

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

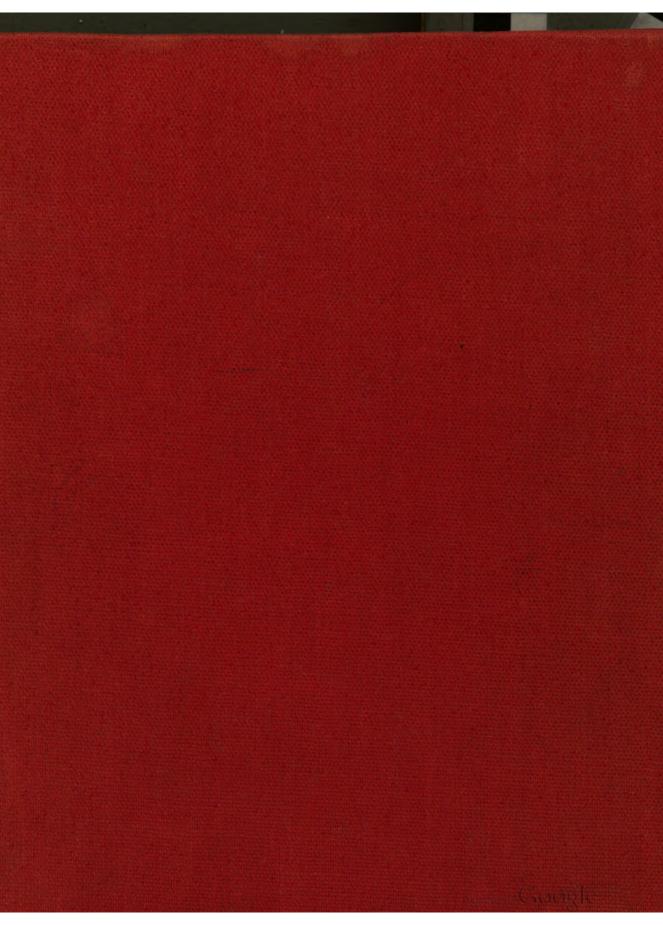

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

In 1879 the publishers of Harpers' Latin Dictionary requested me to construct from it a smaller work, better adapted to the use of schools. In the conviction that a mere abridgment would not supply the wants of pupils, I resolved to compile an independent Dictionary, which should include all that a student needs, after acquiring the elements of Grammar, for the interpretation of the Latin authors commonly read in schools, and for correct expression in Latin, to the extent of the vocabulary of these authors. In forming the detailed plan for this purpose, it seemed desirable in many respects to deviate from the traditional practice in such works; but, unwilling to take such an important step on an individual opinion, I determined to submit the whole subject to the judgment of several eminent scholars and successful teachers, whose advice would be a safe guide. Accordingly, in April, 1881, the plan of the Dictionary, as then entertained, was printed in a private circular, with a number of proof-pages to illustrate it, and was laid before thirty of the gentlemen supposed to be most competent to improve it.

Besides the general request for suggestions and criticisms, particular attention was called to the following questions: 1. Can the list of authors be extended or shortened to advantage? 2. To what degree of fulness should the references be given? 3. Should the late inventions, the so-called letters j, v, for consonantal i, u, be recognized in the alphabet? 4. Shall only long vowels have the mark of quantity? 5. Shall the assimilation of consonants in prepositions compounded with verbs be restricted to classical usage, or follow that of the majority of school-texts? 6. Shall the principal roots of the language find a place, either in the vocabulary, or in a separate list? And shall an attempt be made to indicate the structure of stems? Other questions related to further particulars under these heads, or to the internal arrangement of articles, to the classification of meanings and constructions, and to the English-Latin Index which it is proposed to add hereafter.

