seniority rights* and *grievance procedure*.

Transportation and Public Utilities

Electric Railways and Local Bus Lines

TORONTO, ONT.—THE TORONTO TRANSPORTATION COMMISSION AND AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES OF AMERICA, DIVISION NO. 113.

Agreement to be in effect from October 1, 1949, to September 30, 1951, and thereafter from year to year, subject to 30 days' notice.

Union security: all eligible male employees under 65 years of age in classifications covered by this agreement must, unless

already holding membership in any other labour union and working at their craft, within 30 days become and remain members in good standing of the association; all new employees shall become and remain members in good standing within 60 days after qualification. Juniors and apprentices and all temporary employees shall become associate members of the association within 60 days from the date of their employment at one-half the regular monthly dues. All employees seeking admission shall be admitted by the union and in case a member is suspended from the union the Commission shall have the right to maintain such employee in its service, subject to a thorough review of the case by both parties.

Check-off: The Commission agrees to check-off and remit to the association monthly from the pay of each employee covered by the agreement the proper dues and from members who so authorize all dues and such assessments as may be assessed against them.

Vacations with pay: 2 weeks will be allowed all hourly rated employees with 12 months' continuous service, 3 weeks for all hourly rated employees with 15 years' continuous service (previously 3 weeks were granted to employees with 20 years' service).

Statutory holidays: trainmen and drivers shall be paid time and one-half for all work on any holiday for which a special selection has been held and on which a special holiday schedule is in effect; maintenance and other non-uniformed hourly paid employees shall be paid double time for work on 4 specified *paid holidays* and time and one-half for work on 4 other specified holidays.

Hourly wage rates are in most cases increased by 17 cents per hour over the basic wage rates previously in effect. However, the previous agreement provided for a cost-of-living adjustment in addition to the basic rates; there is no such provision in this agreement.

Provision is made for a *pension fund, retirement gratuities, a disability allowance* to employees with a minimum period of continuous service of 10 years who have been incapacitated since January 5, 1940, and who are still on the Commission's payroll and members of the Pension Fund Society and for *sick benefits and medical services*.

Trainmen and City and Suburban Bus and Coach Drivers.

Hours: 8 per day, straight time, with a leeway of one-half trip to complete schedule for two-thirds of the crews, so far as practicable, the remainder to work ends and spares. Employees required to take cars, coaches or buses at the carhouse or the garage shall, at the first time reporting for the day, report to the office supervisor at least 10 minutes before scheduled time; when required to relieve on the street for the second and subsequent time and when not required to report to the office supervisor, they will be allowed travelling time equivalent to time required between the carhouse or the garage and the relief point, in excess of 10 minutes, at the regular rate of pay, such time in each case not to be computed as platform time. Trainmen and city and suburban bus and coach drivers on scheduled runs shall be paid for any extra time caused by being late when being relieved or running cars, coaches or buses into carhouses or garages when such delay is 10 minutes or

over. Trainmen and drivers required to operate cars, coaches or buses into or out of service from or to carhouses or garages or who may be required to report for a run or crew on the street or be relieved on the street shall be allowed 15 minutes once each day worked at standard rate to compensate for reporting and signing-in time. No man shall be given set off-days from 28 day period to 28 day period but shall take off-days in accordance with his position on the board, except in cases mutually agreed upon. Off-days to be given consecutively whenever possible.

Overtime shall be paid at time and one-half for all combined work over 8½ actual working hours, or for time in excess of 11½ hours' spread for two or more piece crews. Time and one-quarter will be paid for Sunday work; no extra payment will be made for overtime on Sunday.

Guaranteed pay: the Commission guarantees to each extra trainman or driver an amount equivalent to 6 hours' pay for each regular work day and a minimum amount for each regular pay period worked, equal to the equivalent of 70 hours per day period of 5 days per week, provided that such extra employees report for work when required and carry out the duties assigned to them. This guarantee shall be payable at the standard rate applicable in each case. All scheduled crews for trainmen and for drivers of city and suburban buses and coaches will be paid at least 8 hours per day.

Uniforms: the Commission will pay half the cost of the uniforms for trainmen and drivers with one year's service and will provide free uniforms for employees with more than two years' service; no employee shall be required to pay for more than one uniform and a half.

Hourly wage rates—starting, intermediate and maximum rates for certain classes: conductors and motormen \$1.14, \$1.16½ and \$1.19; pay-enter car and trolley coach operators, bus and coach drivers \$1.19, \$1.21½ and \$1.24; when in charge of trainees the above employees shall be paid 15 cents per hour extra.

Interurban Coach Drivers

Hours: the day's work will be arranged to suit the requirements of the business; existing arrangements as to personnel shall be continued.

Drivers required to take coaches at a terminal or garage at the first reporting for the day shall report to the terminal at least 10 minutes ahead of scheduled time; otherwise the runs shall be filled with other men if available.

The Commission will grant an allowance of \$1 for each meal, in excess of one, for drivers on trips requiring more than one meal away from their home terminal.

Provisions regarding overtime, guaranteed pay, uniforms are similar to the ones affecting trainmen and city and suburban bus and coach drivers outlined above.

Rolling Stock Department, Shop and Car House Employees and Garage Department Employees.

Hours: 8 per day, 5 days a week, for shop, car houses and garages. *Overtime:* time and one-half for work after regular 8-hour day, for work on regular off-days and for work on Saturday afternoon done at the

request of the Commission by employees who normally do not work on Saturday afternoon. Time and one-quarter shall be paid for Sunday work to regularly assigned employees; no extra payment will be made for overtime on Sundays.

Employees shall be given 5 minutes in which to wash before leaving work. Two suits of overalls shall be supplied free of charge every year to each hourly rated employee requiring them.

Hourly wage rates—starting, intermediate and maximum rates for certain classes (excluding lead hands); watchmen and janitors \$1.04 and \$1.07; shop helpers and car checkers \$1.08 and \$1.11; steam jenny and shop mule operators \$1.11, \$1.13 and \$1.15; transfer table and mono-rail crane operators \$1.14, \$1.16½ and \$1.19; traction motor installer, mounter (street car), motor repairmen \$1.19, \$1.21½ and \$1.24; wiremen \$1.24 to \$1.42; electrical repairmen \$1.11 to \$1.36; blacksmiths \$1.24 to \$1.36; machine shop \$1.11 to \$1.42; truck section, street car metal body repair \$1.11 to \$1.36; street car wood body repair shop, bus and coach body repair shop \$1.11 to \$1.42; upholsterers \$1.24 to \$1.30; painters \$1.14 to \$1.30; stores \$1.08 to \$1.24; apprentices in garage department from 89 cents during the first 6 months to \$1.24 during the sixth 6 months.

Way and Structures Department Employees.

Hours: the daily hours of work will be governed by the urgency of the work on hand, but normally there will be an 8-hour day or 4-hour half day. A 5½-day week will be worked by all employees except those in the buildings maintenance section who will work a 5-day week and those employees in the way shop section who will work a 5-day week from November 1 to April 30 inclusive. The Commission guarantees to every employee in the department a minimum of 7 hours' pay per regularly scheduled work day, provided such employee reports for work and carries out the duties that may be assigned to him.

Overtime: time and one-half for work in excess of 8 hours per day for employees with a regular 8-hour day and for all work on regular off-days. Time and one-quarter for all Sunday work to regularly assigned employees.

Two suits of overalls will be supplied free of charge every year to each hourly rated maintenance employee requiring same. Protective clothing shall be provided for the emergency crews and switch cleaners.

Hourly wage rates—starting, intermediate and maximum for certain classes: truck driver, fire inspector, Barber-Greene operator, trackman, switch cleaner, track-switch repairman \$1.11, \$1.13 and \$1.15; service car motorman, boiler fireman, general fire inspector, paver, general trackman, switch-lock repairman \$1.14, \$1.16½ and \$1.19; cement finisher (part time), shaper and planer operator, special trackwork fitter, track welder, track grinder \$1.19, \$1.21½ and \$1.24; shop welder, emergency track mechanic \$1.24, \$1.27 and \$1.30; general shop welder, electric crane operator, track bonder, \$1.30, \$1.33 and \$1.36; general machinist \$1.36, \$1.39 and \$1.42.

Divisional Clerks.

Hours: the day's work will be arranged to suit the requirements of the business, and normally will be an 8-hour day, 5 days per week.

Overtime shall be paid at time and one-half for all work in excess of 8 actual working hours per day and for all work on regular off-days and on 4 specified holidays; double time for work on 4 specified *paid holidays*. All Sunday work shall be paid for at time and one-quarter to regularly assigned employees.

Hourly wage rates: junior divisional clerks \$1.14 to \$1.19; divisional clerks (after 2½ years) \$1.21½ and \$1.24; general divisional clerks (after 6½ years) \$1.27 and \$1.30; senior divisional clerks \$1.36.

TORONTO, ONT.—THE TORONTO TRANSPORTATION COMMISSION AND THE NATIONAL ORGANIZATION OF CIVIC, UTILITY AND ELECTRICAL WORKERS, T.T.C. GROUP OF BRANCH No. 1.

Agreement to be in effect from March 26, 1950, to March 25, 1952, and thereafter from year to year, subject to 30 days' notice.

Union security: all eligible male employees of the electrical department must, unless already holding membership in any other labour union and working at their craft, within 30 days become and remain members in good standing of the organization as a condition of employment; all new employees covered by this agreement must become members within 60 days of date of employment. The organization will admit to membership all new employees and will not suspend or expel a member until agreed to by the Commission.

Check-off: the Commission agrees to check-off and remit to the organization monthly from the pay of each member of the organization who so authorizes all dues and such assessments as may be assessed against such member.

Hours: for day employees—8 per day Monday through Friday, a 40-hour week, except for substation operators and assistants who will work an average of 5½ days per week, 6 days one week and 5 days the next. For shift workers—8 hours per shift; each worker shall be entitled to the equivalent of one day's rest in 7. *Overtime:* for day employees—time and one-half for the first 4 hours worked within 5 hours of completing the normal day's work; double time for all other overtime and for all work on Saturdays, Sundays and on 8 specified statutory holidays, 4 of which are *paid holidays*. For shift workers—time and one-half for the first 4 hours worked within 5 hours of completing the normal day's work and for work on 4 specified holidays; double time for all other overtime and for work on 4 specified *paid holidays*. All normal working hours worked on Sunday will be paid at the rate of time and one-quarter.

Vacations with pay: 2 weeks to all employees who during the current year complete or have completed 12 months' continuous service and 3 weeks to employees completing 15 years' service.

Two suits of overalls will be supplied each year to each hourly rated employee requiring them.

Hourly wage rates: electricians, grade 1 \$1.36 to \$1.48, grade 2 \$1.30 to \$1.36, grade 3 \$1.19 to \$1.24; emergency linemen, grade 1 \$1.36 to \$1.42, grade 2 \$1.30 to \$1.36, grade 3 \$1.19 to \$1.24, senior substation operator \$1.30 to \$1.36, substation operator \$1.24 to \$1.30, assistant substation operators \$1.11 to \$1.19, helper \$1.08 and \$1.11; shop service

repairman \$1.19 to \$1.24, chauffeur groundsman \$1.14 to \$1.19, electricians's helper, chauffeur, service truck driver \$1.11 to \$1.15; electronic technician \$257.44 to \$287.69 per month.

Provision is made for *pensions, retirement gratuities, disability allowance* to certain employees, *sick benefits* and *medical services*.

TORONTO, ONT.—THE TORONTO TRANSPORTATION COMMISSION AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LODGE 235.

Agreement to be in effect from October 1, 1949, to September 30, 1951, and thereafter from year to year, subject to 30 days' notice.

Union security: all eligible male employees must, as a condition of continued employment, within 30 days become and remain members in good standing of the association except that any eligible employee who on April 29, 1946, was a member of Division 113, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, will not be required to join Lodge 235 of the association; however, the association will be his sole bargaining agency. New employees covered by this agreement must within 60 days from the date of qualification become and remain members in good standing. All employees seeking admission shall be admitted by the association and in case a member is suspended or expelled from the union the Commission shall have the right to maintain such employee elsewhere in its service.

Check-off: the Commission agrees to check-off and remit to the association monthly from the pay of all members of the association who so authorize all dues and such assessments as may be assessed against such member. The association shall not impose an additional entrance fee or special assessment or increase its existing fees unless agreed to by both parties.

Hours: 8 per day Monday through Friday, a 40-hour week. *Overtime:* time and one-half will be paid for all work in excess of 8 hours per day, for work on Saturdays to employees who normally do not work on Saturdays and for all work on Sundays and on 4 specified holidays, except that lead hand machinists and general machinists will be paid double time on such holidays and also for any overtime on Sundays. Double time for all work on 4 specified *paid holidays*.

Vacations with pay: two weeks to hourly rated employees who during the current year complete or have completed 12 months' continuous service and 3 weeks to employees completing 15 years' continuous service.

Two suits of overalls will be supplied free of charge every year to employees covered by the agreement.

Hourly wage rates—starting, intermediate and maximum rates: lead hand machinist, lead hand millwright \$1.42, \$1.45 and \$1.48; general machinist \$1.36, \$1.39 and \$1.42; machinist, bench fitter, spray welder, P.C.C. axle fitter, millwright grade 1 \$1.30, \$1.33 and \$1.36; radial drill operator, punch press operator, bench repairman grade 1, millwright grade 2 \$1.24, \$1.27 and \$1.30; P.C.C. axle repairman, wheel press operator, metal polisher, babbitt moulder, drill hand, threading machine operator, trolley pole fitter \$1.19, \$1.21½ and \$1.24; bench repairman grade 2 \$1.14, \$1.16½ and \$1.19; machine shop helper, sand blast operator \$1.11, \$1.13 and \$1.15;

apprentices—first 6 months 84 cents, second 6 months 89 cents and so on to \$1.29 during the eighth 6 months. An allowance of 35 cents will be paid to any employee who is required to make out an accident or incident report.

Provision is made for *seniority rights, grievance procedure, an apprenticeship plan, pensions, disability allowance and retirement gratuities* for certain employees, *sick benefits* and *medical services*.

Water Transport

TORONTO, ONT.—THE TORONTO TRANSPORTATION COMMISSION (FOR THE TORONTO ISLAND FERRIES) AND THE CANADIAN MERCHANT SERVICE GUILD, INC.

Agreement to be in effect from March 1, 1950, for the ferry seasons of 1950 and 1951 and until March 1, 1952, and thereafter from year to year, subject to notice.

Union security: all employees covered by this agreement must, as a condition of continued employment, within 30 days become and remain members in good standing of the guild. All new employees must become members of the guild within 60 days of date of employment. The guild will admit to membership all new employees and in case a member is suspended or expelled from the guild the Commission shall have the right to maintain such employee elsewhere in its service.

Check-off: the Commission agrees to check-off and remit to the guild monthly from the pay of each member of the guild who so authorizes all dues and assessments.

Hours: for shore work 8 per day, 5½ days a week; when operating—9 per day, 6 days a week. Employees who work on 8 specified holidays will receive an extra half day's pay for each holiday worked.

Vacations with pay: 2 weeks to employees who have been employed not less than 216 days in all departments of the Commission in the previous calendar year, 3 weeks to those who during the current year complete or have completed 15 years' continuous service.

Monthly wage rates: Captains—4 double-end boats \$305; *T. J. Clark*, first crew (handles freight) \$305, second crew \$280; freight captain \$255; operating overtime over 9 hours for passenger boats \$1.75 per hour, for freight captain \$1.50 per hour. Mates—4 double-end boats \$255; *T. J. Clark*, first crew (handles freight) \$255, second crew \$245; operating overtime over 9 hours \$1.50 per hour. Operating, fitting out and laying up shall be based on 30 days per month and one-thirtieth extra for the thirty-first day.

Provision is made for *pensions, total disability allowance and retirement gratuity* for certain employees, *sick benefits, medical services* and for *winter work* in other departments.

TORONTO, ONT.—THE TORONTO TRANSPORTATION COMMISSION (FOR THE TORONTO ISLAND FERRIES) AND THE NATIONAL ASSOCIATION OF MARINE ENGINEERS OF CANADA.

Agreement to be in effect from March 1, 1950, for the ferry seasons of 1950 and 1951 and until March 1, 1952, and thereafter from year to year, subject to notice. This agreement is similar to the one between the

Toronto Transportation Commission and the Canadian Merchant Service Guild, Inc., summarized above.

Monthly wage rates for engineers: 4 double-end boats \$305; *T. J. Clark*, first crew \$305,

second crew \$280; night engineer \$280, freight engineer \$250; operating overtime over 9 hours for passenger boats \$1.75 per hour, for night engineer and for freight engineer \$1.50 per hour.

Collective Agreement Act, Quebec

Recent proceedings under the Collective Agreement Act, Quebec,* include the extension of one new and one first agreement, the repeal of one, and the amendment of 19 others. These include in addition to those summarized below, two amendments to the agreement for barbers and hairdressers at Quebec and the amendment of the agreement for funeral undertakers at Montreal published in the *Quebec Official Gazette* of June 30, for the fine glove industry in the province and for barbers and hairdressers at Three Rivers in the issue of July 22 and for the building trades at Three Rivers in the issue of July 29. The extension of a new agreement for retail stores at Magog in the issue of August 5, the repeal of the agreement for bakers, pastry-workers and salesmen at Drummondville in the issue of August 12, and the amendment of the agreements for the printing trades at Quebec and for the corrugated paper box industry in the province in the issue of August 19.

Requests for amendments to the agreements for the corrugated paper box industry in the province, for hardware and paint stores at Quebec for the building trades at St. Jérôme for the building trades and for the fur manufacturing industry (retail) at Montreal were gazetted July 8, a request for a new agreement for the fur manufacturing industry (wholesale) at Montreal and requests for the amendment of the agreements for building trades at Montreal, in the counties of Chicoutimi, Drummond and Arthabaska, etc., Hull,

Joliette, St. Hyacinthe, Three Rivers and at St. Johns and Iberville, Sherbrooke, Sorel and at St. Jérôme, and a request for the amendment of the agreement for the paint manufacturing industry in the province were all published in the issue of July 15. A request for the amendment of the agreement for barbers and hairdressers at Three Rivers was gazetted July 29. Requests for the amendment of the agreements for building trades at Montreal and at Three Rivers were published in the issue of August 5; requests for the amendment of the agreements for longshoremen (inland) at Montreal, for the wholesale food trade at Quebec, for building trades at St. Hyacinthe, and for barbers and hairdressers at Rouyn and Noranda were gazetted August 19.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessments

Manufacturing

Printing and Publishing

PRINTING TRADES, CHICOUTIMI.

An Order in Council, dated July 19, and gazetted July 29, amends the previous Order in Council for this industry (L.G., March, 1950, p. 345).

This agreement shall apply to all male and female persons engaged in the production of printed matters or to operations connected therewith.

Hours: 44 per week (as previously in effect). The distribution of working hours may be changed upon agreement between the employer and all the employees of the establishment. Such an agreement may also provide for a week of 5 working days. However, employees shall work a minimum of 44 regular hours in the week before being entitled to overtime rates.

Specified paid holidays (previously 7) are now extended to include the morning of Good Friday (previously observed until noon but not paid for). Ascension Day is also a holiday, but without pay. Employees must work the day before and the day after the holiday to be entitled to any of these holidays with pay. Holidays shall be paid for even when the establishment is closed for a week or more unless it be caused by an actual shortage of work.

Minimum hourly wage rates for all classifications in zone I and zone II remain unchanged from those previously in effect, except that the higher rates (\$1.15 per hour for journeymen) apply to establishments of 9 or more employees instead of to those of 8 or more employees.

* In Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. References to the summary of this Act and to amendments to it are given in the *LABOUR GAZETTE*, January, 1949, page 65. Proceedings under this Act and earlier legislation have been noted monthly in the *LABOUR GAZETTE* monthly since June, 1934.

Non-metallic Minerals, Chemicals, Etc.

GLASS PROCESSING INDUSTRY, QUEBEC.

An Order in Council, dated August 2, and gazetted August 12, makes obligatory the terms of a first agreement between certain glass processing firms and Quebec Painters, Decorators and Glass Workers Union, Local 1696.

Agreement to be in effect from August 12, 1950, to February 3, 1951, and thereafter from year to year, subject to notice.

This agreement applies to all employers and employees of the glass processing industry; without limitation, it includes bevellers, silverers, cutters, setters, polishers, shippers, packers, truck drivers, warehousemen and helpers, working for the preparation of any kind of glass for the manufacturing or building industry.

Territorial jurisdiction shall comprise the cities of Quebec, Lévis, and Sillery, and the towns of Quebec West and Lauzon.

Hours: 9 per day, 45 per week.

Overtime: time and one-half for all time worked in excess of 9 hours in any one day or over 4 hours by the skeleton crew on Saturday and for work performed on Sundays and 4 specified holidays; double time for work on any of 3 additional specified paid holidays.

Minimum and maximum hourly wage rates: bevellers, silverers, cutters 65 and 90 cents per hour; setters, scratch polishers, spinners, examiners and buffers 65 and 93 cents; belt workers 60 and 77 cents; silverers' helpers, spray painters 55 and 70 cents; shippers (full time) 65 and 87 cents; packers 60 and 75 cents; truck drivers 60 and 80 cents; warehousemen's helpers and setters' helpers 60 and 72 cents; apprentices in first six months 41 cents per hour to 79 cents during the period 4 to 4½ years and thereafter at the rate for qualified workers.

Vacation: one week with pay to all employees with one year of continuous service prior to July 1 in any year; one-half week with pay to those employees who were not employed on July 1 of the previous year but who have been steadily employed since January 1 in the year in which the vacation is given. Date of vacation to be fixed by the employer.

Provision is made for board and accommodation and for travelling time while on out-of-town jobs, for apprenticeship regulations and for penalties for late starting.

Miscellaneous Wood Products

FURNITURE INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated July 19, and gazetted July 29, amends the previous Orders in Council for this industry (L.G., Oct., 1948, p. 1127; July, 1950, p. 1052). This amendment to be in effect for a period of one year from June 1, 1950, until June 1, 1951.

Hours: in the town of Rimouski and in the village of Cabano furniture factories may work 60 hours per week at straight time and without restriction as to the starting or finishing time, each day. (These are the two municipalities which suffered disastrous fires earlier this year.)

Construction

BUILDING TRADES, QUEBEC.

An Order in Council, dated July 12, and gazetted July 22, amends the previous Orders in Council for the industry (L.G., Dec., 1947, p. 1803; July, 1948, p. 741, Nov., p. 1247; Aug., 1949, p. 988, Sept., p. 1115, Oct., p. 1247; July, 1950, p. 1052). This amendment to be in effect for the period between May 8, 1950, and May 1, 1951.

Special provisions concerning the *victims of the conflagrations* in the town of Rimouski and the municipality of Cabano. *Territorial jurisdiction* affected comprises the area within the limits of the town of Rimouski and the municipality of Cabano. *Hours:* no daily limitation of hours of work. *Overtime:* payment of time and one-half or double time for overtime work is suspended. Regular rates of wages shall prevail, irrespective of the number of hours worked each day.

BUILDING TRADES, ST. HYACINTHE.

An Order in Council, dated July 19, and gazetted July 29, amends the previous Orders in Council for this industry (L.G., July, 1947, p. 1002, Sept., p. 1308; May, 1948, p. 488; Oct., 1949, p. 1247; Feb., 1950, p. 209, Aug., p. 1185, and previous issues).

This amendment to be in effect from July 29, 1950, and until May 1, 1951, the vacation-with-pay credit period referred to in this section shall mean the period extending from that day to May 1, 1951.

Vacation: employees continuously in the service of one employer during the vacation-with-pay period, May 1 of one year to April 30 of next, are entitled to 7 consecutive days vacation. All employees are to receive credit for vacation pay equal to 2 per cent of their gross wages during the year, which is redeemable from the Commission after April 30 each year. The above provisions do not apply to the employees of municipal corporations or school commissions. (No vacation-with-pay provisions provided for previously.)

BUILDING TRADES, SOREL.

An Order in Council, dated July 19, and gazetted July 29, amends the previous Orders in Council for this industry (April, 1947, p. 544, Dec., p. 1804; Jan.-Feb., 1948, p. 51, Jan., 1950, p. 78, and previous issues). Another amendment to this agreement was published in the *Quebec Official Gazette*, issue of June 25, 1949.

Minimum hourly wage rates for bricklayers, plasterers, masons and cement finishers are increased by 30 cents per hour from \$1.10 to \$1.40 per hour. Rates for apprentice bricklayers, plasterers, masons and cement finishers from 60 cents per hour during the first year to 90 cents during the fourth year. (Apprentices' rates represent increases ranging from 15 to 20 cents per hour and the classification cement finisher apprentice is added.)

BUILDING TRADES, MONTREAL.

An Order in Council, dated August 2, and gazetted August 19, amends the previous Order in Council for this industry (L.G., June, 1950, p. 874) by replacing the trade classifications "construction boilermaker... steam generation mechanic \$1.50", with the following: "construction boilermaker,

erector, chipper, caulker, burner, welder and rigger in connection therewith and including steam generation mechanic \$1.50."

Another Order in Council, dated August 9, and gazetted August 19, amends the previous Orders in Council for this industry by increasing the minimum hourly wage rates for employees of the *elevator construction industry* in the Hull region by 11 cents per hour for mechanics and by 8 cents per hour for helpers and in the Quebec region by 13 cents per hour for mechanics and 9 cents for helpers, so that the new minimum wage rate for mechanics is \$1.50 per hour and for helpers \$1.05 per hour in both the Hull and Quebec regions.

BUILDING TRADES, ST. JÉRÔME.

An Order in Council, dated August 9, and gazetted August 19, amends the previous Orders in Council for this industry (L.G., Aug., 1948, p. 873; Dec., 1949, p. 1559; May, 1950, p. 694).

Minimum hourly wage rates: carpenter-joiner, millwright, weatherstripper, roofer (asbestos, slate and tile), cement finisher, decorator, wall-paper hanger, sprayman, lather (metal), lather (wood, tentest, gyproc or similar material layer), roofer (composition), sheet metal worker (shop or job), tinsmith-roofer, blacksmith, driller (dynamite firer), steam, electric, Diesel or gas mixer operator, engineman (steam, gas, Diesel or electric shovels), stationary or portable boiler engineman, floor maker, saw filer, mastic floor layer, terrazzo polishing machine operator (dry) \$1.05 per hour; marble setter \$1.27; tile setter \$1.26; plasterer, mason (including cutter on job), bricklayer \$1.25; electrician, pipe mechanic, plumber and steamfitter-journeyman, commercial letterer, crane operator, bulldozer operator, grader operator, roller operator (steam or gas) \$1.10; terrazzo layer \$1.16; sprinkler fitter \$1.15; glazier, painter, floor finisher (shop or field), plumber and steamfitter-junior journeyman, fireman (construction), pipe welder (oxygen or electric), tractor operator \$1; floor finisher (hand or machine), insulating cork setter, mastic floor finisher, compressor operator 95 cents; rigger, concrete steel reinforcement erector, tile and asphalt layer, terrazzo polishing machine operator (wet), hod carrier, machinist 90 cents; labourer (plasterer's, bricklayer's and mason's helpers), blacksmith's helper, boiler fireman (4th class certificate), watchmen also employed as foreman and required to hold 4th class certificate (working a maximum of 72 hours per week) 85 cents; common labourer, freight and passenger elevator operator, truck driver (construction), horse driver (single or team), asphalt raker, men committed to ramming, smoothing and spreading asphalt 80 cents. apprentice carpenter-joiners from 60 cents in first year to 95 cents in fourth year; those trades requiring 4 years of apprenticeship 55 cents in first year to 80 cents in fourth year; those trades requiring 3 years of apprenticeship from 60 cents in first year to 80 cents in third year. (The above rates represent an increase of 5 cents per hour over the rates previously in effect in each case with the exception of the rate applying to tinsmith-roofer whose rate is increased by 10 cents per hour.) Foremen supervising a shift of 4 or more men shall be paid 10 cents more per hour than the rates established for their trade. Minimum weekly rates for maintenance men are increased by

\$2.40 per week and are now as follows: journeyman \$33.60; apprentice \$20.65; common labourer \$26.40. Rates for waterman 70 cents per hour and weekly rates for watchmen in the field (night and day) with no hourly limitation and for material checker and timekeeper \$36 per week remain unchanged.

PLUMBERS, HULL.

An Order in Council, dated July 19, and gazetted July 29, amends the previous Orders in Council for this industry (L.G., Aug., 1948, p. 874, Nov., p. 1247; Oct., 1949, p. 1248).

Minimum hourly wage rates: master plumber (personal services) \$2.40 per hour in zone I, \$2 in zone II; senior journeyman \$1.65 in zone I, \$1.05 in zone II; junior journeyman—first 6 months 85 cents in zone I, 75 cents in zone II, second 6 months \$1.10 in zone I, 85 cents in zone II; welder \$1.10 in zone I, 90 cents in zone II; apprentices from 40 cents in first year to 70 cents during fourth year in zone I, from 35 cents in first year to 65 cents during the fourth year in zone II. (The rates shown above represent increases of 10 cents per hour for senior journeyman in zone I, for junior journeyman—second 6 months 10 cents in zone I and for apprentices 5 cents per hour in zone I; rates for other classifications in zone I and zone II remain unchanged from those previously in effect.)

Vacation: employees continuously in the service of one employer during the vacation-with-pay period, May 1 of one year to April 30 of next, are entitled to 7 consecutive days vacation. All employees are to receive credit for vacation pay equal to 2 per cent of their gross wages during the year, which is redeemable from the Commission after April 30 each year. (Vacation provisions not provided for previously.)

Trade

RETAIL FOOD STORES, QUEBEC.

An Order in Council, dated June 21, and gazetted June 30, amends the previous Orders in Council for this industry (L.G., June, 1947, p. 826; Oct., 1948, p. 1128; Oct., 1949, p. 1248, and previous issues). Another amendment to this agreement was published in the *Quebec Official Gazette* of March 4, 1950.

Hours are increased from 51½ to 53 per week. *Overtime* is payable at the rate of time and one-half for all hours worked in excess of 53 per week. (Previously overtime rate was payable for all work in excess of 51½ hours per week at the rate of straight time up to 56 hours, time and one-half thereafter). Double time for Sundays and for work performed between 11.30 p.m. and 7.30 a.m. remains unchanged.

Minimum weekly wage rates in zone II for employees working in the capacity of department managers or head clerks in grocery or butcher stores are increased from \$25 to \$27 per week. In establishments engaged in both the grocery and meat trade in zone I, delivery men, which are included in the percentages, in addition to cashiers and office employees, shall be remunerated at the rate for employees of the grocery department. The table of classification of employees where it refers to establishments with one, two or three employees only is revised.

HARDWARE AND PAINT STORES, QUEBEC.

An Order in Council, dated August 9, and gazetted August 19, amends the previous Orders in Council for this industry (L.G., July, 1946, p. 931; Jan., 1947, p. 50, Sept., p. 1308; April, 1948, p. 335, Nov., p. 1248; Dec., 1949, p. 1559; Jan., 1950, p. 80, and previous issues).

Overtime: delivery men and their helpers and any employees receiving \$43 or more per week (previously \$41.50 per week) shall not be paid for overtime when the weekly duration of labour does not exceed by more than 2 hours the regular work week of the establishment.

Minimum weekly wage rates: manager \$51.50 per week; chief-accountant, head sales clerk \$46; head receiving and shipping clerk, head order clerk \$43; head warehouse clerk \$40; delivery-man \$36.50; delivery-man helper

(under 21 years of age) \$23; delivery-man helper (21 years of age and over) \$27; messenger \$11.50; bookkeeper from \$17 per week in first year to \$43 during ninth year; clerk (selling and taking orders) from \$16 per week during the first year to \$43 during ninth year; receiving and shipping clerk from \$17 in the first year to \$36.50 during ninth year; warehouse clerk (under 20 years of age) \$23.75; (20 years of age and over with less than 5 years' experience) \$27.25; (5 or more years' experience) \$31; order clerk \$17 during first year to \$39 during ninth year; skilled tradesman \$37.50; unskilled tradesman \$35.50; senior employee (under 25 years of age) \$33.50; (25 years of age and over) \$36.50; night watchman \$31.50. (The above rates represent increases ranging from \$1 to \$1.50 per week in most cases.)

Industrial Standards Acts, etc.

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in New Brunswick, Ontario, Saskatchewan and Alberta

Recent proceedings under the Industrial Standards Acts, etc.* include in addition to those summarized below: a new schedule for the barbering industry in the St. Thomas Zone published in *The Ontario Gazette*, issue of April 8, and another new schedule for the same industry in the Aylmer and Springfield Zones published in the issue of May 6.

NEW BRUNSWICK

Construction

PLUMBERS, SAINT JOHN.

An Order in Council, dated July 21, and gazetted August 2, makes binding the terms of a new schedule for plumbers and pipe-fitters at Saint John and within a radius of 15 miles, to be in effect until April 30, 1951.

Hours: 8 per day, Monday through Friday, 4 on Saturday, a 44-hour week constitutes a regular working period. If, on a regular working day, the nature of the work or the conditions prevailing are such to necessitate the carrying out of the work at periods other than during the regular working periods, it may be carried out during other periods of the day and such periods will be known as special working periods. Hours for such periods shall not exceed 7½ Monday to Friday (inclusive) and 3¾ hours on Saturday.

Overtime is payable at time and one-half for the first 6 hours, double time thereafter and on Sundays and 9 specified holidays.

Minimum hourly wage rates: \$1.25 per hour during regular working periods; \$1.33 per hour for work done during special periods.

This schedule shall not apply to any employee who is employed to do the work of a maintenance man and who is in receipt of a regular salary nor to employees engaged in shipbuilding or ship repairing work.

ONTARIO

Construction

BRICKLAYERS AND STONEMASONS, CORNWALL.

An Order in Council, dated June 22, and gazetted July 8, makes binding the terms of a first schedule for bricklayers and stonemasons at Cornwall to be in effect from July 18, 1950, "during pleasure".

Hours: 8 per day, Monday through Friday, 4 on Saturday, a 44-hour week. Work performed at night which because of its nature cannot be done during the regular work-day, where an employee does not work more than 8 hours, shall be known as night work. Where work is carried on in 2 or more shifts, employees shall be deemed to be employed during a regular working-day where an employee does not work more than 8 hours in any 24-hour period (this work to be known as shift work).

Overtime is payable at the rate of time and one-half for all work performed during the 5-hour period immediately following the regular working-day Monday through Friday; double time after 12 noon Saturday and for work on Sundays and 5 specified holidays.

* In six provinces—Nova Scotia, New Brunswick, Ontario, Manitoba, Saskatchewan and Alberta—legislation provides that, following a petition from representatives of employers and employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the *LABOUR GAZETTE*, April 1950, page 518.

Minimum hourly wage rates for work performed during regular working periods and for *night work*, \$1.80 per hour. Employees on *shift work* shall receive 8 hours' pay for 7 hours' work. The advisory committee may fix a lower minimum rate for employees who are only partly subject to the provisions of this schedule or who are handicapped.

SASKATCHEWAN

Construction

CARPENTERS, YORKTON.

An Order in Council, dated April 11, and gazetted April 22, amends the previous Order in Council for this industry (L.G., March, 1949, p. 304). This amendment to come into force May 2, 1950.

Another Order in Council, dated April 28, and gazetted May 6, rescinds the above amendment, because of typographical errors, this further amendment shall be in force from May 16, 1950.

Minimum hourly wage rates for improvers: from not less than 63 cents per hour for those employees holding a first year certificate to not less than \$1 per hour for those holding a fourth year certificate. (This classification not shown in the previous schedule.) The minimum wage rate for journeymen is unchanged at \$1.15 per hour.

It is also provided by this amendment that *public holidays* shall be paid for in accordance with the Provincial Government Minimum Wage Board's Order governing this class of employee and that *annual vacation* shall be as provided for under the Annual Holidays Act of the Province of Saskatchewan.

Regulations governing the employment of journeymen carpenters, the employment of apprentices in ratio to journeymen and the hiring of improvers, when journeymen carpenters are not available, are covered by this amendment.

ELECTRICAL WORKERS, REGINA.

An Order in Council, dated June 23, and gazetted June 30, amends the previous Order in Council for this industry (L.G., May, 1949, p. 606). This amendment to be in effect from July 10, 1950.

Minimum hourly wage rates for the following classifications are increased by 10 cents per hour: journeyman wireman from \$1.40 to \$1.50, probationary journeyman from \$1.30

to \$1.40. Rates for apprentices and helpers are now increased by 5 cents per hour and are as follows—from 65 cents per hour in first year to \$1.05 per hour in fourth year.

CARPENTERS, PRINCE ALBERT.

An Order in Council, dated July 7, and gazetted July 21, makes binding the terms of a first schedule for carpenters at Prince Albert and within a radius of 5 miles, to be in effect from July 31, 1950, "during pleasure".

Hours: 8 per day, Monday through Friday, a 40-hour week.

Overtime is payable at the rate of time and one-half for the first 4 hours in excess of 8 hours in any one day and for work on Saturday mornings; double time for all other overtime including Sundays and 8 specified holidays. Public holidays shall be paid for in accordance with the Provincial Government Minimum Wage Board's Order governing this class of employment.

Minimum hourly wage rates: \$1.40 per hour for journeymen. Carpenters in charge of 3 or more men shall be paid not less than \$1.60. Shift work allowed only when a regular day shift is worked shall be paid for at the rate of one and one-seventh the normal rate if such shifts are worked 3 or more consecutive nights. Where only 1 or 2 nights are worked or where the full shift is not worked the rate shall be one and one-half times the normal rate. A journeyman required to report for work shall be paid a minimum of 2 hours wages unless stopped by bad weather.

Vacation: annual vacation shall be as provided for in The Annual Holidays Act of the Province of Saskatchewan.

ALBERTA

Manufacturing

Vegetable Foods

BAKERY SALESMEN, CALGARY.

An Order in Council, dated April 25, and gazetted May 31, amends the previous Order in Council for this industry (L.G., April, 1950, p. 520).

Overtime provisions are corrected by specifying that double time is payable for work on any of 8 statutory holidays, where one day in lieu thereof is not allowed within 30 days of such holiday.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

The Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classifications of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are awarded in accordance with a policy which provides that wage rates must equal those current in the district.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During July

(1) *Works of Construction, Remodelling, Repair or Demolition.*

During the month of July the Department of Labour prepared 175 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

During the same period a total of 163 construction contracts was awarded by the various Government departments. Particulars of these contracts appear in the accompanying table.

Copies of the relevant wages schedules are available to trade unions or other *bona fide* interested parties, on request.

The labour conditions of each of the contracts listed under this heading, besides stipulating working hours of not more than eight per day and forty-four per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than forty-four per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "*minimum rates only*" and that "nothing herein contained shall be considered as exempting contractors and subcontractors from the payment of higher rates in any instance where, during the continuance of the work such higher rates are fixed by provincial legislation, by agreements between employers and employees in the district or by changes in prevailing rates".

(2) *Contracts for the Manufacture of Supplies and Equipment.*

Contracts for supplies and equipment were awarded as follows, under the policy that wage rates must equal those current in the district:—

Department	No. of contracts	Aggregate amount
Canadian Commercial Corporation.	8,853	\$7,854,258.09
Post Office.	12	48,292.12
Public Works.	4	106,848.40
R.C.M.P.	6	24,519.00

*The labour conditions of these contracts contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of 8 per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.

LABOUR LAW

Labour Legislation in Ontario, Quebec and New Brunswick in 1950

A new Labour Relations Act was the most important enactment of the Ontario Legislature. Less widespread changes were made in the labour laws of Quebec and New Brunswick.

ONTARIO

The Legislature of Ontario at its 1950 session from February 16 to April 8 passed a new Labour Relations Act. It replaces a 1948 Act under which regulations were made adopting the federal Industrial Relations and Disputes Investigation Act as law in Ontario. Without making any changes in principle from its predecessor, the new Act differs from it in certain important respects. The Ontario Labour Relations Board is given new powers which were formerly exercised by the Minister of Labour—the power to authorize prosecutions for violations of the Act and the power to deal with applications for conciliation services. The Act also makes it mandatory on the Board to order a representation vote where a trade union can show that it has as members 45 per cent of the employees in the bargaining unit.

A new Silicosis Act, to come into effect on Proclamation, will require persons engaged in occupations other than mining in which there is exposure to silica dust to undergo a medical examination and hold health certificates. Amendments, chiefly of an administrative nature, were made to the Workmen's Compensation Act.

Collective Bargaining and Conciliation of Disputes

The Labour Relations Act, 1950, which came into force on September 1, 1950, replaces the Labour Relations Act, 1948, under which Part I of the federal Industrial Relations and Disputes Investigation Act was made applicable to undertakings within the legislative jurisdiction of the Province of Ontario (L.G., 1948, p. 1255; 1949, p. 186). Between 1944 and 1948 legislation applying the provisions of the Wartime Labour Relations Regulations (P.C. 1003) was in effect in the Province. Thus, the new law will be the first peculiarly Ontario legislation dealing with labour relations for some six or seven years and, as stated in the explanatory note to the Bill, "is based on the experience gained in

the administration of the several labour codes which have been in effect from time to time in Ontario."

The new Act parallels the 1948 Act in its general provisions. It safeguards the right of association, defines and prohibits unfair labour practices, sets out a definite procedure for certification of trade unions as bargaining agents for employees; requires an employer and a certified trade union to bargain in good faith and endeavour to reach an agreement; provides for the appointment of conciliation officers and boards if bargaining is unsuccessful; prohibits strikes and lockouts during the life of a collective agreement and in other disputes until after conciliation procedure has been followed and seven days have elapsed after a conciliation board's report; requires all agreements to contain a provision for final settlement of differences concerning its interpretation or violation and provides penalties for offences under the Act. There are, however, some significant differences in the two Acts and these are noted below.

Differences from 1948 Act

The new Act transfers to the Labour Relations Board the power formerly held by the Minister of Labour to deal with requests for conciliation services and to grant or deny applications to prosecute. A trade union will now be able to obtain a representation vote by showing that it has a membership of not less than 45 per cent of the employees in an appropriate bargaining unit, instead of over 50 per cent of the employees in the unit. The Act lays down specific conditions under which unions may be decertified. An arbitration clause is set out in the Act which automatically becomes part of any agreement lacking such a provision. The Minister has power, upon the recommendation of a commissioner, to order the reinstatement of an employee discharged contrary to the Act, and it is no longer necessary for the employee to institute a prosecution in order to obtain compensation for being unlawfully discharged. Several amendments were made

in the Bill when it was given second reading by the Legislature. The House rejected almost a dozen other amendments proposed by Opposition members.

Application

The Act does not apply to domestic servants in private homes, persons employed in agriculture, horticulture, hunting or trapping, teachers, policemen, or full-time fire fighters. Members of the architectural, dental, engineering, legal or medical professions, and managers, superintendents, or persons who exercise managerial functions or who are employed in a confidential capacity in matters relating to labour relations are not deemed employees under the Act. The Bill, as introduced, followed the 1948 Act in excluding municipalities and their employees unless a municipality declared the Act to apply. However, the Legislature reversed this provision so that municipalities are to be included unless they declare the Act not to apply.

Administration

The Ontario Labour Relations Board composed of a chairman and four other members equally representing employers and employees is continued. As introduced, the Bill provided for a chairman and either two or four other members. The powers and duties of the Board include the authority to deal with applications of trade unions to represent employees in collective bargaining and to certify unions, to conduct representation votes upon the employer's premises during working hours, to summon and enforce the attendance of witnesses and compel them to give evidence on oath, and to procure documents, and to accept such evidence as it may deem proper, whether admissible in a court of law or not. Under new powers laid down in the Act, the Board may deal with applications for conciliation services and permit prosecutions in the courts (powers which, under the former Act, were vested in the Minister); bar an unsuccessful applicant for certification, or for a declaration that a union no longer represents the employees, from filing a new application for a period not exceeding 10 months; require employers to keep posted in a conspicuous place any notices which it deems necessary to bring to the attention of the employees concerned in connection with any proceedings before the Board; enter and inspect premises; and administer oaths.

Certification

Several important changes were made in connection with certification proceedings.

When a trade union applies for certification as bargaining agent for a unit of employees, the Board must first determine the unit that is appropriate for collective bargaining (which must consist of more than one employee), and, by examining the union's records and those of the employer, must ascertain the number of union members in the bargaining unit. In cases where the union has a membership of between 45 and 55 per cent of the employees in the unit, a vote is compulsory. Where the Board finds that over 55 per cent are members of the union, it may certify the union without a vote, although a vote may be taken at the Board's discretion.

Where a representation vote is taken, the Board must certify the union as bargaining agent if it obtains more than 50 per cent of the ballots of all those eligible to vote. Employees who are absent from work during voting hours and who do not cast their ballots will no longer be counted as eligible voters.

A further section enables the Board to grant certification without a vote where it is satisfied that over 50 per cent of the employees in the unit are members of the union and that the true wishes of the employees are not likely to be disclosed by a representation vote.

Like its predecessor, the new Act forbids the certification of company-dominated unions. It declares specifically that the Board may not certify a trade union if any employer or employers' organization has participated in its formation or administration or has contributed financial or other support to it. Any agreement into which such a union enters will not be deemed a valid collective agreement under the Act. The 1948 Act forbade the certification of a trade union, the administration, management or policy of which was, in the Board's opinion, dominated by an employer or influenced by an employer so that its fitness to represent employees for collective bargaining was impaired.

Guards are not allowed to join and affiliate with trade unions but may have an association of their own for bargaining with their employers. The Act states that persons employed as guards to protect the property of their employers must not be included in a bargaining unit with other employees, and no trade union may be certified as bargaining agent for a unit of guards if it admits to membership, or is affiliated with an organization which admits to membership, persons other than such guards.

Negotiation of Collective Agreements

The procedure for negotiation of a collective agreement is in general the same as under the former Act. A new section provides that the trade union must be represented during negotiations by a bargaining committee of employees of the employer who are in the bargaining unit (or, as the section was amended by the Legislature, in the case of bargaining between a union and an employers' organization, of employees of one or more members of the employers' organization who are in the bargaining unit), and the committee may include one or more officers or other representatives of the trade union.

The new legislation, like the 1948 Act, requires the giving of 20 days' notice to commence bargaining. Where the 1948 Act allowed either party to apply for conciliation at any time, the new Act sets a minimum of 50 days (30 days after the 20 days' notice to bargain has expired) before either party may apply for conciliation services, unless the Board is satisfied that no progress in bargaining is being made and that the parties have exhausted their efforts to agree. In such case, notwithstanding that the 50-day period has not elapsed, the Board may grant the joint request of both parties or the request of either of the parties for conciliation services.

Contents of Collective Agreements

Several new sections relate to the contents of a collective agreement. It must now be specifically provided in every agreement that the trade union which is a party to the agreement is recognized as the exclusive bargaining agent of the employees in the unit. A provision that there will be no strikes or lockouts during the life of the agreement must also be written into all future agreements. Either of these provisions may be added to an agreement by the Board at any time on the application of either party.

The Act provides further that every agreement must contain a provision for the final and binding settlement by arbitration, without any stoppage of work, of disputes which may arise from the interpretation, application, administration, or alleged violation of the agreement, *including any question as to whether a matter is arbitrable*. The italicized words are new.

Under the 1948 Act, if a collective agreement lacked a provision for final settlement of such differences "by arbitration or otherwise" the Labour Relations Board, on the application of either party, could prescribe one. In order to avoid the delay incidental to such an application, the

present Act sets out a clause which will automatically become part of every collective agreement which lacks such a provision. It provides for the appointment of a three-member arbitration board whose decision is final and binding upon the parties. This clause may be modified by the Board at the request of either party which considers it unsuitable, and the Board is also given power to change the arbitration provision which the parties themselves write into the agreement if it considers it inadequate.

A new provision states that an agreement made between an employers' organization and a trade union is binding on each of the employers individually, and if any one of the group of employers ceases to be a member of the organization he will continue to be bound by the agreement until its term expires.

A collective agreement made before or after the effective date of the Act will be binding on the employer and on the trade union that is a party to the agreement *whether or not the trade union is certified* and upon the employees in the bargaining unit defined in the agreement. The 1948 Act provided that an agreement made by a *certified* bargaining agent was binding on the bargaining agent, on every employee in the bargaining unit, and on the employer.

The section of the 1948 Act permitting collective agreements to contain a provision requiring, as a condition of employment, membership in a specified trade union, or granting a preference of employment to members of a specified trade union, was re-enacted with the addition of the words "or requiring the payment of dues or contributions to such trade union". It might be noted here that an Opposition amendment to insert in the Act provisions for a voluntary revocable check-off of union dues was not accepted by the Government on the ground that union security was a matter for collective bargaining rather than for legislation. Further, in the section summarized above, "membership in a specified trade union" was changed to "membership in the trade union that is a party to the agreement".

A similar change was made in the succeeding subsections which permit collective agreements to contain provisions (1) allowing an employee who is a union representative to attend to the business of the trade union during working hours without deduction of wages, or (2) permitting the trade union to use the employer's premises for union purposes without payment. In each case the union is restricted to "the trade union that is a party to the agreement". A provision permitting the employer

to provide free transportation to representatives of the trade union for collective bargaining purposes was omitted.

The 1948 Act declared invalid any provision in an agreement which required an employer to discharge an employee because of membership in or activity on behalf of a union other than a specified union. Under the new Act, an employer is forbidden to discharge an employee who is expelled or suspended from membership in the union that is a party to the agreement solely because he is a member of another union.

A collective agreement will be deemed invalid if it discriminates against any person because of his race or creed. This is a new provision.

Each party to a collective agreement must file one signed copy of the agreement with the Board. The requirement that the copy must be signed was added to the Act in passage.

Every publication dealing with the relations between employers or employers' organizations and trade unions or employees must bear the names and addresses of its printer and publisher.

Revocation of Certification

The Act sets out the procedure under which unions may be decertified. If a union does not make an agreement with the employer within a year after it is certified, any of the employees in the unit determined in the certificate may apply to the Board for a declaration that the union no longer represents the employees in the unit.

Where there is an agreement, and it is for a term of one year, any of the employees may apply for such a declaration but only after the agreement has been in effect for 10 months. If the agreement runs from year to year and neither party gives notice of termination or of its desire to bargain for renewal or a new agreement, application may be made at the expiration of 10 months of each year that the agreement continues in effect. Similarly, in the case of an agreement for a term of more than a year, application may be made during the two-month period at the end of each year that the agreement is in operation or not more than two months before the agreement ceases to operate.

In order to obtain a declaration terminating bargaining rights, a majority of the employees must signify in writing that they no longer wish to be represented by the trade union, after which the Board must order a representation vote. If more than 50 per cent of those eligible to vote cast their ballots in opposition to the union, the Board must make a declaration that the trade union no longer represents the

employees in the bargaining unit, and any collective agreement binding upon the employees in the unit will cease to operate. Absent employees are not counted as being eligible to vote.

The Board may at any time revoke the certification of a trade union which it finds has obtained a certificate by fraud.

Provision is made also for termination of bargaining rights for failure to give notice. If a union fails to give the employer notice within 60 days after certification, or if neither party gives notice within two months before a collective agreement ceases to operate or a desire to negotiate for its renewal, with or without changes, or its replacement by a new agreement, the Board may, on the application of the employer or of any of the employees, and with or without a representation vote, declare that the union no longer represents the employees. The same holds true for failure to bargain. If a union that has given notice or received notice does not begin bargaining within 60 days, or having begun negotiations but before the Board has granted conciliation services allows 60 days to elapse without trying to bargain, the Board may decertify the union, with or without a vote.

Where notice has been given by either party to an agreement after the expiration of 10 months of its term of its desire to bargain, and the Board has granted conciliation services, no application for certification or decertification of a bargaining agent of any of the employees in the bargaining unit may be made after the agreement ceases to operate or after the request for conciliation services is granted, whichever date is later, unless following the request an agreement has been entered into between the parties and has operated at least 10 months, or in the case of an application for decertification, where no agreement is reached, until at least 12 months after the granting of the request.

Unlawful Strikes

New provisions have been inserted regarding unlawful strikes. Unions are prohibited from calling or authorizing, and their officers and agents from counselling, procuring, supporting or encouraging, unlawful strikes, and there is a similar prohibition of unlawful lockouts. If a union calls or authorizes a strike which the employer concerned alleges to be unlawful, he may apply to the Board for a declaration that the strike is in fact unlawful, and the Board may make such a declaration. Similarly, a union or group of employees may apply for a declaration that a lockout is illegal. As introduced, the Bill further provided that if the Board made such a declaration, it

could withdraw its services from the union or from its parent organization or subordinate branches or from the employer or employers' organization so long as the illegal strike or lockout continued. This provision, however, was deleted in passage.

Unfair Labour Practices

Several minor changes were made to the unfair labour practices section. It is now provided that nothing in the Act must be deemed to authorize a person to attempt to persuade an employee during working hours at his place of employment to become or refrain from becoming or continue to be a member of a trade union. Under the former Act, the soliciting of union membership on the employer's premises during working hours was prohibited unless the consent of the employer was obtained.

The Act prohibits employers, employers' organizations or persons acting on behalf of either to impose any condition in a contract of employment or *propose the imposition of any condition in a contract of employment* that seeks to restrain an employee or a person seeking employment from becoming a member of a trade union or exercising any other rights under the Act. The italicized words are new.

Deleted from this section is the provision which forbade an employer to deny to an employee any pension rights or benefits to which he would otherwise be entitled by reason only of his ceasing to work as a result of a lockout or strike which takes place after the procedure prescribed in the Act for the settlement of disputes has been complied with, or by reason only of dismissal contrary to the Act.

Enforcement

To inquire into a complaint that a person has been refused employment, discharged, discriminated against, intimidated or otherwise dealt with contrary to the Act, the Minister may appoint a conciliation officer. If he fails to settle the matter, the Minister may then appoint a commissioner with powers similar to those of conciliation boards to summon witnesses and enter and inspect premises. If the commissioner finds that the complaint is supported by the evidence, having given the parties full opportunity to present evidence and make submissions, he must recommend to the Minister the course which he thinks should be taken, which may include a recommendation for the reinstatement of the employee, with or without compensation for loss of earnings and other benefits. The Minister must thereupon make whatever order he deems necessary to put the commissioner's

recommendations into effect, and the order must be complied with.

Under the former Act, the Minister could, on complaint, appoint an Industrial Inquiry Commission to investigate any alleged violation of the Act and its report had to be considered by the Minister in granting or refusing consent to prosecute. Under that Act, a court or magistrate which found an employer guilty of having suspended or discharged a worker contrary to the Act could order him to reinstate the employee and to pay him compensation for the loss of his employment.

As under the former Act, offences are punishable by fines on summary conviction. However, fines are not provided for each specific offence. For failure to comply with any provision of the Act or a decision, order, declaration or ruling made under the Act, a fine of not more than \$100 a day may be imposed on an individual, and not more than \$1,000 a day on a corporation, trade union or employers' organization. As introduced, the Bill provided for greatly increased fines—\$500 a day for an individual and \$5,000 a day for a corporation, trade union or employers' organization but these were reduced in passage.

Rights of Labour Act

An amendment to the Rights of Labour Act which also came into force on Proclamation on September 1, substitutes Labour Relations Act, 1950, wherever mention is made of the Labour Relations Act, 1948. A new subsection provides that nothing in the Act must be construed to prevent or otherwise affect the prosecution of a trade union or one of its members under the Labour Relations Act, 1950.

Workmen's Compensation

An amendment to the Workmen's Compensation Act provides that, in the case of the death of a workman, compensation will be payable to his invalid child until the child recovers or dies. This is the same as a provision in the Manitoba and British Columbia Acts. Previously, compensation was payable only so long as the Workmen's Compensation Board considered that the workman, had he lived, would have continued to support his child.

A public library board is now specifically included in the municipal corporations, public utilities or other commissions or boards, boards of trustees of police villages, other than rural school boards, to which the provisions of Part I are applicable. Public library boards, like other municipal boards or commissions, are in Schedule II of the Act under which employers are individually

liable to pay for compensation and medical aid to their workmen for accidents as they occur.

The Board is authorized to consolidate and revise the Schedules of the Act in the form of regulations and to delete the Schedules from the body of the Act. These regulations have recently been issued and are summarized elsewhere in this GAZETTE (p. 1701). The Board is empowered, with the approval of the Lieutenant-Governor in Council, to declare any disease to be an industrial disease and to amend Schedule 3 accordingly. Several other minor changes were made chiefly to clarify the Act.

Three Private Members' Bills to amend the Act were defeated. One would have reduced the "waiting period" from seven to three days.

A 1949 amendment increased compensation for disability from 66 $\frac{2}{3}$ to 75 per cent of earnings but provided that the higher rate should be payable only in respect of accidents occurring after January 1, 1950. The second Bill would have eliminated this restriction by providing that the higher rate would apply to all compensation payments accruing after January 1, 1950, whether the accident happened before that date or not.

The third Bill provided for annual X-ray examinations of workmen exposed to silica dust and, where any lung injury was discovered, for an examination every two months thereafter. Any disability suffered by such workman which could be attributed to silicosis was to be deemed to be due to silicosis and any chronic lung disease was to be deemed an industrial disease arising out of his employment.

Prevention of Silicosis

A new Silicosis Act, to come into force on Proclamation, prohibits the employment of a person in industrial operations other than mining which involve exposure to silica dust unless he is the holder of a health certificate. A similar section in the Mining Act since 1928 requires a medical examination for silicosis at least once a year for workmen employed underground in a mine, in ore- or rock-crushing operations or at certain locations at the surface of a mine where there is danger from dust exposure.

An employee engaged in an industrial occupation involving silica exposure may be required by the Minister to whom the administration of the Act is assigned to have a medical examination at any time. The fee for the medical examination must be paid by the employer. The Minister

may exempt an industrial process involving silica exposure in part or in whole from the provisions of the Act and the regulations where, in his opinion, the circumstances warrant this action. A penalty of not less than \$10 and not more than \$100 may be imposed for contravention of the Act or regulations.

Regulations may be made by the Minister, with the approval of the Lieutenant-Governor in Council, to define silica exposure, prescribe medical examinations of employees, set out the fees to be paid and the form of reports to be made in connection with the examination, provide for the issue, renewal, suspension and cancellation of health certificates of employees and to prescribe the form of the certificates, their custody and use. The regulations may be general in their application or may be applicable to a particular locality or industry.

The Act repeals a Silicosis Act of 1929 which was never proclaimed in effect. This Act would have prohibited a person from being employed in the cutting, polishing or finishing of granite who did not hold a medical certificate stating that he was medically fit to be employed in these occupations.

Municipal Firemen and Policemen

Similar amendments were made to the sections in the Fire Departments Act and Police Act governing collective bargaining and arbitration of disputes and provision was made for pension plans of a wider type than those specified previously (L.G., 1949, p. 1000).

By an amendment made to either Act in passage, every collective agreement, decision or award must remain in effect until the end of the year in which it comes into force, after which it will remain in effect until replaced by a new agreement, decision or award. Collective bargaining proceedings for a new agreement may be begun at any time by either party to the original agreement. Formerly, it was merely stated that nothing in the Act required the continuance in force of any agreement, decision or award for more than one year.

Collective bargaining negotiations may now be for the purpose of determining pensions as well as wages and working conditions of the members of a police force and a fire department. When a request for collective bargaining involves pensions under a pension plan established under the Municipal Act, notice of the request must be given to the Department of Municipal Affairs which may determine the maximum

pension benefits which may be included in any agreement, decision or award with respect to such pension plans.

The requirements of the pension plan which must be met before a provincial subsidy can be paid have been modified. The municipality must now contribute not less than five per cent of the amount of the salaries of the members participating in the plan. Formerly, the joint contributions of the members and the municipality were required to equal or exceed ten per cent of their salaries, with the contribution of the municipality equalling or exceeding the contributions of the members.

The section was repealed which stated that where a municipal council failed to bargain in good faith with a bargaining committee, on the written request of a majority of a fire department or police force, or of their organization when not less than half of either class belong to an organization, the Lieutenant-Governor in Council might withhold any grant payable to the municipality out of provincial funds. When the municipal council provided for the making of the expenditures involved, the withholding order might be revoked, subject to any conditions deemed advisable.

Health of Employees in Labour Camps

An amendment was made to the Public Health Act respecting medical, surgical and hospital care and treatment of employees engaged in lumbering, mining and railway construction camps and works in unorganized territory where sickness or accident is not associated with employment.

The regulations, which have been issued under the Act, require an employer to provide medical, surgical and hospital treatment and maintenance for his workmen while they are under treatment. For this purpose the employer may enter into a contract with a legally qualified physician, and during the term of the contract he may deduct from wages a sum not exceeding \$1 per month. The amendment to the Act enables regulations to be made authorizing a deduction not exceeding \$1.50 a month for this purpose.

Pensions

An amendment to the Public Schools Act authorizes school boards, by resolution approved by the Minister of Education, to provide pensions for their employees other than teachers or inspectors by an arrangement under the Government Annuities Act (Canada) or with an insurer licensed under the Insurance Act. The school board must make deductions from the wages of the employee and make its own contributions

as required by the resolution. Previously, the board could establish a pension fund for its employees under the management of a board which arranged for contributions to the fund and payments from it.

A new section authorizes school boards, by resolution and on the approval of the Minister, to set up systems of sick leave credit gratuities and payments for the regular attendance of employees.

Any pension scheme or system of sick leave credits which is already in effect and which conforms to these amendments to the Act is validated.

Housing

The Housing Development Act, 1948, was amended to empower the Minister of Planning and Development to enter into an agreement with the Government of Canada to undertake joint housing projects. The Lieutenant-Governor in Council may set up corporations with the powers and duties necessary to carry out the terms of an agreement. Under the National Housing Act (Canada), the Federal Government will pay 75 per cent and the provinces the remainder of the cost of such housing projects. Municipalities may contribute to the provincial share of the cost and participate in implementing such joint projects.

Bills not Passed

Five Bills seeking to amend the Hours of Work and Vacations with Pay Act failed to pass. In these were included proposals to reduce the maximum weekly hours of work to 40 without reduction in weekly pay; to limit overtime to eight hours in a week and 100 in a year; and to require payment at the rate of time and one-half for overtime. Two Bills would have provided for two weeks' vacation with pay instead of one, and another would have provided for one week's vacation with pay after one year's employment and two weeks after two or more years' employment, with vacation credits of 2 per cent during the first year and 4 per cent during the second or each subsequent year.

Three Bills respecting Fair Employment Practices would have forbidden employers to discriminate in advertisements or application forms for employment, to refuse to hire any person, or to discharge any person, because of race, colour, religion, national origin or ancestry.

A proposed amendment to the Minimum Wage Act sought to establish a minimum wage of 75 cents an hour for all workers except apprentices.

A Bill respecting Equal Pay for Equal Work would have prevented employers

from paying women employees lower wage rates than are paid to men for the same type of work.

An amendment to the Mothers' Allowances Act would have raised from 16 to 18 years the age to which an allowance may be paid for a child who is continuing his education.

QUEBEC

Little legislation of labour interest was passed by the Quebec Legislature in its session from February 15 to April 5. A new Act prohibiting the affiliation of unions of municipal firemen and policemen with other associations was passed.

Firemen and Policemen

By an Act Respecting Public Order, firemen's and policemen's unions will not be able to affiliate outside of their own municipality nor may they include workers of any other category. The Act provides that any association which admits to its ranks members of a municipal police force or persons who are at the same time members of a municipal fire department and police force will not be qualified to negotiate or be a party to a collective agreement nor will it be recognized by the Quebec Labour Relations Board as representing a group of employees if the union is not exclusively composed of employees of the same category and in the service of the same municipal corporation, or if it is affiliated with another association.

As regards salaries and working conditions, a subsisting collective agreement made between a firemen's or policemen's association and a municipal corporation will remain in force for the duration of its term if less than two years or for two years from the signing of the agreement.

Municipal and School Corporations

The section in the Act respecting Municipal and School Corporations and their Employees (L.G., 1949, p. 612) has been deleted which provided that a collective agreement entered into by a municipal or school corporation and its employees or an arbitration board decision regarding such corporation and its employees should not be interpreted so as to interfere with the jurisdiction of municipal corporations concerning the closing of certain establishments at fixed hours and days nor so as to hinder, directly or indirectly, the exercise of this jurisdiction.

Masters and Servants

An Act was passed to repeal the provisions of the Cities and Towns Act and

of the charters of the cities of Montreal and Quebec which authorize municipal councils to make by-laws to regulate the duties of masters towards apprentices, journeymen, servants, domestics and labourers and of the latter towards their masters. Any regulations adopted previously under the rescinded provisions will be void.

Housing

An Act "to promote the settlement of the housing problem" was passed, similar to Acts passed this year in other provinces, which enables municipalities to take advantage of amendments made in 1949 to the National Housing Act, 1944 (Canada). The Government of Quebec is empowered to enter into an agreement with the Government of Canada for carrying out legislative provisions or measures relating to the housing problem. As provided for under the National Housing Act, the federal Government will pay 75 per cent and the Province 25 per cent of the cost of approved housing projects. Municipal corporations are authorized to participate with the Quebec Government in carrying out any agreements. The Lieutenant-Governor in Council, on the recommendation of the Quebec Municipal Commission, may authorize any municipal council to borrow whatever sums are necessary to defray the expenses incurred in carrying out the agreement.

By an amendment made to legislation passed at the 1948 session to facilitate the building of homes (L.G., 1948, p. 1267) the Government is authorized to spend an additional \$5,000,000 for the purpose of paying interest in excess of two per cent on loans made for the building of new homes, such homes to be not more than two-unit dwellings.

Credit Unions

A 1947 Act to contribute to the success of credit unions authorized the Lieutenant-Governor in Council to grant, on conditions he may determine, to any federation of peoples' savings banks, commonly called "Caisses Populaires Desjardins" formed under the Quebec Co-operative Syndicates Act, or to any group of such federations, subsidies not exceeding a total of \$90,000 a year during a period of three years. This period has, by an amendment, been extended to seven years.

Miscellaneous

An Act which came into force on July 19 provides for the setting up of social welfare courts. Among the matters which will come under the jurisdiction of the new courts will

be appeals from decisions of the Quebec Old Age Pensions Commission refusing an application for an old age pension, and infringements of municipal by-laws committed by children under 18.

NEW BRUNSWICK

At the 1950 session of the New Brunswick Legislature from March 7 to April 28 very little legislation of interest to labour was enacted. A law to provide for the regulation by municipal by-law of closing hours of shops replaces a similar statute of 1939. An Act to enable municipalities to provide pensions for their employees was passed.

Early Closing of Shops

A new Early Closing Act, which enables municipal councils to make by-laws fixing the hours for closing of shops, replaces an Act of 1939 without substantial change. The Act continues in effect all by-laws under the former statute.

The council of any city, town, village or municipality is empowered to make by-laws requiring that during the whole or any part of the year retail establishments must be closed and remain closed on any day of the week between the hours specified in the by-law or during part or the whole of a holiday. However, the by-law may permit one or more of such shops, when designated by an official named by the municipal council, to remain open for the convenience of the public on such days and for such hours as may be specified.

A council may pass by-laws on its own motion or on petition of a representative proportion of the persons engaged in any class of retail trade or in barbering or hairdressing. A penalty of not more than \$40 or, in default of payment, of a term of imprisonment not exceeding two months is provided for violation of any by-law made under the Act.

The new Act omits a provision of the former statute which provided that penalties were to be recovered or enforced under the Summary Convictions Act and to be paid to the treasurer of the municipality.

Municipal Employees' Pensions

The Municipal Employees Pension Act was passed to empower a municipality to adopt a pension or superannuation plan for its permanent employees by by-law approved by the Minister of Education and Municipal Affairs.

A municipal superannuation fund may be established and the municipality may arrange for contributions by the permanent

employees to the fund. The municipality may contract with a licensed insurer for the payment by the insurer of the pensions provided for in the plan and for the payment by the municipality to the insurer of the premiums specified in the contract.

From the effective date of the plan the municipality may deduct from the salary of each permanent employee the amount of his contribution to the fund or towards payment of the premium, pay its contribution into the fund and the amount collected from the employees, pay a pension or superannuation allowance to former permanent employees, and assess and levy annually a sum sufficient for its annual contribution to the fund and for the expenses of administration of the plan.

Vocational Education

The loans which may be raised by the Lieutenant-Governor in Council to reimburse vocational committees for expenditures on buildings used for vocational education purposes have been raised from \$1,125,000 to \$4,000,000.

An Act was passed to empower the Lieutenant-Governor in Council to spend a sum not exceeding \$18,000 to acquire buildings for the New Brunswick Technical Institute in Moncton and to purchase equipment for vocational education.

Housing

As has been the case in other provinces this year, a housing Act was passed, entitled the Joint Project Housing Act, to enable the Government of New Brunswick to enter into an agreement with the federal Government respecting joint housing projects. The Act is similar to the Quebec Act noted above. A city, town or incorporated village may make an agreement with the Provincial Government for its participation in such joint housing projects.

Credit Unions and Co-operative Associations

A new subsection added to the Credit Union Societies Act provides that every credit union will have a lien on the shares and deposits of a member for any debt due to it by a member and may use any sum which is credited to the member as payment or part payment of the debt. Security is now required on all loans to credit union members in excess of \$200, instead of \$100, as before. A further amendment adds to the section which enumerates the purposes for which a credit union may be incorporated "to invest in Federations incorporated under The Credit Union Federations Act". The provision

which allowed credit unions to invest in the shares of a building or loan association was deleted.

A new section added to the New Brunswick Co-operative Associations Act, 1946, empowers an association to establish and maintain by itself or jointly with another co-operative organization a pension plan for employees of the association. For this purpose the association may make contributions and by-law provide for the com-

pulsory deduction of contributions from the salaries of employees.

Guides

A person desiring a guide's licence is still required to be registered as a guide with the Minister of Lands and Mines and to pay an annual licence fee, by a new Game Act which replaces a statute of 1921. Camp helpers are also required to obtain a licence from the Minister.

Recent Regulations Under Dominion and Provincial Legislation

Important new safety regulations were issued in both Quebec and Alberta. The protection of workmen and of the public in construction yards is the object of special regulations under the Quebec Industrial and Commercial Establishments Act, and in Alberta regulations have been issued to promote safety in and around quarries. Ontario has revised and consolidated the regulations made under the Workmen's Compensation Act. In British Columbia, the trade of refrigeration has been brought under the Apprenticeship Act.

DOMINION

Canada Shipping Act

The pilotage by-laws for the district of Montreal were amended by an Order in Council (P.C. 3206) made on June 28 and gazetted July 12.

The section dealing with the licensing of apprentice pilots was amended to provide that an applicant accepted and placed on the list after January 1, 1950, may not be granted a licence if he is under 18 or over 22 years of age. Formerly, the age limit for an apprentice's licence, with certain exceptions, was 25 years. It is now provided that an application from a candidate for an apprentice pilot's licence will not be accepted unless the candidate is a Canadian citizen, instead of a British subject. He must, as formerly, be a resident of Canada at the time of making application.

The service which the apprentice must do in each year of apprenticeship has been increased. He is now required to make, in the company of a licensed pilot, at least 40 trips between Montreal and Quebec, five trips into Sorel, five trips into Three Rivers and 20 movages.

The age limit for a pilot's licence has been lowered from 40 years to 35, except that where an applicant's name was on the list of applicants to become apprentices before January 1, 1950, he is eligible to be granted a pilot's licence until he is 40.

Eyesight and hearing tests are now required to be taken by every pilot and apprentice pilot upon entry into the pilotage service and every fifth year thereafter until he reaches the age of 50. These examinations were formerly required annually. After 50 years of age, a pilot is required to have these tests every second year. As before, the licence of any pilot or apprentice pilot who fails to pass such examinations will be suspended. A pilot over 65 years who may be granted a temporary licence must pass such hearing and eyesight examinations.

PROVINCIAL

Alberta Government Liquor Control Act

The restrictions on the employment of women and boys in licensed premises are continued by the new regulations (803-50) made by the Alberta Liquor Control Board on June 27, gazetted on July 15. The former regulations are rescinded.

As before, no person under 21 years may be employed in connection with the sale, handling or serving of beer or liquor in any licensed club, canteen or hotel, nor, except on written permit from the Board, may any female other than a licensee or the wife of a licensee be so employed in or about that portion of any hotel premises licensed for the sale of beer.

Alberta Quarries Regulation Act

The first regulations have been issued by an Order in Council (918/50) gazetted July 31, under the Quarries Regulation Act which was passed at the 1950 session of the Legislature. The regulations provide for the appointment of managers, foremen and blasters and fix their duties, and prescribe minimum safety precautions for blasting operations, for machinery used in the quarry, for storing explosives, for the prevention of the accumulation of dust or water in the quarry and other matters.

A quarry must be under the control and direction of a manager who may be either the owner or his appointee. A foreman for each shift must be appointed in writing by the manager to supervise continually all operations at any open pit or excavation. At least once during each shift the foreman must make a safety inspection of the quarry, enter a report of the inspection in a book kept for the purpose and post a copy of the report in a conspicuous place at the quarry.

To supervise all work in connection with drilling and blasting operations the manager must appoint a blaster who must hold a blaster's certificate. A blaster's certificate may be granted by an inspector to a person over 21 years of age who understands working directions and warnings in English and who has had at least six months' experience under the supervision of a blaster. Each certificate will expire on the 31st of July following the date of issue and may be renewed at the discretion of the inspector. If a blaster is found to be incompetent or guilty of any dangerous practice or improper conduct, the Director of Mines may suspend or cancel his certificate.

The manager may also act as foreman or blaster or both if, in the opinion of the inspector, the nature of the quarrying operations and the size of the quarry are such that he can properly carry out these other duties. A person may not act as manager of more than one quarry, however, without the permission of the Director. The Director must be notified in writing within 10 days of the appointment of a manager, foreman or blaster.

The blaster is given specific responsibility for seeing that blasting can be safely carried out and that the place is safe before work is resumed. He must supervise the care and use of explosives, examine every shot hole before explosives are loaded into it, personally fire all shots, see that all persons are out of danger from possible effects of a shot, and keep a daily record

showing the number of shots fired, the amount of explosives used and the number of misshots occurring.

Detailed safety provisions are set out for drilling and blasting operations including proving and cleaning the drill hole, setting the fuse and firing the charge. All shots must be fired electrically and the firing lines and leading lines must be in good condition and of adequate length to insure the safety of the blaster. A blaster must not enter or allow other persons to enter the places where the charges have been fired until he has disconnected the cables from the blasting battery or has pulled out and locked the switches of the blasting circuit.

Regarding the care, storage and transportation of explosives, the regulations stipulate that no magazine may be maintained on quarry property unless the inspector has given written approval of its structure and location. The magazine must be so constructed and guarded by mounds of earth as to insure safety against explosion. It is forbidden to leave uncased explosives in a magazine, and cases containing explosives must only be opened with wooden or other non-metallic instruments. They must not be opened in the magazine. On every package of explosives there must be printed the name and business of the manufacturer, and the strength and date of its manufacture.

Vehicles used to transport explosives must display a sign marked "Danger-Explosives". The driver is required to exercise the greatest precaution and no unauthorized person may ride on the vehicle. Explosives must be covered with tarpaulin in open vehicles and kept away from detonators and any exposed metal while being transported. Explosives taken into the quarry must not exceed the amount needed for 24 hours. Detonators and explosives must be stored in separate boxes in the quarry. Storage boxes must be kept locked and clearly marked to indicate danger.

Workmen are forbidden to take a naked light into or to smoke in a magazine or other place where explosives are kept. Frozen explosives must not be used. The owner must provide a proper thawing apparatus and regulate conditions under which thawing will take place.

Electrical equipment in or about a quarry must be installed and maintained in accordance with the provisions of the Canadian Electrical Code of the Canadian Standards Association, but where its provisions conflict with the regulations the latter will apply.

With regard to safety precautions in connection with machinery, the regulations

require all exposed dangerous parts of machinery, equipment, appliances and plant to be kept fenced securely. All machinery and quarrying and loading equipment must be maintained in a safe operating condition and must be inspected by a competent person, appointed by the manager for the purpose, at least once in every 24 hours. A signed report of each inspection must be made. Operators of shovels, drag-lines, tractors, hoists or derricks must be provided with efficient warning devices and when this equipment is used during darkness it must be equipped with efficient headlights. Persons are forbidden to get on or off drag-lines or shovels while in motion or travel on hoists or derricks. Operators of loading shovels must swing the dipper over the body of the truck and never over the cab.

No person must be permitted to work near the face of a quarry until it has been examined by the foreman and all hazards removed. No part of the face or walls of a quarry may overhang, and any doubtful or overhanging pieces must be barred down or otherwise made safe. Employees must be kept constantly on the alert for slides or falling material. If, in the opinion of an inspector, the face of a quarry is too high, he may order that the face shall be worked in benches. Where men have to work or climb on the face of a quarry above the floor or bench level, safety ropes and belts must be provided and used when necessary. Runways must be provided on the sides of a quarry at suitable intervals for the safety and convenience of persons employed who are required to enter and leave the quarry.

Special provisions are also set out for working in clay, sand and gravel or other types of friable or unconsolidated material, and for drilling a well on quarry property for the purpose of exploring or drilling for petroleum, natural gas, salt or other mineral.

Where dust is produced by drilling, the drill must be equipped with a water jet, spray or other appliance of a type approved by the inspector to prevent the escape of dust. Every dusty place where work is being carried on in a quarry must be adequately supplied at all times with water under pressure or other appliances approved by the inspector for laying the dust caused by drilling, blasting or moving material.

No water must be allowed to accumulate in a quarry so as to create a hazard. Every operating quarry must be provided with suitable and efficient machinery for keeping it free from water which might

endanger the lives of persons in the quarry or its vicinity or in an adjoining quarry or mine.

The owner is required to provide a good supply of first-aid material at the quarry and to employ on every shift at least one person who is proficient in rendering first aid. He must also supply a sufficient quantity of safe, fresh drinking water with sanitary appliances for drinking within reasonable access of all workers. A sufficient number of sanitary conveniences according to the number of persons employed must be provided and kept clean.

Persons under the influence of or carrying intoxicating liquor are forbidden to enter a quarry or be in or near any working place or machinery in motion.

When operations are suspended or when a quarry is abandoned, it must be securely fenced on all dangerous sides or other precautions taken at the direction of an inspector.

British Columbia Apprenticeship Act

The trade of refrigeration has been added to the list of trades to which the Act applies, by an Order in Council made on July 14 and gazetted on July 20.

British Columbia Electrical Energy Inspection Act

By a notice gazetted on July 13, the regulations under the above Act which went into effect on June 1, 1950, governing electrical permits and inspection fees will now apply to the southern half of the Province including all the area south of a line parallel to and 10 miles north of the Canadian National Railway line from Prince Rupert to the eastern boundary excluding the Queen Charlotte Islands.

Previously, the regulations applied only to an "L" shaped area south from Prince Rupert to the 53rd parallel and extending eastward between the 53rd parallel and the international boundary to the Kootenay River.

No person in this district may construct, install or alter any electrical work in any premises until he has obtained a written permit from the Inspector of Electrical Energy, on penalty of a fine of not more than \$50 (L.G., 1950, p. 1064).

The regulations, however, do not apply to any municipality which, under a municipal by-law, maintains its own electrical inspection service as authorized under the Electrical Energy Inspection Act.

British Columbia Hours of Work Act

The exemption under which the hours of bartenders, waiters and utility men working a split shift within premises licensed to sell beer may be confined within a 13-hour period instead of the 12-hour limit set by the Act has been continued for an indefinite period by Regulation 34E made on July 6 and gazetted July 13. Four previous Orders permitted this exemption for short periods up to June 30, 1950.

British Columbia Workmen's Compensation Act

A change has been made in the industrial diseases schedule under the Workmen's Compensation Act, effective from July 1, 1950. The new Order was made on June 29 and gazetted on July 6.

Employees who contract tuberculosis in their work where there is contact with tuberculous infection or tuberculous-infected material will be compensated, as before, if they are free from evidence of tuberculosis before engaging in their employment, but they now must also be free from evidence of the disease for six months after engaging in their work. However, when primary tuberculosis, as proven by a negative tuberculin test on employment, develops during the first six months of employment, compensation will be payable.

Public health units of the Provincial Government, of the University of British Columbia, of any municipality or of a school board have now been added to the places of employment where compensation for this disease is payable which include, as formerly, hospitals, sanatoria, clinics and any branch of the Victorian Order of Nurses.

Ontario Hours of Work and Vacations with Pay Act

Amendments have been made to the regulations under the Act respecting employees excepted from the application of the Act and vacation-with-pay stamp books. The amending regulations (O. Reg. 175/50) were issued on August 3 and gazetted on August 12.

Persons under the Dental Technicians Act, 1946, the Nurses Act, 1947, the Public Accountancy Act, 1950, and the Teaching Profession Act, 1944, were added to the list of professional workers excepted from the application of the Act. Persons, students and apprentices in the professions

are excluded from both the hours and vacations provisions of the Act.

Within 10 days of the receipt of an employee's stamp book after he has ceased to be employed, the employer must affix the necessary stamps and return it to the employee. In the case of an employee in the construction industry, the employer is also obligated to return the stamp book within 10 days after an employee who has ceased to be employed presents his book. Where the employee has not ceased to be employed, the stamp book is to be returned with the proper amount of stamps affixed on June 30 of each year.

Ontario Workmen's Compensation Act

A new consolidation and revision of the regulations under the Workmen's Compensation Act has been issued (O. Reg. 154/50), replacing earlier general regulations and incorporating the three schedules which previously formed part of the Act. Schedule 1 lists the industries in which employers are liable to contribute to the Accident Fund; Schedule 2 enumerates the industries in which employers are individually liable to pay compensation and medical aid; and Schedule 3 sets out the diseases under the Act for which compensation is payable and the description of the processes in which they may occur. A 1950 amendment to the Act (L.G., 1950, p. 1693) provided for the deletion of the three schedules from the Act and their re-issue in up-to-date form by regulations. The new regulations were made on June 22 and gazetted on July 29.

In addition to an improvement in arrangement within the schedules, certain changes have been made either for the purpose of clarification or better wording or to add related industries to a class where this has been considered desirable. In several cases an industry has been transferred from one class to another. A few industries are no longer specifically enumerated. No significant changes, beyond improved arrangement, have been made as regards the schedule of industrial diseases. The description is omitted of the processes in which bursitis and dermatitis venenata may be contracted.

The general regulations list the industries excluded from Part I of the Act (the collective liability system); those excluded when carried on in connection with the business of a retail store; and the industries excluded from Schedule 1 in which less than a stated number of workmen are usually employed. With respect to the latter, the group of industries which are excluded where less than

six are employed include logging, operation and maintenance of office buildings or buildings rented for manufacturing, mining, power-laundries, the restaurant business, and window cleaning. A smaller group of industries is excluded where fewer than four workers are usually employed.

Other provisions of the regulations deal with the general rule of interpretation, industry regarded as a unit, speculative building, farming, bankruptcy, posting of information regarding the Act, compensation for tuberculosis, and first-aid requirements.

Several new industries have been added to Schedule 1. Included in the additions are land-clearing and stumping (Class 1) except where less than six workmen are usually employed; manufacturing of plywood (Class 3); pattern-making, manufacturing of hockey sticks, lacrosse sticks, lead pencils, pressed-wood pulleys, skis and toboggans (Class 4); manufacturing of artificial abrasives and artificial graphite (Class 7); die-casting (Class 8); manufacturing of steel tanks (Class 9); manufacturing electric apparatus, appliances or motors, manufacturing washing machines and television sets, heat-treating, erecting wire fences, polishing and buffing (Class 10); aerial-testing or flying by the manufacturers of aeroplanes (Class 11); butchering (Class 14); roasting and grinding coffee and roasting nuts (Class 15); manufacturing purses (Class 16); mixing and delivering ready-mixed concrete, sanding streets or roads (Class 20); bull-dozer operations (Class 21); painting, weather stripping, installation of commercial refrigeration, and erection of television aerials (Class 24).

Quebec Industrial and Commercial Establishments Act

New special regulations designed to promote the safety of workers in construction yards and to protect the public were issued under the above Act by an Order in Council (No. 828) on July 12 and gazetted on August 19. Construction yards include any place where a building is erected, altered, repaired, rebuilt or demolished.

In general, the regulations state that all necessary measures must be taken to secure the safety of both the public and the employees. The inspector has the right to make any recommendation to the employer which he deems advisable. Before starting operations, the employer must send written notice to the Chief Inspector of

the Labour Inspection Office in the district where the operations are to be carried out of the date on which work is to begin.

All equipment, whether portable or not, including scaffoldings, ladders, cranes, elevators, cables, staircases, etc., must be passed by the inspector who may by written notice order any necessary repairs to be carried out. Before being used in a construction yard the equipment must be examined by a qualified person designated by the employer and repaired if necessary.

Suitable natural or artificial lighting, approved by the inspector, must be maintained on sidewalks, gates, rails, foot-bridges, platforms, scaffoldings and staircases.

Hoists must be made of sound timber or structural steel and erected or demolished only by skilled workers. They must rest on solid foundations, be upright and pillared securely, and be anchored to the building at maximum distances of 25 feet or held by steel cables of at least $\frac{1}{2}$ " in diameter. When required by an inspector, elevators must be provided with doors on each floor which can be opened from the outside only when the car or platform is at the floor level. They must be equipped with brakes of sufficient grip to check the fall of the car or platform. A signal system approved by the inspector must be installed. When an elevator is halted for repairs no person other than the operator may be in the car while it is being taken up and down for trial runs.

Cranes and derricks must rest on supports and pillars to ensure proper distribution of the load. The employer must observe the regulations for the construction of scaffoldings which are found in forms approved by Order in Council under the Scaffolding Inspection Act.

In the construction of structural steel buildings a temporary floor must be erected at every second floor level, made of materials at least 2" thick and 10" wide firmly secured at the ends and without intervals to protect employees working above or below.

Roofs and floors must not be overloaded with materials, debris or machinery so as to be dangerous to the employees. To allow employees to load and unload materials safely floors must be smooth, with no holes, splinters, projecting nails or cumbersome objects which might cause workers to stumble. Floors, steps and landings must never be slippery and must be free of ice in normal conditions. Staircases, rails, elevators or platforms where slipping may constitute a particular danger must be provided with non-skid surfaces.

All temporary buildings must be solidly built in order to avoid all possibilities of collapse.

The regulations require one or more temporary staircases with firmly secured handrails to be built from the cellar to the top of the building. The handrails must be so constructed as to eliminate obstruction or sharp angles liable to loosen the grip. All openings in staircases must be surrounded on three sides by railings.

Hygienic sterilized nails must be used for wood or metal lathing or the laying of all kinds of wall boards.

The construction yard must be fenced in for public safety when operations are carried out less than seven feet from the building line of a public road or when the inspector deems it advisable.

One or more first-aid boxes, the contents of which are to be determined by the inspector, must be kept in each construction yard in a convenient, clean place, easy of access and affording all the facilities necessary for the administration of first-aid. The box must contain simple instructions for emergencies and its contents must be checked at least once a month and any used articles must be replaced immediately. One or more stretchers as determined by the inspector must be put in various places in the construction yard and if, because of the size of the yard, the inspector deems it necessary, the employer must hire a nurse, certificated orderly or doctor.

If there is no running water, a sufficient quantity of pure, fresh drinking water in hygienic containers must be easily accessible to employees. The use of the common drinking cup is prohibited, and pails or open containers which must be tipped or into which utensils must be dipped must not be used, whether or not they are covered. If the water is cooled by ice, the container must be so constructed that the ice and the water do not come into contact.

If the number of employees warrants it, the inspector may require the employer to provide a clean and heated place for meals and a room where street clothing may be changed. A number of sanitary conveniences as determined by the inspector must also be provided.

Saskatchewan Hospitalization Act

Regulations issued under the Saskatchewan Hospitalization Act, 1948, approved by Order in Council 1305/50 on July 14, gazetted July 28, govern the levy and collection of the hospitalization tax for the year 1951. The regulations are similar to those issued for 1950 (L.G., 1949, p. 1258).

The principal change is that treaty Indians who have resided outside an Indian reserve for the previous 18 months and have resided in Saskatchewan for the previous six months may elect to pay the hospitalization tax and thereby receive the benefits of the Act. The tax remains the same as that set last year—\$10 for an adult, and \$5 for each dependent child, with the family maximum payment fixed at \$30. Treaty Indians residing on a reservation are still exempt from both taxation and benefits. Since last year, Indians resident in Saskatchewan for six months, who during the tax year become enfranchised within the meaning of the Indian Act, may, on payment of a *pro rata* tax of 84 cents a month for adults and 42 cents for dependants under 18, become entitled to benefits under the Act.

Administrative changes follow a 1950 amendment transferring the administration of the Act from the Health Services Planning Commission to the Minister of Public Health.

Saskatchewan Workmen's Compensation (Accident Fund) Act

Following a 1950 amendment to the Act which permitted regulations to be made by the Board providing for penalties for the late filing of medical accounts, such regulations were made by an Order in Council (O.C. 1133/50) on June 20 and gazetted on June 30.

From July 1, 1950, each account for medical services which is not received before the expiry of two calendar months after the month in which the services were terminated will be subject to a discount of five per cent for each month or part of a month during which the account is late, up to a maximum of 25 per cent. This penalty, however, does not apply when the Board is satisfied that the physician was unable to submit the account promptly because of illness or some other circumstance which the Board thinks is reasonable.

Legal Decisions Affecting Labour

The two decisions of the British Columbia Court of Appeal reported below are further developments of a case which has been reviewed from time to time in the LABOUR GAZETTE. The action concerns a member of the Boilermakers' and Iron Shipbuilders' Union who alleged that he had been wrongfully expelled from the union which had a closed shop agreement with the employer and that he thereby lost his employment. In the first decision an appeal from a judgment declaring the plaintiff to be a member in good standing of the union and awarding him \$5,000 damages for loss of his employment was dismissed. In the second, an appeal against a Supreme Court order committing two union officials to jail for contempt of Court for refusing to issue a membership card was allowed.

B.C. Court Dismisses Appeal against Judgment Awarding Damages for Wrongful Expulsion from Union Membership.

The Appeal Court of British Columbia on May 3, 1950 delivered its decision in an appeal from the judgment given by Mr. Justice Whittaker in the Supreme Court of British Columbia on September 23, 1949 in the case of *Kuzych v. White et al.*

The case dates back to May 14, 1945 when Kuzych brought action in the British Columbia Supreme Court against union officers, alleging that he had been wrongfully expelled from the Boilermakers' and Iron Shipbuilders' Union, and claiming damages because his expulsion prevented him from obtaining employment. The action was dismissed with costs on January 20, 1947 (L.G., 1947, p. 554). Kuzych appealed the decision and the Court of Appeal in June, 1948 ordered a new trial because the defendants had amended their statement of defence. In the retrial the Supreme Court on September 22, 1949 reversed the previous decision and awarded the plaintiff damages of \$5,000, and issued an order declaring him still to be legally a member of the union (L.G., 1950, p. 219). The defendant union appealed this judgment. The Appeal Court has now upheld the Supreme Court decision, with two judges dissenting.

In his reasons for judgment, Mr. Justice O'Halloran first dealt with the argument that Kuzych should not be allowed to take his grievance to the Courts since he had not exhausted all means of redress within the union, not having appealed the decision of the trial committee and the union membership to the executive of the Shipyard General Workers' Federation in the manner provided by the union constitution. He accepted the trial Judge's finding that the union trial committee was "inexorably

biased" against Kuzych, and further concluded that Kuzych had no occasion whatever to believe that the Federation executive, which was in no sense a judicial or even an impartial body, would reverse the decision of the union that expelled him. "Its verdict would be a foregone conclusion".

Mr. Justice O'Halloran held that Kuzych's expulsion from the union, since it prevented him from obtaining work from any employer who had a closed shop agreement, interfered with his right to earn his living at his chosen trade, and also with the right to freedom of legitimate speech and action, since his expulsion from the union was connected with his advocacy of the open shop principle.

Such restrictions upon the rights of the individual must be regarded as entirely beyond the power of any union or of any business organization to inflict. Business and labour organizations who may properly claim certain inherent rights can exercise these rights only subject to inseparable duties, one of which is not to trample upon the inherent rights of others.

A man has a right to work at his trade. If membership in a union is a condition attached to working at his trade, then he has an indefeasible right to belong to that union. It must be so, or else the union can have no right to agitate for a closed shop. For a union to set itself up as the sole arbiter of who shall join the union and remain a member, and at the same time decree that no one shall be employed who does not belong to the union, is an attempt to exercise totalitarian powers which no constitutional democratic country claims to have or has the right to confer upon any union.

He distinguished between the present complaint and those of members of clubs and of fraternal or social associations where the grievances are strictly private in character and do not deprive a member of opportunity of earning a livelihood or trench upon his civil liberties. Naturally an asso-

ciation is itself the proper forum for decision of these strictly private grievances, and precedents have been established that such matters should not be brought to court unless all means of redress within the association have been exhausted. On the other hand, "the civil liberties of the subject cannot be decided by a trial committee set up by a labour union. That is the prerogative of the constituted courts of the country".

Mr. Justice Robertson and Mr. Justice Smith also agreed that the appeal should be dismissed. Both found the trial committee not competent to hear the charges because of its bias. The conduct of one member especially, in their judgment, went far beyond what can be excused as expressions of justifiable resentment. Mr. Justice Robertson was also of the opinion that the union had failed to hold a proper investigation in that the committee was not properly constituted.

Mr. Justice Bird, in his dissenting judgment, with which the Chief Justice concurred, pointed out that the union had a closed shop agreement with the company when Kuzych entered its employ as a welder in 1942. He quoted clauses in the union constitution which set out its adherence to the closed shop principle and the obligation of each member to support that principle, and reviewed other sections which prescribed the proper procedure for a member having a grievance against the union. He noted that Kuzych, when he became a member of the union, subscribed to and agreed to observe its by-laws, one of which bound him not to become a party to any suit against the union until he had exhausted all remedies allowed him by its constitution and by-laws. Kuzych did not exhaust the remedies set down in the constitution in that he did not appeal to the Executive Committee of the Federation. Mr. Justice Bird did not find that the committee which dealt with the charges against Kuzych was improperly constituted, nor did he find any evidence that would justify the assumption that Kuzych would not have obtained a fair hearing from the union appeal tribunal. He held that it was well established that courts do not entertain an action of this kind until obligations and remedies available under the constitution and by-laws of the union have been exhausted. For these reasons he dissented from the judgment, but without prejudice to any other action being brought after the remedies provided had been exhausted. *Kuzych v. White, et al* (No. 3) [1950], 2 WWR 193.

B.C. Appeal Court Allows Appeal against Supreme Court Order Committing Two Union Officers to Jail for Contempt.

The British Columbia Court of Appeal on May 3, 1950 allowed an appeal from the order of the Supreme Court made December 14, 1949 committing two union officers to jail for contempt of Court because the executive of the Marine Workers' Union refused to admit Myron Kuzych to membership. (L.G., June, 1950, p. 896).

The appeal was allowed on the grounds that the Boilermakers' Union to which the Court order applied had ceased to exist, and that the order was not binding on the Marine Workers' Union which succeeded it.

Chief Justice Sloan, in his reasons for judgment, with which Mr. Justice Bird agreed, stated that the Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 1, on November 19, 1945 ceased to exist as such and merged "its identity, functions and jurisdictional authority" in the several other unions. The amalgamated unions thenceforth became a new organization known as the Marine Workers' and Boilermakers' Industrial Union. The new union has a membership of approximately 5,300 men of whom 3,112 had been members of the Boilermakers' Union and 2,188 had been members of the other unions joining the amalgamation.

The circumstances leading up to the Court order declaring Kuzych to be a member in good standing of the Boilermakers' Union were reported in a previous issue (L.G., 1950, p. 219). The relevant parts of the judgment, dated September 22, 1949, are as follows:—

This Court doth declare that the resolution of the Defendant Boilermakers' & Iron Shipbuilders' Union of Canada, Local No. 1 allegedly passed on the 19th day of March, 1945, which purported to expel the Plaintiff from the Defendant Boilermakers' & Iron Shipbuilders' Union of Canada, Local No. 1 is, and has been since its alleged passing, illegal and void;

And this Court doth further declare that the Plaintiff since the alleged expulsion of the 19th day of March, 1945, was and remains a member in good standing of the Defendant Boilermakers' & Iron Shipbuilders' Union of Canada, Local No. 1;

And this Court doth order, adjudge and decree that the Defendants, their and each of their servants and agents be and they are hereby enjoined and restrained from giving effect to the said resolution allegedly passed by the Defendant Boilermakers' & Iron Shipbuilders' Union of Canada, Local No. 1 on the 19th day of March, 1945.

On October 11, 1949 Kuzych made a formal demand for a membership card in the new union. His request was considered at a regular business meeting of the union,

and, by resolution, the executive was instructed to refuse the request. On November 16, 1949 Kuzych applied to the Court for an order to commit two officers of the Marine Workers' Union to jail for contempt of Court in failing to comply with the Court's ruling. On December 14, 1949 Mr. Justice Whittaker made an order committing the two union officers to jail.

Chief Justice Sloan concluded that this committing order could not be upheld. The order of September 22 bound officers of the Boilermakers' Union which was no longer in existence. "It cannot be construed to compel the officers of the new Marine Workers' Union to issue a membership card in that union to the respondent and their refusal to do so cannot subject them to the imposition of judicial sanctions in these proceedings."

Mr. Justice Smith in a dissenting judgment held that the surrender of charter by the Boilermakers' Union had no serious legal effect. "The union never had any corporate existence; it was merely a fluctuating aggregation of individuals. . . . The aggregation took in a number of new members, became a larger aggregation, and assumed a new name." He concluded that the judgment was really a judgment against all the "merged" unions.

By way of further analogy it may be said that the membership of the Boilermakers' Union were, so to speak, on a raft, and on that raft were entitled, on amalgamation, every one of them, the least not less than the best, to float into the larger body. But on the way they pushed the plaintiff overboard. The Court has said that this was a wrongful act and has replaced him on the raft which by this time has reached the wider waters of the Marine Workers' Union. Now they seek to shove him overboard again. To put it quite mildly, this will not do. The law would be a poor thing if it contained no remedy.

He would have dismissed the appeal and ordered the recommittal of the two union officers until further orders of the Supreme Court. *Kuzych v. White, et al* (No. 4) [1950], 2 WWR 255.

Mr. Justice Smith in a dissenting judgment held that the surrender of charter by the Boilermakers' Union had no serious legal effect. "The union never had any corporate existence; it was merely a fluctuating aggregation of individuals. . . . The aggregation took in a number of new members, became a larger aggregation, and assumed a new name." He concluded that the judgment was really a judgment against all the "merged" unions.

Report of the New Brunswick Department of Labour for the Year Ending October 31, 1949

Harmonious labour relations are noted in the Annual Report of the New Brunswick Department of Labour for the year ending October, 1949. The newly initiated pre-employment training of apprentices is reported to be developing.

The Department of Labour of New Brunswick is responsible for the administration of the Factories Act, 1946, the Stationary Engineers' Act, 1946, the Apprenticeship Act, 1944, the Labour Relations Act, 1949, the Minimum Wage Act, 1945, and the Industrial Standards Act, 1948. The Annual Report of the Department for the year ending October 31, 1949, summarizes the year's operations under each of these Acts.

New Labour Legislation

Two new labour laws were passed in 1949. The Labour Relations Act was assented to on April 28, and became effective by proclamation on July 1, 1949. It replaced the Labour Relations Act, 1945, and was modelled upon the Industrial Relations and Disputes Investigation Act of the Parliament of Canada. The Trades Examination Act provides for the examination and certification of tradesmen in the electrical trade, the electric-welding trade, and the gas-welding trade by a Board of Examiners for each trade. Minor amendments were made to the Apprenticeship and Minimum Wage Acts.

Labour Relations

The new Labour Relations Act varies in some particulars from previous legislation of this nature. It provides for the certification of unions as bargaining agents instead of individuals. Where it is found that the bargaining agent no longer represents a majority of the employees concerned, the Labour Relations Board may revoke its bargaining rights. Provision is made for the reinstatement of employees who are dismissed because of union activity. The new Act reduces the period between the date of a Conciliation Board's report to the Minister and the date on which a strike or a lockout may legally be declared, from 14 to 7 days.

In certain specified undertakings an agreement may be entered into with the federal Government for the administration of the Act by the Minister of Labour and appropriate officials of the Government of Canada. No action in this connection has been undertaken.

The Report emphasizes the excellent cooperation which has been received in the administration of the new Act and the desire of employers and workers to find a

fair and reasonable solution of their differences without resort to direct action.

For the year covered by the Department's Report only two strikes are noted, involving a total time-loss of 1,008 man-days. During this period the Labour Relations Board dealt with thirty-two applications for certification of bargaining representatives or bargaining agents. Of these, thirteen were granted, thirteen dismissed, five were withdrawn, and one was pending. In nine of the applications the Board conducted supervised representation votes.

During the year under review the Department's conciliation services were utilized in fifteen cases, each of which is summarized. In each case a Departmental conciliation officer or a conciliation board appointed by the Minister of Labour was made available to the parties concerned.

Minimum Wages

Two minimum wage Orders were issued by the Minimum Wage Board during the year. One Order, effective October 24, 1949, established a minimum wage rate of \$4.50 per day for male employees engaged in producing pulpwood, pitprops or logs. This Order has been extended to September 30, 1950. The second Order, effective December 1, 1949, was a general Order establishing minimum wage rates for all female employees with the exception of those already covered by minimum wage orders and those excluded from the Minimum Wage Act.

The minimum wage rate established for female employees working a standard work-week of 48 hours or less is \$14.40. The minimum overtime rate for work in excess of 48 hours a week is set at 45 cents per hour. Thirty cents per hour is the minimum rate for part-time employees.

Departmental inspectors conducted 384 inspections to ensure that the two Minimum Wage Orders previously issued governing female workers in shops and in hotels and restaurants were being observed. Thirty violations for paying less than the minimum rate, 170 for failure to post the minimum wage order, and five for the keeping of insufficient records were discovered and corrected.

Industrial Standards

Under the Industrial Standards Act two Industrial Standards schedules became effective during the past year. One was for the carpentry trade in the construction industry in the Saint John zone. This schedule was approved by the Governor in Council on September 29, 1949, and came

into effect on November 1 of the same year. A schedule affecting employees in the plumbing and pipefitting trade in the Saint John zone came into force on October 15, 1949.

In accordance with the Act, an advisory committee equally representative of employers and employees was established by the Minister to assist in enforcing each schedule. While investigation of complaints and inspections made by an Industrial Standards Officer in the Saint John zone revealed some violations of the schedules, it was necessary to take court action in only one case. This case, in which a construction company was found guilty of paying an employee at a rate of wages lower than the minimum fixed by the schedule for the carpentry trade, was reviewed in the March, 1950, issue of the *LABOUR GAZETTE* (p. 352).

Factory Inspection

During the year the Factory Inspection Branch inspected 938 plants employing 17,419 male and 7,480 female workers. During these inspections 862 recommendations were made with respect to such matters as improved safety, cleanliness, lighting and ventilation, guards on machinery, properly equipped lunch, rest and wash rooms and lavatories, first-aid kits, drinking water facilities, and the installation of proper chairs for women workers, shower baths and additional clothing lockers.

Special attention was given to safety matters during the year. As a part of a larger inquiry by an Inter-departmental Committee on Public Safety, a sub-committee of which the Deputy Minister of Labour was a member was set up to inquire thoroughly into existing industrial safety services in the Province. The report of the Committee which was submitted to the Government on October 3, 1949, was being studied at the end of the year.

Discussions were held with the New Brunswick Accident Prevention Association and the Workmen's Compensation Board on the question of safety codes for various industries. It was decided to begin with the woodworking industry and a committee of three from this industry met with officials of the Department to work out such a code. It is pointed out that such codes as may be developed will be in the nature of recommendations.

During June and July, the Factory Inspection staff assisted officials of the federal Department of National Health and Welfare in a survey of industrial hygiene conditions in the Province, the first survey

of its kind to be made in Canada. About 300 plants were visited and records made of materials used, sanitary facilities, plant medical and nursing services and other conditions which might affect the health of employees. At the end of the year the Department of National Health and Welfare had not yet issued a report on this survey.

During the year 310 uninsured boilers and 850 pressure vessels were inspected by boiler inspectors and inspection certificates issued. During the same period 1,968 Stationary Engineers' and Stationary Boilermen's licences were issued.

Apprenticeship

Apprenticeship continued to develop rapidly during the year and there was a considerable increase in the number of apprentices indentured. In accordance with an amendment to the Act which was passed during the previous session of the Legislature, pre-employment training of prospec-

tive apprentices was undertaken by provincial authorities. An amendment to the Dominion-Provincial Apprenticeship agreement made on January 3, 1949, provided that the Dominion and the Province should share equally the cost of pre-employment training for those who wish to qualify as tradesmen through apprenticeship. Pre-employment training courses were established in the motor vehicle repair, electrical and carpentry trades and classes in plumbing and bricklaying were scheduled to begin early in 1950. On completion of pre-employment training the apprentice is trade tested and given time credits against the usual period of apprenticeship in the trade concerned.

An integral part of the apprentice's studies are part-time courses in trade theory and related technical subjects. Such classes were conducted at Saint John, Sussex, Moncton, Bathurst, Campbellton, Edmundston, Woodstock and Fredericton. Four supervisors actively supervised training on the job.

Annual Report of the Saskatchewan Department of Labour, 1949

A tapering off in the high level of employment of the previous years is noted in the Annual Report of the Saskatchewan Department of Labour for 1949. A considerable increase is reported in the number of inspections made in connection with the protective legislation administered by the Department.

The Sixth Annual Report of the Department of Labour of the Province of Saskatchewan for the year ending December 31, 1949, points out that there was more unemployment in the Province during 1949 than in 1948, that both average hourly and weekly earnings continued to rise, and that there was little change in the number of hours worked per week. Trade union membership increased by two per cent during the year, as compared with a five per cent increase during 1948 and a ten per cent increase for 1947.

The only addition to the work of the Department in 1949 was the transfer to its administration of the Electrical Inspection and Licensing Act.

New Legislation

The two new labour statutes enacted in 1949, the Electrical Inspection and Licensing Act, effective October 1, and the Passenger and Freight Elevator Act, effective December 1, replaced Acts of similar title which had become out-of-date. The Electrical Inspection and Licensing Act was

designed to ensure greater safety both to workmen and to the general public by providing for more control over maintenance work on electrical equipment in industry and over material used by the electrical trade. The new Passenger and Freight Elevator Act, which was designed to enable the Department to keep abreast of developments in design and construction of elevators and hoists, achieves greater control over the disposition of unsafe elevator and hoisting equipment and a wider coverage of such equipment.

Janitors and watchmen were brought within the scope of the One Day's Rest in Seven Act and janitors and caretakers in office and commercial buildings were brought under the Hours of Work Act. Minor amendments were made to the Minimum Wage Act and to the Factories Act (L.G., 1949, p. 740).

Labour Relations

"Time lost on account of strikes in Saskatchewan was considerably less in 1949 than in 1948, and again the greater part

of the time lost resulted from a single strike", the Report states. This was the strike in a sodium sulphate plant at Bishopric which accounted for more than 50 per cent of the 4,417 man-days lost. In 1948, 12,333 man-days were lost and in 1947 the total was 42,908, the highest number since the end of the war. Wages continued to constitute the major causes of all strikes, with general terms of agreements entering to a lesser extent.

The Labour Relations Board dealt with 80 applications from trade unions (a decrease of 27 from 1948) for certification. Of these 69 were granted, 5 were dismissed, 3 were withdrawn and 3 were pending at the end of the year. Representation votes were conducted in six cases. There were 25 applications for orders requiring employers to refrain from unfair labour practices, an increase of 19 from 1948. Of these 5 were granted, 4 dismissed, 15 withdrawn and 1 pending at the end of the year. The Board also dealt with 5 applications for reinstatement of wrongfully discharged employees, 1 for disestablishment of a company-dominated organization and 24 to amend or rescind existing Board orders.

The Report points out that in 1949 there was a slight decrease from 1948 both in the number of conciliation boards established and the number of disputes in which the Department was called upon to provide informal conciliation service. The number of firms involved in conciliation, however, was higher. Six conciliation boards were established during the year and a brief summary of their activities is included in the Report.

There were 27,509 trade union members at the end of 1949 in the two main labour congresses and the independent brotherhoods in the railway running trades, representing a two per cent increase during the year. Of these the largest number, 11,692, were in the transportation, storage and communication industries, 8,440 were in professional and public and personal service, 3,711 in manufacturing, 1,378 in wholesale and retail trade, 1,131 in construction, 490 in public utilities and 256 in finance, insurance and real estate.

Wages, Hours of Work and Holidays

The provisions of the Minimum Wage Act were extended in March, 1949, to a further 83 towns and villages having a population of 300 or more.

A general revision of the minimum wage orders, effective June, 1949, resulted in 13 new orders applicable to all places with a population of 300 or more (L.G., 1949,

p. 747). The wage rates were raised in most cases. A new provision in all except the special orders (9-13) stated that a rest period granted to an employee must be considered as time worked.

Five hundred and fifty-nine special licences were issued to employees on the recommendation of the Chairman of the Minimum Wage Board providing for a rate of pay slightly below the minimum for a restricted period of time and bringing those employees within the category of apprentices. Student nurses accounted for the greatest number of these licences (453), 37 were students in pharmacy, 21 students in accountancy, 18 students at law, 13 student laboratory technicians, 13 physically handicapped employees and 4 student X-ray technicians.

Under the Hours of Work Act, a new regulation, effective June 6, was made exempting from the 8- and 44-hour limits of the Act workers in shops and offices in the 83 small towns with a population of from 300-500 which had recently been brought under the Minimum Wage Act. Time and one-half must be paid for all work done beyond 48 hours (L.G., 1949, p. 746).

In order to confine the 44-hour week within five days, seven authorizations were issued by the Minister under the Act permitting a 9-hour day for 4 days a week. Three authorizations were issued permitting special arrangements for shift workers.

A complete list of the variations and exemptions permitted from the Hours of Work Act is found in Table H of the Report. This includes all Hours of Work Orders in force on December 31, 1949. Table G contains a similar list of all industrial standards schedules in force.

Inspections numbering 5,995 were made under the Minimum Wage, Hours of Work, Industrial Standards, Annual Holidays and One Day's Rest in Seven Acts.

Arrears in wages collected in 1949 amounted to \$36,956.14 representing a considerable decrease from the high figure of approximately \$80,000 for the preceding year. Of this amount \$26,027.90 was collected under the Minimum Wage and Hours of Work Acts, \$10,874.35 under the Annual Holidays Act and \$53.89 under the Industrial Standards Act. Only five prosecutions were instituted under the various Acts and convictions were registered in four cases.

Apprenticeship and Tradesmen's Qualifications

Approval was given to the 1949 amendment to the Dominion-Provincial Appren-

iceship Agreement providing for pre-employment training (L.G., 1949, p. 152). Undoubtedly this wider approach to apprentice training will increase significantly the number of apprentices engaged in the various designated trades, the Report states.

During the year 142 apprentices were indentured, a reduction of 14 from the previous year. The Report explains that this reduction is mainly due to the increased emphasis being placed on tradesmen's qualification. A sharp increase in apprenticeship contract cancellation approved by the Branch is noted—124 as compared to 32 for 1948. The Report states that:—

The reason for this increase is two-fold. Firstly, inspection has been speeded up and has resulted in the clearing of a backlog from the previous year. In the balance the employer or the apprentice has failed to live up to the provisions of the contract. Secondly, a significant number of these cancellations resulted from the movement of apprentices out of the trade or to other provinces.

Inspections by the four inspectors totalled 5,095. The purpose of the inspections, as stated in the Report, is to determine the qualifications of tradesmen in the various designated trades and to ensure that proper training was being given to apprentices indentured under the Act.

Considerable work was done in the field of qualifications of tradesmen engaged in the various trades under the Apprenticeship Act. Thirty-four examinations were conducted and 404 candidates examined, as compared with 23 examinations involving 257 candidates in 1948.

Boilers, Factories and Elevators

Increased activity is noted in 1949 in all phases of the Boilers, Factories and Elevators Branch. The increase is explained by the inspection of boiler equipment in new installations, the coverage of pressure vessels inadequately inspected or not checked at all previously, the great improvement in elevator and hoist equipment during the year and the rapid growth in the use of liquefied petroleum gas equipment.

Of the 11,079 inspections made in 1949 (compared with 4,224 in 1948), 2,402 were inspections of boilers, 2,801 of pressure vessels, 74 of refrigeration plants and 2,276 of liquefied petroleum gas installations. Factories accounted for 773 inspections, grain elevators for 1,710 and passenger and freight elevators for 1,043. A total of 3,115 engineers' and firemen's certificates were issued.

A similar increase is noted in the number of electrical inspections which are now made by the Electrical Inspection and Licensing Branch of the Department. An effort is made to inspect both during construction and after completion. Approximately 9,000 more inspections were made than in 1948. Nine persons were prosecuted under the Act.

Under the Theatres and Cinematographs Act there were 631 inspections of theatres and 619 of public halls compared to 607 and 590 in 1948. Owners have continued to be co-operative in complying with recommendations made, and fire hazards have been kept to a minimum. All four fires reported during 1949 occurred while the theatres were not in use.

UNEMPLOYMENT INSURANCE

Selected Decisions of Umpire Under the Unemployment Insurance Act

Digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act. Published in two series (1) Benefit cases, designated CU-B, and (2) Coverage cases, CU-C.

Held that the claimant had not shown just cause within the meaning of the Act for having voluntarily left his employment.—CU-B 517 (November 3, 1949).

MATERIAL FACTS OF CASE:

The Claimant, married, 30 years of age, filed a renewal claim for benefit on June 7, 1949, wherein he reported that he had been employed as a pipe fitter at a rate of pay of \$1.11 an hour from May 31, 1949 to June 3, 1949, by a large manufacturer of textiles in the Province of Quebec. He also stated therein that he voluntarily left his employment because he could not speak English. In the separation questionnaire the employer indicated that the claimant voluntarily left because he did not like the work.

The Insurance Officer disqualified him from the receipt of benefit for a period of six weeks for having voluntarily left his employment without just cause (Section 41 (1) of the Act).

From this decision, the claimant appealed to a Court of Referees on the grounds that as his foreman did not speak French he was unable to interpret his orders which were given in English and that his fellow workers who were bilingual and doing the same work would not interpret the orders for him because he was being paid a higher wage than they were receiving.

The claimant appeared before the Court along with an official of his union. The Court of Referees in unanimously upholding the decision of the Insurance Officer stated in part:—

The claimant should have made a fair trial of the employment during a certain time and at least should have proved that the working conditions were not satisfactory within the meaning of the Act.

From the decision of the Court of Referees the interested union on behalf of the claimant appealed to the Umpire.

DECISION:

There is no doubt that when the employer hired the claimant, he took into consideration the fact that he would be required to

work under a foreman who could not speak the same language. Furthermore, there is no evidence on file to indicate that during the claimant's brief stay with the Ltd., the company at any time found fault with his work.

Taking all the circumstances into consideration I agree with the Court of Referees that the claimant did not give the work a fair trial and therefore, I find that he has not shown just cause for having voluntarily left his employment.

The appeal is dismissed.

Held that the claimant had shown just cause within the meaning of the Act for having voluntarily left her employment.—CU-B 542 (March 1, 1950).

MATERIAL FACTS OF CASE:

The claimant, separated, 38 years of age, filed a claim for benefit on October 22, 1949, and reported that she had been employed as a dress finisher by a firm of dry cleaners in a city in eastern Ontario, from 1945 to October 15, 1949. Her rate of pay was \$29 a week. She voluntarily left that employment because she was forced to vacate her living quarters and no suitable living accommodation was available in that city in keeping with her limited means.

The Insurance Officer disqualified her from the receipt of benefit for a period of six weeks for having voluntarily left her employment without just cause (Section 41 (1) of the Act).

In her appeal to the Court of Referees the claimant stated she had been separated from her husband for over three years with three small children to support and having been unable to secure future living accommodation she moved to another city in the same part of Ontario where she obtained living quarters.

At the hearing of her case, the claimant appeared before the Court of Referees and stated that she had been a few days late in the payment of her rent but that she had paid it the same day that she received the notice to vacate. She also stated that

on several previous occasions she had been one or two days late in the payment of her rent. The Court in unanimously upholding the decision of the Insurance Officer expressed sympathy for the claimant in her problem but felt that: "the Unemployment Insurance Act is not designed to cover problems other than unemployment problems."

From the unanimous decision of the Court of Referees, the claimant asked the Chairman of the Court for leave to appeal to the Umpire. Permission was granted on the grounds that it was desirable to have the Umpire decide whether the Court had too rigidly and literally applied Section 41 (1) of the Act especially as the claimant had to support her three children.

DECISION:

On the evidence before me, it would seem that the claimant had no other alternative but to move to where living accommodation, within the limits of her income could immediately be found for her.

Furthermore, the claimant's distressed circumstances force her to work and she could reasonably expect to find good opportunities of employment in, which is an industrial centre and has a population of approximately 28,000.

Under the circumstances, I feel that the claimant has shown just cause for having voluntarily left her employment, within the meaning of Section 41 (1) of the Act and her appeal is allowed.

Unemployment Insurance Statistics, July, 1950*

The monthly report issued by the Dominion Bureau of Statistics on operations under the Unemployment Insurance Act states that during the month of July, 1950, 52,179 claims were filed at local offices of the Unemployment Insurance Commission. This represents a decrease of about 16 per cent from 62,048 for June, 1950, but a slight increase (5 per cent) from the total for July, 1949 (49,586).

Claims filed by provinces declined in all provinces from the June level, except in Prince Edward Island where a slight increase was registered. Compared with a year ago, claims were slightly increased in all provinces except New Brunswick, Ontario and British Columbia.

Of the total claims filed in July, 43,929 were initial and renewal claims representing mainly new cases of recorded unemployment. This represents a decline from a level of 51,284 for June but is almost the same as the number of such claims (43,486) filed in July, 1949.

Ordinary claimants on the live unemployment register declined from 109,433 for June to 92,520 for July. (For July, 1949, such claims amounted to 79,902.)

Of the total number of persons on the live register in July, 84,575 or 80 per cent were on the live unemployment register seven days or more as compared to 103,790 or 82 per cent in June, 1950. Of the number on the register seven days or more (which roughly corresponds with the number of beneficiaries) 32 per cent were on the register 73 days or more as compared to only 26 per cent a year ago.

Claims handled at adjudicating centres and Courts of Referees totalled 53,865 in July. Of the 53,061 claims adjudicated

38,533 were allowed, 14,116 were disallowed or disqualified, and 412 represented special requests not granted.

Chief reasons for non-entitlement in July were: "insufficient contributions while in insurable employment" 4,223 cases; "voluntarily left employment without just cause" 3,493; and "not unemployed" 2,335.

Persons commencing benefit on initial and renewal claims in July numbered 30,945 as compared to 40,781 in June and 28,246 in July, 1949. Persons commencing benefit on initial and renewal claims declined in July from the June level for all provinces except Newfoundland and Alberta. Compared to July, 1949, however, current figures are up except in Prince Edward Island, Nova Scotia, New Brunswick and British Columbia.

During July \$4,726,614 was paid in respect of 2,053,009 days as compared to \$6,378,926 and 2,742,203 days in June, and \$3,371,183 and 1,525,462 days in July, 1949.

For the week of July 29 to August 4, 76,840 persons received \$1,022,377 in respect of 444,583 days as compared to 92,827 persons, \$1,209,450 and 521,670 days for the week of June 24-30, and 65,957 persons, \$828,934 and 383,338 days for the week of July 9-15, 1949. The average duration and average amount of benefit for the week of July 29 to August 4 was 5.8 days and \$13.31 as compared to 5.6 days and \$13.03 for the week of June 24-30.

Supplementary Benefit

In July, supplementary benefit paid in respect of claims which had been held pending additional inquiry amounted to \$36,414. The bulk of this amount, \$30,270, was paid to claimants in the province of Quebec.

* See Tables E-1 to E-8.

Estimated Insured Population

The July report includes for the first time a table giving estimates of the insured population which, it is stated, should prove useful as a universe against which unemployment among insured persons can be examined.

Reports received from local offices of the Unemployment Insurance Commission for

the month ending July 31, 1950, showed that 3,512,389 employees were issued with insurance books and had made contributions to the Unemployment Insurance Fund at one time or another since April 1, 1950, an increase of 186,626 since June 30, 1950.

As at July 31, 1950, 238,665 employers were registered, representing an increase of 2,998 since June 30, 1950.

Report of Unemployment Insurance Advisory Committee

In reviewing the state of the Unemployment Insurance Fund the Committee noted that, while revenues in 1949-50 had been large, the amount paid out in benefit was considerably higher than in any year since the inception of the Act.

Regulations governing payment of benefit to married women and changes in existing seasonal employment regulations were recommended.

The state of the Unemployment Insurance Fund is under constant review by the Unemployment Insurance Advisory Committee—a body independent of the Unemployment Insurance Commission, on which both labour and management have equal representation. Under Section 84 (1) of the Act the Committee is required to report to the Governor in Council before the end of July in each year on the financial condition of the Fund as of the preceding March 31, and to make such recommendations as it may deem necessary as to the Fund's sufficiency to discharge its liabilities.

The Committee also has authority to make a continuing study of the Act, to conduct hearings, receive representations from interested employer and labour organizations, and to make recommendations for amendments to the Act or changes in the Regulations set thereunder concerning any matters relating to the financial condition of the Fund.

The report of the Unemployment Insurance Advisory Committee to the Governor in Council covering the fiscal year 1949-50 was tabled in the House of Commons by Mr. P. E. Coté, Parliamentary Assistant to the Minister of Labour, on September 8, 1950. The text of the report follows.

TO HIS EXCELLENCY

THE GOVERNOR GENERAL IN COUNCIL:

The Unemployment Insurance Advisory Committee respectfully submits its report on the financial condition of the Unemployment Insurance Fund as required by Section 84 (1) of the Unemployment Insurance Act.

The Committee held meetings on July 24 and 25 and considered the financial and statistical statements which were submitted to it by the Unemployment Insurance Commission. It had the benefit of reports and comments on the experience of the year by Mr. A. D. Watson, who acts as actuarial adviser to the Committee, and Mr. Neil McKellar, in charge of unemployment insurance statistics at the Dominion Bureau of Statistics, as well as of full information given by the officers of the Commission.

The balance at the credit of the Unemployment Insurance Fund on March 31, 1950, as reported to us was \$582,646,972.52. Over the previous twelve months it had increased by \$53,111,535.14 as compared with an increase of \$81,800,000 in the preceding year. Aside from cash requirements, the whole of the Fund is invested in obligations of the Government of Canada, which over the past year yielded on the average 2.57 per cent interest.

The gross revenue of the Fund for 1949-50 was \$138,935,737.27, somewhat more than \$7,000,000 higher than in the previous year. Of this total, \$104,432,415.94 was the amount of the contributions on behalf of employers and employees. These totals, however, included amounts paid by the Government of Canada in respect of past service of ex-servicemen of approximately \$4,900,000 in 1949-50 and \$15,400,000 in 1948-49. Since these are non-recurring payments which will shortly disappear entirely it is appropriate to point out that the regular contributions from employers and employees increased by more than \$16,000,000 during the year. Interest earn-

ings on the Fund are now an important part of total revenue, amounting to more than \$14,000,000. The coverage of the Act continues to widen, rising wages have increased the rate of contributions, and, despite sharp unemployment in the winter months, the total volume of employment has been high.

Benefit payments to insured unemployed persons during 1949-50 were much the largest in any year since the inception of the Act. They totalled \$85,824,202.13, as compared with approximately \$50,000,000 in 1949-50. Of the former amount, \$818,065.89 is in respect of supplementary benefits provided by amendments to the Act at the last session of Parliament. Under the legislation, the Fund, in respect of \$738,000 paid to persons who had exhausted their benefit rights, is protected by increased contributions of 12 cents a week for each insured person and to the degree that that is insufficient, by reimbursement by the Treasury and in respect of approximately \$80,000 paid to those not previously insured by direct reimbursement by the Treasury.

The large amount paid out in benefits during the fiscal year 1949-50 indicates the severe unemployment which occurred during the winter months. Though on the average employment was high, normal seasonal influences in conjunction with market factors and abnormal weather conditions produced an abnormally sharp contraction of winter employment. In its Labour Force Survey for March 3, 1950, the Dominion Bureau of Statistics reports 312,000 without jobs and seeking work. This number is 7.4 per cent of the entire labour force (including employers and self-employed). As of the last working day in February the Unemployment Insurance Commission reports 286,000 ordinary claimants on the live unemployment register. This is approximately 10.8 per cent of the number of persons insured under the Act. The Committee has examined the available information for any evidence that unemployment insurance has tended to exaggerate the incidence of unemployment. The percentage resulting from the Bureau's figure is minimized because the numerator excludes persons working short time, persons who lost their jobs within the week and persons having some casual employment, all of whom might be eligible for insurance benefits, while the denominator includes the self-employed and salary groups as well as wage-earners. The Committee has not found evidence of any substantial tending toward exaggerated or illegitimate claims for insurance benefit except in the circumstances which it has

noted in previous reports, viz. among persons who have been retired from employment either with or without pensions, among women on marriage and generally in the more remote and non-urban sections of the economy wherever vigilant administration is more difficult and costly.

The Fund, as a result of nine years of high and sustained employment, has reached a level which no one would have predicted in earlier years. It is of course to be noted that the contingent liabilities of the Fund have also increased very greatly by reason of wider coverage, higher rates of benefit and more extended duration of benefit earned by the contributors. The structure of the Fund and the relation of contributions and benefits are broadly based on an actuarial investigation of the employment experience of this country two decades ago. The Committee has considered the advisability of instituting a new actuarial investigation. It has, however, decided not to request it for the time being. While a great deal of valuable information has been accumulated over the past nine years, the period of the war and the ensuing years of very high employment do not appear to the Committee a period likely to be sufficiently representative to yield dependable results on which to judge the future workings of the Fund. The Committee does intend, however, to have partial investigations made on the basis of information on a sample of contributors from which it hopes to obtain guidance in its future recommendations.

The Committee has noted the extensive amendments to the Unemployment Insurance Act passed at the last session of Parliament. The Committee is gratified that the recommendations which it has made have now become part of the Act.

In its report of July 27, 1949, the Committee drew attention to the accumulating evidence that considerable numbers of women on marriage or shortly thereafter withdrew from employment but applied for benefits though not in good faith seeking employment. On its recommendation an amendment to the Act has given power to the Commission, with the concurrence of the Committee, to recommend regulations to deal with this situation. The Committee now joins the Commission in recommending regulations in the following sense:—

A woman who, in contemplation of marriage, separates from her position in employment or who separates from that position at any time within two years after her marriage, shall not be entitled to benefit unless or until she proves her attachment to insurable employment by making contributions for ninety (90) days after the aforementioned separation, or

her marriage, whichever is the later, and she must also fulfil the other conditions for entitlement to benefit. However, the said ninety (90) days' contributions shall not be a condition governing the receipt of benefit in any case where—

- (a) the claimant's husband has died, or become incapacitated, or has deserted or been permanently separated from her;
- (b) the loss of employment was due to the employer's rule against employing married women;
- (c) the loss of employment was because of a lay-off due to shortage of work.

