## WILL THE YOUTH HEED THENT

Hemp what? Why the counsels aud admonitio my pen was guided by the infinite nind, whilic
endeavor to give counsel to the yonng immorta What a startling fact that thonsands of youtli a this hour forming hasmas of thought, of feeling, an of action, which will govern their coursc throug
life, aud probaby scal their fate to alt cternity-
which will aluost to a certainty make them hayp Thich will aluost to a certaintr make them happy
or miscrable as long ns they exist. Yes, youthtul reader, you whose eye follows along these lines, ar
now formiag habits which will as certainly bring now forming habits which will as certainly bring
you happiness or misery as you are a liring being.
Stop, then, and refect! That wivkell deed which yon may eomuit this day may-yes, will probably
lead to another, and still auother; and ore you ar lead to another, and still auother; and nre $y$
awareof int, a habit as irresistible as the th
ing Niagara will be rooted on your being. Oh: that first wrong step! It is of little ne
remonstrate with clie young after they have on connmenced a wilh, a vilioms, or a reckless career
for, like the crushing avalanche, they are precipi tated onward with triple force at cvery step.-
Therefore my words are especially directen to thi
one who hus just sef sail on life's brond occo And methinlss I see such an one throw these
thoughts away, with scorn at the weakness the manifcst But let me beseech you to pouder wel
your nath, for my words are truc as though writte in the parning characters of an angel's spen. Nour
as you uninut your sails to the treeze, and star

 thu sfrcaul. Now it flats lazily nolong, and be may
go which way he will. The current gently bear friends of the dunger lurkiug iu those placid,
sparkling waters, he smiles at their alarm. With increasing, but tunuoticed spece, hat fearful stream
 but alas! of what ryail is human strength now!
He talkes one more look at those who have wartue him, nud pluyges into the awful abyss.
Such, young friend, is a faint piet carcer of many a traveler who started uloon life
voyate with as chering prospects as yun can row
sibly lase. And such will aluost inevitally bo
 ing allurements of earth or the deceitful cray
ings of your own passious, or appetites, make yo ings of your own pa
swerve from the patil
Peoria, ollt, Dec., 1556 .

## For Moort's BY-GONES

Winter winds are again beginning to whistlo
among the empty brunches, and to pierce into cerery unnecnpicd nook and eranny, and we wril-
lingly turn from the tempest without, to the happy within.
Thie very sight of a schoolbog's sled sends
thrill of pleasare to my heart, as I remember with What glee I used to hail the coming of winter in
years gone ly. The first snow storn! how anxionsly were the pearly flakes watched as they
noiselessly descended to earth. With what was the old gled taken down from its snmmer resi dence, and snecedily pht into action. Jear reader do you ever call to mind the heartfelt pleasure
with which, when school wras out youl with which, when school was onh, you hastened to toiled op the stecp ascent to obtain the urerry ride A happy group were we, assemblod cach snowy
morn and night to sllde down hill. Clabexce morn and night to sllide down hill. Clarence
Woonvins, a nohle, manly boy of fourtecen, who
especially clained sweet Cons Asiron for his companion in his rides, Meothinhs I can hear eveni
now her silvery laughter, as he would carcully

 of her own acching throw and wehild, horly, hut as
she gazes uplon the pallith chect and ficur the she gazes ullon the pallidd check and hears th
short-drawn breath, thinks with sad forlhodings the dark and loncly fiture. Clasely she clasps the
litle sufferer to licr aching heart, and as she fondly
ind Kisses his snowy hrow, she pereeives that death
with rclentless hand, is fast placing his iey eeal
upon her only and tilolized child slowly unclose, anil those fecblc lips taintly articy
tate "Mother, mother - good night") assumes a lovely smile; the spirit has left its prisisn-
louse of clay,
the pearly gates which lone on angel linezo it passcs Ah! mother, weep not; thy loved and cherished
one hath been transmlinted to a fairer clime where one hath been transilianted to afairer clime, where
its cherub bet now walk the gollen streets of the
New Jerusalem-and its golden harp shall ever bo New Jerusalem-and its golden harp shall ever be
attuned to the praise of Him who said "Sufier
little elildicen to come onto me, nud forbid them
 hen, thy tears-thou hast now a gen laid np in
heaven - an angel-child waiting to welcome theo
home, where sin comes not and parting is neve home, where sin comes not and parting is never
known. So live, that when the waiting seraply robed choir, and cyer attune thy praise to Hin Wilson, Aiagrara Co., Ja

## FRAGMENTTS

How blind we are! Dareyes perceive but diult throngh the "obseuring day-light" the wondron
form of Beauty though she dwelleth everywhere. We may trace her presence in all nature; in the
watere, in the forcsts, in the changeful clouds that Hoat above nis os in the ennerald green, or dazzling
white, beneath our feet. We may note her in tlio subshine and the
the louman heart.
Gea, teauty is the child of Love; and Love Our ears acknowledge not the perlect Harmony
that teigns and sings in all of nature's realm But when we are freed from this clay prison eyes will opell ou the Sont in all his beanty, -w
shatl joy in all the fullness of the Father's Love Fagle Histor, N. y., Jan., 1857. VINA Meadow.
THE RETURNING ANSWERS. HEse the story of the child which went forth
into the mouutain ravine. Whilist the child wan-
dered there, he called alound to brenk the loneliness and heard a voice which called to hinn in the same touc. He called again, and, as he thought, the
roiee again mocked him. Fhished with anger, he find none. Hic then called out to himem in ange
and with all abusive elithcts-all of which wa
faithlully returnad to child ran to his nother and comphnined thata a lo in the woond had nhused and insulted lim with
many vile words. But the mother tools her child ty the hand, and said: "My child, these name
werc but the cchoess of thine orvn oiec. Whateve
thou didst call was returned to thee from the litl thou didst call was returned to thee from thene liill
side. Hadst thou called out pleasint words, plensan Words had returned to thee. Let this be thy lesso
through lifte. The world will be cohoes of own spirit. Treat Lhy fellows with nukindness, an they will answer with onkindncss; with love, an
thou shatt have love. Send forth sunsline from day spirit, and thou shalt never have a cloude day; carry ahont a vindictive spirit, sud even io
the flowers shull lurle curses. Thon shalt receive cyer what thon givest, and that alone." Always said the spoaker, is that child in the mountain passes-and every
child, - Selected.

than 100 elerks constantly emploged iu recording
transactions with 30,000 contracturs aud other

SABBATHI NIGHT. How beautifully steal the evening shadows or earth, at the close of this the Holiest Day of all the
Seven: The cares, the dnties, the perplesitics o has grown leitter amid the swect influences of the Sabbath. The sovl has broken the cords th air of heaven, and thus is strengthened for the
temptations and conflicts of the coming week. The sweet tones of the church bell have won us to
the honse of Gon, where man has plead for bles-
sings with his Maker; where the songs of praise have bust from lipss attuned to melody, -and, as
the speaker has pointed us froni earth to hearen, something more than his words of burning elo-
mence have tonched our heart, and moistened the eye, -we have felt that Gow was o thre, and hat the the
place was holy. Thank Gop for the Sabaath, writh ts softening, subduing inducuce upon the earthweary sirit.
long week of twil antl striving withont the Sabbath
to break the spell of worlulineiss? But the evening eomes alowly on. The crimson
and the purple clondithat make the West so gloand there in the vaulted sky, a star looks forth, and listens to earth's vesper hymn. As the twilight
gathers over earth, so heavenly thoughts steal to gathers over earth, so heavenly thoughts steal to
the heart. The holy hush of the Salbbath stillness resting on the outer world lays its binger on the
spirit too; tund as wc think of the morror's care and duties, we alrast wish that life were one Sabthy sun or cevening shaduws. But not on earth can
thix he, yet ty-and-by, when the last Sabbath praycr of tho Sanctuary for tho last tinit, then slall we be
where prayer is tnrned to praise, aud the temple wherein we shaul wership will bo a ceity glozious
sith dazzling goll and gems, and "rbe gates of it nall not be shut at all hy day; for there shall
no night there." Hy-and-by the last Sabbath on
earth will coruc, and there will follow a morrow Love, sund joy, aud perce in hearen.
Srockport, S . y.is.

## GATHER TO SPEND.

In all his dealings with his chosen people God had regang, not oipleeir interest alone, ont was es
tablishing principles which our lives are to be gnided, if we would tind favor in his eyes. The
Israelite in the wilderness was tola to go forth and gather manna for his daily food, and there mis no restriction as to the quantity he might bring home. conll. Fint if he attempted to reserve to himself
more than cnungh to last till the the next supply, that which he witulueld from lis hungry brother less snccessful in providing for the wants of the to himself
So is it now, Perhaps it is my duty to gather
cold as God may give me opportunity, assuredly I may do it without sin But wo to me, if, when He gives me opportunity, I fail to we it in reliev-
int the necessities of a brother less successful. he surplas which should have been devoted to
promoting the temporal and spiritual welfare of another, the treasure selfishly hoarded, beec
destrnetive of my own.
Suzsad
Dror by drop falls into the clear well-spring of
our youth the bitter water of experience, aud there is no filterer this side the grave that can restoro

## Stoves economizing Heat.

Ir is well known that cylindrical stoves give ont
the most heat, and have the best draft, bnt there are few who seem to know the reason why. Thes
do not sem to be aware, at least, that there is any-
thing in the principle of their construction which inlarts to fhem sneb qualities. Stove mannaca-
turess cannot be accused of two much scientific
$\qquad$ theun in casting so many with square amd rectan
gular firnaces. Tlis is especially the casc with ooking ranges and stoves,-the
wonstruetell on wrong priucifles.
The reason why a cyliuder store gives ont
mucly heat, und tends to produce such a goo
dralt, is owing to the sides of its fire box or fur

 Oxs of the great wants of the age is made plain
by our edineational system. The defects of that
 feat af we have progressed in popplation and
matorial prospererity. At this time the we ightupon thh mental oneryiges of the conntry is so heary than
the great publice wind docs not in any dercec ax. the great public oind docs not in any degree ex. pand or
around the fey A .em, designed for those countries wher the few eontrol the many, where easte separate
the weal thy and titled from the poor and laboring and doo s the great producing mass to mental a well as $p$ hysical servitude, was carly engrafted up
on the iustitul it has becul in some degree modified, yet it by no means uncets the existing necessity.
How many young men, who have any of ourbest collceses, are preparen to coterupo the nectiv duties or life numitr they have forgotten
nearly all they speut so wany years in learning? How ma yy aro prepared hy their previous learn
ing to enter suceessfully into the workshop of any nechanic? The time spent in disciplining the miad is well, but how much better if the bod had also been cducated, if hands as well as head
had been instructed at the same time. Both body In this country, the law of primogeniture being posed to the perpetuation of estates, it should b the first duty of every parent to educato the child ons and daughters of the millionaingey. The may te reduced to poverty to-morrow, while the the stately mansion of the millionalre. This i exemplified in the history of a generation in cities. Fen of the active business meu who have aceuon suceessfully by their chitldren, white the bo ultimately the inheritor of the business, and the grelf a bervant in the business which has becn in as himse if.
If the poor man could give his ehild a thoroug
practical cducation, if the rich man had donc so how well both would be provided with the mean stances of contingencies that mightut obstruct thei way. But in all this great country, hiolding now sidene ednctited for the cimes or for the proper dis as all must depend more or less upon their ow personat excritions for thaci success in life, they station as well as the highest with credit to then
selves anul profil to the communitr: It was to mect this great want, to remedy thi great evil, that the Peophe's College wis designcd.
The obect of its originators was to found an in
stitution which should not ouly embrace, so far as the hifher branches of literature were concerne also to place within the reach of Une poorest chil an educatiou which would amply lit it for taking
a favorathe position for future success in any walk or busincss in life, All the leading branelies a generally being practically taught, and the student cnaded to graduate in any partieplar branch,
well educuted both iu mind nud body. This grand idea is on the point of realization, by the estab-
lishment of the College. The preliminary steps bave been taken by the tristees, in appointing stood they have agreed upon the spot, and their report only requires the approval of the stock-
holders, to vender the location complete. Thie point chosen is a farm in or nenr the village of
Havanh, in Schuyler comnty. If such be the cuse Havana, in Sohnyler connty. If such be the cense,
as soon as the location is definitely made, prompt as sonirs will be taken to organiza one or more
menasurles in the practical departments, nud pro-
brancties ceca a at once with the business of the lustitution. must cone forward with willing hands, and give it sucli all cidomment as no other College has ever
liad. They ean do it, and its eudownent mans count in nuillious to chable it to scatter its blessed
lightinto overy part of our country the nest ten years, a fund will be raised that will give free instrintion to all who may come witain

| Tur formidable and sanguinary animal above represented-classed by naturalists among the cat kind - is found nearly throughout the whole of Africa, and in castern and southern Asia, He usually measures about threo feet in length, exclu- sive of the thil, fut sometimes reaches four feet. His appearanee indleates his natural disposition. He has a restless eyo aud a sinister countenance, and all his motions are hasty and abrupt. In rapidity, asility, and precision of motion, he is nnrivalled by any other animal; an advantage which he owes to the strength of his museles, the suppleness of his jointe, the extreme pliability of his spine, the greater lateral compression of his body. and the slender proportions of his limbs. prey, on which he darts from his hiding-place, and even pursues up the trees, eonsists of antelopes, monkeys, and the smaller quadrupeds Usmally, he shuns man, but when closely pressed, he turns upon the hunter, and bunger will drive him to | attack, though by stealth, the human race. Instances of this naturc, however, are not frequent. Nothing can be more beautiful than the clegant and uctive manner in which the loopards sport among the brauches of the trees: at one time they will bound from branch to branch with such rapidity that the cye can scarcely follow thew; then, as if tirel, they will suddenly stretich themselves along a brauel, so as to be hardly distinguishable from the bark, but start up agniu on the slightest. provocation, and again resume their gracciul antics. <br> Fven among the cata, he is remarkable for extreme sleckness aud excessive agility. Ho is well distinguished from all the other species, by the viviluess of his coloring, and the beauty of his markiug. Thee eonsist of numerous rows of large rose-like spots, passing along his sides, each formed of the continence of sereral smaller black spots into au irregular circle inelosing a fawn colored ccutre, upon a general ground color of light yel |

PROGRESS AND IMPROVEMENT
ROGHESTER, N. Y , -SATUROAY, NANUARY 17, 1857,
[single no. fite oents.

SWHOWUR NO. 367

MOORE'S RURAL NEW-YORKER,
 CONDUCTED BY D. D. T. MOORE,

METEOROLOGY FOR FARMERS.
Trus is an interesting enlject to all, and to to
Farmers onc of grat practical importanco. Whe intend to treat it at some length, for we are very
utiltarian in out notions, WWe shall sin show the advantages which rould Inure from properly conducted gysten of Metecrological Ob-
scrvatious, not only to the Army and the Navybut to bygiene, to the great induatrial pursuiss of the
conutry, to the |nublic convonience, Fancement of science. Having lone this we shall develop a very simple and coonomical plan for
condnctlug these investigations, and thereby afford
to to the farmers-to whom we especially appocul
because ther have the "J - an opportunity to lenil ns their conntenauce and We do not ask them for money, but for gooll words and fricndly co-operation.
There arc no phere-and to mulcristand its nons in the atmos laws which govern thero, we must overleap State
lines in seareh of facts; we mast study it as a Whole, and olserve its plenomena both by sea and
land. The infuence of Canada upon thic wenther as it is in the Gut of canso that is lound on the surface of our planet fres water pecniliar features upon the elimatiolage of the lake
States, aud exerts a marken infune States, aud exerts a markell infnenec apon the
meteorology of an extensive region of this coun-
try. Many of the storms of thic Mllasizsippi Valley feel the Motecrologleal force of the Gulf Sreame,
and slow signs of its infunce fir and shows signs of its influence far away towards
the Rocky Mountains. And coula we trece the snow which how covers the fiells of many of our
rcaders with ita protecting and fructifyiny uantle as vapor when last it wass in the sea, $\rightarrow$ we slould thic lucifice Ocean, where it hal been ferallug had wished away from the monolithic caves or quarries of Carara martle.
Thic wiuld whlichl trought, of the whit sea, and depositen lt ins snowt hefore our doors, lid
it in ontediance to haws that are na fixed Which regulate the sensons and bring aboat seoud
time und harrest-anl, therefore, to unlerstund the Metcorology of our own country and compre-
hemd the laws which are expresect in it cliwhes we zust nnderstand the movements of the great
crial ocoan which gnvelopect the earth, and to the this ne must push our reecarches far away into
dietant lands and establisho our olsiservations on the
 great waters, are the unfulid volnatecer co.open in tives in this aystem of research which we now
propose to extend to the land ath Which we appeal to the farners for lielp of a like faring people was obtained, and then It will agriculturlsta aud laud cmomen ecmeraly that of the The Superintendent of the Nutlongi end only suthorized, appested to tie ehip master the Americur co-cperation, mult invited all muder stracts of their log books, showing for every day
the ship at sea, the direction and force of the
winds, the strength and get of the currents, with
the temperature of the air and water, and the
height of the Barometer. height of the Barometer.
From these materinas, thns obtained, the celebra ted "Wind and Current Cluarts" were constracted.
Thus the observatlona wrere made gratuitously, and Thus the observationas wrere made gratnitously, an
the datit furnished by ind iniduals witlonit cost while the goverument nndertook the expense o
colaboration and pullication. lu aeknowledgmen of such bervica, and for encouragement, overy
Navigator who had contributad olservations, was and a cony of the work which tine olservation By this simplo aud economical plan, the a a little time, wna dotted over with Ioating me-
teorotogical stations, fron which sea nond air we
watched day and night watched day and night, and the placnomona
sected ly them carefllly observed and uoted. Among the imuediute results of this nnder
taking pasases were shortencl, the dangers of
the sca were lesened, narigation was improved commerce was benefitod, and remoto corners of
thc carth lifted up ns it were, annil set down nearer
to our own doors by many days' ${ }^{\text {siil than than they were }}$ to California was redactacd fistana a sognge of nipward of six months on the arcrage to one of a littlo ored
four montbs, and by a similar process the colle cour montas, and by a similar process the golden
colony of Alustralia was placed just one month
nearcr to the ports of the mother country than it nearcr to the ports of the wother country than it
was before ; the saving this cffected to British commercoalone has heen estimated in England to
be worth to tho merchants and people of that
country not lcess than ten nill Now mind, gentle, prndent, and cantions farmers, the sea caphing and merchants to realize thesc gains dit not have to incur nny gdditional outhay nocessary for recording the obscrvations they were
requested to makc. The instruments nsed were required for the proper narigation of the ship at any rate. Ald the necessary instruments for the
observations now reqnirell to be made on land, are such as crery good furmor ongbt to have nlso a
auy rate. Thus was comucuced tho first sssto matic antempl to study the Meteorology of the se
and to investigate by an extensiro co-operation among wariners, tho laws which govern the move
ments of sat ments of sea nud air
Other maritime
arising from this plan, signified a d desire to take
part in this gystem of research as co-raborers.Accordhayly, the leallug powers of Eurupe, sent their accomplishments in the walks of scicnce, to
meet the Superintendent of the Washlnytut Ob to the best plan of 11 general and uniforin syste in
of Mecterologieal Observato These oficers met iu Brussels abont throo yea for the seh, which, at their rceomine eddetion, hat-
becn adopted by sea-going people generally. The are sent to an ofice, that has bech established ly tho erown, they arc discnssell and lublishell for
the beneft of the sea-faring world, as they arc in and other countrica
This beautifill system of researeh, with, its mag
nificent results which are cstimated to the worth millious sumually to the peoplide of this country and
their factors, is carvicl on under an annual appro priation by Congress of less tham tweaty thous.
lollars
Thus we bave two- thirds of the surface of planct already ocenpied bs meteorologicalstatlons

 brought us to the top of the clifirs. We espried
beverral men iu the viciuity, and some of them on

 clill on which we were then sitting.
A the watcr, we eutered the loat, which foour
sfrong rowers propelled out upon the Atlantic strong rowers propelled out upon the Atlantic,
sind theu with a gradual curve turved toward the Iace of the precipince, and rowed into the caves
The largest is six hundred and sixty six feet loug aud the entrance nincty-six high, forming a grand like a hornt, as it extend surther iuto the rocl and covered by the water, but may be traversed un darkened the race of the clist, and thendered the glocmy entrance vastly more eolemn and impres-
sive. The men slouted together to let us hear the darls depils, and were prolonged until we hall imagined we heard the answering voice of a mon with hollow leats, and kept the wary boatmen he hoat dashing against the rock. What s place never darea to tormain in it whon the sea was rongl, for the tremendous aproar would frightc
them to death. Besiues, it was supposed tha
sometimes the waves rolled to the furtherent
dashed to the very roof.
After coming out of the carc, they wanted to row us round a promontory a milc or two distant,
where we conld get a better view of the Chinneys, rwada fired at, mistaking them for the castle, and also of the face of the cliff which is
Sur hundred feet ligh, but the boat tumbled abon so roughly in the short waves, that I began to fee we desired them to land us on the Canseway, for when that uurelenting fiend haz porwer. Accord ingly we landed, and one of then took both of our
knapsacks on his brick sud went tith us as givide siuphy n canseway of busaltic columns, extending
from the foot of the cliffis jato the sea, and it is tion of eolumns appears again at Fingal's Cave.
The lofiest partt is called the Giant's Che loniest part is called the Giants L.oom, an
rises only alout fifty feet abore the water. Bu the clifit' belinul are from three to four hundre
feet ligts. Hall way up, is tho fiant's Organ, so tho face of the clit" bear to the pipes of un organ The guile said that it plays once iu seven years,
on clitistmas morning, tud then the colnmns in
the Cnuseway dance three times round. I asked him if he had ever beard it illay. He replled that Causeway to advantage until walking orcr it. Tbc
sulfice is very nneren, as there is scarcely tho columns of exactly the saine height. The majority nuother closely. There are, however, some of
cight and nine sides, One column is also a pentagon, all the sides of which are exactly equal, and the guidu pointed out a dianond-shaped
colnan, which he sserted to be the ouly one in outer columns, called the Wishing Chair, and they ansert, if a person sit in it, and afterwards takes
three drinks from the Ciant's Well, a apring of the

## 

Triere are few truths that furnish a greater number of daily illustrations, than that which declares
the indissoluble union between CuRisr and the Christian. How often have we secn the Chiristian
man of business gradually becoming remiss in the man of business gradually becoming remiss in the
performaces of Christian dutien, and finally giving ap allth
weal
sate him, avd while prostrate in the dast, covered with humility, a 10 ws swet roice whispers in his cara
nothing ahall separate us from Christ nothing shall separate us trom Christo
We have heard the fond mother, as she pressed her beloved child to her bosom, exclaim, with all
the fondness of a mother's loye how without thee, my own sweet child! Our ejes were turned but a moment; but when we looked avain, fore a new-made grave-while a voice froun be us from Christ.
We have secn a young man fnll of hope, and
strong in will, buelke on the armor, and march boldyly ont upon life's broad batte-field; but ere
the sun had once Eissed the western hills, lie lay stretched upon the green turf beride hiss armor
and while we gazed upon bis protrate form, we learned the lesson God would teach, nothing shall separate us from Christ. He who lies so lom
boasted of hisom power, and ounght his own glory Another, we have seen, rejoicing in the colnple ted strength and grace of manbood, whom no toils
could reary, no obstacles avercome, no sorrows depress, no caiamities dishearten, no hntaan powe Suddenly he falters in his rapid journeyings ; his feet become weary and way-worn; his strength fails him; the Alesh is leaving his bones; his eyes
are sunken, and look lancuidly out from their loolare sunken, and look languidy out from their lion
low homes; the heart sends the blood dazily th rongh the thin reins; his form, weals and attenuated, is last hasteniag, and he lies cown by t.ee wayside to die. In our presumption we azk, why hath God
dealt with him thus? A still, small voice, answers dealt with him thus? A still, small roice, answers
be gloried in his health and stren gth, and gave no God the praise, and lo his healih and strength have both fail $\underset{\text { Rochester, Jan., } 195}{ }$

What we owe fo Christianitr.-The late emisaid at a public meeting:
"We live in the midst of blessings till we are uttriy insensible of lheir greatuess, and the sourc or arts, our freedom, onr laws and foret enviraly Low large a share is due to Christianits. Blot
Christianity ont of man's history, and what would his laws lase been, what his civilization? Chris tianity is mixed up with our rery being and on
rery life. There is not 2 familiar object aroun you rhich does not wear a difterent aspect, beaw which does not orre its truth and gentleness 10 Christianity-not a custom which cannot be
traeed, in all its holy and healthful parts, to the Tue Prer Splait. - The sprinys of everlasting ife are within. There are clear streams gushing
up Irom the depths of the soul, nnd fowing ont enliven the sphere of must listen to catci the silvery "toncs of the little
fill as it glides slong Yo rill as it glides slong. You mag not witneas its
silent march; but its course will be seeu in the fresh verdure and the opening floters-its presthat gather arouud it. It is thus with the pure
spirit. You maly not hear its "still small roice," or hecd its silent aspirations, hat it has a moral
strength and a holy iunuence that is felt by all strength and a holy in invence that is felt by al
around. The widderness is made to snile in its iresence, and fowers of news life aud beauly siping

Motives to Holiness.-A man who has been be pure. He who is an heir of life should be holy. soon-he knows not how soon-to be translated heaven, shonld le holy, Are the angels my at-
tendants? Then I should walk worthy of their angels? Then I should be pare. Are thess feet
soon to trenul the court of lieaven? Is this ton gule soon to unite with heaveuly beings in praising
cod? Are these eyes of niine soon to toots onthe the
asceuldey Revleemer? Then theso feet, and eyes,
and lips should be pure and huly; and I should be deand to the world and live for heaven.-Albert
Barnes.to hide Lim from his mother. While the fathe
wept the ncighbors looked npon the litile strange with something like fear, zand said to themselves "it would be a happy thing if he should die."
But the infant did not die, and as the mother sut the infant did not die, and as the mother de
manded him with an importunity not to be resist manded him with an importunity not to be resist-
ed, he was placed jo her arms and received the
first maternal kiss from ber whose langoid cres first maternal kiss from her whose
failed to show her the aad reality.
Some days afterwards the bootmaker Deconver
and his young wife stood vith gloomy faces bestde the cradie of a child born twithout arms, and whiose lorreer extremitios were littce else thno trunks ter "No uatter," "he mathe miner exclaimed; "Iloure him," and raising the infant from the cradle, she presse husband said: "at least the ounhappy chold, shall
not go through the world without a father and Finother."
Such was the entrance into life of CASAR DVical schools, recipinint of the the guld of medal of of the
exlibitious at the Lourre, and corresponding member of the Imperial
Science, and Art, of Lille.
The early cbildhuod of DUCORNET Was not unhappy, for inlants do not know themselves. Be
sides, he had such an agreeable face, such a qnic and precociuns intelligence of expression, and so evcry one segarded him with sympathy, and good
hearted poople even thonght himi handsome.-
Mcanwhile the child green up, and it becaunc neces. sary to choose an occupation for him. It had been
remarked that whicn joining in the games of his from the sports of his age. He learnt to use his feet for acarly every purpose for which orther per
sona use their hands, und with an equal facility and freelonn. He used them to throw the ball to
his companions, to hokl a pen, to cut tigurca with vellous. One day the boy surprised his parents ty tracing on a picce of paper a number of ornamen-
tal leters admirably executed. An old man, a
teacher of writing teacher of writing, who happened to be present,
oficred to give the boy sonue lessons gratuitonsly. a year he was at the head of the writiuy-moster"s
class. Strange as such alllity undoultedly was, there was sonething still puore strauge to follo
The new pupil showed bis skill not only in writing,
but in drawhinss sud ouilinull designs, which were
executed with equal ability. The benevolest Writing-master sluwed these productions to M .
Witteau, profesior of drawing at the academial
scloovts of Lille, whe, in his turt, wals seized with admiration at the wonderful altitude shown by
this strange artlist, and cansed him to be admitted
into the acaldeny.
At the Aculenty, Cusar Deconser carried or all the prizes oue after another; and at leugth re-
ceived the great medal for modeling from the life,

Guctray mive amom

| THE APPLE WORM. |  |
| :---: | :---: |
| Notura valuable is necomplished without labor, and as a generul rule the amount of labor re- quiredi is in proportion to the value to be produced. Iron, ia made by labor moore valuable than gold, and gold is ubtained only after careful, earnest and lahorions search. Of the operations of the farmer ful eare, and intelligeut, well-directed labor is the price at which the farmer raises his large erop of ing the attincks of inseuts, there is nothing like care aud watehfulness. The grower of fruit has a ground. As soon as one enemy is checked or sub. never sus au intelligent, persevering, careful cultivator that did not succeed. Eternal visilance is the price of success; and this price we ean afford to pay for tine fruit. A correspondent in Michigath has been examining the doiugs of one of these $\qquad$ a lut of ayples (mostly Roxhury liussets, which you know are nomong the lest of the keepers,) and have bad to cast ont a large share, (alout 3) being more or less rotten, all or ucarly all of which is the result of the doings of the spple Worm. And I may say further, that for several years past tho injury dous: hy these pests is euormons; in many orehurds the value of tho winter apples have theroby becu depreciated more than lial?. And itwonld seem the evil is growing, becoming worko and worse, froms year to year. Now sir, while we do not suppose that as a matter of course, you know every thing allont every matter or question that may arise, yet we liave a right to presume at least, that possibly you may know some things which every one olse does not know. Aud it is to obtain tho bencfit of sueb knowledge that I am uow writ seribe a remedy we will promise not ouly to be thankful, but to pay both cheerfully and liverally therefor. But doa't refer us to the books, as we think we are pretty well posted in these, and moreover think WC have ly experimenting several years, got a leaf or so ahead of them, And altho we liave made some diseoveries which tro think of great value, yot a perfect remedy, i. c., one that can be appliod in all eases withont "costing more than it comes to," we have not yet found. Still, we intend to continue experimenting. <br> I have often queriod whether this difficulty prewails to any extent in Western New York or any other section to anything like the extent it does here, and have mado inquiries, but tho answers obtained have heen so contradictory that no light has been shed on the suljeet. Hence, I have tho't that perhaps the evil has provailed either there or in the vicinity of some of your numerons eorrespondents, and that possibly somebody has made mach more progress in the way of dizeoreries than we have, and will give ns the desired information. We have, and will give ns the desired infornation. Jackson, Mich. Jan. 11,185 . D. Cook. If Mr. C. Las learned facts by experience that will be valuable to fruit-growers-a better why of cheeking the ravages of the Apple Worm than now generally known-we hope he will give the readers of the Roral the beuefit of his knowledge. We should like to know if any worms were found in the apples when he examined them this winter. Also, it a portion of these apples had not fallicn from the tree before paeking away. We will give all the knowledge wo have on the snbject. |  |

Our Mears all thred to fuinces:
Mone-I have been a constant render ofyonr very excellent paper for nearly three years, and
have found in it manaj things nseful and entertaining, as well as hinggs strange and uncommon. I
like your paper for the reason that you open your columns to the pencilings of the men of the plow,
as well as those of scicuce and literature, wheroty wo may profit by the experience of the humble, a
well as of those who ocenpy elevated positions in society.
Ihave read sone articles in your paper which
were rather hard to believe; nevertheless, they may be as renlly true as this which 1 now send yon
for publication. Mauy or my neighbors can testify for the trath of thisstatement, and shonld yon deem should be pleased. On my farm I have a frrit and vegetable yard,
containing abont six ueres of land, and ini It have
almost all the choice varictice of fruit adapted to this climate, and in considerable abnndance. Of pears I have some forty different varicties,-
Some fifceen of them very fine indeed. From one or them, the Flemish Beanty, I cut, in March last,
some scions, and after curre fully labeliug. (as I also some scions, and after unrefilly labeliug, (asi I also
cut other varicties) prt them anay for spring use.
TTo years ago last spring in my yard were set out a number of yonng pear trees of the common stoek,
designed to be grafted when it shon!d be proper to work them. I connmenced gralting abont the 25th
of April ast by cutting oft the top of one of them
which was abont oue inch in diameter, and in the usual way inserted two sciuns of the above named
Flemish Beaney y ariety, one of which did rematha.
bly well, making about thirty inches . gromth, besides several side branches. Upon the same stalk;
abont fiftect inches froun where the scion was in-
serted last April, there came ont a tranch about

## Toun eorresilondent, "Farmer D.", calls ippon scientific men "to reconcile the fucts" given in

his article in the Rewal of February "the "with
the theory that wheat annot produce chess,"
Althongh not a farmer, nor a "scientific man," $J$ will, neveribeless, with your permission, Mr. Edi-
tor, ,uake a few suggestions bearing upon the
question at issue, yiz, the tromsmetation of
 to have aotually oceurred, and to have been cor
recily reported, I would nalk if they are sufficent
to estallish so important and anomalons a doc
trine as the one whieh they involve - that wheat harley aud other gruins, are capable of deteriora
ting, or otherwise changiug, into a new species of grain, which shall therenfter posseess unchauga
Lle characters, and which eannot be reclained to
the oriciual stato of whent
 a conelasion is too important
out a thorongl examination
Every one of course belieres that, as a genera
rrie, "Ilike produces like." Whent produces wheat
 arese subjet to extcrnal conditions, so that tirenm-
stances beting changed the rale no louger obtuins
But if the agencies which he enurnerates ar Bnt if the agencies whicl he enumerates ar
capable of modirying specific regetable claracter
istice, so that wheat and batleg may therchy be istice, so that wheat and barley many thercby be
clinnged into chess, and oats into rye, as hats else
 to say, no one hans ever witnessed.
A faut, then, may be sugpected in the renson-
ing of your correspondente We can adnit the
fuets rellated in tis article, wittout alopting his explanation or theory. We ask for direct, demon-
stratite proo of the transunutation of species. Let
it be proved that the soil coutains no foreign seed
whinen elless follows When chess follews the sowng orthesis which
owir assmit is required to a hapeote
confessedy at varinuee with the cstahishen or of Nature. It cannot be denied that the moos
careful examaination which seicnticic men lave

## 

## two or three ineles with straw thoroughly we with brine; then turn two furrows, covering the straw as well as the potatoes. The salt being of

解
 he who lielke out and plants small potatoes for
fire years in succession, will diga aruy snall crop
The potatoes slould be cat six or cight days he fore plantiug, if tiuse is deemed of iuportance,
the potato never grows while the wound is healing The secd should never be permitted to sprout be
fore planting, which is casily prevented, if no planted until tho ontoto of Jult. It has he shme
injurious effect on potatoes that it has on wheat, The oftener either sprouts, the more feeble and
sickly the platsts the bring forth. 1 plaut a barre
 bome that never fails to we sirend, and at aless ox
pense than from tro to fire dollars per lusiel
 frost the second of Novembember-that weilighed font
teen ounces. I blould not import sced if the seasou was suffientiy loug to ennble
me to grow two crops, taking the last for my secd potato by a change of secd can be improved, howerer far fetched or dear bought on a soil in a a cli
mate both of which ase exactly adapted to it growth, either ly yatne or made so by cultivation,
and I Ian quite sure that I have improved then both in quantity and quality for the last ten years
My reason is, that unlike almost everything else We cultivate, it does much better in other climates
and different soil than in its native land. Foond and different soil than in its native land. Foand
first growing wild in the Tropics ou this Continent first growing wive never socceeded in cultivaling
Where to any cxtent below a levcl of threc or fou
them to thousaua feet above tho sea, unknown to the an
cients, and as lato as 1684 they were caltivated by a very few in the gardens of the nobility of Eny land. They were regardod as such a great delica-
cy, that it is nentioned iu tie mavuseript necount
of the houschold expenscs of Quean Jases I, as costing at the rate of thirty dill of per bushel. So expensive or so thirty dollars

HOME ON THE FARM

## Tris farm preserves the family in its integrity. The home las in that charming worl, and that

 more charming thing, the fireslde; around whiehparconts ann elituren gather, and whlece the bright aud cheerfin blaze upon the hearth is but a true
type of the fane of love that glows in erery heant. The parents bave hecen drawn together, not ly the
sordid fantives of weallh, or ly the ambitions
ce-
 wifc that he is there, who is head of the woman,
aud the land int tiat thome circle. Here they gather at morning aud creuing, and at noon.
Their board is almost nlways surromuled with the
sampe clrcle, THere they sientl the louls winter eveniugs together, culi venced will the school-books
of clitidren, the nowsnapers and journate, and works of history and science. A constuyt homo-
gencous iullucuce goca forth from this circle to gencons hearts that are molding there. Paren
the young heal
tal vigilance guards the young against wicked companions. If the religious inlluences are right
in that home, they will all grow up to be good
 uess of their fatior as solim In the fietd, sud by
availathe. They are with hat
the may, and at home. They form iudnstrions
 Trus whole tendency of fariu life is to dovel
the body hoaltufully and symmetrically. elty drelling, or turned into the thronged and filthy strect, to pursue hif sports. 111 eyes open

 $\overline{\text { THE SALISBURIA, OR GINKGO TREE. }}$ and
 and Ginlogo is the native 'uname in Joppan. It is a
native of China and lapan, aud was first dis.
 into Europe about 17s.s, probably by the Duteh
traders with Japan. It was only int rudnced into
England ahout 100 years since, and LaNN,
 ed in France in 1780 , and in this conatry in 1784,
being imported by Mr. Hasmivov, and planted at
Woodlands, near Woodland, near Fhiladelphia. Iu 1843 the in
ported tree was 54 feet high, and 3 fect 10 inelic ported tre F

Flowers.
The tree makout a foot a year
in height, and the ollowth trees buown coutinue to grow an vigorously ns when young. The form of
the tree is stown thy the engraving, "rlsing with a straight, ere tion, so as to form a regular, couical, oud some
 smooth, ghiny, soft, and of a thn yellowish green,
and of the samue color and tuxtnre on obth sides.
As shown ly the engraviug, the leaves are of peculiar form, beiug triaugular, with long stalks
abrupt at tho upper extrenity, and cloveu or
notehed, giving the tree vich in leaf anostlively as shown in thp firgt engraving are of a yollowish
color. The fruit is a nut somowhat reasmbing, it
is said the

The Lonks and prutr.
The London Gardener's Chronicle, speaking of
this tree, says:-"In the scramble after novelties there is a riak that one of the most yaluable of the
exotlc coniferous treest grown in Eurove may be
forgoten. It would he enteresting ro know shat

be assnred that we have at least one more valuable,
harlly gort.
Mr. Aules says his "i in not a native of Ohio."-
 Woud have known eherry trees bally injured and
Westroyed by the use of ashes.
WINTER squashes and their Ennemirs.
Hatrivg taken the utmost paius in procuring
seeds and prephring the ground by well manuring
and pulverizing and nixing witb the soil, I planted with the intention of raising squashes. In due
time they appeared and gave flatteriug tokens of the future, but soon as the third and fourth leaf
appeared thla striped bng appeared. Ashes, plas.
ter, and often atirring tho ground gcemed rather
gran too much for them. After they had had their day
the large and voracions brown bug gave them a and, wishes, daill expressed and demonstrated.-
After a long strugglo motwithstanding, they in creased by the multiplieation table-like Walker's
soldiers they decreased. Thinking that natnre perhanded, my attention was ealted to to ther mat-
ters for some ten days, when I ohserved the vine wero some of them wilting, nad after s close exjust above the ground, literally eating them up.-
 entirely destroycd, with squashes growing at least
hale their sizc. Perhaps some of your readers

## 

MY CITY COUSINS

It mas a drizzly, raing morning, aloout the mid
dle of November, that I firt started on a visit to
 at our house, and so perfectly at home did the cassonally retwru the complinent. me at parting "Do come aud sce ns, Jexsx,"
decided iu my own mind to do so, and whon the
November following my father had luusiness
atew
as far
witho
that
thi
$\qquad$
own yon as a relative at all:'
This was a phase of hinmau nature which I hat
Brook, nud to my nother's remarks I replicd tha any way." Here Grandma cone to my aid, saying
"I was as good auy day as Tinso. any Pursmin,
mother ought to let mee go and sce the wovs of
mother
worli."
Afler
that I might accompany father, and never was
there a lappicr ehild than the one Whoo on that
raing morning, stood in the Meadow Brook depot, awvaiting the arrival of the eastern train, and care
fully watcliug the little bai! trunk in which wer together with numerouss selenctions from the tard
rote of my nother, fisters, and grandmother, the not to wear them uuless Auut HAliding liad con pany.
It was
nibus wh
of the thonght was the residence of why Uncle who had
tain, howe
the bell, as
" $Y$ Yes
here?" Was tho rather mugracions answer of the
fierce looking coloren wirl who eyed ns askance a
we descended from the muddy yehicle.
"Some of your country cousins, I reckon," an
 my trunir ou the step
"Yankee Doodle" made me look up jost in time to catch a glimpse
of both Trieo, and Pirenie, who instuntly drew Bnt in this I was mistaken, for though I ci B! dently expecting to see then come rumning dow
with cextended hands and oflered lisses, as the of chem, thongh the rustle of silk I led me to suscalored woinan conldueted is. Upon inquiry wi colored woman conducted us Upon inquiry wo
learned that my unele was nt the store, that auut
was making calls, whife the gill, who wns named Drusd " didn't know whether niy cousins wery in
or not, -she would go and see," and cre I could
tell her that they were, she left the room. Soon returning she hronght the astoundiag intelligence that they were both out, adding that we "must make

the smatil fruits-
We need not savy yword in praise of the Stra
 mpurnst connugh for a amily. It stits, too, turns-tho plyutation made one gnriug giving
frll crop the iuext. Xo part of the country is to warm or to
Strawberry.
We had procecded thus far, whicn in walked one
of our most thorongh cult tivators of fruit and tat ing from his hat several papers, phaced in our
nand, to use lisis own osyression, "a a prethy sharr article for the Ruras.." Con looking at the title, we
found it to be "Strawherry Culture." It eommenced "pretty sharp," truly, with some severe marks aloout the slovenly and shatless manncr editors who would reconmend, or even tolerate mass of wecds, and starred and choved int and then add insult to jujntry, hy calling it "field
culture" or " market cullure," deserved to be choked to death with a large Hovey's Seedling, or Britis Queen. Having consented to phblish the article if allowed to make such slight alterations as we. permission to drav black lines over all the har sords, and give it to our readers.
mhorovair cotudre of tie btrathberry. Seprrfictal Cllluvie is not what the Stra
berry likes, but is most frequently what it gets. mast have a good, deep and rich soil, (with plenty of moiiture, while in tlawer and during the time
setting its fruit.) If this is attculded to, the results will be adequate to the lallor hestowed, and with this in vicw, I will proceed to detail somne of the Preparing the Ground-This is one of the most
essential operations shich can be performed, for if tho ground is not thorouglily prepared, befor be of but little ayail. It should be done in the fol 1owing manner:-Mark out the size of the picce or
cround which you desire to appropriate to thi purpose, and open a trench two and a half fce Wide, and about the same indepth, at oue end of the lear neross from side to side. The soit whith ig dug from it must be cithcr wheded or carter to noro: then commence onening a trench of the same width, parallel with, and joining the first. The firs spit dug frons this trench may be laid on one side
until the other trench is fitted up, when it shoul be thrown on top of the one first opened. In the
process of filling up this trench, the manure a plied should be at the rate of two wagon loads, at leas,, to every square rod, placing alternate layers
of earth and manure until the whole is filled up; and so continue eaclisuccecding trench, and whe that which was carted from the first will be ar
hand to All this up also. By the ztirring of th soil and the adidition of manure, the ground will be raised considerally alove the oryiyinal level, and
if the operation is properly performed, a stick may be thrist down to the full depth of the trench with perfect easo, in any part of the bed. Tho expense
of labor for trenching will not cxceed fifty cents per squaro rood, and I have frequently had it done
for lcss. The cost of manure will depend very
ne dollar and a quarter per load. After the ground is thoroughyy liecepared, two
operation of plantitg may be conmuced. W might mention, liowever, that if the Stramberry
plants are required to be set ont in Angus, the trencling may be perforincd in spring, and a crop
of early potatoes many be phantcd, which will leave the gronud in good condition to receive the plants but if required fur spring planting, the trenching
shonld be performed in the fall, and the zoil on top he left very rougl, so that the frost acting on
it, may leave it in a friable condition when spring Plauting,-Commence by running a liue the
whole length of the bed, aud eigltecu incles from the sidc. Make a hole with a dibule sufficiently harge to receive the roots of the plant, which may abont the roots,-continue tlie operation by placin the plants eighteen inches apart in the rows, and
two and a half feet apart lietween the rows (Give cach phant a sufficient quantity of water to sctile
tho carth about the roots, and the completc.
Aufer Culture.-Those beds which are planted in hne a good mulching of tin-burk or straw. Many persons use hay or stable litter
This is a bad practice, for the seeds of weed whicla remuin in it vegetato and entwine thci it is uext to impossillc to cradieate them, whereas
with clemn straw or tan-1mrlk, there is no such difficultr. Of eourse, weeds, 1 wing indigenons to the
soil, there will always he more or less trupte theni"; but this is nothiug in coupharison to that
which is oceasioned ly thefr introduction from old litter. "Tan-burk is the liest material that
atn" acquaitted with, tol that $T$, as sorue cultiva-

 ing, the phants will form runuers, which should no
be atlowed to grow, unless it is desired to inerens stools, as they are called, In garlening phraseot

SHARPENING EDGE TOOLS.
$\pi_{E}$ translate the following from a German Scienificic Jonrnal, for the benefit of our mechauics and agricaltural labo rers:--"It has long been known that
the simplest method of starpcuing a razor is to pat it for half an hour in water to which has been added one-twentieth of its weight of manriatic or
salphuric acid, then lighty wipe it of, and ster a ferr hours set it oz a hone. The acid here supplies
the place of a Whestiono by corroding the whole surface uniform! ? so that nothing further than 9 injures good blades, whil ing. The process nere sach ingrovemeut remains unesplaiued. Of late tis process has been applied to many other cut
ting implements. The workman at the beginuing evening, moistens the blades of his tools with water aciaitited as above, the cost of whitu is almost nothing. This sares the consumption of time
and labor in wheting, , thlch moreover speedily here indicated would be fonad specially advanta-
geona for sickles and scythes." - Marla Lane

STEEL Rrose Oxyd or Iros:-At a recent meetSciences, Colouel Whithlesy presented specimens of steel manulactured directly from prre iron osya This steel presented a finer fracture than that of be made at an equally
wrought-iron, or nearly so

A Micmisist of Memphis, Tennessee, has eonhe is confident can be constricted so as to mak

PROGRESS AND IMPROVEMENT

ROCEESTKR, N. Y.,-SATURMAY, MARGH 7, 1857.
swhable NO. 37 x

| ice is neceled anywhere, it is whece filtered water takes the place of well water, on the table of the firmer. <br> 4th. The searcety of fuel at the West, should lead the farmer to adopt all the devices for economy in it use, which the best nrolhitects can furuish to him. Though a broad fire-place and blazing billets lieaped up lighl, have been deened for eenturies essential to the farmer's honsehold-comfort, yet the West is a region where economy derands that he stould fore go them. He eannot afford the waste of heat which a huge fire-plaee neeessitates. The stylo of his honse, its walls, furances, flues and reglisters, should all be planned with this neecssity in view. A cord of wood, or a ton of eoal, will soon cost the Western farmer more in proportion to his ability, than it does the resident of the eity. There is, then, the same cogent reason why the farnereshonld stuay so to tmillu his honse, that his fuel will yicld hin the greatest warmilh. |

## FAST HORSES AT $\triangle G \cdot L$ FAIRS. IT ls truly pleasant to see on astute friend, Ws.

 Garbirr, a veteran in the art rural, come outwitlr such hearly remarks in praise of onr Ag'l
Fairs, as the certain neans of grood intelligence to Fairs, as the certain neans of good intelligence to
the practical frammes: It it the more seppecally
intercating as there and experieuec, who are so conservative, inut to
say egotistioal, as to beeone stumbllug bloekis in the way of agricultural progress, Yet I cannot
fally agree with Mr, Garneor, that " hursa trothling and ladies riding at tho agricultaral tairs, if
coutinucd, will dwindle down those valuable ex-
 reiterated hy a portion of the naricultural press;
and the faet that the equine race ins more especial
fut favorite wilh the massos at our fairs, thau the
borine, nay niso be admited; yet who bas any
fears that fat beof cattle rill go out of fashiun, or fears, that tat beof eatile will goout of fashiun, o
that working oxen, blood bulls, cows, or swine
will cease to lo produced by nad 2 neeessity to will cease to lo produced by and a neeessity to
the farmer, whe oxpects to live by bis calling.
We are told that the Eurne coinplaint again We are told that the Earne complaint against
blood and fast horses, is made at the regional $A g^{\prime}$ '] Fairs in France; lant the editor of the Agriculture
Pratique says Hat the complaint there, is invariably from those who have work horses or hovine
stock on exhibition; with true French volublliyy stock on exbibition; with true French volublily,
these nen cry out," away with your fancy horses to
the Hippodrome,"- under these discouragements the hippodrome, - under these hiscouragements
it is so wonder that France las no fast horses
cxcept imported ones. But as the editor or the except innported ones. But as the elitor of the
Agriculture 1 'ratique makes the same plea for the
eneonragement of the exhibition of fast borses at eneonragemellic or the extibition of fast torses at
the fairs of France, as has been very modestly
done lyy Ws. H. lasp, President of the Ohio State Board of Agriculture, I hero coly his
froun the last Ohice Cultezator, whicla are
authority, comint as they do form a
horse and stock hreeder and Ohio farmer.