The answers were most instructive. Nearly every scholar appealed to gave the inquiries careful and thorough consideration, and freely communicated his views; while, in several instances, new suggestions were made, of substantial value in improving the method of the work. Among those whose ripe scholarship and great experience in teaching were thus generously contributed to the plan, were Professors George M. Lane, Frederick D. Allen, and Charles R. Lanman, of Harvard College, C. S. Harrington of the Wesleyan University, Albert Harkness of Brown University, Thomas A. Thacher and Tracy Peck of Yale College, Henry Drisler and Charles Short of Columbia College, B. L. Gildersleeve and Charles D. Morris of the Johns Hopkins University, Austin Stickney, John S. White, James H. Morse, and E. G. Sihler of New York, Clement L. Smith of Cambridge, Moses Merrill of the Boston Latin School, W. C. Collar of the Roxbury Latin School, John Tetlow of the Girls' Latin School in Boston, Gustav Fischer of New Brunswick, W. Gordon McCabe of

Petersburg, Virginia, and George K. Bartholomew of Cincinnati. While no one of them is responsible for any feature of the book, least of all for its errors of judgment and defects of scholarship, each of them is gratefully remembered by the author as having rendered valuable assistance in solving the difficulties and diminishing the defects of its plan.

The first gentleman named above, Professor Lane, has not only favored me with invaluable advice and suggestions in planning the book, and permitted me, as difficult questions of detail arose, to call upon him for aid in their solution, but has read over most of the proof-sheets before casting, correcting their errors and enriching them by additions, to such an extent that no acknowledgment which this Preface can contain will adequately express the indebtedness of the work to him. If it shall be found, within its prescribed limits, to have attained in any degree that fulness, that minute accuracy, and that correspondence with the ripest scholarship and the most perfect methods of instruction which are its aims, the result is largely due to his counsel and assistance.

This book is not an abridgment of any larger work, nor is it a Dictionary of the Latin Language. It is designed to explain every word or phrase in Latin books commonly read in schools, including the entire works of Terence, Caesar, Cicero, Livy, Nepos, Vergil, Horace, Ovid, Juvenal, Phaedrus, and Curtius, the Catiline and Jugurtha of Sallust, and the Germania and Agricola of Tacitus. A few words, found in such extracts of Florus, Eutropius, and Justinus, as are sometimes included in elementary readers, have been added. But the additional words necessary to complete the vocabulary of such authors as Plautus, Lucretius, Catullus, Cornificius, Tibullus, Propertius, Varro, Quintilian, Martial, Tacitus (in his larger works), Cato, Pliny the Elder, Pliny the Younger, Seneca, Lucan, Statius, and others, who, for various reasons, are rarely read, except by special students, or in an advanced course, are omitted. The reader of these authors must be referred to a larger work. Within the limits of the literature to which reference is made, it is intended to give such an account of each word as shall make it completely intelligible in every passage in which it occurs, by exhibiting first its original meaning, and then the various modifications which that meaning suffered in usage, and the phrases in which association with other words affected it. The life of a language is largely in the construction and use of its current phrases, and, with a given vocabulary, the most useful Dictionary is that which most readily familiarizes the student with these. Every word or phrase which is cited, without comment, from the prose of the best period, may be accepted by the student as a model for use or imitation. Full references have been given, in order that the authority for each expression may be known; but, as far as possible, the citations have been drawn from the books most commonly read, in order that the explanations given may be available to pupils in the earliest parts of their course. Thus illustrations from Caesar's Gallic War, from the orations of Cicero against Catiline, and from the first books of Vergil's Aeneid, have been preferred to any others, wherever they serve the immediate purpose.

The treatment of proper names has been governed by considerations of practical utility. A general Dictionary should strictly contain only those which demand explanation as part of the language, treating them as word-forms. But it is convenient for the student to find, in the book to which he most constantly refers, enough information on every word to make its use intelligible. The names of persons and places, therefore, and the adjectives derived from them, which occur in texts frequently read in schools, have been placed in the vocabulary and very briefly explained. In this respect, especial attention has been given to Caesar's Gallic War, Cicero's

Select Orations (Halm), Laelius and Cato Maior, the first five books of Livy, with the twenty-first, twenty-second, and twenty-third, Nepos, Vergil, Horace, Terence, Juvenal, the Metamorphoses of Ovid, and the Germania and Agricola of Tacitus. For details of biography, history, mythology, and geography, however, reference must be made to special dictionaries or treatises. In the articles relating to government, trade, houses, money, time, military organization, dress, etc., such particulars as are necessary for an intelligent reading of the authors referred to have been given as briefly as possible, without attempting to make this in any sense a manual of antiquities.

