DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

BUSINESS PLAN, PHARMACEUTICAL SECTION

Period from 1 Sept to 30 Nov, 1950

1. Training course for pharmacists:

At the present time when a long pending question of doctors' dispensing, aiming at improvement of medical treatment, is approaching its final settlement, the pharmacists should increase the knowledge necessary to supply the public with medicines in supreme quality and the techniques to find out whether the medicine is pure or not.

Only by improving the techniques of pharmacy and guiding the public, can the pharmacists win the respect of the public.

In addition to the techniques and the ability of guiding the public, the pharmacists should endeavor to have warm heart to serve the public.

Kagawa-ken Pharmaceutical Affairs Section will hold a short training course for pharmacists at two places in the prefecture in August and November for the purpose of improving general cultures and techniques of all the pharmacists. The major subjects taught at the training course are as follows:

a. Publicity of the Pharmaceutical Affairs Law.

b. Official approval and management of medicine manufacture.

c. Methods of examining medicines.

d. Methods of examining drinking water and food.

2. Guidance of improvement of pharmacy:

The pharmacy is the organ of the pharmacist through which he directly serves the public. However, in order to give full play to the complete faculty of the pharmacy, the present condition is not sufficient.

In order to equip all the pharmacy completely in accordance with the fixed standard prescribed by the Pharmaceutical Affairs Law, not only the economic aid but also proper guidance for all the pharmacists are necessary.

Moreover, adequate guidance must be given for vicious pharmacists who violate the Pharmaceutical Affairs Law.

For the above-mentioned purpose, the prefectural authorities established the rules for complete equipment of pharmacy.

The inspectors of pharmaceutical affairs are guiding pharmacists according to the tules.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

3. Distribution of precious metals for dentists:

As for the distribution of precious metals for dentists, emphasis is placed upon the following points:

a. To hold a meeting for publicity of the Precious Metals Control Law.

The prefectural government authorities have often held the meetings for publicity of the Precious Metals Control Law promulgated on May 1, 1950, and its supplementary regulations. However, in view of the fact that some of the dentists seem to have not sufficient understanding about the above-mentioned law and regulations, the prefectural government authorities have a plan to hold the meeting for thorough publicity of the law and regulations at various places in the prefecture during October and to increase efficiency of the business concerning distribution of precious metals.

b. Just and fair distribution of precious metals:

At present there are 284 dentists in the prefecture. Before the promulgation of the Precious Metals Control Law, about 700 sheets of gold-leaf were consumed in average by the dentists during a quarter. But after the promulgation of the law, at present about 500 sheets of gold-leaf are consumed. In view of the fact, the prefectural government authorities will probe into the cause of the recent decrease of consumption of gold-leaf and endeavor to distribute gold-leaf as fairly and promptly as possible.

c. Investigation on how precious metals for dentists are being used:

The prefectural government authorities will conduct thorough investigation simultaneously in November, dispatching all the investigators in chargeof pharmaceutical affairs to every dentist.

4. To hold liaison conference concerning the biological medicine manufacture.

From the particular nature the biologically-manufactured medicine must be handled carefully. However, the handling of the medicine by the persons concerned has hitherto been not sufficient. In view of the fact, the prefectural government authorities have decided to fix the standard of the shop of the businessmen who deal with the biologically manufactured medicine and to distribute the medicine to the businessmen through the prefectural Pharmaceutical Section in order to unify the handling of the medicine. The prefectural government authorities are intending to hold a liaison conference for disseminating the method of handling the medicine, inviting the members of every local health center on September 7.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

5. Short training course and examination for managers of the enterprises of poison and powerful medicines:

Poison incidents recently have markedly increased. This unfavorable tendency is due chiefly to the poor quality of managers of the enterprises of poison and powerful medicine. In view of this fact, the prefectural governmental authorities will hold short training course for the managers of the enterprises toward the end of October in order to make them cooperate in preventing poison incidents.

The contents of the training course are:

a. Publicity of the laws concerned.

b. Method of handling and preservation of poison.

c. Enlightenment of the public by pamphlet.

d. Measures for preventing danger resulting from handling of a large quantity of poison at the big factory.

After the short training course, an examination will be given for the managers of the enterprises of poison in order to improve their quality and technique.

ACTIVITIES PROGRAM FOR THE THIRD QUARTER 1950
Preventive Medicine Section, Kagawa Pref.

