NEWS IN OUR LOCAL RAILROAD CIRCLES

Mrs. W. J. Meador and small boy family of Posting Clerk Meador have arrived in this city from Amarillo, Texas. They will make their future home here.

Timekeeper Robert Watson has resigned his position as timekeeper in the superintendents office here and has left for Phoenix where he will make his future home. As yet his successor has not been named.

Superintendent William Matthie and Division Engineer Roy C. Kline have left for Los Angeles where they were called to attend the annual budget meeting in the general managers office. They will not return to this city before the first of next week.

Louis Simmons of San Marcial has accepted a position of fireman on the Albuquerque division and expects to move his family here within the next few weeks

Mrs. John Gratton wife of Maintenance Clerk Gratton, returned the first of the week from a visit with friends at Albuquerque.

Valuation Engineer J. B. Skeen was a visitor in the city the first of the week checking over Winslow water facilities in company with Assistant Division Engineer Frank D. Kinnie. Mr. Skeen returned to his headquarters at Los Angeles on Thursday.

Official announcement has been received here of the appointment of Mr. F. L. Hanna as assistant general freight and passenger agent at Phoenix vice F. P. Cruice, who has been transferred to Topeka several weeks ago. Mr. Hanna will no doubt soon call on the many friends that Mr. Cruice made while in this vicinity.

Alex Robertson returned from the Los Angeles hospital this week and will resume his duties as statement clerk in the superintendents office the first of next week after an absence of almost three months account of illness.

Stenographer Maud Bussert of the superintendents office spent last Sunday with relatives at Albuquerque.

Timekeeper Gilbert Graves has resigned his position with the Santa Fe and will leave within the next few days for Temple, Texas where he will make his future home.

Conductor W. A. Vandebur has returned from Florence, Kansas where he was recently called on account of the sudden death of his father.

Wiliam Brooks who was working temporarily as stenographer in the trainmasters office here has returned to Los Angeles.

Relief Agent George A. Fredericks is in the city this week having completed an inspection trip over the Phoenix end. He left for Rice, California where he will work for several days for the Arizona division. The Santa Fe has recently purchased the former Southern California railroad which extends from Rice to Blythe and Mr. Fredericks will instruct the agents on this road relative to Santa Fe practices.

Everett H. Lane of San Marcial, N. M. was in the city Wednesday of this week while en route to Anaheim, California where he has accepted a position in the station service. Mr. Lane's relatives reside in this city. He was formerly agent for the Santa Fe at the above mentioned location.

Last Sunday Brakeman O. G. Mead received a very painful injury while with Conductor Howard on an extra west at Flagstaff. His injury was caused by a sudden application of the air which resulted in his being knocked on his shoulder. His injury was serious enough to call for immediate medical aid at Flagstaff. He was then taken to the company hospital at Los Angeles. At this writing he is reported improving.

Brakeman R. D. Sowell of San Marcial, N. M. has accepted a position here. His wife and children have arrived from Birmingham, Alabama and will make their future home here.

Conductor W. B. Henderson received a very painful injury when he accidentally fell at Williams and broke his left wrist. He left for Los Angeles where he will enter the Santa Fe hospital.

Switchman E. C. Belding left this week for Los Angeles where he will enter the hospital for treatments. Mrs. Belding accompanied him on the trip.

Master Joseph Babcock, son of Electrician Babcock has returned from a short visit with friends at Phoenix

Conductor Harry Ellison and wife have left for Los Angeles where they will visit friends for a few days

Miss Francis Maynard stenographer in the superintendents office has returned from Phoenix where she has been for the past few days.

Yard Clerk Ben Vanderbur returned this week from Florence, Kansas where he was recently called on account of the death of his father.

Miss Marvel Penrod, daughter of Conductor Penrod, is visiting friends and relatives at Phoenix this week.

Switchman B. Vaughn made a business trip to Prescott this week.

Engineer C. D. Anderson and wife are spending the week end at the Grand Canyon.

Brakeman J. W. Bean made a business trip to Flagstaff this week.

Mrs. D. M. Burney, wife of Engineer Burney, is visiting friends at Los Angeles this week.

Mrs. J. D. Carathers, wife of Fireman Carathers, is spending the week end at Seligman.

Engineer L. O. Hohn and wife are spending this week with friends at Phoenix.

Callers Guy Plummer and G. J. Tanner took in the sights at Holbrook this week.

Brakeman O. N. Smyth is taking a few days off and has left for San Diego where he will visit relatives.

Mrs. J. R. Vorhees, wife of Fireman Vorhees, has left for Los Angeles for a visit with relatives.

Brakeman F. E. Thomas and wife are visiting this week at Phoenix.

RED CROSS ROLL CALL

In many ways the National Convention of the American Red Cross, at Columbus, Ohio, the first week in October, gave renewed proof of the sentiment that lies behind the permanent program of service to humanity. The delegates from Chapters in all parts of the country brought tangible evidence of the enthusiasm of the workers who are directing and carying on in conformity with that program. Representatives of the many sided national life—of the masses, the public in its larger sense—bespoke the interest in and the positive demand for a continuance of the activities which the Red Cross has set up. There is an obligation to ex-service men, in behalf of the American people; there is duty to the rest of the population, in behalf of the people for themselves.

On the Red Cross Chapters devolve a double duty in the premises. They must not only execute the tasks for which they have elected themselves responsible; they must mobilize their communities in support of the tasks which are for the genral good. The muster roll is the membership roll; and the fact that has to be faced is that, notwithstanding the popular approval if the Red Coss idea, the general public is not going to form in line before a registration booth for the purpose of signing the roll. Accepting this for a fact does not imply any lack of popular interest, nor does it signify any practical barriers to the achievement of ideals. There are practical ideals. Those of the Red Cross are such. The trouble wth too many idealists is that they asume the ideals may be reached in some ideal way, whereas it requires the hardest kind of practical work to bring them to realization.

"Go and get them." That's the solution of the Roll Call problem in every Chapter. It means personal solicitation house to house and person to person canvass of all eligibles. Pageants, float parades, poster displays, et cetera, are valuable adjuncts in concentrating actention but they will never bring great results detached from the personal element in the equation. They are wasted efforts cnless backed up by the most intensive energy in getting to the people registration book in hand and putting it up to every individual to affirm his membership.