## 

 Mr. Ganburt says that "the trotter's ficetuegs is
valucd purely for jorkey puriosers" but exper
ence now proves that feetness is ar indispensalle ence now proves that feetness is an indispensable
requirement in the roadster, aud that it alone ent.
hancers the price of the lioras in the market, somelinnces the price of the liorse in the market, some-
times screral hundred per cent.; and that instead of "putting money into the joekey's poelket", the
most or it goes directly to the furner. Since the
adyent of railroads, bnch has been the growing most of it goes directly to the fanneer. since the
advent of rairoads, bnch has been the growing
impatience of alow locomotion, that eveut the de scendauts of the pilgrims no longer tolerate the
siow, sleok, family horse. At the last National
Fair at Boston, there were many suaus of family Fair at Boston, there were many spaus of fanilly
horses on the gronud that could trot the ninlo in
from 3 to $3: 10$. The resoll is that all such horges
 anticipating the syinit of the fast age, and Ver
mont is now coinung noney from her sales of fost
roadsters, Whly then stoond not the Ag. Fairs of the Empire State enconrage the exhibition aud trial of fast Lurses at the State and Connty Pairs,
It is at our County Fairs that the merits of horsers can be carefully compared, and competition ha-
manely and earefully trled I I confess that I learned more of the merits of a horse as a trotern at ed more of the merits of a horse as a trotter at
our last Seneea Co. Fair than I had cver known before. Some horses, beautiful to look upon when
slowly walking or in reposo, as soon as they were put to their uncost honfur sympathy in their hagh gone, and I felt a painful sympathy in their high
action and overwrought esertion; on the other hard the Tippoo Brothers, borses of only middulng nppearance, were the most graceful erentures in the world when under motion, coming out at the
fast round as fresh as when they atarted, while the Tast round as fresh as when they atarted, while the
othor animals wore completely exhaustcd -primo facie evidence that their voeation was for draught Rud the plow, and not inr the road. Of ladics on horse-back at our pulic fairs, I lave but one mord to say, and it is, that the oppo-
gition to such exhibitiou of our heaulful animated naturc, would carry nore weighty and bo conne from thosc who cannot ride and will not
learn, or from their next friend. Although 1

| arter laniness lours. Let those who sce anything in it alin to indelicacy, remember the old but ever new motto, "honi soil que mal y pense". Waterlon, N. X. |
| :---: |
|  |  |

It flesh and tallow. That the English sheep re-
qnite less, in eonsequence of their superior form,
I aidmit. That they would retain their superion form, withont tall feed, I presume no one will claim. the form of any animal, willout or good keeping.able to discover than it was any more palatable
ahan that of the Merino. Much attention has lately leen, and is being paid, to improve the forms
of the Meriuo, whicla makes them a fair sleep for nuttou, as well as wool; and if well kept may
turued ort to advantage for that parpose at tho sears old.
Three years ago this winter I fed my wethera,
that were eomiug two years old, in addition that were comidy two years old, in addition to
their hay and straw, one.half pint of corn cacl
per day, and sutu them innuediately alter slieazing
 ed wool, sorting near to eetrav, nuau worth at that
ume 60 cents per it, making the value of sheep and flece $\$ 6$ 50. My wool, however, was not sold hegan to go down before I got mine in market-

ed to be denonontrated in the constraction of hirs son-conanctigy material for filling in, so as to greater economy, strength, darahility and capacit of resistance of heat, cold and rooistre than can
eattained by the use of auy ofher material. attained by the use of auy otber material.
cheap non-conducting material for filling in is in dispensable to render the iron cheaper than th
brick structure, for the iron plates maay be attac umns. It is clear, therefore, that the simple and and straw, to be found everywhere, known to civil
engineers as pise, is the only material enitalice for the parpose suficiently cheap to be nsed witt a
vantage for the filling in of the iron building." WATER-PROOF TEXTILE FABRICS. Tass onc pound of wheat hran, and one onnee of glae, and boil them in three gallons of water in
tin vessel for half an bour. Norr lift the vescel from the fire, and set it asidc for ten minntes; leaving a clear lignor above, which is to be poured
offi and the bran thrown asway; one pound of bar oap cut into small peeces is now to be dissolved pan, and stirred autil all the soap is dissolved.-
In another ressel one pound of alum is dissolved in half a gallon of water; this is added to the soap-bina liquor while it is holling, and all is we
stirred this forms the water-prooiting liquor. I
is used while cool. The textile fabric so be rea dercd water-proof is inmessed in itic, and pressed
between the bands until it is perfectly saturated. It is now wrung, to squeeze ont as tracb of the
free liqnor as possityle, then staken or stretched, nud bung ap zo dry in a warna room, or in a di
atmosphere out-doors. When dry, the fabric or
cloth so trented will repel rain and moisture, but allow the air or perspiration to pass throngh it
The alnm, glaten, gelatine and soap unite together, and form an insolnule compound, which
coats every fibre of the textile fabric, and when ory repels water life the natural oil in the feathers of a duck. There are varions sabstances whieh
are soluble in water singls, bnt mhen combined
form insoluble componds,
 14. Oil is insoluble in water singly, but combined
with canstic soona or potast it forms solable soap. Such arc some of the useful curiosities of chemis Safety Friction MArcaes- - A recent English invention consists of matehes made of salphar and
nitre onls, without any phosphorus, while the phosphorus is applied to the sand-paper, with
which the matches are ignited. To os, this seems only to trauster the danger of ignition lrom the
match to the sand-paper. Bna if this is kept in match to the sand-paper. Bat if this is sept in a
safe place, or if it be carefully fastened on the ซall,
near the place where the matches are to be used, it may be a valuable improvement. It is a good
fashion, in regard both to convenience and satetr, fashiou, in regard both to convenience and satets,
always to hang up pieces of sand-paper, oryamenalways to hang up pieces of sand-paper, ornamen-
tally bound and othervise made tastefal in ap-
and pearance, as tre do a watch-case, by the side of our
beds or bureaus, bs the aid of which a match may be ignited without trouble. One will last, if prop-
erly secured, tor a long while.- Plov, Loom and

## Patent Office, -The receipts of the United

 States Patent Office for 1850 were $\$ 192,588$, and theexpenditures $\$ 199,931$, being an excess of expen exponditures $\$ 199,931$, being an exeess of expen
ditures of $\$$ si,, 43 over receipts, cansed priaulpally by an act cl Congress orderiug extra contpensa
tion to Examiners. The number of applications for patents luring the year was 5,960 , aud the
patents granted 2,50 , being 325 more applicutions nid 4 ss more patents than any previous year.-
The Commissioner recommenda an increase in the patent fees.

the refractina telescope. Yr is claimed that the great refracting teleseope
Cambridge, Mass, is the nost perfect instrument of its kind that the art of man has ever pro-
duced, havias hat one rival, viz: that at tae impe-
$\qquad$

$\qquad$ Pron the onter snfface of the olject-glass to the
point of intersection of the delination and polar
axis is 13 feet and 7 inches; and from the same point to the solar focas of the object-glass it is 8
feet and 11 inches.
The centre of motion of the teleseope is 12 fee
 from the end-bearing of its lower pivot so its june-
tion with the bed of the declination-asis, is 3 feet apart. The triction on the upper bearing of th
axis relieved by tro friction rollera, $\overline{7}$ inches in
diameter, altached to the slort arm of a lever axiameter, attached to the slort arm of a lever
which moves oo a steel pin passirg througn it be low the axle, The longer arm of the ever passes
through the urpight part of the crade and sup-
ports at a forked extremity a porerful balanceports at a torked extremity a powerfus batance-
weight which may be ajoustod as desired. The
defining capacity of the object-glass is such that powers of from 700 to 1,200 are habitually nsed
the rnessurement of $d$ ouble stars, and on raxe o casions a power of 2,000 may bo used to adran-
tage. With this power the teleseope has shonn
well the dises of Neptunc and of the satellites of IMIPROVED LIGET HOUSES
$\qquad$ scribing a system for distinguishing lights by caus-
ing them to slow their numbers by raluid eclipses ing them to sloort their numbers by rapit eclipses
and dashes of light. Any digit way be expressed
by an equivalent nanuber of oceultations and resby an eqnivalent nimber of occultations sad res-
torntions of the light; thus one eclipe and one
restoration would stand for the number one. The ralue of the digit thether belouging to the units,
tens or hundreds' place, might be iudlated by occultations preceded by shorter or longer inter.
rals of llytht as three eceultations at intervals of
a second would express turee units; then a pause a second would express three units; then a pause
of several, say three seconds; then tive oceulta-
tions would express fire in the ten's placee; then tions would express fire in the tens place; then a
panse of say threc scconds and two necultations
would express the humdreds; then a lougor pause of say ten seconds wonld show that the num-
ber was complete. Thos the number of a lighthouse might be repented tonre than once in a
minute, even where the figures are qnite tigh, and each lighth-house would coutinue the repetition of
its own nnmber. Sueb lights cana be seon at least as fir as others whie hare not temporarily obscured,
and wiy arranging tho nuullers of the lighthouse and wy arranging tho nuulhers of the light houses ahoug a coast nion sach a systern that the anfucent
lights shall have very difierent numbers, the figlighes shall have onits, tess and hundreds of the
ares representing
and uumber not reeureing in the adjacent lights,

 ANTI-TOBACCO AND SPIRITS ALSO.
In perusing a late number of the Rokal I ob.
served a "Call" to the young Ladies on the sulject of getting up an Anti-1 obaceo soctety, Now,
think it all well enough, but I do not agree with
the writer in one respect-that is, she thiuks it no morc barm to sip tho rich juice of grapee, ur even
the waters of distilled grains, than to nse tobacco a city, or clse she must be blind to the degridation aud porerty which is eansed ly latemperance, She
says sle wunts a man that she can liss oecosion-
 as obe that uses intoxicating drinks-but, for my
part, I should rather kiss neither. Slue thinks that
the abonse she would receive from her hustand when partially bereft of lis reason could not he the ctfects of tobacco. Jf she thiulss so, I think
she had better try it for a time; I am afraid it reason entirely. the ase or tobateo, for I ant as much opposed to
it as the Jaday herself. But I would ask, what aro lagos and yon will hardly find oue wio dissipation. Are these what they call gentle estimation. Therefore, 1 think thcre ought t
something done to eradieate botin these erile I think there

A CHapter for wives. headed "A Chapter for Husbands," which I joiuder, as r am satisticit the writer has told o Now Mrs. Ulirks (for who doults but what title properly belongs to you? I thiak no one wit
doubt after perusing your cominuication, as
and the truth of yonr opeaiyg fariagrapll, or that jo
really ase a much-abosed person. Just think theso gentleman-bnsthands.firmers, for instanc

THE BETTER-AND WORSE.
"Tukis's no such word."
"There is."
"Waut to bet on it?
How many such pllirases are utered daily:-
hive dullars. Bet you a "bottle o' wine." Bet yousporting nen;" it is a very common practive ilarge namlier of silly or mistaken people a "bet"
is a linal argunent eyen in ordinary conversatiouor disoussion. They have morc mames than truinswhe They think that if they are orly ready to
"hack their opinion,", they are metty sure to
his argnonent lyy offering to deppesit live hundred
or a thonsand dollare, if his opponents would doto he right. This wals usually nuauswotahle, if no
Hifference aloout his being might! money made anyhy the betting argument, for that takes it for grant -ed thal no man will decliue to gamble on his opin-
ion nuless he is conseions of being wrong. Or theonly altermative is a confussion-supposed to bo
humiliating-1t poverty.
Aside from the ridiculous folly of pretcnding
to prove a puint by sucl
to prove a pinint by such an appeal to the dollur,
there is a lronder and more important priaciplo
invelved. You bet and win. You did not carn
ted that the ammonnt is to bo taken froun you with-
out an equivalent
out an equivalent, and you are instinctively irrita-
ted lyy tho uufaincess of the transictiou. In eitler
erent you are a gambler; yon have so far curolled
yourself in the tauls of yerhans the
cious ariny of seoundrels that was ever let loote
on earth. It is a small amount, douhtless, luit the
mrinciplo is involved. Misking mouey, on phro
chauecs is alcays wroug nuld foulisho it in
gambling; aluays coutrary to expedieney and
Argue if you please. If yon don'thow enongli
to argne, hold sonr tongue. If you are wroug,
NAPOLEON AND THE LADIES.
Tire following anecdote told by Dr. Baird in a
recent lecture, will bear repeating:
recent lecture, will bear repeating:
Shorty after Bonaparte was mand
and had installed hinsell in
Shorty after Bonaparte was rinde First Consul
and hadd installed hinselt in the Pulace of the
Tuilleries, he held a grand reeeptioun and ball.-
But he experienced at that early day of his carreer
ing niatters go smoothly:
ing matters go smoothly:
Whea the suaper was realy, the ladies wero
summoned first, the genile ineul becing nuder the
nectesity of waiting antil the ir "betters" wero
served. Two thousand lades, showity, if not
tustefnlly dressed, rushed forward to the duors of
the grcat lining hall, one of the largest and most
spleadid diuing rooms in laurope, The great fold-
ing doors were closod, and the officers of the
palace fonan anies presed aguiust them, and were cugaten in
high dispute anong themselves as to who of thenn
had the entre or right to go first. One Jady said
the right was hers, for ber husband was a great
Generalt, but sho soou found that others mintain-
ed, ou one ground or another, that their claims
Meannwilie the oflicers eould not get toors open,
and in consternation one of them hastened to the
nnd in consternation one of them hastened to tho
First Consul and asked himo how they should settle
tho question of prevenence. "O." said Buaplyarte,
"uothing is easier; tell them that the cldest is
"unhing is easier; telt them that the clacst is to
go first!" Thlo oficer reported to the ladies the
First Consul's decision and inotantly they all fell
First Consil's decision and inetantly they all fell
hek! Tlis gave the officers an ofportunlty to
het the doors open when to their astunishent
none of the ladies were willing to go first. After
standing in that ridlenlons position for a moment,
they leg gan to laugh heartily at their own folly,
and all marelicd into che dining-hall without fur-
ther delay.
CRINOLIANA IN RHYME.
"A any with a crinoline was walking down the
street-her feathers Nultered in the nir-her hoops
stancli out a feet. She walked the earth as it she

along, lor pride was in her hearts She did wot sce
a eurly log which walkod close by her vilie, all
ane the bushy tail of whicl
in the wind, and from the ludy's crinoline stuck
out a foot hehina. A crowd the tail soou dide espy,
as it waved to and fro, and like a rodder secined to
point which way the maid should go. The curly
log rlaht pleased was he such ipuarters lie lain gut,
'ot. Each step, the lady now did tulke, served to
nerease her train, while those who followed in
her wake, roured out witly might and muin.-
Some held their sides they langhed so hard, aud
many fally ericd, and many creus still contese that
dey they 'yilec to died,' But still the lady sailed
along in crinoling and pride, nutaituful of the
crond Lehind, or dog closo by her bille. Bint soon
it so provaked his dokghish lue, he conld nat let it
be-mint with a llecp, lernclons growl, for battle
straight he went, and 'reath the lady's crinolino
both dogs were quickly pent. The foughte, tis satd,
ono bour or moore-tho lady nothing linew- but

For Mooro's Rural Neer-Yorker.
USES OF SINGING IN SCHOOL. In his chiorts to so conduct hifs sehool as to cou-
fer the greatest bencfit on his panils, the teacher
finds himsell hindered by various sliort-eomings Cinds himself bindered by various sloort-eomings
on the part of those for whose advancement he is
laboring. One of the nost annovinc of these, is the sery general sault of coming late to school.-
Anong the many expedients proposed to remedy this evil with the perplexities attending it, and to
seenre the pnnctual arrival of pupilis, the openiug of schoot with ainging woula steen to tee nue of
the most tromising. That it has in eertaiu casses
resulted less favoralily than was expectell, is not, ferlapis, to be attriluted so much to a hack of a
thaetion in the itself exercise, as in the teacher'
faiture to condoctit the way most certain to cugage the interest of the entire scluool.
The pleasure $u$ rifersally exprerienced in listen-
ing to masic, iz, I believe, surpassed by the satisfaction of contributing to its prodnetion; for it is
everywhere observable thateven indiflereutsingers entertainment, than to play the part of listenerg
to more aecomplished vocalists, this ides bas ot had its due infuence in the manageneat of
 ofite of some half dozen of the older, more ma generally far the larger portion of the school-
Very uaturally, those wholind themsolves so read ly exeased from ans active share in the entertain
ment, gradually lose whatever interest the novelt of the thing may have at first awakened, and tional
if fall baek into the old habit of wandering into the sehool-roon in time to be taekcd on as a supple lose that lesson altogcther. The iuvention of the take the hest advantage of this means of inducin
 Aganl, chitaren grow hired and reatless from
long siting and interuietion from talk, anit need
somecthing enlivening to rouse their spirits aud attention. Sowe well-chosea words of encourage
ment from the teacher, will generalls produce an animatiug cfrect; but, lest saméness cause indiffer
ence, it is well to have at hand na many resouree
 change in the feeling of the sehool, by aftordiug to forget thoir mischief, anil the depressed, thei discouragemente, and stimalating the anbitiou of control, might, in judicious hand, be turned to
excelleat account, for the experience of erery indivilual susceptible to musical infnencees, (an orcitod and more good resolutions formed Flise
olistening to music, than under tho orator's fines efliorts at persuasion.
But the introduet
lished part of school oxercises, hins as an estah vantages. Early yonth is, for rarions reasong, the
most fortunate time to commence the derelo of the voice in singing; not the leass indloptant of
which is the faet that cliblen unconscious of tho diference in their musical take eingiug, than after they hare grown olde and learncd their defcioncies, By commencing
thus carly, a great amount of fusieal talent may be thus carly, a great amount of musieal talent may be
brought out which is mell worthy of collivation, ercn though it never attain to high exeellence.-
Parcuts aud tenchers do not discourage a chil from learuing to write because he gives promiso the possession of au indifferenten voico is is no excase singor mayy often make his poor gift a soareo o
entertainment to limself, if not to if the adoption of tho plan of making musie an
established part of the early training of children might aid in correcting the too prevalent error
of valuing a musical educatiou rather is a mean of display than as a sonreo of rrue eujoyment that
would uot te the least of its benefits.
sceool examinations. We have roceived the "Annual Reyort of the

## THE BIBCTI

THEEE are forr graud arguments for the truth
of the Bible. The frst is the miracles on record; the second, the prophecies; the third, the gooduess of the doctrine; the fourth, the noral charae
ter of the penurn. Tbe miracles fiow from Di Vine power; the prophecies, frome divine under
stagding; the excellence of the doetrine Divine gooduess; the morai charaeter of the pen men, from Divine purity. This, Chasistianity is er, the nauierstandiag, the goodnass, tie pority God. The Bible mnzit be one of these thiugs; of bad mea, or bad angels; or a rerelation from men, or angels, for they neither would nor could make a book telling lies, at the same time saying
"Thns saith the Lord", when they knew it all to be their own invention. It could not be the in rention of mieked men
not make a book which not make a boot which commands all duty, which
forbius all sin, and whieh condemns their souls to all eereruity. The conclusion is irresistible - the
Biblemust be given by Divine inspiration.- Bishon Bible mast

## LOVE TO CERIST

Nor ouly the flowers unfold their petals to re of expansiou. It is love mhich opens it and expenetrate and illume it The Christian, in the work of selfesamination, need not direct his at question-How is it witb mylore to Christ? That lore to him is of grcat importsnce, we must con-
clade, siuce be, in truth, requites of us an affetiou for his own person such as no one else ever
claimed. 0 thon must be more than father and claimed. O thon must be more than father and
mother, than brother and sister, else hor couldst thou, the lowliest smong the chisdien of men, lay
claim to sach superabundant love? Since I have beliered in thy word, all my desire has been to love thee. I will wot cease"to lore thee, until thou
art dearer to methan father, mother, and brother! If they deny thee, if they revile thee; what is so
dreadful as to see oues's father and mother reviled at our side! but more than when they reproach
fathor and mother, shall thy reproaches, thy wrongs go to Hy heart.-Tholuck.

Noble Sentinemte-Condema no man thinking as yon think. Let every oae enjog the

livel and norlessfor fruil-while others with pqual liven and ns. Pssfor fruil-while others, with equal
contidence maintain that the culture of the pear on the quince stock has been eminently sncuessful,
sufficient to sat isfy all reasonable expectations, and to justiry tho mare general adoption of this neetloo It is nulorturate that bo many who write on Hor
ticulturc as well as Agriculture, jump at conclusions, without awaiting the guidance of experience or even proliting by the teachings of their obser-
vation. Mr. Surirs purehases a pear trec, and as
he pens to buy a winter varjets. His trees are covered cousnnmation, anxionsly antici inates a rich treat But, sud disappointment, the pears on the tress on
bis neightors ure all ripe-ripe pears aro to be seen in the"-shops and the streets, , out thosc on his
treee are "as hard as stones." Sorme are picked tree ane as hard an stones. Some are pickay; others remain on the trce nutll destroyed ly frost; per haps a few are
pieked-and thrown upon a shelf in a warm room, pieked and thrown upon a shelf in $a$ warm room,
where they glirivel op and arc finally thrown into riety-a great tumbug, or the unrseryman tha of writing for the papers a spioy artiele may be report of a meeting of sonie "Iorticultural Society held in Felrraary, this pear is noticed ns being
"delicions." Tluis, Mr. s. cousiders the greatest
humbuy of all.
Mr. Brown
whey hear is soon as planted Pear Treesthrce or fonr feet ligh. Mr. B. thiuks it wonld bc atinc thing to have plenty of piprs so easy, and
gets a few; but lis trees only thear hallea. dozen pcarz each, and perhapls some lon't hear at all;
othora are broken lown, for the cattle get into the orchard occasionally, Next year they don"tseem
to thrivo very well, gnd Mr. Bicow eonelnules that dwarf trees are a humbug. He likes trees that get
up out of the way of cattle, nud that will bear a barrel or two apicece.
Mr. Jown has read of dwarf pear trees, and
purchases a few, feels gnite proud of them. He reads all the papers thusi.astic - prunes and mannres his trees, and anss Mr. Jones never raised any line pears before; now he enn slow as good pears as anybody, and makes
a rcpepeable exlibition of a lew fine well grown
varicticzult varictics at ine Hortcoltural S.ann, arid takes the
first preminnu for the best plate of pars. Mr.
Joses wouldn't lave a pear in his garden uuless it was on the yuince root. He has onc on peen
stock that has been standing for six or seven it up.
Having inade this sulject one of experiment and careful investigation, we shall endeavor to give
our readers the benelit of what Enowledge we pog. sess. The reason why many fail in their attempts
to grow pcars oal thi quince raot is because the plath vatieties that will uot succeed on thatt stoek
without bcing douldi-1 Without ucing double-terked, that is, bndded or
grafted tpon a variets worked already upon the quinee, and aucceedng uyon it. Mr. B.aRRY re-
comments the following list of TwESTY-FIVE varictles for cultare on the quince:

 Sin

 by the French ind dwarthg their treces, and import.
ed into this connury by onr nursersmen. Mans trees have lieeu worked ont the onminnon stonk and
seut out. The varietles known ns tho Angers and thie Orleans Quince, nre freo growing varie ties, an
tho only kinds that stould be used for stocks. Dwasf trees require proper soil and culture.
good strong, dleep soil, with a well dainced snlsson is neessay for their perfection. Liberal namanur. ing and close andulal pruning is also essential, and sulject, we will give another urticle ina tew weeks When, yrown an ouly a moderately fertile soll,
willout manure nud with modrrate pruuing, we lave foumb nost rarieties, and the loonise Bunue nuch displosed to beare fruit that Inther litllo woud is forned, atud in a few years the trees assume a
serulby ajpearance. This we lavo fonal particullarly the catse on llght, sandy soils and only to be
overcome ly the most liberal use of namure, and thorough prunlug.
To sum up tho whole question, we give the fo
bowing as the ouly conditions on whieh dwar trees can be saccecssfully grown

1. Get varieties that sueceed on the Quince, and
that have lieen worked on proper stoeks.
2. Plant 2. Plant them on a good substantial soil, and if seceds and grass deatroved
3. Give a thorough praning every spring, and a Leavy coat of manure at least every fill, placing it
aronnd the tree, and in the suring torke After forking it in, it wonld be belter to place neve coat on the surface of the ground.
4. Plant the trees so deep that the point wherc they are grafted will be three incucs below the surface. This, though perhapls not a vital matter,
is siltogether the best methoil. Every farmer, and indced,
Whether he is prepared to conform to these condi-
tions. If not, he ellould not plant dwart trecs, for
it is worse than nseles to por it is worse than nseless to plant them in a carelcess
matner, and let them die of negleet, as it not only manner, and let therm die of ne gleet, as it not only np a "mad dog" cry againet dwarl trees. A fewr
years since a gentleman of our acunaintace had occasion to risit a certain place, called en us and inquited if thero were any farms or gardens
in that section worth visiting. We gave him the name of a gentleman prominen: to the agricultura Sorld, and not unisnown to agrlectiltoral literatore. Some time after, on inqniring if be had visited
this phace, we were informed that he passed through the joung orchard, bot the wreeds were abont wigh ss the trees. The owner of this crop
weeds is mow writing against dyart pears, snd caling then hnmbrys. Dwarf pear trees will nol prosper with snch treatnent as most of our or to plant them; in fact, we adrise yone to plant dwarfs nuless they can conform to the conditions has a suitable soil and the right sorta, and complainu that his dwarf trecs will not grow and bear,
proclaims and publishes his own ignorance or negligence as completely as the farmer whe should complain that he could not keep his land in good
condition, his fences from falliug down, or his cat-

Louise bonne de jeriem peali. It may be asked, then, what advautage in plant ing dwarf trees over standards to compeesate for
he extra care? Weanswer, early frniting-enough
frnit to pay for the tree, troubie, and use of the

Inull twice over hefore the standard would bear
pear. We will now answer a qnestion received,
to the lest six rarteties for a village garden in
Wentern Nevir York:
Standards-Bartett, Seckel. Dwarfs - Bloodgood, Lou
 We aro compelled to elose this subject, hut will
resume it aggin in the resume it agnin in the next number, and before
doing so give an outline no doing so give an outline of one of the very best
rarieties of pcars grown, the Louise Bonne Jerses, -as well as an engraviag of a well prnned
dwarf Pear Tree. When sucli beatiful trees and
anch delicions anch delicious litait are grown, as they are bere,
and in inany other places, it will take a aoorl deal of maper and ink to write them down as bombngs.

stows. It is a striking faet, iu eonfirmation of
this, that most of onr great men have been born
poor. Young men should think of this. "Wrat's the nse of bonk-learning 3 " said a man
oh his son, whom he Found poriug over a new work
p ptairi. "It's a waste of time to read ; Tnever
heard that it made anyboly richer." And he heard that it made anybody richer." And he sequenec, was playing in the street hefore a half
an hour, and acquiring the worst habits of his new assoeiatcs.
If that father had been less ignorant, he wonld have known what wooks eould do. He wonld bave
heen aware that the results of reading, if judicious-
ly applicu, assist to wards making a man rich, more than anything else. Fe would have remembered
that Frankilin, Junt for a Jove of stany, wonld have died poor and obscure, instead or achieviug a world
wide reputation as a philosopther, a diplomatist and a patrlot. He would have been couscions that
the surest way to keep lis son from making vile The surest way to keep his son from making rile
accnaiutavees, and to ineuleatc in him refined and
ivem decent tastes, would tre to foster his fondness for reading. Who knows but that the snatehing the hook from that boy was the tnrning.point in
his destiny? From that hour, perlaps, may date a downward career, whieh is not unlikely to end in
disyrave, a prison, or even worse. infallible or irtuoust they tend yastly towarards pro-
dneing these results. The man who has books about him is generally a better man than he who
lias not. If a question in polities, social bcience, the opinious of the wisest, hy merely consalting his bocks; while his illiterate neightor, at best,
can imbibe newr ideas only orally, and practieally has to talk these from very inferior men. Books
do uot alwass nukke their readers' judgment sound, Lecause books are often oncesided, and beeause
reauers lnay partisan books. Bat even the worst selected lihrary is better than no library at all. A
man with brouks. is like a workman with tools; and though the tools are bad, they are tools nevertbe. less, , hey erialle us to farrow ap soans a dield of out many a granary full of truth, which, if we had
no plow or reaping-machinc, nor other labor-saring splyaratus, we might work at, hopelessly, for
years. Books, in a word, bear us, by an express train, to kuowledye.
Books introdace us also into the noblest sooiety.
Thilc tho illiterate are drinking at taverns, seeking company ly lounging in the streete, bis Who is furd of books, aumses his leisare by con-
versing with Shakspeare, Jacoon, Militon, Thacy dides, or ohher great sages of the past. Ho lives
among the liest society of all tines, and on the noost intimate terms; lives with pocts, kings,
philosophhers, philosophers, statesmen, saints and martyrs, He
is at lome with Dante, with Cieero, with Ierieles, of erers generation. Is nut this better than boozz.
ing even at rich ruen's tables? We repcat it, there is no society so select as that into whiel books in
troduce us. Cultivate in your ehildren a love of
how words change their meaning.
Is Shakcspeares's time the word miscreant mean
simply an unbeliever: Talbot calling Joan of fro simply an unbeliever; Talbot ealling Joan of Ar
misereant intimated ouly that she had falled fron the faith. Influence aunong the earliest English
noets 10 and only that powor over mortals which plauets were Eupposed to exercise. Nephece, a lineal descendants, Kinndly fruits, as used in tho
Litany, also simuly denote the natarall fruits, or those which the curtu aceorling to his kind, should
bring forth. The word Girl' was once applled in-

meree and bocial life, were they used to denot
measure. The term wera, now applieable to tles
only, was once applied to all foon. Bafled (defeat
ed) whsimplid in the days of chivalry to a rocre-
aut kuight, who was, cither in person or cfligy

The following remarks are unt intended as atreat are brt are simply designed to furnish a feem hints plants known in the northers section of the coun try. Slrichly scientidc deacriptions are not at
tempted, the leading object being to give sugse

The $A$. Vulgaris major is popnlarly distingushed
 farors rataer moist soils, and will grow better than
most eativated sjpccies on cold, wet upland. It is requently sown mith Timothy (Eerds-grass
New-Eigland,) the two spreies Alowerig, about the same time. It yields \& large bulk of hay
-rather light ia proportion to bulk-and atithough of inferior quality as a pasture grass, compares
with some species, it is readily eaten by cattlo with some species, it is rasdily caten by cat
and horses, and produces a pretty large and reg
lar grovith thmugh the season. Perennial. The $A$. vulgaris sminer is known in the Eastern
Ststes as small Ped-top, Fine-top, sce. It apyears to correspond to the common Agrostis, or Fize
Bentgrass of English authors. The Plymouth is more common in the territory of the Old Col-
ony than in any other part of this conntry. It is there preferred to the Large Red-top, Which is less and the siaiks are very slender, but they olten tand thickly on the grourd. It jields a less bulk
of hay than the larger kind, butit is manch heavier in proportion to bulk and of better quality, being
bighly esteenead for feeding working oxen. Its highly esteemed for feeding working oxen. Its grentest sdvanage over the large kind, how ser
is that on ury soils it grows beter azd lives longer Hence it is the most corumon grass in the pastnres
of this section. The two varieties may be readily of this section. The two varieties mas be readily
distinguished-the major having a broader and lightergreen leat, wuile the ean
narrow and dark-green. Pereunial.
$\qquad$ of spreadiag rapidly br means of numuerous stolons or lateral shoots, and the firm network whieh it
thus forms, would seem to render it a valuable grass for the banks of water-conrses, whith mi ght COLTURE OF THE SWEET POTATO Eds. Rurast:- Noticing in a late numher of the
New-Yorser an articte on the cultare of the sweet potato, and taving, of late years, had some
experience in the growth aud preservation of this interesting and valuahle veggtahle, I felt inclined to correct sowe mistakes, as I think, fo the article
alluded to. The writer admits ho has never been able to keep the potato over winter, in rhich which I will relate alter a fer rords on its growth. I generally select for seed, potatoes of a medium dianneter, ) and not rery long. The hotbed is preparen as for any other parposc, and the potatoes
atit in rows not cut as our friend proposes, as this will inorease the danger of rotting hefore spro mit the introdnetiou of the hand between eaed
oow, for the purpose of removing the pllauts as from time to time they become sufficienty lasge and
well rooted to bear transulantine and dhe danger of frost has past. The potato should not be re.
moved from the hot.bed in order to separate the

How has it heen, farnere, with your sehools the past winter? Have you had good ones? Were
the echnol houses comfortable and attraetive, well
 times did you visit the sehool? Did you nake a
tprartice of qucstioning your children daily to see what progress they were making, or did you rather
listen to their complatuts about the teacher withbe were capable of conducting it? It seems
me that here is the greater me that here is the great orror that exists. Parents
will cuploy a annu, an entire strau ger, morals and qualifications they known nothing, ex
cept he has a certificate from the Town Superintendent or Commissioner, and plaee their children
uubler his care for mouths wilhout once visiting or in whit wnumer it is conducted they are making
 empley al eutire strinpendid edifice that would montlls without examiniug his work or kuowing
affer whit model he was constructing it? Yet the ninds of their children, (iummortal structurcs Intine onf for monlbs without looking at their work
or giving therm a wrod of encouragement in thei lahurs. This, however, is not the only error that
exists nonurng us. There is uot as muyclatention
paio to the comfort crecting vur seliool houses ss there should be, (at
least in some farts of the country,) not enongh the mins taken to attract and interest the young aftraction, and If our educational institutions are
not more pleasaut and agreealle than the places
we would have our chilliren shum, we may denend pon th the sellool will be neglected. The mind is ot occupied by armething that will inplove and clecrate it, it will be ly sowething that will demor-
alize and degrade it, The young will be enncated,
aud if it is not done iu the echool room and at the firesile inder the iustrnetion of parem and and comegraded and vicious. A Faruelis Sons
examinations and exhibitions

1. Examisations. The object of an examina merely and solely to ask them certain questions to very sinitathe hooks they have their anderstad but totest in in of the yarious principles, facta and thonghts that should
have becn developed ty the branches to whicula tention has heen given. It has frequeetly been
the case that, at pul lio exaniuations, teachers have done all the ghestioning, and, we are sorr
 Sume contend that the teachers should ask all the questions; oth $r$, lhat the terehcr should be
silent, and the exannining committee propound the true course, bn' that both parties should partic pato in the exercises. We will suppose a class is alled in Ariminetic. The teacher snys to the exootion. Some of the meabers, I think, nuderbave been irregular in their attendance, or less stadious thau they ought to have been, unay not be
so perfect. In our dally revitations some yuifumso perfect. In our dishly revitations some nuiform-
ly do well, while others frequently fuil. Io qucs
tioning them to day uulcsa they they usually do, gou will hiud the same diversity. With remarks of this kind, the exanination may be introduced aud then questions may be asked by
both teacher and committea. It need not anuoy the teacher ff some questions fail to receive eor eaclers, committecs nor pupils should expect t have the exercises of examiuation day faulless,
Tho true wish and nim should bo to exbibit the correct standing of the sclolars, - to ascerrai
"Wilh classes sumiciently advanced, we think an excellent plan to havo a quarterly rxaurination writen ly tho papils. Thls course has many or Pantages which whll be olvlous to any one. In

THE BIBLE Tra Bible is a saered treasure. It is the gift o
Gon revealing his will to man. It is the golden sey which unlochs the portals of eternity, the
anerring way-mark which points from the ernmling shore of time to the boundless continent
a better world. Like the splendor of the sun, dispels the gloom of darkness; a heavenly messen-
ger, it brings " "lad tidings;" a riendly comforter it whispers "peacce:" a guardian angel, it protects the defenceless; a perpetanl spring of water, it
lows to all: a sacred volnme of insuired trnth, treats $\begin{aligned} & \text { ith } \\ & \text { exactitude apon the past, unfolds b }\end{aligned}$ as acconntable beings at the present, and withiterary production, where shall we find its equal It not on's bears us down to the earliest period o the Deity. where the proposal, "Let us make mad," was heard in deaven.
histories of natios or which scarce amotber trace
remains, the rise and fall of empires, together with the causes of those gre it convulsions which from
time to time have razed cities to the gronud and shaken Kingdoms to their foundations. Where
else do we find sach bobd and feariess declarations snch glowing fifures, such eleganee and purity of
style. How lofty are the sentiments it breatioe style. How lofty are the sentiments it breathes,
how exalted the trutlis it teacbes. Here we find "brates that perish," and ours allignce mith the
skies. Yatare alone might teach our immortal wh, but it is the pecyliar province of revelation
withdraw the pall that settes o'er the grave, and eveal the dim mysteries of the world to come; it dent of the Word of GoD, withont receiving in
ealculable benefit. Tis rich tressnres anyly rent onr research; for it containo wisdom that eternity orth all the universe beside, when all ocher trea sures shall be wortlekes and vain. Why then shal
lbe foolish, epheueral productions of the day be
songht with so much avidity, while this alone is aeglected? Why dues tho stadent delve annong
the tombs of antiguits, aud converse with heathen sages and poets, inile he seeks no instruction from
this great receptacle of wisdom? Why does the
youth weep and smile by turne, as he pores ove outh weep and smile by tarns, as be pores ove?
some rolnme of tietion, while be takes no juteres
 ook we can loois. It is destined to work wonders
in the world- to shed its benign infuence apor ver the intellect. The day is hastening when sill give to the indulater a GoD wortby his adora-

CLIMATOLOGY.
cunates of mie milkee teritohies.
 the three embryonic States, Minnesota, Kansas and
Nebraska, such as the great West with all its mar-
vels and its wonders, never leforo witwessedMray of thic readerss of hever Rueforv withessed.-
their homes and beck their fortunes on the green bosoros of this ntractive yorng trio. A knowl.
edge of the climate nuder which the new-comer is about to settie, is certainly very desirable. To the
emitrant the soil nud climate of the new conatry are every thing. The soil may be good, but hom is
the climate, and what are the fruits nud vegetables that will thrive best thero? Leet us inqnire
The observations that are available for $a$ discns. for the remarks I juropose to make apon the cli matology of these three Territorles, I shall rely
mainly npon the observations recorded in the "Army Neteorological Register" for twelve years, from 1883 to 1854 inclusive, and Blodaet's maps
pullished therowith.
I.et us taho Minuesta lies between the paranlels of $43^{3} 30^{\prime}$ and $490.00^{\prime}$
North, aud ncooroing to estimate, the State of Mlu. nesota will contain an area of not less than 80,000 sus of 1850 shows that the quantity of lanh cevur-
in the Uuited States, rage between 12 and $I 3$ ind acres to the ind individnal; at
this rate Minoesote of freemen, at the enongh for 4,000,000 averige. Witt the prosent uational land-loving
York, she olfers homestion of No more than of people,
The averagn aunual precipitation in this territory is-x.xcluslve of div- ab butt 26 inches for the
Whole cerritoy, of which 10 fall in Summer and
in Winter. of contse not be very heavy, whith finet those concerned in Railways there will be happy to realize. The total
fall of snow durlug the winter nuonths, does not herefore, the Winter may be called the dry an the Summer the wot season, which is exactly the
opposite of what tulkes phaeu win the Pasflic. There, as in Oregnal, the winter precipitation ranges up
to 30 inehes, whilu in the sumuler the toal depth of rain that falls is only two or threo Inches.
The surumer rains of Minnesota occur for then most pirt at night, accompanied dy magnithcent
displays of electrical phenomona. These pruify forth to his nabora nuder a climate the nost elasti fortune to experience on the polar side of the trade wind regions The purity of the nir, and the sa
lubrity of tho cllmante, make it a tuost delightfin lids. It will prove, at lemut in sumerasta inva rium for consumptive patients,
Minnesota-for she may be spoken of alrendy State, as she is ouly passing through the formthe Lake State. Therg is in thi propirlety te called nimuber of thesc lovely sheets of langhaing waters
than in all hine and benuty to conutry besidses. 'They give variety to make this goodly land a lovely pactractions water, nature has done for these benntifuls gheets o

