"Common School Law for Common School Teachers" is the title of a legal treatise well-known in the United States to all whom it concerns. It would seem that a similar work, treating of the legal rights, duties and status of English schoolmasters, is much needed.—*London Schoolmaster.*

Cannot be called the best because there is nothing with which to compare it. It is simply invaluable to every teacher.—*Supt. H. R. Sanford, late President State Teachers' Association, and for five years instructor in School Law at Fredonia State Normal School.*

Fully supplies one of the greatest necessities ever experienced by teachers in our rural schools.—*S. D. Wilbur, School Commissioner Second District Broome Co.*

# Studies in Articulation.

BY JAMES H. HOOSE, A. M., PH. D., PRINCIPAL OF THE STATE NORMAL SCHOOL AT CORTLAND, N. Y.

This volume, the fruit of the author's special study for several years, will be found not only a valuable authority, but a practical manual. It takes up each sound of each vowel, diphthong and consonant, and, besides thoroughly analyzing and distinguishing it, gives a multitude of illustrative words, many of them commonly mispronounced. Thus the following words illustrate the long sound of *a*: Ale, fate, Kate, hate, mate, gray, gate, rebate, reign, eight, ratio, neigh, amen, slain, straight, chamber, *squalor*, main, aid, tiara, yea, pain, obey, wraith, apparatus, *patron*, strata, patriotic, aye, Dey, *heinous*, say, *tomato*, bate, whey, data, *caret*, slate, gauge, gaol, jail, day, break, veil, grey, prayer, shaik, *half-penny*, sleigh, ray, strait, daze, prey, graze, rajah, prays, rail, pail.

It was stereotyped at the Riverside Press, Cambridge, and is handsomely bound in cloth. Price, Fifty Cents.

# INTRODUCTION.

---

## **The University of the State of New York.**

This University, which is one mainly of supervision and visitation and not of instruction, seems to have been modeled after those of Oxford and Cambridge, in England, with this difference, that the institutions composing it are located, for public convenience, in various parts of the State, instead of being grouped within a single city. It was established by an act of the Legislature passed in 1784, (just after the close of the Revolutionary War), and was apparently intended to be the chief if not the only educational institution of the State. Up to this time, there had been no incorporated College or Academy in the State, except the "College of the Province of New York," called King's, now Columbia College. The Act of 1784 was designed to accomplish a twofold purpose, namely: to revive King's College, and to provide for some general system of public education.

It created a Board of Regents, who were to be, in

fact, Trustees or rather the corporation of the College, with ample powers of visitation and supervision over all the means of education which might be established in the State. The Board consisted of four elements:—(1.) The Governor of the State and other officials by virtue of their office. (2.) Twenty-four other persons named in the act. (3.) One person to be chosen by the clergy of each of “the respective religious denominations of the State.” (4.) The Fellows, Professors and Tutors of the College then existing (Kings), and of any other colleges that might be erected. The last, however, were members of the Board with limited rights and privileges. It also changed the name of King’s College to Columbia College. The Board thus created proved to be a cumbrous body, and early in 1787 the Regents appointed a committee to consider the defects of the organization and to devise plans for advancing education. This committee presented an elaborate report, in which several important measures were recommended. Among these were a system of Academies, inferior in grade to the Colleges, and of Public Schools, which should provide general education in the English branches. These, the Public Schools, the Academies and Colleges, were to be parts of one common system.

Alexander Hamilton was on the committee of the Regents for drafting this report, and is understood to have drawn the bill which, with slight modifications, became a law, April 13, 1787, under the title of “An Act to institute an University within this State, and for other purposes therein mentioned.”

---

This act reduced the number of Regents to twenty-one, including the Governor and Lieutenant Governor, to whom have since been added the Secretary of State and the Superintendent of Public Instruction.

It provided that Columbia College and such other Colleges as the Regents might incorporate, should have a local corporation, that each should hold and care for its own property, regulate its affairs generally and confer degrees at pleasure. The Regents were authorized to confer degrees above that of Master of Arts.

It also provided that any Academy, when the state of Literature in it should be so far advanced and the funds admit thereof, shall be authorized by the Regents to elect a President, and that the Academy shall thereby become a College, subject to the like rules, regulations, control and visitation of the Regents as other Colleges.

The original functions and duties of the Board have been continued essentially the same in all the revisions of the law to this time.

The officers of the Board are the Chancellor, Vice Chancellor, Secretary and Assistant Secretary.

The system of common schools recommended by the Regents in 1787, can hardly be said to have been established, although several acts were passed from time to time tending in that direction. But on the 19th of June, 1812, an act was passed "establishing common schools and creating the office of 'Superintendent of Common Schools.'" It placed these schools under his jurisdiction and thus created in

fact a distinct educational system, which is now supported by taxes and made virtually free, while the Colleges and Academies have constituted a system dependent mainly on private bounty and the tuition fees of the pupils — although the State has often exercised its bounty towards them by large contributions to their endowments and appliances for the purposes of instruction, and by the creation of a “Literature Fund,” the annual income of which is appropriated towards the salaries of teachers in the Academies. The State has also for many years provided for the instruction of classes of common school teachers in the Academies during one third of the academic year. The annual appropriations for these several purposes, are:

From the Literature and the U. S. Deposit	
Funds, for the payment of Teachers' salaries	\$40,000
From the Literature Fund, for the purchase	
of Books and Apparatus.....	3,000
From the U. S. Deposit Fund, for the in-	
struction of Common School Teachers..	18,000
Total annual appropriation.....	\$61,000

In 1872 and 1873, the Legislature made a further appropriation of \$125,000 each year, by general taxation, which annual sum the Legislature of 1874 failed to continue; but during the recent session (1876) a bill to increase the appropriation for the instruction of common school teachers from \$18,000 to \$40,000 passed both houses of the Legislature near the close of the session. This bill, however, failed

to receive the signature of the Governor within the period prescribed by the Constitution, and thus became void. The grand aggregate of these appropriations for the last fifty years is about two and a half million dollars.

The incorporation of Colleges and Academies was originally left to the Board of Regents exclusively. In the exercise of this authority, the Board incorporated Union College in 1795, Hamilton College in 1812, Geneva, now Hobart College in 1824, and several others since that time. It has also incorporated more than two hundred Academies. In 1833, the Regents, in obedience to an Act of the Legislature directing them to prescribe conditions for the incorporation of Colleges and Academies, included among other requirements an endowment fund actually paid in or satisfactorily provided for, of at least one hundred thousand dollars. Since that time, most of those who have sought incorporation as Colleges have applied directly to the Legislature, and many Colleges have been incorporated by that body.

The University includes under the visitation of the Regents, twenty-three literary colleges, fifteen medical colleges, and about two hundred and forty academies and academical departments of union schools.

Besides the oversight of these Colleges and Academies, the Regents have the care and custody of the State Library, which is rapidly increasing and now numbers over ninety-eight thousand volumes, and of the State Museum of Natural History, in which are

large collections illustrating the mineralogy, the soils, the paleontology, the botany and the zoölogy of the State. Each of the Colleges and Academies in the State is required by law to make a report annually to the Regents, showing its financial condition and educational work. These reports are classified and tabulated by the Regents in their Annual Report to the Legislature, and the amount of information thus given to the public as to their condition in all departments is the most important of its kind, it is believed, in our country. The Regents make an Annual Report of the condition of the State Library and the State Museum of Natural History, often including in the latter papers of great value, exhibiting the progress of science and the useful arts.

In the exercise of this oversight of higher education, the Regents frequently visit the Colleges and Academies of the State, and this exerts a powerful influence in elevating the tone of instruction and in securing the care and preservation of the public property.

In order to raise the standard of education and to secure greater ability on the part of teachers, the Regents have instituted a system of Examinations by means of printed questions to be answered by the pupils. On the satisfactory answers to these questions, each pupil receives a certificate which, besides being a mark of honor, entitles the holder to certain other educational facilities.

In 1863, they called together the Presidents and Professors of Colleges, Principals of Academies and other prominent educators, as a result of which the

“University Convocation” was organized. The first anniversary meeting occurred at the Capitol in August, 1864, and sessions have been held annually since that time. At these meetings, besides taking action upon other important matters, papers and essays are read in which are discussed subjects relating to the interests of higher education. A volume is annually published giving an account of the Proceedings of the Convocation, and including the more valuable papers presented. For some years past, the Regents have given additional character to these exercises by formally conferring one or more honorary degrees, in the presence of the Convocation, on persons eminent for scholarship and services in the cause of education.

