GRANTS PASS, OREGON

When You Know a Fellow.

When you get to know a fellow, know his
joys and know his cares,
When you've come to understand him and the
burdens that he bears,
When you've learned the fight he's making
and the troubles in his way,
Then you find that he is different than you
thought him yesterday.
You find his faults are trivial and there's not
so much to blame
In the fellow that you jeered at when you only
knew his name.

You are quick to see the blemish in the distant
neighbor's style,
You can point to all his errors and may sneer
at him the while,
And your prejudices fatten and your hates
more violent grow
As you talk about the failures of the man you
do not know,
But when drawn a little closer and your hands
and shoulders touch
You find the traits you hated really don't
amount to much.

When you get to know a fellow, know his
every mood and whim,
You begin to find the texture of the splendid
side of him;
You begin to understand him and you cease
to scoff and sneer,
For with understanding always prejudices
disappear.
You begin to find his virtues and his faults
you cease to tell,
For you seldom hate a fellow when you know
him very well.

When next you start in sneering and your
phrases turn to blame,
Know more of him you censure than his busi-
ness and his name;
For it's likely that acquaintance would your
prejudice dispel
And you'd really come to like him if you knew
him very well.
When you get to know a fellow and you
understand his ways,
Then his faults won't really matter, for you'll
find a lot to praise. —Author Unknown.

A Friendly Word.

WE TAKE great pleasure in presenting you herewith our 1929 seed and plant list. We also wish to take this opportunity to thank our many customers for their patronage and invite our many friends and patrons to make use of our services at any time occasion arises.

If you live close to Grants Pass or are passing this way, we are always glad to have you call and let us show you our gardens. It will give you a better idea than can be described by words, what we are doing in Pansies. If you are too far away to visit our gardens, we are always glad to hear from you, whether to praise or criticize or possibly asking information. Any information regarding our products, will be cheerfully given to the best of our ability. We are as much interested in your success or trouble with our products as you are and always stand ready to help with any problem within the scope of our experience. Constructive criticism is always welcome, as unlike many we realize we are not infallible and through criticism or praise we are able to gauge your likes and dislikes, which makes it possible for us to supply you with increasingly better products.

Our three new original strains, being offered from our gardens for the first time this season, will greatly interest you. They are described fully on pages 4, 5, and 6. You will also find our originator's collections, listed on page 8, of much interest. These collections of both seed and plants are made up exclusively of HARROLD originations and introductions.

After much experimenting we are offering you Antirrhinum seeds and plants of HARROLD QUALITY this year, in addition to our Pansies. Our efforts in this line will be confined to the production of seeds and plants of the cut flower varieties, of superior quality. Strict selection, of seed producing stock and the elimination of artificial conditions in seed production, giving seed of high germination, are advantages offered in our seed that can not profitably be overlooked in making the selection of your source of supply for this stock.

Again thanking you for your past patronage and awaiting any future commands, we remain always ready to serve.

C. W. HARROLD & SON

A Few Words in General About Our Pansies.

AFTER having, in the past twenty years, grown Pansies in several sections of the United States and tested practically all existing strains, we are very proud to bring to your attention our 1929 line of seeds and plants. It is composed of an assortment of strains of our own origination or improvement, that is more complete and of more diversified type than that grown by any other American Pansy specialist.

Since the introduction of our GREATER AMERICAN PERFECTION and OREGON MIRACLE MIXED four years ago, our experimental department has been constantly at work and this year we would like to offer for your approval our three new strains. They are all of distinctive type and no florist or pansy grower can profitably overlook them.

All strains offered by us are of distinctie type and in no case are they a blend of existing strains, as are offered by many others. All seeds offered in this catalogue are absolutely grown in our own gardens. When we offer a new strain it means that every step in the perfecting of the strain has been carried on in our own gardens and under no condition is seed from outside sources mixed into the mixture.

Of the five strains of our own origination, offered from our gardens this season, the three new ones should in no case be overlooked. The two strains of previous introduction, by our gardens, will be found to be improved over those supplied during previous seasons. In addition to our own introductions we are also growing a limited quantity of three other standard strains that have been introduced in the past by other growers. These strains are grown true to the originator's color blend but are of HARROLD high seed quality.