The worker's enthusiasm isn't worth shucks if it be imagined it is a contagious sort of thing which will affect the masses who primarily are engrossed with their own affairs and whose interest in and sympathy with the work of the Red Cross is an incidental matter. The enthusiasm that counts begets laborious action and that of the Red Cross variety right now finds its objective in "Go and get them."

With the homely truths here set forth in mind, Chapter Membership Committees which apply the indicated rules of action need not worry about quotae, financing of Chapter activities and the like. But where the rules in question are not followed in principle the Roll Call will fall short of what it should be.

NEW LOAN AGENCY IN ACTION

The Albuquerque Journal of Wednesday says that the local members of the new agricultural loan company met Tuesday afternoon in the Armijo building for the purpose of passing on loans. An executive committee was appointed whose duty it is to investigate the loans and render decisions. The members of this committee are Lee Baldwin, A. G. Simms and J. B. Herndon.

Several loans were brought up and passed upon, after which they were dispatched to Washington, D. C. for final action.

The following bankers from out of the city met Tuesday with the members of the agency: A. F. Ferr, president of the El Paso Bank and Trust company of El Paso; T. M. Quebedeaux of the Arizona State bank of Winslow; and S. J. Thomas of Holbrook, Arizona.

BAKERY SALE

St. Martha's Guild will hold a bakery sale on Saturday November 5th beginning at 10 o'clock at Babbitt Brothers store. The Guild ladies are also taking orders for tying comforters or the making of ladies' and children's sleeping garments. Ring Phone No. 159 for information.

$5.00 REWARD

$5.00 reward will be paid for the arrest and conviction of any person or persons breaking street lamps.
ARIZONA ELECTRIC POWER CO.

OUR OIL FIELDS AND THEIR PROBABILITIES

A rough resume of a visit to the Holbrook oil fields include many things pointing toward new history being written for that section of the country. Much activity is being shown in the field by capital eminating from sources variously scattered over the country. Drilling has been an actual fact in the field for many months, but like all new fields, has been visited by many handicaps. Because it is an unproven field so far as actual commercial oil development is concerned, the doubting voice of the pessimist is raised against is as it has been raised in negative expression in every new field of the country. It is not a long number of years ago that oil was unsought in this western country. Pennsylvania and Ohio were the centers of the only great pools of the North American continent. Yet California pushed to the top of the ladder in production and remained there until the great fields of Oklahoma and Texas were later brought in through the eforts of the qualified engineer and the capital which is willing to back him in his determinations. Wyoming has been brought into the light also with its wells and Utah and Kansas have demonstrated the presence of oil in their landed areas.

This does not in any manner prove that Arizona and the Holbrook field is destined to become a producer of commercial oil, but it does demonstrate that the great mines and oil wells of the country have become producers of wealth through the direction and intelligence of the qualified engineer. and, so in the Holbrook field, geologists and engineers of national reputation have reported geological conditions as correct for the forming of oil pools from which commercial quantities of oil should be extracted. Again, it cannot be said that this will result, yet data recently compiled under the direction of a reputable statistican evolves the fact that 68 per cent of the areas reported favorably upon by qualified engineers and geologists have become proven territory. Upon this basis the Holbrook field has a two to one chance of becoming productive of commercial oil where drilling has been under the guidance of qualified knowledge and experience. In consideration of the great fortunes that have been made in oil, this must be looked upon as an investment that compares favorably with investments made in any wildcat field. On the other hand, there seems to be undisputed evidence that oil in small quantities have been already found; that the shallower oil stratas have in an instance or two been tapped, but for reasons unknown to the writer, publicity has not been prone to publish the apparent fact. This is undoubtedly a part of the game and the obtaining of more area is the foundation upon which the oil companies are probably working. which, in itself, is only an argument for the field even with the delay that may be disgruntling to the investor who wants quick returns and wants them big.

Under the present system of laws operated through the corporation commissions it is practically impossible for any company to profit through the sale of stock. No matter, therefore, what their methods might have been under different conditions such as might have maintained several years ago, the company which is expending its money in the field of development today must hope to profit through the proving of a paying property else they will have no substantial profit. The corporation commission is a protection which is thrown around not alone the company but also the stock investor. The good intention of the company must be evidenced in its application and through the investigation of the corporation commission before that commission will grant to the applicant a permit to offer its stock to the public. The stock of the promoters is held by the commission in pool until such time as the company shall have proven itself to be honest in its efforts and again we have the fact that the promoter must await his profit jointly with the cash purchaser and can in no manner unload to the detriment of the other fellow. The purchaser of stock in the Holbrook field puts his money into a wildcat district. This is beyond question. The company from which he may purchase stock should be investigated by the purchaser, but if the corporation commission has given its sanction to do business, there must be an evidence of honesty of purpose expressed somewhere else the commission would not have given such permit for corporation commissions are just as vain as individuals and are not intentionally committing any act which will bring just criticism to its department of the state government.

All in all, the Holbrook field is just where every oil field in the country has been at some time. It is wildcat, but it is nearing the point when the word will go out that the Holbrook field has brought Arizona into the list of oil producing states, or, that news space will be devoted to other matters and it will be forgotten. No one thought a few years ago that Texas would ever produce more oil than our own great state, but it has, even with the increased production that California has maintained from year to year.

Having presented the phase of protection which the corporation commission exerts over the affairs of corporations and the marketing of stock let us turn for a few moments to the matter of protection which the mining engineer and geologist offer to the stock investor as applicable, not alone to the Holbrook field, but to all mining and oil sections.

There was a time within the memory of people living today when mines were made by the indiscriminate sinking of shafts, and the running of tunnels. The work was planned by the miner whose knowledge of geology and mineralogy was confined to his own experiences. He was probably a good miner and knew how to do his work. Silent witnesses are to be seen on every hand throughout the mining country of the results of this kind of mining. Today, however, the mining capital of the country makes no investment until the mining engineer has made a favorable report on the mining condition, the geology of the district, and the possibilities of finding ore bodies. This does not insure certainty that paying mines are to be found at every point where the engineer may determine a possibly, but it has raised the chances from the biggest gamble to a point where the percentage of success can be figured.

