Introduction

Agricultural Statistics brings together each year the more important series of statistics concerning Agriculture and closely related subjects. For the most part, the data included herein were prepared in the U. S. Department of Agriculture, or compiled by the staff for official use. A few of the tables were prepared in other Government agencies. A particular effort has been made to meet the diverse interests and needs of the general public for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. The tables presented cover a wide variety of facts in forms suited to most common use. Persons needing daily, weekly, and monthly information are served by the current reports of the agencies which prepare the summary statistics appearing in this book and to which the tables are credited. Research workers and others will usually wish to obtain direct from the agencies the latest facts bearing on particular problems associated with data contained in the tables included here. Inquiries concerning more current or more detailed data, the statistical methodology used, past and projective revisions, etc., should be addressed directly to the agency responsible for the table.

The historical series in this volume have been expanded in order to provide a more complete reference than in other recent editions. A similar volume was issued in 1952 and 1942. With the longer series carried here, there should be few occasions for the user to refer back to earlier issues. Historical tables showing totals for the United States begin with 1866 for the principal crops and with 1867 for January 1 livestock numbers. Most other basic tables showing national totals begin with 1919, 1929, 1934 or 1939 (livestock and poultry numbers 1 year later) depending in part on the relative need for a long series.

Space in this issue was not sufficient to carry all series back to their beginning but in general, sufficient years have been included in each case to meet the needs of most users. It is expected that succeeding issues will carry historical series for fewer years, but with references to the 1957 volume.

The table of contents indicates the general layout of the book and page headings show the subdivisions within each chapter. The organization is much the same as in the 1956 issue, but several new tables have been included with a few series on Hawaiian agriculture near the end of the book.

RECENT REVISIONS

Revisions of basic series from 1949 to 1954, based on a review of the 1954 Census and other check data, have been completed and are carried in this volume. Many of these series had been revised, and were carried in the 1956 issue, but this is the first volume reflecting such revisions in all series.

Per capita consumption data for food items given in this volume are also revised. The series were formerly computed using the Bureau of the Census estimates of population adjusted for underenumeration. The per capita food consumption series now being published and included here are com-

puted using the adjusted population estimates, table 790, which are the population data being used by all other U. S. Government agencies. The revisions also incorporate the changes resulting from the use of the latest Census of Agriculture and Census of Manufacturers data in some of the basic series.

Department Estimates and Census Data

Estimates of the U. S. Department of Agriculture are made primarily to give timely current State and national totals and averages. They are based on "benchmark" data supplied by the Censuses of Agriculture taken every 5 years and on sample data supplied by farmers and by people who do business with farmers, together with check data from other sources. Being estimates, they are subject to revisions as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on acreage, production numbers, price, value, supplies, and disposition are based on official Department estimates and exclude States for which no official estimates are compiled.

Census data are the result of the most nearly complete or actual count that can be made, and are used for many other purposes than determining State and national totals and averages. For example, each census provides much detailed information about counties and minor civil divisions. It also provides data that can be organized into many frequency distributions and cross-classifications for large and small portions of the country or for different segments of the agricultural industry. The definition and manner of handling a census precludes revising census data to bring them in line with other indications, even though in practice it is difficult to obtain a complete enumeration. Any effort to make such revisions or adjustments would produce estimates.

For census years, many tables carry both census totals and this Department's estimates. Generally, where there are appreciable differences between the census totals and this Department's final estimates, the processes of checking and revising estimates have indicated that some sources provide more nearly complete information about some items than the census has been able to obtain. For example, this Department's estimate of tobacco production can be considered more precise than census totals, because the estimates are revised in line with actual production as shown independently by Internal Revenue records and State records of tobacco sales. Sugar beet and sugar cane production and acreage estimates are adjusted to quantities actually reported by sugar factories. Check information on peanuts and rice is available from processors for areas sometimes including several States. In a number of other instances allowances have been made for known incompleteness of coverage by the census.

For livestock and poultry, the Department's estimates of inventory numbers relate to January 1. Most recent censuses have not enumerated numbers on that date. The decennial censuses have usually related to April 1, with the average date of enumeration falling somewhat later. The 1945 census was taken as of January 1, but with the trying wartime conditions, was delayed over a considerable length of time in a number of States with the result that reported inventory numbers did not always represent the actual January 1 inventory. The 1954 census was taken in October and November. These situations have made it necessary to adjust census totals to a January 1 equivalent basis, taking into account changes that occurred between the January 1 date and the actual date of enumeration.

DEFINITIONS

"Farm Value" as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, however, quantities not harvested because of low prices or other economic factors are excluded from the computation of farm value. The term is used in the inventory tables on livestock and poultry to mean value of the number of head on farms on January 1. It is derived by multiplying the number of head by an estimated value per head as of that date.

The word "Year" (alone) in a column heading means calendar year. "Ton" when used in this book without qualifications means a short ton of 2,000 pounds.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the U. S. Department of Agriculture. It does not cover all farm products nor all containers for any one product.

The information has been assembled from various sources within the Department and from State schedules of legal weights. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume, due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights, as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weights. The table was prepared chiefly for use of workers in the U. S. Department of Agriculture who have need of conversion factors in statistical computations.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

Sunflower seed.	Bushel.	24 and 32		Long ton.	2,240

¹ Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweetpotatoes, peaches, green beans, green peas, spinach, etc.

² Approximate inside dimensions, 10 1/2 by 11 1/2 by 18 inches.

³ Approximate inside dimensions, 11 by 13 by 17 inches.

⁴ Approximate inside dimensions, 4 5/8 by 12 1/2 by 16 1/8 inches.

⁵ Approximate inside dimensions, 4 1/2 by 16 by 16 1/4 inches.

⁶ Approximate inside dimensions, 9 3/4 by 11 by 20 5/8 inches.

⁷ Approximate dimensions, 4 1/2 by 13 1/2 by 16 1/8 inches.

⁸ Approximate inside dimensions, 13 by 12 by 32 inches.

⁹ Approximate inside dimensions, 8 by 12 by 22 inches.

¹⁰ Inside dimensions vary. Common sizes are 13 by 13 by 22 1/8 inches, and 13 by 15 1/8 by 23 inches.

¹¹ Approximate inside dimensions, 13 by 18 by 21 5/8 inches.

¹² Approximate inside dimensions, 13 by 13 by 22 5/8 inches.

¹³ This is the weight commonly used in trade practices, the actual weight varying according to temperature conditions.

¹⁴ Approximate inside dimensions, 9 3/4 by 16 by 20 inches.

¹⁵ Approximate inside dimensions, 4 1/8 by 11 1/2 by 14 inches.

¹⁶ The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked, on the ear, because it required 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.

¹⁷ For statistical purposes the bale of cotton is 500 pounds or 480 pounds net weight. Prior to Aug. 1, 1946, the net weight was estimated at 478 pounds. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.

¹⁸ This is the average weight of cottonseed, although the legal weight in some states varies from this figure of 32 pounds.

¹⁹ Approximate inside dimensions, 9 1/4 by 10 1/2 by 15 inches.

²⁰ 45 pounds prior to 1952.

²¹ Approximate inside dimensions, 1 3/4 by 11 by 16 1/8 inches.

²² Approximate inside dimensions, 12 by 12 by 24 inches.

²³ Approximate inside dimensions, 11 1/2 by 11 1/2 by 24 inches.

²⁴ Until 1942, these net weights as used in this Department (for figuring quantities and values of bulk fruit in terms of packed boxes) were 60 pounds for grapefruit, 76 pounds for lemons, and 70 pounds for oranges. Grapefruit in California areas other than the Desert Valleys, averages 68 pounds per box compared with 65 pounds in the Valleys.

²⁵ Approximate inside dimensions, 5 3/4 by 13 1/2 by 16 1/8 inches.

²⁶ Approximate inside dimensions, 4 1/2 by 16 by 16 1/8 inches.