INTERESTING FACTS ABOUT FISH, Fon known and unknown purposes, in the tiny
mountain hrooks and in the wide ocean, fishes are mountain hrooks and in the wide ocean, fishes are
seen in unceasing motion, darting iu all direction traveling now siagle, and now in shoals. Their
regular jonrneys are mostly nudertalaten for pogrpose of spawnii g; the delicate mackerel moves
sutherard when its time comes, and the beantitul sardine of the Mediterraneann goes, in nspring west
ward, aud returns in autumn to the east. The stargeon of Northera Europe is seen aingly ys a ortual, or migratory salmon of the Polar seas,
travels, we know not how, throngh the river and lake, up into the Baikal, and thereswime, in whim-
sical allerations, but always in inmense crowds sical alterations but always in immense crowds
irst on the southern and then on the northern
bink bank. The travels of the saluon sre probably best
knorso. because the fish was a favorite already in
the days of Pliny; and yet strange envagh, it is fonnd in every ses, in the Aretic, near tho Equator,
and off New Holland, only not in the Mediterrane au. They press in large, trisngular masses ap all
the great northern rivers of Earoper, Asia and
Ameries They enter Bohenia of sea, sailing up the river Elbe; they approach Switzerland in the
green water of the Risuiue, nnd even the foot of
the Corderas the Cordileras by a joarney of 3,000 miles up in
Amazon! Their crowds are not unfrequently s rent of the mi matty rivers; still, thess bands are
formed with sreat regularity formed with great reg.llarity. The strongest and
largest females lead, followed by others of the vame sex, traveling two and wo at reghir the mate in like order.-
vith a noise like the distaut roariug of a storn,
With Shey rush up the strean, now sporting in eass,
graceful motion, and now darting ahead with Way, they leap with incredible force, and repea
the effort untit they have overcome their dillicalty
it is even said that it it is even said that, at the foot of cataracts, the denly letting go, like an elastio sprivg, rise twel
or tifteen feet in the air. Thans hrey travel on, un-
ismayed nnd nntired, antil they have found suitable place for depositing their eggs, and with the distant ocean.-Selected

MOORE'S RURAL NEW-YORKER, Agricultaral, Literary and Family Newspaper, CONDUCTED BY D. D. T. MOORE,
WITH AN ABLE CORPG OF ASSISTANT EDITORS

TRutal Afar- indier.

 secds are germinatiog and Lands ane swelling ande
openily, soon to tanate the fice of nature with a
profusion of lcasees gny favorites will wome their euelnies, the insecte,
in their accus omod numbers, and every leafet and anothcr of these traitors, blighting and destroying It is currently remarked that thifs class of crea
tures spponrs to te more nonuerous and is doing much greater amount of lijany in our land of late
years than at any previons period. This remark insects whicls orlginally existed in thly conatry When the lands cane to bo extensively cleared and
pnt under cultivationt, were nuablc immediately to for a time much redroced in numbers, aud occa-
sioned but littlo tronble. Now, become accostomcd to the altered circur, having
of the contry, tiding they can sultain
 are aguiu thriving and multiply ing, everywhere
cansing to our collurists vexations, disappointments and severe losses.
And, in audition to the native insects which properly belong to us, commerce is every year
bringing to our slores one and another of the spe cies of foreigh lands. Hayy of these, fuxiag the
situation hero congenina to then, become estab. situation hero congeninl to then, become estab.
lished, and inuercase, oflen without letor hindranco froul those parasitio destroy ers which nature has
provided in their native cline to check and roatrain their excessive multiplication. Thas the Hessian Fly, tho Wheat Midge and thie Apple Bark
Lonse,- insects whlch we have reccired fron Eu-cope,-have been wad are running a career in th them upon the other slde of the Atlantic This, moreover, is nuquestionably the most in
teresting field in tho wholo domin of nature. The singular habits and remarkable lastincts
some of chese creatures reniler their lustory wonderful than any fairy tale whith the romancer has ever conceived. Others are so cuariousery
shaped, so benatifuly colored, so brilliautly bild.
el ed, taat persons who are the most stolld and heed museutose of Natural listory, the case contanding
ingect in and nsects is that beforo which most minitorg tarry the longest and serutinize most attoatlyely.
Thus, as oljeots of mero curiosity oon the coonomical jupportance whitis numbers And there are many persous who bave been e tremely desirous of gathentag aud becoming ace. quainted with the inseets of thelr own vicinlty.
But unfortuantely, est and artunateng, notwillstunding tho deep literbut lituch of our Nittral 1 listory which hass been malnute their specice are so very numerous and mary fastauces so dinioutt to distingulsh from
each other, und thic mames of those will througla snebs, multetndo of inedi are scattered and dowestic, many of whith are inaccessiblele,
that our men of science liave been disheartened
from oxploving

wants of the present eullghtened day require
Some of the slvecies are very local, occurfing ouly
in particalar districs. Otbers are trausitory,
pearing guddenly in great numbers over a particu-
lars section of country, and again dilsappeariag as

at all calculated for snch an exposed sitnation, at all calculated for fach an exposed sitnation, -
A tree for the street thonld be of a large ize and
symmetrical growt symm. It should be of rapid growth, perfectly
age.
bards. age. It shonld be of rapid growth, pcrifectly
hardy, and able to endnre all suck hardahips as
paved streets, and knocks and scratches, withont
complaiulng. We name s few of the beet trees for complaining.
street planting.
The Sugar Mapple is one of the very hest street
trees. It posseesses all desirable qualitics for such
a position, a bcantiful, bright, straight trank, a position, a beantiful, bright, straight trank,
fine haad, and full rich folinge. The only objec-
tion to it in ita alow so ther The Red Maple and the silver Maple, aro both
yood trees, and grow very rapidy. The foliage is
thin, as compared with the Sagar Maple, but their sapid growth makes them desirable and popular.
The Norway Maple rescmbles very much ont Sugar Maple, and when young is a more beautifal
trec. It grows
The How.
sirse Chestrut possesses nearly all the de-
sirahlo qualitites for a strect tree. It is ciean and sirahlo qualities for a atrect tree. It is ciean and
heallto, with fine foliage and flowers, and a beanhealthy, with fine foliage and tiowers, and a bean-
tiful round head. It cannot be considored a rapid
 gracefal of American trees. With proper room for its development we know of nothing that eqnals
it for a street tree. It is not snitabie for streets and avenues, on acconnt of its spreading It makes a crooked $E$ is the finest of Earopean Elms. makes a crooked growth, and therefore, like the
American Elm is not suitable for narrow strects The American Linden, or Basswood, is onc of
onr beest street trees. It is oasily grown and trans planted, grows freely, and makes a very ornamental strcet trec.
Tho American White Ash is a noble erect, grace
ful tree, with beantiful foliage. It grows quite rapidly, and lears transplanting well, cven when The Tulip Tree, which is our common Whitc
wood, and the Cucember Tree are nusurpassed by wood, and the Cucumber Tree are nusurpassed by
any dceiduous trees for stateliness of form, glorious grech fliage, and beautiful iowers. They are
all that we can ask or hope for. Unfortuately loth are very dificiult to transplant, espectially
when of a size large crongh for atreet planting. Fhor a large lawn or private arenne where they
cau be trangolanted when small nothing con more deflrable.
Tho trees for the lamn should be of small size, Tho trees for the lawn shond he of small size,
as our lawns in this countray bre generally of very
limited extent of beautlful form, and exhibiting as mnch variety in form, foliage, \&e, ns possible They should be perfectly clean, free from insecto
sud also free from any offonsive smell. No tree shonll be planted that throws up suckers to dis
figurc the lawn. All will recollect what au cxeite ment was raised against the Ailanthne, becanse it
ollended in thesc respocts. The style of the arch tecturc of the house, too, shonld lie considered
when plantiag. A housc in the Gothic style, with perpendicular points and lines reqnires round headed trees to reljeve it, to smmoth its harshness
as well as exhilit it heanties. Any ono can im agine how sharp and ancomfortable a Gothic house wonld look, surrounded with polnted trees, like
tho Balsam Fir and the Lombardy Poplar. A house in the Italian style with horizontal lines
requires pointcd trecs to relieve ff , and aford an agreeable contrast. Wc often see such houses surrounded̃ with graceful roond-hended trees, all appearing very tume and stupid. A few Norway
Byruces and other pointed troes would ehange the shole clinracter of the place, and give it a bold ness and atrength, so that the most casual o
server would feel the improvemcnt, withoont per

## SUMMER CARE OF TREES

AT this time young trees will bo making a vig. orons start, ,nd tho cultivator should watch thicir
growith as they will now show the character they arc about to assume. Young branches that are no
neoded can be pinched of or ont outt, and any that secm disposed to make a rampant growth, at the expense of other shoots may be stopped in thelr
progress by pluching ofl the points. In forming the branches for the frame-work of a tree, an small twieryy ranches that are not necded shon smatanen ofe. The whole strength of the tree will
be thus ned where it would benefit, and not wast. be thus nsed where it would benefit, and not wast-
ed by growlug nseless bravches to be cut away the next gpring. AB tho weather becomes warm and dry, if you
have not already be nececsary to do do it, withont further delay, or
vory likely many will droop theon vory likely many will droop, become much infured ging io any of your trees, loosen the soil around sunch, and givo thenin a therough watcring, root and
branch. Then cover the surface around the tre with a good coatiug of onarse manure, and prunc quite close, and you will probably save the treep
At all events you will have the satisfaction or knowing that you have doue jour dats. A lady told us last season that she conld not
make her Rumning Roses climbt, as they formed nothing but tall busbes. There are hundrels and thousanas ol climbing roses in the same situatio
The remcly is to cut away all but three or fonr the strongest sloots, and perruit none but these grow tho first sensou. (iife the plant plenty of
manure- liquil manure- manure of almost any kidu or descripton. By this means yon can cause your climblug roses to grow to alnost any cxte
desired. We have grown the $Q$ Uueen of the $P$

muscadine grape defended. Muce Eetermen Friend Moore:- We have thi
day observed in the Rciunio of April 18 , a lengthy article on the demeritz of the Muscadine Grape,
signed "Colnmtia Co." Is it not rather singular that a man who has so mach knowledge, and
feels so mnch for the pnblic welfare and safety agaiust Shatker Imposition in selling worthles Grape reots, said but worthless Fox Grape, , whoold
they arenothing buta
be ashamed to writo or gign his real name to the abont any person, kind of grape, or societty of peo-
ple, bat what we are willing to meet in our ow proper names, as our reputation has not yet be
come very noted (by those hest acquainted with onr Society, Por selling hasswoo cncimber seed
wooden nutmegs, Batutas, Shanghais, Sorghom Saccharatum, (Bromn Broom Corn Seed, ) or any
other of the late puffed blow-bnbbles, that on trial soon vanish like the malticanilis, ns we tind fill the conrse in respect to this said Muscadine Grap of letting every person who has eyes and a mouth
furnished with tasters of his own, (uot borrowed from abroad,) see and taste the wine and fruit, and
then make their own decision, whether the Grape is worth tho mones asked for it, or whether the will have it at all.
Our rule is to buy and prove all these new kinds
of fin of fruit for onrselves; then we feel confidence in
sayiug that which we do know, and have proved
in our own latitnde- farther than this we venture in our own latitnde-further than this we venture
not. We bought a yearling Concord Grape of
Hover, Boston, when first advertised; paid tive
 0 miles to see the two varieties of Grape growin in ererry instance been refjected and the Mcoscadine
applanded by the strongest esidence of their su-periority-by making their sudden transit from
the vine into the montt and tastes, and thence
down to the dart chamber of the down to the dark chamber of the stomack. Wc
have either been hurabagged on the Concord, or stands no chance in point of flavor or productiveness with the geaning 3rascadiuc, We have again
sent this gpring to E W. Brulu himself for a genutne Concord, aud shall aguin prove to We have
also the \#udson or Relececa Grape; have eaten the Also the Buason or Rebecaa Grape; have eaten the
frnit two years, in jits season. With us, it doesnot
yet compare with the gennine Mrasesdine; hope it yet compare with the gennine Mascadine; hope it
will oo anther trial. Have just got the mneha rout that you can put in a tea cnp, sud hope it
 ilcient we shall be able to say what we know of
them in onr latitude.
our latitude is perfectly trae; and many of in our latitude is perfectly trae; and many of our
good Pitsfield neighbors, who have eaten the fruit
for several yeare, think we have by no means overfor several years, think we have by no means over-
rated its superiority over any other hardy kiads of grape raised, or attempted to be raised in our see any contention, and no backing off the track till we see some evidence of our mistske, but as jet
noue hath appeared to onr view. We have spent noue hath appeared to onr view. We have spent
nunch time and mouey in distribating this remarke, delicions, early and delicate grape, for all who
by their own tasters to judge for thenselves and intend still to do it more extengively next fall In this we more than fulfil the Golden Rule, by
doing better by others than we expect thent to do doing better by others than we expect thent on do
by nos so tar as letting us taste the fruit before we Now, much esteemed frienũ, please give the fore-
going an insertion in the colnmns of your most going an insertion in the collamns of your most

put into a tule connected witl the press, the movements of which, regnlated by stam power,
force the pieces into the proper position for receiving the irrpressions on both the upper and Iower
sides, as well as the indentations on the rims, all

## PRESERTATION OF WOOD

Ons of the most !ngenious processes for the
chemical preservation of wood is that of impreg. nating wooid throughont with oil of tar and other lituminons matters containing creosote, and pyro-
lignite of iron, whieh holds more creosote in solo-
tion than any other watery menstrumm. The wood put into a close Iron tank, like a aigh pressur steam boiler, which is then closed and filled with
the tar oil or pyrolignite: the air is then exhansted by air pumpe, and aitterward more oil or pyro
lignite is poared in by hydrostatic pomps, nntil lignite is poared in by hydrostatic pymps, nntil red and fifty poonds to the inch is obtained. This pressnre is kept np by the frequent working the wood becomes thoroaghiy saturated with the ar oil, or the pyrolignite of iron, and will be found eavier thau before. The effect producell is that hus preventing ita putrefaction. And the atmos. neric action on wood thus pre
logher and infinitely stronger. APrucstion of electrictry to tee Morz
ExTs op Machinery. - The following importan pice of inforaation is from Paris :-" On the in
vitation and under the anspices of the Emperor o the French, Mr. Thomas Allan, of London, has
come over bere to exhibit to a scientific commis. sion, rppoiuted by the Emperor, an electro-mag.
netic engine of Mr. Allan's inveution which solves, I am assured, the dificonlt problem of the applica-
tion of electricity to the movements of machinery. Mr. Allau has receivel every enconragement from
his Majesty, and every facillty from the Governhis Majesty, and every saeinty from the Goveru-
meuto tificials. His ngines are now at worts athe
eugiue mannactory of M. Cail, Whither scientific mer, ansions to test this new motive power, are
dockiag to witnees these cxperiments. Napoleon Aockiug to witness these experiments. Kapoleon
I. was greatly interested iu this scientitic problem, I. Whd the present Emperor is not less so, and is, I
hear, abont to order a practical application, as an experiment, to a locomotive engine."
savcd should be examined, and all naripe and
brnised berrics remorod. Then lay then carefully in layers in a box or basket, placing a plece of cot-
ton between each layer. We have saved them very well by merely putting paper between each as shown in the parraving above there hoops fruits more easily kept or more delicioas taan drapes It is no bad thing, buss, to have a plate ing, as we hope many of you have good reason
to know.

An Inetrrs.-I should like to ask another ques tion if yon have no objection. A few jears ago
thero was a good deal said about grasting, or bud ing fruit npon forest treer ampunted to anything or not?

Remarks. - Thls is one of those hambags tha censionally seem to float to the surface, casse an excitement, and sink agniu. Te hope our young
friends will study the prinuiples of vegetable physiology, so that they will not be deveived by any

Porato-Diaging br Machanerr. - Every one who has dng potatoes, and felt the back-breaking,

## CHiñse marriage Latws.

Tue Celestial regulations eoneerning marriage
are very strict. It it forbididen to manry duriog
"the pyrriod det for mourning" the death of f futh
cr or mother. It is forbilden to marry a person
beariug the sanme name, or one gully of crime, or
a mnsicician, or an actor, or a widow whose formur
hnsband has distinguished limself. The inevita
bile barmboo is the punishunent for transrressions of these lawa Parties salcly marricd, who can
not agree together, may sepurate. Divoreea are
 mother, propensily to slander or theft, a jealous
temper, or habitual ill health. A man is allowed to have bnt one wife ly law, and the law panishes wives-of whom there are a great plenty-have n
when wiie wear no mourning for them at their death.Bat if they slould omit the mourning dress upon
the demise of their own mother, the inovitable the demise of their own mother, the inovitable takes care to use all tho llberty left him by the input awsy exeept for causes specified abovc. Hi he therefore treats them as he pleases.

## Harpiness of Working Mres.-The situation o social position of the poor-and by that word we

 mean tho laboring population-is by no means 80defieient in the means oi tappiness and comfor says Lord Byron, "and working classes who ca naintain thelr familles, are, in my opinion, the
napuiest body of men. loorerty is wretehedness laptiiest Jody of men. Poverty is wretehedness;
luut it is, perhaps, to be preferred to the heartless, popular anthor sayg, "I have no propensity to env
any one, least of all the rich sud great; but if were disposed to this weakuess, the subject of wy
envy would lie a healthy young man, in foll pos morning to work for his wife and cliildren, o bringing them home his wages at night." - Lato Magazine.
Trug Greatnsss,-It is hy what we ourselves
have done, and not by what others have done for ns, that we shall be rememhered by after ages. 1 Ss thought that has aroused the fitellect from its
slambers, which bas " given lustre to virtne, and have julamed the soul with the love of and not by means of senlitured marble, that we
hold communlon with Shakppeare and Mifton with Johnson and Burke, with Howard and Wilber
 ness mere incompatible with, and excluded, encl
other. One day, whlea ho asked in Wadsworth
 make their horwes nulaplpy becanso they have
gening, but because they have not enough genius;

eon
MODE OF PRESERVING INSECTS FOR STUDY.

examined with the greatest facility, wad the least
tiff in lei, $K$ Cowshed and hooker. Ard for the
same reasons, when we are obliged to use the shot
common pins, the middle of the pin will be tho
best situation for the specimen.
lusecta which are to small to allow of their be-
ing played are glued with a solution of colorless
gum arabic upon small square or o pl
Shin card or Bristol board, through which s pin 43
passed. And instead of nosing the most slender sizes of ping, which, from repeated banding,
come badly bent and their points doubled into hook, or broken sender from being often straight
ene many row prefer gaming mob large insects to card than was formerly practised, as
they can thus be supported non a coarser and stinter pin. Insects over a quarter of an inch in
length are put ap in this manor art entomologists of our day.
As the under eide of the specimen is hid when placed anon card, it is sometimes better to cement small insects, by their right side, directly to the pin,
with balsam of Fir (the turpentine from blisters the trials I have made, appears to hold them
the earely sand permanently, Mites and other minute
soft insets which shrivel to a shapeless mass on drying, are best preserved under a drop of th legs and other members being extended with the point

## THE TASTEFUL FARMER

no taste, as a general thing. This remarmars we often
hear, and wo often read it in the letters wo hear, and we often read it in the letters wereceive.
It is not only made by those who do not helong to the standard clase, and who may be supposed to be
someerhat projudiced against them, bnt it is ofton made by farmers themsclves. We were led to
makke these remarks by a letter just received, and

There are nnsny farmers doabtless such as our
corrcespondent had in his mind when writing the corrcepnatent is folly to reproach a class for the
above, hat
sins of a few of its members. We havc seen nothing to cause us to think that farmers have less
taste than an equal nonber of any other calling.Gcnerally they have not the means nor the dispo-
sition to make a very great show, and therefore they are considerod hy many careless observers as
lacking in tast. It is not every owner of a hena-
linol mansion aud well lent cronnds with conse tifal mansion and well kept gronnde, with conser-
vatories, and all the other accompaniments that
wealth and taste can supply to mske a place dewealth and taste can supply th make a place de
sirale, that possesses sunficient taste to appreciato
and enjoy the beanties with which he is and enjoy the beanties with thich he ie sarroon
ed. Many snch places are kept ap for ostentations
display. The piasser-ly of course eonsiders th display. The passir-vy of course eonsiders
owner a man of the greatest liherality and
moost cxquisite taste-a model of refncment. long slnce we visited a truly magnificont place
the lawn was well kept, the trees and shrnbs of t choiccst varicties, and the conservatories were
filled with the rarest plants. Aह the enthuslastic grarlener peinted out to us his finest things, and
seemeal to feast upou the commendation we beseemed to feast upon the commendation we be
stowed npon his farorite plants, and the order in
which they were kopt, we nuade a remark about his very pleassant aitation, whent he replied somewhat ay follows: - "I bave anything I abk for -overy
thing that is nerv and rare; blit what tis the use of
jt? I call sr. In to sce a the plant in bleom,
perhapa he hasnot time to perhapa he hasn't time to come antil it is gone, or
if he does come dontt notice it any urore than he
wonld a polato blossons. He clinks more of a pet woild a polato hoesson. He hinks more of a pet
horse than of all the plants on the place." Thns
the gooil gardener with whom the love of fowers Was an absorbling passion, mourned over the neeg-
lect of his favorltco. His love for them was like that of the parent for the chlll, and be semmed to
feel nis keenly any indificrence; while his eges glowed, and a smile played orer hls conntemanee
at ann expressions of praise, any word or look tha
showed that their beauty was annerioted showed that their beauty was appreciated. A
costly cstablishment, therefore, is मe cridence tha ils ownor is a man of taste, yet good judgment is
shown in thns keeping ap appearances, by cmploy-
inc the ing the good taste of others. It ghews an appre.
clatlon of what a man of wealth and lelsnre should The farmer has not the wealth to make a dis-
play, and generally, no dispesition, so that the appearance of the honse and gronnds tells pretty
troly the character of the farmer and his family If we see slofenty or caltivation fond por fences aud
barna, aud starved cattle, we all say nt onceponr, shifless fircmer. If we see good creps
grais, fair cattle, good fences and tolerabbe apple

 bly has gold in the chicst, or uepesit, in the bank,
bnt he is laeklug in good taste and vefiuement-a bat he is laekling in good taste and refiuement-a
littlo lovc of the beautifil woold make hin a vetter and a happler man. Then we puss over the road
to see if we cannef finul some florer at the front door, planted by a wife's or a daughter"s hand,
and if we discover none, we say the family are as destitute of good taste as the fhther. Anat thon
we feel a little lualgnant at hlum for crushing we feel a little tudguant at hitw for crushing out
and destroying the liner feelingy of his family
for it is a favorte theory of ours that wotuen and Cor it is a favortte theory of ours that wowen and
chilidren always love the benutiful. If wo sco a
narrow horler of wright flowers by the narrow horder of bright dowers by the door, with
the ground plowad and planted to within un inch
of the litule benuties we say of good tante; but the hnsband ls gelfash and ex-
acting, rather regardess of the feelings, and apt to cncroach apon the rights and privileges of his
family. We ouce kncw mach a man as this who not only begrailged his wife the little strip of
nrenual for her flowers, bat to show his contempt
$\qquad$ over them. Afterwards when hat thonglt to ono
Was obscrving we sar him trying to flx up the daf-
fodils and hyacinths which he had so wilfully hro-
kien down. The flowera had brought him on his
knces, and we rejoical to see it. There is some
$\qquad$
When we sec in the front yard a nice collection
of howers, provided with proper space, and the
cround in good coudition, but no other cyidence

Merthanir Antz,
THE FLICKERING OF GAS LIGHT.

OnE of the mnst asefal inventions positively
vanted by the yas light-nsing cemmanity, is some method of posilłvely preventing the gas, jets from
fickering. Gas regulators have hecu finvented to
 we have seen prevides for a steady flow to the light, Boon injure their eyes. Many persons have
spoken to ns on this subject, and their testimony poken to n8 on this sabject, and their testimony
is nniform in reference to the evile efects of ficker ing gas light. The vibrations of the gas light
produce similar yilrations in the retina of the
re, and therehy nodalg excito it ye, and therehy ondaly excite it. According to
the comptatious o o Dr. Young, there are as many as $535,000,000$ of andalations in yellow light-the
ray which prevails in gas jets- prodiced in a sin
gle second. It is very evident, therefore, that the
deter gle second. It is very evident, therefore, that the
disturhed vibrations by fickering gas ligts, mast
effect the ege injurionsly. It tas been fonnd $t$ at person can study snd write a grent deal longer,
nd with greater ease, by the light of a candle or an ane il lamp, by than with
rould not be the case were gas light

| TELEGBAPHIC FEAT. <br> The Toronto Globe nnderstands that "for the last few nights, after the olose of the regalar bnsiness of the line, the Montreal Telegrapi Company, in conjunction with the American Telegraph Companies through the States of Obio, Michigan and Illinois, have been working direct from Chicago to Quebec, via Buffalo, Toronto and Montreal, a distance by the telegraphic ronte of some 1,300 or 1,400 miles. The object of this lengthy commanication is to establish the correct longitude, by solar observations, of the different places. Lient. Asbe, of Quebec, conducted the obsercitions at Chicago. The operators there, say that the lines worked beautitally on fine aigbta, end the siguals went through as instantaneously as thoagh the distance was 14 instead of 1,400 miles. The long. estatretch of the great submarine cable between Englond and America, will be about 1,900 miles; so that if the diffculties of laying down the cable can be successfolly overcome, there appears to he, as far as hrman reason ona foresee, no difficn!ty as to the working of it. The opinion of the operators in Toronto, who watched the signals from Chicago to Quebee, was, fbat if the Ilistance had been twice as greas, the electric finid would have juanded erer it as quically-j. e. literally in leas than no time, as thz signals leaving Quebec at $10 \frac{1}{5}$ P. Mr., wonld reach Chicago ahout $9 \frac{2}{3}$ P. M. -Chicago time heing about one hour slower than Quebec." |

SIIITS AND SCEMES IN EUROPB

 mild, equable olimate. The day was fair, and $m$
had a fine view of the scenery as we passed along
Thirts miles from Paris is Fontannlean. Th Thirty miles from Paris is Fontandean. This
noted town of 8,000 inhsbitants is three miles from the station, and entirels concealed ly dense for-
ests. While so naear, one conll not hetep wishing
to to get a viev of its Rogal Palaco, where, as history
records, many distinguished persocages were born, died, banished, imprisoned, or married, from th
days of Louis VII. to the present Enperor. Her Arowson took leave of
before going to Elba. H
mains nearly as he left
Lhere are over fifty wsy stations between Paris
sud Lyons. We stopped only at few of them, ar riving at Lyous abont seven in the erening. Tb
towns along the waylook as if they indeed beloug ed to past generations The natural scenery is mor
cheerfol and attractive. The roads are fine;
canal extends some distance parallel with the canal extends some distance parallel with th
Railroad. Moontains rose high in the distance mostly on unr right, while between were gree
ficless, fineyards, and groves of various fruit tree -the only tree
Lyons presented a fine appearance as we ap
proached it by a elear moonlight It is situated
at the jnnction of the rivers The Rhone is crossed by eight bridges, the Saone
by nine. The population of Lyons is $2 \overline{0}, 000$. It is the chief mannfactaring town of France. The
sonnd of mills and water-works is heard in everg part of the city. Its manufactures are silks, weol
ens, shavls, crape, silver lace, dc. There are 7,000 establisbwents for silk, and 28,000 looms in opera
tion. The largest library in France is also found
here, contanining 100,000 volumes. Scientific and here, containing 100,000 volumes. \&cientific and
benevolent institutions are numerous. The streeta are narrom; the honses are made of solid stone
seven or eight \&torifes high. In a clear day the
Alps and Nont Blanc caa be plainly been by as cending a high hill that partly surronnds the city $\Delta \mathrm{s}$ we descended the Rhone, tho seenery was
more delightrul. Large olive orcharde were seen, theirspreading branches bending with frutit, which
the peasants were gathering. The trees and fruit in the distauce much resemble our dark plamg,
thorgh the leares look like our willows. The trunks of the trees are split asunder n
vent the snow from lod ging.
The principle stopping place between Lyons vation of Madder in the south of Franco. For
some distance before we reached the city, oneither side there was paradcd a line of peasauts from the hills and valleys in esger expectation or some
great event. At Avignon the varions orders of and tapestry floated from the principal buildings the bells tolled, and cannon were fired, whilo the strects were crowded with people to pay honor to
the King of Sardinia as he passed on his way to visit Queen VIotoris. He went so swifly by that
only a climpse conld be had of the glittering tin. only a glimpse conld be had of the glittering tin
sel that adorned his royal dress and carriage; but it was a king, and the poople paid dne reverence
at the sonnd of his approsch. Avignon is on the right, exten ding from the val-
leg over the craggy hills. The buildings appear old palace of the Popers standas on an eminence, racks. The house where Perrearch lived is still shown, bnt the tomb of his Laurs whom he first
met in this city, is now destroyed. met in this city, is now destroyed
It was toward evening when we came in sight of
the Mfediterranean. The warm suushive of the a harricane, sacceceded The the green sea before us
seemed frious and forbiding, far lese invitin its treacherons snrface, than the broad ocean. A
"Hotel Bristol" we ascertained that no rrenel

Tur song of the Clerk is yet unsung. We hear
sad marmur-work! work! work! rising feebly from high desks in dark places, where a ray of cry of trate, with the ceaseless strokes of ham-
mere, with the olatter of knives and forks in unroured agaiust time, in the reatless days of "busy ledgers-and sometimes it hecomes pain fally start lerk was clarged with embeczzling the funds of The motto which is held up to young A merican be notling!'" They see it in the superficial char-
acter of our institutions-in paved streets, brown stone honses, silks and gems, vsses sad mirrors.-
Country boys see the elitter from afar. Dull to nodding to the light hreese, and all the simple de
ights of nature. With a mother's kiss, and a or his Areadia with a light heart. He hears the perseverance will be rewarded. He loarna ths pootry is weakness-that he manst cease to adore
the beautiful till he can pay for it. He bows down to the golden God, and lays his young uerve and
his young spirit at his feet. Years go by-the other ${ }^{1}$ \& whispered prayer is forgotten-the mingi fond dream of his youth bas heen diphelled; he
begins to feel that persererance is somotimes useHe delivers bimself up to brandy and water, his ad lis cyes are bleared; he freqnents the lowes eports, and one day we miss himentirely. Or his desting, clerk for lifre. His shoulders are tooned Hight Snndags walking with his wifo and children The jounger scions afect fnhniness wilh him, and are a standing joke that he is going "into th ool. His prineely cuploycre wonder why he is ntways sick, and begin to bint tat gomebody else.-
They are just in time-they have sucked the last cant. His little oncs become charity's ohildren, and his wife, forever singing the samo old ditty
work! work! work! soon follows him.- Philadel

## BEAUTIEUL PICTURE

TuE man who stands apon his own soil, who
feels that by the laws of the land in which helives rightrul and exclusive ownoer of the land which
ie tills, is, ky the constitution of our nature, under a wholeso me inlinexeo not casily imbibed from
any other bource. He feels - other things being of a manare strongly than another, the characte great and wonderful sphere, which, fashioned by ing through tho lieavens, a part is his-liis from generation lefore moved in its roond of dnties, and he feels himself conuected by a visible link
with those who follow him, and to whona he is to transmit a home. Perbsps his farm has como
down to him from his fathers. They have gone to their last home; but he can traco their footsteps which shelters him was reared by thoso to whom he owes his being. Sowo interesting domestic tradition is connected with every enclognre. The
favorite fruit tree was planted hy his futher's hand. He sported in boylood beside the brook which lies the path to the village school of eariler days Snlthath bell which colled his father to tho hous of Gud; and near at hand is the epot where hi
parcants laid down to rest, and where, when his time lins come, he shall be laid by his children.-
These are the feeliugs of the owners of the soil.Words caunot paint them-gold cannot buy them they fow ont of the deepest fountains of the
heart; they are the life-springs of a fresh, healthy and generous national claracter.-Evercth

## EVERY WORD TRUE.

A LADY, formerly of New England, bnt now
residing in Towa, writes as follows concerniug tho althed wrongs of "down-trodden woman," and rietures, we imagine thero will be but fow who it to placo at tho head of this article:
"Belicre me that wo (women) are not so much dren and servants, as to ourselves and falac social
customs. We are afraid of caeb other. We don't wistoms. We are afraid of eael other. We don'
ve in reference to coufort or to onr own means, Sit to what poople say of us or thluk of us, and to vertop this one or tho other. I have Been and
nown women fited to adora any socicty in this country, or any other, that did their own work,
took care of thelr own children, kept Wright Ime to keep up with the current literature, wrlte
memoranduns and coly poetry. It is not neces sary hat artifcial lawor that makes our women
drulges. Eternal honsecleaniag, beginulag in Tarch and lasting till May - again in September penrauce, of heing thought good livers and crack hey are nts jenlons of this as poets (or pioliticians)
© each other."

TWO DOLLARS A YEAR.] "PROGRESS AND IMPROVEMMENT." [SINGLE NO. FIVE CENTS

more just and henlthial froportiou* of balk and nutriment. Its proportion of soluble and uutriv
tious matter, if said to be 25 pertcent.; wherens that of the beet is 14 , of barley 83 , of wheat 85 ,
nad of peas 93 . This fact rendere it casy of diges. tion, and unlikely to over-charge the Eystcli, and
produce dyspepsin; a matter by no means nuworthy
of sober retlection ty in the potato; it does not too bighly excite the human appetite, which is a grand affair in the
province of temperance and health. Even the best table rarictics are not linble to be eaten to
excess. The potato, like milk, contains portion of aquueous substance, combincd with the

The potato is very easily grown course, a very chasp artiolc or food. It does
exhuust the soil like most other vegetables, pecially oats and turnips, and leaves it in a goo
stato ior some other crop. It will grow poon al most any
and clayey; but light, dry and friable loams sands of toierablo consistence, are the most ap-
propriate. Reclaimed bogs and peat land, whe well drained, produce large crops, and som
veest qualities are grown on allurial soil.
much prejudice and misconception. There i hardly any crop about the management of whic a greater diversity or opinions exists than this Tre usually adopt. Let sward ground be gencrally
used; and if convenlent brealt the sod fo the foll; if not, as early in the spring as possible. Arter
the sod bcoomes well rotted, spread on from 25 to arere; plow dcep and pulvcrize the soil just before apart, very lightly; place the sets in the furrow
from ten to twelve linches nsouder, aud cover with a hoe, that the gromnd may be leff level; coorer
ligotly, and just as decp as will canse the plants to come up, and no more. As soon as the leaf ap pears above ground, we rua a light harrow, upside down, erosswise of the drills to destroy the weed
which generally apppar abont the same timc. I some of the plants will be pulled up. If, howere some of the wilants are pallod up, wo consider the
loes nothing, when compared with the aivantages loss nothing, when compared with the advantages
of killing the weeds, loosening the soil, etc. As
boon as fonr leaves appear, we alvays them with thf callivator, and stir the carth with a hoe, cutting the weeds between erery stalk, When
six inches high, we go over them again the same Way, lenving thic gromud nearly level. If we carth
nu) at all, we make the ridges broad and a littlo moat needed. It has becn very jostly ohserved,
that ou all very dry saudd, the Iands should be that on all very dry saudf, the lands should le the only means of preserving the ground galii-
ciently moist to promote the growth of the crop 10 danger the land being too dry, and on all thin soils; on
bout through with the erutivator has the advantage of every other method. he soil, cannot be too histy of the manure wit potato culture. The advazutage of covering th
scts in a dry soill, with mannre, is somcwhat donl ful. Coarse, bulfermented dung, would do more sou; good comprost on sandy lana, might help to
keep the soil moist, hesldes furnishing the plant with appropriato food in a proper cordition for
direct assimilation. 15 , then, manare must be used, let it be thoroughly decornosed.
In this latitude, the potato in
In this latitule, the potato io better, both as to cool soil than when grown on one warum nad dryletter on a loose aud frlable, than on a hard, com-
pact soil. They do better on a grass ley than on stabble-and better on short muck, tban on long,
unfermented mannro. Drills or sows ghonld be adapted to the growth of the tops, and the condition of the soil - the mmall-growing tops nearer,
and those having larger tops, further apart-so that the sun may not be exclnded from the inter reals;
and where the soil is suif, or the sod tough, hills and where the soil is auiff or the sod tough, hills
arc considered preferablg to drills. If tho ground is well prepared, snd the secd well covered, they
are not beneited ly heacy earthing; plowing are not benefited ly heasy earthing; plowing
among them, or earthing them, after they come in bloom, is prejudicial.
Seed. It is a mooted point, we believe, among
practical farmers practical farmers, whecther large or small potatoes
are better for planting. The kimple theory re-
specting the mater, we have nover been advanced by any writer upon the subject. The error in the reasoning lies, we thisuls, in the assomption that
the potato, itsolf, is the sced. But the tuber is not the seed, it is simply a root propagnted - not by reprodaction, but by continnation, and the only
advantage which we can conceice the large has over the snall potato, is the nutrfment its greater
balk wonld snyply to tho germ. If this rensen balls wonld snpply to tho germ. If this reason in
satiffactory, we hope smass potatoees may bereafter preserved for planting in times of great scarcity As to the manuer of geeding, we plant from
twelve to afteen busbels to the acre, cutting the large ones to save soced. After trying repentedly
the planting of large and small, cont and uncut, wo
the planting of large and sunall, cnt and uncut, we
could never discover any difference in the resalts.

HUBBAIRD'S "YIELDING FINGXER BAIz NLOWERR."
 attention to the mechanic arts, and Invented sevcral improvements in Agricultaral machinery. The novelty and sopposed advantages It combines some nert featires end apparent improvement Fhich promise well. Tho yieldinys finger bar is a good idea; nnd the machinc is so constructed thal
the driver can readily adjust the height of the entting apparatus-another good featurc. It cortaini has a good look, yet we arc unprepored to oxpress a decided opinion as to its morits, not having see it in operatlon. We trust it will be fested at the Trials of Mowers in
See announcement of the Patentec in our Rivertising degartment.
But among numberless experiments which hav becn made with n vier to compare the producc o
plantatious of difrerent sizes of cuttings, those of ontire potatocs sucre generally statcd to be superio
It has been fonad that the crop was in some mea uro proportionate to the weights of tho sets; and
that it was more profitable to lant small potatoce the diflerence in produce per acre, between larg and small, cut or uncut potatoes for sets, was quite
inmaterial; but that the saving in tho quantit planted, was so mach in favor of the cnt ones It has been asoertained by repeated triale, that
and every variety of the potato, when propagated during a serles of yoars, either by cuttings of the taber or by the whole tubers, is likely to degenerate
on some, the quality remaining Food, after the
poduce in with others, it disappears with the rigor of the with othe
plant.

SUNDAY ANUSEMENTS A Lerrser from Mr. Baines, of Leeds, to the Earl
Shaftesbury, on "The Snnday and the Working Classes," Las been pretty generally circnlated, and and by its exposare of the fallacy which lares in the proposition that the poor man needs sunday amnseruents, as that word is generally nuderstood. he whole is worthy of attentive pernasal, out esrising from a quiet aud reli mionsly spent Sabbath to the laborers and the poor. The following passage is worthy
hat a pions ado, with all my mind and sool, one of the greatest ornaments, blessings and safe guards of society-the very salt of the earth-1 portunity and encourgement for a peacefaL well spent Sabbath. But what hope can we have of that, if inducements are multiplied for parents to
leave the sanctaary, and for ehildren to leave the Sunday school-if the only day free from interrap. the only das suitable for qniet reading, serions is to be 3 day of ramblin rousing! MI profound conviction is, that the very best thing for health, as well as for moral nud re-
ligions improrement, is the peacefol, soothing elerating employment, of a religiously spent Sabbath day, I believe that calm is wore needed than
exereised; and that the sweet paalmody of the honse of prayer infinitely excels the din of military music; and that a man of his own taate, with
a wife by his side, his ehildren aronnd"his knees, nd telling them the matehless stories jo of the Di
ine Book, is ten thonsand times better,"safer and happier than he who roves with don bfful company,
drops in at paillic hoases, and spends (there the money whieh ought to be appropriated to home feceasaries, to an neglected family,

 PUBLIC PARKS.
WF are not about to urge npon our readers the
importance of Poblie larks. We do not desiga to
show that they are show that they are neceessary to the heallthand and
comfort of the inhabitants of cities, or that thes comfort of the inhabitants of cities, or that thes
inerease their prosperity and add to the value of
the property. All this, perthass we might show the property. All this, perlhaps we might show
very clearly should we enleavor to do so. At
preseat we have another obiject; and that is tonrge preseat we have another object; and that is to ntge
upon all interested the proper eare of already ex-
istiug publios grounds istiug publib grounds. Almost every city and
village of any, sive has one or more Parks. These
 attrnetive to straugera Now, we would antk our renders candidly, if after all the oatlay in the par-
chase of land, de., one park in a thonsand answers
the puryose for which it is dest the purpose for whioh it is desfgnsed. Witith the
eeceeption of a very few in our largest cities in
stead of teing a stead of being a crededit to the our largesest cities in the
cxist, they are a disgrace, an esc-sore to every pe son of taste.
No one need to bo astonished at this resalt, whe
we consider how the We corisider how these Purks are got ap. On d
termining to establish a "Square,", the ground either parchaseal by the corporation, the ground
by some generon agines it will be na ornament to the town. It
then plowed two or three a ferv of thic forest trees most easily procured, ar put into holes in the ground, the mann engaged in
this works being very careful to put the right ends in the goil, and not to waste labor by making th of the trees die during the first summer, aud mon
follow, the seot follow, the second. Others blow over, and stand a
a very improper augle for well disposed trees.-
Oers outlive all dilitcolties; bat, unfortunately thed fence, never good enough to keep ont pigs, be
comes broken, and the cattle get in and brows aray at pleasare, always of course, sclectlng
thrifty tree if they can and one. Tho boys, to their narmes very nicely, considoring their youth erally seen-the ornaneental gronnds or your eity
or village, kind reader, Now, what should bo me fear. Hase a competent person make a plan of the
ground, vith broad direction. After the plan is made man in every satisted it is che best that could be designed for
your grounds-then you are prove Dig up erery dead, iying and nusightly tree, and
 take the soil from them to the depth of aboat 18 filling ap any hollow places. Nest, drag suad rale ane surface of the ground quito smooth, carryiag Witbin two or three inches of the surfero with
stones, pack them down level, sad cover with the gravel, whieh would be the better for rolling oc
cesioaally, especially after showers walks with turr aboont six incles wide and sow
thickly Kentucky Blue Giag Ginest shrabs Clover. Plant tastefully witi the mate, taling especial care to obtain thrifty, we large size. The ground should be prepared in the latter part of the sumuer, and the planting may be
done either in the fall or spring. especial charge of one mun-aud one mora noted as a man of taste than as a peliticician. Make it

$\overline{\text { A KNOTTY LOVE QUESTION；}}$
Mr．Foprrars R Rounsss was a bschelor who had
scen some forty－nine smmmeres，and althongh he
 more popular with old married ladies，or with such
single oncs as had ceased to be fighty，and had

 rally observed that a large landod poporty is
great eubbancer of the wit，beattr，and profundity of its possessor．$\Lambda \mathrm{s}$ Mr．Rollins grainally linm
bered diong in life，he naturally became less and
lesa less dieposed to rapid locomotion，and at the time time
he is introduced to the reader，he bat dropped
 tances anong the
dwindect do ovn to exactily three fanuiliee． In one of these fanilices，that of sir．Pettigrew
there were tro elderly young ladies，named Rache and $A$ melia，These ladies were of the respective
ages of thirty s．even and forty－pine，and having ouremelves with the society of a few old boanx hare q quiet game of backgammon with them $p \mathrm{y}$ ， the side of an old．fashioned coal fire，Among
theses riisitors none were more welcome than Mr． hail much to sany of the gad duapeneray of the present fast ages bat then，hesifid being rich in in
the fnnde，he was rich in his reminisences of the olden time．He wonld every now and then so affec
tionatelely allnde to the brill ant exeni
 the Yongh ladies would，in in masination，revel
again throngh those gay

 and marriage ecemed ont of the question，the lattor
interounse lyetween then was as anlm and cool as moonstine to winter．The condition of ancien
benux and ancient belles who havo retired from
 deuly be precipitated to the cronnd by a diman，shad
recollection on the part of that gentleman of the
bewitcliul manner in bewitchiug manner in Which Ann Maria $\Delta$ therbury
nsed to dance nearly a quarter of a century ago
Theal the tender mennories of his early partiality for Miss Harriet Anodyne would so stir np poor
Rollins＇ wagrant sensibilities that the almost made ap his mind to pop the quegtion to her．He proba
bly would have done on on a certain alternoonl，had he not stopyed in at the Pettigrews＇on his way to
Dr．Anodyne＇s．It happened on chis occasion tha
Miss Rachel was at home，and her tender solici Miss Rachel was at home，and her tender solici－
tude in the matter of a cold which Mr，Rolling ha talcen，affected him with such an all－overish sor
of sensation that for a period of some forts－ligh hours the lady in question was the mistress of hi
heart．Moat certainls，bis exclasive predilection io favor of Miss lanolel lasted no longer than the a compound kind of love，for his fore charmer
collectively．His condition of mind was trrly
pitiable，for begides the nervonsness attendant so anomalouse and whimsicial a state of the entic
tions，Mr．Rollins＇ $\begin{aligned} & \text { knowledge of the female liear }\end{aligned}$ led him．Rollins＇s kuowledye of the femall hear should he make proposals to ove of the foar h
wonld incur the risk of losing tho friendahin o
the remaining three． the remaininig three．Now this swas a contingency
too palnfnl to thinlk of，and the poor enamored gentleman epent a whole year in devlsing ways
and means whereby it night be avoided．As yet neithcr of the ladies in question had the remote
sngpicion of the whirlwind of eceentric passio Which was tearing away the very fonndations of
Mr．Folling＇moral being；for if at any time he Lappencd to make some extraordinary demoustra
tions，it was crodited to the accony and unexpected twinge of rheomatism with whioh Ono evening in the month of November，whil
Rolling was sitting in lifs lonely room meditating In the past，and wondering whither the tempes from his charf，snapped his hingers，looked out o himsel again in his chair，and then soliloquized Hes of no nse．＂said he，to endare this confoonded
verplexity any longer．One thing is certain； clare？Sappose they do laugh at no quadrapled
affection，what then？I am sure they must see my sincerity＇；and conclnad that I am 2 mana of a
immenscly large heart，thus to he able to love al Our of them with this inextinguisbsble ardor．－ made by their castlog lots for me，and passing
gitrange ft is，too，hate this happy thought hlould
never bave oceurred to me until this present honr And thell，in this delicious lottery，I shall be sure
on niy part to draw a prize，for the good reason
 Sy propoesed plan w vartial，and th

| well oigh choked． <br> Miss Harriet！you may laugh，but derise plan for me，if yon can．Yon know very if I were to select any one of the othe d leave you，you would consider yonrsel and neglected．You see，then，that it is cessary for the happiness of all concerned ould carry miy point，nod as I profess to e board in all my traneactions，I shall state to yonr worthy father，aud ask him to sn die drawing．＂ <br> onrse，Mr．Rolling＂，replied Miss Harriet， ask pa＇s co－operation in austhing yon to，but the whole procedure would be s and nnnsnal，that so far 3 s I am concern st beg－：＂ |
| :---: |