What is true of the mining industry is no less true of the oil producing industry, and, perhaps to a greater extent the determinations of the oil geologist are to be respected for he has a much larger field of research upon which to base his opinions. The geology of oil, however, is of more recent study and application, but the results have been likewise as beneficial to the production of oil as of metals.

The government geologists of the U. S. Geological Survey made note a number of years ago of the sedimentary formations of the Holbrook area as prospective of oil. Dr. Herbert E. Gregory of the survey made mention of this fact but at that time the oil industry was foreign to the Rocky Mountain section and his mention was passed with little notice except perhaps by a few of the local people residing within the district.

(Continued to Page 5)

MEN CROWDED OUT OF SUNDAY SCHOOL

Since the Promotion Day services at the Christian church and the greatly increased attendance, the men's class has literally been crowded out of the Sunday school. As a result they are planning to build a temporary room outside the present building for their own special use. It is the idea to ask the men to come together at some appointed time, when convenient, and construct the room in a few hours. Such a room built especially for the men's class will make it possible for this class to grow and carry on its activities as it has not been able to do under the crowded condition. Any men who are not now in Sunday school and who would like to join our men in an enterprise of this kind and join our men's class will receive a hearty welcome. We want to build up a large men's class. Come on, men, let's go.

M. E. CHURCH SERVICE

9:00 a. m. Bible School.
11:00 a. m. Morning Worship.
6:30 p. m. Epworth League.
7:30 p. m. Evening Service.

Word has been received from Rev. Enyeart that he expects to reach Winslow Friday, not later than Satrday, and all services Sunday will be in his charge. Come tothe church of the Friendly Hand and give him a hand in the work that he has been sent to do among us.

Our Bible school is a busy one, much interest displayed in the lessons of Paul's work among the Gentiles. Come and learn with us.

MEET INSTANT DEATH

Train number 8 Saturday morning near Cliffs just this side of Flagstaff struck a Nash automobile and instantly killed F. E. Hindman and his wife. It was evident that they were motoring on their way to the cliff dwellers ruins. It is stated the curtains were all up on the machine and it seems probable therefore they did not see or hear the approaching train. The train struck the rear end of the machine tearing it off and throwing it and the occupants of the car fifty feet. They were on their way from their home in Denver to visit a daughter living near Los Angeles. They were about sixty years of age.

A new system of marking grades on the report cards has been adopted this year. Instead of marking from 70 to 100 as the teachers have been doing in former years, they are using the numerals from 1 to 5.

One—Superior work, or from 92 to 100.

Two—Good work, above the average, or from 85 to 92.

Three—Average work, or from 85 to 92.

Four—Passing, but below the average, or from 78 to 85.

Five—Failure.

C—Work is conditional or incomplete.

HALLOWE'EN PARTY

St. Paul's Sunday School held their Hallowe'en party in the Guild Hall Monday evening and the one hundred people present report an extremely pleasant time. The hall was decorated with the usual symbols of the season; biack cats, and witches, etc., being in evidence.

A program of music and recitations followed with Hallowe'en games and a real fortune telling witch, filled the evening.

A splendid llunch was served by the Sunday School teachers to their many guests; the children also received Hallowe'en favors and candy.

One of the most gratifying features of this affair was the fact that all religeous denominations in town were represented. Unfortunately Rev. Gillies was unable to be present. This is the first of a series of parties to be held in connection with the different branches of the church work.

Schools Close Thanksgiving Week, November 21 to 29

It has been the custom in years past in Winslow to close school for Thursday and Friday of Thanksgiving week; then later in the year an institute is held for two or three days to comply with the state law.

This year the State Superintendent requested school boards to close school for the week, allowing their teachers to attend the State Teachers' Association for the first three days of the week and having the usual holiday the last two days. Thus the same amount of time would be lost but at one time rather than at two.

The School Board in Winslow has acceded to the request of the State Superintendent and has ordered schools closed during the week, November 21st to 25th.

BOARD OF SUPERVISORS WILL BE ENJOINED UNLESS---

The 150 names which were published last week as signers to a petition instructing a committee to immediately proceed to enjoin the supervisors in the matter if the Winslow-Moqui reservation road has been more than doubed this week. As a result the injunction papers are all signed and sworn to and are ready for filing in court. If the board continues its stand against the wishes of the Winslow people at the meeting Monday, the complaint will be at once filed. Mr. F. T. LaPrade, the first signer of the petition and probably the largest tax payer in the city makes the affidavit in the injunction proceedings and will be in attendance of the board meeting on Monday to see what action they will take.

HOW I CAN MAKE THE HIGHWAYS MORE SAFE

More than 200,000 school children are to have a chance to help make Southern California the safest territory in America for motoring, according to an announcement just made by the Automobile Club of Southern California.

All children in school under the age of fourteen are to be given an opportunity to get a trip to the nation's capital at Washington and also to aid in the prevention of accidents by writing essays on "How I Can Make the Highways More Sofe."

All grammar school teachers in this locality will also be called upon to engage in a safety contest with a reward of $500.00 and a trip to Washington with all expenses paid, for the purpose of preventing accidents in this county.

Both contests, according to Automobile Club officials, are to be conducted by the Highway and Highway Transport Education Committee in Washington, with representatives in this section.

Any grammar school pupil fourteen years old or under may compete in writing an essay, about 500 words in length, telling about traffic rules, how to cross the streets, why children should not play in the road, or any other means that will make the highways more safe. Illustrations are to be provided by the pupil. All essays must be handed to the school principal on or before December 10th, and it is suggested by Auto Club officials that work on the essays begin at once. In the case of teachers bulletins will be received from Washington as to the conduct of the contest which may take the form of a lecture, recitation, game or drama in presenting the safety subject to pupils.

Full information on these contests may be obtained from the Automobile Club of Southern California.

SCHOOL ELECTION

The school election of last Saturday proved little excitement. A few friends of the candidates got out to the polls. Only 322 votes were cast. V. C. Proctor, who was a candidate to succeed himself received 79 and R. C. Corkhill received 243.

THEY'LL LEARN, THOUGH

Fond Mother—Those little playmates of yours look rather common, Bobbie, I hope none of them swear.

