The Political Economist.

NOTICE.

The PARIS Agent for the Sale of the ECONOMIST is Mr Fotheringham, 8 Rue Neuve des Capucines, where copies of the Paper can always be obtained.

This day is Published No. 9, Vol. VIII., New Series, Price 8d; by post, 9d.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for SEPTEM-BER gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway Banking, Insurance, and Miscellaneous Companies. New Companies and New Capital. Prices made up to September 25.

Advertisements for the next number, to be published on October 26, must be sent, to insure insertion, on or before

The December Number of the INVESTOR'S MONTHLY MANUAL gives, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the Latest Quotations for 1876 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the Names of the Markets where each Security is chiefly dealt in a Financial History of the Very 1877 (in chiefly dealt in, a Financial History of the Year 1877, (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. In addition is furnished the Names of the Chairman and Secretaries, or Managers of the various Companies. A copious Index is added for purposes of reference. Price 1s 4d; by post, 1s 6d. OFFICE—340 Strand.

THE BANK ACT, AND THE BANK RATE.

THE letter from Mr Thomson Hankey, which we print elsewhere, touches on one of the points which the Bank Acts of 1844-45 was intended to insure, namely, the complete convertibility of the Bank of England note. "The objects of the Bill," said Sir Robert Peel, speaking in 1847 in the debate on the Treasury letter authorising the suspension of the Bank Act, "were of a triple nature; one of them was to prevent " panic and confusion; the second was to guarantee the "convertibility of notes into gold; and the third was to limit the circulation of notes." The first of these objects, as is well known, the Act was powerless to attain. Protection against panic is beyond the reach of any Parliamentary enactment. The second of these objects we believe the Act has secured as completely as legislation can do. It is on some of the results which have followed

the third that we desire to make a few remarks.

Among the regulations of the Bank Act of 1845 respecting the Scotch and Irish banks, was one which allowed them to exceed their authorised issue if they held specie to the extent of this excess. This arrangement was based on a sound and statesmanlike principle which might have been carried farther with advantage. The Scotch banks have been compelled by it to hold a considerable amount of gold, which is very desirable. The Scotch banks have found no difficulty in attending to this regulation, but it has caused a regular and periodic drain on the reserve of the Bank of England which has not been without influence. The effect of this was early seen by the Bank of England. In 1856, not quite ten years later than the speech of Sir Robert Peel's, quoted above, the opinion of the governor and some of the directors of the Bank on the operation of the Bank Acts, and the further experience of their working, was sought by Sir G. C. Lewis, then Chancellor of the Exchequer. By that time the amount of gold drawn from the Bank at the seasons when the Scotch note circulation regularly exceeds its limits, namely, the half-yearly terms of Whitsuntide (15th of May), and Martinmas (11th November), had attracted the attention of the authorities of the Bank. Mr Weguelin, who was governor in 1857, observed on this subject "that there is periodically a demand for currency "from the Scotch and Irish banks, which, whilst it pro-"duces a most sensible effect upon the Bank of England " reserve, is uncontrollable by any action of the Bank. "At certain periods of the year, especially after harvest, "the demand for currency commonly greatly exceeds the "authorised issue; and as the excess must be issued on gold deposited in certain specified places, that gold is withdrawn from the Bank reserve." Mr Bonamy "withdrawn from the Bank reserve." Dobree, one of the directors at that period, held the same opinion as Mr Weguelin. He considered "the abstraction "of gold coin from the Bank of England reserve, as at present, in aid of the Irish and Scotch circulation, in excess of their legalised issues, tends to increase the " pressure in the money market, and which would to that " extent be avoided if the Acts in question were repealed " in that particular."

Twenty years further experience of the working of the Bank Acts have confirmed the opinions of Mr Weguelin and Mr Dobree. The rate of discount charged by the Bank always tends to conform to the position of the reserve, and meanwhile the influence which the Scotch demands in particular bring to bear on the reserve has

increased with the growing requirements of the country, On an average of years, the Bank rate is higher in the month of May than in any of the spring or summer months of the year, and in November than in any other month at all. It may be said, "this is the result "of some natural cause, some business influence "makes a demand for money then, and the rise in the "month of May is merely the index of this." Now it is very difficult to discover any other guide to the value of money besides the Bank rate, but some may be found. If the Clearing-house returns are examined, they show no strong business demand in May, and if the rates charged by the banks of France and Germany are tabulated they show that the requirements of May are below the average of the year. The rate charged by all three banks shows that November is a month in which a sharp demand exists, but while other months equal November as to the rate charged in the case of the Banks of France and Germany, in the case of the Bank of England the rate in the month of November stands high above the whole of the year.

The average monthly rates for the banks of England, France, and Germany for the thirty-two years from 1846 to 1877 are given below. The date of 1846 has been selected as the basis to start from, as being the first year in which the Acts of 1845 came into full operation.

Statistical comparisons of this description do not enable us to speak with absolute certainty. It is impossible in an examination of this nature to discover and to record all the disturbing influences which may be at work. It is necessary to speak with the utmost caution with regard to investigations of a subject so vast and so But if the rate charged by the difficult to fathom. Bank is examined month by month from 1846 to the present time, it is found that the influence of the Scotch demand appears continually to increase, and it seems primarily probable that the cause assigned is the real one. Thus one curious result of the Acts of 1844-45 appears to be that the business industry of the United Kingdom is taxed every year, on an average, in the months of May and November to an amount which cannot easily be estimated, but which obviously is very considerable, in deference to a principle, the attainment of which could readily have been obtained without the disadvantages now accompanying it.

THE AFGHAN TROUBLE.

THE Afghan question has come upon us with startling rapidity. Probably when Indian history for the last two years is made public we shall see that had we known what was going on there would have been nothing surprising in the events of last Saturday. Unfortunately, though events in India may touch us more nearly than events in England, few people think it worth while to become familiar with them. Decisions of the most vital moment are taken, and the policy of a quarter of a century is upset in a day, without making as much noise as an eccentric decision by some subordinate judge. We set out a fortnight ago the two views of English policy in Afghanistan,—the view which urges us to undertake in one shape or another the government of a country which contains the "gates of India;" and the view which urges us to regard the plains through which the Indus flows as the natural field in which to give battle to an invader. In our judgment there was, down to the adoption of Lord Lytton's recent policy, far more to be said on behalf of the latter course than on behalf of the former. But an unsound policy has

its obligations, and imposes its responsibilities, just as much as a sound one; and the question now to be decided is not, ought Lord Lytton to have done what he did, but, given what Lord Lytton has done, what ought to be done in consequence? Every Viceroy, from Lord Dalhousie to Lord Northbrook may have been opposed to meddling with Afghanistan, but Lord Lytton has had this supreme advantage over them, that while they are dead or superseded he is actually in office. It is with the Afghan question in its existing shape—the shape which it has been preparing to take for months past, and which it definitely took last week—that we are now concerned.

The refusal of the Ameer to allow Sir Neville Chamberlain, at the head of a friendly mission, to go through the Khyber pass, is an insult which, however unimportant it may be in itself, is not unimportant in its effects upon Indian opinion. We cannot sit down under it. It was open to us to propose or not to propose to send a mission to Cabul. It is not open to us after such a proposal has been rejected to make our bow and retire. We doubt whether a single Indian expert, however mistaken he may think the policy which gave occasion for the rebuff, would maintain that the rebuff itself can be quietly accepted. Whether we should annex Afghanistan, or dethrone the Ameer, or force him to accept our protection, or be content with his promise to behave better, is a point upon which great difference of opinion may exist. But that one or other of these courses must be taken, and the Ameer be taught that his independence will not be allowed to become dangerous to our Empire in India, may be taken as generally admitted. The issue con-sequently resolves itself into this: Shall we invade Afghanistan now, or shall we wait till the spring? Primarily, of course, this is a military question. Is there time to invade Afghanistan before the winter? That is a matter of which the Indian military authorities are the best judges, and to them we are quite ready to trust it, provided that they are left free to decide it on purely military reasons. But it is useless to disguise the fact that the postponement of action till the spring may be a misfortune of the first order. A waiting policy will have three very bad results. It will give the rebuff the Government has received time to sink into the native mind. The news of the Ameer's refusal to receive the English mission is all over India by this time. The Ameer is an object of envy to every native prince, of admiration to every native below the rank of prince. What he has done has been proclaimed on the housetop; but what will the housetop know of what the Government of India are doing, so long as their action is confined to moving troops from place to place along the frontier? Englishmen will remain for six months under the imputation of having submitted to an insult. Is that an imputation under which they can safely live in India? Secondly, Russia will have time to consider her policy—to choose between persuading the Ameer to yield, and receive a mission with such additions by way of penalty as it is thought expedient to inflict on him; and encouraging him to resist by promises of indirect assistance. Either way, the result will be mischievous. If the Ameer yields it will give Russia an opportunity of suggesting that it was through her mediation that England was able to get what she wanted. If he defies us, the rumour that he is helped by Russia may serve to strengthen the resistance offered to us, and to raise the hopes of all among our Indian subjects who sympathise with that resistance. Thirdly, we cannot be sure of the course of events nearer home. We are as far as ever from course of events nearer home. We are as far as ever from an effective execution of the Anglo-Turkish Convention; indeed, all that is known of our position at Constantinople suggests that our influence there is declining while the influence of Russia is growing in proportion. It may not be as easy to throw our whole strength into the reduction of Afghanistan in April as it would be now, and though very much less than our whole strength may be sufficient for the purpose, neither the geography nor the history of Afghanistan make it safe to underrate the resistance we may meet with.

Of course, if the Indian military authorities are agreed that an invasion of Afghanistan before winter is impracticable, the disadvantages of delay must be endured with such patience as we can command. But in that case, we

should very much like to know why it is impracticable. If it is merely because of the lateness of the season, there is no more to be said. It is most unfortunate that Sir Neville Chamberlain's mission should have been delayed till now, but we do not know that anyone is to be blamed for it. But it is possible, though we hope not probable, that the impossibility of prompt action is not entirely due to the lateness of the season; that it is partly caused by the fact that our preparations are not complete, that there is something still to be done before the troops can be ordered to advance, and that when this something has been done the time for advance will have passed. We are loth to believe that the Government, either in England or in India, could have proposed sending a mission to the Ameer without being thoroughly prepared for prompt action in the event of the proposal being declined. The recent change in our Indian frontier policy has not been forced upon Lord Lytton or upon the India Office. has been the result of deliberate preference, and before they gave expression to that preference they should have counted the cost down to the last farthing, and had every soldier and every gun in readiness. If we have simply been playing at brag in the expectation that the Ameer would get frightened before we did, the Government will merit the severest censure.

THE CHANCES OF THE LABOUR-GREENBACK PARTY IN THE AMERICAN UNION.

Eight months ago, on February 9, we ventured to predict that the cry in the United States for "the dollar of our "forefathers" would be successful, that it would be too strong for Congress, that the President would be unable to resist it, and that the "Bland Bill" would pass into law, probably to be found wholly inoperative. We venture now to predict that the Greenback-Labour party, of which General B. Butler is the head, will be found exceedingly strong at the elections, will carry many Western States, and will directly affect the nominations for the next Presidency; making both President Hayes and ex-President Grant next to impossible. The party will not succeed, partly because success is impossible, inasmuch as there cannot in any field be more hay than there was grass, and partly because the American citizen is, in the last resort, much governed by religious feeling, but it will hold for a time the balance of power, and give a shake to American party organisations. Our reason for this belief is very nearly identical with our reason for believing in the success of the Bland Bill, but as it differs on one great point, we think it may be restated with advantage. The labour party, which by itself is not a very formidable party, or rather is formidable only because the American Government keeps so few regular soldiers, has attracted to itself the currency party, which for years past has shown itself fitfully in American politics, and has always been more or less dangerous, because it attracts the body of American voters, the small freeholding farmers of the rural districts.

The position of these farmers is a good deal misunder-stood in England; for partly because they are freeholders, but ship of the state of the individual search of the state but chiefly because the better side of their lives has attracted litterateurs, they are supposed to resemble English yeomen more clesely than they do. These yeomen, however, when they existed, were much modified in their general political tone by two facts,—that they were led habitually by men of wider culture and larger property than themselves, and that they shared in the national vice or virtue, an impatience of the habit of postponing everything to a minute economy. The American farmers, in the absence of these influences, have become in many ways much more like continental peasants than like English yeomen. They are no doubt more independent, have more eduation of a limited sort, and are less tightly bound to the soil, but they have the same excessive devotion to their material interests. The great majority of them, in fact, are very poor. They have abundance of food, and fairly good shelter, but they have very little margin for spending, and they want a margin very much. They have taxes to pay, and education to buy, and children to start in life, and lawyers and doctors to fee, and repairs to make, and they want manure, and they wish to save, and they know that they know that as soon as they die their property will be divided; and altogether the plenty of food does not make them feel rich. Great numbers of them are compelled

from time to time to raise loans on mortgage which they are hardly ever able to pay off. The prices they get for stock are not large—not approaching English prices—and the prices for cereals are distinctly low. The English market rules these, and to grow corn at such a price that it can be " railed " for 1,000 miles, then shipped to Mark lane, and then sold for 45s a quarter is very difficult indeed. It is true they pay no rent and few rates, but if they farm much land they have to pay high for labour, and if they farm little land the margin becomes very small. They cannot think of farming high, and from want of sufficient cheap labour they do not often farm well according to English ideas, the land in many districts being too much An English freeholder of 200 acres, with the market at his doors, does not like growing wheat at that price, and why should the American freeholder, with his market four thousand miles away, like it either? What advantage has he, except the absence of rent-often reduced by a mortgage—and a state of society allowing great simplicity of life, and tempting his whole family to work hard? As a matter of fact he is a poor man, much interested—sometimes extravagantly interested—in the small profit which remains to him year by year, and which he can use or save. He thinks very seriously of small economies, resents fiercely the smallest change in railway fares for the carriage of his produce, calculates to a farthing the interest on the money he always borrows before harvest, overworks himself to spare labour, and is generally a more or less depressed man. The young are not so anxious, but then it is the middle-aged who rule. American literature is as full of the farmer's thrift as French literature is of the peasant's economy, and though the point of view is different the result is the same. The farmer has nothing to spare, and watches his small margin of gain very eagerly. He feels the taxes oppressively; and he has a sense that anyone who lives without working out of taxes is a doubtful character who is helping to make his brothers' lives hard. This sense is diminished, no doubt, when he holds bonds himself, but the majority do not hold bonds, preferring, if they have money, mortgages which seem more secure, or petty investments which give a better return.