The Committee considers that this regulation will enable the Commission to prevent much illegitimate use of the Fund while at the same time preserving to married women who are genuinely desirous of continuing employment after marriage the full benefits to which they are entitled under the Act.

Experience has shown that it is desirable to simplify the regulations governing seasonal employments and to remove certain anomalies. The provision in recent amendments to the Act of supplementary benefits has also made necessary the revision of these regulations. The Commission has made certain proposals which after discussion have been modified in certain particulars and are here presented as the joint recommendation of the Commission and the Committee. The joint recommendation is that (1) the Commission by regulation and on application will exempt any person whose principal occupation is non-insurable and who ordinarily spends less than 50 per cent of the year in insurable employment; (2) for the present regulations in Section 12 (1) and (2) of the Unemployment Insurance Benefit Regulations 1949, regulations should be substituted in the following sense:—

12. (1) If in receipt of the most recent 36 days of employment of an insured person prior to the commencement day of his benefit year there are 10 or more seasonal contributions recorded, such person shall for the purposes of this section be a seasonal worker.

(2) (a) A seasonal worker whose principal occupation is non-insurable shall be entitled to receive benefit for days on which he is unemployed in any off-season applicable in his case, only if he fulfils all the other conditions of entitlement to benefit and if

- (i) he was employed under a contract of service, whether in insurable employment or not, for at least 30 per cent of the working days in the previous off-season; and
- (ii) during the off-season he makes and keeps alive an application at a local office of the Unemployment Insurance Commission for an employment of a kind suitable in his circumstances and normally available at that period of the year.

(b) A seasonal worker whose principal occupation is insurable, whether in a seasonal occupation or not, shall be entitled to receive benefit for days on which he is unemployed in any off-season applicable in his case, only if he fulfils all the other conditions of entitlement to benefit and the condition mentioned in subparagraph (ii) of paragraph (a).

It is considered by the Committee that these regulations will protect the Fund against illegitimate drains while at the same time they will relieve insured workers of most of the vexatious results of the present regulations.

No representations were made to the Committee by employer or employee organizations at its advertised meeting called to consider its statutory report.

Respectfully submitted on behalf of the Committee.

G. M. INGERSOLL,
Secretary.

W. A. MACKINTOSH,
Chairman.

HOURS AND WORKING CONDITIONS IN THE FOOD AND BEVERAGES INDUSTRY, OCTOBER 1949*

Forty per cent of the plant workers in the Food and Beverages Industry were on a five-day week in 1949. Time and one-half was the common overtime rate although double time was predominant for work on statutory holidays. Almost all of the workers were in establishments giving at least one week's vacation with pay. Three-quarters of the employees were in plants paying for six or more of the statutory holidays observed. Written collective agreements covered over 50 per cent of the workers in the industry.

The 1949 survey of hours and working conditions in the Food and Beverages Industry showed a decrease from 1948 in the normal hours and days worked per week and an increase in the rate of payment for work on statutory holidays. A higher proportion of the workers were in establishments whose vacation policy included a paid vacation of three weeks for employees with long service. A larger number of establishments reported paying for observed statutory holidays, and the number of days paid for has been increased in many cases.

In this analysis, the establishments engaged primarily in the manufacture of Foods and Beverages have been grouped, according to their major activity, into seven divisions: Meat Products, Dairy Products, Canning and Preserving, Grain Mill Products, Bakery Products, Beverages, and Miscellaneous Foods.

Geographical and industrial distributions of the 980 establishments and 93,013 plant workers covered in the survey of hours and working conditions in the Food and Beverages Industry are given in Tables Ia and

Ib. Forty-five per cent of the workers were employed by 382 establishments located in Ontario, twenty per cent were employed in Quebec and twelve per cent were employed in British Columbia.

Women workers comprised 30 per cent of the plant employees in this industrial group. The largest proportion of women employees were engaged in the Canning and Preserving Industry.

Collective Agreements.—Written collective agreements covering 53 per cent of the workers were reported by 346 establishments. Large groups of workers were represented by such unions as the United Packinghouse Workers of America (CIO-CCL), the Bakery and Confectionery Workers' International Union of America (AFL), the Distillery, Rectifying and Wine Workers' International Union of America (AFL), and the United Fishermen and Allied Workers' Union (TLC). A small number of establishments reported having written agreements with employees' associations.

The Normal Work Week.—Almost equal proportions of the plant employees in the Food and Beverages Industry, 27 and 28 per cent respectively, were normally working 44 and 48 hours a week in 1949. A further 15 per cent were reported working 40 hours a week. The normal work week is the number of hours and days normally worked by most of the male and most of the female workers in an establishment, exclusive of any temporary overtime or short time. In Tables IIa and IIb all male employees in a single establishment are included under the hours worked by the largest number of males, and all female employees are included under the hours worked by the largest number of females.

*Information in this article was prepared from data obtained in the annual survey of wage rates and working conditions for 1949 by the Economics and Research Branch of the Department of Labour. Employers were asked to report on certain conditions of work as well as to give, by occupation, the wage or salary rates of time workers and the straight time earnings of employees on piece work during the last pay period preceding October 1, 1949.

Information on hours and working conditions comparable to that contained in the present article has been published for other industries in previous issues of the *LABOUR GAZETTE*.

For a summary of provincial legislation on working conditions, see *Provincial Labour Standards Concerning Child Labour, Holidays, Hours of Work, Minimum Wages, Weekly Rest-Day and Workmen's Compensation*, an annual publication of the Department of Labour.

In most establishments the predominant work week for the male and female workers was the same.

The largest groups of workers in the Prairie Provinces and British Columbia were on a 44-hour week, while the largest groups in Quebec and Ontario were on a 48-hour week. In the Maritime Provinces, 43 per cent of the employees were working over 48 hours a week. All but 18 per cent of the workers in the establishments located in British Columbia were reported working from 40 to 44 hours a week.

The Meat Products Industry accounted for almost one-half of the workers reported on a 44-hour week and the Beverages Industry for about half of those on a 40-hour week. The largest group of employees working 48 hours a week was reported in the Bakery Products Industry.

Forty per cent of the workers in the Food and Beverages Industry were on a five-day week in 1949, as compared with about 34 per cent in 1948. The highest proportion of workers on this schedule was in the Beverages Industry, where over three-quarters of the plant employees were reported working five days a week.

In some establishments the male and female employees normally worked different weekly hours, thus for consistency the distributions of establishments shown in Tables

IIIa and IIIb are based on the normal work week of the male plant employees only. The weekly hours common to most establishments were again 44 and 48 per week. More establishments, however, reported having a work week of over 48 hours than of 40 hours. One-quarter of the establishments reported operating five days a week.

Overtime Rates of Pay.—Time and one-half was the predominant rate for work after standard daily or weekly hours in all regions and in all industries (Tables IVa and IVb). For work on Sunday, the largest number of employees were in establishments paying time and one-half although about 28 per cent of the workers in the industry, most of whom were engaged in the manufacture of Meat Products, were in plants paying double time.

Work on statutory holidays was generally paid for at double the regular rate. About 16,700 workers, however, were in establishments paying time and one-half for work on these Dominion, Provincial, Municipal or regularly observed religious holidays, and 12,600 were in establishments paying double time and one-half. This latter group indicates a substantial increase since 1948 in the proportion of workers eligible for double time and one-half for work on statutory holidays.

Vacations with Pay.—Most of the establishments in the Food and Beverages Industry reported a paid vacation of one or two weeks, or an equivalent, after a period of employment of up to one year (Tables Va and Vb). About 12 per cent of the workers were employed in establishments giving an initial vacation of two weeks with pay, or the equivalent of four per cent of earnings or one day per month. Most of the establishments that did not report information on vacations with pay were in the seasonal Canning and Preserving Industry.

More than one-half of the establishments reporting information on paid vacations increased the duration of the vacation period as the worker's term of employment continued. A maximum vacation of two weeks with pay or an equivalent, usually after five years, was reported by 365 establishments employing 38 per cent of the plant workers. Thirty-four per cent were working in establishments giving a paid vacation of three weeks, generally after 20 or 25 years of employment. Most of the establishments giving this maximum vacation of three weeks also gave an inter-

NOTE: Normal Weekly Hours were not reported for 397 workers.

mediate vacation of two weeks, mainly after five years. In 1948 about 27 per cent of the workers had been in establishments reporting a maximum vacation of three weeks.

A plant shut-down for summer vacation was reported by 121 establishments employing 19 per cent of the workers. Almost two-thirds of these workers were in plants closing down for two weeks and the remainder were in plants which shut down for one week.

Statutory Holidays.—Almost all of the plant workers in the Food and Beverages Industry were in establishments observing one or more statutory holidays. In Tables VIa and VIb, observed statutory holidays include the number of days when a plant is not operating by reason of Dominion, Provincial or Municipal holidays or because

of religious holidays regularly observed. Forty-five per cent of the workers were in establishments observing eight statutory holidays, 18 per cent were in those observing nine days and 13 per cent in those observing seven days.

Payment for some or all of the statutory holidays observed was reported by 794 establishments employing 86 per cent of the plant workers. Seventy per cent of the workers were in plants paying for from six to nine statutory holidays not worked, with the largest number being paid for eight. A large proportion of the workers in the Canning and Preserving Industry were not paid for any of the statutory holidays when not worked. About 92 per cent of the workers in the Meat Products Industry were paid for eight statutory holidays observed.

An analysis of the current employment situation prepared by the Economics and Research Branch, Department of Labour, on the basis of returns from the National Employment Service, reports from the Dominion Bureau of Statistics, and other official information.

EMPLOYMENT CONDITIONS DURING AUGUST 1950

Lay-offs of workers due to the railway strike highlighted the employment situation during August. In addition to the 125,000 railway workers out on strike, 47,000 other railway employees and 23,000 wage-earners in other industries were reported as temporarily off work. The mining industry suffered the heaviest lay-offs with 11,000 men involved but flour milling, meat packing, iron and steel, chemical and non-metallic mineral products plants were also hard hit. Emergency storage arrangements, and the indication that the strike would be of short duration, prevented the lay-offs from becoming more wide-spread.

Employment continued to expand during August as stepped-up defence preparations provided an added stimulus to an already strong demand for labour based on the high level of consumer income, the heavy investment program and a good export market for Canadian products, particularly in the United States. With only three of every one hundred Canadian workers not at work it is estimated that about 300,000 more workers were employed in August than at the low point in employment last April.

Registrations with the National Employment Service continued to decline rapidly and at August 24 reached their low point to date for the year, at 146,000. In the last week of the month, however, there was an increase of 6,000 in this total as a result of lay-offs due to the railway strike.

Due to increased registrations of women, this total of 146,000 was 7,600 above that figure at the same date in 1949. Women workers increased by 14,700 because of the large number of married women in the labour market, together with a decline in employment opportunities for women in certain industries, particularly manufacturing. The rising cost of living was reported as the principal reason for the increase in female job-seekers.

Primary iron and steel, non-ferrous metals, electrical apparatus, and pulp and paper were among the manufacturing industries which continued to respond to the stimulus of increased demand for their products both in Canada and the United States. Until the rail dispute, this was reflected in an increase in manufacturing employment. Now that the railways are

once more in operation, many new hirings can be scheduled and for the balance of the year employment in manufacturing is expected to be above the high level reached in 1949.

Neither agriculture nor logging was seriously affected by the strike. Although late frosts reduced the western wheat crop considerably, the demand for harvest workers was strong. The heavy demand for loggers exceeded the supply in most parts of the country and this situation is expected to continue throughout the rest of the year. The construction industry was close to its seasonal peak during August and the shortage of skilled construction workers was increasing.

Regional Analysis

Throughout the *Maritime* provinces, high levels of employment were maintained or increased during August. The principal industries responsible for the favourable employment situation that exists in most areas were construction, forestry, agriculture and mining. Despite the adverse effects of the railway strike, active registrations at National Employment Service Offices in the three provinces declined slightly during the month, from 18,200 at August 3 to 16,800 at August 31. Lay-offs due to the rail strike were responsible for a slight rise in the total over the last week of the period, but nevertheless it had declined to less than the comparable 1949 figure.

While hirings for woods employment slackened somewhat with the end of the pulp peeling season, continuing strong demand for pulp and newsprint indicates

REGIONAL EMPLOYMENT TRENDS

(1941 = 100)

that fall and winter cutting activity will be much higher than last year and some firms have placed standing orders for woods workers with local Employment Service offices. The present high level of lumber cutting employment is expected to continue, as demand for lumber shows little sign of slackening. Fall and winter employment conditions, especially in Northern New Brunswick, are thus likely to be much better than they were last year. The record volume of construction in the Maritimes is also likely to continue, at least until late in the season, and has occasioned a very tight labour situation in some areas, notably Summerside, where there is also very strong demand for agricultural workers.

Lay-offs resulting from the rail strike, as reported through offices of the National Employment Service, affected between 5,500 and 6,000 workers in the Maritimes, with the bulk of these (3,600) being coal miners. Relatively few of these, however, registered with the Employment Service. Long unused coastal shipping routes were re-employed during the strike to offset deliveries to many points, especially in Nova Scotia, and some truckers emerged from the period with increased clientele and new, long-term contracts.

In *Newfoundland*, employment conditions continued to improve during August, and registrations at National Employment Service offices fell from 9,600 at August 3 to 6,600 at August 31. The confirmation of a United Kingdom contract for 200,000 tons of iron ore from the Wabana Mines and the strong demand for woods workers resulting from the continually expanding newsprint markets in the United Kingdom and the United States were largely responsible for this improvement. The shore and Labrador fisheries have been generally good, although catches on the banks were very light. The cessation of railway operated coastal shipping interrupted the placement of workers with the railway and logging camps in the northern parts of the island, and caused the layoff of some 500 railway extra gang workers. With the rail strike ended, extra gang employment is expected to increase during September.

Total registrations on hand at National Employment Service offices in the *Quebec* region declined from 49,600 at August 3 to 45,800 at August 31, remaining about 4,500 above the comparable 1949 total only because of the relatively unfavourable employment situation for women. At August 31, there were 6,000 more live applications from female job seekers than at September 1, 1949.

Slightly more than 2,000 workers, all but a few in various branches of manufacturing, were reported to have been laid off as a result of the railway strike, although few registered with the Employment Service. Generally, however, manufacturing industries were overcoming the summer slackness, and short-time work became less prevalent during August. This is particularly true of secondary textiles, chemical products and footwear manufacturers. Increased aluminum smelting activity in Shawinigan Falls absorbed 175 employees and a Montreal aircraft firm began re-tooling for a \$100,000,000 government order for jet aircraft which will bring substantial increases in employment there. In addition, the usual exodus of students from summer employment left a number of job openings in various lines throughout the region.

Strong demand for pulpwood and lumber cutters, for various areas of the region, in Ontario and in the New England States, continued throughout August and generally exceeded the supply. Although the heavy hay and grain harvests in the region are now over, the supply of workers for woods employment is not likely to improve immediately, due to the continuing high level of construction activity, to the Prairie harvest excursion, which may absorb several hundred, and to current recruiting in the Rivière du Loup area for the Maine potato harvest. The strong demand for woods workers, with some firms already advancing recruits the cost of transportation to the job, may create shortages of miners and mine workers in areas such as Val D'Or.

The already high level of employment activity in the *Ontario* region was augmented during August, as harvesting, both locally and in the Prairies, pulpwood and lumber cutting, construction and a variety of branches of manufacturing all absorbed additional numbers of workers. The number of active job applications registered with National Employment Service offices in the region, continued to decline until the last week of the period, when some workers laid off on account of the rail strike registered. Partially as a result of these registrations, the 39,800 live applications were some 1,300 higher at August 31 than at August 3, and 5,000 higher than at the same time last year. Almost all the increase was due to the greater number of applications from female workers.

Of the 7,100 reported to have been laid off on account of the rail strike, 3,000 were base metal workers in the Sudbury area. The remainder were employed in various branches of manufacturing throughout the region, with food products and transportation equipment workers predominating.

While still relatively light, the registration of these workers with local Employment Service offices appears to have been more general than in the other eastern regions.

Despite vacation shut-downs and the rail strike, however, manufacturing establishments in the Ontario region generally maintained high level activity, with a considerable volume of hiring. Primary and secondary textile plants, in areas such as Toronto, Welland, Niagara Falls and Trenton became more active during the month, but short-time work or reduced staff continued in effect in mills in Carleton Place, Collingwood and Woodstock. Throughout the iron and steel, machinery, transportation equipment and non-ferrous metals products, and the auto manufacturing centres, steady hiring was general, and some substantial expansion took place. Food packing and processing establishments were hiring large numbers for seasonal work, while plants in other areas are preparing to process tomatoes and other vegetables.

Peak activity in the construction industry continued through the month, with shortages of skilled tradesmen becoming more general and materials difficult to obtain, in some areas, a situation that was aggravated by the rail strike.

In the *Prairie* region, live registrations with the National Employment Service declined by a further 12 per cent during August to a total of 19,930. Except for Quebec, this region shows the greatest increase in registrations over the same period last year, and is the only one in which male registrations are greater than a year ago. The increase may be accounted for partly by the unusually late harvest and partly by lay-offs resulting from the railway strike. As well, the reluctance of employers in the area to hire additional men during the strike would be reflected in registration figures.

Cold weather during the month has reduced the near-record grain crop. On August 14, snow fell in the Peace River district, and during the last week of the month there were several degrees of frost over most of the region, the heaviest damage occurring in Saskatchewan. The full extent of the damage cannot be determined until the harvest is completed, but it is known to be considerable, with both yield and quality adversely affected. Nevertheless, the demand for harvesters from the East has not been appreciably diminished, for crops are being harvested in all but a few places. As well, the harvests in Manitoba and Saskatchewan are coinciding this year, and there will be fewer bush workers from the Lakehead going West for harvest-

ing employment. Of the estimated 2,500 to 3,000 harvesters required, about 1,000 had arrived by September 8 to satisfy the more urgent requests.

The effect of the railway strike on employment was generally less extensive than had been expected. The most serious lay-offs occurred in the Edson and Blairmore districts where 3,750 coal miners were temporarily released. Lay-offs in flour mills and packing plants accounted for a further 1,360 out of the total of 7,150 in the region (excluding railway workers) who were laid off because of the strike.

Continuing strong demand for base metals, lumber and pulpwood products combined with a successful fishing season has brought employment in the *Pacific* region to a high level. While job applications with the National Employment Service in other regions increased, or declined very moderately, those of the Pacific region decreased 13 per cent from last year, and 9 per cent during the month. Coal production is the only adverse feature of the employment situation. This industry is hampered by a shortage of coal cars inland, while on Vancouver Island high trans-Pacific shipping rates are damaging possible export markets.

At Vancouver, the fishing season was at its peak. With the pack to date exceeding that of the previous season by 100,000 cases, canneries were busier than usual, but, in most instances, the local labour supply has been adequate. In coastal waters, landings of all types of fish for the first seven months were up \$3,500,000 in value from the same period last year. The increase was due mainly to a larger sockeye salmon catch, which would have been much greater had the Adams River run materialized. This run has produced but 15 per cent of the expected catch, with a consequent loss of potential employment and income in the fishing and canning industries.

Several heavy rains during the month reduced the fire hazard on Vancouver Island and logging continued in full swing. A heavy construction program, including housing for naval establishments, and public and commercial buildings has created a shortage of skilled tradesmen, particularly plumbers and pipefitters. As a result of the strike of railway unions and the Seafarers International Union, now settled, 800 men were temporarily unemployed and the flow of tourists to the island was interrupted.

At Prince Rupert there has been a heavy demand for loggers as the operations of the Columbia Cellulose Company develop. A drive for 40 million feet of logs on the Skeena River took place this year and this is expected to increase to an annual drive

of 100 million feet. Prince George has been experiencing an exceptionally heavy season of railway, highway and building construction, though elsewhere inland activity in this industry has been below that of last year.

From New Westminster to Chilliwack and throughout the surrounding areas the harvesting of seasonal crops has been under way with the available labour supply sufficient to meet most demands. In the Okanagan Valley, the apple crop is maturing, with an expected pack of 7,000,000 boxes. About 1,500 pickers will be required by mid-September, of whom 300 may become available as hop-picking finishes at Chilliwack.

Industrial Analysis

The seasonal peak in *farm labour* requirements was reached during August, with the heaviest demand centred in the eastern provinces. In the Prairies, the harvest was delayed in some areas by cool and rainy weather and was just getting under way at the end of August. In British Columbia, seasonal crops were being harvested and sufficient labour was reported available in most areas.

Most Eastern farmers were able to obtain sufficient labour to harvest their crops, although a few areas in Ontario reported shortages of farm help. About 1,200 harvesters were brought in from the Maritimes and the Prairies to work until the end of August. During the month, the National Employment Service was recruiting men in the East for the annual harvest excursion to the West, about 350 were sent before the rail strike began. During the strike, a substantial number of workers went out by car on their own but a number of loggers laid off from bush work in Northern Ontario and Quebec, who ordinarily would have been available for the harvest, found other jobs. Another large movement of workers during the month was that of skilled tobacco men from the southern United States to Ontario tobacco growing areas, in which an estimated 2,500 took part.

Although the demand for labour had not reached its peak in the Prairies during August, shortages of labour were already developing in that area. Local labour in Saskatchewan was reportedly more scarce than last year, due in part to improved crops in some sections. The Manitoba and Saskatchewan harvests were expected to occur at about the same time this year, thus concentrating labour demand into a shorter period. Wages offered harvest help during August in the West were generally

from \$6 to \$8 per day for stookers and \$9 to \$12 per day for threshers.

In the Eastern Canada *logging* industry, the demand for workers was strong in all areas during August as logging companies were finishing off a heavy summer. Shortages of loggers were general during the month, particularly since construction and farming were making heavy demands on the same labour pool. The end of the pulp peeling season in August did not bring a sufficient reduction in demand to offset this general condition of shortage. During the month, Northern Ontario and Anticosti operators were recruiting cutters in the South Shore counties of Quebec and some 3,300 Canadian loggers were working in Maine.

A new labour agreement, affecting the larger pulpwood producers in Northwestern Ontario was reported which would provide an increase of fifty cents a day for day labour as well as increases in piece rates. An increase of ten cents a day in the rate of board was also provided for.

The British Columbia logging industry continued to operate at capacity during August, although limited by lack of skilled labour. Ideal weather conditions prevailed in all but a few areas where hot weather and forest fires forced short closures. The largest United Kingdom order in several years was recently placed, for 260,000,000 board feet at approximately \$20,000,000, and will be an important factor in maintaining the present high level of employment.

Base metal *mining* in both Ontario and Quebec have been increasing their employment and production, in response to the heavy demand from the United States. Nickel, copper, cobalt, lead and zinc are all in heavy demand, and there have been price increases recently in all of these metals. Mine operators in most areas report a shortage of experienced workers, and in Quebec there has been considerable demand for immigrant workers to meet the need.

Gold production has also increased over that of last year, and labour demand is quite strong. The difficulties of the industry in finding the required number of workers have been increased by the exodus of single workers from the mining areas to the industrial sections of the country. Shortage of experienced miners in gold mining camps is becoming acute.

In the Quebec-Labrador area, continuous field work is revealing more iron ore deposits. In Newfoundland, a contract for 200,000 tons of iron ore received from the United Kingdom, has meant increased demand for workers in that area.

The shortages of coal cars during the railway strike forced the lay-off of about 8,000 miners in Nova Scotia and Alberta. Since nickel mines in Sudbury are dependent on the National Railway for delivery of ore, about 3,000 men were laid off in the nickel mines in this area during the strike.

Quarrying of cement rock, limestone and the digging of sand and gravel are giving employment to larger numbers of men than in previous years. This section of the mining industry has expanded in response to the heavy program of construction now reaching its seasonal peak.

By the beginning of August, the employment situation in **manufacturing** contrasted sharply with that of a few months before. Employment in manufacturing was above that of the corresponding period in 1949, for the first time this year, and there was a pronounced increase in labour demand, which had been at a low point in the first quarter of 1950.

Industries where labour demand is strongest are those which have been most directly affected by the defence preparations, and by the boom in the United States economy. By the beginning of July, the strong demand for many Canadian products in the United States had led to expansion in employment in sawmills, newsprint plants, and smelters refining nickel and base metals. In addition, increases in sales of consumer durables had resulted in a higher level of employment in the electrical apparatus and automobile industries. During August, the heaviest demand for workers came from the iron and steel group, particularly those firms producing primary iron and steel and fabricated steel parts. Skilled moulders and machinists, as well as workers experienced on aircraft production were much in demand, and in some cases, there were shortages of suitable applicants.

The new stimulus to increased production and employment has not yet spread to all sections of manufacturing industries. Although leather footwear and some sections of the textile industry are increasing their employment seasonally, some branches

of the textiles are still operating below last year's level, and short time work persists in a few areas. This has tended to reduce job openings for women, since these industries employ a large proportion of female workers.

The railway dispute at the end of August meant that many employers had to postpone temporarily plans for adding to their staffs, while a considerable number laid off workers for a short time. With the railways once more in operation, employment in many important branches of manufacturing will probably continue to expand, and the general level is expected to be above that in 1949 for the remainder of the year.

With an unprecedented volume of work on hand, the **construction** industry was at its peak of seasonal activity during August. A shortage of qualified workers in almost all of the many skills required by the industry became more of a limiting factor as the season progressed, although the labour force in the industry was the largest in its history. Unskilled labour, which constitutes an estimated 60 per cent of the working force in building construction was generally in satisfactory supply. Material shortages were also a limiting factor with cement and bricks in particular in short supply in some areas.

Due to the heavy demands of the 1950 program, construction costs both of labour and materials, continued to rise during the summer. The average wage paid in building construction at July 1 was \$46.75, or about 8 per cent more than a year ago. The Dominion Bureau of Statistics price index of residential materials in July was 245.2 (1935-39=100). The comparable July figure last year was 227.1.

In spite of this increase in costs, new contracts awarded during August were the highest ever for that month, at \$144 millions. This brought the total value of contracts awarded in the first eight months of 1950 to \$882 millions, 20 per cent more than the eight-month total in 1949. The distribution of this increase among the four main types of construction work is shown in the following table:—

Construction Contracts Awarded, First Eight Months, 1949 and 1950 .
Millions of Dollars

(Source: MacLean's Building Reporter)

Type	1949	1950	Per Cent Increase

Total	708.8	881.6	24

Employment Service Activities

Only with considerable difficulty were sufficient workers being found to harvest the Prairie wheat crop, despite the recent reduction in yield from the earlier anticipated near record levels. This was evidence of the favourable employment conditions which existed in Canada during August and early September and reflected the steady absorption of workers which has taken place since the spring upswing in activity. The number of live applications at employment offices had fallen to 145,900 at August 25, the date before applications increased because of the railway strike. This figure compares with 435,000 early in April, showing that nearly 300,000 workers, as well as this year's graduates from universities and high schools, had found employment in the past four months.

The National Employment Service played an important part in finding jobs for these workers. From May to July, placements exceeded the record of the past four years for this period for Canada as a whole and in most regions. Primarily, this improvement was the result of the buoyant state of the Canadian economy, but it was significant that the expansion in job opportunities was of a type suitable for absorbing the available help. Vacancies reported to employment offices during this period, while higher than in 1949, fell short of the 1947 and 1948 levels. The jobs reported this year, however, were diversified occupationally, for both unskilled and skilled, and were in areas where workers were available, such as Quebec and New Brunswick.

By August 25, applications from male workers totalling 90,600 were 7,000 less than one year ago. All regions except the Prairies showed a decline in applicants over the year, while the rise in the Prairies was largely the result of an increased transient labour force, attracted particularly to Alberta by the high degree of prosperity in that region.

The situation was not as favourable for women applicants and their absorption into employment lagged throughout the summer months. By August 25, 55,300 applications were on hand from women, almost 15,000 more than at the same date last year. About 4,600 of these additional applications were reported in Montreal while the others were scattered throughout the country; each region showed higher registrations than the year before. The new applications were in all occupations although workers in the textile and leather industries showed the largest proportionate rise. The changes in the number of women applicants over the year are shown on the above chart.

The divergence between men and women workers can best be explained by examining the basic trends influencing the upswing in employment. The seasonal expansion in employment affects mostly the primary industries which employ men almost entirely. The food processing industries and tourist trade are exceptions but frost damage in British Columbia and a late season in Ontario had reduced job opportunities in food plants, while employment in the tourist trade had remained at approximately last year's level. The renewed strength of the manufacturing industry was an important factor in the current prosperity, but expansion was mainly in the durable goods industries—iron and steel, automobile manufacturing and machinery building—which again largely employ male workers. Lighter manufacturing industries, such as textiles and leather, which mostly employ women workers, have not shown any significant expansion.

Moreover, the supply of women applicants appears to have changed from predominantly single women to married women, and employers are reluctant to hire them if single girls are available. This has resulted in a core of applications from married women remaining on file at employment offices. Some 45 per cent of the women claiming unemployment insurance at the end of August had been on the live employment register for more than two months; 34 per cent had been registered for more than three months. About two-thirds of the women seeking employment are claiming unemployment insurance.

Barring the disruptions caused by the railway strike, demand for labour, particularly for unskilled workers, was strong. The supply of unskilled workers who were not attached to any particular industry group, was 6,500 below the level of 1949 at the end of August and demand was heavier in almost all industrial groups. Farm labour needs were at their peak at this time. Logging was competing with agriculture for workers, while construction and manufacturing maintained an active demand. Too, the labour force had been depleted by workers enlisting in the special Korean service force.

The railway strike was reflected in an increase of 5,700 in the number of applications for work at employment offices during the week August 25 to August 31, but applications continued their downtrend in the following week although at September 6, they were still slightly higher than before the strike.

PRICES AND THE COST OF LIVING*

Cost-of-Living Index

The Dominion Bureau of Statistics cost-of-living index rose 1.3 points to 169.8 between August 1 and September 1, 1950. This compared with a level of 162.3 for September, 1949 and 161.0 for January, 1950. In rising from 216.7 to 218.8, the food index accounted for one-half of the increase in the total index. Among individual foods to register increases were beef, pork, lard, coffee, sugar, butter and eggs. Decreases were noted for practically all fresh vegetables. Among other groups, fuel and light rose 2.4 points to 140.8 due to sharply higher prices for coke and a small increase in coal. Advances in furniture, furnishings, cleaning supplies and hardware items moved the home furnishings and services index 2.2 points to 171.1. The clothing series gained 1.4 points to 182.3 due mainly to increases in men's suits, topcoats and shoes, and women's hosiery. Rentals rose 0.6 to 135.5 reflecting the results of an August quarterly survey of tenants. An increase of 0.3 to 132.8 in the miscellaneous index followed a sharp advance in automobile tires, coupled with increases in street car fares at Hamilton and gasoline at Toronto.

From August, 1939 to September, 1950, the increase in the cost-of-living index was 68.5 per cent.

Cost of Living in Eight Cities

Continuing increases for foods were again mainly responsible for advances in the composite cost-of-living indexes for the eight regional cities during July. Notable among food price changes were meats, followed by eggs, sugar, and coffee. Increases in telephone rates in Ontario and Quebec were reflected in higher indexes for home furnishings and services in Montreal and Toronto. Fuel and light moved up in Toronto also, due to an advance in coke. Clothing was higher in Halifax, Saint John, Toronto and Edmonton, while other groups were steady.

Composite city index increases between July 3 and August 1 were as follows: Edmonton 1.6 to 165.0; Winnipeg 1.2 to 163.1; Saint John 0.9 to 164.9; Saskatoon

0.8 to 167.2; Montreal 0.7 to 172.3; Vancouver 0.6 to 169.6; Halifax 0.4 to 158.9 and Toronto 0.2 to 164.4. In the same period the Dominion index rose 1.0 to 167.2.

Wholesale Prices, July, 1950

The general index of wholesale prices rose 1.9 points to 166.9 between June and July, 1950. All of the eight major groups moved up during this period, the largest increases being recorded by Animal Products and Wood Products, both of which rose 4.8 points to index levels of 177.8 and 205.8 respectively. Vegetable Products advanced 1.1 points to 150.1. Fractional increases were recorded by the remaining groups: Non-ferrous Metals edging up 0.9 point to 159.1, Chemical Products, 0.6 to 118.6, Non-metallic Minerals, 0.4 point to 140.7, Textile Products, 0.2 point to 165.6, and Iron and Its Products, 0.1 point to 182.5.

Among important commodities to record increases between June and July were the following: onions 48.6 per cent, raw rubber 34.4 per cent, potatoes 34.1 per cent, cedar lumber (level siding) 31.8 per cent, pepper 30.8 per cent, cocoa beans, African, 24.8 per cent, halibut 22.4 per cent, solder 19.4 per cent, fowl 16.7 per cent, tin ingots 15.5 per cent.

Decreases between June and July were recorded as follows: Ontario Wheat 24.4 per cent, lemons 14.7 per cent, Salt Spring Mackerel 12.1 per cent, Ontario oats 10.5 per cent, Timothy hay (Montreal) 10.3 per cent, lamb carcass (Montreal) 9.4 per cent, gluten feed 8.3 per cent, bran 7.9 per cent, cast iron scrap 7.9 per cent, linseed oil 4.8 per cent.

The Canadian farm products wholesale price index advanced 2.0 points to 154.2 between June and July. Animal Products rose 4.8 points to 200.8, influenced by higher prices for poultry, hides, and skins, livestock, eggs and raw wool. In the Fields Products, group increases in potatoes and onions outweighed decreases in grains and hay to move the index up 0.4 point to 126.4.

* See Tables F-1 to F-6.

COST OF LIVING IN CANADA FROM JANUARY, 1946

(1935-39 = 100)

STRIKES AND LOCKOUTS*

Canada, August, 1950

The time loss of a million man-working days resulting from the strike of 125,000 non-operating railway workers was responsible for a time loss during August which was the second highest of any month in the records of the Department. The greatest amount of time lost in any one month was in June, 1919, when a million and a quarter days were recorded. The third highest was in June, 1946, with a loss of 934,000 days, brought about mainly by work stoppages in the logging and lumbering industries, in textiles, rubber, motor vehicle and metal industries, and by a strike of seamen on the Great Lakes.

Further information on the railway strike appears elsewhere in this issue. Apart from this work stoppage, the number of workers involved in strikes and lockouts and the resulting time loss in August were little changed from the previous month or from August, 1949. Other strikes which caused the most time loss during the month were: civic employees at Hamilton, Ont., knitting factory workers at St. Jérôme, P.Q., and can and canning equipment factory workers at Toronto, Ont.

Preliminary figures for August, 1950, show 19 strikes and lockouts in existence, involving 129,787 workers, with a time loss of 1,053,000 days, as compared with 32 strikes and lockouts in July, 1950, with 6,379 workers involved and a loss of 50,750 days. In August, 1949, there were 20 strikes and lockouts, with 4,574 workers involved and a loss of 36,276 days.

For the first eight months of this year there were 99 strikes and lockouts, involving 149,122 workers, with a loss of 1,263,322

man-working days. For the similar period in 1949 there were 92 strikes and lockouts, with 32,005 workers involved and a loss of 766,013 days.

Based on the number of non-agricultural wage and salary workers in Canada, the time lost in August, 1950, was 1.26 per cent of the estimated working time; 0.06 per cent in July, 1950; 0.04 per cent in August, 1949; 0.19 per cent for the first eight months of 1950; and 0.11 per cent for the first eight months of 1949.

Of the 19 strikes and lockouts in existence in August, 1950, one was settled in favour of the employer, seven were compromise settlements and two were indefinite in result, work being resumed pending final settlement. At the end of the month nine work stoppages were recorded as unterminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes and lockouts about which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Strikes of this nature which are still in progress are: compositors, etc., at Winnipeg, Man., which commenced on November 8, 1945, and at Ottawa and Hamilton, Ont., and Edmonton, Alta., on May 30, 1946; textile products factory workers at St. Lambert, P.Q., August 29, 1949; printers at St. John's, Newfoundland, May 22, 1950; and department store clerks at New Westminster, B.C., on August 27, 1949.

* See Tables G-1 and G-2.

Great Britain and Other Countries

The latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month. Statistics given in the annual review issued as a supplement to the *LABOUR GAZETTE* for April, 1950, and in this article are taken, as far as possible, from the government publications of the countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

Figures for work stoppages beginning in May, 1950, were 129 with five still in progress from the previous month, making a total of 134 during the month. In all stoppages of work in progress, in May, 1950, there were 22,400 workers involved, causing a time loss of 51,000 working days.

The number of work stoppages beginning in June, 1950, was 120 and 20 were still in progress from the previous month, making a total of 140 during the month. In all stoppages of work in progress in the period there were 28,400 workers involved and a time loss of 95,000 working days was caused.

Of the 120 disputes leading to stoppages of work which began in June, six, directly involving 2,100 workers, arose out of demands for advances in wages, and 49, directly involving 6,000 workers, on other wage questions; five, directly involving 400 workers, on questions as to working hours, 15, directly involving 1,900 workers, on questions respecting the employment of particular classes or persons; 39, directly involving 8,100 workers on other questions respecting working arrangements; and six,

directly involving 2,900 workers on questions of trade union principle.

United States

Preliminary figures for July, 1950, show 425 strikes and lockouts beginning in the month, in which 225,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 2,900,000 man-days. Corresponding figures for June, 1950, are 425 strikes and lockouts, involving 260,000 workers with a time loss of 2,750,000 days.

SELECTED PUBLICATIONS RECEIVED RECENTLY IN LIBRARY OF DEPARTMENT OF LABOUR

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed, free of charge, by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE.

NOTE.—Latest figures subject to revision. Many of the statistical data in this table are included in the Canadian Statistical Review issued by the Dominion Bureau of Statistics. † Comparable statistics are not available.

(1) Labour Force survey figures given are as at June 3, 1950, June 4, 1949, June 5, 1948. At June 3, 1950 Manitoba is not included due to flood conditions. (2) Average 1926=100. (3) Figures are as at end of quarter ending June 31, 1949, 48, 44 and 1939 respectively. (4) Real earnings computed by dividing index of average weekly earnings of wage-earners in manufacturing by the cost-of-living index; base: average for 1946=100. (5) Average 1935-39=100. (6) Newfoundland is included after April 1, 1949. (7) Year end figures. (8) Figures for 1939-44 are production data rather than shipments.

Finance	42.81	42.70	41.64	152.9	151.8	145.2	225.5	223.2	208.4			
Nine Leading Industries	45.06	44.51	42.90	133.0	129.6	131.2	231.4	222.6	217.2			

(1) This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries, as listed in Table C-4, with the exception of electric light and power. (2) Mainly hotels and restaurants and laundries and dry-cleaning plants. * Includes Welland, Thorold and Merriton.

TABLE C-2.—INDEX NUMBERS OF EMPLOYMENT AND EARNINGS SINCE 1941

(Base:—June 1, 1941=100) (The latest figures are subject to revision) SOURCE: *The Employment Situation, D.B.S.*

Year and Month	Eight Leading Industries				Manufacturing

TABLE C-6.—HOURS AND EARNINGS IN MANUFACTURING

(Hourly-Rated Wage-Earners) SOURCE: *Average Hours Worked and Average Hourly Earnings, D.B.S.*

Tables C-6 to C-9 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-5. They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1 to C-4 relate to salaried employees as well as to all wage-earners of the co-operating firms.

Week preceding	Average Hours Worked			Average Hourly Earnings		
	All Manufactures	Durable Goods	Non-Durable Goods	All Manufactures	Durable Goods	Non-Durable Goods
	no.	no.	no.	cts.	cts.	cts.
July 1, 1945	44.3	45.0	43.3	70.1	77.0	61.2

Personal (Chiefly laundries)	40.5	40.9	40.7	68.5	68.4	66.4	27.74	27.98	27.20

¹ Industries classed in the durable manufactured goods industries.² Since 1941, the Dominion Bureau of Statistics has prepared current indexes of average hourly earnings of the employees of eight establishments producing heavy electrical apparatus. Based upon the hourly earnings at June 1, 1941, as 100 p.c., the latest figures are as follows:—May 1, 1950, 247.1; June 1, 1950, 247.4; July 1, 1950, 249.5; at July 1, 1949, the index was 228.5³ Chiefly street and electric railways.⁴ For information respecting the sex distribution of persons in recorded employment, see Table C-5.

TABLE C-10.—EARNINGS, HOURS AND REAL EARNINGS FOR WAGE EARNERS IN MANUFACTURING INDUSTRIES IN CANADA

(Source: Hours Worked and Hourly and Weekly Wages D.B.S. Real Wages Computed by the Economics and Research Branch, Department of Labour)

Date	Average Hours Worked per Week	Average Hourly Earnings	Average Weekly Earnings	Index Numbers (Av. 1946=100)

Above food prices are simple averages of prices reported. They are not perfectly comparable in all cases with price averages for earlier years. Changes in grading, trade practices etc., occur from time to time. (a) Rental ranges shown above are indicative of prevailing rents being paid. They should not be used as a measure of change in rents paid for the same quality of living accommodation over long periods of time. (b) Averages include prices for cuts with bone in. (c) Mixed—hock-off, and hock-on. (d) Mixed—Carton and loose. (e) Loose. (f) Estimate. (g) Fancy. (h) Mixed—California and Australia. (i) California. (j) Pure. (k) 360's. (l) Mixed—package and bulk. (m) Package. (n) Mixed—Choice and fancy. (o) Tin. (p) Revised.

TABLE F-6.—INDEX NUMBERS OF THE COST OF LIVING IN CANADA AND OTHER COUNTRIES

(Base figure 100 except where noted)

* Preliminary figures.

‡ Strikes unteminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, AUGUST, 1950⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars ⁽²⁾
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to August, 1950				
MANUFACTURING—				
<i>Textiles, Clothing, etc.—</i>				
Cotton and rayon underwear factory workers, Sherbrooke, P.Q.	1	116	2,500	Commenced May 11; for a new agreement providing for increased wages following reference to court of referees; terminated.
Knitting factory workers, St. Jerome, P.Q.	1	504	12,500	Commenced July 6; for implementation of award of arbitration board for increased wages in new agreement under negotiations, untermi-nated.
<i>Miscellaneous Wood Products—</i>				
Planing mill workers, Campbellton, N.B.	1	108	1,080	Commenced June 23; for a new agreement providing for increased wages, instead of proposed reduction, following reference to conciliation board; terminated August 12; conciliation, provincial; compromise, plant to be operated on co-operative basis.
<i>Metal Products—</i>				
Electrical apparatus factory workers, Vancouver, B.C.	1	10	175	Commenced May 11; for a new agreement providing for increased wages, reinstatement of job classification, payment for all statutory holidays, etc., following reference to conciliation board; untermi-nated.
Brass factory workers, Galt, Ont.	1	35	700	Commenced June 15; for a new agreement providing for increased wages, Rand formula for union dues, payment for statutory holidays, extension of vacations with pay, following reference to conciliation board; untermi-nated.
Laundry machinery factory workers, Toronto, Ont.	1	32	650	Commenced June 16; for a new agreement providing for increased wages, extension of vacations with pay, additional union security, etc., following reference to conciliation board; untermi-nated.
Aluminum foundry workers, Etobicoke, Ont.	1	272	6,000	Commenced June 29; for a new agreement providing for increased wages, and Rand formula for union dues; untermi-nated.
Can and canning equipment factory workers, Toronto and New Toronto, Ont.	3	564	7,300	Commenced July 12; for a new agreement providing for increased wages, following reference to conciliation board; terminated August 17; negotiations; compromise.
CONSTRUCTION—				
<i>Buildings and Structures—</i>				
Carpenters, Victoria, B.C.	1	57	170	Commenced July 20; for a new agreement providing for increased wages and elimination of proposed "work stoppage clause", following reference to conciliation board; terminated August 3; negotiations; compromise on wages, "work stoppage clause" omitted.
TRANSPORTATION AND PUBLIC UTILITIES—				
<i>Electricity and Gas—</i>				
Electric power production and distribution workers, Regina, Sask.	1	123	100	Commenced July 22; for a union agreement providing for job reclassification with increased wages; terminated August 1; reference to mediator and negotiations; compromise.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, AUGUST, 1950⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars ⁽²⁾
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to August, 1950				
SERVICE— <i>Business and Personal—</i> Waitresses and dish washers, Sudbury, Ont.	2	33	290	Commenced May 11; for union recognition and agreement providing for increased wages; terminated August 10; conciliation, provincial, and return of workers pending decision on certification of union by Ontario Labour Relations Board; indefinite.
Strikes and Lockouts Commencing During August, 1950				
MINING— Gold miners and millworkers, South Porcupine, Ont.	1	404	2,100	Commenced August 16; for a union agreement providing for inclusion of cost-of-living bonus in basic wage rate, payment for four statutory holidays, extension of vacation plan, check-off, pension plan, etc; terminated August 23; negotiations; compromise.
MANUFACTURING— <i>Miscellaneous Wood Products—</i> Wood products factory workers, Oakville, Ont.	1	140	100	Commenced August 31; for a union agreement providing for increased wages, shift bonus, reduced hours and payment for statutory holidays; untermiated.
<i>Metal Products—</i> Metal factory workers, Hamilton, Ont.	1	339	675	Commenced August 21; for a new agreement providing for increased wages and reduced hours; terminated August 23; negotiations; compromise, increase in wages granted.
CONSTRUCTION— <i>Buildings and Structures—</i> Electricians, Windsor, Ont..	(3) 200	600	Commenced August 3; for a new agreement providing for increased wages, following reference to conciliation board; terminated August 7; negotiations; compromise.
TRANSPORTATION AND PUBLIC UTILITIES— <i>Steam Railways—</i> Non-operating railway workers, hotel employees, etc., Canada.	6	(4) 125,000	1,000,000	Commenced August 22; for new agreements providing for increased wages of 7c per hour (or 5c plus cost-of-living bonus), date of establishment of 5-day, 40-hour week with the same take-home pay as for 48-hour week, and duration of agreement, following reference to conciliation boards and federal mediator; terminated August 30; return of workers under Maintenance of Railway Operations Act, passed by special session of Parliament, pending further negotiations; indefinite.
<i>Other Local and Highway—</i> Bus drivers, mechanics, etc., Oshawa, Ont.	1	85	85	Commenced August 22; in sympathy with strike of non-operating railway workers; terminated August 23; return of workers; in favour of employer.

TABLE G-2—STRIKES AND LOCKOUTS IN CANADA, AUGUST, 1950 (1)

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars(2)
	Establishments	Workers		
Strikes and Lockouts Commencing During August, 1950				
TRANSPORTATION, ETC.— <i>Con.</i>				
Water— Seamen, British Columbia Ports.	3	(5) 850	1,975	Commenced August 25; for new agreements providing for increase in wages and in overtime rates, union shop, payment for statutory holidays, improved working conditions etc., following reference to conciliation board (600 of these 850 seamen employed by two of the three steamship lines were involved in railway strike from Aug. 22 to Aug. 30); untermiated.
SERVICE— <i>Public Administration—</i> Civic employees, Hamilton, Ont.	1	915	16,000	Commenced August 10; for a new agreement providing for increased wages and 40-hour week with same take-home pay as for 44 hours, following reference to conciliation board; untermiated.

(1) Preliminary data based where possible on reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

(2) In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

(3) 611 indirectly affected. (4) 47,000 railway workers indirectly affected, other than railway 23,000. (5) 1,000 indirectly affected.

CURRENT LABOUR CONDITIONS

This article summarizes the latest employment and labour information available at November 10, as the LABOUR GAZETTE went to press. It was prepared by the Economics and Research Branch, Department of Labour.

THE STRONG demand for labour in heavy manufacturing industries and in eastern logging, apparent last month, continued throughout October, although the pressure on the labour supply was eased slightly by the completion of harvesting. The release of workers from agriculture has been reflected in the seasonal increase in registrations usual at the end of the harvest. On November 1, registrations at local employment offices increased to 141,300, 8,700 above the total at the beginning of October, but 22,000 below that on November 1, 1949. The heavy labour demand in logging and manufacturing resulted in a much slower rise in registrations during the month than was the case last year. In October, 1949, registrations increased by almost 21,000.

Up until the middle of October this year, many logging companies in eastern Canada were unable to find enough workers to cut their increased quota of pulpwood. To a considerable extent, this has been due to the late harvest, which kept men on the farms who would normally be moving into the bush. Many of those now applying at local employment offices for work will undoubtedly find their customary winter jobs in the logging industry. While the present acute shortage of loggers is essentially temporary, there may be some logging districts which will continue short of workers, as they are competing for the local supply of labour with other industries in the area, such as mining. As well, some of those who are released from agriculture and construction may decide to seek work in the larger cities, in the hope of finding jobs on the new defence projects. This might tend to reduce the potential supply of loggers.

Shortages of labour have appeared also in heavy industries in some manufacturing centres, in the sense that employers are experiencing difficulty in obtaining enough men whose skill, training and experience come up to specifications. The new defence orders, and the strong demand for consumer's goods requiring the same type of skill as those needed on defence projects has been responsible for the difficulty in obtaining such skilled workers as machinists, tool and die makers and welders. This situation indicates that many of those skilled and semi-skilled men who were unemployed last winter as the result of cut-backs in production have found jobs, and that the metal manufacturing industries are beginning to compete actively with one another for the same supply of labour.

Some of the competition for labour among manufacturing industries may be reduced in the next few months, if the restrictions on credit buying lately put into force slow down the sales of consumer durable goods. In this case, some slackening in hiring or even reductions in employment may occur in industries producing the important consumer durables. These measures designed to remove some of the inflationary pressure in the economy, may have the effect of redistributing some of the skilled and semi-skilled workers into defence production.

As yet, there is no really heavy demand for unskilled workers in manufacturing industries, of the type which can be drawn from the seasonal industries of agriculture, construction and transportation. The need so far is for experienced workers, not for unskilled men who might be trained on the job. This means that those manufacturing firms now increasing their staffs will not be in a position to provide many jobs for the unskilled men released from the major seasonal industries. The logging industry will continue to be the main source of winter employment for this type of worker.

It is expected that the labour requirements of the logging industry will continue well above those of last year, at least for the next month or two, and that the job openings for some skilled and semi-skilled workers will increase.

It is probable, therefore, that the seasonal labour surplus in the next few months will be substantially less than that of last fall and early winter, although the level of unemployment this winter is expected to be above that of the early postwar years. In addition to the workers from seasonal industries who are not absorbed into the logging industry, there may be others temporarily displaced because of shortages of key materials. Some temporary unemployment may occur as workers shift from production of consumer goods into defence industries. It is likely that the general level of employment will remain above that of last year, as new defence orders are placed, and both export and domestic demand for Canadian goods and services will continue strong.

One of the most important factors supporting the current strength of consumer demand in Canada is the high level of labour income. The latest figures available indicate that total labour income reached an all-time high of \$691 million in July, 6.5 per cent above the comparable date last year. Average hourly earnings of wage earners continued to advance, although average hours worked declined slightly. In the past month, there have been a considerable number of wage increases negotiated between labour and management: one of the most notable was a wage increase of 6 cents an hour, affecting some 12,000 employees of pulp and paper plants.

IN BRIEF . . .

Dollar volume of wholesale sales in Canada in August (excluding Newfoundland) was 18 per cent higher than in July, and 17 per cent above August, 1949 . . . Industrial employment continued to advance to higher levels at the beginning of September. The general index stood at a new peak, and rose 0.8 per cent over August and 1.9 per cent over September last year. Employment in manufacturing showed considerable improvement, with increases in vegetable foods, textiles, metal using firms and many other divisions of the industry . . . Canada's domestic exports to the United States in September reached the highest monthly value in the history of Canada-United States trade. Merchandise exports to the United States in September were valued at \$192,790,000, nearly 70 per cent above their value in the corresponding month last year.

CURRENT LABOUR STATISTICS

(Latest available statistics as of November 10, 1950)

Principal Items	Date	Amount	Percentage Change from	
			Previous Month	Same Date Previous Year
Manpower—				
Total civilian labour force (a).....	Aug. 19	5,324,000	—	—0.8
Persons with jobs (a).....	Aug. 19	5,221,000	—	—0.8 (b)

(a) Estimated on basis of sample labour force survey. Only those who did not do any work in the survey week are here classified as persons without jobs.

(b) These percentages calculated on basis of 1949 figures excluding Newfoundland.

(c) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

Data in this table are preliminary figures from regular reports compiled by various government agencies, including Dominion Bureau of Statistics, the Unemployment Insurance Commission, the Immigration Branch, Department of Citizenship and Immigration, and the Economics and Research Branch, Department of Labour. Detailed information can be found in the statistical appendix of the Labour Gazette.

NOTES OF CURRENT INTEREST

New half-yearly index of wage rates The index of wage rates in Canadian industry advanced to an estimated 207.3 at April 1, 1950 (rates in 1939=100), according to the first semi-annual sample wage-rate survey conducted by the Economics and Research Branch of the Department of Labour. This figure represents a gain of just over one per cent during the six months' interval following October 1, 1949, when the last complete annual survey was made.

More than 800 representative establishments co-operated with the Department in making this survey possible. Of these 800 establishments, 70 per cent reported no change in established wage rates from October, 1949. Of those reporting some change, 70 per cent indicated increases up to 5 cents per hour; another 21 per cent reported changes from 6 to 10 cents per hour, while in the remaining 9 per cent changes of over 10 cents occurred.

These changes in wage rates are not affected by temporary fluctuations in actual hours worked nor by increases due to upgrading of an individual worker which do not affect the wage structure. Such changes are reflected in an index of earnings rather than wage rates (see Tables C-1 to C-10 in the *Labour Statistics* section of this issue).

The largest increase in wage rates, 1.4 per cent, took place in the manufacturing industries, raising the index for Manufacturing to 222.2, compared with an index of 100 for comparable rates in 1939. In the Transportation and Communication group, wage rates in Steam Railways were unchanged, but increases were recorded in other components of the group with the result that the index rose 1.1 per cent. Rates in Logging generally were unchanged since the last regular survey. In the other three major industrial divisions—Mining, Construction, and Service—the increases averaged less than one per cent.

The following table gives the index numbers of wage rates for each of the main industrial groups as well as the General Average for October, 1948, and the preliminary figures for October, 1949 and April 1, 1950. In each case the base is 1939 equal to 100.

	Oct. 1, 1948	Oct. 1, 1949	Apr. 1, 1950
Logging	218.8	216.0	216.0
Mining	181.9	185.8	186.5
Manufacturing	205.9	219.1	222.2
Construction	176.3	184.2	184.4
Transportation and Communication .	174.3	175.8	177.7
Service (Laundries)	183.0	194.8	195.2
General Average.	195.8	205.1	207.3

Downward trend in university enrolments Enrolments in Canadian universities for 1950-1951 have shown a downward trend, according to a recent announcement by Hon. Milton F. Gregg, Minister of Labour.

The Minister made this announcement in reviewing a quarterly bulletin of the Technical Personnel Division of the Department of Labour. The bulletin showed that enrolment in the class of 1950-51 was more than 2,000 lower than the number who graduated in 1950. The Minister pointed out that this was expected with the graduation of the majority of war veteran students.

For the past few years university classes had been swollen far beyond normal capacity by the many thousands of war veterans who sought higher learning after their discharge from the armed services, explained Mr. Gregg.

"Now" he continued, "the majority of these young ex-servicemen and women had completed their training and the enrolment was tapering off to more normal levels."

The bulletin showed that the annual number of all graduates with bachelor degrees or the equivalent, had risen from below 4,000 in 1920 to above 18,000 in 1950. The sharpest rise was in the post-war years 1945-1950. It was anticipated that the downward trend would continue to about 11,000 in 1956 when a slight upward trend, the normal long term trend, might be expected.

The annual number of engineering graduates had risen from about 400 in 1921 to approximately 3,600 in 1950. It was estimated that this figure would decline to about 1,100 in 1955, then a gradual increase might be expected to reach about 1,200 in 1960, the Minister stated.

Mr. Gregg explained that in dealing with figures for engineers there was a danger of overlooking the fact that the employment market varied considerably between branches of engineering. As examples he

cited mining engineering as a branch which would be likely to have a shortage of graduates in the next few years while electrical engineering, which had been the most popular choice of veteran students, appeared more likely to show a slight surplus for the time being.

**Labour
bodies expel
members
accused of
Communist
activity**

Following action taken at the recent Trades and Labour Congress Convention to tighten its ranks against Communists and fellow travellers (see p. 1793 of this issue), the Toronto District Labour Council (TLC) expelled three members from its ranks late in September.

The three members expelled were Sam LePedes, president of the United Garment Workers, Reg. Wright, president of the Consumers Gas Local of the International Chemical Workers and Miss Helen Weir, business agent of Local 168, Hotel and Club Employees Union. The action was taken in conformity with Section 6 of Article V of the TLC Constitution (see p. 1801) as amended at the 1950 Convention.

On October 15, H. A. Bradley, International President of the International Chemical Workers Union expelled Toronto local president Reg. Wright; Charles Manser, former secretary; and William Johnstone, executive board member of the local. At the same time, Mr. Bradley took the direction of the local out of the hands of the 12-man executive board and vested it in a three-man supervisory committee, responsible only to himself.

President Bradley's action was taken under a section of the union constitution barring membership to Communists. Mr. Bradley said the men were ejected "on the basis of the records of the Communist party in our possession, and on other information."

Commenting on the 12 cases of allegedly Communist members before him, Mr. Bradley said, "We had undeniable evidence in each of the 12 cases. Three of the 12 charged made a full confession and threw themselves on the mercy of the president."

The three members of the supervisory committee appointed by Mr. Bradley are secretary, Joseph Barry; treasurer, George Petrie; and financial secretary, Orville Williams.

Another move, directly connected with the TLC Convention action, was the announcement by the United Textile Workers of America (AFL-TLC) that an inquiry board would be set up to deal with charges of Communism against Canadian leaders of the union.

The UTWA international secretary, Lloyd Klenert, head of the inquiry board, said the international office "heard reports and rumours about the Canadian branch but we have no proof, judicially speaking."

"However," he added, "we are going to look into the situation, and you know our policy—no Communist will be kept on the union payroll. We will investigate and report to the international executive committee."

The action by the union international fulfilled a promise made to the TLC convention in September, by Anthony Valente, international president of the UTWA. (See p. 1798.)

**Federal-
provincial
conference
studies
amendment
of Constitu-
tion**

The second session of the Constitutional Conference of Federal and Provincial Governments was held at Quebec City from September 25 to 28 and was attended by the Prime Minister, the Rt. Hon. Louis St. Laurent, the premiers of the ten provinces, and Cabinet ministers and officials of the various governments.

At the conclusion of the meeting the following statement was released:—

"The Constitutional Conference of Federal and Provincial Governments has discussed at Ottawa and in Quebec City the constitutional position and procedure by which amendment of the present constitution could be effected in Canada.

"The Conference has had a full and frank discussion of the principles applicable to such a general amending procedure and has reached agreement on many of them. Its members are unanimously of the opinion that substantial progress has been made and are exceedingly gratified at the spirit of harmony and co-operation which has been shown by all delegates throughout the whole of the proceedings.

"Important sections of the Constitution involving what are considered fundamental and basic rights of the provinces were studied at length and considerable progress towards agreement has been made. Various formulae for amendment were submitted which, while having in view the safeguarding of these basic rights, would assure adequate flexibility in the constitution.

"The Conference has requested the Continuing Committee of Attorneys-General to study the proposals which it received with a view to arriving at an amending procedure satisfactory to all governments concerned. The Continuing Committee met today in the late afternoon and agreed that the Provincial Attorneys-General and the

Minister of Justice would exchange views by correspondence leading up to a meeting to be held at Ottawa on November 13, 1950 in order that the matters referred to it might be further considered and a report prepared for submission to a third plenary session of the Constitutional Conference to be held immediately after the Federal-Provincial Conference on fiscal and other matters which is to meet in Ottawa on December 4, 1950.

"The Continuing Committee has also been authorized to study the methods and techniques whereby a Canadian Constitution can be domiciled in Canada as a purely Canadian instrument."

Civil jobs protected for members of Special Forces

Hon. Milton F. Gregg, Minister of Labour, announced on October 2 that the provisions of the Reinstatement in Civil Employment Act, 1946, which safeguarded the civilian jobs of persons serving in World War II, had been extended by Order in Council to those enlisting in the present "Special Forces" of the three Services. Authority for this action was contained in the Canadian Forces Act which was passed at the last session of Parliament.

The Reinstatement in Civil Employment Act applied originally to persons serving in World War II—in the Armed Forces or in other specified services. It provided that, subject to certain circumstances, employers must reinstate a former employee, who enlisted in the Forces, in his former job or the equivalent and within three months of the time of the employee's discharge from the Forces.

The recent Order in Council makes the 1946 Act applicable "to all persons enrolling with the Royal Canadian Navy Special Force, the Canadian Army Special Force and the Royal Canadian Air Force Special Force, and to all officers and men of the Reserve Forces serving with the Special Forces."

Reinstatement of Civil Service employees, including prevailing rates employees and Government Ships' Officers, was covered by recent Orders in Council which provided that they might be granted leave without pay for the period of their employment in the Special Forces. This follows the procedure for World War II veterans of the Civil Service.

Under the Act a discharged person may claim reinstatement either verbally or in writing, usually within three months of discharge in Canada or four months if discharged overseas. There is provision for

extension of this time when through a condition of health the employee cannot return to his employment this soon, but the employer must be notified in three or four months, and a Reinstatement Officer should be consulted.

The employee must be reinstated under conditions not less favourable than he would have enjoyed had he continued on in employment instead of joining the Forces. This means:—

- (a) that the period with the Services is to count for seniority rights, pension rights, vacations with pay and other benefits;
- (b) returning employees are to be given promotions or pay increases they would have received had they remained in continuous employment;
- (c) any skill acquired while in the Services, and useful to the employer, is to be taken into account in adjusting the wage rates;
- (d) any period of mental or physical disability following discharge which warrants delay in reinstatement under the Act, is to be counted as a period of service in the Armed Forces, and as a period of service with the employer.

When a discharged person cannot perform his former duties, the employer must reinstate him in the most suitable employment available at which he is capable of working.

Reinstatement officers are located in local offices of the National Employment Service. Particulars of the application of the Act may be obtained by consultation with these officers.

Canadian to head UN technical assistance program

Dr. Hugh L. Keenleyside, Deputy Minister of Resources and Development, was recently appointed Director-General of the United Nations Technical Assistance Administration.

In this capacity, Dr. Keenleyside has charge of the administration of the various projects which comprise the United Nations program of technical assistance for economic development of underdeveloped countries, and for which a \$20,000,000 fund has been established by the UN.

The projects under his direction include the organization of technical assistance missions, the provision of expert advice, the award of fellowships and scholarships, and the organization of demonstration projects, seminars, training institutes and administration centres.

On September 29, Dr. Keenleyside reported that the United Nations had more than a hundred technical experts in the field rendering technical assistance to a series of underdeveloped countries in Asia, the Middle East and Latin America.

Dr. Keenleyside was a member of the Canadian delegation to the UN General Assembly during the second part of its first session in 1946. In August, 1949, he led the Canadian delegation to the UN Scientific Conference on the Conservation and Utilization of Resources.

In Canadian Government service, he has held the posts of Under-Secretary of State for External Affairs and Canadian Ambassador to Mexico.

**Old age
and blind
pensioners
in Canada**

The number of persons receiving old age pensions in Canada increased from 282,584 at March 31, 1950 to 287,017 as at the end of the quarter June 30, 1950.

The Federal Government's contributions under the Federal-Provincial scheme totalled \$24,212,060.79 for the quarter ended June 30, 1950, as compared with \$23,932,950.46 in the preceding quarter. Since the inception of the Act the Federal Government has contributed \$658,951,116.23.

The average monthly pension in the provinces ranged between \$34.54 and \$38.35. In the Yukon Territory and the Northwest Territories the average was slightly higher.

In only four provinces was the number of pensioners higher than three per cent of the total population.

In addition to the above, pensions were being paid to 10,711 blind persons as at June 30, 1950, as compared with 10,517 at March 31, 1950.

The cost of pensions in respect of blindness to the Federal Government was \$951,768.10 for the quarter ended June 30, 1950 and \$941,934.36 for the quarter ended March 31, 1950. Since the inception of the Act, the Federal payments have totalled \$19,976,632.50. The average monthly pension in the provinces was between \$37.88 and \$39.33. With only three blind pensions in Yukon Territory and the Northwest Territories, the average was \$40.

**Farm cash
income in
first six
months
of 1950**

Cash income of Canadian farmers from the sale of farm products during the first six months of this year—excluding Newfoundland—was estimated at \$870,516,000, according to the Dominion Bureau of Statistics. This was 18.6 per cent below the half-year

estimate of \$1,069,405,000 in 1949, and 5.9 per cent lower than the revised figure of \$925,008,000 for the first six months of 1948.

The substantial decline in farm cash income in 1950, the Bureau states, is largely attributable to the fact that while \$213,300,000 was paid out to Prairie farmers in the form of participation and equalization payments during the first half of 1949, only \$6,300,000 was disbursed during the January-June period of this year. The payments in 1949 and 1950 were for the most part, in the form of equalization payments made on wheat received by western farmers during the period August 1, 1945 to March 31, 1949 and came as a result of a Government announcement early in 1949 that the initial payment to western producers for wheat at the Lakehead would be raised 20 cents per bushel and made retroactive to August 1, 1945.

Cash income from the sale of wheat in 1950 was up as a result of both higher initial prices and increased marketings. On the other hand, reduced marketings and the receipt of initial prices only during the first half of this year have resulted in a coarse grains income below that of the same period a year ago.

Higher average prices for all livestock except hogs and increased marketings of all classes except sheep and lambs during the first half of 1950 have produced a cash income from this source of \$389,400,000, an increase of 10.4 per cent over the 1949 figure of \$352,800,000. This gain is due largely to an increase of approximately \$35,000,000 from the sale of cattle and calves.

Income from the sale of dairy products, estimated at \$153,700,000, was seven per cent below the corresponding 1949 figure of \$165,200,000. A decline of 13 per cent in the cash income from the sale of eggs to the end of June resulted from reduced prices more than offsetting an increase in marketings.

**1949 foreign
investments
in Canada,
Canadian
investments
abroad rose**

Both non-resident investments in Canada and Canadian direct investments in other countries increased in 1949 over 1948 to reach new high levels in Canadian dollar values, the Dominion Bureau of Statistics

reported in August. Total value of non-resident investments in Canada, including Newfoundland, at the end of 1949, the Bureau estimates, is \$7,977 million (Canadian).

While the total foreign capital invested in Canada has grown substantially during the last decade, it is still not greatly different from the aggregate value of \$7,614 million in 1930, the previous peak for this group of investments, the Bureau's report states. Foreign investments now represent a lower ratio of the ownership of all investments in Canada than formerly, since the great wartime and post-war development has been largely financed in Canada.

The recent growth in total non-resident investments in Canada has occurred principally in United States capital, the Bureau reported. All United States investments rose to an estimated \$5,890 million in 1949 from \$5,588 million in 1949, \$4,990 million in 1945, and \$4,151 million in 1939. Holdings in the United Kingdom also increased in 1949 to an estimated \$1,752 million from \$1,593 in 1948, but at last year's figure were only slightly above the value of \$1,750 million for 1945.

Of the total United States investments in Canada, direct investments in companies controlled in the United States accounted for \$2,829 million in 1948, the latest year for which these figures are available, as compared to \$2,548 million in 1947, \$2,304 million in 1945, and \$1,881 million in 1939. Besides substantial inflows of capital, states the Bureau, there was a large accumulation of earnings by Canadian branches and subsidiaries in 1948 which were not remitted to parent companies but were reinvested in the Canadian concerns.

Canadian direct investments outside this country amounted to an estimated \$893 million in 1949 as compared to \$720 million in 1945 and \$671 million in 1939, the Bureau's report stated.

Business Administration Institute formed at University of Toronto

The University of Toronto Institute of Industrial Relations has announced its dissolution as of June 30, 1950, and its merger with the business administration section of the Department of Political Economy to

form an Institute of Business Administration. This announcement was made in the Fourth Annual Report of the Director, Vincent W. Bladen.

During the past four years the Institute has been financed by contributions from over 200 Ontario firms, Prof. Bladen states. The University has now decided, however, that in the future the work of the Institute will be financed by regular University funds.

In its character and scope, the new Institute will be quite different, the director explained. It will be a "teaching"

division of the University, and it will be concerned with many aspects of business administration other than industrial relations. The continuity from the old to the new Institute will be maintained in three ways. First, the directorship will remain in the hands of Prof. Bladen; second, the full-time staff of the old Institute will continue as members of the new staff; and third, the program of the old Institute, particularly its "in-plant" research, its group conferences with management personnel on human relations, its ventures in education with union officers, will be resumed by the new Institute.

Among its activities during the past year, the Institute contributed teaching services to various departments of the University. In the field of research, six students, acting as "participant observers" while employed in various occupations kept "work diaries" and met weekly with the research director. For the third consecutive year a research project was undertaken in Tip Top Tailors; the Canadian General Electric Company again allowed the Institute to study its Royce Avenue plant; and the Mohawk Mills Limited in Hamilton made possible a study of its organization and communication.

Five evening group conferences for management personnel were organized in Toronto. A new venture took the form of a series of evening conferences on "human relations" with a group of a dozen local leaders in the Canadian Brotherhood of Railway Employees.

In the field of radio, four industrial relations scripts were performed on "Cross Section" a weekly program of the CBC.

Canada Year Book, 1950

Publication of the 1950 edition of the Canada Year Book, Canada's official statistical annual, has been announced by the Dominion

Bureau of Statistics.

The 1950 edition, containing 1,300 pages and illustrated with maps and diagrams, has been thoroughly revised. Its 32 chapters contain the latest material available at the time of going to press.

In addition to the regular data on physiography, demography, health, welfare, education, labour, national income, resources, production, trade, transportation, communications, finance, etc., there are several special articles dealing with the influence of the RCMP in the building of Canada, the iron-ore resources of the Quebec-Labrador region, titanium in Quebec, and the Royal Commission on Prices.

Also included in the chapter material wherever possible is statistical information

for the Province of Newfoundland. As this information is based on the Newfoundland Census of 1945 and is not, therefore, on a basis comparable with that for the rest of Canada, it is introduced in special sections of the appropriate chapters.

Cloth-bound copies of the Year Book may be obtained from the King's Printer, Ottawa, at the price of \$2 per copy. By a special concession, a limited number of paper-bound copies have been set aside for ministers of religion, *bona fide* students and school teachers, who may obtain such copies at the price of \$1 each. Applications for these special copies should be sent to the Dominion Bureau of Statistics, Ottawa.

Credit union movement marks 50th anniversary at Lévis

The Credit Union (Caisse Populaire) movement, entering its fiftieth year in late August celebrated the occasion at a convention in Lévis, Quebec, the site of its birthplace, the *Montreal Financial Times* reported on September 1. Three thousand delegates from all over Canada as well as from points in the United States and Europe attended the sessions.

Founded in 1900 by Alphonse Desjardins, the growth of the credit union movement particularly in the past ten years has been remarkable, the paper states. In Quebec alone, total savings have increased from \$14,936,189 at the end of 1940 to \$183,231,781 at the end of 1949 and outstanding loans from \$15,599,614 to \$98,934,104.

At the end of 1940 there were 452 "caisses" in Quebec with a total membership of 100,812 and total paid-in capital of \$2,425,375 while at the end of last year, there were 1,068 "caisses" with an aggregate membership of 561,183 and a total paid-in capital of \$14,433,012.

The 1,068 Caisses Populaires in Quebec are affiliated to 10 regional unions which constitute the Federation of Credit Unions in the Province of Quebec, the paper reports. Total assets are \$210,165,490 with total savings amounting to \$198,000,000. Personal loans are \$25,598,747 and mortgage loans are \$73,335,357.

Total credit union savings for the whole of Canada are \$282,242,000, and total loans reach \$147,895,000. Dominion-wide total of unions is 2,819, with 23 leagues or federations in operation. Total union assets in Canada are estimated at over \$300,000,000 while membership is 940,000.

[An article on the growth of credit unions in Canada appeared in the March issue of the *LABOUR GAZETTE*, pp. 334-6.]

Industrial Relations Officer appointed in Newfoundland

The Hon. Milton F. Gregg, Minister of Labour, and the Civil Service Commission announced on September 11 the appointment of W. L. Taylor, of St. John's Nfld., to supervise the St. John's Office of the Industrial Relations Branch of the Department of Labour.

Mr. Taylor, who headed the eligible list compiled following a competition conducted by the Civil Service Commission, will deal with industrial relations matters in Newfoundland coming within Federal jurisdiction.

Mr. Taylor is a veteran of the second world war, with overseas service. Prior to joining the staff of the Department of Labour, he was employed by the Customs and Excise Division of the Department of National Revenue, having previously been engaged in customs work in Newfoundland before confederation with Canada.

Mr. Taylor was born at Heart's Content, Nfld., where he went to primary and secondary school before attending St. Francis-Xavier University.

Efforts to measure productivity

On September 26, a special meeting of a government inter-departmental committee, formed to investigate the possibilities of research in productivity, was held in the Board Room of the Department of Labour, in order to obtain the views of an expert from the United States in this field.

The guest speaker, Mr. James Silberman, consultant on productivity to the Commissioner of the U.S. Bureau of Labour Statistics, gave an interesting talk on the national and international importance of research in productivity.

In his opening remarks Mr. Silberman indicated that keen European interest in the problem of productivity coincided with concern in the U.S.A. over continuing wartime high cost-price patterns in industry. Recognizing the need for a common approach, appropriations of funds under ECA have been allocated to enable European experts to study and appraise American statistical and analytical techniques. Under this program four groups of fifteen or twenty European experts are coming to the U.S.A. each quarter. At the same time "productivity centres" are being set up in Europe to continue intensive investigation in this field.

Turning to the U.S.A., Mr. Silberman showed how interest in productivity research grew from early fears regarding the danger of technological unemployment. Although

earlier studies carried out by the Department of Labour, and by WPA, effectively disposed of this theory, interest in productivity analysis as such continued to grow. In 1940, a permanent organization was set up by the BLS, which now employs about fifty people and has an annual budget of over \$250,000.

This organization is divided into two sections. One derives industry-wide indexes of output per man-hour through published data of industry totals of production, employment and man-hours. The other section sends field agents to examine the cost-accounting record of industry. By this means it is possible to obtain a synthesis of individual company reports for selected typical products.

The secondary approach is useful for overall coverage at low cost. The direct approach gives depth to the picture, by detailed and comprehensive analysis of the *causes* of trends. The latter is also useful for industries with a broad product complex, such as clothing, for which the secondary approach is inadequate. Together they make for a useful program for the collection and analysis of trends in productivity.

Mr. Silberman stated that concrete results have already been achieved through this program. The reports based on direct studies are being used extensively by industry, since they provide yardsticks for inter-company comparisons. The importance of the concept of unit man-hour requirements is now recognized, and is used extensively in conjunction with other statistical information, such as unit costs. A survey has revealed that many participating firms have made substantial improvements in equipment and organization, as a direct result of these studies. Some firms are utilizing this data, in part, for administering bonus and incentive wage plans.

These studies have also given both management and labour a better insight into the vast number of factors which act as a group in determining the trend of productivity. In addition, the importance of research at the national level was emphasized by the speaker, when he revealed that these studies have shown an apparent levelling off of the trend of productivity in the United States as a whole. Attention has now been turned to an examination of this problem, and of ways to re-establish the earlier trend.

Mr. Silberman displayed a number of charts which showed clearly the light which productivity research can shed on many problems. Among these were illustrations of the differences in output per man-hour between U.S. and U.K. industries. He drew attention to the fact that in some cases

identical plants in the U.S. and the U.K. had striking differences in labour requirements. A key factor, he felt, may be a relative deficiency in the U.K. with regard to the art of management, which is showing itself in a lack of material-handling equipment, conveyor systems, and job-lot production scheduling, which gives some European plants almost a "laboratory" appearance beside the more specialized mass-production plants of the United States.

With respect to Canada, Mr. Silberman congratulated the Committee for its basic enquiries in this field, noted again the value of research in productivity, and pointed out the importance of keeping abreast of international developments.

**Hearing
postponed
in union
expulsion
case**

On October 4, 1950, the Supreme Court of Canada ordered that the hearing of an appeal by Myron Kuzych, a former member of the Boilermakers' and Iron Shipbuilders' Union of Canada, be postponed until after the decision of the Judicial Committee of the Privy Council on another issue in the case had been handed down. The case originated in 1945 when Kuzych was dismissed from the union for his attack on the closed shop principle. Kuzych alleged he had been wrongfully expelled and his case has been in the courts since that time. In September, 1949, a decision of the Supreme Court of British Columbia awarded him \$5,000 damages for wrongful dismissal and issued an order for reinstatement. However, the union officials did not grant him a membership card in the union and in another decision, in December, 1949, the British Columbia Supreme Court found them guilty of contempt of court for failing to reinstate Kuzych. These two decisions were appealed by the union and the British Columbia Court of Appeals affirmed, on May 4, 1950, the decision of the lower court as to the damages for wrongful expulsion but reversed the decision that the union officials were guilty of contempt of court for their refusal to reinstate Kuzych. In turn, these two decisions were appealed; the former dealing with damages for wrongful expulsion is before the Privy Council, and the latter decision dealing with the question of the conduct of the union officials who refused to admit Kuzych to membership was appealed to the Supreme Court of Canada. The case in its various stages has been fully reported in the *Labour Law* section of the *LABOUR GAZETTE*, most recently in the October, 1950 issue at p. 1704.

Bargaining rights restored to teachers' union

The bargaining rights of a French-speaking teachers' union (l'Alliance des Professeurs Catholiques de Montréal) were restored by the Cour Supérieure of Québec in a decision handed down

on September 23, 1950.

In January, 1949, the teachers' union went on a week-long strike to support their claims for wage increases. On January 21, the school board (Commission des Ecoles Catholiques de Montréal) requested the Labour Relations Board to decertify the union and the Labour Relations Board granted the demand on the same day. The proceedings were held in Montreal, but the decision was sent from Quebec. No notice of the request was given to the union and no opportunity was given to the union to be heard. The reason given for the decision was the alleged violation of the Public Services Employees Disputes Act which prohibits strikes among personnel of the public services.

The union applied for and obtained a writ of prohibition against this decision of the Labour Relations Board.

Mr. Justice Savard upheld the writ of prohibition obtained by the union and ruled that the decision of the Board revoking the certification was null because the given reason was not a valid cause for the withdrawal of the certification. It is within the power of the Board to review its decisions provided it gives the party concerned an opportunity to be heard. No notice had been given to the union for such hearing and the Judge considered it strange that the proceedings took place the same day as the request for decertification was made and that the decision was sent from Quebec as though the proceedings had been held in Quebec. Mr. Justice Savard added further that the Public Services Employees Disputes Act provides for penalties with respect to violations of that Act. He stated that in withdrawing the certification because of a violation of the Act, the Labour Relations Board imposed a penalty that only the courts could apply.

This case will be reported in more detail in a forthcoming issue of the **LABOUR GAZETTE**.

Numerous wage increases in U.S.A.

A series of wage increases took place in United States industry during the late summer and autumn, many of them as a result of the voluntary re-opening

of unexpired collective agreements.

The cycle of wage changes began in the automobile industry. Late in August, the General Motors Corporation announced an increase of 5 cents an hour, under the terms of the cost-of-living formula in its contract with the United Automobile Workers (L.G., July, 1950, p. 990). Two days later the Chrysler Corporation and the UAW jointly announced a 10-cent increase (15 cents for certain skilled employees) awarded "entirely apart and outside" of the existing contract which did not obligate the company to discuss wages until July, 1951. Several other companies immediately granted wage increases of varying sizes; and on Labour Day, the Ford Motor Company and the Union announced a complete revision of their collective agreement. The new contract provides for an 8-cent wage increase, with an additional 5 cents for skilled workers; a cost-of-living formula similar to that in effect at General Motors; an annual "improvement" increase of 4 cents an hour; an increase in pension benefits from \$100 to \$125 a month; and several other gains.

In the ensuing weeks wage increases and in some cases other benefits were announced in the electrical, chemicals, farm equipment, oil, shipping, shipbuilding, aluminum, glass, textile, railroad, telephone, paper, clothing, and other industries. A considerable number of the agreements provided for a cost-of-living formula and an annual "improvement" increase.

Chrysler Corporation grants "voluntary" wage raise

The Chrysler Corporation of Canada recently announced wage increases for employees in Windsor and Chatham, granted voluntarily although the company's collective agreement

with the United Automobile Workers precluded the opening of wage discussions prior to June 4, 1951.

The increases, which were announced following discussions with union officials, became effective on September 10. The Chrysler Corporation in the United States had previously announced wage increases awarded outside of the existing contract (see above).

In Canada the increases amounted to 8 cents an hour for production workers, and 11 cents for skilled trades, according to the *Windsor Star*.

Union representatives stated that similar wage discussions were in progress with the Ford Motor Company; and that similar demands would be made on other Canadian companies with which the union had contracts.

Subversive Control Act passed over veto in U.S.

The U.S. Congress voted overwhelmingly on September 20 to enact the Internal Security Bill, designed to control Communists, spies and saboteurs.

The Bill passed the House of Representatives by a vote of 312 to 20, and the Senate by 51 to 7.

President Harry S. Truman vetoed the bill on September 23, but it was immediately repassed in the House of Representatives by a vote of 286 to 48, and in the Senate by a vote of 57 to 10.

Among the main provisions in the act are those which require:—

1. The Communist party and its members to register;
2. Communist "front" organizations to register;
3. "The detention of persons who there is reasonable ground to believe probably will commit or conspire with others to commit espionage or sabotage."
4. Communists to be barred from employment in war plants. This part of the act also calls for public listing of such plants as a means of making the ban effective.

The law also provides that: registered Communists may neither obtain or use passports; federal employees are prohibited from passing secret information to Communists; Communist aliens may be kept out of the country, or deported and may be detained under supervision pending deportation; no alien may be naturalized while deportation proceedings are in progress; aliens seeking naturalization must swear to bear arms if required by law; the statute of limitations in espionage cases be extended from 3 to 10 years and, that stiff penalties be applied to spies and saboteurs.

In vetoing the bill, President Truman raised seven specific objections to it:—

- "1. It would aid potential enemies by requiring the publication of a complete list of vital defence plants, laboratories and other installations.
- "2. It would require the Department of Justice and its Federal Bureau of Investigation to waste immense amounts of time and energy attempting to carry out its unworkable registration provisions.
- "3. It would deprive us of the great assistance of many aliens in intelligence matters.
- "4. It would antagonize friendly governments.
- "5. It would put the Government of the

United States in the thought control business.

"6. It would make it easier for subversive aliens to become naturalized as United States citizens.

"7. It would give Government officials vast powers to harass all of our citizens in the exercise of their right of free speech.

"Legislation with these consequences is not necessary to meet the real dangers which communism presents to our free society. Those dangers are serious, and must be met. But this bill would hinder us, not help us in meeting them." Mr. Truman said.

CIO expels unions for Communist activity

Late in August the Executive Board of the Congress of Industrial Organizations expelled two more unions on charges of following Communist policy (L.G., April, 1950, p. 438). The unions were the International Longshoremen's and Warehousemen's Union, and the Marine Cooks' and Stewards' Union. This action was stated to complete the CIO's purge of Communist-line unions.

President Truman's Industrial Safety Conference

In opening his Conference on Industrial Safety at Washington, D.C., June 5-7, Harry S. Truman, President of the United States, said that the reduction of the number of work injuries in 1949 by 7 per cent was good—but not good enough. A report of the Conference in the *Monthly Labour Review* of August states that some 1,000 delegates represented labour, industry, federal and state governments and organizations interested in the safety movement.

"The great tragedy of accidents," Mr. Truman said, "is that most of them need never have happened. I have heard it said that 'accident' is just another word for 'carelessness'. There is much truth in that."

In the concluding address of the conference, Secretary of Labour Maurice J. Tobin drew attention to the advance made "not only last year, but over the long haul," in industrial safety. Available statistics dating from 1933, he added, would indicate that safety measures had spared the lives of 16,000 workers.

At the conference, various committee reports were presented. The Accident Records, Analysis, and Use Committee pointed out that in manufacturing industries, the total number of injuries declined by 19 per cent—a drop that could not be entirely attributed to the slight decline in employment.

The Laws and Regulations Committee reported progress towards achievement of its goals. State safety laws, codes, rules and regulations had been indexed by State and by subject. Greater interest in workers' safety had been indicated by the introduction of some 70 bills in over half of the legislatures.

Other committees which reported were Engineering, Education, Programs and Services, Research and Co-ordinating. William Connolly, Director of the Bureau of Labour Statistics, and chairman of the Co-ordinating Committee stated: "As a federal official . . . I never miss an opportunity to repeat my conviction that only the States with their legal responsibility for safety and their closeness to industrial problems can carry the safety message to the plant level. Management has primary responsibility for safety at the job site. Labour has a vital interest because workers get killed and maimed. Insurance companies, educators, and private safety organizations have a real interest and can offer real help. The Federal Government's role is to gather facts and offer whatever technical assistance the States request to help them do their job."

Union security clauses in U.S. agreements

Provisions requiring that workers covered by a contract either must be union members at the time of hiring or become such within a specified period after starting work appeared in half of 2,159 collective bargaining agreements in force during 1949, analysed by the U.S. Bureau of Labour Statistics. The remaining agreements contained either "maintenance of membership" or "sole bargaining" clauses, according to the August issue of *Monthly Labour Review*, prepared by the U.S. Department of Labour.

The agreements covered an estimated 4,000,000 American workers employed in 20 major manufacturing and eight non-manufacturing groups.

The examination revealed that almost two-thirds (64 per cent) of the agreements called for some type of check-off of dues alone, or of dues and other union assessments.

The article classifies union security clauses into three major categories: union shop and its variations; membership maintenance; and sole bargaining. The union shop was found to be the most prevalent among the agreements studied, being in force in 1,080 agreements.

"'Union shop' agreements," as defined in the article, "require that all or nearly all

employees in the collective bargaining unit be members of the union. 'Maintenance of union membership' agreements stipulate that all employees who were union members when the contract became effective, or join the union while the contract is in effect, must remain union members in good standing during the life of the agreement. 'Sole bargaining' contracts are those in which the union is recognized only to the extent that it is accorded the right to bargain for all employees in the unit, irrespective of whether the workers are or are not members of the union."

"Employ the physically handicapped" week in U.S.A.

In an appeal delivered prior to "National Employ the Physically Handicapped Week," Harry S. Truman, President of the United States, said that the employment of physically handicapped workers is essential to strengthen the nation in preparation for all-out defence. The occasion was the sixth annual meeting of the President's "Committee to Aid the Physically Handicapped."

In his address, the President announced that the special week devoted to the handicapped would commence on October 1.

"I urge this committee," the President said, "to redouble its efforts to place before all the employers of this nation, and all the groups concerned with employment, the very simple message that the physically handicapped can and should be employed. Only in this way can we enable the handicapped to play their full part in strengthening our nation."

Women's trade union league in Washington closes

After 47 years of effort on behalf of women in industry, the National Women's Trade Union League in Washington, D.C., has closed, according to the *New York Times*.

In closing the headquarters, the executive secretary, Miss Elizabeth Christman said that there was no deficit but that there were not sufficient funds to continue operations. Individual leagues in New York, Chicago and Milwaukee will continue, but on an independent basis.

While the League has ceased to function, the secretary stated that it had accomplished its mission. During the Theodore Roosevelt Administration, the group had instigated the first study of women and children in industry, leading to the establishment of the Children's Bureau and the Women's Bureau in the Federal Government.

"We were pioneers in labour education for working women," Miss Christman said, "in establishing industrial standards for women through organization and legislation, in industrial hygiene, in interpreting to the general public the problems of women wage-earners and of the trade union movement, and in support of international co-operation among women and other nations."

Four fields in which further work could have been accomplished, the secretary stated, were promotion of a better economic status for migratory workers, improvement in conditions of domestic workers, enactment of a federal equal pay law and a larger percentage of women in responsible union positions.

**Arbitrary
retiring age
detrimental
to aged
and nation**

Declaring that he was opposed to arbitrary age limits on retirement, especially at the present time when increased productivity is essential to national security, the President of the United States, Harry S. Truman said that ways should be found "whereby older persons can continue at their regular jobs if they want to." The President's speech, which was read to the National Conference on Ageing, by Federal Security Administrator Oscar R. Ewing, was reported in the *New York Times* on August 15.

For those who do not wish to, or cannot continue their regular jobs, Mr. Truman said, "I believe ways can be found for them to be useful in part-time or consulting capacities." He called for "imaginative thinking about the special problems of health, housing and recreation that older people face."

Alvin Johnson, director emeritus of the New School for Social Research in New York stated that it was a conservative estimate to place at seven or eight per cent the loss to the nation's effective manpower when retirement systems become universal. He urged that there be "no dated retirement; no pensions without disability."

The Family Life Section told the conference that the man or woman with the most children had the "best chance" in declining years, a large family, they maintained, being the best in which to grow old.

An education expert urged the establishment of a system of public schools for people who are growing old. Dr. H. S. Curtis, Ann Arbor, Mich., stated that such

schools are necessary, because so many persons are living for years after their retirement. He said that superannuation at a set age is a mistake "both for capital and labour." At present, he said, men retire "to an unplanned future of doubtful value to themselves and the community."

He recommended that boards of education in large industrial cities should set aside or build special schools for persons, not necessarily retired but of any age, "who have the time and desire to learn."

On the closing day, Federal Security Administrator Ewing stated that the National Conference on Ageing had started a crusade similar in importance to those against child labour and for women's suffrage, the *Times* reported.

"We are engaged in a great movement, a world-wide movement, to give meaning and fulfilment to the later years of every man and woman," he added.

Among the recommendations made in session were:—

1. That a National Council on Ageing be set up to act as a clearing house for information on improving conditions for the older population;
2. That there be established in the Public Health Service a National Institute of Geriatrics, the scientific field dealing with diseases of the aged;
3. That age should not be the deciding factor in retirement and in determining ability to do a job. Instead of a set "cut-off" date there should be a gradual system of retirement;
4. That a broad education program be set up for "senior citizens," possibly including a national system of college.

Other recommendations for federal aid included amending the National Housing Act so that single aged persons as well as aged couples can come under its public housing provisions, and changing the Social Security Act to permit old age assistance to residents of homes for the aged.

**International
organization
expels
seamen's
union**

The International Transport Workers' Federation, at its 21st biennial convention, held recently at Stuttgart, Germany, expelled the Canadian Seamen's Union "for having harmed the interests of its own members and those of other affiliated unions."

The resolution referred to the strike conducted by the CSU in the spring of

1949, which had repercussions in a number of ports outside Canada (L.G., Sept., 1949, p. 1101).

"Everything points to the fact that the strike of the Canadian Seamen's Union was decided by an outside power of which the leaders of the CSU are the lackeys," the resolution stated.

The CSU was formerly affiliated with the Trades and Labour Congress of Canada, but was suspended by the TLC Executive in June, 1949, and expelled by the Congress Convention later in the year.

**ICFTU
introduces
monthly
journal**

The International Confederation of Free Trade Unions has commenced publication of a new monthly journal entitled *Free Labour World*, dedicated to

the cause of free trade unionism in the world.

Writing in the first issue, J. H. Oldenbroek, General Secretary of the ICFTU, describes the purpose of the magazine in these words: "*Free Labour World* will be the forum in which trade unionists and others who support the ideals of the democratic labour movement will be able freely to express their opinions. It will also be the organ in which the attitude of the ICFTU to the problems now facing the world, and the international labour movement especially, will be expressed."

The first two issues of the new magazine contain articles on full employment, European unification, trade union activity in the United States, the fight against forced labour, and other interesting features.

Subscriptions to *Free Labour World* are available for \$1 per year and may be sent to the International Confederation of Free Trade Unions, 24 rue du Lombard, Brussels, Belgium.

**Communist
strength
declines in
Swedish
unions**

Press reports from Stockholm have indicated a sharp decline in Communist strength in Swedish trade unions. This decline has been taking place during the past three years accord-

ing to the *New York Times*.

The Swedish Social Democrat Party has completed a study which shows that the Communists' influence has declined in all areas where they were strong in 1945 and has not grown in any new areas. The *Times* said that "of nearly 9,000 trade union

locals, there are only about 130 with Communist management today."

The Communists are reported to be strongest among the iron mine workers in the far north, "but even here they are about to be driven back," the report said. In the election of officers in the important Stockholm Metal Workers' Union, the Communists polled 8,275 votes in 1945 to less than 6,000 for the Social Democrats. In 1950, the Socialists gained 9,405 votes to 4,503 for the Communists. In Gothenburg, Sweden's second city, Communist support dropped from a 2 to 1 majority in 1945 to less than 40 per cent of the votes in 1950.

Between 1945-1947, the Communists were in control of seven regional union organizations in the northern mining areas, and the Social Democrats only five. Today the Social Democrats control eleven organizations and the Communists only two.

**1949-50
report of
Indian
Ministry
of Labour**

The activities of the Ministry of Labour, Government of India, for the fiscal year 1949-50 were recently summarized in the *Indian Labour Gazette*.

The report showed a considerable improvement in the field of industrial relations. "Much of the credit for this noticeable improvement in labour-management relations must unquestionably go to the main parties directly concerned for it is clear that in spite of temptations, they have on the whole wielded the weapon of lockout and strike with reasonable restraint and an increasing sense of responsibility," the report said.

The activities of the Ministry during the year were widespread, and covered such fields as fair wages, profit sharing, production, legislation, agricultural labour, plantations, forced labour, welfare of miners, and the labour bureau for the collection of statistics.

In addition, the Government of India was represented at all ILO meetings. The Secretary of the Ministry of Labour, Shree S. Lall was selected Chairman of the ILO Governing Body, and the Autumn Session of that body was held in Mysore. India also ratified several ILO Conventions.

The report said that 32 District Employment Offices were opened during the year. Registrations for placement exceeded ten million, and some 2½ million applicants were placed. The Ministry was also active in the fields of technical and apprenticeship training.

ANNUAL CONVENTIONS OF CANADIAN LABOUR ORGANIZATIONS

Continuation of the drive to eliminate Communist influences was the most noticeable feature of the annual Conventions of the Trades and Labour Congress of Canada and the Canadian Congress of Labour.

Both organizations amended their constitutions so as to give their executives a freer hand in dealing with Communism. The TLC Convention refused to seat several delegates considered to be Communist, and ordered all affiliates to rid themselves of Communist officers or face suspension. CCL delegates gave their executive power to expel any union following Communist or Fascist principles and policies.

A Declaration of Positive Economic Philosophy set forth the views of the CCL on the economic and social objectives that should be pursued in Canada and abroad as a counter-measure to Communism.

Housing, old age security, high prices, wages, unemployment insurance and labour relations legislation were among the subjects on which both Congresses debated their views and formulated policies. Delegates voiced strong endorsement of the United Nations action in Korea.

There was unanimous approval by both bodies of the action taken by their executives earlier in the year in issuing joint statements on matters of common concern, and hope that further co-operation would develop. The CCL also exchanged messages of greeting with the Canadian and Catholic Confederation of Labour.

The latter organization, at its Convention, adopted resolutions many of which were similar to those passed by the two Congresses. It gave particular attention, however, to old age pensions, picketing, Canada and the United Nations, and certain questions of internal management.

In the following pages appear accounts of the proceedings of the three Conventions. The TLC met at Montreal from September 11 to 16, the CCCL at Sherbrooke the following week, and the CCL at Winnipeg at the end of the month.

President Percy R. Bengough presents a gold watch to Sir Luke Fawcett, fraternal delegate from the British Trades Union Congress, as a memento of the 65th Convention of the Trades and Labour Congress of Canada.

TRADES AND LABOUR CONGRESS OF CANADA

"It is the job of this Parliament of Labour—a job which it cannot gloss over, shirk, or evade—to resolve the problems in which we and the whole free world finds itself. We want peace. Working people everywhere want peace. But we shall not accept peace at any price. We will not accept peace at the price of domination and enslavement." With these words, President Percy R. Bengough set the pattern for the 65th Convention of the Trades and Labour Congress, held at Montreal, September 11-16. This pattern was begun last year at the Calgary Convention.

Backing this statement, the Convention moved swiftly to tighten its ranks against Communist infiltration by giving the Executive Council strong powers to deal with any subversive elements still left in its ranks.

The Executive Council and the Credentials Committee served early notice to all Communists and fellow travellers that their presence at the Convention was not desired.

As a result of this tightened policy, the credentials of a number of delegates were challenged.

The key decisions in the anti-Communist stand of the Convention were those which:

1. Ordered all TLC affiliates to rid themselves of Communist officers or face suspension;
2. Amended the constitution so that Red delegates could be barred from Conventions at the discretion of the executive council;
3. Confirmed the barring of Bruce Magnuson from the convention;
4. Rejected Communist-inspired resolutions on foreign trade, peace and the atom bomb, and foreign relations, and gave the TLC's wholehearted support to the United Nations and the stand in Korea.
5. Refused a proposal that several anti-Communist measures passed at the 64th Convention in Calgary be repealed.

The delegates refused to support a proposal, backed by the executive council, for a system of voting based on the per capita tax paid by each organization. Another issue which occasioned considerable discussion was the proposal for a minimum wage of one dollar per hour, which was finally amended to read eighty-five cents per hour.

The proceedings at the Convention were enlivened by attempts to distribute literature on the floor of the Convention. The mimeographed sheets bore the address of the "Canadian Peace Congress, 49 Walker, Toronto." The distributors were ushered from the hall by the acting chairman, and the Convention provost.

The Convention agenda contained over 200 resolutions on social and economic matters. Among the important matters receiving attention were: cost of living and price control; bill of rights; education; health, holidays and safety; Unemployment Insurance Act; pensions and social security; workmen's compensation; income tax; and several others.

Opening Proceedings

The formal opening was presided over by President Claude Jodoin of the Montreal Trades and Labour Council. Following his address, the delegates were also welcomed by His Worship Mayor Houde of Montreal, and President Marcel Francq of the Quebec Federation of Labour. Later in the opening proceedings the Honourable Milton F. Gregg, V.C., Minister of Labour, addressed the delegates and presented President Bengough with a copy of the special Anniversary Edition of the Labour Gazette.

In his opening address, President Percy R. Bengough, C.B.E., expressed the Convention's pleasure at meeting in Montreal, and spoke of Montreal's importance as an industrial and commercial city.

Speaking of the troubled condition of the world, Mr. Bengough said:—

If we are to have peace—enduring peace—we must create a basis on which peace is possible. If we are to stop Communism, we must encourage people in our country and in other countries to believe our tried and proven ways of governing, living, and working are better. I have no hesitation in saying that we can do that. We know that our free trade unions are better than a union dominated by the state, in the same way, as we know from experience that our free unions are better than a union dominated by the employer. It is not possible to have a free trade union when the state becomes the only employer. We know that the social and economic improvements gained in Canada are the result of our direct efforts, or in some cases at least, of our inspiration. We know that we can do more along those lines.

Mr. Bengough, speaking for the Executive Council, condemned Communism, communist tactics in the labour movement, and the attack on South Korea.

Speaking of the ICFTU and the ILO, Mr. Bengough noted their "direct and consultative relations with the UN." Through these affiliations, Canadian "trade unionists . . . can make constructive efforts towards building a political, social and economic framework in this old world upon which enduring peace can grow and flourish."

President Bengough said that improving working and living conditions would not be enough under present conditions. There is an immediate need for "defensive measures that must be taken in accordance with our commitments to the United Nations and under the North Atlantic Treaty . . .", he said. Labour will have "to put up the lion's share of the money . . . and . . . do the work . . .", Mr. Bengough continued, but will do its job "with light hearts and cool heads, knowing that it is our living and working standards . . . that we are protecting".

Mr. Bengough then spoke of the growing strength of the trade union movement in Canada, and briefly traced for the delegates the expansion of the TLC since the last convention. He noted that TLC membership "is near the half million mark in affiliated membership".

Speaking of the railway strike, Mr. Bengough sharply criticized the attitude of President Donald Gordon of the C.N.R., and expressed his thanks to all labour leaders for joining "with this Congress in a policy statement of unalterable opposition to compulsory arbitration".

Of Canadian problems, and the job of the Convention, Mr. Bengough said:—

In all that I have said about our immediate tasks as unionists and Canadians, we must not lose sight of our never ending job of accomplishing security for all rights here in Canada. We want a comprehensive scheme of social security. During the coming days you will be considering what your Executive Council has done during the past year to get a little closer to that all-important goal. Let us not be fooled by any talk about defence and other expenditures making it impossible for us to have and enjoy a wide measure of social security. Let us not forget that talk like that simply means that there are people in this country—high-minded as they may claim to be—who would be quite happy to shoulder the cost of defence onto the shoulders of the aged, the sick, the infirm, the disabled, the widowed, and the unemployed. That is all that they are saying when they claim that social security cannot be paid for as well as defence and other costs.

Some of our members have gained increases in wages. That could be a boon

to themselves and their families, if, at the same time, we had not found ourselves grasping for spending power while prices soared skyward in a never-ending spiral. Positive measures should be taken against inflation. Positive measures to stabilize prices should be undertaken by the government at once.

Closing his remarks, President Bengough asked all delegates to . . . "exercise calm judgment . . . (and) . . . give full and careful consideration to all matters before them and reach decisions in the best interests of all of our affiliated membership and to the honour of this Congress".

Address of Honourable Milton Gregg Minister of Labour

President Bengough introduced the Hon. Mr. Gregg to the Convention in the following words:—

Fellow delegates it is now my pleasure to introduce to you one whom I consider a very good friend of labour. One who only, as recently as last Labour Day in a very courageous way defended the good name of Labour, defended the position of our railroad men against the charges of irresponsible leadership and others that had been made. I want to say we appreciate it. This good friend of ours really went out of his way to do it, and I want to introduce him to you. He has a very distinguished military record, one where he definitely had to have a knowledge of human value and one where he received the highest honour that can possibly be bestowed on anyone. That was winning the Victoria Cross. He comes well equipped to the job, having previously been President of the University of New Brunswick and is now in the position of the Minister of Labour for the Dominion of Canada. I want to introduce to you now the Honourable Milton F. Gregg, V.C., Minister of Labour.

Expressing his pleasure for the warmth of his welcome to the Convention, Mr. Gregg spoke briefly of his "introduction to labour-management relations" during the rail strike, and said that he had "derived useful and agreeable experience" from this introduction.

Mr. Gregg reiterated his faith in "the loyalty of Canadian workers", and said that "it has been demonstrated in two world wars that there is no more responsible and public spirited segment of our citizenship than the Canadian Labour Movement".

Mr. Gregg paid tribute to the memories of the late Mr. King and Mr. Mitchell. He said that "both Mackenzie King and Humphrey Mitchell regarded themselves as 'expendable' in State service, and did so expend their lives. Theirs was the kind of service that transcends all thought of self". The Minister also referred to Mr. Mitchell's long trade union associations.

Speaking of the forces working against our democracy, Mr. Gregg said:—

We now know how they operate to undermine those countries which they have marked for conquest. The harder nuts, they try to crack by such schemes as getting the unwary to sign petitions to ban the atom bomb.

But their biggest play is to capture or disrupt the free trade union movement, or work into consumers' leagues, or youth leagues or student groups. Often many a liberal (with a small 'l') has been enticed to join the camp followers.

I wish to commend the labour movement of this country for its forthright action in exposing and ousting the termites in their midst. It was done with neatness and dispatch. And only you could have done it with such thoroughness. A government can pass a law outlawing the Communist party as such, but that does not outlaw Communists, or Communism. I know that your vigilance, in view of the immediate situation, will not be relaxed.

Because free trade unions have so much to lose under a Communist dictatorship, there is no need to emphasize here what you have at stake in our present situation.

Korea is a cross-roads in human affairs. Korea today; Indo-China or Malaya, or Iraq, or Europe tomorrow—anywhere they can get a foot-hold, with satellite armies preferred, until they consider the time opportune to commit their own forces in a more ambitious time-table.

You have demonstrated your awareness of their world ambitions by your strong support of counter-measures and your rejection of anything that would impede our trade relations with Western democracies. Your resolutions adopted last year at your Calgary Convention were most heartening, particularly your unqualified support of the North Atlantic Security Pact.

More recently you have boldly swung your support to the Security Council of the United Nations and its decision to intervene in the Korean situation. All these demonstrated that you, too, have calculated the risks and are prepared to sponsor sacrifice by all Canadians to insure the practical survival of our freedom.

Canadians . . . "would be recreant to our trust and our own safety if we did not honour our pledges in defence plans to preserve the boundaries of the remaining free world", Mr. Gregg said. Despite all efforts at amicable settlement, it has become necessary for us to adopt a program of preparedness "for our own safety and that of others".

"In all . . . (their) . . . cold war tactics, the Communist purpose is to dislocate our economy, to keep it off balance, to bring on discontent by scarcity and inflation, and thereby lower our standard of living and soften us up, Mr. Gregg said."

Mr. Gregg pointed out that increased production of war materials would mean shortages of consumer goods and that "scarcity of goods tends to command higher prices", and bring on inflation.

"The strongest anti-inflation weapon we have is increased production. Your government can do much but it cannot do all to curb inflation. Every citizen has a part in that", Mr. Gregg said. However, it would be folly to adopt all-out war powers at this juncture, he said, "and it would be only by assuming such powers; that it would be possible to apply an over-all tight control of retail prices and wages".

Describing "our most potent weapon", after our material strength as being "in the realm of the spirit", the Minister of Labour urged the delegates to "so organize our human relations in Canada so that every individual—soul and body—be safe against all forms of oppression whether from the state or other factors within our country, or from any outside forces of tyranny".

Presentation of Anniversary Issue

Mr. Gregg re-enacted a chapter from history when he presented a copy of the 50th Anniversary Issue of the *Labour Gazette* to President Bengough. In his presentation remarks, Mr. Gregg noted that, "Mr. King took his first printed copy to Sir William Mulock, who, at the 16th Convention of the Trades and Labour Congress in September 1900, presented that copy to Mr. Ralph Smith, then president of this organization".

Presenting the Issue to Mr. Bengough, Mr. Gregg said,

Today, Mr. Bengough, I am happy to present you with the 50th Anniversary copy of the Department's *Labour Gazette*, which has faithfully recorded the impressive progress of labour during the past half century.

Fraternal Messages

The delegates listened with interest to the addresses of Sir Luke Fawcett, fraternal delegate from the British Trades Union Congress, and Mr. Anthony Valente, International President of the United Textile Workers of America, and fraternal delegate from the American Federation of Labour.

Mr. Valente spoke principally on the world situation and the Communist menace. Placing the guilt for the war in Korea squarely on the Communists, Mr. Valente said:—

... Communism is a world-wide conspiracy against the free nations of the world and must be rooted out everywhere, both domestically and abroad. Communists parade under phony slogans of peace and freedom, not only in the United States and Canada, but in other countries of the world, while they carry on war for the enslavement of peoples. They speak of peace and practice aggression and slavery. The so-called "Stockholm Petition" is a

fraud that has been completely exposed by their actual war against the Republic of Korea.

Lest there be any misunderstanding, I want you to know that the American Labour Movement is completely united in this belief and that it stands firmly behind the United States Government and the United Nations against the puppet North Koreans and their master-manipulators, the Soviet Russian aggressors. The American Federation of Labour is co-operating fully with the United States Government in its defense production program. It is also active in mobilizing the united action of all free labour all over the free world in defence of our free institutions against Communist barbarism and slavery.

Turning to the future, Mr. Valente said that the American labour movement is "conscious of the fact that great sacrifices will have to be made. We know full well that the greatest burden of preparing for defence will be borne by the men and women who work for a living". He said that controls will become necessary but that "controls of prices usually come too late". Already, the greed of some of our industries has become evident in the exorbitant profits being taken", Mr. Valente said.

The speaker noted with pleasure that American labour, "at least in the public press, is well on the road towards becoming united and speaking and acting as one". Referring to the unity discussions now going on between the AFL and CIO in the United States, Mr. Valente said, "I for one, certainly hope that final and complete peace between these two organizations will become a reality". However, Mr. Valente was not convinced of the sincerity of the CIO . . . "particularly . . . in the textile field where the CIO Textile Union's raiding activities have been vicious and are still going on . . ." This "tragic disunity of the American labour movement . . . is particularly tragic today in view of the international perils which beset our country and our movement". To achieve this unity, Mr. Valente suggested that "the dual union organizations themselves must wish it and work for it and must exhibit good faith, goodwill and honourable fulfilment of agreements made".

In agreeing with the Convention's action to bar Communists and fellow travellers,

"... I am happy to present you with the 50th Anniversary copy of the Department's *Labour Gazette*. . . I think it is most appropriate that history is repeating itself. . . ."

The Hon. Milton Gregg, Minister of Labour, to Percy R. Bengough, President of the Trades and Labour Congress.

Mr. Valente sounded a warning against "branding those whom we dislike or disagree with as Communists". Mr. Valente illustrated his stand with a statement he had made at the Textile Workers' Convention. This statement which has now become the policy of the UTW states:

I hold no brief for Communism or any other isms whatever their disguise, nor have I any use for any crackpot who parrots the party line of Communist Russia. However, I am not going to accept the phony issue of Communist name-calling as a license to raid and destroy our Union.

Closing his speech, Mr. Valente re-expressed his full accord with the TLC Korean Resolution, which has exactly the same meaning and intent as the policy of the AFL and the Textile Workers. However, he said that while he agreed with the Convention's action in barring Communists, he could not agree with the method used of releasing the names of barred delegates prior to the Convention opening. He feared that it would work against his organization in their fight with a rival union over jurisdiction at the Dominion Textile Company in Montreal. Mr. Valente said that had the evidence been presented to him, these people would not have received credentials to represent his union, and that he would personally guarantee that any communists on the payroll of his union would be dropped.

Thanking Mr. Valente for his address, President Bengough said that he regretted the prior publication of the names of the barred delegates, which had resulted from a "leakage". He issued a statement expressing "the cordial and fraternal feelings of this 65th Annual Convention of the Trades and Labour Congress of Canada for the textile workers in Canada and especially for those in the Province of Quebec". The statement said in part:—

On behalf of all of the affiliated membership of the Trades and Labour Congress of Canada I urge the employees of the Dominion Textile Company to retain Local 102, United Textile Workers of America, as their union and bargaining agent regardless of any lack of confidence that may now exist in the present Canadian leadership of the union.

The Executive Council of the Trades and Labour Congress of Canada has implicit faith in the sincerity and ability of the President of the United Textile Workers of America, Anthony Valente, and the Executive Board of the International Union.

President Valente . . . has assured the Executive Council of the Congress that the policy of his union is in exact accord with the policy of this Congress.

The Trades and Labour Congress of Canada urges the workers in the Dominion Textile Company not to allow this coming

vote to deteriorate into merely a fight over certain personalities. The United Textile Workers of America is a sound and effective union capable of bringing to the workers in textile plants in Canada the utmost in economic and social benefits.

Sir Luke Fawcett extended fraternal greetings from the Trades Union Congress to the delegates. He spoke of the ties existing between British and Canadian workers and described himself ". . . as the ambassador to you of the fraternity and goodwill of the workers of Britain."

Sir Luke, in describing the progress of the Labour Movement in Britain, told the delegates "We, working folk, have much to learn from each other. The more we exchange ideas and experience borne of our endeavour the better. Knowledge, confidence and inspiration will be obtained for our forward march." He also said:—

I am firmly of the opinion that in Britain we have the best organized, closest knit, most experienced and conscious voluntary Labour Movement in the world.

Trade Unionism, Co-operation and Political Labour are more united there than in any other country. Constituting the ranks of this immense Movement is an enlightened, trained and disciplined democracy with keen grasp of affairs, deeply aware of its aims and ideals, and moving steadily, persistently onward to their achievement.

Describing the employment situation in Britain, the speaker said that there has been full employment since the end of the war and that "to maintain (this) full employment considerable strides have been made towards establishing a planned economy. The great mining, gas, electricity and transport industries have been nationalized."

Sir Luke paid tribute to the "industrial and economic progress made by Canada during recent years", and lauded Canada as 'the linchpin' of the English speaking world".

Closing his remarks, Sir Luke told the convention:

In the eternal struggle between good and evil the scales are not evenly balanced. It is necessary to be ever vigilant in mobilizing the forces that make for good. It is easier to destroy than construct. It seems at times that the powers of destruction are stronger than the powers of construction. Yet it is not so. The overwhelming millions of humanity are on the side of good, of peace, of construction, of freedom, of progress. We know. We represent those whose lot is patient labour throughout the years—the home makers, the tillers of the soil and gatherers in of harvests, the builders, the producers of all kinds of wealth. And they are marshalled on the side of life, and pressing for a kindlier, richer, joyous, more abounding life.

Other Speakers

Also addressing the Convention during its sessions were Mr. C. W. Jenks, of the International Labour Office in Geneva, who extended greetings on behalf of that organization; and Mr. H. W. Manning, Chairman of the Manitoba Flood Relief Fund.

Greetings from ICFTU

President Bengough read a message of greeting to the Convention from Mr. J. H. Oldenbroek, General Secretary of the International Confederation of Free Trade Unions. Mr. Oldenbroek expressed his regret at being unable to attend the Convention.

Slanted Trade Policies Rejected

A series of resolutions on foreign trade, similar to those rejected by the 1949 convention at Calgary, was presented to the Convention. The Resolutions Committee charged that these resolutions had all come from a "central source" and were designed to "unjustly poison the minds of the delegates".

The Resolutions Committee presented a substitute statement on foreign trade to replace the resolutions presented by the following unions: Fort William Trades and Labour Council and Port Arthur Trades and Labour Council; Winnipeg Local 712, International Brotherhood of Firemen and Oilers; Toronto Local 168, Cafeteria and Restaurant Employees; Toronto Local No. 7, Chefs, Cooks and Pastry Cooks; Port Arthur Local 2786 and Sudbury Local 2537, Lumber and Sawmill Workers, United Brotherhood of Carpenters and Joiners of America; and the B.C. United Fishermen and Allied Workers' Union.

The Committee's own resolution was as follows:—

Foreign Trade

Your Committee notes that Resolutions 30 to 35 dealing with Foreign Trade are similar to those on this subject submitted to the Convention last year in Calgary at which time the convention approved of a recommendation of non-concurrence on the basis that the resolutions were inspired by a "central source" and intended to "unjustly poison the minds of the delegates". The Resolutions presented here assume that our foreign trade, the amount of it, and the countries with which it is maintained, is controlled by the United States and restricted by our dislike of the political and social complexion of the governments of certain countries.

During the past year Canada did business with over seventy countries in addition to the United States, Great Britain and more than thirty countries of the

Commonwealth. Expansion of foreign trade with these and other countries is the continuing policy of our country.

No one will deny that our policy must continue to be one of expanding external trade. Our exports and imports are a large and valuable part of the total business of the country. A continuing high level of employment could not be maintained without a large volume of external trade.

Many adjustments in trading relationships were made necessary by the destruction of Europe. We made those adjustments in our sincere desire to assist and rebuild the devastated areas of the world, and to aid and encourage their peoples to maintain and cherish their freedom and democracy. Those adjustments were made through international agreements into which Canada entered willingly and freely.

Our trading relationships are not based fundamentally upon political considerations. One fact, however, we cannot forget. It takes at least two to make a bargain. There are international boundaries across which neither our goods nor our citizens may move freely. The blame for those restrictions does not belong to Canada.

The government of Soviet Russia is trying to increase the number of countries behind those restricted frontiers in an attempt to further reduce the scope and amount of international trade. No other government including Canada's is pursuing such a trade policy.

Present considerations of national defence, along with our commitments to the United Nations and under the North Atlantic Security Pact will have a significant bearing upon our future trade policies. Arrangements now being worked out for closer trade relations and collaboration with countries of Southeast Asia will further influence the direction and development of our external trade. Within the various frameworks of these and other international projects there is plenty of room for the expansion of our foreign trade. There is also room for as many countries as are prepared to co-operate and collaborate freely. It is not we who are closing the doors to trade. We cannot, however, force other countries against their will to enter into reasonable trading relations with ourselves.

The government of Soviet Russia and the governments of its satellites have been asked many times to enter into mutually acceptable trade agreements. The way is still open. It is for them to determine whether international trade shall expand or whether they will pursue their present course.

For these reasons we believe that these resolutions should not be concurred in and we therefore recommend non-concurrence in all of the above resolutions.

The introduction of this resolution caused an immediate reaction from some members on the Convention floor.*

Delegate Stevens of the B.C. Fishermen and Allied Workers' Union opposed the substitute statement and charged that the U.S. State Department was setting policy for the Convention and for Canada. A. L. Gordon also of the B.C. Fishermen's Union

charged that the statement was a "big lie", and that the U.S. State Department was directing the convention.

Speaking on behalf of the substitute resolution, Delegate Bernard Shane attacked the Communist attempt to undermine the good relations existing between Canada and the United States. He urged support of the resolution and said that labour should be opposed to shipping anything to Russia or the satellite countries which could be used against us in a war.

Mr. Shane was supported in his stand by several delegates who praised the action of the Committee in recognizing the nature of the trade-resolutions.

The Committee's substitute resolution was overwhelmingly adopted on a voice vote.

Foreign Relations and International Affairs

A group of resolutions on "peace and the atom bomb" was rejected by the delegates following an Executive recommendation of non-concurrence. Despite protests by a small, but vocal left-wing element on the floor, the following statement on foreign relations was adopted as TLC policy on foreign affairs:—

The Executive Council of the Trades and Labour Congress of Canada, having in mind the immediate threat to the peace of the world and to the free and democratic nations contained in the armed attack by the armies of North Korea against the people of South Korea, issued a statement on August 10, urging the full support of all trade unions and their membership for the actions taken by the Security Council of the United Nations to block this act of armed aggression. In making this appeal to all of our affiliated membership, your Executive Council also warned against the insincere efforts of Communists and communist sympathizers seeking to weaken our own defences and solidarity against the spread of Communism and the imperialist aims of world domination and enslavement by the dictatorship of Soviet Russia. We called attention to these insincere efforts that were being put forth whereby our affiliated membership was being asked to sign the Stockholm Peace Petition and to approve resolutions calling for the banning of the A-Bomb.

This statement issued by the Executive Council now takes the form of a Recommendation of the Executive Council, in which form it may receive the approval of the delegates assembled in Convention, and so become the immediate and continuing policy of the Trades and Labour Congress of Canada on Foreign Policy.

The Trades and Labour Congress of Canada calls for full support of the decisions and actions of the Security Council of the United Nations in its attempt to meet the armed attack of the North Korean armies upon South Korea and

re-establish peace and democratic government in Korea. We are pleased to see that free trade unionists throughout the world have taken the same position, and that the free nations of the world have thrown in their lot with the United Nations in the maintenance of international law and order.

Our members fervently desire peace throughout the entire world. Only in peace can working people increase their standard of living, improve their homes, eat more and better food, advance their education, and enjoy more leisure. These and not war are our objectives.

Recognizing this, there are, unfortunately, some who have attached themselves to our trade unions, who today are attempting to pose as the only friends of peace and as such as the only qualified leaders of the organized workers of our country. But, however incredible it may seem, it is these very people who are in favour of the armed attack upon South Korea.

This duplicity—this campaign in favour of peace on the one hand and armed aggression on the other—must be exposed. The people who are promoting this campaign should be recognized for what they are.

The activities of Communists and communist sympathizers in our unions have never been sincere efforts to improve the position of working people. They have been designed in the past solely to further the interests of the Communist Party. Today these willing dupes are sowing confusion in our unions to assist only the Stalinist dictatorship of Soviet Russia which has for its objective the domination and enslavement of the entire world.

Review for a moment what has happened since Soviet Russia was our ally in World War II. Stalin took advantage of the defeat of Germany and Japan to impose his soviet system, assisted in all cases by armed force, upon Poland, Rumania, Bulgaria and Eastern Germany, in Europe, and upon Manchuria, North Korea and China, in Asia. To this list must be added, of course, Czechoslovakia whose enslavement by Stalin despite its remarkably advanced social and economic conditions and strong trade union movement came as a terrible shock to the whole free world.

Korea for many years was under Japanese control. Stalin agreed at Yalta to a partition of the country for the purpose of handling prisoners of war. It was intended that under the United Nations the country would be unified with its own democratic government, freely elected by the people. But Stalin set up his own puppet government in North Korea and refused to allow the United Nations to hold free elections there in 1947. These elections were held in South Korea and a coalition government recognized by the United Nations was established at the end of 1948.

Having resisted all efforts of the United Nations to re-unite Korea under stable democratic government, the armies of Stalin's puppet government of North Korea invaded South Korea on June 25. The Security Council of the United Nations took action by resolution the same day to counter this armed attack.

The International Confederation of Free Trade Unions immediately stated its sup-

port of the Security Council in these words: "We welcome the firm stand which has been taken by the United Nations Security Council for countering this act of aggression and for the restoration of peace in Korea." The ICFTU also said: "This is clearly the latest move in a systematic plan for enlarging, by armed force if necessary, the totalitarian sphere of influence."

Communists and persons of like minds in our own country are asking our members and others to sign the phoney Stockholm Peace Pledge and to pass "ban the A-Bomb" resolutions, hoping to keep us disarmed and leave Soviet Russia free to move in on any country whenever it suits their purpose.

It is doubtful if any of the people in our unions who support Soviet Russia are really aware of what they are favouring. The masters of Moscow today are not the people who overthrew the Czar in 1917. The dictatorship is not the dictatorship of the proletariat. It is not any longer the government of the Communist Party. It is simply the dictatorship of Joe Stalin. Everything in Soviet Russia and its controlled satellites is under the control of this one man and the few who are closely associated with him in the Kremlin.

But it is not the confusion and stupidity of these dupes of Stalin that we should concern ourselves with. Our job is not to be confused by their insincere and destructive tactics. Our job is to preserve peace and our own way of life, which we have proven to be far better than anything else so far suggested or attempted.

Dictatorship wherever it exists is the foe of trade unions. Dictators, whether they are fascist or communist, are intent upon world domination. They know no goal but unlimited power. They know no method of accomplishing this end but armed force and enslavement of conquered peoples.

We as unionists know the value of peace, of freedom, and of democracy. We also know that there are times when these things have to be fought for. There can no longer be any doubt that that time has come around again.

Thus, in the firm conviction that the steps taken by our own country, Britain, the United States and other members of the United Nations are designed to restore peace in Korea and uphold the dignity and authority of international law in the settlement of disputes between the countries of the world, we call upon all of our affiliated membership to give these measures their unqualified support.

Three resolutions dealing with International Conventions were also adopted by the delegates. These measures asked the Federal Government:—

1. To adopt the International Convention for the Protection of Civilians in Time of War;
2. To support adoption of an International Convention to protect legal rights of refugees;
3. To "accede to the Convention on the Declaration of Death of Missing Persons."

Amendments to Constitution

Several constitutional amendments, proposed by the Committee on Constitution and Law were accepted by the Convention, but an important proposed amendment to Section 2 Article IV, designed to provide for a system of bloc voting at Conventions was defeated after lengthy discussion by the delegates.

The Executive Council of the Congress was "empowered to take the necessary measures" to ensure that Communists and those adhering to Communist principles were not allowed representation in the TLC. A paragraph, taken from the constitution of the American Federation of Labour was added to Section 5 of Article V, providing that:—

"No organization officered or controlled by communists or members of the Labour Progressive Party, or any person espousing Communism or advocating the violent overthrow of our institutions shall be allowed representation or recognition in this Congress or any organization chartered by it."

Section 6 of Article V was also amended to read:—

"Neither shall any person be eligible as a delegate who is a member of the Communist Party or the Labour Progressive or any other named subversive organization, or who holds membership in or allegiance to any other body, local, national or international, hostile or dual to the Congress or its affiliated organizations, nor any organization or individual advocating the overthrow of our democratic form of Government by force or known to participate in and advance the aims and policies of Communism."

When asked by a delegate on the floor, what evidence would be necessary to prove that a person was a Communist under the provisions of the amendment, Delegate Marcel Francq, Chairman of the Committee replied that "in the case of a Communist, we will give him the same opportunity of defending himself that he would be given in Russia—he will be guilty until he can prove to our satisfaction that he is innocent."

One of the most contentious issues to come before the Convention was the Committee's proposed amendment which would have provided for a system of bloc voting at future conventions. The proposal was voted down by the delegates after heated discussion. The chief opposition came from local union representatives who were afraid that it would take away from the

locals the opportunity of having changes made in the constitution. R. K. Gervin, of the Vancouver, New Westminster and District Trades and Labour Council, represented the views of many of the local union representatives when he drew attention to the opening paragraph of the amendment which read: "Questions may be decided by a division or show of hands. One tenth of the delegates present may demand a roll call vote." He felt that the effect of this would be to work against the small unions.

President Percy R. Bengough, speaking in favour of the amendment said that it was designed to alter the situation presently existing, whereby a 15 member union has the same vote as one with 2,000. He also pointed out that the AFL, TUC and ICFTU had voting systems similar to this, whereby each constituent organization voted on the basis of the per capita tax paid.

Among those opposing the proposed amendment were Bruce Docherty, of the Hamilton and District Trades and Labour Council, A. W. Godfrey, of the Fort William Trades and Labour Council, and W. M. Black of the Joint Council of Public Employees (B.C. Division) and Vancouver Hospital Employees' Federal Union No. 180.

A standing vote was called for, and the proposed amendment was defeated.

The Committee's recommendation of non-concurrence for several proposed amendments was accepted by the convention after some discussion. Several other minor constitutional amendments were accepted and passed by the membership, and the amended report of the committee was accepted.

Racial Discrimination and Genocide

The Congress adopted unanimously the report of the Standing Committee on Racial Discrimination, presented by Quebec Vice-President Claude Jodoin. The report surveyed the Canadian situation on discrimination since the last report presented to the 64th Convention at Calgary. The report said:—

Developments during the 12 months since we met in convention in Calgary have been such as to encourage those who seek better human understanding and closer relations between all ethnic, national and religious groups. In this same period, of course, there have been unfortunate instances of active discrimination against certain members of minority groups. We refer in particular to the referendum held in the city of Dresden, Ont., curtailing

the rights of Negroes in that locality and to the outbreak of violence in Shawinigan Falls against the members of the Christian Brethren and in LaSarre, Que., against a group of Baptist evangelists. The sufferings these outbreaks have caused to the victims cannot be ignored and should never be minimized. But it should be stressed that the stronger and more noticeable trend in recent months has been away from such displays of prejudice and towards greater understanding of all minorities.

In line with our educational activities, several new legislative measures against discrimination have been enacted in Canada this year. These new laws are not only the result of educational work by our own labour organizations but, being in force, they are now a part of that educational activity.