The orthography adopted follows, in almost every particular, the standard rules of Brambach (Die Neugestaltung der lateinischen Orthographie in ihrem Verhältniss zur Schule, and Hilfsbüchlein für lateinische Rechtschreibung, translated, under the title 'Aids to Latin Orthography,' by W. Gordon McCabe). It is substantially that of the best critical texts, differing from them, indeed, in but one important point: the use of a distinct sign, V, v, for the Latin U, u, wherever it has a consonantal power. This sign, a modern invention, is misleading to an English or a German reader, in that the sound represented (the English initial w) is very different from the English or the German v; yet it is found in nearly all school-texts, and is defended by Brambach; and, in deference to the views of many practical teachers, it is retained here. The student must remember that the sign V, v, in Latin, is not an independent letter, but represents U, u, when it has lost its vocalism, and has become merely the transitional sound which arose between that vocalism and a following vowel. He will thus avoid a false pronunciation. In the table of roots this distinction of signs is, of course, discarded, as confusing. Another modern sign, J, j, in some texts represents the consonantal or transitional force of I, i, but it has no support in the history of the language, nor in the authority of the best contemporary scholars. It is appropriated in English to a sound (j in jet) wholly unlike the consonantal I, i (our y in yet), and thus suggests a perverse and intolerable pronunciation. The intrusion of it into the Latin alphabet is therefore not recognized in this book.

The long vowels in every word of the vocabulary are carefully distinguished by the usual mark, as far as they can be ascertained; including those of final syllables, whose quantity, in many Dictionaries, is left to be inferred from general rules. Every vowel without this mark is known or believed to have been short in pronunciation, though several cases remain in which the quantity of a vowel followed by two consonants is undetermined. For the first time, in any general vocabulary of the language, an effort has been made accurately to mark quantities, not for metrical purposes only, but for pronunciation. It is necessary, therefore, to discriminate between long and short vowels, as well where followed by two or more consonants as elsewhere, although the syllables in this case are always metrically long. Much labor has been given to this investigation; but the necessity of the discrimination has but recently been recognized by scholars, and in many syllables differences of opinion are still found between eminent authorities. I have relied on the direct testimony of writers who spoke the language, and on the evidence of Greek transcriptions, where these sources are available. Next to these in value are inferences from the treatment of the vowels in the Romance languages, from parallel and derivative forms in Latin, and from comparative etymology. But while the general results are given with confidence that they will be found trustworthy and useful, many of the details must be regarded as provisional only.

Most of the teachers consulted advised that the Roots of the language be inserted in the gen-

eral vocabulary in alphabetical order. But with profound respect to their judgment, and with consequent hesitation, I am compelled to limit that vocabulary to words actually spoken and written by the Romans. My plan requires, indeed, that only the particular forms of each word for which there is direct authority shall find an unquestioned place in the list; and therefore, where the nominative case of a noun or the present stem of a verb is not actually in use, it is enclosed in a parenthesis. Where the comparative and superlative forms of an adjective are actually in use, the fact is expressly noticed. No form is admitted to its regular position save such as may be unhesitatingly employed by the student in composing a theme upon a classical model. This rule would be disturbed, if the roots, which in Latin are not words but logical abstractions, the results of grammatical analysis, were treated as words. But the value of an acquaintance with them, and of the mental habit of recognizing them and of grouping words under them, is so great, that it has seemed desirable to present them in a separate Table, which will be found at the end of the volume. When the form in the vocabulary is followed by brackets, enclosing a root, this is to be understood merely as a reference to the Table, where the principal words containing the same Root will be found under it. Such a reference does not imply that the word is directly formed from the Root. It may be a derivative, primary or secondary, from a verb or noun containing the root. The formation of the word-stem from the Root must be explained by the Grammar, on whose province this book does not seek to encroach.