Now，Miss Harriet！if you please，heg nothing，
interruptei Rolline，＂for rely nopon it，I shall es
cnse neither of you，and when you have serionsl conse neterer the sal，foct，yon will not wish to be ex
consider
cnsed yonrsels． cnsed yourselk．What sense wonld there be，I ask
you，in my going out of onr precius little eircle On the day of this interview，Mrr．Rollins made
known his delicate intentions to the other three adies，and at first they were disposed to regar
tho matter in a jocular light，buton beibg assmre by Mr．Rollins that he loved them all with the
poetie arder of a never－dying affection，it is difl colt to say whether amazement or mirth was the
prominent emotion of their breasta，When Miss Harriet Anodyne related to her father the aingula commonication which had been made to her，tbe
doctor was thrown into such convansionsof langh－
ter that he protcosta to this day he gaiued seven poands of flesh on the strength of it．
In the evening the four loved ones got togethe
nd compared notes，and what n glow and fintter and compared notes，and what $n$ glow and tintter
of chant ing excitement they were all in，to bo sare
Miss Atterbury，Miss A nodsne and Mise Rache Pettigrew made a faint of treating the whole suh
ject with derision；bot Amelia Pettigrew very candinly confessed tbat she was sttractod hy the
novelty of the thing，and if the rest of the othe
girls woald agree，she wonld cheerfnly fall in with
 a good husband，and we may be eqnally sure tha
unless se consent to be wooed in this quarterl manner，some other than our dear selves would b the winner．Pa says that any person acquainte
with Rollins might have known that if be eve
cot married at oll it woll got married at all，it would be dono no in the true
Rollins style，and for his part，he cault seo any inn
propriety in our owning the soft fowenchment and making onrselves a grand Hymenial lottery at Mr Rollins＇earliest convenicnce．Besider，girls，it it
rather a pleagnut reflection that Mr．Rolling slighta sctulea，the ctrve remalutug in singlo blessednes Will have that blessedincss angmented in this lat
trophy to our waulug oluarme．＂ The ladies went off in fresh cachinnations a
Miss A melia＇s playfuil oratlon，but it was plain to Miss amelia＇s playui oration，but was plain to
see that they were heginning to waver；to thiul
more seriously of the matter，and before they parted it was，＂Well，after all，no one is to know
anjtbing aloont It bat ourselvcs，and if pa consents， and if ma consents＂－akil，in short，snch is the matrimong，that Mr．Rollinn carried bis point．
It was ona cold put pleassant evening in the begin． ning of December that the fonr heroines and thei
lover were aesambled in the cozy back parlor a
Dr．Anondyuoge．The ladies looked somerphot ex cited，bnt the worthy Jollins was as comfortabl
and self－possessed as a dncl in a mill－pond．If seemed to regard the approaching transactions a like，and as just the only mothod left whereby a gentleman with a oappacions heart conld le extri
cated from a dilemma．＂Be satisied，ladies！ love you all，but my enpreme aliection will be cen
tered on the prize I draw；she will，of conrse，soon become my wedded sponse！Aul I wonld now say
for myselff，and in the name of my dear wife，who ever ahe may be，that，
manent and oubrober
At this the ladies in a flatter of amiable confu－
sion，simplered a little；but just then the heavy
trend of Dr， went pitcs．pat a little．The doctor enterod into orous bnt becoming gravity，pat twenty tickets in a and the doctor said her shone on take eleven out out
singly，shaking tho box after each times tiket was drawn，and the lads having the largest nnm tions，step op
ling and scttle
St the first drawing of the eleven ticketr，Niss Rachel Petiigrew and Miss Atterbury Lad a ma
jority of tickets，but also an eqnal number o Them，and so there was a yecessity for another at
tempt，In the secoud serles of drawings what a lomptry In the becoud serles of drawings what
dutcering of hearts there was when the eleve autering of hearts there was when the eleven
tickets were all ruken from the lox．
As the doctor Ueliberately As the doctor Ueliberately opencd them，eve nonnced that a cholce had been effected，and on
the doctor＇s requeating all the partics to draw nig
 tar＇s lovely danghter．Mr．Mollins Inatantly spraug
to her gide，and her fafr comparaions，regardug
 male hands can glve．Tho marniage eanio ofl in
feww weeks with great cclat；the three young ladle Itollins，each with a wig on hiss pate，serving
 hyd Miss Harrict an exenplyary bustand．
The poctical feature of this veraclons hist
is，that shific anyo of the four ladles would gla that while any of the four ladles would gla

| hond un she had cherished a gecret affection for him who，twenty－thrce gears ago，had won her southfol heart，and now having lairly won him in \＆lottery，he was to all intents and purposes her lawful property．It is trne，she was sometinnes in clined to a little jealonsy at her husband＇a regard for her three friends，but as Mr．Rollins protested that the deeision of the lottery had coneentrated his affections on her alone，she became content．－ The three single ladies，gratifed that they had not been shoved aside and neglected in this grand matrimonial scheme，ever after retained for Mr． and Mrs．Rollins the strongest attachnent，and all the parties were as regular and coastant in their interchauge of friendly visita as theywere prior to the marriage． |

WHY I WOULD BE A FARMER. "A FARMEI," urgee some people, "can nevcr
ise to eminence"- end this is the reason given by many for not eontinuing to follow that occupasome othcr profession, stamping hard, as it were, Years are passed thas in the struggle to attain dered a burden, and in many casse, the objeet of all this sacrifiee, if gained at all, is not reaohed
until late in life, until the days drave nigh when until late in life, until the days draw niga when
man has no plenare in them. Of a saceessful olfieo-sceker, or seeker for notoriety, nothing can
be said which wonld indnce any one to wish to adopt his mode of life, ceren if snecess conld be
warranted him. His path is beset with perplesiwies; he is dependent nyon lis neighbore, hls friends and his enemies alike for support, and con-
sequently a life of anxiety and suspense must nceessurily le his lot Ho is seandled and his
private alfilrs are meddled with, and nothing can private atmirs are medatcd with, and nothing can oliticician is attended.
No one, I thinkt, can say anght against the lifo of
feruer. It is tuo to dors tot malke a great stir the world, for ho delights in a quiet and seclnrales the nniverse; excrything eontribnting to hla
 his quiet, retired rural home, surrounded by his
family, of eold winter's evening the farmer has nothing to do bat to evino himself; his grain
gored and his larder flled, with no ansiety prey ing upon his ruind, he need give himself no niansiness regarding the futnre.
Contentment is the sonrce of all happiness, an is songht inter liy all, but is seldom experienced,
execpt by the tiller of the soil who earns his bread by the sweat of his lirow, which swectens the stanf
of life. His task is hard who seeks for contentwhose sommit can never be reached-in other nd finds contentmont in his laluors. As he throws Limself at early eveniug on his easy conch, tho'
hifs limbe are Ured lifs heartis light and nọ tronble listurbs his trabsuil mind. Then lot us he farmersif we would be contented
if we would enjoy Nature's richest wleskings independence and laspi iness-for no otle trado Toot-prints" be marked out from the sands
Time; but Jet os use an nuprigut and honorahle fife, that a place may bc res
urc and hetter Home.

Froar the hour I first contemplated becoming tion did not sit very lightly npon me. I took this I apprehend. My mind is to be bronght in contact
Mat with those of young and tender years. It lies in whom I shall instruct. To my obaracter, for tho pecessity, the clements of my character, whether good or bad, mnst, to a certain extent, enter into
the compositlon of thelrss; and the tendency thns given will not btop with time. Some, in the years
to come, may trace pack to me the beginning of a have reached the highest pinnacle, where "Fame' prond temple shines nfar," will look back throngh the dim ycars with hearts fnll of kind remem
brances and blesings for him who tried to lead
thcm in the path of wisdom and virtue, thougb My views, concerning the feacher's calling; its responsibilitics and its rewards; its difficalties and its hopes, have not changed since then, only that
the convictions of their trnthfulness havo been coming strongcr with the growing years - Whilc
the trials of the teacher are many and hard to be borne, his reward is more than a compensation.-
Often, amid cheerless hours, in the hot and un. healthy air of the school-room, there steps in some Few are the callings npon which the world bestows less of her lavish praise, and to whioh she speaks
fewer kindly words of enconragement; yet the in. for all this, and he who feels the dignity of his ciate his labors and do justice to his memory,
Tako courago then, whoever thou art, that seekeat io instract and emlighten the mind of the
young! Thy ninisistry is a noble one, snch as an
angel might desire theng not edncating sonls for eternits. Committed to kcening they are in thy hands, as the soft clag in
the hands of the potter. Thoun canst mold them or to dishonor-fi here and banishment from God's presence hereaf. Tacketh, bestow such wisdom nipon thee, that many in the futare years will "risc up and call thee
blessed." Pall ap the growing weeds in the gar
den of side, the seeds of knowledge and religion. Faith fully tend the carly plants, and by-and-by, it shall
be thy joy to see, in the rich, antumnal years, trees loaded with golacn fruit, and the fruit gatbered But I have beeer waudering. The thonghts hars
come ont only bcconse they would come, and Id huld mysell roppransishe for tho interroption, ontly Rocliester, June, 1857.
EXAMINATION OF TEACHERS,

## Tinat teaching has not everywhere attained its true rank among the professions, is partly the faul

 of those engaged in it, and partly the fault of on relating to the exnmining of teachers These cxaminations are very often ouly a mere farce, and fail of producing and beneficinal effects. farce, and
Half an honr is often deemci saficiont Haf an hon is often deemed saflicient for de
termining whether an entire stranger is fitted to soch, the moulder of their characters and dispositions, and an implan shall that shall be lasting as eternity. They are too o books. A ferv puzzling examples in arithmetic a long list of geographical questions, often askice
fronn an open map, the most dificicult words to some bacl-handed picce of poetry, forms anythin clildreu. They are conducted by persons a to be examined by a lawyor, would be simp
ridiculous; and yet, meaning no disrest nine-tenths of the lawyers aro as well qnalified to examine a doctor, as nine-tenths of the doctoon
lawyers or clergymen aro to exanuine teachers. Young tenchers dread nothing so mnch as bein
examined, nuil well they mas dread it, for tho positions, but in order to gain their vertilicate positions, but ini oracr to gain their vernichates
arc forced to yield their own inore enlighten
views and knowledge of facts, to tho whims, gnorance of their examiuers, who oncr exemp
fy the old adage, "A little learnlag, sco,"
It is unjunt to mamin in every town in which he may teach. In stor

## NEW YORE STATE TEACHERS" ASSOCIATTONT. WE find in the N. Y. Teacher the following "Order of Exercises" for the Twelfh Annual Meeting of the New Yort State Teacher' Associa-

 Meeting of the New York State Teacher' Associa-tion, to he held at Binghamton, on the 25th, 29th nd 30th days of Joly next.
The exercises wlll commence at Brigham Hall,
 Brooklyn; after which, the usal Committees will be appointed, and miscellaneous business transact
d, until the hoor of adjournment. At 2 o'clock
, M., an address will be delivered by

becoming insolent, respected neither the laws nor
even the Snltan himself. They thns turned that
power, which was originally the defence and glory
oo the conntry, to its ruin and destraction; and
many were tho Sultans who fell rictims to their
 was sacrificed to their fory. They were in realit
the raling power in the country-dethroning Sul ated from their minds, their only aim was to pro
mote the interest and glory of their lord and Sul. tan, and they were, for many centaries, justly dis
tingaished for the excellence of their discipline and for their indomitable courage. Bnt, owin
to their constant successes, they at last began to consider themselves inrincibie, and by degrees
tans, and taking of the heads of ministers at their tans, and taking off the heads of ministers at the
will. Thes were npheld in all their excesses os the people, from a dread of their rengeance, many of whom, from motives of personal safety, eve
enlistod as honorary members of their corps. F even the assassin could find a secure asylum i could claim him. Nothing was sacred in their es timation; families dared not to venture abroa without a janissary escort; aus, on this acconnt modated with tro or three of their number, which
cnstom is still in rogne; though Kavasses, or Turkish police oficerrs, hare been subatitnted for the
jnissaries of former times. Even the royal harem was not safe from them, and neither life n
property were secure from tnefr depredations, property were secure from tiofir depredations,
Besides their regnar rations, their pay was their rank, per day. An asper \#as, at that time eqnal to one cent of Feteral money. Bnt they
nsd various ways of iucreasing their personal re enves. They assumed a peculiar stylo of taxin the peaceable citizeng, by carelessly tossing their
handserchiefs at them, with an jntimation that their pockets needed replenishing, and none dared
to retarn the hankerchief withonta tribute tied in one of its corners. Those who were stationed in
the city as metropolitan grarde, generally con trived to amass a quantity of mnd before the gnara-
bouse, which they would ask all the rayahs who passed by, either to sweep away or contribnte
something for its remioval. The day of theit revolt was most memorable,
and our own janissary boatman coolly pat the number and marls
door of our reside rades that the house was already appropriated by
one of the brotherhood. Assassination was a mat ter of freqnent occurrence in those dass. The
father of the writer oncce narrowly escaped witb
his life. He happened to be passing by a shop his iffe. He bappened
where a janissary was ex.
a view of purchasing it.

IIISTORY OF TIIE JANISSALIES.
Tnp Uaisisded by Derny \& Jacrson, New York $]$ the army being then compegsed of the rictorions ready to take the reius of government into thei
own lands. A new militla was consencuently in stituted by Mourad, composed of young prisoners
of war, who were brought np in the Mroslem faith: and, in contradistinctlon to the existing army, we With the design of giving more solemnity to the
now order, tho founder resorted to the aid of ro Lisior, and they were blesssed by a famono sheikh
Hadji-Beltash, who extending his arms over the troops, , froked the blessing of Allah, and pre
dioted thriff fathre victories, pronouncing thes heir conutenance ever be bright! their hand vic
torious ! their ssord keen M May their spear alwass
hang over the head of their encmies, and whereso Ter they go, may thoy return with a white face

## KEEP COOL.

Ir is very easy to talk and "keeping cool" the matter to accomplish the object. It is necessat to call into requisition aill the sids at our command and even then, we often fail. Icr Creas is one and can he had withont mpat loxies of the seaso There are varions recipes for its preparation, we give two of them: One quart milk, the golks of fonr eggs, and the White of one; one teasponnfol hntter, one teaspoo the milk out the fire; then take the arrowroot hntter, and make a smooth paste witi cold milk as soon as the mills boils, stir in the arrowroot an butter, and let it boil until it thickens; then take
it off the fire, add the sigar and it off the fire, add the sngar, and slowlys stir in the
eggs, whioh shonld be well beaten; Havor to the eggs,
taste.
If pin If pine-apple is used to flavor, grate as much as
is wanted, and add sngar enongh to make it qnite is wanted, and add sngar enongh to make it qnite
swect, and add to your oream when half frozen. In boiling cream, a milk kettle or farina boiler Anote used to prevent bnrning. To every quart of mille pnt balf a poond of powdered sngar and toree eggs well beaten. Mix a and put the vescel containing it into a kettle boiling water, and keep it stirring all the time
nntil it thickens. Then allow it to cool, and it is ready to freeze.
The freezing

ATSTLN'S FATBAT PREEZER, done in six minutes, and often even less; and the Whole operation is so simple that it can be done by
a child. We wonld deecribe this freezer and it
 fall directions. Other Ices, besides Crzair, arc very refreshing
these warm dsys, and we recommend the ladies to try the following after they get the freezer Orange Ics.-One orange, (Havara is best) one
gnart water, quarter pound sngas. quart water, quarter pound sngar, grate outelo taric acid, (equal to tro or three grains coffee, train through musilin cloth, and freeze as cream. Lexion Icz.-One lemon, one quart water, qua ter pound sngar. Same process, omitting tartaric
acid. Srratiekrry Ioz.-One quart strawberries,
hree ordinary haskets-mashed, qnart water, na er pound sngar, tartaric acid as for orange; pro-

## TO PRESERVE STRAWBERRIES.

 Ws clip from the Ohio Cultivator the following ecipes for preserviug the Strawherry, which, to imels, and anable them to artinicially prolong the "strawberry season:STMA WBERTY PRE
Stranberory Presbates. - Seleot the large and handsomest berries, weigh them and sprea of poowdered white sngar. Sprinkle halt this monnt over the berries, and let them stand seve ral hours in a cool place, to harden and to form liqnor. Pat them in a porcelain-lined kettle, and and by degrees strew on the rest of the sugar. BOA then take them from the syrnp and saread agsis on platers to cool and harden into shape. Then nut them into wide-nonthed glass hotles, pour the syrnp on boiling hot sad seal the jars,
Stra arberry Jeluy - Talte the

> inst ripe and fresh, mash and drain them throngh Hannel bas. To each pint or finice put a pound of white sugar, To each ond pint of jnice put a pound egg. Boil slowly abont ton minutes, skimming thoronghly, then dip it into tumhlers and cups, an then seal them over. Ie will rever form a rery arm jelly, bur to is delicions and teantifald
nswer maray dax-smanl and poor berries will awooden pestle add te ant decay. Mash wil poand of brown sngar, boil abont fitteen mi. C , and seal up in earthen, glass and stone jars he fire withat berkies.-Put the berries ove nd as soon as the whole nuass is raisest no water, ing point, dip it while hoillng into the cans (glas onter than tin for such acid frnit,) and poor eearly thick enongh can a little boiling syruy and seal air-tight at once. These are very fine eaten with cream.
Strawberries sh
serving. If dirty, do not ase them. Strauberry siortcake is a luxary. Make a large, thick short cake, split it twice clirongh, and spread with but.

JULY 4

あye ernatice
WANDERLNGS IN EUROPE-NO.

 parts of Snlisbury Plain, the soil and roeks bcin
apparently similar, thongl the surface was mor We walked to the wharf where the boat for Os.
tend was moored, and after sccuring our passage,
set out for a stroll to visit the eastle, which we could dimly see on
the heights, but on the slope was cncamped a regiment of Highlanders, just retnrned from the Cri
mea, and the lights which shoue through the mea, and the lights which shone through the whitc
eanpas tents, together witb the lively music of bag eanvas tents, together witb the uvely musio of bag-
pipe and drum and sounds of laughter and joviali-
ty which swelled on the vight nir, attracted. thither. We conversed a while with a tall soldier
whose face was brown from exposnre to sun and storm, looked at his tent and aecontrements, and
listeued to many thrilling aneedotes of the selge in whieh he was engaged. It was astriking acene; it was the last I shonld behold in Englaud. The ed lilie fallen stars; amay to the Eastrard stretch the sea; there was a confused maurmer in the air,
but one could distinguish the sonnds of the camp the hnm of the towb, and deeper thay all, the moa
of the sea at the bottoni of the chalky olifrs. We descended to the boat to seek a little rest and found that the blinudering stecard bad seleetwere no nore vaeant oues left. I secnred a large
arm-chair, however, in the stern of the cabin, and rm-chair, however, in the stern of the cabin, and
disposed myself very coufortahly. The waters
vere still. When below ceive any motion, except that disagreatble jar
which attends all steana vessel which attends all steans vessels We slumber deck from whieb nothing could be seen but the eessel and water. A fog sbrouded all, and the offiout - for they were behind time, and as the tide was rapidly ebling, it was impossible for the boa
to enter the shallow harbor of Ostend. Presently the fog parted, and through the rents we perceived a low, nnintoresting coast; then a few hage wind
mills loomed ont of the mists, and afterwards the spires and part of the town. We saw a few carts
driving along the sandy beach, and bathers plong ing into thc surf.
lasty Dutcbinen, and baggage and passengers wen into them promincuunalyo mhn passengers were,
of course, , wostly Engligh, and not in the best mor after the night's voysge. Their faces dilu not
brighten into smiles when the boarmen denanded a fee of two francs apleee, for rowing us along side
of the pier. On the way, one of them disposed him self carelessly on the baggage, without heediag
the damage he might eanse. To happened to pa his huge feet on my krapisack, but I diad not ob serve it, until I heard E-, Who sat nearer, sin
ont in the coolest tone maginable - "I say, ol rellow, take yonr feet off that laggage, will you,
He understood enough . Euglish to comprelien what was sald, nnd with a hear llike grunt, dre
himself into a swaller compass. When we bad as cended the ladder and stood on the pier, an offlee passports, While our baggage was taken into the
custom honse to be examined. They did not us mneh trouble or detain us long, scarecly look
ing at most of the liaggage, and atter haring s cured our passports we went immedintely to ti
railmas stalion, and took tickets for Bruges rain was ready to start. Scareely had we take

MEANING WELL AND DOTNG Noor's Rural Mer.rorker.
 obeg" the noble looking man, who gazed prondly
down upon his fair child-wife, mentally resolving as he placea the wedding ring opon her finger
that the rows thus plightcd should never be bro
ken. Yes, she was far too young to be a wife,-so
 and sober, and thought every one too yonag, who
had not reacheied the mature age of thirts! Thus
 well ,nd that wasall, for at the age of sevenneen, she Wat, ancomplished seareely one thing which ahe
had andertike, though almays intendiing to do oso,
hat -tomorrow, -next medk, or some time when sly
 and who, to his many oned those of order, promptness, and regularit, asked for $\Delta D$ to be bis wife, she hesitated, until
the yourg givls tears prevailed, and with sa fore. bodingg for the fatroe happiness of her dariing
she gave her to the keeping of another,
asking she gave her te the ine has for he wontid not find
him to deal gently with her
her fantless. But what finsband in the frrs tide of his new born bliss ever believea there is. anght
of imperfcction in his bride? Not Warmer Grad Tusy, most certainly, and if the love of a tr
hearted man can make a woman happy, ADA b hearted mason for anticiciptiting a joyon foture.
 Thes far from leing wealtuy, be itted ap this sinite of rooms with no wiserly hand, arranging erit
thing with the most perfect tuste, anticipting the many happy hoors be hhould spend in them when
Ans was really his own.

 rnnning from one room to another, admiring this
and praising that, whitie her lusband looked fond.

 so. There shall be a place for
cerything shall be in it itp place,") srowing very red in the fuce and once oulisterin
her sollt, white hand, as sho swent and dusted, ranging and re-arranging the furniture which in the end she was sure 2 put back just where tirsa
she had fond it. Bnt at the expirtiono of tha time she hegan to grow weary of well doing
WAIIrse did not praise her-did not evee seem to know what an effirt the was making to break the
habits of her girlhood, and when at night he came home from his ofice and found his chair, llpper
and dressing gown in their nccustomed place, the and dressing govn in their nacoustomed place, the
astral lamp burniug apon the centre table, the fir
 dressed waiting to reeefe hin, he ooly told her
how mueh he loved her and took all the rost as a Manter of consse. And why shouldit' he, Hring est or all neat mothera who neycr allowed a fly to buz more than once in her well kep honia, or
specek of duast to become at all domesticuted in the darkest corner.
Still he mas not nneasonable, and had often laughed at
a over-netne

| burean drawer, which to had reserved for him self, was all in disorder and crowded with some or up what more than all else men detest, viza, "buttonless shirts:" bis brow greew clondy, and houg he neerer spoke to her an angry word, be often remonstrated with her upou her growiug negligenee, While, with tears in her eyes she would invariably reply, "I mean to do better," avd there the matter ended. <br> Fortanately for Waurer his father's bonse was not far away, and after a time finding it ble to obtain from and the little acts of attention which it shonld have been her plensare to render him, he went to his mother, who wisely refrrained from saying what she thought, though many a tiue as she bent orer some formidable rent which a stiteh in time wonld have prevented, she sighed "Poor boy, I knew "twould be so when he martied her." Thus matters progresseâ until spring eame, when ADA was suddenly seized with a ilcsire for house- keeping. "Twas less cxpensive," she said, "aud |

PUBLIC SCHOOLS OF ROCHESTER. Fros fome advance sheots of the Report of th
Snperintendent of Sehools, we are cnabled to gather the following facts relating to the publ chools of Rochester:
The sohool departm of seventeen orgarized districts, besides sehoo kept in ono or mure hired rooms. The selools ar been paid during the yoar $\$ 30,280$ c8, apportioned as follows:-Male 1rineipals of Sehools, $\$ 800$
Female Principals, $\$ 32 \mathrm{~s}$ to $\$ 350$; Female Assis tants in Senior Depurtinenta, \$875; Fomale Teach ers in lntermediate Departueuts, $\$ 235$ to $\$ 245$ Female Teachers in Primary Departmenta, $\$ 205$ to
$\$ 215 ;$ Musio and Writing Tuachers, eacb, $\$ 800$. $\$ 215 ;$ Musio and Writing 'Toachers, eacb, $\$ 800$,
There bas been cexponded for hnildiug and repair during the year, \$6,619 42; for library aud appa-
ratus, $\$ 357$ 64; for fuel and contincent expenses $\$ 8,09573$; and for Superintendentes salary, $\$ 778,80$ making a totul of expenditnres for the year o
$\$ 46,832$ 17. The amonat raised bo tar is $\$ 0$, and the State euppropriation amounted to $\$ 85,184$ 58 , of which $\$ 695$ t 5 was library money. The to
tal number of sclolay's in the city, shown by special censns, is 16,924 , being an increase of 8
dnring the year. The toial number rexistar attending echool during the year is 7 , 59 , wlth average daily attendance during the last torm of
3,389. The wholo number rttending select sehools is put down at 2,553 , thus leaving near $i, 000$ seholars of proper age who attend no
school. The cost per scholar dning school The oost per scholar daring the year, ex
elusive of Buildiag and Lilrary fand, \&o, is $\$ 1185$. PUBLIC SCHOOLS OF BUFFALO. Tre Twent:eth Annual Report of the Snperin
tendent of Public Sehools of Buffalo has jast been pnblished, farnishing sorna statistios of interest to
the frienda of popular edacation. the friends of popular educction, The whole
nambor of districts is thirty-two, acch furnished
with with sehool-Lonses, some of which are ole gant an costly edifices second to none in tho State. The
whole number of elildren taught dnolne the Whole number of ehildren taught durlng the yea
was $17,3: 12$, while the ycarly average was onl was 17,322 , while the yearly average was only
6,916 , slowing $a$ rery limited and defieient attendance. The expenditures from the general fund
for 1556 were $\$ 82,906,88$, and from local fonds, for building, repairs, icc., \$38,842 33, mating a total of S121, i49 31 , or more than one dollar for eaeh in-
habitant of the eity. Of this amount the State pays $\$ 26,66196$.
The number of
The number of volumes reported in the pnblic
libraries is 8,216 , 3nd the number drawn 26,915 ,
heing being an average of more than thrce drawings for
eaeh volume. There has been expended eace volume. There has been expended during
the year for libraries $\$ 1,000$, divided among the distrlcts in proportiun to the number of children registered.
In 1838
Bn
.
In 1838 Bnffilo contained ouly seven schools
tanght by seven natu teachers; taught hy seven mate teachers; at the prescat
time there are thirty-two schools, employing tweuty-ive male, and one hnidred and sixty-four feminle teachers.
for the mane advananced studies, into which Schoo for che motre advanced studies, into whiep scholars
arc aummitted from the other schools after passing
satistictory satisfactory examination, and whero they enjoy advautages second to no Academy in the State.
The salarics established for the The sulaties established for the curzent year are
as follows: - Male Principal of Central High
School $\$ 1,200$. School, \$150; Mrle Priucipals of Schools, s1,000, Femalo Prinoipals of Departments, $\$ 400 ;$ Female
$\Delta$ ssistants of Departments, $\$ 325$, Female Irrincipals of Small Schools, 8335 ; Writing Teacher scholar for tho year is stated by the Saperinten-
dent to be $\$ 970$.

## Tre net amonnt in the Treasnry on thc 1st inst,

 Onxr $\$ 10,8000$ of
1837 arc outstandin
ThB P. M. General, with the approbation of the
President, has sclected the following routes for conveying the overland mail to California, riz:seginning at St. Louis and Memphis on the Mis Rock, Arkansas, thence in the dikection of Preston to the Bio Grandc at the roost gnitable crossing
that river to Fort Fillmore or Donna Amna, thenc along the new road now being made undcr art
ion of the Secretary of the Interior, to Fort ma, thence by the best passage throngli the great
vallegs for atie and expeditious stagin's to San Francisco. The contract has been given to Joh
Butterfeld, W. B. Dinsmore, Win. G. Fargo, Jume Butterfield, W. B. Dinsmore, Wing. Garder, Marguls S. Kenyon and Alexande Holland, of N. Y., and Hamilton spencer, ofly ser vice, they being the lowest lidders, and as the
will perform 700 miles more service than the othe vice, they be
will perform
proposed.
Wsi, Cary Jonse, Esq., who recently left Pana
na in the U. S. sloop-of.war Decatur, is now known to have leen sent ont by the Administration as
seeret agent to the Central American Statcs to as certain the views of thcir goverument in referenc
o the division of Nicaragna and the opening of Tue N. Y. Times learns, from a private sonrce
that no soon as an intervew is bad with Mr. Bow lin, and the Minister from Bugota, the Governme
will imnediately decide on the course to be parand wilh New Grenada, wischarscter, if an amic be adjastuent is not atainied.
In relation to our affairs in Veneznela, concern
ing the Bird Islande, the course of our Minister Mr. Eames, is approved; and if the commmnica
tion to be received from that Goverument be no iion to be received from that Goverument be Government will be conveyed by a vessel of war
as there is no resident Minister here from Ven nela to communicate with.

THe New York papers of the 6th inst, contain the 4th and 5th, in which several desperate en of rowdics, Several personswere killed and others received serious wonnth from missiles and fire-
arms. The rioters obtained posscssion of a cannon, and crected barricades composed of carts and
other vehieles, from behind which shots were fired with madkets, rifles and revolvers $A$ reqnisition orders to three Regimenta to be ready for duty.The 7lat Regiment were ordered out on Saturday
night, and remained nnder arms from 11 o'clock night, and remained nnder arms from $110^{\circ}$ clock
P. M. untilo 0 A. M. of Sonday morning. At this
timo all time all was quiet, and the military occurred in the Five Points and aveuues leading to that centre of depravity, peveral hundred meu
being eugaged in the melee. Nine perbous received sorious gun-shot wound and the military were again called out, and marched through the streets, head
ed by Conimissioner DrAPER, and detachments police, whon order was restored. A telegraph re ceived this morning, (Tuesday) statcs that the
military are again nnder arms, and will he on duty dning the day. The marks of ballets on the
hoases year the sccne of the riot are so nnmerous hoase yiear the sccne of the riot are so nime
that the small number of killed is considered re markalle. in endeavoring to gnell it, Deputy Sherifs Spalle and Clastin received so severe injnrics that Smalle died the next morning, and Clustin lies in a very precario
made.
Wins Prospects in Eunope.-The Courier des Etuts Unis has intelligence from the wine growing
oountries of Earope up to the lst ult From it issue of the 19 th ult. we learn that the vines
hibit, generally, a vigorons growth ander the nuence of the warm weather; and that, fro present appearances, an extraodinary yseld mas
reasonably be anticipated. In some localities the disease "Odinm hans made its appeurance, bnt it i
evidently"on the decliue, and the growers are pre parea to check its progress with sulphur and othe preventives. Notwithsanding these favorami
prosyects the Couriur udd that the prices
wines experience no diminntion.

PROGRESS AND IMPROVEMENT.
[single no. five cents.

FOLE. YYOX. NO. 29.3
MOORE'S RURAL NEW-YORKER, Agrieuturual, Literaray y and ramily Neevgaper,

 development of this cereal, are still timely and e hope, will prove of valne to those most inter
ested - the growers there of. Hilling, although bearing the patent of antiqnity of oor agricultarists perforum no longer this labor-
and luetwcen thoge who bave gbandoacd the method, and those who still cting to ancient forme here is a qatlif of words. The dispntation of "Nytional," and we shonld not be surprised to ee a plank berenfier inscrted in folitical platforns
to bill, or not to hill, becoming the test question Wonld that a majortly of thoso now forming tho basis or poltceal parlies, had one.bnif the virtnc of
this. We should then hear less concerning "ansea
worttinc ss,", nud less fretuently would arise the Nortbinc ras," and less frequently would arise the idea-of hrowlug aside a certain porlion that has,
unfortunately, been deprived of its "availubility." There is but litue Boubt that, if hilling is benefi-
eial, there bas often been in the constractiog rocess "too much of a good thing"-and here We nre iucllued to think, is to be found one canse
of failure. The peculiar bedecits attributed to hilling, are not derived from the elevation of a
greater or less quautity of carth aronad the stalls but from the manner in which it is doae, and the all, it shbuld be in succ.
molsture will be way, that descending instend of actiug us a water-shedi, , ,ceping dampuess
frum the crop, it should be a basim, recelving and naranteeing a bupply equal to the area it occaplies. Our suwnucr rains are gencrally short, rapid falt.
ing sluwers, and these conea desuloy, or operate
directly antagonistie to, One menns by whloh man may aid nature in cerfecting the growth of any crop, is by keepin feoth of clean culture more perceptiblo than that Which now occupies our atwantion. These
appropriste to themselvce the nutriment which would otherwise be taken up and adapted to the
Wants of the corn, detraeting from its strength, support. The pleculiatrities of the present seaso
have given extensive growh to this bano of
 "mect tho encmy." and the filds are alcavst over
ran. These must first be got unt of tue way, and han, though we have not an abondnnt faith in in the season as the prosent time, stily, if the weed
have taken the life frona the land, something may Awong the varivus apylleations in vogue, and eun to bave been nutuinated, is one composed out plaster and ashes. Many farmers ase them sepa reutized. An carlier application would be mor will ufiord opportunity for their profitable nas. Bistcer most readlly will be asslmilated aud pre pared for circulation, and a staull quantityvieluity of the stalk, may be productive of man
benefit bencif.
The great remedy, howcrer, is in the amount o
mnsclo laid out npon the land. Stir the soil i
yon wonld find the panacea for the ills prodnced
by late seusons by late seasons and fonl secds. This is the make ameuds for the depressing inflnences of then $\rightarrow+\rightarrow+$ wheat culture,--Facts and inferences. In 1850 the wheat crop of Maine was less tha in 1840 by more that 600,000 bushels-that of Ne -of Massachnsetts by 120,000 buzhels-of Con 7,000 in 1840 , and byly 41 more than one-half, bein 9 in 1850 indled from 3,000 bushels in 1840 , to 49 in 1550. In Vermont alone, of all the Now Veing in $1850,495,000$ bushels, and $1850,535,000-$
an increase of 40,000 bushels, The whole when crop of New Eugland, Vermont includied, wasle a ceade. Ohio raised legs wheat in 1850 than i
840 by more than 2000,000 bishels. Yet the hree Statcs, New York, Peansylvania and Ohio aised more wheat in 1850 than in 1840 by nearl.
$, 000,000$ bashels. K Kontucky raised less wheat in Virginia, on the other hand, and Maryland and Arkansas, and all the ncwer Western and North Western Statco and Therritories, grew so mach
more wheat in 1850 than in 1810, that daring these con years the annnalaggregate wheat crop of the
United States was increased from $84,000,000$ to 100,000,000 bushels-an advance of nearly 20 pe The infercuces we Uram from these facts we pro ced to state in a fess words,

1. In the older States the wheat cnlture is on the
whole greatly on the declinc. Climate in th: Xorth-Eastern Stutes, and careless culturc, with eneral disrcgard of the demands of the soil, al of this docline,
2. In all the newest States the wheat crop greally, for the present, on the iucrease. The
reasons for this fact will be obvious when it is remembored that the virgin soil of the new country nually cleared or broken ap and bron glat ond ullivation.
3. In the Middle States, where a favoratle soil nanures, the wheat crop has " held to nd suitable

We hope thesc facts will not fail to inpress their obvious lessun on the farmers of our ncw Western
States. The example of Great Britain provesthat ld lands, if property managed, , may contiane zo

## dIASTASE.

Anowg the constituents of plants-as shown by ing peculiar properties and acting an iuportan art in vegetable reproductiou. It is formed du-
Ing the process of malting in barler, and proutiog (which is the same thing) or gerniushat it resides iu a particular part of the grain o botato-that it is forued only at the base of the crin, and there remains during its growth. When, disappears This shows that it pertorms a function nealled for wy tha perfect plantit What its nse are will appear from a detail of its properties.
Diastase (1lke sulphurfe acid) posseges the Diastase (11ke sulphurfc acid) possegses the
property of transforming stareh, frost into gun cid) therc is an interniediate stage when dextrin produced-a substance having the same compo old watcr. Thas diastase first makes the starel
coluble, thicn converta it into gam, and tlen to gar. One part or diastase whll couvert tw of diastase, when allowed to stand, is soon decom Thoogh it lins never been analyzed, it ls known costain nitrogen, for in decompositlon it evolve One fous
roduced in the living seed, and situated at the anse of the gorm, may now bo explained. Starel) he futare germ, prepared sud ready to ininlster La awakening it to life. But starch fo ltself iusol at. a in water, and woold not, therefore, sccompans the flidd sap when it begins its eirculation. For
this renson aiastase is formed at the point where the germ first issues from the mass of food. Ther
it transforms and renders the starch soluble, s
that the yonng vessens can take it up and convey
it to the point of grovth. When the starch ise to the point of growth. When the starch is e formed and carried into general circuiation. I presence is necessery only until the leaves and
roots are fally formed, and if, as in the potato, more starch is present thasa is neceessary, it remain Perhaps there are other functions of diastase. hange of starch into abundsnt than this simple and nature seldom allows waste in her operations, It contains nitrogen-derived from the gluten o
regetable alhumen of the seed-and may be tended to contribnte directly to the nourishmen Theserth of the plant.
Agricultural Chemistry-will interest ons youn attention to the sclence. He concludes his marks as foltows:
" How boantifull How boantifully has natare proviod in th
seed for the nourishment of the ponvo plant, ho
carefally the food is stored mperinily the food is stored up for it, and in protected from canses of decayl For hundreds o years the principle of life will lie dormanr, and io
as mang the food will remain sonnd and undimin Whed ntil the time of awakening comer Thong ions of cold and rain, for the food it contains naffected by cold and absolately insolable alled to life by the access of air and warmth, an oned to its aid, and the food is so agent is so o capable of ruinisterius to its early wants. Th moves, by what inlerentent and impartinl force ppearance of this agent-diastase-of which, pre din the seed. At the root of the germ, wher the vessels terminate in the farinaceons matte
exactly where it is wanted this shis exactly where it is wanted, this substance is to or
found; there and there only, resolving and trans and preparing it for being conveged efther to th ascending spront or to the descending root. And
when the necessity for its presence ceases-irhen he green leap bevomes developed, and the roo o seek tood for itelf-then thiss cuiastase disap pears, it undergoes itself a new conversion, and is
prepared in another form to contribate to the arther increase of the plant. angements! - how plastic the varions forms or icely adjusted in time and place its diversitie changes!-what an apparently lavish expenditure
of forethongtat and kind provision, in behalt of BUCK WHEAT-ITS ACTION ON SOLLS. We have had several inquiries relative to th Whilc a large number of farmers do no
hose who have formed an opinion differ mate
cialy iu their views at a late meeting of the oun. Le gislativo Ag. Club, the subject for discus or other - crops, as for Corn?"-and we purpose to
condense and lay before our ondense and lay before our readers the remarks Mr. Ralipir R. Parleps, of Manclester said he He cited a a case where it had becu plauted on one hen the fielld was sown to rye, nud the crop was
rst rate oue. Plaster was used on the rye. would also say of huckwheat, that it did better wit
guspo for nuenure, than ang othe elt Mr. Gregas of Tolland, knetr a piece of land on lars cousenutively, Rnd the lant crop was better hain the fist, Mr.; G. had found that this s crop jef
he soil too fight. It would do well cnough fo sn if the lagn was frst rolled down hard. Ms Foor, of Guilford, had had a very difieren rst gear, lless the second, and very pour the third His soil was ary aud light. With corn as an after
rop the case was still worse, of a crop of cora after backwhest
st the opposite, lu overy particular. His soil wa
site good loamo. Be mannred it with bara.yard ma-
arre, and got 33 bosthels to the sere of good bnckheat, and after uive years of cropping with ontrary to general expectation. further mentioned that he had found backwheat an

Tre accompanying engravings represedt the varions parts of an Improved Fence patented in December last, and a Gate Post patented April $\mathrm{T}^{2}$, 1850, by Dr. Jas. G. HUNT \& Co... of Cincinnati,
Ohio. It. is claimed to be simple, cheap and durable, and may be pat ap by any intelligent farme he featue aid of a carpenter. We have not seen this fence, bat it apparently comprises some palar
 important cousideration with Weatern farmers, and this methood of bnildiag is as cheap and

 , whith with the cap, need be but 3 inches in width. These are conjected together by having an ad between the battens of the adjoining panel, as $\cdot \mathrm{No}$. 1 and 2 , or connected by short boards or
Ottom rails, masy project and lap or meet in the notch in the base of the brace, The snppor

op, and effectually prevents it being bloun over. The base of the brace for \& fence 4 to $\overline{5} \mathrm{ft}$ of the panels, as in No. 4, , or with a short piece of inch board nailed on it, as in No. 3 ; or of 2 X 4 ia. 4ㄴ․ . 翡 "The base of the Brace should staud in stone or blocks of wood, (see cnts,) or be dippert into a prepa
 size of a proposed panel, then put in pins at the sides and cnds of the battens and rails, so that they on them, and the uther set of battens npon the rails. Then drive $a$ conple of nails into each crossing
 hardness having been rem eating.) Drive another nail into each crossing, and the panel is ready to be removed and capped if asired. Make a pattern of the base and gides of the trianfular brace, according to the sizz of the
ence, saiv out the lumber and nail as before direoted. The notch should be slight or none at all "The Portable Gate Post has a mortice to receive the projecting rail of the pane, and strips to the spaces between the battens and rails, (see No. 1,) and when ploned, cannot sag. Cattle Fence ade by leaving out all except two upper rail
of corn. It not only killed

WROUGHT IRON CARS.
Trexrs is now nearly completed in Patterson, N . a first-class passenger car, a little larger than the ordinary size, constrncted alnuost entirely of
wrooght lron. This material is employed to obain grest strength, with less weight tban usnal destrnction of ordinary ears in any kiud of masb. The experiment, whieb is being coudnct-
d oua nuost ilieral scate, and with a view to esablish concinsively the practical saperiority o his syatem, is made at the expense of 3rr. E. Wh Sargeut, a merchant of New York, nuder the patent of Dr. B. J. La Mothe. The frame-work is basket, escb joint or interseetion bing streng aed by rivets, and the whole being furtber por de strong spring of steel. If the constrnetion ans of the track, falls down a precipice, or comes he springs at the ends cajnot aboorb the shoch he car itself will spring, collapse, twist or eruapple p, but cannot break and crnsh its contents with
he fragments. Ono of the great dangers in col Non, we, arises from the disposition of ofdinaly o shat together like the parts of a telescope, and another srises from the facility with which the lops and sidies, the seats, kc., seyarate from the ward with the passengers. Neither of these, no nce to this style of car, which is also mact ghter than the wooden ones, and thns will absor ar less pawer in hanling it. The car is construct ed eatirely of strips, so conneeted as to be practiectly suecessful in practice, and that it may ro olationize the mode of constructing these im ortant carriers of baman freight The principle
 Iron AND Tin in galvanisk - Ordinary tin lloy of tin and lead, with a small proportion of an inony, form a native element for galvanic batte s so stern 23 to be scarcely affected by the platloized silver, at a very triling cost. It is also Gund that iron, coated with an alloy of lead and in in which the quantity of lead is nearly ernal or exceeds that of tin, will answer as well

tile song of THe ANGELS.

