DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 713 013

KYOTO MILITARY GOVERNMENT TEAM
APO 713 (Kyoto, Honshu)

23 July 1946

SUBJECT: Deletion of Kanegafuchi Spinning Company from reparational list

TO : Commanding General Hq I Corps, APO 301 (Kyoto, Honshu)
Attn: Mil Govt Section, Res. & Ind. Officer

1. Inspection and survey was made of subject plant, 22 July 46, and found it to be represented as stated on attached application.

2. Subject plant is listed on Incl. 1, OD-5/2. At present, this factory is operating under Hq Sixth Army's Permit No. MG 26, dated 19 Nov. 45, producing items mentioned in par. 7b, of attached statement from Director of subject firm.

3. In April 1944, subject plant commenced to produce aircraft parts. At this time, 50% of their production facilities were engaged in war work and the rest of its' facilities were utilized in the spinning and weaving of silk. In Sept., of the same year, the civilian production facilities were sub-contracted by Nikkoku Kogyo K.K., for the production of aircraft parts. It was not until April 1945, that subject plant facilities were engaged in 100% war work, under their rein.

4. It is this Hq belief, even though subject plant only completed one aircraft, that it should remain on the present reparational list.

HAROLD C SHEFFIELD
Major, QMC
Commanding

Hq I Corps, APO 301, 29 JUL 1948

TO: CO, Kyoto Mil Govt Team, APO 713.

1. This headquarters concurs in recommendation contained in paragraph 4 of basic communication.

2. Inasmuch as all of its spinning machines were scrapped during wartime, and its present manufacturing facilities were installed solely for war production, it is the decision of this headquarters, that subject plant is properly listed on Revised List No. 1 appended to Operational Directive No. 5/2, regardless of its past history as a silk plant or its intentions for peace-time production.

Tokyo.

SUBJECT: Designated Factory for Second Reparation.

TO : Headquarters of the 8th Army.

Dear Sirs:

Under date of 28th May 1946, our factory, by the order from the Headquarters of the Allied Forces, has been added to the list of designated factories for second reparation. However our factory, by the permission of the Army authorities as well as that of the Department of Commerce & Industry, has been engaging in the work of building rehabilitation houses, which are supposed to be most vital to the stability of the life of the people suffering from the aftermath of the war, and it has been producing transportation vehicles (the ones operated by storage batteries) and also spindles for spinning---all for the reconstruction of Japan.

The transportation vehicles we are producing are consisted of large size busses, medium and small size trucks, the productive power of which being 30 per month respectively. And we are trying to manufacture spindles with all our might, the productive power being 150.000 per month. As for the rehabilitation houses, we are building 100 21-square-metre dwellings a month to be used for the construction of the homes for the families of the Allied Army officers.

It is only one year since we started to engage in the peaceful industry by manufacturing the goods exclusively for the use of civilians. But when we think that we have done our bit in the course of that short period of time, we feel we could find some consolation in the result though our goal is still a long way off and we have to surmount all difficulties before we realize our aspiration by meeting the great demand of the civilians in general. It is, therefore, our sincere wish to strive with renewed courage and energy for the good cause and do our utmost for reconstructing this country on a democratic principle of the Allied countries.

We have been engaging for the past 36 years in the silk spinning industry, a most peaceful industry in the country. But, alas, with the outbreak of the war, we were ordered to construct

5-f

Encl 1

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

wooden training airplanes by destroying all the spinning machines in the factory. But the irony of it is that in the course of one year and four months, from April 1944 to the time when hostilities ceased, only a single wooden training airplane that had been made in our factory had its trial flight. It was called an aeronautic industry at the time, but very poor in substance, an ephemeral existence.

When we learned that our factory was among the designated factories for second reparation, we were at a loss what to do. We believe, however, that you would grant our wish after examining the true condition of this factory by exempting it from the list of the factories designated for second reparation. We are, Sirs, leaving the matter entirely to your good judgment and generosity.

We remain,
Yours respectfully,

P.S.