In many instances the designation of the Root to which a substantive or an adjective is referred, is followed by a reference to the paragraph [as, L. § . . .] of Professor G. M. Lane's Latin Grammar, now in preparation, in which the formation is explained. These references will be found valuable when the Grammar is published, but for the present may be disregarded.

It is due to the publishers of this work to express my deep sense of the energy, intelligence, and liberality which they have shown at every stage of its progress. While its preparation has occupied nearly as many years as they at first expected it to fill months, every delay and expense, which promised to make it more useful, has been welcomed by them, as if the controlling aim of the house were not commercial success, but to serve the cause of education.

D. Lewis. Much assistance in details has been derived from Kühner's Ausführliche Grammatik der lateinischen Sprache, the Grammars of Roby and of Madvig, Dräger's Historische Syntax, and Hauptpunkte der Livianischen Syntax, and Quicherat's Thesaurus Poeticus Linguae Latinae. For words borrowed from the Greek and other languages, I have relied on Vaniček's Fremdwörter im Griechischen und Lateinischen, on Weise's Griechische Wörter im Lateinischen, and especially on Saalfeld's Tensaurus Italograecus. The Formenlehre der lateinischen Sprache by F. Neue has, of course, been my constant companion.

For 'hidden quantities' I have consulted especially A. Marx, Hilfsbüchlein für die Aussprache der lateinischen Vocale, etc. (useful but with unsound theories); Schmitz, Beiträge zur lateinischen Sprache und Litteraturkunde; L. Müller, Orthographiae et Prosodiae Latinae Summarium; F. Ritschl's Opuscula Philologica; Osthoff's Geschichte des Perfects im Indogermanischen; Brugmann's Vergleichende Grammatik der indogermanischen Sprachen, Vol. I.; Brugmann and Osthoff's Morphologische Untersuchungen; E. Seelmann's Aussprache des Latein nach physiologischhistorischen Grundsätzen; G. M. Lane's List of Verbs in his (unpublished) Latin Grammar; and G. Gröber's Vulgarlateinische Substrate romanischer Wörter (A to P) in Wölfflin's Archiv für lateinische Lexicographie und Grammatik.

For historical, geographical, and social facts, constant reference has been made to the Dictionary of Greek and Roman Biography and Mythology, to that of Greek and Roman Geography, and to that of Greek and Roman Antiquities, all edited by Dr. William Smith; and to Marquardt and Mommsen's Handbuch der Römischen Alterthümer.

The books used in the etymological notes and appendix are mentioned in the introduction to the 'Table of Roots,' at the end of the volume.

A few references have been made to Florus (Flor.) and Justinus (lust.). Also some to the fragments of Ennius

quoted by Cicero (Enn. ap. C.).

Note especially that all abbreviations of authors' names are in Roman type; those of titles of books are in talica.

Where a reference consists of figures alone, they denote the book, chapter, and section of Caesar's Bellum Gallicum.
Where a reference is to a book (in italics) without an author's name or initial letter (in Roman type), it is to a work of Cicero.

Where a reference is made to Horace (H.) without designating the work, it is to his Carmina or Odes; and simfarly V. alone stands for the Ameid; O. alone for the Metamorphoses; S. alone for the lugartha.

* An asterisk before a word means that it is not found in use, but is assumed to account for some derived form.

[] Remarks in brackets relate to etymology. Forms printed in capitals, preceded by R., are references to the Table of Roots at the end of the volume.

= The sign of equality before a Greek word means that the preceding Latin word is borrowed from that form in Greek.

(...) A form in the vocabulary is enclosed in a parenthesis to signify, if a substantive in the nominative case, that it is in use only in other cases; if a verb, that it is not used in the present system. Forms of incorrect orthography, but found in some school-texts, are also enclosed in parenthesis, and a reference is given to the proper form.

— A dash in place of the genitive of a substantive, or of one of the principal parts of a verb, indicates that this case or this system is not in classical use.

LATIN DICTIONARY.