We here present a classified list of the papers read before the Convocation from its organization to and including the meeting in 1875. The numbers prefixed show the order in which the papers were read. The year annexed is that of the Regents' Report in which the paper appears, and is the year subsequent to that in which the paper was read.

**History of the Preliminary Academic  
Examinations of the University  
of the State of New York.**

It is now twelve years since the Regents, by their ordinance of July 27, 1864, for the purpose of ascertaining what scholars in the academies are clearly entitled to be included in the annual distribution of the

Literature Fund, directed that at the close of each academic term, a public examination of all scholars presumed to have completed preliminary studies, be held under the direction of a committee of at least three persons, to be appointed by the trustees of the academy; and that a certificate be given, by the committee, to each scholar sustaining the examination, which certificate should entitle the holder, (1) to be admitted to the Academic Class in any academy subject to the visitation of the Regents, without further examination; and also, in connection with the subsequent pursuit of higher studies for a prescribed period, (2) to be counted in the pro rata distribution of the Literature Fund to the academy reporting the scholar.

The first examination under this ordinance was held in the spring of 1865. The results were not satisfactory, for various reasons. Prominent among these may be mentioned the fact that no uniform tests of proficiency were prescribed, and that the committees established for themselves widely different standards of judgment. It became evident that an examination conducted in this manner would not furnish a basis for the equitable distribution of the income of the Literature Fund among the various academies of the State. Still, the plan of a bona fide examination was generally recognized by the principals and trustees of academies as a step in the right direction, and an effort was at once made to remedy the defects of the original system.

The suggestion made by some of the principals of

---

academies, that a uniform system of printed questions be prepared by the Regents, and that the answers to these questions be in writing, was adopted and put in operation in November, 1866, one set of questions in arithmetic, geography and grammar, respectively, being sent to each academy, to be dictated by the principal, to the class assembled for examination. This method was repeated in February, and again in June, 1867. The most serious defects complained of in the working of this method, were those growing out of the oral dictation of the questions, which not only consumed much time, but in many cases, especially in large classes, did not invariably enable the to correctly hear and fully understand what was dictated. It was urged that to make the examination a success, each scholar must be furnished with a set of the printed questions, for his own exclusive use. As the substitution of an examination wholly by printed questions and written answers would be of no public interest while in progress, it was deemed advisable that the examination be conducted as a private one, only the principal, committee and candidates being allowed to be present. These modifications of the system were adopted in November, 1867, and though attended with greatly increased labor and expense, in printing and issuing the questions, it has been continued to the present time, to the general satisfaction of all concerned. At that time it was also decided to issue the certificates of academic scholarship from the office of the Regents. Under this system thirty tri-yearly examina-

tions have been held and more than thirty-three thousand certificates have been issued by the Regents to as many scholars who have sustained the examination. The formal reports of each examination are mounted in convenient book form in the office of the Regents, and the series is a valuable historical record of the results of these examinations.

The experimental fruits of each succeeding examination have been diligently sought and applied in improving the system and in establishing all practicable safeguards against abuse and checks upon committees, principals and scholars, whose personal interest would of course lead them to desire that all or nearly all candidates should be adjudged to have passed the examination. It was found that many scholars would endeavor either to give or receive aid, or both, and that the committees, if honest and faithful, were compelled to act in a somewhat odious police character. To make this feature less prominent, by throwing a share of the responsibility upon the scholars themselves, the Regents long since concluded to require each scholar's written declaration, at the end of each set of answers, that he had neither given nor received aid in his work. Papers not having this declaration are summarily rejected, and it is believed that the requirement has been highly salutary, and that it is essential to the completeness of the system.

Since February, 1870, inclusive, the Regents have required that all the papers of scholars claimed to be entitled to certificates be sent to their office for revision by one person. These papers are thus sub-

jected to a process of "equalization," and the rejection of any papers unworthily claimed is secured. In this way, the claims made in the examination returns are reduced, on an average, about twenty per cent. ; and the number claimed since this system of revision was adopted is scarcely more than half as great as when the decision of the examining committees was final.

In the review of what has been done in thus projecting, organizing and administering a uniform examination in writing on so broad a field as the more than two hundred academies and academical departments of the State, with no guiding precedent, and in face of the prediction in various quarters that any such system was utterly impracticable, the Regents have been greatly gratified with the results thus far attained, and impressed with the importance of studying to make it still more successful in stimulating general attention to the fundamental branches of education, and at the same time providing a satisfactory basis for the equitable distribution of the literature fund. Acting under this consideration, the Regents, some years since, provided for the appointment of a Standing Committee on Examinations. That committee has rendered valuable service to the executive officers of the Board in the matter of preparing the papers and perfecting the arrangements for the examinations.

The subject of this preliminary academic examination has been often discussed at the University Convocation, any real or supposed defects have been freely pointed out from time to time, and the system,

as a whole, has been cordially and heartily endorsed. Many teachers, including some who at first looked upon it with great disfavor, declare that it is of inestimable benefit in their schools.

The Regents have been urged to include additional subjects, under authority of such legislation as may be needed and procured. It has also been urged that a similar uniform system ought to be employed to ascertain the qualifications of common school teachers. The system is attracting considerable attention in other States, and the question papers are much sought for and used as trial tests in schools other than those subject to the visitation of the Regents. While further modifications are unquestionably desirable, there would seem to be positive merit in a pioneer system which has been able to sustain itself so long and to commend itself so largely to public favor.

**THE**  
REGENTS' QUESTIONS,  
1866—1876.

---

ARITHMETIC.

---

**To the Teacher.**

As first given out, the examination papers in arithmetic contained no special directions as to their use. Experience developed the following expedients to insure honest work

(1) From the Tenth Examination, this paragraph as prefixed to the questions :

Each scholar is to declare at the close of the examination, over his signature, whether he had any previous knowledge of these questions, and whether he has either given or received aid in answering them.

From the Twelfth Examination, this paragraph read as follows :

Each scholar is to declare over his signature that he had no previous knowledge of these questions, and that he has neither given nor received aid in answering them, if such be the fact.

It so remained till the Eighteenth Examination, when the phrase "answering any of them," was substituted for "answering them."

At the Twenty-third Examination, the words "two hours only," preceded this paragraph, and for the last clause this was substituted: "and that he has not spent more than the allowed time, if all this be true."

After this the paragraph did not appear.

(2) At the Tenth Examination, these paragraphs were appended to the questions:

Do you conscientiously declare, that, prior to each session you had no knowledge of the questions, and that you have neither given to any other scholar nor received from any source, aid in answering them? If so, write at the end of your list of answers, the words, *I do*, and subscribe your names.

The Committee must reject papers not bearing this declaration.

This form continued till the Thirteenth Examination, when for the second paragraph was substituted: *Papers not bearing this declaration must be rejected.* At the Fourteenth Examination, the words, *and signature* were inserted after *declaration*.

From the Fifteenth Examination, the second sentence read:

If so, write *I do*, at the end of your list of answers, and subscribe your name.

At the Sixteenth Examination, after the second word of the first sentence there was inserted the phrase: "at the close of the examination in Arithmetic."

At the Seventeenth Examination, the words, *to be proposed thereat*, were inserted after *questions* in the first sentence ; and the second sentence read :

If so, write in the next line after the end of your set of answers, near the right side of the paper, the words, *I do so declare*, and directly underneath this, subscribe your name.

At the Eighteenth Examination, the sentence, "papers not bearing this declaration and signature must be rejected" was left out.

At the Twenty-second Examination, there was added to the first sentence the clause : "and that you have not spent more than the allowed time ;" the words "explanations or other," were prefixed to "aid," and this sentence was added :

Any set of papers lacking this declaration will of course be disallowed.

At the Twenty-fourth Examination, this last sentence read :

Every set of answers lacking this *declaration* and *signature*, however satisfactory in other respects, will be rejected on the presumption that the declaration could not conscientiously be made.

At the Twenty-sixth Examination, the little word SO, in the sentence *I do so declare*, was put into capitals. The word *full* was also inserted before declaration in the last sentence

(3) At the Twelfth Examination, this note was prefixed to the questions :

The mere answers are not sufficient ; the *solutions* are also to be given.