Activity	October	November	December
Health Centers	1. Eradication of rats. Enforcement of housecleaning. 2. Prevention of eruptive typhus. Eradication of lice. 3. Prevention of food poisoning.	1. Holding of competitive meeting of superior infants. 2. Enforcement of strong control on theatrical performance for festivals.	1. Enforcement of housecleaning for eradication of harmful insects. 2. Dental clinics
Clinics according to the law for business of massage, acupuncture, moxa-cautery, judo-orthopedy.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

BUSINESS PLAN, PHARMACEUTICAL SECTION

Period from 1 Sept to 30 Nov, 1950

1. Training course for pharmacists:

At the present time when a long pending question of doctors' dispensing, aiming at improvement of medical treatment, is approaching its final settlement, the pharmacists should increase the knowledge necessary to supply the public with medicines in supreme quality and the techniques to find out whether the medicine is pure or not.

Only by improving the techniques of pharmacy and guiding the public, can the pharmacists win the respect of the public.

In addition to the techniques and the ability of guiding the public, the pharmacists should endeavor to have warm heart to serve the public.

Kagawa-ken Pharmaceutical Affairs Section will hold a short training course for pharmacists at two places in the prefecture in August and November for the purpose of improving general cultures and techniques of all the pharmacists. The major subjects taught at the training course are as follows:

a. Publicity of the Pharmaceutical Affairs Law.

b. Official approval and management of medicine manufacture.

c. Methods of examining medicines.

d. Methods of examining drinking water and food.

2. Guidance of improvement of pharmacy:

The pharmacy is the organ of the pharmacist through which he directly serves the public. However, in order to give full play to the complete faculty of the pharmacy, the present condition is not sufficient.

In order to equip all the pharmacy completely in accordance with the fixed standard prescribed by the Pharmaceutical Affairs Law, not only the economic aid but also proper guidance for all the pharmacists are necessary.

Moreover, adequate guidance must be given for vicious pharmacists who violate the Pharmaceutical Affairs Law.

For the above-mentioned purpose, the prefectural authorities established the rules for complete equipment of pharmacy.

The inspectors of pharmaceutical affairs are guiding pharmacists according to the tules.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

3. Distribution of precious metals for dentists:

As for the distribution of precious metals for dentists, emphasis is placed upon the following points:

a. To hold a meeting for publicity of the Precious Metals Control Law.

The prefectural government authorities have often held the meetings for publicity of the Precious Metals Control Law promulgated on May 1, 1950, and its supplementary regulations. However, in view of the fact that some of the dentists seem to have not sufficient understanding about the above-mentioned law and regulations, the prefectural government authorities have a plan to hold the meeting for thorough publicity of the law and regulations at various places in the prefecture during October and to increase efficiency of the business concerning distribution of precious metals.

b. Just and fair distribution of precious metals:

At present there are 284 dentists in the prefecture. Before the promulgation of the Precious Metals Control law, about 700 sheets of gold-leaf were consumed in average by the dentists during a quarter. But after the promulgation of the law, at present about 500 sheets of gold-leaf are consumed. In view of the fact, the prefectural government authorities will probe into the cause of the recent decrease of consumption of gold-leaf and endeavor to distribute gold-leaf as fairly and promptly as possible.

c. Investigation on how precious metals for dentists are being used:

The prefectural government authorities will conduct thorough investigation simultaneously in November, dispatching all the investigators in chargeof pharmaceutical affairs to every dentist.

4. To hold liaison conference concerning the biological medicine manufacture.

From the particular nature the biologically-manufactured medicine must be handled carefully. However, the handling of the medicine by the persons concerned has hitherto been not sufficient. In view of the fact, the prefectural government authorities have decided to fix the standard of the shop of the businessmen who deal with the biologically manufactured medicine and to distribute the medicine to the businessmen through the prefectural Pharmaceutical Section in order to unify the handling of the medicine. The prefectural government authorities are intending to hold a liaison conference for disseminating the method of handling the medicine, inviting the members of every local health center on September 7.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

5. **Short training course and examination for managers of the enterprises of poison and powerful medicines:**

Poison incidents recently have markedly increased. This unfavorable tendency is due chiefly to the poor quality of managers of the enterprises of poison and powerful medicine. In view of this fact, the prefectural governments authorities will hold short training course for the managers of the enterprises toward the end of October in order to make them cooperate in preventing poison incidents.

The contents of the training course are:

a. Publicity of the laws concerned.

b. Method of handling and preservation of poison.

c. Enlightenment of the public by pamphlet.

d. Measures for preventing danger resulting from handling of a large quantity of poison at the big factory.

After the short training course, an examination will be given for the managers of the enterprises of poison in order to improve their quality and technique.

ACTIVITIES PROGRAM FOR THE THIRD QUARTER 1950
Preventive Medicine Section, Kagawa Pref.

