Approved by the World Agricultural Outlook Board. Summary released October 14, 1998. The next summary of the *Fruit and Tree Nuts Situation and Outlook* is scheduled for release in March 1999. Summaries and full text of Situation and Outlook reports may be accessed electronically via the ERS Web Site at <http://www.econ.ag.gov>.

The *Fruit and Tree Nuts Situation and Outlook* is published two times a year and supplemented by a yearbook. To order, call 1-800-999-6779 in the United States or Canada. Other areas please call (703) 605-6220. Or write ERS-NASS, 5285 Port Royal Road, Springfield, VA 22161.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact USDA's Target Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

Summary

Fruit Production Up in 1997

Fruit production increased 12 percent in 1997 from a year ago to 35.7 million tons. Noncitrus fruit production rose 14 percent, and citrus production rose 10 percent. Noncitrus fruit accounted for slightly over half of all fruit produced. Crop size increased for all fruit except apples, plums/prunes, lemons, papayas, dates, guavas, olives, avocados, and pineapples. It remained constant for limes and mangos. The 1997 crop was valued at \$10.7 billion, 10 percent higher than the previous year. The value of the noncitrus crop increased 11 percent, and the citrus crop value rose 2 percent.

Higher Production Contributed to Lower Grower Prices

The bigger fruit crop in 1997 resulted in generally lower grower prices. The grower price index declined 8 percent from a year ago. The producer price index remained relatively unchanged for fresh, dried, and canned fruit but declined 5 percent for frozen fruit and juices. Consumer prices continued to rise despite the increased supply of fruit and juices. Fresh fruit prices rose less than 1 percent in 1997 after increasing an average of 7 percent annually for the previous 3 years. Consumer prices for processed fruit products increased 2 percent after an average annual increase of 3 percent from 1994 to 1996.

Bearing Acreage Continued To Increase

In 1997, total fruit-bearing acreage increased for the sixth consecutive year. Increases in citrus acreage accounted for most of the rise, as Florida groves planted into the mid-1990s to replace those lost to freezes in the mid-to late 1980s continued to become commercially productive.

Among the noncitrus fruit, bearing acreage increased for grapes, sweet cherries, figs, nectarines, cranberries, dates, and papayas. Grape acreage in California increased 3 percent in 1997. Acreage increased for both wine and table varieties. Plantings of wine grapes over the past several years in response to the increase in the popularity of California wines, accounted for much of the growth in California. Grape bearing acreage also increased in Washington, Oregon, and Michigan.

Per Capita Consumption Topped 300 Pounds

Per capita consumption in 1997 of all fruit and tree nuts grew to 300.3 pounds (fresh-weight equivalent). Noncitrus fruit, such as apples, grapes, bananas, stone fruit, pears, and berries, accounted for 60 percent of the fruit consumed. About 42 percent of fruit consumption is through fruit juices. The major fresh fruit consumed by Americans are

bananas, apples, oranges, and grapes. These four fruit accounted for 66 percent of all fresh fruit consumption in 1997. They have maintained their share of consumption over the past 20 years despite the introduction of many new fruit produced domestically or imported.

Fresh fruit: Fresh fruit per capita consumption rose for the second consecutive year in 1997 to 102.82 pounds, 4 percent above the previous year. This year's growth is the largest annual increase since 1992. Fresh fruit consumption has been growing at an average of 1 percent annually for the past 20 years.

Per capita consumption declined for fresh bananas and apples because of a reduction in banana imports and a smaller U.S. apple crop in 1997. Consumption, however, rose for fresh oranges and grapes. A larger orange crop in California during 1996/97 and increased grape production, coupled with larger imports in 1997, increased supplies of both of these products in the marketplace.

Consumption was up for all other fresh citrus fruit except lemons for the 1996/97 marketing year. Declining yields and bearing acreage in Arizona, because of disease problems, lowered the overall size of the U.S. lemon crop. While imports increased, they were not enough to compensate for the production shortfall. Grapefruit consumption increased as a result of a big crop and reduced exports for the year.

Large crops of fresh stone fruit (peaches, nectarines, plums/prunes, cherries, and apricots), and pears increased per capita consumption of these fruit in 1997. Increased imports of fresh pineapples and mangos boosted their per capita consumption.

Canned fruit: Canned fruit consumption in 1997 totaled 20.4 pounds (fresh-weight equivalent) per person. Per capita use of canned fruit was up for the second year in a row, increasing 9 percent over the year before. Increased consumption of canned apricots, plums/prunes, sweet and tart cherries, pears, peaches, and apples more than offset declines in olives and pineapples.