When, therefore, a man of this kind is told that a new party has been formed in the interest of the poor, which will lower railway charges, and reduce taxes, and make money plentiful, he is attracted towards that party, and specially attracted towards the paper-money side of it, for this reason. He knows that much currency in circulation makes money cheap to lend. He remembers that when paper first became plentiful, everybody except himself spent largely, by which he benefited. He knows that prices seem to rise with every fall in gold, and he does not see the ultimate effect upon his own possessions. Corn becomes no cheaper for the paper, for its price is settled in London; and his land he is not going to sell. If, therefore, the Labour-Greenback party can give him plenty of paper-money, without direct dishonesty, he will support it, and this it promises to do. Its leaders tell him that taxing the bonds is fair, like taxing any other kind of wealth, and ask why he should annually send in a property return for taxation while his neighbour who owns those nice bonds does not. The American system of levying State taxes on a calculation of the gross value of a man's whole possessions inevitably leads to this feeling, no freeholder being quite able to see why his bonds differ from other fruit-producing property. They tell him also that the bondholder lent his money in paper, and cught to have his dividend in it; his demand for gold, unless gold has been specifically promised, being usurious. The farmer agrees to that the more readily because gold and paper are so nearly equal, and on the whole, as he feels oppressed, and dislikes the neighbour who has accumulated, and does not see clearly that he is robbing anybody, he votes for the new party. He has tired of the Republicans, and the Democrats were "agin the war," which he still remembers with pride, and he will try whether these new men can realise any of their promises.

We suspect, too, though we are not quite certain, that confidence in the power of the State, of the one great corporation to which he belongs, is increasing with the American. He sees day by day more of the effect of combination. He hears year by year more of the importance

of what Government does-taxation, it must be remembered was hardly known before the war-and his disposition to make the State do something for him necessarily increases. This is undoubtedly the case in England where the poorer classes are learning to demand protective Acts from Parliament in quite a new way, and it may very well be the case also in America. If the State can do so much, why should it not do what he wants it to do-make taxes lighter, and money more plentiful, and interest smaller, and railway charges easier, and lighten and smoothen life generally. The farmer ought, say Englishmen, to see that the State cannot do these things, for he has education; but education will not always give this kind of knowledge. The American farmer is not better educated than most English middle-class women, and English middle-class women, if they ever try to consider questions of currency or trade, get lost instantly in an impenetrable fog. At this moment half the shopkeepers of London believe that an extravagant expenditure by the Court and the wealthy upon non-productive articles, such as dresses, flowers, and fine food, is in the highest degree "good for trade;" why should we expect the American farmer to be so much wiser without experience? We may depend upon it he is not, and that if the party can abstain from violence and from advocating open plunder -not quite a settled point yet as to railway shares—it will obtain a very large vote at the elections. When, as always happens, it does very little after all, and that little is unfelt, except perhaps by capitalists, its freeholding constituency will be greatly disappointed, and will probably revise expenditure, as the Democrats are inclined to do already with an unsparing hand, and with so little judgment that office will be closed except to the rich, or to those who intend to make it profitable by illicit gains.

THE EFFECT OF THE PRESENT STOPPAGE OF OUR SUPPLIES OF SILVER.

When last February the Bland Bill was passed over the President's veto, it was the avowed object of the silver producers in the Western States to enhance the value of the metal in relation to gold; and owing to that legislation they have undoubtedly aided in materially restricting the export of silver to this country. Since then, it has been from time to time reported that the United States Government have bought considerable amounts of silver in San Francisco, of which over 2,500,000l has up to the present date been coined into dollars, and it is fully intended that, as originally provided for, the resumption of specie payments shall date from the 1st of January next. At the same time, Germany having sold us 13,747,558l silver in 1877, has had less surplus silver to supply us with; and thus, during the current year, the two principal sources from which we have replenished our market are available to a far smaller extent than they recently were. Taking these bare facts into consideration, it might readily be supposed that the price of silver would naturally be higher than it was at this time last year; that the average price of 1878 would be above that of 1877; and that American legislators would be able to point for the time to a fair measure of success having attended their endeavours to enhance the value of a metal which they alone can produce cheaply. But all such hasty deductions would be the very reverse of what has actually occurred, as the following comparison clearly shows :-

	BAR SILVER	-Price pe		Lowest.		Average.
		d		d		d
First half of	1877	581	*****	531	*****	551
Second -	1877	551	*****	531 531 521	*****	541
First -	1878	551	*****	521	*****	54
Second -	1878 (to date)		*****	511	*****	54\ 54 52\
	MOVEMENT in the	PAST TWE	LVE	MONTH	8.	
	AND THE REAL PROPERTY.	September		September		
37		1877.		1878.		Fall.
		d		d		d
Silver, per o	30	541	*****	518	*****	2½ 2å
Marigan dal	llars, per or	521	******	503	******	98

Thus, it is clear that during the past year and nine months silver has steadily fallen; and it is quite certain that the United States and Germany have been powerless

to stop the downward movement. Since the passage of the Bland Bill, when $55\frac{1}{4}$ d was touched, the fall has exceeded $3\frac{1}{2}$ d an ounce. We will, however, carry the inquiry further back, dealing first with our sources of supply. These will be found below:—

Imports	of SILVER From Germany.	F	UNITED rom United States.	1	From Mexico, &c.		Total Imports.
Ten years' average, 1866-75		***	3,260,000	***	3,510,000		10,680,000
1876	5,364,060	***	2,637,234		3,079,318	***	13,578,269
1877	13,747,558	***	2,615,921		3,352,674	***	21,710,814
1878 (eight months)	3,552,127	***	1,165,611		2,536,724	***	8,521,537

It will be seen that in 1876—when the silver panic occurred, and the price on one day nominally fell to $46\frac{3}{4}$ d per oz—our imports of silver were not 30 per cent. above the average of the previous ten years, whereas in 1877 they were as much as 103 per cent. above the average; and the most extraordinary feature was that we were enabled to find uses for this great influx of metal, and to sustain the average price for the year at 2d per oz. above that of 1876. Thus far, during the current year, the imports of silver have not exceeded the average of 1866-75 by more than 25 per cent., but our power of absorption, or rather our power of finding a market for silver is vastly reduced; and hence the stoppage of supplies has had no apparent effect in sustaining quotations.

Dealing with our exports of silver bullion and coin in the same way as the imports, the following results are obtained:—

EXPORTS OF SILVER from UNITED KINGDOM.

	To India.		To China.		To France.		Total. Exports.
Ten years' average, 1866-75	2,780,000		530,000		1.950.000		9,430,000
1876	8,229,124		1,249,729	***	1,832,919	***	12,948,334
1877	14,313,643	***	2,047,685		767.574		19,436,733
1878 (eight months)	3,466,406		1,480,851		1.116.720		8.307.720

The first point to be remarked, when contrasting these figures with the imports, is that whereas, on an average, about 10 per cent. of the silver imported is retained for home consumption, the country has retained barely $2\frac{1}{8}$ per cent. in 1878. The second is that the increase in the export to India and China in 1876 and 1877 more than represented the increase in the entire exports of silver, so that other countries absorbed actually less in those years. The third point is that in the two-thirds of the current year already elapsed, in which, when compared with 1877, the diminished export of silver is about 4,700,000l, the falling-off is much more than accounted for by the decreased shipments to India, that decrease having amounted to 5,700,000l. In the ten years ended with 1875 India took 29 per cent. of our total silver exports; in 1876 she took 64 per cent; in 1877 she took 74 per cent.; while thus far in 1878 she has only taken 42 per cent., and to all appearances is returning to something like a normal rate of absorption. The famine, which became severe in 1876, and attained its climax in 1877, caused an unusually strong demand for money in India, both on Government and on private account, and con-sequently silver was bought here in far larger quantities than usual. But the market was aided in another way, in which it is no longer aided to a similar extent; and to this attention is directed in the following table:-

	Export of Silver.		Export of Council Drafts.		
	£		£		E
1873	2.794.479	********	13,939,095	*******	16,733,574
1874	6,683,431	********	13,285,678		19,969,100
1875			10.841.615	*******	14,072,881
1876			11.513.233	********	19,742,357
1877		*******	8,637,530	********	22,969,173
1878 (eight months)	3.466.406	*******	11.000.000		14,466,406

In 1877, the Indian Government transferred a very small amount of its obligations to India, and to effect that purpose raised a loan in this country. In 1878, with money very cheap in India, it raises rupee loans, and, consequently, has in two-thirds of this year, drawn bills (Council drafts) on the Presidency Governments to a much larger total than in the whole of 1877. Combining these two forms of remittance to India it will be found that the total commercial cash export to that country in 1877 was not three millions sterling higher than the average for the years 1874, 1876, and 1878. If the Indian Government had last year drawn bills to an average extent on India, we are of opinion that the silver market would have been far more materially influenced than it was, and that very possibly there would have been a

severe monetary and financial panic in that country. Now, it is apparent that the additional Council drawings have quite taken the place of the diminution in the silver remittances, and the result is a continued fall in the exchange, and in the price of the metal for which India is

the most important market in the world.

We have yet to consider the state of trade in India, which also exercises a powerful effect upon the exchanges, and the volume of our remittances. According to the Custom-house returns, this country's importations from India and Ceylon in the first half of 1878 were valued at 18,207,000l, against 20,170,000l in the corresponding six months of last year, the falling off being entirely apparent in the second quarter. We have imported much less wheat and less cotton; and though the recent improvement in the price of cotton may somewhat stimulate the inquiry for the Indian staple, the fall in wheat in London will in all likelihood be found to fully counterbalance that stimulant when the definite results of the year are published. There is other testimony to the same effect. For months past the "unfixed "tonnage" lying in Indian ports unable to obtain cargoes has been very large, and freights have for this reason ruled unprecedentedly low. Week after week we have read that the unfixed vessels in Calcutta alone have reached the aggregate of nearly 100,000 tons, while wheat freights, last year quoted 57s have recently been accepted at 15s. Indeed, had it not been for this circumstance, the export trade of our Indian Empire would have been much more reduced than has really been the case.

The result of all these considerations is not satisfactory as regards the immediate future of the silver market. As long as the Indian Government continue to draw bills at the rate of 16,000,000l a year upon India, and as long as trade in the Presidencies is slack, the Indian exchange may be expected to remain depressed, and the leading silver market closed to advanced prices. Apart from this, it is known that although Germany has sold so much silver that she need not now force sales, she would take advantage of any material advance in the market quotation to clear off the balance of her surplus stock. The upshot of which is that, even though the United States should not continue to produce silver quite at the recent rate of nearly 10,000,000l a year, that country, in the presence of opposing circumstances, is powerless to manipulate the price to any marked extent. It has lately been rumoured that silver had, pending the result of the International Conference, been stored in the Western States; and contrasting the rate of production with known sales, this may possibly be the case to some extent. But we do not think that such stores could be of sufficient importance to affect prices materially. We may, in conclusion, recall the fact that during the past few years about one-half of the exports of silver from the United States have gone direct to China and the East viâ San Francisco, and that in the current year the shipments from that port bid fair to equal those of 1877. Recently the East has been so glutted with silver that it will take some time to work off the surfeit.

JOINT STOCK BANKS IN THE DISTRICT OF MANCHESTER AND LIVERPOOI. ANALYSIS OF THE PUBLISHED ACCOUNTS FOR FIVE YEARS, BETWEEN 1871 AND 1877.

In a series of three articles, published in the Economist of 11th May, 1st and 15th June last, we analysed at some length the progress of the banks in Scotland during the period 1870-78. We propose now to apply the same kind of investigation to the joint stock banks of the district represented by Manchester and Liverpool. We do not say to the district represented by Lancashire, because there are large tracts of country in that county—the northern parts of it, for example—which have a banking character of their own. We have obtained the materials of this inquiry from the half-yearly supplements of banking reports published by the Economist in May and October for some years past. We have taken considerable pains to render the figures and the calculations accurate, and we believe that they are so. At the same time it is possible that in the classification and re-arrangement of so

many arithmetical details we may here and there have fallen into error. We are very confident, however, that no error has been committed which at all invalidates any of the important conclusions which the figures suggest.

We divide the fifteen banks selected into three groups, viz., (I.) Liverpool, (II.) Manchester, and (III.) banks extending over both these centres and beyond them.

The first table (I.) gives the position of the banks in 1877-78.

(I.)—JOINT STOCK BANKS in MANCHESTER and LIVERPOOL—1877-71.—Particulars of Branches, Capital, Reserves, Prices, &c.

[In Cols. 5 and 7 the 000's omitted; thus, 5,000 = £5,000,000.]

Note.—Parr's Banking Company—in 1871 only 10l per share was paid up. Liverpool Union—in 1871 only 15l was paid up.

There have been three new joint stock banks formed since 1871, viz., the Lancashire and Yorkshire (Limited), in 1872, having in 1877 half a million of paid-up capital and thirteen branches; the Manchester Joint Stock Bank (Limited), in 1873, having now 102,000l paid-up capital and one branch; and the Commercial Bank of Manchester, in 1875. Four or five banks arose in 1861-65, and the rest are among the oldest of the joint stock banks in the country. Two old and important private banks in Manchester, viz., Loyd, Entwistle and Co., and Sir Benjamin Heywood Brothers and Co., joined the one the Manchester and Liverpool District Bank in 1863; the other the Manchester and Salford Bank in 1874, leaving at Manchester several private banks, among whom Cunliffe, Brooks and Co., James Sewell and Nephew, Lomas and Co., and John Stuart and Co. are the principal. At Liverpool, there are still the two old and considerable private banks of Leyland and Bullins, and Arthur Heywood, Sons, and Co., and some others.

As is well known, none of the Lancashire banks have any circulation. The North and South Wales Bank has a circulation of about 60,000l among its country branches.

The increase of branches in 1877, as compared with 1871, is more than double; 91 has been raised to 213—and the increase is almost wholly in the Manchester and General groups. This extension of branches has, during the last ten years, been a marked feature in provincial banking all over England, and more marked, perhaps, in Lancashire and the manufacturing counties than elsewhere. It is one of the soundest lines of practice to be followed, especially on the part of strong and powerful banks, inasmuch as it renders the advent of new banks more difficult, and carries the facilities of banking to the sources of business. We say to the sources of business, because it is quite true that among the shopkeepers, tradesmen, and residents of small towns and large business there is still an enormous proportion of cases in which banking accounts are not yet adopted, and in which they might be adopted with the best results both to the parties themselves and the banks opening the branches.

(A.)—Capital Subscribed and Paid-up, and Reserves.

ici		Capital.	Reserves, and per			
Groups of Banks.	Sub- scribed. Paid-up.			Cent. of paid-up Capital.		
Liverpool (6)	Mln. £. 8.3 7.4 4.8	Mln. £ 2.6 1.8 2.0	Per Cent. 30 24 40	Mln. £ 0.9 0.8 1.1	Per Cent 34 44 55	
	20.5	6.4	31	2.8	45	

The proportion of reserves to paid-up capital is 45 per cent. all through,—a sound result; and the Manchester and General banks, especially the latter, exceed Liverpool very markedly. The paid-up capital is only 31 per cent., leaving 13,000,000l of subscribed capital available for emergencies. It will be seen by the high price of the shares in most of the banks that local opinion does not regard this large contingent liability as very formidable. The number of shareholders in the three groups is about eight thousand—in itself not a small constituency of customers.

We pass to the deposits, acceptances, and cash balances in the three years, 1877, 1875, and 1871.