Bobbie—Oh, some of 'em try to, mother, but they are not much good

HAPPENINGS AMONG THE CITY PEOPLE

The Elks Hollowe'en dance given at the School Auditorium last Saturday night was well attended and everyone reported a good time. The music was furnished by the Ed. Matthews orchestra. A two course luncheon was served.

City Clerk George J. Schafer made a business trip to Holbrook Wednesday.

City Marshal Edward Gardner is again up and about after being ill with an attack of typhoid fever.

Mrs. H. A. Comstock leaves this week for Fresno where she will visit friends for the next few weeks.

Mr. and Mrs. Roy Justus entertained a large number of friends on Tuesday evening with a Hallowe'en party. The evening was spent in card playing and games in season. Dainty refreshments were later served.

INTERESTING ADDRESS AT CITY HALL

Charles W. Maier, special representative of the Grand Lodge, B. of L. F. and E. will speak on railroad matters of interest to railroad men and the public, at the City Hall, Thursday afternoon at 2:00 o'clock. The public are particularly invited to come and listen to this instructive address.

COMMITTEE.

CHRISTIAN CHURCH
Rev. W. L. Martin, Pastor

Bible School at 9:45 a. m.
Preaching at 11 a. and 7:30 p. m.
Christian Endeavor at 6:30 p. m.
Prayer and Bible Study Wednesday evening.

For the special at the Bible school hour Mrs. Martin will continue her description of the wonderful Pilgrimage Play.

The pastor will preach at the morning service a sermon appropriate to the approaching Armistice Day and the disarmament conference at Washington.

On Wednesday evening the pastor will resume his lectures on the Bible, the one for this Wednesday evening being upon the canon of the Bible, or why we have just the books we have in the Bible and not others.

A cordial welcome to all services.

ST. PAUL'S EPISCOPAL CHURCH
Secand Avenue.

10:00 a. m., Sunday School.
7:30 p. m., Evening Prayer and Sermon.

REV. H. H. GILLIES, Vicar.

Mr. Gillies has been at Phoenix this week attending the State Convention on the nation wide movement of the Episcopal Church. This movement reflects the awakened spirit of the church that strives to meet the new issues before the country and the world since the war. The conference was addressed in a most inspiring way by Rev. Dr. Kemmerer, the national representative of the church from headquarters at New York.

Mr. Gillies will speak Sunday evening on the work done at the conference and the public is cordially invited to this service.

MOTHERS' CLUB MEET

Tuesday afternoon at the Washington school the Mothers' Club of this city, of which Mrs. Driver is president, held their monthly meeting. A large crowd was in attendance. The members and visitors were first entertained by the first grade pupils of Miss Whetstone's room who sang songs; following, the boys of the fourth grade in Miss Davis' room gave a number of gymnastic exercises. This was followed by the girls of this grade giving a number of Indian dances. This participation by the teachers and the pupils was appreciated. Following this program Mrs. George Kingrea read a paper on the fatigue and tire of a child. At the conclusion refreshments were served. It is hoped that all of the meetings will be as well attended and the same interest manifested.

FOR RENT

New Modern Cottage, $30.00 per Month. This residence for sale; renter will be expected to give up possession on fifteen days notice.

The HALL LUMBER CO.

THE WINSLOW MAIL

L. V. ROOT, Editor

Entered as second-class matter at the postoffice of Winslow, Arizona, under Act of Congress of March 1, 1879

Published Every Friday — Subscription, $3.00 year

Friday, November 4, 1921

The Arizona Electric company reports the replacement of 45 street lamps during the month of October. Of this number, much the greater portion were breakages rsulted from the use of beannies, air guns, etc., in the hands of the presumed mischievious urchen. While it is to be expected that the youngster will be mischievious, the destruction of property and the putting out of street lights is criminal. The laws of Arizona make the parents or guardian responsible for the acts of the child. Morally the parent is responsible but there are many cases where the enforcement of the statute is required to make the moral law effective. The very fact that such a law was passed is proof of this condition. The Arizona Electric company are offering a reward for the arrest and conviction of those guilty of the breaking of street lamps whether child or parent.

o

The absolute refusal of the state engineer to pass affirmatively on the matter of federal aid for the Winslow street paving under the bid of Warren Brothers, annuls the award of the city council according to the action taken by that body, and they have now ordered the steps! taken to obtain the concrete paving. It was the writers pleasure during the past several days to visit Gallup on our east and Flagstaff on our west, and the very impression first given of their paved streets was so comparatively bad with our memory of the streets of Winslow that there was no further argument needed, if such had been necessary, to make unanimous our wishes for street paving here. The city council has met with many difficulties and much opposition, all of which we will grant to have been sincere, but now that the question is coming up in new form, it is hoped that the past difficulties and opposition will have been removed and that clear sailing will be afforded the council to obtain for the city the paving which the city certainly needs! to remove it from the catalogue of country towns.

o

FATHER MIGHT INTERFERE

He—Well, I guess I'll kiss you you good-bye until tomorrow.

She—No, George, I couldn't hold my breath that long, and besides, I must go inside in ten minutes.

o

RIGHTEOUS RETORT

"Has your mother any objection to kissing?"

"What do you want—the whole family?"

PROCEEDINGS OF MEETING OF TOWN COUNCIL

Chamber of the Common Council, Winslow, Arizona, October 22, 1921

The Council met in special session at the City Hall at 8:00 o'clock p. m. for the purpose of accepting or rejecting the bids on the sidewalks to be put in on the southeast corner of Kinsley Avenue and Second Street.

The following members were present: Councilmen Milam, Bruchman, Payne, Dunham, Mayor Creswell.

The contracts of A. Ballesteros, and Frank Mana, were opened and read to the Council. Motion by Councilman Dunham seconded by Councilman Payne that the bid of $564.00 presented by A. Ballesteros be accepted. A deposit of ten per cent accompanied the bid. Motion carried.

Motion by Councilman Milam seconded by Councilman Dunham that the Supervisor of Streets be given the authority to buy enough cement to lay thirteen more crosswalks. Motion carried.

After a discussion between the Council and Mr. Walton, it was moved by Councilman Dunham and seconded by Councilman Milam that the City Engineer be instructed to cooperate with the Federal Engineer in surveying a road from Comar Springs to the government road connecting with Winslow and the Moqui Indian Reservation. Motion carried.