At the Twenty-second Examination, this was expanded to read as follows :

*Mere answers* are not sufficient. Indicate the pro-

posed mode of solving each example by the proper arithmetical signs, wherever this is practicable ; and give all computations necessary for finding the answer.

At the Twenty-eighth Examination, the word *Numerical* was substituted for *Mere* before *answers*.

(4) At the Thirteenth Examination, this direction was given :

Fold your paper in proper form for filing, and endorse it with the name of the institution, your own name, and the subject and date of the examination.

At the Eighteenth Examination, this was appended :

The diagram below represents the outer page of an open foolscap leaf or sheet, after being properly folded and filed.

No answer to questions should be written upon this outer page, and especially upon the section to be reserved for the filing entries.

<p><i>Ames Acad.</i> <i>John Smith.</i> <i>Arithmetic.</i> <i>June 6, 1872.</i></p>			<p>(Upper end.)</p>
			<p>(Lower End.)</p>

To fold the paper as it lies with the outer edge upon the desk before you, place the lower edge upon the upper edge of the leaf or sheet, hold the two edges in place with the left hand, and make the fold across the middle of the leaf with the right hand ; finish the folding by repeating the same process.

At the Nineteenth Examination, for the words *upper end* and *lower end* upon the diagram were substituted *top* and *bottom*, and the date was changed, as also thereafter, to correspond with the date of the examination.

At the Twenty-fourth Examination, the two paragraphs preceding the diagram were printed in substance upon the diagram; and at the Twenty-eighth Examination, the first paragraph was also printed upon the diagram.

(4) At the Twenty-first Examination, this paragraph was introduced:

Reduce fractional results to their lowest terms; use the proper signs of denominate numbers, and designate each answer by "*Ans.*"

At the Twenty-second Examination, after the words "lowest terms" was inserted: "and improper fractions to whole or mixed numbers."

At the Twenty-fourth Examination there was inserted this clause: "Solve by *cancellation*, as far as practicable."

The result of ten years of experimenting, aided by the suggestions of hundreds of teachers, is therefore the following form:

(*Preceding the Questions.*)

☞ *Numerical answers* are not sufficient. Indicate the proper mode of solving each example by the usual arithmetical signs, whenever this is practicable; and give all computations necessary for finding the answer.

☞ Reduce fractional results to their lowest terms, and improper fractions to whole or mixed numbers; solve by *cancellation*, as far as practicable; use the proper signs of denominate numbers, and designate each answer by "*Ans.*"

*(Following the Questions.)*

## DIRECTIONS FOR FOLDING, ETC.

To fold the paper as it lies with the outer page upon the desk before you, place the lower edge upon the upper one, hold the two edges in place with the left hand; make the fold across the middle of the leaf with the right hand, and finish by repeating this process.

<p><i>Ames Acad.</i> <i>John Smith.</i> <i>First Session.</i> <i>June 1, 1876.</i></p> <p>(Top.)</p>	<p>This diagram represents the outer page of an open foolscap leaf or sheet, after being properly folded and filed.</p>	<p>No answer or questions should be written upon the outer page here represented.</p>	<p> Fold your paper in proper form for filing, and endorse it with the name of the institution, your own name, the subject and session, and the present date.</p>
--	---	---	--

 Do you now at the close of the examination in arithmetic, conscientiously declare that, prior to each session, you had no knowledge of the questions proposed, that you have neither given to any other scholar, nor received from any source, explanations or other aid in answering any of them, and that you have not spent more than the allowed time? If so, write at the end of your set of answers, near the right side of the paper, “*I do SO declare,*” and underneath *subscribe your name.*

 Every set of answers lacking this *full declaration* and *signature*, however satisfactory in other respects, will be rejected, on the presumption that the declarations could not conscientiously be made.

GEOGRAPHY.

---

**To the Teacher.**

The first paragraphs attached to the questions in Geography appeared at the Tenth Examination, when these were appended :

(1) Do you conscientiously declare, that, prior to this examination, you had no knowledge of the questions, and that you have neither given to any other scholar, nor received from any source, aid in answering them? If so, write at the end of your list of answers the words, *I do*, and subscribe your name.

The committee must reject papers not bearing this declaration.

At the Thirteenth Examination, the last two sentences read :

If so, write *I do*, at the end of your list of answers, and subscribe your name. *Papers not bearing this declaration must be rejected.*

At the Fourteenth Examination, the words, *subscribe your name*, were italicised.

At the Seventeenth Examination, the words "any of" were prefixed to "them," and the last two sentences read :

If so, write in the next line after your set of answers, near the right side of the paper, the words  
*"I do so declare,"*  
 and directly underneath this subscribe your name.

☞ Papers not bearing this declaration and signature must be rejected.

From the Eighteenth to the Twenty-first Examinations, this last clause was omitted. At the Twenty-second and Twenty-third it read :

Any set of papers lacking this declaration and signature will of course be disallowed.

Since the Twenty-fourth, it has read :

Every set of papers lacking this full *declaration* and *signature*, however satisfactory in other respects, will be rejected, on the presumption that the required declaration could not conscientiously be made.

(2) At the Eleventh and Twelfth Examinations, special directions were given as to certain questions. Committees were permitted to accept answers to Q.s 258, 272, 273 and 274, respectively, provided not more than one of the several answers in each was incorrect.

(3) At the Thirteenth to Seventeenth Examinations, and at the Twenty-third and Twenty-fourth, this paragraph was prefixed :

☞ Errors in spelling are to be carefully avoided.

(4) Since the Thirteenth Examination, this paragraph has been appended :

☞ Fold your paper in proper form for filing, and endorse it with the name of the institution, your own name, and the subject and date of the examination.

THE  
REGENTS' QUESTIONS,  
1866-1876.

---

GRAMMAR.

---

**To the Teacher.**

(1.) At the Tenth and Eleventh Examinations, this paragraph was prefixed to the first paper :

[Each scholar is to declare at the close of the examination, over his signature, whether he had any previous knowledge of the questions, and whether he has either given or received aid in answering them.]

At the Twelfth, Thirteenth and Fourteenth Examinations, this read :

Each scholar is to declare at the close of the examination, over his signature, that he had no previous knowledge of these questions, and that he has neither given nor received aid in answering them, if such be the fact.

At the Fifteenth and subsequent examinations, the phrase "at the close of the second session" was substituted for "at the close of the examination."

At the Twenty-first Examination, the last part of this paragraph read :

That he has neither given nor received explanations or other aid in answering any of them, and that he has not spent more than the allowed time, if all this be true.

Since the Twenty-third Examination, the paragraph has not appeared.

(2.) At the Tenth Examination, the following paragraphs were appended to the questions :

Do you conscientiously declare, that, prior to each session you had no knowledge of the questions, and that you have neither given to any scholar, nor received from any source, aid in answering them? If so, write at the end of your list of answers the words, *I do*, and subscribe your name.

The committee must reject papers not bearing this declaration.

The subsequent changes in this paragraph were identical with those made in it upon the arithmetic papers. (See pp. 2, 3.)

(3.) At the Thirteenth Examination, this paragraph was appended :

Fold your paper in proper form for filing and endorse it with the name of the institution, your own name, and the subject and date of the examination.

Since the Twenty-first Examination, the last clauses have read "the subject and session, and the date of the examination."

(4.) At the Eleventh Examination, this paragraph was introduced :

✎ In parsing any word, give the part of speech (or class of words), and its several properties (or modifications),—*i. e.*, its etymological character; also, its *syntax*, or relation to other words, and the appropriate rule of syntax. Materially defective parsing is in every instance to be counted a failure, even though it be correct as far as it goes. Fragmentary answers are not sufficient.

At the Fourteenth Examination, for the last sentence of the paragraph this was substituted :

As orthography is a division of grammar, errors in spelling are to be carefully avoided

After the Eighteenth Examination, this paragraph was dropped.

(5.) (1) At the Fourth Examination, this paragraph was prefixed:

1. Let the Principal distinctly read, one by one, each of the following sentences, and then properly pronounce each italicised word with its prefixed number, allowing the pupil sufficient time to write the same before pronouncing the next.