NOTE.—The accounts of the Manchester and Liverpool District Bank were published for the first time in 1874. In October, 1863, this bank absorbed the old-established private bank of Loyd, Entwistle, Bury, and Jervis, of Manchester.

Entwistle, Bury, and Jervis, of Manchester.

The Bank of Liverpool does not publish the details of its accounts.

The Manchester and Salford Bank publishes the profits and capital only. In 1873 this bank absorbed the old and well-known private bank of Sir Benjamin Heywood, Bros., and Co., of Manchester.

Parr's Banking Company, Limited, has absorbed one or two pri-

There is hardly any increase of deposits at Liverpool in the six years. At Manchester the rapid progress of the Manchester and County has raised the deposits from nearly 5 to $7\frac{1}{2}$ millions. In the general group we can only compare 1875 with 1877, and the figures are practically unchanged. The Liverpool banks return their Acceptances at amounts which are not unreasonable. In many of the other cases this item is not given, and the omission is, we think, an error on the part of the banks themselves, both for the sake of their credit in the open market and for the security of their shareholders.

The cash balances generally include not only coin and bank notes, but money lodged in London with agents and bankers, in I very frequently Consols and India bonds, and even more miscellaneous investments. Hence it is impossible to reason one way or another, on the variations of what are called cash balances. Practically the banks would find it for their interest to set out plainly in their accounts the three categories of (1) coin and bank notes, (2) money at notice, (3) Consols, India bonds, Metropolitan $3\frac{1}{2}$ per cent. The extension of deposit banking and the extremely delicate condition of the ultimate bullion reserve in the banking department of the Bank of England have on mere grounds of safety rendered it necessary for

every prudent banker to secure his own position by adequate immediate assets, under some or all of the divisions indicated. Among the group of banks extending their business beyond Manchester and Liverpool, the North and South Wales Bank has a reserve of cash and money at call on a scale corresponding to the metropolitan banks we have recently referred to.* The proportion of these figures to the liabilities (deposits and acceptances) in the case of the North and South Wales Bank was, in 1871, 38 per cent.; in 1875, $35\frac{1}{2}$ per cent.; in 1877, 40 per cent. It is probable that equally satisfactory figures would have been shown in other accounts had the statements been published.

BUSINESS NOTES.

BILLS OF SALE.—We have not hitherto noticed the passage of the Bills of Sale Act of last session; but it is well worthy of remark. Its object is defined "to consoli-"date and amend the law for preventing frauds upon " creditors by secret bills of sale of personal chattels," and it will come into operation on the 1st January next. To prevent unregistered bills of sale, it is provided that they shall be duly registered within seven days of signature, or shall be deemed fraudulent; and a second bill of sale upon any portion of the same property drawn within seven days of the signature of a previous unregistered bill shall be absolutely void. All bills of sale must be attested by a solicitor of the Supreme Court; they will have priority in the order in which they are registered, and registrations must be renewed at least once every five years. Copies and extracts may be obtained by any person upon payment of a fee. Such attempts as have recently been discovered to renew bills of sale within a period of three weeks—hitherto the period granted for registration—thereby deferring, or avoiding such registration and publicity, can no longer be made, and the public will obtain early knowledge of the great powers which these documents give to their possessors. The Act will not apply to Scotland or Ireland.

ITALIAN COMMERCE.—Sometime ago we drew attention to the novel plan upon which the current returns of the foreign trade of Italy were being compiled. The figures for the first six months of 1878 have now reached us, and are remarkable in that they show an increase of $4\frac{1}{2}$ per cent. in the exports, against a decrease of nearly $8\frac{1}{2}$ per cent. in the imports:—

	1878.	1877.	Differences						
	(1st Half- year.)	(1st Half- year.)	Total.	Resulting from the Different Quantities. Moved.	Resulting from the Different Values of Quantities.				
	£	£	£	£	£				
Imports	23,374,354	25,534,448	- 2,160,094	- 866,589	- 1,293,305				
Exports	20,444,933	19,565,084	+ 879,819	+ 2,975,587	- 2,095,738				

When, however, we consider the movements in quantities only, we find that the increase in the exports has been as much as $15\frac{1}{4}$ per cent., while the falling off in the imports is reduced to the comparatively insignificant amount of less than $3\frac{1}{2}$ per cent. It is strange that in a year of such wide-spread stagnation foreigners have been found to buy so largely of Italian produce and merchandise.

Bankruptcy in the United States.—In accordance with the Act passed last session, the bankrupt law of the United States ceased to have effect on the 1st of September. Now proceedings in bankruptcy must be carried on according to the law of the particular State in which the property of the debtor is located, and as the New York Public points out:—"With as many different systems as there "are States, credit is likely to be much embarrassed for "a time, and may be considerably restricted. It is also "possible that rigorous measures for the collection of debts "may now be taken in many instances under State laws, "where proceedings in bankruptcy have been long pre"vented by the certainty that they would result in no "gain."

* See Economist, August 31, 1878.

PRESIDENT HAYES ON THE UNITED STATES DEBT .-In a speech recently delivered at Minnesota, President Hayes gave an interesting account of the progress in the reduction of the national debt and interest charges which has been made by the United States since the close of the civil war. The public debt, he pointed out, reached its highest point in August, 1865, when it amounted (including unadjusted claims) to 600,000,000l. It has now been brought down to 407,000,000l, so that within thirteen years about one-third of the total debt has been cleared off. On the 31st of August, 1865, the interest-bearing debt amounted to 476,000,000l, and the interest charge to 30,196,000l, or more than double the total expenses of the Government in any year prior to the war. The total interest-bearing debt is now 361,936,0001. and the annual charge upon it 19,360,000l; the debt having been reduced 24 per cent., and the interest payments in consequence of the refunding operations, 35 per cent. Another important improvement in the state of the debt is that "a few years ago the bonds were largely owned in "foreign countries. It is estimated that in 1871 from " 160,000,000l to 200,000,000l were held abroad, and there "was then paid from 10,000,000l to 12,000,000l annually to Europe for interest alone. Now it is estimated that "five-sixths of them are held in the United States, "and only one-sixth abroad. Instead of paying to foreigners 10,000,000l, we now pay them only about "2,400,000l, or 3,000,000l a year, and the interest "on our debt is mainly paid to our own citizens." The refunding of the debt, and consequently the reduction of the interest charges upon it, is now proceeding more rapidly than ever, and the outstanding bonds are passing more quickly than ever into the hands of the Americans themselves. Of the ability and determination they have shown to redeem their debt the people of the United States may well be proud. The one thing to be regretted is that the rapid return of bonds from Europe has, in some measure, been caused by a diminution of confidence in the good faith of the Government, consequent upon unwise financial legislation.

THE EGYPTIAN COMMISSION OF INQUIRY.—The preliminary report of this Commission has now reached us. At the outset the Commissioners state that while they "have " not had time to thoroughly exhaust every question, the in-" formation they have collected is sufficient to enable them " to render an account of their mission, the conclusions of which are not likely to be materially affected by subsequent discoveries. And the first of these conclusions " is that all so-called Egyptian Budgets have been wholly " untrust worthy. Not only are the accounts in such utter "confusion that to balance them properly is an impossi-"bility; they are also incomplete, many items both of "income and expenditure being omitted from them." Thus, the Ministry of War encashed 169,4001, rendering of any account it. encashments for the Nile embankments do not figure in the Budget, being held at the disposal of the Minister of Public Works. Similar appropriations of revenue have been made by the Cairo and Alexandria Governments, and so unreliable are the Budget statements "that," says the Controller-General "one is tempted to ask whether the apportionment of the total expenses of the Budget credit "is not an act of caprice on the part of the different "employés, having no connection whatever with facts." Still more capricious is the system of taxation. Nominally, taxes can only be established or suppressed by the decision of the Privy Council, sanctioned by the Viceroy. But practically this is a dead letter, and all manner of unauthorised and unjust taxes are imposed by the Government officials. To all exactions the natives are forced to bow, for "the Fellah knows that his complaints will never be lis-" tened to, and that the only result will be fresh worry and "vexation." Nor is it only the unauthorised taxes to which exception is taken. The Commissioners further state that "be the authority what it may which has multiplied "the taxes weighing on the people, there is hardly one "single tax that does not give rise to just criticism. Sometimes it is impossible to find a reasonable ground for the tax. Sometimes they are unjust in their incidence. In some cases the cost of collection exceeds by far the amount collected; in others, the collection implies vexa-

"tious measures contrary to the free development of com-" merce." It is with these abuses, and the evils of the corvée system, the military conscription, and the water laws, that the new Constitutional Government are called upon to deal. But the indispensable preliminary to the institution of much needed reforms, is the reorganisation of the finances of the country. The Goschen-Joubert scheme has evidently failed, for under it the Khedive contrived to run up a new floating which is estimated in the report at 6,276,000l. The increased liabilities have been further increased by deficits in the revenues of the past two years, and the present situation is thus summed up: The amounts allowed for the service of the Government by the Goschen-Joubert arrangement were as follows:-For 1877, 4,259,3501; for 1878, 4,403,960l; for 1879, 4,500,000l. During the course of the present inquiry the Viceroy voluntarily offered to accept a reduction of this amount to 3,200,000l, but this offer was probably based on the old system of accounts, in which each Administration deducted its own charges from its gross revenue and returned only the net amounts to the Budget. This system having been altered, the Commission estimates the total cost of administration, exclusive of interest, at 4,474,559l for 1878, and 4,529,559l for 1879. Adding to these the cost of interest and sinking fund for the two years — say, 5,931,106l in 1878 and 5,800,704l in 1879—we have the gross expenditure of the two years as: 1878, 10,405,665l; 1879, 10,330,263l. Finally we come to the yearly receipts, estimated at 7,819,000l for 1878; 9,949,000l for 1879, the difference in the two years being caused partly by the failure in the crops owing to last year's low Nile and partly by the payment in 1878 of 634,000l properly chargeable to the former year, 1877. The deficit for the two years thus amounts to—for 1878, 2,586,665l; for 1879, 381,263l; and adding to this the accepted amount of floating debt, 6,276,000l, we arrive at a total deficit of 9,243,928l.

These figures are, however, as stated by the report, subject to a deduction of over three millions sterling, as

follows :-

837,000 1,361,000 900,000

3,098,000

The amount for which there is immediate need is thus reduced to 6,146,000l, and no doubt an attempt will be made to raise this amount on the security of that portion of the surrendered Daira estates which is not already hypothecated to the Daira creditors. On the financial details it will be possible to speak more confidently when the full text of the report is before us. The shortcomings in the revenue for the past two years, however, suggest the question, whether it is possible for Egypt on an average of years to raise the 101 millions required to cover her present expenditure? Reforms in the system of taxation, however beneficial they may ultimately prove, are more likely at first to diminish than to increase the revenue, and it would be much more to the advantage of the bondholders to submit to a temporary reduction of interest than to burden their debtors with a weight of taxation under which it is impossible for them to rise.

THE PUBLIC REVENUE AND EXPENDITURE. The following are the receipts on account of revenue during the week ending September 21, as compared with

The above return, compared with that for the preceding week, exhibits the following changes:—

INCREASE.	francs.
Treasury account	27,576,340
Discounts	6,189,401
DECERASE.	francs.
Circulation	5,153,310
Private deposits	21,215,572
Cash	6.892,695

The advances on bullion have increased one million. The London exchange has remained firm at 25f 29c to 29½c, and gold has been exported daily, the amount for the week being estimated at over 300,000l. The exports will probably now subside, unless a further advance in the exchange takes place. The gold sent away during the last fortnight had consisted almost entirely of German coin, of which the Bank of France held a quantity, and which it sold at a price which permitted the purchase for export. The stock is, however, now exhausted, and the present rate of exchange will scarcely permit the export of other gold. Discount is unchanged at 1½, with small demands.

A rise in the price of Rente was looked for this week after the declaration of M. Gambetta, and the placing of the last of the Redeemable Threes; but it was checked by the fall on the London Stock Exchange caused by the difficulties in the East. Crédit Foncier shares have made a rebound on favourable news of the formation of the Ministry in Egypt. The following are to-day's closing prices, with the variations in the week:—Threes, 76.30 — 15c; Redeemable, 80.20 — 25c; Fives, 113.85 — 10c; Italian, 73.45 — 30c; Austrian gold 4 per Cent., 63.85 + 65; Russian, 1870, 82½ — ½; 1877, 84.10 — 90c; Egyptian unified, 290 + 1; preference bonds, 378 — 5; Bank of France shares, 3,075 — 25f; Crédit Foncier, 792f 50c + 35f; Suez Canal, 765 — 5f; Northern Railway, 1,385 — 5; Western, 776f 25c —; Orleans, 1,187f 50c — 5f; Eastern, 700 + 2f 50c; Lyons, 1,097f 50c — 2f 50c; Southern, 837f 50c — 1f 25c; South of Austria, 163f 75c + 1f 25c.

The French Treasury has now sold the whole of the 440 millions of Redeemable Three per Cent. stock, created for the purchase of railways. There is a little obscurity in the conduct of this operation during the last fortnight, but it will be no doubt be made clear in the report on the loan which the Minister of Finance will present to the Chambers. It may be remembered that on the 4th September the official journal published a note stating that as the purchases had amounted to 100 millions of capital the sales by the Treasury were suspended. A few days later, on the 9th, M Léon Say, in his speech at Boulogne, announced that the new stock placed amounted to 113 millions. No further information was given until Saturday last, when the official journal announced that the Treasury and Receivers-General would again issue the new Rente, and on Monday a fresh note appeared stating that the whole of the Rente to be created under the law of 11th June last had been disposed of, and that the operation was closed. In reality, the new Rente remaining had been all sold in Saturday's Bourse. Had no sales taken place between the 9th and the 21st, a sum of 327 millions would have remained on hand at the latter date; but the Messager de Paris affirms, on good authority, that on the 21st September a sum of 215 millions only was left unsold. The Treasury must have therefore disposed of Rente for a sum of 112 millions between the 9th and the 20th, during which period the issue to the public was suspended. That inference confirms the rumours in circulation recently that a group of financial houses, or the Caisse des Depôts et Consignations, had purchased 100 millions of the new stock on condition that the Treasury should not make any further issue for a certain time. The sales on Saturday were effected through the Syndicate of Agents de Change at the price of 79.75. At that price all the stock was taken by bankers. As a coupon will fall due on the 1st October, the Rente costs only about 79, while the price of the old Three per Cents. ex div was 76f 30c. Taking into account the present value of the premium on redemption, estimated at 3f 60c, the new Rente was finally sold nearly 1 below its relative value. Three different systems have been employed in the issue; the Rente was first sold through the agents de change for what it would bring, when the average price obtained was 85f; the high rate reached was due to the small portion first offered, and the large orders to buy the agents de change had received beforehand. The first buyers were dissatisfied at having been made to pay more than the new stock was really worth, and when the next issue was made the stock had become discredited, and the public held aloof, although the price had fallen to 81 or below. The Minister of Finance next ordered the sales to be made direct by the Treasury, at the average price on the Paris Bourse of the previous day, and under which arrangement the price fell to 80; and, lastly, through the agents de change at a price named, at which the remainder offered was taken by the bankers. The attempt to avoid the intervention of the financial houses in issuing the Rente direct to investors can hardly be said to have succeeded. The Minister of Finance wished to spare buyers the tribute paid to the bankers, but the public did not appreciate his intention.