A brief history of the factory and its present aspect will be found in the attached pamphlet.

5-5

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715 013

A Brief History of the Factory & Its Present Aspect.

I) Name of factory:

Kanegafuchi Boseki Kabushiki Kaisha, Kyoto Factory.
(Kyoto Factory, Kanegafuchi Spinning Company, Ltd.)

2) Site:

IHigashi-Shiraki-cho, Takano, Sakyo-ku, Kyoto.

3) Superintendent:

Kyoto Factory: Michitoshi Egoshi, Manager.

4) Liaison Office:

Tokyo Head-Office: 3475 Oi Yoroi-cho, Shinagawa-ku, Tokyo.
(Phones: Omori-3241 - 3)

Osaka Head-Office: I23 Tomofuchi-cho, Miyakojima-ku, Osaka.
(Phones: Horikawa: 571 - 7)

5) Area:

89,776 square metres.

6) Number of workers:

Male: I98 (including 77 members of factory staff).
Female: I7I (including 62 ").

7) History of factory:

A) Established in I908. Been engaging in silk spinning industry for 36 years until I944. Compelled to construct wooden training airplanes by order of Japanese Army in April, I944, resuming, however, peaceful industry again when the war ended.
Spinning and weaving industry had considerably been reduced before we turned into making wooden training airplanes. Our factory, however, had been producing our goods, by operating 43,880 spindles, monthly as follows:

5-6

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Silk spun yarn :632,953,206 yards.
Silk spun cloth:554,690 yards (29" wide).

However as we turned into making wooden training airplanes a great deal of spinning and weaving machines were cast away as scraps. And we were inexperienced in making the wooden airplanes in question. Besides the materials were so scarce and the factory was so unfit for the purpose that the greater part of the one year and four months we engaged in making the training airplanes was a 'preparatory period' using only half a year for constructing planes with the result that we were successful in turning out only a single wooden plane before the termination of the war. That was the plane that made the first trial flight in our factory.

B) After the cessation of arms, we should have resumed our former peaceful industry by engaging in produsing silk yarn. But as most of the spinning and weaving machines had been thrown away as scraps we started to produce: 1) small size trucks (operated by storage batteries); 2) rehabilitation houses; and 3) spindles for spinning which we considered to be most important as peaceful industry to meet the demand of the people in general after carefully inquiring into the matter. Therefore we applied to the Headquarters of the Allied Army for the permission and we were authorized and we have been making every endeavour to realize our aim.

8) Our turning into civilian services.

A) Small size trucks (operated by storage batteries).

Taking consideration of the fact that the difficulty in getting the materials for rehabilitation work and in supplying the people with provisions is due to the lack of trasportation facilities, we started to manufacture small size trucks, which, together with the building of rehabilitation houses, is the principal product of our factory. The small trucks are operated by storage batteries, which are available in this country where electricity is easily generated by hydraulic power especially when it is exceedingly hard to get gasoline. And we are expecting to turn out a great deal of the trucks above mentioned to meet the public demand.

B) Rehabilitation houses.

First of all we need dwellings for the people who have lost them during the war. To rebuild the country into a democratic one, our first duty will be to build houses in which to live. However it would be difficult to compensate the great loss by

57

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715 013

the usual method---the building by contract on a small scale, the work done simply in a handcraft way. And we want to make it our principal product.

C) As our 'sister-factory,' Yodogawa Factory, is resuming its spinning work after the termination of the war, we are going to cooperate with it by manufacturing spindles that are necessary for the production of fabrics.

For the above three items we applied for permission to the Allied Army authorities and we were approved under date of I9 January, I945 notified by File M.G. 26. Since then we have been engaging chiefly to build rehabilitation houses and manufacture the small size trucks.

9) The present aspect of our production.

A) Small size trucks (operated by storage batteries).

We are now preparing for its production. We expect to manufacture:

I0 small size trucks	per month -	September, I946.
30	" -	August, I947.

