PROBLEMS

Everyone will agree that the Problems of the Far East are of transcending importance.

It is impossible to evaluate the closely interwoven fabric of the Far East without an understanding of the important component parts.

To understand Japan, it is essential to keep in close touch, not only with current events—startling as they often are—but with an impartial and thoroughly interpretative background of those events—for the events themselves are often but the surface indication of deeper and more significant currents—and those currents are forceful and moving rapidly in these days.

If you wish to keep yourself reliably informed, subscribe to The Japan Advertiser, concededly the leading foreign language daily published in Japan.

The Japan Advertiser is the one and only medium which supplies this information, fully and impartially, and which gives the essential interpretative background.

LEAF TOBACCO Produced in Japan

CHARACTERISTICS.—Very light of body, yellowish-brown and very bright, slender mid-rib and veins of considerable elasticity, and possessed of a bulk increasing disposition.

Capable of inflating the output of Cigarettes by 20-30% in comparison with tobaccos produced in other countries.

With no peculiarity of flavour, and being very mild, it characteristically lends itself to harmonious blending with other tobaccos.

LOW PRICE.—The tobacco cultivation being under the control and supervision of the Tobacco Monopoly Bureau, Imperial Japanese Government, the growers are educated in the art of cultivation and preparation. The co-operation of the Tobacco Growers' Guild, coupled with cheap farm labour, makes possible the low cost of production.

STABILITY AND CO-ORDINATION OF QUALITY.—The tobacco-leaves undergo comparison with standard samples, and after rigorous inspection are purchased by the Bureau at statutory prices, and hence unlike common merchandise the qualities as well as the prices are well stabilized. Strict care being thus taken in the selection and unification of quality, as also in the perfection of packing, the tobacco shipped by us is unvaried and co-ordinated in quality.