The declaration of M. Gambetta that he was opposed to a conversion of the Five per Cents. has put an end for the present to the discussions in the journals as to the imminence of such a measure. The change of front of M. Gambetta has not failed to be commented on, for his own journal was recently one of the loudest in demanding such an operation. After the first issue of the Three per Cent. Redeemable Rente at 85, the Republique Française published an article, much remarked at the time, which, after declaring that the Republicans had reason to be proud of the state of the public credit, added "That confidence will inevitably lead before long to a measure which is henceforth indicated, namely, the conversion of the Five per Cents., for there is no reason why the State should continue to pay 5 per cent. interest when it can borrow at 3\frac{3}{4}, or oven less." Three weeks later the Five per Cents. had fallen from 113 to 110\frac{1}{2}. M. Gambetta's new declaration had an opposite effect, and at once produced a rise of 1 in that stock. M. Gambetta has not observed the precept recently laid down in his journal, when M. Léon Say was expected to make at Boulogne a statement on the subject of the conversion, that the Government had no right to utter words which would cause a rise or fall in the funds without advantage to the public service. In any case it is to be hoped that the subject will be allowed to drop until a conversion is really intended, for there is little doubt that these public utterances, printed or verbal, have been turned to account by well informed speculators. A leading daily journal publishes a long communication, signed a "Boursier," professing to give details of the jobbing carried on lately behind the backs of the Minister of Finance and M. Gambetta.

The French tramway companies, although generally making large receipts, have so far been complete failures from a commercial point of view. The costs of promotion and construction were so enormous that the profits are now scarcely sufficient to cover the loan charges. There are two great companies in Paris, the Northern and the Southern, but neither have yet paid any dividends from their earnings, and do not appear likely to pay any. The 500f shares of the former are now worth only 185f, and those of the latter, after being palmed on the public by clever financing at 200f premium, are now at 200f discount. The Company General of Tramways, established to construct lines in the provincial towns, has just called up the second half of its capital, or 250f per share, to buy in a part of its debentures, the interest on which absorbed all the profits. The value of the 250f already paid on the shares is depreciated to 45f. The Paris Omnibus Company, on the contrary, continues to exhibit excellent results, and is profiting largely by the afflux of visitors to the Exhibition. The receipts for the last week published amounted to 744,437f, against 463,911f in the corresponding week of 1877. The earnings from the commencement of the year to the 9th September amounted to 22,426,483f, an increase of 4,150,996f on 1877. The dividend of 10 per cent. paid last year will no doubt be largely exceeded, but the increase is already discounted, as the price of the 500f shares has reached 1,260. This company has laid down rails for trams on many of its lines.

The Semaine Financière declares that overtures for a new Italian loan have been made in Paris, and attributes to them the heaviness in Italian Rente.

The French Government is negotiating the purchase of other unprofitable railways, or rather the companies have demanded to be purchased by the State, and the applications are being entertained, for it would be manifestly unfair to limit the favour of purchasing at cost price to the nine or ten lines already taken over. The Government having once entered on that course will now find it difficult to stop, and will have to buy up eventually all the insolvent or worthless railways in the country, or provoke the jealousy of the share and bondholders of lines refused. The Government is also treating with some of the great companies to work the lines about to be purchased.

The Cote Europeenne contradicts a statement that the new Greek lean will be issued under the patronage of the Crédit Lyonnais.

The lithographic news sheet, called the Agence Russe, which is the Russian organ in Paris, states that the Treasury of St Petersburg, which has large specie reserves at Berlin, is about to bring them home in order to strengthen the foreign exchanges in Russia, and attributes the sudden rise in the discount in Berlin to that measure.

The suit brought by the auditors of the Crédit Foncier and a part of the Board to compel the governor and deputy-governor to call a fresh meeting of shareholders came on for hearing before the Paris Tribunal of Commerce yesterday, but the defendants made default, and the cause was adjourned to the 6th November.

The new number of the official Bulletin de Statistique contains a series of tables of the value of the imports and exports of both merchandise and specie in France during the last fifty years, 1827 to 1876 inclusively. A last table recapitulates as follows the general results in periods of ten years; the movement of merchandise represents the "special trade," which

excludes goods in transit or re-shipped from the bonding warehouses:—

	Merchandise. Millions of francs.				Specie. Millions of france.			
Period.	Im- ports.	0.0		norts ports		Balance of Imports		
1827 to 1836 1837 to 1846 1847 to 1856 1857 to 1866 1867 to 1876	4,799 7,764 10,771 22,005 34,076	5,215 7,128 12,238 24,301 33,065	+	416 636 1,467 2,296 1,011	1,809 1,711 3,633 6,877 6,479	697 754 2,244 5,025 3,007	+ 1,115 + 257 + 1,38 + 1,85 + 3,47	
Totals	79,415	81,947	+	2,532	20,509	11,7:27	+ 8,78	
Yearly average	1,588	1,639	+	51	410	235	+ 17	

It will be remarked that in the last decennial period, which included the payment of the Prussian war indemnity, not only did the imports of merchandise exceed the exports by 1,011,000,000f (40,440,000l), but France at the same time received a balance of 3,472,000,000f (138,880,000l) of gold and silver.

GERMANY AND AUSTRIA.

(FROM OUR OWN CORRESPONDENT.)

VIENNA, September 24.

Throughout the whole of last week the lead on 'Change was taken by speculators for the fall, who operated with especial freedom in Berlin. Some securities were depressed to what may be termed war quotations, including the shares of the Austrian Credit-Anstalt, those of the State railway, the Berlin Discounting Company, the "rentes" of Austria and Hungary, and the Russian bank notes. A surprising fact is that the silver rente is still sold at 1 florin 65 kreuzer, that is 2½ per cent. higher than paper rente, although notes are about on a par with silver. Yesterday the favourable news from Bosnia and the Herzegovina caused a change for the better, and the price of stocks and shares rose in consequence. The time is now drawing near when fresh demands will have to be made upon the money market to cover the expenses of war. The Minister of Finance is doing all in his power to obtain money upon the lowest possible terms. Thus, he took a loan from the Vienna Savings' Bank, at the lowest practicable rate, to the amount of 9 millions. The Savings Bank cannot, however, grant loans except on mortgages. Depretis has, therefore, mortgaged the new and unfinished palaces of the Court of Justice, the University, and the House of Parliament. This is, of course, but an act of formality.

If we compare the returns of the Austrian National Bank and those of the German Imperial Bank, we perceive that the harvest in Austria and Hungary is a very important factor to be considered at this season. The discounts of the Austrian Bank have been increasing continually since the 1st July, and have grown to the extent of 37½ million florins. The German Imperial Bank, on the contrary, has had its discounts reduced by 62 million marks, owing in some part to the advance in the rate of discount. The circulation of notes by both Banks has taken a similar course. Coin and bullion has not changed with the Bank of Austria, on account of the forced paper circulation. With the Imperial Bank of Germany, the stock of coin and bullion decreased 36 million marks, on account of the unfavourable rate of exchange, and in spite of the high rate of discount. The returns of the Austro-Hungarian sugar tax for 1878

The returns of the Austro-Hungarian sugar tax for 1876 have again proved how necessary the reform of this tax had been. About 49 million cwts of beetroot were declared, and the tax thereon amounted to 17,913,431 florins. From this sum, however, 16 per cent., that is, 2,866,149 florins, must be deducted for various reasons. The tax which was paid during the year from 1st July, 1877, to 30th June, 1878, amounted to 15,047,288 florins. The amount of tax repaid along the boundary line for sugar was 15,031,252 florins. Therefore, the tax for all the sugar consumed in Austria and Hungary would amount to but 16,030 florins for one year. It is, therefore, but just that a provisional impost of 6 millions should be demanded until the reform of this tax be completed and in operation.

The transactions of the Vienna "Saldirungs Verein" (Clearing Society) comprised the sum of 12½ million florins during the last week, which is an increase of over 3 millions as compared with the same week 1877.

Business in iron and steel has improved of late in Austria-Hungary. Prices have not yet risen, but greater quantities of rails and ironwork are being ordered. In Westphalia, also, the demand for Bessemer rails and rolled iron have increased, and the quotation for fine tin plates has risen. In Berne an international Congress has met, which has busied itself with the means of preventing the spreading of the philloxera. A treaty was agreed upon, which will be submitted to the opinion of the Governments, and which gives precise rules for the international traffic in vines. This treaty is intended to render possible the isolation of districts in-

fected with the philloxera, and to hinder the export of infected vines. In Würsburg, a congress of vine-growers took place, in which it was agreed that the best means of ridding the vines from o'dium is by sulphurating them. It was explained that the rarity of anything happening to American vines was owing to the fact that these vines were grown from seed. Experts, however, declared themselves against this method, as growing vines from seed produces too many different sorts, which is a means of degenerating the growth of vine. For this same reason the method of growing potatoes from seed when the disease of potatoes began to spread had to be discontinued.

A congress of German shopkeepers was recently held at Berlin, whose purpose was to demand of the Government that the co-operative societies should no longer be freed from taxation. Shopkeepers, it seems, are the same everywhere in the world. I remember asking of a shopkeeper in Rochdale where the stores of the Equitable Pioneers could be found, and he showed me the way in person, grumbling all the time that he should have to pay high taxes while the Pioneers went free.

The German Government intends to introduce post-office savings banks after the English pattern.

The Union of Swiss Banks will most likely cease to exist very soon. It seems that the expenses of the central office (50.000f) are considered too high.

The revenue derived from indirect taxes and the customs of the German empire for the first five months, from 1st April to 31st August, amounted to 61,124,247 marks, that is, 7,111,619

marks less than during the same period 1877.

The total of new money coined in Germany up to the 14th September amounted 1,633,375,745 marks in gold coins, and of these 314 millions was coined upon private account. The new silver coins amounted to 426,502,321 marks.

Correspondence.

THE BANK RETURN.

TO THE EDITOR OF THE ECONOMIST.

SIR,—I am completely at a loss to understand the object of the statement in your paper of Saturday, September 14, showing the proportion of bullion held by the Bank of England to the total liabilities, from 1853 to 1878.

Mixing up the amount of bank notes in circulation with the liabilities of the Bank in its banking department (as it was the custom to do previous to the Act of 1844) is calculated to lead to grave errors, especially on the part of those who do not, even at the present day, understand that the banking department and the issue department are totally distinct.

It would be most desirable that a paper, which is deservedly considered of so much authority as the Economist, should discard for ever a weekly publication, which, however suitable to the state of the Bank of England prior to 1844, is totally inapplicable to its existing conditions.

The issue department of the Bank might be continued in Threadneedle street, and the banking department removed to Burlington gardens. The latter might, I am ready to admit, be so mismanaged as to render it unable to repay its depositors, whilst the issue department might (and I can hardly see how it could be otherwise) remain perfectly solvent.

I infer, from some of your remarks, that you appear to apprehend that any sudden withdrawal of gold might create alarm as to the power of the Bank to discharge its ordinary

business as bankers.

It would be a very interesting thing if you could inform your readers as to what has been estimated as the probable production of gold in the world since the discoveries in Australia and California. Such a statement (of course only a probable estimate) could, I doubt not, be furnished by Mr Seyd, who has devoted so much time and trouble to collect statistics on this subject; but there can be little doubt that from year to year since 1853, the production has largely exceeded the consumption. All the gold produced, after deducting the estimated consumption for wear and tear on the gold coinage, and the estimated quantity consumed in manufactures—such as jewellery and gilding, must be in Now, there is no known article in the existence somewhere. world so readily attracted to any place, when it is in demand, as gold; and the power of this country to obtain it, can only be measured by the power of exporting or of giving in exchange the enormous quantity of its manufactures, or of tangible securities of every kind which this country is capable of exporting. So long, therefore, as in any part of the globe the production of gold is largely in excess of the whole demand for coinage and trade purposes, so long there will always be found ready means of obtaining all that can be required; and I cannot conceive how any alarm can seriously be entertained that there should be a scarcity of gold when it is required in this country.

The issue department, of which the Bank of England are

merely the administrators, is amply secured, in my opinion, by the Act of 1844.—I am, Sir, your most obedient servant, Shipborne Grange, Tunbridge, Thomson Hankey.

Sept. 19, 1878.

[The object of the article to which Mr Hankey refers, was to show the fluctuations in the total amount of bullion held by the Bank, and that a small drop comparatively in the sum held might be accompanied by a considerable rise in the rate of discount. This could only be clearly shown by arranging the figures in the form employed, which is the same as the "old form" given every week in the Economist, and continued by it since the end of the year 1844. This maintains a continuity of statement between the accounts of the Bank now and in past years, and enables a ready comparison to be made with the position of the Bank of England and the principal banks of the continent, the particulars of which follow the statement itself. The question of the interpretation of the Act of 1844 is a very wide one, but the opinion has been held by weighty authority that the provisions of the Act are not for the benefit of the note-holders, but for ascertaining the limit of issue; we trust, however, never to see them put to that test.—Ed. Econ.]

EXPORTS AND IMPORTS.

TO THE EDITOR OF THE ECONOMIST.

SIR,—As there are very many besides your correspondent, J. Dare, who are puzzled by the Board of Trade Returns showing such a very large excess of imports over exports, perhaps you may consider it worth while to relieve their anxiety by allowing me to give one short practical illustration as to how the figures in such returns are collated, and which will conclusively show that, provided we are not either secretly paying away property, or running into debt to other countries—the greater such excess the better for us. For instance, a merchant buys 2,000 tons of coal at Cardiff for 1,000l, and declares the value to the Board of Trade on its shipment at 1,000l. He sends the cargo to his correspondent at Manilla, where it will sell for 4,000l, and with the proceeds buys sugar to that value, which sugar on reaching England, will be worth—plus freight, profit, and charges, say, 5,000l, and is so declared to the Board of Trade. So that an export of 1,000l yields an import of 5,000l, and if the coal could, by any economy in winning, be sold to the merchant for 800l, or if on arrival at Manilla it would exchange for a larger quantity of sugar, so much the better for the English merchant. I have cited an extreme case but the principle applies in lesser degree always.

In the case of the United States, where at present exports exceed imports in value, a different explanation must be sought—not difficult to find, but too lengthy, I fear, for your space.—I am, Sir, your obedient servant,

Bristol, September 19.

ROBERT H. MARTEN.

Clearing-house return	53,845,000	105,867,000	73,135,000	71.517.000	71,120,000

The amount of the "other" deposits, compared with the "other" securities, showed in 1868, an excess of 3,201,485l; in 1875, an excess of 3,898,107l; in 1876, an excess of 11,507,286l; in 1877, an excess of 2,153,625l In 1878, there is an excess of 2,754,405l.