The report expressed concern "with the practice of discrimination in employment against many working men and women because of their race, religion or national origin." The report noted that during the year, the TLC, through the Committee had "encouraged and lent . . . support to all movements for the introduction of fair employment practices laws." However, although the movement had progressed in Ontario, and efforts towards such legislation are being made in Manitoba and British Columbia, Saskatchewan is still the only province which has legislation prohibiting such discrimination "through (a) provincial Bill of Rights."

On the Committee's recommendation, four resolutions were adopted calling for:

1. Ratification by Canada of the UN convention on "the prevention and punishment of the crime of genocide;"
2. The enactment by all provinces of fair employment practices legislation;
3. Legislation banning restrictive real estate covenants;
4. Continued action by the Executive Council "to continue these efforts—to develop better human understanding between all groups within our country."

"As an interim measure, (the report also recommended), that a Declaration of Human Rights be adopted by the Parliament of Canada . . ." Such a declaration "would state that every one in Canada has duties to our community and is subject to such limitations as are determined by law, for the purpose of securing due recognition and respect for the rights and freedoms of others and of meeting the just requirements of morality, public order and of the general welfare and good government of Canada."

Credentials Committee

Delegate A. F. MacArthur, Secretary of the Credentials Committee in his final statement reported that a total of 679 duly accredited delegates, representing 414 organizations had been seated at the Convention.

The cases of seven persons, refused admission earlier in the convention had been reviewed, and the Committee felt that there was sufficient evidence to warrant their exclusion from the meetings. The list of names read by Mr. MacArthur included:

R. F. Wright, Local 161, Hotel and Restaurant Employees, Toronto; Mrs. Helen Weir, Local 168, Hotel and Restaurant Employees, Toronto; J. Phillips, Local 28, Civic Workers, Vancouver; D. Guise, Local 24, Civic Workers, Vancouver; A. Gauld, Local 144, Plumbers', Toronto; Sam Lapedes, Local 253, Garment Workers, Toronto.

The case of Bruce Magnuson, president of Sudbury Local 2537, of the United

Brotherhood of Carpenters and Joiners of America had been reviewed, and the ban against him confirmed. In its report, the Committee said that Mr. Magnuson had denied Communist affiliation, and membership in the Labour Progressive Party, but that it was the Committee's opinion that "he has shown adherence to the Communist Party line."

The action of the committee was opposed by several delegates who charged that the Congress was attempting to tell the locals who they could send to conventions. Delegate A. L. Gordon, charged that the action was "dictatorial in the extreme", and an "aberration of democracy". Delegate James Beattie charged that the convention was not free, and that "the policy of the capitalist press has become the policy of this Congress".

Replying to these charges of high-handed action by the Executive Council, President Bengough said that TLC policy on Communism had been set by the 64th Convention in Calgary. He then read to the mem-

The re-elected Executive of the Trades and Labour Congress of Canada

Front row, left to right—Gordon Cushing, Secretary-Treasurer; President Percy R. Bengough, C.B.E., and William Jenoves, Ontario vice-president. Standing—Carl E. Berg, M.B.E., Prairie vice-president; James Whitebone, Maritime vice-president; Birt Showler, M.B.E., British Columbia vice-president; Claude Jodoin, Quebec vice-president.

bers the TLC policy on Communism as it appears in the constitution. This statement reads:—

Whereas the principles advocated by the proponents of the Communist Doctrines are inimical to our democratic ideals of freedom of assembly, of speech, of the press and of worship;

And whereas the Trades Union Movement as represented by The Trades and Labour Congress of Canada and the American Federation of Labour has been developed and brought to its present strength under democratic systems of Government;

And whereas our Trade Union Movement, as we understand it, is essentially democratic in its organization and administration;

And whereas a number of affiliated organizations have suffered through the activities of Communists who place their philosophies ahead of the welfare of organized Labour by the introduction of Communist doctrine to the exclusion of legitimate trade union activities, and have thereby discredited the Trade Union Movement in the eyes of the general public;

Therefore be it resolved,—That this 64th Convention of the Trades and Labour Congress of Canada condemns the Communist doctrines as detrimental to the best interests of the working class; severely censures the activities of Communists and fellow travellers and recommends to all affiliated organizations to remove them from any key positions or offices they may hold and to expel them from their ranks.

And be it further resolved,—That no known Communist shall be permitted to hold office in the Trades and Labour Congress of Canada, its Provincial Federations and Central Bodies, nor be permitted to sit on any Committee of the Convention.

The action of the Credentials Committee received almost unanimous approval from the delegates.

Social Security and Pensions

The Convention adopted a resolution on social security which urged:—

That we fully co-operate with the Federal Government in the immediate implementation of a Dominion-wide social security plan on a contributory basis for all citizens of Canada, regardless of income and that this plan shall include health, hospitalization, old age pensions, mothers' allowance, widows' allowance, and such other social measures which are necessary along with financial assistance to the municipalities in the construction of modern hospitals and that the following be included: Cash benefits to maintain income during illness; the integration of curative and preventive work and provision of the necessary technical personnel to guarantee to every person the maximum medical, surgical and dental benefits, labour representation on all hospital boards and that all persons shall have free choice of any professional services.

Seventeen resolutions on pensions before the Convention were consolidated into one which asked for amendments to the Old Age Pensions Act which would:

1. Reduce the pension age to 65 (60 for females), with pensions payable to all, without a means test, on a contributory basis. The only qualification being fifteen years' residence in Canada;

2. Eliminate deductions from pensions for other income;

3. Pay the same pension to blind and totally disabled over eighteen;

4. Discontinue the association of the Parent's Maintenance Act with the Pensions Act;

5. Discontinue placing of liens on homes of pensioners;

6. Increase pensions to \$65 per month;

7. Provide community homes and medical care, under federal supervision for the aged.

Several delegates spoke on the subject of old age pensions, and offered further suggestions to the Convention. Delegate Frank Armstrong of Winnipeg suggested that a cost-of-living index be placed against old age pensions, and that pensions be increased as the index increases.

Other delegates maintained that \$40 was entirely inadequate for older people to maintain a decent standard of living, and that the cost could not be considered in such an important matter. Delegate Nelson Cox expressed the Convention's viewpoint when he said "our duty is to provide money for old age pensions . . ." Delegate Blair of Victoria, urged each delegate to arouse their memberships to work for better social security legislation when they returned home.

Wages, Hours and Conditions of Employment

The Convention adopted a resolution which said that it would like to see enacted "legislation which will institute for all workers a maximum five day, forty hour week without reduction in take home pay." This resolution was unanimously carried.

A resolution, asking for "a national minimum wage of one dollar (\$1.00) per hour," was amended to read, "eighty-five cents per hour or such higher minimum as may be needed to purchase the normal requirements for the maintenance of the welfare of the people."

There was considerable opposition from some of the delegates to the eighty-five cents minimum. Many thought that such a proposal by labour would not help in recruiting new members to trade union ranks.

Other members, in supporting the amended resolution pointed out that only recently had the United States adopted a

minimum wage of seventy-five cents an hour. After considerable discussion, both pro and con, the resolution, as amended, was carried on a close vote.

Also adopted were resolutions favouring: time and one-half for overtime, double time for Sundays and holidays; check-off of Association dues for government employees; increased wages for postal employees; adoption of a fair wage policy; and the observance "on all projects undertaken by or on behalf of Dominion or Provincial Governments in any part of Canada of the terms of Fair Wage Acts."

Housing

Four resolutions on housing were amalgamated to represent the convention's attitude on this matter. The resolution declared that because of rental increases allowed by the Government, "the already lamentable housing crisis" had been added to. Therefore the Convention called upon "the Dominion Government to assume full responsibility for the financing of slum clearance and low rental dwellings and thus make possible the commencement of low rental housing projects in co-operation with the provinces and municipalities."

Two other resolutions asked for "protective legislation to safeguard . . . workers and veterans so that their homes will be protected . . . against a weakened financial condition in the event of a business recession;" and Government intervention to increase production . . . of all building materials."

Immigration

Four resolutions on immigration were incorporated into one which instructed the Executive Council "to reiterate its request for the establishment of an Immigration Commission on which there will be equal representation of Government, Labour and Management to advise on, negotiate and administer all matters concerning immigration."

A resolution protesting against the issuing of permits to American contractors operating in Canada asked "that before any such permits are issued the local unions in the locality must be consulted."

Public Works, Public Utilities and Employment

Twenty resolutions on public works, public utilities and employment were submitted to the Convention, and their major proposals were adopted by the delegates in three substitute resolutions.

Public Works

One resolution requested the Federal, Provincial and Municipal Governments to begin at once a public works program. Such a program to include:

1. Subsidized low rental homes;
2. Hospitals, schools and sanitoriums;
3. Completion of the Trans-Canada Highway;
4. Flood control and irrigation projects;
5. Several proposed canal and power projects.

The resolution also stated: "that pending such action all destitute persons not eligible for unemployment insurance be immediately provided with direct financial assistance at least equal to that provided by the Unemployment Insurance Act."

A second resolve asked that "the Government of Canada . . . stimulate improvement in industrial processes, to aid in the establishment of further industrial plants wherever these are warranted, and to encourage and finance technical and scientific development, especially in regard to connection with development of our iron and steel, oil and forest resources."

Unemployment

To counteract "the danger that unemployment on a widespread scale could become the beginning of a period of depression," the Convention recommended a four-point program. These proposals called for public works programs by all governments; organization of work by employers to offset seasonal conditions; and assurance that Fair Wage Acts and other legislation would apply on all such programs.

Cost of Living and Price Control

The Convention adopted unanimously a substitute resolution, representative of several, calling for "a campaign to arouse public opinion, and continue to urge upon the Canadian Government the necessity of . . . legislation" embodying the following provisions:

1. re-institution of subsidies on basic food commodities and enforcement of a reduction in consumer prices;
2. re-imposition of the 100 per cent excess profits tax;
3. no further price changes on necessities of life and the establishment of a Price Control Board on which labour would be represented.

The delegates also passed a resolution urging all TLC affiliates "to include substantial wage increases in their demands as contracts come up for renewal."

Labour Code

The Convention, through a section of the Report on Legislative activities, commended the Executive Council for its efforts to have a National Labour Relations Act passed. The statement said:

Your Committee is in full agreement with the Executive Council for continuing to press for a National Labour Relations Act which would be in keeping with the beliefs of the Congress.

Your Committee makes this recommendation with the suggestion that the Executive Council keep on the alert for any indication of detrimental interpretation of the Act which will set precedent not in the best interest of its affiliated membership.

Your Committee would particularly urge the Executive Council to meet with the Minister of Labour regarding the interpretation being placed on the definition of "confidential employees" which bars a large number of our members from being included in a bargaining agency.

Your Committee is in accord with the statement that the Act is too limited in scope and your Committee believes that the Executive Council should continue to press for the extension of provisions of the Act whereby it would cover all employees of the Government, including those on the hourly rates, with municipal employees to be included as well.

Legislation

The Report of the Committee on Legislative Activities noted that "some of the legislative measures requested by the Congress have been incorporated as amendments to existing legislation," and that "it can be stated with confidence that the Government has considered some of the measures Labour has sought for years, which indicates the value of persistent plugging which has been done by the Trades and Labour Congress of Canada."

The Report concurred in several matters on legislation, including recommendations for abolishing appeals to the Privy Council; proposed amendments to the B.N.A. Act; the Congress stand for higher income tax exemptions for lower paid workers, removal of sales taxes and exemption of union dues from income taxes; prohibition of the use of injunctions; improved working conditions for Government employees; amendments to the National Housing Act, Combines Act, Supreme Court Act and Criminal Code; ratification by Parliament of the ILO Convention No. 88 on free employment services; payment of supplementary benefits and extended coverage of the Act; and the extension of federal rent controls until March 31, 1951.

Workmen's Compensation

The delegates' views on workmen's compensation were contained in a resolution which asked the Executive:—

to petition the Federal Government for enactment of a Compensation Act, to cover all workers regardless of trade or other restrictions, which will guarantee full earnings and no waiting period for the needy, the act to also include:

1. Blanket coverage of all occupational disease or diseases attributable to the nature of employment regardless of the disease or the occupation of the worker;
2. Payment based on wages of the highest prevailing period between time of accident and final settlement agreeable to recipient or employee;
3. The process of investigation and payment to recipients being speeded up;

And be it further resolved,—That in the meantime the Trades and Labour Congress of Canada, through its provincial bodies, urge upon the respective provincial governments the necessity of amending the Workmen's Compensation Acts to cover these points.

Unemployment Insurance

Of twenty-two resolutions on the Unemployment Insurance Act, before the Convention, ten were passed. In several cases, the requests contained in one resolution were duplicated in one or more other resolves. The major proposals regarding the Act were:—

1. That benefits under the Act remain the same as at present;
2. That it be amended to cover all workers regardless of occupation;
3. Immediate payment of benefits;
4. A limit on the time in which Umpire's decisions can be handed down;
5. Amendment of the Act so that an "insurable person, once having qualified with 180 days, shall not have to qualify further until all benefits have been received to which the insurable person is entitled;"
6. Replacement of the Umpire by a panel of three representing labour, employers and the judiciary;
7. Payment of benefits for holidays and Sundays;
8. Clearer definition of the phrase "suitable employment."

Joint Union Action

On the important matter of joint union action, TLC policy was established by the Convention in a statement which commended "the Executive for issuing several joint statements in the interest of the Trade Union Movement during the past year and

especially during the Railway Strike, and we believe that approval and endorsement by this Convention will inspire them to similar joint action in the future."

Other Recommendations

Among the recommendations contained in other resolutions were:—

The establishment of an international authority to take action to prevent floods in Manitoba, British Columbia and other parts of Canada;

The setting up by the TLC of a Union Label Department in Canada;

The assumption by the Federal Government of "a greater portion of the cost of education by means of grants to provinces to be used exclusively for educational purposes;"

The establishment of a government subsidized national health scheme;

Enactment of a Canadian Bill of Rights.

Adoption of a more orderly, balanced and fixed calendar incorporating the 12 month equal quarters World Calendar.

Election of Officers

The election of officers resulted in acclamations for the re-election of President Percy R. Bengough; Secretary-Treasurer Gordon G. Cushing; William Jenoves, Ontario Vice-President; Carl Berg, Prairie Vice-President; and James Whitebone, Maritime Vice-President.

Contests were held for the other two Executive positions. Claude Jodoin defeated Ulysses Charleboix to retain the office of Quebec Vice-President, and Birt Showler defeated H. L. Hanson for re-election as British Columbia Vice-President.

CANADIAN CONGRESS OF LABOUR

For the occasion of the tenth anniversary Convention of the Canadian Congress of Labour, over 700 delegates, representing a reported membership of 350,000, met at the Civic Auditorium, Winnipeg, from September 25 to 29, 1950.

The Congress continued the strong action it has taken in previous years against Communism. It expelled the United Electrical Radio and Machine Workers of America, a union which some months previously had been suspended by the CCL Executive (L.G., Jan., 1950, p. 8). It adopted a constitutional amendment permitting its Executive to expel any union following Communist or Fascist principles and policies.

As a corollary to this action, the Congress adopted a Declaration of Positive Economic Philosophy, a statement setting forth social and economic objectives for the country as a counter-measure to Communism.

Apart from these matters, the subject which probably evoked the most vigorous discussion from the delegates was that of housing. The debate on this issue culminated in the adoption of a strongly-worded resolution calling for the institution of a low-cost housing program.

The Convention also devoted particular attention to the need for an old age security program and a national labour code. Another resolution called for higher wage rates to relieve suffering caused by the rising cost of living.

The Convention dealt with the question of labour unity in the light of the concerted action taken by Canadian labour bodies in the conduct of the recent railway strike. It proposed the establishment of a joint national council, as a medium through which the whole Canadian trade union movement could press in the future for common aims and objectives.

Continuing the interest it has displayed in recent years in international affairs, the Convention adopted a resolution giving its "unqualified support" to the action taken by the United Nations in Korea.

The Hon. Milton Gregg, recently appointed Minister of Labour, flew from Ottawa to make his first official appearance at a CCL Convention. Mr. Gregg addressed the delegates at the Convention banquet.

At the opening of the Convention, the delegates were welcomed to Winnipeg by Mayor Garnet Coulter, and by Leon Mitchell, President of the Winnipeg Labour Council.

Presidential Address of A. R. Mosher

President A. R. Mosher began his address to the delegates, on the opening morning of the Convention, with a reference to the founding of the Canadian Congress of Labour ten years earlier.

"Our first Convention, in 1940," he said, "was in the nature of an adventurous experiment. At that time, we brought together a group of purely Canadian unions

and a group of international unions, some of which were only beginning to be organized in the mass-production industries of Canada. If I may mention a few of the unions and personalities concerned, I should like to say how much the Congress owed in its formative years to the contribution of the United Mine Workers represented by Brothers Silby Barrett, Pat Conroy, and others, and the Amalgamated Clothing Workers of America, represented by Brother Sol Spivak. These international unions had been established in Canada for many years.

"The United Automobile Workers of America, represented by Brother George Burt and the United Steelworkers of America represented by Brother C. H. Millard, were just getting under way, and laying the foundations for the progress which has made them the two largest international unions in Canada. The contribution made toward the Congress by the purely Canadian unions was also of great importance, and I should like to refer to the very valuable service rendered by Brother M. M. Maclean, who was then National Secretary-Treasurer of the Canadian Brotherhood of Railway Employees and Other Transport Workers, and who, since he entered the Department of Labour as Director of Industrial Relations, in August, 1942, has done extremely good work in that position."

Political Action

Describing the wartime and post war endeavours of the Congress in regard to such matters as price control, housing, employment, health insurance, a national labour code, and labour representation on government bodies, he said:—

"It is obvious that neither the Federal nor the majority of the Provincial Governments pay any respect to the representations of labour, because they do not regard labour as a potential political threat. Our weakness in Parliament and the Legislatures makes it impossible for us to exert adequate pressure on governments, and to obtain legislation which would be of benefit not merely to the workers, but to the public as a whole.

"It is essential, therefore, that we undertake the task of organization in the political field with as much energy and determination as we have shown in organizing our unions for economic action. . . .

"The time has come," he continued, "when we should give this question much greater attention and personal effort than we have shown in the past. We have been lukewarm and lackadaisical in our attitude toward politics, voting when we did vote without conviction and without definite

objectives. We have preferred the movies to political meetings, and, as individual members of Congress unions, we have refused to contribute toward the support of a political party, which our Congress has endorsed, even the price of a couple of movie tickets."

Reviewing the endorsement by the Congress of the CCF Party as the "political arm of labour," he said that it was "quite evident" that "the rank and file of our movement have not yet become firmly convinced of the necessity of voting for candidates endorsed by the Congress, and thus obtaining adequate representation in Parliament and the provincial legislatures."

Need for Labour Organization and Unity

Mr. Mosher also called on the delegates to increase their efforts to organize unorganized workers as a means of building up labour's strength.

"If workers who have gained improvements in wages and working conditions through organization are not willing to accept the responsibility of spending time and money for organizing purposes," he warned, "the labour movement will become smaller and weaker instead of developing into a powerful agency for democratic progress."

Mr. Mosher pointed to the need for unity among the various trade union centres as a further means of strengthening labour's position.

"The Congress has endeavoured to promote co-operation with the Trades and Labour Congress of Canada," he said, "and some progress has been made in this respect. It must be evident that the division of labour into two large national groups and into another important group, the Canadian and Catholic Confederation of Labour in the Province of Quebec, is detrimental to the best interests of the workers and the nation. Both within the Congress, therefore, and in its external relations, it is important that we should strive for a spirit of unity and goodwill."

The President made it clear, however, that there were limits to this drive towards unification of the labour movement.

"Our desire for unity," he declared, "great as it may be, does not require us to retain within our ranks or to co-operate with admitted enemies of our country and traitors to our nation, who have given themselves over body and soul to the totalitarian philosophy of Communism. The great majority of our affiliated and chartered unions and of the membership of these unions have been strongly opposed to Communism from the outset, and at our

Winnipeg Civic Auditorium was the site of the 10th Annual CCL Convention. Above, top: representatives of local chartered unions. Centre: the Auditorium's floor and platform. Bottom: a group from the United Automobile Workers.

Congress Conventions we have unhesitatingly condemned Communism and its supporters, because it was evident that their loyalty was to Soviet Russia rather than to Canada, and to a ruthless and unprincipled totalitarianism rather than to the principles of freedom and democracy. I believe that we should refuse to permit any Communist-dominated union to remain in the Congress and undermine its efforts to build up a responsible and democratic labour movement.

"A well-known proverb tells us, 'It's an ill wind that blows nobody good,' and while everyone, except the Communists, must regret the invasion of South Korea by Communist forces from North Korea, the ridiculous defence of this action by Communists the world over has demonstrated more clearly than ever before that they are willing to follow the Communist party-line, no matter how absurd or illogical it may be.

"The war in Korea has also served to unite the democratic nations more strongly than ever, and to show that the United Nations can, when necessary, become a powerful force to defend its members against aggression. We may take some satisfaction in the readiness with which Canada has answered the call of the United Nations, and I am sure that, as Canadian citizens, we wish our country to do everything possible, in co-operation with the other nations, to oppose Soviet imperialism wherever it may be found."

Desire for National Labour Legislation

Reiterating the desire of the Congress for the adoption of labour legislation on a national rather than a provincial basis, Mr. Mosher expressed the view that there would be "no difficulty whatever" in making any necessary constitutional amendments.

However, he asserted, "the fact is that there is a marked disinclination by the responsible authorities to attempt to introduce federal legislation or to take the necessary steps to obtain power to do so. The result is senseless lack of uniformity which understandably bewilders workers and unions, and adds nothing to the effective administration of labour legislation.

"Certain industries," Mr. Mosher continued, "have become so basic to the economy of the nation that it is ludicrous to continue any longer the present motley pattern of legislation on a sectionalized basis." In particular Mr. Mosher felt that the steel and packinghouse industries should be governed by national legislation.

The CCL President criticized the lack of uniformity in provincial legislation concern-

ing the check-off, and said it was "deplorable" that federal legislation did not make provision for it.

He characterized as "one of the most disturbing features in the administration of labour legislation in the last year" the action of the Labour Relations Board of British Columbia in "taking upon itself" the right to determine whether or not a particular trade union should have the authority, under its constitution, to organize employees in certain industries.

Mr. Mosher declared that "it is no part of the function of the Labour Relations Board to define the jurisdiction of trade unions. It is up to the employees to decide in which union they will belong. If there should appear to be any conflict as to which union enjoys the confidence of a unit of employees, the issue can, and should, in so far as the Labour Relations Board is concerned, be resolved through the ballot-box. In effect, the Board is substituting its opinion for that of the employees, and to the extent that it is doing this it represents an irresponsible usurpation of the right of the employees to decide which union will represent them."

Conciliation Board Procedure

Mr. Mosher urged the need for overhauling the present conciliation procedure used to deal with industrial disputes.

"At the present time," he said, "all labour legislation provides that, in the event of an industrial dispute, the matters at issue between the parties may be referred to a Conciliation Board which reports its recommendation to the appropriate Minister of Labour. Undoubtedly, some more effective machinery must be found for the purpose of reconciling differences between employers and workers. Reports issued by certain Conciliation Boards in recent months in industrial disputes which are of vital importance to the public have shown an almost reckless disregard for factual accuracy, and have had consequences which have defeated the very purpose for which Conciliation Boards are established. Some recent Board reports have actually resulted in a worsening of labour-management relations. In some cases, decisions are made on considerations of expediency rather than of sound principles.

"It may be that the answer lies partly in developing panels of trained and experienced men and women, representing the points of view of labour, management, and the general public, to serve on Conciliation Boards. This might lead to greater consistency and stability. The Congress is giving the problem of Conciliation Boards careful consideration, and we hope soon to

be able to offer suggestions to the legislative authorities so that their work may become more effective and useful. This would be in the interests of all parties concerned, including the public."

Objectives of Labour

Mr. Mosher went on to stress the need for "a sound and adequate program of social security for the Canadian people."

Specifically he called for old age pensions providing a "decent standard of living" without a means test, higher unemployment insurance benefits and "fewer restrictions on the right to get them," a national health insurance scheme, and disability benefits to cover loss of earning power through illness or accident. "And basic to all of this, labour wants the Government to make full employment a permanent feature of our economy."

Mr. Mosher added that "Canadian workers do not expect to get anything for nothing. . . . Just as they pay their full share toward their own unemployment insurance benefits, and, through taxation, for what little other social security legislation there is, so they are prepared to pay their just share of any additional measures that may be introduced," he declared.

He insisted that "social security will not bankrupt Canada," but rather "will strengthen it. . . . It will, in the words of Lord Beveridge, 'free us once and for all of the scandal of physical want for which there is no economic or moral justification.'"

Mr. Mosher directed special attention to the work of the Congress in the fields of research, education and public relations, where, he said, the Congress had made a great contribution toward the progress of the Canadian labour movement.

In concluding his address he told his audience that the labour movement, although "a human institution and therefore fallible in its judgment and its conduct" was "nevertheless one of the great constructive elements in the modern industrial world. We may, I think, take proper pride in being associated with the labour movement and with the Canadian Congress of Labour. Its success represents the collective efforts of its membership from coast to coast, and there is no reason why it should not continue to be a powerful factor in the fight for freedom, security, and the utmost human well-being. Let us on this tenth anniversary rededicate ourselves to the task of carrying out the program of the Congress in raising our standards of living, and making life richer and more abundant for the people of Canada and of the world."

Expulsion of the United Electrical Workers

On the afternoon of the first day of the Convention, the delegates dealt with an appeal from the United Electrical, Radio and Machine Workers of America, District Five, against its suspension by the CCL Executive in December, 1949.

The suspension of the UE was described as follows in the printed Report of the Executive Council, which had been distributed to the delegates:—

In December, 1949, the Executive Council, by a mail vote, as provided by Article 6, Section 10, of the Congress Constitution, decided to suspend the affiliation of the United Electrical, Radio and Machine Workers, with effect from December 1, 1949, on account of being in arrears of per capita tax for a period of three months. This action was taken in accordance with Article 3, Section 9 of the Congress Constitution.

The appeal, a 34-page mimeographed document, was also distributed to the delegates, and was read by George T. Aldridge, President of UE Local 521.

It charged that the matter of alleged arrears of per capita tax had "little if anything" to do with the "real reasons" for the suspension of the UE.

These reasons, the appeal continued, "lie in the position taken by this union on questions of policy at previous CCL conventions, and meetings of the Executive Council. On some fundamental policy questions, particularly the deficiencies of Congress leadership in promoting a unified fight for our wage needs and the political action position of the Congress, the UE with other CCL unions found itself in sharp disagreement with the Congress officers and we carried forward a consistent fight within the Congress in support of our point of view."

The appeal, went on to say that the Congress officers needed an excuse for suspending the UE "because they wished to apply in Canada the action of the CIO Convention which expelled UE from CIO in the United States. They wished to make room for the new paper organization which CIO handed to James B. Carey . . . the International Union of Electrical, Radio and Machine Workers (IUE).

"They, the Congress officers, desired to clothe this paper organization with Congress affiliation so that it could proceed apace with its main purpose . . . disorganizing the organized workers in the electrical and machine industry through disruption and raiding. Affiliation of IUE was designed to legitimize the illegitimate, employer-encouraged practice of raiding.

"To accomplish this purpose the Congress officers had to get rid of UE," the appeal continued. It then went on to charge that the Executive had given a false interpretation of the Congress Constitution governing per capita payments. Admitting that "inadvertently" per capita cheques for two months had not been forwarded to the CCL, the appeal said that these were subsequently remitted before the date when the UE became constitutionally subject to suspension.

Having presented these arguments in its first few pages, the appeal then went on to attack the CCL and various of its officers and affiliates for "red-baiting," "raiding," "splitting the labour movement," "stifling criticism," "accepting political domination," etc.

It proceeded to set forth the policies supported by the UE in regard to wages and the "speed-up." It attacked the Marshall Plan. It asserted that "powerful forces in the American Government" were determined that "there will be, in fact must be war." It charged that, "using the war program of the Government as a shield, big business has launched a many-sided offensive against the people." It criticized the acceptance by labour leaders of the Government's "strike-breaking" legislation in the recent railway strike.

Following all this, the document closed with an appeal for unity of the working classes.

Secretary-Treasurer Pat Conroy spoke in reply to the appeal of the United Electrical Workers.

Dealing with the failure of the UE to pay its per capita tax, he said that this was not due to carelessness or accident. For two years it had been an open question among Communist Party strategists as to whether to set up a new central labour body composed of Communist-dominated unions. This was the reason the dues had been withheld. The same situation had applied in the United States, where the UE had withdrawn its affiliation from the CIO just prior to the November, 1949, Convention, rather than face the issue of non-payment of dues.

Mr. Conroy scoffed at the union as "wearing a halo of virtue round its head while all other unions are black with sin," and pretending that only one organization—the UE—could rescue the Congress.

Pointing to the benefits that had been won for Canadian workers by the leaders criticized by the UE, Mr. Conroy said it was not they but the UE that had "sold the workers down the river." He characterized a recent settlement reached by the UE with Canadian General Electric as

"about the worst contract negotiated in Canada in the last twelve months." Meanwhile, he said, the IUE, the "so-called paper organization," had reached much better settlements at different plants of the same firm.

The UE had criticized the Congress for its political affiliation, but "the brief does not tell you that every staff officer in the UE is a prisoner, slave and complete vassal of the Communist Party in the United States and Canada."

He said there was a hearty welcome for the rank and file of UE members in the ranks of the Congress-supported IUE, but he called on the delegates to dismiss the appeal and to tell UE leaders there was no room for them in the Canadian labour movement.

President Mosher ruled that in accordance with previously established Congress procedure an appeal against a suspension was not debatable. He therefore did not permit further discussion. Congress Vice-President C. H. Millard then moved that the Convention reject the appeal of the UE, and expel it unconditionally from the Congress.

A point of order was raised from the floor that this, as a new motion, should be debatable. Amidst considerable shouting from some parts of the hall, the chairman ruled that the point was not well taken, since the question was still on an appeal. The question, being put, was carried by an overwhelming majority; and the Convention proceeded to its next item of business.

The next morning, Mr. Mosher explained his ruling further. He said that Mr. Millard's motion had the same sense as the question on the appeal he had been about to put to the delegates. He had therefore allowed a vote to be taken on it in this form, but since it was still a question on an appeal he had not permitted a debate.

He referred to the time that had been spent at previous Conventions in debating issues on which a great majority of the delegates had made up their minds.

"I'm not trying to be a dictator," he said, "but the time has come when 95 per cent of the delegates at this Convention are not going to have their minds diverted by a small minority who want to kick up a racket."

Report of Executive Council

The Report of the Executive Council, read to the delegates by Pat Conroy, comprised a record of the past year's activities.

In addition to the suspension of the UE the Report dealt with: the transfer of

jurisdiction formerly held by the International Union of Mine, Mill and Smelter Workers to the United Steel Workers of America; the Congress submission to the Supreme Court of Canada in connection with rent control; establishment of a political action fund; presentation of the annual memorandum to the Government on March 31; public statement on control of atomic energy; Executive meeting of the International Confederation of Free Trade Unions; joint statement with the Trades and Labour Congress of Canada on the Korean situation; service to Congress affiliates; and statements issued jointly with other labour bodies supporting the railway unions and opposing compulsory arbitration of labour disputes.

Charters had been granted to 20 local unions during the year and to 3 labour councils. On August 1, 1950, the Congress comprised six provincial federations, 35 labour councils, 28 international and national unions, and 177 local chartered unions. The membership of the Congress was approximately 350,000. National and international unions affiliated with the Congress had a total of 963 locals.

Appended to the Report of the Executive were reports outlining the activities of the CCL Research and Publicity departments and of the Education and Political Action Committees.

Delegates were presented with a 24-page financial statement, showing the receipts and expenditures of the Congress, and the assets and liabilities at May 31, 1950.

Receipts for the 11-month period ending at that date totalled \$333,083.41, while expenditures were \$339,260.90.

Following their consideration by a Convention Committee, and debate on the Convention floor, the Officers' Reports were approved by the delegates.

During the course of the debate, J. E. McGuire, Secretary, Canadian Brotherhood of Railway Employees, made reference to the recent railway strike. Answering a delegate who had criticized the manner in which the railway strike was brought to an end, Mr. McGuire pointed out that a stage had been reached when Parliament "had to take some definite action." It was significant, he said, that all political parties had expressed opposition to compulsory arbitration "as a permanent feature." The legislation was not all the labour unions had hoped for, but it was a start in the right direction, and had broken down the resistance of railway management. He reminded the delegates that it had been the custom in the railway industry for 30 years to submit disputes to arbitration under the Boards of Adjustment procedures.

Racial Tolerance

In presenting the Report of the National Committee for Racial Tolerance to the Convention, Pat Conroy specially commended it to their attention.

The Report reviewed the efforts of the Congress to have legislation enacted to prevent discrimination on account of race, creed and colour, and to have a Bill of Rights incorporated in the Canadian Constitution.

The Report cited incidents such as a referendum at Dresden, Ont., infringing on the rights of Negroes, and outbreaks of violence against religious minorities in three Quebec towns, as proving the need "for more educational efforts on our part and for the enactment of necessary laws."

On the other hand the Report noted a pronounced trend during the year towards greater understanding of the rights of all racial and religious groups. A number of Ontario municipalities, including Toronto, passed by-laws rendering business licences void when the licensee discriminates against any customer on account of race, colour or creed. The Legislatures of Ontario and Manitoba prohibited the insertion of restrictive covenants in deeds or property leases. (Saskatchewan had previously passed such legislation.) Fair employment practices bills were introduced in the Ontario Legislature by members representing all political parties. The Senate Committee on Human Rights and Fundamental Freedoms recommended the drafting of a Bill of Rights, and, as an interim measure, the adoption by Parliament of a Declaration of Human Rights. The Report commended all these developments.

According to the Report, much of the work of the Committee during the past year was done in co-operation with local labour committees to combat racial intolerance, the CCL Committee on Education, and various affiliated unions. In particular the Report congratulated the United Automobile Workers for "its splendid work in promoting better race relations among its members." Pamphlets, radio broadcasts, films and conferences helped in furthering racial and religious tolerance across Canada.

The Report concluded with a statement that in the present critical times it was particularly important to "give to every Canadian, regardless of his race, religion or national origin, a sense of belonging to a great democratic family with a strong democratic tradition and heritage."

The Committee's chairman was R. J. Lamoureux, United Steelworkers of America, Montreal, and its membership included representatives of several other Congress affiliates.

Two resolutions adopted unanimously by the Convention expressed the view of the delegates in regard to the subjects covered in the Committee's Report.

The first commended the CCL Executive and the National Committee on Racial Tolerance for "the effective educational and legislative efforts to promote understanding between all groups of the Canadian population and to minimize and ultimately eliminate racial and religious discrimination."

The second reiterated requests made in previous years to both Federal and Provincial Governments to pass legislation requiring employers to "hire individuals and deal with them as employees, without discrimination as to race, colour, creed or birth-place."

A third resolution, which had not been dealt with at the time the Convention adjourned, re-endorsed the need of a Bill of Rights.

Declaration of Positive Economic Philosophy

On the second morning of the Convention the delegates took action of considerable significance when they adopted by a very large majority a "Declaration of Positive Economic Philosophy."

The Canadian Congress of Labour has in recent years repeatedly expressed its opposition to Communism. The "Declaration" is an attempt to go beyond this opposition and to formulate goals which the Canadian people and the labour movement might reach by democratic methods. It sets forth the need to fight Communism by positive methods—to "secure the material welfare of the people," and by doing so "provide them with a moral purpose" with which to arm themselves against Communism.

"Basically," the document states, "there are in the world today two great forces—one, the forces of dictatorship, represented chiefly by Communism, and the other, the forces of Democracy. These two forces are engaged in a life-and-death struggle. Communism is challenging the whole of the civilized world—its one aim is directed to securing domination of all nations.

"Regardless of the theories of Communism," the Declaration continues, "in practice it has become the greatest tyranny the world has ever known."

But, the Declaration goes on to show, in areas where "hundreds of millions" of people "have been exploited, degraded, reduced to a sub-human status," where, in short, capitalism has "failed miserably," Communism has succeeded in bringing its message.

"Is our world meeting this challenge?" the document asks. "The answer is not

In the main, the people are confused and leaderless on this issue. Narrow and selfish thinking, or 'Business as usual,' takes the place of basic and necessary policies. The evidence of this is everywhere. Our leading institutions—capital, industrial and financial—and for the most part, our daily newspapers, reflect this confusion. Whether they do not understand the nature of the challenge, or their economic interests prevent them from desiring to understand its nature, is a question for their conscience. They want to liquidate Communism, and yet to continue exploiting the mass of the people. In short, they want to have their cake and eat it too. It just cannot be done.

"In other fields of thinking, various cures are prescribed to meet the challenge. One school holds that military defence is sufficient. Another holds that if people stop sinning, Communism will wither away. Yet another believes that if enough attention is given to material things—a higher standard of living—military defence by our world is unnecessary, despite the mighty armaments and poisonous Fifth Columns of the Communist world.

"We believe that none of these prescribed cures is enough in itself. They must be made to fit together into a co-ordinated weapon of material, military and moral might, if the peoples of the world are to be sufficiently armed to meet the greatest menace of our time.

"The first prerequisite in fighting this dictatorial tyranny is a concentrated dedication to the material well-being of our own and all other people. We must nail on our masthead the slogan: 'For the needy instead of the greedy.'"

The Declaration then goes on to stress the need for raising living standards in backward countries as well as in Canada.

"In the moral field the life of the average man and woman has little or no meaning. If it has to have a meaning, if it must have a purpose in terms of human survival, satisfying the needs of the people in all of the fields mentioned must be the primary objective of our country and all other countries as well. . . .

"This is the fight that must be fought. Secure the material welfare of the people, and by doing so, provide them with a moral purpose to fight and live. Having once possessed such moral purpose, the people will arm themselves militarily and every other way to bring into being not merely a world that has conquered the brutal menace of Communism, but a world that is the rightful heritage of every man, woman and child."

Opening the debate on the adoption of the Declaration, Pat Conroy stressed the

need of giving the people strength to "stand up and fight for a life that's worth living" if the world is to belong to "dignity, decency and freedom."

Among the other speakers who supported the declaration were Elroy Robson, Canadian Brotherhood of Railway Employees, Reg. Gardiner, United Steelworkers, John Whitehouse, Textile Workers, Robert Livett, United Mine Workers, Louis Palermo, Amalgamated Clothing Workers, and Sam Baron, Textile Workers.

Mr. Whitehouse cited the loss of freedom by Czech trade unionists as a result of Communist action. Mr. Palermo said the Congress was taking a position that was "long overdue." Mr. Baron, after castigating the "Genghis Khan mentality" of the Communists in the Kremlin, described the Declaration as saying to the "economic Maginot Line of capitalist mentality" that unless social evils are remedied "Communism will succeed." He said the Congress was neither in the camp of Communism nor of capitalism, but that it stood for economic justice in the face of both systems.

Opposing the resolution were John Kurchack, United Automobile Workers, Toronto, Fred Jackson, International Longshoremen, New Westminster, and Robert Haddow, International Fur and Leather Workers. Mr. Kurchack charged that anti-Communists were also anti-labour, and objected to the support given to dictators in Spain and Asia. Mr. Jackson "rejected" that part of the Declaration which attacked Communism, but supported the rest of it. Mr. Haddow opposed the Declaration as "taking the labour movement into the camp of the war mongers."

Following a motion from the floor "that the question be now put," which was adopted by a large majority, the Declaration itself was overwhelmingly approved. Mr. Mosher then ruled out of order a delegate who still wanted to speak on the Declaration, stating that "ninety-five per cent of the delegates wanted the question put," and that he was "not going to let business be held up by the remaining five per cent."

Resolutions Committee

In accordance with custom, the first resolution put before the delegates by the Resolutions Committee (Chairman, Harry Chappell, CBRE) was that the Convention observe one minute's silence in tribute to members of the Allied Forces who died in World Wars I and II. To this resolution was added a reference to those who died in the Korean conflict.

After the delegates had performed this ceremony, Robert Livett, United Mine

Workers, moved that silence be observed for coal miners who had died in the British mine disaster the previous day; and this also was done.

Price and Wage Policy

The Convention then dealt with two resolutions setting forth Congress policy on wages and prices in the light of the Korean war.

The prices resolution was adopted as a substitute for a considerable number of resolutions which had been submitted in advance of the Convention by various Congress affiliates.

Approved unanimously, it was as follows:—

Whereas our country is now engaged in military conflict, and every indication points to vast expenditures for military equipment, which will entail increased taxes for the Canadian people; and

Whereas since the start of the Korean war, prices have risen alarmingly, with no apparent necessity, with business again taking advantage of war to increase profits. Correspondingly, the living standards of the Canadian people are declining, and unless prompt action is taken, many of our people will be living under increased hardships;

Be it therefore resolved that this Congress go on record as re-affirming its determination to do all possible to have the necessary Federal legislation put into effect which would roll back prices to the June 1, 1950 level, and maintain prices at which every Canadian worker will be assured of a healthy and decent standard of living.

The wages resolution also called attention to the Korean situation. Charging that "profiteers in Canada" had used the war as an excuse to raise prices, thus causing suffering to workers, it urged all affiliated unions of the Congress to "give consideration to the formulation of an effective wage policy designed to meet this increasing cost of living."

A reply to two delegates from the Fur and Leather Workers' union who called for a "revitalizing" of the Congress Wage Co-ordinating Committee, was given by George Burt, Regional Director, United Automobile Workers. He pointed to the difficulty of co-ordinating a wage drive, and suggested that it was up to the various locals to seek higher wages. "Brothers," he said, "the money is there—go after it!"

Housing and Rent Control

The Convention spent almost an entire morning in a debate on housing. It was apparent that many of those who spoke felt keenly on this subject; and numerous instances were cited of the difficulties in obtaining adequate accommodation and of the high cost of homes and rentals.

President Mosher, Secretary-Treasurer Conroy, and Vice-President Millard were among those who participated in the discussion.

The resolution which had been introduced by the Resolutions Committee was twice referred back before the delegates were satisfied that it was sufficiently strongly worded. It was finally adopted by a unanimous standing vote.

One delegate urged that "if we can get money for war we can get it to build homes for everyone." Another declared that houses at eight or nine thousand dollars were beyond the reach of the average working man.

Pat Conroy cited the need for housing as an inherent part of the Positive Economic Philosophy adopted by the Convention on the previous day. He said that the high price of homes was causing "mass frustration in the minds of thousands of families whose basic idea was to own their own homes." Homes were necessary to give these families a stake and investment in civilization. He called on the Government to tackle the situation as a mass problem to be handled on a mass basis.

Mr. Millard attacked the "propaganda" that high costs were mainly the result of the cost of labour or materials. He emphasized instead the high cost of financing homes. This was a "lucrative field" in which families were being "held in bondage for years to come." He stressed the need of providing a "positive answer" to both Communism and capitalism, and urged political action to obtain the desired results.

Mr. Mosher also stressed the relationship between housing and a "positive economic philosophy." There was no lack of land, material or competent help, he said, but rather of a will to see that houses were built.

Another delegate suggested direct action not only through the ballot box but through a nation-wide strike, and hastened to add: "I'm not a Communist."

As finally approved by the delegates, the housing resolution was as follows:—

Whereas The Canadian Congress of Labour has repeatedly stressed the need for an adequate national housing program, and has persistently and strongly criticized the Government for its inadequate housing plans, and has urged upon the Government that the resources of the country be so utilized as to enable a proper low-rental housing program to be started immediately which would provide construction of housing units at a rate which would reduce to a minimum the alarming number of Canadian families affected by this serious housing shortage:

Therefore be it resolved that inasmuch as no such program has yet been started,

and in the meantime the situation has deteriorated rather than improved, this Convention of the Canadian Congress of Labour again condemns the inactivity of the Government in this respect, and instructs the incoming Executive to continue and expand its efforts to have this essential program instituted; and

Be it further resolved that we also urge upon the Government that it immediately investigate, and, if necessary, act upon the alleged inequalities and discrimination in the pricing, distribution and allocation of essential building materials;

And be it further resolved, that we demand of the Government that they should promptly institute a program designed to provide adequate, properly constructed, low-priced homes that may be purchased under reasonable terms within the reach of the lower income groups. In the carrying out of this program we further demand that the Government take the necessary action to remove the building and furnishing of homes from the realm of finance companies and private property;

And be it further resolved that we urge the incoming Executive Council to rally our membership to implement this resolution with every resource, political or otherwise, at its command to the end that all legislators, provincial or federal, will be conscious of the voice of the people and will give us legislation that will wipe out the shameful lack of decent housing in Canada.

In a second resolution the delegates called on the Government to "reverse its decision to abolish rent control" until "every Canadian is properly housed," and to enact legislation "protecting tenants against evictions under unjustifiable conditions."

Still another resolution requested the Federal and Provincial Governments to "take the necessary action to assure Canadians of good lumber at fair prices."

United Nations Action in Korea

As has been the case at recent Conventions, the debate on international affairs provided one of the major occasions for expression of the overwhelmingly anti-Communist sentiment of the Canadian Congress of Labour.

About a dozen resolutions had been submitted by affiliated unions in advance of the Convention. Several of these followed the Communist line by calling on the Convention to "deplore the decision of the Federal Government to involve our country by the sending of ships, aircraft and troops to the civil war in Korea;" and to "endorse the Stockholm appeal being circulated by the Canadian Peace Congress."

The Resolutions Committee recommended non-concurrence in these resolutions, and the adoption of a substitute resolution which incorporated the viewpoint of the

CCL EXECUTIVE, 1950-51

Front row: Freeman Jenkins, Fred Dowling, Alex McAuslane, President A. R. Mosher, C. H. Millard, Pat Conroy, J. E. McGuire. Back row: Sam Baron, H. Chappell, Wm. Robitaille, Stewart Alsbury, George Burt, Silby Barrett.

other proposals. The substitute resolution called on the Convention to give "unqualified support" to the action taken by the United Nations in Korea, and to "endorse and approve" the joint statement on Korea issued in August, 1950, jointly by Percy R. Bengough, President of the Trades and Labour Congress, and CCL President A. R. Mosher.

By adopting this resolution the Convention expressed its desire for peace; its determination to resist aggression; its opposition to "the phoney Stockholm Peace Pledge" and similar "ban the A-bomb" resolutions aimed at "keeping us disarmed and leaving Soviet Russia free to move in on any country whenever it suits their purpose;" and finally its firm conviction that the United Nations action was "designed to restore peace in Korea and uphold the dignity and authority of international law in the settlement of disputes between the countries of the world."

Opposing this resolution, William Stewart, Marine Workers' and Boilermakers' Union, Vancouver, said that there had been no aggression by the North Koreans; but that the Koreans were merely working out their

own destiny in accordance with the principle of self-determination of nations; he urged that Canada should keep out of the conflict.

On the other hand George Banks, CBRE, Moncton, said that "the first fellow that crowd's another fellow's doorstep" was undoubtedly an aggressor; while Morris Rabinovitch, Amalgamated Clothing Workers, Montreal, denied that the North Koreans were following the principle of self-determination since they were following a line dictated by an outside power, namely the Soviet Union.

Robert Haddow, International Fur and Leather Workers, criticized the government of South Korea, and said that even if the North Koreans had invaded South Korea, this action was justified by the right of the Korean people as a whole to settle their own affairs. He charged that Canada was following United States policy in bolstering up reactionary governments in Asia in defence of the millions invested by Wall Street.

In reply to this, Larry Sefton, Steelworkers, declared: "The Governments in some countries may not be all I'd like to

see, but at least they're open to investigation and the force of world opinion." On the other hand North Korea had closed its borders to investigation by the United Nations; and to find out what was going on "we have to accept the word of the Canadian Tribune and Brother Haddow. We refuse to take their word," he said.

In Korea, he continued, the United Nations had matched force with force "and I see by the papers it's working out very well."

Pat Conroy discussed the resolution in terms of the history of the trade union movement. For almost thirty years, he said, the Communists had been caucusing, bulldozing and threatening in an effort to drive the free trade unions to cover so that they could take control.

"We in the Canadian trade union movement," he declared, "are serving notice that the Russian holiday of the last generation has now officially come to an end." He reminded the delegates that in 1940-41 the Communists "were asking us to sign peace pledges for a negotiated peace with the Nazis."

"My friends in the Communist Party," he cried, "and you woolly-headed fellow-travellers, you've come to a halt. This resolution recognizes the thinking of the working people in Canada."

J. Orem, Local 200, UAW, said he was against any form of dictatorship, whether it was Fascism, Communism or Capitalism. But under capitalism the labour movement could make progress and improve its conditions, whereas to adopt Communism would merely be to "change one boss for another," with the disadvantage that "there's no grievance procedure under Communism." He warned the delegates to fight Communism by democratic means, saying that "if you depart from these methods you play their game."

When the question was put to a vote, the resolution was adopted by the overwhelming majority which characterized all decisions on issues opposed to Communism.

Address by Minister of Labour

The Hon. Milton F. Gregg, Minister of Labour, making his first appearance at a CCL Convention, addressed the delegates at the Convention banquet.

He was introduced by Secretary-Treasurer Pat Conroy, who paid tribute to Mr. Gregg's services to his country in war and peace.

The Minister of Labour dealt mainly in his address with ways and means of achieving social objectives in Canada.

"We have got past believing that poverty can be eliminated by the stroke of a pen, or even by Act of Parliament," Mr. Gregg declared. "Our gains of the past fifty years have pointed the way by which future progress can be achieved.

"The great social projects of our time have to be made economically possible through the productivity of our people. They have also to be made politically possible through the persuasion of the majority, including if possible a majority of those most directly affected.

"There are no short-cuts.

"One way of looking at Communism," the Minister continued, "is to consider it as an attempt at a shortcut—an attempt to achieve progress without regard for its two essential factors; productivity and persuasion.

"Any progress that may be achieved in this way is at the expense of every fundamental human decency we cherish," Mr. Gregg warned. "For the absence of democratic persuasion means dictatorship. And the continued existence of a dictatorship is impossible without the repression, the tortures, the liquidations, that totalitarian rulers employ on any who dare to question their system. . . .

"To combat this evil we are being forced to recognize the causes from which it springs, and to take a critical look at the values for which we stand.

"Communism has done this for us—it has put us all inevitably on the side of social progress. It has challenged us to keep democracy working at the best level of efficiency we can muster. It is thus succeeding, against its will, in stimulating a unity of purpose that could scarcely otherwise have been achieved among all classes of people in the democracies.

"For the basic hopeful fact of our economy today is that progress is being made at a faster rate than ever before in our history. . . .

"The history of the past half century shows the extent we have moved towards closing the gap between rich and poor, towards destroying social barriers, towards providing equality of opportunity for all young persons. The trade union movement can claim credit for helping in these gains as well as in securing for workers a fair return for their toil.

"No one pretends we have reached the millenium. But the direction in which we are moving is plain to all.

"And as for the great social objectives of the present time—continued full employment, old age security, better health services, shorter working hours, higher general prosperity for all—there is a greater measure

of agreement than ever before that they can and must be attained. Mr. President, there may be differences of opinion as to the timing of some of these things but as to principle your Federal Government has taken positive action on all of them and will not turn back.

"These important issues are all before the public today. They are discussed and studied in Parliament, by Joint Parliamentary Committees, next month by Federal-Provincial Conference, in the press and on the radio, and especially in assemblies like your own. Certainly there are differences of opinion, but these will be ironed out by methods consistent with our traditions of freedom. . . .

"Whatever difficulties exist, constitutional, administrative, financial or otherwise, are bound to yield to the determined aspirations of the Canadian people."

Mr. Gregg told of the efforts that were being made to preserve world peace, so that social objectives could be achieved. He spoke of the need to convince peoples in other lands of the benefits of democracy.

"In our country," he said, "we have confidence in our ability to make a better life for all our citizens. But in other areas of the world millions upon millions of people live in such extremes of poverty that they lack not only this confidence, but even hope itself.

"These millions, living in conditions of squalor, disease and misery, are ready victims for the Communist propaganda campaign that has already been launched."

The Minister then praised the United Nations Technical Assistance Program, and other activities designed to bring help to underdeveloped countries.

In the course of his speech, Mr. Gregg also paid tribute to the memory of two of his predecessors in office, the late W. L. Mackenzie King, and the late Humphrey Mitchell.

He also congratulated the Congress on being "one of the first groups in Canada to sense the nature of the latest menace to world peace. In acting decisively—as you have done in the past years—to rid yourselves of disruptive elements within your midst you acted primarily to strengthen yourselves that you might better achieve the purposes of the labour movement," Mr. Gregg said. "But in so doing you also won the respect of the Canadian public, and laid the basis for a kinship of national spirit that will be of the utmost value to Canada in the difficult months ahead."

Labour Unity

A resolution on labour unity, submitted to the Convention by the Executive Council, was characterized by CCL Vice-President C. H. Millard as of "outstanding" importance, and one that "will someday be regarded as historic."

The resolution called for the establishment of a joint national council on which all *bona fide* trade union groups would have representation, in order to formulate common policies in the interests of the whole trade union movement.

Mr. Millard said that the introduction of such a resolution followed naturally from the co-operative efforts of labour bodies in the recent railway strike.

Noting that it did not recommend organic unity of the various trade union organizations at this stage, Mr. Millard said: "It is my view and that of the Executive that if we first achieve unity of purpose, organic unity will follow." He urged the delegates, by adopting the motion unanimously, to "let other labour bodies know that we stand ready, willing and anxious to meet them on all matters of common concern to the people of Canada."

Approved unanimously by the Convention, the resolution was as follows:—

Whereas the recent strike of railway workers throughout Canada has demonstrated that trade unionists throughout Canada, regardless of their particular trade union affiliation, have common aims and objectives around which the whole Canadian trade union movement can rally, and

Whereas the joint actions of the railway unions in conducting their successful strike were supplemented by the joint, and successful actions of the major Canadian trade union centres, and

Whereas the successful outcome of such joint actions by all legitimate trade unionists throughout Canada points to the need for more co-operation and consultation between the several legitimate trade union groups:

Therefore be it resolved that this Convention go on record as supporting the early establishment of a joint national consultative and co-operative council which will provide an opportunity for all *bona fide* trade union groups in Canada to formulate common policies in the interests of the workers and the whole legitimate trade union movement.

Constitutional Change Providing for Expulsion of Communist Unions

A proposal for the addition of the following new section to the CCL Constitution was placed before the delegates by the Executive Council:—

The Executive Council shall have the authority to expel any union which, in

the opinion of the Council, is following the principles and policies of any Communist or Fascist organization, subject to appeal to the next Convention.

Defeat of this proposal was urged by W. Stewart, Vancouver, who claimed that it gave too much authority to the Executive and that it would "stifle all criticism."

The right to appeal to the next convention was "not good enough," said Mr. Stewart, pointing to the action of the Executive, after its suspension of the UE, in accepting a rival union in the electrical field of jurisdiction, and thus effectively ruling out any likelihood of reinstatement of the UE.

H. Bastable, Brotherhood of Express Employees, said that he was glad to see the UE out of the Congress but regretted the fact that debate on the expulsion had not been permitted. He asked that the proposed amendment be modified so as to permit debate at the next Convention on any expulsion.

William Mahoney, United Steelworkers, said that a few years ago he would have opposed a motion such as the present one. What convinced him of its necessity were the actions of the Communists themselves, whom he described as "union-breakers."

(Mr. Mahoney is credited with leading a campaign which freed the International Woodworkers of America, the Vancouver Labour Council, and the B.C. Federation of Labour from Communist domination in 1948.)

He urged the need of bringing workers misled by Communists back into the Congress.

On being put to a vote, the proposed constitutional amendment was adopted by a large majority.

Other Constitutional Amendments

At recent CCL Conventions there have been sharp debates on the issue of the representation and voting strength of Congress affiliates. At the 1949 Convention the United Automobile Workers charged that under the present system they were not getting representation at the Convention equivalent to their membership strength. Following the 1949 Convention a committee was set up by the Executive, consisting of C. H. Millard, Steelworkers, George Burt, UAW, and J. E. McGuire, CBRE, with instructions to make recommendations on this contentious question.

The committee recommended no change in the existing basis of representation at Conventions. However it proposed a change in the manner of taking a roll-call vote, designed to give delegates from large

locals the right to cast extra votes, proportionate to their membership, up to a maximum of five. This system would tend to equalize the voting strength between unions of approximately equal membership, of which one contained a large number of small locals, and the other a few large locals.

The amendment was adopted by the Convention without discussion. It provides as follows:—

In a roll-call vote, each delegate shall cast one vote for the first one hundred members or less in the local unit which the delegate represents, and one additional vote for each additional one hundred members or major fraction thereof, but no delegate shall have more than five votes, and no fraction of a vote may be cast.

There were no roll-call votes at the 1950 Convention.

The Convention also adopted amendments to increase the per capita tax payable to the Congress by affiliated unions.

National Labour Code

Numerous delegates took the microphone to support a resolution renewing the Congress' stand in favour of a "national labour code to cover every Canadian worker."

The resolution stated in its preamble that "the present set-up of provincial labour bodies conflicts in many ways with the rights of workers to organize," and that "too many technicalities can be and are translated in favour of unscrupulous employers."

George Burt criticized existing certification procedures, and said that they were operating in such a way as to hamper the organization of new unions. It was the opinion of the UAW, he said, that conciliation boards should be abolished in favour of some other conciliation machinery. The right to strike should not be postponed for so long a period.

Various speakers criticized the legislation or procedures of the provinces in which they resided, with the exception of delegates from Saskatchewan who extolled the legislation in their province. Support of the proposal for a national labour relations act appeared to be unanimous among the delegates.

Old Age Security

A resolution embodying the Congress stand on the problem of old age security brought forth strong support from a number of speakers, including one who, amid applause, stated his willingness to "participate in a general strike of several months" in support of the program.

Pat Conroy said the resolution involved "the end result of our civilization and what it stands for," and stressed its relationship to the Congress Declaration of a Positive Economic Philosophy.

The text of the resolution was as follows:—

Be it resolved that this 10th Convention of the Canadian Congress of Labour endorses the position of the Executive Council in the presentation made to the Parliamentary Committee on Old Age Pensions and further urges in the strongest terms the complete abolition of the means test as opposed to the halfway, hesitant changes in this respect proposed by the Parliamentary Committee. The Parliamentary Committee recommendation, by failing to provide for pensions without a means test at 65 years, rules out the benefits of supplementary pensions won through collective bargaining.

Be it further resolved that this Convention calls upon the Government of Canada to institute old age pensions of \$60 per month for all persons reaching 65 years. The Convention registers its unqualified opposition to any suggestion that such costs be met by a sales tax that would place the financial burden of increased pensions on the shoulders of low income families, already finding it virtually impossible to exist in the face of the unprecedented rise in the cost of living.

Be it further resolved that this Convention rejects the basis of argument that old age pension improvements be delayed because of the re-armament program. Improved social security must be regarded as a vital factor in the maintenance of our democracy and therefore one of its chief buttresses.

Be it further resolved that this Convention instruct its incoming Executive to take the steps deemed to be necessary to assure that the next Parliamentary Session acts on the question of Old Age Pensions changes.

Unemployment Insurance

The Convention Committee on Unemployment Insurance, whose chairman was George Burt, expressed "strong condemnation" of the haste with which amendments to the Unemployment Insurance Act were "hurried through Parliament last February without proper study by Members of Parliament, and without permitting an expression of views by organized labour." The Committee asserted in its report that the amendments imposed "further restrictions" on workers seeking benefit under the Act.

It advocated a series of amendments, to the Act or regulations, as follows:—

Elimination of a requirement imposed last February that unemployed workers show that a certain number of the basic 180 contributions have been made within a year or six months of the establishment of the benefit year;

Provision that workers who have not qualified for paid vacations but are nevertheless required to stay away from work

owing to a plant shutdown for vacation purposes, be made eligible for benefit;

Increase in benefit rates without any further increase in contributions;

Elimination of the 9-day waiting period, or reduction to 3 days;

Elimination of non-compensable days;

Elimination of seasonal regulations;

Elimination of section permitting the issuance of special regulations on married women;

Financing supplementary benefits out of the general revenue, rather than the unemployment insurance fund, and making the rate the same as that of normal benefit;

Extension of coverage, particularly as regards employees of non-profit-making hospitals and charitable institutions;

Extension of the Act to provide sickness disability insurance as well as unemployment insurance;

Amendment of regulations regarding the 5-day week so as to provide that an employee absent for one day will not be penalized an additional day's contribution;

Correction of the practice of invariably imposing the maximum penalty in any case of disqualification;

Budgeting for unemployment insurance on a relatively short-term financial basis rather than accumulating "huge reserves some of which may never be used."

Several delegates spoke in support of particular sections of the Committee's report, which was unanimously approved.

Union Label

Speaking in favour of a "union label" resolution, Harry Waisglass, Amalgamated Clothing Workers, called on the delegates to refuse to buy clothes that did not carry a union label. He described a campaign in one locality where every retailer but two had been persuaded to drop their lines of non-union clothes.

The resolution, which was carried unanimously, urged affiliates to set up union label committees in all localities to educate union members and the public generally to "demand the union label on all articles they purchase."

Education

The report of the Congress standing Committee on Education described a series of activities during 1949-50.

Chairman of the Committee was A. Andras, Assistant Research Director of the CCL.

Weekend institutes were held at a number of centres, and the Committee reported that such institutes have now been conducted in every province except Prince Edward Island and Newfoundland, with a total registration of about 800 students. Several universities co-operated in providing facilities for the institutes, which were administered by Howard Conquergood, United Steelworkers.

"Labour education," the Committee urged in its report, "is not a luxury. . . . It is an essential service which must accompany the organization and development of a strong, durable labour movement. The Committee's views are strengthened by the expressed policy of the International Confederation of Free Trade Unions 'to engage in and foster educational and publicity work with the object of increasing the knowledge and understanding of national and international problems confronting the workers which would enable them to make their struggle more efficacious.'"

The CCL Convention agreed with the Committee's views on labour education, and voted in favour of its proposal for the appointment of a full-time director of education with necessary staff, and for measures to finance the broadening of the educational program.

Report on Organization

Reporting for the Convention Committee on Organization, Alex McAuslane commended the co-ordinated effort that had gone into the drive to organize the T. Eaton Company, Toronto.

The report then said:—

"The Congress and its affiliates face this year the added organizational problem of bringing back into the legitimate labour movement those workers in the electrical and non-ferrous metal industries whose leaders have divided them from the rest of labour. The Committee is satisfied that the workers in these fields have the same basic loyalty to the free trade union movement as other Canadian workers have, and that their separation from the Canadian labour movement need only be temporary. This reorganizational job can only be accomplished if all sections of our Congress co-operate in the drive to provide for these workers their proper place in the industrial trade union movement. We suggest that all affiliates do everything in their power to assist the United Steelworkers of America and the International Union of Electrical, Radio and Machine Workers in their efforts to reclaim these fields for the Canadian labour movement."

The report also urged a redoubling of organizational efforts in the Province of Quebec. It called on affiliates to make contributions to the Congress for organizational purposes, pointing out that the initial work in poorly-organized fields had to come from the Congress.

Although certain supporters of the United Electrical Workers and the Mine, Mill and Smelter Workers criticized the report as condoning "raiding," it was approved by a heavy majority.

Publicity

Praise for the public relations work of the Congress during the past year was given by the Convention Publicity Committee.

"In our opinion," the Committee said in its report, "the general overall reporting of labour news by the press has been fair and much broader coverage has been given than a few years ago. The accuracy of the reporting is undoubtedly due to the fact that many daily papers have assigned reporters to the labour field; and that their familiarity with union activities has enabled them to do a more accurate job of reporting."

While recognizing the important role of the CBC in making all points of view available, the Committee said it was perturbed by a tendency to relegate to the background commentators with a pro-labour point of view. The Committee was convinced that this was due to pressure from anti-labour groups.

Finally the Committee said it was pleased to note that more and more of the working members of the press and radio were becoming members of the American Newspaper Guild.

Help to Congress Affiliates

The Convention listened with enthusiasm to a speech from Miss Eileen Tallman, of the Retail, Wholesale and Department Store Union, describing the progress of the organization campaign at the T. Eaton Company, Toronto.

Miss Tallman thanked the delegates for financial help extended in the past, and declared that the campaign was on the verge of success.

W. L. White, Marine Workers and Boilermakers' Industrial Union, Vancouver, described the litigation his union had engaged in with Myron Kuzych, who had been expelled from the union and ordered reinstated by the B.C. Supreme Court. Mr. White asked for financial help in two appeals arising out of the case, one to the Supreme Court of Canada, and the other to the Privy Council.*

The Congress also responded to a request for help from the Hamilton Civic Workers in connection with a recently-ended strike of municipal employees.

Finally, the Congress adopted an emergency resolution in connection with a strike of employees of the Aluminum Company of Canada at Etobicoke, calling on the Government to "investigate the monopoly

* Developments in this case have been reviewed from time to time in the Labour Gazette; see elsewhere in this issue (p. 1786).

aspects of this corporation in order to protect both Canadian taxpayers and Canadian workers in the present world emergency."

Other Resolutions

The CCL Convention adopted a number of other resolutions, which put the Congress on record as:—

Endorsing the Red Cross blood transfusion service, recommending establishment of labour-management blood donors' committees, and suggesting that organized labour be represented on the governing bodies of the Red Cross at all levels;

Calling on the Federal Government to "recognize and assume its administrative and financial responsibility" in preventing recurrence of floods in the Red River Valley;

Advocating that provincial governments include in the curricula of primary and secondary schools the teaching of citizenship;

Supporting Federal grants (in addition to those now being paid in technical education) to raise educational standards in all parts of Canada;

Calling for the institution of a Dominion Standards Division with authority to enforce quality standards and a uniform system of size descriptions in clothing;

Supporting the organized farmers of Canada in their efforts to achieve stability of farm income, and to institute among the nations a program for feeding the world;

Requesting that statutory holidays be celebrated on Mondays, with the exception of religious holidays;

Urging all provincial governments to enact legislation making it compulsory for all employers to pay their employees for all statutory holidays;

Asking the Federal Government to appoint a committee to study the impact on the economy of the policy of industry not to hire workers over 40, and to provide legislation to "alleviate the adverse effects of this unfair labour practice;"

Calling on the Government to announce a permanent subvention policy so as to enable Western coal to be transported at a low enough cost to compete successfully in Ontario;

Commending the CBC for its "fine public service to the people of Canada," insisting that it be protected against commercial interests, and urging it to "continue and further develop its programs dealing with the problems of organized labour and the need for harmonious relationship between all groups of Canadian people;"

Requesting the National Film Board to produce films reflecting the "ideals and aspirations of the labour movement," and also films exposing the dangers of racial and religious intolerance and discrimination;

Supporting the establishment of film councils;

Concurring in principle with the idea of sponsoring the immigration of doctors and surgeons from European refugee camps, and recommending to affiliated unions that they study this matter with a view to developing the idea;

Urging the Federal Government to exempt union dues, medical costs, and transportation costs to and from work, for income tax purposes;

Advocating income tax exemptions of \$2,500 for married men, \$1,500 for single men, and \$500 for each child; with the proviso that further exemptions should be sought if living costs are not held down;

Calling on the Federal Government to enact a national health insurance scheme, to provide free medical, surgical, optical, dental and hospital treatment.

Among the resolutions which had not been dealt with at the adjournment of the Convention, and which were referred to the incoming Executive, were a number dealing with minimum wage rates, use of injunctions in labour disputes, 40-hour week, collective bargaining of Government employees, amendment of BNA Act, equal pay for male and female workers, co-operative movement, immigration, atom bombs, and Bill of Rights.

Political Action

The Congress adjourned without reaching on its agenda the customary resolution endorsing its political action program.

However the emphasis given by Mr. Mosher in his presidential address to the need for political action by labour was echoed by a number of delegates during subsequent discussions. Debate on such matters as housing, old age security and labour relations legislation gave occasion to various speakers to advocate direct political action by labour as a prerequisite to the obtaining of favourable labour legislation.

The report of the Congress' standing Political Action Committee described meetings held during the year and advocated the appointment of full-time personnel.

Other Speakers and Messages

At the opening of the Convention and at the beginning of each day's proceedings, the delegates listened to addresses and took part in devotional exercises conducted by the following religious leaders: Reverend J. D. Richard, representing His Excellency, the Most Reverend George D. Cabana, Archbishop of St. Boniface; Reverend Douglas D. Sparling, Minister of Fort Garry United Church, Winnipeg; Reverend Gerald Burch, Rector of St. Luke's Anglican Church, Winnipeg; Rabbi Milton Arey of the Shaarey Zedek Synagogue, Winnipeg; and the Very Reverend Gordon Maclean, Minister of the Presbyterian Church, Winnipeg.

The Hon. Paul Martin, Minister of National Health and Welfare, sent a message regretting that his attendance at the Dominion-Provincial Constitutional

Conference prevented him from attending the CCL meeting, and extending best wishes to all delegates for a successful Convention.

A telegram was read to the delegates from the Canadian and Catholic Confederation of Labour, saying that the message of greeting sent by the Congress to the CCCL Convention had been received with enthusiasm, and expressing best wishes for the success of the Congress Convention.

Joe Bierne, International President, Communication Workers of America, and Vice-President of the CIO, brought to the Convention the personal greetings of CIO President Philip Murray.

In introducing Mr. Bierne to the delegates, Pat Conroy said that he had built one of the mightiest unions in the USA, and was now proposing to bring it to Canada, to "introduce social justice to the telephone workers here." Mr. Bierne was thereupon accorded a standing ovation by the delegates.

In the course of his speech, he declared that the CIO by a process of democratic trials, had cleaned itself since its last Convention, of Communist unions and that at the next CIO Convention no Communist delegate would be seated.

Expressing his approval of the Declaration of a Positive Economic Philosophy adopted by the delegates, he promised that it would become part of the policy of the Communication Workers, if not of the whole CIO.

He described the CIO's efforts, to "drain off every single cent of excess profits,"

CANADIAN AND CATHOLIC CONFEDERATION OF LABOUR

A plan for a pension fund in three stages suggested by the General President for the purpose of affording greater security to workers upon retirement; a resolution of the Convention requesting that picketing be prohibited and that factories be closed down temporarily during strikes; a recommendation to the Canadian Government to "meet its obligations as a member of the United Nations;" and some questions of internal management, including the direct payment of "per capita" assessments to the CCCL, and a new method of representation at annual conventions; these were the highlights of the 29th annual Convention of the Canadian and Catholic Confederation of Labour, held in Sherbrooke, Que., September 16-27. The executive and all retiring officers were re-elected to their

leaving only a fair profit to business, as a means of combating inflation during the Korean crisis.

Greetings from the labour movement in Israel were brought to the delegates by Hy Reiff, Amalgamated Clothing Workers, who had recently returned from a visit to that country.

A. R. Kinstley, Vice-President of the Oil Workers' International Union, also addressed the Convention.

A National Film Board production, "Local 100," was screened during the course of the Convention, and was well received by the delegates. President Mosher characterized it as an "excellent film" and hoped that among those who saw it in the future would be many of those workers who "have not yet realized the necessity of getting into the trade union movement."

Elections

The annual election of officers resulted in the return of A. R. Mosher as President, Pat Conroy as Secretary-Treasurer; and Alex McAuslane; C. H. Millard and Sol Spivak as Vice-Presidents.

As members of the Executive Board, the Convention elected William Robitaille, Canadian Brotherhood of Municipal Employees; George Burt, UAW; Fred Dowling, United Packinghouse Workers; Silby Barrett, District 50, United Mine Workers; H. Chappell, CBRE; J. E. McGuire, CBRE; Sam Baron, Textile Workers; Stewart Alsbury, International Woodworkers; and Freeman Jenkins, District 26, United Mine Workers.

respective positions, the elections lasting scarcely a quarter of an hour.

In a brief address of thanks, at the conclusion of the Convention, Gérard Picard, General President, stated that he was delighted that the meetings of the 29th Annual Convention had been "hard and difficult" from the point of view of discussions and procedure. "That's the way a convention should be," the President explained. "As the working class becomes aware of its problems, it expresses itself and demands a maximum effort on the part of its officers. . . ."

Jean Marchand, who was re-elected as General Secretary, asked the assembly of delegates, continually engrossed by problems of internal management during the Convention, not to forget "the factory

worker who takes part of his income and gives it to his organization, in which he trusts." Mr. Marchand asked that discord and opportunism be banished for ever from the ranks of the CCCL, where there is only room for "those who wish to serve the finest class of society—the working class."

More than 400 delegates, representing 83,112 members from 390 affiliated syndicates, were represented at the Convention. The delegates were guests of the National Syndicate of Sherbrooke, which was celebrating the 25th anniversary of its incorporation.

Officers of the Sherbrooke Central council are Gaston Vallée, president, Joseph G. Gervais, treasurer, and L. L. Hardy, secretary. The local committee in charge of organizing the Convention included Messrs. Alfred Paradie, Roméo Rondeau, Alcide Michaud, Laurent St. Saver and Gérard Pelletier.

Opening Ceremonies

The Convention opened at nine o'clock on Sunday, September 17 with an official reception for the delegates at the City Hall, where they were received by His Honour Mayor Howard.

Following the opening formalities, the delegates assembled at the Cathedral for the inaugural High Mass celebrated by Father Henri Pichette, General Chaplain of the Confederation. The sermon was preached by Rev. Father Jacques Cousineau, s.j., former chaplain of the Montreal Central Council.

More than 600 persons attended the opening banquet held in the St. Joan of Arc Hall. About fifty guests were seated at the head table. Besides the officers of the CCCL and their chaplains, the following persons were noticed: Mgr. Adam of Sherbrooke, representing the Lord Bishop and former chaplain of the syndicates of the diocese; Mr. Paul Emile Côté, Member of the Federal Parliament for Verdun-La Salle, representing the Hon. Milton F. Gregg, Minister of Labour, to whom he is Parliamentary Assistant; His Honour Mayor Howard; Mr. Maurice Gingues, Member of Parliament; Mr. J. H. Morgan, United States Consul at Quebec; Mr. J. P. Deslières, Secretary of the Superior Labour Council; Mr. Alfred Charpentier, former General President of the CCCL and a member of the Labour Relations Board of the Province of Quebec, and Mr. Armand Fisette, leader of the Sherbrooke Municipal Council, representing the Hon. J. Bourque, who was absent on account of ill health.

His Excellency Mgr. Philippe Desranleau, Bishop of Sherbrooke, surprised the delegates by appearing at the very beginning of the banquet, but left the hall a few minutes later, explaining that he had been anxious to come to present his regards to the CCCL, but that diocesan ceremonies made it necessary for him to leave again right away.

Mgr. Desranleau expressed his delight at being present "for a number of reasons, one of them being an anniversary: just about thirty-five years ago, at the request of Mgr. Bernard, Bishop of St. Hyacinthe, I began to take an interest in workers' problems." Then His Excellency declared that all Christians, and the bishops in particular, must interest themselves in the working classes.

He went on to underline the importance of the social doctrine of the Roman Catholic Church, "clear on all points and obligatory for everyone," according to Pius XII, "from which one cannot deviate without great danger to the faith." This doctrine, Mgr. Desranleau explained, is not directed against anyone except those who do wrong. It is absolutely necessary to adhere to it, and this adherence is the token of success in any labour action.

Gaston Vallée, President of the Central Council of the Syndicates of Sherbrooke, proposed the various toasts in turn and introduced the speakers who were to reply to them.

Mgr. Adam, replying to the health of the Pope, recalled the beginning of the trade union movement at Sherbrooke: "Everything was against us," the prelate emphasized, "and nothing for us, except our good will and our very firm resolve to make the labour cause triumphant. The movement developed, however, and I have no doubt whatsoever that with the support of the Church and of our Lord Bishops it will continue to grow."

Address of Paul Emile Côté, M.P.

Speaking on behalf of the Federal Minister of Labour, the Hon. Milton F. Gregg, Mr. Côté, Parliamentary Assistant to the Minister of Labour, stressed the fiftieth anniversary of the Department, which, he pointed out, coincided with the beginnings of Catholic trade unionism in Canada:—

Working conditions existing around 1900 in the clothing industry in Toronto, and a lockout in the boot and shoe industry in Quebec that same year, gave rise to a real revolution in labour-management relations in Canada.

The creation of a Federal Department of Labour in September, 1900, was the

result of the indignant reports of a young journalist by the name of Mackenzie King denouncing the exploitation of labour and the poor working conditions found in various parts of the country.

The beginnings of Catholic trade unionism in Canada date back to the lockout of the fall of 1900 in the boot and shoe industry at Quebec, the arbitrator for which was His Excellency Mgr. Louis Nazaire Bégin, Archbishop of Quebec.

Taking his stand on the encyclical *Rerum Novarum* on labour problems, proclaimed by His Holiness Pope Leo XIII in 1891, Mgr. Bégin, in his award, recognized the right of employees to form associations for legitimate purposes, but denounced the constitutions of three of the six syndicates. The constitutions in question were changed, a permanent board of arbitration was set up and the syndicates agreed to appoint a chaplain in an advisory capacity.

The papal encyclical sums up the attitude of the Roman Catholic Church with regard to the rights of workers. Its main points are the declaration of freedom to form associations and to decide working conditions, and the duty of the State to prevent abuses in labour matters and to pass legislation promoting social justice.

By reason of its Catholic views and teachings and the influence it exerts over the working classes in Quebec, the CCCL is one of the best weapons which can be used to fight the monster of Communism.

The CCCL is a school of light, which, by its moral strength and its Christian order, offers Canadian industry a guarantee of permanent peace.

President Picard then thanked the speakers particularly welcoming the presence of Mr. Côté.

Mr. Picard discussed the position of the CCCL in the face of world changes wrought by the industrial revolution and the advancement of the sciences. Using one of Rev. Father Cousineau's themes, he stressed the need of viewing contemporary problems from a broader perspective.

"The limits of the parish, of the province and of the nation itself have been passed. It matters little whether we like it or not, we must henceforth contemplate solutions on a world-wide scale. Perspectives have

changed. Problems are bigger and the world smaller. That is why we must give more and more attention to our international affiliations. The CCCL has begun to co-operate on an international scale with the other labour organizations; it must develop its contacts and intensify them.

"We must, of course, protect our local and national values, but that should not prevent us from identifying ourselves with the world; it should not prevent our reasoning from having just as much scope as the problems under consideration.

"And if our attention is not too much taken up by demands, we of the labour movement will still be able to think of the constructive work which we wish to undertake as soon as possible. And perhaps then we shall be able to build up that harmonious society which everybody wants."

The General President's Report

In his presidential report, Mr. Picard dealt exclusively with social security, old age and retirement pensions. The year's activities, and questions of administration were reviewed in other reports presented to the delegates, and in particular, the report of the Executive Bureau.

President Picard gave a comprehensive analysis of the historical background of social security in Canada and other countries. His report contained a number of recommendations which were subsequently approved by the Convention. These were:—

1. A monthly \$50 pension for women at 60 and men at 65, under a universal or general old age pension plan, the cost of which would be paid three-fifths by the Federal Government and two-fifths by the provinces;
2. Setting of a reasonable period of residence in Canada for admission to pension;
3. Suppression of the means test;
4. Establishment of contributory insurance, with a reserve fund, in favour of wage-earners, with a view to a monthly \$50 pension at age 60 for women and 65 for men. The wage-earner would pay two per cent of his earnings to the reserve fund; the employer would pay the necessary balance to insure solvency of the fund; the Governments would assume the administration costs and make up the deficits;
5. Safeguarding collective schemes for retirement pensions now in existence, and leaving the establishment of other plans, complementary to the schemes suggested above, to collective bargaining;
6. Setting up of suitable organizations to supervise the application of the law and to ensure the payment of pensions to persons entitled to them.

In regard to the above proposals, Mr. Picard considered that the recommendations of the Parliamentary Committee, if approved by Parliament, would favour residents of country districts to the detriment of those in towns and cities.

New Trend of the Movement

At the beginning of the Convention, Mr. Jean Marchand, Secretary-General of the CCCL, pointed out to the delegates the necessity of "thinking out the movement anew," with a view to making it better qualified "to free the working class and to re-Christianize the economic system:"—

Our movement must not be simply a group of 'bargaining agents.' We will not save the working class by collective agreements alone. Even if they do constitute an indispensable technique, they are not sufficient. We must think of certain fundamental reforms which will lead us out of the vicious circle of wages and prices in which we are being held confined by the capitalist system.

These reforms will be made possible only through an awakening on the part of the working class to consciousness of its situation, its needs, its strength, its aspirations, etc.—a consciousness which can be awakened only by education.

That is why the CCCL intends to direct the greater part of its strength during the next few years to training militant members.

President Picard also dwelt on this new aspect of the Catholic trade union movement, pointing out the necessity for a closer approach between city workers and country workers, with the co-operatives acting as liaison agents between the two classes.

Report of the Executive Bureau

The report of the Executive Bureau, presented by the Secretary-General, Mr. Jean Marchand, emphasized and commented upon the appearance last March of the pastoral letter of the Episcopate of the Province of Quebec, dealing with workers' problems in the light of the social doctrine of the Roman Catholic Church (L.G., May, 1950, p. 652). The report went on to deal with the world conference of free trade unions and the attitude of the CCCL with regard to this conference.

The report told of the trip to Europe of the CCCL delegation sent to present the respects of the movement to His Holiness Pope Pius XII in the occasion of the Holy Year and to study the labour situation in Europe. The active part taken by the General President at the thirty-third International Labour Conference, held in Geneva during the month of June, was mentioned in the report. As technical adviser to the Canadian labour delegate, Mr. Gérard Picard was appointed to, and held office on the Committee set up by the Conference to report on industrial relations, including the study of collective agreements, conciliation and arbitration.

The report then mentioned the briefs presented to the Royal Commission on

National Development in the Arts, Letters and Sciences (L.G., July, 1950, p. 1000), and the brief presented to the Joint Committee of the Senate and the House of Commons on Old Age Security (L.G., July, 1950, p. 1011). The other subjects dealt with in the report concerned the cost of living, the rent problem, and questions of internal management (some of which gave rise to rather stormy discussions).

In his report, Mr. Marchand said:—

This year will shine with particular brilliance in the history of the CCCL, for it will recall the publication by our Lord Bishops and Archbishops of the Province of Quebec of the pastoral letter on workers' problems. This document, which will be an inspiration for years to come to all who have set their hearts on restoring our society in accordance with Christian principles, will be the Gospel of our movement and the source of our doctrine.

The year 1949-1950 will also mark a greater measure of participation on the part of the CCCL in international trade-union activities. Our organization realizes that it is not isolated on this earth, but part of a chain which overlooks boundaries. If it intends to defend the interests of its members adequately, it must observe international life and take part in it. Its status as a Christian movement forbids it to limit its horizons and to close itself up in an ivory tower.

World Conference of Free Trade Unions

The report recalled the holding of a world trade union conference in London, England, from November 28 to December 9, 1949, with a view to grouping together all free trade unions, on an international scale, in order to organize a new International made up exclusively of the free and democratic trade-union confederations of the whole world and shutting the door to the Communist unions.

The International Federation of Christian Trade Unions (with which the CCCL is affiliated) had been invited to send observers to the meetings of this Committee, and had appointed its President and Secretary as its representatives. To the great surprise of the latter, Mr. Marchand pointed out, the Preparatory Committee at Geneva, which had as one of its duties the issuing of credentials, did not even invite the International Federation of Christian Trade Unions to send observers to London. As for the confederations affiliated with this Federation, the Committee decided to invite them, but only after consultation with national centres of the countries in which they operated.

In other words, Mr. Marchand noted, applying this principle in our country, the CCCL would have been invited only if

the Trades and Labour Congress and the Canadian Congress of Labour had not opposed this invitation.

As far as Europe was concerned, only the French Confederation of Christian Trade Unions was able to obtain credentials to attend the London Conference. The French Confederation did not approve of the exclusion of the other Christian Confederations, but it decided to take part in the London Conference for the sole purpose of requesting leave to speak as soon as the Conference opened and to ask for the sending of invitations to the other Christian national federations.

The Credentials Committee, having been warned of this, reached a compromise, and the Christian Trade Union Confederations were invited to attend the Conference and the constituent congress "on the understanding that, along with all the other affiliated organizations, and before the next congress in two years' time, they should accept and give effect to the principle of one trade union international."

After considering all the aspects of the problem, the CCCL Executive drew up and sent the following telegram to the Secretary of the Conference:—

"Montreal, Dec. 3, 1949

Mr. Vincent Tewson
Free World Labour Conference
County Hall
London England

Without adopting any attitude on condition imposed with regard to our invitation Canadian and Catholic Confederation of Labour would have been pleased to take part in Conference if short notice did not make trip impossible (Stop) We hope nevertheless to receive all documents distributed especially statutes and reports of discussions (Stop) Fraternal greetings to all delegates and best wishes for success.

Picard—CCCL"

The report emphasized that the CCCL would therefore have agreed to take part in the London Conference if its delegates had been given sufficient time to get there. The invitation was received on November 30 and the Conference had begun on November 28.

The CCCL objected to the dissolution of the International Federation of Christian Trade Unions in a telegram sent by the President to Mr. Gaston Tessier on December 1, 1949.

The CCCL will continue to follow the activities of the International Confederation of Free Trade Unions, but will not break away from the International Federation of Christian Trade Unions and will fight against any suggestion that it should do so, Mr. Marchand said.

The Labour Situation in Europe

Mr. Marchand's report emphasized the fact that the CCCL delegation in Europe took advantage of its trip to get into touch with the Christian labour organizations of a number of European countries.

In all European social circles, Mr. Marchand remarked, last year's struggle by the asbestos workers was followed with interest: "We may say that by this battle the CCCL created an enviable reputation for itself on an international scale. The last pastoral letter of the Bishops of the Province of Quebec on labour problems was also received with enthusiasm."

The delegates expressed their opinions on the European labour situation as follows:—

1. The living standard of European workers is lower than the standard of living of American workers, but their hours and the rhythm of their work are much less exhausting and give them more leisure time;

European industries are better adapted to the workers than American industries are.

For that reason it may be asked whether, in spite of their lower standard of living, European workers are not better off than American workers.

2. The social security schemes of the different countries visited by the CCCL delegates are more advanced than those we have here. The worker and his family have better protection against the risks of life.

3. The productivity of European industries is definitely lower than that of American industries, which means that industrial techniques have not reached such a high standard of perfection there and labour does not work so hard.

4. In Europe collective agreements do not have the same scope as they do here, and result from a different conception of collective bargaining. In short, they are equivalent to national ordinances which are akin to our orders passed under the Collective Agreement Act.

Our system of particular agreements, negotiated by individual companies, is better than the European system of making regulations.

Prices Arbitration

Mr. Marchand's report emphasized that the CCCL has repeatedly made protests against the unwarranted rise in the cost of living. Through the newspapers, the CCCL has sought to demonstrate that increases in wages do not account for the persistent rise in prices; at any rate, price increases always come before wage increases.

Some delegates asked that the Federal Government be urged to establish a ceiling on food prices.

The Convention refused to adopt such an attitude. It preferred "to abide by the general policy of the CCCL in favour of prices arbitration."

The Confederation has set forth its policy, especially when submitting memoranda to the Provincial and Federal Governments. In its memorandum submitted to the Quebec Government in 1948, the CCCL defined the purpose of prices arbitration boards as follows:—

This policy favours the creation of arbitration boards which would play, in relation to prices, the part played by arbitration boards in the field of wages.

In his report, the general secretary noted that the Executive Bureau had spent much time examining and trying to solve differences between its affiliates in 1949-50 and that it would be advisable to define clearly the powers of the Bureau in the case of differences within the organization.

Union Dues

The appointment of regional technical advisers, the consolidation of the constitution, the distribution of the "per capita" assessment and the system of representation at conventions were the points of the report of the Executive Bureau which were most widely discussed by the delegates.

Discussion of the question of union dues was particularly lively and brought forth a strong plea by Mr. Marchand in favour of real trade unionism and also an address by his Lordship Bishop Philippe Desranleau who urged the workers to work peaceably towards the formation of peace in society.

The Tuesday afternoon meeting was extended for an hour and a half in order to allow the delegates to take a secret vote on the following question: Should the dues

of the CCCL be paid directly to the Confederation or to its affiliated Federations?

Under the constitution, that part of the dues payable to the CCCL was to be remitted to the Confederation not by the union, but by the Federation to which the union belonged. The amount to be paid to the CCCL is 25 cents for each member. It would appear that some Federations delay or neglect to remit the amounts due to the CCCL.

The Constitution Committee requested the Convention to change the constitutional point raised so that any amounts due to the CCCL be remitted to it directly.

This proposal led to a lengthy and stormy discussion among certain delegates, culminating in a secret vote which gave approval to the request made by the Confederation. The resolution was adopted 282 votes to 80. Henceforth, unions will be required to send directly to the CCCL any amounts due the latter.

Mr. Marchand's report then dealt with the following: religious retreats, the newspaper *Le Travail*, the research service, unemployed leagues, the rental problem, and union statistics.

With regard to unemployed leagues, the Executive Bureau urged the central councils to organize leagues for the unemployed so that they may have some means of making their just claims and, at the same time, keeping the latter within reasonable limits.

It has already been noted that at the opening banquet of the Convention, his Lordship Philippe Desranleau, Bishop of Sherbrooke, made a brief appearance. On

Tuesday afternoon his Lordship again visited the Convention, and addressed the delegates. He said:—

The important thing, my dear workers, is for you to rest assured that your bishops are fully with you in the great movement which the CCCL has become. I have come back to say this to you again, so that there will be no doubt about it in your minds.

The labour movement must develop today more than ever. We must be thoroughly acquainted with the situation in which we find ourselves. If we study the present development of our country, we realize that industrial centralization is taking place at an ever increasing rate.

You are now of age. This implies inconveniences, but mainly it implies benefits and responsibilities. There will be those who liked you when you were weak, who will now look upon you with more suspicion. But that will also change. I, for one, do not believe that you will face unyielding opposition.

You have made great progress in the last few years. Your social doctrine has advanced. The workers have asserted themselves more and more everywhere. You must continue to do so without fear of being wrong. Should you err, you shall be warned. But mainly, do not stop building. You will thus contribute to the making of society, not only as concerns the working class but all classes as well.

The task will be hard. You already find it so. But every cloud has its silver lining, and you must be encouraged by the conviction that your ideas will some day prevail for the good of all mankind.

CCCL Membership

The secretary-treasurer's report revealed that the CCCL has 10 unions more than last year and a total of 83,112 members, 160 less than last year. This slight decrease was attributed to the unemployment which was felt during the first months of the year in the Province of Quebec, where the CCCL recruits almost all its members.

CCCL Educational Service

The report of the Director of Educational Service, Fernand Jolicoeur, was submitted to the Convention. The report reviewed the progress made by the service in the two years since it was organized.

The Educational Service arranged for the organization of many study days in different parts of the Province of Quebec. These study days were held under the auspices of the central councils of several federations and of numerous unions. Several hundred workers have taken two- or three-day courses on co-operation, union organization, etc. Moving pictures have also been used to promote the education of workers. The films chosen dealt with co-operation, use of leisure time, family education, and the meaning of democracy. A number of

centres including Quebec, Joliette, Plessisville and St. Hyacinthe took advantage of these films.

A number of study days were also organized for the members of the Executive Bureau. Literature on subjects such as wages and prices, social security, monopolies and price control by arbitration, negotiation of collective agreements at the industry level, hours of work and retirement pensions, was provided for the members.

The Educational Service also contributed to the circulation of the pamphlet on the participation of workers in the life of the company and of the pastoral letter of Catholic Bishops on workers' problems in the Province of Quebec.

Strikes and Prohibition of Picketing

One important resolution passed by the Convention was designed to prevent violence during the course of strikes, and to protect the jobs of the striking workers by eliminating strike-breaking.

The resolution calls for legislation both to prohibit picketing and to require an establishment to close its doors for the duration of a strike. As a last resort, the Government should take over the establishment temporarily in order to negotiate, in the name of management, a collective agreement with the workers on strike. The full text of the resolution is as follows:—

Any injunction against a workers' association which goes on strike upon termination of all procedures and time-limits provided for the present Act is prohibited.

For the duration of a strike called upon termination of all procedures and time-limits provided for by the present Act:

(a) any establishment concerned will close its doors if the employees as a whole, according to the terms of the Act, are represented by the organization or organizations having called the strike;

(b) any establishment concerned will stop production and related activities if the strike is called by an organization representing the employees of the production and other related departments;

(c) any establishment concerned will be forbidden to pursue any of the activities practised by the workers involved if the organization represents a separate group of workers or a trade;

(d) in all above cases, the employer will for the duration of a strike be prohibited from hiring new workers to replace those on strike;

(e) in all above cases, all picketing is prohibited for the duration of the strike;

(f) in all above cases, when work is resumed, the employer may not retaliate against the workers who were on strike and each worker must be reinstated in the position he occupied before the strike.

As a last resort, the Government may take over temporarily the establishment

or establishments on strike, in which case the Government will assume by right all the responsibilities of management for negotiation with the workers' organization, of a collective agreement which will bind the employer in the same way as if he himself had negotiated and brought about such an agreement.

This proposal by the Resolutions Committee was a substitute for 4 resolutions submitted by federations representing the mining, pulp and paper, and furniture industries. After lengthy discussion, the resolution was adopted by an overwhelming majority.

As soon as this amendment had been read, Mr. Picard left the chair to explain the object of the Resolutions Committee.

"At first glance," Mr. Picard said, "this resolution that we are submitting to you may appear very radical. In fact, it is radical, as it revolutionizes the present strike system."

"However, it acknowledges more and more that the present system is bad, as it can only lead the workers on strike to illegal and disorderly acts. What we want is a social reform in favour of order. What we desire is the end of scuffles. We must aim towards the re-establishment of order through the elimination of pickets and scabs and their unavoidable conflicts."

"The federal law does not allow picketing by the workers on strike around the employer's property." "However," Mr. Picard noted, "it is almost impossible to put a strike through successfully if scabs are allowed to break strikes. When a strike is on, unfortunate incidents often take place, scuffles which would not occur if there were no strike-breakers. It is up to the Government to adopt legislation compelling the employer to close his factory or establishment until negotiations are over."

"Here is what happens when an employer tries to hire other workers to replace those on strike. The strikers picket the building and stop the strike-breakers from stealing from them their means of earning a living. When they leave their homes, the strikers have no intention of harming anyone or of damaging the employer's property. Most of the time circumstances force the workers on strike to resort to violence."

"When there is a strike, instead of dealing severely with crowds and gatherings the police should stop the strike-breakers from approaching the factories and then they would not have any scuffles to deal with or any blows to give. The troubles that are caused by strikes occur because legislation dealing with the matter is very badly framed."

"At the present time," Mr. Picard continued, "inadequate and definitely incom-

plete legislation in this modern age of the year 1950 gives rise to situations such as those which prevailed in Asbestos where strikers and scabs were at grips, which made it necessary for the Provincial Police to intervene, with the results we all know."

"Adequate legislation would also prevent a recurrence of what is now taking place at the Classon Knitting Mills in Sherbrooke. As you know, a strike has been on for five months at that factory where, as a rule, there are 125 workers. The employer, a Dr. Reinhart from New York, did not want to put into effect the decision given by arbitration, so he merely closed his factory, with the result that a large number of workers, both men and women, are still unemployed"

"In the above case," Mr. Picard added, "if the Government had taken over the plant, the situation without issue which now prevails would have been avoided, even though the workers were justified in their claims, as is proven by the unanimous recommendation of the arbitration board."

"In general, if there had been adequate legislation, a bad light would not have been thrown on the workers on strike as was the case in these two typical disputes, and organized labour would have kept an unblemished and well-earned reputation."

"Present labour legislation forces the worker to violate the law," said Mr. Jean Marchand, general secretary of the CCCL, following Mr. Picard's statement.

"The scuffles which take place in most strikes are not deliberate on the part of the workers on strike, however, they are unavoidable because the workers' right to picket does not allow them even to threaten the strike-breakers. Face to face with the strike-breakers, the workers see their hopes for a better future and for greater security for themselves and their families in danger of being lost—those very hopes they aim to attain by going on strike."

Delegates Demonstrate at Factory on Strike

At the meeting held on Tuesday afternoon, the delegates to the CCCL Convention were given further information concerning the strike which has been on for five months at the Classon Knitting Mills in Sherbrooke. Miss Orietta Lacroix, treasurer of the National Association of Garment Workers in Sherbrooke, told the delegates the story of the strike.

The workers of that plant, Miss Lacroix said, went on strike last May because the employer refused to give effect to the decision of the arbitration board, according

to which the factory owner would have had to pay his workers an initial rate of 30 cents per hour in the case of female workers and of 40 cents per hour in the case of male workers. Since then, the owner has closed his establishment and has gone to New York, where he has been staying for the past five months. The employees tried to re-open negotiations with their employer, but it was impossible for them to reach him.

Following this explanation, Mr. Picard suggested that a fund be started then and there, and he appealed to the generosity of every convention delegate. The collection was taken up immediately and produced \$1,232.75.

On the suggestion of a delegate, the Convention decided to hold a public demonstration in front of the factory as soon as the afternoon sittings were over. Most of the 400 delegates took part in this public demonstration "as a sort of official protest against the improper capitalistic attitude adopted by the owner of this factory in the dispute which has been in existence for five months."

The Korean War

On the fourth day of the Convention, Canada's participation in the Korean war was discussed by the delegates. The Central Council of the Shawinigan national syndicates had submitted a resolution requesting the CCCL to protest strongly "against any participation by Canada in the Korean war or in any other future conflict outside its boundaries." In the preamble of the resolution, it was stated "that the United States has decided to go all out in this war, ostensibly to stop Communism from spreading in the world," that "nothing justifies the belief that it is possible to stop by force the spread of Communism," and the following statement made by His Holiness Pope Pius XII was quoted, "war brings nothing but ruin, death and all kinds of hardships."

Other resolutions had asked that there be no conscription in Canada for the defence of a foreign country. The various resolutions gave rise to lengthy discussion which led to a secret vote.

The Convention adopted the following recommendation:—

... The CCCL requests the Government to fulfill its obligations as a member of the United Nations and . . . urges that Canada should not undertake to do more than is reasonable in its participation in wars outside its boundaries.

Jean Marchand, general secretary of the Confederation explained the content of the Committee's recommendation and stated that there was no proof that the United

States was fighting in Korea to defend capitalistic interests and that he, himself, was rather of the opinion that the war was fought in defence of an ideal. Mr. Marchand stated that he was ready to defend democratic ideas wherever it might be necessary to do so. "I would prefer," he said, "to die standing than to perish in chains."

The Roman Catholic Church and War

The Rev. Father Henri Pichette, general chaplain of the CCCL, intervened in the discussion, to give the Roman Catholic Church's viewpoint in the matter. First of all, Father Pichette declared that it was not fair to quote the Pope's words in support of the assertions made by some delegates, and that the religious authorities have never taken a stand against war on Communism. "The Church," said Father Pichette, "recommends that labour disputes be settled by legal means; but when legal means have been of no avail and when a strike is necessary, then the Church is in favour of the strike. The Church takes this same attitude with regard to war. As some strikes are necessary, so are some wars necessary. It is dangerous for Catholics not to give aid to nations which are oppressed."

The general chaplain added that there is a fellowship among nations which requires that we give our support to those nations who fight in a just war to defend their freedom of faith and their way of life.

To those who find fault with the Canadian Government because it is meeting its international obligations, Mr. Picard declared that it was not up to the Convention to decide on the merits "of some war which may be fought here or there in the world." "It is difficult," he added, "for the Convention to ask the country not to meet its obligations; once participation in the Korean war had been decided upon, Canada assumed certain obligations concerning which the Canadian people have had occasion to express their opinion in their own way."

Other Resolutions

The delegates were asked to vote on 153 resolutions submitted by different syndicates and federations affiliated with the CCCL. These dealt with questions of administration, matters clearly of union interest, and questions of public interest.

Questions of Public Interest

The Convention went on record as favouring free schoolbooks; it also requested that measures be taken to make secondary and university education available to those classes of society which are not too well-off.

The CCCL favoured a legislative amendment to legalize provincial lotteries.

It requested that all owners of motor vehicles be compelled to purchase insurance so that the public may be protected.

It also asked:—

That the Provincial Government, through an Act adopted for this purpose, declare June 24 Saint Jean Baptiste Day, a holiday for all, and that this day be proclaimed a holiday in the Province;

That legislative amendments be adopted providing that any person required to appear as a jury member or as a witness, be paid at the same rate as in the said person's regular employment, so that there be no loss in earnings;

That the compulsory weighing of bread be on a Zone basis, as is now the case, since a standard weight, far from improving the situation, would only make it worse;

That a Bread Board comprising a sufficient number of inspectors provide closer supervision in order that there be no fraud in the sale at a lower price of bread which is not of the required weight for a particular Zone;

That the Convention urge upon the authorities stricter observance of the Sunday Act, both in factories and in shops;

That the CCCL co-operate with the Travelling Salesmen's League in its campaign against blasphemy;

That the provincial Act governing bars be amended to provide that these be closed on Sundays and that women be prohibited from entering them at all times;

That pressure be put on federal, provincial and municipal authorities to stop the very sources of materialistic thinking that spring from immoral magazines which have taken the place of comics;

That municipal regulations providing for the inspection of public buildings be observed;

That all wives in need who have not reached the age making them eligible for old age pension be protected by the Mothers' Allowance Act;

That the Provincial Government be urged to amend the Housing Act so that the Government and the Farm Credit Office may make direct loans to individuals as well as to groups interested in building houses.

A resolution was unanimously adopted requesting the appointment of an ambassador to the Vatican.

A further resolution was adopted as a protest by the CCCL against the imprisonment of Cardinal Mindszenty and the religious persecution practised behind the Iron Curtain. Finally, a resolution was adopted urging the Federal Government that a Canadian be appointed Governor General.

The appeals made at previous conventions for the adoption of a distinctive national flag were renewed.

Another resolution requested that a reduction of 10 per cent be allowed for donations to charitable organizations, with-

out having to attach receipts to Income Tax forms, as is done in the United States.

Furthermore, it was requested that the Federal Government protect the seniority rights of persons called or who may be called to the Armed Forces, upon their return to the service of the same employer.

Certain other requests, with regard particularly to heavy traffic on highways and electric power, were also examined.

Matters of Union Concern

The 40-hour week.—The Convention unanimously adopted a resolution requesting that the 40-hour week be put into operation and adopted through adequate legislation, and that the CCCL take the necessary steps to bring about a reduction of the work-week from 48 to 40 hours.

The CCCL will endeavour to unite with other labour unions of the pulp and paper industry to settle the matter of Sunday work in newsprint establishments.

Unemployment Insurance.—By way of amending a long list of claims concerning unemployment insurance, the Committee on Resolutions submitted the following report, which was adopted:—

1. That the number of hours worked in a week be added and should be considered only for the number of days to which they correspond.

2. That unemployment insurance benefit payments by cheque or by cash be accompanied by a statement showing the amount of benefit, the number of days covered and the balance of days remaining to the credit of the insured.

3. That the days for which benefits are not payable under Section 35 be abolished, and that the waiting period be set at 7 days.

4. That the Unemployment Insurance Act stipulate that the employer must keep the Unemployment Insurance book on the premises, so that the worker may examine it and claim it on separation.

5. That mobile offices be set up and instructed to visit places where there are no permanent offices, in order to save the workers expensive trips.

6. That the Act be amended so that any worker who is forced to take an unpaid vacation will be entitled to insurance benefits.

7. That the Act be amended so to cover employees of hospital and religious institutions.

Workmen's Compensation.—A resolution was adopted requesting the Provincial Government to extend the scope of the Workmen's Compensation Act to salaried employees of hospitals as well as to maintenance employees of religious and educational institutions. This resolution also requested that tuberculosis and other contagious diseases contracted while working

in sanatoriums or other hospitals be considered as industrial accidents under the Act.

Employment of Young People.—The Committee on Resolutions urged the Convention to ask the Provincial Government to prohibit employment of all young persons under 16 years of age, and to request that thorough enquiries be made before granting them working permits.

Employer Associations.—The Convention adopted a resolution requesting that the Labour Relations Act be amended in such manner that employer associations may not be certified. Another resolution declared the CCCL's opposition to certain constitutional powers granted employer associations incorporated under special Bill or otherwise. The Confederation urgently recommended that these associations be refused certification, that they be prevented from fixing rates to customers, making price agreements, determining *ex parte* the working conditions of employees who are members of the association, or from regulating apprenticeship.

That no provision in the above legislation should prejudice the acknowledged rights, privileges and prerogatives of labour unions, nor favour a coalition of employers against workers or labour unions.

Retroactive effect of agreements.—As requested by the Committee on Resolutions, and because the matter came within the scope of contracts, the Convention

rejected a resolution suggesting that the retroactive effect of collective agreements be made binding from the date an agreement comes into force.

Minimum wages.—The CCCL requested the Provincial Government to set a minimum wage rate of 75 cents an hour for all workers, male and female.

Election

The whole Executive of the Canadian and Catholic Confederation of Labour was re-elected in a body at the final meeting of the Convention.

The Executive for the coming year is as follows: President, Gérard Picard, Montreal; 1st vice-president, Gaston Ledoux, Granby; 2nd vice-president, Horace Laverdure, Quebec; 3rd vice-president, Lucien Dorion, Quebec; 4th vice-president, L. P. Boily, Jonquières; 5th vice-president, F. X. Legare, Rimouski; 6th vice-president, Rodolphe Hamel, Asbestos; general secretary, Jean-Marie Marchand, Quebec; and treasurer, Romeo Ethier, Montreal.

Representatives of federations and central units to the Executive Bureau were to be appointed later by each of these bodies. The appointment of the three members of the Arbitration Board to be set up to examine and settle differences within the Confederation was also deferred.

Next year's Convention will be held in the city of Quebec, at about the same date as the 1950 Convention.

WORKING CONDITIONS IN CANADIAN MANUFACTURING INDUSTRIES, OCTOBER 1949*

The Work Week

This second study of working conditions in the manufacturing industries of Canada shows a steady trend towards a shorter work week. By 1949 one-quarter of the employees were normally working 40 hours a week, while about 70 per cent had a normal week of 45 hours or less. More than 60 per cent of the plant workers in manufacturing were on a 5-day week in 1949, an increase since 1947 of 20 per cent.

Overtime Payment

Time and one-half continued to be the general rate paid for overtime after daily or weekly hours, but there was a tendency for more workers to receive higher rates for work on Sundays and statutory holidays.

Vacations With Pay

Almost all of the workers were eligible to receive an annual paid vacation, generally one week after a year of employment. There was a continuing trend towards vacations of two or three weeks after longer service.

Statutory Holidays

More establishments were reported observing statutory holidays, and a larger number were paying for these when not worked. Approximately 60 per cent of the workers were being paid for 6 or more statutory holidays.

* Information in this article was prepared from data obtained in the annual survey of wage rates and working conditions for 1949 conducted by the Economics and Research Branch of the Department of Labour. Employers were asked to report on wage rates and certain conditions of work in their establishment during the last pay period preceding October 1, 1949.

The sections on Provincial Legislation were summarized from the bulletin, *Provincial Labour Standards Concerning Child Labour, Holidays, Hours of Work, Minimum Wages, Weekly Rest-Day and Workmen's Compensation*, an annual publication of the Department of Labour.

This article was prepared in the Working Conditions and Social Analysis Section of the Economics and Research Branch, Department of Labour.

Manufacturing is the largest single industry in the highly industrialized economy of Canada. In 1949 the manufacturing industries employed one out of every four workers in the Canadian labour force, and contributed over one-third of the total labour income. The maintenance of a sound Canadian economy is dependent heavily on the growing productive activities of the manufacturing industries.

The provincial and major industrial distributions of the 6,408 establishments and 721,631 plant employees included in this analysis of working conditions in Canadian Manufacturing are shown in Tables Ia and Ib. The plant workers include all the employees of an establishment except the office staff. More than one-half of the workers were employed in the 3,020 establishments located in Ontario and almost one-third were working in the 1,706 plants in Quebec. Seven per cent of the workers were employed in British Columbia, five per cent in the Prairie Provinces and an almost equal proportion in the Maritime Provinces.

The Normal Work Week

One-quarter of all plant workers in the manufacturing industries of Canada were on a 40-hour week in October, 1949. Some 17 per cent were working 44 hours a week, 21 per cent were working 45 hours a week and 20 per cent were working 48 hours a week. This indicates some lessening in the normal weekly hours of work since 1947, the previous year for which comparable information has been published.¹ The proportion of the total plant employees reported working each of these predominant weekly hours during the past three years is as follows:—

Hours	1947	1948	1949
40	19%	20%	25%
44	14%	14%	17%
45	19%	22%	21%
48	30%	29%	20%

The five-day week was reported by 55 per cent of the establishments employing 61 per cent of the plant workers in Manufacturing. This represents an increase of ten per cent in the proportion of workers on a five-day week in 1949 as compared with 1948, and an increase of 20 per cent as compared with 1947.

A study of the trend in the normal work week from 1947, the first year for which information in this form is available, is subject to three qualifications:—

The largest proportion of workers covered in the annual survey of working conditions in Canadian Manufacturing, 17 per cent, was in the Iron and Steel Products Industry. Other large industrial groups were Food and Beverages, 13 per cent, and Transportation Equipment, 11 per cent. The Clothing, Textile Products, Wood Products and Paper Products Industries had each from eight to nine per cent of the total plant employees. The industrial groupings used in this report follow those contained in the Standard Industrial Classification Manual published by the Dominion Bureau of Statistics in 1948.

Twenty-two per cent of the plant workers in these manufacturing establishments were women. The largest proportion of female workers, 67 per cent, was employed in the Clothing Industry and the next largest proportion, 61 per cent, was employed in the manufacturing of Tobacco and Tobacco Products. Women workers comprised from 30 to 40 per cent of the plant employees in the Food and Beverages Industry, the Leather Products Industry and in the Miscellaneous Manufacturing Industries.

(1) the current material contains a much wider coverage of the industries previously used to represent the Manufacturing Industries;

(2) the adoption of the new Standard Industrial Classification has resulted in some small changes in the industries which make up the manufacturing groups;²

(3) the distribution of establishments and workers by normal weekly hours, in 1947, was based on the hours worked by the majority of employees in the establishment regardless of sex. The 1949 distribution of plant workers has been based on the weekly hours of the majority of workers of each sex. Thus, in those establishments where the male and female employees worked different weekly hours, all of the male workers were included under the hours worked by the largest number of males and all of the female workers were included under the hours worked by the largest number of females. This method of showing the

¹ "The Work Week in Manufacturing Industries, October 1947", THE LABOUR GAZETTE, June, 1949.

² The main industrial groups added to Manufacturing are: Auto Repair and Garages, and Boot and Shoe Repair. Electric Current Production and Distribution has been removed from the manufacturing group, as have those establishments trading in fresh fruits and vegetables and some dairy products.

distribution of employees by weekly hours gives a more accurate presentation of the data than that used previously.

The changes resulting from the above differences in the information for 1947 and 1949 are relatively minor, however, and the overall information is believed to be sufficiently comparable to indicate the broad trends in the normal work week in the Manufacturing Industries.

Provincial Legislation

Special provincial statutes limit the hours of work in factories in Ontario, Manitoba, Saskatchewan, Alberta and British Columbia, and factories legislation places some restrictions on working hours in New Brunswick and Quebec. In these last two provinces the legislation applies only to women and to boys under 18. The maximum weekly hours of work in these seven provinces are:—

	Hours
New Brunswick (females and boys under 18)	54
Quebec (females and boys under 18)	55
Ontario	48
Manitoba (men).....	48
(women)	44
Saskatchewan	44
Alberta	48
British Columbia.....	44

An industrial undertaking or group of undertakings may be exempted from the Act in Quebec, Manitoba, Saskatchewan, Alberta and British Columbia; and in all the provinces the administrative authority under the Hours of Work Acts has the power to permit exceptions from the maximum hours shown above. In the case of exemptions under the Hours of Work Act in Ontario, women and boys under 16 are not permitted to work more than 60 hours a week.

In Manitoba and Saskatchewan the statutory limits shown above apply unless time and one-half is paid for overtime.

Women may not be required to work more than six hours a week of overtime in the cities of Manitoba nor more than eight hours a week in the rural areas. In Saskatchewan, women in factories must receive time and one-half after 44 hours in a week, but in no case may they work more than 48 hours.

Other restrictions may be imposed on some classes of factories by Orders in Council under the Quebec Collective Agreement Act or the Industrial Standards Acts of Ontario, Saskatchewan and Alberta.

Normal Weekly Hours by Province

The normal weekly hours of work for plant employees varied greatly within each province as well as between them (Table IIa). The largest single group of employees was working 40 hours a week in Ontario and in British Columbia, 44 hours a week in Prince Edward Island, Nova Scotia and in each of the three Prairie Provinces, and 48 hours a week in New Brunswick and in Quebec.

A comparison of the proportion of workers in each province who were on a 40-hour week, a 44- to 45-hour week and a 48-hour week will give some indication of the differences in normal weekly hours between provinces:—

Province	44 to		
	40 hours per week	45 hours per week	48 hours per week
P.E.I.	11%	45%	14%
N.S.	4%	57%	22%
N.B.	2%	35%	30%
Que.	14%	31%	31%
Ont.	28%	41%	17%
Man.	26%	53%	9%
Sask.	16%	65%	13%
Alta.	25%	38%	22%
B.C.	60%	29%	1%

A further indication of the difference in weekly hours across Canada may be obtained by comparing the proportion of plant employees in each region working 44

TABLE Ia.—DISTRIBUTION OF ESTABLISHMENTS AND PLANT WORKERS BY PROVINCE

Manufacturing Industries of Canada, October 1949

	Canada (1)	Prince Edward Island	Nova Scotia	New Brun- swick	Quebec	Ontario	Mani- toba	Saskat- chewan	Alberta	British Colum- bia
Number of Establishments	(1) 6,408	17	209	146	1,706	3,020	289	142	253	625
Number of Plant Workers:										
Male.....	566,038	353	17,623	10,825	164,281	295,677	15,059	4,405	10,926	46,825
Female.....	155,593	82	2,631	2,524	60,285	75,566	4,917	554	1,904	7,119
Total.....	(1) 721,631	435	20,254	13,349	224,566	371,243	19,976	4,959	12,830	53,944

(1) Includes one establishment located in the Northwest Territories.

hours a week or less. Forty-eight per cent of the workers in the Maritime Provinces were in this group, 28 per cent of the workers in Quebec, 51 per cent in Ontario, 71 per cent in the Prairie Provinces and 96 per cent in British Columbia.

The distribution of establishments by province (Table IIb) showed about as much variation as the distribution of employees. The normal weekly hours of male plant workers has been used to obtain the distributions of establishments by province and by industry as, in some cases, the hours are different for male and female workers. Thus, in 720 establishments the male employees were working different weekly hours than those worked by the female employees, with the latter working

plant employees was working 40 hours a week in seven of the major industries shown in Table IIIa, 45 hours a week in six of the major industries, and 48 hours a week in four of the industries. In the Durable Manufactured Goods Division³ the largest group of employees, 27 per cent, was working 40 hours a week, while in the Non-durable Goods Division⁴ the largest group, 26 per cent, was working 48 hours.

A comparison of the proportion of employees in some of the larger industrial groups who were working 40 hours a week, 44 to 45 hours a week and 48 hours a week will again give an indication of the differences in normal weekly hours between industries:—

Industry	44 to		
	40 hours per week	45 hours per week	48 hours per week
Durable Manufactured Goods ³	27%	41%	13%
Non-durable Manufactured Goods ⁴	22%	35%	26%
Food and Beverages.....	15%	38%	28%
Textile Products (except Clothing).....	7%	45%	26%
Clothing (Textile and Fur).....	40%	34%	8%
Wood Products.....	30%	26%	12%
Paper Products.....	4%	22%	65%
Iron and Steel Products.....	21%	52%	10%
Transportation Equipment.....	31%	42%	12%

fewer hours in almost all cases. The proportion of women workers in these establishments, however, was relatively small.

In three provinces, Nova Scotia, Ontario and Alberta, the largest group of establishments reported operating on a longer normal work week than was worked by the largest group of employees. In New Brunswick, on the other hand, the largest group of employees was reported working 48 hours while the largest group of establishments reported operating 44 hours a week.

Comparing the proportion of establishments operating 44 hours a week or less, it is noted that, except in Quebec, the proportion of establishments operating below this limit was less than the proportion of workers reported working within this range. Twenty-nine per cent of the establishments in the Maritime Provinces, 36 per cent in Quebec, 44 per cent in Ontario, 61 per cent in the Prairie Provinces and 97 per cent in British Columbia reported operating on a normal week of 44 hours or less.

Normal Weekly Hours by Industry

The industrial distribution of employees and establishments by normal weekly hours shows as much variation both within and between industries as does the geographical distribution. The largest single group of

Workers on a 40-, 44-, 45- and 48-Hour Week in Manufacturing, 1947 to 1949

³ The Durable Manufactured Goods Division includes: Wood Products; Iron and Steel Products; Transportation Equipment; Non-Ferrous Metal Products; Electrical Apparatus and Supplies; and Non-Metallic Mineral Products.

⁴ The Non-Durable Manufactured Goods Division includes all the manufacturing industries except those in the Durable Goods Division shown in the previous footnote.

The industry having the largest proportion of its workers on the 40-hour week was the Printing, Publishing and Allied Industries group, which reported 71 per cent of its employees on this work week. The Food and Beverages Industry had a greater proportion of its employees on the 44-hour week, 27 per cent, than did any of the other major industries. The industry reporting the largest proportion of its workers on the 45-hour week, 76 per cent, was the Tobacco and Tobacco Products Industry; and the one reporting the largest proportion on the 48-hour week, 65 per cent, was the Paper Products Industry.

The industrial distribution of establishments by normal weekly hours of male plant workers (Table IIIb) reveals a large variation similar to that shown by the distribution of employees. The largest number of establishments were operating normally 40 hours a week in five of the major industries, 44 hours in one of the industries, 45 hours in four of the industries and 48 hours in five of the main industrial groups. In only one industry did more than half the establishments operate on the same work week: almost two-thirds of the plants in the Printing, Publishing and Allied Industries group reported operating 40 hours a week.

The Five-Day Week

Fifty-five per cent of the establishments employing 61 per cent of the plant workers in the manufacturing industries of Canada were operating on a five-day week. The largest proportion of workers on the five-day week, 72 per cent, was reported in Ontario, and the second largest proportion, (Continued on p. 1848)

Workers on a 5-day week and on a 40-hour 5-day week, 1947 to 1949

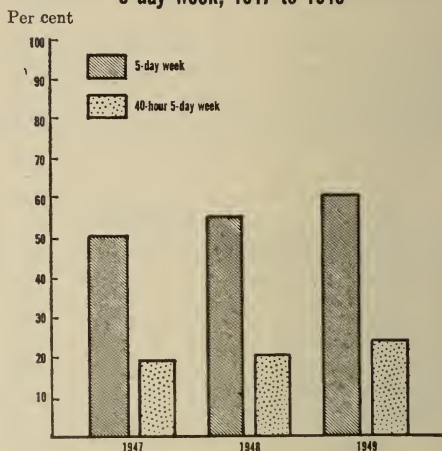

TABLE Ib.—DISTRIBUTION OF ESTABLISHMENTS AND PLANT WORKERS BY INDUSTRY

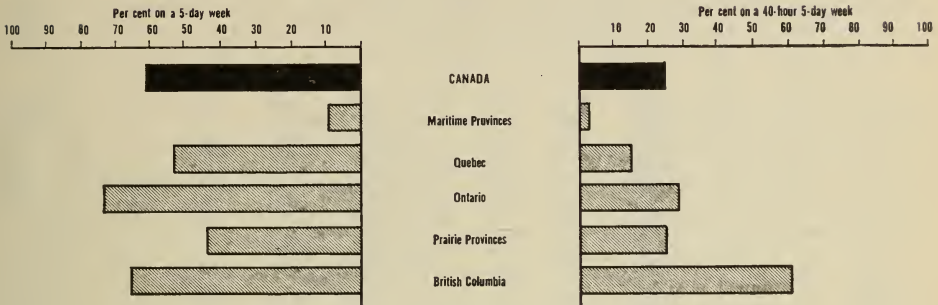

Manufacturing Industries of Canada, October 1949

66 per cent, was reported in British Columbia. Fifty-three per cent of the workers in Quebec, 43 per cent in the Prairie Provinces and nine per cent in the Maritime Provinces were reported working five days a week.

More than 40 per cent of the employees in all but two of the 17 industrial groups shown in Table IIIa were on a five-day week, and in five of these industries more than 80 per cent of the employees were working five days. These latter five industries were Electrical Apparatus and Supplies, 98 per cent, Tobacco and Tobacco Products, 92 per cent, Clothing (Textile and Fur), 84 per cent, Printing, Publishing and Allied Industries, 83 per cent, and Rubber Products, 82 per cent. The Paper Products Industry had the smallest proportion of workers, 22 per cent, on the five-day week.

Sixty-seven per cent of the employees in the Durable Manufactured Goods Division and 56 per cent in the Non-durable Goods

Division were normally working five days a week.

Two-thirds of the employees reported on a five-day week were working either 40 or 45 hours, with a larger proportion working eight hours a day for five days than there were working nine hours a day for five days. The 40-hour five-day week was the normal working week for 24 per cent of all plant workers in the manufacturing industries. The proportion of workers on this schedule ranged, geographically, from 60 per cent in British Columbia to two per cent in the Maritime Provinces; and, industrially, from 70 per cent in the Printing, Publishing and Allied Industries to less than one per cent in the Tobacco and Tobacco Products Industry (see chart on p. 1841).

Twenty-seven per cent of the workers in the Durable Goods Division of the manufacturing industries were reported on a 40-hour five-day week, compared to 22 per cent in the Non-durable Goods Division.

Overtime Payment

Payment for work after standard daily or weekly hours in the Canadian manufacturing industries was usually one and one-half times the regular wage in 1949. Time and one-half was also the predominant rate for work on Sunday, although double time was paid by a large proportion of establishments. More than one-third of the workers were employed in establishments paying double time for work on statutory holidays, and a large number of workers were in establishments paying time and one-half or double time and one-half. Detailed distributions of employees, both provincially and industrially, by the rate of overtime payment are presented in Tables IVa and Va; similar distributions by number of establishments are given in Tables IVb and Vb.

Payment after Daily or Weekly Hours

The majority of workers in each province and in each of the main manufacturing industries was employed, without exception, in establishments which paid time and one-half for work after standard daily or weekly hours. Nineteen per cent of the employees were in 1,356 plants which reported paying overtime rates only after regular weekly hours had been worked.

More than 3,500 establishments, employing almost 520,000 workers, reported paying overtime rates after regular daily hours of work. Ninety-two per cent of these workers were in establishments paying time and

one-half for overtime after daily hours Monday through Friday and a slightly smaller percentage were in establishments paying this rate for overtime on Saturday. In many establishments it was the policy to pay time and one-half for the first three or four hours of overtime and double time thereafter. This was the case for overtime on Monday through Friday in 175 establishments employing 23,400 workers and for overtime on Saturday in 191 establishments employing about 19,600 workers. One-quarter of the workers in the Printing, Publishing and Allied Industries were subject to this overtime policy.

Double time for overtime work on Saturday was reported paid by 104 establishments employing about 6,500 workers. More than half of these workers were employed in the Printing, Publishing and Allied Industries and were normally working a 40-hour 5-day week. A small number of workers, largely in the Clothing Industry, were in establishments paying time and one-quarter for overtime work during the week.

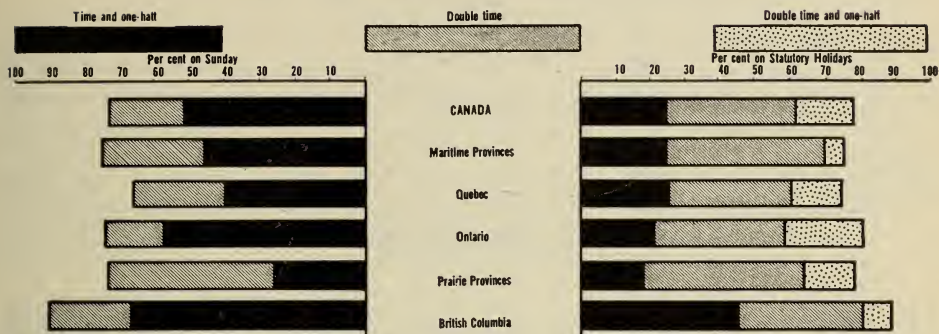

Of the 139,000 workers who were employed in establishments reporting overtime payment only after regular weekly hours had been worked, all but three per cent were entitled to receive time and one-half. Forty-three per cent of the workers in the Leather Products Industry, and 38 per cent each in the Textile Products and

(Continued on p. 1856)

Non-ferrous Metal Products Industries were in establishments paying overtime only after weekly hours.

Payment for Work on Sundays

Almost one-half of the establishments included in the survey, employing about one-quarter of the workers in the Manufacturing industries, did not report any overtime policy for work on Sunday. This was probably because no work has been done on a Sunday and none is anticipated. Sixty-eight per cent of the workers who were in the establishments reporting an overtime policy for work on Sunday were entitled to receive time and one-half, and 29 per cent were entitled to receive double time.

In only two industries were more than half the workers employed in establishments which paid double time for work on Sunday: Printing, Publishing and Allied Industries, 79 per cent, and Products of Petroleum and Coal, 65 per cent (see chart on p. 1849). Straight time and time and one-quarter for work on Sunday was paid by a small number of establishments, most of which were located in Ontario.

Payment for Work on Statutory Holidays

Thirty-seven per cent of the workers in Canadian manufacturing were in establishments paying double time for work on statutory holidays, 24 per cent were in establishments paying time and one-half, and 17 per cent were in establishments

paying double time and one-half. Triple time was reported paid by 51 establishments employing about two per cent of the employees. Nine per cent of the workers were entitled to straight time only for work on statutory holidays, and a small number were entitled to time and one-quarter. Statutory holidays here include the days when the plant is not operating by reason of Dominion, Provincial or Municipal holidays, or because of religious holidays regularly observed.

The largest group of workers in Prince Edward Island, Nova Scotia, Quebec, Ontario, Manitoba and Alberta were in establishments paying double time for work on statutory holidays, while the largest group in New Brunswick and British Columbia were in establishments paying time and one-half. In Saskatchewan, 71 per cent of the workers were entitled to receive double time and one-half.

In ten of the major industries the largest proportion of workers were employed in establishments reporting double time for work on statutory holidays, in four of the industries the largest proportion were in establishments reporting time and one-half, and in three the largest proportion were in those reporting double time and one-half. The industry having the largest proportion of its workers entitled to double time on statutory holidays, 84 per cent, is the Products of Petroleum and Coal Industry; and that having the largest proportion entitled to double time and one-half, 47 per cent, is the Electrical Apparatus and Supplies Industry (see chart on p. 1849).