Canned fruit consumption estimates are incomplete since carryover data became unavailable in 1988. Consumption trends tend toward an alternating pattern, increasing one year and decreasing the next. This fluctuating pattern can be attributed to the lack of inventory data and exaggerates annual per capita consumption data. However, using a 2-year average to view the canned fruit data averages out inventory movements, revealing a downward trend over the past 15 years.

Frozen fruit: In 1997, per capita consumption of frozen fruit averaged 4.1 pounds, fresh weight equivalent, the same as in 1996. Frozen berry consumption, which comprises most of the frozen fruit category, fell 15 percent. Only frozen blackberry consumption increased. Frozen apple and apricot consumption increased, while cherries and peaches declined.

Dried fruit: Dried fruit consumption fell 5 percent in 1997 to 10.8 pounds, fresh-weight equivalent. The slight rise in raisin consumption after 3 years of decline, along with dried apricots and figs, was not enough to offset the drop in consumption of dried apples, dates, and prunes. Dried peaches and pears remained unchanged.

Fruit juice: Americans consumed 9.1 gallons of juice per capita in 1997/98, up 2 percent from the year before. Consumption of noncitrus juices fell 5 percent from 1996/97. Apple juice consumption fell 8 percent, mostly due to a decline in imports. Since the 1980s, imports have become an increasingly important proportion of apple juice consumption. In 1997/98, 60 percent of the apple juice consumed in the United States was imported. Grape juice consumption increased 5 percent in 1997, largely because of the 122-percent increase in Washington's grape production, about 81 percent of which is processed into juice. Cranberry juice consumption also increased from the previous year, while pineapple juice consumption declined and prune juice consumption remained unchanged. Because carryover data are unavailable for noncitrus juices, per capita consumption estimates may be over- or understated.

Citrus juice consumption rose 5 percent in 1997/98 because a 7-percent increase in orange juice consumption offset declines in grapefruit, lemon, and lime juices. Domestic consumption of orange juice totalled 1.6 billion gallons in 1997/98 in response to abundant supplies and lower retail

prices than a year ago. Despite the higher consumption, orange juice stocks are expected to be large going into the 1998/99 season due to the very large supply of orange juice through the 1997/98 season. Grapefruit juice consumption fell 7 percent in 1997/98 partly due to lower production.

Tree Nut Acreage, Production, Trade, and Value Rose in 1997

The production value for all tree nuts in 1997 jumped to a record \$2.0 billion, 22 percent higher than a year earlier because of higher production and good grower prices for most tree nut crops. Values increased for every tree nut commodity except macadamia nuts. Despite reduced grower prices for almonds, higher production increased the crop's value to \$1.1 billion, the highest on record. The 1997 U.S. almond crop accounted for 61 percent of total tree nut production. An "on" year in the alternate-bearing tendency of almond trees, as well as increased bearing acres, contributed to the larger crop. Besides almonds, record production was realized for hazelnuts, macadamias, pistachios, and walnuts. A large pecan crop was also harvested.

Higher production and lower prices resulted in total domestic use of tree nuts rising to 590 million pounds (shelled basis), equal to 2.2 pounds per person. Domestic consumption was also boosted by a 14-percent increase in imported nuts, including Brazil nuts, pine nuts (pignolias), chestnuts, cashews, and mixed nuts. Consumption rose for almonds, hazelnuts, walnuts, pistachios, and other nuts, but fell for pecans and macadamias. Exports increased for all tree nut commodities except walnuts. Even though total disappearance (domestic use and exports) increased for all tree nuts, beginning stocks for the 1998/99 season are higher than a year earlier due to the record supplies available during the 1997/98 season.

List of Tables

Page

GENERAL

A-1. U.S. per capita use of selected, commercially produced, fresh, and processed fruit and tree nuts, 1976-97	9
A-2. Bearing acreage for fruit and tree nuts, United States, 1976 to date	11
A-3. Utilized production and value of production of citrus and noncitrus fruit, United States, 1976 to date	11
A-4. Bearing acreage for selected citrus and noncitrus fruit, United States, 1977 to date	12
A-5. Total commercial production for selected citrus and noncitrus fruit, United States, 1977 to date	13
A-6. Average price indexes for fruit, United States, 1976 to date	14
A-7. Annual average retail prices for selected fresh fruit, United States, 1980 to date	14
A-8. Fruit and tree nuts: U.S. cash receipts, 1975-97	15
A-9. Fruit production in leading countries and the world, 1993-97	16