In 1868, in spite of an increase of 1,000,000l in the Government securities, the Bank return showed an expansion of 264,000l in the reserve. The money and discount markets remained quiet. In the stock markets, Spanish were flat upon the outbreak of the insurrection and the abdication of Queen Isabella. In railways, Midland stock was firm upon the inspection of the new Bedford and London line; but the approaching opening of the line from Praed street to South Kensington was powerless to stop a rapid fall in Metropolitan.

In 1875, withdrawals of gold from the Bank, and purchases by Germany caused rates to stiffen. Bills were more plentiful, and the demand for them more active.

In 1876, money continued very plentiful, and bills were discounted in the open market at the previous week's quotations, notwithstanding a pretty general rise in continental rates. Prices in the stock markets had fallen in consequence of the resumption of hostilities in Servia, Russian stocks being specially affected.

In 1877, the Bank return showed very little change, having regard to the end of the quarter being at hand. In the open market, best bills were quoted at $2\frac{5}{8}$, $\frac{3}{4}$ per cent., and were very scarce. The Government notified that tenders would be received for 3,000,000l Treasury bills, and the Indian Government brought out a 4 per cent. debenture loan for a similar amount.

The account of the Bank of France for the week ending September 26 shows the following changes:-

	Sept. 26.	Sept. 19.	Increase.	Decrease.

Converting the reichs-marc at 1s; the Austrian florin at 2s; the Dutch florin at 1s 8d; and the franc and poseta at 25 per 1l. American currency is reduced into English money at 4s per dollar.

DISCOUNT AND MONEY MARKET .- On Tuesday and Wednesday it was thought possible in some quarters that the Bank of England directors would yesterday have lowered their rate of discount; but the reasons for maintaining the 5 per cent. level, referred to last week, were still in force, and prevented a downward movement. Such a step would at once have operated upon the open market, already showing signs of greater willingness to compete for paper, and would have exercised a decidedly adverse effect upon the foreign exchanges. Thus, although the Bank has with patience won a stronger position, it would in our opinion be a questionable policy to yield to the wishes of the open market, and to lower the rate with the new quarter so close at hand. When that period has passed, we shall be better able to judge whether the Bank will be in a position to satisfy the November withdrawals of coin, and at the same time to run the risk of bullion purchases for America and the continent, which its recent action has effectually prevented. On Monday week the dividends on the funds will be payable; and until that date the market is likely to be well occupied. Today short loans were in request at from $4\frac{1}{2}$ up to 5 per cent., or about \(\frac{1}{4} \) per cent. above last Friday, while best bills were taken at 4 per cent., showing a similar decline. It is therefore still a feature that money for short periods commands a higher level than bills, and this shows that the resources of the market are still comparatively limited. Upon the least pressure, recourse is had to the Bank, as was the case to-day, and the Bank, we understand, still charges rates varying with the position of the applicant. The weakening of the discount rates in the market is alone attributable to the present absence of any discount inquiry. The condition of trade is thought to point to a prolonged dearth of mercantile bills, and they are, therefore, being secured at a present loss in the hope of seeing a profit later in the year. Happily, there was no confirmation to-day of rumours respecting financial difficulties in Scotland which had found credence in the Stock Ex-

This week's Bank return is the last of the quarter, and as yet gives no sign of the additional business to be expected next week. The discount and loan operations, represented by the other securities, show a reduction of as much as 648,903l, and since the beginning of September the diminution in this item has reached about 2 millions. The deposits are, on balance, rather reduced, but there still remains 466,260l to be added to the reserve accruing, 360,520l from coin and bullion, and 105,740l from the return of Bank notes from circulation. At this period, the state of the Government balance deserves special consideration. In the present return the public deposits are 4,674,065l, but, according to the Treasury statement, the Government balance in the hands of the Bank of England at the beginning of the week was only 2,253,6731. Hence, after allowing for another fortnight's revenue, it is apparent that to pay salaries and dividends, which in the next fortnight may be expected to absorb 7 millions, the borrowing will have to be considerable. During the week ended Wednesday the influx of gold from abroad reached 376,000l-being 16,000l more than the increase in the cash—while yesterday 32,000l was sent in, chiefly in bars from the continent, and to-day 100,000l in bars, and 258,000 sovereigns, were received from Australia. Since the return, therefore, 390,000l has been added to the store at the Bank.

Gold continues to arrive from the continent; and yesterday the Surat reached Southampton with 479,000*l* in sovereigns and bars from Australia and the East. The Nepaul is due in about a week with 88,500*l* from India, and various other amounts are on their way, and will probably be added to the store in the Bank. On the other hand, the arrivals of silver

are small; but at the same time the demand is almost as slack as ever, and the Eastern exchanges, though a trifle firmer, are still rather below the silver purchasing point. Thirty-five lacs of India Council drafts were allotted on Wednesday, at the minimum of 1s 7½ per rupee, which was fully ½ above the previous price realised; but next week tenders will be received for the increased amount of 40 lacs, or, say, about 340,000l. A few parcels of silver have been purchased for the continent, and the quotation may be called ½ higher than on Friday last—at 51½ per oz. Yesterday, when 51¾ was bid, the German Government rather unexpectedly appeared as sellers, and placed 100,000l at that figure. The Don arrived from the West Indies this afternoon with 161,400l in gold and silver.

On the 4th of October (Friday next) tenders will be received at the Bank of England for Treasury bills to the amount of 2,060,000l. They will, as usual, be issued in sums of 1,000l, 5,000l, or 10,000l each; they will be dated the 9th October, when payment must be made, and will be drawn for three or six months. As 1,891,000l in three months' bills are repayable on the same day, besides an amount of six months' paper, it is apparent that this operation will not add to the commitments of the money market, but probably somewhat reduce them.

The Frankfürter Zeitung states, on the authority of a St Petersburg paper, that the statements current respecting the issue of mortgages in paper roubles by the Central Bank of Land Credit in Russia having met with difficulties in Paris were incorrect. The general meeting of the shareholders of the Central Bank, on the 9th May, 1878, gave the committee the authority to make the issue. The permission of the Council of the Empire had, however, to be obtained before this authority could be exercised, and this cannot be done before the autumnal session of the Council, which will shortly take place. When the requisite authority is obtained, the issue of these mortgages is to be made both in Paris and in the home market.

On 'Change this afternoon, bills on Paris were quoted 1c firmer than on Friday last, and German were steady. Austrian, however, showed a drop of 7kr. St Petersburg rouble paper was \(^1_4\)d lower on the week.

The discount quotations current in the chief continental cities are as under. The German market quotations continue to harden, and the Berlin rate is but ½ per cent. under that of the Imperial Bank:—

The current allowances on deposits at the private and joint stock banks and discount houses, are given below:

Private and joint stock banks at notice... 4 per cent.

The Stock Markets.—The news from the North-west frontier of India is the great event of the week, and it has set its mark upon the prices of securities. Foreign Government securities are very slightly weaker from this cause; but it is in home investments where the principal decline is apparent. Consols have fallen ½, Indian Government stocks ½ to 1, Indian railways 2, and home railways irregularly, though in half-a-dozen instances the drop therein has reached about 3 per cent. The American market, excluding Canadian railways, keeps steady, but generally it may be said that the record is a decidedly gloomy one. There is little doubt it would have been still more so had not the easier condition of the money market, and the arrivals of gold from abroad, of themselves warranted a return of confidence. Besides which, speculation is so restricted just now that

prices were less likely to move. The half-monthly settlement was completed to-day without much difficulty, for although prices have nominally varied to a fair extent during the account, the volume of business represented has been very small. The carrying-over rates on Wednesday were mostly about the same as, and occasionally less, than they were a fortnight before, and it was noticeable that the charge was lower for deferring purchases in Egyptian securities. Generally, it may be said that the whole of the week's fall in Government stocks occurred on Monday, when first the telegrams announcing the refusal of Shere Ali to receive our mission were published, and later advices The news from Bosnia, have checked any recovery. however, which records a diminished opposition to the advance of the Austrian troops, and the better prospect of an agreement with the Porte, have steadied Austro-Hungarian investments. To-day, the home railway market was agitated, and stocks were offered for sale; which gave rise to a renewal of the rumour that there were likely to be financial difficulties in the North.

BRITISH GOVERNMENT SECURITIES.—The market has been far too quiet to exhibit any sign of panic; but nevertheless the quotations for the home funds have dropped fully $\frac{1}{2}$ per cent., and Indian stocks are still more affected. In neither country is the condition of the revenue such as to render any additional burden other than very distasteful, for an Afghan war will involve new loans. To-day, prices in this department were entirely without change.

COLONIAL GOVERNMENT DEBENTURES.—The market has shown considerable depression. Canadian 4 per Cents. have fallen $\frac{1}{2}$; Mauritius $4\frac{1}{2}$ per Cents., 2; New Zealand 1891, 2; and Queensland 4 per Cents., 1.

Foreign Stocks.—The comparative steadiness apparent in most foreign Government securities is owing to the fact that, though those countries would be interested spectators of a war in Asia, they would only be really affected in the comparatively remote possibility of its spreading to Europe. Turkey and Russia, however, are Asiatic Powers, and hence their stocks are quoted lower on the week. In Turkish the drop is heavy, for it is becoming apparent that the Sultan is likely to throw obstacles in the way of the carrying out of our projects of reform in Asia Minor, and the new Russo-Turkish agreement is viewed with distrust. With regard to Egyptian, the quotations for which have shown a good deal of strength, we have now received the full text of the preliminary report of the Commission of Inquiry, the financial situation disclosed by which we summarised last week. The necessity for a great change in the administration which the first part of the report disclosed, is most clearly and strikingly demonstrated, and as this is secured, it is hoped by holders of Egyptian bonds that the country's financial embarassments may soon be an affair of the past. This happy result of the action taken by the English and French Governments will, doubtless, however, be made a pretext for soliciting Government interference with various other defaulting States, and the precedent is of doubtful value. To-day, the changes in foreign stocks were of a trifling character.

TT TO TO				

Home Railways.—The railway department was exceptionally dull last week, and this tendency has now become much more marked, and has ended in a rapid fall. These who had hoped for a revival of trade have now lost all heart, and the settlement being over, sales of stock have been entered into for the new account. Besides which, it has been reported in the "House" that the Scotch stocks, the prices of which for some time have only been supported upon borrowed money have been pressed for sale in the North, and whether or not much that is said is true or false, there can be no doubt that they have led the fall. Both Caledonian and North British are 3 lower, and Great Northern A, North-Eastern, Metropolitan District, Midland, and Manchester and Sheffield also exhibit a very heavy fall. To-day, North-Eastern fell 2, North British, $1\frac{1}{2}$; Great Northern A and Brighton Deferred, $1\frac{1}{4}$; Great Western, Metropolitan District, Midland, and South-Eastern Deferred, 1; and many others $\frac{1}{2}$ to $\frac{3}{4}$.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :-

JOINT STOCK BANKS.—Agra have fallen 4; Bank of Egypt, 1; Chartered Mercantile of India, 1; Hong Kong and Shanghai, 1; and Imperial Ottoman, about 1. Bank of New South Wales are quoted 1 higher, and London and West-

TELEGRAPHS.—Cuba, and Western and Brazilian are respectively 1 and 2 lower, otherwise prices are unchanged.

MINES. - Richmond Consolidated have advanced 11 some favourable rumours, Pontgibaud have also risen 1, while Van and West Chiverton have each declined 1.

MISCELLANEOUS.—There has been a further fall in Gas Light and Coke, and Imperial Continental Gas, which are each 2 down, the continued alarm at the electric light being.

no doubt, the cause of the decline. Boston City Loan have given way 1, Nantyglo and Blaina 2, General Credit 1, Royal Mail Steam 1, and London General Omnibus about 21, while United States Rolling Stock have risen 1/2.

BULLION.—The following is taken from the circular of Messrs Pixley and Abell, dated September 26:—

Gold to the value of 392,000l has been sent into the Bank since our last circular, and, as there is not at present any demand for export, all arrivals will be purchased by that establishment. The Bokhara has brought 42,130*l* from the East. The only withdrawal from the Bank consists of 10,000l, sovereigns, for Lisbon.

Silver.—The extremely moderate supplies of silver keep the market tolerably steady, and although the demand in the early part of the week was but slight, an improvement in price was observed, and 51% was obtained. The result of the tenders for the India bills yesterday further strengthened the market, and 513d was the price; the rate is weaker to-day on the announced increase of the amount of Council drafts to be allotted next week, and 51% to 51% is the nearest quotation. We have received about 16,000l from New York during the week. The Peninsular

and Oriental steamer leaving to-day takes 8,000l to Bombay.

Mexican Dollars. — The Britannic and one or two other steamers have brought 20,000l of this coin during the week.

These arrivals could only be placed at 50½d per oz, showing a further decline in price. They have been taken for China, but will only be shipped next week.

Exchange on India for banks' drafts at 60 days' sight is 1s 74d Tenders for 35 lakhs of rupees of India Council bills were received yesterday; the amounts allotted were:-To Calcutta, 25,00,000 rupees, average rate, 1s 7.876d; Bombay, 10,00,000 rupees, average rate, 1s 7.875d. Applications on Calcutta, at 1s 7½d per rupee receive about 8 per cent.; and on Bombay at the same price, about 29 per cent. Tenders are invited for the 2nd October for 40 lakhs of rupees. The latest quotations from the East for bank bills at six months' sight are, from Calcutta 1s 8½d per rupee; from Hong Kong, 3s 9½d to 3s 9½d per dollar; and from Shanghai, 5s 2½d per tael. No quotation from Bombay.

The following are the quotations for bullion:—
Gold—Bar gold, fine, 77s 9d per oz standard; ditto, refinable,
77s 10½d per oz std; Spanish doubloons, 74s 6d to 74s 9d per oz
nominal; South American doubloons, 73s 9d to 73s 10d per oz;
United States gold coin, 76s 3½d per oz; German gold coin, 76s 3½d

Silver—Bar silver, fine, 51\dagged to 51\dagged per cz std, nearest; ditto, containing 5 grains gold, 52d per oz std; Mexican dollars, 50\d per oz, last price

Quicksilver, 6l 17s 6d; discount, 3 per cent.

A petition for liquidation has been filed in the Oldham County Court on behalf of Alfred Howe, of Castleton and Red Brook Mill, Oakewood, Rochdale, cotton spinner and manufacturer. The liabilities are stated to be 75,000l.

A petition for liquidation has been filed in the Manchester County Court on behalf of John Wild, of Manchester and Rochdale, woollen cloth and leather merchant, and lately carrying on business at Shaw, near Oldham, as a velvet manufacturer. The liabilities are estimated at 25,000%.

A circular has been issued by Mr Frederick Whinney, provisional official liquidator, stating that a petition has been presented to the Bankruptcy Court to wind up the affairs of Hamilton's Windsor Ironworks (Limited). The circular further states that arrangements have been made, and the necessary powers obtained, for carrying on and completing the existing contracts, and efforts are being made to enable the company to resume business.