1. A. a. as an abbreviation, (1) = the praenomen Aulus. (2)=Absolvo, on the voting-tablets of judges in criminal trials; hence C. calls A littera salutaris. (3)=Antiquo (q. v.), in the voting tablets in the Comitia. (4) a. d. = ante diem. (5) A.V.C. or a. u. c. = anno urbis conditae, or ab urbe condita. (6) A. in the Tusculan Disputations of Cicero, probably = Auditor.

2. & (before consonants), ab (before vowels, h, and some **consonants**, esp. l, n, r, s), **abs** (usu. only before t and q, esp. freq. before the pron. te), archaic af (Orator, 158), praep. with abl. [kindr. with Gr. and, Germ. ab, Eng. of, off], orig. of separation or departure from a place, directly opposed

to ad; from away from (cf. de and ex).

I. Lit, of space. A Of direction of motion, from, mari Flaminia (est via), leads, Phil. 12, 22: ducite ab urbe domum, V. E. 8, 68.—Elliptically: Diogenes Alexandro . . . Nunc quidem paululum, inquit, a sole, a bittle out of the sun, Tusc. 5, 92.—Often joined with usque: usque a mari supero Romam proficisci, all the way from, Clu. 192; v. usque.

b. Sometimes with names of cities and small islands, or with domo, home (for the simple abl.), mostly where motion is conceived as away from, not out of, a place; hence always of raising a siege, and often of the march of soldiers, the setting out of a fleet, etc.: oppidum ab Aenea fugiente a Troia conditum, 2 Verr. 4, 72: quemadmodum

(Caesar) a Gergoviä discederet, 7, 48, 5; cf.: ab Alesiä, 7, 80, 9: a Zamä, S. 61, 1: ab Arimino M. Antonium . . . Arretium mittit, Caes. C. 1, 11, 4: protinus a Corfinio in Siciliam miserat, Caes. C. 1, 25, 2;—of setting sail: a Brundisio hieme summa transmittere, Pomp. 32: profectus ab Orico cum classe, Caes. C. 3, 23, 1; in Livy usu. with names of towns: ab Roma legatos venisse nuntiatum est, L. 21, 9, 3.

c. With names of persons or with pronouns: libertus a Fufiis ad Hermippum venit, Fl. 47: cum a vobis discessero, Sen. 79: multa merces tibi defluat Ab Iove Neptunoque, H. 1, 28, 29 al.—Often of a person, meaning his house, lodging, etc.: videat forte hic te a patre aliquis exiens, i. e. from his house, T. Heaut, 235.—Praegn.: a rege munera repudiare, from, sent by, N. Phoc. 1, 3.

B. Without motion. 1. Of separation or distance, with verbs (abesse, distare, etc.) or adverbs (longe, procul, prope, etc.).—Of separation: abesse a domo paulisper maluit, 2 Verr. 4, 39: tum Brutus ab Romā aberat, S. C. 40, 5: absint lacerti a stabulis, V. G. 4, 14.—Of distance: quot milia fundus suus abesset ab urbe, Caec. 28: hic locus aequo fere spatio ab castris Ariovisti et Caesaris aberat, 1, 43, 1: non amplius pedum milibus duobus ab castris castra distabant, Caes. C. 1, 82, 3.—With adverbs: cum domus patris a foro longe abesset, Cael. 18: procul a castris hostes in collibus constiterunt, 5, 17, 1: tu procul a patria Alpinas nives vides, V. E. 10, 46 (procul often with abl., v. procul): cum esset in Italia bellum tam prope a Sicilia, 2 Verr. 5,

ab domo detineri, 2 Verr. 2, 6.—So in Caesar and Livy, with numerals to express distance: onerariae naves, quae ex eo loco ab milibus passuum octo vento tenebantur, eight miles distant, 4, 22, 4; with the terminus a quo implied: ud castra contenderunt, et ab milibus passuum minus duobus castra posuerunt, less than two miles off, 2, 7, 8; 6, 7, 8; a D fere passibus castra ponere, L. 24, 46, 1.—Rarely without numeral; quod tanta machinatio ab tanto spatio in-

strueretur, so far away, 2, 30, 3.

2.