²⁷ Approximate inside dimensions, 7 3/4 by 16 by 21 7/8 inches.

²⁸ Approximate inside dimensions, 9 3/4 by 13 by 25 inches.

²⁹ Approximate inside dimensions vary. Common size is 4 1/2 by 11 1/2 by 16 1/8 inches.

³⁰ Approximate inside dimensions, 8 1/2 by 11 1/2 by 18 inches.

³¹ Approximate inside dimensions, 13 3/8 by 11 by 22 inches.

³² Approximate inside dimensions, 12 by 10 1/4 by 33 inches.

³³ Inside dimensions vary. Ranges from 4 by 16 by 16 1/8 inches to 6 by 16 by 16 1/8 inches.

³⁴ This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying and the net weight when sold in terminal markets may be below 55 pounds.

³⁵ Approximate inside dimensions, 9 1/2 by 9 1/2 by 19 1/8 inches.

(See conversion factors on next page.)

CONVERSION FACTORS

Commodity	Unit	Approximate equivalent
Apples.....	1 pound dried.....	7 pounds fresh; beginning 1943, 8 pounds fresh
Do.....	1 pound chops.....	5 pounds fresh
Do.....	1 barrel.....	3 boxes or 3 bushel baskets
Do.....	1 case canned ³⁵	1.4 bushels fresh
Applesauce.....	1 case canned ³⁶	1.2 bushels fresh
Apricots.....	1 pound dried.....	5½ pounds fresh
Barley flour.....	100 pounds.....	4.59 bushels barley
Beans, Lima.....	1 pound shelled.....	2 pounds unshelled
Beans, snap or wax.....	1 case canned ³⁷	0.010 tons fresh
Buckwheat flour.....	100 pounds.....	3.47 bushels buckwheat
Calves.....	1 pound live weight.....	0.555 pounds dressed weight, 1952-56
Cattle.....do.....	0.545 pounds dressed weight, 1952-56
Cane syrup.....	1 gallon.....	5 pounds sugar
Cherries, sour.....	1 case canned ³⁸	0.023 tons fresh
Chickens.....	1 pound live weight.....	0.72 pound ready-to-cook weight, since 1947
Do.....do.....	0.65 pounds ready-to-cook weight
Corn, shelled.....	1 bushel (56 lbs.).....	2 bushels (70 pounds) of husked ear corn
Corn, sweet.....	1 case canned ³⁷	0.038 tons fresh
Cornmeal:		
Degermed.....	100 pounds.....	3.16 bushels corn, beginning 1946
Nondegermed.....do.....	2 bushels corn, beginning 1946
Cotton.....	1 pound ginned.....	3.26 pounds seed cotton including trash ³⁸
Cottonseed meal.....	1 pound.....	2.10 pounds cottonseed
Cottonseed oil.....do.....	5.88 pounds cottonseed
Dairy products:		
Butter.....	1 pound.....	21.1 pounds milk
Cheese.....do.....	10 pounds milk
Condensed milk, whole.....do.....	2.3 pounds milk
Dry cream.....do.....	19 pounds milk
Dry milk, whole.....	1 pound.....	7.6 pounds milk
Evaporated milk, whole.....do.....	2.14 pounds milk
Malted milk.....	1 pound.....	2.6 pounds milk
Nonfat dry milk.....do.....	11 pounds liquid skim milk
Ice cream ³⁹	1 gallon.....	15 pounds milk
Ice cream ³⁹ (eliminating fat from butter and concentrated milk).....	1 gallon.....	12 pounds milk
Eggs.....	1 case.....	45 pounds; 46.8 pounds since 1952
Eggs, shell.....do.....	39.5 pounds frozen or liquid whole eggs
Do.....do.....	10.8 pounds dried whole eggs
Figs.....	1 pound dried.....	3 pounds fresh in California; 4 pounds fresh elsewhere
Flaxseed.....	1 bushel.....	About 2½ gallons oil
Grapefruit, Florida.....	1 case canned juice ³⁷	0.83 box fresh fruit
Hogs.....	1 pound live weight.....	0.568 pounds dressed weight excluding lard, 1952-56
Linseed meal.....	1 pound.....	1.56 pounds flaxseed
Linseed oil.....	1 pound.....	2.80 pounds flaxseed
Malt.....	1 bushel (34 lbs.).....	1 bushel barley (48 lbs.)
Maple syrup.....	1 gallon.....	8 pounds maple sugar
Nuts:		
Almonds, imported.....	1 pound shelled.....	3½ pounds unshelled
Almonds, California.....do.....	2.22 pounds unshelled through 1949; 2 pounds thereafter
Brazil.....do.....	2 pounds unshelled
Cashews.....do.....	4.55 pounds unshelled
Chestnuts.....do.....	1.19 pounds unshelled
Filberts.....do.....	2.22 pounds unshelled through 1949; 2.5 pounds thereafter
Pecans:		
Seedling.....do.....	2.78 pounds unshelled
Improved.....do.....	2.50 pounds unshelled
Pignolias.....do.....	1.3 pounds unshelled
Pistachios.....do.....	2 pounds unshelled
Walnuts:		
Black.....do.....	8½ pounds unshelled
Persian (English).....	100 pounds.....	2.56 pounds unshelled
Oatmeal.....	1 case canned juice ³⁷	7.6 bushels oats, beginning 1943
Oranges, Florida.....	1 pound dried.....	0.63 box fresh
Peaches, California, freestone.....do.....	5½ pounds fresh through 1918; 6 pounds fresh for 1919-28; and 6½ pounds fresh from 1920 to date
Peaches, California, clingstone.....	1 case canned ³⁶	7½ pounds fresh
Peaches, clingstone.....do.....	1.0 bushels fresh
Do.....do.....	0.0230 tons fresh
Peanuts.....	1 pound shelled.....	1½ pounds unshelled

See footnotes at end of table.

Do.....	—do—.....	0.026 tons fresh
Peas, green.....	1 pound shelled.....	2½ pounds unshelled
Do.....	1 case canned ³⁷	0.010 tons fresh (shelled)
Prunes.....	1 pound dried.....	2½ pounds fresh in California; 3 to 4 pounds fresh elsewhere
Raisins.....	1 pound.....	4 pounds fresh grapes
Rice, milled (excluding brewers).....	100 pounds.....	152 pounds rough or unhulled rice
Rye flour.....	—do—.....	2.23 bushels rye beginning 1947
Sheep and lambs.....	1 pound live weight.....	0.475 pounds dressed weight 1952-56
Soybean meal.....	1 pound.....	1.28 pounds soybeans
Soybean oil.....	—do—.....	5.45 pounds soybeans
Sugar.....	1 ton raw.....	0.9346 tons refined
Tobacco.....	1 pound farm-sales weight.....	Various weights of stemmed and unstemmed, according to aging and the type of tobacco. (See circular 435, U. S. Dept. of Agr.)
Tomatoes.....	1 case canned ³⁷	0.027 tons fresh
Turkeys.....	1 pound live weight.....	0.78 pounds ready-to-cook weight
Wheat flour.....	100 pounds.....	2.33 bushels wheat ⁴⁰
Wool, domestic apparel shorn.....	1 pound greasy.....	0.44 pounds scoured
Wool, domestic apparel pulled.....	—do—.....	0.75 pounds scoured

³⁶ Case of 24 number 2½ cans.³⁷ Case of 24 number 2 cans.³⁸ Varies widely by method of harvesting.³⁹ The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.⁴⁰ This is equivalent to 4.56 bushels of wheat per barrel (196 pounds) of flour and has been used in conversions beginning July 1, 1944. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790-1879, 5 bushels; 1880-1908, 4.75 bushels; 1909-17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels; 1921-44, 4.7 bushels. From Mar. 1 to Nov. 1, 1946, the milling rate averaged about 2.20 bushels wheat per 100 pounds flour.