The exchanges were yesterday:-

NOTICES AND REPORTS.

Indian 51 per Cent. Loan, 1859-60.—The Secretary of State for India states that notice has been published in India allowing an extension of the time for the transfer of notes and registered stock of the 5½ per cent. loan, 1859-60, until the 7th October, until which date notes and stock of the said loan will be received by the Bank of England for exchange according to the terms specified.

Turkish Defence Loan, 1877.—The payment is announced on October 10 of the interest then due.

Uruguay Consolidated 6 per Cent. Loan, 1871.—Messrs Thomson, Bonar, and Co. notify that they will receive, on 1st October, the four overdue coupons bearing the respective dates, August, 1876, February and August, 1877, and February, 1878, to be exchanged for bonds, to be issued in accordance with the convention concluded between the bondholders and the Uruguay Government, dated Monte Video, 5th July, 1878.
RAILWAY COMPANIES.

Bahia and San Francisco.—The available balance for the six months ended 30th June is 63,096l, out of which a dividend is proposed at the usual rate of 6½ per cent. per annum, while placing 4,500l to working capital account. The passenger traffic has amounted to 6,377l, compared with 5,993l. More merchandise has been brought from the interior, but the drought has affected the receipts in this direction.

Caledonian.—The directors have convened a meeting for the 10th October, in order to obtain authority to issue 1,640,000l, in 10l 5 per cent. preference shares, to be issued at 11l 10s, and to be convertible into ordinary stock, at the option of the holder, within five years. It will also be proposed to raise on debenture stock an amount not exceeding 500,000l.

Great Western of Canada.—Including 2,477l brought forward there is a credit balance for the half-year ended 31st July of 747l, after providing the full half-year's interest on terminable bonds and debenture stock. Revenue has been charged with 26,700l, being the amount expended during the half-year for renewals, but no further credits have been made to the renewal funds. The dividend on the preference stock for the six months to 31st July, amounting to 12,643l, has therefore not been earned, but will be a charge against future net revenue. This was also the case in the first half of 1877.

Maryport and Carlisle.-At the meeting on August 21, it was resolved to issue new capital to the amount of 70,500l, in shares of 5l each, to be alloted pro rata. The first call of 1l per share is payable on October 1, and the new issue to be deemed part of the ordinary stock and share capital.

Northern of Canada.—The gross receipts for the six months were \$323,217, against \$338,109, a decrease of \$14,892, and the working expenses were \$212,805, compared with \$213,084, a saving of \$279. With the addition of the balance of \$1,619, the net revenue was \$110,412, which has been appropriated to the payment of interest dividends, all of which have been met as they became due. as they became due.

Orleans and Rouen.—Messrs Samuel Montagu and Co. have been informed by the official liquidator in Paris that all claims for the first dividend of 15 per cent. must be made before the end of October. English holders may deposit their obligations at the office of Messrs Samuel Montagu and

Co., and receive their dividend when collected.

Ottoman-Smyrna to Aidin.—The receipts for the six months amounted to 42,648l, as compared with 41,188l in the corresponding period of 1877; the expenditure to 24,410l, against 25,829l, and the net profit to 18,237l, against 15,359l. The Council are advised that the Iradé of the Sultan confirming the convention between the Ottoman Government and the

company for the extension of the line will shortly be issued. Panama.—Messrs McCulloch and Co. announce the payment on 10th October of the coupons then due of the Panama

Railroad Company's general mortgage bonds.

Royal Sardinian.—The London agents state that the ascertained amount of the net profits will enable the Council to pay 4.66 Italian lire, paper currency, free of all Italian taxes, on the 40,000 preference shares, and 3.58 Italian lire on the 20,000 preference shares issued in 1875, on the delivery to the

company of the coupon No. 10, falling due 1st of July last, and of all the previous unpaid coupons.

Solway Junction.—The receipts for the six months ended June 30 were 2,690l, against 5,519l, the reduction being due chiefly to the decrease in the quantity of iron ore carried. There is a balance of net revenue of 102l, which, however, will not admit of the payment of any interest on the debenture stock; upon which on June 30 the interest in arrear was

BANKS.

Australian Joint Stock Bank.—The net profits for the halfyear ended June 30, after deducting rebate, &c., were 38,760l, which, with the balance brought forward, made a total available of 43,837l. Of this, 10,000l was added to reserve and 31,250l appropriated for a dividend at the rate of 10 per cent. per annum, and a bonus of 2s per share, carrying over 2,587l.

Bank of Victoria.—At the half-yearly meeting at Melbourne, on August 6, there was an available total for distribution of 38,475l, out of which a dividend and bonus together at the rate of 12 per cent. were declared, leaving 8,475l to be carried forward. The reserve fund remains at 230,000l.

Chartered Bank of India, Australia, and China .- For the half-year ended 29th June, an interim dividend at the rate of 6 per cent. per annum is recommended. This is the same rate of distribution as for the corresponding period.

Clydesdale Banking Company.—The London branch has been removed to the new premises, No 30 Lombard street.

Colonial Bank of New Zealand.—There was an available balance for the half-year ended June 30 of 40,027l, from which a dividend was declared at the rate of 7 per cent. per annum, amounting to 11,500l; 20,000l was added to reserve (making it 36,000l); 6,518l was allowed for rebate, and bank furniture and

stationery accounts; and 2,009l was carried forward.

Land Mortgage Bank of Victoria.—At the meeting at Melbourne, on the 24th August, a dividend was declared at the rate of 7 per cent. per annum for the half-year ended the 30th June, and 1,000l was added to reserve, which now stands at 9,0001. The dividend for the corresponding period was 6 per cent.

New London and Brazilian Bank.-It is proposed to pay a final dividend of 7s per share, making with the interim distri-bution, 6 per cent. for the year. For the previous twelve months the dividend was the same.

Nottingham Joint Stock Bank.—It is announced that the bank have appointed Mr Joseph T. Byng as general manager, late Bristol manager of the Wilts and Dorset Bank.

Oriental Bank Corporation.—An interim dividend of 10 per cent. per annum will be paid for the half-year ended 30th

June. The same distribution was made in 1877. Ulster Banking.—The year's net profits were 63,719l, and there is 71,030l to be dealt with. Dividends amounting to 20 per cent. have absorbed 60,000l, and after paying a 10 per cent. bonus on salaries, &c., there is 7,455l to be carried for-

MISCELLANEOUS COMPANIES.

ward.

Anglo-American Telegraph.—A quarterly dividend of 1 per

cent.—4 per cent. per annum—is announced. Chester Tramways.—Capital, 32,000l, in 10l shares. It is intended to construct and work about four miles of tramways at Chester. A contract has been entered into for the construction of the line and equipment with cars, horses, and stables for 32,000l, leaving the authorised borrowing powers of 8,000l untouched. The contractor also agrees to pay all pro-

motion and parliamentary expenses. Eastern Extension Telegraph.—An interim dividend has been declared for the quarter ended 30th June, at the rate of 5 per cent. per annum. The same rate of dividend was paid

this time last year. Eastern Telegraph.—For the quarter ended 30th June, an interim dividend of 2s 6d per share on the ordinary shares will be paid, and 3s per share on the preference shares for the quarter ended 30th inst.

London Gaslight .- The usual dividend, at the rate of 10 per cent. per annum, is recommended for the half-year. receipts show a diminution, when compared with those of the corresponding period, of 4,194l, owing to a reduction having been made in the price of gas, and also to there being a de-crease in the amount received for residuals. The arrangements for bringing coals to the works without transhipment have been completed, and steam-ships are now delivering coals at

the company's wharf, at Nine Elms.

Municipal Permanent Investment Building Society.—The society will declare an interim quarterly dividend at the rate

of 5 per cent. per annum for the quarter ending 30th inst.

Phænix Gas Light and Coke.—Dividends are recommended for the half-year on the various classes of stocks and shares at the usual rates, and the sum of 5,035l has been added to reserve, which now stands at 110,777l. The amount carried forward is 1,544l.

Reuter's Telegram.—The directors have declared an interim dividend at the rate of 5 per cent. per annum for the half-year ended 30th of June.

Western Union Telegraph.—The company will pay a quarterly dividend at the rate of 6 per cent. per annum, leaving a balance estimated at 665,5121.

West India and Panama Telegraph.-The company recommend a dividend at the rate of 1 per cent. per annum, free of income tax, for the half-year ended 30th June.

Whitworth and Company, Limited.-The accounts show a loss of 9,827l, after making the usual allowance for depreciation of buildings and machinery. Looking at this unsatisfactory result, the directors would prefer to resign if a suitable new board can be formed.

The Commercial Times.

POST OFFICE ANNOUNCEMENT.

On the 1st October next, the Republic of Peru will be admitted into the general postal union, and, thenceforth, the rates of postage chargeable on correspondence addressed to that country, by whatever route it may be forwarded, will be as follows :- Letters, 6d per half-ounce; post-cards, 3d each; newspapers, 1d per 4 ounces; other printed papers, legal and commercial documents, and patterns, 2d per 2 ounces. Unpaid letters from Peru will be charged 9d per half-ounce on delivery. Letters, post-cards, newspapers, legal and commercial documents, and patterns addressed to Peru may be registered, the registration fee being in all cases 2d, which, in addition to the postage, must be prepaid. As no post-cards bearing impressed stamps of the value of 3d have been issued, the ordinary or the foreign post-cards now in use must be employed when it is desired to send a post-card to Peru, adhesive stamps being affixed to the cards to make up the amount of postage required. Correspondence for Peru will be subject in every respect to the conditions of transmission applicable to correspondence addressed to countries of the postal union generally.

COMMERCIAL REVIEW.

FRIDAY NIGHT.

Discouragement seems again to be settling down upon the industries of the country; and this week's advices from India is already producing a bad effect upon trade with the East.

We have had a falling Cotton market this week, and the anticipations indulged in in the trade that the diminished stocks in the American ports would cause a rise during the autumn has thus far not been verified. The fact is that this country has already been stocked with cotton in excess of our consumption, and as the manufactured article has to be offered so cheaply, spinners cannot afford to give a higher figure. They have this week been compelled to accept less money for export yarns; and business can only be secured in shirtings at a slight abatement in price. In Wool, the London colonial sales of which close on the 7th October, there is a downward tendency, and buyers are by no means eager. Yorkshire woollen and worsted markets are not well supplied with orders, and small concessions in price are to be noted. Neither is the Nottingham lace trade doing well just now; and the reports which reach us from the linen and jute manufacturing districts are, if anything, less hopeful.

The Corn market is weak for all descriptions of grain, and the arrivals are still very large, and compete with extensive sales of home-grown corn. In wheat, quotations are lower than since the commencement of 1876, and seem likely to remain so. The Produce markets are also flat, and the demand languid. Oils are noticeably lower in price, especially

petroleum.

The Iron industries are again relapsing into a state of despondency. In pig iron, business can be done upon somewhat easier terms, and we notice that Scotch pig is again quoted lower in London. In the Cleveland districts, plates may be quoted half-a-crown lower, at 6l 2s 6d to 6l 5s, while bars and angles are 5l 10s. From Sheffield and Birmingham advices are very unsatisfactory; and nowhere do fresh orders appear to be coming forward in even moderate proportions. The steel trade is not so depressed as the iron; but here, also, prices are low. In the coal trade there are fair purchases to record, both of steam and house descriptions; but the production in the north, in the midland counties, and in South Wales is ample, and stocks are large. So that there seems little chance of the present low prices showing a revival. Tin is again cheaper;

copper fairly steady.

The following extract from the Liverpool Daily Post has reference to the unsatisfactory state of the cotton trade at this period, and affords matter for careful consideration:-

People unacquainted with the interior economy of the cotton industry are unable to reconcile the complaints about foreign competition with the statistics issued by the Board of Trade. They see that down to the close of last year the shipments of cotton piece goods constantly increased from year to year (leaving out the exceptional period of the cotton famine), and they infer from this that foreign competition has had little to do with the depressed state of trade in Manchester. The fact is, however, that there are yards and yards, and that the yards exported last year contained less cotton and were the outcome of less labour, yard for yard, than those of previous years. Twenty to thirty years ago the late Mr Burn, of Manchester, estimated the weight of cotton goods exported at 4.17 yards to the pound for plain goods, and 6.6 yards to the pound for printed goods. For the present and previous seven years the averages for the whole period were probably about 5½ and 7 yards respectively. In the case of woollen fabrics, the official tables give the weight as well as the number of yards exported; and the Board of Trade would confer a great benefit upon the cotton industry if they would obtain and publish similar particulars for cotton goods. But aside from the question of the weight of British cotton goods consumed by the outside world, the following figures show that, whereas England is using less cotton this year than in 1871, her competitors are using a great deal more:

CONSUMPTION SEASONS ENDED SEPTEMBER 30. 1870-71. 1876-77. 1b 1,273,256,000 1b 1,195,272,000 1,173,000,000 Great Britain..... 784,700,000 979,985,000 United States... 513,700,000 625,660,000

2,971,226,000 2,523,672,000 It may be taken for granted that the industry is suffering from over-production; but it is very clear that the over-production is abroad, and not in England. The quantity of cotton spun in Great Britain this season is over 20,000,000 lbs less than in 1870-71, whereas there is an increase of 74,000,000 on the continent, 161,000,000 in the United States, and 62,000,000 in India.

COTTON TRADE. THE

LIVERPOOL.—SEPTEMBER 26.

Cotton has been only in moderate demand this week, and with a continued free supply, quotations of most descriptions are again reduced. Sea Island has been freely offered, and in some instances rather lower prices have been accepted.

American has been dull and inanimate, and the demand has been freely met at †d per lb decline. For Brazilian there is still a fair demand; it is, however, freely supplied, and prices are generally †d per lb lower. Egyptian continues to be pressed for sale, and quotations are reduced d to d per lb. West Indian is neglected, and prices are rather easier. African is fully d lower. Peruvian has been slow of sale, and quotations are reduced ¹/₅d per lb. East Indian continues in fair demand, but prices generally

16d per lb lower.
"Futures" have been more freely offered during the past week, and, with a very limited demand, prices have declined 16d to and, with a very limited demand, prices have declined $\frac{1}{16}$ d to $\frac{3}{12}$ d per lb from last Thursday's rates. The latest transactions are—Deliveries: American, any port, L.M.C. Sept., $5\frac{5}{16}$ d; Sept. Oct., $6\frac{1}{4}$ d; Oct.-Nov., $6\frac{3}{16}$ d; Nov.-Dec., $6\frac{3}{3}$ d; Dec.-Jan., $6\frac{1}{16}$ d; Jan.-Feb., $6\frac{1}{16}$ d; Feb.-March, $6\frac{1}{16}$ d. Shipments: American, any port, L.M.C.S.V., new crop, Nov.-Dec., $6\frac{1}{16}$ d per lb.

The sales of the week amount to 40,280 bales, of which

860 are on speculation, and 4,550 declared for export; the forwarded is 1,890 bales, of which 740 are American, 20 Maceio, 800 Egyptian, 30 Fiji Sea Island, and 300 bales Surat, which makes the takings of the trade 37,760 bales.