: At the Fifth Examination, this paragraph read:

[Each italicised word in the following sentences is to be written by each pupil. Let the principal read the sentence, and then distinctly and properly pro-

nounce each italicised word (with its prefixed number) allowing sufficient time for writing it before the next word is pronounced.]

It has since been continued without material change.

(2) At the Fourth Examination, this paragraph was also prefixed:

2 Any mode of spelling approved by either Webster or Worcester may be accepted as correct :

This was continued until the Twenty-first Examination, after which it was dropped

(3) At the Twelfth Examination, this paragraph was prefixed with the others :

Let the number of errors of each pupil of the entire class be ascertained and endorsed on his paper, and the same proportion of them as of the other papers be sent to the Regents.

At the Twelfth Examination the last clause read :

And send all those in which at least *eighty* words are rightly spelled to the office of the Regents.

The paragraph was dropped for a time, but appeared at the Eighteenth Examination in this form:

Papers containing more than fifteen mis-spelled words must be rejected.

It so remained till the Twenty-first Examination, after which it disappeared.

(4) At the Sixth Examination this paragraph was inserted after the first :

Direct the pupils to place capital letters at the beginning of proper names only, and to use the apostrophe correctly with the possessive case, and when letters are omitted for the sake of the metre.

It appeared next at the Thirteenth and Fifteenth Examinations, in the following form :

---

*Direct the scholars to begin each proper name with capitals, and all other words with small letters.*

After a time, it was again inserted at the Twenty-fourth Examination, reading as follows :

[26] *Several* [27] *very* [28] *exciting* [29] *skirmishes*

and then [36] *there* (37) *poured* on (38) *to* the (39)

(41) *gentlemen* with (42) *their* hats (43) *off*, (44) *all*

'Tenth Regents' Examination, Nov. 12, 1869.

(11:00 A. M.—12:00 M.)

The next (1) *day*, in a (2) *pouring* (3) *rain*, they  
went (4) *through* Lake (5) *Erie* to (6) *Cleveland*, (7)  
*reaching* (8) *there* in the afternoon, and (9) *staying* (10)  
*till* late at (11) *night*; and (12) *here* Harry (13) *wrote*  
and (14) *mailed* a (15) *little* (16) *letter* home.

Before the French (17) *conquest*, the (18) *governor*

(22) *Coarse* (23) *pieces* of (24) *coal* burn well in a

A (26) *scholar* was (27) *poring* over his (28) *lesson*,

(32) *Several* (33) *commoners* were (34) *promoted* to  
the (35) *peerage* (36) *during* the (37) *reign* of the last  
(38) *sovereign*.

A (39) *treaty* of (40) *peace* was (41) *ratified* after the  
(42) *cessation* of (43) *hostilities*.

(44) *Great* (45) *feats* were (46) *exhibited* by the (47)

We (56) *hear* that the (56) *steamboat* (58) *fare* has been (59) *increased*, and that the (60) *proposed* (61) *pier* will not be (62) *built* this (63) *season*.

O (64) *dear*! what a (65) *crowd* of (66) *people* I have (67) *seen* at the (68) *fair*.

The (69) *stars* in (70) *their* (71) *courses* (72) *fought* (73) *against* Sisera.

A (74) *deer's* (75) *meat* is called (76) *venison*.

(77) *Pear* (78) *trees* do not (79) *flourish* in (80) *some* (81) *localities*.

A (82) *beautiful* (83) *scene* was (84) *sketched* upon (85) *canvas* not less than (86) *eleven* (87) *feet* in (88) *height*.

It was (89) *meet* that we (90) *should* make (91) *merry*.

(92) *Leaven* is (93) *another* name for (94) *yeast*.

There are (95) *quite* (96) *too* (97) *many* poor (98) *readers* and (99) *spellers* in our (100) *schools*.

(XI, 44.) SPELLING.

*Eleventh Regents' Examination, Feb. 17, 1870.*

(11:00 A. M.—12:00 M.)

“The (1) *value* of (2) *written* (3) *exercises* in (4) *mastering* the (5) *orthography* of the (6) *language* is (7) *universally* (8) *conceded*. (9) *They* are of no less (10) *importance*, (11) *considered* as a (12) *means* of (13) *making* the pupil (14) *familiar* by (15) *practice* with the forms of language, and (16) *giving* him (17) *facility* in the (18) *mechanical* part of (19) *composition*. as well as (20) *affording* the (21) *very* best (22) *drill* in (23) *punctuation*, the (24) *use* of (25) *capitals*, etc.”

The five (26) *senses* are (27) *hearing*, (28) *seeing*, (29) *smelling*, (30) *tasting*, and (31) *feeling*.

Then shall the lame man (32) *leap* as an (33) *hart*, and the (34) *tongue* of the (35) *dumb* shall sing.

“A (36) *mighty* (37) *realm* is the land of (38) *dreams*.

With (39) *steeps* that hang in the (40) *twilight* sky,  
And (41) *weltering* (42) *oceans* and (43) *trailing*  
streams,

That (44) *gleam* (45) *where* the (46) *dusky* (47) *val-*

(49) *Sulphur* is a (50) *mineral*, but not a (51) *metal*.  
A (52) *solemn* (53) *group* of (54) *doomed* (55) *criminals* (56) *emerged* from the (57) *gloomy* (58) *dungeon*.

(59) *Hie* thee, (60) *guest*, to the (61) *flowery* (61) *mead* whither the (63) *busy* (64) *bees* in (65) *swarms* (66) *resort*.

(67) *Scholars* who (68) *truly* (69) *deserve*, (70) *generally* (71) *receive* the (72) *meed* of (73) *praise*.

(74) *Dun* is the name (75) *applied* to a (76) *certain* (77) *sombre* (78) *color*.

Mr. (79) *Matthews*, the (80) *delegate* from (81) *Louisiana*, being (82) *thoroughly* (83) *wearied* by the (84) *fruitless* (85) *discussion*, (86) *properly* moved the (87) *previous* (88) *question*.

(89) *Character* should be more (90) *highly* esteemed than (91) *wealth*.

“May (92) *each* morn, that in (93) *succession*

(97) *Leave* a strong and deep (98) *impression*  
Of my (99) *debt*, forever (100) *growing*.”

(XII, 48.) SPELLING.

*Twelfth Regents' Examination, June 10, 1870.*

(11:00 A. M.—12:00 M.)

“It was a (1) *descent* of (2) *more* than (3) *four* (4) *thousand* (5) *feet* from the (6) *summit* of (7) *those* (8) *mountains* which (9) *witnessed* the (10) *vision* of (11) *Babiam* and (12) *Moses*, to the (13) *plains* of Moab, the (14) *Scripture* (15) *name* for the (16) *eastern* side of the (17) *Jordan* (18) *Valley* at (19) *Jericho*. From the (20) *ordinary* (21) *level* of that (22) *table-land* was a descent of (23) *about* (24) *two* thousand feet. The (25) *course* of the (26) *Israelites* may be (27) *traced* with (28) *apparent* (29) *certainty* (30) *down* a (31) *ravine* which (32) *descends* from Heshbon to the Jordan, and which (33) *still* (34) *retains* the name of the (35) *ancient* (36) *city* which (37) *lay* at its (39) *head*.

The (39) *difference* (40) *between* the (41) *upper* and (42) *lower* (43) *grounds* in (44) *respect* to (45) *soil* and (46) *climate* is as (47) *great* as can be (48) *imagined*.

In (49) *aspect*, (50) *temperature*, and (51) *products*, the valley is (52) *tropical* in (53) *character*, so that the (54) *Hebrews* (55) *passed* as if into (56) *another* (57) *Zone*. In its (58) *southern* (59) *extremity* (60) *where* it (61) *opens* on the (62) *gloomy* (63) *mist-covered* (64) *waters* of the (65) *asphaltic* (66) *lake*, it is not (67) *less* than (68) *twelve* (69) *miles* in (70) *width*. (71) *There*, open and level on (72) *all* (73) *sides*, it (74) *forms* a (75) *space* on which (76) *many* (77) *armies* (78) *might* be (79) *encamped*. The (80) *general* (81) *direction* of the valley (82) *itself* for the (83) *sixty* miles between Lake Tiberias and the (84) *Dead* (85) *Sea* is (86) *tolerably* (87) *straight*; but (88) *deep* in its (89) *very* (90) *bottom*, the river (91) *winds*—it has (92) *been* (93) *said* that it (94) *wriggles*—(95) *along* like a (96) *gigantic* (97) *serpent*, so that the (98) *length* of the valley is not sixty, but two hundred miles. The (99) *square* (100) *monotonous* range of hills that support the eastern highlands rises up on that side for nearly a hundred miles.” (*Gage's Studies in Bible Lands.*)

(11:00 A. M.—12:00 M.)