Motion by Councilman Milam seconded by Councilman Dunham that the City Engineer be given the power to survey and report an estimate on the new reservation road site. Motion carried.

After a long discussion on the question of paving, it was moved by Councilman Milam and seconded by Councilman Bruchman that we readvertise for bids on concrete pavement. Motion carried.

Motion by Councilman Dunham seconded by Councilman Payne that the Supervisor of Streets be given entire charge of the City Camp grounds. Motion carried.

There being no further business at this time, Council adjourned.

GEO. C. CRESWELL,
Mayor Town of Winslow.

ATTEST: GEORGE J. SCAEFER,
Acting City Clerk.

Ford

THE UNIVERSAL CAR

Authorized Sales and Service

Who is Making The Cars? Who is Selling Them?

FORD IS MAKING NEARLY DOUBLE THE AMOUNT OF CARS THAT ALL OTHER MANUFACTURERS COMBINED MAKE. STUDY THIS LIST:

HOW THEY STAND ON AUGUST PRODUCTION

(1)	FORD	118,000
(2)	Dodge	14,300
(3)	Buick	11,750
(4)	Studebaker	8,900
(5)	Oldsmobile	2.080
(6)	Cadillac	1,950
(7)	Hupp	1,500

They used to say: "FORD MAKES HALF THE CARS." BUT CONSIDER AND ASK THE REASON WHY that for the three months ending June 30th, 1921,

FORD MADE	301,796
All others made only	196,341
DIFFERENCE	105,455

Fords are selling F. O. B. factory, for less than ever before in history.

ARE YOUR EYES NORMAL?

A recent examination of 1000 skilled workers (average age 32 years) in a Western Plant showed that 410 had imperfect vision which was not corrected by glasses. Let me examine your eyes.

LIGHTENS THE TAX LOAD

The most prosperous states are those having the finest systems of power development.

An abundance of power means industries. Industries means payrolls and payrolls means community development and the building of cities.

When a great public utility company invests millions in any city, county or state, it at once means a lightening of the tax burden on the general taxpayer.

To illustrate: Supposing a power company has an assessed valuation of $10,000,000 in a state where the total tax levy is 40 mills or $4.00 on the hundred. This utility would be paying $400,000 a year in taxes as its share in maintaining city, county, state, school district and road expenses of that state in addition to furnishing the means of increasing all lines of business activity with resulaing new property for taxation purposes.

Thus does the modern public utility play a tremendous part in the civic life of any community, to the direct financial benefit of all the people.

BANKS ARE OPTIMISTIC

A reasonable supply of optimism becomes the circulation medium of community spirit and individual success and new enterprises.

Too much optimism not founded on actual business facts and conditions is as great an injury as well-founded optimism is a blessing.

A well-managed bank adopts the latter policy and becomes the discrimiating disseminator of the happy golden mean in business.

Knowledg of what constitutes safe business conditions on the part of banks lifted this country over many a temporary scare.

The wave of doubt and fear is dispelled by well-rounded and cheerful optimism and the sunshine of hope gets community radiation.

These important funtions in community psychology are being performed daily and all the year round by banking organizations.

What would happen to business and the financial stability and credit of our country if the bankers became pessimistic?

MIAMI SMELTER TO BLOW IN

Announcement is made that the Internatianl Smelting company will blow in one reverbatory furnace at its Miami smelter about November 20, after a shut down of six months due to the small demand for copper.

In announcing resumption of activities Thomas H. O'Brien, general manager of the Inspiration Consolidated Copper company, two hundred additional men would be employed at the semlter. One hunderd additional men will be employed at the Inspiration and Live Oak mines, he said and a shaft would be sunk on recently acquired porphyry property.

The smelter will begin operations on concentrates produced by the Miami Copper company in the last six months and stored at the smelter. It was said this supply is sufficient to keep the smelter going for several months.

This announcement means much to the copper country which was hard hit by the business slump of the past year.

PROCLAMATION OF ARMISTICE DAY

This year, for the first time in history, Arizona will observe Armistice Day as a legal holiday, provision having been made by the Fifth State Legislature for such recognition of the day. Such formal acknowledgement of its importance is eminently approprite, for the date is a most significant one in the history of the world. Through ages yet to come it will carry its meaning of solemn memorial, of joycus triumph of the blood bought victory of the people of the earth over the sinister forces of autocracy and military despotism. These are meanings of the day which will always abide.

It breathes a still deeper significance this year. This Armistice Day points not only backward to an historical event, but beckons also upward along the road which civilization is traveling, toward the goal of common humanity. Its deeper meaning is one filled with promise, and in its observance there is embodied the crystallized hope of the peoples of the world that war shall be no more and their prayer that never again shall our civilization be called upon to undergo such an cataclysm.

That this hope is stronger, more poignant today than ever before is most obvious. Three years of readjustment and reconstrudtion, wearily undertaken by a world whose strength was well-nigh spent, have served to convince even the most skeptical that the world cannot afford war. Too vividlly it has been demonstrated that its cost transcends human capabilities. Millions starving, other millions out of work, governments tottering on the verge of bankruptcy and financial ruin, whole peoples suffering from the ravages of disease while the cancer of anarchy spreads throughout their land—these are but a few of the appalling items on the bill of war, red and hideous, has presented to the world.

In the hush that came over a war-torn world on that November day three years ago, there was born in the hearts of mankind a promise. After the wind and the earthquake and the fire of four long and weary years, there came the still small voice. Out of the blood-drenched soil of France in which its roots were buried, sprang a tender plant, its tendrils toward the future, holding out the promise of that fairest flower, the day when war shall be no more. And the world has accepted, and believed, and today clings more tenaciously to the hope of early civilization.

The burden of competitive armaments has become unbearable, yet along the Marathonian course in the race of power there has been found as yet no resting place. He who runs must keep on, or acknowledge his weakness by dropping out of the contest. Recognizing the stupendous folly of prolonging this struggle the President of the United States has invited the surviving contestants to meet at Washington on Armistice Day to confer on the Limitation or Armaments.

The responsibilities of the hour are tremendous. The need for a definite agreement that will insure the peace of the world was never greater in all history. The problems which will arise at this momentous gathering will require the ablest treatment our race can summon. There is much over which to feel encouraged. There are signs that humanity is at last leaving its childhood and is entering the era of clearer thinking and better intentions. But the obstacles are very real. Suspicion and distrust, material selfishness and militaristic ambition may once more conspire to disappoint the hopes of the world.