Vacations with Pay

In 1949, more than 99 per cent of the plant workers in the manufacturing industries of Canada were employed in establishments which reported an annual vacation with pay policy for their employees. Ninety-three per cent of these workers were entitled to receive an initial vacation of one week with pay, or an equivalent, generally after a year of employment. Most of the remaining workers were in establishments which gave an initial vacation of two weeks, or the equivalent, usually after a year of employment.

Three-quarters of the employees were working in establishments which gave longer periods of vacation with pay as the worker's term of employment increased. Forty-five per cent of the workers were eligible to receive a maximum vacation of two weeks with pay, or an equivalent, generally after they had been employed five

years; and over 30 per cent were eligible for a maximum of three weeks, or the equivalent, usually after 15, 20 or 25 years of employment. Most of the establishments which reported a maximum vacation of three weeks with pay also gave an intermediate vacation period of two weeks, mainly after five years' service.

Since comparable information on vacations with pay was published⁵ the proportion of workers eligible to receive a maximum vacation of three weeks has increased from 20 per cent to over 30 per cent.

Almost 3,000 establishments, employing more than 55 per cent of the plant workers in manufacturing, reported that their plants

were shut down for a summer vacation period. About 1,600 plants, employing 159,000 workers, were shut down for one week, while 1,300 plants, employing 241,000 workers, were shut down for two weeks.

Provincial Legislation

Annual holidays with pay for most workers are provided by statute or under statutory authority in Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia. In all these provinces except Saskatchewan, a worker is entitled to one week's vacation with pay after a year of employment, and in Alberta he is entitled to a second week's vacation after two years' service. In Saskatchewan, a worker is entitled to two weeks' vacation with pay after a year of employment.

The rate of pay for the vacation is two per cent of annual earnings, or regular weekly pay if on a time basis, in Quebec, two per cent of annual earnings in Ontario, regular pay in Manitoba, Alberta and British Columbia, and one-twenty-sixth of annual earnings in Saskatchewan. A worker who has worked less than a year is entitled, in Quebec, to a half-day for each calendar month of employment and, in Saskatchewan one day for each month. If he terminates his employment during a working year he is entitled to holiday pay, in all provinces but Manitoba, for the time he has been employed.

Vacations by Province

At least 99 per cent of the plant workers in all provinces except the Maritimes were in establishments reporting an annual vacation with pay policy (Tables VIa and VIb). Six establishments employing 30 per cent of the workers in Prince Edward Island, 56 establishments employing eight per cent of the workers in Nova Scotia and 47 establishments employing 18 per cent of the workers in New Brunswick either did not give vacations with pay or did not report any such policy.

More than two-thirds of the workers in all the provinces except Saskatchewan were entitled to receive an initial vacation with pay of one week, or an equivalent, usually after a year of employment. In Saskatchewan, almost all of the workers were employed in establishments which gave a vacation of two weeks with pay, or an equivalent, mainly after one year's service.

In general, the period of vacation with pay was increased as the worker's term of employment lengthened. Sixty per cent of the workers in Saskatchewan, however, were in establishments which had only one

vacation period regardless of the length of employment, but in almost all these cases the vacation period was two weeks. Of the workers in establishments reporting a vacation policy, 58 per cent in New Brunswick and 45 per cent in Prince Edward Island maintained their initial annual vacation period of one or two weeks regardless of their length of service with the establishment.

In all of the provinces except Prince Edward Island, New Brunswick and Saskatchewan, more than 30 per cent of the workers were employed in establishments which gave a maximum vacation of two weeks with pay, or an equivalent, generally after five years of employment. In Alberta, however, this two weeks' vacation was usually given after two years' service. The proportion of employees eligible for a maximum vacation of two weeks with pay reached 57 per cent in Alberta and over 60 per cent in British Columbia. In New Brunswick almost 29 per cent of the workers were in establishments giving a maximum vacation of two weeks.

From 30 to 40 per cent of the workers in Prince Edward Island, Nova Scotia, Quebec, Ontario, and Alberta were eligible to receive a maximum vacation of three weeks with pay, usually after 20 or 25 years of employment. Most of the establishments reporting a maximum vacation of three weeks also reported giving an intermediate vacation of two weeks, generally after five years of employment.

A small number of workers, most of whom were in Ontario, were eligible to receive a maximum vacation of four weeks with pay after 25 years of employment.

Vacations by Industry

In only two of the 17 industrial groups shown in Tables VIIa and VIIb were more than one per cent of the plant employees in establishments which did not report having a vacation with pay policy. About three per cent of the workers in the Food and Beverages Industry and five per cent in the Wood Products Industry were in establishments which either did not give annual vacations with pay or did not report a vacation policy.

More than two-thirds of the workers in all but one of the manufacturing industries were eligible for an initial vacation of one week with pay, or an equivalent, generally after a year of employment. Forty per cent of the workers engaged in the manufacture of Products of Petroleum

and Coal were eligible for this vacation period, but the remaining 60 per cent were in establishments which gave an initial vacation of two weeks with pay, or an equivalent of one day per month. Thirty-one per cent of the workers in the Leather Products Industry and 29 per cent in the Printing, Publishing and Allied Industries were also eligible to receive an initial vacation of two weeks, mainly after a year of employment.

The initial vacation of one or two weeks with pay was maintained regardless of the duration of employment in establishments employing more than one-quarter of the workers in seven of the manufacturing industries. Fifty-nine per cent of the workers in the Leather Products Industry and forty-two per cent in the Printing, Publishing and Allied Industries maintained their initial vacations, but for the majority of workers in these industries the initial vacation was two weeks with pay.

More than one-third of the workers in all but three of the industries were employed in establishments which gave a maximum vacation of two weeks, or an equivalent. This vacation period was given generally after five years of employment

in all these industries except the Chemical Products Industry, where a two or three-year requirement was more common.

Many of the industries had a large proportion of their employees in establishments which gave a maximum vacation of three weeks, or an equivalent six per cent of earnings, usually after 15, 20 or 25 years. Eighty-six per cent of the workers in the Tobacco and Tobacco Products Industry were eligible to receive a maximum vacation of three weeks after 20 or 25 years, 81 per cent in the Products of Petroleum and Coal Industry were eligible to receive this period of vacation after 15 or 25 years, and 76 per cent of the workers in the Electrical Apparatus and Supplies Industry were reported eligible to receive three weeks with pay, or an equivalent, generally after 20 years. As has been mentioned above, most of the establishments reporting a maximum vacation of three weeks with pay also reported an intermediate vacation of two weeks.

The few workers who were eligible to receive a maximum vacation of four weeks with pay were employed largely in the Iron and Steel Products Industry.

Statutory Holidays

Almost one-half of the plant workers in the manufacturing industries of Canada were employed in establishments which observed eight statutory holidays in 1949. Eighty-three per cent of the workers were in establishments which observed from six to nine holidays. This indicates some increase in the proportion of employees in these groups since 1947, the previous year for which comparable information has been published.⁶ At that time, one-third of the employees were in establishments which reported observing eight statutory holidays and three-quarters were in those which reported observing from six to nine.

Observed statutory holidays, in this article, include those days when the plant is not operating by reason of Dominion, Provincial or Municipal holidays; or because of religious holidays regularly observed by the establishment.

In most of the establishments the workers were paid for some or all of the statutory holidays observed although they did not work on these days. If work was necessary

on the observed holidays the employees generally received a premium payment in addition to their regular rate. Fifteen per cent of the workers were employed in establishments which did not pay for statutory holidays when not worked; and information on payment for statutory holidays was not reported for about one per cent of the workers. In 1947, establishments employing 34 per cent of the workers reported that none of the statutory holidays were paid for if not worked.

Fifty-five per cent of the plant workers were entitled to their regular pay on six to eight statutory holidays observed by the establishments in which they were employed, and 73 per cent were entitled to their pay on three to eight statutory holidays not worked. This information shows a substantial increase in the proportion of employees being paid for statutory holidays when not worked and in the number of holidays for which payment is made. Thirty per cent of the workers were in establishments paying for six, seven or eight statutory holidays in 1947 and 55 per cent were paid for three to eight holidays if not worked.

⁶ "Statutory Holidays in Manufacturing Industries, October 1947", *The Labour Gazette*, May 1949.

The proportion of workers employed in establishments observing and paying for various numbers of statutory holidays in 1949 is as follows:—

Number of Statutory Holidays	Per Cent of Workers	
	Holidays Observed	Holidays Paid For
None	.3	14.9
1-3	.9	11.8
4	4.2	7.3
5	3.4	4.9
6	9.7	20.6
7	14.1	7.3
8	45.7	27.0
9	13.1	3.1
10	4.2	.8
11	2.4	.6
More than 11	1.6	.4
Other periods	—	.1
No information	.4	1.2
Total	100.0	100.0

Provincial Legislation

Some statutory provision concerning public holidays is made in Nova Scotia, Quebec, Manitoba, Saskatchewan, Alberta and British Columbia. Factories in Manitoba and British Columbia must be closed on public holidays unless permission is given for employment.

Wages in relation to public holidays are dealt with under minimum wage laws in Nova Scotia, Quebec, Manitoba, Saskatchewan and Alberta. In Nova Scotia there can be no deduction from the minimum weekly wage for women because of a holiday. The Quebec General Wage Order 4 has no provision for public holidays, but some special Orders require holidays to be observed or a punitive rate paid.

No employer in Manitoba may require any woman to work on a public holiday unless a permit is obtained from the Minister of Labour; nor may he make any reduction below the minimum weekly rate from the wages of a full-time woman worker who does not work on the holiday. If permission to work on a public holiday is granted, the worker must be paid, in addition to the regular daily rates, a day's pay at not less than the minimum rate; or she must be given a day off without loss of pay within seven days or at some agreed later date.

Full-time workers in Saskatchewan must be paid a full week's wages at the regular weekly rate if they do not work on a public holiday; and if work is required on a holiday they must be paid two and one-half times the regular rate.

In Alberta, no deduction may be made for time not worked on a holiday when the employer's place of business is closed.

Statutory Holidays by Province

The number of statutory holidays observed and paid for varied greatly within each of the provinces shown in Tables VIIIa and VIIIb. The largest single group of workers in all of the provinces except New Brunswick and British Columbia were employed in establishments observing eight statutory holidays in 1949. Seven statutory holidays were observed by the largest group of workers in New Brunswick; and nine

holidays by the largest group, almost one-half, in British Columbia.

Some indication of the variation between provinces in the number of statutory holidays observed may be obtained by comparing the proportion of workers in each province receiving less than eight and more than eight statutory holidays with those who receive eight holidays. This distribution, shown at top of next page, does not include those workers for whom no information was reported:—

(1) Includes one establishment located in the Northwest Territories.

The distribution of establishments by the number of statutory holidays observed reveals a distribution somewhat similar to that of the workers, except in the provinces of New Brunswick and Quebec. The largest number of establishments in New Brunswick reported observing nine statutory holidays although the largest number of employees were reported in establishments observing seven days. In Quebec, an almost equal number of establishments reported observing seven and eight statutory holidays, but a much larger number of workers were employed in the latter group of establishments.

Many workers were employed in establishments which did not pay for any of

the statutory holidays if these days were not worked. This was particularly the case in British Columbia, where more than 45 per cent of the workers were in establishments which did not pay for statutory holidays not worked. In New Brunswick and Nova Scotia there were also large groups of workers, 42 per cent and 36 per cent respectively, who were not paid for statutory holidays which they did not work.

The largest single group of workers in Prince Edward Island, Ontario and each of the three Prairie Provinces were paid for eight statutory holidays when not worked. The largest group in Quebec received payment for six of the statutory

The distribution of establishments according to the number of statutory holidays paid for although not worked is, with but few exceptions, similar to the distribution of workers. In Quebec the largest group of workers were paid for six statutory holidays, but by far the largest single group of establishments, 27 per cent, were those which reported paying for none of the statutory holidays if not worked.

Statutory Holidays by Industry

In all but two of the industrial groups shown in Tables IXa and IXb the largest proportion of plant workers were employed in establishments which reported observing eight statutory holidays in 1949. Fifty-three per cent of the workers in the Prod-

ucts of Petroleum and Coal Industry were in establishments reporting nine observed statutory holidays and 45 per cent in the Paper Products Industry were employed in establishments reporting four observed holidays. The number of statutory holidays observed varied substantially within most of the manufacturing industries. In the Electrical Apparatus and Supplies Industry and the Iron and Steel Products Industry, however, 90 per cent and 70 per cent of the workers respectively were in establishments which observed eight statutory holidays. Thirty-eight per cent of the workers in the Tobacco and Tobacco Products Industry were employed in five establishments which reported observing eleven statutory holidays.

The largest group of establishments in all but one of the industries reported observing eight statutory holidays. The exception was the Products of Petroleum and Coal Industry, in which the largest group was reported to be observing nine holidays. Forty-five per cent of the workers in the Paper Products Industry were employed in establishments reporting four observed statutory holidays, but more than twice as many establishments, smaller on the average, reported observing eight holidays.

In only two industries were more than one-quarter of the workers in establishments which did not pay for any of the observed statutory holidays if these were not worked. About 60 per cent of the workers in the Wood Products Industry and

40 per cent in the Leather Products Industry did not receive pay for statutory holidays not worked.

The largest proportion of workers in six of the industrial groups shown in Table IXa received payment for eight statutory holidays if not worked, and in five of the industries the largest proportion were paid for six holidays. Three, four, seven and nine statutory holidays were predominant in one industrial group each. In the two remaining industries, mentioned above, the largest group of employees were not paid for any of the statutory holidays if not worked.

About 80 per cent of the workers in the Electrical Apparatus and Supplies Industry and one-half of the workers in the Iron and

Steel Products Industry were paid for eight observed statutory holidays. In the other industries the number of statutory holidays paid for if not worked varied widely, with no single number of days applying to more than one-half of the employees.

The proportion of establishments which reported making no payment for statutory holidays unless these days were worked was larger than the proportion of workers employed in these establishments. Fifteen per cent of the employees were in 26 per cent of the establishments which paid only for work done on statutory holidays. Nine

Industrial groups reported the largest proportion of establishments in this category, but in only two of these industries were the largest number of workers in these establishments.

The largest group of establishments in five of the industries reported paying for eight observed statutory holidays, and in all but one of these the largest group of workers were in these same establishments. In the Chemical Products Industry, the exception, a slightly larger proportion of workers was reported paid for six observed holidays than for eight.

FULL EMPLOYMENT PROGRAM ADOPTED BY THE ECONOMIC AND SOCIAL COUNCIL

At the conclusion of a long and painstaking debate which was characterized by a spirit of co-operation and a willingness to compromise, the United Nations Economic and Social Council recently adopted a resolution designed to provide the framework of an international program against unemployment. The Council's action, which has been hailed as an important step in pursuit of the "full employment" objective contained in the United Nations Charter, is reviewed in the following article.

Resolute determination to avert a recurrence of the mass unemployment of the 1930's was one of the strongest ingredients in world public opinion at the close of World War II. It found expression in the "full employment" policies adopted by many national governments, and, of course, it was reflected at San Francisco when the promotion of "full employment" was written into the United Nations Charter as one of the basic objectives and obligations of all members.

But there was little occasion for undue concern with the problem of unemployment in the first years of the post-war period. The unsatisfied civilian demands of the years of hostilities, augmented by the requirements of European reconstruction, were sufficient to ensure a high level of production and employment. Under these conditions the implications of the Charter's "full employment" pledge were negligible.

It was not until 1949 that the situation changed. A temporary recession in the United States in that year was responsible for a decline in effective world demand. The market for European exports was substantially reduced, problems of currency

exchange multiplied, and unemployment rose to noticeable and even serious proportions on both sides of the Atlantic.

It was not surprising, therefore, to find the Economic and Social Council, at its ninth session, in the summer of 1949, turning to a consideration of remedial action which might be taken. A resolution was passed requesting the Secretary-General to appoint a small group of economists to prepare a report on national and international measures required to achieve full employment. The report was submitted to the Council in February, 1950 (L.G., July, 1950, pp. 994-999); and, at the eleventh session of the Council, which began in Geneva early in July, 1950, the contents of the report provided the basis for a lengthy debate which ended with the passage of a long and comprehensive resolution setting forth the framework of an international program against unemployment.

United Kingdom and United States Draft Resolutions

From the outset of the Council's "full employment" debate, it was apparent that discussion would revolve around the draft

Highlights of UNITED NATIONS "FULL EMPLOYMENT" PROGRAM

Following are the salient features of the international "full employment" program which will become effective if a resolution recently adopted by the Economic and Social Council is approved by the United Nations General Assembly.

1. The Economic and Social Council will hold an annual debate on employment, bringing unemployment problems in all parts of the world under international consideration.
2. Each country will be asked to say how it defines "full employment," and to publish an annual statement of its economic objectives, including, if practicable, a statement of quantitative goals or forecasts relating to employment, production, consumption, investment, etc.
3. Each country will be expected to consider a series of specified techniques for achieving its economic objectives, and to announce and review periodically "the policies, programs and techniques which it intends to pursue."
4. Each country will be asked to consider a series of specified measures for international co-operation towards the maintenance of full employment; and to avoid trade, currency or investment policies which might have an adverse economic effect abroad.
5. Three groups of independent experts will be appointed by the Secretary-General: two to analyze the reports of governments on their progress in achieving economic goals domestically and internationally; and a third to study the special employment problems of underdeveloped countries.

The resolution embodying this program was unanimously approved by the Economic and Social Council on August 16, 1950.

resolutions submitted by the United States and United Kingdom delegations. These resolutions, which were placed before the Council on the opening day of debate, drew the divergent views of the two delegations into sharp focus, and indicated that the adoption of a final resolution acceptable to all parties would require compromise.

The proposals contained in the United Kingdom resolution followed closely the recommendations set forth in the report of the experts—recommendations which, in the view of a number of delegates, were somewhat radical and overly-elaborate. Among other things, the British resolution would have imposed upon each member government an obligation to set quantitative “targets” for maximum unemployment or minimum employment, these targets to be analysed by the Secretary-General “with a view to elucidating the comparative degree of achievement aimed at by each Government”. Member governments would also have been required to submit reports outlining the measures they intended to invoke in the event of rising unemployment, fluctuating price levels or inflation.

With the object of preventing the spread of depression from one country to another, the United Kingdom resolution called for an international agreement whereby each government would undertake, “in the event of a decline in effective demand within its borders”, to maintain an adequate flow of its currency to the rest of the world, “preferably by maintaining imports or alternatively by the provision of additional credits.” A further agreement designed to provide a high and regular flow of capital export for developmental purposes was also proposed. And finally, the resolution called for the appointment of a group of experts to study the problem of unemployment and underemployment in underdeveloped countries.

The draft resolution submitted by the United States was more moderate in tone, shorter in length, and the measures it proposed were less rigid. One of its highlights was a proposal whereby the problem of achieving and maintaining “full and productive employment” and an “equilibrium in balances of payments” would be considered annually by the Economic and Social Council.

The Canadian Position

The first day of debate also saw the submission of a Canadian draft resolution, and on July 18 the head of the Canadian delegation, the Hon. Alphonse Fournier, made a speech in which the position of his delegation was made clear.

After congratulating the experts on the excellent quality of their work, Mr. Fournier commented at some length on the various features of their report. Noting that the experts had concentrated on devising measures to prevent the repetition of the mass unemployment experienced after the crash of 1929, he pointed out that, since that time, the risk of general unemployment had been substantially reduced as a result of considerable progress in the field of economic policy. Governments, he observed, now, had much more effective instruments with which to influence their national economies, and their policies were increasingly directed towards the promotion of social welfare, international security, a high level of commercial exchanges and a rapid and healthy economic development. In view of this, Mr. Fournier felt that the experts might reasonably have been expected to include in their report an analysis of inflation, excessive demand and over-employment—problems which, in recent years, have been prevalent in many countries.

Mr. Fournier next turned to a consideration of the measures recommended by the experts for use in the domestic field. His first remarks are officially summarized as follows:—

The principle of fixing employment objectives was most desirable, and Canada had already been following that course of action for several years. The objectives had been set out in a report on income and employment submitted to the Canadian Parliament in 1945.¹ In that document, the Canadian Government had undertaken to maintain a high and stable level of employment and income and, moreover, had described the action it proposed to take with a view to implementing that policy: stimulation of export trade by measures designed to facilitate the recovery of overseas countries and by international co-operation aimed at re-establishing a multilateral system of international trade; encouragement of private investment by means of tax adjustments, by a monetary policy designed to maintain suitable interest rates, and by the grant of credits through government agencies; stabilization of consumption by the distribution of family allowances, unemployment insurance benefits, old-age pensions and other social security payments; maintenance of a fixed price level for agricultural and fishery products, with the object of protecting the income of the primary

¹ This report was summarized in the *LABOUR GAZETTE* for May, 1945, p. 616.

producers against a sudden sharp slump in prices; and, finally, the direction of public investment in such a way as to reinforce private investment whenever the employment situation made it desirable to increase public investment.

In the field of fiscal policy, the Canadian Government was prepared to accept any deficits caused by its employment and income policy in the event of increased unemployment. On the other hand, the Canadian budget estimates provided for surpluses in periods of full employment and high incomes.

Canada's economic policy was therefore in accordance with the first of the general principles enunciated by the experts.

On the other hand, Mr. Fournier pointed out that Canada could not undertake to establish a maximum percentage of unemployment. Such a target, he explained, was not suitable in countries in which the loss of earnings and underemployment stemming from a decline in the demand for primary products might be just as important as the percentage of actual unemployment. Consequently, the type of objective set up as a guide for economic policy must be left to the decision of individual governments acting in the light of circumstances in their particular economies.

With regard to the international measures recommended by the experts, Mr. Fournier spoke out against the establishment by lending countries of rigid foreign investment targets. He further stated that the Canadian delegation would have difficulty in accepting a recommendation of so specific and automatic a nature as that suggested by the experts in regard to the International Monetary Fund. He did, however, feel that general foreign investment targets were necessary, and also considered it essential to work out methods of realizing these targets. To this end he suggested that member governments should, at the beginning of each year, submit reports describing recent national trends and future prospects in employment, production and trade. These reports, he proposed, should be summarized and commented upon by the Secretary-General, and forwarded to the governments concerned.

With further reference to the question of international movements of capital, the Canadian delegate stated that creditor countries should be urged "in their own interest as well as in that of the world at large", to make every effort to maintain their net capital exports at a high and stable level.

In conclusion, Mr. Fournier associated himself with the desire expressed by other

delegations for the appointment of a "fresh committee of experts" to study the problems of under-employment in the under-developed countries.

General statements were made by virtually all other members of the Council, by representatives of the International Labour Organization,¹ the International Confederation of Free Trade Unions, and the International Monetary Fund, and by Mr. Nicholas Kaldor, a member of the group of experts, who gave his opinion in an individual capacity on the various points raised during the debate.

Although delegations from the Communist countries were not present at the debate, the Communist position in regard to the report of the experts was expressed by Mr. Fischer, a representative of the World Federation of Trade Unions. Unemployment, he stated, was increasing and would continue to increase throughout the capitalist world. The experts, according to Mr. Fischer, had failed to see that unemployment "was a consequence of the increasing poverty of the masses and of the all-embracing profit motive, which dominated the capitalist system. . .".

The Adopted Resolution

After a debate of almost five weeks' duration, the Economic and Social Council finally gave its approval on August 16 to a lengthy resolution, setting forth the basic elements of an international "full employment" program. The passage of the resolution was immediately greeted with warm expressions of satisfaction by the President of the Council (Mr. Hernan Santa Cruz of Chile), and by the representatives of several countries including the United States, France and the United Kingdom.

The resolution's preamble, which is followed by several operative sections each dealing with a particular aspect of the overall problem, is of some significance inasmuch as it contains an expression of the Council's confidence in the democratic process. "Governments", the Council recognizes, "can achieve and maintain full and productive employment in an expanding world economy under conditions ensuring fundamental and economic freedoms to the individual."

Ensuring Regular Systematic Considerations of Employment Problems by the Council.—The first operative section of the resolution gives expression to the Council's decision to place on its agenda each year

¹The ILO representative informed the Council of the resolution on Action Against Unemployment adopted at the 1950 session of the International Labour Conference (L.G., Aug., 1950, p. 1157).

"the problem of achieving and maintaining full employment with progressively improving levels of production, trade and consumption, and maintenance of or progress toward the achievement of equilibrium in balances of payments."

Encouraging the Adoption of Effective Domestic Full Employment Policies.—

To this end, the Council, in the important second section of its resolution, makes a number of proposals. The first of these, which resolved one of the most controversial issues of the debate, "recommends" that each Government:—

- "(a) Publish annually a statement of its economic objectives for the ensuing year or for such longer period as may be appropriate, making special reference to the purposes set out in Articles 55 and 56 of the United Nations Charter, and being accompanied, wherever practicable, by a statement of quantitative goals or forecasts relating to employment, production, consumption, investment or such other pertinent measurable economic factors as may be significant indicators of the trends of its economy;
- (b) Publish as soon and as precisely as is practicable the standard by which it defines the meaning of full employment as a continuing objective of policy, such standard being expressed, wherever possible, in terms either of employment percentages or of absolute numbers of unemployed or in ranges of such percentages or numbers; and thereafter publish such revised standard as may become necessary from time to time".

The Council further recommends that each Government "formulate, announce, and periodically review . . . the policies, programs and techniques which it intends to pursue" for the purpose of achieving its economic objectives. Particular reference is made to the following:—

- "(a) Measures, such as the adaptation of fiscal, credit, monetary, investment, wage and price policies, to promote steady economic expansion;
- (b) Measures to combat recessionary tendencies, such as measures to influence the volume of investment, to increase the flexibility of budget and fiscal policies, and to prevent undue fluctuations in the incomes of primary producers;
- (c) Special corrective measures, whether of a discretionary or of an auto-

matic type, to meet emergency unemployment situations that may arise;

- (d) Measures to avoid inflation and to prevent excessive increases in the price level;
- (e) Measures to promote the geographic and occupational mobility of labour".

Full information concerning national economic trends and developments, and governmental objectives, programs and policies, is to be submitted to the Secretary-General for analysis by the Economic, Employment and Development Commission. The Commission is requested to call attention to possible international repercussions of national policies, to formulate "significant problems of international concern" for consideration by the Council, and to recommend appropriate action.

Encouraging Effective International Full Employment Policies.—

In this, the third and longest section of the resolution, the Council is mainly concerned with developing the techniques and machinery necessary to prevent the spread of depression and unemployment from one country to another.

In the first place, each Government is advised to intensify its efforts to achieve and maintain equilibrium in its balance of payments, such equilibrium to be characterized by:—

- "(a) Conditions of trade involving, along the lines envisaged in the relevant international agreements; (i) the absence of quantitative restrictions on international trade imposed for balance of payments reasons and of exchange restrictions on current account transactions (as defined in the Articles of Agreement of the International Monetary Fund); (ii) a reduced level of other trade barriers; and (iii) a minimum of discrimination in the application of such trade, monetary or investment restrictions as may still exist;
- (b) A level of reserves of convertible currencies and gold which would be sufficient to enable a country to meet normal fluctuations in its receipts of foreign exchange; and
- (c) An increased and stable flow of international investment funds".

With further reference to this question, each Government is advised to furnish the Secretary-General, in reply to a special questionnaire, with "quantitative estimates of the balance of international payments that it hopes to attain by 1954", together

with "a classification of its estimated trade by major commodities important in its foreign trade". Replies are to be analysed and commented upon by a group of three independent experts in a report which is then to be discussed by the Economic, Employment and Development Commission. The Commission will undertake to call attention to major problems and will recommend appropriate action by the Council, and the Council, for its part, will consider the whole matter at its fourteenth session.

In the second place, the Council recommends that Governments:—

- (a) Achieve and maintain, to the extent feasible, a high level and regular rate of flow of international investment capital for development purposes;
- (b) Strive to prevent lapses in the flow of international investment resulting from or associated with economic recessions; and
- (c) Continue to co-operate in efforts to achieve these results by both national and international measures".

It also recommends that Governments:—

- (a) Seek to avoid, in their economic policies and programs, measures which would be likely to have seriously adverse effects on the balance of payments or employment levels of other countries;
- (b) In the event of a domestic recession adopt, to the extent feasible, measures to offset the adverse effects of such recession on the balance of payments or employment levels of other countries; and
- (c) Continue to co-operate in investigating ways and means for preventing domestic recession from spreading to other countries".

The International Bank for Reconstruction and Development and the International Monetary Fund are urged to take every possible action to aid their member governments in the event of economic recession.

The Secretary-General is asked to appoint a group of three to five independent experts to prepare a report "formulating and analysing alternative practical ways of dealing with the problem of reducing the international impact of recessions that may arise". This report is to be studied by the Economic, Employment and Development Commission and considered by the Council at its fourteenth session.

The resolution also advises Governments, specialized agencies and the Secretary-General to "pursue the action already taken in the field of migration, taking into consideration the importance of facilitating the international mobility of labour for the solution of the problems of full employment".

Facilitating the Council's Further Consideration of the Problem of Unemployment, Particularly in the Less-Developed Countries.—One of the most frequent

objections to the report of the original group of experts was that it failed to deal with the problems of underdeveloped, predominantly agricultural countries, and, during the debate, most delegations, including those of the United States, Canada and the United Kingdom, expressed the view that a special study should be undertaken to meet this shortcoming. Accordingly, the Council wrote into its resolution a section in which the Secretary-General is requested to appoint still another group of independent experts, this group to be responsible for the preparation of a report outlining national and international measures to reduce unemployment and under-employment in the underdeveloped areas of the world.

PRESENTATION OF TABLET COMMEMORATES WARTIME WORK OF INTERNATIONAL LABOUR ORGANIZATION AT MCGILL UNIVERSITY

An interesting ceremony was held at McGill University on September 14, 1950, commemorating the wartime stay of the International Labour Organization on the University campus.

In the year 1940, when Nazi Germany overran most of the continent of Europe, the ILO left its headquarters in Switzerland, and found a temporary home in Canada, on premises owned by McGill.

Here the ILO remained until 1948. In that year it returned to Geneva.

In gratitude to McGill for its wartime hospitality, the ILO presented to the University a bronze tablet, which was unveiled on September 14 by the Hon. Milton F. Gregg, Minister of Labour.

Recalling that the purpose of the ILO was "a crusade to raise and equalize the standard of living of people everywhere," Mr. Gregg said that this was never a more lively topic than at the present time.

"No doubt," he continued, "when the foundations of this organization were laid in 1919, on the principle that poverty was a major cause of wars, there must have been many who dubbed it a far-fetched idea.

"However, enough far-sighted men did assemble to write the principles for the Organization which began with the official blessing of world leaders. How far-sighted they were we now begin to realize. That Canada was an original member is a reason for pride.

"I am honoured to have a part in this ceremony, by which the International Labour Organization records its gratitude to McGill University—the University which gave it a home during the dark days of the last war.

"Dr. Cyril James, who is with us today, was probably more active than any other person in arranging that the ILO should move to Canada in 1940.

"It is interesting to note that the late Right Hon. Mackenzie King took a great personal interest in this matter, and was responsible for the invitation of the Government."

ILO Representative Recalls Wartime Experiences

In a review of the ILO's stay in Canada, Mr. C. W. Jenks, Assistant Director-General of the ILO, described

some of the problems that had to be overcome, and dwelt on the significance of the episode in the history of the world movement towards a "stable peace of freedom and progress."

"We have come together today," he said, "to record a memorable episode in the history of international co-operation. Here the International Labour Organization kept alive throughout the Second World War the ideal and practice of organized international effort to promote economic and social progress on the basis of political freedom. Ten years after we first came here, almost to the day, Director-General David Morse has asked me to come back once more to express on his behalf the permanent gratitude of the International Labour Organization for all which the people and Government of Canada, the Government of the Province of Quebec, the employers' organizations and the organized labour movement of Canada, the citizens, the press and the printing trade of Montreal, the Royal Bank of Canada, the University of Montreal and especially the Governors, Principal and Faculty of McGill, did to make it possible for the ILO to discharge in a world at war the responsibilities committed to it by its member nations.

"Our debt of gratitude to the Government of Canada is particularly great." It was the prompt response of Mr. Mackenzie King, who had taken a close interest in the work of the International Labour Organization since 1919, which made it possible for John Winant and Edward Phelan to carry out, with the support of the Governments of the free peoples all over the world, the policy laid down by the Governing Body of maintaining the activities of the International Labour Organization throughout the war. To Mr. King, Dr. Skelton and their immediate advisors, the International Labour Organization owes a lasting and immeasurable debt. The full extent of that debt is not always appreciated. What Canada gave the International Labour Organization was not a refuge but a base of operations. We were able to work successfully in Montreal because the Canadian Government recognized from the outset that the functioning of an international organization on belligerent territory in wartime involved unpre-

Honourable Milton F. Gregg, V.C., Minister of Labour, unveils tablet at McGill University, Montreal, to commemorate the establishment of wartime headquarters of the International Labour Organization at the University. Mr. Gregg is shown uncovering the tablet, to the reader's left of the plaque. In the centre, at the right of the plaque, is Principal Cyril F. James, of McGill University. Others in the photograph are: V. C. Phelan, Director of ILO's Canada Branch; L. Mayrand, Assistant Under-Secretary of State for External Affairs, who represented the Minister of External Affairs at the unveiling ceremony; Senator Leon Troclet, of Belgium, Chairman of the Governing Body of the ILO, and C. Wilfred Jenks of Geneva, Assistant Director-General of the ILO.

The wording of the plaque is in both French and English; the English version being as follows:—

“To this campus the International Labour Organization transferred its wartime headquarters in 1940 on the generous invitations of the Government of Canada and McGill University. From here the ILO directed its work of furthering world peace through social justice until 1948. This tablet records the lasting gratitude of the ILO to McGill University.”

cedented problems for which appropriate solutions must be found in order to maintain the usefulness of the Organization as an independent international organization retaining the full confidence of its member nations. Special administrative measures involving the co-operation of a wide range of Government departments and notably of the passport control, censorship, foreign exchange, postal and customs authorities, were taken promptly amidst all the pressing pre-occupations of the hour for the purpose of reconciling the functional needs of an

international organization with the security requirements of a belligerent state, and I think I may say that these arrangements operated to the mutual satisfaction of the Canadian Government and the International Labour Organization throughout the war. Certainly they played an essential part in enabling the ILO to continue to do its job. Our appreciation of all that was done has frequently been expressed, Mr. Minister, but this is a particularly appropriate occasion on which to reaffirm it.

"Equally lasting is our debt to McGill University," Mr. Jenks continued. "This University has many just claims to fame, but the hospitality which it accorded in the critical summer of 1940 to the ILO, which in retrospect has been the one major institutional link between the League of Nations and the United Nations phases in the development of world organization, gives McGill a place in the history of international institutions which is altogether unique and upon which the Board of Governors and Principal James may well look back with legitimate pride. In placing on record on this occasion our gratitude for all the help and kindness which we received here, I should like to mention some of those to whom we were particularly indebted, notably Dr. Wilder Penfield who was so largely responsible for our coming here, the Registrar, the Librarian and his whole staff, the faculties of the Departments of Law and Commerce, the Superintendent of Buildings, the authorities of the theological colleges which made additional accommodation available for us, and the Faculty Club and its staff. Without their constant and ungrudging help and cheerful encouragement, the multitude of practical problems which confronted us when we attempted, with very limited resources, to equip the wartime working centre of the ILO as an effective unit, might well have proved insuperable. Our debt to McGill is, moreover, of a continuing character, for before we left Canada we found here some of the ablest of the young recruits who have joined our service since the war and they remain with us as a lasting link with Montreal.

"To the official gratitude of the ILO as an Organization," Mr. Jenks then said, "I should like to add, on behalf of those of us who lived and worked here, a more personal expression of appreciation for the warmth of the welcome which you extended to us. To those of us who worked here during those years, this is a place of proud and poignant memories. We recall with pride how John Winant brought us from neutral Switzerland to belligerent Canada during the Battle of Britain in order to keep open our lines of communication with the free world, and to ensure that the ILO remained an active and worldwide force at the service of the political and social ideals at stake in the war; how Edward Phelan piloted us with uncanny political foresight through the constantly changing problems and dangers of global war, wrote the Declaration of Philadelphia here and laid the foundations for all which the ILO has sought to accomplish in the post-war world; how Oswald Stein and Pierre Waelbroeck

completed lifetimes of loyal service to the ILO in peace and in war and prepared the way for much of what has been and is being done by the organization in the post-war world in the vital fields of social security and manpower; and how preparations were begun here for the subsequent development of the regional activities of the Organization in Asia, in the Near and Middle East and in Latin America, for the establishment of the Industrial Committees, for the intensification of our work in non-metropolitan territories and for the post-war development of our work in the fields of industrial relations, industrial safety and maritime labour. The years we spent here were rich in achievement and in friendships and to all of us our wartime base of operations in Montreal became and remains a home away from home.

"These personal memories mingle with reflections on wider issues which a retrospective glance at those years suggests. At a time when the magnitude of the difficulties confronting the post-war world has become fully apparent and when it is all too clear how much still remains to be done to create the stable peace of freedom and progress which remains the goal of all our efforts, the episode of the wartime activities of the International Labour Organization has assumed a new significance. Whatever the future may hold in store, effective international action to secure peace, protect human rights and promote economic and social well-being remains of crucial importance for the whole future of civilization. The plaque which the International Labour Organization is privileged to present to McGill today acknowledges our debt for the assistance which you gave to us during one critical phase in this age long struggle. We are again passing through a period when no one can predict the future, but come what may we, in the International Labour Organization, will endeavour to continue to deserve the trust and confidence which the freedom loving peoples placed in us during those years."

McGill Principal Describes Incidents of ILO Transfer

Dr. F. Cyril James, Principal and Vice-Chancellor of McGill, expressed to the ILO the thanks of the Board of Governors and the Senate of the University.

Referring to the "world-wide prestige" the ILO had enjoyed for more than three decades, Dr. James said: "This university was proud, in a moment of crisis, to aid its work, and none of us who were active in those dark days of 1940 gave thought to the possibility that on a quiet September

afternoon, ten years later, we should meet to record in bronze the actions that were spontaneous efforts on the part of every individual concerned to keep the lamp of freedom burning.

"There was not much opportunity to think of lesser things during the autumn of 1940. Spring had blossomed fair; it was a period of quiescence which restlessly martial spirits called the 'phoney war'. But, on April 9, the Germans had moved into Denmark and Norway. Holland and Belgium were over-run during the month of May, and the invasion of France had forced the British Army back to the beaches of Dunkirk when that month ended. June saw the establishment of the Petain Government at Vichy, with France lost as an ally and Mussolini's Italy enrolled among our enemies, while Russia (the ally of Germany at that time) had moved her armies into Roumania. By the beginning of August, the Western Coast of Europe was in Nazi hands, enemy submarines ravaged the ocean highways and Britain was under assault from the air.

"Hitler is now sprawled over Europe," said Mr. Churchill in the House of Commons, and that penetrating diarist, Francis Neilson, from his eyrie in Mid-Western United States was deeply concerned. 'What must we expect?,' he writes on August 18, 1940. 'What tortured hopes can foreshadow the awful end? Each day brings its toll of war, and leaves us crippled in spirit, and with grief so bitter that we fear the coming of night. . . . God keep all brave souls!'

"It is no wonder that, in such an hour, those responsible for the administration of the ILO decided to flee from the constriction of Geneva. It is no wonder that, in such a moment of international chaos, the ILO was short of funds.

"The memory of those days is still fresh, and each of us who remembers them prays devoutly that neither he nor his children's children may have to live through such another climacteric. But the international horizon is not clear. In spite of our fervent hopes, no one of us would like to prophesy at this moment and, in case another hour of crisis may confront us, I should like to set on record the way in which many men, by their own individual efforts, effected that transfer of the ILO Office which we mark today. It is a story that does not lack inspiration. It is worth remembering when people suggest that individual initiative is dead, or capable of being invoked only when there is prospect of profit.

"John Gilbert Winant, whose spirit is surely among us this afternoon, was

Director-General of the ILO in 1940 and, on August 13, he telegraphed to his old Princeton friend, Dr. Wilder Penfield, to ask if the ILO could use McGill University as a mailing address until it found a home. Dr. Penfield telephoned that message to me and, after consulting the Chancellor, the late Sir Edward Beatty, I telegraphed on August 14 to offer the ILO not only a mailing address but a home at McGill University.

"Things moved fast in those days. On August 16 Winant telegraphed his acceptance of the offer and immediately went to Ottawa to discuss the matter with the Hon. Norman McLarty, Minister of Labour, who on August 17 issued an official invitation on behalf of the Canadian Government.

"As a result of the personal initiative of Winant, Beatty and Dr. Penfield, the legal situation was now clear, but the practical task of finding accommodation was still ahead of us.

"On August 19 Sir Montagu Allan offered to lend *Ravenscrag* to McGill University for use by the ILO, but since the University was facing financial problems of its own we could not afford the costs of operation. When Winant came to Montreal, on August 22, all of the available possibilities were explored, and it was finally decided that the ILO would move into the university premises at 3480-3484 University Street. To make this possible, the School of Graduate Nurses had to be moved to the Gymnasium. The premises also required extensive reconstruction, estimated to cost \$25,000, and the ILO had no funds to spare for this purpose.

"On September 4 the Executive and Finance Committee under the Chairmanship of Sir Edward Beatty gave careful study to all aspects of the situation and resolved to make these premises available to the ILO. It also resolved to spend \$25,000 in putting them into shape.

"The late P. W. Macfarlane, Superintendent of Buildings and Grounds at that time, started work on this task the following day and enlisted the assistance of the Sutherland Construction Company—but several weeks would necessarily have to pass before the buildings could be ready for occupancy. Within four days, however, Dr. Scott Mackenzie, Dr. Howard and Dr. Kilpatrick had offered temporary accommodation in the three Theological Colleges, so that the ILO had a group of homes which it used until it moved into the reconstructed premises on November 11. As our last item in this catalogue of individual contributions, I should record the fact that

when the costs of reconstruction were found to exceed the estimates the contractor immediately offered to forego his fee for the job.

"By 1944 conditions throughout the world had improved to the point where the ILO suggested that it would like to repay to McGill University the \$25,000 that had been spent. Soon after the war, the offices in Montreal were abandoned and the ILO returned to its palace in Geneva. The events that I record here have faded into the realm of memory, and many of those who played so outstanding a part in the transfer of the ILO to the McGill campus are today present only in the rich memories of those who knew, and loved, them.

"This bronze tablet which you have unveiled should recall to us more than an ancient episode of global war. It must remind us of our individual opportunities and responsibilities, by recalling vividly the achievements of those who were the exemplars of our yesterdays. Twenty years before the events that we are commemorat-

ing today, the ILO was dependent on outside help. Mr. E. J. Phelan, in 'Yes and Albert Thomas' records how, in 1920, the first Director-General persuaded the Government of the United Kingdom to lend him office space in London and to advance the funds needed to get the Organization started.

"Let us hope that, if such a problem should arise again, it will be as promptly solved. The quality of our civilization is measured in terms of its efforts to enhance the welfare of ordinary men and women throughout the world. The lamps will indeed have gone out if international organizations like the ILO should cease to function because they have no friends."

Senator Leo Troclet of Belgium, Chairman of the ILO Governing Body, also spoke, and expressed the gratitude of the ILO to Canada. Leon Mayrand, Assistant Under-Secretary of State for External Affairs, spoke on behalf of his department. V. C. Phelan, Director of the Canada Branch of the ILO, introduced the speakers.

ILO COMMITTEE STUDIES WORKING HOURS AND SAFETY IN CHEMICAL INDUSTRIES

The Chemical Industries Committee of the International Labour Organization held its second session at Geneva, Switzerland from April 11 to 21, 1950, in the ILO Building, and adopted a series of reports and resolutions concerning problems of the Chemical Industries. The Committee is one of eight tripartite Industrial Committees created for the purpose of giving consideration to the particular and practical problems of the industries concerned. The Committee is responsible to the Governing Body of the ILO. The Chemical Industries Committee was the last industrial committee to be created.

Organization of the Committee

The second meeting was attended by 110 delegates, advisers, observers, and representatives of other international organizations. Of the fifteen States members of the International Labour Organization, of which the Chemical Industries Committee is composed, only China was not represented at the Second Session.

The following fourteen countries sent tripartite delegations: Belgium, Brazil, Canada, Denmark, France, India, Italy, Mexico, Norway, Netherlands, United Kingdom, United States, Sweden, Switzerland.

There were also three observers representative of the German Federal Republic. Observers were also present on behalf of the United Nations, the International Federation of Christian Factory and Transport Workers, and the World Federation of Trade Unions.

The Canadian delegation was composed as follows:—

Government delegates.—S. Picard, Chemical Engineer, Manager, Quebec City local office, National Employment Service, Unemployment Insurance Commission; P. H. Casselman, Labour Economist, Economics and Research Branch, Department of Labour, Ottawa, Ont.

Employers' delegates.—W. H. Mueller, Assistant Superintendent, Chemicals Division, Shawinigan Chemicals Ltd., Shawinigan Falls, P.Q.; R. W. Winsor, Assistant General Manager, Chemicals Department, Canadian Industries Limited, Montreal, P.Q.

Workers' delegates.—S. Barrett, Canadian Director, District No. 50 United Mine Workers of America, Toronto, Ontario; F. G. McIlwain, International Representative and Executive Board Member, International Chemical Workers' Union, Sarnia, Ontario.

Mr. J. J. Ricard of the Ministry of Social Affairs, Denmark, and government representative of the Governing Body was Chairman of this session of the Committee. The Committee elected as Vice-Chairmen, Mr. H. Huston, Assistant to the President, American Cyanamid Co., New York, for the employers' group and Mr. H. Christensen, Chief of Section in the Danish Unskilled Workers' Association, Copenhagen, for the workers' group.

Mr. John Price, Chief of Industrial Committees' Section of the ILO was appointed Secretary-General, while Mr. Kurz and Mr. J. P. Despres served as Executive Secretary and Clerk respectively of the Committee.

Agenda

The agenda for the second session of the Committee as determined by the Governing Body of the ILO was as follows:

1. General Report, dealing with particularly:
 - (a) Action taken in the various countries in the light of the resolutions of the First Session.
 - (b) Steps taken by the Office to follow up the studies and enquiries proposed by the Committee.
 - (c) Recent events and developments in the Chemical Industries.
2. Safety and Hygiene in the Chemical Industries.
3. Special aspects of the organization of working hours in the Chemical Industries.

For each of these items a report had been prepared in advance by the International Labour Office.

Procedure

At the beginning of the Session, plenary meetings were held for the purpose of determining procedure and to permit general discussion of the business before the meeting. As a result of general discussion, it was decided to set up subcommittees in order to deal with items two and three of the agenda. A Working Party was created to deal with the matter of the definition of chemical industries, a task which had been started at the First Session in Paris in 1948. On April 12, the second day of the Session, a Steering Committee was created in order to speed up the work of the Chemical Industries Committee and for the purpose of giving overall direction to the Committee.

Safety and Hygiene

The Subcommittee on Safety and Hygiene had before it the report of Safety

and Hygiene in the Chemical Industries, which had been prepared by the Office. At the first meeting of the Subcommittee the representative of the Secretary-General spoke and explained the difficulties which had been met since the First Session of the Chemical Industries Committee in April 1948, in obtaining material on which to base any drafts to put before the Second Session. There was an absence of suitable existing safety codes which might have given guidance in drafting a code of the type then contemplated.

In the opening stages of the discussion in the Subcommittee it was apparent that there was a strong body of opinion which was opposed to the creation of a large detailed code for the Chemical Industries. This opinion was held by many who had long experience in the compilation and administration of law and codes of various kinds dealing with the safety and health of workers in industry. They held these views not merely because of the difficulties in drawing up such a code but because they thought that the production of such a code was not the best way of achieving the objects which the Committee had in mind.

The Government delegates from the United States, France, Belgium and Brazil, among other Government members, as well as many employers' delegates opposed the setting-up of such a safety code for the Chemical Industries. One of the Government members from France thought the proposed code was unnecessary in view of the recent publication of the Model Code On Safety Regulations For Industrial Establishments by the ILO.

Workers' delegates, for the most part, favoured the creation of such a model safety code for the chemical industries. Each of the three groups submitted draft resolutions on the creation of a model code. A Drafting Committee composed of six members was elected to work out a solution. The Drafting Committee set to work and presented a draft resolution to the 6th sitting of the Subcommittee. With some small modifications to the wording, the resolution was adopted by a vote of 72 to 1 in plenary session. In brief, the resolution recommended that the International Labour Office make a thorough study of possible amendments, additions and deletions to the general code in order to give adequate protection to the workers in the Chemical Industries.

A second resolution, one concerning the classification, labelling and establishment of an international mark of protection in the case of dangerous, obnoxious and toxic chemicals was adopted by a vote of 73 to nil in plenary session.

In all, the Subcommittee on Safety and Hygiene held seven sittings.

Definition of Chemical Industries

The Working Party elected to study the definition of chemical industries, adopted as a basis for discussion the definition previously arrived at by the Committee in 1948 and a study made by the Office since that time. Mr. Picard was elected chairman of the Working Party.

The object of the definition and nomenclature was essentially to determine the scope and competence of the Chemical Industries Committee without prejudice to existing national classifications.

Certain products gave rise to discussion and necessitated recourse to a vote for the purpose of deciding whether or not they should be retained in the new nomenclature, but on many products the Working Party was able to reach agreement rapidly, their inclusion being either unopposed or necessitating only slight modification or again requiring only certain clarification in order to avoid misunderstanding. Among the products that gave rise to the discussion were matches, petroleum chemical products, fats and oils other than edible fats and oils, soap, candles and glycerine, industrial alcohol, synthetic rubber and resins.

The item "artificial and organic fibres, but only up to and including manufacture of the filament to its final preparation for weaving and knitting," gave rise to a lengthy discussion. The Governing Body at its 109th session (Geneva, June-July 1949) had taken a decision which resulted in the deletion of this item from the nomenclature. The Employers' representative of the Governing Body expressed the view that the Governing Body had taken this decision after having examined the report of both the Chemical Industries Committee and the Textile Committee, and that the Working Party should not question or discuss this decision of the Governing Body. The Working Party, however, unanimously considered that it was necessary to discuss the question whether or not to request the Governing Body to reconsider this decision. The Working Party reaffirmed the view that the manufacturing of synthetic organic fibre but only up to and including their final preparation for weaving or knitting, was a chemical process and invited the Governing Body to re-examine the matter.

In regard to this question, the Governing Body which met in Geneva in June 1950, subsequent to the Chemical Industries Committee meeting in April 1950, has taken the following decision:—

Concerning the classification of artificial and organic fibres in relation to problems in which both the Chemical Industries Committee and the Textiles Committee would be interested, the Governing Body adopted the following procedure: in cases in which it appears a conclusion is reached by the Textiles Committee which may affect persons engaged in the manufacture of artificial and organic fibres up to and including their final preparation for weaving or knitting, such conclusions will be communicated to the Chemical Industries Committee for its observations, and governments will be informed that this action is being taken.

The Working Party drew up a definition of the Chemical Industries which included a list of 44 groups of chemical products. This resolution was adopted unanimously by 73 to nil at the 5th Plenary Session of the Committee. The Working Party held six sittings.

Organization of Working Hours

The Subcommittee on the Organization of Working Hours in the Chemical Industries appointed by the Committee at its 3rd Plenary Session, on April 13, 1950, was composed of 30 members (10 for each group). The Subcommittee held eight sittings.

The Subcommittee had before it Report III, *Organization of Working Hours in the Chemical Industries*, prepared by the International Labour Office. This report was composed of two essential parts: one, relating to the organization of working hours in the Chemical Industries, and the other to overtime in these industries. Each part contained a list of points proposed by the Office to serve as a possible basis for discussion.

The Subcommittee began at once the discussion of the list of points prepared by the Office together with the various proposals which had been submitted by the Workers' Members. It agreed on the request of the Employers' Members, who felt it desirable to have the opinion of all their members before taking a definite position, to carry out the discussion in two stages—the first, devoted to a general examination of the points one by one; the second, to decisions on these points.

At the conclusion of the first stage, the Subcommittee decided to set up a Working Party to which it referred the list of points established by the Office and the proposals submitted by the various groups. The Working Party was asked to draw together and if possible reconcile the points of view in the light of the opinions expressed and the arguments put forward during the examination of the points and to present proposals upon which a subcommittee might reach a decision.

The question of the competence of the Subcommittee to deal with some of the points suggested by the Office for study in its report became a major aspect in the discussion. The Employers' Members expressed doubt on the desirability of undertaking examination of various points which did not appear to them to fall within the competence of the Subcommittee.

With reference to the use that might be made of the work of the Subcommittee, various Employers' Members expressed the wish that it should not result in regulations of a compulsory nature, such as legislative measures, and stated their preference for solutions resulting from collective bargaining in the form of collective agreements. This point of view was shared by the United Kingdom Government Member, and by the United States and United Kingdom Workers' Members.

A memorandum was addressed to the Governing Body by the Subcommittee in which it was shown that 14 points for discussion (out of 17 suggested by the Office)

were eventually adopted either unanimously or by a majority vote of the Subcommittee.

Two propositions brought forth by the Workers' group, one dealing with the paying of extra rates for unavoidable shift work, and the other limiting the hours of work per day and per week beyond which overtime should be paid, did not reach agreement. Three other proposals submitted by the Workers' group dealing with overtime and restriction of shift work over the weekend were not debated. Two resolutions, the one requesting the Office to undertake a comparative study of day work and of continuous shift work in the Chemical Industries and another relating to vocational training in the chemical industries were adopted unanimously by the Committee in Plenary Session.

Closing of the Session

The work of the Second Session of the Chemical Industries Committee was officially closed at the Committee's 5th plenary sitting on Friday evening, April 21, 1950.

CANADIAN VOCATIONAL TRAINING 1949-50

A total of \$7,321,850 was contributed by the Federal Government to the provinces in the fiscal year 1949-50 for vocational training.

Gross enrolment during the year was 22,043, making a total gross enrolment of 940,783 since the inception of Dominion-Provincial Training in 1937 to March 31, 1950.

The Annual Report on Canadian Vocational Training for the fiscal year ended March 31, 1950, covers the activities of the Training Branch of the Department of Labour, which is responsible for administering the various projects authorized by the Vocational Training Co-ordination Act of 1942.

The various projects are carried on under agreements between the Federal Government and the provinces, which provide for Federal financial assistance in the operation and development of vocational training.

Federal Government Appropriations

The Report shows that the Training Branch administered Federal appropriations to the amount of \$7,321,850 during the fiscal year ended March 31, 1950. This amount was apportioned as follows:—

Youth Training	\$ 410,000
Supervisory Training	22,000
Training of Discharged Members of the Forces.....	500,000
Training of Armed Forces Per- sonnel	500,000
Apprentice Training	480,000
Training of Unemployed Persons.	350,000
Vocational Schools Assistance.....	2,000,000
Vocational School's Capital Expen- ditures	3,000,000
Replacement of Depreciated Equipment	15,000
Administration	40,850
Advisory Council	4,000
Total	<u>\$7,321,850</u>

Enrolment

Gross enrolment during the year was 22,043, with enrolment in the various divisions as follows:—

Youth Training	5,144
Student Aid	2,741
Supervisory Training	7,042
Training of Discharged Members of the Forces	270
Training of Armed Forces Personnel	656
Apprentice Training	5,022
Training of Unemployed Persons..	1,168
<hr/>	<hr/>
Total	22,043

Youth Training

The main activity under the Youth Training division of the Vocational Training Agreement was student aid. This consisted of financial assistance in the form of a loan, outright grant, or combination of both, given at the discretion of each province to students to make possible continuation of their courses. This division was operative in all provinces except Newfoundland. Apart from Quebec and the four western provinces, at whose request a special section of the schedule provided for assistance to nurses-in-training at hospitals, the plan was restricted to university students registered in a course leading to a degree.

Approximately \$262,757 was given in grants and \$179,805 in loans. Altogether, 2,741 students—1,807 men and 934 women—were assisted in this way: 425 in medicine, 85 in dentistry, 395 in applied science and engineering, and 746 in arts and sciences. Several provinces, it is noted, provided additional assistance solely from provincial funds.

Courses in agriculture and rural home-making again predominated.

Supervisory Training

Quebec was the only province to continue supervisory training in 1949-50. Training was given to supervisors and personnel officials in industry through the media of job instruction, job relations, job methods and job safety institutes and conferences. The number trained under this plan in the year was 7,042.

Training of Discharged Members of the Forces

The training of war veterans was continued but on a much reduced scale. At the end of the fiscal year 264 men and 6 women were in training.

Training of Armed Forces Personnel

A new schedule of the Vocational Training Agreement was authorized by Order in Council on March 29, 1950, to provide for the training of armed forces personnel. It had been operative only in Saskatchewan, Manitoba, Ontario, Quebec and New Brunswick. The new schedule has been accepted by all provinces.

No training was carried out for the navy or the air force but training for army personnel was given in CVT schools or under CVT auspices in Saskatchewan, Manitoba, Ontario, Quebec and New Brunswick. The total enrolment was 656. The bulk of the training was in driver mechanics; some courses were held for vehicle mechanics, building tradesmen and clerks.

An experimental course in English, with particular reference to trade terminology, was organized at the Three Rivers Technical School for French-speaking army personnel, to enable them to undergo instruction in English in army schools. Forty-seven soldiers were admitted to the first course and the military authorities have requested that a second course be provided upon completion of the first.

Apprentice Training

The principle of pre-employment apprentice training which was authorized by Order in Council of December 21, 1948, has now been accepted by all provinces with which there is an apprentice agreement. The provinces with which there is no agreement are Newfoundland, Prince Edward Island and Quebec. Pre-employment classes have been established in Alberta, Manitoba, New Brunswick and Nova Scotia. Saskatchewan did not accept the amendment until late in 1949 and classes had not been opened at the end of the fiscal year. Total enrolment during the year was 5,022.

Training of Unemployed Persons

The training of unemployed persons is carried out under a separate division of the Vocational Training Agreement. Although the division has been accepted by all provinces except Newfoundland, training was carried out only in British Columbia, Alberta, Saskatchewan, Manitoba, New Brunswick and Nova Scotia. Arrangements were made to commence training for unemployed persons in Quebec in April, 1950. Provincial authorities in Ontario and Prince Edward Island did not consider that a need for such training had developed.

Although there has been no great increase in enrolments, steady improvement in courses and arrangements for placing unemployed persons in them is reported. At the close of the year, 280 men and 347 women were in training under the plan. Courses offered included auto body repair, barbering, cabinet making, commercial, cooking, drafting, dressmaking, machine operating, practical nursing, radio, restaurant management, sheet metal work, shoe repair, upholstering, watch repair, woodwork, etc.

Vocational Schools Assistance

The purpose of the Vocational Schools Assistance Agreement is to provide financial assistance for vocational training on the secondary school level. The Minister of Labour was authorized to enter into an agreement with any province, covering a ten year period commencing April 1, 1945. With the signing of an agreement by Newfoundland on February 1, 1950, agreements are now in effect in all provinces. Under the agreements, since April, 1945, 103 buildings were approved for Federal contribution, and at the end of the fiscal year 66 had been completed and were in operation, 14 were under construction, and 23 had not been commenced. Vocational training in one or more fields was introduced in 24 new centres during the year.

Vocational Correspondence Courses.—

The Minister of Labour was authorized by Order in Council of March 4, 1950, to enter into an agreement with any province to provide financial assistance in promoting the preparation of new correspondence courses and revision of existing ones. A participating province receiving such assistance

must agree to provide any correspondence course to any person in any other province at the same price charged to its own residents.

Newfoundland.—On February 1, 1950, a Vocational Schools Assistance Agreement was completed between the Federal Government and Newfoundland. The agreement provides for an annual grant of \$10,000, unmatched by the Province, commencing with the fiscal year 1949-50, and continuing for each fiscal year up to 1954-55, inclusive; an annual allotment of \$55,800 to be matched by provincial expenditures of equal amount, over the same period; and an amount of \$292,250, to be matched by provincial contributions of equal amount, for capital expenditures for vocational school buildings and equipment, subject to certain requirements, also over the same period.

Although it had not been possible by the end of the fiscal year to organize any training activities in Newfoundland in conjunction with the provincial authorities, the province has been able to utilize the \$10,000 annual outright grant under the Vocational Schools Assistance Agreement, and also to take up a small portion of the amount which has been made available for operating expenditures under the same agreement.

Vocational Training Advisory Council

The Vocational Training Advisory Council met twice during the year for the purpose of discussing vocational training matters and advising the Minister regarding the training program generally.

This section covers proceedings under two federal statutes, the Industrial Relations and Disputes Investigation Act and the Conciliation and Labour Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board and the Industrial Relations Branch of the Department.

INDUSTRIAL RELATIONS AND CONCILIATION

A fifteen-day extension was allowed during September for the negotiations between the railways and railway labour organizations prescribed by The Maintenance of Railway Operation Act.

Introduction

Following upon the termination of the railway strike on August 30 and the resumption of operations the following day on the railways and their ancillary services, the month of September was quiet and uneventful from the standpoint of labour-management relations and the Industrial Relations Branch of the Department of Labour experienced a welcome breathing spell.

On September 9 the Hon. Milton Gregg, Minister of Labour, received a joint letter from the vice-presidents of the Canadian National Railways and the Canadian Pacific Railway Company and the leaders of the two groups of international and national trade unions involved in the railway dispute, stating that the parties had commenced negotiations looking to a collective agreement, in compliance with the provisions of Section 5 of The Maintenance of Railway Operation Act (L.G., Oct., 1950, p. 1653). The letter added that a situation had intervened which prevented immediate

continuance of the discussions, in that the officers of the trade unions and members of the Joint Negotiating Committees found it necessary and desirable to attend the annual conventions of the Trades and Labour Congress of Canada and the Canadian Congress of Labour. Consequently, the parties had agreed that it would be impractical to give sustained attention to the negotiations within the thirty-day period prescribed by Parliament in The Maintenance of Railway Operation Act, and a joint request was made for a fifteen-day extension of the period for negotiations, during which it was hoped that settlement would be reached.

Consequent upon the request of the parties, an Order in Council was approved on September 11 by the Governor General in Council granting the desired extension.

As reported below in this article, the settlement of three minor disputes was achieved during the month and two Boards of Conciliation and Investigation were established.

The following statement concerns the scope and administration of the Industrial Relations and Disputes Investigation Act and the Conciliation and Labour Act.

Conciliation services under the Industrial Relations and Disputes Investigation Act and under the Conciliation and Labour Act are provided by the Minister of Labour through the Industrial Relations Branch. The Branch also acts as the administrative arm of the Canada Labour Relations Board under the former Act.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until succeeded by the Wartime Regulations in 1944.

Proceedings begun under the Wartime Regulations are continued in so far as the services involved in such proceedings are authorized under the new Act. Likewise, decisions, orders and certifications given by

the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the new Act.

The Act applies to industries within Dominion jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the Dominion Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of Concilia-

tion Officers, Conciliation Boards, Industrial Inquiry Commissions for the consideration of complaints that the Act has been violated or that a party has failed to bargain collectively, and of applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Conciliation services are also provided by the Industrial Relations Branch under the provisions of the Conciliation and Labour Act. This statute empowers the Minister of Labour to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing

the parties together, and to appoint a conciliator or arbitrator when requested by the parties concerned.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour. From time to time, as required, a third article under this section will cover Conciliation Proceedings under the Conciliation and Labour Act.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton and St. John's, Newfoundland. The territory of two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; two officers in Montreal are assigned to the province of Quebec, and two officers resident in Fredericton and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Certification and Other Proceedings Before the Canada Labour Relations Board

The Canada Labour Relations Board met for two days during the month of September. The Board issued one certificate designating a bargaining agent, rejected one application for certification, and ordered one representation vote. During the month the Board received six applications for certification.

Application for Certification Granted

The National Union of Operating Engineers, for a unit of employees of the National Harbours Board comprising operating enginemen and operating engineers employed in the cold storage warehouse refrigeration plant at Montreal Harbour.

Application for Certification Rejected

The International Brotherhood of Electrical Workers and the International Association of Machinists, joint applicants, and the Canadian National Railways (L.G., Sept., 1950, p. 1556). (See Reasons for Judgment below.)

Representation Vote Ordered

The Canadian Brotherhood of Seamen and the Western Union Telegraph Com-

pany (L.G., May, 1950, p. 675). The Board ordered the vote following an investigation and a public hearing of the parties concerned.

Applications for Certification Received

1. The Canadian Brotherhood of Railway Employees and Other Transport Workers, on behalf of a unit of employees of National Terminals of Canada Limited, Montreal (Investigating Officer: C. E. Poirier).

2. The Order of Railroad Telegraphers (System Division No. 7), on behalf of a unit of employees of the Canadian Pacific Railway Company employed in the Communications Department of the Company (Investigating Officer: R. Trépanier).

3. The West Coast Seamen's Union (Canada), on behalf of uncertificated personnel employed on board deep sea dry cargo vessels owned or operated by the Western Canada Steamship Company Limited, Vancouver (Investigating Officer: D. S. Tysoe).

4. The West Coast Seamen's Union (Canada), on behalf of uncertificated personnel employed on board deep sea dry cargo vessels owned or operated by Johnson, Walton Steamships Ltd., Vancouver (Investigating Officer: D. S. Tysoe).

5. The West Coast Seamen's Union (Canada), on behalf of uncertificated personnel employed on board deep sea dry cargo vessels owned or operated by Canadian Union Line Limited, Vancouver (Investigating Officer: D. S. Tysoe).

6. Local No. 882, International Union of Operating Engineers, on behalf of engineers employed by the Central Mortgage and Housing Corporation in its steam heating plants at Park Crescent, New Westminster, B.C. (Investigating Officer: D. S. Tysoe).

REASONS FOR JUDGMENT in application for certification affecting

International Brotherhood of Electrical Workers and International Association of Machinists, *Joint Applicants,*
and
Canadian National Railways, *Respondent,*
and
Canadian Brotherhood of Railway Employees and Other Transport Workers, *Intervener.*

The Applicants, two craft unions, the International Brotherhood of Electrical Workers and the International Association of Machinists, apply to be jointly certified as bargaining agents for a bargaining unit consisting of electrical workers, artificers, plumbers and marine engineers employed on the two ferry ships operated by Canadian National Railways between Cape Tormentine, N.B., and Port Borden, P.E.I. The employees in the classifications of second, third, and fourth engineers, engine-room artificers and plumbers included in the unit are claimed to be members of the International Association of Machinists. The employees in the classifications of electricians are claimed to be members of the International Brotherhood of Electrical Workers. The classifications of chief engineer, chief electrician, and electrical engineer have not been included by the Applicant in the proposed bargaining unit on account of their supervisory duties.

At the present time, all of the employees in the proposed unit are represented for collective bargaining purposes by the intervener. The intervener is a party to a collective agreement with the respondent covering these employees and the balance of the engineroom staff of which they are a part on the two ferry boats.

The joint application is made under the provisions of subsection five of Section seven of the Act. This subsection provides that two or more trade unions claiming to have as members in good standing of the unions a majority of employees in a unit that is appropriate for collective bargaining may join in an application for certification as bargaining agent for the unit.

The applicants submit that the two unions as representing the majority of employees comprising a craft group are entitled to certification as bargaining agent

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, A. Deschamps, A. J. Hills, A. R. Mosher, G. Picard and H. Taylor, members.

The Judgment of the Board was delivered by the Vice-Chairman.

for the group under the provisions of Section eight of the Act. The respondent and the intervener base their opposition to the application on the ground that these employees are part of a long-established bargaining unit consisting of the entire engineroom staff on both boats and represented by the intervener for collective bargaining purposes with the respondent. The intervener argues strongly that the recognition of this small group as a separate bargaining unit would seriously disturb the existing seniority rights which have been established and the opportunities for promotion which are open to employees within the larger unit. The present engineroom staff unit, which comprises a total of some 82 employees, includes not only the classifications in the proposed bargaining unit but also oilers, firemen, trimmers, and artificers' helpers. Both the intervener and the respondent assert that the established practice of the respondent has been to afford to employees in other classifications in the engineroom staff the opportunity for promotion into the electrical classifications, which opportunity would be cut off if the smaller bargaining unit were approved. They further contend that under the established practice in the marine industry it is not customary nor is it conducive to efficient operation to segregate for collective bargaining purposes employees comprising the proposed bargaining unit from other employees in the engineroom staff.

In reply the applicants contend that the ferry boat operations are part of the railway service, and that the electricians on these boats are part of the railway electrician craft group which the International Brotherhood of Electrical Workers represents for collective bargaining purposes with the respondent, and that the engineers on the boats are part of the railway machinists craft group which the International Association of Machinists represents for collective bargaining with the respondent. The applicants, therefore, claim the right to bargain jointly for the electricians and the engineer classifications on the two boats.

Section eight of the Industrial Relations and Disputes Investigation Act reads as follows:—

Where a group of employees of an employer belong to a craft or group exercising technical skills, by reason of which they are distinguishable from the employees as a whole and the majority of the group are members of one trade union pertaining to such craft or other skills, the trade union may apply to the Board subject to the provisions of Section seven of this Act, and shall be entitled to be certified as the bargaining agent of the employees in the group if the group is otherwise appropriate as a unit for collective bargaining.

The purpose of this section is to preserve the identity of craft groups of employees for collective bargaining purposes, and to enable them to be represented for collective bargaining by a union pertaining to their craft.

The Wartime Labour Relations Board (National) in disposing of an application for certification for a craft group made up of bricklayers and apprentices in a steel plant under a section of the Wartime Labour Relations Regulations similar in effect to Section eight of the present Act, certified the Bricklayers, Masons and Plasterers' International Union of America, a craft union, as bargaining agent for the craft unit, notwithstanding that this group had prior thereto been part of a plant unit which had over a number of years been represented in collective bargaining by an industrial union. In its reasons for decision (reported in DLS 7-678) the Board in that case said:—

The mere fact that this craft group has not had separate representation for collective bargaining purposes in this plant in the past several years does not in itself operate as a bar to recognition at this time as a separate craft bargaining group as provided in Section five, subsection four, of the Regulations.

The same Board in the International Harvester Company case (reported in DLS 7-699) gave effect to an application of the Pattern Makers' Association, a craft union,

for certification as bargaining agent of a unit of pattern workers that had prior thereto been part of a plant unit.

The same Board in the Air Engineers' Society of Canada and Trans-Canada Airlines case (reported in DLS 7-721) was called upon to consider an application for recognition of a separate craft unit for air engineers who were, at the time of the application, part of a larger unit covering all mechanic classifications. The application was opposed by the employer and the International Association of Machinists on the ground that air engineers could not be regarded as a separate craft, but should remain part of the mechanic craft group. The normal line of promotion to other classifications was from the other classifications in the machinists' group. The Board in holding that the group was not a separate craft group appropriate for collective bargaining said:—

The right to such separate recognition as a separate craft group must be determined rather by the nature of the work, skills exercised, and training required in acquiring such skills, and the manner in which the work is performed.

and gave substantial weight to the relationship with and practice of promotion from other mechanic classifications in the same employment.

Applying the principles laid down in those cases, which the Board considers are equally cogent in the application of Section eight of the present Act, this Board is unable to accept as conclusive in the present case the argument put forward by the respondent and the intervener that the application should be rejected because the establishment of a separate unit would interfere with seniority rights and promotional opportunities of other employees established within the present engineroom unit.

On the other hand, the applicants have failed to satisfy this Board that the ferry boats' operations are in fact a part of the railway operations, or that either the marine engineers or the electrical workers are in fact a part of the railway mechanical and electrical craft groups.

The ferry boats are substantially-sized vessels operating in maritime waters between New Brunswick and Prince Edward Island. The work on these vessels is directed, organized and carried on in a manner substantially in accordance with normal shipping operations, and certainly has no correspondence to railway operations. The classifications in the engineroom and the duties pertaining thereto appear to correspond more closely to those pertaining to normal ships' operations than to railroad operations. It was not established that the

marine engineers were drawn from railway machinist ranks, nor the electricians from the railway electrician ranks, nor that there was any interchange of personnel. In fact, the weight of evidence placed before the Board was to the contrary effect. According to this evidence, the unlicensed electricians have been for the most part promoted from the other classifications in the engineroom, and marine engineers from other sources in the marine industry.

For the reasons mentioned, the Board, in considering the question of the appropriateness of the bargaining unit, concludes that this should be determined in the light of trade union custom and collective bargaining practice in the shipping industry rather than the railway industry. In the shipping industry the unlicensed personnel in the engineroom have been held by the decisions of this Board and the Wartime Labour Relations Board under the Wartime Labour Relations Regulations, to be an appropriate bargaining unit. This is also the practice in the maritime industries in other jurisdictions in so far as the knowledge of this Board extends thereto. It was these considerations which formed the basis of the Board's decision at an earlier date in rejecting an application by the International Brotherhood of Electrical Workers to be certified as bargaining agent for the electrician classifications included in the present application.

The present application, it should be noted, is not an application for certification limited to one craft group, as, for example, marine engineers. The proposed unit includes not only marine engineers and artificers, who are claimed to be a machinist craft group, but also electricians, whom the applicants claim belong to a separate craft, namely the electrical craft.

The Board is of opinion that an applicant cannot rely upon the provisions of Section eight of the Act when certification is sought in respect of a unit extending beyond one craft group. For example, it would not appear to be consistent with either the purpose or the provisions of the section to include several separate crafts, such as bricklayers, carpenters and machinists, in one unit if the applicant wishes to rely on Section eight, since the purpose of the section is to preserve the identity of the individual craft group for collective bargaining purposes, and the section does not by its terms go beyond this purpose.

The applicants rely upon the provisions of Section 7 (5) as authority for the present joint application. This subsection reads as follows:—

Two or more trade unions claiming to have as members in good standing of the said unions a majority of employees in a unit that is appropriate for collective bargaining, may join in an application under this section and the provisions of this Act relating to an application by one union and all matters or things arising therefrom, shall apply in respect of the said application and the said unions as if it were an application by one union.

This provision would no doubt provide authority for two unions pertaining to the same craft in making joint application under Section eight to be certified for a group of employees belonging to that craft. Likewise, a similar application could be made for employees belonging to more than one craft and constituting an appropriate unit, provided that in this latter case it is not intended to rely on Section eight as the basis of certification, and provided further, of course, a majority of employees in the unit considered appropriate support the application.

The provision does not, however, for the reasons given, provide authority to enable applicants to obtain certification on the present application under Section eight.

For the several reasons set forth above, the Board finds the unit to be inappropriate and rejects the application accordingly.

*(Sgd.) A. H. BROWN,
Vice-Chairman
and Acting Chairman
for the majority
of the Board.*

While not agreeing completely with the reasons given above, in particular that a joint craft unit is inappropriate, I concur in the result.

Conciliation and Other Proceedings Before the Minister of Labour

Conciliation Officer Appointed

On September 7, the Minister appointed a Conciliation Officer to deal with a dispute between the Quebec Railway, Light and Power Company and the Catholic Syndicate of Garage Employees of the Quebec Railway, Light and Power Company, Inc. (Conciliation Officer: L. Pepin).

Settlements Facilitated by Conciliation Officers

1. On September 19 the Minister received a report from L. Pepin, Conciliation Officer, indicating the settlement of matters in dispute between the Quebec Railway, Light and Power Company and the Catholic Syndicate of Garage Employees of the Quebec Railway, Light and Power Company, Inc. (see above).

2. On September 25, 1950, the Minister received a report from R. H. Hooper, Conciliation Officer, indicating the settlement of matters in dispute between the Canadian Pacific Transport Company, Limited, affecting employees of the Company in Manitoba and Saskatchewan, and the Canadian Brotherhood of Railway Employees and Other Transport Workers (L.G., Aug., 1950, p. 1172).

3. On September 8, 1950, the Minister received a joint telegram from Messrs. H. Chambers, Personnel Officer, British Overseas Airways Corporation, and E. P. Henley, President, Association of Aviation Employees (Federal Labour Union No. 24609), indicating the settlement of matters in dispute between the Company and Union, affecting ground employees of the Company at Gander, Nfld. The settlement was reached following the appointment of H. R. Pettigrove as Conciliation Officer (L.G., Sept., 1950, p. 1556), and before Mr. Pettigrove could make his services available to the parties.

Conciliation Boards Appointed

On September 8, 1950, the Minister appointed two Boards of Conciliation and Investigation to deal with disputes between The Canadian Press and the American Newspaper Guild and between Press News Limited and the American Newspaper Guild. The Boards were appointed following receipt of reports from James H. Stitt, Conciliation Officer (L.G., Oct., 1950, p. 1669). Constitution of the Boards had not been completed at the end of the month.

COLLECTIVE AGREEMENTS AND WAGE SCHEDULES

Recent Collective Agreements

A file of collective agreements is maintained in the Economics and Research Branch of the Department of Labour. These are obtained directly from the parties involved and through the Industrial Relations Branch of the Department. A number of those recently received are summarized below.

Agreements made obligatory under the Collective Agreement Act in Quebec and schedules under Industrial Standards Acts, etc., are summarized in separate articles following this.

Logging

NORTHWESTERN ONTARIO.—CERTAIN PULP AND PAPER MANUFACTURERS AND OTHER PULPWOOD CUTTING AND LOGGING OPERATORS AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA (LUMBER AND SAWMILL WORKERS UNION).

Agreements, negotiated jointly but signed by individual companies, to be in effect from August 30, 1950, to August 31, 1951, and thereafter from year to year, subject to notice. The agreements are similar to the ones previously in effect (L.G., March, 1950, p. 340) with the following changes and additions:—

Vacations with pay: the following provisions have been added—effective September 1, 1950, employees of companies whose woods departments have been operating for 15 years, who have completed 15 years of continuous service will be given 3 weeks vacations with pay. After 3 months of continuous service cooks shall be entitled to 7 days' time off with pay and cookees, chore boys, watchmen, barn bosses, raftsmen and inland waters logmen to 3 days in addition to vacation with pay benefits; such time off to be taken at a time mutually satisfactory to both parties; if, for any reason, such time is not taken employees will receive pay in lieu thereof.

Wage rates for daily-rated employees are increased by 50 cents per day and the rates for cutting pulpwood and fuelwood by 25 cents per single cord. The rate for strip roads is unchanged at one cent per foot for 7-foot road and 1½ cents for 10-foot road. The following provisions have been added; payment will be made for walking distance at the rate of 5 cents per cord for each 500 feet walked in excess of 1½ miles to start of strip; when a man has cut and piled 75 cords of rough pulpwood or 37 cords of peeled pulpwood in any one camp, he will be paid in addition to above rates a bonus of 55 cents per cord for rough wood and 75 cents per cord for peeled wood. The rates for loading and hauling and changing sleighs at spotting grounds, or where unloading is done by mechanical means, are increased and rates are also provided for longer

A 5-year term, a non-contributory Pension Plan, a contributory Insurance Program covering Life, Extra Accident, Sickness and Accident, Physicians' Attendance, Hospitalization and Surgical Operation insurance, a progressive reduction of working hours from 44 to 40 per week and progressive wage increases with a cost-of-living escalator clause are the main features of the collective agreement between General Motors of Canada, Limited, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America.

Sick leave with pay under certain conditions is provided in an agreement between Longlac Pulp and Paper Company, Ltd., Terrace Bay, Ont., and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Both agreements are summarized below.

hauls; they now range from 90 cents per cord for peeled wood and \$1 for rough wood for haul up to one-quarter mile, up to \$2.95 per cord for peeled wood and \$3.55 for rough wood for haul of 5 miles.

Working conditions: the charge for board and lodging is increased from \$1.65 per calendar day to \$1.75.

Manufacturing

Pulp, Paper and Paper Products

TERRACE BAY, ONT.—LONGLAC PULP AND PAPER COMPANY, LTD., AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, LOCAL 665.

Agreement to be in effect from July 5, 1950, to April 30, 1951, and thereafter from year to year, subject to 30 days' notice.

Union security: all employees eligible for membership in the union shall, as a condition of continued employment, join the union and maintain their membership in good standing. New employees shall join the union within 30 days. When hiring new employees the company shall give preference to union members when competent and desirable members, in the judgment of management, are available.

Hours: 8 per day 6 days a week, a 48-hour week. *Overtime:* time and one-half will be paid for work in excess of 8 hours per day (except when, in the case of tour workers, such work is caused by the absence of employees' partner or by change of shift) and for work on Sunday or the alternative

day off. Double time and one-half shall be paid to employees who work on 4 specified *paid holidays* and whose work is directly related to the resumption of operations after a shut down; employees whose work is not so related shall receive time and one-half for hours worked, and another day off with pay within 30 days or, if this is found impossible, 8 hours' pay in lieu thereof. One additional holiday with 8 hours' pay will be designated through local negotiations. At management's option the mill may operate on such day; if it does operate wages will be paid on a straight time basis.

Vacations with pay: all hourly-paid permanent employees shall be entitled to one week after one year's continuous service and to 2 weeks after 3 years' continuous service.

Wage rates for certain classes: Wood handling and preparation—jack ladder man \$1.05; saw tender, chipperman \$1.13; boat operator, senior \$1.31, junior \$1.16; saw filer \$1.26, stackerman \$1.07; craneman, licensed \$1.50, unlicensed \$1.31; winchman \$1.16, crane helper \$1.13; head conveyor man, knife grinder \$1.26; drumbarker man \$1.10, bark press man \$1.07, chip bin man \$1.06, labourer \$1.05. Pulp conversion—digester cook \$1.40, helper \$1.18; brown stock washer (pulp) \$1.29, evaporator operator \$1.31, caustic operator \$1.33, caustic helper \$1.10, operator lime kiln and gas producer \$1.26, operator lime kiln \$1.20, screen room operator \$1.31, helper \$1.09, sluice knoter men \$1.06, utility men, cleaners \$1.05, bleach operator \$1.45, helpers \$1.13 and \$1.24. Engineering (steam and recovery)—shift engineer \$1.68, firemen \$1.20 and \$1.35, coal handler boiler \$1.10; recovery boiler operator \$1.41, first helper \$1.20, second helper \$1.14; pumping station operator \$1.28, lancer \$1.13, meter man \$1.33. Engineering (maintenance and structural)—electricians, millwrights, mechanics (auto), machinists, pipefitters: head \$1.45 to \$1.54, class A \$1.37 to \$1.45, class B \$1.37, helpers \$1.14 to \$1.20; rigger, mason, pipe coverer \$1.37; blacksmith, sheet metal men, welders \$1.37 to \$1.45; tool room man, truck driver \$1.10; head oiler \$1.45, oiler \$1.20. Service—tractor driver \$1.31, Diesel engineer \$1.39, switchman \$1.18 and \$1.24; bus driver, head pulp labourer, pulp inspector \$1.18; pulp labourer, truck driver, trackman, raw materials unloader \$1.10; warehouse checker \$1.13, labourer \$1.05.

A *shift differential* of 3 cents per hour shall be paid for all hours of work on tour or shift work occupations between 8 p.m. and 8 a.m.

Sick leave with pay: after one year's continuous service an employee may be paid his regular wages for 6 days if he is unable to work for 14 consecutive days because of a non-industrial illness or an off-duty accident.

Employees' Mutual Benefit Policy provides for its members benefits of \$2.50 per day in case of sickness or off-duty accidents and special benefits for the loss of hands, feet, eyes, fingers or toes resulting from off-duty accidental injury and one-half of dental bills up to \$15 annually and one-half of optical bills up to \$10 annually. Dues are \$1.50 per month. *Group Life Insurance:* employees may enrol at time of employment or within 60 days for basic insurance of \$2,000 at 20 cents per month. After 6 months' service they may enrol for additional insurance according to annual earnings at 50 cents per additional thousand. The policy contains the

total disability clause. *Blue Cross Hospital Plan:* all employees are enrolled after approximately 45 days' service at the company's expense. Families may be covered under the semi-private service at employee's expense. *Medical Plan:* as a term of employment employees pay \$1 per month which entitles them to professional services of the local doctors and medicines prescribed by them.

Provision is made for *seniority rights* and *grievance procedure*.

MILLE ROCHES, ONT.—PROVINCIAL PAPER LIMITED (MILLE ROCHES DIVISION) AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS, LOCAL 218.

Agreement to be in effect from May 1, 1950, to April 30, 1951, and thereafter from year to year, subject to 30 days' notice. This agreement is similar to the one previously in effect (L.G., Oct., 1949, p. 1242) with the following changes:—

Vacations with pay provisions now provide an additional week to employees after 15 years' service making it 3 weeks in all.

Wage rates for most classifications are increased by 7 cents per hour.

THOROLD, ONT.—PROVINCIAL PAPER LIMITED (THOROLD DIVISION) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, LOCAL 290.

Agreement to be in effect from May 1, 1950, to April 30, 1951, and thereafter from year to year, subject to 30 days' notice. This agreement is similar to the one between Provincial Paper Limited (Mille Roches Division) and the International Brotherhood of Paper Makers, summarized above.

Hourly wage rates for certain classes: cookers and washers—pulp runners \$1.08, pulper helpers \$1, washers and screens \$1.05; beaters—beater engineers \$1.38, pulper runners \$1.10 and \$1.12, helpers \$1.05, broke pulper 99 cents, size, bleach, clay \$1.09; machines—machine tenders \$1.40 and \$1.49, back tenders \$1.18 and \$1.27, third hands \$1.09 and \$1.13, fourth hand \$1.04, spare \$1.10, swipe, coreman 99 cents; calendars and winders—calendar runners \$1.17, re-winder runners \$1.12, helpers 99 cents; finishing—trimmers \$1.16, finishers, new \$1.07, present personnel \$1.14; sample girl 87 cents, girls 83 cents, shipper \$1.18, trucker 99 cents, stockkeeper \$1.14; millwrights, machinists, mechanics—lathe man \$1.42, class A \$1.37, class B \$1.30, helpers \$1.09 and \$1.17, oiler \$1.10; yard—unloading crew, new 97 cents, present help 98 cents, Clark truck operator \$1.04. The above rates are in most cases 7 cents per hour higher than the previous rates.

GEORGETOWN, ONT. — PROVINCIAL PAPER LIMITED (GEORGETOWN DIVISION) AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS, LOCAL 481.

Agreement to be in effect from May 1, 1950, to April 30, 1951, and thereafter from year to year, subject to 30 days' notice. This agreement is similar to the one between the Provincial Paper Limited (Mille Roches Division) and the International Brotherhood of Paper Makers, summarized above.

Hourly wage rates for certain classes: colour room—colour man \$1.21, mixers \$1.11, strain-

ers, clay mixers \$1.04; coating machines—machine tenders \$1.26, back tenders \$1.21, third hands \$1.06, fourth hands \$1.01 and \$1.06, labourers 97 cents, paster \$1.14, helper 99 cents; calendars and winders—wide calendar runners \$1.22, calendar runners, embosser runners, brush machine operator \$1.17, winder runners \$1.11; calendar helpers, winder helpers \$1, wide calendar helpers \$1.01; trimmers—operators \$1.12 to \$1.20; loader, unloader \$1.10; helpers \$1.01, inspector (female) 87 cents; finishing—wrappers (reams) \$1.07, finishers (skids and cases) \$1, sample girls 87 cents, girls 83 cents, tablemen, balermen \$1.01; box shop—case maker \$1.12, helpers \$1.01; millwrights, machinists, mechanics—class A \$1.37, class B \$1.30, helpers \$1.09 and \$1.17, painters class B \$1.17. The above rates represent, in most cases, an increase of 7 cents per hour over the rates previously in effect.

Manufacturing

Metal Products

OSHAWA, ONT.—GENERAL MOTORS OF CANADA LIMITED AND THE INTERNATIONAL UNION UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 222.

Agreement to be in effect from June 12, 1950, to June 11, 1955, and thereafter from year to year, subject to 60 days' notice. The company recognizes the union as the exclusive bargaining agency for its employees with respect to wages, hours and working conditions.

Check-off: the company agrees to deduct from the pay of each employee such sums as may, from time to time, be assessed by the union on its members, excluding any initiation fees and any special assessments which relate to any special union benefit, and remit same to the union. In the event of an unrepudiated illegal strike the company may, at its option, cease to make such deductions.

Hours: 9 per day Monday through Thursday, 8 on Friday, a 44-hour week (except for power house employees). The above hours shall be reduced by one hour per week in each of the years 1951 to 1954 inclusive, such reduction to become effective on June 12 in each year. **Overtime:** time and one-half for work in excess of the regular hours and for work on Saturdays, Sundays and 2 specified holidays; double time for work on 6 specified *paid holidays*. Should any such paid holiday fall on a Saturday or on an employee's regular scheduled day off he shall receive 8 hours' pay at his regular hourly rate. Power house employees shall be paid time and one-half for work in excess of 8 hours per day or 48 hours per week. A 10-minute *rest period* for all employees will be given in the morning and in the afternoon conditional upon the rest period limits being adhered to and production maintained.

Vacations with pay: one week after one year's seniority, 1½ weeks after 3 years', 2 weeks after 5 years' and 3 weeks after 15 years' seniority.

Wage rates, other than group bonus base rates, in effect at the date of this agreement shall be increased by 5 cents per hour and the group bonus base rate by 3 cents per hour. All employees shall receive, by way of improvement factor, a further increase of

3 cents per hour on June 12, 1950, and further increases of 3 cents per hour on June 12 of each of the years 1951 to 1954. In addition, a *cost-of-living allowance* will be granted to all employees on the following basis: beginning with the first pay period on or after June 12, 1950, and at quarterly intervals thereafter to March 12, 1955, the amount of the cost-of-living allowance for any 3 month period will be based on the Dominion Bureau of Statistics' Cost-of-Living Index published in June, 1950, and at quarterly intervals thereafter to March, 1955. For every 1.3 point rise in the index above 164 a one cent per hour increase will be granted. Such adjustment will be made upwards or downwards but in no event will a decline in the index below 164 provide the basis of a reduction in the wage scale. All new men employees shall be paid at the rate of 5 cents per hour less (women and boys 3 cents less) than the standard rate for their respective classifications.

Night shift differential: the present practice of paying a 5 cent premium for night shift work will be continued.

Provision is made for *seniority rights, grievance procedure* and an *apprenticeship plan*.

PENSION PLAN

A supplemental agreement between the two parties provides for the establishment of a Pension Plan, contingent upon obtaining the approval of the Company's Board of Directors and shareholders not later than December 1, 1950. The Pension Plan may be adopted by any Canadian wholly-owned subsidiary company of General Motors Corporation by appropriate action of its Board of Directors. The effective date of the plan is to be set by the Company, but it shall not be later than December 1, 1950, and it shall continue until the termination of the collective agreement.

Eligibility for Retirement and Amount of Pension—Normal retirement: "An employee who on or after the effective date of the Plan shall have attained age 65, and shall have completed 10 or more years of credited service and who shall cease active service," or "An employee separated from the Company's active employment because of quit, discharge or release on or after January 1, 1950 and prior to the effective date of the Plan, and who at the time of such separation had attained age 65 and who had completed 10 or more years' credited service," or "An employee on lay-off or approved Company leave of absence on the effective date of the Plan and who on that date has completed 10 or more years of credited service and who has neither suffered a break in seniority nor returned to work at the date he reaches age 65, or the effective date of the Plan, whichever is later," shall be entitled to receive a pension the monthly amount of which "shall be \$1.50 for each year of credited service, provided that not more than 30 years of service shall be credited for the purpose of such pension."

Early retirement: "On or after the effective date of the Plan an employee who has attained age 60 but not age 65 and who has completed 10 or more years of credited service may retire at his option, or may be retired at the option of the Company." If retired at his option or discharge for cause such employee "may receive at his election either (i) a pension commencing at age 65

based upon his credited service at the time of early retirement" and determined as in the case of normal retirement "or (ii) a pension commencing at the time of early retirement calculated by reducing the pension determined under sub-paragraph (i) immediately above by 6/10 of 1 per cent for each completed calendar month by which such employee is under the age of 65 at the time of early retirement." An employee retired at the option of the company "shall receive a pension commencing at the time of early retirement based upon his credited service at the time of early retirement, the amount of such pension to be determined" as in the case of normal retirement.

Automatic retirement: "An employee who has attained age 69 on or before January 1, 1952 shall be automatically retired on that date, and thereafter an employee shall be automatically retired on the first day of the month following his 69th birthday." Under certain conditions employees with between 5 and 10 years of credited service who reach the automatic retirement age or date shall receive a monthly pension of \$15.

Total and permanent disability retirement: "An employee with at least 15 years' credited service who . . . becomes totally and permanently disabled after his 50th but prior to his 65th birthday, shall be eligible for a disability pension." The amount of such pension is to be determined as in the case of normal retirement.

Supplementary Pension Benefits: In the case of normal retirement, early retirement at the option of the company, and total and permanent disability retirement the company will provide "until such time as there is a Federal or Provincial Old Age or total and permanent disability benefit other than one provided on a "needs" basis, . . . a supplementary pension of \$10 per month for an employee with 25 or more years of credited service. The monthly supplementary pension for an employee with 10 or more years but less than 25 years' credited service shall be that proportion of \$10 which the employee's credited service bears to 25 years of credited service." Upon enactment of legislation entitling an employee upon retirement to statutory benefits in excess of \$45 per month the supplementary pension shall be reduced by such excess amount. However, the early retirement and disability pension will then be increased from \$1.50 to \$2.60 per month for each year of credited service, not in excess of 30 years, until the pensioner attains age 65 or the age at which he becomes entitled to a statutory benefit. In certain cases where the pensioner receives benefits (workmen's compensation, disability benefits, previous retirement plan of company) provided by premiums, taxes or other payments at the expense of the company, the monthly pension may be reduced by a corresponding amount.

Financing: "The Company shall execute a Trust Agreement with a trustee or trustees selected by the Company to manage and operate the Pension Fund . . . The Company will determine the form and terms of any such Trust Agreement . . . For a period of five (5) years commencing December 1, 1950, the Company shall make such contributions to the trustee or pay such premiums under any insured contract for the purposes of providing pensions under the Plan as shall be required under accepted actuarial prin-

ciples to maintain the Plan and pension or insured fund in a sound condition and shall pay for expenses incident to the operation and management of the Plan. No employee shall be required to make any contributions to the Plan."

Administration: The general administration of the provisions of the Plan shall be vested exclusively in the Company. A Board of Administration shall be established, composed of 4 members, 2 appointed by the Company and 2 by the union. Each member of the Board shall have an alternate. The Company and the union shall mutually agree on an impartial chairman. It will be the responsibility of the members of the Board to work out the procedures to be followed in the administration of the Plan.

Provision is made for *computing credited service and the amendment and termination of the Plan.*

INSURANCE PROGRAM

A supplemental agreement between the Company and the union provides for the establishment, subject to the approval of the Board of Directors of the Company, of an Insurance Program either through a self-insured plan or under one or more group insurance policies issued by one or more insurance companies or by arrangement with various Blue Cross or other non-profit plans. The Program is for the hourly-rate employees of all wholly-owned Canadian subsidiary companies of General Motors Corporation, provided that the Board of Directors of the companies decide to participate therein and that at least 75 per cent of the eligible employees have enrolled. The Program shall become effective not later than December 1, 1950, the date to be set by the Company, and it shall continue in effect until the termination of the collective agreement; when effective, it shall terminate all previous group insurance coverages under Company plans.

Administration: The general administration of the Program shall be vested exclusively in the Company. All administrative expenses shall be borne by the Company and it shall determine all administrative procedures which may be required to execute the Program in respect of its employees.

Enrollment: An employee may elect any combination of (a) Life, Extra Accident, Sickness and Accident and Physicians' Attendance Insurance, (b) Blue Cross Hospitalization Insurance and (c) Surgical Operation Insurance, but if he elects the coverages in (a) he must take all the coverages thereunder. The provisions of the Program pertaining to sickness and accident, hospitalization, surgical operation or physicians' attendance insurance shall not apply to employees in provinces having cash sickness benefit laws. Appropriate changes and modifications may be made in their case.

Financing: Employees are required to contribute a specified amount to the Program of Life, Extra Accident, Sickness and Accident and Physicians' Attendance Insurance; the amount, and also the benefits, vary with the employees' base hourly wage rate. The Company will pay the balance of the net cost of the Program over and above the employee contributions. It will also pay any increase in such costs and shall receive any surplus, credits, etc., on any such contracts. The coverage under Hospitalization and Surgical Operation Insurance may include, at the

employee's option, protection for self only, self and spouse, or self and family (spouse and eligible children). The Company will pay one-half the subscription rate for the Blue Cross Plan (semi-private accommodations) and the Physicians' Services Incorporated Plan (for surgical and obstetrical care only) or the equivalent.

COLLINGWOOD, MIDLAND AND PORT ARTHUR, ONT.—THE COLLINGWOOD SHIPYARDS, LIMITED, MIDLAND SHIPYARDS, LIMITED, AND PORT ARTHUR SHIPBUILDING COMPANY, LIMITED, AND THE INDUSTRIAL UNION OF MARINE AND SHIPBUILDING WORKERS OF CANADA, LOCALS 4, 9 AND 11, RESPECTIVELY, OF THE ONTARIO FEDERATION OF SHIPYARD WORKERS.

Agreement to be in effect from March 1, 1950, to February 29, 1952, and thereafter from year to year, subject to 60 days' notice. This agreement is similar to the one previously in effect (L.G., October, 1949, p. 1244) with the following changes and additions:

Statutory holidays: the number of paid holidays has been increased; from March 1, 1950, to March 1, 1951, employees with 90 days seniority will receive 4 specified paid holidays and from March 1, 1951, to March 1, 1952, 6 paid holidays. Work on 8 specified holidays (including the paid holidays) shall be paid for at double time; work on Armistice Day will be paid for at time and one-half.

Pension plan: the company agrees to carefully survey the possibility of extending the company pension plan to all employees of the yard and to be prepared to negotiate this matter during negotiations in 1952.

Wage rates effective March 1, 1950, were, with a few exceptions, 2 cents per hour higher than the rates previously in effect. Effective August 1, 1950, the wage schedule is revised upward, granting employees a further increase of 3 cents per hour.

Construction

NOVA SCOTIA—THE MASTER BUILDERS OF SYDNEY, GLACE BAY, NEW WATERFORD AND NORTHSIDE AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCALS 1588, 1645, 611 AND 2348.

Agreement to be in effect from June 1, 1950, to May 31, 1951. If either party desires to alter the terms of the agreement at its termination 3 months' notice shall be given.

Union security: the employer agrees to hire only union members when available and will give preference to members in good standing; no union member shall be laid off until all non-union men are laid off. If the union is unable to supply the required number of journeymen carpenters upon 2 days' notice non-union men may be employed who will be subject to the rules and regulations of the union. Master carpenters shall have the right to work on their contracts.

Hours: 8 per day Monday through Friday, a 40-hour week. **Overtime:** time and one-half for work in excess of 8 hours per day or 7 hours at shift work. When necessary to work 2 or more shifts, men employed between 5 p.m. and 8 a.m. shall be paid 8 hours' pay for 7 hours work. Double time shall be paid for work on Saturday, Sunday and 8 specified holidays.

Minimum hourly wage rates for journeymen carpenters shall be \$1.40 (an increase of 10 cents per hour). Any member of the union working for anyone other than a recognized contractor shall charge 45 cents per hour more than the above rate. Apprentices—first 500 hours 7½ cents, second 500 hours 78 cents, second 1000 hours 85 cents, third 1000 hours 95 cents and so on to \$1.26 for eighth 1000 hours. A special rate of wages may be established for an employee who is handicapped. No union member who is regularly employed shall sell his services outside of the scheduled working hours.

Apprentices may be employed in ratio of 1 to 5 journeymen; in regard to hours, overtime and holidays they shall be governed the same as journeymen.

Transportation to be mutually arranged between employer and employee.

Provision is made for *grievance procedure*.

TORONTO, ONT.—THE GENERAL CONTRACTORS SECTION OF THE TORONTO BUILDERS EXCHANGE AND THE BRICKLAYERS, MASONS AND PLASTERERS INTERNATIONAL UNION OF AMERICA, LOCALS 2 (BRICKLAYERS' UNION) AND 26 (STONEMASONS' UNION).

Agreement to be in effect from May 1, 1950, to April 30, 1952, and thereafter from year to year, subject to notice.

Union security: only members of the union shall be employed during the term of the agreement. The union shall give preference in supplying men to members of the Exchange, party to the agreement. No union members shall be allowed to lay brick or cut or lay stone for any employer who employs non-union stonemasons or bricklayers. The union shall be strictly a practical journeymen's union. Any member desirous of engaging in contracting must, before doing so, resign as a member of the union and 12 months must elapse before he can re-enter the union.

Hours: 8 per day Monday through Friday, a 40-hour week. **Overtime** at time and one-half will be paid for all work in excess of regular hours and at double time for all work on Saturdays, Sundays and 8 specified holidays.

Vacation pay shall be at the rate of 4 per cent of wages.

Wage rates for journeymen bricklayers and stonemasons \$1.95 per hour until April 30, 1951, and \$2 per hour thereafter (the previous rate was \$1.80 per hour). If the *cost-of-living* index as determined by the Dominion Bureau of Statistics rises above 165 during the life of this agreement, the wage rate will be increased by 5 cents per hour for each 5 points by which the index exceeds 165. The employer agrees to pay 10 cents per hour extra for fire work. Time and one-seventh will be paid for work on the second and third shifts when such shifts are worked. Employees will receive 2 hours' pay for reporting to the job.

Transportation: on jobs outside Toronto city limits the employers agree to provide free transportation from the city limits to the job and to pay travelling time at the rate of 6 cents per mile.

Apprentices: the minimum rate of wages and conditions for apprentices shall be as stipulated by the Ontario Apprenticeship Board.

Provision is made for the *settling of disputes*.

TORONTO, ONT.—GENERAL CONTRACTORS SECTION OF THE TORONTO BUILDERS EXCHANGE AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, TORONTO AND DISTRICT COUNCIL.

Agreement to be in effect from May 1, 1950, to April 30, 1951, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect (L.G., Oct., 1949, p. 1244) with the following change:—

Minimum hourly wage rates for journey-men carpenters have been increased from \$1.60 to \$1.75 with the provision that if the *cost of living* index, as determined by the Dominion Bureau of Statistics, rises above 165 during the lifetime of this agreement, the wage rate will be further increased by 5 cents per hour for each 5 points by which the index exceeds 165.

WINNIPEG, MAN. — GREATER WINNIPEG PLUMBING AND HEATING EMPLOYERS LABOUR RELATIONS BOARD AND UNITED ASSOCIATION OF JOURNEYMEN AND APPRENTICES OF THE PLUMBING AND PIPEFITTING INDUSTRY OF THE UNITED STATES AND CANADA, LOCAL 254.

Agreement to be in effect from August 1, 1950, to April 30, 1952, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect (L.G., Sept., 1949, p. 1113) with the following change:—

Wage rates for journeymen are increased from \$1.55 per hour to \$1.65 per hour from August 1, 1950 to July 31, 1951, and to \$1.70 per hour from August 1, 1951, to April 30, 1952. The wage rate for helpers remains unchanged at 95 cents per hour.

EDMONTON, ALTA.—THE EDMONTON MASTER PAINTERS ASSOCIATION AND MEMBERS THEREOF AND THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS OF AMERICA, LOCAL 1016.

Agreement to be in effect from April 1, 1950, to December 31, 1951, and thereafter until replaced by a subsequent agreement. The employers will recognize the union as the exclusive bargaining agency for all eligible employees. There shall be no discrimination in the employment of or the laying off of qualified journeymen.

Hours: 8 per day Monday through Friday; a 40-hour week. *Overtime:* time and one-half for hours worked in excess of the standard working hours. On jobs where more than one shift is necessary, all shifts outside of the regular day shift shall receive 8 hours' pay for 7½ hours' work. Double time will be paid for work on Saturdays (after 8 a.m.), Sundays and 7 specified holidays. No work shall be performed on Labour Day.

Minimum hourly wage rates: journeymen painters, decorators or paperhangers \$1.30 from April 1, 1950, to October 31, 1950, and \$1.35 from November 1, 1950, to December 31, 1951; spray painters and swing stage men shall receive 10 cents per hour above the minimum rate for journeymen. The rate for extra hazardous work shall be settled by mutual agreement between the employer and the employee.

Out-of-town jobs: employees on out-of-town jobs shall receive transportation and room and board at \$2 per day; pay at the regular

rate shall be paid while travelling during the regular working day. Where the employees return to their homes daily, transportation shall be provided to the nearest street car or bus stop; travelling time for one way shall be paid for.

Apprentices shall be employed in accordance with the regulations respecting painting and decorating trades under the Apprenticeship Act.

Provision is made for the *settling of disputes*.

VANCOUVER, B.C.—THE BUILDING AND CONSTRUCTION INDUSTRIES EXCHANGE OF BRITISH COLUMBIA (PAINTING AND DECORATING SECTION) AND THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS OF AMERICA, LOCAL 138.

Agreement to be in effect from July 3, 1950, to March 31, 1952, and thereafter from year to year, subject to 90 days' notice.

Union security: only members of the union shall be employed. If the union is unable to supply suitable men, the employer shall have the right to employ whomsoever he wishes but men thus employed shall join the union within 30 days from date of employment.

Hours: 8 per day Monday through Friday, a 40-hour week. *Overtime:* time and one-half shall be paid for the first 4 hours worked in excess of the regular hours, double time thereafter and for work on Saturdays, Sundays and 8 specified holidays. No work shall be performed on Labour Day. Night shifts between 4.30 p.m. and 1.30 a.m. will be paid 8 hours' pay for 7 hours' work and after 1.30 a.m. time and one-half, except that when building cleaning 8 hours between 5 p.m. and 8 a.m. shall constitute a night shift and a night shift bonus of 15 cents per hour shall be paid; any time worked after 8 hours shall be paid for at regular overtime rates.

Vacation pay will be provided as required by Provincial law.

Minimum hourly wage rates: from July 3, 1950, to December 31, 1950,—brush painting and paperhanging \$1.50, spray painting, steamcleaning and sandblasting \$1.60; thereafter, during the remaining operation of the agreement, an additional 5 cents per hour will be paid. Ten cents per hour extra will be paid for all work performed from scaffolds between 60 and 100 feet high and 45 cents per hour extra for work from scaffolds over 100 feet high.

Out-of-town jobs: employees on out-of-town jobs shall receive transportation to and from the job and reasonable living expenses, the latter not to exceed \$60 per month. The regular rate shall be paid for travelling time during regular working hours; no transportation time shall be paid for Saturdays and Sundays. On jobs outside of the Greater Vancouver area or on jobs where camps are maintained where a majority of all the employees on the job request, and it is agreed, 44 hours a week may be worked on straight time. However, in all cities or towns and also where there is a building trades union agreement, the hours of work customarily in those cities or towns, or as specified in the agreement, shall be worked.

Apprentices shall be employed in accordance with the provisions of the British Columbia Apprenticeship Act. All apprentices shall be registered with the union.

Provision is made for *grievance procedure*.

Collective Agreement Act, Quebec*

Recent proceedings under the Collective Agreement Act, Quebec,* include the extension of one new agreement and the amendment of ten others. These include in addition to those summarized below, the amendment of the agreements for barbers and hairdressers at Three Rivers, and for the wholesale fur industry at Montreal.

Requests for the amendment of the agreements for the building trades at Sorel and at Montreal, for the mechanical construction and repair industry at Quebec and for barbers and hairdressers at St. Hyacinthe were published in the *Quebec Official Gazette* issue of August 26. Requests for the amendment of the agreements for the building trades at Montreal and for the building materials industry in the province were gazetted September 2, a request for the amendment of the agreement for the barber and hairdressing trades at Montreal was gazetted September 9. A request for a new agreement for bakers, pastry workers and biscuit makers at Quebec and requests for the amendment of the agreements for the fine glove industry in the province and for the building trades at Chicoutimi were gazetted September 16.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessments on the parties.

Manufacturing

Fur and Leather Products

SHOE INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated August 9, and gazetted August 26, extends the term of the previous Orders in Council for this industry (L.G., Jan.-Feb., 1948, p. 50, April, p. 331, Nov., p. 1245; Jan., 1949, p. 65; Jan., 1950, p. 77, and previous issues) to December 1, 1950.

WHOLESALE FUR INDUSTRY, MONTREAL.

An Order in Council, dated August 30, and gazetted September 9, makes obligatory the terms of a new agreement between The Fur Manufacturers' Guild Incorporated and The International Fur and Leather Workers' Union and The Joint Board of the International Fur Workers' Union of Montreal and locals 66 and 67.

Agreement to be in effect from September 9, 1950, to April 30, 1952, and thereafter from year to year, subject to notice. Agreement covers all employers and/or manufacturers engaged in producing, repairing, re-modelling fur coats, fur garments, fur trimmings, piece plates, strippings, and any apparels or articles made in whole or in part of any type of furs. All signatories represented by The Fur Manufacturers' Guild Inc., as well as all wholesale and retail merchants who, on April 30, 1950, paid an

assessment to the Fur Industry Parity Committee, Wholesale Section of Montreal and all fur merchants, wholesale or retail, who might, following an award of The Chief Conciliator and Arbitrator of the Province, be so classified as to come within the scope of the agreement are also governed by it.

Territorial jurisdiction comprises the Island of Montreal and within a radius of 50 miles of it. (This area is now composed of one zone only instead of two zones as previously.)

Hours: for manufacturers, 8 per day, a 5-day week; for retailers, a 5-day week of 7 hours and 5 hours on Saturday. (Hours are similar to those previously in effect for the area formerly known as zone 1, the Island of Montreal and within a radius of 10 miles, but are now extended to include the area formerly known as zone 11, the balance of the territorial jurisdiction, in which zone a 48-hour week was previously in effect.)

Overtime as previously in effect is payable at time and one-half. Employees are to be paid for 7 holidays; if required to work they shall be paid at double time and one-half.

Minimum weekly wage rates to be in effect from September 1, 1950: cutters \$55.50 and \$65.50, operators (male) \$43 and \$54.50, operators (female) \$33.50 and \$42, finishers (male) \$41 and \$49, finishers (female) \$32.50 and \$40, trimmers \$36.50 and \$43, blockers \$32.50 and \$43, examiners \$37 and \$47, apprentice cutters \$43, lining cutters (or those who cut and sew) \$36.50, lining operators \$31.50, employees engaged in trimming or padding collars \$32.50. (The above rates represent increases ranging from \$1.50 to \$2.90 per week.) Wage rates for apprentices (male or female) from \$15 per week during the first 6 months to \$21 in the fourth 6 months and thereafter the wages of a second class worker. All employees will receive a 5 per cent increase in their weekly wages effective September 1, 1950.

Vacation: one week with pay to employees with at least 6 months' service; 2 weeks with pay for 3 or more years of continuous service with the same employer. (Vacation provisions similar to those formerly in effect.)

* In Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employees or associations of employees, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. References to the summary of this Act and to amendments to it are given in the *LABOUR GAZETTE*, January, 1949, page 65. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Provisions governing late starting, work at home and apprenticeship regulations are included in this agreement.

RETAIL FUR INDUSTRY, MONTREAL.

An Order in Council, dated August 9, and gazetted August 26, amends the previous Orders in Council for this industry (L.G., Aug., 1947, p. 1174; Sept. 1948, p. 992, and previous issues). The agreement as amended is to remain in effect until April 30, 1952, and thereafter from year to year, subject to notice.

Hours and overtime: employees reporting late to work by their own fault shall complete the regular number of daily working hours before being entitled to the rate of time and one-half. Employers, may however, keep a female finisher at work on Saturday morning during January and February, at straight time. The regular week of such employee shall not however, exceed 44 hours. When Christmas and New Year's Day fall on Sunday, the following Monday shall be observed as a *paid holiday*. (Regular working hours and overtime rates are similar to those previously in effect.)

Minimum hourly wage rates: cutters \$1.64 and \$1.38, operators \$1.36 and \$1.08, finishers \$1.22 and \$1.02, blockers \$1.07 and 81 cents, female operators and female finishers \$1.02 and 82 cents, female coat closers \$1.02, lining makers (cutting and sewing) 96 cents, finishing foreladies and female finishers who distribute work \$1.08. (The above rates represent increases ranging from 1 cent to 11 cents per hour.) Rates for apprentices (male and female) are increased by 3 cents per hour and are as follows: 38 cents per hour during the first 6 months to 63 cents per hour during the first 6 months of the third year; rates for apprentice cutters from 80 cents per hour during the first 6 months of the first year to \$1.30 per hour during the second 6 months of the third year. (Rates for apprentice cutters were previously \$1 per hour during the first 6 months of the first year to \$1.25 per hour during the second 6 months of the third year.) Female lining cutters 90 cents and female lining sewers 80 cents per hour are added classifications.

All employees in service during the week ending September 1, 1950, shall automatically be entitled to a 5 per cent increase on the rates paid the preceding week, as from September 4, 1950.

Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated August 30, and gazetted September 9, amends the previous Orders in Council for this industry (L.G., Aug., 1947, p. 1174, Sept., p. 1306, Oct., p. 1474; April, 1949, p. 450; June, p. 735, and previous issues).

Statutory holidays: all employees with 3 months' service are entitled to 5 specified paid holidays as formerly in effect. Employees required to work on any of the above holidays shall receive payment at the rate of double time and one-half. The following are exceptions to the above—if an employer has entered into a collective labour agreement with a union representing his employees whereby an alternative arrangement (subject to investigation and examination by the Joint Committee or its duly authorized repre-

sentatives) is given for the payment of statutory holidays (regardless of what statutory holidays are observed), providing for payment in lieu of holidays of a minimum sum equivalent to not less than 5 days' pay at regular rates, then such employer shall not be bound to pay the statutory holidays specified herein; employers manufacturing children's sportswear and children's clothing, and girls' clothing up to 14 years inclusive.

Cost-of-living bonus: effective September 9, 1950, all employers shall pay to their employees a cost-of-living bonus of 18½ cents per hour (previously 15 cents per hour), with the following exceptions—employers who pay a sum equal to 3½ cents per hour for each regular and overtime hour worked by their employees into a social welfare plan shall only be required to pay a cost-of-living bonus of 15 cents per hour; employers in the odd pants and sportswear industry producing, in an amount exceeding 25 per cent of their total production, garments not covered by this agreement, shall pay to their employees a cost-of-living bonus of 12½ cents an hour; employers manufacturing children's sportswear and children's clothing, and girls' clothing (up to 14 years inclusive) shall pay a bonus of 10 cents per hour; any employer, who by virtue of a collective labour agreement with the union representing his employees, has agreed to give a second week's vacation with pay, to all employees with 13 weeks' but less than 2 years of service, may continue to pay a cost-of-living bonus of 11 cents per hour (previously 7½ cents) to beginners who have had no previous experience in this industry until they have completed 13 weeks of employment after which they shall be paid the full bonus of 18½ cents per hour; any employer who by virtue of a collective labour agreement with the union representing his employees who has been paying prior to the effective date of this agreement, an increase of 3½ cents per hour in cost-of-living bonus shall now only be required to pay the present 18½ cents per hour bonus provided herein.

Overtime premiums shall not apply to the special cost-of-living bonus provided herein.

Non-metallic Minerals and Chemicals

PAINT MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated August 30, and gazetted September 9, amends the previous Orders in Council for this industry (L.G., Oct., 1948, p. 1127; Jan. 1950, p. 78).

Hours: 48 per week, except for those employees on continuous operations (boiler house employees and workmen in white lead and linseed and other oil manufacturing) who work 56 hours per week. (Hours remain unchanged from those formerly in effect.)

Overtime: time and one-half is paid for all work over 9 hours in any one day or 48-hours in any week except employees on continuous operations who are paid overtime after 56 hours in a week. Employees are to be paid for 5 specified holidays (an increase of 2) provided they work the first working day following these holidays unless prevented from doing so by sickness. Employees required to work on any of the above holidays shall, in addition, be paid at their regular hourly rates for the hours worked. (Overtime rates are similar to those previously in effect.)

Minimum hourly and weekly wage rates: in paint and lacquer factory—labourers 82 cents; helpers 86 cents; fillers 89 cents; mixers 95 cents; millmen 96 cents and \$1; shaders 98 cents and \$1.02; varnish factory—labourers 82 cents; helper 86 cents; filler 89 cents; thinner man 96 cents; kettlemen \$1 and \$1.05; white lead and dry colour factory—labourer 82 cents; helper 86 cents; grinders 93 cents and 97 cents; pressmen 93 and 96 cents; strikers 97 cents and \$1; receiving, packing and shipping departments—labourer 82 cents; helper 86 cents; packer 89 cents; shipping and stockkeeping clerk 89 cents; general—cooper and mill dresser 89 cents; watchman, fireman and time keeper \$42.50 per week; maintenance men (including carpenter, electrician, plumber, machinist and blacksmith) \$1.07; stationary enginemen fourth class 94 cents, third class \$1.02, second class \$1.14; linseed oil mill—labourer 82 cents; hydraulic press or expeller men 89 cents; maintenance man \$1.07; male employees (under 18 years of age) 60 cents, (18 years of age or over) 82 cents; boys (under 18 years of age) 60 cents; female employees—helpers 60 cents, labellers 65 cents, operators and fillers 70 cents. Charge hands will be paid 5 cents per hour more than the minimum rate established in this agreement for their classification. (Rates shown above represent increase ranging from 8 to 22 cents per hour and the weekly rate represents an increase of \$7.75 per week over those rates formerly in effect.)

Vacation: one week with pay after one year's service, 2 weeks with pay after 3 years. (Vacation provisions remain unchanged from those previously in effect.)

Construction

BUILDING TRADES, MONTREAL.

An Order in Council, dated August 30, and gazetted September 9, amends the previous Orders in Council for this industry (L.G., June, 1950, p. 874, Oct., p. 1679) by the addition of special provisions governing the trade of *asbestos insulation mechanic*.

Hours: 8 per day, 40-hours per week (a reduction of 4 hours per week).

Overtime provisions are similar to those presently in effect for other building trades at Montreal with the exception of the following: for the above trade, as previously in effect, the rate of double time shall be paid only after midnight.

Minimum hourly wage rates for asbestos insulation mechanics are increased by 10 cents per hour to \$1.55; junior mechanics (previously fourth year apprentices) now receive \$1.20 per hour instead of \$1.10 as formerly in effect. Apprentices' rates from 77 cents during the first year to \$1.05 in the third year. (Rates for apprentices in the second and third years are increased by 5 cents per hour; the rate during the first year remains unchanged.) Foremen's rates are also increased by 10 cents per hour.

Another Order in Council, dated September 6, and gazetted September 16, amends the previous Orders in Council for this industry (L.G., June, 1950, p. 874, Oct., p. 1679).

Plumbers

Cost-of-living bonus: to the minimum rates of \$1.55 for journeymen and \$1.11 for junior mechanics, a cost of living bonus of 3 cents

per hour, effective from September 16, 1950, shall be paid to the following categories of employees—journeymen in plumbing, heating and pipe work, pipe welder, junior mechanics and apprentices. The cost of living bonus will not be paid for any hours exceeding the standard work week of 40 hours or to those employees whose hourly rate is already equal to or exceeds \$1.58 for journeymen of the above trades and \$1.14 for junior mechanics.

BUILDING TRADES, CHICOUTIMI.

An Order in Council, dated August 30, and gazetted September 16, amends the previous Orders in Council for this industry (L.G., Jan., 1948, p. 51, April, p. 334, Aug., p. 872; Aug., 1949, p. 987; Aug., 1950, p. 1185, and previous issues).

Minimum hourly wage rates in the structural iron industry, for steam generation mechanics and construction boiler-makers: structural iron erector (or demolition) and welder (all categories), construction boiler-maker, steam generation mechanic and erector, welder shall be paid a minimum of \$1.50 per hour, structural iron painter \$1.40, construction boiler-makers', erectors', welder's and steam generation mechanic's helpers \$1.10; workers installing stokers in furnaces with a horizontal heating surface of 20 feet or less \$1.20 and their helpers 95 cents per hour. (The above rates represent increases ranging from 10 cents to 15 cents per hour.) Wage rates for apprentices (structural iron) from 70 per cent of the journeyman's rate in the first year to 85 per cent in second year; apprentices (steam generation mechanics and construction boiler-maker) from 60 per cent of the journeymen's rate in the first year to 90 per cent in the fourth year. (Previously rates for apprentices of the above trades were from 50 per cent of the journeymen's rate in the first year to 85 per cent in the second year.)

BUILDING TRADES, COUNTIES OF DRUMMOND, ARTHABASKA AND NICOLET.

An Order in Council, dated August 30, and gazetted September 16, amends the previous Orders in Council for this industry applicable to the *structural iron industry, steam generation mechanics and construction boiler-makers* (L.G., Aug., 1948, p. 872; May, 1949, p. 605; July, 1950, p. 1053). Another amendment to this agreement was published in the *Quebec Official Gazette* issue of June 25, 1949.

Minimum hourly wage rates for classifications covered by this section of the agreement are similar to those shown above for the same classifications in the building trades at Chicoutimi. Rate increases range from 16 cents to 30 cents per hour. Wage rates for apprentices (structural iron) 70 per cent of the journeymen's rate in the first year to 85 per cent in the second year are similar to those previously in effect; apprentices (steam generation mechanics and construction boiler-makers) 60 per cent of the journeymen's rate in the first year to 90 per cent in the fourth year. (Rates for this class of apprentice were previously similar to the rate shown above for apprentices—structural iron.) The classification welder mentioned in this amendment is additional to those previously covered by the agreement affecting this area.

BUILDING TRADES, HULL.

An Order in Council, dated August 30, and gazetted September 16, amends the previous Orders in Council for this industry applicable to the *structural iron industry, steam generation mechanics and construction boiler-makers* (L.G., Jan., 1950, p. 78, April, p. 517).

Minimum hourly wage rates and their comparative increases over those previously in effect for the classification covered by this section of the agreement are similar to those shown above for the same classifications in the building trades at Chicoutimi.

BUILDING TRADES, JOLIETTE.

An Order in Council, dated August 30, and gazetted September 16, amends the previous Orders in Council for this industry applicable to the *structural iron industry, steam generation mechanics and construction boiler-makers* (L.G., Aug., 1947, p. 1175; June, 1948, p. 620; June, 1949, p. 736; July, 1950, p. 1053, and previous issues). Another amendment to this agreement was published in the *Quebec Official Gazette* issue of June 25, 1949.

Minimum hourly wage rates are similar to those shown above for the same class of employee in the building trades at Chicoutimi. (Rate increases for this area range from 26 cents to 40 cents per hour over those previously in effect.) Rates for all apprentices of the above trades which were formerly 50 per cent of the journeymen's rate in the first year to 75 per cent in the second year are now as follows: apprentice (structural iron) 70 per cent in the first year to 85 per cent in the second year; apprentices (steam generation mechanics and construction boiler-makers) 60 per cent of the journeymen's rate in the first year to 90 per cent in the fourth year.

BUILDING TRADES, ST. HYACINTHE.

An Order in Council, dated August 30, and gazetted September 16, amends the previous Orders in Council for this industry applicable to the *structural iron industry, steam generation mechanics and construction boiler-makers* (L.G., July, 1947, p. 1002, Sept., p. 1308; May, 1948, p. 488; Oct., 1949, p. 1247; Feb., 1950, p. 209, Aug., p. 1185, Oct., p. 1679 and previous issues).

Minimum hourly wage rates are similar to those shown above for the same class of employee in the building trades at Chicoutimi. (The range of wage rate increases over those previously in effect are the same in this area as shown above for the building trades at Joliette.) Wage rates for apprentices of the above trades which were formerly 50 per cent of the journeymen's rate in the first year to 85 per cent in the second year are now as follows: apprentice (structural iron) 70 per cent of the journeyman's rate in the first year to 85 per cent in the second year; apprentice (steam generation mechanic and construction boiler-maker) 60 per cent of the journeyman's rate in the first year to 90 per cent in the fourth year.

BUILDING TRADES, ST. JOHN AND IBERVILLE.

An Order in Council, dated August 30, and gazetted September 16, amends the previous Orders in Council for this industry applicable to the *structural iron industry, steam generation mechanics and construction boiler-makers* (L.G., April, 1947, p. 544; Jan.-Feb., 1948, p. 51, June, p. 621, Nov., p. 1247, Dec.,

p. 1241; July, 1950, p. 1053). Another amendment to this agreement was published in the *Quebec Official Gazette* issue of June 25, 1949.

Minimum hourly wage rates are similar in all cases to those shown above for this class of employee in the building trades at Chicoutimi. (The rates shown remain unchanged from those previously in effect in this area.)

BUILDING TRADES, SHERBROOKE.

An Order in Council, dated August 30, and gazetted September 16, amends the previous Orders in Council for this industry applicable to the *structural iron industry, steam generation mechanics and construction boiler-makers* (L.G., Nov., 1947, p. 1661; Dec., 1948, p. 1421; Feb., 1949, p. 178; Feb., 1950, p. 209). Another amendment to this agreement was published in the *Quebec Official Gazette* issue of February 11, 1950.

Minimum hourly wage rates are similar to those shown above for this class of employee in the building trades at Chicoutimi. (The range of wage rate increases in this area over those formerly in effect are the same for tradesmen as those shown above under building trades at Joliette.) Conditions governing wage rates for apprentices are similar to those shown above at St. Hyacinthe.

BUILDING TRADES, SOREL.

An Order in Council, dated August 30, and gazetted September 16, amends the previous Orders in Council for this industry applicable to the *structural iron industry, steam generation mechanics and construction boiler-makers* (L.G., April, 1947, p. 544, Dec., p. 1304; Jan.-Feb., 1948, p. 51; Jan. 1950, p. 78, Oct., p. 1679, and previous issues).

Minimum hourly wage rates are similar to those shown above for the same class of employee in the building trades at Chicoutimi. (The range of wage increases in this area over those previously in effect are the same as those shown above for the building trades at Joliette.) Conditions governing wage rates of apprentices are similar to those shown above at St. Hyacinthe.

BUILDING TRADES, ST. JÉRÔME.

An Order in Council, dated August 30, and gazetted September 16, amends the previous Orders in Council for this industry applicable to the *structural iron industry, steam generation mechanics and construction boiler-makers* (L.G., Aug., 1948, p. 873; Dec., 1949, p. 1559; May, 1950, p. 694, Oct., p. 1680).

Minimum hourly wage rates are similar to those shown above for the same class of employee in the building trades at Chicoutimi. (The range of wage rate increases in this area over those formerly in effect are the same as those shown above at Chicoutimi.) Wage rates for apprentices previously indicated as 70 per cent of the journeymen's rates in the first year to 85 per cent in the second year are now as follows: apprentices (structural iron) 70 per cent in the first year to 85 per cent in the second year; apprentices (steam generation mechanics and construction boiler-makers) from 60 per cent of the journeymen's rate in the first year to 90 per cent in the second year.

BUILDING TRADES, THREE RIVERS.

An Order in Council, dated August 30, and gazetted September 16, amends the previous

Orders in Council for this industry applicable to the *structural iron industry, steam generation mechanics and construction boiler-makers* (L.G., March, 1947, p. 370, Nov., p. 1661; Jan., 1948, p. 51, Aug., p. 873; Sept., 1949, p. 1116; Feb., 1950, p. 209, and previous issues). Other amendments correcting and amending this agreement were published in the *Quebec Official Gazette* issues of September 17, 1949 and July 29, 1950.