CHAPTER I

STATISTICS OF GRAIN

This chapter deals primarily with estimates of acreage, production, farm disposition, prices, farm value, stocks, and foreign production and trade. Estimates in greater detail are published regularly by the Crop Reporting Board. The United States tables on acreage, yield, production, value, and foreign trade for wheat, corn, and oats have been extended back to 1866 which is the beginning of the series. The 1949-54 data in this chapter have been revised in the light of the 1954 census enumeration results.

Tables on sorgo sirup, which might be expected in the sorghum group, are included with "sugar crops", and popcorn tables are placed with "minor field crops." Corn sugar and corn sirup, however, are included in the corn tables.

A table on transactions under the International Wheat Agreement and one on stocks of grains in principal exporting countries have been added to this chapter.

Table 1.—Wheat: Acreage, yield, production, value, and foreign trade, United States, 1866-1956

Year	Acreage seeded ¹	Acreage har- vested	Yield per har- vested acre	Production	Season average price per bushel received by farmers ²	Farm value	Average price per bushel, year beginning July, at—		Foreign trade, including flour, year beginning July ³

¹ Includes acreage seeded in preceding fall for harvest in the year shown.² Prior to 1908 prices are as of Dec. 1.³ Prior to 1899 price of Spring wheat at Chicago, quoted as follows: 1866–84, No. 2 Spring—simple average of mean weekly high and low cash prices, as quoted in annual reports of the Chicago Board of Trade; 1885 to December 1896, No. 2 Spring—simple average of mean of daily high and low cash prices, as quoted in Howard Bartel & Co. Red Book (summary of current quotations in Chicago Daily Trade Bulletin); January 1897–June 1898, No. 3 Spring and 1898, No. 1 Spring—simple average of mean of daily high and low cash prices as quoted in Chicago Daily Trade Bulletin. 1899 to date Hard Winter wheat at Kansas City, quoted as follows: 1899–1946, No. 2 Hard Winter, and 1947 to date, No. 2 Hard and Dark Hard Winter, computed by weighting selling prices by number of carlots sold, as reported in the Kansas City Grain Market Review.⁴ 1899–1917, No. 1 Northern Spring and 1918 to date No. 1 Dark Northern Spring, computed by weighting selling prices by number of carlots sold as reported in the Minneapolis Daily Market Record.⁵ Compiled from reports of the Department of Commerce. Wheat flour converted to grain equivalent on the following basis: 1866–79, 5; 1880–1908, 4.75; 1909–17, 1921 to June 30, 1944, 4.7 bushels of grain to 1 barrel of flour; July 1, 1944, to Feb. 28, 1946, 2.33 bushels of grain to 100 pounds of flour; the following months of 1946 as indicated, March 2, 28, April 2, 17, May 2, 18, June 2, 17, July 2, 18, August 2, 22, September 2, 20, and October 2, 23 bushels; and Nov. 1, 1946, to date, 2.33 bushels of grain to 100 pounds of flour.⁶ Includes flour milled from imported wheat. See also table 8, which includes civilian feeding by the military abroad prior to January 1947.

Continued on page 46.

¹ Includes acreage seeded in preceding fall for harvest in the year shown.

² Preliminary.

³ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 1—Continued

⁷ Includes wheat imported for milling in bond and subsequent export. Total imports 1866–1928, general imports 1929–32.

⁸ Total exports (domestic plus foreign) minus general imports 1929–32; beginning 1933, domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁹ Includes an allowance for unredeemed loans at average loan value; beginning with 1948, also includes an allowance for purchase agreement deliveries valued at the average rate.

¹⁰ Excludes some minor producing States and parts of other States where wheat was not asked separately.

¹¹ Preliminary. ¹² July–May average.

Agricultural Marketing Service.

¹ Acreage seeded in preceding fall for winter wheat.

² Preliminary.

³ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁴ Includes "Red Durum". Small additional quantities of durum wheat are grown in other than the States shown here, but are included with "other spring" wheat.

⁵ Short-time average.

Agricultural Marketing Service.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1956 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1956 and ended early in 1957.

² Refers to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts.

⁴ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁵ 1935 only.

⁶ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland and Rumania.

⁷ Average of less than 5 years.

⁸ Estimates for Syria and Lebanon not shown separately during this period.

⁹ Data for the period shown are not strictly comparable since figures for 1954–56 include allowances for non-reporting areas, which are not included for earlier periods shown, but are included in estimated total for Asia.

¹⁰ Production on European holdings only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments reports of United States Agricultural Attachés, results of office research and related information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Includes flour expressed in wheat equivalent. ² As reported by U.S. Department of Commerce. ³ Classified as "unfit for human consumption" or imported for special feeding programs. ⁴ Includes flour imported free for export in 1,000 bushels as follows: 1935, 43; 1937, 108; 1938, 363; 1939, 214; 1940, 170; 1941, 2; 1942, 2; 1945, 19; 1948, 1; 1949, 29 and 1953, 2. ⁵ Includes wheat and wheat products used for livestock and poultry feed, imported duty-free by the Commodity Credit Corporation. ⁶ Reported by the National Military Establishments; financed by the United States. ⁷ Usually all from imported wheat, although in some years small quantities of United States wheat were added. Reported by U.S. Department of Commerce. ⁸ 14,072,000 reported by U.S. Department of Commerce plus 822,000 unreported exports to British Services. ⁹ 142,637,000 reported by U.S. Department of Commerce, plus 11,358,000 unreported exports to Germany financed by the United Kingdom.

¹⁰ 154,407,000 reported by U.S. Department of Commerce, plus 11,884,000 unreported exports to Germany financed by the United Kingdom. ¹¹ 184,324,000 reported by U.S. Department of Commerce, plus 23,038,000 unreported exports to Germany financed by the United Kingdom. ¹² 123,546,000 reported by U.S. Department of Commerce, plus 9,539,000 unreported exports to Germany financed by the United Kingdom. ¹³ Includes exports of 2,788,000 bushels for relief or charity by individuals and private agencies.

¹ For importing countries, represents quantities which indicated importers were obligated to purchase at minimum prices under the terms of the International Wheat Agreement of 1953. For exporting countries, represents quantities which the indicated exporters were obligated to sell at maximum prices under the terms of that Agreement.

² Represents actually recorded sales by signatory exporting countries to signatory importing countries during 1955–56 (August-July) under the terms of the International Wheat Agreement.

Commodity Stabilization Service.

¹ Includes flour made from United States wheat and shipments to territories.² Includes "Red Durum."³ Less than 500,000 bushels.⁴ Preliminary.

Agricultural Marketing Service. Stocks include only old crop wheat on hand July 1 of year shown and are the total of the following stocks: On farms; in interior mills, elevators, and warehouses; in merchant mills; commercial stocks at terminals; and stocks owned by Commodity Credit Corporation in steel and wooden bins, and in transit. Estimated stocks on farms and in interior mills, elevators, and warehouses by classes, as well as production by classes, are on the basis of the quinquennial wheat-variety surveys. Commercial stocks are reported by classes, and merchant mill stocks are broken down largely on the basis of the distribution by classes of commercial stocks. Exports and shipments by classes are estimated on the basis of "inspection for export" records of the former War Food Administration and the Department of Agriculture, and export indemnifying agencies.

1956 ⁴		56,929												

¹ Owned by Commodity Credit Corporation and stored in bins or other storage owned or controlled by CCC; also in transit to ports and in Canadian elevators. Other Commodity Credit Corporation-owned wheat included in the estimates by positions.

² Prior to 1937 some new wheat included; beginning with 1937 only old-crop wheat is shown in all stocks positions. The figure for July 1, 1937, including the new wheat, is 102.8 million bushels, which is used as year-end carryover in the 1936-37 marketing year.