Activity	October	November	December

Clinics according to the law for business of massage, acupuncture, moxa-cautery, judo-orthopedy.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

BUSINESS PLAN, PHARMACEUTICAL SECTION

Period from 1 Sept to 30 Nov, 1950

1. Training course for pharmacists:

At the present time when a long pending question of doctors' dispensing, aiming at improvement of medical treatment, is approaching its final settlement, the pharmacists should increase the knowledge necessary to supply the public with medicines in supreme quality and the techniques to find out whether the medicine is pure or not.

Only by improving the techniques of pharmacy and guiding the public, can the pharmacists win the respect of the public.

In addition to the techniques and the ability of guiding the public, the pharmacists should endeavor to have warm heart to serve the public.

Kagawa-ken Pharmaceutical Affairs Section will hold a short training course for pharmacists at two places in the prefecture in August and November for the purpose of improving general cultures and techniques of all the pharmacists. The major subjects taught at the training course are as follows:

a. Publicity of the Pharmaceutical Affairs Law.

b. Official approval and management of medicine manufacture.

c. Methods of examining medicines.

d. Methods of examining drinking water and food.

2. Guidance of improvement of pharmacy:

The pharmacy is the organ of the pharmacist through which he directly serves the public. However, in order to give full play to the complete faculty of the pharmacy, the present condition is not sufficient.

In order to equip all the pharmacy completely in accordance with the fixed standard prescribed by the Pharmaceutical Affairs Law, not only the economic aid but also proper guidance for all the pharmacists are necessary.

Moreover, adequate guidance must be given for vicious pharmacists who violate the Pharmaceutical Affairs Law.

For the above-mentioned purpose, the prefectural authorities established the rules for complete equipment of pharmacy.

The inspectors of pharmaceutical affairs are guiding pharmacists according to the tules.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

3. Distribution of precious metals for dentists:

As for the distribution of precious metals for dentists, emphasis is placed upon the following points:

a. To hold a meeting for publicity of the Precious Metals Control Law.

The prefectural government authorities have often held the meetings for publicity of the Precious Metals Control Law promulgated on May 1, 1950, and its supplementary regulations. However, in view of the fact that some of the dentists seem to have not sufficient understanding about the above-mentioned law and regulations, the prefectural government authorities have a plan to hold the meeting for thorough publicity of the law and regulations at various places in the prefecture during October and to increase efficiency of the business concerning distribution of precious metals.

b. Just and fair distribution of precious metals:

At present there are 284 dentists in the prefecture. Before the promulgation of the Precious Metals Control Law, about 700 sheets of gold-leaf were consumed in average by the dentists during a quarter. But after the promulgation of the law, at present about 500 sheets of gold-leaf are consumed. In view of the fact, the prefectural government authorities will probe into the cause of the recent decrease of consumption of gold-leaf and endeavor to distribute gold-leaf as fairly and promptly as possible.

c. Investigation on how precious metals for dentists are being used:

The prefectural government authorities will conduct thorough investigation simultaneously in November, dispatching all the investigators in chargeof pharmaceutical affairs to every dentist.

4. To hold liaison conference concerning the biological medicine manufacture.

From the particular nature the biologically-manufactured medicine must be handled carefully. However, the handling of the medicine by the persons concerned has hitherto been not sufficient. In view of the fact, the prefectural government authorities have decided to fix the standard of the shop of the businessmen who deal with the biologically manufactured medicine and to distribute the medicine to the businessmen through the prefectural Pharmaceutical Section in order to unify the handling of the medicine. The prefectural government authorities are intending to hold a liaison conference for dissseminating the method of handling the medicine, inviting the members of every local health center on September 7.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

5. **Short training course and examination for managers of the enterprises of poison and powerful medicines:**

Poison incidents recently have markedly increased. This unfavorable tendency is due chiefly to the poor quality of managers of the enterprises of poison and powerful medicine. In view of this fact, the prefectural governments authorities will hold short training course for the managers of the enterprises toward the end of October in order to make them cooperate in preventing poison incidents.

The contents of the training course are:

a. Publicity of the laws concerned.

b. Method of handling and preservation of poison.

c. Enlightenment of the public by pamphlet.

d. Measures for preventing danger resulting from handling of a large quantity of poison at the big factory.

After the short training course, an examination will be given for the managers of the enterprises of poison in order to improve their quality and technique.

ACTIVITIES PROGRAM FOR THE THIRD QUARTER 1950
Preventive Medicine Section, Kagawa Pref.

Activity	October	November	December
Health Centers	1. Eradication of rats. Enforcement of housecleaning. 2. Prevention of eruptive typhus. Eradication of lice. 3. Prevention of food poisoning.	1.