Our statements in past seasons, that HARROLD'S Pansies are "the World's finest" have been more forcibly than ever, substantiated during the past season through the work of our experimental department. Test lots of practically all of the strains of Pansies now on the market have been tried, many of which have been imported for this express purpose. We do not make such statements in regard to quality of strain without first making sure in our own gardens, that we have a product to back up such a statement.

Another point to remember in regard to our Pansies is, that our strains are all outstanding, for their free blooming during the winter months, as well as spring and fall. This makes them desirable for both indoor and outdoor culture. Other points of paramount superiority are the wonderful coloring and markings, brought about by our methods of culture and cross breeding. Also the size and form of flower as well as the robust hardy habits of the plants.

In regard to flower size, we have found that owing to the varied conditions of soil, fertilization and care, any statement as to exact measurement of the flowers is in many cases found to be misleading. As a consequence we say that our strains will be found to equal or be superior to others in their respective type class.

INSIST ON HARROLD'S SEEDS, both in Pansies and antirrhinum, but remember **WE HAVE NO AGENTS AUTHORIZED OR OTHERWISE** and unless the seeds you plant are received direct from **HARROLD'S** there is no guarantee that they have been grown by us and are not genuine. **BUY DIRECT FROM HARROLD'S**, then and then only are you assured the purity, strain quality and vitality equalled by few growers and surpassed by none.

A Few Points on Commercial Pansy Culture.

First: Moisture is the paramount point of pansy plant success. Germination moisture should be closely watched. Moisture evaporation must be carefully controlled during the first five to eight days. This is best accomplished with a covering on the bed. We have found in our own gardens that black building paper of the light grade is very well suited to this purpose.

Second: Prepare the beds well but do not rake too smooth. Beds should be thoroughly wet to a depth of six or eight inches, being careful not to run soil together. Proper fertilizing will have to be determined by experiment, as what will be fine for one soil may not be so good for another. Any fertilizer used should be well worked in. A light sifting of well rotted screened manure or granulated peat moss will be found fine to sow the seeds on. After sowing seeds cover lightly with the same material.

Third: Avoid dry spots in beds. Watch closely for them and should any appear great care should be exercised in watering. A sprinkling can with a fine nozzle will answer admirably. Do not use the hose! The glossy enamel on the outside of a pansy seed is as essential to its germination as the kernel and if this is destroyed or washed off many seeds, although beginning to sprout, will die.

Fourth: When plants begin to unfold their leaves, care should be taken not to over water, as some trouble may be experienced from damping off. Should this get started, one teaspoon of Semisan in three gallons of water, used sparingly will greatly help.

It will be found advantageous to make several plantings of Pansy seed during the year. Nice plants for summer blooming may be had by planting as late as March 10th. The Pansy when handled right can be adapted to all year use almost as readily as any other plant. Forcing Pansies inside greenhouses is an angle that in many localities can be made a profitable line. They are desirable on many occasions as cut flowers and when such types

as our PEDIGREED GIANTS, SUNSHINE or IMPROVED SWISS are planted in bulb boxes or pans and brought into flower during December, January and February, they are as popular as many of the bulbous flowers offered at that season. For such work "HARROLD'S FREE WINTER BLOOMING STRAINS" will be appreciated to their full extent.

Remember, Pansies are loved by almost everyone and although they are becoming more popular every year, few florists realize their full possibilities. These conditions were brought forcibly to our attention this past season, by the early date at which the supply of our fancy strains was exhausted. Many growers of our Greater American Perfection strain have reported the same condition and have booked orders for both seed and plants for the coming season in greatly increased quantities.

Several years ago many Pansy plants were retailed at 35c per dozen while few demanded as much as 75c. Today few of the modern types retail at less than 75c while modern fancy types will top that figure considerably. Fancy stock in our knowledge has already equalled the price of geraniums of the same age, while in a few cases fanciers have paid as much for single plants as was received for two dozen of the older types.

Why not take advantage of this growing demand and make fine pansies a part of your business, by either sowing and raising your own plants or obtaining plants already started, from a reliable source?

Our New Introductions for The 1929 Season.

HARROLD'S PEDIGREED GIANTS (Series 900)

A blend of mixed colors of the fancy show type.