NONCITRUS FRUIT

General:

B-1. Utilization of noncitrus fruit production and value, United States, 1976 to date	19
B-2. Fruit, frozen: Commercial pack, United States, 1976 to date	20
B-3. Fruit, dried: Production (dry basis), California, 1976 to date	21

Apples:

B-4. Apples: Production, utilization, and season-average grower price, United States, 1976 to date	21
B-5. Apples, fresh: Monthly prices received by growers, United States, 1976 to date	22
B-6. Apples, Red Delicious, fresh: Monthly retail prices, United States, 1980 to date	22
B-7. Apples: Processed utilization and season-average grower price, United States, 1976 to date	23

Apricots:

B-8. Apricots: Production, utilization, and season-average grower price, United States, 1976 to date	23
--	----

Avocados:

B-9. Avocados: Production, season-average grower price, and value, by State, 1976/77 to date	24
--	----

Bananas:

B-10. Bananas: Number of farms, acreage, production, price, and value, Hawaii, 1976 to date	24
---	----

Cherries:

B-11. Cherries, sweet: Production, utilization, and season-average grower price, United States, 1976 to date	25
B-12. Cherries, tart: Production, utilization, and season-average grower price, United States, 1976 to date	25

Figs:

B-13. Figs: Production, utilization, and season-average grower price, California, 1976 to date	26
--	----

Grapes:

B-14. Grapes: Production, utilization, and season-average grower price, United States, 1976 to date	26
B-15. Grapes: Production and season-average grower price, California, 1976 to date	27
B-16. Grapes: Processed utilization and season-average grower price, United States, 1976 to date	27

Guavas:

B-17. Guavas: Total processed, farm production, price, and value, Hawaii, 1976 to date	28
--	----

Kiwifruit:

B-18. Kiwifruit: Acreage, production, season-average grower price, and value, California, 1980 to date	28
--	----

Mangos:

B-19. Mangos: Acreage, bearing trees, production, season-average grower price, and value, Florida,
1976 to date 29

Nectarines:

B-20. Nectarines: Production, utilization, and season-average grower price, California, 1976 to date 29

Olives:

B-21. Olives: Bearing acreage, production, utilization, season-average grower price, and value, California,
1976 to date 30

Papayas:

B-22. Papayas: Acreage, yield per acre, production, utilization, and season-average grower price, Hawaii,
1976 to date 30

Peaches:

B-23. Peaches: Production, utilization, and season-average grower price, United States, 1976 to date 31

B-24. Peaches, fresh: Monthly prices received by growers, United States, 1976 to date 31

B-25. Peaches: Processed utilization, and season-average grower price, United States, 1976 to date 32

Pears:

B-26. All pears: Production, utilization, and season-average grower price, United States, 1976 to date 32

B-27. Bartlett pears: Production, utilization, and season-average grower price, United States, 1976 to date 33

B-28. Pears, fresh: Monthly prices received by growers, United States, 1976 to date 33

Pineapples:

B-29. Pineapples: Number of farms, acreage, production, disposition, price, and value, Hawaii, 1976 to date 34

Plums and prunes:

B-30. Plums: Acreage, production, season-average grower price, and value, California, 1976 to date 34

B-31. Prunes (dried basis): Acreage, production, season-average grower price, and value, California,
1976 to date 35

B-32. Prunes and plums: Production, utilization, and season-average grower price, four States, 1976 to date 35

CITRUS FRUIT

Grapefruit:

C-1. Grapefruit: Bearing acreage and yield per acre, by State, 1976/77 to date 36

C-2. Grapefruit: Production, by State, 1976/77 to date 36

C-3. Grapefruit: Utilization of production, by State, 1976/77 to date 37

C-4. Grapefruit: Equivalent-on-tree returns, by State, 1976/77 to date 37

C-5. All grapefruit: Monthly equivalent-on-tree returns received by growers, Arizona, 1976/77 to date 38

C-6. All grapefruit: Monthly equivalent-on-tree returns received by growers, California, 1976/77 to date 38

C-7. All grapefruit: Monthly equivalent-on-tree returns received by growers, Florida, 1976/77 to date 39

C-8. All grapefruit: Monthly equivalent-on-tree returns received by growers, Texas, 1976/77 to date 39

C-9. All grapefruit: Monthly equivalent-on-tree returns received by growers, United States, 1976/77 to date 40