Minimum hourly wage rates are similar to those shown above for the same class of employee in the building trades at Chicoutimi. (The range of wage rate increases over those previously in effect are the same in this area as shown above for the building trades at Joliette.) Conditions governing wage rates of apprentices are similar to those shown above at St. Hyacinthe.

Another Order in Council, dated September 6, and gazetted September 16, amends the

previous Orders in Council for this industry (L.G., March, 1947, p. 370, Nov., p. 1661; Jan., 1948, p. 51, Aug., p. 873; Sept., 1949, p. 1116; Feb., 1950, p. 209, and previous issues). This amendment shall remain in force until June 1, 1951, and thereafter from year to year, subject to notice.

Minimum hourly wage rates: should the official cost of living index, as established by the Dominion Bureau of Statistics, attain 168 points the hourly rate of all employees of zone 1 governed by this agreement, excepting apprentices, shall automatically be increased by 5 cents. Such increase, however, shall come into force only on the Monday following the publication of a notice to that effect by either one of the contracting parties to the collective agreement rendered obligatory by the present agreement in *Le Nouvelliste* and the *St. Maurice Valley Chronicle*.

Industrial Standards Acts, Etc.

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council in Nova Scotia, Ontario and Saskatchewan

Recent proceedings under the Industrial Standards Acts, etc.* include seven new schedules and the amendment of one other, all summarized below.

NOVA SCOTIA

Construction

BRICKLAYERS, MASONS AND TILE SETTERS, HALIFAX AND DARTMOUTH.

An Order in Council, dated July 14, and gazetted August 2, makes binding the terms of a new schedule for bricklayers, masons and tile setters at Halifax and Dartmouth, to be in effect until and including April 30, 1951.

The terms of this schedule are similar to those previously in effect and summarized in the *LABOUR GAZETTE* issue of December, 1949, with the following exceptions:—

Overtime: time and one-half for work done during the 4-hour period immediately following the regular working-day and for work on Saturday morning; double time for all other work and for work on Sundays and specified holidays. (Previously the rate of time and one-half mentioned only in respect of Saturday morning.)

Minimum hourly wage rates for apprentices from 45 per cent of journeymen's rates during the first 1000 hours to 80 per cent in the eighth 1000 hours (exclusive of vacation pay of journeymen). (Rates for apprentices were previously 66½ cents per hour during the first 1000 hours to \$1.16 in the eighth 1000 hours, these rates included 3 cents per hour in lieu of vacation with pay.)

Vacation: apprentices shall now receive 3 cents per hour in addition to percentages of journeymen's rates (exclusive of vacation pay) in place of vacation with pay for all regular hours worked.

Apprenticeship regulations are included in this schedule.

CARPENTERS, HALIFAX AND DARTMOUTH.

An Order in Council, dated July 14, and gazetted August 2, makes binding the terms of a new schedule for carpenters at Halifax and Dartmouth, to be in effect until and including April 30, 1951.

The terms of this schedule are similar to those previously in effect and published in the *LABOUR GAZETTE* issue of December, 1949. The wage rate remains at \$1.26 which includes 3 cents per hour in lieu of vacation pay; regular hours are 40 per week.

PAINTERS, HALIFAX AND DARTMOUTH.

An Order in Council, dated July 14, and gazetted August 2, makes binding the terms of a new schedule for painters at Halifax and Dartmouth, to be in effect until and including April 30, 1951.

The terms of this schedule are similar to those which were formerly in effect and summarized in the *LABOUR GAZETTE* issue of August, 1949. The wage rate remains at \$1.10 for brush painters and \$1.20 for spray-gun painter (these rates inclusive of 3 cents per hour in lieu of vacation with pay). Regular hours are 40 per week.

* In six provinces—Nova Scotia, New Brunswick, Ontario, Manitoba, Saskatchewan and Alberta—legislation provides that, following a petition from representatives of employers and employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the *LABOUR GAZETTE*, April 1950, page 518.

PLASTERERS, HALIFAX AND DARTMOUTH.

An Order in Council, dated July 14, and gazetted August 2, makes binding the terms of a new schedule for plasterers at Halifax and Dartmouth, to be in effect until and including April 30, 1951.

The terms of this schedule are similar to those which were previously in effect and summarized in the *LABOUR GAZETTE* issue of December, 1949, with the exception of the following:—

Vacation: apprentices to receive 3 cents per hour in addition to regular rates in lieu of vacation with pay during the regular hours of work.

Provisions covering apprenticeship regulations are included in this schedule.

PLUMBERS, HALIFAX AND DARTMOUTH.

An Order in Council, dated July 14, and gazetted August 2, makes binding the terms of a new schedule for plumbers and steam-fitters at Halifax and Dartmouth, to be in effect until and including April 30, 1951.

The terms of this schedule are similar to those which were formerly in effect and summarized in the *LABOUR GAZETTE* issue of December, 1949 with the exception of the following:—

Vacation: apprentices to receive 3 cents per hour in addition to regular rates in lieu of vacation with pay during the regular hours of work.

Provisions covering apprenticeship regulations are included in this schedule.

BUILDING LABOURERS, HALIFAX AND DARTMOUTH.

An Order in Council, dated July 14, and gazetted August 2, makes binding the terms of a new schedule for labourers at Halifax and Dartmouth, to be in effect until and including April 30, 1951.

The provisions of this schedule are similar to those formerly in effect and published in

the *LABOUR GAZETTE* issue of December, 1949. The wage rate remains at 81 cents per hour; regular hours are 48 per week.

ONTARIO

Construction

SHEET METAL INDUSTRY, OTTAWA.

An Order in Council, dated August 31, and gazetted September 16, makes binding the terms of a new schedule for sheet metal workers at Ottawa, to be in effect from September 26, 1950, "during pleasure".

Hours: 8 per day, Monday through Friday, a 40-hour week.

Overtime: time and one-half for work performed during the 4-hour period immediately following the regular working-day Monday through Friday and for emergency work performed between 8 a.m. and 12 noon on Saturday; double time for all other work, and for work on Sundays and 8 specified holidays.

Minimum hourly wage rates: \$1.57 per hour (an increase of 17 cents per hour over those formerly in effect). Employees working on *night shift* shall receive 8 hours' pay for 7 hours' work. The Advisory Committee may fix a lower minimum rate for handicapped workers.

SASKATCHEWAN

Construction

CARPENTERS, MOOSE JAW.

An Order in Council, dated June 15, and gazetted June 23, amends the previous Orders in Council for this industry (*L.G.*, Nov., 1947, p. 1663; June, 1948, p. 622).

Minimum hourly wage rates: effective July 4, 1950, minimum wage rates for carpenters are increased from \$1.30 to \$1.40 per hour.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

The Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classifications of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are awarded in accordance with a policy which provides that wage rates must equal those current in the district.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During August

(1) *Works of Construction, Remodelling, Repair or Demolition.*

During the month of August the Department of Labour prepared 241 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

During the same period a total of 151 construction contracts was awarded by the various Government departments. Particulars of these contracts appear in the accompanying table.

Copies of the relevant wages schedules are available to trade unions or other *bona fide* interested parties, on request.

The labour conditions of each of the contracts listed under this heading, besides stipulating working hours of not more than eight per day and forty-four per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than forty-four per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "*minimum rates only*" and that "nothing herein contained shall be considered as exempting contractors and subcontractors from the payment of higher rates in any instance where, during the continuance of the work such higher rates are fixed by provincial legislation, by agreements between employers and employees in the district or by changes in prevailing rates".

(2) *Contracts for the Manufacture of Supplies and Equipment.*

Contracts for supplies and equipment were awarded as follows, under the policy that wage rates must equal those current in the district:—

Department	No. of contracts	Aggregate amount
Canadian Commercial Corporation.	8,570	\$12,066,846.79
Post Office.	11	29,348.34
Public Works.	3	19,013.00
R.C.M.P.	3	28,341.00

*The labour conditions of these contracts contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of 8 per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.

LABOUR LAW

Labour Legislation Enacted by the Twenty-first Parliament of Canada 1949-50

Parliament paved the way for constitutional amendment, provided for supplementary unemployment insurance benefits in the months of low employment, and dealt, in an emergency session, with the railway strike.

The main enactments of interest to labour of the first three sessions of the Twenty-first Parliament were the steps taken to make possible amendment of the Canadian constitution by Canada, important amendments to the Unemployment Insurance Act, and the enactment of the Maintenance of Railway Operation Act at the third (special) session.

FIRST SESSION

The first session of the Twenty-first Parliament opened on September 15, 1949 and prorogued on December 10, 1949.

B.N.A. Act Amendment

Parliament at this session took steps to abolish what the Minister of Justice described as "two badges of colonialism"—first the need to petition the United Kingdom parliament to pass a United Kingdom statute to amend the Canadian constitution, and second the ultimate determination of Canadian statute and other laws by the Judicial Committee of the Privy Council, a United Kingdom court.

A resolution to ask the United Kingdom Parliament to amend the B.N.A. Act was adopted by the House of Commons October 27 and by the Senate November 9. Following this petition the United Kingdom Parliament on December 16 passed the British North America (No. 2) Act, 1949 by which the Parliament of Canada was given power to amend the constitution of Canada except as regards matters coming within the classes of subjects assigned exclusively to the provinces, and particularly as regards schools or the use of the English or French language. Another respect in which the Constitution may not be amended by Parliament is the requirement that there shall be a session of Parliament at least once a year, and an election every five years except "in time of real or apprehended war, invasion or insurrection" on a two-thirds vote of the House.

Supreme Court Act Amendment

Appeals to the Judicial Committee of the Privy Council were abolished by an amend-

ment to the Supreme Court Act. This amendment makes the judgment of the Supreme Court of Canada final and conclusive in all cases in and for Canada. The amendment was proclaimed in force December 23, 1949. It does not preclude appeals to the Privy Council in respect to a judgment pronounced in a judicial proceeding commenced prior to the coming into force of the Act.

Bankruptcy Act

A general revision and consolidation of the Bankruptcy Act, prepared and introduced in the Senate, was also passed at this session and proclaimed in force July 1, 1950. In introducing the Bill in the House of Commons the Minister of Justice reviewed the history of bankruptcy legislation by the Federal Parliament. The subject of bankruptcy and insolvency comes under federal jurisdiction, and the first Dominion Act was passed in 1869, "An Act Respecting Insolvency", applying only to traders. In 1875 the law was revised and consolidated and made applicable to the new as well as the original provinces. This Act did not work out satisfactorily, and was repealed in 1880. There was no general bankruptcy law until 1919, when Parliament passed the Bankruptcy Act, modelled on the English statute of 1914. This Act had been amended from time to time since 1919.

The new Act, besides aiming at improvement in drafting and arrangement of sections, and providing a simpler method of administration of small estates, clarifies the question of priorities to be accorded different classes of claims when distributing the debtor's assets.

As before, wages or salaries for services rendered during the three months next preceding the bankruptcy are a preferred claim. They now rank after funeral expenses in the case of a deceased bankrupt, the costs of administration and the levy under the Act to cover supervision costs. The amount of the preferred claim for wages or salaries is now further limited to five hundred dollars, but a creditor whose claim is not completely satisfied because of this restriction

is entitled to rank as an unsecured creditor for the balance due him. In the case of a travelling salesman, the preferred claim may be increased to the extent of three hundred dollars to cover disbursements properly incurred by him in connection with the bankrupt's business. Indebtedness under a Workmen's Compensation Act, along with indebtedness under the Unemployment Insurance Act or the Income Tax Act, are preferred claims, following municipal taxes and rent. Claims resulting from injuries to employees not covered by a Workmen's Compensation Act are also preferred claims, "but only to the extent of moneys received from persons or companies guaranteeing the bankrupt against damages resulting from such injuries". Other claims of the Crown constitute the last preferred claim.

Housing

An Act to amend the National Housing Act, 1944, contained four major changes as well as minor amendments.

One change effects a reduction of the down payment from people who wish to own their houses. The basic joint loan will now provide for 80 per cent of the lending value of the house to be built, for a term not exceeding thirty years. The Central Mortgage and Housing Corporation is authorized to make an additional one-sixth loan where the sale price or cost of the house is fair and reasonable in the opinion of the Corporation. This extra loan will be secured by the same mortgage or hypothec and under the same conditions as the joint loan.

Another new provision enables the Federal Government to join with the provinces in desirable housing developments of all forms, including assembly of land as well as house construction. Costs, profits and losses will be shared on the basis of 75 per cent by the Federal Government and 25 per cent by the province.

The amount of loan allowed by the Act for home extension and home improvement was increased by 25 per cent.

The definition of "co-operative housing project" was changed to include "a housing project built by a co-operative association incorporated under the laws of Canada or of any province". The basic loan extended to co-operative housing projects is fixed at 80 per cent of the lending value, and may be secured by a blanket mortgage, and an additional one-sixth loan may be made, if after completion, the ownership of the project is to remain in the co-operative association.

Workmen's Compensation

An amendment to the Government Employees Compensation Act resulted from the passing of a Workmen's Compensation Act in Prince Edward Island in 1949. The Government Employees Compensation Act provides that when a Federal government employee suffers personal injury or death as a result of an accident or an industrial disease arising out of and in the course of his employment, he is to be compensated according to the rates of the Workmen's Compensation Act in the province where he is employed. Since Prince Edward Island had no workmen's compensation act until 1949, the Government Employees Compensation Act provided that the rate of compensation for a Government employee working in Prince Edward Island should be in accordance with the law of New Brunswick. Parliament amended the Act by repealing this section, since after the passing of the Prince Edward Island Act, it was no longer necessary to make a special case of Government employees in that Province.

Combines Investigation

An Act to amend the Combines Investigation Act made changes designed to facilitate enforcement of the Act and related Criminal Code provisions concerning undue monopolistic trade restrictions and unlawful combinations in restraint of trade. The amendment authorizes the Attorney-General of Canada to institute and conduct any prosecution or other proceedings under the Act or under sections 498 and 498A of the Criminal Code, as well as the attorney general of a province, as formerly. A second change effected by the amendment is that corporations are to be tried by a judge without a jury in combines prosecutions. An individual can still elect jury or non-jury trial. An employee acting in connection with his employer's business will now be presumed to have authority so as to act unless it is proved otherwise.

Pension Fund Societies

The Pension Fund Societies Act was amended to extend the benefits of the Act to the employees of subsidiary companies as well as employees of a parent company. The amendment will enable one pension fund society to administer a pension fund for the employees of a parent company and the employees of its several subsidiaries.

Bills not Passed

Four private members' Bills dealt with matters of interest to labour. Bill 5 proposed to declare the meat packing industry

to be works for the general advantage of Canada with a view to making that part of the meat packing industry which carries on operations in two or more provinces subject to the Industrial Relations and Disputes Investigation Act. After considerable discussion of the Bill the motion for second reading was defeated 172 to 10.

Bill 60 sought to repeal Sections 43 to 46 inclusive of the Industrial Relations and Disputes Investigation Act dealing with enforcement, and to substitute a new Section 43, providing that any employer or trade union may apply to the Board for an order that a provision of the Act has been violated. The amendment would give the Board power, after investigation, to issue an order indicating the precise nature of the violation, and it would be the duty of the Chief Executive Officer of the Board to file it in the Magistrate's Court of the jurisdiction in which the violation took place, for enforcement of the penalties.

Bill 61 sought to amend the Industrial Relations and Disputes Investigation Act by adding a new subsection to provide for the voluntary revocable check-off of union dues.

Bill 199 was a proposal to amend the Criminal Code by adding a section which would make it unlawful for an employer to discriminate against any person in respect to employment because of his "race, colour, creed, religion, ethnic or national origin or ancestry". These last three Bills did not get beyond first reading.

SECOND SESSION

The second session opened on February 16, 1950 and prorogued on June 30, 1950.

The main labour enactment of the winter session was the amendment to the Unemployment Insurance Act providing for supplementary benefits during the winter months. Several changes were made in other Acts affecting labour and a resolution for approval of the I.L.O. Employment Service Convention was endorsed.

Unemployment Insurance

Supplementary Benefits.—A new section, Part IIA, 87A-87F, was added to the Unemployment Insurance Act. Under this new legislation, supplementary benefits were provided for certain unemployed workers during the winter months. The four classes eligible and the length of time for which they may receive benefits are described in detail in a previous issue (L.G., 1950, p. 532). They include insured workers who had exhausted their benefits or who had not yet built up a sufficient number of contributions to qualify, as well as workers in employment recently brought under the

Act or to come under by April 1, 1950. In 1950 these benefits were payable in respect of unemployment in the period from February 28 to April 15. In subsequent years the Act provides that these benefits may be paid for unemployment in the period between January 1 and March 31. The rates of supplementary benefits are approximately 80 per cent of the regular benefits, and range from \$3.30 to \$14.70 weekly.

New Contribution Rates.—To finance these additional benefits, changes were made in the contributions required, effective July 3, 1950. Formerly there were nine rates of contribution related to the weekly earnings of the employee. These classes have now been reduced to six by grouping some classes together, and a higher class has been added. Formerly the employer contributed at a higher rate than the employee in the case of all employees earning less than \$15 a week. The rates of contribution for employer and employee are now equal in all cases, and vary from 18 cents a week from both employer and employee in respect to persons earning less than \$9 a week to 54 cents a week in respect to persons earning \$48 or more a week. A provision which required the employer to pay both his own and the employee's contribution for employees under 16 years of age or earning less than 90 cents a day has been repealed. Any workers in insurable employment in these classes will now pay their own contributions, and insured workers under 16 years of age will now be eligible for benefit if they otherwise qualify. Since the Government contributes to the fund one-fifth of the combined contributions of employers and employees, the increase in contribution rate will also mean a larger regular Government contribution. Besides this, Section 87 provides for a special Government contribution to guarantee the fund against loss through payment of supplementary benefits up to March 31, 1952.

Changes in eligibility.—The first statutory condition for receipt of benefit, having to do with the required number of contributions, has also been altered, effective August 1, 1950. As before, to be eligible for benefit the applicant must have made 180 contributions during the previous two years. In addition, he must have made 60 contributions in the year preceding, or 45 contributions in the six months preceding, the date of the claim. These two periods may be extended for the same reasons as the two-year period may be extended under the Act.

Regular Benefits.—The method of determining daily benefit is the same as before

the amendment; for example, for a claimant without a dependent, 34 times the average of the 180 most recent daily contributions. However the amendment provides that in computing the average daily contribution one cent shall be deducted from each daily contribution paid by the insured person after July 1, 1950, to help pay for the supplementary benefits described above.

It is also provided that the higher rate of benefit for persons contributing at the new nine-cent contribution rate shall not be paid until after July 1, 1951. Then a new maximum weekly benefit of \$16.20 for a claimant without a dependent or \$21 with a dependent, will be possible.

Changes in non-compensable day rule, waiting days, and permissible earnings.—

An amendment to the non-compensable day rule will have the effect of encouraging a claimant to accept short periods of employment. Before the amendment, the first day of unemployment in any claim week was non-compensable unless it followed or was in a complete week of unemployment. The rule now is that the first day of unemployment in any period of unemployment will be non-compensable *unless it follows a period of employment of 3 days or less*. If a person is working short time, that is on a regular schedule of less than the normal working days per week, the first day of unemployment in any period of unemployment is still non-compensable in every case.

In addition, the number of non-compensable waiting days (i.e. the first days of unemployment in any benefit year) has been reduced from 9 to 8.

A claimant is now allowed \$2.00 a day permissible spare-time earnings instead of \$1.50 as formerly without impairing his right to benefit.

Increased coverage.—The coverage of the Act was widened by raising the insurable limit for salaried employees from \$3,120 to \$4,800 a year. Employees paid by the hour, by the day, or by the piece, as formerly, are insured irrespective of the amount of the earnings. From April 1, 1950, logging and lumbering in all parts of Canada were brought under the coverage of the Act by order in council (P.C. 474 of February 23, 1950). Lumbering and logging in British Columbia had previously been under the Act, and some operations in other areas.

Power to make regulations determining benefits to married women.—Section 38 of the Act was amended to enable the Unemployment Insurance Commission to make

regulations in regard to the determination of benefit for married women. Where it appears to the Commission that benefit rights under the Act applied to married women result in anomalies in relation to the benefit of other classes of insured persons, additional conditions may be imposed or the amount or period of benefit may be restricted.

Other changes.—Minor amendments cover a variety of matters. Section 20 was amended to place the obligation for paying contributions upon prime employers as well as the person who actually pays the wages. The payment of travelling and other expenses is now allowed to a person whom the Commission or the Umpire has requested to attend a hearing. The Section providing for the Unemployment Insurance Advisory Committee was changed to permit a maximum of eight members instead of six. One member representing railway employees and one representing railway companies have been added to the Committee since this enactment (L.G. 1950, p. 792).

Employment Service Convention

A motion for approval of ILO Convention 88, the Employment Service Convention, 1948, was moved by the Minister of Labour and approved by the House May 29, and by the Senate June 2. In introducing the motion, the Minister stated that no new legislation was required to implement this Convention, as existing law and practice already had established in Canada standards at least as high as those set out in the Convention. The Convention provides that each member state ratifying it shall maintain a free public employment service, consisting of a national system of employment offices under the jurisdiction of a national authority. The employment service is to assist workers to find suitable employment and to assist employers to find suitable workers on a voluntary basis, providing vocational guidance for particular categories such as young persons and handicapped persons. It is to facilitate the transfer of workers to areas with suitable employment opportunities, to collect and make available information on the employment situation, assist in social and economic planning to ensure a favourable employment situation and co-operate in the administration of unemployment insurance. Co-operation of employers and workers is to be secured through national, regional and local advisory committees. The resolution was followed by an Order in Council (P.C. 3451 of July 19, 1950) ratifying the Convention.

Grain Elevators "Works for the General Advantage of Canada"

An amendment to the Canada Grain Act declares all grain elevators to be works for the general advantage of Canada. This is no change in principle from the section declaring grain elevators to be works for the general advantage of Canada which was first enacted in 1925, but in the 1925 enactment, elevators were individually listed in Schedule Four. The list had become inaccurate and incomplete. The Schedule has now been repealed and the following substituted: "All elevators in Canada heretofore or hereafter constructed are hereby declared to be works for the general advantage of Canada". One effect of declaring a work to be for the general advantage of Canada is that such works are subject to the provisions of the Industrial Relations and Disputes Investigation Act.

Canada Shipping Act

Changes were made in the Canada Shipping Act to bring the Act into compliance with the International Convention for the Safety of Life at Sea, 1948 and its Regulations. This is a new safety Convention replacing an earlier one of 1929 (L.G., 1934, p. 629).

An amendment was also made to Part III concerning seamen by the addition of Section 276A. The new section requires that whenever a ship arrives at a Commonwealth port or a port in which there is a consular officer, for a stay of over 48 hours, the ship's documents relating to the agreement with the crew and indenture of apprentices must be delivered to the consular or customs officer by the master of the ship. The documents are kept during the ship's stay and, at a reasonable time before its departure, are to be remitted with a certificate endorsed on the agreement with the crew indicating the time the documents were received and the time they were returned to the ship's master. If it appears to the consular or customs officer that the Act has been violated, he is required to make a statement to that effect on the agreement with the crew, and forthwith report his statement and all the information in his possession to the Minister of Transport. A master who fails to comply with this section is subject to penalty, and the burden of proof that the section has not been violated is on the master.

Part VI (Pilotage) was also amended to make possible the amalgamation of pension

funds for pilots. The former section excluded pilots from the district of Quebec. The rate of contribution is to be mutually agreed upon between the pilots and the pilotage authority, and if not agreed upon, shall be fixed by the Minister, and in any case shall not be less than 5 per cent of the pilot's earnings.

The superannuation, retirement and annuity funds in pilotage districts for which the Minister is the pilotage authority, except in any pilotage district which with the approval of the Governor in Council may so elect, are to be administered by the Ministers of Transport and Finance. The administration of the pilotage fund created by an early Act of 1849 is vested in the pilotage authority of the district of Quebec, to be carried out in conformity with the requirements set out in the Canada Shipping Act. These changes in Part VI will come into force on proclamation.

Taxing of Employees Profit Sharing Plans

An amendment to the Income Tax Act added a new section, 71A, dealing with employees profit sharing plans. The Act did not previously provide for the manner in which employees profit sharing plans are to be taxed. The new section defines employees profit sharing plan and provides that the amount allocated to an employee's credit will be taxable in the year of allocation and the amount paid into such a plan by the employer will be deductible in computing his income. The payments will accordingly not be taxable on receipt by the employees unless it can be shown that they were not previously taxed.

Other Enactments

The Regulations Act, which will come into force on proclamation, provides a uniform system of publishing regulations and laying them before Parliament. It applies to all orders or regulations for the contravention of which a penalty of fine or imprisonment is prescribed by or under an Act of Parliament. The new Act requires that every regulation shall be published in English and French in the *Canada Gazette* within thirty days after it is made, and laid before Parliament within fifteen days after it is published in the *Canada Gazette* or, if Parliament is not then in session, within fifteen days after the commencement of the next ensuing session thereof. The Governor in Council may by regulation exempt any regulation or class of regulations from being published and tabled, but any such exempting order

must itself be published and tabled. A Schedule to the Regulations Act will repeal provisions of existing laws that are in conflict with the new Act.

An Act to amend the Continuation of Transitional Measures Act, 1947 provides that the Act shall expire on April 30, 1951.

Transfer of Administration of Compensation Acts

Early in the session the Prime Minister tabled two orders made under the Rearrangement and Transfer of Duties Act. P.C. 744 of February 17, 1950 transferred from the Department of Transport to the Department of Labour the administration of the Merchant Seamen Compensation Act and P.C. 6470 of December 22, 1949 transferred the functions of the Minister of Transport under the Government Employees Compensation Act to the Minister of Labour.

Bills not Passed

Three bills to amend the Industrial Relations and Disputes Investigation Act were introduced by private members during the second session but all were defeated on second reading.

Bill 3, which is similar to a measure introduced at the first session, sought to add a provision to the Act for the voluntary revocable check-off of union dues. This proposed measure was defeated by a vote of 98 to 45.

Bill 6, also introduced at the previous session, would have amended the federal labour law by expanding the powers of the Labour Relations Board in respect to the enforcement of penalties. This Bill was put to a vote and defeated by a count of 104 to 12.

By a vote of 147 to 14, Bill 10 failed to pass second reading. This measure would have given the Labour Relations Board power to make an order requiring an employer to reinstate any employee discharged contrary to the Act and to pay such employee the monetary loss sustained.

THIRD (SPECIAL) SESSION

Railway Legislation

The third (special) session opened on August 24 and adjourned on September 15. The reason for the special session was the railway strike, and the first enactment was the Maintenance of Railway Operation Act. The text of the Act and a summary of the circumstances leading to its passing appeared in the October issue (p. 1638). Briefly, the Act required that railway oper-

ations be resumed within forty-eight hours after the commencement of the Act. It provided for a provisional increase of four cents per hour to each rate of wages established by each collective agreement to which the Act applied, and the terms and conditions of these agreements were made effective until a new collective agreement has been entered into or, failing agreement, an arbitration award has fixed new terms. If an agreement is not reached within 30 days, provision is made for the appointment by the Governor in Council of an arbitrator to decide all matters not agreed upon. The 30-day period could be extended by Order in Council, and was on September 11 extended for an additional 15 days by P.C. 4385.

Defence Measures

The session next passed measures to increase appropriations for national defence and three Acts arising out of the preparedness program.

Veterans Benefits.—The Canadian Forces Act, 1950, amended the National Defence Act to authorize the establishment and maintenance of active service forces where considered desirable in consequence of any action undertaken by Canada under the United Nations Charter, the North Atlantic Treaty or any other similar instrument. Before the amendment the National Defence Act provided for the placing of the forces on active service only in an emergency, emergency being defined as "war, invasion, riot or insurrection, real or apprehended". Another clause enables the Governor in Council, by regulation, to extend the benefits of veterans legislation applicable to veterans of the Second World War, to veterans of any force designated as a special force. The statutes providing such benefits include Part IV of the Unemployment Insurance Act, 1940 and the Reinstatement in Civil Employment Act, 1946. The Canadian Forces Act was made retroactive to July 5, 1950 and section seven (the clause providing for veterans' benefits) will expire on the last day of the first session of Parliament in 1951. In speaking on the Bill the Minister of National Defence stated that this legislation was intended to give temporary authority to deal with cases that might arise until the question of veterans' benefits could be dealt with more fully at the next session.

Power to control materials and services essential for defence.—The main purpose of the Essential Material (Defence) Act is to give the Governor in Council the power to designate materials and services as essential for defence purposes, and to

control the production, processing, distribution, acquisition, disposition or use of these materials and services when deemed necessary.

Regulations may be made under this Act to exercise control over production of essential materials by requiring production or processing of such materials in the manner directed, and by requiring that these materials be given priority in their production. The supply of essential materials, and the manner in which they may be acquired or disposed of, may also be made subject to regulation.

Orders may regulate the extent and conditions of supply of essential services, which are defined to include distribution of power and such other services as may be designated as essential for production, storage or distribution of essential materials. These orders may restrict and control the use of essential services by means of permits.

The maximum price for essential materials or essential services may be fixed by determining the selling price or the mark-up price and terms of sale. Information respecting essential materials or essential services may be required by order.

Orders made under this Act must be published forthwith in the *Canada Gazette* and laid before Parliament ten days after

their publication in the *Canada Gazette*, if Parliament is then in session, and if not within ten days of the commencement of the next session.

The date of expiry of the Act is fixed at July 31, 1952, but the Governor in Council may order it to expire at an earlier date; upon presentation of addresses by the Senate and the House of Commons to the Governor General praying the Act to be continued in force, the Governor in Council may order the Act to be continued in force for a further period.

The Act is administered by the Department of Trade and Commerce.

Consumer Credit.—The Consumer Credit (Temporary Provisions) Act gives the Governor in Council authority to make regulations applicable to the retail sale of consumer goods for the purpose of restricting consumer credit. These regulations may apply to the sales made under conditional contract or under charge account, to the repayment of loans secured on consumer goods, or to loans obtained for the purpose of buying consumer goods.

The requirements for the publication of regulations and the duration of the Act are the same as noted above in the Essential Materials (Defence) Act.

Recent Regulations Under Dominion and Provincial Legislation

A higher minimum wage has been established for women in New Brunswick factories, shops, offices and other workplaces. ¶In Quebec new regulations to safeguard the health of workers in industrial camps have been issued. ¶New rules of procedure have been made for the Ontario Labour Relations Board under the 1950 Act. ¶Further exemptions are permitted under the Alberta Labour Act.

DOMINION

Canadian Forces Act

The Reinstatement in Civil Employment Act has been made applicable, by an Order in Council under authority of the Canadian Forces Act (P.C. 4614) gazetted October 11, to all persons enrolled for the purpose of serving in the special forces of the Royal Canadian Navy, the Canadian Army and the Royal Canadian Air Force and to all officers and men of the reserve units of these forces.

Employers of such persons are required to reinstall them in employment at the termination of their service in the special force under conditions not less favourable to them than those which would have been applicable had they remained in their

employment. The Act further provides that the right to reinstatement shall be subject to established rules of seniority in the employer's establishment with retention of seniority rights during the employee's period of service with the special force, and that in determining pension rights or other benefits, service in the special force shall be counted as service with the employer.

Under the Canadian Forces Act (L.G., Nov., 1950, p. 1919) the Governor in Council is authorized, by regulation, to extend the benefits of veterans legislation applicable to veterans of the Second World War to veterans of any special force established in consequence of action undertaken by Canada under the United Nations Charter the North Atlantic Treaty or any other similar instrument.

PROVINCIAL

Alberta Labour Act

Five Orders of the Board of Industrial Relations have been revised to exclude certain classes of workers from all, or a part of, their provisions by an Order in Council (1080-50) of August 23, gazetted August 31.

Trucking Industry

A new Hours of Work and Minimum Wage Order (No. 20), which consolidates two previous Orders, continues to exempt truck drivers and their helpers or swampers who work outside of any city from the 8 and 48-hour limits fixed by the Act and from the overtime provisions of Male Minimum Wage Order 1 (L.G., 1947, p. 843), and permits an exemption from the limits imposed on the hours of persons working on split shifts.

Workers covered by this Order may be employed on a straight-time basis up to 10 hours in a day, or in a shift, and 50 hours in a week but their hours must be confined within the twelve immediately following commencement of work. The new Order does not limit, however, the hours within which split shifts may be worked if the employer furnishes his employees, free of charge, with sleeping accommodation approved by the Board of Industrial Relations.

All truck drivers, helpers and swampers must be allowed at least eight consecutive hours of rest after completing a day's shift. Previously, this requirement only applied to those who had worked for 10 hours.

An employee is deemed to be on duty from the time he is required to report until he is relieved from work and all responsibility for work.

The earlier Orders, Nos. 3 and 4 (L.G., 1947, p. 1333), are now rescinded.

Split Shifts

Two new Hours of Work Orders (Nos. 19 and 21) exempt employees in summer resorts, and provincial and national parks between June 1 and September 30 of each year from the requirement laid down in two earlier Orders of the Board that the hours of a person working on a split shift must be confined within 12 hours after commencing work if he is employed in a town or village of less than 2,000 population, or within 10 hours in the remainder of the Province.

The earlier Orders (No. 35, 1946, and No. 1, 1947) are now rescinded.

Holidays with Pay

The general Holidays with Pay Order (No. 5) has been amended to exclude from

its provisions bond and stock salesmen registered under the Securities Act. The Order requires that most workers in the Province must be given an annual vacation equal to one-half day with regular pay for every 23 days of actual work with a maximum of one week. After two or more years' employment, one day with regular pay for every 23 days of actual work must be given, with a maximum of two weeks (L.G., 1949, p. 1439).

Other classes exempted from the Order are coal miners, construction workers, real estate agents and commercial travellers working exclusively on a commission basis, workers employed temporarily for eight hours or less in a week, farm labourers and domestic servants.

Alberta Nursing Aides Act

Revised regulations governing nurses aides issued on July 25, gazetted August 15 (O.C. 940-50), reduce the minimum age for applicants in training from 18 to 17½ years, the upper age limit remaining at 40 years. As before, applicants must have Grade 9 standing or its equivalent and submit satisfactory health certificates.

The length of the training period which an applicant must undergo to become eligible for a certificate as a nursing aide remains at 40 weeks. The schedule of classes, however, has been rearranged to provide for a longer period of instruction at the training school and less practical nursing.

The applicant is now required to take a 15 weeks' course (formerly 12) at the training school followed by two 10-week periods of practical experience at two approved institutions and a final 5 weeks' course at the school for review and examination. Under the earlier regulations the practical experience had to be acquired in three 8-week periods at three approved institutions and the final period of school training was four weeks.

The earlier regulations are now rescinded (L.G., 1947, p. 1334).

British Columbia Hospital Insurance Act

By an Order in Council of September 9, gazetted September 21, a new section was added to the general regulations under the Act authorizing the Hospital Insurance Commissioner to make an agreement with any person, other than a civil servant, to act as a local representative of the Hospital Insurance Service for the purpose of collecting premiums, taking applications for registration and other duties which the Commissioner may prescribe. The amount

of remuneration for such work is to be determined by mutual agreement and paid out of the Hospital Insurance Fund.

British Columbia Male and Female Minimum Wage Act

Persons employed in mail delivery are no longer exempt from the application of the Minimum Wage Order (No. 9) covering drivers, swampers or helpers employed in the transport of goods by motor vehicles of over 1,000 pounds (L.G., 1948, p. 1135; 1949, p. 185). This amendment was made by an Order (9B) of the Board of Industrial Relations on August 8, gazetted August 17.

New Brunswick Minimum Wage Act

A general Order, effective September 1, covering most women workers in the Province fixes a higher minimum rate of 35 cents an hour for a 48-hour week or less. This new regulation replaces two earlier Orders—a general order for women (L.G., 1950, p. 87) and a special order covering wholesale and retail stores (L.G., 1948, p. 1137), both of which established a minimum rate of \$14.40 a week. The new weekly rate calculated on the basis of the higher hourly minimum set by the new Order is \$16.80, the same as that fixed in Ontario for women employed in the larger cities.

Exempted from the Order are women employed in hospitals, nursing homes, religious, charitable or educational institutions, apprentices, persons employed in a confidential capacity, in domestic service, agriculture or by the Crown. Women working in hotels, restaurants and other places of public accommodation where meals are served are covered by a separate Order (L.G., 1948, p. 492).

Overtime in excess of 48 hours a week must be paid for at the rate of 50 cents an hour instead of 45 cents as formerly.

The Order does not fix a rate for part-time workers who work less than 30 hours a week. The earlier Orders required that these workers be paid at least 30 cents an hour.

Newfoundland Shops Act

Two new areas—Stephenville-St. George's and Clarenville-George's Brook—were proclaimed shop-closing areas on August 14 and August 29, respectively, gazetted August 22 and September 19. The Shops Act, 1940 authorizes the Lieutenant-Governor in Council to proclaim any area a shop-closing area, whereupon the schedule of days and hours of closing shops attached to the Act will apply (L.G., 1949, p. 392).

The Lieutenant-Governor in Council is also authorized under the Act to amend the schedule of holidays in respect of any shop-closing area. Ten additional holidays have been proclaimed for the Clarenville-George's Brook Shop-Closing Area and eight more have been added in the Stephenville-St. George's area.

The list of holidays in effect in the Bell Island Shop-Closing Area was amended by proclamation on August 14, gazetted August 22. Bell Island was designated a shop-closing area in 1940.

Ontario Labour Relations Act

New rules of practice and procedure under the Ontario Labour Relations Act, 1950, which was proclaimed in force September 1, were approved on September 7 (O.Reg. 202/50), gazetted September 23. The rules of procedure under the 1948 Labour Relations Act are rescinded (L.G., 1949, p. 186).

The rules relate to those matters which fall within the administrative jurisdiction of the Board. As a result of wider powers given to the Board under the 1950 Act, rules are now laid down governing application by the parties to the Board for conciliation services, applications for consent to prosecute parties alleged to have committed offences under the Act and declarations that a strike or lockout is illegal. The powers to deal with requests for conciliation services and to grant or deny applications to prosecute were formerly held by the Minister of Labour.

In other respects, the rules are similar to those made under the 1948 Act regarding the procedure for making application for the granting or the revocation of certification as bargaining agent, the serving of a notice of a hearing and the taking of representation votes.

In conducting representation votes, however, the registrar, appointed under the Act, is now given power to direct the interested parties to refrain from propaganda and electioneering during and for 72 hours before the day of the vote and to give any directions he deems necessary for disposing of improperly marked ballots and ballots of persons whose eligibility to vote has been challenged or is in doubt.

Quebec Public Health Act

New regulations to safeguard the health of persons employed in industrial camps which were issued on August 30 (O.C. 958), gazetted September 16, replace all earlier regulations (L.G., 1924, p. 354). Minimum standards are set out with respect to location, construction of buildings, water supply, drainage, garbage disposal, toilets, camp

equipment, etc., and require cooks to be medically examined before entering employment. The rules governing drainage and water supply do not apply to camps situated within the limits of a city, town or village connected with an aqueduct or sewer system.

"Industrial camps" are defined in the regulations as "all temporary or permanent installations, including the outhouses, which the employer organizes to house the persons employed by him in lumbering or mining operations, railroad or highway construction, the building of dams and other similar undertakings, in saw-mills and pulp and paper mills, whether they be permanent camps, permanent summer camps or temporary camps".

The Director of Industrial Hygiene must be notified at least three weeks before a camp is constructed or re-opened. All camp buildings must, wherever possible, be situated in a dry, sunny place at least 150 feet from the high water level of a lake or stream and at least 100 feet from all refuse, stables and other domestic animal enclosures.

The drinking-water supply must be situated at least 150 feet from the camp, free from any source of contamination. The distance of a spring, which is situated at a much higher level than the camp buildings, or of a tube well, is left to the discretion of the Director of Industrial Hygiene. A covered water reservoir, equipped with tap, must be available to the workers and the common drinking cup is forbidden.

Dormitories must be supplied with a water-tight sink with at least one basin for every five workers and an adequate supply of hot water. The regulations require the employer to supply each worker with a single bed with springs, and a clean mattress and pillow, in good condition, which have been disinfected. Clean, disinfected bed-clothes in good condition must be furnished to each worker for his exclusive personal use and must be washed at least once a month. If flannel or other sheets are supplied in addition to woollen blankets, the latter need only be washed at the opening of each working season.

A room with window, entirely separate from the kitchen, must be provided for women residing in a camp, and a separate dwelling provided for women with children.

A laundry room, equipped with a boiler

of sufficient capacity to supply hot water for the washing of personal clothing, must be furnished. Such room may also serve as a bathroom or a special room may be provided for this purpose. In either case, suitable tubs must be installed. A clothes drier of approved design must be installed in every camp.

No cook or assistant cook may be employed in a camp unless he is able to furnish a medical certificate showing that he has been examined within the previous three months and is free from any contagious or communicable disease. He must also produce a certificate showing that he has been successfully vaccinated against small-pox within the previous seven years.

All food must be protected during transportation and stored properly in the camp to prevent contamination by flies, vermin and dusts, a pantry of approved construction to be installed for perishable foods. The inspector may prohibit the use of kitchen utensils which are not properly washed and kept in good condition.

All floors must be damp swept daily and washed at least once a week. All openings must be screened. Proper space for clothing and personal belongings must also be provided.

Inspectors of the Department of Health must be permitted at any time to inspect all buildings and equipment connected with a camp.

Additional rules are set out for the construction of tents which are permitted in permanent summer camps from May 15 to October 1 and in temporary camps operated for not more than 15 days in any one place.

Penalties are provided for violations of the regulations.

Saskatchewan Social Aid Act

To enable a child on whose behalf a mother's allowance is paid to become better qualified for employment, the Mothers' Allowance regulations (L.G., 1949, p. 456) have been amended to provide that after September 1, 1950, when a child reaches 16 and continues to attend school, the allowance may be paid until the completion of Grade XII, or until the age of 18. Previously, when a child reached his sixteenth birthday during the school year and continued to attend school, the allowance was paid only to the end of the school year.

The amendment was made on August 18, gazetted August 25 (O.C. 1462/50).

UNEMPLOYMENT INSURANCE

Selected Decisions of Umpire Under the Unemployment Insurance Act

Digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act; published in two series (1) Benefit cases, designated CU-B, and (2) Coverage cases, CU-C.

Held that the claimant, who was on a roll of jurors but did not serve as such, was unemployed and available for work within the meaning of the Act on the days he had to present himself at the Court.—CU-B 559 (April 5, 1950).

MATERIAL FACTS OF CASE:

The claimant, while in receipt of unemployment insurance benefit, informed the local office of the Commission by telephone on October 4, 1949, that he was on the roll of jurors for the term of the criminal assizes in Rouyn, P.Q., commencing October 5, 1949. He reported at the local office on his regular call days, viz: October 6, 13 and 20 but did not state on the unemployment register the days he had been requested to attend the Court.

On October 26, 1949, the Registrar of the Court informed the local office as follows:—

(The claimant) has not been called yet to be a juror although he did present himself on the dates fixed by the court namely October 5, 6, 11, 12, 13 and 25, 1949.

He has received \$5 for October 13 and for the other days he has received a half-day allowance of \$2.50 per day each day.

According to the submissions the claimant did not receive the moneys referred to above until October 25, 1949.

The insurance officer pursuant to Section 55 (2) (a) of the Act referred the case to a court of referees in order that they decide whether the claimant was unemployed and available for work on the days he reported to the Court for jury duty.

The court of referees, after having heard the claimant and two representatives of the local office, unanimously found that on the days in question he had been unemployed and available for work. In that connection, they stated in part:—

The court of referees is of the opinion that the amount received as a juror is not a remuneration nor a profit and that the duty as a juror is a duty which is the responsibility of each citizen summoned by the crown whether willing or not to

assist as a juror and this cannot be considered as a contract of service.

Concerning the availability of the claimant, he was an accountant and if work had been offered during the period he was obliged to report to the Superior Court, he could have accepted this employment for the afternoons and the evenings; therefore, the court is of the opinion that the claimant was available for work.

From the decision of the court of referees, the insurance officer appealed to the Umpire on the following grounds:—

The evidence on file indicates that the claimant, whose name appeared on the roll of jurymen for the term of criminal assizes in Rouyn beginning October 5, 1949, was summoned to appear in court on October 5, 6, 11, 12, 13 and 25, 1949 and that, on those dates, he was in court for at least the whole forenoon; his attendance brought him a minimum remuneration of \$2.50 a day.

The insurance officer is of the opinion that the claimant, on the days on which he appeared in court could not be available for work, if we consider that he could not seek employment and that, if some had been offered to him, he could not have accepted it.

The British jurisprudence however seems to be to the contrary (CF. BU-63-64-65).

It can be argued that if employment could have been offered to this claimant and he had requested the Court's permission to be relieved from Jury duty I am satisfied that he would have been permitted to accept the employment.

DECISION:

The insurance officer in his appeal to me does not seem to differ with the unanimous finding of the court of referees that the claimant was unemployed on the days he presented himself to the Superior Court for jury duty. I also agree with that finding.

The insurance officer, however, in the second paragraph of his submission to me argues that the claimant, on those days, could not be available for work.

The question of the claimant's availability on the days he so attended the Court is entirely a question of fact which has to be determined in the light of the claimant's intention towards accepting employment which might have been offered to him during that period, of the measures he took in order that any opportunity of employment would be immediately brought to his attention and of whether or not he would have been prevented from accepting at once suitable employment.

The claimant's willingness to take employment as well as the fact that he reported to the local office is not disputed by the insurance officer and, in the last paragraph of his appeal, he states that he is satisfied that the Court would have relieved the claimant from duty had work been offered to him.

Furthermore, it was only after having thoroughly examined the claimant and two representatives of the local office that the court of referees came to the unanimous conclusion that the claimant was available for work on the days in question.

Under the circumstances, I consider that their finding should not be disturbed and the appeal is dismissed.

Held that the claimant was not unemployed nor available for work on the days he was engaged in forest fire-fighting.—CU-B 615 (September 7, 1950).

MATERIAL FACTS OF CASE:

The claimant, while in receipt of benefit, was drafted by the Quebec Department of Lands and Forests for forest fire-fighting and performed such duty from May 19, 1950 to May 25, 1950. His rate of remuneration was 50 cents an hour if he brought his own food or 40 cents an hour if food was provided for him. He was on duty from 7:00 a.m. to 6:00 p.m. and subject to call for the overnight shift.

Pursuant to Section 55 (2) (a) of the Act, the insurance officer referred to a court of referees the question as to whether the claimant was unemployed and available for work within the meaning of the Act on the days he was engaged in forest fire-fighting.

The court of referees rendered a unanimous decision which reads in part:—

It was proved by the Assistant District Chief of the Provincial Department of Lands and Forests, that any person between the age of 18 and 55 is obliged, if drafted, to fight forest fires under penalty of a fine of \$200 or failing that of imprisonment for three months. The wages paid are low, 50 cents if the person drafted supplies his own meals.

The court is of the opinion that such work does not constitute a contract of service within the meaning of the Unemployment Insurance Act and is, also of the opinion, following (the) evidence (of the Assistant District Chief of the Provincial Department of Lands and Forests), that it would have been possible for the claimant if he would have received an offer of employment, to be exempted of fire-fighting work and under the circumstances the court considers that the claimant was unemployed and that he was also available for work.

The insurance officer appealed to the Umpire stating in part:—

The court was of the opinion that drafting for fire-fighting is not a labour contract within the meaning of the Unemployment Insurance Act and accordingly while a man is fulfilling a public duty to his country, he is still in a state of unemployment.

It is submitted that this man, who received an hourly rate of wages for the work performed by him, can be compared to unemployed Reserve Army personnel who attend training camps and who are not entitled to benefit during the period of such attendance at camp when they are deemed to be employed.

DECISION:

The claimant's participation in forest fire-fighting does not appear to have had all the requisites which constitute a contract of service.

It is my opinion, however, that he followed an occupation within the meaning of Section 29 (1) (b) of the Act and that that occupation did not come within the exception mentioned in (i) and (ii) thereof.

Section 29 (1) (b) reads as follows:—

29 (1). "An insured person shall be deemed not to be unemployed

(b) on any day on which, notwithstanding that his employment has terminated, he is following an occupation from which he derives remuneration or profit unless

(i) that occupation could ordinarily be followed by him in addition to, and outside the ordinary working hours of, his usual employment, and

(ii) the remuneration or profit received therefrom for that day does not exceed one dollar and fifty cents or, where the remuneration or profit is payable or is earned in respect of a period

longer than a day, the daily average of the remuneration or profit does not exceed that amount.

The claimant, therefore, was not entitled to Unemployment Insurance benefit while engaged in forest fire-fighting.

As to the claimant's availability for work during that period, it is significant to note that according to form UIC 493A, he was on duty at least eleven hours a day. Furthermore it would seem from the testimony of the representative of the

Provincial Department of Lands and Forests that it would be only under exceptional circumstances that a person engaged in forest fire-fighting would be released therefrom.

The insurance officer in his submission to me might have rightly compared the claimant's case to that of "unemployed Reserve Army personnel who attend training camps". However a case relative to such personnel has never been before the Umpire for decision.

The appeal is allowed.

Unemployment Insurance Statistics, August, 1950*

During the month of August, 1950, a total of 61,545 initial and renewal claims were filed at local offices of the Unemployment Insurance Commission. This represents an increase of 40 per cent over the July figure of 43,929 claims, as compared with an increase of about 22 per cent over the 50,291 claims filed in August, 1949. The more than seasonal increase in claims in August, 1950, was likely due to lay-offs of non-striking workers in industries which experienced a curtailment of operations due to the nation-wide railway strike in the latter part of August.

All provinces except Prince Edward Island showed an increase in the number of initial and renewal claims filed in August over July. The largest percentage increases were registered, in order of descending magnitude, in Nova Scotia (154 per cent), Saskatchewan (135 per cent), Manitoba (101 per cent), Alberta (86 per cent), and Ontario (40 per cent).

Ordinary claimants on the live register on the last working day of the month increased from 92,520 in July to 98,930 in August (the August, 1949, total was 80,813). The relatively small increase in ordinary claimants on the live register on the last working day of the month, in comparison with the large increase in claims filed over the previous month, can probably be explained by the fact that the railway strike was over just prior to the last working day of the month.

Of the total number of persons on the live register in August, 74,402 or 67 per cent were on the register seven days or more, as compared with 84,575 or 80 per cent in July. A higher percentage of females (34 per cent) than males (25 per cent) was on the live register 73 days or more.

Initial and renewal claims handled at adjudicating centres numbered 46,232 in August. Of these, 35,743 were allowed and 10,489 were disallowed or disqualified.

Chief reasons for non-entitlement to benefit were: "insufficient contributions" 4,094 cases, "voluntarily left employment" 3,723 cases, and "not employed" 1,678 cases.

Persons commencing benefit on initial and renewal claims numbered 30,628 in August as compared with 30,945 in July, and 34,422 in August, 1949. The lack of any increase in new beneficiaries between July and August, a time in which claims filed increased sharply, is probably due to the fact that persons filing claims during the railway strike became re-employed before completion of their waiting period.

During the month of August, \$4,412,992 in benefit were paid in respect of 1,925,184 days as compared with \$4,726,614 and 2,053,009 days for July, and \$3,717,000 and 1,650,997 days for August, 1949.

For the week of August 26 to September 1, 67,303 persons received \$886,221 in respect of 387,366 days, as compared with 76,840 persons, \$1,022,377 and 444,583 days for the week of July 29 to August 4, and 62,705 persons, \$813,027 and 361,497 days for the week August 13 to 19, 1949. Average duration of benefit for the week of August 26 to September 1 was the same (5.8 days) as for the week of July 29 to August 4, while the average amount of benefit paid during these weeks was \$13.17 and \$13.31 respectively.

Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission for the month ending August 31, 1950, showed that insurance books were issued to 3,644,839 employees, who had made contributions to the Unemployment Insurance Fund at one time or another since April 1, 1950—an increase of 132,450 since July 31, 1950.

As at August 31, 1950, 240,277 employers were registered, representing an increase of 1,612 since July 31, 1950.

* See Tables E-1 to E-7.

UNEMPLOYMENT INSURANCE COMMISSION'S NINTH ANNUAL REPORT

In reviewing the fiscal year 1949-50, the Unemployment Insurance Commission notes that it was one of "remarkable contrasts." Canada, in the twelve-month period under review, achieved the highest level of employment in its history, and also encountered the most serious unemployment since the organization was established.

During the summer of 1950, the Commission reports, Canada's total labour force rose to approximately 5,200,000, while during the winter the numbers of persons seeking employment, exclusive of those applying for supplementary benefit, exceeded 375,000. "Obviously", the Report observes, "one condition has an important bearing on the other. When the labour force increases there will be a corresponding increase in unemployed if conditions producing unemployment develop".

The Report points out that from November, 1949, until nearly the end of March, figures of unemployment increased, and that although it was the period of seasonal unemployment there were other factors which were not entirely seasonal in their nature. Uncertainties respecting international trade, currency, devaluation, industrial disputes in the United States and Canada resulting in curtailment of essential supplies, as well as adverse weather conditions, all resulted in slowing up certain industries.

The situation was such that during the 1950 session of Parliament provision was made for amending the Unemployment Insurance Act so as to provide for payment of supplementary benefit to persons who had exhausted or were unable to qualify for ordinary benefit.

During the winter of 1949-50, when figures of unplaced applicants were showing a marked increase, the Commission initiated a campaign designed to assist in stimulating employment. The basic idea was that a great deal of work, such as interior painting and decorating, repairing, etc. frequently held up until the spring, could be done in winter. A large number of jobs were provided through the campaign and in this way, the report says, difficult periods for many workers were bridged over until the spring brought increased employment opportunities.

Amendments to Unemployment Insurance Act

In addition to making provision for payment of supplementary benefit, other amendments which received the approval of Parliament provided for a number of important changes with reference to coverage, contributions and benefit. Effective on proclamation, the ceiling for insurability is raised from \$3,120 to \$4,800 a year, bringing within the scope of the Act an estimated additional 75,000 persons. The number of contribution classes is reduced from nine to six, payments by employers and employees are equalized throughout all classes, and an additional higher class of contributions is added, in keeping with the raising of the ceiling for insurability, and a higher rate of benefit to persons contributing in the new class. The Commission was also empowered to make special regulations prescribing the conditions under which benefit may be paid to married women (L.G., April, 1950, p. 532).

Seasonal Regulations

Seasonal regulations applying to certain industries which have a pronounced and regularly recurring off-season were modified in several respects.

Regulations were also made extending the provisions of the seasonal regulations to employment in lumbering and logging in all parts of Canada other than British Columbia when contributions became payable in that industry at April 1, 1950.

Unemployment Insurance Fund

At March 31, 1949, the balance in the unemployment insurance fund was \$529,-535,437.38. During the fiscal year 1949-50 revenue from contributions by employers, employees and the government totalled \$124,526,748.14. Miscellaneous revenue (interest on investments, etc.) increased the total revenue to \$138,935,737.27. Benefit paid (including supplementary benefit for

March of \$818,065.89) totalled \$85,824,202.13, leaving a net balance at March 31, 1950, of \$582,646,972.52.

The amount paid out in benefit was almost \$36,000,000 over the total for 1948-49. The increase was due to the higher amount of unemployment in the winter, as compared with the previous year, and the fact that more claimants had become entitled to the maximum benefit payable under the new rates which came into effect for the first time in October, 1948. The average daily rate of benefit payable in 1949-50, excluding supplementary benefit, was \$2.34 as compared with an average rate of \$2.09 in 1948-49.

Costs of Administration

Administrative costs of the Unemployment Insurance Commission during the fiscal year amounted to \$20,385,981.70. The total for the previous fiscal year was \$18,965,130.67, an increase of \$1,420,851.03. Increased salaries and higher rents accounted for the major portion of the increase. The amount of commission paid to the Post Office Department also increased.

In considering the cost of administering the Commission organization, the report says, "there is sometimes a tendency to forget that a considerable part of this cost results from operation of the National Employment Service. This service is given free of charge to employers and to all workers who require it whether they have previously been insured or not.

"It is impossible to determine the value of the National Employment Service in terms of dollars and cents. Not only is it of great importance and value to the unemployed worker, but it is also a time, money and worry saver to the employer. That this is becoming more evident to employers in Canada is demonstrated by the fact that they are turning to the National Employment Service for their employment needs. Some of the large organizations do their entire hiring through the Commission organization."

In addition to the National Employment Service, a certain amount of the administrative cost must be charged up against the cost of administering unemployment assistance in the new province of Newfoundland. A further administrative obligation arises out of the payment of supplementary benefits as provided in the recent amendments to the Unemployment Insurance Act.

Operations of Employment Offices

During the year 1,928,090 applications were registered at local employment offices,

and 1,019,045 vacancies were notified. Placements in regular and casual employment effected totalled 685,103; of these 466,980 were male and 218,123 female. Placements in the previous year totalled 700,818.

Placement of Displaced Persons

The work of placing European displaced persons continued throughout 1949-50 but at a slower tempo due to a decline in employers' requests for immigrant labour. Since the inception of the immigration-labour program 38,582 displaced persons have been admitted to Canada. At the end of the year only 200 unplaced immigrants remained in reception hostels, indicating the success of the government's program as well as of the placement task accomplished.

Movement of Farm Labour

Group movements of workers within Canada for the harvesting of farm crops, under Dominion-Provincial Farm Labour Agreements, between June and October resulted in the transfer of approximately 4,600 workers.

The Employment Service also took part in international transfers of sugar beet planters and harvesters, potato pickers and tobacco workers.

Placement of Handicapped Workers

Employment suitable to their physical capacities was found for approximately 11,300 handicapped workers through the special placement facilities provided by the Employment Service. Of this number some 8,200 were men and 3,100 women. More than 4,000 of the males were disabled ex-service men, while 79 disabled ex-service women were among the females placed.

Executive and Professional Employment

Improved organized and directed employer relations activities, supplemented by increased publicity, brought about greater use of facilities provided by the employment service for employers seeking workers and workers seeking jobs in the technical, scientific and professional fields, it is reported.

Inquiries from persons in other countries seeking information in regard to employment opportunities in the various professions in Canada also increased in number. The officer of the Commission in charge of executive and professional placement work was appointed recruiting officer in Canada for the United Nations Organization and two campaigns were conducted to obtain staff for that organization.

Activities on behalf of university students were expanded. In the previous report it was noted that placement offices, staffed by Employment Service personnel, had been established at the Universities of Manitoba, Saskatchewan and Alberta. During the year under review, by request, similar offices were organized on the campuses at Laval University and the University of Montreal, and skilled Employment Service staff members assigned to assist the offices at Toronto and McGill Universities and the University of British Columbia, operated by those institutions. At some of the other Canadian universities a part-time service was given by Employment Service personnel.

Unemployment Assistance in Newfoundland

In accordance with the terms of union, it was agreed that the Government of Canada would pay unemployment assistance to persons resident in Newfoundland who were unemployed at the date of union (April 1, 1949), or who lost their employment within two years thereafter, provided they had been engaged in insurable employment but were not yet qualified for unemployment insurance benefit.

Claims for unemployment assistance are handled through local offices of the Commission in the same manner as claims for benefit, but payment is made by subventions from the Treasury and not out of the unemployment insurance fund.

Appeals to Umpire

During the year the Umpire handed down 129 decisions—benefit cases 126 and coverage cases 3. The Commission also reported that a number of oral hearings were held at which officers of various interested unions and officials of the Commission, as well as claimants and their legal counsels, were present.

Enforcement

At both head office and regional levels, the legal branch is making a determined effort to ensure more complete and effective enforcement, the report states. In the interests of establishing uniformity in enforcement procedure, the Legal Adviser inspected legal branches in all regional offices of the Commission during the autumn of 1949. A new method for reporting benefit frauds, which has been under study for some months, it is anticipated, will result in increased efficiency.

A total of 22,834 investigations of claimants was conducted by district investigators of the legal branch as compared with 19,263 in the previous year—an increase of 18 per cent.

The most decided increase occurred in prosecutions against employers for failure to pay contributions on behalf of insurable employees. In the fiscal year 1948-49, 69 prosecutions of this type were undertaken, whereas in the fiscal year 1949-50 there were 270. This represents an increase of almost 300 per cent.

There was also an appreciable increase in the number of prosecutions against claimants. In 1948-49, 594 prosecutions of this type were undertaken, whereas in the fiscal year 1949-50, 751 benefit prosecutions were instituted. This is an increase of 26 per cent over the previous year.

In the overall picture 1,101 prosecutions of all types were commenced in the fiscal year 1949-50, representing an increase of 54 per cent over the fiscal year 1948-49 when 714 prosecutions of all types were commenced, 810 convictions registered, 12 actions dismissed, and 31 cases withdrawn. On March 31, 1950, 366 cases were awaiting hearings in the various courts across the country.

Employment Committees

The National Employment Committee, advisory body to the Commission, held four regular quarterly meetings during the year.

Some 500 meetings were held by the 80 local committees established to advise and assist local office managers, and 45 by the five regional advisory groups, it is reported. Activities of the regional and local committees resulted in submission to the central body of considerable employment data, as well as proposals for alleviation of unemployment in various parts of the country through inauguration of work projects and other means. When endorsed by the national committee and approved by the Commission such suggestions were referred to the appropriate government authorities.

Employment of older workers, private employment agencies, assistance to technically qualified displaced persons, apprenticeship, vocational guidance and employment of youth, were some of the subjects which received the attention of committees during the year.

Administration

At the end of March, 1950, from five regional administrative offices the Unemployment Insurance Commission operated 181 local offices located in the principal cities and towns from coast to coast. In addition, full-time service was given to the public at 37 branch offices located principally in centres of population near, and under the supervision of, local offices.

Itinerant, or regular part-time service, was also extended from various local offices at 71 other cities or towns. Agencies were maintained at two places.

The extension of the Employment Service to Newfoundland upon the entry of the tenth province to Canada was accomplished speedily and without serious difficulties, it is reported. The island's industry and workers are served by three local offices, and employment activities have been integrated with those in other provinces in the Commission's Atlantic region.

During the fiscal year certain increases in staff were necessitated by the opening of offices in Newfoundland and by the volume of insurance and employment work being handled by the Commission's offices

throughout Canada. On March 31, 1950, the number of regular employees stood at 7,070.

The extension of the clearance facilities to the overseas office in London, established in 1948 to enable Canadian employers to seek workers in Britain, has proved successful. Through the London office many British craftsmen possessing skills relatively scarce in this country have found employment in Canadian industry. A service has also been rendered by the London office to Britons planning to emigrate to Canada, by supplying information on employment prospects and working conditions in this country.

The personnel of the Commission remained unchanged during the year.

An analysis of the current employment situation prepared by the Economics and Research Branch, Department of Labour, on the basis of returns from the National Employment Service, reports from the Dominion Bureau of Statistics, and other official information.

EMPLOYMENT CONDITIONS DURING SEPTEMBER, 1950

September was a month of unusually high activity in the labour market. In contrast to the same period last year when the loss of some foreign markets due to exchange difficulties was causing considerable uncertainty in the economy as a whole, a note of optimism now prevails in nearly every industry. Several have already benefited from new defence contracts received recently, notably the aircraft industry which was operating well below capacity last year. Strong seasonal activity superimposed upon this basic expansion has meant a steady drain upon the current labour supply.

The labour market was more active during September than at any time since the first post-war years. Seasonal activity was reaching its peak in agriculture, food processing, construction, and transportation; defence preparations were stimulating employment in manufacturing and the logging industry was preparing for a heavy cut this fall. The generally buoyant state of the labour market during the late summer and fall months was indicated by the continued decline in applications on hand at National Employment Service offices during September. At September 28, applications on file had fallen to 133,100, almost 8,000 less than at the same time last year, and there were more jobs registered than at any time since 1947.

The greatest activity was in the unskilled labour market. It is estimated that there are about 300,000 workers in Canada who work as the season demands in agriculture, fishing, construction and logging. During September, the demand for these workers overlaps and logging industries vie with agriculture and construction for the same supply of labour. This year, the competition was even keener, since harvesting operations have been delayed in Western Canada. At the same time that application files in Ontario were being combed to find workers for the Prairie harvest, the logging industry was attracting help by high wages and offers of longer employment. Workers were not only being drawn from agriculture but from construction and mining.

Nevertheless, the working force in logging had not reached its peak by the end of September. Unfilled vacancies at National Employment Service offices, which probably represent the smaller part of the demand for woods workers, totalled more than 17,000 at September 28.

Although the focal point of recent demand has been the unskilled seasonal worker, labour shortages have appeared in other fields. Shortages of skilled and semi-skilled men in construction and in some metal-working trades have appeared; auto mechanics were still scarce and the lack of female help persisted in the domestic service field. Seasonal developments will not greatly change this situation and in some cases, as in metal-working, demand may increase in the coming months as more orders are placed for defence projects.

Regional Analysis

The continued improvement in employment conditions in *Newfoundland* during September was based largely on the optimistic outlook for the newsprint industry. About twice last year's number of workers were engaged in pulp cutting and pulp and paper mills were continuing to operate at capacity. In an effort to fill orders totalling one million tons of iron ore before the end of the shipping season, mining activity on Bell Island moved towards peak proportions. Work for trans-

portation and dock workers had increased with the rising volume of imports for the Christmas trade and heavy shipments to the outports prior to the freeze-up. Fishing, building and road construction and railway maintenance also kept many workers occupied. Registrations at National Employment Service offices declined 1,100 during the month, to total 5,500 at September 28.

Features of the still improving employment situation in the *Maritime* provinces during September were the continuing high level of construction activity in many areas; movements of harvest workers into Prince Edward Island, New Brunswick, and Maine potato fields and Annapolis Valley orchards; and increases in pulp and lumber cutting activity in Northern New Brunswick. The strong demand for harvest help retarded the expansion of woods employment and the supply of woods workers is expected to remain below requirements until the harvest season ends. Coal mining employment continued at a high level as steps were taken to further increase coal output. While growing shortages of materials make the future plans of steel plants uncertain, their activity has been generally well maintained so far. Shipbuilding has expanded somewhat in Halifax.

Live job applications on file with National Employment Service offices in the Maritimes at the end of September totalled 16,500, only slightly lower than at the end

SELECTED OCCUPATIONS WHERE VACANCIES EXCEED APPLICATIONS

September 28, 1950

of August but over 2,000 below the total a year ago. Registrations at most local offices varied only slightly over the month, but the decline relative to last year appears to have taken place in the smaller areas, while data from most of the larger centres show slight increases over 1949.

Some temporary labour shortages had developed in the *Quebec* region during September, particularly among unskilled workers. Total applications on hand at employment offices dropped by about 3,000 during the month to total 42,700 at September 28. This was 1,300 less than last year at this time; male applicants had declined by 6,600, but the number of women registered had risen by 5,300. Heavy hiring for the logging camps, which coincided in many instances with agricultural labour requirements, have taxed the available supply of male workers. Sufficient farm help was available, however, to harvest the better-than-average crop this year. By the middle of September, workers were moving into the State of Maine for potato picking; about 1,200 were involved in the organized movement this year. Another 1,150 men left Quebec to help with the Prairie harvest. Farm workers were also being absorbed in large numbers in the woods. It was estimated that 35,200 were already employed in the major pulp and paper companies in Quebec at October 7, and about 11,900 others were required. The greatest demand was in the St. Maurice and North Shore districts.

Many skilled men will be needed in Sorel to help in filling the \$12.1 million order for guns placed by the American and Canadian governments during September and early October. In addition, employment in the shipyards will be expanding due to the recent orders received by the Dominion government.

As in all districts in Quebec, the employment situation had decidedly improved in the Eastern Townships. Increased tonnage is reported by mining industries, with some labour shortages. Employment is seasonally increasing in textiles although some firms are still working short-time. A union agreement for an 8-hour shift in the cotton textile plants in Valleyfield, has necessitated the hiring of 400 additional workers. Although heavy industries in Sherbrooke are still operating below last year's level, the situation has improved considerably. Former workers are being recalled as important orders have been received for materials for the Labrador development project.

In the *Ontario* region, increased employment activity was reflected in a decrease of 15 per cent from the previous month

in the number of job registrations at September 28, which totalled 33,900. The reduction was entirely in the male division, and a marked scarcity of heavy labour has developed. Considerable expansion in heavy industry, the transfer of workers to the Western harvest and peak construction activity accounted for these conditions.

The upsurge in manufacturing activity in response to the current buoyancy of the national economy has resulted in increased hiring in many Ontario centres. Activity in firms manufacturing durable goods has shown particular improvement. The automobile industry in Windsor attained a new production level during the month, and hiring at other automobile manufacturing centres was steady. The new diesel plant at London was in full production and steadily increasing its staff. There were also substantial gains in employment in aircraft, paint, woodworking, electrical and industrial machinery plants.

In general, the Ontario harvest has been disappointing. Frost in the Belleville area caused heavy reductions in the yield of vegetables with consequent loss of employment in canning factories, while excessive rain deteriorated crops at St. Catharines and Niagara Falls. Sugar refining, however, was beginning to absorb some labour at Wallaceburg and Chatham.

In the northern part of the region, although there was a steady expansion in metal mining, the heaviest demand came from pulp-wood contractors. The scarcity of bush workers at Kirkland Lake, Timmins and Sudbury is already acute and it is expected that fewer Quebec farmers will be available this year to relieve this shortage.

During September, the *Prairie* region entered its period of peak employment as the grain harvest made a long-delayed beginning. Job applications, which stood at 16,500 on September 28, showed a decline of 36 per cent during the month, almost all of which was in male applications. Although most of this reduction was the result of harvest hirings, part at least could be attributed to increased activity in coal mining and some branches of manufacturing, as well as the beginning of fall fishing and the sugar beet run.

Through the joint efforts of the National Employment Service and the Provincial Farm Labour Services, about 2,300 Eastern harvesters were received and distributed almost equally among the three provinces. There was some shortage of farm labour in Manitoba, but in other areas the local and transient labour supply was sufficient to meet the demand.

Because of the lateness of the harvest, other activities whose labour needs are usually met by the return of harvesters were being delayed this year. There was a continuous and heavy demand for bush workers in the Lakehead area. Although there were 1,400 more men working in the bush than at this time last year, additional orders for 5,000 men were placed at Winnipeg; these will be difficult to obtain even after the harvest. In some areas, it was also impossible to supply the demands for workers until after the harvest in such industries as sugar refining, construction and railway maintenance. With favourable weather, therefore, it is likely that the peak employment period will continue somewhat later this year than last.

In most of the Prairie region, there was a scarcity of skilled construction workers. Employment in coal mining improved during the month, particularly at the Estevan strip mining projects. Miners were also working full time at Lethbridge, Red Deer and Drumheller, but mines at Edmonton and Blairmore were still on short time.

The strongest employment situation in the past two years prevailed in the *Pacific* region during September, as peak activity continued in most industries, particularly in logging and lumber, agriculture and base metal mining. At September 28, live job applications at National Employment Service offices totalled 17,900, a drop of 2,100 from last month, and 3,000 from the same date last year. At some offices, the percentage drop in actual claims for unemployment insurance indicated a greater improvement in insurable occupations than in employment as a whole. At the month's end, there was some slackening in construction and harvesting, but all physically fit workers, skilled and unskilled, were being absorbed in the forest industries.

The fruit harvest was well on the way to completion at the end of the month. The United Kingdom order and increased shipments to the United States had eased the apple marketing problem considerably. In most areas, the crop was harvested without undue difficulty. There was a scarcity of pickers at Kelowna and Vernon, but the situation was expected to be in hand by the beginning of October.

Under the influence of continued export demand, logging and allied industries were working at capacity. The most urgent need was for all types of logging labour. On the mainland, the scarcity of forest skills remained acute, despite collective agreements with higher wages. Some lumber operators were advertising for Prairie

workers but these would not be available until after the harvest.

The stepped-up defence program had brightened the prospects for the base metal industry, and there has been a steady demand for experienced miners. Coal mining remained relatively stable throughout the month.

Industrial Analysis

During September, *agricultural* activity was at its peak and Canadian farmers experienced difficulty in obtaining sufficient harvest help. Increasing demand for workers from other industries, particularly construction and logging, cut heavily into the available labour supply. As well, immigrant help was not available in such large numbers as in previous years, although some Displaced Persons were still being admitted. Many who have completed their contract terms, have bought their own farms and others have moved into urban employment. Finally, the re-opening of the schools resulted in the withdrawal of younger workers who formed a large and important sector of the labour force.

The Prairie harvest was late in starting this year, getting under way about the first week in September, and was further delayed by wet weather in some parts of Manitoba and Saskatchewan. Labour shortages were general throughout the region, especially since the harvests in the three provinces occurred at the same time this year. In the organized movement of harvesters from Eastern Canada to the Prairies, 2,300 workers were sent during August and September.

Potato picking made heavy demands on Canadian labour during September. About 2,200 pickers from Quebec and New Brunswick went over to Maine in the organized movement this year, as compared to 1,350 in 1949. There were three organized movements carried out within the Maritime provinces. About 600 pickers went from Nova Scotia to Prince Edward Island; 1,000 workers took part in a movement within the province of New Brunswick and another 300 in a similar movement in Prince Edward Island. A movement from the Prairies to North Dakota was also carried out.

Data on wages paid male hired help on farms, issued by the Dominion Bureau of Statistics, showed that wages at August 15 were the highest on record. During 1949, a downward movement in wage rates was experienced but the scarcity of farm labour, together with increases in wages and prices generally, has terminated this trend.

A marked increase in labour market activity in the *manufacturing* industries

was evident during September, as the economy expanded in response to increased seasonal activity and defence spending stimuli. Hirings were heavy during the month, wage rates were rising, many new factories were either planned or in the contract stage, and shortages of some materials, notably steel, were beginning to develop.

EMPLOYMENT AND EARNINGS IN MANUFACTURING

(Base: June 1, 1941=100)

The producer goods industries, in which heavy lay-offs have occurred in the past two years, were preparing to return to near-wartime levels of production and employment. Aircraft, shipbuilding, and armament plants were adding large numbers of workers to their staffs. While some consumer durable goods industries, particularly those producing electrical apparatus and automobiles, were expanding, employment in other consumer goods industries such as textiles, tobacco and beverages was either stable or declining.

With an expanding economy, the upward movement in wage rates became more general during the month. With new collective agreements being negotiated for the year, wage increases were being given in most industries, usually without a work stoppage. In the meat-packing industry, 10,000 employees of the "Big Three" received an 8½ cent-an-hour increase; some 6,000 Eastern Canada textile workers received varying increases; Montreal and Toronto fur workers were also given industry-wide pay raises and about 20,000 iron and steel workers, including employees of General Motors and Chrysler, received wage boosts.

During August and September, there was a rush to start work on new factories before anticipated shortages of key materials developed. Industrial contracts awarded during these two months were unusually heavy, bringing the 9-month total to \$102.5 million, about 25 per cent above the comparable 1949 figure. Over 2,700 new job openings were reported to the Department of Labour during the third quarter of the year, as a result of the completion of 38 new plants.

In sharp contrast with the 1949-50 season, labour demand in the logging industry was very strong in all regions during September. In the East, with excellent market prospects for both lumber and pulpwood, operators were planning a heavy cut and were starting early to build up their staffs. The supply of labour was limited however, as both construction and agriculture were at the peak of seasonal activity and the demand was far in excess of supply.

The British Columbia forestry industries continued to operate at a high level, with ideal weather conditions prevailing during most of the month. Shortages of skilled and unskilled workers were reported in all occupations, although labour turnover was lower. Fire hazard was the only other limiting factor on production and resulted in a three-day lay-off of 450 workers at Ladysmith. Rains toward the end of the month eliminated this hazard in most areas.

Eastern Canada including Manitoba as reported by Canadian Pulp and Paper Association.

With this heavy demand in all regions, the number of unfilled vacancies registered with the National Employment Service increased sharply during September. At the month's end, there were over 17,000 registered as against 6,000 at the end of August. The demand was the strongest in those areas in which heavy unemployment occurred last year. About half the total of 17,000 was in the province of Quebec, 4,600 in the Prairies (chiefly the Lakehead area), 2,400 in Ontario and 1,100 in the Atlantic region.

Construction activity was at its seasonal peak in September, with the industry operating at capacity and backlogs of new work beginning to pile up. The demand for workers was increasing and labour shortages, which had existed all summer, became more severe during the month. These shortages were common to both skilled workers and labourers in all occupational groups. In only one large city, Vancouver, where several large commercial and housing projects had been completed, was a drop in demand reported.

In addition to the scarcity of suitable labour, shortages of material were also a limiting factor on production. Temporary lay-offs of construction workers due to lack of materials were reported from various centres in Ontario, Quebec and British

Columbia during the month. The type of material in short supply varied by locality but structural steel, cement, plastering materials, and brick were among the more important.

High employment in the industry in the immediate future is indicated by the large number of projects now in the contract stage. An unusually high volume of contracts were awarded in September, the figure of \$129 million being the highest on record for that month. This brought the nine-month total value of contracts awarded to a staggering \$1.01 billion, well above the total of \$812 million for the same period in the record construction year of 1949.

In spite of this apparent increase in the volume of work, the Dominion Bureau of Statistics index of construction employment at August 1 was below that of August 1, 1949. The index for that date in 1950 was 202.3, as compared to the 1949 figure of 203.5 (1926=100). This slight decline was due to a drop in railway and highway construction, as the building construction index was above that of August 1, 1949. On a regional basis, these year-to-year comparisons show that reported employment was down at August 1 in the Maritimes, Quebec and Pacific areas, with Ontario and the Prairies showing increases.

APPLICATIONS FOR EMPLOYMENT ON FILE AT NES OFFICES

▲ Includes Newfoundland from April, 1949.

1935

Employment Service Activities

The number of workers and jobs brought together by the National Employment Service during September was at a record high for the past four years. While most of the orders were filled by local workers, increasing numbers were being put in clearance—that is, were being circulated through the region or the Dominion, if necessary, to find suitable help. Orders for farm help, loggers, various construction and metal-working tradesmen, as well as requests for bank clerks, were being sought outside the local office areas where they were placed.

Despite the fact that more women have been placed during the past five months than in the same period in any postwar year, applications on hand at the end of September were more than a third higher than a year ago. This, to some extent, was due to the number of married women returning to the labour market. High living

costs have been forcing housewives who have not been working for many years to seek work; others have been registering at NES offices in anticipation of job opportunities in aircraft and munitions plants.

In an effort to further ensure that married women not genuinely interested in securing employment will not be eligible for unemployment insurance benefits, a new regulation concerning the payment of benefits to married women will become effective on November 15. This specifies that married women who have not worked for 90 days since their marriage may be disqualified from receiving benefits for a period of two years unless the reason for their release was a shortage of work or an employer's rule against employing married women. The Unemployment Insurance Commission was given the power to make such a regulation by an amendment to the Unemployment Insurance Act during February, 1950.

Unemployment in Trade Unions, June 30, 1950*

Trade union unemployment in Canada declined to 3.1 per cent at the end of June, from 4.4 per cent at the end of the previous quarter, but was higher than the percentage of 1.8 noted at June 30, 1949.

In this analysis, unemployment refers only to involuntary idleness due to economic causes. Persons who are without work because of illness, a strike or lockout, or who are engaged in work outside their own trade are not considered as unemployed.

The number of reporting unions varies from quarter to quarter with consequent variations in the membership upon which the percentage of unemployment is based. It should be understood, therefore, that the figures refer only to organizations reporting. At the date under review, 2,643 locals reported a combined membership of 570,692. In the previous quarter, reports were received from 2,477 locals with 489,984 members, while at the end of June, 1949,

* See Tables C-11 and C-12.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

the percentage was based on 2,504 locals representing 489,045 members.

Table C-11 shows the percentage of union unemployment at the end of certain months in various provinces. As compared with the previous quarter, the percentage of unemployment declined in each province except New Brunswick. As compared with June, 1949, unemployment declined in Manitoba, Saskatchewan and British Columbia, was unchanged in Alberta and exceeded the previous year's level in all other provinces.

Table C-12 indicates the percentage of trade union unemployment by industrial groups. Returns were received from 1,088 locals in the manufacturing industries. These reported 297,457 members of whom 9,928 were unemployed at the end of June. At the end of the previous quarter, 1,020 locals reported 256,404 members of whom 9,435 were unemployed at the end of March. At June 30, 1949, reports were received from 1,028 locals with a membership of 260,071 members of whom 4,723 were without work at that date.

In the transportation group, reports were received from 867 locals representing a

membership of 116,510 of whom 4,397 were unemployed at the end of June. At the end of the previous quarter, 804 locals with a membership of 102,731 reported 2,180 out of work while at the end of June, 1949, 821 locals with a membership of 99,966 members reported 1,044 as unemployed.

Unemployment in Mining fell from 2.3 to 1.3 per cent. Reports were received from 69 locals with a membership of 35,363 of whom 464 were out of work.

In the building and construction trades, unemployment fell from 15.8 to 4.2 per cent. Reports from 221 locals with a membership of 55,852 show 2,356 unemployed as compared with 7,343 unemployed out of a membership of 46,483 in 214 locals at March 31, 1949. At June 30, 1949, the proportion unemployed in these trades was 4.3 per cent.

Of the main groups of industries, unemployment at June 30, as compared with the previous quarter, was less in Lumbering, Mining, Manufacturing, Construction, Communication and Services; it was unchanged in Trade, and increased in Transportation.

EARNINGS AND HOURS OF MALE AND FEMALE WAGE-EARNERS AND SALARIED EMPLOYEES IN MANUFACTURING, 1948*

In the eleven-month period between the 1947 and 1948 surveys, average weekly wages rose by 10.6 per cent for men and 12.1 per cent for women. In the preceding year, men's weekly wages rose by 14.1 per cent and women's by 15.1 per cent over the November, 1946 figures. Average time worked remained substantially the same as in 1947.

Results of the third annual survey of earnings and hours in leading manufacturing establishments, recently published by the Dominion Bureau of Statistics, show that in the last week of October, 1948, women made up 24.1 per cent of all employees reported in the latest survey, 22.4 per cent of the wage-earners and 32.8 per cent of the salaried personnel. These percentages reflect insignificant decreases from the proportions reported for November, 1947.

Women employed as wage-earners received, on the average, \$5.35 a week less than those defined as salaried workers.

There was a somewhat greater increase in the wages than in the salaries paid to women over the 11 months. Their average hourly earnings amounted to 63.6 per cent of men's hourly earnings, their average weekly wages to 56.7 per cent, and average weekly salaries to 49.2 per cent. The difference in percentage between the hourly and weekly figures for the women results from

* The survey includes all employees on the pay-lists of establishments usually employing 15 or more persons, with the exception of travelling salesmen, homeworkers, watchmen, charwomen and workers engaged on new construction. Proprietors or firm members and employees of separately organized sales offices were also excluded.

their shorter working time; the disparity between the proportions of women's weekly wages and their weekly salaries in relation to men's earnings is chiefly due to the influence of the comparatively high salaries of executive and administrative employees—mostly male—on the average earnings of the salaried personnel.

The 1948 statistics were collected for the last week in October, one month earlier than in the two preceding surveys. Except in a few seasonal industries, such as sawmill, food processing, and apparel manufacturing, the change in the period of the survey did not materially affect the comparability of the date, it is explained.

Increases in average wages were general throughout Canada in the 11-month period between the 1947 and 1948 surveys. Average weekly wages rose by 10.6 per cent for men and by 12.1 per cent for women. Upward adjustments of wage rates, often on an "across-the-board" basis, were chiefly responsible for the increases, although changes in levels of industrial activity for seasonal and other reasons, and other circumstances were contributing factors. The variations were smaller than in the preceding year, when men's weekly wages rose by 14.1 per cent and women's by 15.1 per cent over the figures reported in November, 1946. The average time worked by the wage-earners, and the proportions working hours longer or shorter than average remained, on the whole, substantially the same as in 1947.

Salaried personnel made up 16.7 per cent of the reported employees and were paid 20.5 per cent of the gross payrolls in 1948. Their average weekly earnings rose by 6.3 per cent from 1947, while wages rose by 10.9 per cent. In the preceding year, salaries had increased by 13.5 per cent and wages by 14.9 per cent. Men averaged \$63.48 a week in October, 1948—\$3.27 more than in November, 1947; in the previous year their weekly earnings had risen by \$7. The amounts of the increases in women's salaries in the same periods were appreciably smaller; they were paid \$31.26 a week in 1948 and \$28.68 in 1947. The average hours reported for salaried personnel of both sexes declined slightly from the 1947 levels.

Wage-Earners

Wage-earners, defined as production workers, route drivers and delivery men, maintenance and related employees, comprised 83.3 per cent of all persons reported in the 1948 survey. Male wage-earners made up 77.6 per cent of the total, 0.3 percentage points above the proportion in November, 1947. Among the 17 major

industrial divisions, the numbers of women wage-earners exceeded the numbers of men only in the clothing division, where they comprised 69.8 per cent of the reported workers.

The sex distribution of wage-earners varied provincially in accordance with the industrial activities represented in the different areas. The highest proportion of men was reported in British Columbia, where large numbers of wage-earners are employed in the lumber, iron and steel and other industries which utilize the services of few women. The general proportion of women employed as wage-earners in Quebec was substantially higher than in other provinces because of the importance of the textile, clothing, tobacco and other light industries, in which women constitute high percentages of the workers.

Average Earnings²

Reported earnings in manufacturing as a whole averaged 94.6 cents an hour and \$41.25 a week for both sexes, 102.3 cents an hour and \$45.73 a week for men, and 65.1 cents an hour and \$25.91 a week for women. These figures represent substantial increases over the levels reported in November, 1947, although the advances were smaller than in the preceding year. Both men and women employed in durable goods manufacturing were more highly paid and enjoyed somewhat greater increases in pay in the 11 months than those in the non-durable goods division.

Male workers in the motor vehicle manufacturing group received the highest average hourly pay of \$1.31 an hour, and those in pulp and paper mills received the highest average weekly pay, amounting to \$55.02. Among industries reporting more than 1,000 female wage-earners, women's average hourly and average weekly earnings were highest in the plants producing motor vehicle parts and accessories, where they received 87.2 cents an hour and \$35.23 a week, on the average, at the end of October, 1948. In this industry and in several others, the amounts of increases in hourly earnings since November, 1947, were the same for both men and women. Such "across-the-board" adjustments produced higher percentage increases in women's earnings than in men's, so that their wages constituted

² Manufacturers co-operating in the survey were asked to state the gross earnings of all reported wage-earners for part-time, full-time and overtime work in the week ending October 31, 1948, regardless of whether they were paid on a time, piece-work, commission or other basis. Incentive, production, cost-of-living and other bonuses earned in the week were included, as were payments to workers absent with pay during any part of the week.

a somewhat higher proportion of men's wages than in 1947. In a few industries, the most important of which were fish canning and women's clothing manufacturing, women's hourly earnings rose by greater amounts than men's earnings. The most substantial advances in average hourly earnings in the 11 months were 20.8 cents to men and 18.1 cents to women engaged in tobacco products manufacturing and 15 cents to men in railroad shops.

Average Hours of Work

The average working time of the wage-earners reported did not vary significantly from the average recorded 11 months earlier. Men averaged 44.7 hours, and women 39.8 hours, as compared with 44.9 and 39.7 reported for November 30, 1947. The largest proportion of men, 19.4 per cent, was reported to have worked 45 to 47 hours in the week, and the second largest group, 13.9 per cent, worked 48 hours. Over 17 per cent of the female wage-earners, also the largest group, worked 45 to 47 hours, but only a small percentage worked 48 hours or longer.

In the three-year period covered by the surveys, there was a small increase in the proportions of wage-earners working 40 hours, and a slight decrease in the proportions working 48 hours. The percentage of women reported in each category did not differ appreciably from that of men, except in the 48-hour class. Average hours of men varied from 48.6 hours in pulp and paper mills to 40.3 hours in men's clothing factories. Among industries reporting more than 1,000 women as wage-earners, the average time of such workers ranged from 44.3 hours in rayon, nylon and silk textile mills to 34.6 hours in fruit and vegetable processing plants.

Salaried Employees

Salaried personnel reported in the survey comprised executive, managerial, supervisory, office, clerical and related staff. Working proprietors, firm members and travelling salesmen were excluded, as were all employees of separately-organized distributive units not properly classed as manufacturing concerns. Professional workers were usually classified as salaried personnel.

Salaried workers made up 16.7 per cent of the total number of employees reported. The proportions of salaried workers in relation to wage-earners varied considerably among the provinces, the variations being related to the scale of operation and the organization of the individual establishments.

The percentage of salaried women decreased slightly in Canada as a whole and in several provinces between November, 1947, and October, 1948. Differences in levels of activity in industries employing above- or below-average proportions of women and changes in classification of employees were largely responsible for these small variations.

Average Weekly Salaries

The reported salaries in leading manufacturing establishments in Canada were higher in the last week of October, 1948, than they were 11 months earlier, but the increases were not so large as in the year from November, 1946, to November, 1947. Unlike the preceding year, the general increases to the salaried personnel of each sex in 1948 were smaller than those to the wage-earners.

The general increase in women's salaries in the 11 months ending October 31, 1948, amounted to \$2.58 a week, as compared with \$3.26 in men's. (In 1947 women's salaries had risen by \$2.77 and men's by \$7.) The greater percentage gain to women in 1948 over 1947 resulted in an increase of 1.7 percentage points in the proportion that their salaries constituted of men's salaries. In comparing salaries of men and women, consideration must be given to several factors influencing their pay levels. In addition to occupational differences and pay differentials, the age of women employees tends to be lower than that of men, their rate of labour turnover is higher, and part-time work and absenteeism are more prevalent.

In all three years, leading manufacturers reported the highest salary levels for men in Ontario, British Columbia and Quebec, and for women in British Columbia, Quebec and Ontario.

While men generally received larger increases in the 11 months than women in the same industry, there were several instances where the rise in women's average weekly earnings exceeded that of male salaried workers. Several factors contributed in varying degree to this situation, among which may be mentioned (1) continuing increases in salaries of general office workers, while upward adjustments to executive and other senior personnel (mostly male) were less important than in 1947; (2) increases granted on an occupational basis, particularly where insufficient numbers of trained workers were available; (3) higher proportions of more experienced women office workers; and (4) greater activity of a seasonal character

in industries employing above-average numbers of women, such as the apparel and food processing groups.

Hours of Work

The hours reported for the salaried employees are less precise than those for the wage-earners, mainly because short absences and overtime frequently do not affect their earnings so that time records in hours are often lacking. In general, salaried personnel work fewer hours, on the average, than wage-earners in the same

establishments. Only in a few industries did the working time of the salaried staff exceed that of the wage-earners; instances were some food and beverage groups and apparel manufacturing, where the average hours of the wage-earners were comparatively low.

On the whole, there was little variation between the average hours of the salaried workers reported in 1947 and 1948. In most provinces, their hours declined slightly, but nowhere did the difference amount to as much as an hour.

PRICES AND THE COST OF LIVING*

Cost-of-Living Index

The Dominion Bureau of Statistics cost-of-living index rose 0.9 point between September 1 and October 2 to reach 170.7. At January, the index stood at 161.0 and the October, 1949 figure was 162.2. In contrast to the past few months, groups other than food accounted for most of the increase. The food index recorded an advance of 1.3 points to 220.1 reflecting increases for eggs, butter, milk, coffee and fruits. Reversing a January-September trend, meat prices declined slightly while fresh vegetables also moved lower. The clothing index rose from 182.3 to 183.5 largely as a result of higher prices for fall and winter items and footwear. Slight increases throughout the home furnishings and services group advanced this index 1.6 points to 172.7. The index of miscellaneous items moved from 132.8 to 133.3 following increases in tires, barbers' fees and certain drug items. Higher prices for coal and coke resulted in a slight gain in the fuel and light index from 140.8 to 141.0. Rents were not surveyed during October, and the index remained at 135.5.

Between August, 1939 and October, 1950, the cost-of-living index advanced 69.3 per cent.

Cost of Living in Eight Cities

Regional city cost-of-living indexes registered advances during August, with the exception of Edmonton. For this city a sharp seasonal drop in potatoes and other fresh vegetables was sufficient to offset higher prices for meats, coffee, sugar and butter. At other centres, food prices were higher although considerable variation was noted. Clothing was up at all centres as was home furnishings and services. Fuel

costs were higher at most centres. The quarterly survey of rents revealed advances in six of the eight centres—Saint John and Saskatoon remaining unchanged. A general increase in automobile tires was reflected in advances in the miscellaneous items indexes.

Composite city index increases between August 1 and September 1 were as follows: Montreal 2.4 to 174.7; Toronto 1.7 to 166.1; Halifax 1.4 to 160.3; Winnipeg 1.2 to 164.3; Vancouver 1.2 to 170.8; Saint John 1.1 to 166.0; Saskatoon 0.6 to 167.8. Edmonton remained at 165.0. In the same period, the Dominion index rose 1.3 to 168.5.

Wholesale Prices, August, 1950

The general index of wholesale prices moved up 1.6 points between July and August, 1950, to a new all-time high of 168.5. Of the eight major groups, six recorded increases in this period and two were unchanged. The most substantial group increase was shown by Textile Products which advanced 7.1 points to 172.7. Non-ferrous Metals and Chemical Products followed with equal gains of 3.7 points which brought the Non-ferrous Metals index to 162.8 and the Chemical Products index to 122.3. Animal Products increased by 2.1 points to 179.9 and Non-metallic Minerals edged up one-tenth of a point to 140.8. Vegetable Products and Iron Products remained unchanged at July levels of 150.1 and 182.5 respectively.

Important commodity price increases were recorded between July and August for the following: tallow 50.0 per cent, lard (average) 37.3 per cent, worsted yarn, 2 ply 18's, 35.4 per cent, raw rubber 31.5 per cent, calf skins 28.6 per cent, raw sugar 25.3 per cent, canned peas

* See Tables F-1 to F-6.

COST OF LIVING IN CANADA FROM JANUARY, 1946

(1935-39=100)

25.0 per cent, raw wool, eastern bright, 22.8 per cent, automobile tires 20.7 per cent, pepper 15.3 per cent, glycerine 15.1 per cent, wool cloth 14.9 per cent, cocoa beans (African) 14.7 per cent. Among commodity declines recorded in the same period were: potatoes 19.5 per cent, onions, Toronto, 16.7 per cent, oats, No. 1 feed 10.4 per cent, lemons 9.8 per cent, rolled oats 8.3 per cent, lambs 8.1 per cent, barley, No. 2 feed 7.6 per cent, canned tomatoes 6.7 per cent, halibut 6.7 per cent, beef carcass, cow, Montreal 5.8 per cent.

The Canadian Farm Products index of prices at wholesale declined 12.3 points to 141.9 between July and August. A sharp drop of 20.7 points in Field Products to 105.7 was due largely to lower initial payment prices to producers for grains which became effective August 1, although seasonal decreases in potatoes and onions also contributed to the downward movement. The Animal Products Index rose 1.8 points to 202.6 when higher prices for raw wool, hides and skins, fowl and eggs outweighed a small recession in livestock prices.

STRIKES AND LOCKOUTS*

Canada, September, 1950

There was a slight increase in the number of new work stoppages during the month, as compared with August. However the number of workers involved and the time loss declined sharply from the August totals, which were swollen by the trans-Canada strike of 125,000 non-operating railway workers which caused a time loss of a million days. In September, 1949, with about the same number of stoppages as in the month under review, the time loss was almost double.

Preliminary figures for September, 1950, show 20 strikes and lockouts in existence, involving 15,902 workers, with a time loss of 38,376 man-working days, as compared with 19 strikes and lockouts in August, involving 129,787 workers and a loss of 1,053,000 days. In September, 1949, there were 25 strikes and lockouts, with 8,588 workers involved and a loss of 67,933 days.

* See Tables G-1 and G-2.

For the first nine months of this year preliminary figures show 110 strikes and lockouts, involving 162,247 workers and a loss of 1,301,698 days. In the same period in 1949 there were 105 strikes and lockouts, with 38,520 workers involved and a loss of 833,946 days.

Based on the number of non-agricultural wage and salary workers in Canada, the time lost in September, 1950, was 0.05 per cent of the estimated working time; 1.26 per cent in August, 1950; 0.08 per cent in September, 1949; 0.17 per cent for the first nine months of 1950; and 0.11 per cent for the first nine months of 1949.

Of the 20 strikes and lockouts in existence during the month, one was settled in favour of the workers, three in favour of the employers, five were compromise settlements, and four were indefinite in result,

work being resumed pending final settlement. At the end of the month seven work stoppages were unterminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes and lockouts about which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Strikes of this nature which are still in progress are: composers, etc., at Winnipeg, Man., which commenced on November 8, 1945, and at Ottawa and Hamilton, Ont., and Edmonton, Alta., on May 30, 1946; textile products factory workers at St. Lambert, P.Q., August 29, 1949; printers at St. John's, Newfoundland, May 22, 1950; and department store clerks at New Westminster, B.C., August 27, 1949.

Great Britain and other Countries

The latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month. Statistics given in the annual review issued as a supplement to the *LABOUR GAZETTE* for April, 1950, and in this article are taken, as far as possible, from the government publications of the countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in July, 1950, was 77 and 13 were still in progress from the previous month, making a total of 90 during the month. In all stoppages of work in progress in the period there were 43,500 workers involved and a time loss of 249,000 working days was caused.

Of the 77 disputes leading to stoppages of work which began in July, five, directly involving 27,200 workers, arose out of demands for advances in wages, and 25,

directly involving 1,400 workers, on other wage questions; nine, directly involving 1,300 workers, on questions respecting the employment of particular classes or persons; 33, directly involving 4,800 workers on other questions respecting working arrangements; two, directly involving 500 workers on questions of trade union principle; and three, directly involving 200 workers, were in support of workers involved in other disputes.

New Zealand

For the first quarter of 1950, figures show 28 strikes, involving, directly and indirectly, 10,604 workers and causing a time loss of 14,077 man-days.

United States

Preliminary figures for August, 1950, show 560 strikes and lockouts beginning in the month, in which 350,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 2,900,000 man-days. Corresponding figures for July, 1950, are 425 strikes and lockouts, involving 225,000 workers with a time loss of 2,900,000 days.

Circulating media in hands of public.....\$000,000		1,159	1,155	1,135	925	(7) 281
Deposits.....\$000,000		3,532	3,033	2,913	(7) 2,163	(7) 1,089

NOTE.—Latest figures subject to revision. Many of the statistical data in this table are included in the Canadian Statistical Review issued by the Dominion Bureau of Statistics.

† Comparable statistics are not available.

(1) Labour Force survey figures given are as at June 3, 1950, June 4, 1949, June 5, 1948. All figures for June 1950 exclude Manitoba.

(2) Average 1926=100.

(3) Figures are as at end of quarter ending June 30, 1950, 1949, 1948, 1944, 1939 respectively.

(4) Real earnings computed by dividing index of average weekly earnings of wage-earners in manufacturing by the cost-of-living index; base: average for 1946=100.

(5) Average 1935-39=100.

(6) Newfoundland is included after April 1, 1949.

(7) Year end figures.

(8) Figures for 1939-44 are production data rather than shipments

TABLE C-6.—HOURS AND EARNINGS IN MANUFACTURING

(Hourly-Rated Wage-Earners) SOURCE: *Average Hours Worked and Average Hourly Earnings*, D.B.S.

Tables C-6 to C-9 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-5. They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1 to C-4 relate to salaried employees as well as to all wage-earners of the co-operating firms.

Week Preceding		Average Hours Worked			Average Hourly Earnings		
		All Manufactures	Durable Goods	Non-Durable Goods	All Manufactures	Durable Goods	Non-Durable Goods

Personal (chiefly laundries).....	40.0	40.5	40.1	68.6	68.5	65.9	27.44	27.74	26.43

* Industries classed in the durable manufactured goods industries.

¹ Since 1941, the Dominion Bureau of Statistics has prepared current indexes of average hourly earnings of the employees of eight establishments producing heavy electrical apparatus. Based upon the hourly earnings at June 1, 1941, as 100 p.c., the latest figures are as follows:—June 1, 1950, 247.4; July 1, 1950, 249.5; August 1, 1950, 248.0; at August 1, 1949, the index was 228.8.

² Chiefly street and electric railways.

³ For information respecting sex distribution of persons in recorded employment, see Table C-5.

TABLE C-10.—EARNINGS, HOURS AND REAL EARNINGS FOR WAGE EARNERS IN MANUFACTURING INDUSTRIES IN CANADA

(Source: Hours Worked and Hourly and Weekly Wages D.B.S. Real Wages Computed by the Economics and Research Branch, Department of Labour)

Date	Average Hours Worked per Week	Average Hourly Earnings	Average Weekly Earnings	Index Numbers (Av. 1946=100)		
				Average Weekly Earnings	Cost of Living	Average Real Weekly Earnings

August 1, 1950(1).....	42-5	104-2	44 29	146-6	136-3	107-6

Note: Average Real Weekly Earnings were computed by dividing the index of the cost of living into an index of the average weekly earnings, both indexes have been calculated on a similar base (Average 1946=100).

* Figures adjusted for holidays. The actual figures are: January 1, 1948, 38-3 hours, \$33.17; April 1, 1948, 41-6 hours, \$37.02; January 1, 1949, 40-6 hours, \$39.46; May 1, 1949, 42-5 hours, \$41.91; January 1, 1950, 39-9 hours, \$40.34; May 1, 1950, 42-6 hours, \$43.67.

(1) Latest figures subject to revision.

Above food prices are simple averages of prices reported. They are not perfectly comparable in all cases, with price averages for earlier years. Changes in grading, trade practices etc., occur from time to time.

(a) Rental ranges shown above are indicative of prevailing rents being paid. They should not be used as a measure of change in rents paid for the same quality of living accommodation over long periods of time. (b) Averages include prices for cuts with bone in. (d) Mixed—hock-off and hock-on. (e) Mixed—carton and loose. (f) Loose. (g) Estimate. (h) Fancy. (i) Mixed—California and Australia. (j) California. (k) Pure. (m) 360's. (n) Mixed—package and bulk. (p) Package. (s) Mixed—choice and fancy. (t) Tin.

*Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, SEPTEMBER, 1950 ⁽¹⁾

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars(?)
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to September, 1950				
MANUFACTURING—				
<i>Textiles, Clothing, etc.—</i>				
Cotton and rayon underwear factory workers, Sherbrooke, P.Q.	1	104	2,000	Commenced May 11; for a new agreement providing for increased wages following reference to court of referees; untermi-nated.
Knitting factory workers, St. Jerome, P.Q.	1	504	750	Commenced July 6; for implementa-tion of award of arbitration board for increased wages in new agree-ment under negotiations; termi-nated September 2; conciliation, civic, and negotiations; compro-mise.
<i>Miscellaneous Wood Products—</i>				
Wood products factory workers, Oakville, Ont.	1	140	2,660	Commenced August 31; for a union agreement providing for increased wages, shift bonus, reduced hours, and payment for statutory holi-days; terminated September 26; return of workers pending further negotiations; compromise.
<i>Metal Products—</i>				
Electrical apparatus factory workers, Vancouver, B.C.	1	5	100	Commenced May 11; for a new agree-ment providing for increased wages, reinstatement of job classification, payment for all statutory holidays, etc., following reference to conciliation board; employment condi-tions no longer affected by the end of September; indefinite.
Brass products factory workers, Galt, Ont.	1	30	600	Commenced June 15; for a new agree-ment providing for increased wages, Rand formula for union dues, pay-ment for statutory holidays, exten-sion of vacations with pay, follow-ing reference to conciliation board; untermi-nated.
Laundry machinery factory workers, Toronto, Ont.	1	29	550	Commenced June 16; for a new agree-ment providing for increased wages, extension of vacations with pay, additional union security, etc., following reference to conciliation board; untermi-nated.
Aluminum foundry workers, New Toronto, Ont.	1	200	4,000	Commenced June 29; for a new agree-ment providing for increased wages and Rand formula for union dues; untermi-nated.
TRANSPORTATION—				
<i>Water—</i>				
Seamen, British Columbia Ports	3	850	850	Commenced August 25; for new agreements providing for increase in wages and in overtime rates, union shop, payment for statutory holidays, improved working conditions, etc., following reference to conciliation board (600 of these 850 seamen employed by two of the three steamship lines were involved in railway strike from August 22 to August 30); terminated September 1; negotiations and return of workers under tentative agreement similar to that of non-operating railway workers pending final settlement; indefinite.
SERVICE—				
<i>Public Administration—</i>				
Civic employees, Hamilton, Ont.	1	915	10,500	Commenced August 10; for a new agreement providing for increased wages and 40-hour week with same take-home pay as for 44 hours, following reference to conciliation board; terminated September 16; conciliation, provincial and negoti-ations; compromise.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, SEPTEMBER, 1950 (1)

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars(2)
	Establishments	Workers		
Strikes and Lockouts Commencing During September, 1950				
MANUFACTURING—				
<i>Rubber and Its Products—</i>				
Tire factory workers, Kitchener, Ont.	1	1,197	3,190	Commenced September 27; protest against dismissal of maintenance man for unsatisfactory service, terminated September 29; negotiations; compromise, worker reinstated at another job.
<i>Fur, Leather and Other Animal Products—</i>				
Luggage factory workers, Amherst, N.S.	1	50	100	Commenced September 11; against dismissal of a worker for cause; terminated September 12; arbitration; compromise, reinstated after 10-day suspension.
<i>Miscellaneous Wood Products—</i>				
Basket factory workers, Grimsby, Ont.	1	135	1,200	Commenced September 14; for increased wages; terminated September 26; return of workers pending certification of union as bargaining agency; indefinite.
<i>Metal Products—</i>				
Wire rope and cable factory workers, Lachine, P.Q.	2	164	3,100	Commenced September 5; for a new agreement providing for increased wages, 42½-hour week with the same take-home pay as for 45 hours, and adjustment of minor grievances, following reference to conciliation board; unternminated.
Electrical apparatus factory workers, Montreal, P.Q.	1	23	35	Commenced September 14; refusal of outcase finishers to work a third shift; terminated September 15; negotiations; in favour of employer.
Die casting and electro-plating, factory workers, Wallaceburg, Ont.	2	450	1,350	Commenced September 25; for a new agreement providing for increased wages, check-off, payment for statutory holidays, etc., following reference to conciliation board; terminated September 27; conciliation, civic, and negotiations; compromise.
Metal factory workers, Fort Erie, Ont.	1	87	215	Commenced September 27; for a new agreement providing for increased wages, reduced hours, and revision of incentive plan; unternminated.
Motor vehicle factory workers, Windsor, Ont.	3	8,000	5,000	Commenced September 28 and 29; protesting alleged delay in negotiations for increased wages; terminated September 28 and 29; return of workers; in favour of employer.
TRANSPORTATION—				
<i>Electric Railways and Local Bus Lines—</i>				
Street railway motormen and conductors, Montreal, P.Q.	1	2,900	2,000	Commenced September 2; dispute over seniority of conductors and motormen transferred to bus service as chauffeurs; terminated September 3; return of workers pending judgment on injunction taken by Association des Chauffeurs d'Autobus re seniority rights; indefinite.
TRADE—				
Grocery warehousemen and truck drivers, Sault Ste. Marie, Ont.	1	19	76	Commenced September 26; for a union agreement providing for increased wages and reduced hours; unternminated.
SERVICE—				
<i>Business and Personal—</i>				
Sanitarium employees, Guelph, Ont.	1	100	100	Commenced September 7; alleged discrimination in dismissal of union officers; terminated September 7; negotiations; in favour of workers.

(1) Preliminary data based where possible on reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

(2) In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

CURRENT LABOUR CONDITIONS

This article summarizes the latest employment and labour information available at December 11, as the LABOUR GAZETTE went to press. It was prepared by the Economics and Research Branch, Department of Labour.

DURING November, developing defence preparations, the continuing strong demand for consumer durable goods, and a surge in capital expenditures, all increased the pressure on available labour and material supplies. Nevertheless the growing scarcities of skilled men and key materials had not yet reached the point where they were causing more than sporadic temporary layoffs. Although applications for jobs on file at National Employment Service offices increased to 186,300, 44,400 above the total a month previously, this was to a great extent a reflection of the usual decline in employment in seasonal industries.

To those who last month were released from agriculture and had not yet found jobs in logging or other industries have now been added the workers from construction projects on which outdoor work is being curtailed as cold weather begins. It is expected, however, that many more construction workers than usual will be retained on indoor work this season, as employers are anxious to keep their staffs of skilled men intact as long as possible.

There have also been a number of seasonal layoffs in manufacturing industries now beginning their slack periods. Among these are secondary textile factories, sawmills in eastern Canada, leather products firms and canneries.

Many of these seasonally displaced workers continued to move into the logging industry. The movement into the woods from farm districts particularly has to a great extent relieved the shortage of loggers which existed at the beginning of the cutting season. By the end of November, the rate of hiring in the eastern logging industry had begun to slow down, as camps were filled and the peak of the fall employment period approached. Except in a few areas, the period of acute shortages of loggers was over.

With a few exceptions, the scarcity of skilled metal tradesmen, and of experienced semi-skilled workers who can meet the relatively high employers' specifications is not likely to be solved to any great extent by drawing on the seasonal labour surplus. There is very little sign of a relaxation of high standards required for workers being hired, and not much indication of willingness to train new men to the job. There has been some indication, however, that skilled men in the older age brackets are finding more employment opportunities. In addition, some of those now employed in the seasonal industries who have had wartime experience in aircraft, for example, may be qualified for jobs in the expanding aircraft industry.

The general maintenance of high standards is to some extent, a reflection of the fact that the scarcity of skilled labour has not yet become acute enough to create bottlenecks in production, with the resulting layoffs of workers.

This strong demand for skilled and semi-skilled workers in the metal trades continues to reflect, not so much the defence orders themselves, but the reaction of both consumers and producers to the anticipated increase in defence preparations over the next year. Consumer demand is heaviest for household appliances, radios, autos, and other durable goods and continues to be well sustained by current high levels of earnings and income. In addition there has been a decided increase in investment in new factories and equipment, on the part of private industry. Revised estimates made in the third quarter of 1950 indicate that the capital outlay by government and private industry for 1950 will probably amount to \$3.9 billion, an increase of \$500 million over the total for 1949. This represents an increase of about 7 per cent change in volume over the level reached in 1949. This type of demand is putting pressure, not only on the labour supply in these industries, but also on the supply of materials, especially steel and base metals.

Although there have as yet been very few layoffs due to shortages of steel or other key materials, the prospect of such temporary layoffs occurring in the near future is increasing as current inventories of steel are exhausted. It is still necessary for Canada to import about 30 per cent of her total consumption of steel from the United States, although Canadian iron and steel capacity increased by about 60 per cent since 1939. A good portion of the imports, particularly alloy steels, consist of types of steel which cannot be produced economically in Canada. In recent months, imports of steel into Canada from the United States have declined considerably. Imports from 1950 are expected to be about 700,000 tons, as compared with a postwar average of 900,000 tons. Even at capacity production the Canadian industry may have difficulty filling this gap.

The supply of nickel and base metals used in the production of special types of steel is also short. There is a heavy demand for these metals, not only in Canada and the United States but also in Europe, because they are very important to defence production. This situation may in time limit the expansion of steel production of all kinds, and may also have an effect on defence production itself. Canada is a major producer of these metals, and the expansion in production to meet the needs will depend to a considerable extent on the ability of the base metal mining and smelting industry to increase its labour force.

IN BRIEF . . .

Industrial employment in Canada showed a further increase at October 1 this year. The index for eight leading industries reached a new peak of 137.1 (June 1, 1941=100), 3.6 per cent higher than October 1 last year. The index of payrolls, at 244.9 (June 1, 1949=100), was 9.4 per cent higher than a year ago, and was the highest in the record of nine and half years . . . The cost of living index remained unchanged at 170.7 between October 2 and November 1. Declines in the food, fuel and light indexes counterbalanced increases in the remaining four groups. The food index declined by 1.5 per cent . . . Wholesale sales in September were 6 per cent higher than in the corresponding month last year. Increases over a year earlier occurred in all provinces and most trades, the largest advances being in automobiles and equipment, hardware, clothing and dry goods. In the first nine months of this year, all-Canada sales averaged 5 per cent above those in the same period of 1949 . . . Canadian production of steel ingots rose again in October, reaching the highest monthly total since March this year. This month's output amounted to 285,655 tons.

CURRENT LABOUR STATISTICS

(a) Estimated on basis of sample labour force survey. Only those who did not do any work in the survey week are here classified as persons without jobs.

(b) These percentages calculated on basis of 1949 figures excluding Newfoundland.

(c) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

Data in this table are preliminary figures from regular reports compiled by various government agencies, including Dominion Bureau of Statistics, the Unemployment Insurance Commission, the Immigration Branch, Department of Citizenship and Immigration and the Economics and Research Branch, Department of Labour. Detailed information can be found in the statistical appendix of the Labour Gazette.

NOTES OF CURRENT INTEREST

Economic Agreement between Canada and U.S.A.

The Department of External Affairs announced on October 26 an exchange of notes, giving formal effect to a *Statement of Principles for Economic Co-operation* between

Canada and the United States. The statement sets forth general principles for guidance of the two Governments in achieving a co-ordinated economic program for their common defence.

The notes were signed in Washington by Mr. H. H. Wrong, Ambassador of Canada, and Mr. Dean Acheson, Secretary of State of the United States. The two chairmen of the Joint Canada-United States Industrial Mobilization Planning Committee, Mr. C. D. Howe, Minister of Trade and Commerce, and Mr. W. Stuart Symington, Chairman of the United States National Security Resources Board, were present at the signing.

The exchange of notes reaffirms the practice of the two countries followed during the Second World War when they co-operated closely under the terms of the Hyde Park Agreement of 1941. That agreement enabled officials of Canada and the United States to co-ordinate for mutual benefit their efforts in such matters as military procurement, economic controls and the use of raw materials.

The arrangements worked out under the Hyde Park Agreement proved so successful that when international conditions again appeared threatening, the Joint Canada-United States Industrial Mobilization Planning Committee was established on April 12, 1949, to exchange information in case joint action should again become necessary. At its last meeting on August 8, 1950, in Ottawa, the Committee drew up the Statement of Principles which has now been confirmed by both Governments.

Following is the text of the Statement:—

Statement of Principles for Economic Co-operation

“The United States and Canada have achieved a high degree of co-operation in the field of industrial mobilization during and since World War II through the operation of the principles embodied in the Hyde Park Agreement of 1941, through the extension of its concepts in the post-war period and more recently through the work of the Joint Industrial Mobilization Planning Committee. In the interests of mutual security and to assist both governments to discharge their obligations under the United Nations Charter and the North Atlantic Treaty, it is believed that this field of common action should be further extended. It is agreed, therefore, that our two governments shall

co-operate in all respects practicable, and to the extent of their respective executive powers, to the end that the economic efforts of the two countries be co-ordinated for the common defence and that the production and resources of both countries be used for the best combined results.

“The following principles are established for the purpose of facilitating these objectives:

“1. In order to achieve an optimum production of goods essential for the common defence, the two countries shall develop a co-ordinated program of requirements, production and procurement.

“2. To this end, the two countries shall, as it becomes necessary, institute co-ordinated controls over the distribution of scarce raw materials and supplies.

“3. Such United States and Canadian emergency controls shall be mutually consistent in their objectives, and shall be so designed and administered as to achieve comparable effects in each country. To the extent possible, there shall be consultation to this end prior to the institution of any system of controls in either country which affects the other.

“4. In order to facilitate essential production, the technical knowledge and productive skills involved in such production within both countries shall, where feasible, be freely exchanged.

“5. Barriers which impede the flow between Canada and the United States of goods essential for the common defence effort should be removed as far as possible.

“6. The two governments, through their appropriate agencies, will consult concerning any financial or foreign exchange problems which may arise as a result of the implementation of this agreement.”

Married women and unemployment benefit

Regulations of the Unemployment Insurance Commission designed to prevent a drain on the unemployment insurance fund through claims from women who, on marriage, are really withdrawing from the employment field, have been announced by Hon. Milton F. Gregg, Minister of Labour. The new regulations came into force on November 15.

The regulations were approved on recommendation of the Unemployment Insurance Advisory Committee, which is charged with responsibility for reviewing and reporting on the unemployment insurance fund. This committee is representative of workers and employers. The Committee reviewed the situation following representations that claims for benefit were being made by some married women who registered as unplaced job applicants but who were not in fact interested in employment. One of the basic requirements in making a claim is that the claimant shall be in the employment field.

The Minister made it clear that the new regulations do not put married women

outside the field of unemployment insurance, nor make any departure from the principles of the Act.

The regulations do not apply to a married woman—

- (1) who has lost her employment because of a lay-off due to shortage of work;
- (2) who has lost her employment within two weeks prior to her marriage or at any time following her marriage solely by reason of her employer's rule against retaining married women in his employ;
- (3) whose husband has died, or has become permanently and wholly incapacitated, or has deserted her, or has been permanently separated from her.

If any one of these conditions applies, she will be treated for unemployment insurance benefit purposes as a single woman.

A married woman who is not so exempted from the regulations is disqualified from receiving benefit during the two years following her marriage unless she re-qualifies by showing proof of further attachment to the employment market. She may do this by working for an aggregate of at least 90 days in employment under a contract of service (other than for immediate relatives) in either insurable or non-insurable employment. If she was not employed at the time of her marriage the 90 days may commence with any such employment that she obtains immediately following her marriage. If she was employed at the time of her marriage, the 90 days may commence immediately following her first separation from employment subsequent to her marriage.

For example, if a woman has been working in insurable employment up to her marriage and keeps on working for the same employer for six months following her marriage, and then resigns, she cannot qualify for benefit until she gets other employment for a further 90 days, or until two years have elapsed from the date of her marriage. However, if she resigns from her employment prior to her marriage, she may count the first 90 days of employment that she obtains after her marriage towards overcoming the disqualification. Should she then become unemployed, or should two years or more have elapsed from the date of her marriage, she will no longer be subject to any disqualification.

Changes in regulations concerning seasonal workers

Hon. Milton F. Gregg, Minister of Labour, recently announced certain changes in the regulations of the Unemployment Insurance Commission with regard to benefit claims from workers

in seasonal industries.

These changes, which became effective November 15, modify the regulations which have been in effect since 1946 governing the payment of unemployment insurance benefit during the off-season for workers employed in certain industries of a highly seasonal character.

The industries declared by the Commission to be seasonal for purposes of these regulations are lumbering and logging (except in British Columbia), inland water transportation, and stevedoring at inland ports and at Saint John, N.B., and Halifax.

The changes simplify the regulations and remove some anomalies. The general effect is to ease the restrictions upon seasonal workers who wish to qualify for benefit in the off-season when unable to get work, while preventing a drain on the unemployment insurance fund through unwarranted claims from those who do not normally seek work in the off-season.

The new regulations provide as follows:—

(1) An insured worker whose principal occupation is employment in a seasonal industry will be entitled to benefit in the off-season if during the off-season he registers for employment of a kind suitable in his circumstances and normally available at that period of the year. In other words he must establish his attachment to the labour market by applying for employment in an industry which at that time is not undergoing an off-season lull.

The amended regulations would disqualify a stevedore at an inland port, for example, who during the winter months when the port is frozen up holds himself out as available only for employment in stevedoring. However, he will not be disqualified if he registers for employment in a secondary occupation which can normally be carried on during the winter months and which he is capable of performing.

(2) A worker whose principal occupation is non-insurable may ask for exemption from payment of contributions while employed in a seasonal industry.

However, if he prefers to be insured he must, in order to qualify for benefit in the off-season (of the seasonal industry), show that he worked during the previous off-season for at least 30 per cent of the working days under a contract of service (other than for immediate relatives) in either insurable or non-insurable employment. He must also, of course, register for employment of a kind suitable in his circumstances and normally available at that period of the year.

For instance, a farm labourer whose custom it is to spend his winters in woodwork and not less than 30 per cent of the

summer working in insured employment, can draw benefit in the summer if he is seeking and cannot obtain this summer-time employment. If, however, during the previous summer he worked for farmers the whole time, he will not be eligible for benefit. On the other hand, because his principal occupation is non-insurable (farming), he need not pay unemployment insurance contributions while in woods-work.

In either case the claimant must fulfil the ordinary conditions for the receipt of benefit in addition to the above special conditions. For instance, he must have contributed for the necessary number of days and must be unemployed and available for work.

If unemployed during the active season a seasonal worker may qualify for benefit on the same terms as any other claimant. The seasonal regulations apply only to claims made during the off-season.

Controls on instalment plan buying

On October 30 the Minister of Finance, Hon. Douglas Abbott, announced the adoption of Consumer Credit Regulations. Designed to institute a moderate degree of restraint in consumer buying on the instalment plan, the regulations require a down payment of 20 per cent for most instalment plan purchases, and 33½ per cent for automobiles. Full payment is to be made in not more than 18 months. The regulations became effective on November 1.

Rehabilitation Conference to be held in Ottawa in February

The first national conference on problems of physically handicapped Canadians, which was postponed last May because of the Manitoba floods, will be held in Ottawa early in February, 1951, it was announced recently by Hon. Milton F. Gregg, Minister of Labour.

The Minister explained that the conference was under the joint sponsorship of the Departments of Labour, Health and Welfare and Veterans Affairs.

All ten provinces, national voluntary agencies, and individuals with special experience in this field have been invited to join federal authorities in studying some of the rehabilitation programs in Canada and abroad and to consider where such work may be extended in this country to provide more adequate protection for the disabled. The findings will be referred to the respective governmental and other interested agencies for their guidance.

In addition to some hundred federal and provincial officials whose work relates to aid to the handicapped, a large number of delegates are expected to represent national bodies, such as the National Institute for the Blind, the Canadian Welfare Council, the Canadian Legion and other groups with special interests in this field.

Prime Minister stresses industrial co-operation

Prime Minister St. Laurent urged greater unity between capital and labour as being vital to defence, in a speech delivered recently before the Canadian Industrial Preparedness Association.

"Everything those of you who are employers can do to give to labour a genuine sense of co-operative partnership in our national endeavour will not only increase our national capacity to provide security, but it will also contribute greatly to the capacity of your members individually and collectively to make your most effective contribution to the combined strength of the free world," the Prime Minister said.

"Most Canadians are ready to do their proper share of the co-ordinated effort that is essential to the well-being of the whole community. But all of us have to be given the opportunity of using brains as well as brawn, if we are to share in the most efficient manner in the accomplishment of our common national task."

Speaking of Canadian labour's drive to wipe out Communism from its ranks, Mr. St. Laurent said:—

"We should never forget that Communists have always directed their main appeal particularly to organized labour. We have all watched with the greatest satisfaction the effective way in which the responsible leaders of Canadian labour have fought this subversive menace to their organizations.

"They are fighting the battle for all of us, for our way of life, and they deserve our help."

Canadian Chamber of Commerce platform, 1950-51

An appeal to management to devote more effort towards winning the support of labour for the free enterprise system was voiced by Mr. J. H. Brace, chairman of the executive committee, in an opening address before the twenty-first Annual Meeting of the Canadian Chamber of Commerce, held at Banff, in September.

Management's responsibility today goes further than turning out good products at

fair prices, he said. "Throughout the process it must constantly present to the public, the owners and the employees a running story of what it is doing and why. It has to justify its stewardship because it can carry out the responsibilities which it has accepted only with the consent and co-operation of those concerned."

Management's first responsibility in the field of information is to its own employees, he continued. "You, as business leaders, have an unequalled opportunity of acquainting the individual citizen—the productive citizen who works with hands and brain—with the fundamental principles of our economic democracy." To do this successfully, Mr. Brace stated, business must have some appreciation of the workers' aims. "We need first of all a sound understanding of human relationships in industry, a personal appreciation of the worker as another person, with legitimate needs, desires and hopes."

Declarations of policy, adopted by the Canadian Chamber of Commerce included a restatement of the Chamber's views on employer-employee relations. "If Canada is to maintain a high standard of living for her citizens, harmonious industrial relations are essential," it was declared. "In their turn, harmonious relations depend upon a more general recognition of the mutuality of interest of management, labour and capital, and between these three and the community they serve."

The Chamber expressed the belief, also, that the maintenance and expansion of the high living standards enjoyed by Canadians are dependent on productive efficiency. "Greater productivity is the key to national and individual prosperity. This greater productivity can be obtained through the continued introduction of improved methods and the fuller realization of a fair day's work for a fair day's pay."

The Canadian Chamber reaffirmed its policy of "vigorous opposition" to Communism and again recorded its "unswerving support" of the system of free enterprise (L.G., 1949, pp. 1526-28). Other subjects on which the Chamber expressed its views were immigration, public finance and taxation, profits, international trade, and the desirability of holding statutory holidays on the nearest Monday.

The secret strike ballot was the subject of a resolution urging an amendment to the Industrial Relations and Disputes Investigation Act, "to prohibit all strikes until they have been authorized by a majority of all the workers affected by means of a government-supervised secret ballot, held after the expiration of a

'cooling-off' period." The form and wording of the ballot should be determined by an appropriate agency of the government, its terms made public, and the results of the election published, the resolution declared, and further expressed the view that "the vote should be held on a specific question and not take the form of a general authority."

A policy of decentralization of industry was endorsed and recommended both to Chamber of Commerce members and the Federal Government. In addition to its strategic importance from a defence angle, the principal advantages of such a policy, the resolution claimed, are "proximity to important new markets, increased efficiency, improved public and human relations."

Uniformity throughout Canada in the application of daylight saving time was advocated in a further resolution, coupled with a request that the Federal Government place this subject on the agenda for discussion at the first Federal-Provincial conference.

The declarations of policy and resolutions were presented to the Federal Cabinet by officers of the Canadian Chamber of Commerce on November 6.

Labour bodies fear too rigid constitution

In a recent letter to the Prime Minister of Canada, the presidents of the Canadian Congress of Labour and the Trades and Labour Congress of Canada expressed concern that individual provinces might be given an absolute veto power in amendments to the British North America Act.

The letter said that the labour organizations had been disturbed by reports emanating from the recent conference on constitutional amendments held in Quebec (L.G., Nov., 1950, p. 1781). It expressed fear that the "entrenchment" of certain clauses would mean "fastening a strait-jacket upon the social development of the country."

The text of the letter is as follows:—

"Dear Mr. Prime Minister:

"The Trades and Labour Congress of Canada and the Canadian Congress of Labour are vitally interested in the present discussions between the Dominion and the provinces on methods of amending the British North America Act. As you know, both Congresses have long favoured certain amendments, notably in regard to labour legislation and social security, which would enable our national Government and Parliament to deal effectively with national

problems, while preserving essential safeguards of provincial and minority rights. The Congresses have been disquieted by some reports of the proceedings in the constitutional conferences. There appears to be strong pressure from certain quarters to establish an unduly rigid amending procedure, one which would give a single province, even the smallest province, an absolute veto on any changes in matters of the highest importance to labour.

"The two Congresses, representing over three-quarters of a million Canadian workers and their families from coast to coast, respectfully urge that the constitutional conference should not finally decide on any method of amendment until organized labour, and other representative bodies of citizens, have had a chance to present their views, fully and in detail.