In recognition of the needs of the hour it has been appropriately suggested that the Sunday preceding Armistice Day be observed as a day of special prayer for the Divine blessing on the International Conference, and for the attainment of its objects. It has also been requested by President Harding that special services be held in every church throughout the land at the hour when the conference convenes, and the memorial service is held at Washington.

While paying grateful homage therefore, to those who offered their lives in defense of our country, it is altogether fitting that we should implore the help and guidance of the God of nations to the end that the forthcoming conference may result in the reaching of a satisfactory agreement, through the prevalence of mutual trust and good will, for material curtailment of existing armament programs.

Now, Therefore, I, THOMAS E. CAMPBELL, Governor of the State of Arizona, by virtue of the authority vested in me by law, do hereby designate Friday, November 11, 1921 as

ARMISTICE DAY

a legal holiday, and do earnestly urge that the day be marked by special services to be held at the hour when the International Conference for the Limitations of Armaments convenes at Washington. It is also requested that Sundty, November 6, 1921, be observed as a day of special prayer in all our churches for the purpose of invoking the Divine blessing on this important conference.

IN WITNESS WHEREOF, I have hereunto set my hand, caused the great seal of the State or Arizona to be affixed. Done at Phoenix, the Capital, this 26th day of October, 1921.

THOMAS E. CAMPBELL,
(SEAL) „ Governor.

Feel how smooth this paint is

NO wonder Certain-teed paint is so smooth—it is made of the finest grade materials ground exceedingly fine and mixed thoroughly and evenly by machines which make no mistakes. And how it does spread! No ordinary paint equals it. The brush glides over the surface, leaving a velvety coating of paint that completely hides the surface and keeps it hidden.

You'd expect such high grade paint as Certain-teed to cost more, but it actually costs less. The Certain-teed people certainly know how to make paint, and they know how to price it. Each color stands on its own price, based on cost. You pay less for those colors which cost less to make. That's fair. Everybody pays only for what he gets and nothing more. We have the right Certain-teed Paint or Varnish for everything inside or outside your house. Come in and see us before you buy any paint.

CAHN'S

OUR OIL FIELDS AND THEIR PROBABILITIES

(Continued from Front Page)

During the period of 1918 to the present time a number of qualified geologists of reputation, have been in the field and have made lengthy researches of the natural conditions. It is demonstrated that the great northeastern portion of the state of Arizona is sedimentary. A few instances are noted of igneous intrusion and a great portion, if not all, was at one time capped by a basaltic flow, the evidences of which still remain in the great black mesas whose escarpments are particularly noticeable to the north of Holbrook a short distance.

To the south of Holbrook a few isolated instances are found where the basalt is still in place, but generally it has disappeared with the erosions of the centuries of bygone ages. The sedimentaries are laid down in beds as the different geological ages succeeded each other. These beds dip slightly to the north and easterly and are consequently lost beneath the later flows which are still capping the sedimentaries to the north. To the south the sedimentaries continue to raise for a distance of approximately twenty miles from the Little Colorado river where a prominenet anticlinal fold is evidenced. To the south and extending both east and west of Holbrook, Mr. Charles Edward Major, a consulting engineer and geologist of reputation states the "upper Pennsylvanian series of the Carboniferous age extends over the entire area." Mr. Major in his report of the district concerning the possibilities of oil further states: "that the greatest oil areas in the country have been found in beds in the Carboniferous age and older formations, of which Pennsylvania, Ohio, Indiana, Oklahoma and Kansas are examples. As to the possibilities of petroleum in the Holbrook area we have as an indicator the San Juan fields of southwestern Utah where oil is found in strata of the Pennsylvania age. It is evident. therefore, that any expected development of oil in the Holbrook area must be made in this formation and it is found exposed over a wide area in all that section of Holbrook and is known to underlie all the younger sedimentaries to the north it is reasonable to expect that systematic and intelligent prospecting drilling should result in locating commercial accumulations of petroleum in this formation."

Thin films of oil are to be found upon the water from deep wells in this area. Oily shale has been cut at depth and within the past few days affidavits have been made by workmen engaged at one of the wells recently drilling in the area that upon the pulling of the casing it was found necessary to use "gunny" sacks in the handling of the casing because of oil with which the casing was covered. Mr. Major in his report further states the Holbrook field offers as favorable possibilities, geologically, for the production of petroleum as have been proven in the San Juan field and that there is as reasonable a prospect for developing oil in quantity as was had by any of the pioneers in the now widely known fields of Kansas and Oklahoma, both of which are in the same geological formation.

Mr. A. B. Baird, a geologist and mining engineer, who made an examination of the field also confirms the reports of Gregory and Major, having expressed the opinion that oil sands should be found in the lower strata, which should be the making of a great producing field and that the structure of the area is perfect and well located and should provide the necessary gas pressure to produce gushers.

Mr. Milton A. Allen, mineral technologist of the Arizona Bureau of Mines, confirms the findings of other geologists who have visited the field. He found the rock and structure exists which are favorable to oil.

Numerous other reports of mining engineers and geologists have been made upon the field and there has been no variance in their determinations. The great oil fields of the country have been made through the intelligent work of the geologists. Texas, which is now the greatest oil state of the union, has been made so through the work of the engineer and the geologist, and to his intelligent and comprehensive deductions Texas owes her present position in the oil world. The Holbrook field stands today where the Texas fields stood a few years ago. Will a duplicate of the oil history of Texas and of Oklahoma be written for Arizona? The answer will be given when some well in the Holbrook field has reached a sufficient depth to tap the oil sands or stratas.

It was the writer's privilege to visit the well now drilling on the property of the Holbrook Oil Company some twenty-five miles southwesterly from Holbrook. The location of the company's well was made by Mr. Major, as was also the selection of the site of thedrilling of the Hopi Oil Company a few miles from the Holbrook company's well. The Holbrook Oil Company have a complete standard rig, fully equipped and manned with competent drillers who are enthusiastically progressing daily toward the prospective oil pools. In a period of four months they have reached a depth of a thousand feet, starting in with a sixteen inch hole and prepared to go a depth of 3,000 feet or more as necessary. Considering road conditions in that section of the country at this season of the year with its plentiful mud and rain and snow and cold, this must be considered as good progress.