 alds and disk ana noisy habung Trook with

 rasas Ginaly frace, one that the mothereseat 1ored broken never feared a frown. Her bair was very

 footprinits were apath of ointeltunent tand happit

 dead MMeror, wose daygher Aucr mas The ineexitit sere in the oren, and the litlo

 deeti Iontt but the will never be good for nin thing at this rate. I almost wish there wan't a
book in the world, except the Biblo, and Pilg grim's Pfogresp, and Saint's Rest, und the Prayer Book, uever did hear anybodysing as bhe does. Mr. Brard says that sang for the thinis of bome great some bod that sang for the queen in London. Well, I don

| mother was alive to tell me what to do with the child. Twelve jears old and ean harily peew a seam, and never knit but two pair of stockiugs in her life. Yee, I mast bnrn up her books, and keep her out of the mendows and woods." <br> The table was spread and the tro wooden ehairs placed on either side of it, and then grandma took her knitting from her pockut, so as to loze no time hefore tho biscuits were done. She did not sit đomn ms was her enstom in her old fashioned rocking chair, bnt plying her fingers busily she walked throngh the garden to the meadow gate, and there ealled out the name of Alice beveral times as lond as sho could. <br> The pure Jnne air, hearily laden with the smell of the new mown hay, eanght the sweet name and swiftls floating down the winding meadow path,onderneath the sweeping branches of the willows, and the training vines of the wild grapes,-past the broad shanows of the oaks and clms, close by the side of the noisy brook, eame at last to a hidden dell, so hidden that even the samshine bed to straggle to get in,-ard there on the soft green tarf, elose to the water's edge,-so close that the ripples were striving snd striving to kiss a pair of little bare feet, they found the lassio in whose ear they were to whisper their harden. Starting at the sonnd, she quiekly litted ber large brown eyes from the page before her, and shaking back the anfettered hatr that had fallen npon her face, she looked ap to the eky, as if thinking the voice lad fallen from above. But the repetition of the sonnd fally undeceived ber, and staring half wildily abont her as her thoughts wandered out of their dream, she slowly closed her book, gave a most nnromantic yawn which aronsed the large dog that was slecping heside her. He heard the third |

eall that grandmother gave, sprang to his feet, and
stand the summons,
Aurce did not obey so readily. She looke
lovingly at the sky, the guarding trees, the langh ing brook, she even pattered the water with he
feet, and took time to wish that she was the little bird that was singing bo sweetly over her head
for he conld be iu the fields and woods all the day; for he conld be in the fields and woods all the day
and aing as long and lond as he wished withou or bringing home the cows and milking them. Yes she did wish that she was a bird, a hrlk thas
sang soaring aud soaring until it was lost in the skr. Ah! child dreamer, you never thoo ght of its
dropping to the earth again! "Well, Bouncer,", said aho, langhing and stroking
the faithfnl old fellow npon his silky head, "what will graudmother say to us to-night, I wonder? It
is most sun-down, and I must go and get the cows and milk thema and take them baek again, besides
ironing np a lot of things before I go to bed. 'This Bnt Bouncer was not at all inclined to be senti
mental, and after lapping a copious dravght from he brook, set his mistress the example of return stringr, and holoing the book sho had heen read
When Atack appironched the garden gate sh saw her grand mother standing there awsiting he
coming. The ehild felt half gullty for the manne which she had gpent the day, yet the deligh were even then whispering about her heart, gave
her a justifieation. Yet the first words she spoke when she camo within her gration half sorry hal were these, acconl
"Do forgive me, grandma, for I did forget all
bont the ironing and everythingo I"ll wash up he dishes so nieely, end get the cows so qnicy randma was locking very sober indeed
"My dear child," said she, laging ber band npon
be rolnme $\Delta$ Lick held so cloesly, "give ane tha ashamed when 1 thisk of the little work yon do Yway yonr books."
"Oh don't, grandma!" eame faintly from the lips of the down-cast ehild-faintly heeause she
Fnew the firmness of her grandmother's determi"I do it for your good, Alick," and grandma" eses grew moist and her rolee tremnlons, "Your
mother woald feel yerg bad werc she living now, of your age she was a good honse-keepere, and made all of her own "But, grandma, thought. Silently she walked hy her grand mother' breast heaviug with the tnmnltnons confict with in. That was a very sad commonion with her u tried heart.
Afler tea, away, Alice called Bonneer and they started of Cor the cows. She did not trip lightly aloug
warling songs with a sweetness that the will hirds might envy, but her step was heary, and her yes, when the tears did not bind them, saw only
he path at her feet. Once or trice she ventared to look op to the sky, bat the weight of her nn-
attered sorrow bowed ber head npon her breast again.
She mast needs cross the epot where she bad whiled away her afternoon. At first she beemed
intending to avoid it, and reluetantly her steps withdrew from the well known and bejoved paty.
hnt snddenly she stopped short-a momeut'u inde. grove with the lighteess of a fawn, and springing npon the soft turf only to throw herself npon ber
faee and give way to a wild and passionate floo of taarg. Bouncer followed, and when he saw her lying thns prostrate, and heard her violent aobs
he drooped bis shagey tail, and with au air or deep concern rnbbed his nose seross her neck and The brook chunged its laughing to a sad murmur, when it heard its playmato sobbing so bitter Inlly as they evor bud before, fluttered aronnd their resta, and chirped most like a wail. The
trees waived their boughs monrnfully, and only
the clear blue sky remained nochanged, it con

| sweetly up to it. <br> Only for a tew moments did Allog lie npon free, bnt within that time she suffered more th she cver had before in all ber life. It was her keen realization of ber existence, and the cla ished hopes and aspiratious that,-born in soul, planted there by her Gor,- -had been grow nnthwarted until, to yield them up, as othing which she had no rightfol olaim apon, and to plant them by something foreign to their na and her orno, was a blow that has staggered sbattered many a riper heart, and fon grant little Auce to bear it. |

## WORD TO THE BOYS.

Cows, Bnys, aud listen a few momenta to yon most begin to thifik ahont doing something for ourselves. The first piece of adviee I have for here is but littlo danger of your beeng too partic alar in this respect, Ahight line on his slate, will be very likely to gake a straight line through life. There is $\mu \mathrm{p} \mathrm{p}$ to be as exact as possible. Step into a jeweller' bop, and see how carcfnl the workwen must he j Visit a ship yard, and the man with the broad axe
nst learn to hew on the line or be diamised. Yon think of being a clerk. Well, remember thu
a mistuke there, is little less than a crime. Ineve law a man who was very partieclar about his a
irs that was not successfnl. How exact is the militury officer in the command of a body of men
a ship.
But there fo one great danger which beseta man young men at tho present day. It is tho disposi-
ion to avvid all solid fimprovement, and take un with sn njects that require no thought, and which
erve as mero excitegents to the mind. Your old er friendstell you that boyswere very fast boys long
hefore you were horu; tut they never wadu soli before you were horn; but they never wade son
aod usenl men. Tery fow of them ever lived to be forty years old. Nobody ever trasted them.
They never filled any important oflice or station. They usually became small men, becauze the
ad no capital in their heada with which to worl bad no capital in their heada with which to wor
ont a living. Out of fifty of that class of fast boy do not know of one who ever aecomplishod muec
s yon sow, so shall you reap. The boy who speud his honrs late and early at the card table, howling
alley, or tavern bar room, is learniuy nothing nae. fol, but wurch that is injurious. Listen to sucl
men as Ancos Lavivence, Thomas H. Benton, Danl Webster, Bendamfu Franklin and Georyo Washing these things, and swed their greatneess to thefr at tention in early lifit to wbat wonld be useful to them.
n'his may bo a hura lesson for yon, bnt it must ho studied, and the earlier in life you aeqnire it, tho betTranscript and Ectectic. Wht clul?", "Sond it to tho editor, of course." for?" "Cause he says if unybody will send hitio a mothor came near faintung, bat retaiucd conolons. ness to ask:-"Bnt, "'ommy, what do you thiuk be wants with a clah?" "Well, I don't kuow," re

MOORE'S RURAL NEW-YORKER, Agricoltural, Literary and Family Newspaper, CONDUCTED BY D. D. T. MOORE,
WITH AA ABLE CORPS OF ASTISTANT EMTOR

PROPER TLME FOR CUTTING GRASS
DISCUSSION BEFORE THE U. B, AG. SOCTETY. Ag. Society, last wect, scveral discnysions of sere
annonceed, bot tin consequence of the heat of the weather, and the fatigne of oficers and others in
attendance, cormparatively little interest was man. ifessed. We give below the snbstance of the
principal discussion, ns reported by one of our
 Wras annoanced to deliver a Lecture on the "(rase-
Ees, Froper Time of Catting, dce:" The weather
belug exccedingly belug exceedingly warm and the speaker mach
fatigned by the labora of the day, it was proposed that a general conversatina he had on the qnestion.
Mr. llownan opened the discussion hy baying that the sabjcct was very importnot, as the hay crop
was now one of onr most valuable products, and
it wras well to koow when to cut thend how to make it Wo shonld first gettle the principle, what is the
best condition of the grass for cntting, and why?
He believed all planis contained the most nntritive matter when in fall bloom. The okject whioh na-
tare seekis is the prodnction of seed. Plante when they frst come from the ground contain more wa.
ter than at any other time. At llowering a crisis arrives, and all the energies of the plant from tha seed was songht it wonld he well to wait until it
riponed or matured before cuttiug, bat as herbago is sought in hay, it should he cut before the forms seed in a anillion beiog digested in passing through in the formation of secd is lost. Tinnothy, and all grass shoald he cnt when it contains the greatest
amount of natritive matter. Convenience, and
and ing out this mrinclple. For instance, Timothy is an imperfeot pereminal. Fnrther snonth it is in.
certain in endunance. It is fonnd neceessary to allow the seed to matare, so as to beep the groun triment contained in grass was ascertained by the srow and others had proved that test incorrect and indeed Sinclank had not mach faith in it
himself. As to the mode of curing, he conld call atten-
tion to the neethod generally practioed of preserr-
ing herbs. No one wonld think of drying them ing herbs. No one wonld think of drying them
in the suna, or where the dev and gain wonld fall on them. So with grass, cut when dry, dry it ns
littlo ns possihle in the suu, aud let it care ky
sweating. A certain degree of decomposition is reeating. A certain degree of decomposition is
beueficiel, turufag tho starch into sugar, and making the hay more tonder. In answer to a
questiou as to the value of hay capg, Mr. How ArD tatod they were nsed or hay Mr. Viok Snquired if any better test of the valuc
of grass as food had been dlacovered than the proportion solnble in water. And, also, whether the oxperience of the farmers present wonld go to
prove or disprove the stitencuct of Mr. How wro, In flower. He cared little about the theories of Mr. Jounspex, or any other chemist. Thla like all other thitugs in agricalture, mnst bo proved by re-
peated and oareful experinenta. He would like Mr. Whisox, of lowa, give the experience of neighbor, who raised nud sold great quantitics of
hay. 110 always cut when in always prized and sought after by the proprietors of atages, aud he got tifteca per cent. more than
the ordinary prico. ghowlog speeen in in of hudson, N. Y., made and the donbte attempted to be cast upou the

| liability of chemical experimente. The matter of | $\begin{array}{l}\text { quoted on the one side, it will not be inappropri } \\ \text { which onr hodies is composed now is not the same } \\ \text { ate to give the views of eminent chemists uro }\end{array}$ |
| :--- | :--- | :--- |
| ath |  | as that which composed them ten years since.

constant maste is taking place. Chemistry show 3 what plants can sapply that waste.
Mr. Vtcr did not design to sttack chemistry
hemists; but he did think theories fonnded o chemical science, unsupported by experiments,
shoand be received with cantion, antil proved or
dopro we need do to grow a certain crop is to find its mineral elements, and farnish the soil with these, nd snc cess, under ordinary circnmastances is cer.
tsin. This theory, so confidently advocated fo lany yeare, I suppose it will be admitted, ha
been proved false by expcrience, aud tenerally Irr. Gous, of Connectient, stated that in the Horth there is no dificnty in raising good Timo math, and is hetter the next gpring for being so out Hr. CAPRON, of Iilinois, thought if we would fol rase larger crops, and clueaper than we now do.
Mr. Vice tionght that as there was a good deal difierence in the theories of agricnltaral chem which. is right, before uadertaking to followe either.
Mr. Worruinoiros, of Dhio, hai a differens ox. cience to relate tban that espressed ioy soma thers The seed, it is true, dooses not digests but
is so small, it proportion to the whole plant that bat lititle of the enatriment of the plant chas be thought, came from the soil, and not from the
leaves and steas of the plant. If the geed should leaves and stem of the plant. If the eee3 should
be ground it wonld be of but little acconnt. Gor lster; aud sounetimes is troublezome, if the weather is nnfavorable. My experience, and that
of nyy neighbors is, that the lest time to cut Tim. germinate. We have all tried cutting in t ower, and sbandoned it. Catting in flower in
area the roots, and if continued, destroys on neadows. Prof. Kirrisasis has made this question ound that the best time to cnt is when the stall decomes dry at a point above the first or second
oint of the stem. If cut earlier than this, the oots send ap nerv stalks, snd therehy becon Mr. Howarn relied for his statements on the e ons of chemists. The question raised hy the gen theman from Rochestcr, whether the esperieuce of
armers agrees with the theories of chemists, is certainly a very important one. Joan Jousssox,
of (ienera in liscussing this his zeighhors, agreed to leave the question with lock of lambs, and they soon decided it, hy eating ap clean that which was cat in Hower, but of the Mr. Hunses, of Illinois, had fonnd that the best arliest hearls was falling. Experienced the same ifficulty as Mr . Wokthivarox whlth the Timothy dying out; and the only way he conld preserve
his meadows was to dras them in the spring hich seemed to furigorate the roots and gir

 he votary of pleasure, as the still smnll voice of
onsciencc whispered that he was perilling his immurtal soul for that "which satisfieth not."Alas! for the norrow, to him it never came; "thas aight his soul was required of him. te in reply to the plcadiugg of his wife and fami1y; but that ulght reason tottered on ber throne
and the morrow found him a raving wadman. "I will arise and go to my father," said the un happg prodigal,-"tomorrow I will confess my er-
rors-1 will say father, I have, slnneü before heaven and in thy sishty, "- but
dawned his father was so mort.
"I will eertainly give up my evil associates; co such was the resolve of oue who had fallen bad company-bat that nisht, maddened with wine
and infuriated with anger, he lifted his hand and ainst his fellow and the mark of Caia was on against his fellow, and the mark of caja was on
his brow. "Whatsoever thy land findeth to do, do
it with thy might," for who can tell what a day it with thy might," for who can tell what a day
may lring forth.
Mrs. Pivsler.

## TEE USES OF HOME.

Whrae lie the clearest proofs of a heaveuly watchfuluess over our heads, if uot in the shelters
Where we lay thoso heads at wight? Consider
whatsecurities bome aftections bind about tempted virlue; how the man of business carries a zone of moral parity woven about him by the caresses o
children, from this hounse to the market-place; how the false sud frandulent purpose, half conceived in tho counting-room, is rebbkeed and put to shanne
by the invocence tbas gazes iuto his eyes and cline inuocence thast gazes into his eyes and
clists nect when he goes home and shots the door on the world at night. Conside
what a hindrance houschold love interposes to stay the erring feet of dissipation-what a triple
shield it holds ap agaiust the sins of prodigality, indulgence, or dishonor! Consider that with mos of us, whatever impulses of generosity visit the
soal, whatever prayers we breathe, whatevar holy soul, whatcer prayers we breathe, whatevar holy
vows of religious consecratiou we pled ge, whatup within the sacred enclosures of the house! Consider how the mere memory of that spot, with
all its precions endearments, goes forth with the all its precions endearments, goes forth with the
traveler, zails with the sailor, keens vigils over the exposed heart smong the perils of the foreiga city sweetens the feverish dreams and softets the pain of the sickly climate, and, hy calling his love
homeward, calls his failh to Hcavcu! Consider that the difcipline of disense, the purification o bcreavemont, the tears of nourners, aro all ele-
mentin tine samctity of hiome; that colosta oi de.
votion are parts of the arolitecture of the house; that Bibles are opened on its tables; that the ege are dramu in its chambers; and that the dead body is borue ont of its doors;--liow fast do the
gatheriug proofs accuandate, that the human dwelling is a sanctaary of the Most High!-Hun
tingtorn. ting goto.
Do not Condmas Hastine. - Be pationt with
yoar erring brethren; for God is rery patient with Your erring brethren; for God is very patient with
yon, aud it is your daty o imitnte your Father in
Heavcu as much as possille. For one or two acts which may be proved to bewrong, do not coodemn and cast ont forever a brothcr heloved. Yon mas
not anilerstand tho whole case, and if you were faithfully and prayerfolly to wisit that brother, and
latbor with that brother, 的 Christ Las labored with you, ho might be saved. Ne connot always see
ioto the heart, and oul juderent iato the heart, and oar' judgucat would hicrlaps
be condemned as olter as apppoved by orr Savior. Ynstend of casting stoncs at nu individual, we
would often, if wo knew and felt as Jesus does, sympathrylugly say to the erriug, "Go and sin no
100re." We are uot called npon to exercise judg.
ment Lass Worvs or Presibgnt Edwazds.-When
tho great thoologian was ding, having taken leave
of his famaly, ho looken about aud said: "Now,
 fathog friend ?" and so he fell alleep and went to
the Lord ho loved. How uufaling is the iustine which leads hle pious heart to cry out for Jesus in
the lust hour! The mighty intellect of Edwards aiter all itsacquisitions during a life of nuefulness,
manst then lean opon the manst then loan opon the savior's arn with tho
same helpless depondence as a young child jnst able to syllable that precious name.

propos-we qnote the following from Moors ncyclopedia
Pisso Forte. The tone of this wocld select a pends almost wholly apon the seasoning of the sound-board, which shat part of it catred sprace, or pine, similar to that used in the apper
side of a violin. The case, too, has some influeace apon the qualits of its voice, and the mechanical part shoold never be lormed of green wood.-
Therefore it is always best to purchase an instrumeat frow those factories whose means euable them to expose their materials to heat and cold, in fact to all vicissitudes of seasons, for sears to
gether. It is most importane that the wood forming the block upon which the wires are strang, should be thoroughly seasoned, as it is termed, for if natermpered timber be used, the instrament no
conly will not remain in tuue, but the quaslity of the masy be a 00 artisan, bot he canot prodnce man erery respect a sood or durable piano forte.-
Moreoser, the shave or the fosm of an instrument has something to do with its monsical qualits. To piece of furniture, it were well to recommend the
rarions modiūestions of upright constructions in arions modiutestious of upright constractions in
handsome cases of mahogaug, rose, oz zebra wood but to the mazician, amatent, or urtsts, it would b bettc: to advise the choice of a good equare or
grand piano they have better tooue, are more
durable, and their action is less liable to be out of

In the machine-room are also made the "bot-
toms" of all the cascs; these are constracted in the most thorongh manuer, and as all the raterials
have been seasoucd for years, they cannot be affectby any change of climate, or yield in the least to
the tension of the striugs, amounting to several ons,*
Nor step upou this platform; we sonet a leve in the midst of the busy occupsiag three adjoining rooms, giving an ag-
gregate length of $17 \overline{\text { fen feet, each of which is fur. }}$ nished with its steann ovensas glue -beaters and ererg
facility lor carrying on this bravel of the business In all its forms, from the plain "square" to the most elaborately carved "grand." The rim and
top of the case being mado and veneered, they
are fruly secured to the bottom, braced and
bloced tithe are friuly secured
blocked in the strongest possible manaer, when it
is ready to receelve the Soundiu. Board and Iron Frume.
Botr the volume and qnality of tone, depend to Both the volume and qnality of tone, depend to
sogreat au extent upon the sounding.board, that
it is justly regasded as oue of the most Inportant

It was formerly sapposed to be necessary that this
shoold be made of "Swiss Fir," but while the Sritish perts were closed during, the revolationary
Far, necessity obliged maliers to try the American white spruce, which was found equal in all respects to the former material. In this department Moesrs. boardran, Gray \& Co. have applied one of the
most aluable of sill improtements in the piano forte, by the introdnction of their pateut which adds one-half more vibrating garlace to board, thereby largely increasing the volume of
sonnd, while it gives a pecaliar, bold distinctness

A nother very importaut advantage derived from the nse of the corragated board is, that as from its peculiar construction, it cannot warp oat of shace, it entirely avoids the dauger of spliting Thus it not only adds matcrially to the quantity nd rood qnality of the tone dot hlso renders the piano forte more daralle and less liable to be
affected by any changes of temperature or olimate. affected by any changes of temperature or climate.
The cut gives quite a correct representation of a piano minns the striugs, with the frout portion of the case and iron frame cut awas, shoveing tho oughly tested in the manuficture of over 1,500 o
 in 1855, and has received the highest commenda. tions throughont the United Statea Now that the sounding-board, with its graceful miuiature waves, is properly placed so as to the iron frame is to be fitted over all. Here the iugenions skill of Messrs. B. G. \& Co. is again displayed in a recent invention, (secured by letters
patent anpliec ior, ) by which the nassioie iron frame pateat, applied ior, by which, (1) masvide ironframe

The only arisen from the deadening effect prodnced by the partial resting of such a mass of metal upon ta sounding-board. This new improvement, cowever,
entirely obviates that difficulty, as the fron frame is suspended from the bottom of che case, by bolts of pecoliar construction, in such a manner as to
sustain the immense strafin of the strings with the utmost tirmuess and security, while the sonnding-
board is left perfectly free, and also gains in board is left perfectly itee, produces a mach more pare, fall, and rich quality of tone than is possible
when its power is limited by contact with the when its power is limited by contact wita
heary mass of metal. The fron frame havina been frundy secureã and coma which are of the tinest steel wire, highly polished.

## 

SEASONABLE HINTS．

To illastrate the process we will take the Carna tion for an example．The ground ehoold be nicely
spaded ap around the plant and raked off amoly Then rafe a aray the earth a few incles deep in the
form of a trench，in＊hich to lay the lissnch． Next select the branoh you wish to layer，cut abon one－tbird throngh it，tnru the koife and alit the
branch about aa inch toward the point．Then pes down the bruach with the slit open，ss shown in will be thrown out freely at the point where the
branch in cnt，nud each lager will form a perfect
 s．the ingertion of the bad must first be removed， 80 as to secure a clean place for the work．
When all is ready，make two incisions througl the bart，in the form of a T ，as shown in fgure 1
Then cut a lod from the＂atick of badas，＂In the form of fig．2．This bud will contain a small por
titon of the wood，which may be remoyed If sep arates freely，if not it may remain，In removing
it，however，asre mast bo exerclised，so as not to injure the root of the bnd．Reise the bark arone
the incision，as shown in fig． 3 ，and puss the bud down，and cat it off square，like fig．4．Then ban－
dage caref fulty with bass mating，basswood bark， or corn husks，as shown in $\mathbb{I g}$ ．5．This keeps the bod firm，and exclndes the air．In from ten to
twanty days the growth of the tree will cause the
baudage to cal the hark，when it manst be removed
 The bud remains dormant uutil the folliowing
spring．Plams perfect their bnds earller thau
most other trees and are therefore budded first， cherries follow，afterwards peaches，apples， extends tho budding seas
of July to late do August
Strawberry beds should be cleaned of weeds that
have grown during bave grown during frulthe，and the runucr
shonla be cut away if the bedse are new，if old its of the olu plania，and allowing the ronners to main．As soon as the ronuers are well rooted new
beds unay bo fortucd．Select clondy，Anmp wenther be dag deeply and well manured．
As boun as the fruit is gathered，the old canes o
the Raspleary that have borne this year shone cat ampay，as this gives the new caucs a better
chance to ripen．
The withered dowrr ste my of herbaceons playtu
 plants shonld now cover the eutiro bed， 80 as to
entrely bide the soil frum view．Annula will soon make the garden gay for the remainder of the
season．Secds of afl flne thinge should be caro－ fully saved as fust as they ripen．

giant of battlefs rose．

Perhaps another season may prove this opiuion
incorrect，and if so we will make the amende hon－

|  | incorrect，and if so we will make the amende hon－ orable by giving a partrsit of the flower． <br> The Giant of Batues is of dwarfish habit，hardy， a constant bloomer，as ia farorable sebsone，whan well treated，it is scarcely ever oul of llower from Jece to Octoher．Oa this poiat it will perhaps be well enough to give a hint．The Perptual Roses will bloom constatels if they grow constantly，and not otherrise，as it is on！the foang wood that bears the dowers．To keep the piants in constan growth，then，it is necessary to have a very rich and deep soil．One ball sod from an old pastare len：suil for roses．There is rery little canger of getian the soil for roses too rich，and there is rery little pleasure in growing them in a poorsoil |

Passport, leaving the most important port Passport, leaving the most important portion be
hind. We had macec considerable speed beneath the pelting rain when the loss was discorereã and
wo at once retraced the distance. After a little delay, the precious document, which had all the way been watched more constantly than the few
Napolems in my wallet, was returned, somewhat iujured by the carcless hands through which it had passed. It was a timely hint for cantion in
future; for had it disappeared altogether, my stay in Florence might have been brief. Not only is a permit necessary to eater the city, but if if forty.
fighth bours after, the Passport is not sent to the resident Consull, who returns a certicicate for resl-
dence in its stead, the onfortunate orvuer may be dence in its stead, the onfortunate orvuer may be
ordered beyond the walls, or otherwise sulljeeted to trouble by fine or imprisonment. Notice must also be given a few days before departing, when
twe certificate is exchanged for the Passport, toe certincate is exchauged for the Passport,
whish mnst report the place you next wish to visit
So strict are these regulatlons evergwhere, that So strict are these regulations evergwhere, that by
searching the reeords of this peculiar form of Na-
tional Government, parents have fonnd their children who had been lost many years. Thus after a lone, safe and pieasant journey I
reached the friends who had invited me to a for eign land. I fonnd them oeenpying a suite (gswect) Santa Maria Novella, near tho noted church which
gave name to the pnilic छ!nime in front. The honses are generally in long blocks, bailt
of brown stone, and very high. The elimneys are not squqre, but irregular in form aud fantastic
in appearnnee. Throughout the eity estengive accommoiations are made for visitors. Пundreds of buildings arc ready furnished with every articlo
for hoose-keeping, Meals can lue prepared in the
familly, or obtained at other places. family, or obtained at other places, This mode ef
livlng, even for a few weekr or monthe, le the most indeperidear, and of course generally preferred by
Americans. Great decision and watchfulucss are
necessary in making bargains with the necessary in making bargains with the crafty
padroni who are generally females. In renting
apprtmente, an io rentory of every article, of how. apbrtmente, an ioventory of every article, of how-
ever small valne, shonid bo talken in the presence
of disinterested witnescos of disinterested wincesses, and every item com-
mitted to paper. And often when the contract is
weing diawn, steal some articles for which, in the settlement, the tenant is chargod an enormous price. Many Italians doem it a privilege to outwita aforeigner, while many foreigners in turn think it no disgrace
to lay aside every principte of honor and humanity "Sonny ltaly" broken heartcd people. They go to "Sanny ltaly"
in the wealth and pride, and selfighness of mose

UNIVERSITY OF ROCHESTER.

The Screnth Auni cresary of the Theological
Teminany was colebratod in the First Baptist Churci on Thesday morning-the exerecises con-
sieting of orations from the frasanting Class in Dr. Ronis soo. The Gradatiig Class nnmbero
thirtcen, the following named nembers of which

On Wedues ${ }^{2}$ ay niorniug, July stb, the nsnal pro
cession was formed at the University Building and the line of march taken for Corinthian Hall, which place were delivered the orations of those composing the Gradnating Class of the University.
The class nnmbered twent5-one zsembera, all of
Mater.
The Baccalaureate degree, in course, was con ferred upon cighteen yonng men, as follows:-
Throdore F. Baker, Norwalk, O.; Jares D .

 Brllasy, Newark, N. Y.; Tisotiy E. Ellisworst
East Windson, Conn.; Coblas T? Gardngr, Roch ster; Julues R. Hogins, New York; Join R
lowarn, Brooklyn; Narclsae Dural, Grand

 The degree of Bachelor of Sciences was con
ferred upon Datru Hbsky Semidox, Facine, Wis. Yraac Eslegeck Eubldon, Nety Yortr, and Georob
P. Dramer, Claremont, N. H. upon the following members of former gradnating
classes:-J. O , MERRILL, N. J.; J. M. BAOLET, III. I. C. Bardes, Eben Neshitr, New York; W. CTERITT, Brooklyn; A. J. Barretr, Nunda;
CAR M. Hows, Ill.
 Tessa, A. Ms. Joun Albor Kiro, Governor of th
Stze, LL. D. Rov. Tens. EFANS, Scarlorong England; Rev, War. Croweli, St Louis, Mo.; Rer.
E. J. Gma.ErT, Presidcnt Yellow Springs College - Both Institutions-the Theological Scminary
and Univcrsity, (one purely Theological and the other Literary, though wo blend the exercises unrenience, )-are we vcliere in a highly prosperons snpport of the friends of Theological, Literary and Scientific Edueation.

THE SCHOOLATASTER-wHERE IS HE?
Eds. Rural:- - hare been disposed to nsk yonr
mighty inflncnce in aid of the schooimaster. His mighty inincuce in aid of the schooimaster. His at the ontrage committed in this one violation al loded to. It is the separation of those who bave
always been anitcd, and had pormed an inviolable nnion. It is anti-grammatical licentiousness. This a very insigniticant agency, even of an aderb. achoolmaster answers, to write, to speak, , o print,
to have loved, and the grammarian echoes this has been correct ecer since a Sason lractuled, and
must be cortect so loug as an Anglo-Saxan shall speak. 20 serice is the prescut intinitive, and Who dares to maintain or to act otherwise,
thanders out Jonssos, and Wather, and $W_{\text {Ess }}$. sither or all of this trio of grmmethl nores airc the violators of the rale, and are turning the
antultivo mode "upside dornu." They say, to benutifully write, instend of to wrlte beautifully to rapidy print instend of to priat rapialy, or of to have loved tenderly. These are specimens
of this forceful and abominable scparation. 0 , of
shades of Anglo-Saxon beauty and propriety, dis-
Own as brethren or children the lawless violators! Messrs. Eds, I was aboat to appeal to you to the gaments of the luash are spotted with the Prof, MAvRY's article is wholly free from any snck Abuse of our angange; he loves the truo Anglo
Saxon too well to allopt a corruption. Loook at read "to thoronglity coultivate" " "to flectually pulveriza," it the ery next, liuce. Thess are
enough-far too many for tho correct and tastefal The pullic prints often riolate the rule. The $\pm$
aymawis elder people have traln and tnried of thonght that to put into our
heads before.

## 

Asiae from the unture of the sounding-board,

The amonnt, varicty and expense of materials
used by Boardman, Gray \& Co., is somewhat snr-
prising to one not

tems worthy of special note, prominent among
bich are two buge patent Planing Machines, Which are tro buge patent Planing Machines,
which will plane Inmber three and a half feet wide, and of any thickness. Also the canrious and ugly in the gracefally carved "ogee," "faucy wave," or
any other desired form, ready for the veneers
which are carefalls bent to stape while hot, and applied to the snriace of the bodies with glen by
means of "calls" or blocks of rood cutout exnctly means of "calls" or blocks of wood ant fate ned with
to fit the sulfice ote veneered,
hand scrers. $A$ sonly one surface can be reneered at a time, and each diflerent attle of leg bas many
sides, this reqnires mnch time ano labor. The
reneering of case tops, is accomplished by the
nse of a "Tor Veneering Press," made to ooder io
3fessrs. B. ©f. \& Cor, on the principle of "Dicks Patent duti.Friction Press," and we think it is in mensely powerfnal, for with two men at the crank
a preasure eqnal to ore hundred huns can be pro We mast also glance at the mannfactnce of the beartifal scroll desks.
The "dest-piece" is of three or fort laicknesses so glned together as that they canout split, after
which they are reneered, raryished aud polished, which they are veneered, rarnished aud polished,
before being bawed in the form in which we see
them, which is done ky the " seroll saw" in the
 the joints in the top, applies the hinges, locks, eas
tora, and sill the minntire necessary to complet tors, and sil the minntix neccssary
the external part of the instrument.

piazo fortes are constantly in process of manufa
we may at ang time find from 200 to 20 cases
hese rooms, besides lundreds of lytes, legs, top
these rooms, besides sundreds of yres, tegs, top
desks etc, ete. In the varnishing, as well as is
every other part, no pains are spared to arrive a
near perfection as possible, and each case receiv
with ground pumice-stoue and water nitil a fin
polish is obtained. A large machine driven b
the engine, is nsed for rabuing the tops and othe large surfacea. It now receives the last cos hardened, is polished with fine rorten stone, any
mirror.
We are particularly strnck with the perfectio
of systematic arrangement in the large establis
 trenty fnor or more distinct trades, and with this
systeus and dicieion of labor, esch workman is enabled to bring his own part to greater perfectio
than would otherwise be possible. The good resn
nense cquntitities of roserwood for veneering and other purposes, are used ycarly, the latter of whic eing of the richest figures, is very expensive. So with the ivory, cifferent kinds of prepared
loth, bnckskins, eto. The amonnt of hardware nd of "twning nin" 3. Then there are thards of one and a bals of hinges, screws, pedal-feet, 10 cks , pins, gprings, onstantly on hand; the ontlay for their stecl mu rire alone, a
Every portion of the vast bnilding is snpplied with water from the city water-works, and provid We notice also two large
hich are ingeniously constrncted in such a man er thata person on eitber floor, or on the platform, snficiently large to carry a piano with workmen and are eminently entitled to the appellation abor-saving machines.

SCIENOE OT plaso forte masivg. with all its complicated mechanism, shall be of the most faithful workmanskip, and of the best possi. ble materials, anless the scale, which is the starting
point, be correctly laid down on scientific principles, with the ntmost nicety and mechanical pre-
cision. The length of eacio string in

## proportion, the best shape of th

## be determined from numberless carefnl

 experiments and mathematical calcola-tions. Messrs. Borsdman, Gray ic Co., tions. Messrs. Boardman, Gray is Co.,
nse improved circular scales of their
own constrnction, in which they have own constrnction, in which thes bave
embodied all the improvements which
have from time to time been discovered. Lave from time totime been discoverea. In the management of this immense
bsineess, the frmm avail themselves of
from the adivantages arising from a systematie division of labor, and each member
of the firm has his own appropriate
sphere, for which be seems preënizentsphere, for which be seems preemiaent-
ly qualicied, ana to which he may
rote bis entire energies. Mr. James A. Gray gives bis personal attention to An entire snpervision of the manafacturing department, sele cting materialz, , inspecting
each instament before it it is permitted to leave the
factiry factory, and watchiag with an artist's eye every
opportunity for the least improvement. Possessed of saperior genias, and having made piano forte
mannfactro the stndy of a lifetine, be is a most thorough master of his vocation. The department of finance is under the especial
charge of Mr. Wm. G. Boardman, the senior partner of the firm, while the janior member, Mr.
Siberia Ott, attends to the sales, accounts, shipMesar Messre. Boaruman, Grio s o. Lave, by the integrits, achiered an enriable success, and while they liberally compensate their workmen, wpon
the Scriptare principle that "the laborer is worthy of his nire," they reap their remath in the rezewe Theg are constanly introdncing new improre ments, and the demand for their Corrugated
Sounaung. Board Piano Fortes is so zapialy in reasing, that a farther enlarzement of the
immense manafactory is neceessary, for whic fring proof of the snperiority of Boardman, Gray \& elegant spukres and magniicent grannis have been
scngbt for and pnblicly ased, not only bo the firs of American pianista but also by nearly all the Thalberg, Gottschalk, Willism Mason, Strakosch, ane borne pablic testimony to their great
have

ad acknowledged merit, in the most flatering Messrs. Bocrdman, Gray of. Co. are at the cor wh of state and North Fearl ctreets, Ab any,
where one or more of the coantous propietors
may tho mas favor them with a vistt, whether for the purpose of purctasing, or only to gratry ing of listening to any of thei: arperband तo
Piano Fortes.-Graham's Magazine.
Tus arctic firmament. - The intense beant of the arctic firmament can haraly be imagined. nified in glory, and the very planets twinkling so mucl as 10 bame the ooservations ohen the lifo
mer. I have trodden the deck whe
earth seemed suspended -its movements, sounds, its coloring, its companfonships; and
looked on the radiaat hemisphere circliza abore me, as if rendering worship to the naseen Centre
of light, I Lave ejaculated, in humility of spirit, "Lord, What is man, thast thon art mind ful of
hian?" And then I have thought of the kindly
World we had left with it serolving sunlight and shadow, and the other stars that gladen it in
their changes, and tho bearts that marmed to n there, till I lost myyself in memories of those who
are not, and they bore mo brels to the stars again.

## KORACNE ORHED

PROGRESS AND IMPROVEMENT
YOL. YOOX: NO. $3 \%$.
ROGHESTYR, N. Y.,-SADURDAY, AUBUST 8, 1857
WHOOLCNO. 396

| MOORE'S RURAL NEW-YORKER, <br> Agrieultural, Litcravy anid Family Newspaper, CONDUCTED BX D. D. T. MOORE, <br> Thatad Afiru-2 <br> PRODUCTIVE LABOR. <br> Reasor as we will the impelling power in the accomplishment of auy design is revard. A re- turn in some form is what actuates laborers in all conditions of lfe, and anid the cultifarions em- ployments pursued by tho human fanily, the proyments pursuled by tho hursan family, the graulfication of gove peenlinr development of mitut, os the supply of some want, is the incentive that inumbiks the bail-worn nul? urafs tho task to completion. Were it nut for thits " meed to be Wou," enterprise wonld lie down and die-the enl- tivated filds become desolate, silence broode where now is heard the hum of the bnsy wheel and the click of tiee shuttle, ships wonld rot and ocean inling the hnman face, would reigu supreme. We prate sbout the "Infringement of onr liberties" when we discover, or think tre do, some aggrcssion, but if ever any one shonid endeavor to Wrench from the peonle the liberly to labor, the pe- riod has then arrived to iroy :lll worde, aud pat in play argaments noted for the proclivity to horlwhich they aro brought to bear. <br> Work is the riecessty of a heallhy man and one who wonll remain so. Physical gtrength is given ns to use, and mentul power is furnisiod to guide and dircet that we be not "hlind leaulag the blind" ana mecting with the fate inevitable under snch circumstances. Work is to a commannity lehat the heart is to the physical system-the ensine which not ouly glres circulation to the sources of life but prepares them for usa by ahstracting whaterer is pernlcious and infastug whatever is needed to sastain, fuvigorate and fully devolop. The edict "In the sweat of thy face stalt thon eat bread" has proved to man, coustitnted as he is, his greatest earthly blessing. Wreo it not for his opportunities asd capablities of performance, the hlock of marble fishioned ynder the chisel would be his poet. For all mand lute, ts, or will be, he is indebted to toil. All the acta that have blessed gulded aright, and though those that have shed banefnl litlincnces had the same great origin, right motives and right euds directed them nangbt. motives and right euds directed them nangos. The farmer amid the class of productive labor crs standes pre-eminent, atud in his peculiar rocn. The mechanio nuay go back, tear down and rebnild, without more detriment than mere loss of time; the farmer, if he mis-directs hiz energies, wastes not only timo and toil hat the resplts thereos. The princlylle inculcated in the aivice of Persase at Banker lill-" don't fire "till you ste the whites of their eyes"-is one worthy of tudy, there shonid be no waste of ammunition. From the turnlog of the furrow to the marketing of the produce erery the best tools the best work can be performed, and Wherever the best labor is given you will be suro to flad the best returns. <br> Anoticer requitio <br> tire absenco of brakes or hold-backs when en. prosccution of any undertasiug is de cided upon. ccess many bo taken, bnt the result may turn npon that isolated point. A striking illustration of this fact was okserved a fow days since while on a trip through tho Gencee Valleg. A friend was pos. sessed of two pieces of whent-forty and ten nero a number of years and had done what was In hils power tu render the suil fertile by mavure, draiueverything, except draining had been givou it with the hope of prontahie crops. Equally care. fol in the preparation of tho land, Belectlon and |  |  | the crowd, broken np into little knote, some dis. cassing the prospect of the crops, or the best hreeds of sheep, or cattle and horses, while occasionally an old veteran was giving his experience of the hardships of the pioneer, and the great contrast whicl is shown between the conntry to day and as it appeared twentr-five and thirty little grove partly natural and partly artificial, and in front of the honse, a long table was being spread and preparations making for $\frac{2}{}$ sutgtautial fcast Unfortunately for the comfort of the bogtess, just before placing the vistuals upon the table it began to sprinkle, with the premonitory symptoms of a hears shower. Tables were soon extemporized in were invited to seat themsel res and partake of the bonaties beaped upon thens. My hangry reader, if in your memory there lingers any recollection of the last Thanksgiving or Caristmas dinner, then I need not tell yon of the roast turbey and chicken ple, and all the appropriate secompani ments which loaded the tabies, nor with what rapidtsj they disappeared. Four experience is better taan my pen, and I leave yon to your im agination. After all had been fed to tieir ntmost desires, the company assembled in front of the piazza, and was adcuressed by several of the gentle men present, and hearty cheers given for Mr. and Mrs. Lanodon and Mr. and Mre. Stew Art, with a these annual festivals, which aforded so mach pleasnre to their guests-of which there were some two or tliee hundred present. <br> The company now adjonrned to the shearing fior, which hall been swept ont and putin as good order as a barn floor could well be, when the dan cing commenced. I obtained a partner, the ac- quainternce of the honr, and may she nerer in her Cons of tif have onglivine to gise ker greater heaaled man for a partncr. I went through toe mazes of the cotilion in that hard, with its large declining san and the cool, delicuons breeze, for the rain was over, with as mech zest and pleasar rated by tho iavish bands of wealth and art. Pleasare is always neaz ns, it we do but possess the awas, which was before sundown, the youngsters scend enjoying theniselves in the highest degree Commend me to thifs sind of sheep-Ehearing. Care loses a wrinkle when he eomes in contact with sneb one as pleasant os that of yesterday, I eannot bnt hope they will be more generally adopted th rongb the country.-P. [Jaly 11th. <br>  | The Italian Rye-grass haslately been introduced here, and has not, perhaps, been thoronghly tried. It is highly recommended in England and Scotland feeding, and especially as producing a great growth under the appllcation of liqnid manare. With this treatment it is said to have heen cat five times of hay to the acre. In snch cases the sward recejv. ed a liberal smpply of liquid manare after each cutting. This species is said to be only biennial, <br> Dactruis.-The Dactylis glomerata - Orchardsome parts of the United States, tiongh it does not appear to be as highly esteemed here as in its Statea, however, it is preferred to Timothy (Phlentre pratensel for mixing with elover for hay, as it ripens earlier and at the same period as the kind it is not so valuable for hay as for pastnrage. When mixed with other plants it stands in tusgneven and rot easy to be mown smoothly, As a permanent meadow grass it is best bry itself, and seed enongh shonld be sown to bare the plants sward. On account of the lightnesa of the seed, not less than three bushels is reqwied for anace. will grow on all toleratly drg, friable soils of medium quality. It is very teascions of life, and when once fairly established will snstain itself a spring, is less checked by dronth than almost any other species, and grows till the gronnd freezes.vimoronsly immeuiately after being cut or eaten off. It mases hat fem stems or seed.stalks, but jts the length of two feet or more, and forming, when nntonched, a thick cov. eriug to the gronnd. Perennial. <br> AVENA. - The species Avena elatior-Tall Oat-grass-has been enltivated in some parts of the but has not, on actnal trial, sapported the chaims Which sume have set np for it. It is a coarse light, strawy grase, not weil relished by any kind of stock, ดs is proved by its being left in pastures when other species are eaten down. It grows three feet high, but stands thinly on the ground, and its bulk consists almost wholly of long, hollom stoms. <br> Festcea.-This genus comprises several valna ble species, the most common of which in this conntry is the Festuces protensis-Mfeadow Fescue. This abonnds on rich old grass-fields in some neighborboons, althongh it is seldum parposely sown. It ripens at the same period isith the June grass, and is most cnltivated srasses are not at that time sutficiently matured to cat for bay, the Meadow Fescne stands till itshedsit sucds, and thas propagates Itself. It is a good earls pasture grass, producing abundance of long leares and It is conspicnons from its glosgy green color. The Ohio Cultivator states that this is the "Randallgrass:" of Virgiula l'erenial <br> Broyus - The Bromus Secalinus - Chess, or tricts of this country. As illostrating the want of |

## tCHes Of the bible.

Sous writer gives the following analysis of the the right and wrong. It is a Book oo Wisdom,
tbat mskes the foolish wise. It is a Book of Trath, Which detects all homan errors. Ie is a book of is che most anthentic and entertaining history ever pnblisted. It containg the most remote erfal occntences. It is a complete code of lawa
it is a perfect boyd of divialty. It is an nneqnalook of travels. It is a book of vogages. It ritten. It is the best will ever executed; the
dest testament ever signed. It isthe young man's best companiou. It is the sebool boy's best in Is the ignorant man's dictionary, and every' man' ithfal and believing. But that which crownsall, is the Anthor. He is withoat partiality, and with
out hypocrisy, "Fith whom there is no variableout hypocrisy, " "rith whom there
eess, neither stadow of tarning."