(1) Leaving (2) Boston on the (3) afternoon of (4) Saturday, the (5) fifth of (6) February, (7) we (8) proceeded (9) by (10) another (11) railroad (12) to (13) Wor-

chester, a (14) *pretty* (14) *New England* (16) *town*, (17) *where* we had (18) *arranged* to (19) *remain* (20) *under* the (21) *hospitable* roof of the (22) *Governor* of the *State*, (23) *until* (24) *Monday* (25) *morning*.

(26) *These* towns and (27) *cities* of *New England*, (28) *many* of (26) *which* (30) *would* (31) *be* (32) *villages* in (33) *Old England*, (34) *are* as (35) *favorable* (36) *specimens* of (37) *rural* America as (38) *their* (39) *people* are of rural (40) *Americans*. The (41) *well-trimmed* (42) *lawns* and (43) *green* (44) *meadows* of home are not (45) *there*; and the (46) *grass*, (47) *compared* with (48) *our* (49) *ornamental* (50) *plots* and (51) *pastures*, is (52) *rank* and (53) *rough* and (54) *wild*; (55) *but* (56) *delicate* (57) *slopes* of land, (58) *gently* (59) *swelling* (60) *hills*, (61) *wooded* (62) *valleys*, and (63) *slender* (64) *streams* (65) *abound*; (66) *every* (67) *little* (68) *colony* of (69) *houses* (70) *has* its (71) *church* and (72) *school-house* (73) *peeping* from (74) *among* the (75) *white* (76) *roofs* and (77) *shady* (78) *trees*; every house is the (79) *whitest* of the white; every (80) *Venetian* (81) *blind* the (82) *greenest* of the green; every (83) *fine* (84) *day's* (85) *sky* the (86) *bluest* of the (87) *blue*. (88) *All* the (89) *buildings* (90) *looked* as if (91) *they* had (92) *been* (93) *built* and (94) *painted* that (95) *morning*, and (96) *could* be (97) *taken down* on *Monday* with (98) *very* (99) *little* (100) *trouble*. (XV, 60.) SPELLING.

*Fifteenth Regents' Examination, June 9, 1871.*

(11:00 A. M.—12:00 M.)

(1) *Olney*, (2) *England*,  
(3) *November 3, 1873.*

“Rev. John (4) *Newton*,  
(5) *Dear* (6) *Friend*:

My time is short, and my (7) *opportunity* not the most (8) *favorable*. My (9) *letter* will (10) *consequently* be short (11) *likewise*, and perhaps not (12) *very* (13) *in-*

*telligible* I find it no very (14) *easy* (15) *matter* to bring my mind into that (16) *degree of* (17) *composure* which is (18) *necessary* to the (19) *arrangement of* (20) *either* (21) *words or matter*. You will (22) *naturally* (23) *expect* to (24) *receive* (25) *some* (26) *account of the* (27) *confusion* that I (28) *describe*. \* \* \*

On (29) *Saturday* (30) *night*, at (31) *eleven* (32) *o'clock*,  
\* \* \* I was (33) *alarmed* by a (34) *cry of* fire, (35) *announced* by two or three (36) *shrill* (37) *screams upon our* (38) *staircase*. Our (39) *servants* \*  
\* saw it from their (40) *windows*; and, in (41) *appearance*, so (42) *near*, that they (43) *thought* our house in (44) *danger*. I (45) *immediately* (46) *rose*, and (47) *putting* by the (48) *curtain*, saw (49) *sheets of* fire (50) *rising* above the (51) *ridge of Mr.* (52) *Palmer's* house, (53) *opposite* to (54) *ours*. The (55) *deception* was such that I had no (56) *doubt* it had begun with him, but (57) *soon* found that it was rather farther (58) *off*. Having broken out in three (59) *different* parts, it is (60) *supposed* to have been (61) *maliciously* (62) *kindled*. A (63) *tar-barrel* and a (64) *quantity of* (65) *tallow* made a most (66) *tremendous* (67) *blaze*; and the (68) *buildings* it had (69) *seized upon* being all (70) *thatched*, the (71) *appearance* became every (72) *moment* more (73) *formidable*. (74) *Providentially*, the night was (75) *perfectly* (76) *calm*, so calm that (77) *candles*, (78) *without* (79) *lanterns*, of which there were (80) *multitudes* in the (81) *street*, burned as (82) *steadily* as in the house. \* \* \*

Every man who supposed his (83) *dwelling* in (84) *jeopardy*, (85) *emptied* it as fast as he could, and (86) *conveyed* his (87) *móvables* to the house of some (88) *neighbor*, supposed to be more (89) *secure*. \* \* \* (90) *George* ——— is the (91) *principal* (92) *sufferer*. He gave (93) *eighteen* (94) *guineas*, or (95) *nearly* that sum, to a woman, whom in his (96) *hurry*, he (97) *mistook* for his wife; but the supposed wife (98) *walked off* with the (99) *money*, and he will probably never (100) *recover* it." \* \* \*

Yours, my dear friend,

WILLIAM COWPER.

## VALUE OF THE FEDERAL UNION. — Webster.

I (1) *profess*, (2) *sir*, in my (3) *career* (4) *hitherto*, to (5) *have* (6) *kept* in (7) *view* the (8) *prosperity* and (9) *honor* of the (10) *whole* (11) *country*, and the (12) *preservation* of (13) *our* (14) *Federal* (15) *Union*. It is to that Union we (16) *owe* our (17) *safety* at (18) *home*, and our (19) *consideration* and (20) *dignity* (21) *abroad*. To that Union we are (22) *chiefly* (23) *indebted* for (23) *whatever* (25) *makes* us (26) *proud* of our country. That Union we (27) *reached* (28) *only* by the (29) *discipline* of our (30) *virtues* in the (31) *severe* (32) *school* of (33) *adversity*. It had its (34) *origin* in the (35) *necessities* of (36) *disordered* (37) *finance*, (38) *prostrate* (39) *commerce*, and (40) *ruined* (41) *credit*. Under its (42) *benign* (43) *influences* (44) *these* (45) *great* (46) *interests* (47) *immediately* (48) *awoke*, as from the (49) *dead*, and (50) *sprang* (51) *forth* with (52) *newness* of life. (53) *Every* (54) *year* of its (55) *duration* has (56) *teemed* with (57) *fresh* (58) *proofs* of its (59) *utility* and its (60) *blessings*; and (61) *although* our (62) *territory* has (63) *stretched* (64) *out* (65) *wider* and wider, and our (66) *population* (67) *spread* (68) *farther* and farther, (69) *they* have not (70) *outrun* its (71) *protection* or its (72) *benefits*. It has (73) *been* to us (74) *all* a (75) *copious* (76) *fountain* of (77) *national*, (78) *social*, (79) *personal* (80) *happiness*. \*

\* I have not (81) *accustomed* (82) *myself* to (83) *hang* over the (84) *precipice* of disunion, to (85) *see* (86) *whether*, with my short (87) *sight*, I can (88) *fathom* the (89) *depth* of the (90) *abyss* (91) *below*; nor (92) *could* I regard him as a safe (93) *counselor* in the (94) *affairs* of this (95) *government*, whose (96) *thoughts* should be (97) *mainly* bent on (98) *considering*, not how the Union should be best (99) *preserved* but how tolerable might be the condition of the people when it shall be broken up and (100) *destroyed*.

## (XVII, 68.) SPELLING.

*Seventeenth Regents' Examination, Feb. 28, 1872.*

(11:00 A. M.—12:00 M.)