As for the vehicles operated by storage batteries, we have applied to manufacture:

Large size busses (@ :¥I70,000)	I0	during Sept.,'46.
Medium size trucks (@:¥I50,000)	30	" Aug. ,'47.

B) Rehabilitation houses.

We use fine 'sugi,' cryptomeria, and Japanese pines produced in Kyoto district as building materials. And as our factory is located in Kyoto, a city not bombed and damaged, we could engage in the rehabilitation work for Osaka and Kobe district.

Present productive power per month:

2I-square-metre simple houses	(@ ¥II,000) -	I00
27-square-metre prefabricated houses	(@ ¥I6,500) -	50
48-square-metre stores	(@ ¥35,000) -	20

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

In both quantity and quality we seem to have reached the highest level in the production of houses in this country. The demand, however, is so great and we are expecting to double the quantity of the production in the near future. And we are taking charge of the construction of the homes for the Allied Army officers' families by supplying timber.

C) Spindles for spinning.

Present monthly power of production: I00,000 (@25 sen).

Expect to manufacture from September, I946:
I50,000 pieces.

IO) The productive power and the demand.

Under the present circumstances every thing and article is in great demand. To rehabilitate Japan reduced almost to the state of ruins we must exert ourselves to the utmost especially those who are taking part in rehabilitating industry in this country.

A) Vehicles operated by storage batteries.

Large size busses: Yearly productive power, 360.

Medium size trucks: " , 360.

Small size trucks: " , 360.

The percentage of production of the above vehicles in the whole country will be about 20%, when estimated by the rate of the present production.

B) Rehabilitation houses.

Productive power of 2I-square-metre houses: I,200 per year.

When compared with the number of houses lost during the war, this is by no means a great number. However when seen from the point of view of the present state of production in this miserable country, we may be allowed to say that our factory's productive power is worthy to be praised.

C) Spindles for spinning.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

With the production of spindles, we are meeting the greater part of the demand of Kanegafuchi Yodogawa Factory, one of the principal spinning factories in Japan.

II List of the machines and equipments in custody at present. (See the attached list.)

I2 Materials we have now in custody.

A) We are using the material in stock as material for the custody.

B) We are taking precautions against fire and theft in the premises of the factory employing 8 guards and 2 assistants and in conjunction with Shimo Kamo Police Station exercising jurisdiction over the site of the factory every effort is being made to prevent the factory from any loss and damage.

C) Every machine in custody is being kept carefully with a board with name attached to it.

11 Apr 1946

AG 000.5 - BA

SUBJECT: Reported Illegal Operation of Silk Goods - Kanegafuchi Kogyo K. K.

TO : Commanding Officer, 94th Military Government Group, APO 660 (Osaka).

1. This headquarters has received information to the effect that the subject company's plant located at Nagahama-cho, Nagahama, Shiga prefecture, is operating without a reconversion permit, and that they are manufacturing silk, contrary to SCAP directives freezing all silk goods.

2. The Kanegafuchi plant at Kamikyo-ku, Yamashina-cho, Yamashina, Kyoto prefecture, was given a permit to operate by Headquarters Sixth Army. However, this factory was ordered to cease the knitting and weaving of silk yarn on 23 Mar 46 by Lt Heritch when he visited this headquarters and inspected plants in this area. Lt Heritch is attached to the E & S Section, GHQ, SCAP.

3. It is directed that you have an inspection made of the Nagahama plant to determine why they are in operation without permit, and that they be ordered to caese operation on weaving of any and all silk goods within 10 days.

4. It is further directed that you cause the 103rd Military Government Company to check the Yamashina plant of Kanegafuchi Kogyo K.K. to determine whether or not they are complying with the order given them by Lt Heritch.

5. A report of your findings in both instances will reach this headquarters not later than 25 April 46.

BY COMMAND OF MAJOR GENERAL WOODRUFF:

/s/ H. B. Taylor
/t/ H. B. TAYLOR

103D MIL GOV CO, KYOTO OFFICE, APO 301, 23 April 46

TO: CO, Hq, 94 Hq & Hq Det Mil Gov Gp APO 660
Attention : Public Safety Officer

1. An inspection was made today, 23 April 1946 on Kamikyo-ku, Yamashina-cho, Yamashina, Kyoto prefecture to find out if they complied with Lt. Heritch order to cease the knitting and weaving of silk yearn.