³ Includes full-duty wheat, wheat imported for feed, and dutiable flour and other products in terms of wheat. Excludes wheat imported for milling in bond and export as flour.

⁴ Preliminary.

⁵ Includes flour and other products in terms of wheat.

⁶ Food use is computed as follows: Total grind (commercial and noncommercial) less exports and shipments of flour and other wheat products, less military procurement, plus estimated breakfast food produced outside the flour-milling industry, plus dutiable imports of flour and other wheat products.

⁷ Quantity of wheat ground into granular flour for alcohol production together with wheat grain used for that purpose.

⁸ Balancing item; roughly approximates total use as feed, including that used in commercial feed as well as that fed on farms.

⁹ Includes procurement for both military exports and for military food use; military takings for civilian feeding in occupied areas measured at time of procurement and not at time of shipment overseas.

¹⁰ Exports as here used, in addition to commercial exports, include USDA flour procurement as distinct from USDA deliveries for export. They exclude exports for civilian feeding by the military abroad, which are included in military procurement. Deliveries for export (actual exports, including those of civilian feeding in occupied areas) of wheat, flour and other products, in million bushels, beginning with 1941 were as follows: 27.9; 27.8; 42.6; 144.4; 390.6; 397.4; 485.9; 504.0; 299.1; 366.1; 475.3; 317.8; 217.0; 274.3 and 346.1.

¹¹ Shipments are to Alaska, Hawaii, Puerto Rico, Guam, Samoa, Virgin Islands and Wake Island; partly estimated. For the war years, USDA shipments for stockpiling in the territories have been added to reported Census totals.

¹² Total disappearance plus year-end carryover accounts for total supply.

¹³ Includes exports of 2,220,000 bushels for relief or charity by individuals or private agencies.

Agricultural Marketing Service. Foreign trade figures from reports of the U.S. Department of Commerce and U.S. Department of Agriculture. Military procurement figures from the National Military Establishments.

¹ Markets are Chicago, Minneapolis, Kansas City, St. Louis, Omaha, and Duluth.

² Basic export selling price of Australian Wheat Board, bulk f.o.b. basis. Prices for 1947-48 are a composite of bulk and bagged wheat f.o.b. ports basis; 1949-52 for export outside International Wheat Agreement quota; and 1952 to date, for both International Wheat Agreement quota and "free" wheat. Prior to 1947 quotations are for Sidney, Australian milling.

³ Export price to the United States and neutral countries from Oct. 19, 1943 to July 31, 1946.

⁴ August 1946-July 1949, commercial sales to countries other than the United Kingdom.

⁵ No. 2 Hard and Dark Hard Winter.

⁶ Beginning August 1949, export price for sales outside of the International Wheat Agreement.

⁷ Beginning March 1952, changed to Spring short patent.

⁸ Preliminary.

Agricultural Marketing Service. Compiled from following sources: Northwestern Daily Produce News; Bureau of Labor Statistics Wholesale Price Bulletins; reports of the Commodity Stabilization Service; New York Journal of Commerce; Broomhall's Yearbook and Corn Trade News; Canadian Grain Statistics; Statistical Register of New South Wales, annual; Summary of the Australian Wheat Situation, The Wheat Industry of Australia, and trade papers published at various markets. Wheat prices at Minneapolis, St. Louis, Kansas City, and Chicago are weighted averages. Foreign prices are compiled in original currencies and units. Prices converted to cents per bushel of 60 pounds at current monthly rates of exchange as reported by the Federal Reserve Board.

¹ Includes rye sown in the spring of year shown.² Averages of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.³ Compiled from reports of the Department of Commerce. Rye flour converted to grain equivalent on the basis of 6 bushels of grain to 1 barrel of flour through 1943; beginning 1944, 4.6 bushels of grain to 1 barrel of flour. Rye malt converted to grain on the basis of 1.1 bushels of grain to 1 bushel of malt through 1942; beginning 1943, 1 bushel of grain to 1 bushel of malt.⁴ Includes rye flour, grain equivalent, 1929–32. Rye malt not separately reported. The period 1942–48 does not include rye and flour used by military services for civilian relief abroad, estimated in thousands of bushels as follows: 435; 484; 1,397; 944; 0; 406; and 0. These exports are included in table 20.⁵ Imports for consumption minus domestic exports, with net exports shown by a minus sign.^b Less than 500 bushels.⁷ Includes an allowance for unredeemed loans at average loan value; beginning with 1948, also includes an allowance for purchase agreement deliveries valued at the average rate.⁸ Excludes some minor producing States and parts of other States where rye was not asked separately.⁹ Preliminary.¹⁰ July–May average.

Agricultural Marketing Service. Italic figures are census returns.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1956 is combined with preliminary forecasts for the Southern Hemisphere harvests, which began late in 1956 and ended early in 1957.

² Figures refer to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts.

⁴ 1935 only.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland and Rumania.

⁷ Average of less than 5 years.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Agricultural Attachés, results of office research, and related information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ 1934-42, farm and commercial stocks only; beginning in 1943, includes interior mill, elevator and warehouse stocks; and beginning 1953, includes Commodity Credit Corporation stocks stored in bins or other storage owned or controlled by CCC, also CCC rye in transit. The stocks figure for July 1, 1943, of 38,609 thousand bushels, excluding interior mill, elevator and warehouse stocks, was used in computing 1942-43 disappearance.² 1934-44, calculated from trade sources; 1945-55 from Bureau of the Census.³ 1942-47, includes rye and flour (rye equivalent) used by military services for civilian relief abroad, estimated in 1,000 bushels as follows: 435, 484, 1,397, 944, 0, and 406. These exports are not included in table 16.⁴ Less than 500 bushels.⁵ Preliminary.

¹ Compiled from reports of the Department of Commerce.² General imports, 1919-30; imports for consumption, beginning 1935.³ Domestic exports minus imports, for consumption with net imports shown by a minus sign.⁴ Includes buckwheat flour 1922-25. Buckwheat flour converted to grain equivalent on the basis of 7 bushels of grain to 1 barrel of flour.⁵ Not available on crop year basis prior to this date.⁶ Less than 500 bushels.⁷ Includes shipments under the Army Civilian Supply Program beginning January 1947, and continuing in later years.⁸ Excludes some minor producing States.⁹ Preliminary.

Agricultural Marketing Service. Italic figures are census returns.

¹ Yield and production represent equivalent grain yield on total acres harvested for all purposes, i.e., grain silage, fodder, hogged off, grazed, etc. Census yields are corn for grain.

² Prior to 1908 prices are as of Dec. 1.

³ Prices 1866–98 are averages of the weekly quotations for No. 2 or better in annual reports of the Chicago Board of Trade; 1899 to date are the average of daily prices weighted by carlot sales, No. 3 yellow corn as reported in the Chicago Daily Trade Bulletin through May 1942, and the Chicago Journal of Commerce or Wall Street Journal from June 1942 to date.

⁴ Compiled from reports of the Department of Commerce. Corn meal converted to grain equivalent on the basis of 4 bushels of grain to 1 barrel of meal through December 1945; beginning January 1946 3.16 bushels of grain to 100 pounds of meal.

⁵ General imports 1866–1908 and 1911–33. Includes corn meal, beginning 1933. Excludes cracked corn.

⁶ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁷ Not available on crop-year basis.

⁸ Corn harvested for grain.

⁹ Includes an allowance for unredeemed loans at average loan value; beginning with 1948, also includes an allowance for purchase agreement deliveries valued at the average rate.

¹⁰ Includes shipments under the Army Civilian Supply Program, beginning January 1946, and continuing into later years.

¹¹ Preliminary.

¹² October–May average.

Agricultural Marketing Service. Italic figures are census returns.

¹ Relates to corn for all purposes, i.e., grain, silage, fodder, hogged off, grazed, etc.

² Preliminary.

³ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

Agricultural Marketing Service.