The [1] *great* [2] *object* of all [3] *knowledge* is to enlarge and purify the [4] *soul*, to fill the mind with [5] *noble*

contemplations, and to furnish a refined [6] *pleasure*. [7] *Considering* this as the ultimate end of [7] *science*, no branch of it can surely [9] *claim* [10] *precedence* of [11] *astronomy*. \* \* \*

Much, however, as we are [12] *indebted* to our [13] *observations* for [14] *elevating* our [15] *conceptions* of the [16] *heavenly* [17] *bodies*, they present even to the [18] *unaided* [19] *sight* [20] *scenes* of glory, which words are [21] *too* [22] *feeble* to [23] *describe*. I had [24] *occasion*, a few weeks since, to take the [25] *early* [26] *train* from [27] *Providence* to [28] *Boston*; and for this [29] *purpose* rose at [30] *two* o'clock in the morning. \* \*

It was a mild, [31] *serene*, midsummer's [32] *night*,—the sky was without a [33] *cloud*—the winds were [34] *whist*. The moon, then in the last [35] *quarter*, had just [36] *risen*, and the stars shone with a spectral [37] *lustre*, but [38] *little* [39] *affected* by her [40] *presence*. [41] *Jupiter*, two [42] *hours* high, was the herald of the day; the Pleiades just above the [43] *horizon* shed [44] *their* sweet [45] *influence* in the east; Lyra [46] *sparkled* [47] *near* the Zenith; Andromeda [48] *veiled* her newly [49] *discovered* [50] *glories* \* \* in the [51] *south*; the [52] *steady* [53] *pointers* far beneath the pole looked meekly up from the [54] *depths* of the north to their [55] *sovereign*.

Such was the glorious [56] *spectacle* as I entered the train. As we [57] *proceeded*, the timid [58] *approach* of [59] *twilight* became more [60] *perceptible*; the [61] *intense* [62] *blue* of the sky began to [63] *soften*; the [64] *smaller* stars, like little [65] *children*, went first to rest; the sister-beams of the [66] *Pleiades* soon melted together; but the [67] *bright* [68] *constellations* of the west and north [69] *remained* unchanged. Steadily the [70] *wondrous* transfiguration went on. \* \*

The blue sky now turned more softly [71] *gray*; the great watch stars shut up their holy eyes; the east began to [72] *kindle*. Faint [73] *streaks* of [74] *purple* soon blushed along the sky; the [75] *whole* [76] *celestial* [77] *concave* was filled with the inflowing tides of the morning light, which came [78] *pouring* down from above in one great [79] *ocean* of [80] *radiance*. \* \*

In a few [81] *seconds*, the everlasting gates of the morning were [82] *thrown* wide open, and the Lord of day, [83] *arrayed* in glories too [84] *severe* for the gaze of man, began his state.

I do not [85] *wonder* at the [86] *superstition* of the [87] *ancient* Magians, who in the morning of the world went

up to the hill tops of Central [88] *Asia*, and ignorant of the [89] *true* God, adored the most glorious work of his hand; but I am filled with [90] *amazement*, when I am told that in this [91] *enlightened* age, and in the [92] *heart* of the [93] *Christian* world, [94] *there* are [95] *persons* who can [96] *witness* this [97] *daily* [98] *manifestation* of the [99] *power* and wisdom of the [100] *Creator*, and yet say in their hearts, "There is no God."

*Eighteenth Regents' Examination, June 7, 1872.*

(11:00 A. M.—12:00 M.)

PATIENCE—SPURGEON.

[1] *Patience* is [2] *better* than wisdom; an [3] *ounce* of patience is worth a pound of [4] *brains*. All men [5] *praise* patience, but few [6] *enough* can practice it; it is a [7] *medicine* which is good for all [8] *diseases*, and therefore every old woman [9] *recommends* it; but it is not every garden that grows the [10] *herbs* to make it with. When one's flesh and bones are full of [11] *aches* and [12] *pains*, it is as [13] *natural* for us to [14] *murmur* as for a horse to shake his head when the [15] *flies* [16] *tease* him, or a wheel to [17] *rattle* when the spoke is loose; but nature should not be the rule with [18] *Christians*, or what is their [19] *religion* worth? If a [20] *soldier* fights no better than a ploughboy, [21] *off* with his red [22] *coat*. We [23] *expect* more [24] *fruit* from an [25] *apple-tree* than from a [26] *thorn*, and we have a [27] *right* to do so. The [28] *disciples* of a patient [29] *Saviour* [30] *should* be patient [31] *themselves*. Grin and [32] *bear* it is the [33] *old-fashioned* [34] *advice*, but sing and bear it is a [35] *great* [36] *deal* better. After all, we get [37] *very* few cuts of the [38] *whip* [39] *considering* what bad [40] *cattle* we are, and when we do smart a little, it is [41] *soon* over. Pain past is [42] *pleasure*, and [43] *experience* comes by it. We [44] *ought* not to be [45] *afraid* of going down into [46] *Egypt*. when we know we shall come out of it with [47] *jewels* of silver and gold.

Impatient [48] *people* water their [49] *miseries*, and [50] *hoe* up their [51] *comforts*; [52] *sorrows* are [53] *visitors* that come without [54] *invitation*, but [55] *complaining* minds send a [56] *wagon* to bring their [57] *troubles* home in. [58] *Many* people are born [59] *crying*, live com-

plaining and [60] *die* [61] *disappointed*; they [62] *chew* the [63] *bitter* pill which they [64] *would* not even know to be bitter if they had the [65] *sense* to [66] *swallow* it [67] *whole* in a cup of patience and water. They think every other man's [68] *burden* to be [69] *light* and their own [70] *feathers* to be [71] *heavy* as [72] *lead*; they are hardly done by in their own [73] *opinion*; no one's [74] *toes* are so often [75] *trodden* on as [76] *theirs*; the snow falls [77] *thickest* round their [78] *door*, and the hail [79] *rattles* hardest on their [80] *windows*; and yet if the truth were [81] *known*, it is their [82] *fancy* rather than their fate which makes things go so hard with them. A little sprig of the herb called [83] *content* put into the [84] *poorest* [85] *soup* will make it taste as rich as the Lord Mayor's [86] *turtle*. John [87] *Ploughman* [88] *grows* the plant in his garden, but the late hard winter [89] *nipped* it [90] *terribly*, so that he cannot [91] *afford* to give his [92] *neighbors* a slip of it; they had better [93] *follow* [94] *Matthew* xxv, 9, and go to those who sell and [95] *buy* for themselves. [96] *Grace* is a good [97] *soil* to grow it in, but it wants [98] *watering* from the [99] *fountain* of [100] *mercy*.

#### EXERCISE.

We, the [1] *People* of the [2] *State* of [3] *New York*, [4] *grateful* to [5] *Almighty* God for [6] *our* [7] *freedom*, in [8] *order* to [9] *secure* its [10] *blessings*, do [11] *establish* this [12] *Constitution*.

[1] *Article* 1.

[14] **SEC. 1.** [15] *No* [16] *member* of this state [17] *shall* be [18] *distranchised*, or [19] *deprived* of [20] *any* of the [21] *rights* or [22] *privileges* secured to any [24] *citizens* [24] *thereof*, [25] *unless* by the [26] *law* of the land, or the [27] *judgment* of his [28] *peers*.

**SEC. 2.** (15) *Trial* by (30) *jury* in (31) *all* (32) *cases* in (33) *which* it (34) *has* (35) *been* (36) *heretofore* (37) *used* shall (38) *remain* (39) *inviolable* (40) *forever*, but a jury trial may be (41) *waived* by the (42) *parties* in all (43) *civil* cases, in the (44) *manner* (45) *prescribed* by law.

SEC. 3. The (46) *free* (47) *exercise* and (48) *enjoyment* of (49) *religious* (50) *profession* and (51) *worship*, (52) *without* (53) *discrimination* or (54) *preference*, shall forever be (55) *allowed* in this state to all (56) *man-kind*; and no (57) *person* shall be (58) *rendered* (59) *incompetent* to be a (60) *witness* on (61) *account* of his (62) *opinions* on (63) *matters* of religious (64) *belief*; but the (65) *liberty* of (66) *conscience* (67) *hereby* secured shall not be so (68) *construed* as to (69) *excuse* (70) *acts* of (71) *licentiousness*, or (72) *justify* (73) *practices* (74) *inconsistent* with the (75) *peace* or (76) *safety* of this State.

SEC. 4. The privilege of the (77) *writ* of (78) *habeas* (79) *corpus* shall not be suspended unless (80) *when*, in cases of (81) *rebellion* or (82) *invasion*, the (83) *public* safety may (84) *require* its (85) *suspension*.