2. This factory was in full operation and the factory officials informed this Hq. that Lt. Heritch inspected their factory 23 March 46 but gave no order to cease operation on the knitting and weaving of silk.

3. Mr. Masuda, Shuzo was sent, as a representative from this factory, to Tokyo 8 April 46, to confer with Lt. Col. Sampson, A.E.C.P.O.(P.X.) and representatives from other silk concerns. "Nippon Bo Daisho Tosei K. K. (The Japan Knitting Control Co.)" was given an order by Lt. Col. Sampson for 2,400 dz. silk stockings. "The Japan Knitting Control Co." is one of the leading silk concerns in Japan and controls most of the minor silk factories and which the control of the factory in question comes under. The Japan Knitting Control Co. turned this order over to Kamikyo-ku, Yamashina-cho, Yamashina, Kyoto prefecture to be fulfilled, so now this factory is in operation making silk stockings for the United States Government.

4. In view of the above information, this Hq. would like to know if this factory is to continue or cease operations.

HAROLD C. SHEFFIELD
Major, QMC
SMGO

Hq I Corps, APO 301, 29 APR 1946

TO: CG, Eighth Army, APO 343.

1. Reference is made to letter from your headquarters dated 28 March 1946, subject: "Illegal Operation of Silk Mill" and to basic communication which was originated by this headquarters in response to subject reference.

2. Particular attention is invited to the 2nd Indorsement.

3. In view of the fact that this concern apparently possesses legitimate order for silk stockings issued by Tokyo, and claims that it did not receive instructions to cease silk spinning and weaving operations, additional advice and instructions are requested by this headquarters as to what action should be taken with reference to subject plant.

AG 000.5 (MG) 5th Ind. 10MAY 1946

Headquarters Eighth Army, APO 343.

TO: Commanding General, I Corps, APO 301.

1. According to information in this headquarters, paragraph 2 of the 2nd indorsement is correct.

2. The Kanegafuchi Kogyo K. K. will be permitted to consummate any legal unfilled orders it now has or will have in the future for the Army Exchange Central Purchasing Office.

3. Reference is made to paragraph 3-b Directive file AG 423 (22 Nov 45) dated 22 November 1945, subject: "Release of Raw Silk, Semi and Finished Goods," which permits semi-finished greige goods to be completed to warps.

4. Reference is made to paragraph 2-b Directive AG 423 (8 Apr 46)ESS/IE (SCAPIN 870), subject: "Manufacture of Silk Fabric for Export," which will permit the referenced firm to manufacture for export if they have certified papers signed by the authorized agency of the Imperial Japanese Government.

5. Any other operation of the referenced firm is illegal and will not be permitted.

Hq I Corps, APO 301, 17 MAY 1946

TO: CO, 94th Mil Govt Gp, APO 660.

1. Your attention is invited to paragraph 2 of the preceding indorsement.

2. Inasmuch as the Kanegafuchi Kogyo K. K., Yamashina Plant, located in Shiga prefecture, has a contract with the Army Exchange Central Purchasing Office, it will be permitted to remain in operation in order to fulfill this and any future order for silk that the company may receive from the same authority.

3. In the event this company contemplates continued operation after completion of the present Army Exchange Central Purchasing Office order, it may complete the manufacture of any semi-finished greige that it may possess into warps under the authority referred to in paragraph 3 of the 5th indorsement. Likewise, this plant may be permitted to continue in operation provided it possesses certified papers signed by the authorized agency of the Imperial Japanese Government authorizing production for export.

4. Since any other operation of this firm is illegal, you are directed to make periodic inspections to see that no violations of paragraphs 2, 3 and 4 of the preceding indorsement occur.
