TABLE OF ROOTS.

THE term 'Root' is used in different senses. It is sometimes supposed to designate an original element of language; the first form in which a thought vaguely clothed itself in articulate sound. In this sense, however, there can be no roots in any language known to us; for these languages consist substantially of groups of words transmitted, with modifications, from older languages. These groups, and the words composing them, can often be traced back for ages before the languages arose to which they belong; but still as words and groups of words, as verbs, substantives, pronouns, etc.—with no direct evidence that the so-called roots are older than the words which contain them.

In this book the term 'Root' simply designates that element, common to all the words of a group of kindred meaning, which remains after the formative additions are removed. Thus, in Latin, we find a group of words which relate to guidance or government, such as regō, rēx (i. e. regs), rēgnum, rēgnō, rēgula, regiō; and a group which relate to standing or fixedness, as stō, statiō, status, statim, stabulum, stabilis. Now in either group, apart from the elements in any word which make it a verb or a substantive or otherwise specialize its meaning, the core of the word, that which is felt to contain the fundamental notion or suggestion which is common to the whole group, is the syllable REG- or STA-, and this accordingly we call the Root. The use of the term must not be understood to imply that Latin roots had an independent existence, as parts of speech, at any time; either when Latin was spoken or previously.

When we find that different languages fall into groups whose roots are substantially common, we infer with certainty that these languages had a common origin. Since this relationship has been proved, in different degrees, among a multitude of languages, including the Sanscrit, Persian, Greek and Latin, the Slavonic, Scandinavian, Celtic and Germanic tongues, scholars recognize in these a class, called the Aryan or Indo-Germanic languages; all of which must be modifications or developments, more or less remote, of one original language, spoken in early times by common ancestors of the Aryan races. Some philologists have thought it possible, by studying the speech of existing peoples, and the recorded fragments of the speech of others, to determine the laws of development and change, so far as in a great measure to reconstruct the original Aryan language. Many efforts in this direction have been fruitful of interesting and suggestive results; but no agreement has been reached concerning the nature or form of the original vocabulary. Indeed, it is now seen that most of these efforts have been founded too largely upon the study of written words, which are very imperfect symbols of what is uttered and heard; and that the scientific determination of laws of change in language must rest upon a comprehensive and thorough investigation of facts, gathered by observation of the organs of speech, and of their work, products, and habits in the intercourse of life.

The processes of this investigation are not in place in a school-book. Some of its results, however, are so well established that they may help us at every step in acquiring a language, such as Latin or Greek, whose near relationship to our own tongue is largely disguised by phonetic changes. The following Table, therefore, is to be regarded merely as an aid to the student-first, in grouping Latin words, in his mind, under their simplest significant elements; and then in associating the groups with those in which the same elements have been discovered in Greek, German, and English. For this purpose the principal words of the vocabulary, whose relationships are known, are brought into kindred groups, each under its Root, with an occasional indication of the connecting link supposed to have existed at some period between forms which appear isolated in our fragmentary records. All forms, thus assumed to account for others, and of the actual use of which there is no direct evidence, are marked with an asterisk. When a parallel group is found in Greek—that is, one in which the meanings, forms, and history of the words show that it must, in some earlier stage of development, have been one with the Latin group—the most important or most suggestive of its words are placed immediately after the root. Parallel groups found in English or German, with which students of this book are more likely to have some acquaintance than with any other of the independent cognate languages, are afterwards indicated, by a selection of words for comparison. These selections in English are, of course, limited to words which have come to us independently of the Latin. Words which come into English or French from Latin are only referred to in a few instances, in which their forms are peculiarly instructive.

Most of the Roots in our Table are predicative or verbal Roots; that is, each of them, in connection with certain formative elements, is found in a group of complete words, including verbs and nouns, of definite meaning, the Root itself suggesting, in the consciousness of the speaker and the hearer, a general notion of action or being, out of which, by a process of specialization or integration, each of these definite meanings may have arisen. But there are also a few Roots or elements which, as Max Müller says, 'merely point to an object in space and time, and express what we express by here, there, then, this, etc. In their primitive form and intention they are addressed to the senses rather

than to the intellect. They are sensuous, not conceptual.' These are known as pronominal stems or demonstrative roots, each of them being the common element in a group of 'symbolic' words; that is, of pronouns, conjunctions, prepositions, and particles indicating, not actions nor objects, but relations.