SEC. 5. (86) *Excessive* (87) *bail* shall not be required, nor excessive (88) *finer* (89) *imposed*, nor shall (90) *cruel* and (91) *unusual* (92) *punishments* be (93) *inflicted*, nor shall witnesses be (94) *unreasonably* (95) *detained*.

SEC. 6. No person shall be held to (96) *answer* for a (97) *capital* or (98) *otherwise* (99) *infamous* (100) *crime*. \* \* \* unless on presentment or indictment of a grand jury. \* \* \*

EXERCISE.

(1) *Once* upon a (2) *midnight* (3) *dreary*, (4) *while* I (5) *pondered*, (6) *weak* and (7) *weary*,  
 Over (8) *many* a (9) *quaint* and (10) *curious* (11) *volume* of (12) *forgotten* (13) *lore*,—  
 While I (14) *nodded*, (15) *nearly* (16) *napping*, (17) *suddenly* (18) *there* came a (19) *tapping*,  
 As of some (20) *one* (21) *gently* (22) *rapping*, rapping  
 at my (23) *chamber* (24) *door*;

“’Tis some (25) *visitor*,” I (26) *muttered*, “tapping at my chamber door,—

Only this, and (27) *nothing* more.”

Ah! (28) *distinctly* I (29) *remember*, it was in the (30) *bleak* (31) *December*,

And (32) *each* (33) *separate* (34) *dying* (35) *ember* (36) *wrought* its (37) *ghost* upon the (38) *floor*,

(39) *Eagerly* I (40) *wished* the (41) *morrow*; (42) *vainly* I had (43) *sought* to (44) *borrow*,

From my (45) *books*, surcease of (46) *sorrow*,—sorrow for the (47) *lost* Lenore,—

For the (48) *rare* and (49) *radiant* (50) *maiden* (51) *whom* the (52) *angels* name Lenore,—

(53) *Nameless* (54) *here* (55) *forevermore*.

(56) *Back* into the chamber (57) *turning*, (58) *all* my (59) *soul* within me (60) *burning*,

(61) *Soon* (62) *again* I (63) *heard* a tapping, (64) *something* (65) *louder* than (66) *before*,

(67) “*Surely*” (68) *said* I,—“surely that is something at my (69) *window* (70) *lattice*;

Let me (71) *see* then, (72) *what* thereat is, and this (73) *mystery* (74) *explore*,—

Let my (75) *heart* be (76) *still* a (77) *moment*, and this mystery explore;—

’Tis the (78) *wind*, and nothing more.”

Open here I (79) *flung* the (80) *shutter*, (81) *when*, with many a (82) *flirt* and (83) *flutter*,

In there (84) *stepped* a (85) *stately* (86) *raven* of the (87) *saintly* (88) *days* of (89) *yore*.

Not the (90) *least* (91) *obeisance* made he; not a (92) *minute* (93) *stopped* or (94) *staid* he;

But with (95) *mien* of (96) *lord* or (97) *lady*, (98) *perched* above my chamber door;—

Perched upon a (99) *bust* of Pallas, (100) *just* above my chamber door,—

Perched and sat, and nothing more.

## EXERCISE.

(1) *When*, in the (2) *course* of (3) *human* (4) *events*, it (5) *becomes* (6) *necessary* for (7) *one* (8) *people* to (9) *dissolve* the (10) *political* (11) *bands* which have (12) *connected* them with (13) *another*, and to (14) *assume*, (15) *among* the (16) *powers* of the (17) *earth*, the (18) *separate* and (19) *equal* (20) *station* to which the (21) *laws* of (22) *nature* and of nature's God (23) *entitle* them, a (24) *decent* (25) *respect* to the (26) *opinions* of mankind (27) *requires* that they (28) *should* (29) *declare* the causes which (30) *impel* them to the (31) *separation*.

We hold (32) *these* (33) *truths* to be (34) *self-evident*, that all men are (35) *created equal*; that they are (36) *endowed* by (37) *their* (38) *Creator* with (39) *certain* (40) *unalienable* (41) *rights*; that (42) *among* these are life, liberty and the (43) *pursuit* of (44) *happiness*. That to [45] *secure* these rights, [46] *governments* are [47] *instituted* among men, [48] *deriving* their just [49] *powers* from the [50] *consent* of the [51] *governed*; that whenever any form of government becomes [52] *destructive* of these ends, it is the right of the people to [53] *alter* or to [54] *abolish* it, and to institute a [55] *new government*, [56] *laying* its [57] *foundation* on such [58] *principles*, and [59] *organizing* its powers in such form, as to them shall [60] *seem* most [61] *likely* to [62] *effect* their [63] *safety* and happiness. [64] *Prudence*, [65] *indeed*, will [66] *dictate* that governments long established, [67] *should* not be [68] *changed* for [69] *light* and [70] *transient* causes; and, [71] *accordingly*, all [72] *experience* hath [73] *shown*, that mankind are more [74] *disposed* to suffer, while [75] *evils* are [76] *sufferable*, than to right [77] *themselves* by [78] *abolishing* the forms to which they are [79] *accustomed*. But when a long [80] *train* of [81] *abuses* and [82] *usurpations*, [83] *pursuing* [84] *invar-*

*iably* the same [85] *object*, [86] *evinces* a [87] *design* to [88] *reduce* them under [89] *absolute* [90] *despotism*, it is their right, it is their duty, to [91] *throw* [92] *off* such government, and to [93] *provide* new [94] *guards* for their [95] *future* [96] *security*. Such has been the [97] *patient* [98] *sufferance* of these [99] *colonies*, and such is now the necessity which [100] *constrains* them to alter their former systems of government.

## EXERCISE—FABLE OF THE ANT AND THE GRASSHOPPER.

In the [1] *winter* [2] *season*, a [3] *commonwealth* of [4] *Ants* was [5] *busily* [6] *employed* in the [7] *management* and [8] *preservation* of [9] *their* [10] *corn*, which [11] *they* [12] *exposed* to the [13] *air* in [14] *heaps* [15] *about* the [16] *avenues* of their [17] *little* [18] *country* [19] *habitation*. A [20] *grasshopper* who had [21] *chanced* to [22] *outlive* the [23] *summer*, and was [24] *ready* to starve with cold and [25] *hunger*, [26] *approached* them with [27] *great* [28] *humility*, and [29] *begged* that [30] *they* [31] *would* [32] *relieve* his [33] *necessity* with [34] *one* [35] *grain* of [36] *wheat* or [37] *rye*. One of the *Ants* [38] *asked* him, how he had [39] *disposed* of his time in summer, that he had not taken [40] *pains* and [41] *laid* in a [42] *stock* as they had [43] *done*. [44] “*Alas*, [45] *gentlemen*,” [46] *says* he, “I [47] *passed* away the time [48] *mer- rily* and [49] *pleasantly* in [50] *drinking*, [51] *singing*, [52] *dancing*, and [53] *never* [54] *once* [55] *thought* of winter.” “If that be the case,” [56] *replied* the ant, [57] *laughing*, [58] “*all* I have to say, is, that they who drink, sing and dance in summer, must starve in winter.”

## MORAL.

As summer is the season of the [59] *year* in which the [60] *husbandman* [61] *gathers* such [62] *fruits* as may [63] *supply* his [64] *necessities* in winter, so [65]

youth and [66] *manhood* [67] *should* be [68] *chiefly* [69] *occupied* in [70] *providing* such [71] *necessaries* as may [72] *suffice* for the [73] *craving* [74] *demands* of [75] *helpless* old age. Yet [76] *many* of [77] *those* [78] *whom* we call [79] *rational* [80] *creatures* live in [81] *quite* the [82] *opposite* [83] *way*, [84] *making* it their [85] *business* to [86] *squander* whatever they may have [87] *acquired*; as if the [88] *feebleness* of age would [89] *need* no [90] *supplies* to [91] *support* it; or, at [92] *least*, would have them [93] *furnished* in [94] *some* [95] *miraculous* [96] *manner*.

From this fable we [97] *learn* this [98] *lesson*, never to lose any [99] *opportunity* of providing against the future evils and [100] *accidents* of life.

EXERCISE.