¹ Preliminary.² Includes grain equivalent of corn silage and forage, as well as grain corn.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 38

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which follow; thus the crop harvested in the Northern Hemisphere in 1956 is combined with preliminary forecasts for the Southern Hemisphere harvest which begins early in 1957.

² Refers to harvested area as far as possible.

³ Revised estimates for Northern Hemisphere countries; for the Southern Hemisphere, revised preliminary forecasts.

⁴ Average of less than 5 years.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ Data for the period shown are not strictly comparable, since figures for 1954-56 include estimates for non-reporting areas, which were not included for earlier periods shown, but allowances were included in estimated total for Asia.

⁷ Production on European holdings only. Allowances for native cultivation, not shown, are included in estimated total for Africa.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Agricultural Attachés, results of office research and related information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Average of daily prices weighted by carlot sales, as reported in trade papers published at the various markets.² Average of bulk-of-sales price for 1 day each week, compiled by Grain Division, AMS.³ Compiled from Boletin Estadístico, Banco Central De La Republica Argentina, Buenos Aires (monthly). Prices converted to cents per bushel of 56 pounds at current monthly rates of exchange as reported by the Federal Reserve Board.⁴ 2-month average.⁵ 5-month average.⁶ Preliminary.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 44

¹ In bins or other storage owned or controlled by Commodity Credit Corporation and in transit; additional Government stocks are included in other positions.² Compiled from reports of the U.S. Department of Commerce. Imports include grain equivalent of corn-meal and flour; exports are grain only.³ Preliminary.⁴ Estimated quantities (based on census data) used in making prepared breakfast foods.⁵ Estimated quantities used in producing cornmeal, flour, hominy grits, and flakes for human food and for the production of fermented malt liquors. Based on reports of the Bureau of the Census and the Bureau of Internal Revenue. Does not include corn processed for livestock feed.⁶ Starch, syrup, sugar, etc. Compiled from data of Price Waterhouse and Company, New York.⁷ Compiled from data of the Internal Revenue Service. Does not include corn products used in the production of fermented malt liquors.⁸ Based on acreage planted to corn the following year.⁹ Residual; includes small quantities for other uses and waste.¹⁰ Includes exports for military civilian feeding abroad during the period 1945–49.¹¹ Total disappearance, minus exports of corn and grain equivalent of corn products.

Agricultural Marketing Service.

1956 ¹¹	44,648	33,639	34.3	1,152,652	69.0	794,855	78			

¹ Estimates of seeded acreage relate to the total acreage of oats sown for all purposes, including oats sown in the preceding fall.

² Prior to 1949 includes an allowance for oats cut ripe for feeding, unthreshed.

³ Prior to 1908 prices are as of Dec. 1.

⁴ Compiled as follows: September 1868-June 1899, Chicago Board of Trade annual reports, average of weekly quotations for No. 2 white; July 1899-May 1942, Chicago Daily Trade Bulletin and June 1942 to date, Chicago Journal of Commerce and Wall Street Journal, average of daily quotations for No. 2 white, weighted by carlot sales.

⁵ Compiled from reports of the Department of Commerce. Oatmeal converted to grain equivalent on the basis of 1 bushel of grain to 18 pounds of meal through December 1942, and 13.17 pounds of meal thereafter. No exports of oatmeal reported 1866-84.

⁶ Oats—general imports, 1866-1932; oatmeal—general imports 1866-68 and 1884-1909. Includes "oats, unhulled, ground," beginning 1934.

⁷ Total exports (domestic plus foreign) minus imports 1866-1932; beginning 1933 domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁸ Includes shipments under the Army Civilian Supply Program, beginning July 1946, and continuing in later years.

⁹ Includes an allowance for quantities of unredeemed loans and purchase agreement deliveries, valued at the average rate.

¹⁰ Excludes some minor producing States and parts of other States where oats were not asked separately.

¹¹ Preliminary.

Agricultural Marketing Service. Italic figures are census returns.

¹ Preliminary.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where grown and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 50

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1956 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1956 and ended early in 1957.

² Refers to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts.

⁴ Production reported in bushels of 34 pounds.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ Average of less than 5 years.

⁷ 1935 only.

⁸ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania.

⁹ Includes estimate for Lebanon, and is, therefore, not strictly comparable with estimates shown for later years.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Agricultural Attachés, results of office research and related information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ In bins or other storage owned or controlled by Commodity Credit Corporation and in transit; additional CCC stocks are included in other positions.

² Compiled from reports of the U.S. Department of Commerce. Imports include grain equivalent of oatmeal; exports are grain only.

³ Preliminary.

⁴ Used in production of oatmeal and other cereal preparations. Based on reports of the Census of Manufactures.

⁵ Based on area seeded to oats for the following crop.

⁶ Residual; includes small quantities for other uses and waste.

⁷ Includes exports for military relief feeding abroad during the period 1946–49.

⁸ Total disappearance, minus exports of oats and grain equivalent of oatmeal.

Agricultural Marketing Service.

¹ Estimates of seeded acreage relate to the total acreage of barley sown for all purposes, including barley sown in the preceding fall.

² Price of No. 3 barley, average of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.

³ Compiled from reports of the U.S. Department of Commerce. Barley flour converted to grain equivalent on the basis of 9 bushels of grain to 1 barrel of flour. Barley malt converted to grain equivalent on the basis of 1.1 bushels of grain to 1 bushel of malt through 1943; beginning 1944, 1 bushel of grain to 1 bushel of malt.

⁴ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁵ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁶ Includes shipments under the Army Civilian Supply Program, beginning July 1946 and continuing in later years.

⁷ Excludes some minor producing States and parts of other States where barley was not asked separately.

⁸ Preliminary.

⁹ August-May average.

¹ Estimates of seeded acreage relate to the total acreage of barley sown for all purposes, including barley sown in the preceding fall.

² Preliminary.

³ For certain years, prices include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁴ Short-time average.

Agricultural Marketing Service.

1942	429,480	263,998	165,452	1956 ¹		372,495	127,539

¹ Preliminary.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 58

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1956 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1956 and ended early in 1957.

² Figures refer to harvested areas as far as possible.

³ Revised estimates for Northern Hemisphere countries; for Southern Hemisphere, revised preliminary forecasts.

⁴ Estimated totals, which in the case of production, are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁵ Average of less than 5 years.

⁶ 1935 only.

⁷ Comprises Albania, Bulgaria, Czechoslovakia, Eastern Germany, Hungary, Poland, and Rumania.

⁸ Estimates for Syria and Lebanon not shown separately during this period.

⁹ Data for the period shown are not strictly comparable throughout, since figures for 1954–56 include allowances for non-reporting areas, which were not included for earlier periods shown, but were included in estimated total for Asia.

^f Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Agricultural Attachés results of office research, and related information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 61

¹ In bins owned or controlled by Commodity Credit Corporation, in transit, and in Canadian elevators. Additional Government-owned stocks are included in reports for other positions.

² Compiled from reports of the U.S. Department of Commerce. Both imports and exports include grain equivalent of malt.

³ Preliminary.

⁴ Compiled from reports of the Internal Revenue Service. Includes small quantities of barley grain.

⁵ Principally for food. Estimated on basis census reports on malt production after making allowance for quantities exported, imported, and used in alcohol and alcoholic beverages.

⁶ Based on acreage seeded to barley for the following crop.

⁷ Residual; includes small quantities for other uses and waste.

⁸ Includes exports for military relief feeding abroad during the period 1946-54.

⁹ Stocks at interior mills, elevators, and warehouses not included in computing 1942-43 disappearance.

Agricultural Marketing Service.

¹ Consumption data for most grains are measured at the processing level. Total consumption is the grain equivalent of the food products processed from the grains. Excludes quantities used for alcoholic beverages. Beginning 1941, the per capita civilian consumption was obtained by dividing the total apparent civilian consumption by the civilian population adjusted for members of the Armed Forces eating out of civilian supplies.