"It appears, from a table in the October 21 issue of the *Financial Post*, that there may be danger of a large number of sections of the British North America Act being 'entrenched', that is, made amendable only by unanimous consent of the provinces. This applies particularly to the sections dealing with the Senate, and to Section 92, dealing with the exclusive powers of provincial Legislatures. The Congresses are especially alarmed to note that Section 92, head 13 'property and civil rights in the province,' carries the note: 'All provinces except Saskatchewan and Alberta say this is 'entrenched.' Ottawa assents.' If this is correct, then there is the gravest danger that any one province will have an absolute veto on any amendments which would enlarge the national Parliament's power to deal with nation-wide social and economic questions. Against any such proposal, the Congresses must enter a most emphatic protest. It would mean fastening a strait-jacket upon the social development of the country.

"The Congresses also note that all provinces want to abolish the Lieutenant-Governor's power to reserve bills for the signification of the Governor General's pleasure and the Dominion's power to disallow provincial Acts, and that 'Ottawa expresses no view.' For reasons which are set out at length in the Canadian Congress of Labour's brief to the Senate Committee on Human Rights and Fundamental Freedoms, last spring, the Congresses are opposed to abolition of these powers, which have been, and can be, used to protect basic rights. The Congresses are convinced that without the power of disallowance, it would never have been possible to secure the repeal of most of the Prince Edward Island Trade Union Act of 1948, an Act which struck at the very foundation of

trade unionism, and might have created a disastrous precedent. If our Constitution contained a Bill of Rights, placing essential rights and freedoms beyond the power of either Parliament or the provincial Legislatures to abridge or abolish, then the powers of reservation and disallowance might perhaps, safely be given up. But in the absence of such safeguards, they should be firmly maintained.

"The Congresses had understood that the present discussions between the Dominion and the provinces were concerned solely with the method of amending the Constitution. It appears, however, that they have also dealt with at least one specific proposed amendment: the abolition of the powers of reservation and disallowance of provincial legislation. These are powers to which the Fathers of Confederation attached great importance. The Congresses agree with the Fathers' view, and urge most strongly that specific amendments ought not to be dealt with by conferences or committees set up, so the public was given to understand, solely for the purpose of devising a method of amendment.

"If specific amendments are to be dealt with, the principle the Congresses are contending for in regard to the method of amendment, namely, that no final decision should be made until organized labour has had a chance to express its view, applies even more strongly to such amendments. The Congresses themselves have amendments to propose, in support of which they are prepared to submit detailed arguments. They would also wish to submit detailed argument against various amendments which might be proposed by a province or provinces or others.

"Yours sincerely,

Percy R. Bengough,
President,
Trades and Labour Congress
of Canada.

"A. R. Mosher,
President,
Canadian Congress of Labour."

Fiftieth anniversary of credit unions in Canada

The consistent growth shown by credit unions in Canada since the establishment of the first union at Lévis, Que., in 1900 was maintained throughout 1949. Combined membership in that year reached a total of 940,427, and assets \$282,242,278; loans made to members amounted to \$99,537,166.

These totals represent increases over 1948 of almost 90,000 in membership, \$28.7 million in assets, and \$9.3 million in loans,

according to the annual report, *Credit Unions in Canada, 1949*, issued in October by the Economics Division of the Federal Department of Agriculture. The year 1950 marks the fiftieth anniversary of the establishment of the movement in Canada and preliminary reports indicate that membership will exceed one million. "Even now" (December, 1949), the report observes, "one in every fourteen Canadians is a credit union member."

Provincial inspectors reported 2,819 credit unions chartered during 1949. This is an increase of 211 over the previous year's total. The greatest number of new credit unions was reported from Ontario, where 75 new charters were issued. Most other provinces reported new charters numbering between 10 and 20. Cancellations were few, not exceeding 10 in any one province. Almost 100 credit unions were reported as being inactive through the year, although still holding charters.

Credit unions in Canada are shown to be mainly rural. Quebec had the greatest number of rural unions, followed by Saskatchewan, Nova Scotia and Alberta. Ontario accounted for the largest number of occupational or industrial credit unions, with British Columbia second and Alberta third.

Newfoundland is included for the first time in the report, and is shown to have 83 chartered unions, with 82 of them reporting a combined membership of 5,347. Assets were valued at \$378,497, and loans to members during the year totalled \$286,379.

The combined balance sheet shows that 63.5 per cent of the total assets is in mortgages and investments, while 22.1 per cent was outstanding in loans to members. Deposits made up by far the greatest item on the liabilities side, with over 73 per cent of total liabilities on deposit. Shares held by members made up over 20 per cent. It is noted, however, that both shares and deposits represent members' savings, and it is because of differences in policy between provinces that deposits are so much greater than shares. In Quebec the policy is to restrict the amount placed on shares, and to encourage deposit accounts which can be used and withdrawn by cheque, while in other provinces the reverse is the case.

Central credit unions numbered 20, distributed throughout the provinces. These unions act as depositories for local credit unions for surplus and reserve funds, from which loans may be made. At the end of the year, assets of the central credit unions totalled \$32,769,246, concentrated largely in the eight *caisses regionales* in the Province of Quebec.

Value of manufactures at new peak in 1949

Canada produced goods to an estimated record value of over \$12½ billion in 1949, according to the *Preliminary Statement of Manufactures in Canada, 1949*. The statement was prepared by the Dominion Bureau of Statistics.

The report, based on estimated gross factory value, shows a value increase of approximately \$500 million over 1948, the previous record year. Newfoundland is included in the report for the first time, and accounts for about 10 per cent of the increase.

Salaries and wages of over \$2½ billion were paid to 1,159,315 employees. The number of employees showed a slight increase over 1948, and salaries and wages were up \$157 million over the previous year.

The food and beverages group led the 17 industrial groups with a gross value of products of over \$2¾ billion. Iron and steel products ranked second with a value of about \$1½ billion, and paper products third with a value of just over \$1 billion.

In addition to general statistics for the 17 major groups, the report contains for the first time preliminary information on gross value of products, cost of materials, employees' salaries and wages, and the production of 1,000 important commodities or commodity groups.

Canadian Congress of Labour Tenth Anniversary Book

As part of its Tenth Anniversary celebrations, the Canadian Congress of Labour issued a commemorative book as the official souvenir of its Winnipeg convention.

The book contains messages from the Hon. Milton F. Gregg, federal Minister of Labour, Provincial Departments of Labour, affiliated unions and industry.

Feature articles appearing in the book include: *Facing Our Responsibilities*, by Pat Conroy, an article on domestic and world conditions; *UAW-CIO in Canada (1940-1950)*, by Jerry Hartford, Publicity Director for UAW District No. 7; *The Manitoba Department of Labour*, by W. Elliott Wilson, Deputy Minister of Labour; *The United Packinghouse Workers of America*, by John Lenglet, Research Director; *Textile Workers Make Notable Progress*, by Samuel Baron, Canadian Director of TWUA; and *Canada's Largest Transport Union*, by J. E. McGuire, National Secretary of the CBRE.

In addition to the feature articles, there are shorter stories on the co-operative

movement, use of the union label, and a brief chronology of highlights in CCL history from 1940 to 1950.

Weekly salaries and wages in Newfoundland

Average weekly salaries and wages in the major non-agricultural industries of Newfoundland in June ranged from a low of \$20.60 in the services industries to a high of \$47.91 in mining, according to first figures on employment and earnings in Newfoundland released by the Dominion Bureau of Statistics.

In manufacturing as a whole, average weekly salaries and wages for the week of June 1 stood at \$42.98, transportation and communications \$42.66, forestry \$40.57, construction \$36.14, finance \$32.90, public utilities \$31.11, and trade \$29.53.

Largely due to seasonal changes in the levels of employment during the period between December 1 and June 1 in several industries, there was considerable variation in average weekly salaries and wages. In manufacturing the figure was highest at \$44.59 at April 1, while in forestry a peak of \$47.64 was reached at January 1, in construction at \$38.68 on April 1, public utilities \$31.91 at March 1, and trade \$32.24 at March 1.

Average hours worked by wage-earners during the week ending June 1 in leading establishments in the mining industries amounted to 46.9, in manufacturing 44.6, and construction 43.9 hours. Average hourly earnings were 91.6 cents, 98.6 cents and 81.3 cents, respectively.

Provincial Labour Standards, 1950

The 1950 revision of the bulletin, *Provincial Labour Standards*, which has been issued annually since 1944, is now available. Copies may be obtained from the Legislation Branch, Department of Labour, Ottawa.

This bulletin sets out the standards which are in effect in the provinces of Canada with respect to child labour, holidays, hours of work, minimum wages, weekly rest-day and workmen's compensation.

During the year, a stamp system of holiday-with-pay credits was put into effect by the Quebec Minimum Wage Commission for the Montreal and Hull districts.

From September 1, most women workers in New Brunswick must be paid a higher minimum rate, as the result of a revision of the general minimum wage order for women.

A new weekly rest statute in Saskatchewan replacing a 1930 Act, made provision for a 24-hour rest for workers in all centres of the Province with 300 or more population. Several new classes of workers in British Columbia were granted a weekly rest of 32 hours.

Several provinces made changes in their Workmen's Compensation Acts. In Saskatchewan, benefits payable in case of the death of a workman were increased with respect to the payments allowed for each child under 16 and with respect to the expenses which will be paid to cover the cost of burial.

A higher minimum payment in case a workman is disabled was provided for in Nova Scotia, Prince Edward Island and Saskatchewan. Newfoundland enacted a Workmen's Compensation Act of the collective liability type which, however, has not yet been proclaimed in force.

Quebec industrial association holds convention

Meeting in Montreal on October 30 and 31 for its sixth Convention, the Professional Association of Industrialists, an employers' organization of the Province of Quebec, expressed its opposition to government seizure of strike-bound plants.

The Association said it opposed such action, even on a temporary basis, except in cases of national or public emergency, "as such a violation of the right of ownership leads directly to socialism."

The Association reiterated its complete adherence to the social doctrine of the Roman Catholic Church, and its wish that this doctrine may form the subject of more and more study on the part of employers and employers' associations, as well as workers with their syndicates or unions, and that they may apply it more and more effectively.

Addressing the delegates, Mr. Paul Emile Côté, Parliamentary Assistant to the Minister of Labour, said that international peace is possible only if every nation has peace within itself. Pointing out that any solution found for individual problems contributes in a large measure to the establishment of world peace, he urged closer co-operation between employers and their employees.

The United Nations exists, according to Mr. Côté, for the precise purpose of coordinating peace efforts, and it can do more effective work towards the obtaining of world peace than any other organization.

Mr. Côté stressed the fact that "the aim of the United Nations is twofold: in the first place, to oppose all armed aggression

and thus prevent a third war, and, in the second place, to restore the economy of the nations and, by providing for the happiness of their people, to avert another war."

The Member from Verdun then pointed out that, if our country has made such remarkable progress since the war, this progress is partly due to the Labour-Management Production Committees, made up of employers and workers. There are 700 of these committees, and only six of them have had differences on important matters. Besides, these production committees constitute a means of liaison on the strictly human plane, and that, according to Mr. Côté, is perhaps their greatest merit. A greater degree of humanity in industry is, no doubt, the solution to many problems.

The theme of the Convention was "Economic and Social Security." In a resolution on this subject the Association urged employers to continue and to increase their efforts in order to assure their workers of such security. It expressed the opinion that workers must contribute their fair share in any social insurance scheme set up on their behalf. It urged the State to limit its intervention in the establishment and administration of any social insurance scheme to supporting and assisting the action taken by employers and workers.

Another resolution reaffirmed the necessity of safeguarding fully employers' freedom of decision with regard to economic questions and all matters relating to the proper functioning of the concern, and of safeguarding, at the same time, the right of the workers to work and to freedom of association.

The Association emphatically repeated its request that all strikes be declared illegal unless they have been voted for by secret ballot by a majority of the workers concerned.

It asked that effective sanctions be imposed on those really responsible for the breaking of laws in the case of a strike or lockout.

Profit-sharing body holds conference in Toronto

United States testified to this at a regional conference of the Council of Profit-Sharing Industries held in Toronto in late September.

Profit-sharing gives workers a sense of participation in free enterprise, brings higher wages and profits and reduces labour-management strife. Leading industrialists in Canada and the

(For additional information on the Council in the United States, see the *LABOUR GAZETTE* for Feb., 1950, 168-9.)

Close to 600 business men attended the conference which was the first held in Canada by the Council, it was reported in the *Financial Post* of October 7.

Employees of the 250 American and 15 to 20 Canadian firms represented at the conference have a share in their companies' profits in one way or another in addition to their usual wages and benefits, the *Post* article stated. The Council members claimed besides that they have better relationships with their employees than any other single group on the continent.

"Does profit-sharing work?" was one question asked at the conference. In his reply, one executive told of the union grievance committee in his firm making every effort to cut down over-time work because the extra pay reduced profits to be shared among the workers.

Another member disclosed that his employees get 40 per cent of earnings before taxes; half of it is in cash and the other half goes into a trust fund. Relations have been harmonious and the business has prospered.

As for the human relationship between management and workers, James Lincoln, president of the Lincoln Electric of Cleveland had this to say: "The biggest trouble with present industrial relations is that there's no opportunity for the average employee to fully develop any latent ability he might have. . . . Profit-sharing—I prefer to call it the incentive system—bridges the gap. If workers have any latent ability, they get an opportunity to display it and more important, get rewarded for it.

"You eliminate the dividing line. Workers feel they belong; that they are not just another cog in an impersonal machine. They get a sense of participation. The result is happier workers, no more industrial warfare; higher wages, and in our case, higher returns for management; lower prices for our customers. And most important, you can begin to educate employees as to just what makes free enterprise tick. . . .

"We put in our plan 16 years ago. Today we're getting four times as much production per man. The average employee has received \$40,000 in bonuses in that period. That's over and above his basic wages which are on a par if not better than for industry generally."

"What happens when there are no profits to share?" was another question. One general manager told the conference that when the 1949 coal strike hit his steel firm hard, the employees' general attitude

to the problem of no profits was: "Forget 1949, let's make it up in '50." And they did just that, the executive reported.

"What is the attitude of union leaders?" According to one company president, the union was suspicious of the profit-sharing scheme when it was first put in. However today the union is co-operating 100 per cent. A cautious note was sounded by William Loeb, Council president, when he emphasized that union co-operation will more likely be forthcoming on the local level since the policy of big unions on the national level generally is to be suspicious of profit-sharing.

Why have some schemes failed? Cass Hough, executive vice-president of the Daisy Manufacturing Co. in Plymouth, Michigan, suggested that this might be because management attempted to substitute profit-sharing for real basic wages.

Walter Wheeler, president of the Pitney-Bowers, Inc., at Stamford, Connecticut, stated: "Obviously, management can't go into it (profit-sharing) with a selfish materialistic approach—how much more will it make for us. There has to be a spirit of wanting to do what's right."

Executive meeting of ICFTU in Brussels

Both the Canadian Congress of Labour and the Trades and Labour Congress of Canada sent representatives to the Executive meeting of the International Confederation of Free Trade Unions, held in Brussels, Belgium, early in November.

The CCL was represented by Vice-President C. H. Millard, who is also Canadian Director of the United Steelworkers of America. President Percy R. Bengough represented the TLC.

Among the matters on the agenda of the meeting were: the date, place and agenda of the 1951 Congress of the ICFTU; the proposed Inter-American Regional Conference to be held in Mexico City in January, 1951; and aid to trade unionism in underdeveloped countries.

Mr. Bengough remained in Brussels at the conclusion of the ICFTU meeting to attend the 113th Session of the Governing Body of the International Labour Office.

Hiring and separation rates in certain industries

A report entitled *Hiring and Separation Rates in Certain Industries* has been issued by the Dominion Bureau of Statistics. Covering the period from September, 1947, to August, 1949, the report is based on data collected by the Unemployment Insurance Commis-

sion from establishments employing 10 or more persons and having one or more employees insured under the Unemployment Insurance Act. It shows the number of hirings and separations per 100 persons on the payrolls of all industries thus covered and of 40 selected industries for all Canada. Similar figures are shown separately for the Maritime Provinces, Quebec, Ontario, the Prairie Provinces, and British Columbia (including the Yukon), the selected industries varying to fit the leading industrial activities of each region.

For all Canada, the report shows generally higher rates of hirings than of separations during the spring and summer months; an approach towards equality from September to November, with hiring rates down only slightly from those of summer but separation rates higher; and generally higher rates of separation than of hiring from December to March.

Overall hirings were smaller in proportion to the average number on payrolls during the four months May to August last year than in 1948. They stood at nine per cent in May, eight per cent in June and August and seven in July as compared to 10 per cent in May and June and nine per cent in July and August, 1948. Separations were also lower last year at six per cent in May and seven per cent in June, July and August compared to seven per cent in May and June and eight per cent in July and August the previous year.

During the 24 months the highest proportion of hirings was 10 per cent and the lowest five, while the highest rate of separations was nine per cent and the lowest six per cent.

Activities of Ontario Labour Relations Board

A cumulative report of the Ontario Labour Relations Board shows that 827 applications were filed from December 9, 1948, the Board's date of inception, to August 31, 1950.

Of these applications, 795 were for certification, and in 521 cases certification was granted. The Board dismissed 121 applications and 44 were withdrawn.

Of 25 applications for revocation of certification, 2 were withdrawn, 15 dismissed and 3 granted. The Board dismissed 2 complaints referred it by the Minister of Labour.

Applications for final settlement procedure constituted 3 of the cases; of these 2 were dismissed and 1 granted.

The 2 remaining cases were requests for cancellation of collective agreements.

School for workers opened in Montreal

Under the auspices of the Thomas More Institute, a School for Workers was opened at the D'Arcy McGee High School in Montreal on October 2, according to newspaper reports. Union representatives of every affiliation are said to have co-operated in the work of preparing the program of studies.

The following comprise the first term courses: Human Rights and Labour Unions; The Rise of Labour Movements; Talking at Meetings; and Labour and Management. The latter course consists of a series of lectures by various union leaders, designed to explain the dealings of unions with management and also elementary and more advanced procedures involved in the defence of workers' rights under the laws of the province. Two of the speakers will be Pat Conroy of the Canadian Congress of Labour and Max Swerdlow of the Trades and Labour Congress.

British Ministry of Labour report, 1949

Recent activities of the Ministry of Labour and National Service are described in the Ministry's annual report for the year 1949, published by H.M.'s Stationery Office in September. The five sections making up the report deal with manpower, services of the Ministry, industrial relations, international labour relations, and organization of the Ministry.

Manpower and industrial relations "in the widest sense" were the main concern of the Ministry during the year, the report states.

A chapter is devoted to surveys of the labour position, and the action taken by the Ministry to build up the labour force in the essential industries and services.

Although by 1949 distribution of manpower was already adjusted broadly to peacetime pattern needs, it was still found necessary, it is pointed out, to canalize the flow of labour in order to get the level of manpower required in the more important industries and services, and the individual firms producing goods for dollar export. There was a slight increase in the civilian labour force, due in part to a small rise in the working population and to a further reduction of the armed forces, but no substantial numbers of additional workers were available, and there was a "constant demand for labour" in some important industries.

Employment offices during the year filled about four million vacancies for

persons over 18 years of age, 488,000 of which were "first preference" jobs. Under the Youth Employment Service 234,000 boys and girls were placed in their first jobs since leaving school.

There was a decline in the labour force in coal mining, but in the textile industries the labour force rose by 43,000, as against the *Economic Survey* forecast of 24,000.

Unemployment continued at much the same level as in 1948, varying according to seasonal trends from 375,700 in January, to 243,000 in July and 330,300 in December. Nearly £19 million was paid out in unemployment benefit, and more than £4 million in supplementary National Assistance grants.

The Ministry's efforts to foster joint consultation between management and workpeople met with encouraging response, it is reported. At the end of the year about 80 per cent of the 20½ million employees in Great Britain's industries and services were covered either by voluntary negotiating machinery or by statutory machinery. The report outlines the developments in conciliation and arbitration.

Particularly noticeable throughout the year, it is noted, was the number of claims for increased wage rates that were settled through conciliation or arbitration machinery, many of which covered entire industries. The number of cases referred to the National Arbitration Tribunal was the highest in any year since the war.

U.K. labour invited to study management problems

The British Trades Union Congress has given its support to participation by affiliated unions in local management associations, as a means of enabling trade union officials to "join with lively-minded managers in getting a mastery of today's problems and techniques of management," according to a recent issue of the TUC magazine, *Labour*, which describes the functioning of these associations under the sponsorship of the British Institute of Management.

The Institute itself was established, with a Government grant of £150,000, on the advice of a committee set up by Sir Stafford Cripps, while he was President of the Board of Trade in 1945. Since 1947—its first year of operation—the Institute has been an independent, non-political and non-profit making organization, having as its main object the raising of the general level of management efficiency.

Firms and boards of nationalized industries are among the corporate bodies

eligible for membership. Trade unions are also welcome to join; and the article states that in addition to the TUC itself, 21 unions with a membership aggregating 3½ millions have now enrolled.

The use of the Institute's lending and reference libraries, assistance from its information service and places at its lectures and conferences are available to members.

The Institute acts as a clearing house for information on managerial practice and experience which it endeavours to present to management in simple, practical and authoritative form.

Under a national scheme which the Instituté is operating in connection with the Ministry of Education, some 60 colleges are providing approved courses in management studies. In addition, large-scale conferences on such subjects as standardization in industries, which have attracted 500 or more management personnel and some trade unionists, are now a popular feature of the services afforded by the Institute.

British unionists report on American productivity

"Unions should seek to co-operate in the application of 'scientific management' which, even if not an exact science, can make a valuable contribution to increasing productivity in industry." This was one of the recommendations made by a team of British trade union officials who visited the United States to investigate the role of unions in increasing productivity in that country. The detailed report, *Trade Unions and Productivity*, was published on their behalf by the British Trades Union Congress.

While British trade unions can learn much from the experience of American trade unions, the latter can equally benefit by studying British methods and attitudes, the team stated, although differences in the industrial and economic environments of the two movements limit the effectiveness of the interchange of experiences.

In this connection, the United States has not experienced a post-war economic situation calling for a policy of wage restraint on the part of trade unions. Moreover, because of the size of the home market and the comparatively small percentage of American industrial capacity employed on export production, there is not the urgent need as in Britain to keep prices down—provided wages are not left behind. Britain must keep prices down in order to maintain a high standard of living and to compete effectively with other countries, the report maintained.

The United States, in addition, enjoys certain advantages not familiar to British

industry. The scattered and small-scale nature of Britain's foreign markets often prevents integration with home production and does not permit the long production runs common to American industry.

Some of the other recommendations in the report were as follows:—

Industrial Efficiency

(1) Larger unions and federations should establish production engineering departments and train production engineers for their national or district offices to protect and further the widest interests of their members.

(2) The Trades Union Congress should have a competent technical staff to give help and guidance in the establishing of union production departments and to provide direct services to unions too small to engage their own staffs.

(3) Consideration should be given to the employing of small full-time staffs, including technicians or production engineers, in some of the TUC Regional Advisory Committees to render services to unions in the regions and to give direct help to shop stewards and the trade union sides of joint production committees and works councils.

(4) Quarterly or half-yearly meetings of the technical staffs of the TUC, the unions and regional committees would facilitate an exchange of information. It might be considered desirable also to seek regular meetings with government statisticians and other authorities to discuss current statistics.

Education and Training

(5) In staffing trade union production departments it should not be enough to change the title of an organizer to that of production engineer. It is essential for him to acquire a first-class training and to be equally as competent as the industrial consultants employed by management.

(6) Technical staffs should train and instruct workshop representatives in the techniques of production and joint consultation—to deal effectively with day to day problems in the place of work and to make practical contributions to works councils and joint production committees.

(7) Unions should extend their educational facilities to provide weekend and summer school courses in the economics of trade unionism in full employment and the implications of an increasing standard of living.

Technical Advance

(8) In initiating or participating in the introduction of incentive schemes, unions should, where practicable, seek to increase production efficiency through a greater use of mechanical aids and the application of time and motion study in order to maximise earning opportunities.

(9) As trade unionists want the standard of living to rise continually they cannot justify opposition to the installation of new or modernized machinery or the use of re-deployment techniques.

Profits and Prices

(10) Unions should collect information on profit margins, costs of production, sales turnover and other aspects of company finances with a view to taking action against unnecessarily high consumer prices.

(11) Where management refuses to reduce high consumer prices, unions should prepare authoritative cases for presentation to such bodies as the Central Price Regulation Committee and the Monopolies and Restrictive Practices Commission.

Exchange of Information

(12) In establishing production departments British unions should arrange to send teams to the United States to observe trade union attitudes and methods.

(13) American trade union teams and individual officers should be invited to Britain to study British trade union administration and methods of operating, particularly in joint consultation, working class education and politics.

(14) Eminent trade union production engineers might also be invited to Britain to give talks on their unions' production engineering activities, thereby reaching a wider audience than could possibly visit the United States.

Safety in the use of power presses

The first Report of the Joint Standing Committee on Safety in the use of Power Presses, recently issued by the United Kingdom Factory Department, indicates the progress which has been made in improvements in design and performance of interlock guards since the publication in 1945 of the Report of the main Committee appointed to consider the subject. It was on the recommendation of this Committee that the Joint Standing Committee was set up to continue the study, particularly with regard to new developments.

The Joint Standing Committee reports that it has given consideration to:—

- (a) Progress in the voluntary implementation of the recommendation in the Main Report that new presses should be supplied with safety devices at the time of sale.
- (b) Examination of existing designs of interlock guards with a view to improving performance and reliability.
- (c) Examination of new designs of safety devices incorporated in presses.
- (d) The use of fluid (e.g. compressed air) assistance in the operation of presses and guards.

With regard to the first subject dealt with by the Committee, the Report states that presses can now in general be purchased complete with interlocking guards. This progress has been achieved because makers have produced machines in which interlocking guards of the makers' own design have been incorporated and also because press makers have collaborated with guard makers in the modification of existing press designs so as to provide a more effective application of the guard

makers' products. The Joint Committee is convinced, however, that the application of interlocking guards will be made completely satisfactory only when clutch design is considered in relation to the guarding problem. Press makers are advised to give this matter their early attention.

The Report recommends the improvement and simplification in certain respects in the design of interlocking guards. It is pointed out that the principle of "failure to safety" was not attained in many earlier designs but steps have been taken by the factory inspectors to advise makers of this point so that modifications could be made. Consequently, guard makers have modified designs to ensure that in the event of failure of the guard mechanism, it is not possible to operate the press. It is also suggested that designers should give special attention to the amount of wear and tear of many guards and a table analyzing the causes of accidents occurring with interlocking guards during 1947 is given in Appendix I to the Report.

The Committee is of the opinion that the principles of the specifications for interlocking guards do not in general require modification but that there are certain details which should receive attention in design. These details are set out with diagrams in Appendix II.

In connection with developments for the reduction of fatigue and improvement in production, the Committee notes an increasing tendency for the application of pneumatic devices for press and guard operation. Examples of various types of interlock guards incorporating pneumatic devices which were examined by the Committee's technical subcommittee are described. A press arranged for pneumatic operation is illustrated in Appendix III.

The Report deals also with the use of "arrestor" devices, interlocking guards for presses driven through friction clutches, and automatic mechanical guards on "sub-heavy" presses, i.e., those presses in the range intermediate between the key-clutch operated presses and the heavy presses used for motor car panels and similar work.

British pamphlets on industrial safety

The Factory Department of the United Kingdom Ministry of Labour and National Service has recently issued revisions of three safety pamphlets—Memorandum on Electric Arc Welding; Safety of Machine Tools and other Plant: No. 1, Fencing of Drilling Machine Spindles, Chucks and Tools; and the Use of Chains and Other Lifting Gear (Safety Pamphlet No. 3).

Memorandum on Electric Arc Welding has been reprinted with few changes (L.G., 1946, p. 550). The section relating to the precautions which should be taken to protect the eyes from ultra violet and infra red rays has been revised to bring it into line with the latest standard of the British Standards Institution on the subject (No. 679, 1947—Protective Filters for Welding and other Industrial Operations).

Both the Protection of Eyes Regulations, 1938, and the Building (Safety, Health and Welfare) Regulations, 1948, require the provision of suitable goggles or effective screens to protect the eyes of persons employed in the process of electric welding from particles or fragments thrown off.

An addition to the section dealing with the ignition of inflammable material consists of excerpts from the 1950 Report of the Working Party on Fire Prevention and Fire-Fighting in Ships in Port. Some of the preventive measures recommended in the Report which are set out in this section of the revised pamphlet are the employment of watchers with the necessary fire-fighting equipment on the opposite side of the plating where the welding is in progress; keeping fire patrols informed where welding has been in progress; frequent inspection of ship for two hours after welding stopped; removal of combustible material from opposite sides of deck where work is being carried on; closing or screening of port holes and openings through which sparks may fall; instructions to workers; and the responsibility of the senior official in charge of such work for the observance of these precautions.

By permission of the Controller of H.M. Stationery Office in the United Kingdom, the 1945 edition of this pamphlet was reprinted in 1946 by the Department of Labour of Canada and copies are still available.

The 1950 edition of *Safety of Machine Tools and Other Plant: No. 1, Drilling Machines*, like the earlier one, consists mainly of diagrams which stress the need for the protection of the lower parts of the spindles, chucks and tools. It is pointed out in the introduction to the pamphlet that while it has been the practice for many years to fence securely the upper parts of spindles, numerous accidents have been caused by insufficient protection of the lower parts.

Among the diagrams which have been added to the new edition are those showing proper guards for radial drilling machines and for tapping operations.

The revised edition emphasizes that the wearing of caps by women operators cannot be regarded as substitutes for secure fencing.

The seventh edition (1949) of *The Use of Chains and Other Lifting Gear* contains concise, illustrated information as to good practices with regard to quality, proportions, safe working loads and treatment of chains and other lifting gear.

Some new types of chains are dealt with in this edition and additional tables on the safe working load of lifting gear are included. A section designed to assist chain examiners describes the principal causes of failure in chains and lifting appliances and a summary of recommended precautions, particularly applicable to chains and slings, is set out.

The Appendices to the pamphlet include the statutory requirements relating to lifting gear contained in the Factories Act, 1937, the Building (Safety, Health and Welfare) Regulations, 1948, and other regulations, together with a list of the latest standards approved by the British Standards Institution for chains, rings, hooks, shackles and eyebolts.

TUC aid for Common- wealth and colonial unions

Britain's 8,000,000 organized trade unionists are to spend nearly £37,000 on practical help to the trade unions of the colonies, whose membership is now over 500,000, and also on helping the unions in India and Pakistan, according to the United Kingdom Information Office.

In order to finance this new program, the General Council of the Trades Union Congress is asking for an increase in the subscription paid to the TUC by each affiliated union. It is estimated that the increase will bring in an extra £30,000 to the TUC's annual income.

Twenty-three overseas trade union centres will share this help. It will be spent on providing them with concrete assets—type-writers and office equipment, books and lecture courses, and with personal advice from experienced British trade unionists. This last item will prove the most costly, both in money and men, as the TUC plans to send about 30 experienced trade unionists to the colonies and to India for limited periods, to advise and help the new trade unions.

This TUC program is intended to supplement the work which the International Confederation of Free Trade Unions is planning, on a wider scale, for all the underdeveloped areas of the world.

Growing demand for labour in U.S.A.

Commenting on the effects on the United States economy of the defence program, the U.S. *Monthly Labour Review* states in its October issue:—

“One of the most serious impacts of the expanding defence program on an economy already utilizing most of its manpower is a growing demand for labour and the possibility of shortages in certain areas or occupations. In that respect, the current situation, with less than 2½ million unemployed, may present greater problems than the beginning of the defence program before World War II, when there was a pool of 8 million jobless. . . .

“Total employment in early September was 61·3 million, the highest on record for that season of the year, according to the Census Bureau’s report. This was about a million less than were employed in August, due almost entirely to the withdrawal from the labour force of students returning to school.”

Increased factory hiring in U.S. industry

The Bureau of Labour Statistics of the United States Department of Labour announced that the factory hiring rate had increased to 66 per 1,000 workers on payrolls during August. This compared to a July rate of 47 per 1,000, and was the highest since October, 1946.

Statistics on factory hiring rates indicate the extent to which workers are hired in a particular month. Such hiring results from the need to replace workers who have left their jobs for various reasons, and to fill labour requirements because of increased production.

The Bureau attributes the sharp increase to “strong civilian demand and the beginning of defence mobilization. . . .”

The report said that the increase in the rate of hiring was “recorded in virtually all industry groups.” The rising tempo of the preparedness campaign also increased the rate at which workers were leaving their jobs for service in the military forces, and for employment in defence plants and industries. The Bureau reported the August quit rate in all industries as 30 per 1,000. This compared to a rate of 18 per 1,000 in July. The quit rate covers all voluntary separations.

The report further noted that “job opportunities became more abundant (as) students and teachers left vacation jobs to return to school. All industry groups except tobacco manufacturers reported higher quit rates in August. Military and miscellaneous separations increased for the

second consecutive month to 3 per 1,000, the highest rate since VJ-day. Factory lay-offs continued at a low rate, changing slightly from 6 per 1,000 in July to 7 per 1,000 in August.”

The greatest rate of increase in hiring was in the durable goods industries where the August hiring rate was 72 per 1,000. Among industries in this group showing increased hirings were ordnance, fabricated metal products, electrical machinery, transportation equipment, aircraft and ship-yards.

In the non-durable goods industries, increased hiring was noted in the food, apparel and textile industries, and in the rubber products, tobacco, and paper and allied products industries.

In September the hiring rate declined somewhat, following the record expansion of August. From 66 per 1,000, the rate dropped to 58 per 1,000, but was still higher than in any other month since September, 1947.

Trend to voluntary wage increases in U.S.A.

During the first nine months of 1950, more than a million organized workers in the United States received wage increases, according to the Bureau of Labour Statistics.

The report noted an increasing trend by employers during 1950 to grant voluntary wage increases and to promise additional increases later in the year or in following years.

During September, guarantees of additional increases in 1951 or later were written into 135 settlements affecting some 220,000 workers. In 45 of these settlements, provision was also made for periodic cost-of-living adjustments. An estimated 100,000 workers were affected by these agreements. Promises of a later wage increase and a cost-of-living adjustment have been written into 85 contracts.

Escalator clauses, providing for later automatic adjustments based on the Bureau of Labour Statistics price index, were inserted in 34 additional agreements involving 105,000 workers. There was no promise of separate annual increases in these contracts, the Bureau said.

The report estimated that there were at least a thousand separate wage actions which provided wage increases for over 1½ million employees. The Bureau said that 77 per cent of these workers were employed in manufacturing; 16 per cent in non-manufacturing establishments; and 7 per cent in Federal, state, county and municipal governments. In numbers of

workers involved those employed in metal working were first, followed by the textile group.

About 250,000 clerical and salaried employees (not covered by the terms of union agreements), and production employees in non-union establishments also received increases, the report stated.

Survey of non-wage labour costs in United States The Economic Research Department of the United States Chamber of Commerce recently released a study on non-wage labour costs to industry.

The report is the result of a survey of 690 individual American firms, employing more than four million workers.

The Chamber of Commerce gives three reasons for making its study:—

- “(1) Because of the addition of non-wage costs, the hourly wage rate has ceased to be an accurate reflection of the labour costs of operating a business, or of the income and benefits received by workers.
- “(2) Most of these non-wage benefits are relatively recent innovations. They are growing in importance as both

workers and management place ever greater emphasis on fringe and other non-wage payments. The spread between wage costs and total labour costs will, therefore, widen in the future.

“(3) There is little statistical information available on the size of non-wage benefits. In particular, they are not included in the wage data reported by government bureaus. As a result, government data give an inadequate measure of the labour costs of business.”

Non-wage labour costs as defined in the survey include the employers' share of social security taxes, unemployment compensation, workmen's compensation, railroad retirement pensions, paid rest periods, payments for time not worked, paid holidays and vacations, profit-sharing payments, Christmas or special bonuses and special payments ordered by courts, and payments to union stewards.

According to the report, non-wage payments by industry in 1949 amounted to 16.0 per cent of payrolls as compared to 14.4 per cent in 1947. They averaged 23.7 cents per hour worked, or \$477 per year per employee.

Non-wage Payments, 1949

	As per cent of payroll	Cents per hour worked	Dollars per year per employee
25% of firms paid more than.....	20.0%	28.8¢	\$583
50% of firms paid more than.....	14.9	21.5	442
75% of firms paid more than.....	11.0	15.0	312
Mean or average payment.....	16.0%	23.7¢	\$477

The survey shows that non-wage payments are “of considerably more importance to some firms than to others.” However, such payments “amount to a significant cost to business and to an important benefit to workers,” the report said.

Movement towards equal pay for equal work in U.S.

Recent publications of the Women's Division of the U.S. Department of Labour describe the progress that has been made in the United States towards the acceptance of the principle

of equal pay for equal work. They also outline state equal-pay legislation now in effect and the proposed federal equal-pay law.

A leaflet entitled *Equal Pay for Women Means a Rate Based on the Job—Not on the Sex of the Worker* emphasizes the importance of equal pay to persons in every walk of life. To working women, equal pay is a matter of “simple justice”,

which insures women receiving what they are entitled to for the work they do. To working men, “equal pay affords greater wage and job security. It discourages employers from hiring women for less money, or, as sometimes happens, from replacing men with women at lower rates.” To industry, “equal pay protects fair employers from the unfair competition of those who attempt to use women as undercutters of men's wages.” To housewives, “equal pay means more economic security . . . for it protects the wages of male heads of families.”

Included in the pamphlet are suggestions on what to work for in equal pay bills and what to avoid. As a guide to state legislators and the public, the pamphlet carries a summary of the Bureau's draft, “State Equal Pay Bill.” Briefly the draft prohibits wage discrimination against women on the basis of sex; defines such basic terms as employer, employee and occupations; establishes enforcement powers

of State commissioners of labour; provides for the collection of unpaid wages; provides for the maintenance of records and for reporting by employers; establishes penalties for violations; and preserves the remainder of the law if one section is held invalid.

Reviewing the equal pay movement, a second publication, *Movement for Equal Pay Legislation in the United States*, states that this trend is not a "temporary war-inspired expedient but a sound wage-policy, established in some measure for many years, and with a growing body of support behind it."

During World War I, public attention was concentrated on equal pay for women when the War Labour Board enforced the policy of "no wage discrimination against women on the grounds of sex." With World War II, even greater strides were made in the direction of this principle. Confronted by the influx of women into jobs normally open to men, many war industries introduced equal pay. The impetus given this principle during the war has added support to present progress.

Turning to public service, the booklet notes that the Federal Government has recognized the principle of "rate for job" regardless of sex. Under the Classification Acts of 1923 and 1949, a uniform salary is established for each specified grade and class of work, thereby eliminating variation because of sex. Approximately half of the States have Civil Service Systems which include all branches of the State Government, and the practice of equal pay for State employees is generally observed.

About one-fourth of the States have passed equal pay laws specifically on behalf of teachers. Federal equal pay bills in connection with workers in private industry in inter-state commerce have been introduced in the 79th, 80th and 81st Congresses with Department of Labour support.

The importance of women in industry is demonstrated by the constantly increasing proportions of married women and of older women who have employment or are seeking it, the review points out. Of the 17 million women in the labour force in April, 1949, 50.9 per cent were married, 33.1 per cent single, and 16 per cent widowed or divorced. In February, 1950, 43.4 per cent of these women were 35 years or over, whereas before the war only 40 per cent of women in the labour force were in that age category.

The question of Equal Remuneration for Men and Women Workers for Work of Equal Value was on the agenda of the 1950 International Labour Conference

(L.G., Aug., 1950, p. 1155) and will again be considered at next year's Conference.

Foreman's duty to plant held paramount to own interest

A trial examiner for the U.S. National War Labour Board recently ruled that a foreman's responsibility to his employer may at times "be paramount to his own interest."

The case involved fifty supervisors and guards of a coke plant who had joined in a strike of rank-and-file employees, members of the United Steelworkers of America. The employer discharged them for this action. The foremen and guards thereupon filed charges that they had been dismissed illegally, declaring that they concerted had ceased work for their own mutual aid and protection as well as for the mutual aid and protection of the rank-and-file employees.

The examiner, however, declined to recommend their reinstatement. He found that the strike occasioned a "hazard with possible ensuing damage of a serious and extensive nature to the company's physical plant," and that the company had therefore the right to "rely upon the supervisory personnel to take the place, so far as possible, of the striking rank-and-file employees." He ruled that in this case the responsibility of the foremen and guards to their employer superseded their own interests.

The case was heard under the old Wagner Act, which had been in effect at the time of the strike (1946).

Mediation priority for disputes in defence plants

Cyrus S. Ching, chief of the U.S. Federal Mediation and Conciliation Service, recently announced a plan whereby the Service could give priority to the conciliation of disputes in

defence plants.

Mr. Ching said that his agency, the armed forces and the Munitions Board, had worked out a system of close liaison and priority designed to maintain a careful watch on labour-management problems, and give immediate assistance wherever needed.

The defence agencies will advise the Conciliation Service of plants receiving contracts, and give other information which might be of value. Area conciliation officers will then observe labour-management relations in these plants. Mr. Ching said that his present staff of 200 conciliation officers would be considerably augmented.

Wage, price control agency set up in U.S.A.

Under the provisions of the United States Defence Production Act (L.G., Oct., 1950, p. 1662), President Truman has appointed Dr. Alan Valentine as Administrator of Economic Stabilization.

Dr. Valentine's work will be to plan and develop both short and long-range price and wage stabilization policies. He will also be responsible for creating the necessary organization for their administration. He is empowered to "establish price ceilings and stabilize wages and salaries where necessary."

Mr. Truman also announced establishment of the position of Director of Price Administration, and of a nine-man tripartite Wage Stabilization Board to work under Dr. Valentine. The wage board will be under direction of Cyrus S. Ching, and its members will equally represent labour, management and the public. The price director has not yet been named.

The function of the wage board is to "make recommendations to the Administrator regarding the planning and development of wage stabilization policies and . . . such other functions with respect to wage stabilization as may be determined by the Administrator after consultation with the board."

Extension of social security in U.S.A.

Important changes in United States social security legislation were made by legislation approved by the United States Congress in August.

The new law adds about 7½ million people to the 35 million previously covered by Old Age and Survivors' insurance, makes voluntary insurance available to a further 2 million, liberalizes eligibility conditions and increases benefits by an average 77½ per cent. In addition, the public assistance program is extended, principally through the establishment of federal aid for needy persons who are permanently and totally disabled. Federal grants to the states for maternal and child health services, for services to crippled children and for child welfare services are also increased.

Coverage under Old Age and Survivors' Insurance is extended to some 4¾ million self-employed persons and to regularly employed farm and domestic workers, although most professional people and certain other groups, including self-employed farmers, are not included. Voluntary coverage is made available to employees of non-profit organizations when the employer and two-thirds of his

employees agree to contribute and to state and local government employees not covered under a retirement plan. Americans employed outside the U.S. by an American employer are now covered and the definition of employee has been extended. The new coverage provisions come into force on January 1, 1951.

Pensions to existing beneficiaries are increased by about 50 per cent in the highest benefit group and by about 100 per cent in the lowest; the average primary benefit for a retired insured worker will be increased from the present \$26 to about \$46. As from May, 1952, pensions for future beneficiaries will be increased through use of a new benefit formula under which pension will be 50 per cent of the first \$100 of average monthly wage plus 15 per cent of the next \$200. It is estimated that under this formula pensions to future beneficiaries during the next ten years will be about 110 per cent higher than would have been possible under previous regulations. Subject to limitation in certain cases minimum primary benefit is raised from \$10 to \$25, and maximum family benefit from \$85 to \$150. The amount a beneficiary may earn in covered employment without loss of benefit is increased from \$14.99 to \$50 and the retirement test at age 75 is eliminated together with increments in benefit for years of coverage. Another revision under which an applicant for benefit must have coverage for only half the number of quarters since 1950, instead of since 1936 as formerly, substantially liberalizes eligibility. Benefits to survivors are also increased from 50 to 75 per cent of the primary benefit in certain cases.

Employers and employees will continue to share costs equally. Contributions by each will be 1½ per cent of wages until 1953 and will rise gradually until 1970 when they will remain at 3¼ per cent; rates for the self-employed will be one and one-half those for employed persons. The limit on earnings on which benefits are computed and contributions paid is raised from \$3,000 to \$3,600.

In view of the difficulties encountered in attempting to obtain universal coverage under a program where benefits are related directly to contribution record, the Senate unanimously voted \$25,000 for a two year committee study of ways by which coverage could be extended, and of "pay as you go" financing as opposed to the present modified actuarial system.

The original provision in the bill for establishment of a permanent and total disability insurance system did not become law, but a new category of federal-state

assistance to needy, permanently and totally disabled individuals is now to be set up. Under the aid to dependent children program the new law makes benefits available to a disabled mother or other relative with whom the child is living and under the aid to the blind scheme a mandatory exemption of \$50 monthly earned income is provided. Finally the new Act authorizes substantial increases in the important grants administered by the Children's Bureau. The grant for maternal and child health services is raised from \$11 million annually to \$15 million in 1950, and to \$16.5 million thereafter; the grant for crippled children's services is raised from \$7½ million to \$12 million in 1950, and to \$15 million subsequently; and the grant for child welfare services is raised from \$3½ million to \$10 million.

One amendment which was incorporated in the Act, in spite of criticism by President Truman and by labour groups, was the so-called Knowland amendment, relating to federal government contributions to state unemployment insurance funds. The amendment prevents the federal Government from withholding funds from a state which it believes has failed to meet federal unemployment compensation standards until the state's highest court has ruled on the issue in question.

According to the *New York Times* this amendment facilitates strike-breaking, since its net effect is "to permit a state to deny unemployment compensation benefits to a person who refuses to take a job left vacant in a labour dispute, and still collect from the federal government, until the state supreme court decides the case—a matter of three years or so."

Princeton study of lay-off policies and practices

The Princeton University Industrial Relations Section has published a study by Robert L. Aronson, entitled *Lay-off Policies and Practices*, based on recent experience in collective bargaining in the United States.

The study describes "the problem of handling lay-offs . . . (as) essentially a problem in selection." Management's chief interest is to maintain efficient production, and to keep the most able workers. The union's major problem "is to devise a method of distributing a limited quantity of work among the members of the bargaining unit." The unions "have institutionalized the principle of seniority," the study notes, to handle the situation when lay-offs become necessary.

The report describes the application of seniority, types of seniority units and

factors in choosing these units, the use of displacement and transfers in lieu of layoff and other factors of the lay-off problem.

From his study, Mr. Aronson concludes:—

Unemployment is never satisfactory either for the individual or for society, regardless of the machinery established for handling it. Such measures as dismissal compensation, unemployment insurance, public employment exchanges, community-wide and inter-industry arrangements for transfers of employees between firms, and vocational guidance and training may help to alleviate or even reduce the problem. The most satisfactory lay-off provisions and procedures, it is true, only serve as a means of fairly distributing a reduced amount of work among the employees of particular companies. Policies and procedures with respect to lay-off, transfer, and recall may, however, contribute considerably to the processes of adjustment to change in our economy. To do so in a way that reconciles divergent viewpoints and interests is no mean achievement.

Financing of veterans' housing in U.S.A.

Almost half the veterans who bought mortgage-financed homes made no down payment, according to a survey made by the U.S. Labour Department, covering nine large-city areas during the latter half of 1949.

The survey is stated to be indicative only of findings in large metropolitan areas, and it did not cover custom-built houses.

Most of the veterans in the survey (7 in 10) made down payments of 5 per cent or less. In contrast, most non-veterans (7 in 10) paid over 15 per cent down.

On the whole, veterans bought less expensive houses than non-veterans, although the modest home was predominant in both groups. Most of the homes (around 60 per cent) were in the price brackets from \$7,000 to \$10,000. Only a fourth of the veterans but half the non-veterans bought houses selling at \$10,000 or more. Among the non-veterans in these large metropolitan places, a relatively small number (something over 10 per cent) had new houses that cost them \$15,000 or more.

Only about 15 per cent of the houses were bought without Government-aided financing.

Quarterly summary of Australian statistics

Statistics concerning wages, prices, and other information are contained in the latest issue of the *Quarterly Summary of Australian Statistics*.

One section of the quarterly is devoted to employment, unemployment and wages. The figures show a total trade union

membership to the end of 1948 of 1,423,150, as compared with 915,470 in 1939. In this nine year period, there has been a steady yearly increase in the number of trade unionists in Australia.

The figures show a general decline in unemployment among trade union members since 1939. In that year, 9.7 per cent of trade unionists were unemployed. In 1949, reporting unions indicated that 2 per cent of their members were unemployed. For the first three months of 1950 the percentage was 0.8 per cent.

An average of 1,573 people received unemployment benefits each week in the year 1948-49, and in the same period, sickness benefits were paid to a weekly average of 10,560 people.

In July, 1939, there were approximately, 1,700,000 wage and salary earners in Australia as compared with 2,321,200 in July, 1949, and 2,527,000 in March, 1950. There has been a steady increase in wage and salary earners since 1939.

In 1949, there were 849 industrial disputes, involving 3,984 establishments. These disputes involved 264,577 working people both directly and indirectly, and resulted in a loss of close to 1,400,000 working days. The estimated loss in wages was £2,611,536.

At March 31, 1950, the average weekly wage in Australia was 17s 10d. Excluding workers in shipping and agriculture, the average wage was 17s 10d; the average hourly rate was 4s 3d, and the average work week 39.96 hours. The average weekly total wages paid in the year 1948-49 were 19.4 million pounds, as compared to 10.2 million pounds in 1941-42. The average for the three months to the end of March, 1950 was 21.5 million pounds.

The Australian price indices for six capital cities are computed on the basis of the years 1923-27 equal 1,000. The food and groceries index has risen from 886 in 1938 to 1,473 at the end of the March, 1950 quarter. The housing index, computed for four and five roomed houses has risen from 942 in 1938 to 984 at the end of March, 1950. In Sydney, the index was 1,004 in 1938 and 1,049 in March, 1950. The "all items index" shows a steady increase since 1939. In September, 1939, the index stood at 916, and in March, 1950, it was 1,491.

India institutes vocational training scheme

With the three-fold object of ensuring a steady supply of skilled industrial workers, improving quality and quantity of production, and reducing unemployment, the Government of India earlier

this year announced the introduction of a technical and vocational training scheme for adult civilians.

The Government's decision to introduce the scheme was in response to public demand for training facilities for civilians, such as were provided in the rehabilitation of ex-service personnel.

Under the scheme two types of training are available: a two-year technical course in all the important engineering and building trades, and a one-year vocational course in selected cottage and small-scale industries. The plan includes six months' apprentice training to provide the trainee with practical experience.

The scheme is jointly sponsored by the Central and State Governments and is integrated with the National Employment Service. It is open to all classes, with 12.5 per cent of the entrances reserved for candidates belonging to the "scheduled" castes. Training is given free of charge, and scholarships providing monthly payments while at training centres are provided for fifty per cent of the trainees. In addition, free medical treatment and other facilities are available. At the commencement, 10,000 trainees are being accepted.

In conjunction with the scheme, the Government has established a central institute for the training of instructors, in consultation with the State governments.

Trainees will, on completion of training, submit to a trade test by a Board of Examiners drawn from industry and Government departments, and successful candidates will be awarded a "National Certificate in Craftsmanship."

In announcing the scheme, the Director-General of Resettlement and Employment said that India's shortage of skilled manpower "might well prove to be a serious bottleneck in the development of the country's industries," unless steps are taken to remedy the situation.

Work of resettling displaced persons to continue

The way has been opened for the resettlement of 55,000 "new refugees" from behind the Iron Curtain. This has been made possible as a result of a resolution approved by the General Council of the United Nations International Refugee Organization, according to a Geneva dispatch to the *New York Times*.

The Council's action removes the deadline of October 15, 1949, which marked the last date on which a refugee could register with the IRO for resettlement. Many persons who have arrived in the West since the deadline date, with no visible means

of getting to new homes outside Europe, will be eligible, subject to the usual personal qualifications, for transport in IRO ships.

Since July, 1947, when the IRO took over the post-war displaced persons problem from UNRRA, the organization has maintained a daily average of 721 persons transported from "DP" camps to new homes in countries around the world. In the three years, some 1,500,000 refugees have been assisted. Of these, 70,253 were repatriated and 790,398 were re-established in new homes. Over 90 per cent of the refugees resettled came from IRO camps in Germany, Austria and Italy.

Canada in this period has accepted 86,789 refugees.

Persons resettled during the past fiscal year ended June 30, 1950, totalled 264,079, a decrease of over 53,000 from the previous year. The drop is attributed to a slackening off of Jewish emigration to Israel, and the immigration programs of Canada, Brazil and Argentina.

Refugees receiving full care and maintenance at the end of June, 1950, had declined from the July 1, 1947, figure of 719,588 to 248,441. Eighty-four per cent were located in Germany, Austria and Italy. The July total included 11,745 refugees in staging and embarkation centres awaiting departure for resettlement. In addition, 291,138 registered refugees were being provided with IRO legal or political protection, resettlement or repatriation services.

**World
Conference
planned for
white collar
workers**

The International Confederation of Free Trade Unions is planning to hold a world conference for "white collar" workers at ICFTU headquarters in Brussels, April 18-21.

The conference will consider conditions of employment, organizational problems, and establishment of an international trade secretariat for non-manual and professional workers.

Collective Bargaining Contracts in the Canadian Meat Packing Industry

This is article Number 11 in the series *Collective Agreements Studies*, prepared in the Economics and Research Branch of the Department of Labour.

At right: Packing plant workers stamp and tag beef which has been graded by a Federal Government grader.

Labour organization in the Canadian meat packing industry developed rapidly during the war years, until at present almost 80 per cent of eligible employees are covered by collective bargaining agreements.

Agreements in this industry show more uniformity than do the contracts in many other mass production industries. Three contracts covering the majority of workers are signed by the United Packinghouse Workers of America with the largest companies. The remainder are almost all negotiated by the same union and have many similarities with the larger contracts.

The following article describes the provisions in meat packing agreements relating to such matters as wages, hours, guaranteed weekly earnings, overtime, seniority, vacations, holidays, union membership, and settlement of grievances.

Almost eighty per cent of the eligible employees in meat packing establishments across Canada are covered by terms of collective bargaining agreements. Of an estimated seventeen thousand production and maintenance workers, fourteen thousand are under agreements, those omitted being for the most part employed in relatively small plants. Thirty-nine current agree-

ments were available for study. The majority apply to single plants and cover an average of less than 125 employees,¹ but three cover 9,500 workers in establishments operated by Canada Packers, Swift Canadian Company and Burns and Company, the largest firms in the industry:

Activities of meat packers include the buying and slaughtering of meat animals and the preparation, packing and canning of meat products. In addition to meat production, residual materials give rise to such products as lard, shortening, tallow, oils,

¹ Sixteen agreements apply to bargaining units of from 100 to approximately 700 employees; twenty apply to units of 100 employees or less.

soaps, fertilizers, hides and bristles. The minute division of tasks employed has reduced the majority of individual job assignments to a single operation, but cutting skill remains a prerequisite to a large number of jobs.

Employees directly engaged in production tasks; maintenance workers such as engineers, firemen and electricians; men employed in company stockyards; and truck drivers are generally covered by collective agreements. Supervisors, office workers, buyers, salesmen and confidential employees are excluded from bargaining units. The United Packinghouse Workers of America (CCL-CIO) is the recognized representative of approximately ninety per cent of the organized employees and is the negotiator of agreements on their behalf.

The rise of the UPWA to its present position in the industry has taken place within the past decade, but union activity dates to the turn of the century. The Amalgamated Meat Cutters and Butcher Workmen of North America (TLC-AFL) had some early success in organizing Canadian packinghouse workers, particularly from 1919 to 1922. Although further organizing attempts were made by various groups, little was accomplished until the time of the Second World War. After 1939 the Packinghouse Workers' Organizing Committee laid the foundations for the present United Packinghouse Workers of America which replaced the Committee in 1943. This group was not alone in its work for coincident with the early expansion of the UPWA, local unions of packinghouse workers were chartered, first, by the Trades and Labour Congress of Canada and, subse-

quently, by its member national union, the Packinghouse Butchers and Allied Workers' Union. These have since been replaced by the UPWA and the Amalgamated Meat Cutters and Butcher Workmen's Union.

Negotiations between the three principal companies and the UPWA were first at the plant level but, with the later development of the union, it began to press for industry-wide bargaining. Progress in this direction was made in 1944 and in 1945 when certain contract adjustments were made for all establishments of the "big three" companies and a common expiry date for the individual plant contracts was adopted. Following this, company-wide bargaining in the agreement of each company took place in 1946 and since that time agreements signed with each of Canada Packers, Swift Canadian Company and Burns and Company have applied to all their meat packing establishments. The remaining thirty-six agreements in the industry cover more than 4,300 workers, the majority having been signed by UPWA locals. Approximately 10 per cent of the workers are covered by collective agreements negotiated by unions other than the UPWA including the Amalgamated Meat Cutters and Butcher Workmen's Union, which again chartered locals in Canada in 1945, and a number of independent local unions.

Almost all packinghouse contracts are effective for a one-year or a two-year period. Regardless of duration, agreements are automatically renewable on a yearly basis after the initial term unless, within thirty to sixty days before the annual expiry date, one party serves notice of its desire to negotiate changes. Those which initially

Membership in the United Packinghouse Workers of America, 1940-1949

run for two years usually permit adjustments of the wage scale once during their terms.

The conditions of employment set forth in the contracts can be broadly classified in three divisions, working conditions, union membership and settlement of differences. So grouped, clauses of the agreements are discussed in the following sections.

Working Conditions

Rules for plant working conditions agreed upon in collective bargaining affect such matters as wages, hours and overtime, seniority, vacations and statutory holidays. Certain aspects of plant operation are subject to "management rights" clauses in all but two agreements. These clauses vary, but, in general, they specify that, subject to the terms of the agreement, the companies retain the right to manage the business; to determine the products manufactured, the methods and scheduling of production; to hire, promote, transfer, discharge for cause and otherwise direct the working force.

Wages—(See Table 1). Clauses regarding rates of pay for hourly paid and weekly paid workers are included in the agreements. The large majority of employees covered by agreements are paid by the hour. Inclusion of an occupational rate schedule is relatively uncommon, only fourteen smaller contracts having such a schedule. Nevertheless, many agreements state that wage schedules are available for reference, presumably for purposes of adjusting grievances. Among the few contracts containing a wage schedule, one standard rate for each job classification is generally quoted. Only three provide a range of rates according to length of service. Generally, wage provisions in the contracts examined provided for a cents-per-hour or percentage increase above previous rates. Basic minimum rates for male and female labour are usually indicated and constitute the only reference to wage rates in the contracts of a small minority of workers.

New employees are usually required to work for a time at below standard rates, although the length of time is not clear in all contracts. These rates vary between 2½ and 11 cents an hour below regular job rates and may apply for a period of from one to six months. Four cents below regular rates was the most common hiring rate found. Under six contracts, in which the qualifying period is relatively long, new employees receive periodic increases until the basic rate is reached. In most cases newly hired employees apparently receive starting rates until the qualifying period is completed.

1950 CONTRACT CHANGES

This study of collective agreements in the Meat Packing Industry is based on the agreements in effect prior to August 1, 1950. Since completion of the analysis, information has been received in the Department concerning revised two-year agreements, effective August 1, 1950, which were negotiated between the "Big Three" meat packing companies, Canada Packers Limited, Swift Canadian Company Limited and Burns and Company Limited, and the United Packinghouse Workers of America. Major changes between the three new contracts and those included in the analysis are as follows:—

WAGES

Increased 7.4 per cent effective August 1, 1950, with a further three cents per hour increase to become effective August 1, 1951.

Wage rates to be adjusted periodically according to changes in the official cost-of-living index from a base of 167.5 (rates adjusted one cent for each 1.3 point change in the index).

HOURS

Reduced to 42 per week in most plants of two companies, and to 40 in plants of the remaining company.

Guaranteed work week reduced to 36 hours in all plants.

STATUTORY HOLIDAYS

Employees required to work on a statutory holiday will be paid 1½ times their regular rate in addition to holiday pay.

VACATIONS

Third week of vacation after 15 years of service for all employees.

UNION DUES

In two of the companies new employees must pay dues to the Union commencing on the first pay day of the second calendar month following employment.

The computation of wage rates for employees performing more than one task is dealt with in contracts covering more than one-third of the employees subject to collective agreements. Workers in meat packing may be called upon to perform several tasks in a day owing to production requirements and it is provided that the wage for the highest rated job worked will be paid if 75 per cent or more of working time is spent on that job. Otherwise actual time worked on the highest rated job is paid for at its rate and the time remaining at the rate of the next highest paying job.² These clauses occur frequently in agreements of larger firms, but are not commonly found in the contracts of smaller firms. It seems probable that the performance of several tasks raises a greater problem in larger firms having greater job specialization.

Wage adjustments for workers transferred from one principal job to another are dealt with variously in the contracts. Some state that an employee permanently transferred to a higher rated job be paid the higher rate when qualified. Normally, the qualifying period is limited to six weeks. On permanent transfer to a lower rated job, a number of agreements, particularly those of larger companies, provide for payment of the former rate over six weeks. Clauses referring to temporary transfers specify that employees transferred on a temporary basis to higher rated jobs must be paid the higher rate, while on similar transfers to a lower rated task, the previous rate is paid.³

Five cents is added to basic hourly rates for night work under contracts applying to

² A representative clause reads.—“The term ‘base rate’ shall mean the rate set down for a specific labour operation under the base rate schedule. The term ‘job rate’ shall mean the rate determined by a combination of base rates applicable to the work performed by the employee, and the job rate shall be determined as follows:

The two highest base rates shall be used; the highest rate at the actual time worked and the second highest rate for the remainder of the time worked;

When an employee spends 75 per cent or more of his time on the highest rated job, then the highest base rate shall become the job rate.”

³ Examples from contracts:

- (a) “If an employee is transferred permanently to work where the job rate is higher, he shall receive the higher rate when qualified in the opinion of the foreman. If an employee is kept on work where the job rate is higher for a period of six (6) consecutive weeks such a transfer shall be considered permanent.
- (b) “If an employee is permanently transferred from work where the job rate is higher his rate shall not be reduced for a period of six (6) weeks including lay-off, after which the lower rate shall prevail.
- (c) “When an employee is required temporarily to fill a higher rated job, he shall receive the higher rate, but if required temporarily to fill a lower rated job, he shall receive his regular rate.”

a large majority of meat packing workers. The night bonus is paid for hours worked between 6 p.m. and 6 a.m. under nearly all of the contracts. A few call for payment between 4 p.m. and 4 a.m. This clause is the only direct reference to shift work under many of the contracts, and it appears that shift work among production workers is not common. Certain groups of employees are classified as “continuous shift operators” including such workers as oilers, engineers, firemen and tankmen, and work on a shift basis, but the schedule of shifts and daily hours is not generally given.

An employee who, owing to circumstances beyond his control, is dismissed for the day without completing four hours is entitled to four hours’ pay under the majority of minimum call pay provisions. A very few contracts specify a three-hour minimum. Employees called to work outside of normal working hours are frequently covered by a separate minimum pay provision. For the largest number of workers this minimum is four hours at the regular rate of pay. Other minima in order of importance are time and one-half for the hours actually worked or four hours at the regular rate, whichever is larger; the actual time worked at time and one-half plus additional time at the regular rate required to make three hours; four hours at the overtime rate; and three hours at the regular rate.

Hours and Overtime—(See Table II). Although the largest number of contracts call for a forty-five to forty-eight-hour week, the majority of workers under packing-house agreements are scheduled to work a maximum forty-four-hour week. Daily hours, days per week, starting and quitting times are infrequently detailed. More commonly, weekly limits are stated with the added stipulation that hours per day must not exceed a given number, usually eight or nine. Within these limits, hours schedules for various plant departments are to be drawn up. From contracts which do supply more detail on daily hours, it is evident that all employees in a plant do not work the same number of hours in the day or the same number of days in the week, some being scheduled to work five days a week, others five and one-half days and shift operators, six days.

Hours schedules may be altered in ten agreements affecting approximately 8,600, or more than sixty per cent, of the workers. It is usually specified that contemplated changes will be discussed with the union and that changes will not be made effective until after seven days’ notice in the case of gang schedules or twenty-four hours’ notice for an individual employee.⁴

Length of Work Week—Meat Packing Agreements

Uneven deliveries of livestock to packing plants results in irregularities in production schedules and hours of work. To avoid consequent hardships on workers, there is a minimum guarantee of weekly pay equal to a stated number of hours. The usual guarantee is $36\frac{1}{2}$ or $37\frac{1}{2}$ hours' pay, but in a number of contracts it is as high as 40 hours.⁵ The latter applies where the standard work week is longer than 45 hours.

Application of the "minimum guarantee" is detailed in most contracts. Though some variations occur, the following provisions are commonly found. First, the companies are frequently free to adjust gangs, distribute work between departments and to transfer employees. Part time and casual workers are normally excluded from the guarantee. Lateness or absence is to result in a proportionate reduction in the guarantee. Also, a reduction will be made during the first week of employment for employees hired after the beginning of the week. An employee is not entitled to any guarantee for the week in which he quits or is discharged, but one who is laid off is entitled to the guarantee for the week in which notice is given. Agreements usually require

⁴ "The present schedule may be altered from time to time as the exigencies of the business require. The Company, however, agrees that except by mutual consent, no gang's schedule shall be changed without 7 days' notice, and, no individual's schedule without 24 hours' notice. . . . The Union will be consulted before a change is made in a gang's schedule, or when feasible, in an individual's schedule. If a change of schedule involves a reduction in take-home pay, it shall be subject to grievance procedure".

⁵ "The Company guarantees to each full-time (excluding thereby part-time employees and casual employees) hourly paid employees, pay equivalent to thirty-seven and one-half ($37\frac{1}{2}$) hours of work at his regular rate of pay for each week at work for the Company. . . ."

that notice of one day for each six months of service be given to employees who are to be laid off. Pay received for statutory holidays not worked is normally considered as part of the guarantee.

Daily rest periods are discussed in most contracts, ten minutes twice a day being the usual contract provision. Where one rest period is specified, the duration is normally fifteen minutes.

Although the arrangement and duration of meal periods is not generally covered, a provision in contracts applying to approximately two-thirds of the employees states that workers may not be required to work more than five or, in some cases five and one-half hours, without having time for a meal. Agreements covering a somewhat larger number of workers specify that employees working overtime are entitled to a meal period within a stated time, usually one or one and one-half hours after overtime starts. Approximately one-half of the latter stipulate that workers will continue on pay during the overtime meal period, limited to twenty or thirty minutes, and that the company will supply the meals.

Hourly rated employees covered by the contracts analysed are paid one and one-half times regular rates for overtime work. Practically all of the agreements stipulate that overtime rates will be paid for hours worked in any day outside of daily scheduled hours. While a number of these state that overtime may be calculated on a daily or a weekly basis, only a few outline the method of calculation in detail. These require that overtime be calculated for hours worked in excess of scheduled weekly hours and separately for hours worked in excess of scheduled daily hours during the week, the larger of the amounts to be paid.

Guaranteed Weekly Earnings—Meat Packing Agreements

Overtime for weekly rated employees may be handled similarly to that for hourly rated employees by reducing weekly rates to an hourly basis. However, nine agreements, two of which are "big three" contracts, state that weekly paid employees will be allowed compensatory time off which may be accumulated.

A clause contained in nine contracts covering 8,700 workers, approximately three-quarters of whom are employees of two of the largest firms, makes overtime following a late start in the working day subject to a separate provision. When, owing to a late start, it becomes necessary to work beyond scheduled quitting time, time and one-half will be paid after a stated period even though the employee may not have worked the full number of daily hours. One or one and one-half hours after the normal stopping time, depending on the individual contract, is the usual period set for this purpose.⁶

Hours worked on the seventh day of the week are governed by a separate overtime provision in 33 of the 39 agreements. More than 13,000 employees under 30 contracts receive double the regular rate of pay for hours worked on a Sunday or other rest day in place of Sunday. Somewhat more than 600 workers under three contracts receive the regular time and one-half overtime rate.

Seniority—(See Table III). Employees covered by all meat packing agreements are subject to seniority provisions. Seniority, although not normally acquired until employees have completed a probationary

period, dates from the time of hiring. The probation period may be as short as one month or as long as one year, being in the majority of contracts, three months or less. A worker is usually placed on a seniority list for the department in which he works. Departmental employees, after an additional period of employment, also acquire plant seniority. The length of service required before plant seniority is attained ranges from three months to three years, but in the majority of contracts it is nine months.⁷ Only in small bargaining units is an employee placed on a seniority list for the entire plant on completion of the probationary period.

Subject to an employee's skill and ability to perform tasks assigned to him, seniority applies in lay-offs, in rehiring after a lay-off, and in promotion. Seniority is also to be considered under many contracts when arranging vacation schedules.

Lay-off rules in establishments having plant seniority require that employees be laid off in order of their accumulated seniority, after first discharging probationers, part-time and casual labourers. Rehiring is in the reverse order. In plants having both department and plant seniority the system is more complicated, and varies between contracts although the intent in all cases is to retain workers with plant seniority until others have been laid off. When employment is to be reduced in a department, employees with seniority in that department are laid off in order. Employees in the affected department who have plant seniority may usually displace workers with department seniority elsewhere in the plant. Thus a common order of lay-off in packinghouse contracts is, (1) part-time employees, casual workers and

Application of Seniority—Meat Packing Agreements

⁶ Example:

"When, by reason of a late start, it is necessary to work beyond scheduled quitting time, the Company agrees to pay one and one-half (1½) times his regular rate to an hourly rated employee required to work after expiry of one hour beyond his scheduled quitting time, even though he may not then have worked the full number of hours scheduled for the day. The Company similarly agrees to pay to an hourly-rated employee one and one-half (1½) times his regular rate for any hours he may be required to work before his scheduled starting time".

⁷ Examples:

- "An employee's seniority rights shall become effective when he has twelve (12) weeks of service within any six-month period and has received in each such week pay at least equal to the guaranteed payment . . ."
- "The Company shall maintain seniority lists showing those employees who have plant seniority, and those who have seniority in each of the seniority divisions."
- "Seniority shall be on a divisional basis until an employee has completed nine months of seniority service."

probationers, (2) employees with department seniority in the department being reduced, (3) employees with department seniority in other departments, and, (4) employees with plant seniority. In rehiring the order is commonly, (1) employees with plant seniority, (2) employees having department seniority in the department being increased, and, (3) employees with department seniority in other departments.

To avoid large temporary lay-offs, the possibility of reducing working hours is con-

sidered in eighteen contracts applying to 9,000 workers. By such clauses companies agree to investigate the possibility of reducing the hours of work.

Seniority governs promotions, where skill and ability are relatively equal, under a large proportion of contracts. The normal procedure, where combined department and plant seniority prevails, is promotion within departments. Almost all such contracts contain a clause covering the seniority of employees transferred to different depart-

ments. Upon transfer, the employee retains his seniority in his old department for a period of from three to four months, after which his accumulated seniority is transferred.

In order to facilitate promotions, several agreements stipulate that vacancies, except those which must be filled immediately, be posted to allow interested employees opportunity to apply. Employees promoted are on probation in some cases until satisfactory qualifications for the new job are demonstrated. Other contracts merely state that

a promoted employee must be given a reasonable time in which to qualify. In neither case is the qualifying period limited, apparently being left to the judgment of the company, subject, of course, to a possible grievance.

Most employees under collective agreements in the industry retain seniority during periods of non-employment caused by lay-off or sickness and during leaves-of-absence. Terms of the majority of contracts specify either that seniority will be retained during non-employment for a period dependent on

length of service or that seniority will be retained for a uniform period for all employees. Under the first of these, an employee with less than one year's service will be retained on the seniority list for a stated number of months or for a period equal to a percentage of his accumulated service. Between one and two years' service will entitle the employee to retention of seniority during a stated longer period or for a period equal to his length of service. After two years of service the maximum break in employment, without loss of seniority, is frequently two years. Absence owing to sickness receives additional con-

sideration under many contracts. Under agreements affecting a substantial portion of the labour force, seniority will be retained up to two years during sickness even though an employee may not qualify for a break of such length under other contract terms. Others state that an employee will not lose his seniority during illness, but the period is not limited.

Leaves-of-absence without loss of seniority of two types are dealt with in the great majority of agreements; for union business and for personal reasons. The number of employees permitted leave to take up full time union positions in most cases is

limited to one or two in each plant. Other employee representatives engaging in union business outside the plant may obtain leave as shown in table III, the number granted such leave being frequently determined in negotiations between the unions and the companies. Companies also agree to grant leave for personal reasons for durations shown in table III.

Reasons for immediate loss of seniority are contained in a large proportion of the contracts. Either two or three days of absence without permission will result in loss of seniority. Failure, upon notice, to return to work after a lay-off, or to advise the company of an intention to do so, within forty-eight hours will result in loss of seniority, although in a small number of contracts the time limit is set at a "reasonable time". Where it is urgently required to fill a vacancy, companies generally need not be guided by the forty-eight hour or "reasonable time" provision, but can go down the seniority lists until another suitable laid-off employee is located. Workers so rehired retain their positions, but a senior employee who was not located is to be re-employed on the next available position without loss of seniority provided, after receipt of the notice, he informed the company of his desire to return to work.⁸ Furthermore, contracts place no obligation on the companies to trace an employee. A communication directed to the last known address of an employee is considered sufficient notice.

Vacations with Pay—(See Table IV). All employees covered by collective bargaining agreements are entitled to annual paid vacations, the length of which depends on accumulated service. The most common arrangement is one week's vacation after one year's service, two weeks after five years and three weeks after twenty years. Female employees under most of these are granted the third week after fifteen years of service.

Reference to the method of computing vacation pay states, in the majority of cases, that hourly rated employees are to receive pay for the basic weekly hours at regular

hourly rates and weekly paid employees receive regular weekly rates. Only a few contracts in smaller plants base vacation pay on a percentage of earnings during the previous year.

Service for vacation purposes is generally computed as at a fixed date commonly referred to as the "cut-off" date. For example, assuming May 1, to be the "cut-off" date, employees with one year of service but less than five at that date will receive one week's vacation according to most contracts. But a substantial proportion of the agreements provide that an employee who has not completed one year of service at the "cut-off" date will receive a vacation proportionate in length to his service.

Vacation allowances or service credits for vacation purposes are related to actual time on the payroll during the year. Total service for vacation purposes may be reduced by an amount equal to any time lost during the year but more frequently vacation pay is proportionately reduced. However, certain absences may be allowed without effect on subsequent vacations. While permissible absences vary between contracts, vacations will not normally be reduced for absence with permission up to a limited number of days, for absence owing to illness or accident for a stated number of weeks, or for absence of limited duration while on authorized leave.⁹

Other frequently found provisions relating to vacations deal with vacation allowances on separation and extra allowances for statutory holidays occurring in vacation periods. Employees leaving the service of a company are entitled to pay for existing vacation credits. An employee leaving a company with six months of such service will receive one-half his normal vacation pay. Nearly all of these contracts stipulate that discharge for cause cancels unused vacation privileges. For a statutory holiday within a vacation period, most companies may either grant an extra day with pay or an extra day's wages.

⁹ For Example:

"Vacation pay for each week of vacation for hourly rated employees shall be the basic weekly hours at the regular hourly rate (weekly paid employees, the weekly rate) prorated on the number of weeks of earnings for which vacation pay has not been granted in the 12 months . . . immediately preceding the cut-off date."

"Leave of absence not exceeding . . . weeks shall be regarded as weeks of earnings. In the case of illness certified by a practicing Physician or Surgeon an employee, upon his return to the service of the Company, shall receive vacation credit for each week of illness, not to exceed . . . weeks, as if earnings had been received. An employee upon his return to the service of the Company after a compensable accident shall be granted vacation credit as if earnings had been received."

⁸ Sample clause:

"In urgent cases, however, where it is necessary to secure workers at notice of less than 48 hours, the Company, if unable to make contact with the senior eligible employee, may recall the next senior employee and so on down the list, until the vacancy is filled. Employees rehired under such circumstances shall retain the positions to which they are appointed, but provided the employees with whom the Company was unable to communicate in time later within 96 hrs. advise the Company of their desire to return to the Company's employ, they shall retain their seniority and shall be eligible for recall on the next occasion of a vacancy in a position for which they possess the required ability."

Statutory Holidays—Eight statutory holidays with pay are to be observed annually according to the majority of packing house agreements. Employees required to work on any of these days receive premium rates for hours worked. Normally workers must be present on the day before and the day following a statutory holiday to qualify for pay, except if absent with permission of the company.

Miscellaneous—Twenty-four agreements covering 12,400 workers make reference to employee benefit plans. Only a minor number contain details of the plans, most agreements merely stating that employees are entitled to sick pay or other benefits under a health and welfare plan. However, details of sick pay are given in five agreements under which an employee will receive either one-half his normal wages for a period of time proportionate to his service or full wages for a short period of time, depending on the individual contract.

Safety is a subject of nearly all the agreements. A clause by which the companies agree to make all reasonable provision for the safety of employees during working hours is common. Five of the smaller contracts provide for the setting up of union-management safety committees. In addition, a number specify that certain safety devices, not including personal items of clothing, will be supplied to employees by the companies where necessary.

Other clauses relating to working conditions and found variously throughout the contracts include such matters as provision of working clothes at cost, free laundry service and reasonable time for tool sharpening.

Union Membership

Employees under agreements are not generally required to become union members as a condition of employment. Only five contracts applying to an average of 96 workers each contain a union shop provision. However, maintenance of membership clauses under which union members are obliged to remain so for the life of a contract are common. Most of these allow employees to withdraw from the union during a short period, normally two weeks, before the annual expiry date.¹⁰ Supplementing maintenance of membership clauses, fifteen contracts covering more than 11,000 workers, contain a provision designed to assure freedom of action to employees respecting union membership.¹¹ (See Table V).

Check-off provisions are almost universal in packinghouse agreements, only six cover-

ing very small bargaining units not having some form of dues deduction. The voluntary revokable check-off, by which any employee who authorizes the company in writing to do so will have his union dues deducted from his pay, is generally applicable. Individual employees may later rescind such authorizations. Contracts frequently outline the form of authorization to be used; the times at which, and the union officer to whom, the company will turn over amounts deducted; and the maximum dues that the union will charge for purposes of the check-off.

Bulletin Boards—In order that the union can more effectively transmit information to its members, twenty-eight of the contracts affecting 13,200 workers, specify that the union has the privilege of posting notices of meetings and other matters of business on bulletin boards within the plant. Usually notices must be approved by management before posting.

Settlement of Differences

Methods for disposing of contract interpretation differences and other employer-employee differences during the life of a contract are outlined in detail. Work stoppages are restricted and procedures are set out for handling day-to-day grievances. (See Table VI.)

Work Stoppages—The resort to strikes and lockouts is restricted in practically all of the meat packing agreements. The largest number prohibit strikes or lockouts during the life of the contract and agreements covering the majority of employees extend this prohibition to the period of

¹⁰ Example—

"The Company agrees that all employees now members of the Union and all employees who become members of the Union, shall remain members in good standing of the Union while employed by the Company during the life of this Agreement.

"Any employee to whom . . . this article applies to, may resign from membership in the Union between July 17 . . . and July 31 . . . inclusive and his future employment shall not be thereby affected."

¹¹ Example—

"No employee shall be subject to any penalties against his application for membership or for re-instatement as a member in the Union except as may be provided in the Constitution and By-Laws of the Union; and no coercion or intimidation of any kind shall be practised to compel or influence an employee to join the Union nor shall any discrimination of any kind whatsoever be practised or permitted with respect to employees who are or who become members of the Union.

"If an employee asserts that he has been unfairly deprived of membership in the Union, such assertion shall constitute a grievance and shall be dealt with according to the Grievance Procedure established by this agreement."

renegotiation.¹² On the other hand, in a substantial number, strikes or lockouts may occur after all agreed upon methods for the settlement of disputes have failed to bring about agreement.¹³ Not only do the contracts restrict strikes and lockouts, but also slowdowns or other cessations or restrictions of production. A number of contracts in larger plants prohibit strike votes among union members during the contract term and the period of renewal negotiations until all procedures for settling disputes, as outlined in the contract, have been exhausted and no agreement reached.¹⁴ Contracts covering approximately 3,000 workers provide for the continued operation of certain plant departments to protect perishable goods in the event that a work stoppage does occur.¹⁵

Grievances—All contracts make provision for processing disputes during the term of the agreement. A step-by-step method for the handling of grievances is generally outlined. By the terms of thirty-one agreements, grievances not settled through negotiation between the parties may be referred to arbitration.

Contracts covering only a small proportion of employees restrict the definition of a grievance to differences in interpretation or application of contract clauses. More commonly, a grievance is not defined in any way or includes all disputes incident to labour relations in the plant. Once a dis-

¹² Example—

“There shall be no strikes, or lockouts during the term of this agreement and thereafter while negotiations are under way for a renewal of extension thereof, and the Union and its members shall not during the aforementioned period authorize, call, encourage, support or take part in any strike, walkout, stoppage, slowing down or other cessation of work in or on the Company's plant or property which shall in any way affect the operations of the Company.”

¹³ Example—

“There shall be no strike, slowdown, stoppage of work or suspension thereof on the part of the Union or its members employed by the Company, or lockouts on the part of the Company until the steps set forth (in the grievance procedure) have been taken with respect to the matter.”

¹⁴ Example—

“The Union agrees that no strike vote of the members of the Union will be taken during the term of this Agreement or the course of negotiations with the Company for renewal or extension thereof until an attempt has been made in good faith to settle any differences arising in such negotiations by conciliation, arbitration or some other form of mediation.”

¹⁵ Example—

“The Union also agrees that in the event of any strikes, walk-outs or stoppages of work, the Union shall not do or permit to be done anything by any of its members to prevent Power House staff such as firemen, engineers and electricians from continuing all or any part of their regular duties in the service of the Company.”

pute is referred to arbitration, contracts affecting the large majority of workers stipulate that arbitrators are to be governed by the terms of the agreements. Thus arbitration boards have no authority to add to or alter agreement terms.

Clauses providing for the election or appointment of union stewards and grievance committees are frequently included in contracts. Stewards and grievance committee members must be employees of the company. Under multi-plant contracts union representatives are selected at each plant, grievances being handled at the plant level. The numbers of stewards and the size of the grievance committee may be indicated in the contract or left to negotiation between the company and the union.

Normally the initiation of grievance procedures requires that an employee first present a complaint to his foreman with or without the assistance of a steward. If not settled, a complaint is carried in prescribed order to higher officials of the company, a steward or sometimes two stewards acting on behalf of the employee until the chief plant officials are reached, at which time the committee acts on behalf of the employee. Up to this point a complaint will have passed through from three to five stages. At the grievance committee step, a frequently found clause permits the assistance of an outside representative of the international union. Eight contracts carry the negotiation of grievances a step further to meetings between representatives of the company head office and of the international union.

Only after each step in the procedure has been followed through without settlement can either party take a grievance to arbitration. For purposes of arbitration a three-member board is established, one member appointed by the company and one by the union; the chairman to be agreed upon by these two appointees. Should the two fail to agree on a chairman within a specified time, provision is normally made for the appointment of a chairman by the appropriate provincial Minister of Labour or other outside agency. Majority decisions of arbitration boards are final and binding.

Clauses relating to certain aspects of grievance handling not included in the procedure outlined above are found among the packinghouse contracts. Only a small number state specifically that an employee may process a grievance without the assistance of union representatives. A larger proportion of agreements state that the presence of a complaining employee may be requested at any stage or all stages of the grievance procedure. Complaints arising

from claimed unjust dismissal receive special consideration in the majority of agreements. An employce alleging to have been unjustly dismissed must promptly notify the grievance committee which, in turn, will notify a designated official of the company within a limited period of time, commonly three days. The grievance is then initiated at an advanced stage of the procedure. A reinstated employee must be returned to his former position and must be compensated at his regular rate of pay for time lost.¹⁶ It is general policy that pay increases arising from grievance settlements will be retroactive to the date on which the grievance was first submitted to the company in writing. A substantial number of contracts permit grievances by the company against the union, its officers or members which are usually dealt with beginning at an advanced stage in the process. Finally, a number of contracts make reference to grievances alleging violation of the agreement. Such allegations must be set forth in writing and negotiations omit preliminary steps in the grievance procedure.¹⁷

Only a small number of contracts state definitely that employee union representatives will be paid at regular rates for all

time spent handling grievances during working hours. Others specify that members of the grievance committee will be paid for grievance work during working hours although pay is often limited to a stated number of hours. Clauses dealing with the expenses of arbitration require that each party bear the expenses of its own representative and that the expenses of the chairman be shared equally.

¹⁶ Sample Clause—

"If an employee is dismissed for any reason and feels that he has been unfairly dealt with, he may within not more than seventy-two (72) hours from receipt of Notice of Dismissal, notify the Grievance Committee, who shall in such event within twenty-four (24) hours notify the company in writing. The dismissal shall then be dealt with according to the Grievance Procedure, beginning with the third step. If subsequently it is decided that the employee was unjustly dismissed, he shall be reinstated in his former position and shall be paid for this period during which he has not worked as if he had not been dismissed."

¹⁷ Example—

"If an employee or the Union or the Company alleges violation of this agreement, the aggrieved party shall set out clearly in writing the alleged violation stating in what respects it is alleged that the agreement has been violated. This procedure will apply at stage (c) of the Grievance Procedure."

Meat for the Canadian Army—Whole sides of beef are checked in the storage room of a training camp.

NUMBERS OF WORKERS AFFECTED BY COLLECTIVE AGREEMENTS IN CANADA, 1949, BY INDUSTRY*

The proportion of paid workers in Canada employed under the terms of collective agreements in 1949 was about 34 per cent. There was an increase of one per cent in the total number of workers under agreements over the previous year. Agreements in the province of Newfoundland are included for the first time.

The great majority of agreements were renewed or revised by peaceful negotiation, only 58 strikes involving 20,000 workers having arisen out of disputes over the revision of existing agreements.

In the year 1949, the number of workers employed under the terms of collective agreements in Canada increased one per cent to a total of 1,224,146. This figure is 23 per cent higher than that for 1946, the year for which the compilation was made for the first time. Agreements in the province of Newfoundland were included in 1949 for the first time.

Classified by industry the number of workers affected by agreements is shown in the accompanying table, for the year 1949, with comparable figures for the years 1946 and 1948. (The total for 1947 was 1,120,310; details for this year were published in the *LABOUR GAZETTE*, December, 1949.) This table was compiled from information received from employers in the annual survey of wage rates and hours of labour in Canada, supplemented by additional information from employers and unions. In the great majority of cases, then, the number of workers is that reported by individual employers or employers' associations. In the remainder, the unions' estimates were used; these apply mainly to agreements made between a local union and a number of employers each of which employs a small number of workers, e.g. many of the construction trades agreements.

The proportion of paid workers in all industries in Canada who were covered by the terms of agreements in 1949 was 34.2 per cent, using the estimate of the Dominion Bureau of Statistics of 3,580,000 paid workers in Canada at October 29, 1949. The numbers under agreement in certain main industrial groups expressed as a percentage of total paid workers in the industry were: Mining 51.2; Manufacturing 47.5; Construction 48.5; Electricity and Gas 45.5; Transportation and Communication 85.4; Trade 7.3; Service 9.7.

Although there was a substantial increase in the number of agreements, these, for the most part, were made in small undertakings and did not affect large numbers of workers. In those industries where decreases in the number of workers affected are shown, they are almost entirely the result of decreases in the number employed in the establishments under agreement, e.g. in the shipbuilding industry, and not to a reduction in the number of agreements. An exception is in the asbestos mining industry where the strike early in 1949 and subsequent conciliation proceedings did not result in new agreements being made until the beginning of 1950.

There were approximately 4,580 collective agreements in effect in the year 1949. There is no doubt a small number of additional agreements in Canada which have not come to the attention of the department, but these probably concern relatively few workers. The number of agreements does not correspond to the number of establishments concerned. Although the majority of agreements are those between one employer and one union for one establishment, there are also agreements between one employer and one union for a number of establishments located in different localities, e.g. meatpacking com-

* A file of collective agreements has been maintained in the Department of Labour for many years and summaries of representative agreements are published each month in the *LABOUR GAZETTE*. The Economics and Research Branch makes analytical studies of current agreements on file, by industry and by topic. Ten previous studies have been made covering various industries. These have been published in previous issues and have also been printed in separate bulletins. Copies of most of these bulletins are available, on request. A study on Collective Agreements in the Meat Packing Industry is in this issue. The present article is No. 12 in the series of Collective Agreements Studies.

panies; separate agreements between one employer and each of a number of unions, e.g. pulp and paper companies; agreements between an association or a group of employers and one union, e.g. in the construction industry.

The table includes the number of workers affected by agreements extended under the Collective Agreement Act of the Province of Quebec. Under this Act, the terms of agreements made between a number of employers and a union or unions may, under certain conditions; be extended by provincial Order in Council to apply to all employers and workers in the industry in the zone affected, or even to the whole province. A number of the agreements made in the Province of Quebec have been so extended, notably in the construction industry, the boot and shoe, fur, clothing, printing, garages and service station industries. The figures as to the number affected are those issued by the provincial government. In some cases more complete union agreements, dealing with union security and other clauses not covered by the Act, exist in the same industry and some workers are therefore included in each of the first two columns of the year 1949 in the table. However, all such duplications of workers are eliminated in the totals for the year.

The number of workers under agreement is greater than the total union membership in Canada. Only in closed and union shop agreements are all those affected union members. Under all other agreements, non-union employees in the bargaining unit are covered by the terms of the agreement as well as union members. On the other hand, some union members are employed in undertakings in which no collective agreement exists. Actual union

membership in Canada was 1,005,639 in 1949 (L.G., Oct., 1950, p. 1634).

In addition to agreements between employers and international or national unions, there are also a number in which the workers were represented by independent local unions, associations of employees or plant councils, whose membership was confined to the employees of one company and which were not affiliated with any central labour organization. The total number of workers under agreement who are represented by such employees associations, plant councils and unions not affiliated with a central labour organization was 113,700 or 9.3 per cent of the total number of workers affected by agreements. Most of these are not included in the total of union membership in Canada.

One of the important functions of a collective agreement is the provision for grievance procedure for the settlement of disputes which may arise between the parties. The success of these procedures, and of the established relations between employers and unions which is carried over into the negotiations for renewals or revisions of agreements (usually annually), as well as the success of conciliation proceedings provided by legislation is evidenced by the comparatively few workers who took part in work stoppages in 1949. In that year only 51,437 workers were involved in strikes and lockouts (See *Strikes and Lockouts in Canada, 1949*, a supplement to the *LABOUR GAZETTE*, April, 1950). This number represents only 1.4 per cent of the total paid workers in Canada. Of this number who were involved in work stoppages, only 20,000 went out on strike in disputes over the revision of existing agreements.

COLLECTIVE AGREEMENTS IN CANADA

(a) These totals are not the sum of the numbers in the two previous columns. Duplications are eliminated. (b) Revised.

(c) This agreement, for the building materials industry in the province of Quebec, is included under "Manufacturing" but also covers granite and marble quarrying. Information not available as to the number in each industry.

(d) Agreements affecting workers in garages and service stations, in the province of Quebec, included under "Manufacturing" also affect "Trade" in so far as service stations are concerned. Information not available as to the number in each industry.

(e) Water supply covered under "Service—Public".

(f) One agreement for several towns in Quebec included under "Trade" also includes employees of financial institutions.

(g) Agreements for building workers extended under the Collective Agreement Act, Quebec, include maintenance work and certain shop work which is not included in the construction industry in the Dominion Bureau of Statistics classification.

SENATE COMMITTEE REPORTS ON HUMAN RIGHTS AND FREEDOMS

Although recommending the ultimate incorporation into the Canadian Constitution of a National Bill of Rights, the Special Senate Committee on Human Rights and Fundamental Freedoms urged that pending the solution of certain constitutional difficulties the Federal Parliament adopt as an interim measure a Declaration of Human Rights.

Shortly before the prorogation of Parliament on June 30, 1950, the Special Senate Committee on Human Rights and Fundamental Freedoms tabled in the Senate of Canada its report based on two weeks' hearings.

Expressing the belief that many people in Canada are deeply interested in this subject, the Committee recommended the incorporation into the Canadian Constitution of a Bill of Rights to ensure the freedom and civil liberties of all Canadians.

Such a Bill would be based on the Universal Declaration of Human Rights* adopted by the United Nations on December 10, 1948.

Recognizing the existence in this country of constitutional difficulties which from time to time are the subject of Dominion-provincial consultation, the Committee urged "as an interim measure" the approval of a Declaration of Human Rights.

Such a declaration, the report states, would be valid within the jurisdiction of the Federal Government. It would not have binding force but "it would serve to guide the Canadian Parliament and the Federal Civil Service."

The report further observes: "Canada should lead the world in reliance upon the rule of law," and by ultimately adopting a National Bill of Rights "would set an example which would enhance her status among the nations. . . ."

* The UN Commission on Human Rights, which drafted the Universal Declaration, continued its work in this field at its sixth session, held at Lake Success from March 27 to May 19, 1950, under the chairmanship of Mrs. Franklin D. Roosevelt. It adopted a draft first international Covenant on Human Rights, the first of a series of measures designed to cover the whole of the Declaration and provide for the implementation of its principles by member states. The Covenant was submitted by the Commission to the Economic and Social Council, which decided that it should be referred first to the UN General Assembly, for policy decisions on certain points, and then back to the Commission for revision and possible strengthening. On November 17 the Assembly's Social Committee decided that the draft Covenant should be returned to the Commission on Human Rights for redrafting and strengthening.

Senator Roebuck's Motion

The Special Committee was formed on March 20, 1950 when on the motion of Hon. Senator Arthur Roebuck, seconded by the Hon. Senator J. J. Kinley, it was:—

"Ordered that a Special Committee be appointed to consider and report on the subject of Human Rights and Fundamental Freedoms, what they are and how they may be protected and preserved, and what action, if any, can or should be taken to assure such rights to all persons in Canada. . . ."

The order of reference also listed the names of the members who were: Hon. Senators Baird, David, Davies, Doone, Dupuis, Gladstone, Gouin, Grant, Kinley, Petten, Reid, Roebuck, Ross, Turgeon, Vaillancourt and Wood.

In conformity with the order of reference, the Committee inquired into the general subject under discussion and held eight public sessions in the course of which 36 witnesses were heard. Among the organizations represented were the Trades and Labour Congress and the Canadian Congress of Labour.

(For a report of the briefs presented by the TLC and the CCL to the Committee, see the July, 1950, issue of the *LABOUR GAZETTE*, pp. 1004-1010.)

In addition to the many briefs presented by witnesses, numerous statements and briefs were received from persons and organizations.

Life and Liberty

"It is not possible," the report states, "for your committee to give an all-inclusive definition of human rights, except in the broadest of general terms or to list the various ways in which human rights may be violated. The right to life and liberty is basic, and from this as a foundation there follows the endless ways in which life may be lived and liberty exercised, and the equally endless ways in which the life and liberty of one individual may be interfered with by another individual, or

other individuals. Men now inhabit the globe in great numbers, so that the rights of each individual must necessarily be limited by the equal rights of all other individuals. It is in order to preserve this balance of rights that governments have been instituted and laws are devised and enforced. The problems with respect to Human Rights and Fundamental Freedoms arise out of the fact that human beings must live together in communities. In order that life may continue and liberty be enjoyed, certain rules of conduct become necessary. Long and painful and frequently tragic experience has taught us some of the things we must avoid both individually and collectively if the lives of individuals are to be lived in freedom."

The United Nations

The report recalls that five years ago, representatives of forty-nine nations gathered at San Francisco to found an organization now known as the United Nations. The awakened respect for human rights which was evidenced in the Atlantic Charter and the Four Freedoms message was again reflected in the reference to basic rights and fundamental freedoms in seven of the articles of the United Nations Charter adopted at San Francisco in 1945.

In 1948, the General Assembly of the United Nations meeting at Paris adopted a Universal Declaration of Human Rights (L.G., Feb., 1949, pp. 162-5), Canada being among the nations which voted for it. In its preamble, the Declaration declares that "recognition of the inherent dignity and the equal and inalienable rights of all members of the human family is the foundation of freedom, justice, and peace in the world," and adds that "disregard and contempt for human rights have resulted in barbarous acts which have outraged the conscience of mankind."

Young Nationhood

"Canada is just commencing her life as a nation," the report states. Over the years she has gradually cast off her colonial limitations until today she has "achieved a complete and unfettered national status, together with a high place in international affairs. Representatives of the Dominion and provincial parliaments are working on the final step in the "legalistic recognition of Canada as a nation," namely an agreed procedure for the control of the Constitution in all respects.

Concurrence Before Action

The report states that the fundamental law envisaged should preferably be con-

tained within the Constitution, which in Canada is the British North America Act. This Act already contains a number of clauses protecting certain valued human rights such as the use of the two official languages, annual sessions of Parliament, elections every five years, an independent judiciary, separate schools and others. Guarantees of certain minority rights have influenced our national development and indicate the procedure that should be followed now when guaranteeing individual rights as distinguished from minority rights. Provisions which are part of the Constitution would be binding upon all persons in the country and upon all governments.

The enactment of a National Bill of Rights presents difficulties however, the reports points out. Because of Canada's harmonious association of people of different races, language and religion, respect for provincial rights as they have been defined in the past is basic. "Concurrence, therefore, is an essential requisite to constitutional progress," observes the report.

An additional difficulty is the fact that the British North America Act is a statute of the Imperial Parliament at Westminster and any legislation deriving from that body, even though on the request of its Canadian counterpart, would doubtless face opposition from Canadians desiring complete Canadian sovereignty. It would therefore be wise, the report states, to await the time when prospective Dominion-Provincial Conferences will have worked out a method for the control within Canada of the Constitution, and agreement has been reached as to incorporation in the Constitution of a National Bill of Rights.

Interim Measure

"Your Committee therefore recommends that, as an interim measure, the Canadian Parliament adopt a Declaration of Human Rights to be strictly limited to its own legislative jurisdiction," the report continues. "Such a Declaration would not invade the provincial legislative authority, but it would nevertheless cover a very wide field. While such a Declaration would not bind the Canadian Parliament or future Canadian Parliaments, it would serve to guide the Canadian Parliament and the Federal Civil Service. It would have application within all the important matters reserved to the Canadian Parliament in Section 91 and in other sections of the British North America Act. It would apply without limitation within the North West Territories."

In its general lines, the Canadian Declaration of Human Rights could emulate the Preamble and certain articles of the Universal Declaration subject to the reservations expressed by the Canadian delegates at the United Nations.

"It would declare," continues the report, "the right of everyone in Canada to life, liberty and personal security, the right of equal treatment before the law, to fair trial, to freedom from arbitrary interference with one's privacy, family, home and correspondence; to freedom of movement; to a nationality; to obtain asylum from persecution; to found a family, to own and enjoy property; to freedom of thought, conscience and religion; to freedom of opinion and expression; to peaceful assembly and association; to take part in the Government of the country directly or through representatives chosen at periodic elections by universal and equal suffrage.

"The Declaration would also state that everyone in Canada has duties to our Community and is subject to such limitations as are determined by law, for the purpose of securing due recognition and respect for the rights and freedoms of others and of meeting the just requirements of morality, public order and of the general welfare and good government of Canada."

Upon adoption by the Canadian Parliament, such a Declaration would "solemnly affirm the faith of all Canadians in the basic principles of freedom and it would evidence a national concern for human rights and security. Judges would recognize the principles of such a Declaration as part of Canada's public policy, and subsequent Parliaments would hesitate to

enact legislation violating its revered principles. . . ."

"Canada," the report maintains, "should lead the world in reliance upon the rule of law, in her respect for human rights and in her care for fundamental freedom, and in a love for liberty. Her adoption of a National Bill of Rights in due time would set an example which would enhance her status among the nations and which might lead to similar progress by others."

Affirm Human Rights

"Many of the provisions suitable for inclusion in a Bill of Rights already appear in some portions of our law, but they are not always of nation-wide application. Some fundamental rights are already expressed in the Constitution. Other provisions of freedom and security are in the Statutes and still others in decisions of the Courts, together with custom, or the commonly accepted way of doing things.

"What is required in Canada," comments the report in the closing paragraphs, "is one grand and comprehensive affirmation, or reaffirmation, of human rights, equality before the law and of security, as the philosophical foundation of our nationhood, that will assure continually to each Canadian that he is born free and equal in rights and dignity with all other Canadians, that he cannot be held in personal slavery or arbitrarily arrested, that he will always be presumed innocent of any offence until proven guilty, that he has freedom of thought, conscience, expression and movement, and so on through the Universal Declaration. Thus will Canadians know of their freedom, exercise it in manly confidence and be proud of their country."

SUPPLEMENTARY UNEMPLOYMENT INSURANCE BENEFIT

How the Program Worked Last Winter How It will Operate this Year

Supplementary benefit, provided for the first time last winter by an amendment to the Unemployment Insurance Act, will again be paid to certain classes of unemployed persons during the winter of 1950-51.

For the six-week period February 28 to April 15, 1950, supplementary benefit amounting to \$4,498,014 was paid to 98,415 claimants.

Canada's program of supplementary unemployment insurance benefit was instituted by Parliament in recognition of the higher unemployment which constitutes a special problem during the winter months.

The program is designed to protect workers who have exhausted their right to ordinary unemployment insurance benefit, or who are ineligible for certain other reasons, and who become unemployed in the winter months when employment opportunities are generally least favourable.

It was in effect last winter from February 28 (the date of its approval by Parliament) until April 15. This winter and each winter hereafter, it will operate from January 1 to March 31.

Although benefit payments do not commence until January 1, the commencing date for filing claims for supplementary benefit is December 1. Any claimant who makes application for ordinary benefit on and after December 1 and fails to meet the statutory conditions regarding the number of contributions will be immediately considered for supplementary benefit. The Unemployment Insurance Commission revised its forms for taking regular claims to make this procedure possible.

Supplementary benefit is payable, upon proof of entitlement, at approximately 80 per cent of the rate of regular benefit which the claimant would be paid if he were entitled to it. Duration of payments is in each case determined by the employment history of the applicant in the same manner as for regular benefit, but cannot exceed the number of days (excluding Sundays) between January 1 (or the date of the application, if that is later than January 1) and the expiry date of the supplementary benefit.

Classes of Persons Eligible for Supplementary Benefit

The four classes of persons eligible for supplementary benefit are listed below. Last winter it was found that approximately fifty per cent of the money paid out under the program went to claimants in class 1, about 11 per cent to those in class 2, slightly over 38 per cent to those in class 3, and less than one per cent to those in class 4.

Class 1 includes any person whose benefit year has terminated since March 31 preceding the day on which he makes a claim. (This means that the claimant had previously qualified for benefit, but his benefit year had terminated either by exhaustion of his rights or because a period of 12 months had passed since the benefit year was established.)

Class 2 includes any person who has failed to fulfil the statutory conditions respecting the qualifying number of contributions provided that not less than 90 daily contributions have been paid in respect of him since the 31st day of March immediately preceding the date of his claim. (To qualify for ordinary benefit a claimant must have made at least 180 contributions in the two years preceding his claim.)

Class 3 includes any person who has been employed in lumbering and logging in areas where that industry was not subject to payment of contributions, or in lumbering and logging together with other insurable employment, provided that he has been so employed for not less than 90 days in any period of 12 consecutive months within the 18 months preceding the day on which he makes his claim. (This provision was added

because of the fact that contributions were not payable in respect of employment in lumbering and logging, except in British Columbia, until April 1, 1950.)

Class 4 includes any person who has been employed for not less than 90 days since the 31st day of March immediately preceding the day on which he makes his claim in any employment that was brought within the scope of the Act in the 12 months immediately preceding the date of his claim, or for not less than 90 days in any such employment together with any other insurable employment. (This would apply where a person's employment had only recently become insurable; for example, by the raising of the insurable ceiling.)

With the exception of the requirement as to the number of contributions necessary to qualify, persons claiming supplementary benefit must fulfil all the conditions for entitlement to ordinary benefit. They must show that they are unemployed and that they are capable of and available for employment. They cannot receive supplementary benefit if they are disqualified under any of the provisions of the Unemployment Insurance Act; for example, if they are disqualified by reason of having

left their previous employment voluntarily without just cause.

Financing of Program

The supplementary benefit is financed by an additional contribution of one cent per day payable by every person employed in insurable employment, and a corresponding contribution of one cent per day payable by his employer, which is additional to the basic unemployment insurance contribution. These additional contributions became payable on July 3, 1950. They are paid in the same manner and at the same time as regular unemployment insurance contributions, but are earmarked for the payment of supplementary benefit. If the amount of supplementary benefit payable exceeds the revenue from contributions, the deficiency is made up by the Federal Government through a special appropriation payable out of the Consolidated Revenue Fund.

Operation of Supplementary Benefit Program in Winter of 1950

In 1950, supplementary benefit was paid for the six-week period February 28 to April 15.

¹ "Persons Claiming" indicates the total number of claims received for supplementary benefit. A person may have made more than one claim.

"Claims Paid" represents the number of claims which resulted in one or more benefit payments. This total is less than that for persons who established benefit rights, as some who qualified did not draw benefit because of either subsequent disqualification or re-employment before benefit payments actually commenced.

As at the end of June, 128,607 persons had filed claims for benefit covering unemployment during this period. The total number of claims for supplementary benefit was 139,089 but this figure included 10,482 renewal and revised claims, filed by claimants whose initial claim was interrupted by a period of employment or was reviewed at the request of either the claimant or the Unemployment Insurance Commission.

Some of the 128,607 workers who claimed benefit found employment before the statutory waiting period had elapsed, others were unable to show that they were capable of or available for work, or that they had made sufficient contributions to qualify for receipt of supplementary benefit. Of the 128,607 persons concerned, 98,415 actually received benefit, amounting in total to \$4,498,014. A provincial breakdown of the number of claimants, and the number and amount of claims paid, is shown in Table 1.

When Parliament, in February of 1950, discussed the proposal to establish a scheme for payment of supplementary benefit, it was estimated that over the three-year period 1950-1951-1952 approximately \$34 million would be paid out, and that payments would be made in respect of unemployment in a total of seven and one-half months, made up as follows: a month and a half in the year 1950 (February 28 to

April 15), and three months in each of the years 1951 and 1952 (January 1 to March 31). On the basis of this estimate, it might have been expected that the amount of benefit paid out in the month-and-a-half period this year would have been approximately \$6,800,000, or one-fifth of the total estimate of \$34 million. As has been indicated, payments up to the end of June this year amounted to less than \$4,500,000. In some cases the difficulties of verifying employment and contribution records with employers have delayed settlement of claims, but the remaining payments for 1950 will have been comparatively small.

In estimating the cost of providing supplementary benefit, it was suggested that during the periods when it was provided payments would be made to a constant figure of 80,000 unemployed. Actually, 98,415 people received benefit, but many of these drew for relatively short periods and other workers replaced them on the benefit rolls.

It is the opinion of those closest to the situation, namely the Employment and Insurance Officers of the Unemployment Insurance Commission, that this supplementary benefit plan met in a substantial way a very critical need and that, had the plan not been devised, some other means of relief to people in want would have had to be provided.

ANNUAL MEETING OF BRITISH TRADES UNION CONGRESS

Despite the advice of its General Council, the British Trades Union Congress rejected a policy of continued wage restraint during its convention at Brighton, England, September 4-8.

The Government was asked to impose statutory controls on profits, and bring in equal pay for women.

The eighty-second annual meeting of the British Trades Union Congress was held at Brighton, England, September 4-8. Approximately 900 delegates representing British unions having a total approximate membership of 8,000,000 were in attendance.

Among the notable speakers who addressed the Congress were Prime Minister Clement Attlee; Mr. Alex Rose, fraternal delegate from the American Federation of Labour; Mr. R. K. Gervin, fraternal delegate from the Trades and Labour Congress of Canada; and Sir Vincent Tewson of the General Council of the Trades Union Congress.

Presidential Address

Mr. H. L. Bullock opened his presidential address with a general review of Britain's economic situation. He noted that although devaluation of the pound sterling had been a hazardous step, it was necessary, and that so far it had accomplished its purpose in helping the country to keep its place in closing world markets, and in stimulating exports.

Mr. Bullock said that the TUC General Council had been compelled to urge wage restraints on its affiliates, but that some wage adjustments had been made since the war. It had not been the Council's intention to suspend normal wage negotiations, but he said that a new cycle of wage demands was a different matter.

However, Mr. Bullock felt that every effort should be made to boost the wage rates of the host of members whose basic rates paid them less than £5 per week. He said that wage rates should be substantially increased for these people.

It would have been impossible for Britain to have reverted to pre-war conditions following a war such as World War II, he said, but too many people had thought this could be done. The Labour Government of 1945 had avoided wage reductions such as former post-war governments had done, and the people of Britain were better off than they had been following any other war.

The TUC had co-operated with the Government and despite unreasonable and impractical statements by some sections of the trade union movement, most labour men had shown balance and understanding. Mr. Bullock added that the standards of the British workers could stand comparison with those of any other in the world.

The gathering of war clouds in recent weeks has dimmed the hopes of the workers for more elasticity in wages and improved working conditions, Mr. Bullock said, but the burden on the worker would have to be eased. British employers would have to use profits to improve their industries, and enable them to compete successfully with better mechanized industries in other countries. This must not be done, however, so as to exploit the workers. He noted the satisfactory progress in mechanization achieved by the nationalized industries, and said that the results obtained there would satisfy any impartial observer.

Mr. Bullock deplored any rash, large-scale action by trade unionists because of the pressure of high prices. Such action, he said, could undermine present living standards, and any move to ease the situation would have to be based on objective and reasoned observation of Britain's present situation. Any unofficial strikes or work stoppages would destroy all the efforts by the unions in wage negotiations. Mr. Bullock urged the workers to be on guard against those with authoritarian and totalitarian ideas who were inciting world disturbances and armed conflicts behind the screen of a "phoney" peace campaign.

"We are too near to the grim results engineered by Hitler and his gangster accomplices to be taken in by the antics of those troglodytes behind the Iron Curtain and their stooges, catpaws, and deluded supporters on this side of the Iron Curtain," Mr. Bullock said. He strongly urged the maintenance of the rule of law by the United Nations, and said that the alternative to this would be world ruin.

Urging the Congress delegates to continue their long record of support for the principles of peace and freedom, Mr. Bullock asked the delegates to give whole-hearted support to UN action in Korea. He emphasized the fact that this decisive action had not only set at rest any doubts about the power of the United Nations, but that it had also increased the country's responsibility in supporting these actions.

Another organization which the TUC President felt was making good progress was the newly formed International Confederation of Free Trade Unions. Mr. Bullock described it as a genuine trade union international.

Commenting on the nationalized industries, Mr. Bullock said that public ownership had been the only salvation of the coal and transport industries. Nationalization had brought great changes to these industries in the face of great obstacles. Mr. Bullock did not intend to imply that what had been done was perfect, or that no mistakes had been made, but he felt that it was unlikely the Opposition parties would try to denationalize these industries.

Many of the most experienced and able labour leaders have taken positions on the boards of the nationalized industries and must be replaced, Mr. Bullock said. In training people to replace them in their union positions, attention would have to be given to the technical needs of industry. Mr. Bullock also suggested that in wage negotiations, employers must be told that they should have trained production engineers to ensure competent plant reorganization and more efficient and scientific methods to help increase productivity.

In closing his address, Mr. Bullock reminded the delegates of the importance of accepting responsibility, and building morale in order to make a success of nationalization and other Socialist measures.

Prime Minister Attlee's Address

Prime Minister Clement Attlee addressed the delegates on the second day of the Convention. Speaking generally on the British economic recovery program, he said that:—

1. Devaluation was having the hoped for effect in British economic recovery;
2. The co-operation of all Britons was responsible for this success;
3. The policy of restraint adopted by all levels of the labour movement had been a great contribution;
4. The government had never intended to impose wage rates; and was of the opinion that the machinery of collective bargaining should be maintained;

5. The government had felt duty-bound to keep both workers and employers informed on the broad consideration of the economic position.

Mr. Attlee said that at no time did the Labour Government give direction to those arbitrating claims, because to have done so would have destroyed the usefulness of such machinery. Rather than imposing any wage freeze, the Government relied on the co-operation of the workers—"and they did not rely in vain."

The Government had found itself in the position where it could suggest some measures of relaxation of this program as conditions improved, Mr. Attlee said, but the need for restraint remained. This restraint was still necessary because the danger of inflation was still present, and the large expenditures on armaments which were imminent would add to the danger.

Mr. Attlee said that the achievements of the country since 1945 had been widely recognized by foreign observers, but some people in Britain had suggested that it was all due to aid from Canada and the United States. Freely acknowledging the benefits of this outside aid, Mr. Attlee pointed out that despite her own troubles, Great Britain had played a large part in assisting general world recovery.

Speaking of Russia, Mr. Attlee said it was unfortunate that we have not been able to work with her as closely in peace as in war. He condemned Communist tactics in Korea and warned the delegates of the consequences of giving in to aggression. He welcomed the support of organized labour in the struggle to maintain peace.

Mr. Attlee explained that the measures for defence which Parliament would be asked to pass were designed to deter any would-be aggressor. Pay for servicemen would be increased, one reason for this being to include long-term enlistment. In line with this program, Mr. Attlee asked for trade union co-operation on three points: first, to recognize service-trained tradesmen and thus smooth their rehabilitation into civilian life; second, to assist in resettling discharged regular army men whether skilled or not; and third to allow men in service to retain their union membership.

Redeployment of labour would be necessary, and would perhaps work hardships, Mr. Attlee said. There would be less goods and services available to consumers because of defence production. This could be offset to some extent by increased production and productivity, and even greater labour-management co-operation.

"We have asked the nation to accept sacrifices in the interest of security," the Prime Minister continued. "We shall do our utmost to see that these sacrifices are fairly borne. Some people will be giving up some leisure, others will be passing a longer period of their lives in the armed services, others will have to forego some hoped-for amenities. I ask you to regard any alterations in your working conditions as your contributions to ensuring the safety of the nation. The times in which we live are difficult and dangerous, but I am certain that the British trade union movement will not fail to respond to the challenge of the age. I can assure you that we in the Government will continue to do our utmost to realize the great aims of the Labour movement."

Rejection of Wage Policy and Demand for Profit Controls

Disregarding the advice of their General Council, the Congress delegates voted to overthrow the policy of wage restraints which had been followed for over two years. The resolution was a composite one demanding profit controls as well as wage increases.

The section of the General Council's report dealing with wages was defeated by a vote of 3,898,000 to 3,521,000, a majority of 377,000; and the demand for profit controls was adopted 3,949,000 to 3,727,000, a majority of 222,000.

The resolution on wages, prices and profits, which thus became TUC policy, reads as follows:—

This Congress notes that since the issue of the White Paper on personal incomes, profits, and prices, profits and prices have continued to rise and the living standards of large sections of the working community to fall. Congress protests that no effective steps have been taken to prevent this continued trend on increasing profits.

Congress is of the opinion that until such times as there is a reasonable limitation of profits, a positive planning of our British economy, and prices are subject to such control as will maintain the purchasing power of wages at a level affording to every worker a reasonable standard of living, there can be no basis for a restraint on wage applications.

Congress declares that wage increases can be met without resulting in increased prices, for example, by reducing profits, and therefore calls on the General Council to abandon any further policy of wage restraint, and at the same time urges the Government to introduce statutory control of profits.

Fraternal Message of TLC Delegate

Speaking as the Fraternal Delegate from the Trades and Labour Congress of Canada, Alderman R. K. Gervin of Vancouver

stressed the need of solidarity among the democratic countries of the world. Mr. Gervin said, in part:—

"We have had enough experience of Communism to be entirely certain that military measures are not enough to compete with the well-armed bandits now in control of Soviet Russia.

"We have dealt with dictatorships before. We are dealing or will deal with this one—the worst of them all. Today more perhaps than ever in history we must realize the full value of our democratic institutions to meet the threats to our established freedoms.

"The best and surest attitude is to make our democratic way of life operate effectively in the best interests of all."

Mr. Gervin reviewed the development of trade unionism in Canada, and spoke of Canada's resources and her social progress. He told the Congress that the example of the five Tolpuddle Martyrs still inspired Canadian trade unionists.

Labour in Canada had become a powerful force, Mr. Gervin said, and stood ready to give its full support in the struggle to support democracy. He praised the solidarity of working people throughout the Commonwealth.

Substantial wage gains had been won by the Canadian worker, although price increases had detracted from their value. Mr. Gervin told the delegates his Congress would welcome a return of the price controls removed after the war.

Other Resolutions

The Convention adopted a resolution which declared that a policy of equal pay for equal work should be adopted in Britain, and urging that the Government, by adopting this policy itself, give the lead to other employers. This resolution was passed in opposition to the advice of the General Council.

Another resolution was adopted asking for a government inquiry into the relation between production costs and retail prices. This resolution also asked for re-examination of the effects of the purchase tax and consideration, by the Government, of its removal from all items except those in the luxury category.

After lengthy discussion, a resolution calling for immediate discontinuance of the conditions of Employment and National Arbitration Order was rejected by the delegates.

The General Council presented a supplementary report on the public control of industry. The report compared the different methods of controlling industry.

The object of this report was to see how wages and working conditions could be improved, and how labour's influence in industrial planning and management could be extended. The report was adopted by the Convention.

A group of resolutions proposing that the administration of nationalized industries should be controlled by industrial parliaments, to be established for each industry, was rejected. These resolutions had also asked that at least one-third of the members of the Boards of these industries represent the trade union movement.

The Convention urged that the benefits of increases in productivity be passed on by industry to consumers through lower prices; and to the worker by better wages and working conditions.

A resolution was passed, asking the General Council "to give early attention to the financial structure of the mining and

transport industries with a view to securing an easement of the burden of compensation and redemption funds on these industries."

Other resolutions were passed dealing with the National Insurance (Industrial Injuries) Act; the need for statutory provisions for the health, welfare and safety of office and other workers not covered by the Factories Act; the erection of small health centres; continued co-operation between the TUC and the Government regarding full employment and economic planning; education and housing. Several other resolutions were passed, and a number of others were remitted to the General Council for further consideration.

The new Chairman of the TUC for the coming year is Mr. Alfred Roberts, General Secretary of the Amalgamated Association of Card, Blowing and Ring Room Operatives.

ANNUAL CONVENTION OF AMERICAN FEDERATION OF LABOUR

The 69th Annual Convention of the American Federation of Labour met in Houston, Texas, from September 18-23. President William Green in his keynote address urged an end of United States trade with Russia and higher wages. The delegates passed resolutions asking for defeat of the Taft-Hartley Act; and more social legislation.

Representing nearly 8,000,000 organized workers, some 600 delegates attended the 69th Annual Convention of the American Federation of Labour held in Houston, Texas, September 18-23.

The aim of the Convention, as expressed in the official AFL publication the *American Federationist* was "to help the nation to mobilize its strength for the establishment and maintenance of world peace and security."

During the sessions, the delegates considered 128 resolutions, as well as several matters brought before the Convention in the Executive Council's Report.

Action was taken on a wide range of subjects of interest to members of the Federation, including a national emergency policy to insure a balanced economy; a demand for price controls; opposition to wage freezes until wages have risen to catch prices; continued effort for repeal of the Taft-Hartley Act; an expression of "earnest hope and desire" for labour

unity; denunciation of Russian tactics; support of the UN action in Korea; demand for labour participation on administrative control agencies; a pledge of continuing support to the ICFTU; and reaffirmation of AFL support for the Marshall plan and the "Point Four" program to aid underdeveloped countries.

Among the many speakers who addressed the convention were Secretary of Labour, Maurice J. Tobin, Oscar R. Ewing, Federal Security Administrator, Wayne Morse, Senator from Oregon, Tom Daugherty, general secretary, Australian Workers' Union, W. Averell Harriman, special assistant to President Truman, Gust De Muynck, assistant general secretary of the ICFTU, J. C. Turner, ILO labour counsellor, Roger Provost, fraternal delegate from the Trades and Labour Congress of Canada, R. O'Hare Lanier, president Texas State University, Francisco Aguirre, secretary general of the Inter-American Confederation of Workers, Miss

Florence Hancock and Sir William Lowther, British fraternal delegates, and Lawrence Hair, New Zealand fraternal delegate.

Address of President William Green

The Convention opened with the keynote address of President William Green, who pledged to fight "with all the power that we possess to lift the wage level up so that it is established on a parity with prices before there is any freezing of wages." He also urged defeat of those congressmen who had voted for the Taft-Hartley Act.

Speaking on international affairs, Mr. Green strongly denounced Communist aggression in Korea. He said:—

I am sure you are all thinking about the tremendous war that is being carried on in Korea. It is disturbing us very greatly because they are calling for our sons to go there and fight for the preservation of liberty, freedom and democracy. Our feelings have been aroused because of the lying misrepresentations that have been made by the Communist government, in which they accuse America of being responsible for this terrible situation in Korea.

A great many of us think that it was the Russian army, equipped and financed by Russia. At any rate it was the North Korean communists that crossed the line into South Korea seeking to rob that country of its independence.

This convention should call upon our government now to stop buying anything from or selling anything to Russia, stop shipping goods to Russia from America because she will use them for the purpose of preparing for war.

Mr. Green predicted that "free, liberty-loving nations are going to win another great victory." The AFL had responded promptly to the government request for labour's support and co-operation in the war and national defence effort. However, the Federation intended to keep watch against profiteering and unjustified price increases. He maintained that "there is no justification for the mounting costs of food and those items that enter into the cost of living. . . ."

The AFL is opposed to wage and price freezing now because "such action . . . would mean freezing prices up high and wages down low," Mr. Green said. He pledged the Federation to "fight with all the power we possess to lift the wage level up so that it is established on a parity with prices. . . ."

Mr. Green strongly repudiated those in Congress who had "refused to listen to us and who voted for the notorious Taft-Hartley law." He reasserted the AFL's

"firm and fixed determination to fight on until we bring about absolute and unequivocal repeal" of the law.

Mr. Green also praised the new United States social security law; pledged continued AFL support to the International Confederation of Free Trade Unions; and promised that the AFL will stand steadfast against any Communist infiltration.

President Truman's Message

President Harry S. Truman was unable to accept the Federation's invitation to address the Convention, but sent a message which was read to the delegates.

Mr. Truman extended his cordial greetings to the Convention, and noted the AFL's "long history of service to wage-earners . . . enabling them to improve their working and living conditions in such a marked degree it has rendered a signal service to the nation as a whole."

The President's message also referred to the amended Social Security Act of 1935, and supported the Federation's stand against the Taft-Hartley Act.

Concluding his message, Mr. Truman said:—

American workers will, I know, go all out in their efforts to expand our total production so that we can arm ourselves and help arm the free world. It is in this way that we will make the United States and the democratic nations powerful enough to meet the challenge of communist imperialism that today is a world menace.

Our workers will be joined by industry and farmers in a co-operative American effort to produce the goods our armed forces and the United Nations need in order to cope successfully with the world situation. The job will be even better done than it was in World War II when we broke all production records and in so doing helped to put down the threats to the freedom of liberty-loving peoples.

Now our capacity is greater, the danger is ever-threatening and our determination is, as it always has been in our history, to preserve the American way of life for our children and our children's children. That we shall do by working together, sharing sacrifices willingly, in order to preserve the institutions of democracy to which we owe our happiness as a nation.

Address of Canadian Fraternal Delegate

Mr. Roger Provost of Montreal, fraternal delegate from the Trades and Labour Congress, brought fraternal greetings from the TLC to the AFL. Mr. Provost described the Canadian and American labour movement as "a solid and immovable bulwark against any tyranny which may, now or at any other time, threaten our hard-won freedoms and democracy."

Discussing the "unique" trade union situation in the Province of Quebec, Mr. Provost, said, in part:—

Almost the entire population of the Province of Quebec is of French descent, and almost all are descendants of people who lived in the northern part of France. They settled in Quebec centuries ago. They were living in Quebec long before the French Revolution and were largely unaffected by it. In fact it is fair to say that France is the New France; Quebec is Old France.

These French-speaking people brought their religion with them, and Roman Catholicism is still one of the strongest influences in the personal, family, and community life of the Province. While the Church has not opposed trade unionism, it has taken a different attitude in the Province of Quebec from what it has taken in the rest of Canada and in your country. While not opposing, and even in some cases encouraging, international trade unionism in the United States and the rest of Canada, the Church in Quebec has maintained and still does, that its members should belong to local unions closely associated with the Church, with adherence to the Catholic faith as a condition of membership.

In spite of this, however, our international unions have substantial memberships in the Province and their membership is growing. The bulk of that membership is composed of devout French-speaking Catholics. They believe that more of their working brothers and sisters should become members of, and enjoy the benefits of, international trade unionism. As a result the Quebec Federation of Labour of the Trades and Labour Congress of Canada is initiating a powerful membership and organizational campaign. We in the Province of Quebec have high hopes for the success of our organizing drive and I have given this background sketch so that you here in the United States may be better able to appreciate our problem in dealing with the unique trade union situation in the Province of Quebec.

The speaker sketched for the delegates the action which his Congress had taken at its Convention to close its ranks against Communist infiltration (L.G., Nov., 1950, pp. 1792-1807). Internationally, Mr. Provost declared "Korea (is) a stern warning of what may lie ahead." He emphasized Canadian labour's determina-

tion to resist all aggression, and said that "Canada will stand firm."

Canada's efforts to aid in world preparedness will mean a considerable diversion from civilian to military production, and "this cannot fail to have a worsening influence upon the cost of living," Mr. Provost said. The TLC wants "curbs placed upon inflation . . . (and has) urged the Government to take the necessary steps to control prices."

The Trades and Labour Congress did not want the "arbitrary" controls imposed during the last war, Mr. Provost said. His Federation wanted organized labour to be consulted before any controls are imposed. He said:—

Under our present wage contracts which are binding legal agreements our wage structure is the most stable part of our Canadian economy. We do not want to see that disturbed. In fact what we want is a similar approach to prices. We want prices negotiated in much the same way as we negotiate wages. When we negotiate wages we, as workers, through our union, come to an agreement with our employer. When the employer wants to change his price he doesn't have to negotiate with anybody under present conditions. We want him to have to negotiate with the consumer, and we are satisfied that that can be done by creating a government board on which there will be labour representation before which every price must be considered before it can be changed. In this way we can obtain both short-run and long-term price stabilization; the stability we have achieved in wages can be maintained and strengthened without submitting to wage freezing, and organized labour will be able to wield sound and responsible influence over our economy and our living conditions whether in peace or war.

Mr. Provost also spoke on the recent Canadian railway strike, and the joint stand taken by the TLC and CCL.

Concluding his address, Mr. Provost said, ". . . if we take to the world's peoples our tried and proven ways out of which have come personal freedom and civil liberty, the time is not too distant when working men and their families in all of the countries of the world may join with us in life, liberty, and the pursuit of happiness."