This is by far the finest truly giant strain of Pansies that has been offered to date. It is the direct result of over twenty years of constant effort and improvement. In size it is almost beyond the description of the word giant and we predict that it will be several years before it is surpassed. Flowers are well formed and heavily ruffled, borne on medium long stiff stems. The plants are compact and bushy, of hardy habits with rich luxuriant foliage. This strain is especially notable for its fine coloring and many new shades, which have made it a constant attraction in our gardens, almost from the time the base plants were first bred. Among the many new and novel colors are found some wonderful Brown, Orange, Red and Wine shades, in markings that are distinct novelties. Like other HARROLD introductions this strain is extremely free blooming, both out of doors and under glass and we recommend them unreservedly to the florist or Pansy fancier who must have the finest the world has to offer. Plants of this strain will be found to retail at much more profitable prices than older strains and move more readily.

SEEDS: Trade packet \$2.50; $\frac{1}{8}$ oz., \$3.75; $\frac{1}{4}$ oz. \$7.00; $\frac{1}{2}$ oz., \$13.00; 1 oz., \$25.00.

PLANTS: Strong plants from seed bed, \$2.00 per 100; \$15.00 per 1000; 500 at 1000 rate. Delivery beginning about September 15. Transplanted stock showing bud and bloom ready after November 1, per 100, \$3.00; per 1000, \$25.00.

NOTICE: The supply of this strain, this season, will be limited, so let us have your order early so we will not be compelled to disappoint you.

Harrold's Sunshine Pansies (Series 1000)

A fancy novelty blend of the sunburst type.

This strain is a distinct type in a class by itself and is a wonderful attraction wherever shown. The coloring is really marvelous and is so exquisitely novel as to make this one of the most outstanding types. Our improved strain is the last word in this class and will be found to contain some wonderful duplex and rolled forms, the flowers of which remind one of the wonderful large sweet-pea. The coloring of this strain is largely in the orange, cream, delicate lavenders, rich purple, and deep wine shades, marked in the most exquisite ray, paneled, and striped patterns. It is a true sunburst type that will rival a summer sunset in its delicate shadings. The flower size, although not of the super-giant type, is fine and flowers are produced on long stiff stems. Plant form is excellent, although this strain is not as hardy as many others and should be given more protection. In common with other HARROLD introductions it is very free flowering during the winter months, making it especially adaptable for inside culture. This is a type that no florist or pansy fancier can well be without.

SEEDS: Trade packet \$2.00; $\frac{1}{8}$ oz., \$3.00; $\frac{1}{4}$ oz., \$5.00; $\frac{1}{2}$ oz., \$9.50; 1 oz., \$18.00.

PLANTS: Strong plants from seed bed, \$1.75 per 100; \$12.50 per 1000; 500 at 1000 rate. Delivery beginning about September 15. Transplanted plants showing bud and bloom, delivery beginning about November 1, \$2.40 per 100; \$18.00 per 1000.

NOTICE: The supply of this strain this season will be limited, so let us have your order early to avoid disappointment.

Harrold's Improved Swiss. (Series 800)

A mixture of color in three and five blotched types.

This strain is of the three and five blotched types in a color range far more diversified than any previously offered in this class. Large size flowers on medium long stems, in the many shades of red, pink, salmon and orange, augmented by many yellow, brown, old rose, and beautifully fringed novelties found in no other strain, makes this one of the year's outstanding offerings. As the name implies this strain has been evolved from such strains

as the Improved Swiss Giant and similar type, but in no case should it be confused with these strains, owing to its superior blooming qualities and coloring. The flowers produced are extremely large in size and almost round, many being heavily ruffled. Stems are moderately long and stiff and plants are of very compact and hardy habits. As in other HARROLD strains the winter blooming qualities of this strain is well above the average, which makes it nicely adapted for culture inside in winter as well as for outdoor bedding. You will find this strain to be a profitable addition to any stock as its type is much in demand and sells readily wherever shown.

SEEDS: Trade packet \$1.50; $\frac{1}{8}$ oz., \$2.50; $\frac{1}{4}$ oz., \$4.50; $\frac{1}{2}$ oz., \$8.00; 1 oz., \$15.00; per pound \$150.00. Eight ounces or more at pound rate.