The actual stock of cotton in Liverpool, declared this morn-

ing, proves to be 42,070 bales less than the estimate, showing a decrease of 73,350 American, 270 Smyrna, and 4,830 East Indian, and an increase of 1,950 Brazil, 27,770 Egyptian, and 6,660 West Indian. DDICES CHIDDENT

SEPTEMBER 27 .- The sales to-day will probably amount to about 10,000 bales, with a steady market.

IMPORTS, EXPORTS, CONSU	MPTION, &	C.	
	1877.		1878.
T	balas.		bales.
Imports from Jan. 1 to Sept. 26	2,450,901	********	2,245,198
Exports from Jan. 1 to Sept. 26		********	199,193
Stock, Sept. 26	598,160	*********	387,220
Consumption from Jan. 1 to Sept. 26	2,173,050	********	2,047,230

The above figures show :-A decrease of import compared with the same date last year of bales 205,700

A decrease of quantity taken for consumption of 125,820

A decrease of actual exports of 13,710

A decrease of stock of 210,940

In speculation there is a decrease of 39,090 bales. The imports this week have amounted to 17,798 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to date) is 24,000 bales, against 14,000 bales at the corresponding period last year. The actual exports have been 3,835 bales this week.

LONDON.—SEPTEMBER 26.

Annexed is a portion of the circular issued this week by the

London Cotton Brokers' Association:—
Only a moderate business has been transacted, and the market closes quietly at a decline of about \$d\$ per lb.

Manchester, September 26.—The condition of the cotton market is, in no respect, better. Throughout all departments sales have been on a comparatively small scale, buyers doing as little as possible, except where a decided advantage in price has been obtainable. Manufacturing yarns have met with less inquiry, and quotations rule barely steady. Export yarns keep in limited demand, though there is no giving way in values. In goods the inquiry has decreased, and stocks can only be cleared at ruinously low rates. Common and medium makes of shirtings and printing cloths have sold at a moderate amount. Long cloths and domestics continue in poor request, and quotations are quite three-halfpence per piece below the rates paid a week ago.

THE WOOL TRADE.

There is no improvement whatever to notice in the English wool trade, and hardly any is changing hands.

For colonial wools, the market has been flat. Messrs Helmuth Schwartze and Co. state that "the relapse does not extend to only the inferior and faulty descriptions, but touches also the better classes of combing wool. Good Port Phillip fleece especially sells very poorly. Good greasy wools have also become cheaper. In the case of New Zealands the lower level of prices is ascribed to the heavy condition, but it is also visible in good Port Phillip grease where this explanation fails. Good scoured combing wools are in fair demand at about 1d below opening rates. Faulty scoureds show a much stronger decline, and sell irregularly. Coarse crossbreds remain neglected. In Capes, scoured and grease are weaker; fleece had already receded a week ago, and have since remained unchanged. The difference from the best point is in the case of all Cape descriptions, about 1d per lb. Taking present prices all round and comparing them with the rates ruling in the early portion of the series, the market may be said to have, on the average fallen about 5 to 8 per cent."

on the average, fallen about 5 to 8 per cent."

At Liverpool, this year's fifth series of East India auctions was held here from the 24th to 27th inst. The catalogues comprised 13,353 bales, of which about 12,350 bales had passed the hammer to the 26th inst. at prices on the average quite equal to those obtained at the July series. The miscellaneous kinds to the extent of about 30,000 bales will be brought forward from the 1st to 4th proximo. Messrs Ronald, Sons, and Co. state:—"The attendance of home buyers was quite an average one, and several foreign consumers were also present, but com-

petition was for no class really active."

Bradford advices still show that there is no sign of revival in their wool market. Spinners fall back as far as they can upon their stocks, and come very cautiously into the market. There is some irregularity in prices, but there can be no doubt that the tendency is against sellers. Farmers are beginning to believe in the flatness of business here, and in most districts—Lincolnshire being still largely an exception—they are beginning to show signs of softening. In yarns there is again

but little change. Buyers bring increased pressure upon spinners, and in a few instances succeed in obtaining further concessions. But the bonâ fide offers are too few fully to test values. A little inquiry continues to be felt for various tube sorts. Twofolds are not wanted, with the exception of a few thick genappes. In 30s for Leipsic Fair a very few low offers have been made and refused. The Botany spinners are still busy. As regards pieces there seems to be no courage on the part of either home or foreign buyers to make engagements for next season. Soft fine goods are bought, but in ordinary fancies and lustre stuff generally, there is very little new business offering. The following is the conclusion of an elaborate estimate which we find in the Bradford Observer:—

 Net clip of wool in 1878 in United Kingdom as compared with the lbs.
 151,700,736 lbs.

 Net clip of wool in 1877 151,955,680 155,835,320
 155,835,320 lbs.

 The above enumeration does not include the Isle of Man, and Channel Islands

LABOUR.

IRON AND COAL.—On Saturday a notice was sent by the chairman of the South Staffordshire Ironmasters' Association to the secretary of the Workmens' Union, intimating that a meeting would shortly after be held of the Ironmasters' and Ironworkers' Wages Board, to consider the question of reducing the wages of the men in proportion to the recent reduction of 20s per ton in the price of finished iron. The dispute in the Leicestershire coal-field, caused by a large number of the colliers asking for a rise in wages, has terminated, the majority of the men resuming work upon the old terms. The mechanics employed in the Seaham Colliery, belonging to the Marquis of Londonderry, have come out on strike against the requirement to work ten hours per day in place of nine. Should the strike continue, nearly 2,000 men and boys will be the strike continue, nearly 2,000 men and boys will be idle. Lord Londonderry declines to interfere, leaving matters in the hands of his agent. Delegates representing miners in South Staffordshire and East Worcestershire districts have waited upon Lord Dunkley's chief agent, urging him to advise an increase of wages for miners. Mr Smith said if miners were willing to work nine hours and a half a day, he should be willing to advise an increase of 9d a day. The delegates argued that eight hours were sufficient and recommended that the tonnage eight hours were sufficient, and recommended that the tonnage system should be introduced. Considerable alarm has been occasioned among the miners of North Staffordshire by the announcement that Mr Lucas, the manager of Earl Gran-ville's collieries, intends introducing a sort of butty system into the working of his lordship's mines.

SLATE.—The extensive Orsedd Quarries, near Carnarvon, which have been closed for several weeks, owing to the dulness of the slate trade, were reopened on Saturday.

POTTERIES.—At a large meeting of delegates of flat pressers at Hanley, it was announced that the notices for reduction of wages were withdrawn. The meeting resolved to appeal to the whole of the manufacturers in the potteries to adopt a fixed standard rate of payment.

COTTON.—The strike of weavers at the mill of the Rhodes Manufacturing Company has terminated, and the hands returned to work on Thursday morning. At the beginning of the week the operatives submitted price lists of the Heywood Mill as a standard of their work, and the Board on Wednesday posted a notice on the mill to the effect that they would abide by the Heywood list, and that the mill would be opened. The hands state that this will make a reduction of $2\frac{1}{2}$ percent. in their earnings. The proposal of the directors last week was a reduction of 10 percent.

GLASS.—The workmen in the glass manufactories of Saint-Etienne (Loire) are on strike. They demand a new scale of payment, and that their own sons only should be received as apprentices.

THE CORN TRADE.

MARK LANE, FRIDAY EVENING.

The wheat trade during the week has shown the same dulness as noticed for some time past, the same influences still having effect, mainly the heavy supplies coming forward from America, and which since our previous report have received some further considerable additions, the shipments shown in the last weekly return being even larger than before. By these shipments the quantity on passage has been increased to 1,532,000, against 1,024,000 quarters at this time last year. From these supplies the quantity due to arrive in the ensuing month is heavy, and the precautionary withholding of purchases as far as is practicable until the market has been tested by the expected arrivals. The demand is therefore very meagre, and insufficient to take off the moderate importa-

tions that are at the present moment occurring, and with a difficulty in closing sales prices are further weakened. English difficulty in closing sales prices are further weakened. English wheats, by the last official returns, appear to have been sent forward more largely, but in London they have not been at all heavy, nor do the reports from the country markets indicate depression, so much from the extent of the supply as from the very unsaleable condition and quality of the samples offering. It has consequently been upon the commoner grades of wheat that the weakness of prices has been most apparent of wheat that the weakness of prices has been most apparent, and these in many cases show a fall of 1s to 2s per qr on the week as regards English, and 1s on foreign. Really good new wheats are but little altered, and prime old are no lower. While the heavy supplies on the way remain to be dealt with, anything lying beyond will be regarded as only a secondary consideration, still it may be noted that the visible supply at the points of collection in the United States. which for some time past has gone on steadily increasing, at length shows a falling off. Coast cargoes of American red winter have sold down to 43s, and rather under, per 480 lbs for United Kingdom. Southern amber realised 45s, and white Michigan, 47s per 480 lbs for the continent. Berdianski sold at 38s 6d, and Taganrog at 37s per 492 lbs for United Kingdom. On passage and for shipment the limited business has included Californian at 46s 6d per 500 lbs for the United Kingdom, and American red winter at 42s per 480 lbs for the continent. Flour continues to follow wheat in the decline of value, and in most markets has further given way 6d per barrel and 1s per sack. Prime malting barley does not promise to be plentiful, and looks firm. The more ordinary qualities are not a ready sale, and prices are irregular. Grinding sorts have again rather favoured buyers, but there has been little doing to test values, either on the spot or forward. Maize in perfect condition is rather scarce and without material change, but imperfect sorts are again cheaper. On the spot prices range from 23s 6d to 24s. Off coast the sales have been at 23s 6d to 24s 1½d for American mixed, and for shipment Danubian has sold at 24s 3d. Beans, with continued scant supplies, were again rather dearer. Peas sell in favour of buyers. Oats have not arrived at all largely, and meet a moderate demand at steady rates. The agricultural seed trade has not presented much change. Some few offers of new American red clovers are making at moderate rates, but from all quarters present crop reports are too vague for buyers to operate while looking forward to a good average yield in this country; while clover seed and alyske meet some little attention, chiefly for export account. A good business is doing in canary, and prices are fairly well maintained. Fine parcels of white mustard seed are freely taken off at full prices, lower qualities not enjoying so much attention. Good harm seed in control of the prices of the pri hemp seed is scarce.

COLONIAL AND FOREIGN PRODUCE MARKETS.

FOR REPORT OF THIS DAY'S MARKET SHE "POSTSCRIPT.

MINCING LANE, FRIDAY MORNING. Sugar.—A quiet feeling pervades the market, and some of the low qualities have barely supported last week's quotations. West India is steady, but sales to yesterday rather limited. The prices of Beet are firmer, which restricts business, as the buyers do not operate at any advance. Refined here continues very steady. The stock of cane sugar is still moderate, and the deliveries have been steady. 849 casks West India sold to yesterday, including the parcels by auction. Crystallised Demerara 26s to 28s; Trinidad Usine, 35s; refining sorts, 17s 6d to 20s 6d per cwt. There have not been any sales in floating cargoes. Yesterday the market was very dull, with transactions upon an unusually small scale. Brown sugars have now fallengto, the low prices which usually lead to sugars have now fallen to the low prices which usually lead to speculative operations. These show 2s 6d to 5s per cwt decline on last year's quotations at same date.

fauritius Privately,	450 ba	gs	syrups	sold	l at 18s	6d.	I TO EN	

Bengal.—133 bags at 19s 6d for soft low greyish Demerara sort Privately small sales of white Benares at 24s 3d to 24s 6d. Penang.-1,933 baskets low brown native part sold at 14s 9d. 609 bags at 15s 3d.

Foreign.-199 casks Porto Rico were chiefly taken in. Two lots sold at 22s 6d for good, and 24s 6d for very fine pale grocery. Privately a few sales reported including Centrifugal Cuba at 23s 6d.

Refined.—The feature in this market has been a decline of 3d to 6d upon French loaves; Say's, 28s; other fine makes, 26s 9d to 27s. London made pieces steady; stoved goods firm. The Clyde market is active with prices rather higher.

Beet Sugar.—Higher rates are demanded for the new crop for delivery. Austrian 88, quoted 20s 3d. French crystals sold at 25s per cwt f.o.b.

Glucose.-190 cases by auction sold without reserve at 15s 6d to 16s per cwt for German.

Molasses .- A few sales have been made, including Dominica,

at 10s 6d per cwt.

Rum.—The market is quiet, with moderate sales, including

Demerara at 1s 5d to 1s 6d, and a few barrels at 1s 7d per proof gallon. Total transactions about 400 puncheons, and other packages. No Mauritius now offering in first hands.

Cocoa.—A good business has been done privately, including some|West India and Caraccas, the latter at 98s to 98s 6d. Tuesday's public sales went off with less animation than lately experienced, but prices were unchanged. 596 bags Grenada chiefly sold at 90s to 94s. 255 bags Trinidad were about half disposed of at 88s to 95s. Some small parcels other West India at 84s to 88s. 355 bags Caraccas were taken in at 100s, and 556 bags Guayaquil at 105s to 120s. 82 bags Carapano sold at 86s to 90s per cwt.

COFFEE.-Prices have not experienced any general change, the market being less depressed than last week. Yesterday some parcels of plantation by auction sold at rather higher rates. Most of the lower qualities remain dull. 447 casks 67 barrels 113 bags plantation Ceylon by auction sold as follows: middling and dull to colory, 106s to 109s; good middling to fine bold, 110s to 118s. 222 half-bales Mocha at 100s 6d for mixed short berry, and 87s to 88s for ragged and ungarbled. 47 casks 7 barrels 540 bags Jamaica partly found buyers at 70s 6d to 80s 6d for low to fine ordinary. 238 bags East India: palish and mixed small berry 93s 6d to 94s. Of 73 bags Manila, one lot sold at 72s for Indan. 4,582 bags Costa Rica, chiefly mixed quality, found buyers at steady, and a few parcels good, at very full rates; low middling to middling, 96s to 103s; mixed at a range of 83s to 95s, with low and ordinary at 74s 6d to 80s. 4,582 bags other foreign part sold including Rio at 54s 6d to 65s; New Granada, 85s 6d to 88s; Honduras, 93s; pale, 79s 6d; Guatemala ordinary, 75s 6d to 84s; Savanilla, 85s to 88s per cwt.

| Temported | Line | Li

TEA .- The market is again inactive, but the diminished supply at public sales and the firmness of importers by private contract prevent any further reduction in prices. Fine teas almost neglected. Common to fair new congous now range from 8d to 1s 1d. In the latter grades, transactions are on a moderate scale. Second crop Oopacks have sold for export at 1s to 1s 3d. Common Tayshans, 8d to 8½d. In the public sales of 12,243 packages Ping Suey greens and fine gunpowders show some decline. There have been some heavy arrivals from China. During the past fortnight good medium to fine Indian teas have not supported the recent advance. Many other grades steady, but inferior neglected. At the public sales the competition has been less keen than of late. The supply during the week amounted to about 8,300 packages.