² Includes white, whole wheat, and semolina flour.

³ Rice consumption for year beginning August previous to the year stated. Table rice used by brewers excluded.

⁴ Excludes corn and corn products used in the production of alcoholic beverages.

Total corn includes an allowance for the quantity used as hominy and grits and minor food uses.
Barley consumed in food products, excluding malt beverages, expressed in terms of grain equivalent. Includes quantities used as pearl barley, flour, malt extract, and other food products.

⁶ Malt equivalent of barley grain used for food.

⁷ Preliminary.
Agricultural Marketing Service. All figures are estimates based on data from the Census of Manufacturers, Price Waterhouse and Co., the U.S. Department of Commerce, the Internal Revenue Service, and other sources.

¹ Series not comparable prior to 1929. Grain sorghums and sweet sorghums estimated separately 1919-28, but sweet sorghum estimates related to total acreage for hay and forage and acreage for sirup.

² Grain and sweet sorghums for all uses, including syrup.

³ Includes both grain sorghums for grain and sweet sorghums for grain or seed.

⁴ Based on the reported price of grain sorghums.

⁵ Dec. 1 price; prior to 1942, price of sweet sorghums for forage and hay.

⁶ Dry weight.

⁷ Green weight.

⁸ Includes an allowance for unredeemed loans at average loan value; beginning with 1948, also includes an allowance for purchase agreement deliveries valued at the average rate.

⁹ Preliminary.

Agricultural Marketing Service. Italic figures are census returns.

¹ Preliminary.

⁴ For certain years, prices for sorghum grain include an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

³ Based on the reported price of grain sorghum.

⁴ Short-time average.

Dry weight for forage; green weight for silage.
Dec. 1 price

• Dec. 1 price.

¹ Total stocks not available prior to 1947. Beginning with 1947, Oct. 1 stocks include the following positions: farms, interior mills, elevators and warehouses, Commodity Credit Corporation grain in its own bins, and terminal elevators.

² Principally alcohol and distilled spirits. Includes an allowance for wet-processing from the middle of 1949 to date.

³ Exports grain only. Imports are very small and are not separately reported.

⁴ Since carryover stocks have been available only since 1947, production has been considered as the disappearance for each season prior to that date.

Agricultural Marketing Service. Prices of corn and oats at Kansas City, Chicago, and Minneapolis were computed by weighting selling prices by reported number of carlots sold. Prices of barley and grain sorghum at Kansas City and of barley at Chicago and Minneapolis are average of prices at the close of each day. Prices at San Francisco are the average of prices on one day each week.

FOOTNOTES FOR TABLE 73—Continued

year. For current years the weights for converting United States livestock numbers to grain-consuming animal units are as follows: Number on Jan. 1 of milk cows and heifers 2 years old and over, 1.02; heifers and heifer calves, 0.344; beef cows, 0.167; cattle on feed, 2.0; all other cattle, 0.154; stock sheep, 0.022; sheep and lambs on feed, 0.12; horses and mules 2 years old and over, 1.34; colts, 0.15; hens and pullets, 0.0577; number hogs fed during the year, 0.712; chickens raised, 0.018; commercial broilers raised, 0.008; and turkeys raised, 0.07.

¹ Other mill products, not listed, are screenings, hominy and oat feeds, etc., for which no statistics are available.

² Does not include moist sugar beet pulp.

³ Includes dried skim milk, buttermilk, and whey for feed, but does not include any milk products fed on farms.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 76

¹ 1947-55, 41 percent.

² 1934-40, 37 percent; 1944-46, 32 percent; 1950-55, 36 percent.

³ 1950-55, 44 percent.

⁴ Based on the prices of the following commodities at the leading markets, weighted by average consumption: Bran, middlings and shorts, copra meal, cottonseed meal, linseed meal, peanut meal, soybean meal, gluten feed, hominy feed, brewers' dried grains, distillers' dried grains, alfalfa meal, tankage, meat scraps, fish meal, and industrial molasses.

CHAPTER II

STATISTICS OF COTTON, SUGAR, AND TOBACCO

In addition to tables on cotton, sugar, and tobacco, this chapter includes tables on fibers other than cotton, sorgo sirup, maple sugar and sirup, honey, bees, and beeswax. Most cottonseed data, however, are in the chapter on oilseeds, fats, and oils. The tables include the revised data on acreage, yield per acre, and production for the 1949-55 period resulting from a review of the 1954 census data.

Much of the information on cotton lint is given in terms of "running" bales. The term "running bale," when applied to weight, is the average weight of a bale as it comes from the gin; when applied to number, it is the number of bales actually ginned.

New tables have been added to this chapter on: supply and distribution of cotton, by principal exporting and importing countries, and estimated world stocks of cotton, by principal surplus and deficit countries.

Table 77.—Cotton: Acreage, yield, production, value, and foreign trade, United States, 1866-1956

Year	Cotton								Cottonseed		
	Acre-age in cultivation July 1 (¹)	Acre-age harvested	Yield per harvested acre	Pro-duction ²	Season average price per pound received by farmers ³	Farm value	Market price per pound, New Orleans year begin-ning August ⁴	Foreign trade, year beginning August ⁵		Pro-duction ⁶

¹For 1909-26, inclusive, the acreage figures relate to June 25 instead of July 1.²Census of Agriculture figures for all periods are in running bales; Department of Agriculture figures for 1866-1898 are in running bales; for 1899-1956, in 500-pound gross-weight bales.³Gross weight price, including bagging and ties, except that, beginning 1922, American Egyptian cotton is included at net weight; prior to 1905 prices are as of Dec. 1.⁴Prices compiled from following sources: August 1899-August 1900, Commercial and Financial Chronicle, average of daily quotations; August 1900-August 1915, from reports of the New York Cotton Exchange except Aug. 1-Nov. 16, 1914, when the Exchange was closed (prices for this period from Commercial & Financial Chronicle); beginning August 1915, from reports of the New Orleans Cotton Exchange. These central-market prices are for middling grade, $\frac{1}{2}$ -inch staple through 1939; 15/16-inch staple August 1940-July 1956; 1-inch staple beginning August 1956.

Footnotes continued on page 75.

Table 78.—Cotton: Acreage, production, and season average price per pound and per ton of cottonseed received by farmers, by States, average 1945-54, annual 1955 and 1956.

¹ Preliminary.
² Bales ginned, as reported by the Bureau of the Census with an allowance made for interstate movement of seed cotton for ginning, rounded to thousands, by States. Cotton produced but not ginned is not included in production.

³ Gross weight, price, including bagging and ties, except that American-Egyptian cotton is included at net weight. Includes an allowance for unredeemed loan cotton.

⁴ Average price to May 1, 1937.

⁵ Agricultural Marketing Service.

⁶ Sums of acreage and production for "other States" rounded to thousands for inclusion in States totals. Estimates for these States, except Kansas where cotton production is insignificant, are shown separately.

⁷ Short-time average.

⁸ Included in State and United States totals.

1956 ³	7,600	8,200	15,800			

¹ Includes only raw cotton produced for factory consumption and does not include large quantities grown in India, China, and other countries for consumption on hand spindles or for use in other noncommercial ways.

² American in running bales; foreign in bales of approximately 500 pounds gross weight.

³ Preliminary.

⁴ Excludes cotton destroyed.

Foreign Agricultural Service.

FOOTNOTES FOR TABLE 77

¹ Compiled from reports of the Department of Commerce. Equivalent bales of 500 pounds gross weight.

² Excluding linters beginning 1914. ³ Imports for consumption beginning 1934; reexport not considered beginning this date. ⁴ Prior to 1928, cottonseed production was computed on the basis of 65 pounds of seed to 35 pounds of lint. ⁵ Year beginning July. ⁶ 13 months, July-July. ⁷ Acreage in cultivation July 1 less acres removed, as reported by the Agricultural Adjustment Administration and natural abandonment on area not under contract. ⁸ Includes an allowance for unredeemed loan cotton at season average price or average loan value, whichever was higher. ⁹ Includes an allowance for all cotton put under loan at average loan rate.