Weather conditions at the time of the writer's visit to the field precluded any extended examination of other wells in the district but from the drillers whose years of experience in various oil fields there is to be gathered much optimism; an optimism that is not based falsely upon a long cherished hope, but upon a comparison with experience which they have undergone in other fields during the period of their life work.

Such a condition as this is the working spirit which prevails in the hearts of those who are pioneering the field. It is the same spirit that made industrial centers and metal and oil producing fields and built cities. It is the pioneer spirit to which most of us owe all that we have now or in expectancy. The spirit which permits us today to live in comfort and safety amid the thriving progress of our own Southwest as an important part of the greatest nation of the world.

* * * * *

The foregoing article appeared in The Needles Nugget in January, 1920. It is from the pen of the present editor of The Mail.

In consideration of the many things that have or have not happened in the Holbrook oil field since its publication, it is worth while to review the situation as it then existed and as it now exists. There has been development in the field since January, 1920. but not sufficient to prove the productivity of the area, although the work that has been done is entirely satisfactory in every element except time elapsed and the matter of finances has been the controlling feature in this measurement. Every evidence that has been deduced since January, 1920, has been prospective and indicative of the final culmination of the expectations of the poneers who have been fighting the game of finance like heroes of old to keep the work going.

Geological reports on the field made since the writing of the reprinted article herewith have been more optimistic of the results than those previously made. This is due to a wider study of the conditions and a closer examination of the field structure. To the one who reads the book of nature as it is opened unto him in the Holbrook field can easily deduce the coming chapters. There are better prospects today for the bringing in the Holbrook field than there was in the Kansas of Oklahoma or Texas fields prior to the time of actual striking of oil. The reports of the geologists are more favorable. Their judgment is based upon the geological structure that extends throughout the great sedimentary area. It is the same as has made fields of great productivity and no other deduction can be made by any individual qualified to make a determination upon the field. All honor to the pioneers who have stayed with the field. Their reward should be great and we believe it will be.

WHAT IS THRIFT?

Thrift, in its broad sense, is handling money wisely.

It is getting the most out of every dollar of the income.

It is the power of making one's dollars bring more dollars after he has earned them.

It is administering one's earnings with an eye to the future as well as the present.

It is using one's money, much or little, as an instrument with which to weave strong fibre into the character.

True thrift does not curtail buying power. It increases it.

It does not make misers. It teaches how to spend as well as how to save.

THANKSGIVING DAY PROCLAMATION

That season has come when, alike in pursuance of a devout people's time honored custom and in grateful recognition of favoring national fortunes, it is proper that the president should summon the nation to a day of devotion, or thanksgiving for blessing bestowed and of prayer for guidance in modes of life, that may deserve continuance of divine favor.

"Foremost among our blessings, is the return of peace, and the approach to normal ways again. The year has brought us again into relations of amity with all nations, after a long period of struggle and turbulence. Thankful, therefore, we may well unite in the hope that Providence will vouchsafe approval to the things we have done, the aims which have guided us, the aspirations which have inspired us. We shall be prospered as we shall deserve prosperity, seeking not alone for the material things but for those of the spirit as well; earnestly trying and helping others asking, before all else, the privilege of service. As we render thanks anew for the exaltation which came to us, we may fittingly petition that moderation and wisdom shall be granted to rest upon all who are in authority, in the tasks they must discharge. Their hands shall be steadied, their purposes strengthened, in answer to our prayers.

"Ours has been a favored nation in the bounty which God has bestowed upon it. The great trial of humanity, though we indeed bore our part as well as we were able, left us comparatively little scarred. It is for us to recognize that we have been thus favored and when we gather at our altars to offer up our thanks, we will do well to pledge, in all humility and all sincerety, our purpose to prove deserving. We have been raised up and preserved in national power and consequence, as a part of a plan whose wisdom we cannot question. Thus believing, we can do no less than hold our nation the willing instrument of the Providence which has so wonderfully favored us. Opportunity for great serviceawaits if we shall prove equal to it. Let our prayers be raised for direction in the right paths. Under God, our responsibility is great; to our own first, to all men afterwards, to all mankind in God's own justice.

"Now, therefore, I, Warren G. Harding, president of the United States, hereby designate Thursday, the twenty-fourth day of November to be observed by the people, as a day of thanksgiving, devotion and prayer, urging that at their hearthsides and their altars, they will give thanks for all that has been rendered unto them. and will pray for a continuance of the Divine fortune which has been so generously showered upon this nation.

"In witness whereof, I have hereunto set my hand and caused to be affixed the seal of the United States of America.

"Done at the capitol of the United States this 31st day of October, in the year of Our Lord, nineteen hundred and twenty-one and of the independance of the United States, the one hundred and forty-sixth.

(Signed)

"WARREN G. HARDING,

By the President,

"CHARLES E. HUGHES,

"Secretary of State."

WHAT IS SILVER'S FUTURE?

The recent advances in price of "foreign" silver, have awakened the American to the fact that he is virtually interested in the world market, in spite of the fact that henow enjoys protection through the Pittman Act, which will in all human probability stabilize the domestic price at around the dollar mark for four years or more.

If the "foreign" price level approaches that assured by the act when the latter abrogates itself by fulfillment, good times in the mining industry will result, with the United States, as the greatest producer, enjoying the lion's share of resultant prosperity.

In this chaos of world interests, it is of course impossible to foretell the future course of the white metal with accuracy or even complete intelligence, but upon the face of things it seems entirely possible that world shortage will push the price up to the domestoc level, possibly beyond it, before the demand for metal to replace fiat currency has been, even in part, fulfilled.

"It has always been our own opinion," says the Northwest Mining Truth, "That the future of silver at high levels was assured and as the Old World reaps the whirlwind of unlimited paper credit that opinion is only strengthened. Something must be done to equalize exchange which now acts as a barrier to free commercial intercourse, and what more natural than that the world should turn to silver to restore confidence and allow Europe to fight her way back to commercial equality."