PLANTS: Strong plants from seed bed, \$1.50 per 100; \$10.00 per 1000. 500 at 1000 rate. Delivery beginning about September 15. Transplanted stock showing bud and bloom for delivery after November 1, \$2.00 per 100; \$15.00 per 1000.

Strains Previously Introduced by Harrold.

GREATER AMERICAN PERFECTION

A general purpose mixture of superior quality.

This strain is almost too well known to the trade to need description. This being the fourth year since its introduction, we feel sure this strain will be more popular than ever before. Since its introduction it has challenged the supremacy of many strains that have been considered standard for years. The supply of seeds and plants last season was insufficient to supply the demand and many growers who grew them have at this writing booked their needs for the coming season. We are much gratified with the increasing demand for this strain and as stated many times before this is one of the finest strains on the American market.

This strain, this year has the widest range of color ever shown in a Pansy before. This alone we feel sure will add to its popularity, especially in connection with its reasonable price. Aside from the marvelous coloring, size of flower and their form makes this strain outstanding. Many blotched and pastel shaded novelties are to be found in this strain along with the most desirable variegated types, which in connection with the coloring as offered in past years makes this a true rainbow mixture. Through careful selection and destruction of all but the finest types, you are assured the finest possible strain found in this type of Pansy.

This is the original HARROLD free flowering strain. Planted side by side with the so-called winter blooming, or Ice Pansy, this strain will out-bloom them two to one throughout the fall, winter and spring seasons, while flower form and size will equal any of the standard giant types. Ruffled form is predominate, with flowers on exceptionally long

stiff stems. Plants are compact and extremely hardy. For both forcing and bedding this strain is only excelled by our 1929 introductions.

SEEDS: Trade packet, \$1.00; $\frac{1}{4}$ oz., \$2.25; $\frac{1}{2}$ oz. \$4.25; 1 oz., \$8.00; per pound \$80.00; 8 ounces or over at pound rate. To the wholesale plant grower sowing over two pounds per season, we can quote very attractive prices on this strain. Write for them.

PLANTS: Strong plants from seed bed, \$4.00 per 1000; 3000 for \$10.00. Delivery beginning about September 15. After January 15, we can supply a large size from thinly sown seed beds that are showing some buds at \$4.50 per 1000. Transplanted stock showing bud and bloom for delivery after November 15, at \$10.00 per 1000.

PERFECTION STRAIN IN SEPARATE COLORS

This year for the first time we are going to supply straight color seed of this strain as follows:

(Please order by number).

- 510: Dark Royal Purple. A wonderful free blooming type.
- 520: Red shades with white markings.
- 530: Dark blue. Very attractive.
- 540: Two tone effect of blue.
- 550: Various shades of deep rich red.
- 560: Many lavender art shades of variegated patterns.
- 570: Deep velvety black.
- 575: Yellows of both black blotched and penciled type.
- 580: Red shades with yellow markings.
- 590: Contains the brown and blue bronze types.

SEEDS: Trade packet, \$1.25; $\frac{1}{8}$ oz., \$2.00; $\frac{1}{4}$ oz. \$3.75; $\frac{1}{2}$ oz., \$6.50; 1 oz., \$12.00.

PLANTS: Strong plants from seed bed for delivery after September 15, \$4.50 per 1000. Transplanted stock after November 1, \$12.00 per 1000.

Harrold's Oregon Miracle Mixed.

This is a wonderful strain at a really competitive price and will be found to be as fine a giant mixture as those obtained elsewhere at much higher prices. This mixture will produce flowers of wonderful size and substance on long stems and in a very wide range of colors. Owing to its very reasonable price it is impossible to include in this mixture the many new novelties found in our GREATER AMERICAN PERFECTION, however, it belongs to the same type class. Where a high quality strain must be grown to meet a low priced market, it will be hard to equal this mixture at 50% greater cost.

SEEDS: Trade packet \$1.00; $\frac{1}{4}$ oz., \$2.00; $\frac{1}{2}$ oz., \$3.00; 1 oz., \$5.00; per pound \$60.00; 8 ounces at pound rate. To the wholesale plant grower who plants over two pounds of this class of seed we will be glad to quote special quantity prices. Write for them giving an estimate of your requirements.