¹⁰ Preliminary. ¹¹ Average price to May 1, 1957, including an allowance for unredeemed loans.

Agricultural Marketing Service. Italic figures are census returns. Production figures conform with census annual ginning enumerations.

FOOTNOTES FOR TABLE 79

¹ These estimates represent total acreage and production in each country, including cotton consumed on hand spindles or in other ways without entering commercial channels. For this reason some of them should average somewhat larger than estimates of the "commercial crops." Years refer to crop years beginning August 1 in which major portion of crop was harvested.

² Preliminary.

³ Production in bales of 478 pounds net prior to 1946 and 480 pounds thereafter.

⁴ Includes allowances for any missing data for countries shown and for other producing countries not shown.

⁵ Estimates for 1943 to date are not comparable with prewar years because of boundary changes.

⁶ Pakistan included with India.

⁷ South Korea only, after 1941.

⁸ Less than 500.

⁹ Exports.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of Agricultural Attachés, and Foreign Service Officers, and results of office research and related information.

¹ Includes Low Middling Spotted and all grades of Tinged, Yellow Stained, and Gray. Below grade is also included.

² Bureau of the Census.

³ Running bales; round bales counted as half bales.

⁴ Carryover at the beginning of the season, plus ginnings.

⁵ Supply minus carryover at the end of the season.

⁶ Preliminary. Negative disappearance for "Other Colored" reflected in total.

¹ Crop year beginning August 1. Data for 1947 do not include added charges made in some instances for drying and conditioning seed cotton. Data for 1948–56 include added charges for drying and conditioning seed cotton, the practice of assessing such added charges being confined chiefly to Arizona and California. Data for 1953–56 also include any added charges made for lint cleaning, such charges being assessed primarily in Arizona and California. Data for all years exclude added charges made for sterilizing cottonseed in connection with pink bollworm control measures.

² In addition to American Egyptian cotton, small quantities of other extra long staple cotton are produced and ginned on roller gins. The production is too small, however, to affect the United States average ginning rate.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 96

¹ All prices are averages of weekly quotations, 52 weeks or less. These quotations do not include export taxes of varying amounts in effect in all the above countries during the past 5 or more years.

² Price is for G/F/G which replaces F/G/F as of September 1, 1955. G/F/G is the new base quality for trading.

³ Series discontinued.

1941	25.51	3.01	22.50	12	1956 ⁴	55.86	7.07	48.79	13

¹ Simple average of semi-annual and quarterly data. Quantities are annual per-family purchases of 42 cotton articles.

² Computed from prices collected by the Bureau of Labor Statistics, weighted by average number of articles (clothing, furnishings, and yard goods) purchased annually (from 1934–36 survey) by families of wage earners and clerical workers. Estimates for 1943–56 based on indexes of retail prices of specified items of cotton clothing and housefurnishings, prepared by the Bureau of Labor Statistics.

³ Estimated prices received by farmers for cotton of grade and staple lengths used in the manufacture of the various articles, weighted by quantities of cotton required in their manufacture.

⁴ Farm-retail spread includes the processing tax paid by manufacturers, which was in effect from August 1933 to January 1936. The tax on the quantity of cotton represented in these products amounted to 37 cents in 1933 and 89 cents in 1934 and 1935. The amount of the tax returned to farmers increased the farm values to \$2.35 in 1933, \$3.43 in 1934, and \$3.30 in 1935. Farmer's shares including tax payments are 9.8, 13.2, and 13.6 percent respectively in these years.

¹ Southern Hemisphere estimates include unginned cotton.

² In bales of 500 pounds gross.

³ Running bales.

⁴ Estimates based on production, consumption, and trade data.

⁵ Mostly U.S.S.R., Mozambique, and Nigeria.

⁶ Includes Pakistan stocks.

⁷ Mostly China and Eastern Europe.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of United States Agricultural Attachés and Foreign Service Officers, results of office research and related information.

FOOTNOTES FOR TABLE 98

¹ Uncompressed in carload lots, f.o.b. mill points.

² Bales are running bales except imports, which are 500-pound bales, includes production at oilmills, gins, and other delinting plants.

³ 200 bales.

⁴ Not available.

⁵ Preliminary.

Agricultural Marketing Service. Supply and distribution figures compiled from reports of the Bureau of the Census and Bureau of Foreign and Domestic Commerce.

¹ Apparel and carpet wool, scoured basis.² Imports for consumption.³ Domestic shipments plus imports for consumption.⁴ Domestic production less exports plus imports for consumption.

5 Less than 0.05 pounds.

6 Less than 50,000 pounds.

7 Preliminary.

Agricultural Marketing Service. Data on man-made fibers from Textile Organon. Calendar year data divided by population on July 1, including armed forces overseas, to calculate per capita consumption.

FOOTNOTES FOR TABLE 99

¹ Estimates for Southern Hemisphere countries include unginned cotton.² Includes cotton destroyed and unaccounted for.³ In bales of 500 pounds gross.⁴ Running bales.⁵ Ginnings in season.⁶ Net imports after deduction of re-exports.⁷ Estimates based on incomplete data.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of U. S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

FOOTNOTES FOR TABLE 103

¹ Includes filament yarn and staple fiber.² Domestic shipments plus imports.³ Wholesale prices, f. o. b. producer plants.⁴ Viscose, 150 denier, first quality.⁵ Viscose, 1½ denier.⁶ Japanese silk, 78 percent 13-15 through 1950. Since then, white 20-22.⁷ 1939-51 carded 40/1 southern spinning; beginning 1952 carded, twisted knitted on cones or tubes.⁸ OPA ceiling price of 3.08 per pound effective 1941; no sales if this grade reported from May 1942 until July 1946.⁹ Less than 50,000 pounds.¹⁰ Domestic shipments only.¹¹ Not available.¹² Preliminary.

Agricultural Marketing Service. Compiled as follows: Imports from reports of the Bureau of the Census; prices from bulletins of the Bureau of Labor Statistics; production and consumption of rayon from the Textile Organon.

¹ Includes bags and bagging for cotton (new and second-hand), webbing, padding, carpets and rugs, and yarns.² In some instances import statistics have been converted from yards to pounds on the basis of average weights.³ Prices for raw jute are for native first marks, duty-paid.⁴ Excludes Communist China, Manchuria, and U.S.S.R.; and excludes mesta and other substitutes wherever possible.⁵ Less than 500,000 pounds.⁶ Prices for January-July from Daily Mill Stock Reporter.⁷ Preliminary.⁸ Raw abaca and manila cordage.⁹ Prices for raw abaca are for Davao Grade I.¹⁰ Sisal and henequen cordage.¹¹ Prices for raw sisal are for Haitian Grade A, compiled from New York Journal of Commerce.¹² Prices for raw henequen are for Mexican Grade A.

Agricultural Marketing Service and Foreign Agricultural Service. Import data compiled from reports of the U.S. Department of Commerce; price data, except as noted, from reports of the Bureau of Labor Statistics; production data prepared or estimated on the basis of official statistics of foreign governments, reports of U. S. Agricultural Attachés and Foreign Service officers, results of office research and related information.

FOOTNOTES FOR TABLE 111

¹ Estimates are for harvested areas.² Preliminary.³ Includes area and production of beets grown in Denmark and processed in Sweden.⁴ Includes area and production of beets grown in Denmark and processed in Sweden and West Germany.⁵ Topped beets.⁶ In some Eastern European countries the harvested beets are for sugar only.⁷ Processed beets.⁸ Harvested beets are for sugar only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of U. S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Relates to year of harvest, but for California beginning with 1952, includes some acreage harvested in the beginning of the following year. Most years from 1919 to 1923 include a small unknown quantity of beets grown in Canada for Michigan factories.² Prices do not include Government payments under the Sugar Act. Price support payments for 1943–45 are included. (See table 112).³ Preliminary.