C-10. Grapefruit processed, Florida, 1976/77 to date 40

C-11. Canned grapefruit juice: Cannery stocks, pack, supplies, and movement, Florida, 1976/77 to date 41

C-12. Frozen concentrated grapefruit juice: Cannery stocks, pack, supplies, and movement, Florida,
1976/77 to date 41

Lemons:

C-13. Lemons: Acreage, yield per acre, and production, by State, 1976/77 to date 42

C-14. Lemons: Utilization of production, by State, 1976/77 to date 42

C-15. All lemons: Equivalent-on-tree returns, by State, 1976/77 to date	43
C-16. All lemons: Monthly equivalent-on-tree returns received by growers, Arizona, 1976/77 to date	43
C-17. All lemons: Monthly equivalent-on-tree returns received by growers, California, 1976/77 to date	44
C-18. All lemons: Monthly equivalent-on-tree returns received by growers, United States, 1976/77 to date	44
Limes:	
C-19. Limes: Acreage, yield per acre, production, utilization, season-average grower price, and value, Florida, 1976/77 to date	45
Oranges:	
C-20. Oranges: Bearing acreage and yield per acre, by State, 1976/77 to date	45
C-21. Oranges: Production, by State, 1976/77 to date	46
C-22. Oranges: Utilization of production, by State, 1976/77 to date	46

TREE NUTS

General:

E-1. All tree nuts: Bearing acreage, United States, 1976/77 to date	.61
E-2. All tree nuts: Gross return per bearing acre, United States, 1976/77 to date	.61
E-3. All tree nuts: Utilized production (shelled basis), United States, 1976/77 to date	.62
E-4. All tree nuts: Season-average grower prices received, United States, 1977/78 to date	.62
E-5. All tree nuts: Value of production, United States, 1976/77 to date	.63
E-6. All tree nuts (shelled basis): Supply and utilization, United States, 1976/77 to date	.63

Almonds:

E-7. Almonds: Acreage, yield per acre, production (shelled basis), season-average grower price, and value, California, 1976 to date	.64
E-8. Almonds: Supply and utilization (shelled basis), 1976/77 to date	.64

Hazelnuts:

E-9. Hazelnuts (filberts): Bearing acreage and yield per acre (in-shell), by State, 1976 to date	.65
E-10. Hazelnuts (filberts): Production (in-shell), season-average grower price, and value, by State, 1976 to date	.65
E-11. Hazelnuts (filberts): Supply and utilization (shelled basis), 1976/77 to date	.66

Macadamia nuts:

E-12. Macadamia nuts: Acreage, yield per acre, production (in-shell), season-average grower price, and value, Hawaii, 1976 to date	.66
--	-----

Pecans:

E-13. Pecans: Production (in-shell), season-average grower price, and value, United States, 1976 to date	.67
E-14. Pecans: Supply and utilization (shelled basis), 1976/77 to date	.67

Pistachios:

E-15. Pistachios: Production (in-shell), season-average grower price, and value, California, 1977 to date	.68
E-16. Pistachios: Supply and utilization (shelled basis), 1976/77 to date	.68

Walnuts:

E-17. Walnuts (English): Production (in-shell), season-average grower price, and value, California, 1976 to date	.69
E-18. Walnuts: Supply and utilization (shelled basis), 1976/77 to date	.69

PER CAPITA CONSUMPTION

F-1. Fresh apples: Supply and utilization, 1976/77 to date	.70
F-2. Fresh bananas: Supply and utilization, 1976 to date	.70
F-3. Fresh grapes: Supply and utilization, 1976/77 to date	.71
F-4. Fresh kiwifruit: Supply and utilization, 1985 to date	.71
F-5. Fresh mangos: Supply and utilization, 1976 to date	.72
F-6. Fresh papayas: Supply and utilization, 1976 to date	.72
F-7. Fresh peaches and nectarines: Supply and utilization, 1976 to date	.73
F-8. Fresh pears: Supply and utilization, 1976/77 to date	.73
F-9. Fresh strawberries: Supply and utilization, 1976 to date	.74
F-10. Fresh grapefruit: Supply and utilization, 1976/77 to date	.74
F-11. Fresh lemons: Supply and utilization, 1976/77 to date	.75
F-12. Fresh limes: Supply and utilization, 1976/77 to date	.75
F-13. Fresh oranges: Supply and utilization, 1976/77 to date	.76
F-14. Canned apples: Supply and utilization, 1976/77 to date	.76