Special Collections of Pansy Seeds and Plants.

The following special combination collections of HARROLD INTRODUCTIONS will be found to be ideal for the florist who must supply a diversified trade and wishes to maintain a reputation for the latest and finest in this class of stock. These collections will not be broken and are supplied only as listed.

NO. ONE. SAVE \$2.00 ON THIS ONE

One trade pkt., Harrold's Pedigreed Giants	\$2.50
One trade pkt., Harrold's Sunshine Pansies	2.00
One trade pkt., Harrold's Improved Swiss	1.50
One trade pkt., Greater American Perfection	1.00

List Price \$7.00

Combination Price **\$5.00**, a saving of **\$2.00**
on this collection.

NO. TWO. \$4.00 SAVING

¼ oz., Harrold's Pedigreed Giants	\$7.00
¼ oz., Harrold's Sunshine Pansies	5.00
¼ oz., Harrold's Improved Swiss	4.50
¼ oz., Greater American Perfection	2.50

List Price \$19.00

Combination price **\$15.00**, a saving of **\$4.00** and a fine collection of the finest at only the cost of standard strains.

NO. THREE. SAVE \$16.00

1 oz., Harrold's Pedigreed Giants	\$25.00
1 oz., Harrold's Sunshine Pansies	18.00
1 oz., Harrold's Improved Swiss	15.00
1 oz., Greater American Perfection	8.00

List Price \$66.00

Combination price **\$50.00**, a saving of **\$16.00**. This combination gives the grower a well balanced line of the latest types at only the cost of many of the blended strains.

PLANTS

Strong Plants from seed beds.

250 Harrold's Pedigreed Giants	\$3.75
250 Harrold's Sunshine Pansies	3.12
250 Harrold's Improved Swiss	2.50
250 Greater American Perfection	1.00

List Price \$10.37

In combination the above **1000 plants** will be supplied as listed at **\$7.50**, a saving of **\$2.87**.

Transplanted plants showing bud and bloom.

250 Harrold's Pedigreed Giants	\$6.25
250 Harrold's Sunshine Pansies	4.50
250 Harrold's Improved Swiss	3.75
250 Greater American Perfection	2.50

List Price \$17.00

This collection of **1000 transplanted plants** will be supplied for **\$14.00**, a saving of **\$3.00** over list. Multiples of the above collections may be ordered to meet any demand.

Seven Points to Remember About Harrold's Pansy Seed

- First:** The finest and most up-to-date strains.
- Second:** Originated and grown in our own gardens, not under our supervision by some contract or inexperienced grower.
- Third:** Grown under the most ideal climatic conditions, producing fine plump seeds of the highest germination.
- Fourth:** Experimental and hybridizing work is carried on on a scale equalled by few growers of Pansy seed in the world.
- Fifth:** Grown by experts of over twenty years experience, assuring strain quality of the highest type.
- Sixth:** The only gardens in the United States, growing commercially, superior strains of four distinct types, who specialize in Pansies. The types are readily distinguished from one another, even by the inexperienced.
- SEVENTH: ALL SEED TESTED FOR GERMINATION. NO GUESSING.**

Four Points to Remember About Harrold's Pansy Plants.

- First:** Grown by the originator from seed produced in his own gardens.
- Second:** Grown in a climatic and soil condition that promotes sturdy and hardy growth.
- Third:** All plants grown in the open with no protection, producing plants that stand shipping over long distances and transplanting exceptionally well.
- Fourth:** Packed by the latest methods. We spare no expense to pack your shipment so it will reach you in the best possible condition. Plants are tied in moss and shipped in **LIGHT, STRONG CASES MADE OF ALL NEW BOX LUMBER. EACH CASE IS TAILORED TO FIT EACH SHIPMENT.** It is surprising to many how successfully properly packed Pansy plants can be shipped even over long distances.

Other Reliable Standard Strains by Harrold.

The following strains are not of our origination but are grown in our gardens from originators or introducers strain, having been under cultivation by us for from one to four seasons. The same extreme care is exercised in growing this stock, as our own strains and seed of these strains will be found to be of a quality equalling similar strains from other

sources. We make no claims for these strains other than stated above, except that the seed quality and germination is of HARROLD high quality.

