About this Orientation...

The program has been divided into three key modules, each sharing a piece of the Wikipedia experience:

1 **Core:** *This module discusses the core policies and guidelines that govern content development on Wikipedia.*

2 **Editing:** *Here we'll share with you the technical skills needed to edit Wikipedia. Since editing on Wikipedia does not happen in a vacuum you will also be introduced to the Wikipedia Community.*

3 **Advanced:** *This module goes into a little bit more detail on some specific editing topics that are relevant to students editing Wikipedia for class, including advice on picking a good topic.*