Rice is firm on the spot. A few cargoes off the coast have sold at the reduction established last week, viz., two Bassein, about 2,200 tons, at 10s; one of 870 tons Rangoon at 10s; and one of 895 tons at 10s 1½d per cwt open charter. Yesterday the market was rather quiet. Exports from Burmese ports to Europe to 21st September 521,700 tons, against 484,500 tons last year, and 472,300 tons in 1876 at same date. Cleaned rice is in steady demand.

SAGO.—No change of importance has transpired.

SAGO FLOUR.—100 tons Borneo sold at 16s 10ad to arrive, and 100 tons at 17s per cwt. TAPIOCA.—252 bags Singapore flake were only part sold at 23d

per Ib for good quality.

BLACK PEPPER.—There has been a limited demand on the spot. Penang sold for arrival at $3\frac{1}{16}$ d. At the public sales the sound portion of 2,338 bags Penang withdrawn at $3\frac{1}{8}$ d to $3\frac{1}{8}$ d. Seadamaged realised 3d to $3\frac{1}{8}$ d. Of 1,391 bags Singapore, a few lots sold at $3\frac{3}{8}$ d. 428 bags Malabar part found buyers at $4\frac{1}{8}$ d to $4\frac{1}{8}$ d per

Ib for heavy is unchanged.

WHITE PEPPER.—710 bags Singapore chiefly sold at 5 td to 6 td. with a few lots at 57d for fair to very good quality being previous rates. The sound part of 256 bags Penang withdrawn at 51d.

OTHER SPICES.—119 packages nutmegs partly sold on last week's terms. Small brown Penang, 116's and 110's, 2s; 124's, 1s 11d; very small and part defective, 1s 2d; low Java at 1s 5d. Bombay, brown, 82's, 3s 5d; other qualities, 1s 8d to 2s 3d; 76 packages West India, 1s 8d to 2s 10d. 44 cases Penang mace found buyers: good bright, 2s 8d; middling to fair, 1s 10d to 2s 2d; ordinary brownish, 1s 6d; very low and broken, 1s 1d to 1s 2d, the common kinds being lower. 47 boxes Java part sold at 1s 2d for very ordinary. Penang cloves have sold ad under the previous sale quotations. 23 cases in public sale found buyers at 1s 9d to 1s 10d. Zanzibar quiet. 50 bales fair quality realised 1s 3d. 566 bales from United States were withdrawn, excepting one lot of middling quality, which sold at 1s 24d. 49 cases Amboyna were taken in at 1s 51d to 1s 61d per lb. 56 cases Cassia Lignea of old import sold at 40s to 41s. 600 boxes, recently landed, withdrawn at 41s. 200 cases broken, part sold at 37s. 223 cases 210 bags Cochin ginger part found buyers: low to ordinary, rough, 49s to 52s; fair rough, 57s to 58s; fine soft washed, 89s; medium, 71s; small, 59s; One case bold cut, 107s; wormy at 53s to 61s. 230 barrels Jamaica brought full prices, viz., 60s to 89s per cwt for ordinary to good quality. 1,299 bags Pimento were chiefly withdrawn. Some small lots sold at 42d to 5d per lb for ordinary to fair quality.

SALTPETRE.—The market is firmer, closing at 6d to 9d recovery on last week's quotations. About 900 tons Bengal sold to arrive during the week at 20s to 20s 9d, and 150 to 175 tons landing at Some fine on the spot at 19s 3d to 19s 9d per cwt.

INDIGO.—Prices have further advanced on account of unsatisfactory prospects of the crop. Declarations for the forthcoming sale this morning were 7,600 chests.

IMPORTS and DELIVERIES of E. I. INDIGO to Sept. 21, with STOCKS on hand. 1878. 1876. 1876. 1878.chests 13,967 14,014 1877. 14,962 ... 14,259 ... 23,545 17,756 18,541 17,338 ... 13,271 ... 18,796

COCHINEAL.—The demand is slow, and about one-fourth part of the supply by auction sold, as the buyers seemed disposed to operate only at some further reduction on current low prices, 834 bags Teneriffe went as follows:—Grey black, 2s 4d; rosy, 2s 1d to 2s 9d; silver, 2s 2d to 2s 3d per lb. 67 bags Mexican with-

DRYSALTERY GOODS. — At the public sales 666 bags Bengal Turmeric sold at 15s 3d to 15s 6d. 2,070 bags Myrabolanes at 6s to 6s 6d for ordinary Madras. 40 bales Bengal safflower of the new crop sold at higher rates-from 5l 5s to 5l 17s 6d; low, 31 17s 6d per cwt.

Shellac is dull. 100 cases by auction withdrawn, and some parcels advertised for Thursday postponed until this day. 225

cases sticlae were taken in at 54s per cwt for good Siam.

Metals.—Present exceptionally low quotations do not lead to any return of confidence, and the markets, as a rule, are quiet. Since last Friday Scotch pig iron has experienced some further decline. Yesterday, the quotations were most depressed, but a steady business done in Glasgow at 46s to 46s 11d cash. The same prices accepted here. Tin has further receded in price. Some demand existed up to 56l 7s 6d for foreign. Yesterday a dull market. Straits and Australian, 55l 15s to 56l cash. Fresh arrivals of the latter. English ingots, 6ll. The Dutch Trading Company's sale of 24,200 slabs Banca on Wednesday established a price equal to 60l 5s per ton here. Spelter dull, and the price of Silisian nominally the same as before. Lead also inactive. There is not any improvement to quote in imported copper: Chili, g.o.b., 60l to 60l 5s, or 5s to 10s more for named brands. Wallaroo quoted 69l 10s; Burra, 68l 10s per ton. Quicksilver, 6l 17s 6d per bottle No change reported in other metals.

JUTE.—There has not been any new feature in the market, which remains quiet. Sales to arrive amount to about 10,000 bales, at easier rates for some of the marks and about 4,000 bales in dock. In Dundee, jute fabrics dull, and a want of animation pervades business generally. Supplies afloat are moderate by contrast with last year.

MANILA HEMP.—The demand has not improved, and transactions by private contract continue limited. Of 371 bales by auction a small portion only sold, including white Quilot at 29l to 30l 15s. 325 bales other kinds were chiefly withdrawn. 53 tons

Russian about half sold at 20l 5s to 24l 10s per ton.

Linseed.—A few sales have been effected, the latest barely up to last week's quotations. Calcutta to arrive viâ, Cape, 51s 6d to 51s 9d. On the spot, 51s 6d, to 51s 9d, ex warehouse; 51s to 51s 3d ex ship. A coast cargo of Azov sold at 49s 71d, and a steamer cargo to arrive at 50s per quarter. The supply affoat from the East Indies to London at date of latest advices was about 263,000 quarters, or not much over half the quantity at same time in 1877.

Oils.—The markets generally are without improvement. Olive is dull. Spanish quoted 48l to 49l per tun. Reports continue favourable for the olive crop. Linseed oil dull and lower. On the favourable for the olive crop. Linseed oil dull and lower. On the spot, 27l 10s; last three months, 27l; January to April, 26l 15s: English brown rape inactive. On the spot and to the end of the year, 31l 10s; January to April, 31l 15s. Refined on the spot, 33l 10s. Palm nominally unchanged. Ceylon cocoa-nut is rather dearer on the spot, up to 49l being paid. For arrival the prices range from 44l 10s for distant, up to 48l June sailing. Cochin does not maintain its relatively high value now supplies are coming not maintain its relatively high value now supplies are coming forward. Yesterday it could be bought at 65l per ton. Fish oils are unchanged: pale seal, 31l; sperm, 65l per tun; but inferior has sold at less. In 1876 the price was 19l per tun more than at

PETROLEUM OIL has fallen to a remarkably low price, and the demand is now steady. On the spot, 7 d to 7 d; last three months, 73d to 8d, last two, 81d to 81d per gallon.

SPIRITS TURPENTINE steady. American on the spot, 22s 6d;

last three months, 23s to 23s 3d per cwt.

Tallow.—Prices of Russian have fallen 6d to 9d, and the market is dull. This morning's quotations as follows: Petersburg new, 37s to 37s 3d; October to December, 37s; several sales at that price up to 37s 6d; December, 37s 3d; January to March, 38s; March, 38s 3d per cwt. A full supply of Australian in to-day's public sales.

POSTSCRIPT. FRIDAY EVENING.

Sugar.—A more steady market for West India. Business to-day, including the parcels by auction, 1,130 casks, or 1,999 casks for the week, besides 2,382 bags Barbodoes, 19s to 20s 6d; crystalised Demerara and Berbice, 24s to 27s. 1,365 bags cane Jaggery of the new crop withdrawn at 15s 6d. 91 baskets 136 bags Java 19s to 22s for brown and grey.

COFFEE.—258 casks 33 barrels 45 bags plantation Ceylon by auction were sold at yesterday's rates. 538 bags Jamaica part

sold at 70s to 70s 6d for ordinary quality from New York. Of 613 bags East India the portion sold consisted chiefly of damaged. 1,393 bags foreign partly realised previous quotations. RICE inactive.

SALTPETRE.—Bengal, August to December shipment, sold to arrive at 21s.

arrive at 21s.

Shellac.—898 chests by auction chiefly sold "without reserve" at 1s to 2s decline: B S L S orange, 75s to 76s; livery orange, 61s to 66s; native orange, 64s; bronze, 64s; button, 75s to 85s; low dark, 55s to 56s per cwt.

JUTE.—About 2,000 bales sold to arrive at previous rates. METALS.—Scotch pig iron firmer at 46s 71d per ton cash.
Oils.—English brown rape easier. 80 tuns fish oil by auction only part sold, at 28l to 29l per tun for yellow and straw.

TALLOW. - The official price of town remains as last week. 1,802 casks Australian by auction three-fourths sold without material change in prices: mutton, 36s to 38s; fine, quoted 38s 6d to 39s; beef realised, 35s 6d to 37s per cwt.

ADDITIONAL NOTICES.

TEA .- A large business is being done both for the home trade and for export, and prices remain firm. Several parcels of old season's congous, which have been held for several years, have recently been placed in the market, and have found buyers up to 8d per lb. Green teas have been sold at ridiculously low prices,

the loss to importers being reported at upwards of 25 per cent.

Green Fruit.—Messrs Keeling and Hunt report that lemons are without alteration in value. Barcelona nuts advanced in price. Good inquiry for Brazil nuts. French walnuts, owing to moderate supplies, are realising satisfactory rates. Fine Almeria grapes in demand; poor and those in bad condition selling at low prices. St Michael pine-apples and Spanish melons in request.

Oporto onions dull of sale. DRY FRUIT.-Currants show a further decline this week, and prices now rule at a lower range than has been known for good quality for a great many years; and there is every appearance of a further drop. Arrivals have been heavy, and the home deliveries are but moderate. Valencias, after the sort of panic lost week, have sold steadier this week, and about 600 out of 1,000 tons found buyers at an improvement of 1s to 4s, according to quality. New muscatels are neglected, because the packing is so bad. New figs are moving slowly, the quality is good. Sultanas are in very limited supply, and no direct ships will be here till late in October.

FLAX.—A few small sales made this week at 23l for good New

HEMP .- Some Russian sold at auction this week, "without reserve," at very low prices. Manilla is weaker, with more disposition to sell on the part of holders. SILK.—The market continues quiet, and prices are unchanged.

Tobacco.—There has been but few transactions in American tobacco during the past week, and buyers have, in most instances, only taken such as they required for immediate use, only one or two purchases have been made. In export nothing has been

LEATHER.—A moderate trade for most descriptions of leather has continued throughout the week, in which most articles have participated. At Leadenhall on Tuesday, there was a short attendance of buyers, and only a limited business was done. The supply of fresh leather is small, but with large stocks on hand no article is particularly wanted. Prices are unaltered.

METROPOLITAN CATTLE MARKET.

Monday, September 23.—The total imports of foreign stock into the port of London last week amounted to 22,535 head. In the corresponding week of last year we received 12,119; in 1876, 20,033; in 1875, 22,913; in 1874, 14,381; and in 1873, 15,334. At Liverpool, Bristol, and Southampton, 2,488 head of cattle, 1,525 sheep, and 1,384 pigs were received in the course of last week from American and Canadian ports.

The cattle trade has been in a very dull and weak state. Supplies of stock have not been over large, but in conjunction with the heavy quantities in the dead meat market, and the full average show at Deptford, have more than exceeded requirements; hence the demand has been flat. Fair but not excessive supplies of beasts came to hand from our own grazing districts, and the quality generally was satisfactory. Business progressed very slowly. A few very choice Scots, Welsh runts, and Herefords slowly. A few very choice Scots, Welsh runts, and Hereiotta made 5s 10d per 8 lbs, or 2d less than last week, but in the general run the fall was 4d, and occasionally 6d per 8 lbs. The average top price may, in fact, be taken not to have exceeded 5s 6d to 5s 8d per 8 lbs. From Lincolnshire, Leicestershire, and Northamptonshire we received about 1,800; from other parts of England, about 150; from Scotland, 44; and from Ireland, 1,000 head. The foreign side of the market was tolerably well supplied with beasts. America was again well represented, about 1,000 head having been received from there. There were also some Danish and Spanish.

The inquiry was limited at a decided decline from Monday. The sheep pens were moderately well stocked. Trade was very dull, and prices fell 2d to 4d per 8 lbs. The best Downs and half-breds were disposed of at 6s 8d to 6s 10d per 8 lbs. Calves were dull and weak. Pigs were drooping in value. At Deptford were about 1.800 beasts, and about 12000 sheep. 1,800 beasts, and about 12,000 sheep.

MAGNESIA. DINNEFORD'S

The Medical Profession, for over Forty Years, have approved of this pure solution as the best remedy for

ACIDITY of the STOMACH, HEARTBURN, HEADACHE, GOUT, and INDIGESTION.

And as the safest Aperient for Delicate Constitutions,
Ladies, Children, and Infants.

MAGNESIA. DINNEFORD'S

HOLLOWAY'S OINTMENT AND PILLS.—Rheumatic Pains, Tic Doloreux.— These diseases are unfortunately very prevalent in this country, and are frequently most distressing, sometimes for years baffling all medical skill to alleviate the sufferings of the victim. In no case have Holloway's Ointment and Pills failed to produce a cure. The Ointment exerts a peculiar and soothing influence over the nerves and muscles, relaxing spasms and subduing pain. The attack soon becomes milder, and the intervals between the paroxysms longer, until they cease altogether. The Pills restore the body from a weak and debilitated condition to a state of health and strength. Persons bedridden for months with rheumatic pains and swellings, after using the Ointment, have been cured in an incredibly short period. short period.

REMARKABLE INDEED, are the effects of LAMPLOUGH'S PYRETIC SALINE in Preventing and Curing Smallpox, Fevers, and Skin Diseases. Excellent, refreshing and invigorating to the constitution. Sold by Chemists. Have it in your Houses.