F-15. Canned apricots: Supply and utilization, 1976/77 to date77
F-16. Canned cherries, sweet: Supply and utilization, 1976/77 to date77
F-17. Canned cherries, tart: Supply and utilization, 1976/77 to date78
F-18. Canned olives: Supply and utilization, 1976/77 to date78
F-19. Canned peaches: Supply and utilization, 1976/77 to date79
F-20. Canned pears: Supply and utilization, 1976/77 to date79
F-21. Canned pineapples: Supply and utilization, processed-weight basis, 1976 to date80
F-22. Canned plums: Supply and utilization, 1976/77 to date80
F-23. Apple juice and cider: Supply and utilization, 1976/77 to date81
F-24. Grapefruit juice: Supply and utilization, 1976/77 to date81
F-25. Orange juice: Supply and utilization, 1985/86 to date82
F-26. Pineapple juice: Supply and utilization, 1976 to date82
F-27. Dried prunes: Supply and utilization, 1976/77 to date83
F-28. Dried raisins: Supply and utilization, 1976/77 to date83
F-29. Fresh fruit: Per capita consumption, 1976 to date84
F-30. Canned fruit: Per capita consumption, product-weight basis, 1976/77 to date85
F-31. Frozen fruit: Per capita consumption, product-weight basis, 1976 to date85
F-32. Dried fruit: Per capita consumption, product-weight basis, 1976/77 to date86
F-33. Selected fruit juices: Per capita consumption, 1976/77 to date86
F-34. Apples: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, by product, 1976/77 to date87
F-35. Grapes: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, by product, 1976/77 to date87
F-36. Total U.S. population88
F-37. Fresh and processed fruit: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, 1976 to date88
F-38. Per capita consumption of selected noncitrus fruit, fresh-weight equivalent, 1976/77 to date89
F-39. Per capita consumption of citrus fruit, fresh-weight equivalent, 1976/77 to date90
F-40. Selected fruit: Per capita consumption, fresh-weight equivalent, 1976 to date91
F-41. Tree nuts (shelled basis): Per capita consumption, 1976/77 to date91

TRADE

General:

G-1. Volume of U.S. imports of selected commodities from top countries, 1989-9792
G-2. Volume of U.S. exports of selected commodities to top countries, 1989-9795

Fruit:

G-3. U.S. fresh-market fruit imports, monthly, 199797
G-4. U.S. fresh-market fruit imports, monthly, 199698
G-5. U.S. fresh-market fruit imports, monthly, 199599
G-6. U.S. fresh-market fruit exports, monthly, 1997100
G-7. U.S. fresh-market fruit exports, monthly, 1996101
G-8. U.S. fresh-market fruit exports, monthly, 1995102

Fruit juice:

G-9. U.S. fruit juice trade, monthly, 1997103
G-10. U.S. fruit juice trade, monthly, 1996104
G-11. U.S. fruit juice trade, monthly, 1995104

1/ National Agricultural Statistics Service (NASS) began reporting "limited" and "undersized" as separate categories in 1990 and made estimates for 1988 and 1989. All data since 1988 are as reported by NASS. 2/ Mostly canned, except for 1980 when use of limited-size fruit in canned ripe olives was not permitted. Reported by California Olive Committee for 1976 to 1987. 3/ "Limited and undersized" reported by NASS, minus "limited size" reported by California Olive Committee for 1976 to 1987. Includes undersized and culls.

N.A.= Not available.

1/ Maine produces wild blueberries, other States cultivated. NASS publishes data for cultivated blueberries only. Beginning in 1988, data are from the New England Agricultural Statistics Service. Data prior to 1988 are from the North American Blueberry Council. 2/ Includes small amounts from Indiana prior to 1992.

Sources: New England Agricultural Statistics Service; Oregon Agricultural Statistics Service, Oregon Dept. of Agriculture; Washington Agricultural Statistics Service, State of Washington Dept. of Agriculture; North American Blueberry Council; National Agricultural Statistics Service, USDA.

1/ Beginning July 1 for almonds, hazelnuts, macadamias, and pecans; August 1 for walnuts; September 1 for pistachios; other tree nuts include Brazil, pignolias, chestnuts, cashews, and mixed nuts. 2/ Utilized production minus marketable production, which includes inedibles and noncommercial usage.

3/ Marketable production is used to calculate consumption. 4/ Marketable production plus imports and beginning stocks. 5/ Preliminary estimates.
