

Welcome to the  
**Wikidata Babel Workshop**  
**Wikimania 2018, Cape Town**

**User :** \_\_\_\_\_  
**Babel :** \_\_\_\_\_  
*ex. fr-N eo-4 en-2 br-1*

## **Mission**

On this level 3, your goal is to make Wikidata more consistent and powerful. To achieve this, join contributors from other cultural and language backgrounds, and discuss how to build a more consistent tree structure for Wikidata items. Your goal is to improve the conceptual tree of Wikidata at high levels of abstraction.

## **Tips**

P279 and P30 will be your best friends today, but don't hesitate to take a paper and a pen. You can use Reasonator to explore the arborescence and find a part of the Wikidata tree that needs gardeners.

## **Why people will thank you**

Improving the Wikidata tree makes it a more powerful tool. For instance, it makes SPARQL requests more accurate, and it's easier to explore data.

**>>> See you next time?**

Please do not hesitate to give us some feedback about the workshop. Thanks for having been there!