Hraven upon Earri.-It is indeed a precions
onsolation that a Christian aced not ask how he ay ascend unto heaven. Remains he at Jernsa omi, at Rome, anywhere upon the earth, in the
ield or in the house, he masy still be in hearen, fo ou and Ivell in and lioly Chost will be wit here upon earth, then indecd it is true, that all we
do, speakk, think, or snffer mnst be well done; p, stndy, sing, read or pray, God is gloritied in
al. Wo may ever find heaven apon earth, if only e kare graco onough, and are able to belleve.lan can boast. OP heaven, God says it is my
hrone, and the earth is way footstool. But a hristian heart is His dwelling.place. In ns He
ill dwell, if we only belierc that Clarist snffered ad died for us, and love Him in return for sric
ompassion.-Luther. the neig
within.

EVA，THE MINISTER＇S WIFES

 now in the bether lhnd，wat eneircled by a croon
of never fadigg glory．Bat the old man＇s world Was well nigh ended，and one Sathath he told his
congregation with quivering lips and streamin $\Delta$ ud so a yeunger mad，fresh from the Univera ty，was called to fill his place．Suldom before，of
since，has the old stono church at Ellingwood bee so densely crowded as it was on the first Sabbain
after Mr．Sraxwon＇s arrival，for many strnuger d onder Parson C －＿administration， 5 came to hear the new mintster．The large，velve
coshioned pew of Whoow Burss，who lived wit
her fulr daughters of a cernin sge，in the bi white honse on the hill．side，，was again occapied，
thing which had pot been for monthe，as to widow had taken offense nt Parion C －， enuse he one Salbaath preached a sermoon on ele
tion，in which he frmly belle red，while on the nex
Sabbath he refosed to preach one oul Sabbath he refased to preach one on Abelitionism，
in which he also beliered，bot not exactly as
Widow Buiss did，he thinking it just possible that Widow Bulss did，he thinking it just possible that
thore might now and then he a good Christian
south of＂Mason and Dison＇s line，＂whije Mrs． Burss openly denounced them all．
As the lamented linshand of the widow had horne the title of General，his lady thoughtherself
of considerablo consequence，and so，because Elic couldn＇t rule the charcb，she with held her patron age，groaning over its wretched condition，whil
her eldest daughter，MAtiLDA，who went Elip－shoo and affected to bo literary，wrote several newspa per articles tonchiug the neccesily of having for sense and a man of Gop．＂But now a new era wa dawning apon the five Clisses．Parsou C C
had resigne his post，whtch was to be filed by a
young，a handsonone，and what was better than all， an zonmaried man！This last was peesibly the
reason wby，on the first Ssbbath of Woon＇s lahars，there were in the congregation so
many young ladies，and why Marrind Buss
dresed herself with sach her gold pencil and sheet of feolscap so that $M$ STANWOOD might know slle was taking notes his sermon，whiels she prononnced to be＂the
most impressive，touchiag，and sublime discourse she had heard，＂and then，too，she knew ho had a
finc ear for musto by the way he scovled＂when Was there ever a choir of slagers who did no of Elllngwood，which as long as Matripa Bhis heing pitched on threo Ilate，MarridA＇s voice had in it a slight crack，jnst lig enongh to let all the
bad seunds out，while fi resolutely kept all the good ones in．Of this，lowever，slie was not an ellart to dislodge her from their ranke，there
was war at onec，the five Blissea，with a few others heading one party，whele every，hody else hieade
the oulher．The confest reas antion in her place of Juhrev lumpery in what the five Blisses over after lootsed with evil eyces
the widow sometimes groanang andily and dro the widow sometimes groaning andilly and drop－
plag suddenly into her seat whan JuLier，on par－

| pose to tease her，poured out some of ber loudest atrains． <br> Once，rs the people were leaving the charch， Matlina whispered to Juhert＇s bister Mary，ask－ ing her＂if her grandmother were not in tho gal－ lery that day．＂ <br> Grandma！Why no，＂exclaimed Mary；＂What made yon think so？＂ <br> Ob，＂returned Marilids，＂I didn＇t turn round when they were singing，but I heard a voice which sounded so much like an old rooman＇s that I thought，yerhaps，Jourew was sick and your grand－ mother had taken her place！＂－and with a feeling of relief the amiable lady walked away． <br> For a few months after this the pers of the Blisges was vacant，during whioh time there en－ sued a degree of quiet，and when they came again te church，the singing was of minor importance， as Marilda had conceived the idoa of becoming Mrs．Staxwood．To accomplish this，the young Mrs．Starwood．To accomplish this，the young | It was terrible to witpess the anguish of the pastor，which was not manifest in any lond out－ breats of feeling，but was visiblo in every lineanent of his face，－in the apasmodic quivering of his white lips，and in the low，bitter moans of agony， which had in them the tones of a broken heart，an he trowed his manly bead and wept over her he had called his for the brief space of a year．They buried her on a sunny slope，and from her early grave came more than one lesson of good to the inhabitants of Ellingwood．At first thoy feared lest their pastor shoold lewve them，bat＂Eva＂s grave was there，＂he sadd，＂and he would rather remain．＂So he staid，and from that time forth and when he saw how united in mind and heart they were，he felt that through lis amictions gooid had come to them，and that Eva had not died in |

## THE WHEAT MIDGE．

Eds．Robal：－I have noticed in some of the lste
nnmbers of jour paper inquiries from different individunls in the western part of this State，jnst
now so severely afficted with that sconrge of the now wo severely afficted with that sconrge of tho
farmer，the Wheat Mdget how they may yroid or
rid themeelves of its devastating and roinoos war fare npon their prospecto and hopes．Having haà
and still experiencing our fall share of tie evil in this vicinity，on itz onward maroh westward，－and for some years beforo it reached the granary of
the State，－you will perhaps permit me to speak
． from esperience for the benat and prescnt seasons
manp farmers，who，the past sihoper deferred and
have hsd nnd are having＂iop have hsd nnd are having＂hopes deferred and on the farm．As yonr pages are amply filled
wil be brich
In this vicinity we still raise some wheat，and
some rery good crops of white whent too；and have learned that in order successfully to compete
with the midge，onr lisnd must be in high condition， well nanured，and sown eartly－sasy the first week
in September．The earliest varieties－the Mediter ranesn and Sonle＇s－lave alone withstood the
ravages of the midge．Several other kinds which were raised here when the midge first appeared
－such as the Hutchinson，Garden and Flint ra． －such as the Hntchinson，Garden and Fint ra．
rieties－have not been heard of since the firstand
second jear of its prevalence，and are now among the things that rere．
The Mediterranaau wheat cannot be said to be a favorite among the farmers，$n$ nt is raised rathei
as a neceasity，where they do not consider thei
land strong enongh to bring good white wheat－ It is more exempt from the midge that any other lind，but does not give a large field to the acre－
so that tit has become somethingof a froverb that thalf crop of white crop of Mediterranean．
In a recent number of the RURAL I noticed complaint that the miadge was taking somebody
barley also．They have dono the same here，until barley also．They have done the amme here，until we
have learned at least to to try and dodge them by sow． of Aprill or not until arter the first of May．Fai
crops of barley are raised here this ycar whic Were sowed at or about both of these periods．
Such，Mr．Editor，has been the experience
myself and others in this vicinity since the a pearance of the midge among us．Shonld you pearane worth publishing，and it shonld prove o
deem it to any one，I shall feel amply compensated．
beneit to Yours，
Cayuga，Cayaga Con，Aug．8，1857．
Rbmaris，－The views of our

## Rrmarks，－The viems of onr correspondent

and suggestive．His snggestion as to good cul－
turc，mannring and early sowing $\rightarrow$ ot that the plant may attain a strong，healthy growth in the fall－is
undonbtedly correct，and worthy of adoption by all who wonld raise winter what in हections where
the midge preraile．The plas has been suecesb－ fully practised for years by some of the best
turmers in Senece，Caynga，do，ond we advise our
friends in other connties to give it a trial．The friends in other connties to give it a trial．The
remark relative to varieties sis also ongagestive and
confirmatory of the teestimony of good farmers in this section－some of whoma aver that the Mediter－
ranean yields so poorly that its cnltare is nuprofit－ able．The hint as to the periods of sowing barley
in order to escape the midge will attract attention as order to escape the midge will atirect attention
Mr．Moone：－Haring read the commnnications of Mr．MCVEAN and J．H．B，in last Rorari，ypon and Winter Barley，and yonr intimation of a de－
aire to elicit information therenpon from expe． Bire to elicit information therenpon from expe．
rienced farmerg，
hnmbenture a short expose of my hnmble experience．
On the 17 th Septem On the 17th September， 1866 ，I drilled upon five
acres of good wheat soil，well prepared by snm．
mer fallowing， 12 bnshels of Mediterranean wheat． mer fallowing， 12 hnshels of Mediterranean Wheat．
Harvested it 28 th nut，and threshed yebterday；
yield 115 bnsbels ly tbrebters＇basket measure， which is not expccted to hold ont when cleaned
perfeotly．No perceptible infury from the midge．

 harvested 7 th ult，and three．
nring as above 203 bubhels． Botlu fields were slightly anã about equally in－
jured by＂winter tilling＂in February．The barley jured by＂winter killing＂in Febraary．The barleg
was ten days later than heretofore－as we have
nsnally harvested within the lagt four days of June Isnant was as good wheat soil and cultivation as
winter wheat，and freezes ont as easily bnt winter wheat，and freezes ont as easily，ont
things favorable it has invariably yielded me 4
$\left\lvert\, \begin{aligned} & 45 \text { bushels per acre－worth same price of spring } \\ & \text { bisrles；interleres with no other harvestiug，ib }\end{aligned}\right.$
a pieee of winter wheat that wold not suffer by
eomparison with halmost any field of the same size
in Morioe county．

What our＂Sonthern ties＂of counties most
need is inteliggent farmers to develop tleir agri－
coltonral resonces， caltural resonrees，as there is an exhanstless
amonnt of wealth treasured up here in onr mas sive hills，our fertile valless，and our incompsra－
ble forests，that skill and energy will not fail Che fores．
Could
Cold
Could the farmers of this connty all be induced think it would add 25 per cent．to the valne of the county in one year，and I shonld regara it as as
most prolific scheme of politicsl ceonomy for the most pron lescheme of puliticsl economy for the suficient to frnigh every family with a copy．The estra copies you sont me
some tine ago，I have dill gently circulated amons the people．Everybody professes to be mnch pleased with the paper，and a number say thes
intend to take it by－and－by．I warn them of the danger of procrastination．But some people here are like some people in other places．Thcy don＇t
see $\pi$ hy a farmer sboold need to read minch to nn derstand his bnsinessl Yours

Thye (1) Crlyaro ano farden RAISING NEW FRUTTS FROM SEED. Trup raining of new varietie of fruisf from seed

 variety in a bundred proves anperior, yet the un.
danated cnltivator parsnes his expcriments, notil success rewards his zenlous labors. Most of onr
sither finest froits are of recent origit, and many of them
natives of our conntry. Prof. Kiktcand's cher. ries, Dr. Horey and others and and the strawherpears, do our coantry bonor thronghout the civi-
lized World. On examining an English nnrser catalogue recently, we noticed that nearly all the fruits advertised as new varieties, were American
seedlinge. To all who are engaged in this work ersevere,

"These peaceful triurphs," Mr. Wilder trath
fally remarks, "are worthy of the bighest ambi
tion, congnests which leave no wound on the
heart of memory, no staiu on the wing of time.He who only auds one reanlly valnalle varicty to rather he the man who plantled that nmhrageons
tree, from whose bending branches fnture generations shall pluck the luscions fruit, when I am sleeping heneath the clods of the valley, than he
who has conquered armies. I wonld prefer the Seckel pear, Hovey's Scealing strawberry, aye,
the Black Tartarian cherry from the Crimes, the Black Tartarian cherry from the Crimea, to
the pronest victory which has been won npon That hlood.stained soil"
We havo noticed this season several very prom.
ising geedling currants, that bid fair to exccl the ising seedling currants, that bid fair to exccl the
bcot English sorts, which we hope to make a goo report of next gnumer.
We have just receive
Society of Shakere, a from the New Lehanon Society of Shakere, a bax of Gooseberries, of a
dart parplish color, good Aavor, and ratherless than
medium size, though larger than Houghton's Seedling. It mnst be ery prodnctive, as tbe branches
were logded with fruit subhect to mildew, is a desirable acquisitiou. A companying tbe fruit, was the following note:-"I
send yon s mall box of gooseberries, the Mount ainh Seecding, not 80 mach for their size, as for
thoir suyerior tiavor and productiveness. The
hnsh grows from six to eeren fect himh, hnsh grows from six to eeven fect high, and load-
ed all the way np, as you see the branches I send
yon, are with frnit. It is perfectly hardy snd free from hlight. It was discovered growing wild some ten years since, and has heen proved side by
side with other varieties, both foreign and domes. side wita other varieties, both foreign and domes.
tic, and we havo found that while other varieties
milder nnd cast tueir frait, the Monntain Seedling Las improved year by year.
of producing inuproved ruricties of frnit from meed, snbject. Our advice, however, is to plant the best seeds of the fiuest varieties, take good care of tho
plants, and ruast to Providenoo for tbe resnlt. We caution all persons a against purchasing any
nerw rarieties of froit sent ont with a fourish of new rarieties of frait sent ont with a flourish of
tranpets, at high price, as by duing so, they will
most assurcdily get cheated. Whenever a new clalumant for the phblic favor apypears, its merits
shonld be canvassen thoronghly shonld be canvassed thoronghly and carefully by
disiaterested and competent persons, and when. disiaterested and competent persons, and when-
evor practicable, it should to presented to somo importance, a conimitteo shonld be of spminiclen examine the frnit, the habit, growth and produc.
tivevess of the plant or trec the tivenees of the plant or trec, the natare of the soil,
manner of cultivation, and Euch other things manner of cuitivation, and suctio other things as
they may deem important. This committce shonld pnblish their report for tho henefit of the public. If, after foll investigation, they should decm it an
important sequisition, planters would buy with conlidence; if they considered it unworthy of
gencral enitivation, it would prevent tho pnblic from being cheated. If they should think another trial necessary, it would be for the trno
interest of both baycr and seller to have this trial made before the plant or tree was offered for
sale. We protest most sale. We protest most decidedly against the patent
miedioine asstem or puning a new fruit or flower. Timber for tue Praniziss.-I wontl like to ask
a fow questious throngh the medinm of your val nable paper. I have a few acres of prairie laud
in the northern part of Iown, a portion of which I wflal to plant in timber of some kind that will
not ouly be usefal for shade, but for the general uses required of timber on a farm. I wonld like
not only yonr own viems in regard to the matter but those of gorr readers who cau give any infor
nution on the sulject. 1 1st, I should like to kuow
what What kind of timber would be hest; 2d, the nan-
ner of preparing tho seed for the gromua; ; 3a, the
west modo of puthg theul best modo of puttling them in the ground and time
of planting, nud what attention they require after of planting nud what netention they regnaire after
they have come shove ground. Alyy
zantion ifforfully received. I would also 1 whe to know thank best
methad of getting rid of the common alder which grows in rauth profusion In this comoction of country
W/stiug you and your paper may both prosper as
 tious with our readers in the West. We hepg
some ono will give us bis experiance in growlog
timber ou the prairics.

 $=-2$ epring. Our springs a
that it is desirable to
sible done in the fall
 the white corolla fucesias. An English Florist, hy the name of Srory, has the novelty of wbich has given a fresh stimulns to We bud thonght that ingenuity was exhansted in
the wonderfnl variety of contrast we alroady possessed in the colors of the sepals and corolla.-
pore selite sepala and scarlee corolla wa thonght vonderfal; then came the dark purple, nearly blue corollas with white and scarlet and crimson scpals

- in fact we had nearly every possible oombinaion, except the white corolla, which we nombave How Mr. STony obtained it we have not been fnl. yadvised, hut we believe it was by crossing the
common sorts with a species with white corolla Which is now lost, We have seen only two of these
rarieties yet in bloom, viz, Empross Engenie, and Mrs. Etory, and we give a drawing of the latter.-
Both tbese have scarlet crimson sepals and white habits slender, wuith rose; the form is free fliue, tbe
sides these there are in cultivation-FlorencNightingale; Galantluæ Hore plena, double whit corolla; Queen Victoria; Snow Drop; Wate
Nymph; and for anght we know to the contrary many more.
The differe Sreat; thisenew nee betwreen is several of them is no
great a novelty that THE SEASON, FRUITS, THE Raspberries are jnst over. Gooseberries
are ripening, bnt on acconnt of the mildew, they have never been, with 48, a very reliable crop, and culture. Early pears and apples are not yet ripe,
or scarce, and we are, thercfore, in the early part of Augnst, slmost withont fruit, except currants.We need something hadly to all up the space be We are in hope that gooseherries will yet become American secdlings may yet prove what we so much need.
We have another resoarce in Blackberries.
 very bealtuy and delicions frnit. Tbey begin to
ipen soon after the close of the raspherry seaso apen soon after the close of the raspherry season,
and continne for a long time. We may notice
this this frait tiore particularly in tbe next number.
The currants, however, are sure and invalaable Wext to tre strankberry, they ano the most impor tant of all oar small frith. They well deserre
good cultivation, Which they will well repas by
improved size and lavor.

| DOYENNE D'ETE PEAR. <br> To.dsy, (Ang loth) we picked the | from the enting?-L. C. A., Albion, Mich. <br> Rexakes.-To get frnit next season yon should plant immediately. If the season shonld he showery tbe plants will become strong before frost and yon will get considerable frnit next season, though uot balf a good erop. If poor, the gronnd shoald be enriched with well-rotted stable mannre. The only care they will reqnire is hocing and weeding, which will not be very tronblesome. The Early Scariet is the earliest and one of the best market berries. Of the ralne of later sorts there are a variety of opinions, almost every cnlifator haviug a lavorite sort. Vines if layered immediately wonld take root, bnt if delayed any longer you will have to make conttiugs in the spring.Make cnttings of two joints, ard plant leaving an incli or two of the enttilig with one eye above |
| :---: | :---: |
| Ete, or Snmmer Doyenue Pear, and we were ncer more impressed witb its valne nud profnctiveness. It is jaicy and dellcions, and ripens well on the tree, thongh it is better for heing plecked s few days before ripening. It is a very groat bearer, and we notice that tbe little dwarf trees of onif two years old in the nursery zows are loaded with frnit. On the gnince root it is too prollic, and unless well the quince root it is too pryear, the tree is spt to hcoome enfeebled by over-bearing. We give an ontline of this fruit. | GARDENING IN KENTUCKX. <br> Gardening-Protection agcinst Bugs, foc.-Chinese Sugar Cane-Peas. <br> Eds. Reral:-A short time since, I gave your readers a brief sketch of the crops and their cultivation with us. I now propose giving gon tbe resalt of my experience in gardening. <br> Kentucky has been aptly styled the garden spot of America. With her great nataral fertility of |
| Jaune Hative, is now ripe, and it is a very pretty little fruit, pale yellow, thinly coated with bloow, jnicy, sweet and pleasunt. It is well wortby ut cnlitisation on acconnt of its earliuess. Ripe this serson 10th ol August, but it mnst be remembered tbat the present reason is much later than usual. Whis plum is recowrended | soil, and admirahle climate, Nature abundantly rewarda tho "tiller of tec soil." I prepare my garden gronna, wbien is four acres in extent, by thoroughIy plowing and ridging in November, atter manur. ing well. In this condition it remuins until spring, when anotber coatiug of manure is banled on,again p!owed, aud well pulverized with harrowing. We do not trench as is done with you, nad which would doubtless augment the produot. <br> As your readers are famillar with the general plana of planting seeds, I will wontine myseif to the manuer of managing tico of the most diflecilt ves etables to raiso with us -tornips and cucumbers. The lirst I sow among my water melons the tirst of August, by gently raking the rines asido and plow- |
|  | ell, -the ground being shaded by the riues, |

mind, like a flower of earthe mind, snd a flower kind. Like the blossom of a papaver, so is the Egrance of evil thooght. Better were it ff mind corrapting to mental wisdom. By reading, we to fill the storehouse of memory. Meditation receiveth frora mind, as a bank, the deposits of e? fita treasures. Reade little and think mach; for evity inconsiderate. Scan well the prodrctionso thy observation, and reason apon the objects
around yon. And to store thy memory with wis. dom, zeek well the teaehings of thy Bible. For
who can measure the value of Omnipotenee, or know the extent of and naterstanding. Res with prayer. For withont asking, yon bave no
promise of receiring; aud withont the blessing of Gaines, hy reason prointeth little

TEe Wial of Gon,-I often think that the real
alne of whatever we do is proportioned by the nee of whatever we do is proportioned by the
onformity with which we do it to the will of God. in merels esting or drinking I do it because it more agreeable to him than it I were to do \#hat shonld even cost me my ife, wittont any such
Dirine intention. I woald advise you often, duing the day, beseech God tast be ronid finspire yon should say, like St. Panl, when he was convert ouldst thon that I shonld serve thee in the low too, blest. Provided I serve thee, I osre not in to what is vexing yon, say, "Wonldest thou that I thongh 1 am not worthy. willingly

Privars PBayEn-"Philosophy," ssid the good
and great Richard Tatson, "asks a reason for the oifering of praycr, and, waiting for answer never prays as all. Religion hears that God will be in
qnireĩ of by all, thankfully bends the knee, tonches the golden sceptre, and bears alway the blessing." tempted hy for prayer is neither reeded or at adaptation to man's utter dependeney, snd per haps who pras themselves. Tre ask no other reathe single eommand of our great Prophet:-" Bnt
thon, when thoo prayest, enter into thy closet, and When thou hast shatt che door, pray to thy Pather secret, shall rewasd thee openls." This is our anas it doe Tar Fuslino Prbacarr-He that can tell men bring their sonls to God; lardly can he speak to
the heart that speato not from it How can a frozen-hearted prescher warm his hearers' heart and enkiule them with the love of God? bat be
whom the love of Christ coustrains, his lively Eisll sweetly constrain others to love him. Above
all lopas, it is most trine of this, that none can speak sensibi's of to but those that hare felt it. Soskow, - Sorrow is the night of the mind.-
What wonld be a day without th night? The das reveals one sno only; sud algut brings to light the
whole of the aniverse. The snalogy ls complete. Sorrow is the frimament of thought and the schoo!
of intelli isence.

Tre Engligh people and press find the reeent
ontbreak in India the all－ahsorbing topico of thought and diseussion，and the re－enaetion on a much
more extensive seale，of the fearni seenes conuect－ At that time the confiet was waged principally With but one division of the inhabitants．At the
present，jndging from the tone of the press，we might gay the disalliection had spresd throughont
the entire conntry．We give the following extrsct the entire conitry．We give the following extrset

Offe Orffraio and Chaticr．

American trailiag species，was dirst brought to no
tice ia Frauce．The branches are very flender，
drooping and abnndaut．When grafted opon an drooping san abnndart When grafted opon au
npright stock some seven to ten feet from the
ground，it makes oue of tho most heartifal droop
jug trees we have．It sperfeotly bardy，and as
makes ouly a manall tree，is much better adapted makes only a enall tree，is much better adapte
for lawna than the common Weeping Willow． engraving is tuken from a toe only three year
from the bnd，aud sbows somewbat of its charac
ter，thongh we hope to be able to give an engrav ter，thongh we hope to be ahle to give at engray
ing before loug of a larser tree that will sho
more of its characteristic beanty．
 NEW Rocabilie．Migr bres．
The Blackberries are still in fine couditio，and will，from sppearsances，foruish an abnucace or
frait for several weeks to come．We give na en．
graving of a single berry of both the New Rochelle or Lawton，and High Bush，Both varieties are
grown here，and we see but little difference elther in slze or favor．The advantage，if ang，is in
favor of the New Rachelle，which，with the same
calture grows Jather larger than the Hlgh Buah． colture grows rather farger than the Hlgh Buah．
If weare not very muchm mistaken，we lare picked
wild berries of munch superior navor to eltber of them，though the preseat weet geason has injnred
the frunt in this respect．Bnt our＂blackberry pateles＂are mostly gone．If we wish to eat
the old favorite frait of onr boyhood，we mn
grow it，houestly，like ang other．So let all lope of good fruit platta a fery blackberrics．
The Ner Roohelle is very productire
grounds of C．P．Blsskrı，of thls citt，an cxtensive
caltivator of the blackberry，we counted 360 fine cultivator of the blackberry，we counted
berries on a cauc less than hive feet loug．
 dowering plath，yee，if properly propagated by
cattiugs of the yonng shoots in the Epring，and planted out io Jnne la a sheltered situation，it will continue to throw ap a succeesion or blooms till
late in the season．It thrives best in a rich fight
soils ank should be pletirat in dry wanther．Lase pleatifolly supplled with waster lo the front of a greeuhouse，in bloorn in Sep．
tember，and it appeared llkely to coutinne in Rower Tus abore is from an Eaglleh Journal．The Dielytra we saw in bloom here late in Auguat．By
coutling away the llower stems when they first ap． pear，the plant may be made to flower late in the
sammer or fall，particularly if planted in a cool
dampp sitnation． Wall Rosss．－Tbe secret of growing robes
agaiust a wall might te packed in a lad＇s thimble． A two teet deep border of strong lomu，fonr or tive
feet ivide，to be as rich as rotten dunc an make
itt the pond－water twice a week in dry weather，and shleut
the russe gre io bloom，to keep them thin in the branches，as if they were peach trees，and to plas
the water－engine agamat them as for a Louso on moro come．There is a reason for everything
under tho sum，and the reason for insects attucking roses in general，and thust ou walls more partien－
larly，is from too nunch dryncess at the roots，caus－ ing the juices to be more palatathe througb the
action of the leaves．－Lon．Hort．Journal． Trees And Plants．－Those who intend to iur－
prove their farme or homes by plauting fritit or
 the Rusal．Trees of the nuest kin
ceasily nud olheuply obtained，that
horizontally at first，and as they Increasc in length
droop until they rach the ground．We have never seen any trees of vers large size，，hough we
have them luere spliciently large to form fine ar－ bors，In Europe，where large specimens are
growing，the brancbes exten ehirty or forty feet
in each drection．Iit requlres to be grafted ou a

 Tur Whering Sophord is a very fine droopin
tree with slender braches，green barl；aud dart green foliage very mucb like the yellow locust，
lt grows rapidy，and in winter the green bark
forms a very flue contrast witb the yellow of the forma a rery flae contrasf with the yellow of the
Cold Barked Ash．Unortuately this beautifn
tree is litlle tender． Tha Wrering Lispen is a pretty variety of the
Linden．The branches at frst atart horizontall jibe the $\begin{aligned} & \text { ab，bat as wey iecomc lengthened，droo } \\ & \text { gracefully．Tte leares are large，roundish，an } \\ & \text { gray on the nuder side．It has a reddish bark．}\end{aligned}$ ． Tue Nibw Webping Burca is a very fine droo ing tree，with very peudulous brauches．
Tus Wxunc or the Enropean Moxutain Asb．The hranches a we aaw it last sumuner at the West doing innely
localities wbere large apple trees had been kille by the frost． MrssRs，EDs．：－For the last two years tbia sec－
tion of country has beea greatly injured by field
mice，girdllng and destroviug mice，girdllag and destroying whole orchards 120 trees of what I cousider the bese varities of from Col．Firosr＇s＂Highland Nursery，＂every one
of whiub grevr finely．The laud tipon whluh these
treea wcre get is a ine loant which wis deply rreea were set is a fine loant，which was deeply
plowed the previous fall，with the donble Michi gan
plow，nad well man plow，and well manured and plowed in the apriug．
Preparatory to setting thic roots of the trees were dipped into a common wasb tnb partly tilled
witb the soll from the lot which we water and well mised，so as to adbore closely deeper thana they had stood in the nurscry，an
immedlatel well mulched with coarse manure．
Latt spring I I set Latt gpring I set it tho eame ruanner nearly a
luudred trees，apple，pear，peaio and cherry，a
of which livod and pench treas．But a jear ago last winter the mic
girclued a largo number of my best trees，and du
riug the pust wlater have girdied noost of hie ring the pust winter have girdied most of the
muinder．
Last spring I followed the directions give

 ap and ded in summer．This treatunent，$I$ ann con－
vinced，will not same trees tbat have been entiroly
firdled girdled．
Oe of my neigbbors，Mluss C．Balnwin，an
amateur mater amateur frnit－grower，a natural meelanic and
practieal farmer，boxed his trees that were glrded
and saved them
 and cut into the fresh bark and wood alove na
belowr the girdle the the dept of ouequarter of
inch，a littlo bovelligg；then，with the chisel

For More's Rural Now-Forker.
INTELLECTUAL IMPROVEMENT. Mgsses. Ens:- Allow me to address to the
readers of the RURAL the following small article on a great snbject;-namely, the improvement
onr intellectnal faculties. It is a snbject upo onr intellectnal faculties. It is a snbject upo
which mankind since the begiuning of tlme have practised in direct opposition to their theory have professed to beliere that all exertions fo the coltivation of the mind were likely to produc
far greater benefits to the haran family than an others, and yet have bestowed less attention npo this snbject than mang others of less importance The intellect,-" divinely bestowed upon man,"
is all that prevents his being an animal of the rate creation. Why, then, should it be solighti) ceive hat littlc benefit from the natural world with ont perscevcring effort. For Instance, althong the son is composed of the jest materials for prodncing sunh articles as are necessary to the snp
port of animal life, yet how destitute of all com ort, convenience and means of existence, shoul mado by agricnlttral labor. The earth itself to view, nothing bat dense forests and boarren wastes rdens; these fields of grain, no orclaards, n gardens; these are proonred only hy the patient
continned industry of snceessive generations. And why shonld we expect to realize the bcne effort; as mind is created by the same power that order to be ascfal to the possessor. And like the soil
whenerer and wherevcr nature has with held endow menta, proportionatly greater shonld be the at tempts to improve. Bat here we see anotber
strange inconsistency in the proceedings of man
kind. The farmer baving ascertained the re. lative properties of the several divisions of hi farm bestows the most labor and expenditnre on
thosse parts for which natare has done the least; thus producing, as near as possible, per
fect nuiformity. Bnt the same farmer who works his land so wisely, takes a course dlamet-
rically opposite in the management of his
children if one by nature with snperior intellectnal capacity
that is the one who receives attention and en couragement. Those who appear less brilliant
are treated, not like his barren tract of land, bn with ne gleet, sometimes with derision-thus cans mind, than nature ever ordained or intended. With the sanne spirit, and in the same manner,
so long as any production of the vegetable world, grass, rrain or frait, or ani mals in his possession is actively engaged, constantly on tho alert, striv
ing to prodnce the requlito improvements, they are right, he comes to the reasonable concln
sion that no fartier exertion is reqnired. But o the minds intrusted to big care, that one which in
ncarest perfection in the natoral state, is the on The worla displer. nd discernment in selecting the means for calti. vating the mind, than the soll. As a farmer, sncl
information as he acquires by his ownobervation and experience, is considered nseful and reliable. He is not reqnired to take a degree or diploma
from any incorporated institntion, wlth a big uame, the heap." Let him properls prep the ter and sonw good seed, in the right way, and he will
be pretty sure of a good crop, witbont saping a word of Latin throngh the whole performance. Whereas, bofore a man can be supposed to have
mnobl literary knowledge, or many intellectual at tribntes, he must lave been coninined a certain nnmber of jears in some prison-lhouse of learning,
and reccived an ear-mark fron the overseers when he left I wonld not wish to have any one nnderhighly nseful, and, to a certain degree indispensa ble. But thonsands of onr young men, who have.
not the means of obtalning a liberal ednoation, give up in despair all hope of renown, and dis. act wrong, for as socicty is now organized, grea means of obtanining sned informatiou as monle be
nseficl in the practlcal affalry of ufe, are open to nsefil in the practlcal affars of ufe, are open to
all. Amoug the means, yone, perhaps, are more beneficial, when rigbtly conducted, in neighbor-
hoods and villages, than the Lyceum, "onr debating school."
In proparing argaments for discossing the
several qnestions, re are led to make examiuation several qnestions, re are led to make examination
of hlstorical facts, - of the moral and politican ef fects prodnced by legislative enactments, and
doings of men in oficicial stations, to formo opinions thereon, sud learn how to express them. And
onr young men by improving such means, may onr young men by improving such means, may
become as well qualified for rulers lin the land, "s
some of those who have been labelled "Lh. D." at a celebrated oniversity or colle ge.
North Almond, N. Y, , 857.

Ingxitaustrality of Booss.-Books are the canse of boks, Werathere no books in the world,
it might be dificult to mrite one; but because
there are so many there may be so many more, there are so many there may be so many more.-
The rays of intellectual liglit are, by the prismati operation of booke, broken into an infinity of llue and colors. Men may as soon cease to talk as to
cease to read and write books. All onr daily and honrly talk may be made matter of ilterature, ase,
and of Interesting literatnre, too. The more books that are printed, the more food is given to the
midad; and the more nourishawent the mind regreater its streugth, the more valuable iss thonghts There is no oone topicit in the whole range of lite ra,
ry interest that can be couceived capable of ex. hanstion; and in matters of imagination there is is capable of conjecturing what may be done-

Prople are bettor fond ont in their unguarded
hourg, than by the prinoipal actions of their lives hours, than by the prinoipal actions of their lives
the first is natare, the second art.

WIIAT AND HOW THE TURKS EAT.

His Majesty's meals, according to the onstom of
the conntry, are two; ona in the morning between ten and eleven, the other at snnset. They are served by the echeshnigear, whose dity it is to
break the seals of the different dishes inteñed for ry them into the rogal presence.
Althongh the Omanlis are great epicirres, the
tastes are rery singular. Their dishes are diversified and nnmerons, consisting nsally twelve or Afieen, and sometimese ven thirty conrse sweet and meat dishes being introdnced in alter-
nate snceession; the meal commencing with sonp nate snccession; the meal commencing wion of rice
and ending with pilaf, or a preparation of and ending with pilaf, or a preparation of rice
peculiar to Tarkey. They have a psecies of pastry or paklava, which is remartabll light and deli
cious; and the mohalleby, or Torkish blanc.mange, is mnch liked, even oy Earopeans. Frrit, at Con partaken of frequently during a repast. Indeec valled, and even more delicions and delicate tha those of Madeira or Malaga
Iows - sonp, kebab (or roast meat in small pieces
entremet (or ve etables and meat er,) pastry, roast, fishl, entremet, mohalleby, entre
met, maccaroni, forls, jelly, etc., nntil at last winds ap with the significative pilaf and slertbe
No wine or liqnor is served at the table, bnt his
No
 zation has some vices as well as misny virtues; and
the fashion of excessive drinking has, among oth
 elegants are becoming mech addicted, , and, ere
long, they may, perhaps exeel even the paragon,
John Bnli.
Alihongh many other innovations and attempts inal style of eating has not been mnch improved. They nse neilher chairs nor tables; bnt a low stool
being pat in the midale of the room, a large circolar copper tray is placed upon
No snoh paraphernalia as cloths, napkins, knives,
forks, plates, glasses, ete, are essential; small loaves of bread, slternately with small dishes of
frnit, piekles, anchovies, chcese, etc., are indis eriminately scattered around the edges of the tray
in the middle of which the different preparation in the midale of thich the different preparations
of food sre successively placed by the ayvaz or senllion, and the food is eaten with she fingers, ex are provided. Aroand the tray the company ass
semble, siting with thelr legs under them, and all sentble, sithing with thell legs under them, and al
eating from the dish in the midale; reminding us of the customs of ancient times, when it was said "It is one of
One long, nsrrow napkin is provided, which
goes all round the tray, snd lies npon the floor goes all round the tray, and lies npon the floo
each person slipping nuder it as he sits down.
Their tables being accessible to their times dinner parties are never given, except on
atate occaslons; for, hospitality belng one of the characteristics of the East, and especially enjoined by the Koran, no one is exoluded from the ir boar and when the nomber present is so large as not to
allow them to sit comfortabls, they place themselves sideleetse, or in a sort oi spoon fashion, ss
though they were leaning npon one another, and
thas illnstrating the seene at the fens of the Pas over.
In some of the honses of the frealthy and especially of those whose owners have visited Enrope,
the Earopean mode of eating is imitated, when the motley company, which is always assembled 80metimes presents a most Indicrons scene.
Once a Turla at such a table, wishing to conform to the customs of civilized life, endeavored to nse
the fork. Failing in several attempts to take plece of ment, and determined to overcome his
sancherle, he resolutely took hold of the morsel Rgainst his breast, stnck the ment npon it with nu1 immense ellort, and then carried it to his month,
quite contented with his owu snecess, and the ap. planse of the company. Daring the esacred anapth
of Ramaza, however, the European mode of eating is never practised, even by the most enlighten. are then altogether set aside, as being too profane. His Majesty usualty brealfasts at the Mabeyn
and always quite alone; for no one being equal to him, none can mare the houor of his company; and his erening repast is often taken, weather
permittlug, at some beautiful watering-place. Hear gotten by degrees, with motlon and exer
cise, is more natural, and stays longer by one that ise, is more natural, and stays longer by one thas
hat is goten all at once by coming to the eire--

LOOK ATOFT.
The billow hath its foam, the star its beam light, the eve its breath of balm, and the heart of
man hath hope. Like the gay dance of the bil. low, like the soft light of the star, like the lalleth the heart to its rest. The wave of the
water is gladdening and the snnlight loveth its motion, it beateth in passion and beanty, to the heart, And the fairy may loat, on the
fleecy clond, or ride on the silvery beam, bnt man
 Weil that sweeps over the spirit like "a somund of glanceth brightly, peering as aneye oflove through
the cloods. It loveth the sarines of earth and las. th a riel offering there-light, soft, dewy, holy he beantifall star. The wind cometh at night wit balm and bliss. It kisseth the flower, it rippleth wild weird story the wind hatb, gending the pirit ont npon a phantom chase for happiness.
Earth resteth in beauty forever, with its mon tains, its siasdows, its forests, snd waters, an
thoorsand gems. Bnt the beart hath one in its cir let of gems, one beautifal pearl more bright and precions than these-the clear pearl of faith, the
sweet apirit that whispers-"Look aloft and b strong."
Look aloft, for thy spirit high-soaring shall catch glimpse of that glory its glance bethe throne of iny Goo. The soul bath such nndying aspiration
sfter the Infinite; high-born, it disdains earth's Serters, and moanting on free pinions soars to its
native skies. Yet often, even from thence will the rude tempests harl it Often will the Tempter Then keep thy sonl's gaze on Heaven, lest these storms overwhelm
If dreams of smbltion and beanty are fading, and hearts which have echoed those dreams are
passing away, look aloft-thon shalt dwell with them all in that home of perfection where nothing
can fade. If thon err'st and friends of thy faith should for
sake thee, and billows of darkness roll over thy
soal-look aloft. He sittetk a friend who shall sourer forsaka.
ne
If man dare 0 hold its tenement in chains; if he dareth to and be fearless-look alos If thon hast grown weary in thy earthly oareer thee; if 1 n their sinfulness the sinfal have jnisged
bee, amidst the strite of thy natnre " are and the gale," look alof, there is rest with Be strong forever. When at last thy sun rolleth
down to its rest, let erery clond be lined with lory, thro a mitle of faith roand abont thes, and die f is folds,
Stouts Grove, III.,

PROGRESS AND IMPROVEMENT
YOLE. VYOX. NO. 35. 3

sweare NO. 399.

HOORE'S RURAL NEW-YORIER, Agrieultural, Lititrany and and family Nempygper

| continuing hazardous experiments with wheath or disposing of beantifal and fertile farms, with all their improvemente, couvenienees and sarronnil. ings, (including schools, charches, and other insti. tations and advantages to be found only in farored |
| :---: |
|  |  |
|  |  |
|  |  |
|  |  |

ntions and advantages to be found only in Pavored
localities, with \& view of trying some uew and
unimproved Westera EI Dorado. Not that we ob.
$\qquad$ beads of ramilles who possess and csin retain sectiono of Western New York to mame such
migration. They already possess a competence and by good culture and jadiciors managemen nenting the value of thetir estatas by making anecce.
ary and permanent improvements-withont pro. dacing a boshel of wheath
With many, however, the great question i
Whast ean we produce as easily, readily and prof What ean we produce as easily, readily and profic.
ably as wheat has been grown heratofore? The
paragraph at the heaido this article indicates one
branch of production which can be lartely in. creased in many sections, but whetber it can b
pranaed ass advantareously as was whest growin jears ago is sotuemhat problematical. Yet the
in no donlt that it will pay far beter nook-ape
cially in any locality adapted to grazing-for th producta of the dairy are certait and generall
find a ready market at remunerative prices. Th
tusines of deiving is asiness of dairying, stocle breeulug, and grazius ry in many counties of tuls Stste, and mast
time be largely anguented-for there are compa
tively fevs sections in which it atively fews sections in which it cannot oe prose
cuted with decided adrantage. Some locallities cured wis decided adrantage. some localities
bawever, are better adapted to grain and fruls
and fin these farmers nust be gniced in their Choice of products by their soil, climate, faciltitie
for marketiog, sad pricee, They will be safest an or marketiog, , and lricees. They will be safest nu
donbtedly in adoptiug a systen of mised husband ry, withont relying exclusively anon ajy one pro
duct. Barley, Oats, Lorn, Potacos, Backwhest
Beans, and Beans, and other crops, can be grown snecesstally
in most localities where wheat has hitherto been the staplle. Last bnt far from least, Frult is an important and proitahie crop, and oughlt to hecome
one of the chicf staples in most sections of West
ern New York. Bot the negligcnce and procrastination of farmers fan planting and bestowin
proper attention mpou orchards, hss greatly rc proper attention upou orchards, hss greatly ro
tarded and lessened the products of this source of pleasare and profto
and mas be aceowpllished by farmera who aro complled to relinquish wheat culture. The a most total faillare of the recent whent crop renders
the snblect of future operations onc of immediate and pressing concern with many of onr readers
and demands carefnl cousideratious. Not a few in almost overy midge.scourged locality are almost disconnaged, and undecermined as to the course
best to bo pursned-for while the abandonment for a time at least, of the former staple of the coun the best substitntes or alternatit es. . Indeed the
whole subject is one of paramount interest Whole surbect is one of paramouut interest and
importunce to a vast nnmber of the land importance to a vast number of the land-wuers
and cultivators of Westeru New York, and we solicit the views and suggestions of correspondents
for its elncidation.

DRAINING.
Promersmar amht tho labors peculiarly adapte porlod is nopr almost at hana, we purpose, in two
or three articles, briefls to spal an outlay in tisis direction; the philosophy of systan; and the various motes of perfornining the
necessary labor to render the work one of satisfac.

## 

property of soils
sive attruet or the soil to absorb water, by cohe the state of division of its parts; the more divide Again be says: -"The power of soils to sbso water from sir is mucte conneted witt their fer
tility. Whon this power is great, the plant is sup plied with suoisture in dry seasons; and the efficet
of evaporation in tho day is counteracted by the shororption of sqneous vapor from the atmosphere by hoth the extorior and interior during the nig gta The stilic claya, apyroaching to pipe class in the nature, which take ap the greateet quantity o

PLEASURES OF COUNTRY LIFE.
Thehe are pleasarcs peculiar to the eity, and
dalone among green field, and groves, and fun-
ning brooks. Thee there are ploasures pecnliar
gubarian life, partaking somervant of the cbat lo subarian life, partaking youecryan of the cbat some extent the pleasare or both. Many who have
longed antiviuuly aud for many years for conntry
life, fail to tealize their expectationg, life, fail to realize their expectationg, when cir-
comstances allow them to indalge their long cher-
ished wishes, and they soon become disgusted ished wishes, and they soon become diagusted
with the country, and long to return to the town
to engage again in basy city life. The same dis.

 the pleasares of a great part of ira citizers. In
large city a person can manage to get flong to
erably well, end pass away the time withont sonl-stiring thooghts - allonst without a sonl.
In the conntry the pleasures are rosiz plesures,
heart joss, the pleasures of thought. Miserable, or heart joss, the pleagures of thought. Miserable, or
excessively stapid, must be that man who tries to
get aloag, in che conntry withont a honene, where the heart car warm and be warroed, make and be
made happy; without looks, in whiok he cau con-
verse with the great and the good, footto living and
 of the forest aud the field.