Labour Unity

A statement on labour unity was read into the Convention records by AFL vice-president Charles MacGowan. Mr. MacGowan, speaking on behalf of the Executive Council said:—

I want the record to show that the Executive Council of the American Federation of Labour is sincerely and genuinely trying to bring about organic unity in the American labour movement.

The Executive Council report to this convention shows that we have had conferences. They have been cordial and they have been friendly.

We make no promises as to what may come out of them. The conferences were suspended because of the conventions of both the American Federation of Labour and the Congress of Industrial Organizations, plus many international union conventions.

We have high hopes and we will work diligently to bring about the condition that the rank and file of the American labour movement wants—and that is organic unity.

Other Resolutions

Among the other resolutions passed by the Convention were the following:—

A request for a lower tax on small incomes and increased excess profit taxes;

A proposal for an increase in the legal minimum wage to \$1 per hour;

Reaffirmation of support of low-rent public housing;

Reaffirmation of support of President Truman's civil rights program and particularly for legislation to compel fair employment practices;

A request for the United States Government to restate the American democratic creed to enhance its practical appeal to impoverished or oppressed people of other continents;

A request for Congress to pass pending national health insurance and public health legislation.

Election of Officers

The Convention re-elected William Green as president for his 27th consecutive term. Mr. Green has been president since he succeeded Samuel Gompers, founder of the AFL, in 1924. Re-elected with Mr. Green were Secretary-Treasurer George Meany, and all thirteen vice-presidents, who serve as the Executive Council.

DEVELOPMENT OF A POLICY FOR INDUSTRIAL PEACE IN U.S. ATOMIC ENERGY PLANTS

A recent study of labour relations in U.S. atomic energy plants describes the efforts of management, labour and government to maintain democratic procedures of collective bargaining in an industry where it is necessary to avoid strikes.

How one of the United States' essential industries—atomic energy—has avoided disastrous strikes is the subject of a pamphlet issued by the National Planning Association¹ entitled *The Development of a Policy for Industrial Peace in Atomic Energy*. The author, Donald B. Straus, is Executive Secretary of the Atomic Energy Labour Relations Panel.

The report derives unusual interest from the fact that collective bargaining in the atomic energy industry is complicated by the third-party role of government in guarding the national security and in controlling all costs of the program.

The purpose of the report is stated to be to increase public understanding "(1) of

the intensive efforts being made by management, labour, and the government to maintain democratic procedures of collective bargaining in a government-owned, privately-operated plant; and (2) of the complexities of collective bargaining in other essential industries."

Use of Flexible Methods

The progress that has so far been made in the search for democratic methods of safeguarding industrial peace in the atomic energy industry is attributed, in the report, to voluntary and flexible methods rather than legal compulsion for solving labour-management disputes.

The present national policy on labour relations in the industry is recognized by those who framed it, and by contractors and unions operating under it, as a compromise rather than a precise guarantee against interruptions of vital production, it is stated. However, according to the author, it has gained acceptance by the parties concerned because it seems to

¹ The National Planning Association describes itself as a "non-profit, non-political organization, devoted to planning by Americans in agriculture, business, labour and the professions." Its Committee on the Causes of Industrial Peace under Collective Bargaining, which has issued a series of studies on labour-management relations (see p. 2045) comprises well-known representatives of U.S. labour and industry, and prominent observers of industrial relations.

provide the maximum assurance possible against strikes without depriving management and labour organizations of the initiative and freedom necessary for the progress of the atomic energy program.

Threat of Strike in 1948

The report points out that a strike threat at Oak Ridge, Tennessee, in the summer of 1948, directed attention to labour relations in atomic energy. The President appointed a Commission on Labour Relations in Atomic Energy Installations, with the request that it suggest a desirable policy for the conduct of labour relations in the industry. The investigations of the Commission resulted in the establishment of an Atomic Energy Labour Relations Panel, which was appointed by the President in April, 1949, to assist in peaceful settlement of disputes in vital parts of the program.

The Panel was faced at the outset with reconciling two objectives of the Atomic Energy Commission, not easily compatible: first, the need for national security, and second, the desire to assimilate the atomic energy industry into the normal business structure of the country so far as possible. The Commission, it is stated, has consistently encouraged collective bargaining between the contractors and their employees on the normal and typical aspects of wages, hours, and working conditions, and has refused to interfere in bargaining sessions. At the same time the AEC has had to carry out its responsibility for controlling costs of the program and for protecting it against espionage and sabotage—which unavoidably affects the attitudes of management and unions at the bargaining table.

Procedures of Labour Relations Panel

The complex, intertwined relationships of the various parties concerned make the Panel's work difficult because of the wide variety of interests and the range of activities involved. Actively participating in the atomic energy program are the Government, including Congress and the Atomic Energy Commission, representing the public interest; contractors, including universities, representing private industry; the American Federation of Labour and the Congress of Industrial Organizations, representing workers with many different skills, who must consider their internal political problems and the effect of contracts in atomic energy on their members elsewhere.

A fundamental element in the success of the present policy is the reliance upon labour-management co-operation rather than legislation or dictation by the AEC. Companies and unions in the atomic energy program have agreed not to cause any interruption of production through strikes or changes in the basic working agreements without first giving the Panel a chance to resolve the differences. When one of the parties to a dispute in atomic energy feels that it has gone as far as possible in collective bargaining and still has not been able to negotiate terms which are acceptable, it may then notify the Panel. This is in tacit recognition that the right to take economic action of any kind remains in escrow with the Panel until after this impartial group has either (1) dismissed the case as one affecting a non-essential part of the atomic energy program, or (2) had an opportunity to settle it. In theory, at least, no strike in atomic energy is possible until the Panel has been officially notified of the dispute and has followed its procedures. Thus the nation is safeguarded against any surprise emergency—and is further protected by the deliberative processes of the Panel.

The procedures of the Panel purposely are indefinite. This is primarily to allow the Panel every opportunity to bring about an agreement but also to avoid letting the parties know in advance what to expect from the Panel so that they will be less eager "to relinquish their own responsibility for working out a solution." According to the author, the "fuzziness" of outline in part distinguishes the Panel's procedures from compulsory arbitration. A further distinction, he points out, is that Panel recommendations are by no means an assured part of the process nor, once given, are they binding. They can be accepted or rejected by the Atomic Energy Commission, the contractor, or the union.

Attitude of Labour

It is interesting to note the author's statement that, prior to the establishment of the Panel, both AFL and CIO unions tended to favour the institution of compulsory arbitration in atomic energy plants. An AFL statement pointed out that "emotional pressures from the public, Congress, and [labour's] own organizations, due to the tremendous public interest involved, serve as restrictions upon labour from exercising its prerogatives" (i.e. the right to strike). An AFL officer said: "Bargaining with contractors, with the practical right to strike non-existent, is just mere shadow boxing."

A CIO official told a Joint Congressional Committee that "the possibility of a strike and the threat of a strike" is "part of the system of settling labour disputes in this country."

With the possibility of strikes removed, it seemed to both organizations that some modification of the collective bargaining process was necessary. "As a matter of fact," the author states, "both unions tried to avoid the word 'compulsory' in connection with arbitration, as this implied legislation and a standing injunction against strikes in the atomic energy industry. Legislation of this kind, both unions felt, would have far-reaching and evil effects on industrial relations. They also argued that experience in other countries showed that compulsory arbitration is not necessarily an airtight safeguard against strikes. Both unions preferred to have AEC require all of its contractors to agree 'voluntarily' to submit all disputes that could not be settled at the bargaining table to arbitration. In return, the unions were willing to agree 'voluntarily' not to strike."

Avoidance of Special Legislation

Commenting on the necessity for avoiding strikes in atomic energy plants, the author declares:—

"Any formula that blocks strike action must also provide an alternative means of achieving a settlement that will be accepted by the parties. The only full substitute so far invented is compulsory arbitration. But time and again in the history of industrial relations, both here and abroad, compulsory arbitration has failed as a positive guarantee against strikes. Unless an arbitration award is acceptable to both management and the union, a strike remains a very real possibility, and neither laws nor other compulsions are certain safeguards.

"Compulsory arbitration has the further drawback of harming the collective bargaining process. Experience has proved over and over again that when arbitration is known to be available at the end of the bargaining road, even those disputes which might under normal conditions be settled without a strike are pushed on to the arbitrator for decision. The President's Commission sensed that this would be especially true in atomic energy, since both unions and management were so concerned with the precedent-setting effect of collective bargaining in this field. A union faced with a wage settlement which it feels would be unpopular among the rank and file, and which perhaps is less than it hopes to get by calling a strike elsewhere, will often

prefer to have the settlement decreed by an outsider, thus disclaiming any responsibility for, or acceptance of it. Similarly, management may prefer to be 'forced' into a wage increase which under the circumstances seems inevitable—but which it thinks is greater than it would agree to in its home plants—than to have the increase set as a 'voluntarily' reached precedent."

The President's Commission, in avoiding any recommendation for special anti-strike or arbitration legislation in atomic energy, put its faith instead in creating the most favourable environment for achieving agreements.

In its report to the President it said:—

We make no recommendation for enactment of special legislation at this time, believing that the recommendations or something substantially equivalent to them should be given a trial for a period of 2 or 3 years. If they failed to secure continuity of production at any vital Government-owned, privately operated atomic energy installation, the effect would be to throw the full responsibility back into the hands of the Atomic Energy Commission. If this responsibility then seemed to make any special legislation necessary—Congress would have the benefit of that experience in considering such special legislation.

Cases Heard by Panel

On June 10, 1950, the Atomic Energy Labour Relations Panel had been in existence for over a year and had been called in on eleven cases. Nine had been settled satisfactorily by a variety of techniques and two were still in process.

Four cases—two in construction at Oak Ridge, Tennessee, one involving a unit of guards at the Mound Laboratory in Miamisburg, Ohio, and one involving the determination of the appropriate bargaining unit at Sandia Laboratory in Albuquerque, New Mexico—were settled after the Panel was called in, but before it formally accepted them.

One case involving job classifications at the Mound Laboratory was settled by the Panel's repeated referral of the dispute back to the parties for more bargaining.

One wage case on a new construction job at the K-29 and K-31 building sites at Oak Ridge was settled by arbitration, although a short wildcat strike—quickly put down by union officers—marred the orderly handling of the case.

Two wage cases—one at the X-10 Laboratory at Oak Ridge and one at the Mound Laboratory—were mediated to settlement after the Panel had stimulated the parties to seek further agreement on basic facts.

The Panel made a formal recommendation on one case involving jurisdictional problems on an assignment of work for the new K-29 and K-31 plant sites at Oak Ridge.

The two cases still unsettled were over wages—one in the K-25 Plant at Oak Ridge and one at Knolls Laboratory in Schenectady, New York.

An important factor in agreement-making to date and for the future, the author stresses, is the strong moral responsibility felt by contractors and labour unions to maintain atomic production. Both not only have patriotic motives, but also recognize that if the present policy proves ineffective in avoiding disastrous strikes in atomic energy, public opinion will demand that work stoppages be outlawed by drastic legislation—which, by extending government control over wages and working conditions, might have far-reaching effects on collective bargaining outside the industry.

Difficult problems in atomic energy labour relations still remaining unsolved are raised by the author. One is the reconciliation of reasonable cost control by AEC with non-interference in collective bargaining between the contractors and their employees. Steps have been taken to work out with the contractors and unions involved broad principles which can serve as criteria for wage costs which the AEC will reimburse, but which will be sufficiently general to allow ample room for bargaining. No definite principles had been agreed to at the time the report was written.

Strikes and the Public Interest

A foreword to the report sketches the nature of the basic problem of maintaining peace in the atomic energy, as in other essential industries, as follows:—

“Strikes in essential industries present one of the great American dilemmas. They emphasize the frequent conflict between individual freedom and the common welfare.

“By law and by tradition, the right to strike is an accepted feature of our democratic society. American workers should be free to exercise their economic strength in order to obtain fair wages and good working conditions. The strike is their strongest weapon and ultimate source of power.

“Nevertheless, we recognize that the exercise of that right should not be abused

to an extent where it irresponsibly threatens the overriding public interest. Modern technology has so increased specialization and thus the economic interdependence of our people that strikes in essential industries may disastrously affect the general health and safety. Today, a few strategically placed individuals can make decisions adversely affecting millions of their fellows.

“Certainly when there is a conflict between individual freedom and the public welfare, the latter must come first. When disagreements occur between employers and employees in essential industries, the public cannot tolerate prolonged work stoppages to force one side to change the position of the other and thereby reach ‘agreement.’ Our government neither can nor should permit parties to collective bargaining in these industries the extravagance of a genuine test of strength by a prolonged work stoppage.

“No democratic government has long stood idly by in such cases, and none could remain long in office. Thus while the unlimited right to strike or lockout exists in theory, in practice it is a limited right—it exists only so long as it is not used beyond the limits of the public’s tolerance. . . .

“As a last resort, American governments have always stepped forward to end prolonged work stoppages in essential industries. Doubtless they will continue to do so—and with continued public approval. But what they should do *after* they step forward is subject to much less agreement. Compulsory arbitration, injunction, and plant seizure have been tried and generally found wanting.

“In atomic energy, the experiment of not announcing in advance the precise nature of the government’s proposed action is being tried. Flexible and non-legalistic techniques are being employed.”

The foreword adds that “it is clearly too soon to reach a final judgment as to the success or general applicability of the techniques being employed. But the short record is an encouraging one and future developments deserve careful attention.” There may well emerge, the statement continues, “a common law,” based on experience and precedent, that will have implications for management-labour relations in other essential American industries.

CAUSES OF INDUSTRIAL PEACE UNDER COLLECTIVE BARGAINING

Significant parallels in the basic causes of industrial peace are found in the eight cases so far studied by the National Planning Association, in its attempt to find an answer to the question "What Makes Industrial Peace?"

For its eighth case study of the causes of industrial peace under collective bargaining, the special committee of the National Planning Association selected for analysis the Marathon Corporation, described in the report as "one of Wisconsin's leading companies in the highly competitive paper industry."

In a statement accompanying the authors' analysis, the NPA committee stresses the value of this particular study as a companion piece to Case Studies Nos. 1 and 7, which dealt with paper companies on the West Coast and in New England (L.G., 1949, p. 703, and April, 1950, p. 438).

This study, it is claimed, adds further strong evidence that constructive and reasonable attitudes of employers and union representatives toward bargaining are far more important in achieving industrial peace than outside factors such as the size, profitability, or location of the company, or the number of unions involved.

Marathon Corporation and Seven Labour Unions

The thirteen-year record of Marathon's peaceful relations at four Wisconsin plants and one Michigan plant has been marked by integrity, good faith, and a willingness to bargain on the part of management and unions, according to the report.

The company deals with seven unions, composed of all of the company's production and maintenance workers, numbering about 3,000. The bulk are members of AFL's twin paper unions, the International Brotherhood of Paper Makers, and the International Brotherhood of Pulp, Sulphite and Paper Mill Workers. The rest are members of four AFL printing unions and the independent International Association of Machinists.

The record shows that there has never been a strike at Marathon. Arbitration has never been resorted to, although contracts call for arbitration of differences over the interpretation and meaning of the contract. Neither the company nor any of the unions has resorted to the courts, and governmental administrative agencies have been called in on labour relations matters only

when the law required it. Conciliation has been resorted to but twice, and on one of these occasions the matter was beyond the control of both the company and the local union. Both company and union credit the recent president of the 40-year old company as the "principal architect" of the relationship.

The authors of the report conclude that there are twenty factors which have contributed in varying degrees to the remarkable record of industrial peace at Marathon. There seems no question to them, however, that most important are the facts that Marathon's management officials act on the principle that "a company gets just about the kind of labour relations it asks for" and that the unions with which Marathon deals have a record of responsibility and maturity.

The committee and the authors show that the company, the union, and the public have gained from this constructive relationship. The company has prospered and steadily expanded. Its sales have increased about five and one-half times; employment has almost quadrupled; and profits—figured on sales or net worth—are satisfactory. The workers have received wages above local levels, comparable to competitive rates within the industry as a whole, but somewhat below metropolitan standards. In addition, fringe benefits account for a sizeable amount of the company's wage bill. Employment has been steady and turnover low. Both the company and the unions recognize the peril of losing customers due to work stoppages. There has been no collusion against the consumer through arbitrarily high prices.

Referring to earlier Case Studies of pulp and paper companies, the NPA committee explains that three studies were made in the same industry in order to see how unions which have peaceful relations with one company fared with other companies in different geographical locales and under different bargaining conditions. "We wanted, too, to explore the effects that the size of the bargaining unit and the presence of multi-union bargaining had on specific relationships. Thus, although

there are similarities in these three cases, there are also important points of difference." For example, Crown Zellerbach Corporation (*Case Study 1*) is the second largest pulp and paper company in the country and it bargains as part of a region-wide employer group on the Pacific Coast. Nashua Gummed and Coated Paper Company in New Hampshire (*Case Study 7*) has less than 1,000 employees and it bargains individually with seven unions. Marathon is between the two, both geographically and in size, and it bargains with seven unions individually. Nevertheless, the authors and committee find significant parallels in the basic "causes" of industrial peace in the three paper companies, as well as in the other *Case Studies* of other companies in other industries.

The Marathon study reaffirms the importance of the following factors found in the seven previously studied situations:—

1. There is full acceptance by management of the collective bargaining process and of unionism as an institution;
2. The unions fully accept private ownership and operation of the industry; they recognize that the welfare of their members depends upon the successful operation of the business;
3. The unions are strong, responsible, and democratic;
4. The company stays out of the unions' internal affairs; it does not seek to alienate the workers' allegiance to their unions;

5. Mutual trust and confidence exist between the parties. There have been no serious ideological incompatibilities;
6. Neither party to bargaining has adopted a legalistic approach to the solution of problems in the relationship;
7. Negotiations are "problem centered"—more time is spent on day-to-day problems than on defining abstract principles;
8. There is widespread union-management consultation and highly developed information sharing.

The study gives a brief history of the company and describes the type of jobs performed. It then reviews the coming of the unions, and the developments of collective bargaining. A chapter entitled "administering the Contracts" deals with grievance procedure, seniority, discipline and discharge, and other matters. The study is enlivened with a series of accounts of episodes illustrating various aspects of the union-management relationship.

It concludes with a listing of some of the problems which union and management may have to face in the future, which "may be tougher than anything the parties have had to face in the past."

"None of these possibilities, however, represents a matter so serious that it cannot be overcome by the same brand of integrity, good faith, and willingness to bargain which the parties have shown in the past. Furthermore, they have managed to build up a tremendous reservoir of good will which can withstand hard knocks."

INTERNATIONAL LABOUR ORGANIZATION

Participation of ILO in United Nations Technical Aid Program

The International Labour Organization has begun to provide technical assistance to its member countries as part of the United Nations program for the economic development of underdeveloped areas (L.G., March, 1950, p. 312; Aug., p. 113).

The ILO's contribution to the program is being co-ordinated with the contributions of other UN specialized agencies through the Technical Assistance Board which was established by a resolution approved by the Economic and Social Council and the General Assembly of the United Nations.

The equivalent of \$20,000,000 has been pledged by 54 Governments to finance the program up to December 31, 1951. Of this sum, roughly \$2,000,000 will be allocated to the ILO.

The fields in which the ILO is providing assistance include vocational guidance and

training, employment service organization, migration, labour statistics, co-operation and handicrafts, industrial welfare, labour inspection, labour legislation, industrial relations, agricultural working and living conditions, social security, industrial safety, and industrial hygiene. Assistance will also be given in the solution of specific problems relating to particular industries or categories of persons.

Assistance is being supplied by missions composed of experts, and in the form of seminars, training institutes, meetings for the exchange of information, and in various other ways.

The ILO has provided technical assistance to its member states since the earliest years of the Organization. With the funds that have been made available under the new program, however, the possibilities of

increasing the Organization's work of this kind have been considerably enlarged.

Countries which have requested assistance within the ILO's area of responsibility under the new program include Burma, Ceylon, Colombia, Ecuador, India, Indonesia, Iran, Israel, Lebanon, Pakistan, Thailand and Turkey.

Publication of Handbook on Canada's National Employment Service Inaugurates ILO Series

With the publication of *National Employment Services, Canada*, the International Labour Office has, as part of its manpower program, begun the issue of a series of handbooks intended to serve as a guide in the development and improvement of employment services throughout the world. The handbooks will bring together and make available in comparable form surveys of employment service policy, practices and techniques in various countries.

The National Employment Service of Canada was requested to prepare the first report in the series.

The material is presented according to a uniform plan which will be followed by the countries participating. The first two

Preliminary work has been started on some of the projects proposed by these countries, and others are under consideration by the Technical Assistance Board. Certain of the projects will be undertaken by the ILO in co-operation with one or more of the other international organizations participating in the program.

chapters include a general introduction and an account of the administrative organization of the service. The bulk of the information is contained in chapter 3, which describes in detail the functions, program and procedures of the service, under such headings as statement of policies, organization of placement work, employment information, employment counselling, service to special categories of workers and special industries, and co-operation in economic and social planning and administration. The remaining chapters deal with the organization and operation of advisory committees, recruitment and training of employment service staff, private employment agencies, and employment service research activities. Specimen forms are shown in the appendix.

Freedom of Association and Conditions of Work in Venezuela

The International Labour Office has published a report prepared by a mission sent to Venezuela by the ILO in response to an invitation from the Government of that country.

Under the terms of this invitation, the purpose of the mission was "to secure complete and impartial information concerning social problems, general conditions of work in the different industries, the scope of the benefits and protection afforded to workers under the legislation in force and the National Government, and the development and functioning of trade unions." The mission was headed by Jef Rens, senior Assistant Director-General of the International Labour Office. It spent seven weeks in Venezuela in 1949.

According to the report, freedom of association in Venezuela "is far from being complete."

The report said the Venezuelan unions "do not at present enjoy a freedom of action and organization comparable to that

enjoyed by countries in which the functioning of workers' organizations is protected from legal or administrative restrictions."

At the same time, the report described the social legislation of Venezuela as "very progressive and conceived in such a manner as to ensure the effective protection of the workers."

It said that in the field of living conditions and conditions of work, certain Venezuelan laws generally conform to—and sometimes go beyond—ILO standards. However, it added, this legislation was not applied everywhere with the same degree of effectiveness.

To consolidate the legislation, certain revisions appeared necessary, the mission suggested. It said, however, that it would be difficult for the Government to undertake these revisions without the active collaboration of the workers and employers concerned, and it emphasized that a return

to freedom of association appeared to be a condition for this collaboration.

Certain measures taken by the Military Junta since the mission's visit indicated a new trend in the Junta's attitude toward the right to organize and other fundamental freedoms, the report said.

The mission said it had carefully refrained from expressing any judgment with regard to questions which did not fall within the terms of reference of the Venezuelan invitation.

The mission suggested, however, "in the light of the situation" it had reviewed, that the Venezuelan Government "give the fullest and most earnest consideration to the following steps designed to permit the normal functioning of a healthy trade unionism."

1. Removal of the bar against the re-election by the trade unions of former members of their executive committees.
2. Lifting of the obligation to obtain prior Government approval for the holding of trade union meetings.
3. Re-establishment of the liberty of the unions to form national federations and confederations.
4. Restoration of the right to strike and lockout within the limits of the labour law.
5. Encouragement of collaboration in the economic and social field

ILO Report on Employment Conditions on Panama Ships

The International Labour Office has published the report of a committee of inquiry which investigated employment conditions in ships flying the flag of Panama.

The report was examined by the Governing Body of the ILO, and was published in agreement with the Government of Panama.

The volume contains a statement made by the Governing Body drawing attention to certain points concerning the report and making certain suggestions and recommendations. The volume also contains

between free strong and independent organizations of employers and workers.

The report also suggested measures to improve Venezuela's social security legislation and its labour inspection services.

The report suggested that the workers' and employers' organizations could themselves contribute to the re-establishment of normal industrial relations in the country.

It said the mission considered the employers should "endeavour without delay to set up free representative organizations, the absence of which constitutes a regrettable gap in the social structure" of Venezuela.

The mission also considered, the report declared, that "the trade union officials might, to such a degree as is possible, protect the unions from the vicissitudes of political life and enhance their prestige and the effectiveness of their action by drawing a clearer demarcation between their purely trade union activities and their political activities. . . ."

"The mission is convinced," the report concluded, "that if the Venezuelan Government were to adopt the recommendations which it has put forward a secure foundation would be laid for the gradual development in Venezuela of a free trade union movement and a body of social legislation corresponding to the needs and aspirations of the Venezuelan people."

certain observations on the report made by the Government of Panama.

The committee of inquiry was set up by the Governing Body in December, 1948 at the request of the Panamanian Government after the International Transport Workers' Federation threatened a boycott of certain Panama flag ships.

The committee was composed of Herman Vos, member of the Belgian Senate, representing Governments; A. Dalgleish of the United Kingdom, representing the workers; and A. G. Fennema of the Netherlands, representing the employers.

This section covers proceedings under two federal statutes, the Industrial Relations and Disputes Investigation Act and the Conciliation and Labour Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board and the Industrial Relations Branch of the Department.

INDUSTRIAL RELATIONS AND CONCILIATION

The Honourable Mr. Justice R. L. Kellock, of the Supreme Court of Canada, was appointed during October to arbitrate the matters in dispute between the railways and the trade unions representing non-operating employees.

Introduction

Pursuant to the provisions of The Maintenance of Railway Operation Act, discussions on the current dispute between the major railways and the trade unions representing groups of non-operating employees began in Montreal on October 4 between officers of the four railway companies involved and the negotiating committee of the seventeen associated unions.

On October 10 the Government was notified by letter that the differences between the parties as to the terms of a collective agreement had not been resolved. The Government was also informed that the parties had been unable to agree upon the selection of a person to act as arbitrator, as contemplated by the law passed by Parliament to terminate the railway strike of August 22-31.

After the expiry of the thirty-day period provided by the Act for negotiations and of the fifteen-day extension thereof granted upon the request of the parties, His Excellency the Governor General in Council on October 17 appointed the Hon. R. L. Kellock, one of the Justices of the Supreme Court of Canada, as the arbitrator to determine and decide all matters that had not been agreed upon between the railway companies and the unions. The appointment was made upon the recommendation of the Minister of Labour, the Hon. Milton F. Gregg, V.C., by Order in Council P.C. 4994.

The Hon. Mr. Justice Kellock entered upon his duties on October 27, when he

convened a hearing in Montreal. The arbitration proceedings continued for three days the following week and were renewed on November 8.

* * *

Another development of interest during October was the receipt of majority and minority reports of a Board of Conciliation and Investigation under the chairmanship of His Honour Judge A. Cochrane, of Brampton, Ontario, dealing with a dispute between the Ottawa Transportation Commission and its employees represented by Division No. 279, Amalgamated Street, Electric Railway and Motor Coach Employees of America. The full text of the reports are printed below. Following the release of the Board's recommendations, the employees voted in favour of their acceptance but the recommendations were rejected by the employer. Further conversations were taking place between the parties at the end of the period under review.

* * *

The Minister of Labour also completed the personnel of two Boards of Conciliation and Investigation to deal with disputes between The Canadian Press and its subsidiary, Press News, Limited, and their employees represented by the American Newspaper Guild. In the absence of a joint recommendation from other members, the Minister appointed His Honour Judge A. Cochrane, of Brampton, Ontario, as Chairman of each of the Boards.

The following statement concerns the scope and administration of the Industrial Relations and Disputes Investigation Act and the Conciliation and Labour Act.

Conciliation services under the Industrial Relations and Disputes Investigation Act and under the Conciliation and Labour Act are provided by the Minister of Labour through the Industrial Relations Branch. The Branch also acts as the administrative arm of the Canada Labour Relations Board under the former Act.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until succeeded by the Wartime Regulations in 1944.

Proceedings begun under the Wartime Regulations are continued in so far as the services involved in such proceedings are authorized under the new Act. Likewise, decisions, orders and certifications given by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the new Act.

The Act applies to industries within Dominion jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the Dominion Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of Conciliation Officers, Conciliation Boards, Industrial Inquiry Commissions for the consideration of complaints that the Act has been violated or that a party has failed to bargain collectively, and of applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every

reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Conciliation services are also provided by the Industrial Relations Branch under the provisions of the Conciliation and Labour Act. This statute empowers the Minister of Labour to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or arbitrator when requested by the parties concerned.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour. From time to time, as required, a third article under this section will cover Conciliation Proceedings under the Conciliation and Labour Act.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton and St. John's, Newfoundland. The territory of two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; two officers in Montreal are assigned to the province of Quebec, and two officers resident in Fredericton and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Certification and Other Proceedings Before the Canada Labour Relations Board

The Canada Labour Relations Board met for two days during the month of October. The Board issued seven certificates designating bargaining agents, rejected five applications for certification, and ordered four representation votes. During the month the Board received three applications for certification.

Applications for Certification Granted

1. Three certificates designating the Canadian Merchant Service Guild, Inc., as bargaining agent for separate units of deck officers employed by (1) Blue Peter Steamships Limited, on board the ss. *Blue Peter II* and mv. *Blue Cloud*; (2) Provincial Steamships Limited, on board the ss. *Federal Trader*, and by (3) Northlantic Sealers Limited, on board the ms. *Blue Seal*. Head offices of the Companies are located in St. John's, Nfld. (L.G., Sept.,

1950, p. 1556, and Oct., 1950, p. 1669).

The National Association of Marine Engineers of Canada, Inc., was certified as bargaining agent for three separate units of engineers officers below the rank of chief engineer employed by the same Companies (L.G., Sept., 1950, p. 1556, and Oct., 1950, p. 1669).

2. District Council No. 3, National Association of Marine Engineers of Canada, Inc., for a unit of engineer officers below the rank of chief engineer employed by Paterson Steamships Limited, Fort William, Ont. (L.G., Sept., 1950, p. 1556).

Applications for Certification Rejected

The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and five employers of longshoremen at the Port of Quebec, including the Albert G. Baker Company

Limited, the Clarke Steamship Company Limited, W. G. McCauley, Anglo-Canadian Pulp and Paper Mills, Limited, and Robin Hood Flour Mills, Limited. The applications were rejected for the reason that the applicant organization had not received the support of a majority of the employees concerned in a vote conducted by the Board (L.G., Oct., 1950, p. 1668).

Representation Votes Ordered

1. Local No. 779, Hotel and Restaurant Employees' and Bartenders' International Union, and Canadian National Railways (Newfoundland Hotel, St. John's, Nfld.) (L.G., March, 1950, p. 339). The Board ordered the vote following an investigation and a public hearing of the parties concerned.

2. The Canadian Air Line Flight Attendants' Association and Canadian Pacific Air Lines Limited (L.G., Oct., 1950, p. 1668). The Board ordered the vote following an investigation of the application.

3. The Canadian Brotherhood of Seamen and the Quebec and Ontario Transportation Company Limited, Montreal (L.G., July, 1950, p. 1041). The Board ordered the vote following an investigation and a

public hearing of the parties concerned (See Reasons for Judgment below).

4. The Canadian Brotherhood of Seamen and the Gulf and Lake Navigation Company, Limited, Montreal (L.G., Aug., 1950, p. 1169). The Board ordered the vote following an investigation and a public hearing of the parties concerned (See Reasons for Judgment below).

Applications for Certification Received

1. The Brotherhood of Locomotive Firemen and Enginemen, on behalf of a unit of locomotive engineers handling steam or other classes of motive power and employed by the Canadian Pacific Railway Company in its Prairie and Pacific regions (Investigating Officer: F. J. Ainsborough).

2. Division No. 1229, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, on behalf of a unit of employees of Island Motor Transport Limited, Charlottetown, P.E.I. (Investigating Officer: J. R. Kinley).

3. Communications Workers of America, on behalf of a unit of employees of the Northern Telephone Company Limited, New Liskeard, Ont. (Investigating Officer: R. L. O'Neill).

REASONS FOR JUDGMENT in application for certification affecting

Canadian Brotherhood of Seamen, *Applicant,* *and* Quebec and Ontario Transportation Company, Limited, with head office at Montreal, Que., *Respondent.*

This is an application for certification received by the Board under date of May 11, 1950, for certification of the Applicant as bargaining agent of a unit of employees of the Respondent consisting of unlicensed personnel employed on the vessels of the Respondent which operates a shipping business.

The Applicant had, according to the report of the Board's investigating officer following upon his check of the Applicants records, a majority of employees as members at the time the application was made.

The Respondent contends that it had entered into a collective agreement, dated March 16, 1950, with the Seafarers' International Union representing this unit of employees for a term ending March 15, 1951. The Respondent contends that at the time the collective agreement became effective the Respondent had satisfied itself that the Seafarers' International Union represented the

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, J. A. D'Aoust, A. J. Hills, A. R. Mosher, G. Picard and H. Taylor, members. The Judgment of the Board was delivered by the Vice-Chairman.

majority of employees in the unit. The Respondent therefore submits that the application having been made less than ten months after the agreement became effective, the application is premature and should be rejected.

The Respondent had entered into a collective agreement in 1949 with the Canadian Seamen's Union which expired on March 14, 1950, and was not renewed. The Canadian Seamen's Union intervened in the present proceedings but subsequently withdrawn, thereby abandoning any right it may have had to represent

the employees by reason of having had an agreement with the Respondent covering the employees. The Canadian Seamen's Union had not been certified as the bargaining agent of the employees covered by the agreement. The Respondent states the agreement entered into with the Seafarers' International Union on March 16, 1950, was entered into on the representations of that Union that it represented the employees covered by the agreement, and that the company in signing the agreement stipulated that it was provisional in nature until the Union satisfied the company that it did represent the employees. The agreement was filed with the Department of Labour at the end of May, prior to which date the Respondent states the union had produced to it individual authorizations signed by 147 out of 149 employees in the unit, designating the Seafarers' International Union as bargaining representative of the employees and authorizing the Respondent to deduct union dues and assessments from wages. In addition, the Respondent states each employee in signing the monthly payroll sheet of the Respondent authorized the deduction of the monthly union dues to the Seafarers' International Union from his monthly pay and its remittance to the union. These signed authorizations and payroll sheets were produced at the hearing. The authorizations so filed are dated at various dates running from March 30, 1950, at earliest, into June, 1950, the great majority thereof bearing dates from March 30 on through to the end of the month of April, 1950.

On the other hand, the Applicant points out that the aforesaid agreement between the Respondent and the Seafarers' International Union, a copy of which was produced at the hearing, contains a provision requiring the employees as a condition of employment to either join the union and continue as members thereof during their employment or, in the alternative, to pay one month's dues as well as initiation fees and to pay subsequent monthly dues as required of union members, and providing that failure by an employee to pay arrears of monthly dues at a pay-off date shall

constitute a bar to further employment until arrears are paid. The Applicant claims that, although the agreement is stated by the Respondent to have been provisional only, pending the establishment by the Seafarers' International Union of its claim to represent the employees, nevertheless the provision recited above was given effect to and made applicable immediately following the execution of the agreement, and that employees signed the authorization cards in March and April subsequent to the signing of the agreement under threat of loss of employment.

It is clear from the evidence before the Board that at the time the agreement between the Respondent and the Seafarers' International Union was signed that union had no authority of any kind to represent the employees covered by the agreement. The Respondent states that the agreement was not to be effective until the Seafarers' International Union had established its representative status to the satisfaction of the company.

The Board is of opinion that the existence of an agreement entered into in the circumstances related above should not be permitted to operate as a bar to the making of the present application.

The Board accordingly, without considering it necessary to the disposition of the application to reach any conclusion as to the final effect of the aforesaid agreement and the opposing contentions of the parties, gives its consent to the making of the present application. A vote will be taken, under the direction of the Chief Executive Officer of the Board, of the employees in the bargaining unit, namely the unlicensed personnel employed on the vessels of the Respondent. The names of both unions will appear on the ballot.

(Sgd.) A. H. BROWN,
*Vice-Chairman
and Acting Chairman
for the Board.*

I. R. PRAZOFF, Esq.,
M. E. NUTTALL, Esq.,
for the Applicant.

C. R. MCKENZIE, Esq., K.C.,
W. F. COLLISON, Esq.,
for the Respondent.

Dated at Ottawa, October 12, 1950.

REASONS FOR JUDGMENT in application for certification affecting

**Canadian Brotherhood of Seamen, Applicant,
and**

**Gulf and Lake Navigation Company Limited, with head office at
Montreal, Quebec, Respondent.**

This is an application for certification of the Applicant as bargaining agent of a unit of employees of the Respondent consisting of unlicensed personnel employed on the vessels of the company which operates a shipping business. The application is dated June 21, 1950, and was received by the Board on June 23, 1950. The Board's investigating officer reports, following a check of union records, that a majority of employees in the unit were members of the Applicant organization at the date of application.

The Canadian Seamen's Union is the certified bargaining agent of employees in the unit by virtue of a subsisting certification order made in 1946. The last collective agreement between the Respondent and the Canadian Seamen's Union expired in March, 1949. The Canadian Seamen's Union has not intervened in respect of the present application. In these circumstances, it must be assumed that the Canadian Seamen's Union no longer represents a majority of employees in the unit. The certification granted to that union as aforesaid is accordingly revoked.

The Respondent in opposing the application denies that the Applicant represents the majority of employees, and states that it entered into a collective agreement with the Seafarers' International Union under date of July 11, 1950, effective from July 1, 1950, to run until March 31, 1951, covering the employees in the proposed bargaining unit.

Both the Respondent and the Seafarers' International Union should be well aware that where a union has been certified as a bargaining agent for a unit of employees under the provisions of the Industrial Rela-

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, J. A. D'Aoust, A. J. Hills, A. R. Mosher, G. Picard and H. Taylor, members. The Judgment of the Board was delivered by the Vice-Chairman.

tions and Disputes Investigation Act, no other union has authority under the Act to represent the unit for collective bargaining nor to bind employees in the unit by collective agreement until that certification is revoked.

In any event, the application was filed prior to the date of the alleged collective agreement, and is therefore in order as to the time when made. The Seafarers' International Union which is the other party to the alleged collective agreement has not intervened to oppose the application nor to attempt to establish its right to represent the employees in the unit.

A vote will be taken of employees in the bargaining unit consisting of unlicensed personnel on the ships of the Respondent, under the direction of the Chief Executive Officer.

(Sgd.) A. H. BROWN,
Vice-Chairman
and Acting Chairman
for the Board.

I. R. PRAZOFF, Esq.,
M. E. NUTTALL, Esq.,
for the Applicant.

J. BRISSET, Esq., K.C.,
for the Respondent.

Dated at Ottawa, October 12, 1950.

Conciliation and Other Proceedings Before the Minister of Labour

During the month of October the Minister appointed Conciliation Officers to deal with matters in dispute between the following parties:—

1. Local No. 38-163, International Longshoremen's Association, and the Shipping Federation of British Columbia, representing Canadian National Steamships, The Canadian Pacific Railway Company (B.C.

Coast Steamship Service), Frank Warehouse of Canada Limited, Packers Steamships Company Limited, and Union Steamships Limited (Conciliation Officer: G. R. Currie).

2. Local B1440, International Brotherhood of Electrical Workers, and Chaudière Water Power Owners and Lessees, Ottawa (Conciliation Officer: Bernard Wilson).

3. The Canadian Navigators' Federation and the Prescott and Ogdensburg Ferry Company Limited, Prescott, Ont. (Conciliation Officer: L. Pepin).

Conciliation Board Appointed

On September 19, 1950, the Minister appointed a Board of Conciliation and Investigation to deal with matters in dispute between Eldorado Mining and Refining Limited, Port Hope, Ont., a Federal Crown Company, and Local No. 13173, District 50, United Mine Workers of America. The Board was appointed following receipt of the report of W. Dunn, who had been appointed by the Minister of Labour for the Province of Ontario as Conciliation Officer to deal with the dispute on the assumption that the Company came within the jurisdiction of the provincial authorities. Constitution of the Board has been delayed pending further discussions between the parties and with officials of the Federal Department of Labour.

Conciliation Boards Fully Constituted

The two Boards of Conciliation and Investigation appointed by the Minister on September 8, 1950, to deal with matters

in dispute between The Canadian Press and the American Newspaper Guild and between Press News Limited and the American Newspaper Guild (L.G., Nov., 1950, p. 1895) were fully constituted on October 30, 1950, with the appointment of His Honour Judge A. Cochrane, Brampton, Ont., as Chairman. Judge Cochrane was appointed by the Minister in the absence of a joint recommendation from the other two members of the Boards, Messrs. Gordon R. Munnock, K.C., and Herbert Orllife, both of Toronto, who had previously been appointed on the nominations of the companies and union, respectively.

Conciliation Board Report Received

On October 19, 1950, the Minister received the majority and minority reports of the Board of Conciliation and Investigation appointed to deal with matters in dispute between the Ottawa Transportation Commission and Division No. 279, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (L.G., Sept., 1950, p. 1556). The texts of the majority and minority reports are reproduced below.

REPORT OF BOARD in dispute between

**Ottawa Transportation Commission,
and**

**Division No. 279, Amalgamated Association of Street, Electric
Railway and Motor Coach Employees of America.**

Meetings of this conciliation board were held at Ottawa on the 1st and 2nd days of August, 1950, and again at Ottawa on the 16th and 17th days of August, 1950. A further meeting of the board was held at Toronto on the 6th day of September, 1950.

The following were present at the meetings held in Ottawa. On behalf of the Union: Messrs. W. P. Wall, International Representative of Amalgamated Association SER & MCE of America; J. A. Robinson, President of Ottawa Local No. 279; T. H. Hammell, Secretary; A. Brisbois, Treasurer; M. Goulet, Vice-President; H. Dyett, member of the executive; and J. H. Stitt, counsel. On behalf of the Commission: Messrs. E. F. Marchand, member of the Commission; D. N. Gill, General Manager, and A. W. Beament, K.C., counsel.

All members of the board were present at the meeting held in Toronto on the 6th of September which was for the purpose of considering our report.

On October 19, 1950, the Minister of Labour received the majority and minority reports of the Board of Conciliation and Investigation appointed to deal with the dispute between the Ottawa Transportation Commission and Division No. 279, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (L.G., Sept., 1950, p. 1556).

The Board was composed of His Honour Judge A. Cochrane, Brampton, Ontario, Chairman; John J. Connolly, K.C., Ottawa, and C. L. Dubin, Toronto, members appointed on the nominations of the Company and Union, respectively.

The texts of the Board's majority and minority reports are reproduced herewith.

We should first deal with the question raised by the Commission as to whether the Agreement dated the 6th day of

September, 1948, is still in full force and effect. The Commission has consistently taken the position that this Agreement is in fact still in effect and that the only question at issue which the conciliation board can consider is the question of pensions. The attitude of the Commission on this point is clearly set out in a letter from Mr. W. R. Creighton, Chairman of the Commission to Mr. Arthur MacNamara, Deputy Minister of Labour, dated the 13th of March, 1950. The parts of the letter which directly refer to the question as to whether there is an existing contract read as follows:—

In view of the fact that neither party to the Collective Agreement gave a notice terminating the Agreement at the end of 1949 under the provisions of Section 5, the Agreement automatically continues for the year 1950. Accordingly, since this Collective Agreement was entered into and up to the present time neither party has had or now has the right to require the other party to commence collective bargaining. That being so, neither party has at this time the right to request nor is there power in law to instruct a conciliation officer to confer with the parties.

Despite the legal position set out above, the Commission is quite willing, without prejudice to the continuance of the present Collective Agreement, to resume negotiations with the Union of a supplementary agreement and the introduction of a pension plan. The Commission must, however, oppose the appointment of a Conciliation Officer at the present time under the provisions of the Industrial Relations and Disputes Investigation Act, in view of the valid and subsisting Collective Agreement between the Union and this Commission.

A submission setting forth certain facts was made to the Hon. the Minister of Labour by the Union which bears date the 16th day of March, 1950, and some further correspondence in addition to the letter above referred to was had between the Commission and the Department. In this correspondence the Commission adhered to its original position but, in spite of representations made by the Commission, a Conciliation Officer was eventually appointed by the Department of Labour. The Officer failed to bring about a settlement between the parties and in his report to the Department bearing date the 1st day of June, 1950, it was pointed out among other things that the Union wished a Board of Conciliation to be set up but that the Commission was opposed to this being done. The Conciliation Officer had failed to arrange a settlement and recommended that a Board be established, and this Board was established on the 6th of June last. The setting up of the Board was done over the strong objec-

tions of the Ottawa Transportation Commission, and the Commission has not since in any way or at any time changed from its original position.

It may be significant that the appointment which is under the seal of the Hon. the Minister of Labour reads as follows: "Now therefore, the undersigned, the Minister of Labour of Canada, pursuant to the provisions of Section 17 of the Industrial Relations and Disputes Investigation Act, does hereby appoint a Board of Conciliation and Investigation, to be constituted as in the said Act provided, which Board shall endeavour to effect agreement between the parties on the matters on which they have not agreed." No complete agreement has been arrived at since the appointment of the Conciliation Board and it is obvious, keeping in mind the position which has always been taken by the Commission and not receded from, that a settlement at the present time is not possible. Failing a settlement and following these conciliation proceedings the parties have certain rights. We have been asked to make a finding as to the legal position of the parties, but we are not sure that we should do so for the following reasons:—

1. To some extent at least we are being asked to review an Act of the Minister of Labour and this is not desirable.
2. A finding one way or the other might prejudicially affect the rights of the parties or one of them.
3. It is possible that one or other of the parties might apply to the courts for a ruling as to its legal position notwithstanding any finding which might be made by this board.

Under the circumstances we have concluded that it is advisable that we deal with all matters at issue between the parties and make our recommendations on the merits.

In this conciliation there were originally six matters at issue between the parties as follows:—

- (a) Request by the Union for a twenty-cent per hour general wage increase.
- (b) Request for a ten-cent per hour differential for skilled tradesmen.
- (c) Request for increased vacation days with pay.
- (d) Request for improvements in working conditions.
- (e) Request for alterations in sick benefits.
- (f) Request for establishment of a super-annuation scheme.

Of the above the request for improvements in working conditions was settled by direct negotiations between the parties following the first sittings of the conciliation board.

(a) Twenty-cent per hour general wage increase:

The Union submitted a statement (which was not questioned by the Commission) showing the rates paid to first class operators by twenty-seven different transportation systems throughout Canada. The highest rate paid is \$1.27½ per hour; the lowest rate is 85 cents per hour—the Ottawa Transportation Commission pays its first class operators one dollar per hour. The average rate of pay, excluding Ottawa and excluding also the cost-of-living bonuses which are paid in certain places, is approximately \$1.08½ per hour; from which it will be seen that the Ottawa rate is well below the average. There has been a substantial increase in the cost of living since the Ottawa rate was established on the 1st of January, 1949, and this fact has an important bearing on the question as to what is a fair wage. No evidence has been submitted to the board which would suggest valid reasons why the Ottawa rate for operators should be so far below the average. It is our understanding that generally speaking the operators' rate is taken as the yardstick by which all of the rates are measured, and it would appear that the rates paid not only to operators but to other employees of the Commission are somewhat lower than those paid by other transportation systems. Since the last meeting of the board in Toronto we have considered the matter carefully and we recommend an increase of 15 cents per hour across-the-board, of which 12½ cents per hour shall be effective as of the 1st day of April, 1950, and the remaining 2½ cents per hour as of January 1, 1951.

It will be noted that after lengthy negotiations between the Commission and the Union the matter first went to conciliation on the 25th of March last; this being so we are of the opinion that the suggested dates are reasonable under all the circumstances. The employees should not be penalized for the long delay in the negotiations because it would appear that both sides are to some extent at least responsible for the delay; on the other hand it is obvious that if no provision is made for increased rates to be retroactive, employers could profit perhaps in some instances unfairly by prolonging negotiations.

(b) Ten-cent per hour differential for skilled tradesmen:

It is our opinion that differentials for skilled tradesmen should be established. The Union request is for ten cents per hour, but the evidence on the point is not too complete or satisfactory and we find it difficult, on what is before us, to recommend

a specific rate. We are of the opinion that differentials could be settled between the parties if base rates were first agreed upon, but under the circumstances and on what is before us the request of the Union for a ten cent differential does not appear to be unreasonable. We would therefore recommend adoption of the ten cent differential leaving it to the parties to decide as to how it should be applied, but on the understanding that existing differentials if any should not be reduced.

The Commission contends that it is financially unable to meet the demands of the Union; if this contention be correct the solution is in our opinion obvious, namely—to increase fares to meet increased costs of operations. It should be noted that there has been no substantial increase in fares for many years.

(c) Increased vacation days with pay:

We recommend in favour of two weeks' vacation after two years' service.

(d) Improvements in working conditions:

Settled.

(e) Alterations in sick benefits:

This question was not seriously in issue—little reference was made to it during the sittings of the board. The matter is referred to on page 15 of the Union brief under the heading Clause 10—Sections 31 and 32. This is a quotation from a memorandum indicating the position taken by the Ottawa Transportation Commission with regard to the presentations of the Union, and this quotation indicates an intention on the part of the Commission to improve the position of its employees so far as sick benefits are concerned. Very little was said during the sittings and therefore the matter does not appear to be in issue and it seems to us that if there are differences between the parties they could in all probability be settled by direct negotiations. We therefore make no recommendation in connection with this matter.

(f) Establishment of superannuation scheme:

The establishment of a superannuation scheme or plan is in itself not an issue between the parties as the Commission has always indicated its willingness to do so. Practically the sole question at issue in connection with this matter is the refusal of the Commission to recognize "past service" rendered by the employees when the transportation system was owned and operated by the Ottawa Electric Railway Company. The Commission takes the position that when the system was purchased by the City of Ottawa the City did not

purchase the Company but only the physical assets of the Company. At the time of the purchase no superannuation scheme or plan had ever been set up by the Company. It would appear that representations had in the past been made by the Union to the Company on this subject but it had never been pressed to a conclusion. The Commission takes the position that it is not legally bound to recognize "past service" to the Ottawa Electric Railway Company, and it is contended further that the Commission has no funds on hand out of which such a fund could properly be set up. It would appear that this contention is correct.

On the other hand the men who have given many years of faithful service to the Ottawa Electric Railway Company and to the public of Ottawa and who are faced with permanent lay-offs in the near future are not in a happy position. Whether this matter was considered by the City Council at the time of the purchase has not been disclosed and it has not been shown that the Union made any representations to the Council at that time. It would appear therefore that the responsibility for the present situation does not rest entirely on the shoulders either of the Union or of the Corporation; nevertheless we are of the opinion that it is desirable that in any superannuation plan or scheme which may be established recognition should be given to past service. It is our understanding that the street railway system is owned by the Corporation of the City of Ottawa, but operated by the Commission for the City. If in fact funds or means to provide funds for this purpose are not available to the Commission, it may be that the Corporation of the City of Ottawa might recognize an obligation to these men and provide the necessary funds to finance a superannuation plan. In its request for recognition of past service the Union asks for twenty dollars per year for each completed year of service, but not exceeding twenty years in any case. In view of the fact that the entire responsibility for the present situation does not rest on the Corporation or the Commission, we recommend that in any plan or scheme for superannuation which may be set up recognition be given ten years of past service rendered prior to the date when the Commission purchased the physical assets of the Ottawa Electric Railway Company, namely, August 10, 1948.

Dated at Brampton this 18th day of October, A.D. 1950.

(Sgd.) A. COCHRANE (Judge),
Chairman.

(Sgd.) C. L. DUBIN,
Employees' Nominee.

Minority Report

The 1949 contract between the Ottawa Transportation Commission and Division No. 279, Amalgamated Association of Street Electric Railway and Motor Coach Employees representing the men, set out certain specific provisions to govern the relationships which were to obtain between the parties. There may have been some matters not covered by the contract and upon which both parties felt no prescribed course of conduct was required. The method of terminating the contract, however, was not one of these. Section 5 of clause 2 of the Agreement reads:—

This agreement shall be in effect from the 1st day of January, 1949, until the 31st day of December, 1949, and shall continue from year to year thereafter until terminated by either party giving the other two months' notice of termination prior to the 31st day of December, 1949, or any anniversary thereof.

If either of the parties wished to terminate the contract it was bound to follow the rule prescribed in the aforesaid section. Neither party has taken advantage of this clause and I cannot see how it could be said in the result that the contract was terminated. If the clause were obscure there might be some room for doubt as to its meaning. But it is clear and it was not invoked.

It has been suggested that the letter written by the Union on the 31st day of October, 1949, seeking to have amendments made to the Agreement for 1950 was tantamount to a notice of cancellation. This argument might have been of avail to cancel the existing contract if there had been no easily understood method of cancelling.

Moreover it was stated for the Commission at the hearing in the presence of all parties, and not denied by the Union, that at a meeting between the parties shortly after the letter of October 31, 1949, was dispatched, the Union stated to the Commission's representatives that it was not its intention to terminate the agreement.

It is true that in a subsequent letter dated the 14th of December, 1949, the Union argued that it had sought to terminate the agreement by the earlier letter of October 31. This I think was a protest after the event and written to attempt to accomplish indirectly (and too late) what it could so easily and simply have done in time if it had so intended.

To hold, as I do, that no effective notice of termination of the Agreement was given is not to take too technical a view. It is simply to hold that when two parties agree by written contract to observe a simple

rule of conduct, they are both bound to observe that rule or to be bound by the consequences of their failure so to do.

Pensions:

Both parties to the dispute agree that the question of pension rights is open for conciliation for 1950. The Union claims that the Commission should recognize the past service of employees who qualify for a period of twenty years. The Commission is willing to recognize past service for pensions back to August 13, 1948. This was the date upon which the Commission took over the assets of the transportation system and which it is now managing and operating in the City of Ottawa.

The Commissioners, as Trustees for the Corporation of the City of Ottawa, say that in law they cannot provide pensions for their employees based upon services rendered to a former employer. For the Commission it is stressed that in 1948 the physical assets of the Ottawa Electric Railway Company were purchased by the City of Ottawa, the Commission was established and it was directed to manage and operate the assets then bought. There is in evidence before us, and not denied by the Union as authentic, a Notice in the following form dated August 10, 1948.

Ottawa Transportation Commission
Special Notice
to the Employees of the
Ottawa Electric Railway Company

All the present employees of the Ottawa Electric Railway Company desiring to continue their employment with the exception of a few who have been notified by letter, will be re-engaged by the Ottawa Transportation Commission on August 13, 1948, with their present status and seniority.

However, the Ottawa Transportation Commission can accept no responsibility for past service of any employee previous to August 13, 1948.

It is the intention of the Ottawa Transportation Commission to continue for the present the benefits presently enjoyed under The OER Insurance and Benefit Plan.

The Ottawa Transportation Commissioners look forward to receiving from the employees the same loyal and efficient service and co-operation that they have rendered to their former employers.

The Commissioners will in turn endeavour to keep the welfare of the employees before them at all times.

Ottawa Transportation Commission.
Ottawa, August 10, 1948.

Every employee of the Ottawa Electric Railway Company who was hired by the Commission received this notice and

accepted employment with the Commission subject to its terms. I can find no authority in law for the Commission to recognize any pension rights and which would involve an expenditure of money by the Commission, for services except those rendered to the Commission.

The Ottawa Electric Railway Company did not establish a pension scheme for its employees before it sold its physical assets to the City of Ottawa. It was said that the Union had tried many times to have a pension scheme established, but without success. When the negotiations for the purchase by the City were conducted, apparently no consideration was given to the matter. It did not seem to be a factor which influenced the City when the purchase price was determined. The Union apparently did not then bring the matter to the attention of the Civic authorities. Yet it now appears as a potential liability of some \$450,000 for the system and indirectly for the City if the Union demands are met in full. I think it would be too much to ask the Commission alone to assume this responsibility.

For the Union it is urged and particularly on behalf of the older employees, that these men have given a lifetime of service to a transportation system for the citizens of Ottawa. Many of these employees are now reaching the end of their employable time and they have comparatively little security.

While I have trouble trying to convince myself that there is a moral responsibility on the part of the Commission, I think the citizens of Ottawa generally would feel that something should be done to recognize for the employees more past service than the service rendered to August, 1948. At the present time there is a pension fund covering past service for the civic employees including the firemen and the policemen. The pension fund for employees of the street railway system would be in accord with the policy followed for other civic employees and with the trend of such matters today. In the circumstances, however, and taking into account the facts which I have stated above, I would recommend to the Commission that their pension scheme should recognize past service to no more than 10 years prior to January 1, 1951. accepted employment with the Commission. This is approximately 7½ years more than the Commission feels it should go and it is ten years less than the Union demand.

Wage increase:

The Union demand on wages is for a twenty-cent per hour increase across-the-board. Section 14 (b) of the Agreement dated the 6th of December, 1948, between

the Commission and the Union, provides for a cost-of-living bonus to be paid by the Commission based upon the Cost-of-Living Index of the Dominion Bureau of Statistics. The clause states that wages would go up or down depending upon whether or not the Index rose or fell by three points from the Index figure of 166.6. At the time of the hearing the Index had not yet reached the point where Section 14 (b) could be invoked. The effect of the present wage demand is to accelerate the arrangement then made. This fact, in my view, should influence the finding of the Board.

There is another factor which should be considered. The Commission is operating a publicly owned enterprise. The Commissioners carry on as Trustees for the City and so for the citizens of Ottawa. When the budgets are prepared the Commission's plans are fixed for the year. Any extra expenses which arise accordingly, put the Commission that much farther into debt. In this case there is no question of the Commission piling up profits for distribution to shareholders. It may be that the Commission is operating along very conservative financial lines. That may be a form of criticism which is frequently directed at publicly owned utilities, but it is a policy of which taxpayers appear to approve. Practically the only source of revenue which the Commission receives, comes from the fare box. If the Board is to consider a wage increase I think it would be unfair to make it retroactive. The Commission should meet its operating expenses out of current revenue. To make a wage increase retroactive when no surplus is being accumulated for dividends as in the case of a privately owned company, would not in my judgment be equitable. I do not think that either party to this dispute is responsible for any delay in reaching a firm conclusion about a wage increase.

In view of what I have already stated about the failure of the Union to cancel the 1949 contract effectively and for the other reasons set out under this heading, I do not feel I should make any recommendation about the wage increase to become effective before January 1, 1951.

It may not be within the province of this Board to make a recommendation for any year but 1950. However, I think in the interests of the parties it would be helpful if I were to state what I think should take place at January 1, 1951 in the way of a wage increase.

I think sufficient evidence was given at the hearing to indicate that wage levels in the Ottawa area of Ontario are not as high as they are in the more highly industrialized centres like Hamilton, Toronto and

Windsor. The present basic wage for operators in Ottawa is \$1 per hour. In Toronto, I believe it is \$1.24. In Hamilton it is approximately \$1.24. In Windsor it is approximately \$1.27½.

Other systems, though perhaps smaller, in the Ottawa area, pay wages for the same work of from 85 cents to 90 cents. I think it would be fair to suggest to the Commission that a wage increase of 10 cents an hour beginning January 1, 1951, be granted.

Wage differential:

The Union asks for a differential running between 2 and 10 cents an hour for some of its employees. The best evidence given under this heading was by Maurice Goulet who is a welder. Other evidence on the differential was not satisfactory and I do not think it sufficient to enable the Board to make a reasonable finding. It was stated before the Board that the question of the differential was raised at the last meeting held by the parties and was not properly discussed. I believe the Board would be justified and would be doing both sides a service, by recommending that the parties themselves adjust the differential. If after further meetings they both find they cannot agree, the question could be submitted to us again. My view, however, is that the differential can be settled amicably. The Commission has taken the initiative before, in this.

Vacation with pay:

Under the present agreement the Commission provides holidays with pay as follows:—

- 6 days after 1 year
- 7 days after 2 years
- 8 days after 3 years
- 9 days after 4 years
- 10 days after 5 years.

The Union has requested two weeks' holidays with pay after 1 year of service. The Commission is willing to meet the Union's demand as follows:—

- After 1 year 7 days holidays with 6 days' pay.
- After 3 years 10 days holidays with 9 days' pay.
- After 5 years 14 days holidays with 12 days' pay.

The history of this question indicates that the Commission has been liberalizing its approach every year. I believe the Commission will continue to improve the holiday position as time goes on. Accordingly I would recommend for acceptance the new holiday schedule as proposed by the Commission.

(Sgd.) JOHN J. CONNOLLY.

October 12, 1950.

COLLECTIVE AGREEMENTS AND WAGE SCHEDULES

Recent Collective Agreements

A file of collective agreements is maintained in the Economics and Research Branch of the Department of Labour. These are obtained directly from the parties involved and through the Industrial Relations Branch of the Department. A number of those recently received are summarized below.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining

Coal Mining

CAPE BRETON AND SPRINGHILL, N.S.—DOMINION COAL COMPANY LIMITED AND CUMBERLAND RAILWAY AND COAL COMPANY AND UNITED MINE WORKERS OF AMERICA, DISTRICT 26.

Agreements to be in effect from February 1, 1950, to January 31, 1952, and from year to year thereafter, subject to notice. The company recognizes the mine committee in the discharge of their duties as provided for in the agreement which applies to all union members and to all eligible to membership in the union.

Check-off: the company agrees to deduct from the pay of all union members all dues, fines and initiation fees, and also assessments and levies for strictly union purposes. The maximum amount to be so deducted in any one month shall not exceed \$5.

Hours: 8 per day, in machine shops 8½ per day. If necessary, surface workers may be required to work ½ hour longer to facilitate their own work or the work of the next shift or day. **Overtime:** Collieries: surface—machinists, mechanics, carpenters, blacksmiths, electricians, shaftmen (No. 2 colliery), masons (No. 4 colliery), will be paid time and one-half for overtime and double time for Sundays and statutory holidays; underground—workers will be paid only for the actual time worked after the regular shift or on Sundays and legal holidays, except that rope splicers who work less than 4 hours overtime will be paid a half shift and those who work over 4 hours will be paid a full shift. Machine shops, construction and property department, outside mechanical and electrical departments, splint crushing plant and stone dump—time and one-half for overtime and double time for Sundays and legal holidays will be paid to all classes of labour. Central power plant—machinists, masons and electricians will be paid time and one-half for overtime, double time for Sundays and legal holidays. International and Louisburg piers—carpenters, machinists, blacksmiths and electricians time and one-half for overtime, double time for Sundays and legal holidays; all other employees will be paid for the actual time worked after regular hours or on Sundays

and legal holidays. Warehouse department—employees will be paid for actual time worked. Cumberland Railway and Coal Company: Surface—time and one-half for overtime, double time for Sundays and straight time for legal holidays will be paid to mechanics, machinists, blacksmiths, plumbers, boilermakers, carpenters, masons, electricians and helpers; underground—time and one-half for Sundays, actual time worked for overtime and for work on legal holidays.

Vacation with pay will be granted to employees covered by the agreement in accordance with the Supplementary Finding and Directions of the National War Labour Board, dated January 20, 1944, as modified by later negotiations.

Wage rates for certain classes: the agreements contain schedules of mining rates for the various collieries showing the rates per ton of coal mined, rates for timbering, pushing, etc. Where daily rates are given they are as follows: underground workers—labourers, drivers, pit stablemen \$8.14; pickmen \$8.24 and \$8.41; bratticemen, chock builders, chock drawers' helpers \$8.24; roller men \$8.26, dispatchers \$8.61, pipemen \$8.70, rope splicers \$8.95, chock drawers \$9.25; mechanized mining rates—joy loader operators, cutting machine operators \$11.90; borers, operators of duckbills, Eimco machines or other types of loaders \$11.40; mechanics and electricians with loading units \$9.55; others employed at face with loading unit \$9.25; shops, per hour—machinists, blacksmiths, boiler makers, moulders \$1.198 and \$1.27; patternmakers, wood workers, brass moulders \$1.27; carpenters, painters, iron melters \$1.215; welders \$1.191 to \$1.327, tinsmiths \$1.215 and \$1.27, drillers \$1.125 and \$1.27, helpers \$1.08 and \$1.125; apprentices to start at \$5.92 per day, increased by 43 cents per day each 6 months for 4 years; electrical department, per hour—electricians and linemen \$1.198 and \$1.276, helpers \$1.086, labourers \$1.018, boys under 17 years .876, boys over 17 years .911. Surface workers—tally boys \$7.04; labourers, teamsters, pickmen, screen men \$8.14; tippie men \$8.14 and \$8.24; car shunters and trimmers \$8.29, washhouse and boiler tenders \$8.53, carpenters \$8.64 and \$8.69, electricians \$8.69; blacksmiths \$8.69 and \$8.83, helpers \$8.53; colliery mechanics \$8.69 and \$8.95. colliery machinists \$10.16, acetylene welder \$9.53, hoisting enginemmen \$8.60 to \$9.75, stokers \$8.70. The above rates are the same as in previous agreement.

Provision is made for the election of *checkweighmen* and for *grievance procedure*.

Metal Mining

KIMBERLEY AND CHAPMAN CAMP, B.C.—THE CONSOLIDATED MINING AND SMELTING COMPANY OF CANADA LIMITED AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 651.

Agreement to be in effect from June 1, 1950 to May 31, 1951, and thereafter unless

2 months' notice is given by one party to the other. The agreement is similar to the one between the Consolidated Mining and Smelting Company of Canada Ltd., Trail, B.C., and the International Union of Mine, Mill and Smelter Workers, Local 480, summarized in the *LABOUR GAZETTE*, October, 1950, p. 1674, with the following classifications and the corresponding basic wage rates added: barman \$1.59, miner (raise or shaft) \$1.43, miner (drift or stope) \$1.39, timberman \$1.39. Basic wage rates are in all cases 6 cents per hour over the previous rates.

Manufacturing

Animal Foods

CHARLOTTETOWN, P.E.I., MONTREAL AND HULL, QUE., TORONTO AND PETERBOROUGH, ONTARIO, WINNIPEG, MAN., EDMONTON, ALTA., AND VANCOUVER, B.C.—CANADA PACKERS LIMITED AND THE UNITED PACKINGHOUSE WORKERS OF AMERICA, LOCALS 282, 357, 314, 114, 210, 216, 243 AND 162 RESPECTIVELY.

Agreement to be in effect from August 21, 1950, to August 1, 1952. Notice to terminate or to amend may be given before June 1, 1952. During the period of negotiations the agreement shall remain in force. The company recognizes the union as the exclusive bargaining agency for all eligible employees in the above plants.

Union security: any employee who is now or who later becomes a member of the union in good standing shall, as a condition of employment, maintain such membership during the term of the agreement. *Check-off:* the company agrees to deduct union dues monthly from the pay of employees who so authorize and to remit same to the union. Such authorization may be revoked at any time. New employees shall, as a condition of employment, pay dues to the union during the term of the agreement, beginning with the second monthly check-off date after employment. Between July 17 and August 1, 1952 (both dates inclusive), an employee may resign from membership in the union and/or cancel his authorization to deduct dues and his employment shall not thereby be affected. There shall be no discrimination, coercion or intimidation because of membership or non-membership in the union.

Hours of work shall not exceed 8½ per day and 42 per week, except at Montreal and Hull where it is 9 per day and 44 per week (a reduction of 2 hours per week in all plants from previous agreement). The union agrees that it may at times be necessary to exceed or to reduce these basic hours. In consideration of the foregoing the company agrees to guarantee a minimum work week of 36 hours (at Montreal and Hull 36½ hours) at regular rates of pay, subject to certain specified conditions. *Overtime:* hourly-paid employees will be paid time and one-half for all hours worked in excess of the hours prescribed for the day, double time for work on Sunday or the alternative day off and double time and one-half for work on 8 paid holidays (previously double time). Shift employees working on a paid holiday may elect to receive either double time and one-half or the regular rate and another day off with pay. Weekly-paid employees shall receive compensating time off with pay for work in excess of their weekly or daily schedule of hours.

Rest periods of 10 minutes each during morning and afternoon shifts will be granted, provided the working time of the shift exceeds 2½ hours.

Vacations with pay: one fifty-second of one week for every week's service for employees with less than one year's service, one week after one year's service, 2 weeks after 5 years' service and 3 weeks after 15 years' service (formerly only female employees were granted 3 weeks after 15 years, males after 20 years).

Wages: effective August 2, 1950, present hourly rates shall be increased by 7.4 per cent. Rates of weekly paid men shall be increased by \$2.50 and of weekly-paid women by \$2 weekly. After August 1, 1951, a further increase of 3 cents per hour will be granted. In addition, employees shall be given a *cost-of-living allowance*, which is to be adjusted every 3 months. The amount shall be determined in accordance with the latest cost-of-living index figure published by the Dominion Bureau of Statistics before the beginning of each 3-months period: for each 1.3 points change in the index above 167.5, a 1-cent adjustment upwards or downwards shall be made in the cost-of-living allowance. However, in no event will a decline in the index below 167.5 provide the basis for a reduction in the wage scale.

Night premium: the company agrees to pay a premium of 5 cents per hour for work performed between 6 p.m. and 6 a.m. In Winnipeg and Edmonton a premium of 5 cents per hour will be paid to all employees working on shifts beginning between 3 p.m. and 3 a.m.

The *sick pay and welfare plan* as amended will remain in effect for the term of the agreement.

Provision is made for *seniority rights and grievance procedure*.

Textiles and Clothing

TORONTO, ONTARIO.—THE ASSOCIATION OF MILLINERY MANUFACTURERS AND THE UNITED HATTERS, CAP AND MILLINERY WORKERS' INTERNATIONAL UNION, LOCAL 46.

Agreement to be in effect from February 15, 1950, to February 15, 1952. In the event of a serious change in circumstances affecting the welfare of either party during the existence of this agreement, either party may demand that a general conference be held for the purpose of discussing and dealing with any demands with respect to such changes in condition.

Union security: every employer signatory to this agreement shall maintain a union shop during the existence of the agreement. The union agrees to supply to the employers any additional skilled workers in the classifications covered by this agreement. Should the union be unable to do so within 3 days of receiving a request, the employers may obtain such workers on the open market, but the latter shall become members of the union.

Check-off: the employers agree to the irrevocable check-off of union dues and assessments of all union members in their employ.

Hours: 8 per day Monday through Friday, a 40-hour week. In dull periods when there is not sufficient work for all employees, foremen, foreladies, etc. shall refrain from doing any work in the classifications covered by the agreement; the available work shall be

divided as equally as possible amongst all the employees of a particular classification. *Overtime* shall not be worked except for a period of 4 to 6 weeks in the spring, before Easter, and 4 weeks in the fall. The overtime shall consist of not more than 10 hours per week, 2 hours per day, except in the case of female employees whose hours are subject to the provisions of the "Factory, Shop and Office Buildings Act of 1932". Overtime shall be paid for at the rate of time and one-half.

Statutory holidays: workers who have been employed in the millinery industry for at least 3 months and who have been with their present employer for one month shall be granted 4 specified *paid holidays*. No work shall be performed on Labour Day. Employees shall have the right to absent themselves from work on May 1, but without pay.

Vacations with pay: 1½ weeks in 1950 and 2 weeks in 1951, provided workers have been with their present employers at the vacation time a minimum period of 8 months; otherwise they will be paid at the rate of 2 per cent of their earnings from the time of their employment.

Minimum weekly wage rates: hand blockers \$57.96, blockers \$53.55; cutters, straw operators, fabric operators \$52.29; drapers \$37.20, trimmer-drapers \$32.40, trimmers \$29.50. The above rates are from \$2 to \$2.76 higher than the previous rates.

Industrial Standards Act: both parties having agreed to apply immediately for a conference to establish a schedule to operate in the industry in Ontario will invalidate certain clauses of this agreement and will impose conditions that are not set out in this agreement. However, conditions of employment, working hours, and rates of pay as set out by the schedule under the Industrial Standards Act and by this agreement are not to be conflicting.

Provision is made for the *settling of disputes*.

Printing and Publishing

TORONTO, ONT.—THE EMPLOYING PHOTO-ENGRAVERS ASSOCIATION OF TORONTO AND INTERNATIONAL PHOTO-ENGRAVERS UNION OF NORTH AMERICA, LOCAL 35.

Agreement to be in effect from May 1, 1950, to April 30, 1952, and thereafter from year to year, subject to 60 days' notice.

Union security: none but members of the union in good standing shall be employed to do any work which comes under the jurisdiction of the union. This provision includes superintendents and foremen. No employee shall be required to handle any work which has not been executed in its entirety by members of the union or which emanates from an establishment engaged or assisting in a strike or lockout involving the union. The union agrees to furnish the necessary skilled and competent workmen; if it fails to do so within 10 days of a request the employer shall have the right to employ other workmen. Such workmen shall make application to become members of the union within 30 days. No individual employment contracts conflicting with this agreement shall be entered into unless consented to by both parties.

Check-off: a payroll deduction shall be made by the employer from each member's wages and remitted monthly to the union for

"Special Assessment Fund" purposes. (One specified employer is exempted from this provision.)

Hours: 7½ per day for day shift, 7 for first and 6¾ for second night shift, 37½, 35 and 33¾ hours, respectively, per week. After starting for the day or night no employee shall receive less than a full day's or night's pay. *Overtime:* time and one-half for the first 3 hours of work in excess of the above hours, double time thereafter and for work on Saturdays and Sundays, triple time for work on 8 specified *paid holidays*. No journeymen shall be permitted to work more than 8 hours overtime in any one week when competent unemployed men are available.

Vacations with pay: two weeks after one year's service; employees with less than one year's service shall be entitled to one day for each 23 days worked during the previous year.

Minimum weekly wage rates: for day journeymen \$90, for night journeymen on first night shift \$95, on second night or "lobster" shift \$100 for the first year of the agreement (an increase of \$5 over the previous rates). For the second year of the agreement the above rates shall be increased by \$3 per week. All foremen shall receive not less than \$5 per week over the journeyman rate of wages. Apprentices shall be paid 30 per cent of journeymen's rate for first 6 months, 35 per cent for second 6 months and so on to 90 per cent for twelfth 6 months.

Apprentices: the number of apprentices to be allowed shall be based on the number of journeymen regularly employed on a full time basis for a period of not less than 3 months, at the ratio of one apprentice to each 8 journeymen.

All engravings shall be stamped with the union label. All negatives and positives to be transferred to other establishments for completion shall bear the union label.

This agreement shall be extended to provide for work on Saturdays but employees shall be engaged only on work for 2 specified companies and the production of plates for Federal and Provincial Governments of an emergency character and necessitating work on Saturdays.

Provision is made for the *settling of disputes*.

TORONTO, ONT.—ROTO-GRAVURE EMPLOYERS AND INTERNATIONAL PHOTO-ENGRAVERS UNION OF NORTH AMERICA, LOCAL 35.

Agreement to be in effect from May 1, 1950, to April 30, 1952, and thereafter from year to year, subject to 60 days' notice. This agreement is similar to the one between the Employing Photo-Engravers Association of Toronto and the International Photo-Engravers Union of North America, summarized above, with the following difference:—

Minimum weekly wage rates: for day journeymen \$95, for night journeymen on first night shift \$100, on second night or "lobster" shift \$105 (an increase of \$6 over the previous rates). For the second year of the agreement the above rates shall be increased by \$3 per week.

Wood Products

NEWMARKET AND HOLLAND LANDING, ONT.
—THE OFFICE SPECIALTY MANUFACTURING COMPANY LIMITED AND INTERNATIONAL WOODWORKERS OF AMERICA.

Agreement to be in effect from April 1, 1950, to March 31, 1951, and thereafter from year to year, subject to notice. The company recognizes the union as the sole collective bargaining agency for all eligible employees. No employee shall be discriminated against, coerced, restrained or influenced on account of membership or non-membership, activity or lack of activity in any labour organization.

Hours: 9 per day Monday through Friday, a 45-hour week. *Overtime:* time and one-half shall be paid for work in excess of the above hours and for work on 3 specified holidays, double time for work on 5 specified *paid holidays* (except in the case of engineers, firemen and watchmen). All employees shall receive a *rest period* of 10 minutes' duration in the forenoon and 5 minutes' duration in the afternoon.

Vacations with pay: one week for all employees; those with one year's seniority shall receive pay equal to 2 per cent and those with 5 years' seniority pay equal to 4 per cent of their earnings during the preceding 12 months. It is the policy of the company to close the plant during the first week of July and employees with less than 12 months' service shall receive as vacation pay an amount equal to 2 per cent of their earnings during their employment. In the case of absence without adequate excuse in excess of one working day in each month, the excess will be deducted from the employees' vacation.

Wage rates in effect March 30, 1950, are increased by 5 cents per hour for all adult male employees and 4 cents per hour for all female employees. Piece work rates will be adjusted to reflect these increases. The following are hourly rates for certain classes applicable to the Newmarket plant: Wood division—sticker, tenoner double end, shapers, band saw, dado saw, trim saw, rip saw 93 cents to \$1.05; shapers, dado saw, rip saw, operate only 75 to 89 cents; re-saw, swing saw, dovetail, mortising 85 cents to \$1; automatic rip saw, buzz planer-jointer 85 to 95 cents; boring machine, hand clamps, framing 75 to 90 cents; crating saws, chair bender 80 to 90 cents; cabinet makers 85 cents to \$1.05; finishing 75 cents to \$1.05. Metal division—tool makers \$1.06 to \$1.25, tool maker improver 95 cents to \$1.05, machinist 80 to 95 cents; heavy presses and power brakes 75 cents to \$1.05; punch press 80 cents to \$1; turret lathe 85 cents to \$1, operate only 75 to 85 cents; case makers 95 cents to \$1.05, welders 75 cents to \$1.05, upholsterers 75 to 95 cents, tool grinder 90 cents to \$1, layout 95 cents to \$1.07, die setter 95 cents to \$1.14, grinding, plater 75 to 90 cents; filing, riveting and drilling 75 to 85 cents. Service—stock room employee, crater and packer 75 to 95 cents; watchmen 75 to 87 cents, plumber 95 cents to \$1.08. Paper department—paper cutter 75 to 95 cents; pressmen 95 cents to \$1.11, operate only 75 to 95 cents; ruler 85 cents to \$1. All departments—general labour, adult males 75 to 85 cents, boys (under 19 years) 55 to 75 cents, females 45 to 68 cents; minimum hiring rates for new employees—adult males 70 cents, boys 50 cents, females 40 cents.

Provision is made for *seniority rights* and *grievance procedure*.

Metal Products

BRANTFORD, ONT.—THE COCKSHUTT PLOW CO., LIMITED AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 458.

Agreement to be in effect from June 7, 1950, to June 7, 1951, and thereafter from year to year, subject to notice. The company recognizes the union as the bargaining agency of its employees in respect to all working conditions. No discrimination, interference, restraint or coercion will be exercised or practised by the company because of an employee's membership in, or connection with, the union.

Check-off: the "Rand Formula" is part of the agreement.

Hours: 8 per day 5 days a week, a 40-hour week. Where 3 shifts of 8 hours each are worked males will be entitled to 20 minutes for lunch and females to 30 minutes, both with pay. *Overtime:* time and one-half shall be paid for work in excess of the above hours and for work on Sundays (except where part of regular shift) and 8 specified *paid holidays*. Where an employee is required to work 7 continuous days of any calendar week, he or she shall be paid at the rate of time and one-half for the seventh day.

Rest periods and wash-up time: employees (except shift workers where 3 shifts are worked) shall be allowed a rest period of 10 minutes each half shift. The company will also allow a 5-minute period for the purpose of washing up immediately prior to the end of each half shift.

Vacations with pay: one week after one year's service, 2 weeks after 5 years' service and 3 weeks after 25 years' service (the last provision is a new one). Employees with between 3 and 12 months' service shall be entitled to 2 per cent of their earnings during the first 11 pay periods of the current calendar year (employees are paid bi-weekly). All vacation pay shall be subject to deductions on a *pro rata* basis for any unauthorized absence from work in excess of one day per month.

Shift bonus: any person employed on night shifts shall receive a bonus of 5 cents per hour for each hour worked between 7 p.m. and 7 a.m.

Welfare plan: the company will set aside an additional one cent per hour for the purpose of increasing welfare benefits for the employees. The 2 parties shall agree on the details of the increased welfare benefits.

Pensions: the company will commence paying 5 cents per hour into a trust fund in the hands of a trust company, selected by the company for a non-contributory plan effective from the commencement of the new collective agreement. Details of any pension plan are to be mutually worked out and agreed to by the actuaries of the company and the union.

Provision is made for the continuance of a *Health and Safety Committee*, and for *seniority rights* and *grievance procedure*.

Non-metallic Minerals, Chemicals, Etc.

ST. MARY'S, ONT.—ST. MARY'S CEMENT COMPANY LIMITED AND THE AMALGAMATED BUILDING AND CONSTRUCTION WORKERS OF CANADA, LOCAL 15.

Agreement to be in effect from August 1, 1950, to July 31, 1951, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect (L.G., Jan., 1950, p. 74) with the following changes and additions:—

Statutory holidays: the agreement provides for 5 specified paid holidays and two holidays without pay (previous agreement provided for 5 holidays without pay), with the understanding that the union will make no further request to the company for additional holidays or for changes or amendments to the paragraph regarding statutory holidays for a period of 5 full years. Work on the paid holidays will be paid for at double time and on the other 2 holidays at time and one-half.

Vacations with pay: effective September 1, 1950, employees with 25 years' continuous service will be granted an additional week, making it 3 weeks in all; 2 weeks of the vacation may be taken between December 1 and the following March 31 and the third week between April 1 and November 30.

Pension plan: all employees who are eligible for the pension plan and who have joined the company's working force on or after May 31, 1944, will join and participate in the company sponsored pension plan as a condition of employment.

Hourly wage rates are increased by 5 cents. A provision that there will be no increase in the cost-of-living bonus if the index rises above 169 has been added.

Construction

TORONTO, ONT.—CERTAIN ELECTRICAL CONTRACTING FIRMS AND INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL 353.

Agreement to be in effect from June 1, 1950, to May 31, 1951, and thereafter from year to year, subject to notice. The companies agree not to employ anyone on electrical construction work who is not a member of the union. No member of the union shall be permitted to work at electrical construction work for anyone who is not a party of the agreement. The union shall not sign this agreement with anyone other than a party whose business is recognized as electrical construction work.

Hours: 8 per day Monday through Friday, a 40-hour week. **Overtime:** double time for all overtime, including work on Saturdays, Sundays and 8 specified holidays. Where 2 or 3 shifts are employed those other than the day shift shall receive 8 hours' pay for 7 hours' work. When work cannot be done during the day such work may be done as a straight night shift of not more than 7 hours with pay for 8 at straight time. A minimum of 6 hours with 7 hours' pay shall be considered a shift. No employee shall be permitted to work on more than one shift in 24 hours unless overtime rate is paid.

Vacation pay of 4 per cent of wages shall be given employees in order to allow 2 weeks' vacation with pay.

Wage rates: for journeymen electricians \$1.80 per hour from June 1, 1950, to June 30,

1951 (an increase of 5 cents per hour over previous rates), and \$1.85 thereafter; for apprentices during second half of first year 30 per cent of journeymen's rates, during second year 40 per cent, during third year 50 per cent and during fourth year 70 per cent.

Apprentices: one apprentice may be employed by each employer and, in addition thereto, one apprentice for every 3 journeymen in a shop.

Transportation: men requested to travel out of the Toronto Zone shall have their transportation cost paid by the employer and also receive travelling time to and from the job. Employees on these out-of-town jobs shall conform to building trades agreement in the district.

VANCOUVER AND NEW WESTMINSTER, B.C.—THE GENERAL CONTRACTORS ASSOCIATION OF VANCOUVER, B.C., AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCALS 452 AND 1251.

Agreement to be in effect from May 1, 1950, to March 31, 1951, and from year to year thereafter, subject to 60 days' notice.

Union security: only competent union journeymen shall be hired; if they are not available the contractor may obtain carpenters elsewhere but they must join the union within 30 days or be replaced by competent union tradesmen when available.

Hours: 8 per day Monday through Friday, a 40-hour week. **Overtime:** time and one-half shall be paid for the first 4 hours in excess of the regular hours until a break of 8 hours occurs, double time thereafter and for work on Saturdays, Sundays and 8 specified holidays. No work shall be performed on Labour Day. Additional shifts, when required and continued for 3 consecutive nights, and shifts starting after 4 p.m. on jobs in occupied buildings where work must be done after regular working hours shall be paid 8 hours' pay for 7 hours' work.

Vacation pay will be provided as required by Provincial law.

Hourly wage rates: for journeymen carpenters \$1.68; foremen in charge of work shall be paid not less than \$1.60 per day over the journeyman's rate.

Transportation: all workmen on out-of-town jobs shall receive transportation to and from the job. Meals and travelling time up to 8 hours in any 24-hour period will be paid for.

Should men be asked to work in districts under the jurisdiction of other locals of the United Brotherhood of Carpenters and Joiners of America they shall be paid the wage and adhere to the conditions applicable in the district in which the local union has jurisdiction.

Apprentices shall be employed in accordance with the provisions of the British Columbia Apprenticeship Act.

Provision is made for *grievance procedure*.

Transportation

Water Transport

ST. JOHN'S, Nfld.—NEW FOUNDLAND EMPLOYERS' ASSOCIATION LIMITED AND THE LONGSHOREMEN'S PROTECTIVE UNION.

Agreement to be in effect from May 1, 1950, to April 30, 1951, and thereafter from

year to year, subject to 60 days' notice. During the currency of this agreement no new working conditions shall be introduced by either party.

Union security: all employers shall employ members of the union. If sufficient members are not available non-union help may be employed at union rates of pay. No union member shall be required to perform work which involves the processing, handling, or transportation of any goods which have been shipped from any premises where there is a dispute between such shipper and any union performing longshore work.

Hours of work shall be: day—9 a.m. to 6 p.m., early night period—7 p.m. to 11 p.m., late night period—midnight to 8 a.m.; meal hours—8 a.m. to 9 a.m., 1 p.m. to 2 p.m., 6 p.m. to 7 p.m., 11 p.m. to midnight. Men working through the night may carry on to midnight if they so desire. Should men be required to work beyond the regular meal hour they shall be paid meal hour rates. Men required to work after midnight shall be entitled to a short lunch period with pay if work extends beyond 4 a.m. or to one-half hours' pay at the appropriate rate. A man who has worked continuously for 20 hours must not continue his employment or be re-employed until he has had at least 8 hours rest.

Union holidays: there shall be 9 specified union holidays; on 4 of them no work shall be performed except the handling of mail and luggage, maintenance work on cold storage plants, and in cases of emergency; if work is undertaken the following rates of pay shall apply: loading or discharging cargo—Sunday rates; work in connection with cold storage and fish wharf operations—meal hour rates. On the other 5 holidays work may be undertaken at meal hour rates. On Christmas Eve no work shall be performed after 11 p.m.; work between 6 p.m. and 11 p.m. shall be paid for at Sunday rates.

Hourly rates of wages for (1) day; (2) early night; (3) late night; (4) meal hours, union holidays, Saturday night and (5) Sunday work, respectively: Steamship—general and salt cargoes \$1.20, \$1.43, \$1.95, \$1.95, \$2.40; cement, coal, sand \$1.28, \$1.51, \$2.03, \$2.03, \$2.56; Welsh steam coal and slag, coal storage on ships \$1.38, \$1.61, \$2.13, \$2.13, \$2.76; anthracite coal \$1.40, \$1.63, \$2.15, \$2.15, \$2.80; ammunition \$1.80, \$2.26, \$2.72, \$2.72, \$3.60; general labour about premises 81 cents, 92 cents, \$1.17, \$1.68, \$1.68. Fish wharf—barrowing and packing 91 cents, \$1.02, \$1.27, \$1.71, \$1.71; labour in oil freezers and cleaning oil tanks 85 cents, 95 cents, \$1.20, \$1.69, \$1.69; general labour about premises 81 cents, 92 cents, \$1.17, \$1.68, \$1.68. Seal—cleaning sealoil tanks 85 cents, 95 cents, \$1.20, \$1.69, \$1.69; packing skins, scrapping and piling skins, salting and piling skins, drumming skins after manufacturing period

88 cents, 99 cents, \$1.24, \$1.70, \$1.70; all factory work, wheeling to elevator or drop, drumming skins during manufacturing period 95 cents, \$1.06, \$1.31, \$1.72, \$1.72; cleaning steamer after voyage \$1.20, \$1.43, \$1.95, \$1.95, \$1.95; drawing and shipping oil and other labour about premises 81 cents, 92 cents, \$1.17, \$1.68, \$1.68. Special rates on certain cargoes: asphalt and tar (in barrels) when in damaged condition 30 cents per hour over general cargo rates; fertilizer, creosote sticks, cow hides (in bundles) 10 cents per hour over general cargo rates; lime, talc, plaster, charcoal, and powdery commodities (in brin or paper containers) 7 cents per hour over general cargo rates; men engaged in cleaning boats after discharge of cattle shall be paid 25 cents per hour over general cargo rates; men working cargoes of cement wherein substantial breakage of paper packages has occurred shall be paid 30 cents per hour over cement rates. Waiting time shall be paid for at the full rate for the first hour and at half rate for each subsequent hour.

The number of men per gang is specified.

Provision is made for *settlement of disputes*.

Conditions applying to cold storage operations only:

The Newfoundland Employers' Association shall deal with a separate committee of the Longshoremen's Union, appointed especially to deal with the working conditions for cold storage workers, with certain exceptions.

Hours: 8 per day 6 days a week, a 48-hour week. *Overtime:* any work performed other than during regular hours of work shall constitute overtime and shall be paid for at standard overtime rates. When the receipt of produce does not warrant starting work until 2 p.m., and before 5 p.m., work will go on until not later than midnight and is to be payable at ordinary rates until 6 p.m. and standard overtime rates after 6 p.m. where a minimum wage for a 48-hour week is not guaranteed; where a guarantee is made such work shall constitute part of the 8-hour day guaranteed period. The decision whether employees shall work under the guaranteed 48-hour week, or not shall be left to them when employed. The rate of pay for the guaranteed 48-hour week shall be \$42.70 for men and \$24.25 for women.

Hourly wage rates for (1) day; (2) early night; (3) late night and (4) meal hours, Saturday night and Sunday work, respectively: casual labour around plant 81 cents, 92 cents, \$1.17, \$1.68; casual labour in plant, filleters and skimmers 85 cents, 95 cents, \$1.20, \$1.69; wheeling fresh fish into plant, checkers and weighers 91 cents, \$1.02, \$1.27, \$1.71; women 47, 52, 85 and 85 cents. Any work performed above the 8 hours per day to be paid at the ordinary rates normally applying to the time of such work.

Collective Agreement Act, Quebec

Recent proceedings under the Collective Agreement Act, Quebec,* includes the amendment of eight agreements. These include, in addition to those summarized below, the amendment of the agreement for barbers and hairdressers at Rouyn and Noranda published in the *Quebec Official Gazette* issue of September 30.

A request for the amendment of the agreement for the building trades at St. Jérôme was gazetted September 23. Requests for the amendment of the agreements for retail stores at Granby, for the building trades at St. Hyacinthe and for barbers and hairdressers at Chicoutimi were published in the issue of September 30, and requests for the amendment of the agreements for barbers and hairdressers at Victoriaville, and at Quebec, and for the ornamental iron and bronze industry at Montreal were gazetted October 7.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessments on the parties.

Mining

Non-ferrous Smelting and Quarrying

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC.

See below under "Manufacturing: Non-metallic Minerals, Chemicals, etc."

Manufacturing

Vegetable and Animal Food Products

FOOD PRODUCTS MANUFACTURING AND WHOLESALE FOOD TRADE, QUEBEC.

An Order in Council, dated September 20, and gazetted September 30, amends the previous Orders in Council for this industry (L.G., July, 1946, p. 930; Aug., p. 1094; Dec., p. 1774; Dec., 1947, p. 1804; Oct., 1948, p. 1128; June, 1950, p. 872, and previous issues). This agreement as amended is to remain in force until May 1, 1951, and thereafter from year to year, subject to notice.

Hours remain unchanged from those which were formerly in effect and summarized in the *LABOUR GAZETTE* issue of June, 1950, p. 872, with the exception of the following: stationary enginemen and firemen, other than first class enginemen (except those employed in packing houses and mashers or "supplements" makers), shall work a regular week of 56 hours, when there are 2 or more shifts, distributed over 7 days per week. However, a weekly holiday shall be given to all the above employees, and it shall fall on Sunday, in rotation.

Overtime: stationary enginemen and firemen, other than first class enginemen (in all establishments except packing houses), are entitled to an overpremium of 5 cents per hour, when such employees work a 56-hour week. All work in such cases performed in

excess of 56 hours per week is payable at time and one-half. (Other overtime provisions remain unchanged.)

Minimum weekly and hourly wage rates in zone I to be in effect from the first complete week of June, 1950: slaughterer and boner \$35.50; butcher and boner, pork-butcher, dry-curer (certificated) \$41; apprentice (butcher-boner, pork-butcher and dry-curer) from \$22 during the first 6 months to \$36 during and after the third year; feeding meat cook and presser \$37.50; stationary enginemen (chief) \$47 and \$62; egg grader, from \$28 in the first year to \$36 in the fifth year and thereafter; sales clerks from \$24 during the first year to \$37 during and after the fourth year; butter and cheese conditioner \$38; truck driver \$35.50; butter cutter \$30; butter wrapper and packer \$25; night watchmen (weekly minimum) \$27 or 50 cents per hour; junior employee (not handling heavy merchandise) \$20; general hand (male), not in packing houses or food products factories (under 17 years of age), \$22 during the first 3 months to \$25 after 3 months of service; (17 years of age) \$27; (18 years of age) \$30; (19 years of age and over) \$33.50; general hands (male) in packing houses \$36; order employee (receiving clerk) \$35.50; miller or mixer operator \$37.50; warehouse female, personnel outside the office staff (excepting packing-houses and food products factories) from \$18 for less than 2 months of service to \$21 for one year or more of service; warehouse female personnel (excluding office staff) in packing houses from \$18 for less than 2 months' service to \$23 during and after the third year; accountant \$43. assistant-accountant \$40.50; accountant-cashier \$38.50; junior clerk \$15; office messenger \$17; office female staff (excepting stenographers) from \$17 during the first year to \$23 in the third year and thereafter; stenographer-typist from \$20 in the first year to \$26 during and after the third year; bookkeeper or office clerk from \$20 during the first year to \$37 during and after the eighth year.

Minimum hourly rates: enginemen 74 and 89 cents; firemen and enginemen's helper 64 cents; carpenter-joiner 83 cents; truck driver for food products factories 74 cents; confectioner 78 cents, assistant 72 cents;

* In Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. References to the summary of this Act and to amendments to it are given in the *LABOUR GAZETTE*, January, 1949, page 65. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

shipper in food products factories 76 cents; general hand (male) in food products factories from 62 cents for less than one year of service to 69 cents for one year or more of service; occasional hand, male (from June 1 to October 1) 59 cents; common labourers, male and female furnace firemen 60 cents; millwright 78 cents; warehouse female personnel (excluding office staff) in food products factories from 38 cents per hour for less than one year of service to 44 cents for one year of service or more; occasional hand, female (June 1 to October 1) 42 cents; roaster 76 cents; warehouse occasional hand (male), 75 cents; (female) 42 cents; cooper 83 cents, apprentice cooper from 40 cents in the first year to 70 cents in the third year; office occasional hand 65 cents per hour. Minimum wage rates for foremen, departmental managers and their assistants, and for administrative office personnel are also included in this amendment. *Minimum weekly and hourly rates in zone II* are 10 per cent less than those shown above in zone I; *in zone III*, in the majority of instances, the rates are 15 per cent less than those shown for zone I. (Wage rates shown above remain unchanged from those which were formerly in effect.)

Cost-of-living bonus in zone I only: to compensate for the increase in the cost-of-living index from June 1, 1949 to June 1, 1950, which equals 4 points (160-164) based on the Dominion cost-of-living index, all employers, effective from the pay day for the first complete week in the month of June, 1950, shall add to the minimum wages shown above a basic weekly stabilizing cost-of-living bonus of \$1.40 per week for employees on a weekly basis or 3 cents per hour for employees on an hourly basis, which is computed on the basis of 35 cents per point per week. For each point or fraction thereof equal to or in excess of one-half point of rise or fall in the cost-of-living index the stabilizing bonus mentioned above will be increased or decreased by 35 cents per point per week for weekly rated employees. Readjustments will take place after each 3 months. Any downward revision in the stabilizing cost-of-living bonus because of a similar trend in the cost-of-living index will never exceed the amount of the stabilizing indemnity. *Commercial salesmen, etc.*, governed by Part 2 of this agreement will also benefit by the above cost-of-living regulations.

Metal Products

MECHANICAL CONSTRUCTION AND REPAIR INDUSTRY, QUEBEC DISTRICT.

An Order in Council, dated October 4, and gazetted October 14, amends the previous Orders in Council for this industry (L.G., Nov., 1948, p. 1247; Jan., 1949, p. 67; Oct., p. 1247; Jan., 1950, p. 77) by substituting the name of "L'Association patronale de la Metallurgie" for the name "L'Association professionnelle des Industriels, Regionale de Québec" as contracting party of the first part.

Non-metallic Minerals, Chemicals, Etc.

BUILDING MATERIALS INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated October 4, and gazetted October 14, amends the previous Orders in Council for Part III of this agreement which governs the *marble industry* (L.G., June, 1950, p. 872, Aug., p. 1185).

Minimum hourly wage rates: this amendment provides for a general increase of 6 cents per hour over those rates formerly in effect to all employees engaged in the marble industry with the exception of helpers and labourers, and watchmen whose rates remain unchanged. The new rates are: hand cutter \$1.38, carborundum machine operator, terrazzo caster \$1.32; machine cutter, hand and machine polisher, compressorman, saw setter, bed rubber face, bed rubber end, craneman \$1.16; sawymen on gang saws \$1.01 during the first 3 months, thereafter \$1.16. The rates for apprentices to the above trades are also published in this amendment.

Construction

MECHANICAL CONSTRUCTION AND REPAIR INDUSTRY, QUEBEC DISTRICT.

See above, under "Manufacturing: Metal Products."

BUILDING TRADES, MONTREAL.

An Order in Council, dated October 4, and gazetted October 14, amends the previous Orders in Council governing Part "C" of this agreement as it applies to the *marble, tile and terrazzo trades* in this industry (L.G., June, 1950, p. 874, Oct., p. 1679, Nov., p. 1904).

Minimum hourly wage rates for employees governed by the provisions of Part "C" of the present agreement are increased by 6 cents per hour over those previously in effect and are now as follows: marble setters, tile setters and terrazzo layers \$1.60, hand marble polishers \$1.27, terrazzo polishing machine operator (dry) \$1.41, terrazzo polishing machine operator (wet) \$1.21: apprentices (marble and tile setters and terrazzo layers) from \$1.01 during the first year to \$1.41 in the fourth year, apprentice (terrazzo polishing machine operator (dry), from \$1.11 in the first 3 months to \$1.41 after 6 months, apprentice (terrazzo polishing machine operator (wet), during the first 3 months \$1.06, thereafter \$1.21.

BUILDING TRADES, ST. HYACINTHE.

An Order in Council, dated September 20, and gazetted September 30, amends the previous Orders in Council for this industry (L.G., July, 1947, p. 1002, Sept., p. 1308; May, 1948, p. 488; Oct., 1949, p. 1247; Feb., 1950, p. 209, Aug., p. 1185, Oct., p. 1679, and previous issues) by providing that regulations governing payment of *cost-of-living bonus* will not apply to municipal or school corporations.

BUILDING TRADES, SOREL.

An Order in Council, dated October 4, and gazetted October 14, amends the previous Orders in Council for this industry (L.G., April, 1947, p. 544, Dec., p. 1804; Jan.-Feb., 1948, p. 51; Jan., 1950, p. 78, Oct., p. 1679, Nov., p. 1905, and previous issues). The names of five employers are deleted from the list of contracting parties of the first part and fifteen other firms are added.

Territorial jurisdiction which comprises the city of Sorel, the county of Richelieu and that part of the county of Verchères not governed by the agreement regulating the building trades in the district of Montreal is now divided into 2 zones: zone I, in the city of Sorel, the village of St. Joseph de

Sorel and within a radius of 6 miles from their limits; zone II, the remainder of the territorial jurisdiction.

Minimum hourly wage rates in zone I: carpenter-joiner, setter of screens (wood and metal) frame-work, windows, steel partitions, tinsmith-roofer, steam crane operator, electrical and gas crane operator \$1.15; painter and paper hanger, steam stationary or portable engineman, tile setter, carpenter-joiner (working for a door and window-frame manufacturer) \$1.05; spray painter \$1.25; boiler fireman 90 cents; steam mixer operator, marble setter, terrazzo layer \$1.10; horse driver 95 cents; ornamental iron workers—erector \$1.20, helper 85 cents; trucking—special transport and towing \$1; common labourer 80 cents; watchmen on a weekly basis (72 hours per week) 60 cents; plumber and pipe mechanic—contractor (personal services) \$1.25, journeyman \$1.15, junior journeymen \$1.05 and \$1.15; electrician—contractor (personal services) \$1.25, journeymen \$1.15. (The rates shown above represent increases ranging from 5 to 30 cents per hour over those previously in effect). The rate for bricklayers, plasterers, masons and cement finishers remains unchanged at \$1.40. New classifications are added as follows: joint pointer (gyproc) \$1.30; cement vibrator operator \$1.25; landscaper, hod carrier 90 cents; construction blacksmith \$1.20; bulldozer operator \$1.25; reinforcing steel layer \$1. Rates for apprentices requiring an apprenticeship from 60 cents in the first year to 90 cents in the fourth year.

Minimum hourly wage rates in zone II: bricklayers, plasterers, masons and cement finishers \$1.40; carpenter-joiner, setter of screens (wood and metal) frame-work, windows, steel partitions, tinsmith-roofer, steam mixer operator \$1; painter and paper hanger, steam stationary or portable engineman, marble setter, terrazzo layer, tile setter 95 cents; painter-spray \$1.10; boiler fireman,

horse driver 85 cents; steam crane operator, electric and gas crane operator \$1.05; landscaper, trucking (special transport and towing) 80 cents; ornamental iron workers—erector 90 cents, helper 75 cents; carpenter-joiner and painter (working for a door and window-frame manufacturer) 90 cents; common labourer 70 cents; watchmen on a weekly basis (72 hours per week) 35 cents; plumber and pipe mechanic—contractor (personal services) \$1.10, journeymen \$1, junior journeymen 85 and 95 cents; electrician—contractor (personal services) \$1.10, journeymen \$1. Rates for apprentices: bricklayers from 45 cents in the first year to 75 cents in the fourth year; plasterers, masons, marble setters, tile setters and terrazzo layers from 45 cents in the first year to 65 cents in the fourth year; carpenter-joiner from 40 cents in the first year to 70 cents in the fourth year; painters and electricians from 40 cents in the first year to 65 cents in the fourth year; wall-paper hanger and tinsmith-roofer from 35 cents in the first year to 50 cents in the fourth year; pipe mechanic from 45 cents in the first year to 70 cents in the fourth year; carpenter-joiner (employed by a door and window-frame manufacturer) from 35 cents in the first year to 50 cents in the fourth year.

Transportation and Public Utilities

Water Transportation

FREIGHT HANDLERS (LONGSHOREMEN) (INLAND AND COASTAL NAVIGATION), MONTREAL HARBOUR.

An Order in Council, dated September 20, and gazetted September 30, amends the previous Orders in Council for this industry (L.G., April, 1943, p. 490; June, 1948, p. 621, Nov., 1948, p. 1249) by increasing the minimum wage rates to \$1 per hour for day work and to \$1.05 per hour for night work, which is an increase of 5½ cents per hour.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

The Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classifications of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are awarded in accordance with a policy which provides that wage rates must equal those current in the district.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the *LABOUR GAZETTE* for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During September

(1) *Works of Construction, Remodelling, Repair or Demolition.*

During the month of September the Department of Labour prepared 182 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

During the same period a total of 147 construction contracts was awarded by the various Government departments. Particulars of these contracts appear in the accompanying table.

Copies of the relevant wages schedules are available to trade unions or other *bona fide* interested parties, on request.

The labour conditions of each of the contracts listed under this heading, besides stipulating working hours of not more than eight per day and forty-four per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than forty-four per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "*minimum rates only*" and that "nothing herein contained shall be considered as exempting contractors and subcontractors from the payment of higher rates in any instance where, during the continuance of the work such higher rates are fixed by provincial legislation, by agreements between employers and employes in the district or by changes in prevailing rates".

(2) *Contracts for the Manufacture of Supplies and Equipment.*

Contracts for supplies and equipment were awarded as follows, under the policy that wage rates must equal those current in the district:—

Department	No. of contracts	Aggregate amount
Canadian Commercial Corporation	9,732	\$11,986,012.91
Post Office	20	68,739.83
Public Works	5	20,003.00
R.C.M.P.	5	80,064.80

* The labour conditions of these contracts contain the General Fair Wages clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of 8 per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.

LABOUR LAW

Labour Legislation in Newfoundland, Alberta, Nova Scotia and Prince Edward Island in 1950

Newfoundland enacted new laws concerning labour relations, trade unions, workmen's compensation and minimum wages, making its labour laws very similar to those in other Canadian provinces. Alberta made extensive changes in the Alberta Labour Act, which consolidated the main labour laws of the Province in 1947. In Nova Scotia, the minimum compensation benefit payable to a totally and permanently disabled workman has been raised from \$15 a week to \$75 a month. Prince Edward Island gave the Workmen's Compensation Board increased authority for accident prevention measures and enacted a new Mechanics' Lien Act.

NEWFOUNDLAND

The Newfoundland Legislature was in session from February 15 to June 30, 1950. Four major labour Acts were passed: a Labour Relations Act modelled on the Federal Act, a Trade Union Act which sets out certain rights and obligations of trade unions, a Workmen's Compensation Act similar to Acts in the other nine provinces, and a Minimum Wage Act providing for the setting of minimum standards of wages, overtime pay and other conditions of employment on the recommendation of a Minimum Wage Board.

Labour Relations

The Labour Relations Act, proclaimed in effect July 18, 1950, is patterned on the Federal Industrial Relations and Disputes Investigation Act of 1948. The Federal statute was drafted with a view to meeting the needs of industrial relations in industries under provincial jurisdiction as well as those in the Federal field, so that if the provinces chose to enact similar legislation there would be uniform industrial relations law throughout Canada. In addition to the Newfoundland Act, the New Brunswick, Manitoba and Nova Scotia Acts follow very closely the Federal Act, and the Acts in the other provinces are similar to it in many respects.

Like the Federal Act, the Newfoundland Act establishes a procedure for certification of trade unions as bargaining agents, makes collective bargaining compulsory, provides for the appointment of conciliation officers and boards if bargaining is unsuccessful, and prohibits unfair labour practices. It makes a collective agreement binding upon the

employer and the bargaining agent and every employee in the unit which the bargaining agent has been certified to represent, requires that every collective agreement shall contain a provision for settling differences without work stoppage during the course of the agreement, and prohibits strikes and lockouts until conciliation procedure has been followed and seven days have elapsed after a Conciliation Board report. It prescribes penalties in the form of fines enforceable through the Courts. It provides for an agreement with the Federal Government under which the Federal authorities may administer the Act with respect to any particular undertaking or business. A detailed summary of the Federal Act may be found in the *LABOUR GAZETTE* (L.G., 1948, pp. 1255-1261). The main points of difference are noted below.

The Newfoundland Act provides for a voluntary revocable check-off of union dues. An employer is required to honour a written assignment of wages to the certified bargaining agent. If an assignment is revoked the employer must notify the bargaining agent. There are similar provisions in the British Columbia, Alberta, Saskatchewan, Prince Edward Island and Nova Scotia Acts.

A trade union that does not comply with the Newfoundland Trade Union Act is barred from certain benefits of the Labour Relations Act as long as non-compliance continues. These benefits are certification and decertification of bargaining agents, and the compulsory collective bargaining requirement.

Besides the unfair labour practices listed in the Federal Act, the Newfoundland Act adds three provisions. One provision makes it an unfair labour practice for an employer in the course of a labour dispute to threaten to shut down or move a plant. Secondly, an employee or any person acting on behalf of a trade union is prohibited from using coercion or intimidation to encourage or discourage membership in a trade union, but this does not preclude attempting to persuade an employer to make an agreement requiring membership or maintenance of membership in the union as a condition of employment. Finally, no trade union or person acting on behalf of a trade union and no employee "shall support, encourage, condone or engage in any activity that is intended to restrict or limit production".

In the provisions regulating the procedure for negotiation a clause is included providing that, if an application for certification or decertification is pending before the Labour Relations Board, the Board may order collective bargaining to be suspended until a decision on the application is reached.

As in several other provinces, the Newfoundland Labour Relations Board is composed of four members and the chairman, rather than eight members and the chairman, as under the Federal Act. There must be equal representation of employers and employees.

The penalties for offences under the Act are similar to those set out in the Federal Act, except in the case of a union declaring or authorizing a strike contrary to the provisions of the Act. The fine in such case is fixed at an amount not exceeding two hundred and fifty dollars, instead of one hundred and fifty dollars as in the Federal Act.

The Trade Disputes (Arbitration and Inquiry) Act, 1944, as amended, is repealed.

Trade Unions

The Trade Union Act, 1950, proclaimed in effect July 18, 1950, replaces an earlier Trade Union Act in Newfoundland. The early Act was patterned on English law and brought into force in Newfoundland two English statutes, the Conspiracy and Protection of Property Act, 1875, and the Trade Disputes Act, 1906, which defined the legal status of trade unions and gave them protection against civil and criminal actions. The new Act retains the provisions protecting unions from civil liability and as a result, deals more comprehensively than statutes in the other provinces with the legal position of unions. The

provisions of the former Act concerning criminal conspiracy have been omitted, since criminal conspiracy comes within the scope of the Criminal Code of Canada.

The new Act is administered by the Department of Labour, and besides protecting unions from civil suits, sets out procedures for registration and certain requirements which the union must meet. If unions do not comply they are not protected by the Act.

"Trade union" is defined as any combination of seven or more workmen for regulating the relations between workmen and employers or for imposing restrictive conditions on the conduct of any trade or business.

The first sections of the Act deal with the legal position of trade unions. A provision similar to one in the Federal Trade Unions Act stipulates that nothing in the Act shall enable court proceedings to be taken for damages for breach of certain agreements, including those agreements having to do with the relation of the union to its members or to other unions.

No act done by two or more members of a trade union in furtherance of a trade dispute is actionable unless the act would be actionable without such combination. This is similar to provisions of an English law of 1875 which sought to protect unions from the historic common law principle that combinations are in themselves unlawful. This provision also appears in statutes of Ontario and Saskatchewan.

It is also provided that an act done by a person in furtherance of a trade dispute is not actionable "on the ground only that it induces some other person to break a contract of employment" or on the ground that it interferes "with the trade, business or employment of some other person or with the right of some other person to dispose of his capital or his labour as he wills". This section is similar to one enacted in the British Trade Disputes Act of 1906, and does not appear in the statutes of any other province.

Also similar to a section of the British Trade Disputes Act is the absolute protection of unions from civil court actions in respect to wrongful acts alleged to have been committed by or on behalf of the union. It further expressly prohibits an action against a union through representative defendants as well as an action against a union in its own name.

The Companies Act, under which associations formed for various purposes may be incorporated, is declared not to apply to trade unions. However, it is provided that unions may hold property for the use

and benefit of their members, and authorized officers of the union may bring or defend a civil action concerning the property. In such cases the president and secretary may sue or be sued in any court in their proper names without other description than the title of their office.

The Act also imposes specific obligations upon trade unions.

Every union must file with the Minister of Labour on request a certified copy of its rules, and must file amendments to the rules within one month after they are made. A list of names and addresses of officers must be submitted within a month after their election. On the Minister's request a union must provide an audited statement of its receipts and expenditures, and the Minister may, if he deems it necessary, require a further audit at the union's expense by persons approved by him. A union must also supply such other particulars and information as the Minister may from time to time require.

The treasurer of the union is required to make available to each member an audited financial statement, and, if required to do so, must turn over the balance as shown in the audit to the person designated by the members. On failure to do so he may be sued.

The rules of a trade union must contain certain regulatory provisions. Besides provision for the appointment and removal of officers, investment of funds and an annual audit of accounts, the rules must set out

Every object for which the trade union is to be established, the purposes for which the funds thereof shall be applicable, and the conditions under which any member may become entitled to any benefit assured thereby, and the fines and forfeitures which may be imposed on any member of such trade union.

They must also set out the manner of making, altering, amending and rescinding rules.

The rules must also contain provision for the manner of dissolving the union, and require that the balance of funds at dissolution "shall be donated for some *bona fide* charitable or benevolent purpose or to some other trade union with co-related or similar objects".

To unions which have complied with these conditions, the Minister of Labour issues a certificate annually, stating that the requirements as to rules and returns have been complied with. This certificate must be posted in a conspicuous place at the union meeting place or headquarters.

A trade union cannot take a name identical with that of any other trade union or nearly resembling it. The name may be

changed by the consent of at least two-thirds of the members present at a special meeting convened for that purpose. With the consent of at least two-thirds of the members of each trade union, two or more trade unions may amalgamate. Notice of change of name or amalgamation must be given to the Minister of Labour and recorded by him.

The effect on a union of failing to comply with the Act is that it shall not "enjoy the benefits conferred by this Act while such refusal or neglect continues". Similarly, it is provided in the Labour Relations Act, that the benefits of that Act apply only to unions which are in compliance with the requirements of the Trade Union Act.

Workmen's Compensation

The new Workmen's Compensation Act, like the Acts in all the other Canadian provinces, is of the collective liability type. The Act has not yet been proclaimed in force as a Workmen's Compensation Committee is conducting a study preparatory to determination of rates of compensation and assessment. The new Act will repeal the Workmen's Compensation Act, 1948, which provides compensation through an individual liability system, but the workman's right to compensation for an accident happening before the new Act comes into force will not be affected.

The new Act establishes for the majority of industries a contributory insurance fund, and provides for a Workmen's Compensation Board to administer the fund and deal with claims for compensation. Employers in industries covered by Part I of the Act are required to contribute to the fund at a rate determined by the Board in accordance with the hazards of the industry. Another important duty of the Newfoundland Workmen's Compensation Board will be its responsibility for prevention of accidents and industrial diseases. The Board is required to report annually to the Minister of Labour, who will table the report in the Legislature.

In any industry to which Part I of the Act applies, compensation will be paid for personal injury to a workman by accident arising out of or in the course of his employment or by an occupational disease specified in the schedule, except where the workman is disabled for three days or less or where the injury is attributed to his serious and wilful misconduct and does not result in death or serious disablement. Where compensation for disability is payable, it is computed from the date of disability. The waiting period in the other provinces varies from one to seven days.

Application

Part I of the Act applies to employers and workmen in or about any operations carried on in a factory; the industries of manufacturing, logging, lumbering, rafting of lumber, river driving; mining, quarrying, excavation, diamond-drilling; road construction, building, construction, building moving, demolition; engineering; printing; installation of plumbing, heating and electrical systems; fishing, including seal fishing and whaling, fish handling, fish processing; canning; automobile repairing, servicing, storage or selling; armature winding; ice harvesting, cutting, storing or delivery; kelp collection; stone dressing; land surveying; the operation of wholesale and retail stores; repair shops; marble works or monument business; bakeries; horticultural nurseries and green houses; ice rinks; bowling alleys; broadcasting stations; barber shops, beauty parlours; laundries; restaurants; theatres; beer parlours; packing houses; lumber yards; coal yards; refrigeration or cold storage plants; warehouses; elevators; and where there are ten or more bedrooms, the operation of hotels or lodging houses; commercial buildings or apartment buildings where rooms, suites or space is rented to a tenant; hospitals; the operation of railways or tramways; telegraph, cable or telephone systems; electric light or power plants or systems; steam-heating plants; gas works; water works; sewers; and any public utility; the operation of docks, wharves; boats, ships, tugs, dredges; trawlers, bankers, draggers, and other fishing vessels; ferries; marine salvage, navigation, stevedoring; janitor service; chimney cleaning, or window cleaning service; messenger service or delivery service; extermination and fumigating service; blacksmithing, horse-shoeing; transportation, teaming, trucking, hauling; scavenging, street-cleaning; handling of hides; painting, decorating, renovating; dyeing and cleaning; any of the industries, operations, or occupations incidental to or connected with any of the above industries, occupations or operations; any employment by or under the Crown in right of the Province including employment by any permanent Board or Commission of the Crown in right of the Province. The list of industries covered corresponds closely to the list in the British Columbia Act. Farm labourers or domestic servants are not included under Part I, but upon application of the employer, may be admitted on such conditions as the Board may impose. This is similar to provisions in five other provinces.

Excluded from Part I are casual employees who are employed otherwise than for the purposes of the employer's business, outworkers, and members of the family of the employer who reside with the employer.

Members of a crew of a fishing vessel of 15 tons or more gross tonnage who are remunerated by shares in the profits or gross earnings in the operation of the vessel, may, if they and the owner apply to the Board, be admitted within the scope of the Act on terms and conditions to be set by the Board.

As in the other provinces, the Lieutenant-Governor in Council on the recommendation of the Workmen's Compensation Board may by order in council bring additional industries within the scope of the Act. On the application of the employer, any industry may be admitted by the Board to the coverage of Part I. The Board also has the power to exclude industries in which not more than a stated number of workmen are employed.

Compensation Provisions

In its details the Act is very similar to the Acts in the other provinces. The Prince Edward Island Act passed in 1949 was fully reported in the *LABOUR GAZETTE* (L.G., 1949, pp. 1430-1436). A workman who is injured in employment covered by Part I of the Act is required to file with the Board an application for compensation together with certificate of the attending physician and such other information as may be required. The employer is required to report to the Board in writing the particulars of any accident which disables a worker for at least three days or for which he has received medical aid. Compensation is not payable unless notice is given as soon as practicable after the accident and unless the claim for compensation is filed within six months of the injury.

Where a Newfoundland workman is employed outside of the Province in employment connected with his work in Newfoundland, he is compensated for injury unless his employment outside of Newfoundland has been longer than eight months, or unless he is covered by the laws of the place where the accident happens. The Board may grant compensation to a non-resident employee in Newfoundland if the laws of the place where he is resident would permit compensation to a Newfoundland workman injured in that place.

Unlike the Acts in all the other provinces, the Newfoundland Act does not specify the scale of benefit. It provides

that the amount of compensation is to be set by regulations of the Lieutenant-Governor in Council, to be published in the *Newfoundland Gazette*. The Committee appointed to make recommendations to the Lieutenant-Governor in Council as to the rate of benefits is expected to report within the next few months.

Industrial Diseases

Compensation may also be paid under the Act for death or injury due to industrial diseases. The diseases for which compensation will be paid are set out in a schedule, which is the same as the one incorporated in the 1948 individual liability statute and somewhat similar to the schedule in the Ontario Act. It lists the following diseases: ankylostomiasis; anthrax; blisters (infected); bursitis; bursitis (acute) over the elbow (miners' beat elbow); cancer; cellulitis (subcutaneous) of the hand (miners' beat hand); cellulitis (subcutaneous) over the patella (miners' beat knee); compressed air illness or caisson disease; dermatitis (venenata); frost-bite; inflammation of the synovial lining of the wrist joint and tendon sheaths; pneumoconiosis; poisoning by arsenic, benzol, brass or zinc or nickel, carbon bisulphide, carbon dioxide, carbon monoxide, chrome, lead, mercury, nitrous fumes, or phosphorus; retinitis, seal finger, silicosis, stone workers' or grinders' phthisis.

As in New Brunswick and Prince Edward Island, the Board is authorized to order any workman to be medically examined to determine whether he is affected with an industrial disease, or to determine the progress of the disease. If a workman does not comply his employer is subject to penalty if he continues to employ him.

Medical Aid

An injured workman is also entitled to medical aid, under provisions similar to those previously described in the Prince Edward Island Act. An amount not to exceed \$15,000 a year may be spent to lessen handicaps resulting from injuries.

Accident Prevention

The Board is given wide powers to carry out measures for the prevention of accidents and industrial diseases. The Board may investigate working conditions to determine what safety devices or other safeguards are required and may make rules and regulations, of general or special application. The Board may also arrange exhibits of safety devices, publish accident prevention bulletins, and arrange for lectures for employers, workmen and the general public regarding first aid and the

causes and prevention of industrial accidents and diseases, and appoint advisory committees, representative of workmen and employers, to assist the Board in establishing safety standards. Before the adoption of rules or regulations the Board may confer with a committee of not more than five employers representative of the industries affected, and with a committee of an equal number of the workmen concerned.

Where the Board has determined that safety devices are necessary, it may order the installation or adoption of such devices within a specified time. The order is to be posted in a conspicuous place by the employer, and kept posted until it has been complied with and its removal has been authorized by the Board. If the employer fails to comply with such an order, or if the Board is of the opinion that conditions of immediate danger exist, "the Board may in its discretion order the employer forthwith to close down the whole or any part of the employment or place of employment and the industry carried on therein". Every employer who fails to comply with a safety order made by the Board is guilty of an offence and liable on summary conviction to a fine not exceeding five hundred dollars for each day on which the offence continues. The Board or its officers is required to report to the Department of Health any breach of the Health and Public Welfare Act.

Leave from the Board to commence operations is required in the case of every mine, plant or establishment which has not been in operation for seven months and in which power-driven machinery is used. The employer is required to report to the Board that the plant is ready for operation, and following inspection the Board may grant leave to operate if the establishment is found to be reasonably free from danger to persons employed in it. Pending inspection the Board may grant a temporary permit. A fine of from fifty to one thousand dollars a day is provided for contravention of this section.

Individual Liability

Part II applies to industries not included under Part I, but excludes farm workers, domestic workers and fishermen. As under the individual liability provisions of Acts in other provinces, an injured workman has the right of action in the courts against an employer for damages sustained. Where a worker employed by a contractor or subcontractor is injured due to the negligence of the person for whom the work is being done, the latter may be sued for damages. The contractor or subcontractor is also liable, but the claimant cannot recover

double damages. In the case of death of a workman through injury his dependents may recover such damages as they are entitled to under Chapter 213 of the Consolidated Statutes of Newfoundland, "Of Compensation to Families of Deceased Persons when Death occurs through Negligence".

Blind Workmen

The Blind Workmen's Compensation Act, to come into force on proclamation, is similar to statutes in effect in Alberta, Nova Scotia, New Brunswick, Ontario, Quebec and Saskatchewan. The Department of Labour is to pay into the Accident Fund established under the Workmen's Compensation Act the full cost of compensation in excess of \$50 payable in respect of an injury to a blind workman employed in an industry under Part I of the Workmen's Compensation Act. The employment of the blind workman must, however, have been approved by the Canadian National Institute for the Blind or other organization designated for the purpose by the Lieutenant-Governor in Council.

As in four other provinces, the Act provides that where an employer employs a blind workman or changes his employment without the approval of the Institute he is deemed to have waived his rights under the Act.

Minimum Wages

The Minimum Wage Act, applying to both men and women workers, provides for a permanent government Board to be set up to make recommendations to the Lieutenant-Governor in Council regarding minimum rates of wages, minimum overtime rates, and other conditions of work for any classification of employees. The Act, which is similar to the Minimum Wage statutes of the other provinces, repeals the Labour (Minimum Wage) Act, 1947, under which advisory committees could be set up to investigate conditions of employment in any particular industry and to make recommendations to the Lieutenant-Governor in Council regarding minimum rates.

The new statute is very wide in its coverage, applying to all persons who work under a contract with an employer whether by way of manual labour, clerical work or otherwise and includes apprentices.

Provision is made for a Minimum Wage Board of three members appointed by the Lieutenant-Governor in Council, one member representing management, one labour and an impartial chairman. The

members of the Board are to hold office during pleasure and are to be paid remuneration and travelling expenses as the Lieutenant-Governor in Council may determine.

The Board on its own initiative may, and at the request of the Minister of Labour must, conduct investigations into the terms and conditions of employment in any trade and make recommendations to the Lieutenant-Governor in Council regarding the trade or area to which a minimum wage order should apply; the classes of employees to be covered; the minimum rates of wages; the maximum hours for which such wages shall be paid, compensation for overtime; rates for part-time employees, apprentices, inexperienced or handicapped employees and for piece work; deductions from wages where board and lodging, uniforms, etc., are supplied by the employer, for time lost through illness, holidays, etc., and for special privileges resulting from the nature of the work performed.

On the recommendation of the Minister, the Lieutenant-Governor in Council may, by order, give effect to the Board's recommendations, with any amendments deemed necessary, and he may also prescribe penalties for a breach of the provisions of the Order. Minimum Wage Orders must be published in the *Newfoundland Gazette* and they must be laid by the Minister before the Legislature within 15 days after issue or within 15 days after the Legislature is in session. The Board must review Orders at least every two years and recommend to the Lieutenant-Governor in Council that they be continued in force, amended or revoked.

Newfoundland is like Manitoba, Alberta, Saskatchewan and Quebec in requiring the approval of the Lieutenant-Governor in Council before a minimum wage order can take effect. In the other provinces rates are fixed directly by the Boards. In New Brunswick the Board's Orders are subject to review by the Minister.

For the purpose of obtaining information as to the prevailing rates of wages and conditions of employment, the Board may arrange for a conference between employers and employees or their representatives in any industry. The Board has power to summon witnesses to attend and give evidence on oath.

Employers are required by the Act to keep complete records of the names, addresses, rates of wages, hours of work and actual earnings of each employee and they must make the records available for examination to any member or representative of the Board or officer of the

Department. Every employer must keep posted in a conspicuous place on his premises a copy of any Order affecting his establishment.

The Lieutenant-Governor in Council may appoint such officers as he deems necessary for securing the proper observance of the Act, who will have the power of entry of premises and inspection of records.

An agreement between the employer and employee for payment of wages below the minimum is void, and the parties are guilty of an offence.

If an employee is not paid the full amount of the prescribed wages, he is entitled to recover from his employer by court action the amount due him, and in case of dispute, the burden of proof is on the defendant.

Employers are forbidden to discharge or discriminate in any way against an employee who has testified in any proceedings under the Act or who has assisted the Board in any way. If an employer is convicted of this offence, in addition to other penalties imposed by the Act, the court may order the employer to pay the employee compensation for loss of employment not exceeding the sum equivalent to the wages that would have accrued up to the date of conviction had he not been discharged. The court may also order the re-instatement of the employee.

A penalty not exceeding one hundred dollars for the first offence and, in default of payment, of imprisonment for not more than three months is provided for an employer who is convicted of an offence under the Act. For each subsequent offence a fine of not more than two hundred dollars and, in default of payment, imprisonment for not more than six months is provided.

Food and Drug Handling

A new Food and Drug Act sets out minimum standards for the sanitary handling of food in the public interest and requires the licensing and inspection of premises where food is prepared, stored or sold. The provisions of the 1943 Act providing for medical examination of employees in food handling trades are continued in the new statute. The 1943 Act was rescinded on July 15, 1950, when the Federal Food and Drug Act came into force in Newfoundland.

The Act applies to all places where food is prepared or sold including hotels, restaurants, delicatessens, bakeries, breweries, bottling plants, cold storage plants, dairies, slaughter houses, preserve factories, ice plants, and factories where tinned goods, drugs or medicines are prepared and packed.