IMPROVED SWISS GIANT

We have not found this strain as free in flower as it might be but it is an excellent strain and will well repay its cultivation. Flower form is good with red shades predominant. Types three and five blotched.

MATCHLESS

A giant strain from an American specialist. Size is good but stems are short and rest period is quite protracted during the winter months. This is a good bedding type.

MASTODON

A strain of wide coloring of American introduction. Has been considered by many for years as a standard. Seed offered of this strain are all grown in our own gardens from a base stock obtained from the introducer.

PRICES of all the above strains, both in seeds and plants are the same as our GREATER AMERICAN PERFECTION.

Antirrhinum

(Snapdragon)

Seed and plants grown by Harrold.

The Snapdragon seed we offer are all grown in our own establishment and the same great care in selecting seed producing plants is exercised in this line as in other Harrold seed products. All varieties offered are well-known to the florist trade and are grown from originators' stock.

HARROLD'S THOUSAND UNIT PACKET

These seed are all tested for germination and packed in liberal quantities so that each packet under proper conditions should produce at least one thousand good strong plants. Seed prices of the following varieties are, per packet, \$1.00; 3 packets \$2.50; 7 packets \$5.00; 15 packets \$10.00. In ounce quantities we will be glad to quote you exceptionally attractive prices. Write for them!

CEYLON COURT. A wonderful canary yellow, very productive.

GENEVA PINK. A fine pink of merit.

HELEN. Beautiful salmon, free blooming.

JENNIE SCHNEIDER. Columbia rose pink, very popular.

ORLANDO. Fine bronze.

PENN ORANGE. Tangerine orange of striking type.

PHILADELPHIA PINK. One of the best standards.

SILVER PINK. Beautiful silvery pink self.

WHITE ROCK (or ROCK WHITE). Best early white.

PLANTS

Beginning with the first of September and continuing until the first of June we try to be in a position at all times to supply seedlings and two inch stock of the above snaps., at the following prices. Ceylon Court, Jennie Schneider and Penn Orange, Seedlings \$1.75 per 100; \$15.00 per 1000; transplanted and pinched \$3.00 per 100; \$25.00 per 1000. Two inch stock pinched, \$5.00 per 100; \$45.00 per 1000. All other varieties listed above. Seedlings \$1.25 per 100; \$10.00 per 1000; transplanted and pinched, \$2.00 per 100; \$18.00 per 1000; two inch stock, pinched, \$3.75 per 100; \$32.50 per 1000.

All stock absolutely free from rust.

TERMS OF SALE: All prices quoted in this catalogue are net for cash with order and are subject to no discount, except on quantity orders, on which prices will be quoted direct by mail.

Remittance should be by check, draft or money order. Stamps will not be accepted. Customers outside the United States should remit in U. S. funds.

Perishable goods will **POSITIVELY NOT BE SHIPPED C. O. D.** Other goods shipped C. O. D., when order is accompanied by 1/3 of purchase price.

SHIPPING: All seed prices are quoted, delivered by insured mail. All plants are priced for shipment by express, collect, unless sufficient funds are sent with order to cover transportation. We prefer that all perishable stock be shipped by express. It is far more reliable than Parcels Post even over short distance. The added cost is slight and the additional protection far out balances the added cost. We will assume no responsibility for Parcels Post shipments of perishable stock.

ADVANCE ORDERS: All orders for stock not yet harvested, are received subject to pro-rata delivery in case of crop shortage. We reserve the right to supply only a portion of an order, but will make no substitution without consulting the purchaser.

STATE QUARANTINES: Plant regulations which may delay or damage plants are at customers' risk and responsibility. If your state imposes such restrictions please tell us at time of ordering, so we may pack to withstand such delay.