## 

## Many attempt to do tco mnci. Thes commenc improvementa that requirc a long time and a arg

 amount of mones to complete, and before thworlk is half done become disconraged. These
eemarks are only intended as prefatory to a seric

| pressed by a correspondent in the Rucral for April 4th, and in the nomber for Angust 15th, we gave our views of the manner in which a new fruit claiming pablic favor shonld be tested and introduced to pablic notice. <br> Oeio Pomological Societr.-The Eighth Seg. sion of the Ohio Pomological Society is to be held at Cincinnati, and commences on Mondar, Septem. ber 14 tb , continuing as many days or ceveninge as may be desirable during the week of the Ohio State Fair. |  |  | THE NEW CANADA WINE GRAPE. Throvgn the notice pablisbed in the Rtras

considerablestention seems to bave beenattracte to what has beer called the "Nero Canadz Wirn
Grape." We are nut yet satikted thant is a new ras
rity riety. We hope to sce specimens both of the frait
and folliggo this fall, ana then wo shall be zbe to
give on opinion in regard to it In the meantime give in opinion in regard to it In the meantine
our correspondents scem determined to agitate
the snlject. Eds. Rerasi:-In looking over the pages of the
RURAL, Ifind a statement of a remarkable Grape
Vind Vine, which requires a little explauation in order
that we, Americuus, or Yankee inquisitivenes, may
know ard teliere the truth of snch etatemcat. It know and beliere the truth of snch etstemcnt.
is stated that a gallon of the fruit will make a gal 10n of wine, which ts fuconsistent withont a state
ment of method of the mannizcture, as the zeed
and other fragments would measare something and other fragments wond neasare somethars
course; and for tie vine to yelel from three to
five barrcls of wine, (according to the statement) wonla make the sield of the rine to be from twelve
to eighteen bushels of fruit, whick looks rether large. Perlanps our Canada friend will give ns
the desirea explanation, - A. H., East Hamburgh Eds. Rupal:- Since writug (to the Resal) my
acconnt of the New Tine Grape, I have been cono
stantly besieged by inquirles from different parts stantly besieged by inquirles from different parts
of the States and Canada. I am asked 1 I had any of the States and Canada. I am asked if I had any manner or cun wation, sc. ace Non, Nint in you the same medinm that they receivel the first no-
tice of it I have no plants to sell; the fow that had are engaged. 1 might, however, supply 1,000 in another column of this paper. Caltivate the same as auy other graye, with this difference-do
not prune it as nuluch as other varieties, and conseqnently tite
manure,

ghould be left outried whereby we mas prevent their destraction. Different plans have been menYon will, therefore, permit me to add one other to

Vines?
Onr apple crop is very hesvy, better than for
sereral jears. Cherries, rather light. The peach tress are mostly killed in the openings, bnt we
thall hare a good crop in the timberen land.-J. B, shall have a good
Colaicater, Mich.

1. Yes. The seed should be sown carls in the
spriag in drills an inch or so deep, aud the row eighteen inches spart, The best ground for the and
are op the groand monst be well as worked. The
lants may be taken from the seed bed either plants may be taken
one or two gears old.
2. Celery is naed principally as a salad. It
good for Davoring sonp.
3. Canlitiower is simpl
Care slould be bad that the head is not broken in $\stackrel{r}{\text { rally }} 4$. 4. Runners should be cat away as soon as the
commence to form in the sammer. You will have to go over the beds several times; particular
when the season is wet.
 It growing, sad do not know what it is. If you
can gire ns a little light on the sabject fon wil
much oblige - C. Bracastr, Roskester, Fultor
 Ensope it is more generally used The footatalks and the midribs of the leaves only are nsefal, and
are used for stering, sonps and salais in anto and winter. The plant reqnires llancling, like celery; and it is, therefore, planted in a similar taiued the heigha of ahont cighteen inches, place
a stake three feet high to each, and tie the leaves loosely to them to prevent their being broken by
high winds. The earth muast then be drawn np around the plants, and this shoald be repeated as
the plaut grows, as for celery. In the fall the the plaut grows as for celery. In the fall the cellar, in beds or boxes of gacd.
The most approved method of cooking Cardoons
is to select the solid leaf stalbs and cut tbem in pieces abont six inches long. They are then
boiled in fresh water (withont galt) nutil tender boiled in fresh water (withont salt) nntil tender
when they are taken ont, their stringy coating scraled of, and planged in cold water, where they
semplu until required for the table, when the aro heated and served with
other bauce to suis the taste.

## PRESERVING FRUIT-AGAIN.

Ens. Rubsu:-Mrueh has already been said, and
mneb more may well be said, in referenee to pre serving frits in a fress atate, if it will e enlighten
the public mind on the sntiject. But when all the theories have been diacurased sufficleotly, withont settling the question fully, it will be pradent to
test practieally thoae which seem plansible, and et experience, the greatest of all teachers, settle
the question,
Your Philacelphia correspondent in tbe Rirai
of August $22 d$, ia his partiality for the selfsealing mesels commits several errors Tie would make prefered oruinary gach thing, but stated explicitly
whan I sid
what style of hoottie was desirable for the purpose. He stetes further cteat "monld has never been

$\qquad$
$\qquad$
$\qquad$ them. And the carrants preserved in tin st the
for snimmer nase, every one was covered more or
leas with monld; And of those nsed in the minter
previous, abont one-fourth or one-third were more
or less mouldy-while those in botiles Eep: for sammer use were mostly without any monld; and Where there was any, the surface being small, very
litte froit was dama bed by it The tin cans with
as moold as readily as the jars, znd both mueb
niore than bottiog.
And as to to convenience of puting ap, a per
son may cort np from tro to fire botiles pe
n m3y corl np from two to fire botiles p
minate if the corks have been previonsly wel
fited, and they are readily sealed in the most pet fect, manner yy tre raing the top of the bottic after it is corsed into a vessel of hot sealing-wax, which
should be at hand, and which may be very cheaply
made of tie best kind from abont seven or eigh parts rosin and one part of beesmas. In order so
avoid any pasticular care or nicety abont fitting the corks to the botles, I have procured the con qake for me a quantity of bottles with mouta 1 distazee from the top to 19 inehes, (ivhieh is large
enongh for peaches and all ooher fruits whea ooked, forming a flange or shoulder below which
he cork cannot gettle or be forced bs the the cork cannot settle or he forced by the atmo
pheric pressure on it. It is said that if there should be any defect in
sealing a jar, it at once slows itself, so that the
vessel may be opened and tbe froit remored to vessel may be opened and the froit removed to
another jar and saved. So, if the botrle contain Prnit imperfectly prepared or put np, it will report
itself by throwing the cork ons withont injury loss to the frait. Comparatively, we have justainat
od loss or damage to frait in the cans and jast more than in bottles of over three to one, while bottle re cheaper than either.

## A NEm FIRe LadDER－A Cincinnati mechauic has invented a new description of ladder to be

 nsed at fres．Its tuility was practically demon－strated in that city few dags ago．It is made on the exteusion principie，occepsing but a smal space，bat can be extended to the length of 75 feet
It was driven to the sonthe east corner of Sixth and
Walnat streets，placed in Waluar streets，placed in position，and by simply
turning a crank，it shot ont oue reach after ano－ ther，and in a minute or two，th hooks were
hitched over the ive atory building there located， and persons were passing np and down the mhole
distance To the upper end of the ladder a prle is attached over which runs a rope with a basket
at one end，which is easily raised to any window 3t one end，which is easily raised to any window
underveath the ladder，and persons takean from or pnt into the building．Its advanta ges are，that it is ught；easily drawn by one horse，is readily ex
tended；is longer than any ladder now in ase
and is adapted for easily yremoving persons from burning buildiags，a ter escape by stairs and doo

Rapid Photocraphy．－Experiments were mad in Bombay in November，1856，for the parpose o
estimatiug the limit of the photogenic action o the direct solar rays，and aleo，if possible，to mea are the diameter of the sun within a small frac－
tion of a secocod of angalar measarement by com－
竍 bining the photographic and the electric tel
graphic processes，emplosing photograpby to est mate the element of time．The general resalt of
the first experiment is that it reqnires an exposnre the first experimet is，that is reqnires an exposnr
to the direct light of the san for only one twenty a plate costed with collodion an impression，whic may be completely developed by the ordinary Interesting to Dentists and taerr Patients． －D．J．．．Francis，0f Philadelphia，has invented as a relief to tho paiu of extracting teeth It is a
combination of the ordinary forveps，with a gal－ the tooth may be caarged with the galvanic influ－ ence，and its sensibility be sugperded．In this
condition the extraction will be withont the pain nanally accompanying the drawing of a tooth in a
high state of inflammation．

makes rarfare with hismakes rarfare with his own spirit ere he ventrres
to upbraid saother. The warrior may lall beneathto upbraid sather. The warrior mas fall beneath
his plnmed ceres upon the vattlefield; the states.man win for himself a name among the annals of
the graar; or the poet, like Brizos, may build forhimself a teaple of Fame, each and all seems toforget the trne object of existence
Life is indeed a nerer-cessiug st
ever-tirunging images of evil which continuallythrong our pattisas, consisting not merely of some
ontwar coulict but a continned watchfal strife- a strife with our own onsabdued feellings whichoft times seem to war with Natare and with God
There are many who tread the bnmhler walks oflife who sre dails becoming more noble and goodin the sighr of their God Dy sllencing those feelings
of discoutent which often arise; while others, insome higher station, iespariring of acquairiug both
the congnest of their spiri and a sonuding namethe conqnest of their spirit and a soluding name,
cling to the last as mith the steuggle of a drown.ing mau, while they relinquish the former as of
Ittule value, forgetting that "he that ruleth his spiritis bette: shan he that taketh a city," and that in"the roaghest casket often glitters the brightest
gezu," There ase those, slso, both of high and low
degree, who in splrit follow the example of Himdho in his conflict throngh the loug night watchesnever faltereal, though the "sweat as it were great
no
drops of bood falling down to the grond.! Sodrops of blood falling down to the ground." So
they, when the lour right of Hite has passed, are
grided to the celestial portals by the ssme bandwhich strengthencd the Redeemer in Lh/s hour of
agoag. An entrance is granted to these wearyones- to them Heasven's first welconis is the dawn
of an Eternal Morning
of an Eternal Morning.
Oberiin, Ohto, 1855.

Tur past is disclosed; the fnture concegled in
donbt. And yet human natnre is heedless of the doubt and yet human natnre is heedless of the
past and fearfal of the future, regardius not the
science and experlence that past ages have nn.
veile

Aftreflymir Ants 或 Sirmce. COPPER IN THE SEA Sous five years ago, two French chemists
demonstrated that the ocear contained a notable portion of aitve. Pasennly coese and other phi.
losophera hasy ugnin heetu st work npout the same they now tell us that, calculating the whale ocean,
it canot contain less than troo miliono of tonno of
silver in solution. The sruth of this statement is it cilver in contation. The stuth of this statement is
verified by experiments tried at parlons parts of the world-one more famons than the rest hy Mr.
Field, an English oltemist, who Ivea at Coquimbo, in Chili. The water he analyzed was taken from
the Pacific Oceann, and atoroded the eame reanlt as
that which the French that which the French chemista obtained from wa-
ter taken ofr St. Malo. Fisacee, in the English
Chanel Channel. That the ofean shonld contain minnte
portions of every snbstance of tine clobe that i portions of every snbstace or tae globe that is
solnble In saline water is not tanprising; therefore
we ere, in a measure, prepared for the further dis. we ere, in a measure, prepared for the further dis-
covery that the "old grey beard," ocean, contaius cently proved in the laboratory of onr London conuriontor, Mr. Septimas Piesse. The beautiful
bine color of portions of the Mediterrean Sea is
die the greenness of other zeas is owing opper, ochlo coppar being sanpended in the aflnity. Grannlated waves," any
ilver salt tlast is contained therein is decompose silver salt thas is contained therein is decomposed,
a portion of the copper is dissolved, and the silver parted by the ussal nieans adopted in everyy labo-
atory. By a happy analogy, UIF. Piesse separated copper from the sea by the same proces. His expermuents were performed between the ports of
Marseilles, on the Frerch Yediteranean coast,
and Nice, in Sardinia. A hag of nails and scrap
$\qquad$
$\qquad$
$\qquad$
$\qquad$ Mrr. Piesse is continuing his experiments, and we shall not fail to notice what is going on in his
aboratory, conceruing this singalar and wonderfnl Wrise Rigang for Shres. -The Liverpool Cour
 ne-half tie bnik of that made of hemp, and th ost is siso 25 per cent less. It is mach loss sn
ceptible than hemp of atmospheric changes, and is is predioted that in s fews jears it will snperceede hemp rope for standiag risging. A trial of wire emp and Iazilla ropes was recently made st the
Kingss dock, Liverpool. The straicing tests shomed the immense saperiority of wire rope oreer that
mude even of the best fibrons material. The test. Tanilla to be far superior to Rusgian hemp, takio many of the merchants, ship-masters and rizgers
present by zarprise, as a difierent opinion had been entertained by many of thoss gentlemen.

Calorio Evariss. - Mr. Eriesson does not de-
pair of sueceas in applying the "new motor." H is said to hare baitt eight small engines, on th hot air pricciple, since she esperiment with the
Ericsson steamship, and to be still eugaged in the pursuit of his favorite staç. The Scientific son a small steamer, or aip-cer, abont seventy feet
loug, which he bas sncceeeded in driving at a, good rate by the combustion of an almost incredibly
small quantity of pine hindling wood. There are two englnes, horizonts?, siagle acting, and apparently sbout thirty inches diameter by thirty-six
Inches stroke. The vessel is an open boat, or mammoth yawh, and the paddle wheels are abont
ten os twelve feet in diameter. We believe air rate tho poiner.
Pristing Textile Fabrice by Liget, - The choomatic photoprinting process is an ingenions action of light. It is designed to employ the
okemical asency of light ia dyeiug or staining textile fabricas the cloth, whether wool, sllt, fax
or cottou, veiag drst steeped in a snitable solution, or cotton, being dirst steeped ius snitable solution,
then dried in the darl, and subseqriently exposed to the sction of the patern being protected by pleces o
darkened paper, or some other saitable material darkened paper, or some other saitable material,
attached to a plate of glass. When the desired
effect is produced-she time for which varies from effect is produced-the time for which varies from
foo to tranty minutes, accosding to the procese,
the fisbric is remored in order to undergo a fixing Rslation of Inventione, -The Loudon Critic,
noticing a recent invention of appareutly little consequence, ases the following well chosen simile:
cilet erery derelopment of thought and every adaptation of thought, be enconraged and wel comed, even thongh its nlimate uses-we mean
those uses which the mas of the day can seeWere as distant as gravitation and lunar distances zeometers, whict were resdy to band when wan ed. Those who decry the highest to to e becasse
snpparts nothlag, are fortunete in one poiat-they Will slways bare aomething to decry. Those who are busy in rasing the next stone, will ind them
another job at the very instant the old one is fin.
ished." Invention is the talent of youtb, and jndgment
of age; so that our judgment grows harder to pleage, shen we hare ferwer thingroto oter it this this
goes throngh the whole commerce of life. When we are old, our friends cind it dificoltt to please
ne, are are less conceried whether we be pleased

## CHE שratelet

WANDERINGS IN EUROPE, -NO. V.
Trip from Hendelberg to Frankfort.
[Concluded from No. 401, page 27i.] I W 18 suxions to reach the Main hefore night,
and suoordingly left this valley, tuking a shorter
road aoross the hills. Tpuon inquiring the way of a peasant, I learned that the distance could bo
shortened atill furtuer ly following a foot-path which I wontd tiud apon emorging from the forest
befure me. He directed me to torn to the left, but before me. He directed me to nitn to the left, but
as he was going in an opposite direction from my-
gelf, I mistouk the road nnd was led a mile or two out of the way. I inally carme down from the hills
into the valley of the Main, where I found the ai lamp and mooh warmer. 1 passed on in the dlarkness over the level road towards Aschafferlurg, a city on the frontiers of Bavaria, within a corple of niles of the city, the stage oach overtook me, which I hailed, and took a seat
on the top. In a few minntes we crossed a ston ridge over the Main and eutered tho towa, It sav ne towers of the castle dimly tbrough the darks Fere many people and soldicrs in the streeta, along
phlch we drove rapldy towards the railway staion. I was glad enongh when seated at last in the cars and speeding along the level valley towards
Fraulf ort. I fell iuto conversation wich a merFrankfort. I fell into conversation with a mer-
clant who was going to attend the Farir, and when
we arrived at the station we toota a coach and drovo to the same hotel. It was full from top to
hottom, but the landlord procnred a room for me a a privito house close hy.
I had come to Fraukfort for the parpose of gur
Ing my passport algned by the Austrian Minister
 ican Minister-whose sigriture was also nece
sary-residing in the ciry, und said that I mast g
 help me out of the difinnity. He informed mas
that the Auturesgdors at Fraikfort were extremels strict, patily hecause it was a free citt, and partly
because many travelera came there for the same
parpose as mysalf, and as the other anthorities
 ith ont mach The great Annarl Tair was going on lyrfakly,
Booths wera erected in the market places an Booths were crected in the martet places an

all beeanse of those Blissse Flowzrs.

## MEN AND WOMEN

Woarss in thcir uature are much ronre joyons
than men; whether it be that their blood is more than men; whether it be that their blood is more
rcined, their fibres more celieate, their aniual have imagined, there may dot the a sex in the ver
soul, we shall not preteud to delermine. AB vacity is the gift of woman, gravity is that of men npon the particnlar bias which nature has fixed i their nilidn, that it may not draw ton raneb, an
lead them out of the paths of reason. This wi certainly happon, if the one in every word and ac tion affeets the character of being rigid amul eevere
and the other of leing lribk aud airy. Men shoul bevare of being capuvated by a kind of savage
philosophy, women by a thougbtless gallantry.
Where these precautions are not observed, the man Where these precautions are not observed, the man
ofter generates Into a cynct, the woman into a eo quette; the man grows snlleu and norose, the wo
mand inapertlnent and funtastical. Taking these faots as a babla for our premises, wo may conelnd
than men and womer were made es counterpart than men and women we palns and auxieties of the unsband might be relieved by the sprightllacs tempered, care and cheerfulness go hand in hand and the family, like a ship that is dul.
wants дeither gail or ballast.- Selected.
 has willed that man shonlu be the head of tho hu
man race, even as woman is its heart; that he should be its strength, as she is its solace; that ho
should be its wisdom, as ahe is its graee; that h
should be its mind, its impetns, and its courage, should be its mind, its impetne, and its courage, as
she is its eentiment, its charmand its cousolation

## HONOR THE GOOD.

Tres true basis of distinction among men is not stances of life, bnt in tho conduct. It matters not
how eovisule a poeition a man occapies, nor how how enviable a poaition a man occapias, nor how
nuch wealth he has in store; if there be defects ration and respcct dne to oue who is his suplerior
in a noral point of riew, ehongl he posscases sives ns place, but conduct which makcs the solid distinction. We should think no man above us
but for his virtucs, and no man below ns hnt for his
and vices. Entertaining this view, we تould seek to
emalate the good, though it be found under a consse exterior, and pity the cvil, thongh Woold never become obecgnions in the wrong
plice.
Call no man menn, low or vuigar because be tills Whe soil or stands before the work-bench; for in much superior to the C'resident of semo bank or the rlch natoo who dwells in yon miscrable
pilace. The virtnous and high-minded sons of toil are lovers of truth, lovers of nature, lovers of each nor to be the reclpfents of enperty honors; bat they werl bark.

A Biautiful Fatrin-" Beanutifn, excoeding

| Wagive a fine engraving of the White Doyenne Pear. This la one of the oldest, and best years, and is more geuerally cnitivated in Western Now York than any other variety. The preminz, offered at the recont exbibition of the Geacsse Valley Horticultural Society for the best dish of pearz, was awariled to this fine popalar sort. Our market is weil suppiied with thls frnit, and we thick wo shonh not excecd the trnth in stating that as many busbels of this sort are groma and sold in Thestern New Yosk as of all othur sosta combined. On the seaboard it sometimes crachs, and for this reason in the Eastern States, ayd vear New York it was for many jears considered alcost worthleas, butlatterly the Boston and Other Eastern growers have prodtced it in the greatest parfection. We have lueard complaints of its cracking in somo lacallies sn Western New York. This anblect wes brought before the American Pomological Socicty st its last meeting, and the following opinions were expressed by the members: <br> Mr. Fipld, of New York city, had sacerianed that the fruit was not so liable to crack on the quince as on tho pear. Mr. Hodoes, of Bnffalo, formerly thought it first rate, bnt op late jears it is so much specied and spotted as to be almost worthless. Thonght it required a verg strong soil. Mr. Hose stated that at Lockport, N. Y., i सas as fine ss need be on a light soil, or ons sy soil. Mr. Rern, of New Jersey, thought the cracking was a local dlseese, not dependent ou soil.Mr. Warren, of Genesee Co., Eaid he had sectit cracked on the lear worse that on the yuince. It ancceeds Enefy in Gonesee Co, in this State. Mr. Canor, of Massachusetts, thought we should have to abandon its coltare on tho pear root, bat ua the quince is is as good as evor. J. J. Tunyas stated that Mr. Frossans, of Wayne Co., had planted an orchard of 2300 Virgaiien trees on quince root. |

 accustomed to be tleeced by our Trans-Atlantic
friends, before we had the plang drawn ont on the same esale, or we taink we fhonld have hesitated
to mazke snch sn expose of orr delliencies, but
tha plana being propared and promised to our readere, we feel bonnd to bring them to the light,
let the consennences be damaging an they may.We had read of the sizes of the varions rocms of
the Anuerican office, 33 pated in the pablisished de
sctiption of it, and we had eeeai the plant; and, farther, we knew well the ins and outs of our own
Patent Office, bnt never, untit the plans were placed aide by side, did the comparison appear so ridicn-
Iona. We do not say that some of the closets of
the tho American offico are us large as on patent 1 l
brary, bat really the space oconpied ${ }^{\text {os }}$ tre entire bailcing is so yastl| greater than our own little
jewel in Caancery lane, that we are at 8 losi to
know what nse can possibly be made of it it is krow thas the plan of the American office, as we
trave given it, is not yet completed-one portion
hat having to bo bnilt, and other portions being occu-
pied by diflerent departments of state; yet for all pied by dilllerent departments of state; yet for all
this, the vuilding was designed for the Patent of Ace slone, and to the parposes of this office alone
will it very shortly be devoted, so that we may
justly conclude, from the size of the entire bailding, What viens the Americans entertain of the
importance of the patent bosinass of their country fined thet we have recommended the attendanats to Wear saring shoes, so that they would, after a lit-
tle fractice, be able so jaup over each other's heads; there being no soom to pass between the ting st the central table. Wib respect to th
Etore department, there is onfy sulicient roomi
 ations of the patents granted ender the old law does not exist, except iu one of the boflers at Ken-
siagton; and as recent events give signa of an exet been discorered -it is not impossible that the
codels may again bave to be placed in their r spective cares, and co especially when we consider that the patent fund
notwitbstanding the excessive fees of the iaw of 000, Patentees will never, as was as one time sng gested, Lave any part of this land eeturned to
then, and why, we mant to krow, Fonld it not be as well employed in bailding a s The business dore in oar Patent Ofice is no less inportant than that of the United States of-
feef shen what mases the diference in the riews
enterianner as rothe anoultor space requirea for the proper tranaaction of that bnsinees? The real
fact, we suspect, is that no dillterence of opinion exlstt ax to the space required, bat there are some
nodetned uses to which it is dapposed the acc andelned uses to which is sapposed the acc time has nor jet reveaied. We bes to saggest that be nothing more than that the rhole fand, if necessary, should he expended in building a new
Patent Office, containing ample space for every department, including a maneam for models; and We ventnre to hope, fnrther, that the revelation
wi!l ahow tizat a sitnation near Chancery lane is in every respect the best for such a building. - Lon-
CRYSTALLIZAmION.

charity it is neeessary to appeal to the sympathy of those who conslder it a privilege and a dnty to do good as they have opportanity.
Rochester, Sept. $28,1857$.

## HOME, HOPE AND HEAVEN.

Truly has one said, "that three of the swretest
words in the English langnage, are Home, Hope Words in the English langnage, are Home, Hope
and Hearco," and particnlarly it the last two is an earthly bomae, a quiet, sheltered spot, where the birds sing their joyons songs in tho grand old
trees, and the flowers, kized by the sunlight, never trees, and the flowers, tipsed by the sunll ght, never
ceese to bloom, from the first warm days of Spring, eharms-a home where the loved ones are gathered
with thcir sweet smiles and pentle worde, from which the great world with ite sorrows and temp But ah! bow many have fiad ench a home, that have it not now, nor ever will again on earth. The
Augel of Death hovered over it, and one after
auother of the family circle drooped shadow of his wing, and went ap to join the re deemed in hearen. Time wronght its changes, an paths around the door stone are overgrown with grase, for the feet that daily preased them have
long trod the streets of the New Jernasalcm; stran gers gather the frolt from the orehard trees, for
tho hands that planted them bave einee placked not can the tree of life rais lian any of eare hope? Can any gorrow, however heartecrushio it may be, take from fon's beloved the sweet res
of heaven? No, no, the afflcted; the sorrowing may hope still; and for the tempted, the tried, an $\underset{\text { Wrepared. }}{ }$
man heart, then roald the mopal from every hit of $t$ the world he turied into the blackness of deapair for elements are warring in anger, aud his ship trem
bles like the merest tny apou the billowe, boping

| ty. Hoye fs the whispexed watclursaru of the sonl in the żarkest zight of sur row-itio beantiful star that shincth ever ami $\lambda$ the clonc̈a and tempests of earth. <br> tear ace, realer, like maly another, you have and hushed lipa, the still, loug slcel of dcatb, and froun her yon learned the meaniug of the words hope and heaven, as yon never did be fore-for there are trnths that we learn nowhere so well as by the dying bed, or the grceul grave of one we lovo. Through all the bright sprthg dass bue faded slowly, bnt you never thought that she conld and gently, lest ṭt should break your loving heart, told you that she shonld leave you soon. It was a beantiful evening in the early summer, and yon had drawn her easy chair to the open window that light stesling over her white dress and resting like a glory on her brown hair, 解e talked to you of the home to which she was bastening, told you that it Was more beautiful than the gold and parple clouds that lay against the western sky; and while you listened, you forgot to weep, for you conld almost see fts jasper walle and gates of pearl-conld almost see how she would look when she had en- tered into its blesed rest. There followed for her days of snfuering and long nights of waking, bnt a hope not of earth enetained her, and spread orer her wan fivee a holy loot that told of the peace within. <br> With the fading flowers and falling leaves of antumn she passed awag. Jost a little hefore she died, lier baptian of suffering ceased forever, aud the meelk spirit went gladly op to the land of love. The gras is very green over her grave now, zud when yon are and and weury with the great sorrows that come to crery heart, you go there and think long of the gentie one who Eleeps beneath its tarf. There come to yon then sweet risions of beasen with its shining streets and glitering walls; you remember there is no night there, no fading low. ers nor failling leàves, no pale anç wasted forms, and not a grave in ell that beautifol land; bat the of golud-theese is a soft fowing river and crowns of life with its healing leaves is ever fresh and green npou its banks. In soch momeats as these you feel that the words hope and heaven are precions worde whose wurt camnot be told; 50n gems nor prccions stones. F. स. Brockport, X. Y., Sept., 1857 |

THE TWO $\begin{gathered}\text { For Soorros Raral Nes.- Porker. } \\ \text { NAMESAKES. }\end{gathered}$

Mr. Everett's Andrbss at tirk Statr Falr we fear will not soon be equalied. Speakiag of it
the Ruffilo Advertiser remarks:-"It is uot too
maoh to say that this lost effirt of the accom.
plishod orator is equal to ayythiug that he bas yet plished orator is eqnal to anything that he bas yet
given to the world. Those who were frituanto enoogh to listen to its delivery will cortaialy coin-
cide in this opitiono. Nothing contd have heen more appropi1ite to the ocolsiou, more complete
in overy part, and mors tiohly freighted wilh nohily ideas and brillisat passages, Io its practical the aldross will stani unequalled amongst, similar froductions, ensllug the past into the shade and
furnishing a model for the fature. It would not he sali, factory to onr readers, nor hir to ar. Evc.
rett, to snpply an, thing lite a sketch or the aldiress pa ay portlon of is to ricior alone, stribisiagls beantihalf its charm. Still, there ure of coarse certaiu
 the migoilicent denanciation of the doctrine
whloh holds that a miracle cannot be Forked uyon this earth; the alluaion to the heroes of former,
and the great statesmen of our own dass who devoted zach of thcir time as was no given to
their coantry, to agricultural parsnits; the wither-
ind street; tho comparison of the $£ \in v e r$ of city lif aith the oalm repose enjoyed by the diweller in the
conntry; and the picture, unrivalled by the pencil was bronght to as close, and which impreased ns
with the idea, as the volce of the that wo bad jast turn
a beantifal painting,"

Crors in Eurors, - The London Economist say
The Eaglith wheat crop is remarkably good, of
 the produce is from forty-ix to fifty-ix bos'rels
per acre. In the Millard districts the yield in fortyern and western districts the growth, may be consliered the best on record. Hence it would be no
exaggeration to state that England has producel this year nearly, if 10t quite, eight million busbels not antioipate any great rednction of price in conprobably he a proportional increase in consump-
tion onatage has commenced in eevoral parls of
rom France, The wine is expected to be of excelle
qualicy this year, and in many places large in quantity.

THE SHELDON PEAR.
 ne of your readers to see a description of the fine withoat any color. Flesh - remarkably meltin Sheldon Pear in your
Palmyra, 0 ct, 1857.
The Sheldon is at least one of our very best
pears. It is of exceedingly high flavor and yen juicy. We once lieard a gentleman remarb on would malke a monathfol than of thay variety he had ever eaten. And this is trac. All the farest faspors of all the best pears seem to be concentrated in
this fruit. This pear was raised from seed brongh from the east, by Mr, SubLDov, of Wayne Co., ifter Whom it is named. It does not anceeed on the
qnince, but donble- Worked, or on the pear stock, it shonld have a place in every collection, no matter
how small. Oar engraving is a very good portrait of a specimen rather under average size. Form-generalty ronndish, bat varying much;
sometimes quite ronnd, otbers abopate or inclining to oral; ; bome taper to a point at the stalk,
and ohero are as broad at the stalk as at the
 giallow basin. Skin-smooik, nanslly of a green-
ish russet; some specimena are tinted with red on

artifictal wialebone.

 deadly assailt of the harpoon. Arriltcialls made
 dacts for porposes of illanination, sud now by a
somewhat recent discovery the bone of the whale is no longer needed to supply our urabrella and akirt-masers aith 85 eloton frames, In 1855 , Jo
 Whalebone. The process has been put into prac-
tice by a frm in New York city, who are tnriog out abont twenty thonsand nmbrella frames every week! It consists in taking sticks of the common ratan, and soaking them in a liquid estract, for abont fonr days, after which they are fmmersed in
a solution of any of the iron aalle, which gives the ratan a deep black dye. Snbsquently the
stickza are exposed in a close vessel, for the space of abont one hour, to the action of stesm of spoont
three or forr stmospheres' preseure, and tien thoroughiy dried in a furnace or drying room at when they become ready for the impregnating

The sticks are then placed into an iron cyl idder, (capable of standing lie pressure of at least
ten atmopapheres, connected by a pipe with an ing 120 parts op shellac, and 200 parts of Bargno dy pitch, in 90 parts of absolute alcohol The sir having been exhansted from the cylinder, the
cock connecting it with the vessel containiug the will foree the rarnish into the cylinder and into the pores of the ratan.
The impregnation of the ratan is rendered more
perfect by the use of a nump for forcing the solnperfect by the use of a pamp ior forcing the solu-
tion into the cylincer. The ratan has now chsagfroma the best quslity of whalebone, except that it is somewhat more elestic and less liahle to splinter and break. It has gained oze tundred per cent in weight by frpresnation. After being re mored from the cylinders, or impreguators, bat
little remains to be done io the way of drying polishing. sud filting the ende, \&c., to prepare it for nee for nmbrellse, parasols, sce.,
otter purposes. - Scientifc American.

## CONSTRUCTION OF STOVEB.

Tur desirable points to be secrred in the con
straction and management of stofes, are, first ready contrivabces for regulating the drafc; sed ond, accurate tilting in the joining, doors, dampers
and vakres, to prevert the leakage of fonl gases into tise roome ; third, inclesnre of the fire-place, with slow condnctors, as are-brick or stone; foarth, a high tealperatnre, attaized by the rapid and per-
fect culutaztion of the fnel; and, Ath, to bring all he bested prodacts or the combnation in contac ita the largest possib:e aisurbiug ani radhating
etallic surface, so that the iron iu contact with he air may not be overheated, but give out ita armi at a low temperatare Larye stoves, noderately heated, are therefore tove, or the nearer it is in temperatare to the ai will be its indnence. This desirable resall is to be itaiced ouly by exposing tue greatess quantiey of heating sarface to the leaset quantiry of fnel-
condition almost reversed in modern stores. ermany sid Rossio, stores are commonly mad entrally made to trcject into the room from one door for the fire being sometimes in an aujuoining apartment. These stoves heat more slowly, and

## IRE BRICE

Tre materials requisite for the mannfacture of
good fire brick are very pleatifui in the United kaolin, the resalt of the decomposition of feldspathic rock, witah is very common between the
Allefhany mouatains and the shores of the Atlanic; and itis more aconuantin whe Southern tosn
ot the Raytern and Nortuera States. In the eregion
of the Weetern coal deposits, an abandance of in one cr other form, aboundis aslso is the Wester
Stares. Io this convection it mas he remathe Wat when fire brick of a fiaer compcastion are re-
gired, it is necessary that the materials should be he refractory yature of the brick sbould he pare

Yes, woman has power to mold the elements of society and make them mingle in barmony, or she may soatter far and wide ibe germs of discord and
atrlfe. She may canse virtue and religion to be respected, or vice and immorality to rule the
hearts of muen, She may encourage lonesty, in dustry and temperance, or swell the tide of im. The daughter end the sister have their influeuce, fiourigh in oternity. She stamps the linos so indolibly apon that young soal that all the water-
floods of Time eraee then not, yor stern Death fiooda of time erase thenn not, yor stern Death, as
ho pornses them when he geals ap the feroll of of yon ocean boy in his lonk watches? What is
called up from memory's store-louse when the hillows are ōushicg high-when the storm-spirit rides o'tr the face of the deep, and there's buta a
plank between him and eternity? The honrs of oblitaluood, thie evening prayer,--taught, perhaps by a sainted mother, -are again in his eare, and he
calls npon that mother's God in penitence and
tears. In yonder ligh.walled prison there is a atern.
visaged man; critee has blackoned hls heart and steeled it to suffering and sin. The love of a Re-
deenier, the joys of Heaven, and the terrors of remorse are heard unbeeded, bnt the nsme of
" mother" muves the adamsnt and conqners vice and price. Then does not woman's mission mos
sarely commence at homine, where aronna the fireside
circle are clustered loved and cherished ones? Tis hers to cheor the droopiog spirit there and arive awsy the loote of anstons care. 'Tis bers to
soften all the little woes of life and make of home (that angel place) a hearen of rest-a praralise. Woman's nutive place is not npon the stage of
public lif in leglstative halls or ministerial ranks
nor in faany of the nor in maany of the nnmerons positionn so univer-
saliy allotted to man. Not becanse slle possesses saliy allotted to man. Not becanse slie posssesse

## GOOD ADVICE TO FARMERS.

In an aecount of thc recent Wyoming Co. Fuir,
published in the Warsaw papers, we find some re marks by the retiring Presizent, MNj. Hvan $T$.
Brooks, which are Brooks, which are so that wo transfer them for
pertineat to the times, thend
the benefit of Rurareaders-as follows: "There is one polnt affecting sour material in. terests npon which I deera it proper to offer a re-
mark or two. Mones is scarce and prices aro gettiug low-well, you mast pay for what you want
with what you bare-the merohaut ninat take your bntter and beanes, and send them to New York
in exehange for codfish and calico. Yon mnst curtail in your meats and your driuks, patch np
old clothes, and varnieh over old favitare- the fashion plates mast be sent to the Quakers for revision, and every "hoop" must be made into two.
We magt all gpend less and work more. Bnt this is not all; exigencies of the times demand mntnal mercy as you hope to receive it. If yon have
meane use them dibereelly and humanely. Don't keep money sdie in your pookets-1f you don't
owe bills that are due, pay those that will become dne; huy now what yon are golug to need, for now
is the time to boy cheap; and tien if son have money left, land fit; I beg pardon, bnt you can find
sometiody just as safe, gutu just as houest, 8 s yon are, who wonld put it in circulation.
The Bayks jast now are prominently hefore the
public. Recent developments illostrate their intimate counection with the bosiness interests of the
eountry, aud the fearfal dependence of commercial men npor them-certainly great tesponaihility
is attached to their management. Bnt the prlilic mnst keep good faith with the banke. If you trke their bills, or deposit your noney with them, yon
thereby espress some taith in the integrty of their officers, and sume confidence in the Eccorities and
guarauties which the laws have imposed for sonr guarauties which the laws have imposed for yons
sefett. You are not oxcusable elf yon ehange your mind sudacnly,
you take no pains to verffy comemence tor ran ap.
on them for specie or deposits. Capriee in this case is a crime.
It is well anderstood that deposits are to bo loaned oat to \& certain extent by the bakke, else
why shonld they icur the trouble aud rigk of
taking them. Your boginess men
 positors make a surdden zush for their money it
creates an emergency that the beat bank iv ollisla. tendoim may not be able to meet, and I may add onght not to be reqnired to noeet, lhe rair vnder-
standing is that the money is so be calld for as
four necessitics, sud not your jears, shall dictate.stard necessitics, snd wot your fears, shall dictate.-
If yoa are constitutionally timld, and are lishle to act without eense or jastice, jou pre bound to get
a garaician appointed to goverr aud restrain you
 The pribic eafety; othervilse put yonr bllls into
gold, azd the first dark night go ond bury it in the earth, and let no one share lhe seeret I take
pleannre in saying that the kanks in this vleinlty -the bakks of Wyoming and Gencsee eoantiesare all of them, without exception, perfectly safe
and sound; if I bad ten thonsand dollars in nold,
I woold not hesitate \& moment to deposit it with either of them. I bellive the same confilence may be reposed in the lanks of the State generally.
Let ns then etrive to restore confidence, and ere a generous soil and improved calture, with the inlessing of Providence, Las furbished us.

## fruit farming pays.

Friend Moore:-Mol disconssion has been
had, and many experiments have been tried, to as eertain how the greatest proitit compared with expenditnre, may be reallzed from the same amonnt
of land with a given amonnt of labor, and I propose to give a brief atatement of a small cxperi ment
 year (the 5 th year from planting) 270 bushcls of
Pcaches no one dollar per minsel; and from lems than one-th1frd of an aere of Dachees de Angonwhich has previonsly borne over 8100 porth of Pcars, I have this year shipped to New York uls-

Tarmers of thly frnitegrowing land?

## CROPs IN WESTERN MICHIGAN.

 Eds. Rutal:-The plan recommeaded in thaRURAL of having each town furnigh a enmmary erops to the County Ag. Society of Its dibtrict, to
be publighed by the Society in Agricaltaral and other journals, is certainly a commendabie on the farmers would he in possegsion of valnalle in formation gnch as conla be obtained from no other soarce. By knowing the amount of the
productioas in the eountry, the farmer can ealen Inte with a considerable degree of exsctness
rise and fall of grain in the market, and of cours oar tell tat what time be had best dispose of h
products to the best ndrantage to himbelf. As products to the best adrantage to himbelf. As we
have not now reoourse to the workinge of this chances to come before ns. In vjew of this I propose to give a hrief gtatement of the crops in thi observation aud inquir.
Wheati-This erop on summer fallows is uot an
average yield, owing mainy to the snow leaving it hare in Febraary to the getlon of the frost,
Whiel csased it to heave to snch an cxtent that probably one-fontth of the crop was destroyed.that we will have enough for ho
and cousidorable sarplus besidea.
and cousidorable sarplus besides.
Oals - Were a first rate crop, aud as the guanalty ply. Corn-A better crop of this staple product of the West hrs never been harvested, and the as
sence of carly frosts have been favorable for th ripening of late plented.
Grass - Has not beenexceecied, cilher in qnality
or quanity, by any previons crop for a number of sears. Old meadors that hardly paid fur enttin
a year ago, have this season pronced well. clay or wes, undrained solls. From the scarcity
of sced last gping the nsal yuavtity was not
planted, yet the yield 1 think will oompare favor ahly with any previons crop.
Ryc.-The growth of this is not extensively en gaged in, but what I have been will y yield wcll. Thole, neither the quantity nor quality is so goc as heratofore.
more raised this ceason than any three ycars pre. injury from frost.

THE HEART OF THE STRANGER

and tones of thonghtfol tenderness. There was no
night when I did not lie down to sleep with a
a witffil memorg of the mother's loving kiss, and
the gentle "good night darling," that had eve
hefore been my last greeling at evening; no day
When in a thonsand things I was not sadly remind
ed of the far-off hoore, or gladened by the con
sclonsness that they rememberd me there
One who knows litite orallt this, a stranger who
never guessed at the passioute heart throbbio
 to mo, one das, "is your mother iting?" It was
simple quastion, prompted hy ide curiosity, bat
never can tell son of the horror it struck throng never I answered it qulekly, ana then in a moment
me.
Was sobbing in my rooml. "Was my mother living?" I had not thonght of the possibility of her dying
-had nover thonght what it wonld be to write my -had novor thonght what it wonld be to write my
nsme motherless. But now with the question the
dreadfal thought came like lightuing to me, and I aaw it all in an Instant. I knew then just what a
desolate wort it would be to me with no mother
in it the chlld she had
to cradle-dreams.
Ithonght or her letters-how sle wrote in the
young spring time of the violeta-sryy were jnst heginning to open in the sout
where the snushine lay warmeat nyon then.
oan atuell them," Etue wrote, "throwgh the oan atuell tiem," Ete wrote, "throngh the win-
dows as sit hero st my writhng. I have beno out
pulling. tho dead leaves away from thes, byt thay
 ald dolere al Lome. Thenin tie mellow antumn
she told me bow sie had leen ont by tho brook,
and across the brown meedowe, gathering wild grapes and the late fall formerss "EEverything i
very beantiful; the woods are in their foll glorg, very beantiful; the woods are in their frll glory,
and the $12 a p l e e ~ a r e ~ a ~ p e r f e e t ~ c r i m s o u . ~ I f o n a d ~ t h e ~$ friuged Gentian in the meadow, ard a few Astera
by the brook, bnt hircis and flowers are
almost gone. I thought mueb of jon, dear child, and
wlshed yon could have been witio me-I ame al. wlshed yon could bave been wito me-I am al-
ways thinking of yoo, alwaya wishius for yon, bot I trys to trast you with the good Lorn."
So I reviembered all her words of love, and-then with a glad beartsaid to myself, "Yea, thank Gon,
my mother is living. Slue has not forgotlen me becanse I have leff ther and gone out inco the great
toiling world. And when $T$ am old and weary and toiling world, And when fam
my brown heir is white and faded , weary, and child still, and if she he not ealled home to
angels, she will weleome mee again beside the angers, bhe will Teleome me again b
hearth stone, my blessed puother still
I have always remembered that hour, and never
can I ask tbst common question of the wanderer,
"Is "Is your mother living?
Once sinee tben, whon engaged in teaehing, I
aaid to a littie blue-ryed hoy of only siz years, "Yon mast nsk yonr mother to bny yoa a new
hook, Casker, will you?s hook, Chapley, will you?". The obild looked a
moment in my face rith bis great, wondering eyeer,
sod then quiletly went to his seat. and then quietly went to his seat. A little while
afterward I notlced him sobbing bitterly.

 cond eoothe the saggiizi I Ihad nneouncoriousl
conld
awakened, and longer still before I could forget that tearful niea, " $I$ woant my mother $/$ "
Readerl if you can atand by your fireside, and naming over yonr beloved see around yon every
gaswering form, or if long jarring and jostling with the world has made their absence an accus.
tomed thing, forget not to deal tenderly with the heart that beats fadly away from its stelterlng
rest, and waken by no eareless word the liought
of a dread pogsibility which the bravest shrlnk from facing.

Morgkrs.-By the qniet fireside of bome, the
trne mother, In the midst of her chlldren, ia sowtrne mother, in the midst of her chlldren, ia sow. Rhall sometime give to Heaven the fragrance of
their liossoms, and whose fruit will be a rosary of
angello decda-the no liest offering that she easi angelfo decdn-the noblest offering that she easi
malke throngh the ever aseending aut ever expanding souls of her chlldren to her Maker. Every
word that ste atters goes from heart to heart with a power of whlch she little drean1s. Solemn is
the thought, but mot more solemn to the Christian
mother than che thought that every word that fulls mother than the thonght that every word that fullis
from her lips, every expresslon of ber connte-
nancc, even in the eheltexed walk and retirement may leave an indelible impresslon upon the yonug,
soula around her, and form,
as it were, the under. lyiug strata of that edncation which people
heaven with celestlal befngs, ind gives to the whit
lrow of the angel, nexit the grace of cod, it
crown of glory. Traveler.

## 

TWO WAYS TO SAVE MONEY.