An annual licence from the chief health inspector must be obtained by every person who wishes to operate a food handling trade. The licence may be cancelled if the holder is convicted of a breach of the Act or if the inspector finds that the premises have become unsuitable for the trade for which they have been licensed.

Inspectors must be allowed to enter and examine at all times any place where foods or drugs are prepared or sold.

All persons employed in a room where food is prepared must be clean in their personal habits and keep all articles and utensils in the room in a sanitary condition according to a standard of cleanliness approved by an inspector.

A person who works where food is prepared may be required by the Minister or by an inspector to undergo a medical examination to see if he is suffering from a contagious disease which might contaminate the food. Any person who is found to have a contagious disease is forbidden to work in a place where food is prepared or sold until he has received a permit from the Minister.

Regulations may be made by the Minister prescribing minimum standards for workmen and equipment in the food handling trades and requiring owners or managers of hotels and restaurants to make written returns of the names, addresses and descriptions of persons employed by them. General regulations have been made and are summarized in this issue.

Tourist Establishments

The Tourist Establishments Act, 1950, which came into effect on proclamation September 5, 1950, replaces the Newfoundland Tourist Traffic Development Board Act, 1936. The new Act gives to the Lieutenant-Governor in Council the power to make regulations regarding the classification of tourist establishments and the issuing of licences, to prescribe ground plans, hygienic conditions, and safety measures, the furnishing of the establishments, and monthly returns on the people accommodated in them.

These regulations may also deal with the health of the persons employed in the tourist establishments, or in connection with their maintenance. They may prescribe the production of a health certificate by the persons employed, and prohibit the employment of persons suffering from any contagious or infectious disease.

The regulations will be regarded as minimum requirements only. They are to be published in the *Newfoundland Gazette* and will have effect from the date of their publication.

Anyone who contravenes the provisions of the regulations will be liable upon summary conviction to a fine, not exceeding one hundred dollars, and in default to three months' imprisonment, or to both penalties.

The Minister of Economic Development is charged with the administration of the Act.

Sunday Closing in Garages and Service Stations

The Garage and Service Station (Sunday Closing) Act, 1943 was amended in respect

ALBERTA

At the 1950 session of the Alberta Legislature, which lasted from February 23 to April 5, the Alberta Labour Act, which consolidates the greater part of the labour legislation of the Province, was the subject of a large number of amendments, most of which were suggested and agreed upon at a conference of representatives of labour, employers' organizations and the public, and Government officials held in June, 1949. A new Act for the regulation and inspection of quarries was passed.

Labour Act

Effective from July 1, extensive amendments were made to the Alberta Labour Act, 1947, which consolidates in one statute provisions relating to hours of work, minimum wages, labour welfare, holidays with pay, industrial standards and conciliation and arbitration. The changes made in the Act were discussed and agreed to at a four-day conference of labour and management representatives and Government officials which was held in June, 1949, and all the amendments proposed at the Conference were passed by the Legislature. Several of the changes made bring sections of the Act into line with the federal Industrial Relations and Disputes Investigation Act or with the industrial relations legislation of some of the other provinces.

Changes were made in all five parts of the Act but those dealing with conciliation and arbitration are of most consequence. The certification of company-dominated unions is prohibited, and the definition of "employee" has been changed to exclude persons in a managerial or supervisory capacity and certain professional classes. The Board of Industrial Relations has been given new powers including the certifying of bargaining agents (formerly done by the Minister of Labour) and in cases where a Conciliation Commissioner is unable to settle a dispute the Board is given authority to review his report and to make recommendations to the Minister as to whether

to the provision requiring garages and service stations in the St. John's area to remain closed on Sunday unless special permission was granted by a Stipendiary Magistrate or the Chief of Police. The 1943 Act expressly forbade any employee to be employed in a garage or service station on Sunday.

The effect of the amendment is to permit the sale of gasoline or oils on Sunday.

Repair or service work or the sale of parts or accessories is still prohibited on Sunday.

or not he should appoint a Board of Arbitration. Formerly, the Minister automatically appointed an Arbitration Board when a Conciliation Commissioner failed. Another amendment provides that if, before an award is made by the Board of Arbitration, the parties agree in writing to accept the Board's decision, then the award will be binding on the parties. Other changes provide that an employee must revoke a check-off in writing; protect the pension rights of an employee who has participated in a lawful strike or lockout or has been dismissed contrary to the Act; and set out special provisions governing the effect on certification and on a collective agreement when a business is sold or transferred.

Amendments to other parts of the Act provide that holidays with pay may now be included among the subjects to be negotiated at a conference between employers and employees and may be included in the ensuing industrial standards schedule; penalties may be imposed on employers who fail to grant holidays with pay as authorized by the Board; the Board may authorize wages less than the minimum for handicapped workers only on their own request; the employment of women on night shifts for two months after childbirth may be prohibited by the Board, as well as the employment of children under 15 in any work outside of the prohibited employments set out in the Act without the consent of the Board; and when employees have been notified of their hours of work or their shifts, these must not be changed without 24 hours' notice to the employees concerned.

Administration

An amendment provides for an increase in the personnel of the Board of Industrial Relations by the addition, on appointment by the Minister of Industries and Labour, of a chief executive officer, a secretary, and other officers which the Board may require.

The section was clarified which allows the Board to arbitrate between employers and employees in any case where in its opinion there has been a violation of any provision of the Hours, Minimum Wages, Labour Welfare or Industrial Standards sections of the Act, or of any order, regulation or schedule made under these sections. It is now made clear that this provision does not apply to the Conciliation and Arbitration section (Part V) of the Act.

A minor amendment makes it clear that the Board or its chairman or an inspector may require an employer to produce as well as keep correct statements respecting wages and hours and conditions of employment.

It is now stipulated that employers who fail to keep the employment records which the Act requires will be guilty of an offence. A fine on summary conviction of not less than \$25 and costs and not more than \$500 and costs, or in default of payment imprisonment from 30 to 120 days, is provided for an employer who falsifies wages and hours records or gives misleading information to the Board respecting conditions of labour.

Hours of Work

Only minor amendments were made in the Hours of Work section (Part I). As before, the employer is required to notify his employees of the hours at which work begins and ends, or the hours at which each shift begins and ends by posting notices in conspicuous places or by some other method approved by the Board. It is now provided that when the employee has been notified, the hours must not be changed unless at least 24 hours' notice is given to the employee.

A further amendment exempts employers from the necessity of recording the hours of work and wages of persons employed in a confidential capacity or holding managerial or supervisory positions. These persons are not covered by the hours provisions of the Act.

Minimum Wages

An amendment to the section which permits the Board to grant a permit authorizing payment of wages less than the minimum to handicapped employees, empowers the Board to issue such permits only on the written request of any such employee.

As previously, an employee who is paid less than the minimum wage may recover from his employer, in a civil action, the difference between the amount paid and the amount of the minimum wage, with costs of the action. However, he is no longer required to give written notice to

his employer within six months of leaving his employment of his intention to bring action, or if he does not leave, within six months of the making of a minimum wage order affecting him or within six months of his entry into the employment, whichever event is later. The employee must, however, still bring action within 12 months from the date on which the cause of action first accrued.

Labour Welfare

An amendment to the section which forbids the employment of a child under 15 in or about a factory, shop or office building prohibits the employment of a child under 15 in any other employment without the consent of the Board.

The Board is given power to prohibit the employment of a woman on night shifts for two months after childbirth as well as during the whole period of her pregnancy, as before. The Board also has power to prohibit the employment of women on day shifts for six weeks before and two months after childbirth.

Employers of over 50 workers may be required to employ a qualified first-aid attendant and, by an amendment, this requirement may also be imposed on an employer who operates an industry in an isolated area where less than 50 employees are engaged.

Holidays with Pay

It is now provided that, for the purpose of computing holidays with pay where a business is sold, leased or transferred, the employment of the employee will be deemed to have been continuous and uninterrupted by the transfer to new ownership or control. A penalty of from \$10 to \$500, with costs, is provided for violation of an order of the Board requiring employers to grant holidays with pay. In addition to the fine, the convicting magistrate has authority to order the employer to give his employee the holidays with pay to which he is entitled within the time fixed by the court or, if the employee has left his employ, to pay to the employee or to the court the money due in lieu of holidays with pay. In default of payment of the fine or compliance with an order, the employer is liable on summary conviction to imprisonment for a term of from 10 to 90 days.

Industrial Standards

Holidays with pay are now included among the subjects to be negotiated at a conference of representatives of employers and employees in an industry and in the terms of the industrial standards schedule drawn up by such a conference, provided

that the vacation-with-pay plan is not less favourable to employees than the holidays-with-pay provision set out in the Orders of the Board.

A schedule may be declared in force by the Lieutenant-Governor in Council if it is agreed upon in writing by a proper representation of *the majority of* employers and employees. The italicized words are new. Employers or employees may now apply to have a schedule amended or rescinded after it has been in force for 10 months, instead of for 12 months as before. The revocation or amendment, however, will not be effective until after the expiry of 12 months from the date on which the schedule was declared in force.

Conciliation and Arbitration

Several amendments were made to the definitions under this section chiefly to bring them into line with those in the federal Act. "Bargaining agent", which has been re-defined to strike out the reference to an organization or association of employees, now means a trade union that acts on behalf of employees in collective bargaining or as a party to a collective agreement with their employer. Excluded from the definition of "employee" are a manager or superintendent or any other person who, in the opinion of the Board, exercises managerial functions or is employed in a confidential capacity in matters relating to labour relations, and members of the medical, dental, architectural, legal and engineering professions. The definition of "trade union" was amended to exclude an employer-dominated organization.

An application for certification of a bargaining agent will now be made directly to the Board to be dealt with instead of being submitted to the Minister who formerly referred it to the Board for inquiry and report. In addition to making inquiry as to whether or not the trade union has been elected by a majority of the employees entitled to vote, and whether the unit is appropriate for collective bargaining, the Board must inquire into other questions of fact which may be material in considering the application for certification of a bargaining agent. It is now stipulated that the Board itself is to be the authority to determine which other facts may be material. As previously, the Board must complete its inquiry within 21 days after it receives the application but it is now stated that the 21-day period is exclusive of statutory holidays.

The Board, instead of the Minister, is to certify the bargaining agent. As in the federal Act, no trade union or organization of employees may be certified, the admin-

istration, management or policy of which is, in the Board's opinion, dominated by an employer or influenced by an employer so that its fitness to represent employees for collective bargaining is impaired, and any agreement made between an employer and such a union is not to be recognized as a collective agreement for the purposes of the Act.

As before, a dispute may, on application of either party, be referred to a Conciliation Commissioner who is required to transmit his report to the Board (formerly to the Minister) within 14 days or such longer time as may be agreed to by all parties. The Conciliation Commissioner is given wider powers. The information which he is required to set out in the report is now specifically laid down and includes the matters on which the parties have agreed, and those on which they cannot agree, together with his recommendations on the matters in dispute and on the advisability of appointing a Board of Arbitration.

A different procedure is now set out in cases where a Conciliation Commissioner is unable to bring about any settlement or adjustment of the dispute. The Board must consider the Commissioner's report and *may* recommend to the Minister the appointment of a Board of Arbitration (which may as appropriately be called a Board of Conciliation). If, in the opinion of the Minister, a further endeavour should be made to bring about agreement between the parties, he may appoint a Board of Arbitration consisting of three arbitrators, one the nominee of the employer concerned, a second the nominee of the union and a chairman nominated jointly by the other two. The Act before amendment provided that, failing settlement by the Conciliation Commissioner, the Minister was automatically required to refer the dispute to a three-man Board of Arbitration.

Formerly, it was mandatory that the award of a Board of Arbitration be made retroactive to the date of the application for the appointment of a Conciliation Commissioner or for the intervention of the Minister. Now, however, the effective date of the award is left to the discretion of the Board of Arbitration.

The report of a Board of Arbitration is not binding. It merely contains recommendations for settlement which must be voted on by secret ballot of the employees directly affected and by the employers, respectively.

An amendment, however, adds new provisions, similar to those in the federal Act, which provide that if, before an award is made, the parties agree in writing to accept the Board's decision, the award will be

binding on the parties who must give effect to it without submitting it to a vote and must include the terms of the award in a collective agreement.

A new subsection permits the employer, during the time that a strike or lockout is prohibited, to give effect to a proposed change in wages or hours if he has the consent of the bargaining agent. A further section provides that where a dispute arises, the employer may not bring into effect a proposed change in wages, hours or conditions of employment except with the consent of the employees or of the bargaining agent, and strikes and lockouts are forbidden before application is made for conciliation services or for the intervention of the Minister. The requirement that the consent of the bargaining agent be obtained is new.

An amendment to the section which governs the procedure for taking a strike vote provides that no strike or lockout may occur until a vote has taken place under the supervision of the Board and a majority of the employees *entitled to vote* have voted in favour of a strike. Formerly, this section was worded to require a majority of the employees *affected* to have voted in favour of strike action.

An employer is now prohibited from depriving an employee of any pension rights or benefits to which he would otherwise be entitled by reason only of his participation in a legal strike or lockout or by reason only of dismissal contrary to the Act. This is similar to a provision in the federal Act.

Where a business or part of it is sold, leased or transferred, the new owner or manager will be bound by all proceedings relating to collective bargaining, conciliation and arbitration under the Act. If a bargaining agent was certified, the certification will remain in effect and if a collective agreement was in force it will continue to bind the purchaser as if it had been signed by him. No changes may be made in the agreement during its term without the approval of the Board. This provision is similar to one in the British Columbia, Manitoba and Saskatchewan statutes.

Another new section, similar to one in the British Columbia Industrial Conciliation and Arbitration Act, provides that an extra-provincial company whose board of directors does not meet in the Province must appoint a person resident in the Province to bargain collectively with the certified bargaining agent and to conclude and sign a collective agreement on its behalf or it will be guilty of an offence. The collective agreement will be binding on the company.

The section forbidding trade unions or employees' organizations or their representatives to solicit union membership on the employer's premises without his consent "while the employees are on duty" was changed to read "while the employees are working".

Two new provisions are concerned with the check-off of union dues which is presently provided for in the Act. An employee must revoke a check-off in writing. At least once a month the employer is required to remit the dues deducted to the trade union, together with a written statement of the name of the employee and the amount of the deduction until such time as a revocation signed by the employee is delivered to the employer. The employer is required to send a copy of such revocation immediately to the trade union concerned.

Security for Wages

Several amendments, effective from July 1, were made to the Industrial Wages Security Act which ensures the payment of wages to workers in mining and lumbering by requiring all operators in these two industries to furnish the Minister each year with security for the protection of the wages of employees in case the employer defaults. The Act provides that quarries, salt works, and drilling operations for natural gas, oil or salt may be brought within its scope by Order in Council (L.G., 1938, p. 632; 1942, p. 589).

Each employer is required, before beginning operations each year, to deposit with the Minister security for the payment of wages to his workmen for the next 12 months. Formerly, the security had to be given before June first each year but administrative difficulties arose because operation of some industries did not commence till after that date.

A further amendment requires an employer who has been ordered to cease operations because he has defaulted in the payment of wages to furnish security in an amount equal to twice the greatest amount paid by him for wages in one month during the 12-month period preceding the date of beginning the year's operations. In most other cases the security required is the greatest amount paid by the employer in one month during the previous year.

The definition of wages now inserted in the Act is the same as that in the Alberta Labour Act and includes any compensation for labour or services measured by time, by the amount of work performed, by piece work or otherwise.

Imprisonment for a term of from 30 days to six months may now be imposed for

continuing to operate a mine or lumbering industry after an order to cease operations has been issued, as an alternative penalty in default of payment of the fine of \$100 a day which the Act provides for this offence.

A minimum fine of \$100 has now been fixed in addition to the maximum of \$1,000 for an employer who fails to make to the Minister the annual statement of wages paid or any other returns required by the Act.

Regulation of Quarries

Effective from July 1, a new Quarries Regulation Act provides for the regulation and inspection of quarries in the Province in the interest of safety of the workmen and of the public. The Act will not cover sand and gravel operations unless they are classified as quarries by a notice of the Director of Mines published in the *Alberta Gazette*.

The Act empowers the Lieutenant-Governor in Council to make regulations for the purpose of ensuring public protection and the safety of persons employed in or about a quarry, and governing the operation of quarries. Such regulations have been made (L.G., 1950, p. 1699).

Quarries inspectors and other employees required for the administration of the Act may be appointed by the Minister of Mines and Minerals. Inspectors must report to the Director regarding the condition of quarries and the observance of the regulations. The owner or manager must, on penalty of a fine, admit the inspector at any time, give him every reasonable aid, and answer all his inquiries relating to the operation of the quarry. The inspector must notify the manager in writing of any danger or defect in the quarry and require it to be remedied. He may require the withdrawal of the men from the quarry, in which case the owner must only permit repairmen to enter the quarry until the requirements of the notice are carried out to the inspector's satisfaction.

Within six months from the effective date of the Act every owner operating a quarry must apply to the Director for a permit to operate and no new quarrying operations may begin without a permit. The Minister may cancel or suspend a permit for cause after an inquiry has been made into any representation that the holder of a permit has failed to comply with the Act or regulations or an inspector's notice. He may renew or restore the permit on such conditions as he thinks fit. Before quarrying operations are abandoned, a notice of intention to abandon must be sent to the Director and his written consent obtained.

The Director must be informed in writing within 10 days of any change in ownership or supervision of a quarry.

Loss of life or serious injury must be reported immediately to the Director and a full report sent to him within 24 hours with any other information that the Director may require.

The Act provides for fines to be imposed on summary conviction on an owner or manager who defaults in carrying out a duty imposed by the Act, or fails to comply with an inspector's notice or on any person who contravenes a regulation. Not more than \$100 may be imposed for each offence, or in the case of a continuing offence, \$100 for the first day and not more than \$50 for each subsequent day during which the offence continues.

Hospitalization

The Hospitalization of City Residents Act authorizes the council of any city to pass by-laws establishing a hospitalization scheme to provide standard ward accommodation to residents of the city at a cost to the patient of one dollar or less per day for each day that the patient is in hospital.

The money required to operate the scheme will be raised by the levy and collection of a mill rate or by a contract plan for hospitalization.

Any such by-law may be put into effect without a vote of the residents or of the electors.

An amendment to the Hospitals Act, effective from June 1, makes provision for the payment from provincial funds of hospitalization grants to municipalities which provide \$1-a-day hospitalization for their ratepayers and non-ratepayers. To be eligible for a grant the Board of a municipal hospital district must operate a hospital for its ratepayers or have made arrangements for the hospitalization of its ratepayers by means of an agreement with an approved hospital. The agreement must be approved by the Minister of Public Health.

No grant will be paid in respect of any ratepayer when hospitalization is provided under The Workmen's Compensation Act or any other legislation passed by the Province.

Credit Unions

Effective from July 1, an amendment to the Credit Union Act provides for a simpler method of compelling a credit union to reorganize its affairs when they are being mismanaged. After the Supervisor of Credit Unions has made an inquiry he may, with the approval of the Minister of Industries and Labour, cancel the incorporation

of the credit union or notify it that it must reorganize its affairs within 90 days. After 90 days, if his notice has not been complied with, the Supervisor may cancel the incorporation of the credit union and appoint a liquidator. Formerly, the Supervisor, at the direction of the Minister, was required to call a general meeting of the members and following the meeting report to the Minister. The credit union is prohibited from disbursing money without the consent of the Supervisor after it has received a notice to reorganize its affairs.

Old Age Pensions

An Act to amend the Old Age Pensions Act ratifies a new agreement made on June 24, 1949, between the Province and the Government of Canada for the payment of pensions. Under the new agreement, the maximum pension payable by the Province is increased from \$360 to \$480 a year. The increase is in accordance with an amendment to the Dominion Old Age Pension Act, effective May 1, 1949, which raised from \$30 to \$40 the basic monthly pension to which the Dominion Government contributes 75 per cent of the cost and the provinces the remaining 25 per cent together with administrative costs.

In 1949 the supplementary allowance payable to old age and blind pensioners was raised from \$7.50 to \$10 a month. A 1950 amendment to the Old Age Pensions (Supplementary Allowances) Act, however, makes it clear that the increased rate is payable only after March 31, 1950. This amendment is retroactive to June 1, 1949.

A motion carried on March 14 requested the federal Government to enact the neces-

sary legislation to enable old age pensioners to supplement their pension by total allowable earnings of \$240 a year in the case of single pensioners and \$480 a year for married pensioners.

Loans to Municipalities

In accordance with a resolution adopted by the Legislature on March 9, an Act cited as the Self-Liquidating Projects Act was passed to authorize the Provincial Treasurer, with the approval of the Lieutenant-Governor in Council, to grant a loan to a municipality for such municipal self-liquidating projects as the construction, extension or improvement of a municipal water works system, gas plant, or electric light system.

The resolution mentioned above urged the federal Government, in view of the seriousness of the unemployment situation in various municipalities throughout Canada, to re-enact the Municipal Improvement Assistance Act of 1938 which was designed to alleviate unemployment and at the same time assist municipal development by providing low cost money to municipalities for self-liquidating construction projects. In addition, the Provincial Government was urged to give consideration to enacting legislation to grant further assistance to municipalities for self-liquidating projects.

Rent Control

To come into effect on Proclamation, the Rental Control Act makes provision for the Government of Alberta to take over rent control for the Province. Under the Act a Rental Control Board may be set up.

NOVA SCOTIA

No widespread changes were made in the labour laws of the Province by the 1950 session of the Nova Scotia Legislature which opened on March 21 and prorogued on May 6. The minimum weekly benefit provided for a totally disabled workman was increased by an amendment to the Workmen's Compensation Act. The Labour Act, which gives residents of the Province preference in employment, was renewed until May, 1951. Amendments were made to the Children's Protection Act, the Mines Act, the Scalpers' Act, the Vocational Education Act and the Motor Vehicles Act.

Workmen's Compensation

An amendment to the Workmen's Compensation Act raises from \$15 a week to \$75 a month the minimum benefit payable

to a workman who is totally and permanently disabled. As before, the regular weekly rate of compensation in a total permanent disability case is two-thirds of the worker's average weekly earnings payable during his lifetime; the new \$75 rate being the minimum rate which he must receive. This is the second time in two years that the minimum rates for this type of disability have been raised; in 1949 they were raised from \$12.50 to \$15 weekly.

The increased minimum benefit is made retroactive to May 1, 1950. Although the new rate will apply to persons receiving compensation for injuries which they suffered at any time before May 1, they will not be able to claim payments at the increased rate retroactively to the date of the injury.

Employment of Non-Residents

Preference in employment in the Province is given to Nova Scotia residents under the terms of the Nova Scotia Labour Act. The Act, which was first passed in 1933, is renewed annually and is now to be in effect until May 1, 1951.

Under the Act no person or corporation employing 25 or more persons may hire a worker who has not resided in the Province for at least a year, unless the worker produces a certificate from the government employment agent or clerk of the city, town or municipality where he is to be employed, stating that there are no unemployed residents available who would or could do the work. A fine of not more than \$500 may be imposed for a violation of the Act.

Employment of Young Persons in Shops

A revision and consolidation was made in the Children's Protection Act, now renamed the Child Welfare Act. The sections of the former Act which made it an offence to employ boys under 14 and girls under 16 in shops for more than eight hours a day and four hours on Saturday have been omitted from the new Act. This provision has been in the statutes since 1909.

This amendment will come into force on proclamation.

Inspection of Mines

The Mines Act was revised and consolidated. The new Act, like the 1941 Act which it replaces, provides for a mines inspection staff composed of a Chief Inspector and other inspectors and officers, to carry out inspections under the Coal Mines Regulation Act and the Metaliferous Mines and Quarries Regulation Act as well as under the Mines Act itself. The revised section now specifically provides for the appointment of an Electrical Inspector, an Assistant Electrical Inspector, a Mechanical Inspector, an Assistant Mechanical Inspector, a Chief Mining Engineer and one or more Mining Engineers, and sets out their respective duties.

Licensing of Timber Scalers

An amendment was made to the Scalers' Act. This Act, which was passed in 1945 but has not yet been proclaimed in effect, provides for the examination and licensing of persons to scale and measure timber. A fee of \$3 has now been set for each candidate for examination for a scalers' licence

or for a waiver of examination. The amendment further provides that a surveyor of lumber or a measurer of cordwood who has been appointed by a city, town or municipal council is not required to be licensed as a scaler.

Vocational Education

By an amendment to the Vocational Education Act, certain powers and duties of the Council of Public Instruction in respect to the establishment, maintenance and direction of schools and courses under the Act have been transferred to the Minister of Education. The Minister of Education is now empowered to establish night schools, miners' and apprenticeship schools, schools for vocational education teachers and to establish correspondence courses.

Industrial Assistance

An amendment to the Industrial Assistance Act transfers the administration of the Act from the Minister of Industry and Publicity to the Minister of Trade and Industry. In addition to the power to make loans for the purpose of acquiring land, buildings, machinery, implements, plant or equipment for an industry, the Minister is now empowered to make loans or guarantee loans for the provision of working capital in any industry and he may include in the loan an amount sufficient to cover all or part of any existing debts or obligations of an industry. The loan to cover debts or obligations may not exceed one-half of the total amount of the loan.

Motor Vehicles

The Motor Vehicle Act was amended to make it clear that no person under the age of 21 years may drive a motor vehicle while it is being used as a passenger-carrying vehicle for hire. The Act formerly implied that a person over 18 could drive a school-bus although the Act otherwise prohibited any person under 21 from driving a motor vehicle used as a passenger-carrying vehicle for hire.

Mothers' Allowances

An amendment was made in the Mothers' Allowances Act to provide for a Director of Mothers' Allowances. Formerly, the Director of Child Welfare appointed under the Children's Protection Act filled this position. This amendment was proclaimed in force on June 12, 1950.

PRINCE EDWARD ISLAND

The Prince Edward Island Legislature, which met on February 27 and was prorogued on March 30, broadened the scope of the Workmen's Compensation Act passed last year and strengthened the powers of the Workmen's Compensation Board in several respects. A new Mechanics' Lien Act was passed and a minor amendment was made to the Co-operative Association Act.

Workmen's Compensation

The power of the Workmen's Compensation Board in taking accident prevention measures has been increased and the scope of the Act has been broadened by an amendment to the Workmen's Compensation Act.

The Act provides that the Board has the authority to inspect the premises of any employer within the scope of the Act to ascertain whether adequate safety appliances and safeguards are being used. The amendment now stipulates that where safety devices are, in the Board's opinion, necessary for the prevention of accidents or disease, the Board shall give notice to the employer ordering the installation and adoption of such devices within a fixed time.

Further, if the Board considers that an accident to a workman was due to the failure of the employer to comply with the regulations or the directions of the Board, the Board may now levy upon the employer a special contribution to the Accident Fund not exceeding one-half of the amount of compensation payable in respect of the injury.

Radio broadcasting stations and restaurants and any occupations incidental to these businesses have been added to the list of industries and occupations which the Act covers. Farming, fishing and domestic service remain the main exceptions from the application of the Act.

The Act now specifically excludes from its scope any child under 15 years of age. By the Prince Edward Island Minimum Age for Industrial Employment (International Labour Convention) Act of 1945, a child under 15 is prohibited from employment in any private industrial undertaking, or in any industrial undertaking carried on by the Provincial Government or by a municipal corporation.

The Board is empowered under the Act to determine all questions of compensation matters and, except in matters of its jurisdiction or questions of law from which appeals to the Supreme Court are allowed, the Board has final and conclusive juris-

diction. The amendment expressly adds to the list of questions of fact which the Board may determine, the question of whether personal injury or death has been caused by accident.

The amendment further provides that the assessments which the Board is empowered to levy upon and collect from employers are subject to revision by the Board as may be necessary to meet the claims payable from the Accident Fund. Previously, in the first year of operation of the Act, the assessments were based on the minimum table of rates established as of January 1, 1948, by the Workmen's Compensation Board of New Brunswick, and were subject to such revision as the Board deemed necessary.

The special powers given to the Board to invest the funds under the Act or borrow any sum have been made subject to approval of the Provincial Treasurer.

Under the Act, the minimum weekly compensation payable to a workman who is permanently and totally disabled by an accident is set at \$12.50 or the amount of his weekly earnings if less than that amount. The amendment now makes it clear that, in such a case, the Board may fix the compensation payment at \$12.50 weekly even though the worker's earnings are less than that amount.

Mechanics' Lien

A new Mechanics' Lien Act was passed, repealing the former Act of 1938 and bringing the legislation more in line with similar laws in the other provinces.

The Act provides that any person performing work in respect of, or furnishing material to be used on an improvement, i.e. anything constructed, erected, built, placed, dug or drilled, shall have a lien for wages or for the price of work or materials supplied. Agreements by workmen to waive the provisions of the Act have no effect, nor has any device by the owner, contractor or sub-contractor to defeat the priority given by the Act to a labourer for his wages. Payments made to defeat or impair a lien shall be null and void for that purpose. Under the former Act, an express agreement could waive the right of a workman to a lien for such work.

Liens have priority over all judgments, attachments, garnishments, etc. issued or made after the lien arises, and liens for wages have, to the extent of 30 days' wages, priority over all other liens. No claim of lien for less than \$32 may be registered.

A sworn statement of claim of lien for wages and services may be registered in the

office of the Registrar of Deeds for the county in which the land is situated at any time during the 30 days after the doing of the last work for which wages and services are owing.

Other requirements of the Act are designed to ensure discharge of the lien. An owner, liable under a contract in connection with which a lien might arise, must deduct from any payments he makes under the contract an amount equal to 20 per cent of the value of the work done or material supplied, and must retain the amount for a period of 30 days after abandonment or completion of the contract. Where the value of the work and material supplied exceeds \$15,000 the amount to be retained is 15 instead of 20 per cent. Where a lienholder gives the owner written notice of his lien, stating under oath the amount claimed, the owner shall retain from the amount payable to the contractor under whom the lien is derived an amount stated in the notice in addition to the deduction specified above. This amount shall constitute a fund for the benefit of the lienholder who gives notice, and any payment made to a lienholder from this fund shall not disentitle him to claim for any balance remaining payable to him. If a lien has not been registered, payment of the amount required to be retained may be made after 30 days have

elapsed from the completion or abandonment of the contract. If a lien has been registered, payment may be made either after 30 days have elapsed from the completion or abandonment of the contract or, unless proceedings have commenced, on the expiration of two years from date of registry, whichever is the sooner.

Where property is destroyed wholly or partially by fire, any insurance money received by the owner or chargee shall take the place of the property and shall be subject to claims of lien.

A lienholder is entitled to enforce his lien notwithstanding the non-completion or abandonment of the contract by the contractor or sub-contractor under whom he claims provided that the owner shall not be made liable for a greater sum than the sum payable by the owner to the contractor.

Any lien may be enforced by action in the Supreme Court according to the ordinary procedure.

Co-operative Associations

A minor amendment was made to the Co-operative Associations Act, consolidating the section concerning the incorporation of associations. The section now specifically includes associations of farmers and fishermen as well as dairy companies and associations as before.

Recent Regulations Under Provincial Legislation

The regulations this month deal mainly with the safety and health of employees. In British Columbia revised Accident-prevention regulations have been issued by the Workmen's Compensation Board, and in Newfoundland there are new regulations for the sanitary control of food handling trades and of tourist establishments. Newfoundland has also issued Rules of Procedure for the Labour Relations Board.

British Columbia Female Minimum Wage Act

Women licentiates in pharmacy are now excluded from Order 11 which requires rest periods to be given to all female employees in every industry, business, trade or occupation in the Province except farming, fruit picking and domestic service (L.G., 1949, p. 455). The exemption, which was made by Order 11A of October 6, gazetted October 12, became effective October 16.

British Columbia Workmen's Compensation Act

Accident Prevention Rules

Effective from September 1, 1950, new accident prevention regulations, issued by

the British Columbia Workmen's Compensation Board after public hearings, replace those of 1945 as amended (L.G., 1945, p. 1531; 1950, p. 1066).

Revised and consolidated, the regulations relate, as before, to all buildings and structures covered by the Act in or about which workmen are employed, and deal with lighting and ventilation, ladders, stairways, floors, etc., protective clothing and equipment, machinery and machine-guarding, welding, cranes and derricks, the use of explosives, construction, painting, window cleaning, saws, woodworking machinery, saw-mills, shingle-mills, logging, punch presses, foundries, storage batteries, electrical installations and equipment, laundries and grain elevators. The rules previously in effect have been more conveniently arranged, with more detailed provisions in some cases, and some entirely new sections have been added. The sections dealing with locomotive cranes and mechanical refrigeration have been deleted.

Accident prevention committees of from 4 to 12 members must now be set up wherever 20 or more workmen are employed instead of where 25 or more men are

employed, as before. Employers are now required to keep posted at all times in conspicuous places on the premises "Notice to Workmen" placards furnished by the Board and to have available for reference a copy of the Accident-prevention regulations.

The section on window cleaning has been revised to bring it more into line with the CSA Code of Practice for Window Cleaning (Z91-1949) and sections on the storage and transportation of explosives are similar to those in the explosives regulations under the Federal Explosives Act.

New sections of the regulations apply to safety belts, guards, metal working equipment, hoists and elevators, and the certification of blasters.

Safety Belts

Safety belts must be worn by workmen when working more than 10 feet above grade if adequate working platform or stages cannot be provided; when entering bins, hoppers, chambers or vessels where there is danger of being overcome by air contamination or oxygen deficiency or of being trapped by the movement of material; when working where there is danger of falling into pits, shafts or moving machinery if the hazard cannot be otherwise guarded, and when working from ladders where both hands are required to perform the work. Workers must also be equipped with life-lines and have another workman stationed where he can readily effect a rescue where there is danger of being overcome by fumes or lack of oxygen, or of being buried by moving material. Detailed specifications are set out for the construction of safety belts and life-lines. Safety belts and life-lines need not be used by structural steel erectors whose work is of such a nature that their use would produce an additional hazard or where a safety net or other adequate protection has been provided.

Guards

Machine guards must provide positive protection against contact with moving parts or prevent access to the danger zone during operation. They must be of substantial construction to resist normal wear and to absorb blows and shocks which may be encountered, and they must be hinged wherever possible to prevent their removal from the machine and to allow for quick servicing, oiling or adjustment. Provision must be made, where possible, for lubricating the machinery without removing the guard.

The section on miscellaneous power transmission equipment requires the contact

faces of all friction-drives to be guarded when necessary. The guards must be arranged to permit the application of lime or other dressing without removing the guards.

Metal Working Equipment

New sections specify the types of guards required for metal working equipment. Splash guards must be provided to protect the operator and the working area from cutting or cooling fluids thrown from the work, and pipe-guards or other enclosures must be used to prevent contact with stock projecting from machine tools. Openings in shaper and planer beds must be filled in solidly or completely covered to eliminate shearing hazards. Railings must be installed at the farthest point of travel of the carriage or table of shapers and planers. The revolving table of vertical boring-mills must be protected by a sheet-metal or pipe-rail guard. Metal saws must, wherever possible, conform to guarding requirements of wood-cutting saws. Forming rolls must be guarded with a barrier in front of the rolls as close as possible to the rolls. An emergency control device must extend across the front of the rolls in such a position that it can be operated by anyone caught between the rolls.

Hoists and Elevators

All elevating equipment used for carrying workmen must conform to the regulations governing the installation, operation and maintenance of elevators issued under the Factories Act, or as provided for in the Coal-mines Regulation Act and the Metal-liferous Mines Regulation Act. No workman must be allowed to ride on a material or construction hoist. Workmen are forbidden to ride on elevators when protective devices are inoperative during their construction or demolition. If work is performed from the cage or platform when it is suspended in the shaftway, it must be securely blocked and positively held in position. Regulations are made for guarding entrances to shaft hoistways, including installations of a temporary nature. The mechanism for raising and lowering the car or platform must include a brake capable of holding at rest the maximum load that may be carried, and specifications are set out for cables and fastenings. All controls for operating power hoisting machinery must be located outside of the shaftway. Notices stating that no one may ride on the equipment must be conspicuously displayed in or on the cage or platform and at each landing.

In the section on construction hoists, the regulations now require a specified signal

system to be installed at all landings and in the hoist-room to control the movement of the hoist platform or skip. The hoisting engineer must only operate the equipment on receipt of the signal.

Certification of Blasters

No person may conduct blasting operations including the preparing, fixing and firing of charges and the handling of misfires unless he holds a blaster's certificate issued by the Board. A candidate for a blaster's certificate must be over 21 years, have a satisfactory knowledge of English and forward to the Board a written statement from an employer certifying that he has had at least six months' experience at blasting or as a blaster's assistant and that by his character, knowledge and experience he is competent to handle explosives. Candidates must be examined for their knowledge of commercial explosives, blasting accessories, the use of safety-fuse, electrical blasting, the transportation and storage of explosives and blasting accessories, the safe use of explosives for general purposes and the Accident-prevention regulations concerning explosives. A certificate is granted for life or during good conduct but it may be endorsed with any limitation or qualification which the Board may determine and it may be suspended or revoked if the blaster is negligent or fails to comply with the regulations. It must be delivered to the employer on commencing employment, be produced for inspection purposes and returned to the employee on termination of his employment. If, at any time the employer believes the blaster to be guilty of a breach of the regulations, he may suspend the blaster from performing his duties and immediately report the suspension to the Board.

When a blasting accident occurs in which a person is injured or where there is an unusual occurrence involving explosives, the employer must immediately forward a report of the accident to the Board with the certificate of the blaster who was in charge of the operations. The Board is to determine whether the certificate should be returned or not, or any penalties imposed.

Penalties

Every person who contravenes any of the regulations is liable to a penalty of not more than fifty dollars. Since 1943 there had been no penalty provision in the Regulations.

Newfoundland Food and Drug Act

General regulations under the 1950 Food and Drug Act were made on August 16, gazetted August 22. The Act requires, in

the public interest, the licensing and inspection of all places in the Province where food is prepared, handled, or sold (L.G., 1950, p. 2080).

Minimum sanitary standards are set out in the regulations with respect to lighting, ventilation, heating and screening of workrooms, water supply, toilets, garbage containers, etc., which must be observed by employers and workmen in all places where food is prepared, handled or sold. Special provisions relate to bakeries, breweries, ice houses, dairies, restaurants, movable shops, snack bars, and cold storage, meat packing, pasteurization and bottling plants.

The regulations apply to St. John's and a two-mile radius, Bell Island, Botwood, Stephenville, Placentia, Corner Brook and a five-mile radius, Channel-Port aux Basques and Fogo. They apply to places within a 15-mile radius of St. John's and Corner Brook with respect to establishments where milk, butter or cream is produced.

Workrooms must be provided with a sufficient number of chairs and benches for the use of workmen. Employees must be provided with a warm dry room for washing and dressing and proper storage space for their clothes.

In restaurants, snack bars, movable shops, dairies, meat packing plants and butcher shops employees must be provided with white washable outer garments. In restaurants and bakeries no personal clothing or private property may be taken into the workroom.

Suitable toilets, lavatories, wash basins, soap and towels must be provided for the use of employees in all food handling trades. In snack bars and movable shops facilities for personal washing, separate from those used for washing utensils, must be provided.

Spitting is forbidden in any premises, stall or vehicle where food is prepared, stored or served unless a sanitary receptacle is provided for the purpose. Smoking is prohibited in pasteurizing plants and bakeries.

No person may be employed in a pasteurization plant until he has undergone a medical examination, including a chest X-ray, and has received a medical certificate approved by the Chief Health Officer. Persons whose work brings them into contact with pasteurizing, processing and handling milk, or handling containers or equipment, must submit to such examinations as the Medical Officer of Health or the Department may require to ensure that they are free from any disease which could be spread by milk. If an operator of a pasteurization plant suspects that an employee is suffering from a disease he must notify the Medical Officer of

Health immediately. If the Chief Health Inspector has evidence that any person has failed to comply with these requirements he may direct the operator of the plant to see that the person is not employed in any work which might bring him into contact with handling milk. Every dairyman or milk purveyor supplying milk, cream or butter in any city, town or village must at once report to the Medical Officer of Health or to an inspector any case of contagious disease affecting himself, his family or his employees.

Newfoundland Labour Relations Act

Rules to govern the procedure of the Newfoundland Labour Relations Board, as provided for in the new Labour Relations Act of 1950, were made on September 11, gazetted September 12.

The Rules, which are similar to the Rules of Procedure of the Canada Labour Relations Board (L.G., Jan., 1949, p. 57), relate to those matters which fall within the administrative jurisdiction of the Board, including applications for the granting of certification as bargaining agent, applications for the prescription of provisions for the final settlement of differences concerning the meaning or violation of collective agreements and complaints alleging failure to

bargain collectively which may be referred to the Board by the Minister.

Newfoundland Tourist Establishments Act

General regulations under the above Act, made on September 11, gazetted September 12, prohibit the employment in a tourist establishment of any person suffering from a communicable disease or coming from a place where such a disease exists. If a communicable disease occurs in a tourist establishment the operator must immediately notify the medical health officer and take precautions to prevent the spread of the disease. Under direction of the health officer the operator must furnish temporary accommodation or isolation for a guest or employee who is suffering from a communicable disease until he can be safely removed to a suitable place.

The operator is also required to ensure that all persons in his establishment engaged in preparing, cooking or serving food are cleanly in their habits and that they wear washable clothing.

An inspector may make such examinations and inquiries as may be necessary to ensure that the operator is complying with the provisions of the Act and regulations. A qualified medical practitioner, a building, sanitary or fire inspector, or a police officer may accompany the inspector.

Legal Decisions Affecting Labour

The Supreme Court of Canada holds delegation of legislative powers contemplated in Nova Scotia Bill 136 to be unconstitutional. ¶The Quebec Court of King's Bench finds that the Unemployment Insurance Act permits charges to be laid within one year of the date on which the Commission has sufficient evidence to warrant proceedings. ¶The B.C. Supreme Court rules on picketing. ¶The Court of King's Bench in Saskatchewan quashes an order of the Labour Relations Board directing an employer to refrain from an unfair labour practice. ¶The Quebec Superior Court finds that a Council of Arbitration was properly appointed. ¶Quebec School Commissions are found to be subject to the provisions of the Labour Relations Act which prohibit discrimination in employment because of union activity.

Delegation of legislative powers by a Provincial Legislature to Parliament or by Parliament to a Provincial Legislature held unconstitutional by Supreme Court of Canada.

In a judgment given October 3, 1950, the Supreme Court of Canada unanimously agreed with the majority opinion of the Nova Scotia Supreme Court which on June 12, 1948, with one judge dissenting,

had held Bill 136, introduced at the 1947 session of the Nova Scotia Legislature, to be constitutionally invalid (L.G., 1948, p. 824).

Bill 136, entitled "An Act respecting the delegation of jurisdiction from the Parliament of Canada to the Legislature of Nova Scotia and *vice versa*" would give the Lieutenant-Governor in Council power to delegate to and withdraw from the Parliament of Canada authority to make laws in

relation to any matter relating to employment in any industry, work or undertaking where such matter is, by the BNA Act, exclusively within the jurisdiction of the provincial legislatures; any laws so made by the Parliament of Canada while the delegation is in force would have the same effect as if enacted by the Legislature. The Bill also provides that if the Parliament of Canada delegates to the Provincial Legislature power to make laws in relation to any matter relating to employment in any industry, work or undertaking where such matter is, by the BNA Act, exclusively within the jurisdiction of the Parliament of Canada, the Lieutenant-Governor in Council while the delegation is in force may, by proclamation, apply any or all of the provisions of a provincial Act to any such industry, work or undertaking.

The Bill also brings up the possibility of raising revenue for provincial purposes by means of indirect taxation through delegated power. If the Parliament of Canada were to delegate to the Provincial Legislature authority to raise revenue for provincial purposes by imposing a retail sales tax, the Lieutenant-Governor in Council may, according to the provisions of the Bill, impose a tax not exceeding three per cent of the retail price on any commodity to which the delegation extends.

The five judges of the Supreme Court of Canada gave their reasons for decision separately, all leading to the conclusion that the delegation of powers contemplated in Bill 136 is unconstitutional. The reasoning of all the judges followed the same general line: the Parliament of Canada and the Legislatures of the provinces can exercise only the legislative powers respectively given to them by Sections 91 and 92 of the BNA Act. There is no power given by these sections to delegate authority or to accept delegation. The word "exclusively" used in both sections "indicates a settled line of demarcation and it does not belong to either Parliament or the Legislatures to confer powers upon the other." That Parliament and the provincial legislatures have power to delegate some part of their legislative functions to a subordinate body such as a board or commission is not disputed, but this is a different matter from delegating authority to each other, as the latter would amount to a readjustment of the respective spheres of legislative authority.—*The Attorney General of Nova Scotia v. The Attorney General of Canada*, Supreme Court of Canada, October 3, 1950.

Prosecutions for violations of the Unemployment Insurance Act may be commenced at any time within one year of the day the Commission has sufficient evidence to warrant proceedings.

The Court of King's Bench at Montreal on May 31, 1950 reversed the judgment of the Superior Court at Terrebonne given February 9, 1950 and upholding the ruling of a magistrate's court which dismissed a charge brought by the Unemployment Insurance Commission against an insured workman. The workman by means of false statements had received two days' unemployment benefits (for July 30 and 31, 1948) to which he was not entitled. The magistrate dismissed the charge on the grounds that more than twelve months had elapsed before the charge was laid.

The Court of King's Bench noted that the Unemployment Insurance Act contains a provision which makes an exception from the common law rule as to the date from which the prescription of the right to prosecute begins. This provision is as follows:—

Proceedings for an offence under this Act or regulations made thereunder may be commenced at any time within twelve months from the day on which evidence, sufficient in the opinion of the Commission to justify prosecution for the offence, comes to its knowledge.

This is followed by another subsection which provides that a certificate issued by the Commission certifying as to the date on which the evidence came to the Commission's knowledge, shall be received as conclusive proof thereof. The Commission's certificate in this case stated that the date on which sufficient evidence to justify proceedings came to its knowledge was October 31, 1949. A charge could accordingly be properly laid within twelve months from that date. Proceedings were in fact started on December 5, 1949.

The workman was found guilty and fined \$15, and in default of payment within 15 days, was sentenced to eight days imprisonment.—*Guimont v. Boivin*, *Rapports Judiciaires de Quebec* [1950], B. R. Montreal, No. 7, p. 552.

Court Interprets Union's Picketing Rights Under B.C. Trade-unions Act.

On March 20, 1950, Chief Justice Farris of the Supreme Court of British Columbia dismissed with a warning to the defendants the application to commit two members of the Retail, Wholesale and department Store Union, Local No. 535 for contempt of Court for failing to observe an injunction against picketing of a Department

store in New Westminster. The injunction, granted on November 12, 1949, restrained and enjoined the union from watching and besetting the store premises, from causing a nuisance in the vicinity of the store, from attracting crowds, or from molesting, threatening or intimidating any person from patronizing the business of the store, but nothing in the injunction was to take away the rights of pickets as set out in Sections 3 and 4 of the Trade-unions Act.

The Chief Justice found that the two defendants had, in fact, violated the terms of the order, but that they had not intentionally done so; rather, they had misconceived their legal rights. In view of the plaintiff's statement that the object of the application to commit the two union men was not to punish them but to prevent a repetition of what had been done, and since the plaintiff had not asked for costs, His Lordship stated that he had dismissed the application with a warning to the defendants.

The plaintiff had based his application on the fact that the defendants had participated in the picketing of the plaintiff's store in disregard of the injunction, i.e. that they had exceeded their picketing rights under the Trade-unions Act. Section 3 of this Act reads as follows:—

No such trade-union or association shall be enjoined, nor shall any officer, member, agent, or servant of such trade-union or association or any other person be enjoined, nor shall it or its funds or any such officer, member, agent, servant, or other person be made liable in damages for communicating to any workman, artisan, labourer, employee or person facts respecting employment or hiring by or with any employer, producer, or consumer or distributor of the products of labour or the purchase of such products, or for persuading or endeavouring to persuade by fair or reasonable argument, without unlawful threats, intimidation, or other unlawful acts, such last-named workman, artisan, labourer, employee, or person, at the expiration of any existing contract, not to renew the same with or to refuse to become the employee or customer of any such employer, producer, consumer, or distributor of the products of labour.

With reference to this section, His Lordship continued:—

As I view Section 3 of the Act, labour is given the right to communicate the facts of the strike to the public and/or to the employees and to persuade the employees not to continue to work or the public not to buy and it only gives the right to do this to the extent necessary to communicate labour's side of the picture. It does not give labour, under the guise of this, a right to employ such a number of pickets (although they may appear to be good-natured) as would be unnecessary for the purpose and which

would have the effect of blocking traffic or making it difficult for any person to enter the store. Labour has the right, under this section, to place its case before employees and/or the public. Having done so, it is for the employees or the public, without interference, to judge for themselves as to whether they desire to do business with the employer against whom the strike has been instituted. The acts of the pickets in giving the information may be annoying to the employer but nevertheless this is labour's right and the employer must put up with it until such time as the pickets have exceeded the statutory authorization and/or become a nuisance, block traffic and otherwise interfere with the business of the employer.

The Chief Justice stated that it was impossible for him to define the number of pickets which would be permissible. In each case, it would depend on different factors.

To sum up, it would seem to me that any picketing is unlawful which would go beyond allowing the strikers or their friends in a reasonable manner, under all circumstances, to communicate to employees and/or the public the facts of the dispute between the parties and reasonably seek to convince the public of the justness of their case. . . .

In conclusion, His Lordship stated:—

In my view, the number of pickets employed in the small area in front of the store in question was such that it went beyond giving the strikers' side of the case. The number of pickets engaged and their method of procedure was such that, in my opinion, it could only have the effect of intimidating persons who might be going into the store, drawing crowds, blocking the store entrance and generally having the effect of destroying the business of the employer.

Army and Navy Department Store (Western) Ltd. v. Retail, Wholesale and Department Store Union, Local No. 535, et al. 2 DLR [1950], p. 850.

Saskatchewan Labour Relations Board found to have acted without jurisdiction since in making an order it failed to follow its own rules and regulations.

The Saskatchewan Court of King's Bench on July 4, 1950 quashed an order of the Labour Relations Board dated February 24, 1950 requiring the Regina Grey Nuns' Hospital to refrain from engaging in certain unfair labour practices with respect to 36 employees of the Hospital. The "unfair labour practice" was that the Hospital was retaining in its employ persons who were not members of the union certified as the bargaining agent. This action was taken on an application of the Regina Grey Nuns' Hospital Employees' Association (no affiliation) for a writ of *certiorari* to remove and quash the Board's order.

On October 18, 1945, Local 284 of the Building Service Employees' International Union was certified as the bargaining representative for the employees (with certain exceptions) of the Regina Grey Nuns' Hospital. Collective agreements were executed between Local 284 and the Hospital, the last one on March 24, 1949, effective for one year from March 1, 1949. The agreement contained a union security clause as provided in Section 25 of The Trade Union Act:—

Upon the request of a trade union representing a majority of employees in any appropriate bargaining unit, the following clauses shall be included in any collective bargaining agreement entered into between such trade union and the employer concerned, and, whether or not any collective bargaining agreement is for the time being in force, the said clause shall be effective and its terms shall be carried out by such employer with respect to such employees on and after the date of such trade union's request until such time as the employer is no longer required by or pursuant to this Act to bargain collectively with such trade union:

Every employee who is now or hereafter becomes a member of the union shall maintain his membership in the union as a condition of his employment, and every new employee whose employment commences hereafter shall, within thirty days after the commencement of his employment, apply for and maintain membership in the union as a condition of his employment.

On February 22, 1950, the Labour Relations Board conducted a hearing on the application of the Regina Grey Nuns' Hospital Employees' Association (no affiliation) for certification as the bargaining representative to replace Local 284 of the Building Service Employees' Association which had been certified in 1945. On February 24 the Board issued an order directing that a representation vote be conducted by secret ballot during the last week of April, 1950. At the same hearing an application by Local 284 was heard for an order requiring the employer to refrain from engaging in unfair labour practices, in particular from violating Section 25 of the Trade Union Act respecting union security. The Board on February 24 issued an order requiring the employer forthwith to refrain from engaging in unfair labour practice in contravention of Section 25 of the Act with respect to 36 employees named in the order. These 36 employees were members of the Regina Grey Nuns' Hospital Employees' Association (no affiliation).

Mr. Justice Doiron in his reasons for decision dealt with the objection of counsel for Local 284 that the Employees' Association had no status in law and accord-

ingly no right to bring a suit before the court. He stated that a trade union may sue or be sued in representative actions and that the Employees' Association was given corporate recognition by the Board when the Board made the order directing the vote, since the Board must have found that it was a labour organization within the meaning of the Act.

He then made reference to the power of the Board to make regulations as found in Section 13 (1) of The Trade Union Act, 1944. Under this authority, the Board issued rules and regulations which were published in the *Saskatchewan Gazette*, August 15, 1947. Regulation 7 reads as follows:—

Upon the filing of any application referred to in any of the foregoing clauses, the secretary shall make every reasonable effort to determine the names of all persons, trade unions and labour organizations having a direct interest in the matter in respect of which the application is made, and shall, with reasonable dispatch, forward a copy of the application to every such person, trade union and labour organization.

No such copy of the application was forwarded either to the Employees' Association or to the 36 persons named, although the Board must have known, His Lordship said, that they had "a direct interest in the matter". He concluded:—

The Regina Grey Nuns' Hospital may have been guilty of an infraction of Section 25 of the Act but I am not concerned with making a finding in that regard. The question before me is whether the procedure was such as to give the Board jurisdiction to hear the application and make the order, and I find the Board acted without jurisdiction and beyond the powers conferred on it under the Act, by neglecting to follow its own rules and regulations.

Regina Grey Nuns' Hospital Employees' Association v. Labour Relations Board, et al [1950], 2 WWR, p. 659.

Council of Arbitration appointed under Quebec Trade Disputes Act held to be properly constituted.

The Superior Court of Quebec on March 21, 1950 dismissed a petition from a textile company for a writ of prohibition ordering a Council of Arbitration to cease and suspend all proceedings in a dispute between the Company and *l'Union des Employés de vêtement de Sherbrooke*.

The case arose out of difficulties encountered in the dispute between the company and the union. The efforts of the conciliation officer to effect a settlement were unsuccessful and consequently on June 9, 1949, the Conciliation and Arbitration

Service directed both the company and the union to name their appointee to the Council of Arbitration. On June 20, 1949 the union named its appointee. The company failed to make any recommendation and accordingly on July 25, 1949 the Minister of Labour named the arbitrator for the employer. The chairman was chosen by these two members and appointed by the Minister on August 1, 1949.

The Court pointed out that a writ of prohibition may be issued when a lower court exceeds its jurisdiction. The company based its petition on the argument that the chairman was not properly a member of the Council of Arbitration, charging him with incompetency and partiality.

After reviewing Section 18 of the Quebec Trade Disputes Act, which governs the appointment of councils of arbitration, the Court concluded that the chairman "was duly appointed strictly pursuant to the Quebec Trade Disputes Act and particularly under the provisions of Section 18 (2) of the said Act". It found also that there was no evidence adduced to support the contention of incompetency and partiality on the part of the chairman.

The Court further held that "the Council of Arbitration emanates from the Crown through appointment by the Minister of Labour under the said Act, and the Attorney-General may on behalf of the Crown intervene to defend such appointment".

The petition for a writ of prohibition was dismissed, with costs against the petitioner. —*Classon Mills Limited v. Council of Arbitration and others and Hon. A. Barrette, Mis en cause and Attorney-General of the Province of Quebec, intervenant.* Rapports Judiciaires de Québec [1950], C. S. Mont-real, Nos. 5 et 6, p. 281.

[The Council of Arbitration gave its decision on the points at issue on April 25, 1950.]

Non-discrimination provisions of Quebec Labour Relations Act held to apply to School Commissions.

Mr. Justice Pettigrew in the Court of the Sessions of the Peace at Quebec on March 30, 1950, dismissed a motion of the Lauzon School Commission to quash a charge brought against the Commission by a teacher who alleged that the Commission, in contravention of the Quebec Labour Relations Act, had refused to employ her because of her participation in union activities.

The motion was brought on the grounds of default in procedure and of the inapplicability of the Quebec Labour Relations Act.

The first objection was that the authorization for prosecution issued by the Labour Relations Board was not in due form and did not meet the requirements of the law as set out in Section 49 of the Labour Relations Act. The attorney for the defence submitted that the declaration did not contain the essential details for the issuing of a legal authorization. The Court found that the assent showed that the Labour Relations Board had sufficient knowledge of the facts to allow the proceedings.

The defence also submitted that Section 21 of the Labour Relations Act did not apply to school commissions. The Education Act, Section 232, provides that school commissioners after they have decided, by a resolution at a regular meeting, not to retain the services of a teacher, must give to that teacher a written notice to that effect before the 1st of June preceding the expiry of his services and that the commissioners are not obliged to give the reasons for their decision. The attorney for the defence held that because of this section of the Education Act, Section 21 of the Labour Relations Act did not apply.

In dealing with this argument, Mr. Justice Pettigrew pointed out that Section 3 of the Public Services Employees Disputes Act provides that the Labour Relations Act applies to public services "but subject to the modifications hereinafter indicated". The modifications referred to concern only the procedure of arbitration, the execution of the award, the length of time it will be in effect, the prohibition of strikes, etc.

In no way do they debar employers from the defence of actions forbidden by Section 21 of the Labour Relations Act. No employer may refuse, states Section 21, to hire a person because of his membership in an association, and no threat of dismissal, intimidation, or imposition of any penalty may be resorted to, to prevent an employee from being or becoming a member of an association. An employer may however suspend, dismiss or discharge an employee for a sufficient cause and the burden of the proof will lie upon him. A school commission sued on the grounds of the preceding section will be found guilty only if the proof accumulated against it leaves no doubt in the judge's mind.

It was also pleaded that Section 21 was inapplicable because federal legislation dealt, in Section 502A of the Criminal Code,

with an identical offence. Mr. Justice Pettigrew held that there was no repugnancy between these sections, and that there was no question of the Labour Relations Act being *ultra vires*. When the federal Parliament enacted Section 502A, it did not undertake "to treat the whole

subject *de novo*, and so to make *tabula rasa* of the pre-existing law".

The motion of the defendant was rejected as a whole.—*Couture v. Commissaires d'Ecoles pour la Municipalité de Lauzon*. *Rapports Judiciaires de Québec* [1950], C.S. Montreal, Nos. 5 et 6, p. 201.

Annual Report of the Nova Scotia Department of Labour, 1949

An increase in the activities of the Conciliation Branch and of the Factory Inspection Branch is noted in the Annual Report of the Nova Scotia Department of Labour for 1949. Harmonious labour relations prevailed during the year. A decrease in the number of industrial accidents is reported.

The Annual Report of the Nova Scotia Department of Labour for the fiscal year ending November 30, 1949, states that the index number of reported employment for November 1, 1949 was 122·8, a slight decline from 123·7 for the same date in the preceding year. Employment in manufacturing fell off more than the general index, the Report notes.

The total payroll for establishments from which reports were obtained increased more rapidly than the number of employees. Per capita weekly earnings increased during the year from \$37.05 on November 1, 1948 to \$38.38 on the same date in 1949.

Changes in Legislation

One new labour law was passed in Nova Scotia in 1949 and three others were amended. A new Steam Boiler and Pressure Vessel Inspection Act which covers pressure vessels as well as steam boilers replaced the Steam Boiler Inspection Act. Except for its wider application and a few minor changes, the new Act is similar to the former one.

The Trade Union Act was amended during the year to make it compulsory for a trade union coming within the definition of the Act to have a written constitution setting forth its objects and purposes and defining conditions of membership. Another amendment provided that when a vote is taken to determine whether a trade union shall represent a unit of employees for bargaining purposes, the Board must be satisfied that not less than 60 per cent of the employees have voted and that a majority of the votes cast is in favour of the trade union. Previously a majority of all the employees within a unit was required before certification would be granted.

Another amendment makes it clear that the Labour Relations Board is now required to revoke a certification only upon application being made for revocation of such certification or on an application by another trade union for certification as bargaining agent for the same unit, if the Board considers that the trade union no longer represents a majority of the employees in the unit. Changes were also made in the provisions regarding check-off votes.

By amendments to the Workmen's Compensation Act, effective from May 1, 1949, benefits to dependent children under 16 in fatal cases were increased from \$10 to \$12.50 a month. The minimum weekly payments to workmen in cases of total permanent disability were increased from \$12.50 to \$15. The maximum average earnings on which compensation is reckoned were raised from \$2,000 to \$2,500.

By an amendment to the Apprenticeship Act the minimum time for which an apprenticeship contract can be made was increased from 2,000 to 4,000 hours. The section of the Act dealing with the scope of the regulations was rewritten and amplified.

The Nova Scotia Labour Act, first passed in 1933, was re-enacted for another year.

Labour Relations

During the year ending November 30, 1949, the Labour Relations Board of Nova Scotia received 27 applications under the Trade Union Act, a decrease of 23 from the previous year. Certifications as bargaining agent were granted in 23 cases, three applications were rejected and one application for the revocation of certification was granted.

"Requests for the services of a Conciliation Officer under the Trade Union Act increased greatly during the year both in negotiating collective agreements and in adjusting disputes which arose during the term of an agreement", the Report states. Of the 33 requests for conciliation services, collective bargaining agreements were secured in 30 cases through the efforts of the Department of Labour and agreement was reached in two disputes by means of Conciliation Boards. At the end of the fiscal year one case had not been settled.

During the year 1948-1949 there were 10 strikes in Nova Scotia, a decrease of 5 from the previous year. These resulted in an estimated time loss of 17,124 man working days. The industries affected by these work stoppages were transportation, construction, mining and manufacturing. The seamen's strike was the only major tie-up during the year.

Industrial Standards

Increased activity during the past year with respect to the Industrial Standards Act was due mainly to the fact that a large building program was under way in Halifax, Sydney and Dartmouth. Schedules of rates of pay and hours of work were posted on 183 jobs as compared with 103 in 1948. Twenty-six violations of the Act were recorded, fourteen more than in the previous year. At the end of the year twenty-three of the violations had been investigated and settled and one case was still pending. During 1949 nine schedules of wages and hours of labour were approved.

Factory and Boiler Inspection

"During the past year there has been considerable expansion in the activities of the Factories Inspection Branch of the Department. The number of factories, accident investigations and special visits to

the different plants throughout the province has increased over one hundred per cent", the Report notes.

The Branch made over 1,039 first, second and special investigations and inspections during the year, covering approximately 30,000 workers. As a result, 626 violations of the Nova Scotia Factories Act and the Industrial Standards Act were ordered corrected.

A total of 810 accidents was reported, as compared with 923 in 1948. Four were fatal accidents, a decrease of five from the previous year.

One boiler explosion occurred during the year resulting in the death of two employees and injury to a third. The boiler had been operated contrary to the Boiler Inspection Act and Regulations. It had never been reported to the Branch, was not insured against explosion and had therefore never been inspected.

Apprenticeship

At the close of the fiscal year there were 362 apprentices registered for apprenticeship training. During the year 70 apprentices attained journeyman status which is the largest graduation in the history of apprenticeship in Nova Scotia, and 34 final apprenticeship certificates were issued. The Report states that most of the ex-service apprentices have completed their time and the emphasis is now on young civilians.

In addition to the apprenticeship training courses organized within the Province, an active pre-employment apprenticeship training program is being conducted, the cost of which is shared equally between the Provincial and the Dominion Government. During the year five groups successfully completed a seven months' course in Vocational Training Centres at Halifax and North Sydney. These courses were in the motor vehicle repair, electrical construction, bricklaying, carpentry and plastering trades.

Annual Report of the Ontario Department of Labour, 1949

The thirtieth annual report of the Department of Labour of the Province of Ontario for the year ending March 31, 1949, states that the year has been one of increasing activity in the Department, reflecting the continuous progress of business and industry in the Province. A greatly increased number of disputes were referred to the Conciliation Branch for settlement. Construction of premises for business and industry reached a new

peak, and fewer industrial accidents were reported.

Factory Inspection Branch

Inspection

Further progress was made during the year in increasing the factory inspection staffs and revising the inspection districts.

A total of 28,818 inspections was carried out in industrial and commercial establish-

ments during the year, 1,159 more than during the previous year. In addition, 3,826 investigations were carried out for other branches of the Department.

In connection with their duties under the Factory, Shop and Office Building Act of assisting with the enforcement of certain other protective legislation, the inspectors reported 816 violations of the Minimum Wage Act, 95 violations of the Operating Engineers Act and 31 violations of the Adolescent School Attendance Act.

Of the 106 complaints of violations of the Factory, Shop and Office Building Act, the principal offences were in connection with fumes and dust, sanitation, heat and light, excess hours and child labour. Other complaints referred to elevators, fire hazards, home workers, machinery, overtime and double shifts.

Industrial Accidents

During the year 11,104 male and 703 female workers were reported injured while working on their employers' premises, representing a slight decrease from the previous year. In addition, 56 were fatally injured, a decrease of seven from the previous year.

Accidents occurred in the following industries:—

Paper products 1,236; metal trades 3,748; rubber products 390; textiles and clothing 508; foods and beverages 721; wood products 530; chemical products 168; transportation equipment 1,578; leather 138; non-metallic mineral products 363; electrical apparatus and supplies 574; trade 143; and 753 others in various industries.

In addition there were 262 accidents (29 of them fatal) not within the jurisdiction of the Factory, Shop and Office Building Act.

Of the 273 compensatable cases of industrial diseases reported, 245 were dermatitis, 20 were lead poisoning, 1 was undulant fever and 7 were silicosis.

During the year the Department, desiring to effect a closer check on safety factors in the electrical industry, sent two members of its staff to visit one of the plants of a large manufacturer in the United States.

The appointment of a second foundry inspector has enabled all foundries in the Province to be inspected at least twice during the year. Draft regulations for the control of dust and other hazards in the foundry industry were prepared for discussion with interested government bodies and the industry.

Hours of Labour

Of the 567,069 workers in industry reported on, the majority (292,862) were on

a working week of from 45 to 48 hours. While detailed statistics on the 5-day week are not available, Inspectors of the Branch report that most industries in the 40 to 44-hour group and many in the 45 to 48-hour group are on a 5-day week of 8 to 9 hours a day.

Permits allowing overtime work were issued to 449 firms during the calendar year 1948 as compared with 361 firms during 1947. It is felt that the prevailing shorter work-week is responsible for the increase in seasonal overtime. A total of 274 firms was permitted to employ youths and females on a 2-shift basis and 323 permits were granted to restaurant employees providing for the employment of women until 2 a.m.

Child Labour

Forty-six cases of child labour involving the employment of persons under 14 years of age were reported, a decrease of 15 from the previous year. Eight charges were laid against employers and convictions reported in five cases.

Homework

During the year, 515 permits were issued to firms authorizing them to give out work to be done in homes at rates of pay approved by the Industry and Labour Board. Homeworkers' permits were issued to 3,027 persons to undertake the work of manufacturing or assembling household articles or wearing apparel in their homes.

Approval of Building Plans

"For the third consecutive year, the number and value of approved construction projects exceeded previous maxima," the report states.

During the year, 1,324 plans for new buildings, or alterations to factories, shops and office buildings were approved at a construction cost of \$61,276,500 as compared to 1,250 plans at a cost of \$59,407,600 during the previous year.

The iron and steel industries were again first in the number and value of projects, with the food industries and transportation equipment industries expending the second and third largest amounts of money on building expansion.

Each grain elevator in the Province was inspected two or three times and standards of cleanliness, protective equipment and safe working habits were reported.

The replacement of open stairways by stairways enclosed with fire-resistant materials has been aggressively undertaken by the Branch during the year.

Prosecutions

Fourteen charges for violation of the Factory, Shop and Office Building Act were laid against 11 employers for late employment of females without a permit, child labour, inadequate training and supervision of females working at machines and failure to submit building plans for approval. Convictions were registered in ten of the charges, one case was dismissed and one withdrawn.

Board of Examiners of Operating Engineers

The Board issued 20,587 certificates, of which 20,251 were granted to operating engineers for the year 1948-49.

The Board received 1,163 applications for examination and 602 applications for re-examination. A total of 117 applications for examination were not accepted because they did not meet the requirements of the regulations.

The Branch Inspector made 649 inspection calls during the year to check violations of the Operating Engineers Act.

Boiler Inspection

"As a result of industrial expansion continuing unabated during the fiscal year under review, there has been an appreciable increase in the number of new steam and refrigeration plant installations and extensions to existing plants throughout the Province". The report states that the slight decrease in the number of annual inspections recorded for the year is the result of the effort of the inspectorate to meet demands required by construction of new boilers and pressure vessels in the manufacturers' shops and the installation of new plants.

Certificates were issued as follows:—

	1948	1949
New boilers and unfired pressure vessels	2,845	3,522
Used boilers and unfired pressure vessels	805	933
Low pressure boilers accepted by affidavit	545	610
Pressure vessels accepted by affidavit	2,673	1,603
Boilers under 3 H.P. accepted by affidavit	87	94
Duplicate certificates	49	87
Total	7,004	6,849

The report also gives a summary of investigations of boiler explosions that took place throughout the Province during the period under review.

Conciliation and Arbitration

The report points out that the Conciliation Branch handled conciliation matters referred to it under the Labour Relations Board Act, 1944, the Labour Relations Board Act, 1947 and the Labour Relations Act, 1948 which repealed the earlier legislation. During the year, 286 cases were dealt with by the Branch under collective bargaining legislation as compared with 228 cases during the previous year. Of these, 244 cases were referred to the Board by the Labour Relations Board and settlement was achieved in 133 cases and 111 were referred to conciliation boards appointed by the Minister. The total number of firms involved was 927 and the number of employees 90,647. Forty-two additional cases were referred directly to the Conciliation Branch without recourse to the Ontario Labour Relations Board and all were brought to a satisfactory conclusion.

Sixty cases of alleged discrimination or unfair labour practices were investigated. Of these, two cases were withdrawn, settlement was reached in 40, and, in the remaining 18, an Industrial Inquiry Commission was appointed to hear evidence under oath and to make recommendations pursuant to the regulations.

The report notes that requests for the service of the Branch in respect to taking plant votes have shown a marked decrease during the year. Only three votes were requested and held during the year involving a total of 733 employees.

Under the Industrial Standards Act, 48 conferences for drawing up schedules of wages, hours and days of labour were conducted during the year.

Ontario Labour Relations Board

On April 16, 1948, the Legislature of Ontario enacted the Labour Relations Act, 1948, which provided for the making of regulations similar in form and effect to Part I of the Federal Industrial Relations and Disputes Investigation Act, 1948. The Act was proclaimed in force on December 9, 1948, and regulations were passed concurrently. Except for cases still pending, the Labour Relations Board Acts of 1944 and 1947 were then repealed.

Under these two Acts, 313 applications were filed for certification, 228 requests were made for the appointment of a conciliation officer, seven applications were for leave to initiate a prosecution, four applications were made for the establishment of a grievance procedure and two requests were submitted for the cancellation of collective agreements. Of these

requests, 183 applications for certification and three applications for leave to prosecute were granted. Two hundred requests were referred by the Board to the Minister for the appointment of a conciliation officer and the four applications for establishment of a grievance procedure and the two requests for cancellation of collective agreements were also granted.

During the period between December 9, 1948, when the Labour Relations Act, 1948, came into force, and March 31, 1949, 131 applications were considered. Of these 129 were requests for certification, one was a request for the cancellation of a collective agreement and one was concerned with the

revocation of certification. The latter case was still pending at the end of the fiscal year. Sixty-six of the applications for certification were granted as was the request for the cancellation of a collective agreement.

Apprenticeship

The close of the year marked the end of job training for a large number of former members of the armed services. During the year 664 applications were approved by the Industry and Labour Board for apprenticeship in the building trades, 620 in the motor vehicle repair trade and 11 in the barbering trade.

UNEMPLOYMENT INSURANCE

Selected Decisions of Umpire Under the Unemployment Insurance Act

Digest of selected decisions in appeals heard by the Umpire under the provisions of the Unemployment Insurance Act. Published in two series (1) Benefit cases, designated CU-B, and (2) Coverage cases, CU-C.

Held that the claimant had shown just cause within the meaning of the Act for having voluntarily left her employment.—CU-B 612 (September 7, 1950).

MATERIAL FACTS OF CASE:

The claimant, married, 27 years of age, filed an initial application for benefit in Toronto, Ont., on January 19, 1950, stating that she had been employed as a book-keeper in Timmins, Ont., from March, 1946 to January 4, 1950, when she voluntarily left to join her husband in Toronto, where he was attending university.

The insurance officer disqualified her from the receipt of benefit for a period of six weeks for having voluntarily left her employment without just cause (Section 41 (1) of the Act).

The claimant appealed to a court of referees. The court after having heard the claimant unanimously reversed the decision of the insurance officer in a finding which reads:—

The facts appear to be that (the claimant) became married in November, 1949, but was unable to find living accommodation in Toronto until January, 1950 when she left her employment. Her husband is a fifth year dental student and although he formerly was a resident

of Timmins, we accept the evidence of the claimant that he does not intend to return there to live. It is our opinion that the husband has established his residence and domicile in Toronto and that in any event he has abandoned any previous domicile he may have had in Timmins. We are of the opinion that the statement of the Umpire in Case No. CU-B 45 "A wife has a legal and moral obligation to live with her husband wherever he has established his residence or domicile" is applicable and that there are no special circumstances in this case as in CU-B 45 to justify our disregarding this general principle.

From the decision of the court of referees, the insurance officer appealed to the Umpire, stating in part:—

The husband is a student attending University in Toronto and it is not considered that in so doing he has established "residence or domicile" within the meaning intended by the quotation referred to in CU-B 45. It is reasonable to assume that the husband is not earning any wages or if he is, it is unlikely that his earnings would be sufficient to cover his tuition fees, his own maintenance and the maintenance of his wife.

The claimant apparently had a permanent position in Timmins earning \$34 per week as a bookkeeper and in circumstances such as these it seems reasonable to assume that she was self-supporting and should therefore have had reasonable assurance of employment in the city of Toronto before voluntarily leaving her position in Timmins.

DECISION:

When dealing with the case of a married woman who has voluntarily left her employment in order to join her husband at his place of residence or domicile or with that of a married woman who refuses to accept employment outside of her own district due to her marital circumstances, one must bear in mind the basic principle that "a wife has a legal and moral obligation to live with her husband wherever he has established his residence or domicile."

In some cases, however, the circumstances are such that a too strict and rigid interpretation of that general principle would lead to abuses and defeat the purposes of the Unemployment Insurance Act. For instance in CU-B 45, the claimant had voluntarily left her employment in wartime in order to follow her husband who was in the armed forces and temporarily posted for duty at a distant point; in other cases which came before the Umpire, claimants had voluntarily left suitable employment in order to join their husband in small communities where they could not reasonably expect to find employment or had refused, after a lengthy period of unemployment, to accept work outside their husband's place of residence where there was no likelihood of employment for them. In all these cases it was found that the particular claimant had not shown just or good cause within the meaning of the Act.

In the present case, the claimant, a month or two after her marriage, was able to find living accommodation in Toronto where, as found by the court of referees—and I have no valid reason to differ on this question of fact—her husband had established his residence and domicile. In order to live with her husband in that large city, which, no doubt, could offer her fair opportunities of work, she therefore voluntarily left her employment as a bookkeeper in Timmins which is situated approximately 500 miles from Toronto. Under such circumstances, I agree with the court that a disregard of the general principle set forth above would not be justified.

I agree with the court of referees that the claimant has shown just cause within the meaning of Section 41 (1) of the Act and the appeal is dismissed.

Held that the claimant had not shown just cause within the meaning of the Act for having voluntarily left her employment.—CU-B 492 (October 3, 1949).

MATERIAL FACTS OF CASE:

The claimant married, 21 years of age, filed an initial application for benefit in Selkirk which is near Winnipeg, Manitoba, stating that she had been employed as a clerk-typist in Toronto from September 24, 1948 to February 28, 1949, when she left her employment voluntarily to move back to Winnipeg. The employer reported that she had left voluntarily because of pregnancy.

The insurance officer disqualified her from the receipt of benefit for a period of six weeks for having voluntarily left her employment without just cause. (Section 41 (1) of the Act.)

The claimant appealed to a court of referees and in support of her appeal produced the following certificates, the first from a doctor in Selkirk, the second from a doctor in Toronto:—

April 18, 1949.

This is to certify that Mrs. will be fit for clerical work until May 7, 1949.

April 26, 1949.

Mrs. was under my care in Toronto. I advised her to travel home to Winnipeg at the end of February that she might become settled properly before having her baby.

At the same time the insurance officer referred the question of availability to the court under the provisions of Section 55 of the Act. The court unanimously reversed the decision of the insurance officer by lifting the disqualification imposed under Section 41 (1) of the Act, but disqualified the claimant for an indefinite period on the ground that she was not available for work.

The insurance officer appealed to the Umpire from the decision of the court, which lifted the disqualification imposed under Section 41 (1) of the Act.

DECISION:

The question for me to decide is whether the claimant "has established just cause for voluntarily leaving her employment on February 28, 1949."

There can be no doubt that women who are in the claimant's condition are handicapped to a considerable extent in obtaining employment. It would seem therefore that when they have the opportunity of remaining in suitable employment, they should do so as long as possible.

In the present case, there is no evidence on file that the work that the claimant was performing was detrimental to her health. For personal reasons and to suit her own convenience, she chose to have her confinement take place in Winnipeg and so voluntarily left her employment in Toronto three and a half months before the expected date of childbirth. Subsequently, she filed a claim for benefit in Winnipeg. If the

claimant wished or desired to work, she should have adjusted her personal affairs accordingly and remained in the employment she had in Toronto.

My decision is that the claimant has not shown just cause for having voluntarily left her employment and she is disqualified from the receipt of benefit for a period of six weeks as from the date that this decision is communicated to her.

Unemployment Insurance Statistics, September, 1950*

The report issued monthly by the Dominion Bureau of Statistics on operations under the Unemployment Insurance Act states that during the month of September, 1950, initial and renewal claims for benefit filed at local offices of the Unemployment Insurance Commission amounted to 49,229. Compared with the previous month, when claims numbered 61,545, September showed a decline of about 20 per cent. In September, 1949, initial and renewal claims amounted to 51,935.

Ordinary claimants on the live unemployment register on the last working day of September totalled 79,263 (45,990 males and 33,273 females), as compared with 98,930 (64,378 males and 34,552 females) in August, and 83,525 (59,567 males and 23,958 females) in September of last year.

Of the 88,893 active claimants on the last day of the month, 65,982 or 74 per cent were registered for a period of seven days or more. In August 74,402 or 67 per cent of the 111,054 active claimants on the last day of the month were in this category.

A total of 63,959 initial and renewal claims were adjudicated during the month. Claims allowed numbered 50,946, while 13,013 claims were disallowed or disqualified. In addition, 3,518 revised claims were disqualified.

Claims disallowed totalled 5,345, due to insufficient contributions while in insurable employment. Among the chief reasons for claims disqualified were the following: "voluntarily left employment without just cause" 3,764 cases; "refused an offer of work and neglected an opportunity to work" 1,816 cases; and "not unemployed" 1,799 cases. In addition, 1,365 disqualifications were imposed on claimants who had lost their employment by reason of a stoppage of work due to a labour dispute.

(The dispute in question was the nationwide railway strike.)

There was a slight increase over August in the total of persons commencing the receipt of benefit on initial and renewal claims. Claimants who received initial payments of benefit during September totalled 32,401 compared with 30,628 in August, and 34,414 in September, 1949.

During the month of September \$3,843,797 were paid in respect of 1,633,140 compensated days of unemployment, compared with \$4,412,992 paid respecting 1,925,184 days in August, and \$3,671,773 for 1,611,461 days during September one year ago.

For the week of September 30 to October 6, 61,578 persons received \$812,841 for 352,188 days of proven unemployment, in comparison with 67,303 persons, \$886,221, 387,366 days for the week August 26-September 1, and 65,443 persons, \$848,957 and 372,196 days for the week September 10-16, 1949. The average duration of benefit for the week September 30-October 6 was .57 days, while for the week August 26-September 1 the average was .58. The average amounts of benefit paid during these respective weeks were \$13.20 and \$13.17.

Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission showed that during September 3,750,999 insurance books were issued to employees who had made contributions to the Unemployment Insurance Fund, at one time or another since April 1, 1950. This was an increase of 106,160 over the previous month.

As at the end of September there were 241,988 employers registered, an increase during the month of 1,711.

* See Tables E-1 to E-7.

Meeting of National Employment Committee

The National Employment Committee held its regular quarterly meeting in Edmonton, Alta., on October 2-4.

Established under authority of Section 90 of the Unemployment Insurance Act, the National Employment Committee is an advisory body to the Commission and co-ordinates the work of the five regional committees. Employer and worker and other interests are represented on the committee.

The most important items under discussion during the session were a report on seasonal employment and a brief reviewing present measures to deal with unemployment, with suggestions for further action. Because of the amount of material contained in these reports and the number of subjects covered, it was decided that subcommittees should be formed and subjects allotted to them for further study. The following topics were selected in order of importance.

1. The staffing of the NES—qualifications, adequacy and salaries paid, etc.;
2. Seasonal unemployment;
3. Training and re-training of workers;
4. Unemployment assistance;
5. Vocational guidance program in schools and its relationship to the NES;
6. Penetration by the National Employment Service into the Labour Market.

Considerable discussion arose out of the question as to "what was being done to help immigrants and to assist these immigrants in citizenship." The members expressed the opinion that it is essential that new immigrants learn one or other of the two official languages of Canada, in order that they may be more easily absorbed into the Canadian labour market, thereby establishing economic security, and may be able to appreciate the responsibilities and privileges of Canadian citizenship. A report on this question will be submitted at the next meeting of the committee.

A resolution instructed the secretary to prepare an analysis of existing apprenticeship regulations for presentation at the next meeting.

Resolutions submitted by Regional and Local Employment Committees considered by the meeting included such subjects as decentralization of industry, with particular reference to direction of rearmament projects to the Maritime Provinces, and uniform rates of pay for members of the Corps of Commissionaires. Another resolution requested that the attention of the Civil Service Commission be called to the practice of setting age limits in civil service competitions, while at the same time the Federal Government is urging employment in industry of the older worker.

National Employment Committee members in attendance were:—

Judge W. J. Lindal, of Winnipeg, Chairman, Mrs. G. D. Finlayson, Ottawa, National Council of Women, H. A. Chappell, Winnipeg, substituting for A. R. Mosher, Canadian Congress of Labour, A. J. Maure, Edmonton, substituting for J. B. White, Canadian Manufacturers' Association, R. A. Stewart, Almonte, Canadian Federation of Agriculture, Carl Berg, Edmonton, the Trades and Labour Congress, R. E. G. Davis, Ottawa, Canadian Welfare Council, Geo. S. Hougham, New Westminster, B.C., Canadian Retail Federation, A. L. Lott, Hamilton, Canadian Chamber of Commerce, T. D. Anderson, Ottawa, Canadian Legion, T. A. Fishbourne, Ottawa, Secretary.

The meeting was attended also by R. J. Tallon, Commissioner, UIC, W. K. Rutherford, Director of Employment Service, M. Taschereau, Information Branch, Department of Labour, and J. D. Forbes, Department of Labour.

The next meeting of the National Employment Committee will be held in Ottawa early in the new year.

HOURS AND WORKING CONDITIONS IN THE CHEMICAL PRODUCTS INDUSTRY, OCTOBER 1949*

More than sixty per cent of the plant workers in the Chemical Products Industry were on a five-day week in 1949. One-third of the employees were normally working forty hours a week. Time and one-half was the general overtime rate except for work on statutory holidays, when double time was predominant. Most establishments reported an initial vacation with pay of one week after a year of employment; many reported giving a second or third week after longer periods of service. Almost all the employees were in plants which observed from six to ten statutory holidays, and most were paid for six to eight of these days when not worked. Written collective agreements covered fifty-six per cent of the workers in this industry.

The Chemical Products Industry kept up with the general high level of industrial production in 1949. Preliminary reports¹ indicate that over 40,000 employees in 1,000 establishments produced \$595 millions worth of chemicals and allied products last year. The industry was concentrated largely in the provinces of Quebec and Ontario, with 37 per cent of the employees in Quebec and 52 per cent in Ontario. The aggregate payroll amounted to almost \$96 millions in 1949.

The annual survey of wages and working conditions in the Chemical Products Industry, October 1949, included some 329 establishments employing 25,083 plant workers. This represented about one-third of the plants and over 60 per cent of the total employees, both plant and office, in the industry. Forty-seven per cent of these plant employees were working in Ontario and about 40 per cent in Quebec (Table I). Less than one-fifth of the plant workers were women.

* Information in this article was prepared from data obtained in the annual survey of wage rates and working conditions for 1949 conducted by the Economics and Research Branch of the Department of Labour. Employers were asked to report on wage rates and certain conditions of work in their establishment during the last pay period preceding October 1, 1949.

Provincial legislation on working conditions may be obtained from the bulletin, *Provincial Labour Standards Concerning Child Labour, Holidays, Hours of Work, Minimum Wages, Weekly Rest-Day and Workmen's Compensation*, an annual publication of the Department of Labour.

¹ See "Chemicals and Allied Products, Preliminary Summary Statistics, 1949", Dominion Bureau of Statistics, Ottawa.

In the set of tables accompanying this article, detailed information on hours and working conditions is shown for each of the two major provinces, Quebec and Ontario, and for four of the main divisions of the industry: Acids, Alkalis and Salts; Medicinal and Pharmaceutical Preparations; Paints and Varnishes; and Soaps, Washing and Cleaning Compounds.

The Normal Work Week.—The distribution of plant workers by normal hours and days worked per week is given in Table IIa. The largest single group of workers, about one-third, was on a 40-hour week and the next largest group, one-quarter of the workers, was on a 48-hour week. A further 30 per cent of the plant employees in the industry were normally working 44 or 45 hours a week.

One-half of the workers in Quebec were on a 48-hour week in 1949, while an almost equal proportion in Ontario were reported on a 40-hour week. There was also considerable variation in the normal weekly hours between each of the four selected industries shown in Table IIa. The 48-hour week was predominant in the Acids, Alkalis and Salts Industry, the 45-hour week in the Paints and Varnishes Industry, and the 40-hour week in the remaining two industries.

More than 60 per cent of the workers in the Chemical Products Industry were on a five-day week in 1949. The majority of these employees were normally working 40 hours a week, and all but two per cent were working from 40 to 45 hours. About 85 per cent of the workers in Ontario and

IN THE CHEMICAL PRODUCTS INDUSTRY . . .

. . . one-third of the plant workers were on a 40-hour week . . .

. . . and over 60 per cent were on a 5-day week in 1949.

Initial vacations with pay, mainly one week after a year of employment, were usually increased after longer periods of service.

Almost all workers observed six to ten statutory holidays . . .

. . . and most were paid for six to eight when not worked.

42 per cent in Quebec were reported working five days a week. Over two-thirds of the workers in each of the selected industries shown, except the Acids, Alkalis and Salts Industry, were on a five-day week.

The distribution of establishments by normal weekly hours of male plant workers, Table IIb, is quite similar to the distribution of plant employees. Twenty-seven per cent of the plants were operating 40 hours a week, 24 per cent were operating 44 hours and 22 per cent, 48 hours. The five-day week was reported by 62 per cent of the establishments.

Overtime Payment.—Time and one-half was the common overtime rate for work after standard daily or weekly hours (Table III). Many establishments did not report an overtime payment policy for work on Sunday, but those which did generally reported a rate of time and one-half. Double time for work on this day was reported by establishments employing 28 per cent of the workers in the industry. In the Paints and Varnishes Industry, more than 60 per cent of the workers were in establishments which paid double time for work on Sunday.

Double time was the usual payment for work on statutory holidays. In a few cases, double time and one-half or triple time was reported paid to employees working on these Dominion, Provincial, Municipal or regularly observed religious holidays.

Vacations with Pay.—An initial vacation of one week with pay, or the equivalent, after a year or less of employment was reported by 265 establishments employing about 88 per cent of the workers (Table IV). The remainder of the workers were employed in establishments which gave an initial vacation of two weeks with pay, or an equivalent, generally after a year of service.

More than 80 per cent of the workers in the Chemical Products Industry were in establishments which increased the period of the annual paid vacation as the worker's term of employment continued. Just over one-half of these workers have their vacation periods increased to a maximum of two weeks, generally after two, three or five years, and all but a few of the remainder have theirs increased to three weeks, usually after 15 or 25 years. In the Paints and Varnishes and the Soaps, Washing and Cleaning Compounds Industries the majority of workers were employed in establishments giving a maximum vacation of three weeks with pay. Most of the plants which gave this maximum vacation of three weeks also reported giving an intermediate vacation period of two weeks.

Statutory Holidays.—All but five per cent of the workers were in establishments which observed from six to ten statutory holidays in 1949. Almost one-half of the employees were in plants which observed eight holidays (Table V). In Ontario, 90 per cent of the workers observed from six to eight statutory holidays, most of whom observed eight; and in Quebec, 85 per cent observed from seven to ten holidays, with the largest group observing seven.

The number of holidays observed, in this article, is the number of days when the establishment is not operating by reason of Dominion, Provincial or Municipal holidays, or religious holidays regularly observed by the closing of the establishment.

Payment for some or all of the statutory holidays when not worked is made to most of the workers. More than 80 per cent of the employees were paid for six to eight of the statutory holidays observed, and a further seven per cent were paid for two days. In Ontario, 54 per cent of the workers were paid for eight statutory holi-

TABLE I.—DISTRIBUTION OF ESTABLISHMENTS AND PLANT WORKERS IN THE CHEMICAL PRODUCTS INDUSTRY, OCTOBER 1949

	ALL CHEMICAL INDUS- TRIES	Selected Industry Groups				Main Provinces	
		Acids, Alkalis and Salts	Medicinal and Pharma- ceutical Prepara- tions	Paints and Varnishes	Soaps, Washing and Cleaning Com- pounds	Quebec	Ontario

Total.....	25,083	2,919	3,429	2,930	3,094	10,293	12,202

days. Two-thirds of the employees engaged in the manufacture of Soaps, Washing and Cleaning Compounds were also paid for eight holidays when not worked.

Collective Agreements.—All of the establishments in this survey of the Chemical Products Industry reported having written collective agreements with a union or other employee organization.

The terms of these contracts covered 56 per cent of the workers in the industry. The largest groups of workers were represented by the International Chemical Workers' Union (AFL-TLC) and the United Mine Workers of America (CCL). The Canadian and Catholic Confederation of Labour and the International Union of Mine, Mill and Smelter Workers also represented a large number of workers.

An analysis of the current employment situation prepared by the Economics and Research Branch, Department of Labour, on the basis of returns from the National Employment Service, reports from the Dominion Bureau of Statistics, and other official information.

EMPLOYMENT CONDITIONS DURING OCTOBER, 1950

Seasonal shifts of workers between primary industries combined with marked expansion of hirings in manufacturing resulted in an unusually active labour market during October. Harvesting had been completed for the most part and construction work was being speeded in order to finish outside jobs before cold weather began. Many of the workers thus engaged would then transfer to woods employment, where hiring was at record heights. In manufacturing, defence contracts and continuing high consumer demand were sustaining activity at almost unprecedented levels. Base metal mining has also expanded in response to defence needs.

The employment situation during October was unusually favourable for many of those seeking work. On the other hand, from the employers' viewpoint, numerous labour shortages, especially in regard to skilled workers, were becoming apparent. Although the end of harvesting in most sections of the country and the tapering off of construction work brought hundreds of men to National Employment Service offices to register for other jobs, many of these were not suitable for the skilled work necessary in heavy manufacturing plants which required machinists, welders, and others with experience in the metal trades. A shortage of experienced miners was also apparent in base metal mining. Many of these unskilled seasonal workers, however,

were readily placed in logging jobs, where current demand exceeded the supply of workers, especially in Quebec and northern Ontario.

Nevertheless, the usual seasonal increase in jobless workers did occur. Total live applications at employment offices, for instance, increased from 133,000 to 142,000 during the month. Although such a rise was inevitable with the large labour turnover at this time, it was much less extensive and took place at a much slower rate than last year. Also in contrast to last year were the greater number of job opportunities this fall; unfilled vacancies at NES offices were 23,000 greater at the end of October, 1950, than at the same date in 1949.

LABOUR FORCE, EMPLOYMENT AND UNEMPLOYMENT

▲ Newfoundland totals included for the first time at June 29, 1949.

* Includes June 1949 figures for Manitoba. No labour force survey in Manitoba in June 1950 due to the flooding of the Red River.

Regional Analysis

In *Newfoundland*, available workers were being absorbed rapidly during October. Applications for employment on hand at NES offices declined by 2,000 to a total of 3,500 by the end of the month, a situation markedly improved over last year when 4,000 more job-seekers were then registered. The heavy demand for woodworkers was perhaps the strongest factor contributing to this active labour market. By the end of the month, demand for pulp cutters still exceeded the supply in the Corner Brook area; in the Grand Falls area, although logging employment was beginning to level off slightly, the Anglo-Newfoundland Development Company was employing 2,000 more workers than at the same time last year. Employment at pulp and newsprint mills was continuing at high levels, as in construction, mining, fishing and transportation. Trade was also very active.

In the *Maritimes*, the number of applications for jobs on file at NES offices totalled the same at the month's end as at the beginning, namely 16,500. Such stability was largely the result of the slackening in agriculture, shipbuilding and fish processing being offset by extensive hiring for woods work. Although a steady demand for bush workers was maintained throughout most forest areas during October, shortages of manpower were not serious. The seasonal slackening of some types of construction and of farming was expected to result in an adequate supply of workers for logging. Activity in the construction industry as a whole showed little signs of abating, although hampered in some areas by material shortages. There were some seasonal lay-offs from fish processing plants. Coal mining employment throughout the region remained steadily high. Primary steel manufacturing was operating at a high level, but there were some temporary lay-offs from steel-using plants, and shipyards due to slow deliveries of materials for new contracts or lapses between contracts. Pulp and newsprint mills continued capacity operations, in some cases making the usual seasonal lay-offs but in others hiring additional help.

In the *Quebec* region, the 1,400 increase in job applications on file with the NES during October brought the month-end total to 44,100. This was 11 per cent below the comparable 1949 figure, although there had been a substantial increase in female job-seekers. As in the Maritimes, the strongest demand for workers came from logging companies. The usual influx of farmers into the woods at this time of

year was not nearly large enough to offset the shortages of woodworkers in several districts. As a result, some companies were falling behind in their cutting schedules.

Throughout the region, manufacturing industries generally were steadily active or were expanding output and employment. Seasonal reductions of employment in some industries were lighter than usual; there were a few temporary lay-offs due to delayed shipments of steel. Footwear and textile firms were resuming normal operation after some short-time; chemical manufacturing plants were hiring for stepped-up production to fill export orders. Mining activity and employment continued at high levels, with a steady demand for mining skills exceeding the supply in some areas.

Highlights of the employment situation in the *Ontario* region during October were the strengthening of production and employment in most manufacturing industries, continued record activity in all phases of construction and further increases in the demand for pulp cutters. As a result of these factors, the seasonal increase in registrations at NES offices in the region began several weeks later this year than last, and the rate of increase was considerably slower. By the end of October, applications on file totalled 37,300.

Growing shortages of skilled workers for the heavy manufacturing industries and for aircraft production were becoming apparent during the month as these industries responded to the stimulus of increased defence preparations. While these shortages had not appreciably influenced hirings of female workers by the end of October, some older men who had been unable to find steady work in their trades were being re-hired by former employers. Pulp and newsprint mills throughout the region were fully active during October, postponing seasonal lay-offs in some cases; improvement was apparent in conditions in textiles, rubber and leather manufacturing; the chemical industry was expanding to handle defence orders. The electrical apparatus industry continued to establish new peaks of activity and employment. Only in the automobile industry were there temporary lay-offs while re-tooling for new models was under way.

With most of the harvesting completed, employment in the *Prairie* region contracted slightly during the month. Active registrations at NES offices tallied at the beginning and end of the month showed an increase of 2,800; these totalled 19,300 at October 26. Hiring of farm workers was sporadic and the number of men reporting for woods work in the Lakehead area was greater than anticipated. Logging camps

were rapidly approaching full staffs by the end of October. It was fully expected that the large pulp-cutting program, resulting from the sustained demand for newsprint, would be completed without serious difficulty. In other areas, the seasonal increase in hirings at packing plants and flour mills was less than usual and lay-offs were occurring in plants producing construction materials, garments and beverages. Most highway construction was coming to an end, but the high level of building construction continued, with labour scarcities increased by the rush to close buildings against the weather.

Registrations for jobs on hand at NES offices in the *Pacific* region began their yearly rise during October. The total of 21,000 at October 26 was over 3,000 greater than that at the end of the previous month, but 12 per cent lower than on the same date a year ago. Much of the recent rise could be attributed to the seasonal decline in agriculture, fishing and some phases of construction, as well as the usual influx of transient workers from the Prairie Provinces at this time. This was particularly noticeable in the larger centres of Vancouver and Victoria where the usual decrease in job opportunities was augmented by the closing of shingle mills and a work stoppage in Vancouver shipyards. Victoria shipyards were working on new naval contracts.

The continuing full operation of logging camps and sawmills, however, and a considerable expansion of base metal mining have brightened the employment picture considerably. Increased orders from the United Kingdom were chiefly responsible for the double-shift operation of sawmills in the Vancouver Island, Prince Rupert and Prince George regions.

Industrial Analysis

The Eastern Canada *logging* industry, enjoying its busiest season since the peak year of 1947-48, continued to add thousands of workers to its labour force during October. Cutting operations were expanding rapidly and approaching the most active period, although many operators were waiting until after the freeze-up to begin work. In British Columbia, on the other hand, the seasonal peak had been reached by the end of October and employment was levelling off.

As farming and construction work tapered off, more men became available for woods work, thus easing the severe labour shortages which were created in September when the logging companies began seeking their men for the winter's work. Higher

wage rates and unemployment insurance coverage have made the industry more attractive this year and a good class of worker was being obtained. There was a heavy influx of farm workers from the Prairie Provinces to the Lakehead and British Columbia and a movement of loggers from Quebec to Northern Ontario during the month.

As much of the work is done in remote areas or by individuals, it is difficult to estimate how many loggers were at work during October. Among the member companies of the Canadian Pulp and Paper Association, the number employed increased from 45,000 at the beginning of the month to more than 57,000 at the month's end. This was about 40 per cent over the employment level of the 1949-50 season. These data are shown in the accompanying chart, which indicates the increase in the number of jobs provided by the industry this year as well as the longer duration of employment.

The major employment period in *agriculture* was drawing to a close in October and workers were beginning to move out of the industry. Harvesting of seasonal crops was being finished and additional labour requirements were low. Applicants for work in the industry were correspondingly few in number.

In general farming areas, particularly in the East, farmers were at work on their fall ploughing or harvesting root crops. In

Eastern Canada including Manitoba as reported by Canadian Pulp and Paper Association.

fruit-growing areas, in British Columbia, the Maritimes and southern Ontario, picking, grading and shipping or storing of the crop were being carried out. Rain and snow in October delayed an already late harvest in parts of the Prairie Provinces. Farm labour moved from farm to farm as harvest work was completed, and labour shortages were kept at a minimum. The demand for workers was not strong, although experienced tractor operators were readily employed.

Only a few farmers were seeking year-round help. Not many applicants for this work were available, particularly since higher wages in other industries were attracting workers. Many farmers, as well, were insisting on experienced men only. There was less interest this year in immigrant labour, formerly an important source of supply. Exceptions to this were some sections of British Columbia and the Lake-head area where farm labour was quite scarce.

Employment in *mining* continued to increase in the fall of 1950, with expansion in the metallic and non-metallic mining industries and a gradually declining labour force in coal mining. The most recent data showed reported employment in the industry as over the 90,000 mark, an increase of about 5 per cent over 1949 levels.

The international situation has provided added impetus to the base metals group. The demand for nickel has been so great that producers have been rationing customers, although output was at a record peacetime level. Zinc also was in extremely short supply, due in large part to the United States stock-piling program. Gold mines were in a more uncertain position. Increasing seasonal demand has helped keep current employment steady in coal mines.

More skilled labour could have been used by the industry were qualified men available; these in turn would provide added employment for helpers and beginners. Many mines have been operating training schools for newly hired men. There was some demand for more immigrant workers to be brought into the country; although this type of labour still forms an important part of the industry's labour force, many left the mines when their contract period was up. With labour costs mounting the trend towards increased use of machines, such as mechanical muckers, has been accelerated, thus reducing labour demand.

The labour market in the *manufacturing* industries continued strong during October as the usual seasonal activity was augmented by the stimulus to the economy

resulting from increased defence expenditures. Such industries as meat packing and fruit and vegetable processing were at their peak period. Most consumer goods industries, particularly those producing electrical apparatus and textiles were adding to their staffs. In some cases, shortages of metal-workers had developed. Capital investment was heavy during the month and resulted in improved employment conditions among producers' goods industries. The demand for labour from these groups offset seasonal employment declines in other industries, including sawmills, beverages and petroleum products.

Lay-offs, other than those for seasonal reasons, were light during the month. In British Columbia, several shingle mills were forced to reduce operations because of a drop in sales in the United States market and several hundred workers were laid off. Steel shortages limited production in some plants, also resulting in temporary lay-offs. About 6,000 men were off work in automobile plants, mostly for less than three weeks, because of re-tooling for new models and shortages of parts.

The heavy amount of work on hand in the *construction* industry this fall has resulted in a delay in seasonal lay-offs. Towards the end of the same season, there was in fact a pre-winter flurry of work as contractors rushed to complete outside work so inside jobs could be carried on during the winter months. There was no unemployment problem of any proportion in the industry by the end of October, therefore, although some lay-offs had occurred as projects were completed.

MILLIONS OF DOLLARS

Shortages of labour and materials, which have delayed production in recent years, again became more prominent as the backlog of work increased. Qualified men in all trades were in demand and generally easily found other jobs if laid off. Unskilled labour was in better supply, although demand from the logging industry for this type of labour was heavy. Among the scarce materials, cement and steel were particularly short in all regions and caused some temporary unemployment.

Employment Service Activities

The operational statistics of the National Employment Service revealed October as a month of exceptionally high placement activity. Since this was a time of transition between summer and winter employment for many workers, applications for jobs were numerous and, in spite of the high placement rate, not all these immediately secured jobs. Job applications on the active file increased from 133,000 to 142,000 during the month. The employment situation for those seeking work was decidedly better than at the same time last year, however, with an increase of 23,000 in unfilled vacancies over the year.

Logging industries particularly were using the facilities of the NES to obtain suit-

able help. Despite thousands of hirings during the month, 18,300 vacancies in this industry were still available at the end of October, according to employment office records. This was 1,200 more than a month earlier and 17,000 higher than a year ago.

Considerable hiring was also taking place in the metalworking and electrical trades during October, as both skilled and semi-skilled workers were directed to jobs. Almost twice as many opportunities were available at NES offices in these trades than a year ago but applications from job-seekers had fallen off by over 40 per cent.

Demand for both engineers and draughtsmen rose during the month, but requirements had to be met from a much depleted labour supply. Employers were seeking qualified men with experience, but either age, inexperience or lack of education has hindered employment officials from effectively matching available workers to the vacancies on file.

Job orders for miners also rose during October with applications on hand decreasing correspondingly. Considerable activity was evident in the service industries as workers released from tourist resorts looked for alternative employment. Waitress jobs in second-class restaurants and domestic openings were still difficult to fill, however.

PRICES AND THE COST OF LIVING*

Cost-of-Living Index

The Dominion Bureau of Statistics cost-of-living index remained unchanged at 170.7 between October 2 and November 1. Declines in the food and fuel and light indexes were counterbalanced by increases in the remaining four groups. The food index moved down 1.5 points to 218.6 as sharp seasonal declines were registered for meats and small recessions for fresh vegetables. These outweighed slight advances for eggs, butter, fish, coffee, oranges and canned goods. A decline of 0.4 to 140.6 for the fuel and lighting index was due to lower prices for imported United States coal and coke, which followed the removal of controls from the Canadian dollar. Home furnishings and services rose 2.1 points to 174.8 due to advances for almost all items included in this group. Higher prices for most clothing items was reflected in an increase of 1.0 points to 184.5 in the index for this group, while the index for miscellaneous items rose fractionally from 133.3 to 133.4. For the latter group, firmer prices for barbers' fees, toilet soap, hospital charges and street car fares outweighed a decline in the average price of gasoline. Reflecting the results of the November quarterly survey, the rent index rose 0.9 point to 136.4.

Between August, 1939 and November, 1950, the cost-of-living index advanced 69.3 per cent.

Cost of Living in Eight Cities

Regional city cost-of-living indexes registered mixed changes between September 1 and October 2. Indexes for six centres moved higher while two recorded declines. Wide changes in foods were principally responsible. Halifax and Edmonton food prices declined sharply due to seasonal drops in meats and fresh vegetables, and were responsible for declines in the composite indexes for these two centres. At other centres, declines for these food items were overbalanced by increases for dairy products and eggs. Group indexes for clothing and home furnishings and services moved up at most centres. Fuel costs and miscellaneous items were generally unchanged to fractionally higher. Rents, which were not surveyed in October, remained unchanged.

* See Tables F-1 to F-6.

Composite city index changes between September 1 and October 2 were as follows: Saint John +1.8 to 167.8; Winnipeg +1.1 to 165.4; Toronto +0.7 to 166.8; Montreal +0.4 to 175.1; Saskatoon +0.4 to 168.2; Vancouver +0.1 to 170.9; Halifax -1.0 to 159.3, and Edmonton -0.5 to 164.5. In the same interval, the Dominion index rose 0.8 to 169.3.

Wholesale Prices, September, 1950

The general index of wholesale prices advanced 5.1 points between August and September, establishing a new peak level of 173.6. All eight groups contributed to this increase, with Textile Products and Non-ferrous Metals recording the sharpest advances. Textile Products rose 17.3 points between August and September to 190.0 and Non-ferrous Metals moved up 13.7 points in the same period to 176.5. Chemical Products followed with an increase of 6.3 points to 128.6. Wood Products rose 6.1 points to 213.6. Vegetable Products and Animal Products recorded equal increases of 2.6 points, to reach September levels of 152.7 and 182.5 respectively. Non-metallic Minerals rose 2.2 points to 143.0 and Iron Products 2.0 points to 184.5.

Among important commodity price increases between August and September were the following: tallow 57.6 per cent, refined glycerine 41.0 per cent, antimony 40.0 per cent, botany serge 30.4 per cent, beef hides 28.6 per cent, worsted suiting 26.4 per cent, litharge 26.1 per cent, turpentine 25.8 per cent, lead pipe 25.6 per cent, red lead 25.0 per cent, fresh whitefish 25.0 per cent, brewers' malt 23.0 per cent. Price declines in the same period included the following: onions, Toronto 23.8 per cent, potatoes (average) 16.9 per cent, hay No. 2 Timothy, Montreal 13.3 per cent, beef carcass, Vancouver 13.2 per cent, lamb carcass, Toronto 11.6 per cent, ham, Winnipeg 9.8 per cent, rolled oats 9.1 per cent, canned raspberries 8.3 per cent.

The index of Canadian farm products at wholesale moved up 0.8 point between August and September. The Animal Products index rose 3.9 points, reflecting higher prices for hides and skins, raw wool, eggs, fresh milk and livestock. Field Products declined 1.1 points when prices for onions, hay, potatoes and grains moved lower.

COST OF LIVING AND WHOLESALE PRICES IN CANADA FROM JANUARY 1914 TO DATE

(Base 1935=100)

STRIKES AND LOCKOUTS*

Canada, October 1950

Strike activity was little changed from the previous month. There was an increase of two in the number of new stoppages reported but fewer workers were involved and the time loss was down slightly. In October, 1949, with about the same number of strikes and lockouts, the time lost was more than double that for October, 1950. A strike of shipyard workers at Vancouver, B.C., caused the greatest amount of time loss during the month. This is the first strike recorded in the shipbuilding industry since November, 1947.

Preliminary figures for October, 1950, show 20 strikes and lockouts in existence, involving 12,557 workers, with a time loss of 29,973 man-working days, as compared with 20 strikes and lockouts in September, 1950, with 15,902 workers involved and a loss of 38,376 days. In October, 1949, there were 22 strikes and lockouts, with 16,433 workers involved, and a loss of 69,992 days.

For the first ten months of this year preliminary figures show 123 strikes and lockouts, involving 174,180 workers, with a loss of 1,331,671 man-working days. In the same period in 1949 there were 119 strikes and lockouts, with 49,289 workers involved and a loss of 903,938 days.

Based on the number of non-agricultural wage and salary workers in Canada, the

* See Tables G-1 and G-2.

time lost in October, 1950, was 0.04 per cent of the estimated working time: 0.05 per cent in September, 1950; 0.08 per cent in October, 1949; 0.16 per cent for the first ten months of 1950; and 0.11 per cent for the first ten months of 1949.

Of the 20 strikes and lockouts in existence during the month, one was settled in favour of the workers, three in favour of the employers, three were compromise settlements, and four were indefinite in result, work being resumed pending final settlement. At the end of the month nine work stoppages were reported as un-terminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes and lockouts about which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Strikes of this nature which are still in progress are: compositors, etc., at Winnipeg, Man., which commenced on November 8, 1945, and at Ottawa and Hamilton, Ont., and Edmonton, Alta., on May 30, 1946; textile products factory workers at St. Lambert, P.Q., August 29, 1949; printers at St. John's, Newfoundland, May 22, 1950; department store clerks at New Westminster, B.C., August 27, 1949; and electrical apparatus factory workers at Vancouver, B.C., May 11, 1950.

Great Britain and Other Countries

The latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month. Statistics given in the annual review issued as a supplement to the *LABOUR GAZETTE* for April, 1950, and in this article are taken, as far as possible, from the government publications of the countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in August, 1950, was 90 and nine were still in progress from the previous month, making a total of 99 during the month.

In all stoppages of work in progress in the period there were 18,000 workers involved and a time loss of 52,000 working days was caused.

Of the 90 disputes leading to stoppages of work which began in August, four, directly involving 300 workers, arose out of demands for advances in wages, and 40, directly involving 4,800 workers, on other wage questions; seven, directly involving 1,800 workers, on questions respecting the employment of particular classes or persons; 34, directly involving 6,000 workers on other questions respecting working arrangements; four, directly involving 3,300 workers on questions of trade union principle; and one directly involving 100 workers, was in support of workers involved in another dispute.

United States

Preliminary figures for September, 1950, show 525 strikes and lockouts beginning in the month, in which 275,000 workers were involved. The time loss for all strikes and

lockouts in progress during the month was 3,500,000 man-days. Corresponding figures for August, 1950, are 560 strikes and lockouts, involving 350,000 workers with a time loss of 2,900,000 days.

FATAL INDUSTRIAL ACCIDENTS IN CANADA*

Third Quarter of 1950

There were 288¹ industrial fatalities in Canada in the third quarter of 1950 according to the latest reports received by the Department of Labour. This number of fatalities is one less than the 289 recorded for the previous quarter (including 27 on a supplementary list).

The industrial fatalities recorded are those fatal accidents which involved persons gainfully employed and which occurred during the course of, or which arose out of their employment. Deaths which resulted from industrial diseases as reported by the provincial Workmen's Compensation Board are included.

Statistics on industrial fatalities are compiled from reports received from the various provincial Compensation Boards, the Board of Transport Commissioners, and certain other official sources. Newspaper reports are used to supplement these data. For those industries which are not covered by workmen's compensation legislation, newspaper reports are the Department's only source of information. It is possible therefore that coverage in such industries as agriculture, fishing and trapping and certain of the service groups is not as complete as in those industries which are covered by compensation legislation.

During the quarter under review there were three accidents which resulted in three or more industrial fatalities in each case. On July 9, three electrical workers engaged on the conversion of a hydro-electricity transmission system from 25 to 60 cycles at London, Ontario, received fatal burns when a transformer exploded. An aircraft crash at Timagami Ontario, resulted in the death of five employees of the Ontario Department of Lands and Forests on August 30. Five fishermen from Woods Harbour, Nova Scotia, are believed

to have been drowned when their boat was capsized off the south coast of Nova Scotia during a hurricane; their overturned boat was found on September 20.

Grouped by industries, the largest number of fatalities, 53, was recorded in construction; during the previous quarter there were 48 fatalities in this industrial group. There were 47 fatalities in manufacturing during the third quarter; 13 of these were in the saw and planing mill products group and 10 were in the iron and steel products group. During the second quarter of 1950 there were 60 fatalities in manufacturing, 25 of which occurred in the iron and steel products group.

During the three months under review there were 46 fatal accidents in the transportation group as compared with 40 in the previous quarter. Accidents in the steam railway sub-group numbered 21 as compared with 16 in the preceding period. Fatal accidents involving watercraft numbered 10 as compared with 12 in the previous quarter.

There were 39 fatal accidents in the service groups during the third quarter, 35 of which were in the public administration sub-group. In the previous quarter 24 fatalities in the service group had been recorded.

Fatal accidents in logging numbered 25, a decline of 9 from the number recorded in the second quarter.

Twenty persons died as the result of accidents in electricity, gas and water production and supply during the quarter as compared with 17 in the previous three months.

The number of accidents in mining which were reported as occurring during the quarter numbered 19, or 25 less than the 44 which were recorded in the second quarter of 1950.

As mentioned above information in regard to accidents in agriculture is obtainable only from newspaper reports. Only 15 fatal accidents were reported in the third quarter of 1950 as compared to 50 in the same quarter of 1949 and 22 in the second quarter of 1950.

* See Tables H-1 and H-2.

¹ The number of industrial fatalities that occurred during the third quarter of 1950 is probably greater than the figure now quoted. Supplementary lists compiled from reports received in subsequent quarters generally revise upwards the figures for previous periods.

During the quarter under review there were 14 fatal accidents in trade, the same number as that recorded in the previous quarter. There were 10 fatalities in fishing and trapping during the quarter.

An analysis of the causes of the fatal industrial accidents which occurred during the quarter shows that 96 or 33.3 per cent were caused by moving trains, watercraft or other vehicles. Falls of persons resulted in 51 or 19.8 per cent of the period's fatalities, while the classification "dangerous substances", in which is included electric current, accounted for 42 or 14.6 per cent

of the industrial fatalities recorded. Falling objects were the cause of 24 fatalities while industrial diseases, strains and infections were responsible for 21 of 32 deaths reported under the heading of "Other Causes".

The largest number of industrial fatalities was recorded in Ontario where there were 112. In British Columbia there were 58 and in Quebec, 52.

During the quarter under review there were 104 fatalities in July, 91 in August and 93 in September.

SELECTED LIST OF PUBLICATIONS RECEIVED IN LIBRARY OF DEPARTMENT OF LABOUR, OTTAWA*

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed, free of charge, by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE.

TABLE I.—STATISTICS REFLECTING INDUSTRIAL CONDITIONS IN CANADA

Items	1950		1949	1948	1944	1939
	Oct.	Sept.	Sept.	Sept.	Sept.	Sept.
Labour Force—						
Civilian labour force ⁽¹⁾000		5,324	5,253	5,109	†	†
Persons with jobs ⁽¹⁾000		5,221	5,155	5,042	†	†
Male ⁽¹⁾000		4,107	4,012	3,932	†	†
Female ⁽¹⁾000		1,114	1,143	1,110	†	†
Paid workers ⁽¹⁾000		3,639	3,575	3,439	†	†
Persons without jobs and seeking work ⁽¹⁾000		103	98	67	†	†
Index of employment, 8 leading industries ⁽²⁾		206·0	202·1	201·8	185·5	119·6
Unemployment in trade unions ⁽²⁾%			2·2	1·0	0·3	9·1
Immigration.....No.		5,030	4,174	11,871	976	1,461
Adult males.....No.		2,262	1,706	4,383	262	451
Earnings and Hours—						
Total labour income.....\$000,000			662	663	†	†
Per capita weekly earnings, 8 leading inds.....\$		44·26	43·27	40·86	31·69	†
Average hourly earnings, manufacturing.....c		104·4	98·4	93·4	†	†
Average hours worked per week, manufacturing.....		41·9	42·4	41·7	†	†
Real weekly earnings, manufacturing ⁽⁴⁾		105·3	105·2	100·2	†	†
National Employment Service—						
Live Applications for employment (1st of mo.) ⁽⁶⁾	133·1	151·6	137·4	88·3	59·6	†
Unfilled Vacancies (1st of month) ⁽⁶⁾	64·8	46·2	42·6	63·7	188·1	†
Placements, weekly average.....		19·9	16·3	16·7	†	†
Unemployment Insurance—						
Ordinary live claims.....000	79·3	98·9	80·8	44·3	5·4	†
Balance in fund.....\$000,000		614·5	568·8	490·3	228·9	†
Price Indexes—						
Wholesale ⁽²⁾		173·6	155·4	158·4	102·3	78·4
Cost of living index ⁽²⁾	170·7	169·8	162·3	158·9	118·8	100·8
Residential building materials ⁽²⁾			226·2	221·6	146·6 ⁽⁷⁾	102·3 ⁽⁷⁾
Production—						
Industrial production index ⁽⁵⁾		200·4	188·5	184·1	195·4	111·8
Mining production index ⁽⁵⁾			144·8	127·9	102·1	120·2
Manufacturing index ⁽⁵⁾		211·4	197·2	195·3	216·2	110·1
Electric power.....000,000 k.w.h.		4,113	3,753	3,598	3,235	2,381
Construction—						
Contracts awarded.....\$000,000			103·3	79·7	25·3	19·4
Dwelling units, started.....000			10·0	10·7	†	†
Completed.....000			7·6	6·7	†	†
Under construction.....000			67·6	58·7	†	†
Pig iron.....000 tons		199·4	168·4	182·5	145·4	66·0
Steel ingots and castings.....000 tons		274·9	240·7	257·9	242·7	124·4
Inspected slaughtering, cattle.....000			145·2	162·8	125·2	84·6
Hogs.....000			274·7	233·8	440·6	269·6
Flour production.....000,000 bbls.			1·86	2·19	1·97	1·93
Newsprint.....000 tons			415·2	376·1	244·2	253·2
Cement producers' shipments.....000,000 bbls.		1·6	1·6	1·5	0·9 ⁽⁸⁾	0·9 ⁽⁸⁾
Automobiles and trucks.....000		38·3	30·9	23·8	12·5	3·9
Gold.....000 fine oz.		364·9	364·7	295·0	237·1	422·4
Copper.....000 tons			22·2	19·6	21·6	25·4
Lead.....000 tons			12·8	15·3	9·5	16·2
Nickel.....000 tons			9·6	9·9	11·4	10·2
Zinc.....000 tons			22·7	19·8	23·5	14·9
Coal.....000 tons	1,753	1,495	1,747	1,578	1,396	1,385
Crude petroleum.....000 bbls			2,170	1,101	852	720
Distribution—						
Wholesale sales index, unadjusted ⁽⁵⁾		352·1	332·6	327·0	205·4	159·1
Retail sales.....\$000,000		746·3	684·7	638·5	†	†
Imports, excluding gold.....\$000,000		279·7	221·6	221·7	159·7	73·6
Exports, excluding gold.....\$000,000		279·1	228·4	283·0	264·6	81·5
Railways—						
Revenue freight, ton miles.....000,000			5,141	5,375	5,563	4,800
Car loadings, revenue freight.....000	85·0	363·0	363·0	378·0	317·0	295·0
Banking and Finance—						
Common stocks, index ⁽⁵⁾	143·9	141·5	109·6	113·4	85·0	91·2
Preferred stocks, index ⁽⁵⁾			141·8	144·8	126·3	100·5
Bond yields, Dominion index ⁽⁵⁾	92·0	89·8	91·8	96·1	97·0	117·0
Cheques cashed, individual accounts.....\$000,000		8,747	7,656	6,710	4,819	2,832
Bank loans, current public.....\$000,000			2,184	1,931	939	891
Money supply.....\$000,000			4,369	4,153	3,153 ⁽⁷⁾	1,370 ⁽⁷⁾
Circulating media in hands of public.....\$000,000			1,211	1,180	967	281 ⁽⁷⁾
Deposits.....\$000,000			3,158	2,973	2,163 ⁽⁷⁾	1,089 ⁽⁷⁾

NOTE.—Latest figures subject to revision. Many of the statistical data in this table are included in the Canadian Statistical Review issued by the Dominion Bureau of Statistics. † Comparable statistics are not available.
 (1) Labour Force Survey figures given are as at August 19, 1950, August 20, 1949, September 4, 1948. (2) Average 1926=100. (3) Figures are as at end of quarter ending September 1949, 1948, 1944, 1939 respectively. (4) Real earnings computed by dividing index of average weekly earnings of wage-earners in manufacturing by the cost-of-living index; base; Average for 1946=100. (5) Average 1935-39=100. (6) Newfoundland is included after April 1, 1949. (7) Year end figures. (8) Figures for 1939-44 are production data rather than shipments.

¹ Includes Welland, Thorold and Merritt. ² This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries, as listed in Table C-4, with the exception of electric light and power. ³ Mainly hotels and restaurants and laundry and dry-cleaning plants. ⁴ Employment and earnings in the last pay period in August were affected by the railway dispute. The amount of change resulting from this occurrence is impossible to assess.

TABLE C-6.—HOURS AND EARNINGS IN MANUFACTURING(Hourly-Rated Wage-Earners) SOURCE: *Average Hours Worked and Average Hourly Earnings, D.B.S.*

Tables C-6 to C-9 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-5. They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1 to C-4 relate to salaried employees as well as to all wage-earners of the co-operating firms.

¹ Industries classed in the durable manufactured goods industries.

² Based upon June 1, 1941 as 100 p.c., the index numbers of average hourly earnings of wage-earners employed by eight establishments manufacturing heavy electrical apparatus are as follows: 1950, July 1, 249.5; August 1, 248.0; and September 1, 251.2; 1949, September 1, 228-1.

³ Chiefly street and electric railways.

⁴ For information respecting the sex distribution of persons in recorded employment, see Table C-5.

⁵ The situation in the last pay periods in August was affected by the railway dispute. The amount of change resulting from this occurrence is impossible to assess.

NOTE: Average Real Weekly Earnings were computed by dividing the index of the cost of living into an index of the average weekly earnings, both indexes have been calculated on a similar base (Average 1946=100).

* Figures adjusted for holidays. The actual figures are: January 1, 1948, 38.3 hours, \$33.17; April 1, 1948, 41.6 hours, \$37.02; January 1, 1949, 40.6 hours, \$39.46; May 1, 1949, 42.5 hours, \$41.91; January 1, 1950, 39.9 hours, \$40.34; May 1, 1950, 42.6 hours, \$43.67.

(1) The situation in the last pay period in August was affected by the railway dispute. The amount of change resulting from this occurrence is impossible to assess.

(2) Latest figures subject to revision.

Above food prices are simple averages of prices reported. They are not perfectly comparable in all cases with price averages for earlier years. Changes in grading, trade practices etc., occur from time to time. (a) Rental ranges shown above are indicative of prevailing rents being paid. They should not be used as a measure of change in rents paid for the same quality of living accommodation over long periods of time. (b) Averages include prices for cuts with bone in. (c) Mixed—hock-off, and hock-on. (d) Mixed—Carton and loose. (e) Loose. (f) Estimate. (g) Fancy. (h) Mixed—California and Australia. (i) California. (j) Pure. (k) Pure. (l) Pure. (m) 360's. (n) Mixed—package and bulk. (o) Package. (p) Package. (q) Mixed—Choice and fancy. (r) Tin. (s) Mixed—with pectin and pure.

TABLE F-2.—INDEX NUMBERS OF THE COST OF LIVING FOR EIGHT CITIES OF CANADA AT THE BEGINNING OF OCTOBER 1950

(Base: August 1939=100)

	Total			Food	Rent	Fuel	Clothing	Home Furnishings and Services	Miscellaneous
	Oct. 1, 1949	Sept. 1, 1950	Oct. 2, 1950						
Halifax.....	155.0	160.3	159.3	212.7	117.5	132.6	194.0	158.3	123.5
Saint John.....	159.0	166.0	167.8	214.1	122.4	137.7	200.8	166.2	132.6
Montreal.....	165.4	174.7	175.1	230.6	135.4	137.4	175.8	177.4	131.1
Toronto.....	157.9	166.1	166.8	211.5	138.2	161.0	182.5	168.8	131.7
Winnipeg.....	156.2	164.3	165.4	221.1	130.0	123.2	177.3	174.0	127.6
Saskatoon.....	162.4	167.8	168.2	225.2	126.1	140.8	188.4	174.9	123.7
Edmonton.....	156.8	165.0	164.5	225.3	120.8	114.6	187.2	164.5	129.9
Vancouver.....	162.8	170.8	170.9	224.2	124.8	142.6	192.3	166.3	136.9

N.B.—Indexes above measure percentage changes in living costs for each city, but should not be used to compare actual levels of living costs as between cities.

Cumulative totals.....	119		49,289		903,938	0.11

* Preliminary figures.

‡ Strikes un-terminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten or more days time loss is caused but a separate record of such strikes is maintained in the department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, OCTOBER, 1950 (1)

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars(2)
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to October, 1950				
MANUFACTURING—				
<i>Textiles, Clothing, etc.—</i>				
Cotton and rayon underwear factory workers, Sherbrooke, P.Q.	1	104	1,750	Commenced May 11; for a new agreement providing for increased wages, following reference to court of referees; partial return of workers; untermiated.
<i>Metal Products—</i>				
Brass products factory workers, Galt, Ont.	1	30	270	Commenced June 15; for a new agreement providing for increased wages, Rand formula for union dues, payment for statutory holidays, extension of vacations with pay, following reference to conciliation board; terminated October 13; return of workers; in favour of employer.
Laundry machinery factory workers, Toronto, Ont.	1	20	200	Commenced June 16; for a new agreement providing for increased wages, extension of vacations with pay, additional union security, etc., following reference to conciliation board; employment conditions no longer affected by the end of October; indefinite.
Aluminum foundry workers, Etobicoke, Ont.	1	200	2,800	Commenced June 29; for a new agreement providing for increased wages and Rand formula for union dues; terminated October 20; conciliation, provincial; compromise.
Wire rope and cable factory workers, Lachine, P.Q.	2	164	3,400	Commenced September 5; for a new agreement providing for increased wages, 42½-hour week with the same take-home pay as for 45 hours, and adjustment of minor grievances, following reference to conciliation board; untermiated.
Metal factory workers, Fort Erie, Ont.	1	87	1,825	Commenced September 27; for a new agreement providing for increased wages, reduced hours, and revision of incentive plan; untermiated.
TRADE—				
Grocery warehousemen and truck drivers, Sault Ste. Marie, Ont.	1	19	105	Commenced September 26; for a union agreement providing for increased wages and reduced hours; terminated October 7; return of workers pending reference to conciliation board; indefinite.
Strikes and Lockouts Commencing during October, 1950				
LOGGING—