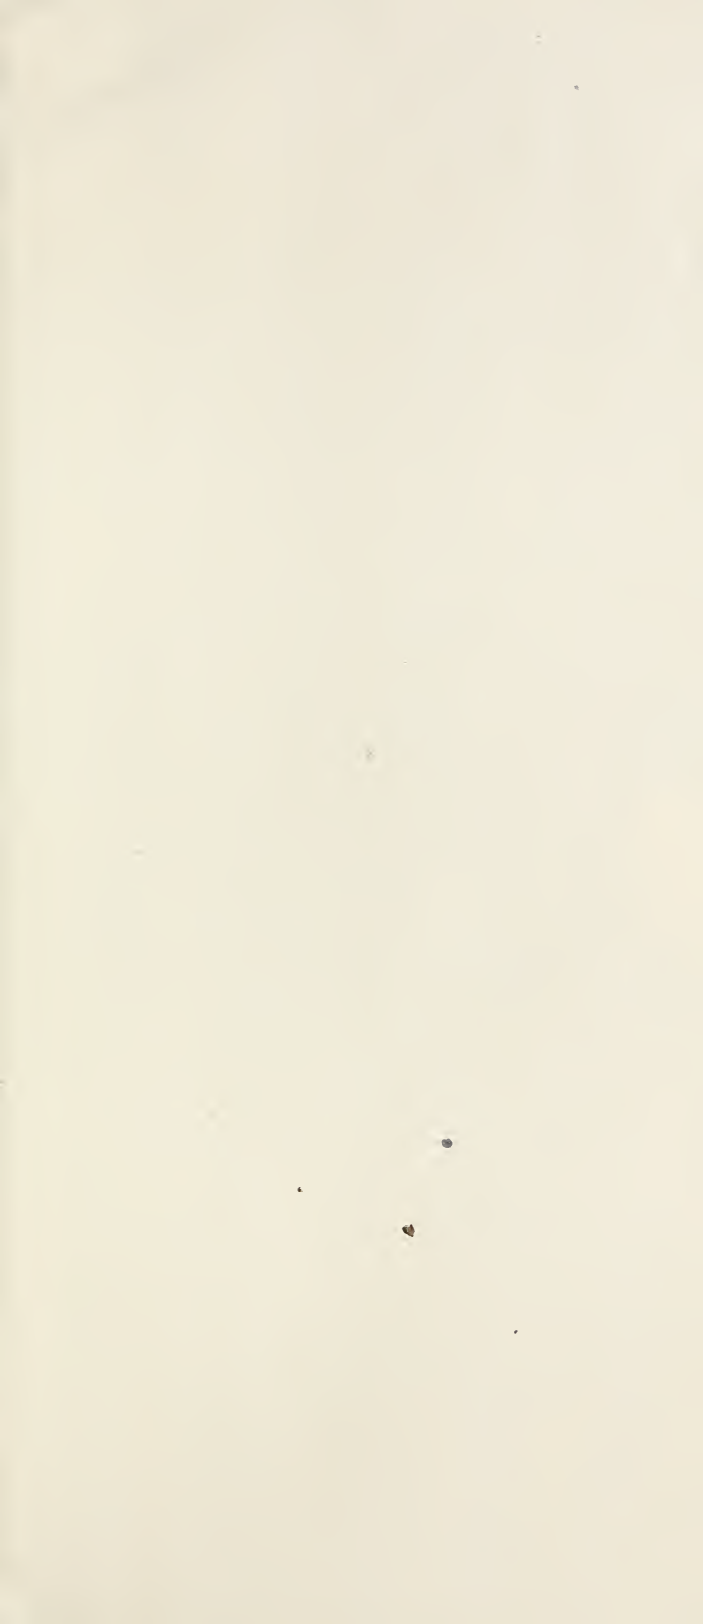

WARRANTY

All varieties listed in this catalogue are true as to name. Should any mistake on our part occur we are always ready to rectify it if it is brought to our attention. We make no guarantee express or implied, covering failure caused from climatic conditions or through neglect of the grower and in no case do we assume a responsibility greater than the purchase price of the goods.

We are vitally interested in all our seeds and plants during their growth in the hands of our customer and any question regarding proper handling will be cheerfully answered.

**REGARDING TRADE PRICES QUOTED
IN THIS CATALOGUE**

This catalogue is issued to the Florist trade and all prices quoted herein are wholesale. We endeavor to restrict the distribution of this list to the trade and do not intentionally send it to retail buyers. We ask that you help us protect your interests by not showing or leaving this catalogue where it may be seen by your retail customers or visitors. If it should come to your knowledge that we are inadvertently sending this list to retail buyers we will take it as a favor if you will bring this condition to our attention. We thank you for your cooperation.