(1) *Daniel* (2) *Webster* was (3) *great* in all the (4) *elements* of his (5) *character*: *great* in (6) *original* (7) *mental* (8) *strength*; *great* in (9) *varied* and *vast* (10) *acquirements*; *great* in (11) *quick* and (12) *keen* (13) *perception*; *great* in (14) *subtle*, (15) *logical* (16) *discrimination*; *great* in (17) *force* of (18) *thought*; *great* in (19) *power* of (20) *intense* and (21) *rigid* (22) *analysis*; *great* in *rare* and (23) *beautiful* (24) *combination* of (25) *talent*; *great* in (26) *ability* to (27) *command* his *powers*; *great* in (28) *range* and (29) *acuteness* of (30) *vision*, for he (31) *could* (32) *see* like a (33) *prophet*. (34) *Hence* his (35) *decision* of *character*; his *bold*, (36) *manly*, (37) *independent* *thought*; his (38) *whole* (39) *soverignty* of *mind*.

No man (40) *probably* ever lived, who could (41) *calculate*, with such (42) *mathematical* (43) *certainty*, the (44) *separate* (45) *effect* of (46) *human* (47) *actions*, or the (48) *intricate*, (49) *combined*, and (50) *complicated* (51) *influence* of (52) *every* (53) *movement*, (54)

*social*, (55) *political* or (56) *personal*. He could (57) *define* and (58) *determine* the (59) *very* (60) *destiny* of influence. This is the (61) *key* to the (62) *problem* of of his (63) *greatness*, an (64) *explanation* of the (65) *miracle* of his power. We are (66) *proud* of his greatness, (67) *because* it is (68) *American*, (69) *wholly* American! The very (70) *impulses* of his (71) *heart* were American.

The (72) *spirit* of American (73) *institutions* had (74) *infused* itself into his life—had (75) *become* a part of his being. He was proud of his (76) *country*; proud of her (77) *commerce*; her art and (78) *science*; her (79) *wealth*, (80) *resources* and labor; and all in turn were proud of him. His (81) *patriotism* was not (82) *bounded* by the (83) *narrow* (84) *limits* of (85) *sectional* (86) *interest* nor (87) *hemmed* in by state lines, nor (88) *regulated* by local (89) *policy*. It was as (90) *broad* as his country. He (91) *knew* a North and a (92) *South*, an East and a West; but he knew them only as one—"One and (93) *inseparable*!"

As a (94) *forsenic* (95) *orator*, I know of no age which can boast his (96) *superior*. He united the boldness and energy of the (97) *Grecian*, and the (98) *grandeur* and strength of the Roman, to an original (99) *simplicity* which neither Grecian nor Roman (100) *possessed*.

1866-1876.

---

PENMANSHIP.

---

**To the Teacher.**

Penmanship was added to the Regents' Questions at the Twenty-third Examination. Under the printed matter to be copied was given this declaration :

I hereby certify that this copy of the above printed matter is a genuine specimen of my hand-writing.

Signed,

This has since appeared as follows :

The above is a genuine specimen of my hand-writing.

Signed, .....

This paragraph of directions was also printed :

☞ Each scholar who has been examined in all the other branches, and who is likely to be reported for Regents' Certificate, is to furnish a written copy of the rest of the printed matter on this page, properly subscribed and filed.

Since the Twenty-fifth examination, the directions have read thus :

☞ This exercise is intended only for scholars examined in all the other subjects, and who are likely to be reported for Certificates. The Specimen is to be forwarded to the Regents, as part of the complete set of papers required in the case of each Scholar claimed for a Certificate, which the Regents reserve the right to withhold on the ground of defective Penmanship.

☞ The Specimen is to be written on a half leaf of foolscap, and be subscribed and filed like the papers on other subjects.

## (XXIII, 93.) PENMANSHIP.

*Twenty third Regents' Examination, Feb. 27, 1874.*

(4:15—4:30 P. M.)

“ Whence did the wondrous mystic art arise  
 Of painting speech, and speaking to the eyes ?  
 That we, by tracing magic lines, are taught  
 How both to color and embody thought ? ”

## (XXIV, 97.) PENMANSHIP.

*Twenty-fourth Regents' Examination, June 5, 1874.*

(9:30—9:45 A. M.)

Dr. Busley, whose figure was beneath the common size, was one day accosted in a public coffee room, by an Irish baronet of colossal stature, with, “ May I pass to my seat, O, Giant ? ”

The Doctor, politely making way, replied “ Pass, O Pigmy ! ” “ Oh ! sir,” said the baronet, “ my expression alluded to the size of your intellect.” “ And my expression, sir,” said the Doctor, “ to the size of yours.”

## (XXV, 98.) PENMANSHIP.

*Twenty-fifth Regents' Examination, Nov. 6, 1874.*

(9:30—9:45 A. M.)

John Horn Tooke's opinion upon the subject of law was admirable. “ Law,” he said, “ ought to be, not a luxury for the rich, but a remedy, to be easily, cheaply and speedily obtained by the poor.” A person observed to him, “ how excellent are the English laws, because they are impartial, and our courts of justice are open to all persons without distinction.” “ And so,” said Tooke, “ is the London Tavern, to such as can afford to pay for their entertainment.”

(XXVI, 106.) PENMANSHIP.

*Twenty-sixth Regents' Examination, Feb. 26, 1875.*

(9:30—9:45 A. M.)

PROTECTING VINEYARDS BY ARTIFICIAL CLOUDS.—  
The experiment has been tried in France of protecting vineyards, during critical periods of cold, by forming artificial clouds that would prevent excessive radiation from the soil. Vessels containing a heavy oil were lighted, and formed a thick black cloud between the vines and the sky, which completely answered the purpose. The expense was only about forty cents an acre.

(XXVII, 111.) PENMANSHIP.

*Twenty-seventh Regents' Examination, June, 4, 1875.*

(9:30—9:45 A. M.)

“There was a most ingenious architect, who had contrived a new method of building houses, by beginning at the roof, and working downwards to the foundation; which he justified to me by the like practice of those two prudent insects, the bee and the spider.”

(XXVIII, 113.) PENMANSHIP.

*Twenty-eighth Regents' Examination, Nov. 5, 1875.*

(9:30—9:45 A. M.)

“We, the People of the State of New York, grateful to Almighty God for our freedom, in order to secure its blessing, do establish this Constitution.”

(XXIX, 121.) PENMANSHIP.

*Twenty-ninth Regents' Examination, Feb. 25, 1876.*

(9:30—9:45 A. M.)

“Lake Champlain is ninety miles long from north to south, with a length of coast on either side of about one hundred and twenty-five miles: its southern extremity, or head, being at Whitehall, and its northern, near the boundary line between the United States and Canada.”

# The Regents' Questions, 1866-1876.

We have printed sets of the arithmetical problems upon separate slips of heavy and durable card board. These are numbered continuously from 1 to 692; are printed upon six different colors, according to the divisions of arithmetic to which they belong, for convenience in assorting; are put up in cloth-bound boxes and accompanied by a key; and will be sent post paid to any address on receipt of ONE DOLLAR. 112 specimen questions in Compound Numbers and Percentage, two colors, sent post-paid for five green stamps.

These questions will afford in the class room a varied and convenient exercise, without the expense of a book in the hands of each pupil, or waste of time in dictation. Suppose five minutes can be spared at the close of a recitation in arithmetic. The teacher, selecting by the color the subject desired, hands problems to members of the class as they file by on their way to the black-board. Each pupil works his problem, places over it his name and the number of the problem, and returns the problem to the box. The teacher, glancing at the key (*to which no pupil has access*) can see whether the answers correspond, mark the pupils, and dismiss the class within the allotted time. It is believed that in no other way can so much and so varied practice be given with so little labor.

For Superintendents, Commissioners, and others who have to conduct frequent examinations, these questions will prove a convenient and inexhaustible resource. As the colors indicate whether each question is in the Fundamental Rules, Fractions, Decimals, Compound Numbers, Percentage, or the more advanced rules, *questions suited to classes of any grade may be chosen at sight.*

We have also printed the questions in each subject separately, in cloth-bound pamphlets, for sale as follows:

Arithmetic, 692 questions, - - - -	25 cents.
Geography, 824 questions, - - - -	25 "
Grammar, 1,400 question, - - - -	25 "
Spelling and Penmanship, - - - -	25 "

The questions complete, illustrated volume, \$1.00.