MOB RULE

Would the proper protection be afforded citizens of Winslow should we have disturbance such as was recently enactel in Tulsa, Oklahoma? Do we have sufficient and the proper kind of officers to quell any disturbance, or would it be necessary to send to Phoenix for such officers. In Jerusalem during the time of Paul's last visit there the Jews created a tumult in the Temple, mobbing Paul, but there was a squad of Roman soldiers stationed ae Jerusalem who rushed upon the scene, took Paul to their castle for safe keeping and the captain of the guard was told of a plot to kill Paul, a Roman citizen; Paul was therefore taken by night by a guard of Roman soldiers to Caeserea out of all harm by this Jewish mob. Come to the Methodist Sunday School 9:45 a. m. Sunday and learn more about the way to escape from harm.

WHAT, INDEED?

"My son," said the father impressively, "suppose I should be taken away. What would become of you?"

"Why, pop," repllied the son, "I'd stay here. The question is, what would become of you?'

"TAXED TO DEATH AND D——D NEAR RUINED"

Business men who are squirming under taxation burdens will read with keen interest the following letter sent to an English bank by one of its customers, explaining why he was unable to reduce his overdraft. It was embodied in an address by Harry Coe, vice-president of the Anglo and London Paris National Bank, San Francisco. Here is the letter:

"Dear Sir: For the following feasons I regret being unable to reduce my overdraft. I have been held up, held down, sandbagged, walked on, sat upon, flattened out and squeezed gy our income tax, the super tax, the excess profits tax, war loans, war bonds, war savings certificates, the automobile tax, and by every society and organization that the mind of man can invent to extract what I may or may not have in my possession.

"The government has governed my business so that I do not know who owns it. I am inspected, suspected, examined and re-examined, informed, required and commanded, so that I don't know who I am, or why I am here at all.

"All I know is that I am supposed to be an inexhaustible supply of money for every human need, desire or hope of the human race, and because I will not sell all I have and go out and beg, borrow or steal money to give away, I am cussed, discussed, boycotted, talked to, talked about and held up, hung up, robbed and d——n near ruined, and the only reason why I am clinging to life now is to see what will happen next."

INDUSTRIAL WEEK AT PHOENIX NOVEMBER 7-8-9-10-11-12

With the idea of building up closer trade relations between the manufacturers, wholesalers and jobbers of Arizona, and the retail trade, a mammoth industrial exposition is being planned as the central feature of a week of attractions to be known as Industrial Week.

November 7 to 12 inclusive are the dates set for this event, which promises to eclipse in spectacularity and attendance any previous event of like nature ever held in the South west. It will afford a splendid chance for every resident of the state to meet old friends and make new ones and it will be especially advantageous to the retail merchants of the state in making their selections for the holiday trade.

A mammoth tent, 300 by 100 feet, fully equipped, has been secured and this will house every phase of industrial life. These attractions will be enhanced by a daily program of high class musical and vaudeville numbers.

A large number of special attractions are offered. There will be two days of automobiles races under the direction of Barney Oldfield, together with motorcycle races, airplane events and auto polo.

One of the most spectacular features will be the big industrial parade to be held Armistice Day. Bands, cadet and lodge organizations together with industrial floats and decorated automobiles will make up the pageant, which is expected to reach a length of four miles.

The city will be artistically decorated and special night illumination features are planned in honor of the thousands of visitors from all parts of the southwest who are expected to congregate on this occasion.

A parade of masked revellers concluding in a street carnival and dance will provide plenty of amusement for the young folks and thruout the week there will be plenty of dancing and band concerts as well as special attractions at all the theaters.

A poultry show, the only one to be held in Arizona this year, a football game between El Paso and Phoenix high schools, and a grand opera concert featuring Miss Mabel Garrison of the Metropolitan Opera company are some of the other attractions which augur well for a large attendance.

Preliminary arrangements are also well in hand and no pains are being spared to make the affair a brilliant success.

For the man who's business is slack, try advertising.

First: It is sold at a moderate price. You save when you buy it.

Second: It has more than the ordinary leavening strength, therefore, you use less.

Third: There are no failures—it always makes the sweetest, most palatable of foods.

Fourth: It is used by millions of housewives—leading domestic science teachers and cooking experts.

Fifth: It is the best Baking Powder that can be produced. Was given highest awards at World's Pure Food Exposition, Chicago; Paris Exposition, Paris, France.

Sixth: It contains only such ingredients as have been officially approved by the United States Food Authorities.

The finest quality Baking Powder—at the most economical cost. "The Biggest Bargain That Goes into the Kitchen Today."

Pound can of Calumet contains full 16 oz. Some baking powders come in 12 oz. instead of 16 oz. cans. Be sure you get a pound when you want it.

Calumet Nut Cookie Recipe

—½ cup butter, ½ cup sugar, 2 eggs, ½ cup flour, 1 level teaspoon Calumet Baking Powder, ¾ cup chopped nuts, 1 teaspoon lemon juice. Then mix in the regular way.

Announcing

Our New Service Department

It's Free, And We Want You To Use It

Mr. R. L. Martin, an experienced lumberman of Iowa, has been brought to Winslow and placed in charge of this Company's new SERVICE DEPARTMENT, which has been inaugurated for the sole purpose of furnishing the Company's patrons with a service we feel sure you will appreciate and at the same time derive much benefit from.

Let Us Tell You About This Service—What It Means To You:

NOW, if you contemplate building a fence, barn, shed, garage or home, or making some repairs, all you have to do is just go to your 'phone and call us and say you want SERVICE DEPARTMENT. Mr. Martin will be at your service every minute from that time until you have been told exactly how much lumber you will need, and how much this lumber will cost delivered to the job. Then if you desire, he will secure the services of a competent carpenter or contractor who will attend to all necessary labor, and you will know just exactly what this labor will cost before you are ready to have the work done. Also, if you have a broken window glass to replace, Mr. Martin will call and get the size of the glass needed, then see that the glass is put in. Or, suppose you want to do some painting, either outside or inside, all that is necessary for you to find out exactly how much paint will be required is to call on him, and he will promptly call and show you color cards from which you may make your selections, and then tell you what the paint will cost and see that you are not delayed in getting your order filled.

This SERVICE DEPARTMENT is also at your service to see that all orders placed with us are delivered on time, and that all material is delivered at the right place—exactly where you want it. We are furnishing it to you free, and, we want you to use it.

The Hall Lumber Company