The principal authorities consulted in constructing this Table have been: Vaniček, Griechisch-Lateinisches Etymologisches Wörterbuch: Pott, Etymologische Forschungen: Fick, Vergleichendes Wörterbuch d. Indogermanischen Sprachen: Brugman u. Osthoff, Morphologische Untersuchungen; Brugmann, Grundriss der Vergleichenden Grammatik der Indogermanischen Sprachen, vol. i.: Osthoff, Zur Geschichte des Perfects im Indogermanischen; G. Curtius, Grundzüge der Griechischen Etymologie; G. Meyer, Griechische Grammatik; Brugmann, Griechische Grammatik, and Stols und Schmalz, Lateinische Grammatik (both in I. Müller's Handbuch der Klassischen Alterthums-Wissenschaft); several valuable treatises and papers, especially by Pott and by Brugmann, in Techmer's Internationale Zeitschrift, 1864-87; Max Müller, Science of Thought, and Science of Language; Jacob and Wilhelm Grimm, Deutsches Wörterbuch (unfinished); Littré, Dictionnaire de la Langue Française; Bracht, Etymological Dictionary of the French Language (translated by G. W. Kitchin); and W. W. Skeat, Etymological Dictionary of the English Language. The first and the last named of these works have necessarily been recorted to, as the latest attempts to present the facts sought in a comprehensive and systematic form, but I have endeavored to check and correct their results, as far as possible, by the other, and especially by later authorities.

- 1 AC-(strengthened ANC-), bend, swell. Gr. dymwr, dympa, δγκος; Lat. ānulus (dim. of old ānus, ring, for * acnus), annus (for * ac-nus) whence annālis, per-ennis, soll-emnis; ancus (one who crouches, a servant, cf. - VOM-, vomit. Gr. (R. FEM-) into; Lat. vomō, vomitus, vomica.

HARPER'S LATIN L

A New Latin Dictionary, founded on the Translation of "Freu.... Latin-German Lexicon." Edited by E. A. Andrews, LL.D. Revised, Enlarged, and in great part Rewritten by Charlton T. Lewis, Ph.D., and the late Charles Short, LL.D., Professor of Latin in Columbia College, New York. pp. xiv., 2020. Royal 8vo, Sheep, \$6 50; Full Russia, \$10 00.

This Lexicon must supersede all its rivals for common use. . . . As a hand lexicon, to lie on the desk and receive corrections and additions in the margin, no existing book in any language is so well fitted as this. It contains many new words.... It removes many errors. Orthography, etymology, and accidence have been corrected by the best and latest authorities. Many words are rightly explained which have long misled lexicographers.—J. E. B. MAYOR, Professor of Latin at Cambridge University, England.

. . . Among the peculiar features which distinguish the present work may be noted the comparative breadth of its scope and the comprehensiveness of its details. The list of Latin authors to whose works it affords a key contains more than thirty names not referred to in Freund or Andrews, many of which have never been used before in the preparation of a general lexicon of the language. . . . It forms a more complete guide to the entire literature than any previous work. In regard to the Latin orthography, the present Dictionary, moreover, claims the attention of students as the only work which embodies the results of recent investigations by philologists like Ritschel, Corssen, Brambach, and others, and which are accepted as authorities in the latest and best editions of the Latin classics. . . . In the collection, classification, and definition of the words in the Latin language, the editors have evinced no less critical sagacity than intelligent industry. . . . There are hundreds of words the treatment of which, in all previous dictionaries, has been unsatisfactory, and to which they have devoted an immense amount of research in order to supply the deficiency.-N. Y. Tribune.

There is no doubt that in the present work we have the most correct and useful Latin Dictionary yet pub-

lished .- Nation, N. Y.

The great advances which philological study has made of late years, and the vastly increased knowledge of ancient life and thought, have given to this Dictionary a scholarly completeness which places it in the very front rank among works of reference. It will undoubtedly be-come a standard authority.—Westminster Review, Lon-

It is the best Latin Dictionary ever made. . . . This noble achievement is a splendid triumph, if not the most splendid triumph, of American scholarship.—Christian Intelligencer, N. Y.