Tre following Eketch of real life so plainiy ex by meny of onr poople, that we glve it to the read er aimply as it oceurred, only concealing the real
names of the parties concerned. And as the story bears ittown
"reflectiong,"

John Poland and $\Delta$ nson L.yman hought farms
adjoining each other. The land bad formerig heen owned by one man who had carried on the whole,
employing a heavy force in the erork. When emploriends bonght the land it was ag equally di. two friends bonght the land it was as equalty di.
vided as possible; and after the line of separation had been run, those who bad worked mnch on the
land declared that they would not give the "toss land declared that they woald not give the "tons
of a copper" for a choice between the two farns, The old buildings were almost toselese, so new ones menced farming in earnest. They were poor, bave ing praid their last pennies for the farms, and
being obliged to ran some jn ôblt to get stock and tools.
In all respeets the $t$ too men commenced evenly onc son and two daughters, Lymon had one dangh "Look ye," aaid Lyman, $\varepsilon 8$ the two sat together after their farming operations werv commenced,
"I heve set my mark to aim at. I'm determined if I bave my healtb. to $\mathrm{In}^{2}$ up a t
clear of everything, in live yearg.
"That is rasher a short tive for such a pnrpose, retarned Polana
"I'm not going to wear my back-bone away for nothing. 1 'm going to lay up nores."
"SoI hope to do," eaid Poland, "bnt mones "Sn't the frase consideration.
"What's the reason ft isn't!" asked Lyman. "I fou bave money yon ean have everything. Mones
is the key that qulocks all doors-tho card thas admits you to all places. O
dollars, and Thl be content."
"So I mnst have a thousand dollara," remarked turn.
One day a man came alogg who had some aplen-
did young cactle. They wero of a pare Englisb did young cathe. They wero of a phre English
breea, or rather a cross betteen two of the best
breeds ever importea, and oame very ligh. Poland saw him passing and hailed him. Our friend wa nazious to grow a fine hock, and
rast commence in the rightu yay,
The owner of tae strok said he was willing $t$
sell, bnt he mast have his price. He had a fin young palr, male and fcimule, two years old, which
he wonld sell for two bundrod dollars. Polanid offred hid note on 81 x months, together witu a bill
of eale of the oatle as security. The owner we satisfied, and the bargain was made. The animals were bronght home, and
"Phenत" broke from Lyman's lips, as he bear
the price which his zeighbor had pald for the ne atock. "Two handred Coliars for a two-year-old
boll ind heffer! Why-what on earth could yon have been thitking of, Polaud? Why-I would n' My cowa will give as much milk and make as mnch butter and cheese. I tell gon plainly you'll never
see that thousadd dollars if you luanch out in tha
"But, ray dear sir, I'an" dctermiued to bave the
est stock I can get," retarned Poland earnectly; best stook I can get," retarned Poland earnestly have made it from Atock. I rasure you It is one of are content with simsll, poor cattle, when, ly s lit "Detter."
"My sto rea dolurs for a pair of two.year-olda, and one o buy one of the boit, when for Afty dollars I can "Yon have aright to yonr own opinions."
"Aye-and l'll have my thousund dollars, langhed Lymana, as o to tarnee dasay.
It was ouly a week after this that the canvesser for au agricultural ne wapalier stopped at Lyma
honsee ;but the lost conlon't afford to take it
honse; bot the lost couldn't afford to take it
"Hadurt you better"" venurce bis wife. fight our omn town and that's enourth, Yon kno right our opn town, and that's eacouth. Yon know
What I told yon, Dolly,-1 mnge have that $t$ tiousan

| Poland-he'll take angthing that anybody rs him." <br> l've calied on him, sir, and he told me l'u betstop bere. He said yon were taking no agritaral paper." <br> And did be subscribe?" <br> Tes-and paid me the money." <br> I tell ge, Dolly, Poland's thonsand dollars 'll <br> me cot minns-now you mark mp words." <br> Dolly Lgman said nothing, for she was troubled <br> that moment by the thongkit that her husband <br> sexercising a spirit of penarionsness which <br> ked mean; bat she did not say so. <br> "Hallol what ye doing?" cried Lyman, as he <br> Poland commencing to run a fence across his <br> d. <br> " Y 'm going to throw out jnst half of this field <br> to pastruing." retorned Poland. <br> "What?"' exclaimed Lyman, hardly able to beve what he had heard. "Throw of balf of your <br> ld! Why-that wont leave jox with more than ents acres to tillh:3 <br> "I know it,-and that's all I want. I am odeter ined not to waste my time and energies in swiog. a seythe over forty acres of lanã after five and enty tons of hay when I can get forty tons from enty acres." <br> "Crany as a Maroh hare!" mnttered Lyman, as |

|  |  | Ere long Lyman was met by another sarprise.thero feamed that his neighbor Peland had on

gaged all their manure for fonr years; and thnt he was io pay for it in wood, and butter, and cheese and
wante wanted.
"Dolly, what do you sappose Poiand has been
and done now?"
 the marare made at the tavera atables for tho next fout gears, and he's got to harl wool
bntter aud cheese go to pay for it ly
On the same day he saw Poland and asked hinn What he weant. "I mean to bring my farm up," returned the latter.
"Bat I get manure enongh for two aores of
cornevery year, and that's croogb," aaid Lyman. corn every year, and that's onongb," aaid Lyman.
"For you it masy be, but I wish to manare more. order to get it np to its fullest capacity we must be prodigal of rich dressing."
"Well," aaid Lyman, with a sort of pitying ex ression-" go abead; bnt if you ever see you oney, let me know
plied Poland, langhing. "I munt feed my land if
would have it feed me. We haventt got land bere llke those rlch alluvial botoms in the West. My
land needs nnreing now:) land needs nnreing now
Bnt Anson Lyman co ing mones in that way. He thonght the man who Tonld first cnt his tillage land down one. half, sna
then go off snd buy sach a quautily of manure mans be lithe better than fooliad. He wamutench ufocil, at all eventit.
Dring the following winter, while Lyman was Cutting asd haullog wood to the village for two
dollars and a halt per cord, "poor" Foland was hinling his to tho tavern to pay for manare whic he bad not got yet!
It was on the lirat day of April that Poland come to see his neighlibor. He wanted to horrow a han
dred dollare for gix montha, or for a yoar if be could. "What ye going to do with it?" asked Lymang. "I want to aske some improvements in my iari
cellar, and also enlarge the bnilding hy putting on bar
pityiugfrace "Here I've laid up over two lhandred
dolia-s nothing-in debt By the jingo, Jolu, I don barn is large enonga-as large as mine is with double yorr land to empty into it. If I lend yor Shall ever sec it? I'd rather let it go whera I know Might not get it withont. Your farm is as goo as mine, and yon have no more need to be
rowlog tban I have-or, you shonldn't have." John Poland didn't Ray aupthing about the two nimals he had bought a year and a halp before had beeu offered within the wetk forr handred abore the stock owned by Lyman. He turued the solbect of converration as qnickly as possible, for for not lending him the mones. That alternoon he went over to sce the mand or
whow he liak bought his new stock, who lent hin "What a fool "" said Lyman, as he saw the car penters at work tearing sway one whole aide of bit netghbor's barn, prepparatory to adding an apart
ment capable of accommodatigg forty five head
ecatle," Howeycr, Poland worked of calle," However, Poland workerl on, and trice "Dice.
"Dont tulle to the," crived Lyman, at the end o
he second yenr. "Ive got four hnandred dollat tinterest. How muoh have youn got H "
"A thongand or so," returned the other.
"A thonsand or so," returned the other.
"Eh? What do gon mean""
"Why, all the money I have laid out on thi Whate is ou interest."
"Oho- ab , ha, ha, ha,-and now bow moch in(rest have you realized?"
"So fur I've let it all ran at componad intercst
-pat the interest right in with the principle, and - pat the linterest right in with the principle, and
there it lice." Gan raize fifty dollars now in cash."
"Yon are right, Lyman-I coold not raise it without selling gomething which I do not wish "I Lhooght so. But take your own way."
Ero loug Anson Lyman was astonished to fin tuat his nedgatur aad sulascribed for a tuird pa.
per, besides buying a ot of books for his crildren.
"What's the use?" be said, as he sat in his
to work — not to be spending their time over
bookg. They get sehooling enough when onr
chool is open."
school is open."
"So I mean that my children slaall learn to work," returned Poland; " "bot that shall not prevent them
from becoming well cdacated. I would rather rom becoming well cacatated. I would ratber vell educated, tian with tho ossands of dollarseack, minus the ellnation."
"Ohol That's tho honsand dollars; to baye it in meats, to lay np papers, "You shall see when the time is up."
"We shall," returned Lyman, as he turned to-
vards home. Mr. Lymana had not fully realized how moeh corn Poland had received from the land he had mannr. ed so heuvily and so oarcfuliy; and on the eecond
sear he ouly noticed that his neighbor had "ex. jear be ouly noticed that his neighbor bad "ex.
raordinsry gond luck" with his wheat, getting traordinsry gond luck" with his wheat, gelfing
fbont ninely bnghels from three acree. Brt he
bad ocesaion to open bis eyes on the third sear. bad oceasion to open bis eyes on the third sear.
One evening, just at enndown, he went over futo One evening, just at Enndown, he went over into
Poland's field, where tho men were fust finibing Poland's siell, where tho men were just finishing
raking un the three-scre piece where the grain had been the year before-the first plec
owner had plowed np and dresed.
"Beeu poling some hay on bere," eaid Lyman,
as he savy the hage bunches of hay nearly as thicls
as they conld stand.
"No this was all cut from these three acres," retorned Poland. Lyman counted the boudles, ano then estimat their are rage weigat, and apour reckoning up be found that the land had sielided not far from foner

## ANCIENT AND MODERN GREEKS．

NEXT to the pleasare enjoged by the traveler in
contemplating the ralns of Greece must bo ranked that of comparing the singularity of the manners
of the present inhabilants with those of the an－ vients．In many of the ordivary practices of life
this resemulunce is strising．The hotest hours of the day are stili ceroted to sleep，as they were in the times recorded by Menopbon，when Couon at
renpted to eacape from the Lacedænoziaus a
 of Thebes The Greeksstill feed cbiefly upon ve eyobrows of the Greek women are estill hlackened
ha art，aud their theelks painted occarionalls with ell and white，急deseribed by Xenopaon．This among the nqper flasseg．The lavers，from which appears by many passages in the Odyssey to hare ben a comnon rtensll in the time of Homer；and silly nsed in the Leraut，seems to have been com－ Heranongst the ancient Greeks．According to
Herotas，in his deserlption of the bangne given by the Theban Antigonus to Mardonins and the chicfo of the Persian army，there were tho
men，a Persion and heban，placed at each tabl which circumstance，being so particularly r
anked，was probsbly a deriation from the cn each person having a table to himself． I uave come to the conchasion，says Prof．U all power of personal heauty，it mnst be by cherish－ grohlo hoyes and purposes－by baving cone niag to to and somethitg to live for，which is
nuthy of buraanity－and which，ky expanding

Silbath 解lusimgs
$\qquad$ ze THE BOOK OF JOB．
$\qquad$ most perfiect epecimen of the poetry of the He－ brews．It is alike pictaresque in the delineation
of indiridual phenomena，and artistically，skilfual In all the modern laugasges into whleh the Book
of Job bas been translused，its iunares，draman from of ne natnral scenerg of the Eass，leases a deep ims－
the drand pression on the raiud． ＂The Lord walketh on the heights of the waters， on the ridges of the waves，towering high beneath
the force of the wind．＇＂The niorning red has colored the margius of the earta，and varionsly formed the corering of the clonds，as the band of man bolda the yieldiug olag．＂
The thabits of animals are stance，those of the wild ass，the horse，the baffilo， the erhinocerog，ana the crocodile，the eagle and
the ostrich．We gee＂pure ether spread dnring tha storching teast of the South wind，as as－melted
mirror over a parched desert＂ The yoetic literature of the Hebrews is not def－
cient in variety of form；for while the Hebrew po－ etry breatbes a tone of rariite enthasiastn，from
Joshua to Samael，the litlle book of the gleaner Roth presents us with a cbarning and exquisite ：hasiasm for the Eas＂，spolke of it＂as the＂loveliest
oi epic acd lofy poetry whict we possess．－Humi． at

| belly, let flow the wine, and like the atelent priestleod hang garlande opon their victicn, made of the sweetent and rarest flowers. Her remains are deposited in that great stone honse fronting the square, the one with the verandabs, atid bey windowe, and with the magnificent earriage atandiug before the door. There wes never a tomb fited np more splendidly; but the ghosts will filt thro its gloom after sll. <br> I have kooma Pbinilila ever since ale wet het oradle pillow beoanae of the ragged cural that ohafed her fat neok, or wheczed with the croup that too often followed the showy promenades the little lady took with ber fachionalile mothor, on early spring or late sntuma days, her knees, arme and shoulders exposed to the cold,-and though when a child, $x$ bave cried in envy of her finery, naught wonld havo indnced me change places with her. <br> Her earliest perseentors were her genteel mother, and the precise old French governess that would bave proved an invincible Sultana for the most mad-eap girl that ever fell in love. They were the main bulwarke of her prison, the firm fortionation between her little sell and the vulgar throng of plevian childrex that attended the common sehool, the only institution of learning in onr village, and oftentimes when we hare comescreaming and romping home, swinging our bounetg in onr hands, while our onbraided bair plased wild whth the wind, with a torn drees or mud-etained pantalete to hall tell of some traent expedition, we bave eeen Misg Prinnie:s pale litio face, bet ronnd with corls and bows of ribiors, looking sadly, yet dindainululy down apou us, from her nursery mindow, where we hnew ber governees was rating our merits at no high degree. Foor Prin. Nis! She मever played horee with tho bojs, uever maded hare-fonted upatd down the meadow brouk, never ran races up the steep "meetiug honeo hill," never trled to climb $\frac{1}{}$ poplar tree, zever jumped from barm raftera down apon the hay, never weat sleighryding ou s tea-server, never hailt dans in the swampe, and never went after beech and ohestnata in the fall. And what is a childhood without all that? Whilo we were romplng hare-beadud, jes, and bare-footed too, over the meadows and | sides depending apon bla for enpport. Bat there never was a nobler hente than his in any homan breast, nor are there many facea easier to fall in love with, and, mind you, by gensible, and even ambitious women, for there is a world of promise in his face, -a pronise, that these who know his past life, his industry aud bard-carned, yet extanded and derp edncation, eanont think will fitl. He went into busisess bere in town, and made his home at his aunt'e, and in sone way, -who can underatand love's tanoles? - he fell deeply in love With Phinnib, and never dnnbted for the year he stayed there but that his affection was sbandantly returnen. And sle did love bim, and it was the green spot of her almost barren heart, promising. if unblighted, to cover all with beanty and with bloom. She was ont of hesth much of that year and so kept from gay sociely, and ander Harby's infloence she was emigrating brok to her natural life, when the frost came sharp and heary, and left overything deal-very dead. <br> Now if 1 go into the particulars of this affir I shall be telling a love atory and that fo not my in. tention, bot rather to give an obituncy, if so we may eall it, of Mis8 Prindilea Pbisrose, Obacnie Martyr of Westerfield, A. D., 1857. <br> Mrs. Peminose and her foreign coadjatorbeheld with great alarm the course thinge were takiug, and proceeded with due diligence to re-prune and eultivate what they bed carefolly sown in Miss Parmas's early jerre, and beholid the weeds grew sunce again, with brambies rank and tali, and Harky Duniusy left bis annt's very precipitantly one morning, tranke and all, and liefore two mouths had passed it was rumored for tratb aronnd the town, that Prinilita Primbose was the hride elect of ofd Col. CAPSON, who is past seventy jears old, has buried three wives, and, worse than all, is worth a half million of dollars. And last Thnrsday was the day of the great saczifuce. Seventeen years it has been prepariug, and alas! its victim lias pasged only to the great stone house on the equare, to be crowned with hollow congratulations, and a thorns wrenth that tore hicr hands in the bindlag, and that shall forever brnise ber lirow in the wearing. <br> Yes, ste is dead. Her life is hid in the dnst. |

| AMERICAN FRUIT IN ENGLAND. |
| :--- |
| Ow the 24th of October, the Engish Horicultn. |

$\qquad$
Ens. Reras:-It is comparatively recent that any consilieralile extent, to produce new parietles of frnits and Alowers, hy hybridization, or the
ninglling of one species with another. The facts, and law of regetable physioiogy, on which the been for a long tiae trown that ofrtain plants,
snch as the cacnmber, and tho melon, and many others, have diffierent kInds of fowerb, and that drop off, they are yet in some wey nece essary to the
fralforiness of the other. Many who hato grown these plants near each other, bave obscrved that their see तs had in some way deteriorated, and
failed to produce frnlt llke that from which they failed to pro,
were taken.
The difiference between staminate and pistillate
Howers, and between the stamens and pistlis be same fower, and their different offico in the production of fenlt, has long heen known. It has
been known that if the pollen from one of these plants shonla be carried by the wind, or insects, hus produced wonld partuke in some degree o the nature of each of the prrent plante. A part oie of the pollen from the corn tassel, on a astilk o
ono kind of corn, fulliug apon the end of a fbre of the silk from the nevily formed ear of another Ind, at a certain stage of its growth, wllit produce gether liko either, but what ts called a cross of the gardens, or filds, where different Einds of cor are grown. it is a very conmon practice, at the kinds in the
the other.
In regard to all these cases, the generality peoies is tu the selleve, is, that the mingiling her this year is not at all diffreent, from its flowers any variety of pistillate atraw berries, at all difrer ent, in color, ,ize, or flavor, whether fertilized by
the Early Boariet, or the Black Prlnce. Bat if seds of this cucamber, or of these strawberrie are sown, the froit prodnced by the new piants
wiil be hybride, or orosses, of the difierent species All the facte, which I have observed, favor ths theory unies it may be the one which I now oom. ike the oplnton of some one who is wise in thes growing in this town, snd haring for its snppor of thio description: The ontslde husti, and general aite so larse as the ants pion the tree, com te centre, what appeared like several grape eeeds rowded, and joined to gether. This specimen wal examined by sevoral persons lifely to be interest nc of them has commonicated the fact to Aother query, hesides the one relating to the
heory of hybridizatlon, suggesied itself to mg Ind or soelng this queer mengref, viz, If there is druit in these different species, of oo widoly affilinity exists betweeu the plants themeelver, and I assere no such probablity, bnt saggest the qnery for the curions.
Hadeon, Ohto, 1ss5.

| Few perbons, except teaohers, are aware of tho evils incident to irregularity of attendance at school. Those having cbildrea in charge are of ten prone to detain them at home, to perform some domestic labor, or to ladulge thom in ialeness.Yet every such interruption in a conrso of study, particularly when extended to a term of daye, re good the timo and opportunities lost by absence; or else, in most oase, futare progress is impeded by the fallure to master certalu lessons necessary to prepare for farther attulument. To be sure this difficnlty exists ouly, or principally where papils are in classes, and required to perform regalar ex- ercisee. But with the modern improvements in the management of eodaoole, classifcatlon, thongh often illg salapted to favor individual papils, is considered lomperative, as it certainly is, to the conomy of labor sad time. The papil who does not keep np with his class generally becomes disgusted with his stndles, and then is not blow to as sume the character of the dolt of the school. Even lo tho more primitive anolasaified scion the pupil who stass often at home canuot retain so vivid an interest ia his stadles. It is natural to be enconraged when we make rapid advancempat in our work, sud to be dispirited when onr progress is almost constantly impeded. The schular tuat feels conscious of being behind his feliows is prone to become envious of them, mas lignant and troublesoma in sobool. In this way often it is that children acquire the repntation of learniag mischisf there which they woald not at homo. <br> An old masim says that "what is worth doing ant is worth doiag rell." Most true is thls of his basiness ite phonid perform it thoronghly. He then, becomea "a whole man at it," and proficlency is thas snre sesult, This glves him the calmas. Moral courag, energy and serenity of mind, ele ments of a noble and a stshle ciaracter are chus indaced; and the ohild becomes "father to a man" |

"SEARCE THE SCRIPTURES.
Turbe is a great difference between reading and searchngg the Scriptnres. There have been, and
still are many, that read mach; bnt oar knowledga of divite truth depends more nopon the manner we
read, than npon the quantits. Dr. Goage, it is read, than npon the quantits. Dr. Goage, it is
gaid, read fifteen chapters a day; Jeremial Whifiter read sil the Ypiztles of the New Teetramen in Greek, every week; and Roger Cotton read the
Ftole Bible rlurongh twelve times every year,
This ranid reading of the Bible is not the mos Fhole Bibla rhrongh twelve times every sear,
This rapid reading of the Bible is not the most
proiteble, I have been impressed of lste, mare proiteble. I have been impressed of lste, more
thau ever, with the neceesity of "meditating in hau ever, with the neceusity of "meditating in
he law of the Lord," of panslng and refecting pon the portions we read, of looking at it from diferent stand-phinte, till we are $n$ nee we have be-
ore our minds the precise idea the Holy Spirit meant to convey. We shonld consider when the
psssage ander cons!deratlon was written, bj whom wino By searching the Scriptnres carefully, by coro-
aring parallel texter and similar facts, a person an hardly fill of becoming deeply intereoted in the contents of the asored volume. We shall sym.
pathize with Dsvid. wio eaid, " \#ow sweet are thy pords nito my taste, gee, sweeter thau honey to
worn
Ey studying the Bib:e, rsther thsn reading it, the mind is stored with idess, the conscience is enligh mind long enongh to prodnce an impression Pastors sin Sababth Sebool teechern shoold trake
pains to instrnct those under their charge, now to ead the Bible so as to derive the most beneft om the Bible was stadied, instead of being ray保 read, I have no donbt it wonld be, mnch oftenbreaketh the rock in pleces - Puritan Recorder. Judgina Oruras.- "Dont jadse others by your-
self," is a common warning; and yot he advice is
enerally nugatory. Unconscionsly every ma generally nugatory. Unconscionsly every man
jnages of others rather es his owa nature sng Gests, than by the real character of the man he
judges. One may se this in the theological crees. The crael man esteems his Mraber to bo
co volent and viudictive as hinself, and wonla not
as believe bim to be God, if he were otherwise. The enevolent and mild tempered man, on the conrepresents to a degree the pecnliar traits and tem-
pers of those nstions.
Y Yoltaire,":
says a writer In Blacswood, "thonght he was looklug throngh when 上 tratu the glass was a mirror
and copied only his own scofing face

Tus axint seeks not to do great tbings, reason he cun accomplish great things. He who
thinks many tulogs easy is sure to enconnter mo thinks many tuidgs easy is sure to enconnter an-
merous difficulties, Hence it happens that the saint who esteems everythng dificalt,
ters no difitienley to the ead of his life.
Whasm we bend the dore of prayer to heaven, it brings baot an olive branch in its moath. We
must send prager befure, as a harbinger to bespeak blessing. Do men think the tree of blessing will arop its fratt into their mon.
shake $1 t$ by prayer? - Watson.

If He prayed, who was without sin, how moch more is the sinner bonnd to pras? And if He
watching throngh the whole night, prased with coutiuned snpplioations, how much more ongh St. Cypriarl.
Ir is not great wealth, nor bish station, which makes a man happg. Many of tee most wratche
beings on earth have botb. Bat it is a radiant sungy spliti, which knows low to bear litile trials and to enjoy litule comforts, snd which that

|  <br>  <br> THOUGHTS FOR THE THOUGHTFUL. <br> Ws wonld not flatter the farmer, nor would we discourage nor nndervalne the resalts of his lahors and experimenta. In the fow hints we are ahont to present, our only object is to offer a few thoughts whlch may be of some service to those in parsait of knowledge. If experimenta are condacted for the purpoes of elncidating a certasu proposition, they are moss likely to resnlt in seportant such experlmects as many of those try, are, in a great degree, simlese, and give bnt "an untertain sonnd." Great and hidden tratha in earnest, as thons Lat ns lized the thom tance of the work, and had strong faith in our ability to aid in its accomplishment. <br> The manafactarer of woolen cloth, bnys the klad of wool he needs for the prodaction of the artcle whleh is in greatest demand, or npon which he can realize the greatest protit He is so well acquainted with the cost of manafacture that he can tell the price he can afford to pay for the several grades, and the proft that will resalt from the operation. Hence our readers will often see it stated in onr report of the wool marker, that "at present rates, manufacturers bay very sparing. ly," or in some cases that they refase to buy altothe manufacturers of almost sill articles of commerce, There is no gness-work about it. Everything has heen rednced to rule by experiment oorn, potatoes, beef, muttod, pork, wool, and all necessaries of life. The farmer is the mannfac tarer, depending npon the profits derived from the mannfactare of these arloles for the snpport of blmaself and family. And yet, who, among the handreds of thonthands engaged iut the bosiness, can tell what it costs him to raise a bnshel of Wheat, or corn, or potatoe日? Who can tell what it costs him to make a qnart of milk, or a ponnd he oin make from can toll how much pork or bee tell the comparative valne of hay, and corn, and carrots in the manufactnre of beef, and at what prices it wonld be most proitable to sell the one and feed the other? These aro important questiong, allectlug directly the bnsiuess and profits of the farmer. Well do we know that the puranit of the farmer, ip, wore than any other, affected hy oontingences entirely beyond his control, anch as these thlugs into consideratlon, we wonld sak our readers it there is not an unnecessary lack of insent us with aualyses of the different articles of food, and from these calcnlate their comparative ralue; but these results are often fonnd false in praotice. Careful experiments have also been made in Europe, with direct reference to some of these queatlone, but our cllowate and other orrenm stances are so diferent, that while these results true gaide in prectic selves, and fnstead of relying on the labora of others, ndd our milte to the stock of naiversal tnowledge. <br> Thorough experiments to obtain reliable resnlts wonla be tedions and expensive, and on an extensive soale, perhaps, might be done best hy some of our Agrloultural Societies, nader the supervisiou of some competent person. In Europe, men of waalth, lovers of truth and science have avoted their lives and fortnues to these snbjects, Will orown them with houor as long as time en- dures. Here we have fow men of lefsare and |  | sufficient mack or other earth spread over the sarface at regolar intervals to prevent in a good degree the escape of steam. <br> Bat it is abont the racts itself that "perfect prat. Permanent racks about the ontside of the bnildings, elevated a litule opon au embanbment of earth to prevens the manore from getting above their level and to lavor the keeping of it away, At any rate the common practice of nsing bo racks, and letilng them be moved promiscnously abont over a mass of putrefying excrements, is a grievance that ought nos to be permitted. <br> greatest snlferere, bat the necessity of feeding all snimaia in a wholesome place, opon wholesome <br> Construction of stables. <br> In the Reral of the 5th inst, we spoke briefly concerning some of the defects noticeable in the erection and completion of the bome of the borse, with were not treated npon, we again revert to the sahject. <br> In onr previona remarts, we asserted tbat where stables were close, and sa a consequence fetid, lung diseasee arong the horses were frightfally pre occnpied a prominent position among those known as fital. The air is the grand pasifler of the blood, snd where the inngs are charged with a fonl and vitiated stmosphere, the blood cannot be otherwise than impaired in its life-giving propertiea. The renovatory prosess is sccomplished hy inhalation-ais and blood are brooght in contact, and tae latter is thas the falfillment of the desigus of natnre hoth the air and hlood become radically changed. The former loses a portion of its oxygen and acquires carbon, the latter parts with its darls scarlet hue, and assumes the hrilliant red-so marked of purity -and hounds with fleetuess along the minate conrses traced by the All. Wise band, Iapgrting bealth and vigor. If, hy repeated nse, the afr is deprised of its oxygen, the whole animal econcmy langaishea-the great Jabor of repleniabment ceases, and in proportion as the stiging process is lengthened or decreped we are enabled to perceive fis deleterions ForkIngs. The whole case impnre tends to consnmption. We can here take in the whole matter at a glance-the canse and the effect, the germ and the disastrous prait. <br> How shall a remeady be found? Standing amid the miltitudinoos contrivances, patent and nopatent, that have been hrought hefore the people, tor the parpose of giving empioyment to the lnngs lor the purpose of gine that the Creator had either de- one would prived us of the material with which to inflate the systern, or that the apparatus speciaily constrncted for that puryose mas sadly deficlent in ita capacity tolabor. Sclentific treatlses npon ventilation, with names attached that are "hoosehold सorda" for learging and probity, are donbtless very well, hnt after all, the snbject is simple and does not need burying under a mass of verbiage. Rnnoing water parifes itself-air in motion is self-piriyying.- Heated air will rise, snd If opportunity is presented it will ne lievitably pass offi, and its place be snp. plled by a parer atmosphere. <br> The apertures for the escape of impure air ought to he placed at the highest part of the ballding, and their freqnenoy and size mast be determined by the number of animats contined. Erch stall shonld be provided with either a ventilator exclu- sive, or a passage into a large one used as a geneeral parifer for the whole stable. From eight to ten inchea square is deemed the best size for the condnit which is to carry off the aif as it becomes foul. These shonld be so arranged with a revolving panel that a carrent of air may he set in motion or checked as may be desirable. <br> The above section of a "roop-ventilator" is taken from the Cyclopedia of Agricultnre, and ls deacrihed as follows:-" lt is constracted with fonr posta, a a forming a sqnare, the sides of which are alled in with lonvre-boards, $b, b, b, b$, having openings between them. The roof is formed boarding, covered with lead or zinc; and there are lead or zine flashlags, $c_{i} r_{5}$, round the base, cover- ing its janction with the main root." The panele | which admlt the air are placed in the hack or end Walls of the stable as close to the foor as possible. These openings should, in all cases, be fnrnished with sliding doors or windowe, and so arranged that they may be readily thrown open or closed at the will of the keeper. <br> In the foregoing design we bave a seotion of the stables of Mr. Lyon, of Glasgow, Scotland, in which the windows serve as outlets and inlete, snd in addition farnish light. Whlle the hested and impure air is ascending the sides of the tnanel, the external air is descending the centre of the same passage and spreading all over the stable. Each of these stahles contains sixteen borses. The air is kept perfectly fresh by this mode, and, aays Srbwarr, suthor of the Staste Book, "they are the best lighted baildinga for the parpose I have $\qquad$ fresh air, as well as for the removal of that which has become vitiated. Many persons seem to think that they have done all that is required when the selves with the reffectlon that the wants of the animals will be met by such chance drats as force under doors, around loose windows, and between the crevices that impertect constraction has left open. The fact is, withont these latter openinga, the process of ventilation will often prove an en tire failare, and money thns laid ont be actually squandered. <br> Crowded, confined atables are another evil festure of the majority erected. We have seen four horses in on apartment hardly large enongh for one The great fanlt of these-in addition to and extreme transitions of the temperatnre they nndergo. Coldas and conghs are prevalent among animala thas oribbed. Where every means are adopted for 3 supply of pure air, the stalls shoald never be less than six feet wide-we shonld prefer eight-eight feet higb, and with a depth thaterery and fying heels will not resch yor, it the animal should desire a more intinate acquajatance. <br> Want of light is another of the orceltiea too often imposed rupon the horse. To enter many of the stables and look aronsd, one woald snppose seeming care is the light of hearen exclnded. It is ntterly impossible to prodnce or sustain bealthy animal or vegetable life miere everything isiven to the powers of darsuess, Many veterinarians contend that shis continned glooms is irjarious to the ejes. Be this as it may, there are a thonsand ressons tor letting the light In in its fnlliness, and immediately remove every obstraction, and give to the patient and worthy horse the care that a mercitul and high-minded man will ever award to the handifors of his Creator. <br> IO F : <br> SOIL, PRODECTIONE, IMPROVEMENTS, BTC. <br> Eds. Roraz:-As you have many readers in thls new Siate who wlll feel a commendable pride in a just notice of the home of their choice, and also many readers who may be interested to know more of the country hereabonts, allow a brief space for a sketch of lowa <br> This State lays between the Mssissippi and Missoari rivers, bounded un the North by Mionesotaand by Missouri on the Sonth. Throngh the ceatre of by Missouri on the Sonth. Throngh the ceatre of the State East and West, from river to river, the distance is about three handred milles. It is longer From North to Soath, A large proportion of the land in this State is of that description snown as tiguons to the streams. The soil is fertile, of a dark, tenacions, clayey loam, from one to tive feet deep. There are difer ent characteristics in dlffer- ont localities, thongh differing not materlally as far as we can learn, taken ss a whole. | cottonwood, oak of different varieties, walnut, ma- ple, linwood, with a scattering of a few of the common snd smaller growing forest trees recent geologioal sarvey has developed beds of recent geologiaal saryey has developed heds of coal, iroo, plaster and lead, in the Central and Sonthen along the Des Moiness iver, sas hisqg op nesily as Fort Dodge. It will nagnestionably be fond in places where it is not yow known to exlst ss the variong $i m p r o v e m e n t s ~ a n d ~ t i l l a g e ~ p r o g r e s s . ~$ How extensive the deposits of iron, lead and gypanm, have been fonnd, or are likely to prove, we have not leartued. <br> In regpect to water-power for milling and mana. facturing porposes, Iowa is more Sortonate than some others of the Western States. Nearily every portion of the State is watered by creeks and rlv- ers, some of which are sofifieiently large to be navlgable at Esasons of bigh water. Commencing in the Northcra part, we find emptying their waters into the Mlisisisilpi the Turbey, Wapaliplecon, Cedar, Iowe, Stannt and Des Muines rivers kome of which have large hranches. On the Western borders of the State are the Biz Sions, Little Sions, Boyer, Mishnabotany and Nodamay rivers, besides siderable of these rivers is the Des Moines, which, starting in Minneatot, runz in a South and Sontbwhen bearing more to the Eastward it forma a part of the Sontharn bonndary and anites with the Mis- sissippi below Esoknl. In high water, sprlag and iall, merchandize is taben np this river as far as Fort Des Moinge, and in some instances as far as Fort Dodge, which is far towards the Nozilh- <br> Some years since, the State commenced the im. provemeti of ibe des Hoines river, by means of locks and dams, for the porpose of slack. water navigution, bos shbe quently navlgation, but snber quently transferred their in- tereat to a company who have steadily proseceated <br>  pletion of the worli. In adidition to this, several important railroad enterprises have heen commenced, some of $\overline{\text { bich a }}$ are partially completed, <br>  very strongly bis conviction tast rot 3 sailrosa of any magnitude had heen projectod in lowa, hat would he outle, and become s good investmentIf so, they will prove more fortonate than a ma- jority of such enterpryses in the older States The progress of Tons is a perfect realization of the famlliar ads ase, " Weatward <br>  <br>  learn the number of acres of fimproved land to be 2343,958; of readow 140,343 acres, producisg 223,234 tons of has, or little more than one and a מalf tuns per acre; of spring wheat 345.518 acies, producing $4,973,639$ bubhels, being little short of afteeu bnshels per sere; of winter whest only 41, - 043 acree, ,ield ing 495 , 703 bnshels, a fraction over twelve bushels per acre. Of oats the acres are put down at $190,15 s$, , barvestiog $6,054,341$ bnsbels, <br>  per acre. Potatoes yielded less thas thirteen busbels per acre. The value of togs sold was $\$ 2$., <br>  8 tate, was worth $\$ 1,315,147$ s0; of cheese 792,852 ponnds, and of wool 1010,003 . Domeatic or household manafactures sare estimated at $\$ 138,331$ while the general manufactrree sre and the valne of lead prouaced $\$ 213,000$. The State taxes for 1800 were $\$ 305,24302$. These statistics were the result of a censsns ordered by the State, and if the ratio of increase has contined, as there is reason tu sappose it has, th now spproximates closely to 750,00 . <br> The soll of Iowa is eastly cilled, being mostiy rrairie, and yields a fair retarn to the industrions hasbandmas It will bo observer that the greater portion of the wheat growi is spring, and it may be dobted ti winter wheat oant be grown to any great exteat. The aution of the frost npon these semb-oiay solls bas the effoct of rendering them perfect hones $s$ cormbs eren thas early in the season, and if continned throngh a severe winter, while ig be the case, very litule wiuter wheat or even grase can be expected to stand. Very fow perma- neat pastures or meadows have been made aa yet, and bat for the introdnoction of the Eungarlan Grass, a apecles of arall-growlog millet, it wonld he dificcult to minter large herds of cattle withont making grain the chlef relisnce. Here, as in Now York, deep tillage and thorongh draining will be the great amellorators of the aoil and the most ettective fureans of ensuring a fair reward for |

CONDDCTED BY AZLLE.

MORNING.

 the digtinction. And is not an onneasonable one?
That there should be oistiuetions in societs is right. The wise, and virtnons cannot find pleasare
in the company of the iguorant, and vlcions. And get we are to coinider all as merels parts of
great shole, and treat them as snch. We are no to desplise those who are not like as, or to look
चith scorn npon those who have not the zame en Creator who see not as man secs. In his eyes the
poor Lazares who wader iu our streets may be thought far inore woithy than the Drres who in
olotided "in parple and fine Hoer every day."onrs conld be at aribtocracy of mind instead of
mones! The lady of our day will scarce allow he tervant to step across the threshold of the sittiog
room, asd yet in all that partains to true worman hiood tho servant may be far unperior to her mis.
tress-for what can be more hollow.hearted that faghionable friendship? And nntil the day comes
that perbons are respectod according to their mer it, how trne it is that we are Repullicans but in
namene.

## Biaury consata not in the rosy cheel, the co

rallip, or the brilizant eye, bat in the richness,
purity and undylug love of the soal. Beanty of contour and a gracefal mlen, may yild a monien-
tary oliarm, bnt like the flghtuing's Дabl they only ever phast; liut the beanty of the son - like the
rongh dianond - although scarce percelved at first by ns, grows the more beantifal as gradually, oach lovely, glowing ray springs forth to weet our
admiring gaze, thro illuminating the dark recesses of the sonl with a heaveniy radiance. The sweet serenity of a true Christian - the soal at peace
with its maker-basa fonnt of light and joy whlch Irradisten every hneament of the face with a celes. tial boanty that fadeth not away. It maketh the
aged face lovely and the deformed to glow with

were intended to be by carpeting their progress with velvet; real strength Is tosted by difficalties attaln rogard.

| Ir was a bright afternoon in Jnne, that onr All natare eremed to rejolce with her ever varied beanties, but sad hearis, sud tearfnl cyes were in that room, for an elder brother, one we had looked to for conusel, was to leave ns, and in that sad hour we mere to exchange the farewell hand, pcrhaps forever. He was to bid adion to ford parents who had watched over his youthfal ateps, and to brothers and sisters who were as desr to him as for a foreign shore. <br> He had in carly life given his heart to the Savior, and had lived a life of devotedness to His canse. He bad labored for the good of othera within the narrow circle of his homo, bnt his sympathes extended to those who had never felt the blessed inflaences of onr holy Ohrlstianity, those who worsbiped Idols made with their own hands. It was hard to part with one we loved so well, one that aged parents had looked to for snpport and comfort, one that hari cheered them with kiad srords when day's of trial were their's to endure. But when wo remembered "that Carist had dled that we through Him might have life everlasting," We would uot have him sacricice an objeot so pure, an ambition so holy, to gratify the feelings of our nature. <br> We heard from bim after he left onr embrace.He waslaboring with zeal and anccess amoug those dark-minded ones, "poiating them to the Lamib of Gon that taketh away the sins of the world," and many were bowing at the foot of the Cross. <br> Three years had passed awas, another missive finde its wey to our ionely dwelling, a stranger's hand had penncd those liucs. How different the contents. Disease had fasterted itsalf upon ont brother, and death had claimed him es its own. Although no mother's hand was there to wipe the dews of death from that brow, there whs an arm that aafely oondncted him through the "Valley and Shadow of Death." We wonld not wish him bact, he has essaped the tarmoils of life, snd lis spirit rests with God. Lapis Mbrtifo. |

OUR COMMON SCHOOLS．
Ens．Rural：－From the known interest that you
take in the moral and intellectual improvement of youth，yon will not objeot to publishing anylhing that will stimnlate pazents to send their children
to school－for it is moch to be regretted thai too to school－for it is moch to be regretted thai too
many do not receive the henefl from the cormmon many do not receive the teneitit from the conson
school organization that the friends of eduation desired，and had renson to expect from the liberal State appropriation that se made for their snpport， Which places the menns of scaniring che rndi－
ments of literatare within the power of all who ments of literatore within the power sf all who
desire to obtain them，and it is moat lamentable desire to obtain them，and it is moar lamentable
that there are so many children in the State that receives so little or no benefit irsm the liberal State boon．
The Report of the Superlititendent of Pnblic chlldren in the State that are of proper age to at－ chlldren in the State that are of proper age to at－
tend school who do not eater the sehool room， owing to the ennmeration being misie between cannot be called schnol childicen．He reporis as attending school 844,36 ，of which namber 212,110
attended two months，and $199 ; 150$ attended less than two months；and those children who attended so lithe，are the ta and ont selholare，whioh，with the school instrnctions end do not deserve the name of atending，-30 that there ouly remalns
432,919 who receive much benefit from the Common Schools．But add to that number all that yon can ing the first of January，wbich often pats the win－ ter term into two reports，and the attendance at
the common achools is certsinly very small con－ sidering the llberal appropriations that are made for the ir snpport，And it is of great importance better attended．It cannot bo the expecrze，for in the city of New York，wherc everything is free，
the attendance fs no hetter than Jo the Raral Dis－ tricts；nor，can it be for want of Loglslative en－ the first orgnaization there has been some altera tion，some amendment，nome experiment trled，
and yet the children do uot generally attend 8chool，and what can be the canse，is worthy of
candld furestigation，for it matters not how syste－ Candld luvestigation，for it matters not how 8 syste－
matic the sohool arrangement may be，nor how－ ever valnable the instractions that are therein
taught，if the children do not sttend school the lăndable desiro of general cacacation is not ob tained．I think that it is as evident as noon－day
snn that it is tho indifference of parents and dians towards the common schools．That is the princi pal canse；yes，sur，elmost the only casse why
their ohildren dc not attend bohool；and the arbi－ trary dictations and annecessary taxation in th present State organization of the common school
has a powertul tendenuy to lucrease that indifier erence，and to annibilate the good feelings of so－ ciety from taking as interest in the common schools．And I hope that the frlends of the pre dcavor to point oat some of the nnmerons error The State supervision is too ditctstorial．Th educstlon of childen is a most solemn parenta the dictator ba wiser than themselves．There which do not beliere themsclves as competent to manage their school 8 s．well as the State can do，
and why shonld they not be permilted to do so？－ and why shonld thes not be permilted to do so？－
Becanse the Sta：e has made suoh literal provision for their snpport，it is not necessary that it should
osurp the coutrol and management of them． Having three Trustees to eacb Distrlct that must ivjary to the school．It prevents dectslun of ac is the daty of three，is not the businees of an ers have to submitt to the ordeal of au anunal in spectlon，whict ls an nnnece8bary inconvenlence
for it fs not nicommoan that the inspocted is more competent than the inspector；bat those tu the the best opportunity to judge of the reauber3
adaptatiou to teach．Each teacher is requifed to keep a jonrnal of the daily atendance at achoo
He has дo interést iu makling a false roport；yet it cannot be relied apou，unlefs he goce before a
nagistrato and swoars that it is correct－what a dirgracefal insult on thr the morals of the tench ers they caunot belleved unless they are ander
oath！And the rato blll has to bo made ont from said dally journnl，each one payiug for daily at－ sain lauce，go or play，no mattor，－－10 attendance， ，
teny
pay．A hettor plan coald not have been coutrived o iucrease tho irregular attendsuce nt school，an its banefal effeet is evident from the superiaten－
dent＇s Rewiort for 190,155 attended solioul leas than two monthsia the year．
Tho repented district tang prevents the
good feelings of commnity from taking interest good feelings of commanity from taking interest
in tho common sehools．Compel a man by law to couvenienco of making out and collecting these trifing distrlo taxes，is aggravatiog snd annoying
in the extreme．The annaal appropriation to the Couluon Schools for than payment of teachers wa． poor，who sent their children to school；yot they are not allowed to have tho benellt of it．If the
are uny la the district who are not able to pay th socool bill，a quarterly，or at least a semb－annnal tax，mast bo leviod on the taxable filuablants of
the dlatict to pay their school bill，hiog brandiak the diatrict to pay their sehool bill，thos brandlag
thein with the disgrace of belng pullu paupers and what is yet more annoylng，thoir neighbors
aro taxed to ralse a obarity fond to pay for their
 operatlon without mach bencfit－for a strange Who has no laterest lu tho schools bot his analary to vislt thous twice or thrive a year，（or，perhap？
 the incumbent will be a tool of the party in powe and be shifted as often as the power changes，so
that the interest of the schools will be saorificed

On the golfold of party strife，which is always the
case with every moral improvement that the State Case wity every moral
nndertake to manage．
In my nexi I will propose a state Organizatio of the Cormon Schools in hopes that it may pro． mote thei：intereat，by stimnlating and encourag，
ing pareats to have their child ren attend school． ing pareats to hid

South Albion，N．X．， 1857.

## GROWING IN GRACE

## I Mgrva knew a wan bora full grown．I never knem

 Lert ng not he dissouraged becanse we cannot
become good at ozce．Beanase we cannot throw off all onr degradation in a moment；cennot enter our closets aud breathe a prayer for redcupt
and mercy，
and come forta therefroun pare and undefled，is uo resson whs we should sall religion
a phantom and cease striving to obtain it．The

 ing brigater asd brighter，radiant，glorions in
middharen So will religion come．A desire，a
prager， ptrength to conquar，a patience to endare，a holy
love of Craist，a blisfal assurance of Eis divine love of Crasist，a blisgatal assurance of Eis divine
protection，an abiding fatith in His power to give Thns day by day．year by year we shall grow in
grace．Nat perfect in the beginning，bnt coming nearer snd zearer God and that pority of soal
which we mon＇d possess．Let as be pastient，though the blessing comes slowly it will sarels come at the one all lovely．What If this hour yon toza fonr beart toward Gon and fodly things；shall fon into the world and find the sirea voices of teapta－ yourself weak，slmost ss mest as son are to－day； iay 50 sill have s little nore strength，and the almost entire！y lose its power over yon－ When the love of Craise frat springs＂＂nto life amidst the cosoo of passiou，strife and sin＂which
fills our bearts，we mant watch it carefuily．WTe fills oar bearts，we mast watch it careruly，
must never silence an impalee to do right，neerer must never silence an inpulse an opportunits of conferring a hlessiag