¹ Preliminary.² Does not include Government payments under the Sugar Act. The United States average for these payments excluding abandonment and deficiency payments amounted to \$2.31 per ton in 1955 and approximately \$2.38 in 1956. (See table 112).³ Short-time average.⁴ Relates to year of harvest. Beginning with 1952, includes some acreage harvested in the beginning of the following year.⁴ United States totals rounded to hundreds for acreage and to thousands for production.

Agricultural Marketing Service.

¹ Support payments were made under the price support programs of the U.S. Department of Agriculture and are reflected in the estimated average prices received by farmers. Program payments represent payments for sugar beets and sugarcane marketed before deducting local administrative expenses charged in the years 1939-44 and before making deductions imposed in 1940 for excess sugarcane acreage. Payments with respect to crop deficiency and acreage abandonment have not been included; see table 750 for these data. Program payments are based upon provisions of the Sugar Acts.

² Includes price support payments.

³ Preliminary.

SUGARCANE

¹Preliminary.
²The growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following the season of growth.

³Includes high test molasses made from frozen cane.
⁴Includes 3,193,000 gallons of edible molasses in 1955 and 2,384,000 gallons in 1956.
⁵Edible molasses not produced in Florida; therefore the Florida figures are for blackstrap.

⁶Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.
Agricultural Marketing Service.

⁷Calculated on the basis that 100 pounds of raw sugar is required to produce 83.46 pounds of refined sugar.

⁸Includes 3,193,000 gallons of edible molasses in 1955 and 2,384,000 gallons in 1956.

⁹Does not include Government payments under the Sugar Act. The United States average for these payments excluding abandonment and deficiency payments amounted to \$1.11 per ton in 1955 and approximately \$1.22 in 1956. See table 112.

1957 ⁵	-----	-----	990	1,125	15	-----	1,154		

¹ Raw value is the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.

² Crop year generally coincides with the calendar year except that small proportions of continental United States beet and cane sugar processings are produced early in the following year and that the Philippine crop year starts in October of the preceding year.

³ Crop year October 1-September 30 until 1933; calendar year 1934 to date; 1933 production includes 127,000 tons produced between October 1 and December 31, 1933.

⁴ Raw sugar, as made.

⁵ Preliminary.

Commodity Stabilization Service.

FOOTNOTES FOR TABLE 113

¹ Includes Louisiana for all years, Florida from 1928-56, and Texas from 1919-23.

² The growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following the season of growth.

³ Prices do not include Government payments under the Sugar Act. Price support payments for 1943-45 are included. See table 110.

⁴ Raw value equals 96° raw sugar as defined in the Sugar Act of 1948; prior to 1929, calculated by the Agricultural Adjustment Administration Method. (S. R. Series 1, No. 1.).

⁵ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

⁶ Converted to 80° Brix beginning with 1934. Data for previous years are as reported.

Sirup production not included. (See table 129.)

⁷ Preliminary.

Agricultural Marketing Service. Of the total sugar produced in Louisiana about 25 percent consists of direct consumption sugar, marketed "as made" without further refining.

¹ Harvesting season usually begins in January and extends through June. The length of the growing season is normally 12 months.

² Some years cane for invert molasses are included in the cane production.

³ Sugar yield in pounds per tons of cane harvested for sugar.

⁴ Commercial weight.

Foreign Agricultural Service. Prepared from data compiled by the Cuban Department of Agriculture and from trade sources.

FOOTNOTES FOR TABLE 118

¹ The growth of 18-24 months. Only a portion of the total acreage in cane is harvested each year. The harvest takes place throughout the year with a short recess at the end of the year.

² Raw value is the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.

³ Not available.

Commodity Stabilization Service.

¹ Harvesting begins in October, the length of the growing season being about 11 months.² Cane production divided by harvested acreage.³ Prior to 1950 calculated cane production is the quantity of cane ground for centrifugal sugar, estimated on the basis of the reported yield of sugar per ton of cane. From 1950 to date the cane production is reported.⁴ Prior to 1950 reported: from 1950 to date computed.⁵ Not available.⁶ Preliminary.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Agricultural Attachés and Foreign Service Officers, results of office research and related information.

FOOTNOTES FOR TABLE 121

¹ Years shown are for crop years; generally the harvesting season begins in the fall months of the year shown or in the early month of the following year except in certain cane-sugar-producing countries in the Southern Hemisphere, such as Australia, Argentina, Mauritius, Union of South Africa, etc., when the season begins in May or June of the year shown.² Centrifugal sugar as distinguished from non-centrifugal includes cane and beet sugar produced by centrifugal process, which is the principal kind moving in international trade.³ Preliminary.⁴ Includes a small amount of cane sugar.⁵ Includes sugar from Danish beets processed in Sweden.⁶ Includes both cane and beet sugar.⁷ All Indochina. Includes non-centrifugal sugar.⁸ Calendar year.⁹ Included in 1935-39, 1945-49 centrifugal sugar.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, reports of United States Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Raw value equivalent in terms of 96° sugar as defined by the Sugar Act of 1948.

² 1939 includes mainland cane sugar stocks, and beginning 1940 includes raw sugar for processing held by importers other than refiners.

³ Includes sugar used in the manufacture of other commodities. 1929-41 exports from U. S. Department of Commerce, Foreign Commerce and Navigation; 1942-54 quantities delivered for export as compiled by Sugar Division, Commodity Stabilization Service.

⁴ Data based on allocation audits and records kept by the armed forces.

⁵ Adjusted for changes in invisible stocks (estimated) held by manufacturers, wholesalers, and retailers. Civilian per capita consumption 1941-54.

⁶ Includes exports for civilian feeding by the military abroad.

⁷ Includes 9,000 tons for livestock feed in United States in 1954 and 19,000 tons in 1955 and 1956.

⁸ Preliminary.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 124

¹ Stocks include sugar in bond and in customs custody and control.

² Sugar for direct consumption only. All sugars converted to refined basis. Mainland cane sugar mills stocks and production, 1946-52, are estimates of that part of total stocks and production which is later delivered for direct consumption. Estimation discontinued.

³ Excludes raw sugar delivered by refiners for direct consumption as follows: 1934, 17,153 tons; 1935, 10,183 tons; 1936, 11,032 tons; 1937, 13,946 tons; 1938, 10,480 tons; 1939, 6,176 tons; 1940, 7,779 tons; 1941, 8,573 tons; 1942, 5,587 tons; 1943, 15,196 tons; 1944, 9,875 tons; 1945, 5,021 tons; 1946, 3,939 tons; 1947, 9,025 tons; 1948, 2,343 tons; 1949, 2,212 tons; 1950, 2,636 tons; 1951, 1,864 tons; 1952, 2,833 tons; 1953, 2,831 tons; 1954, 1,137 tons; 1955, 2,547 tons; 1956, 2,394 tons.

⁴ Larger than actual deliveries by a small amount representing losses in reprocessing; includes 1,047 tons loss by fire in 1951.

⁵ Includes deliveries for export as follows: 1941, 66,167 tons; 1942, 194,911 tons; 1943, 436,312 tons; 1944, 292,953 tons; 1945, 271,621 tons; 1946, 376,850 tons; 1947, 217,060 tons; 1948, 72,243 tons; 1949, 40,880 tons; 1950, 56,477 tons; 1951, 76,751 tons; 1952, 26,993 tons; 1953, 30,038 tons; 1954, 27,094 tons; 1955, 39,077 tons; 1956, 134,467 tons.

Commodity Stabilization Service.

¹ Raw value is the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.² Marketings under quotas. These comprise all sugar marketings except small amounts of ex-quota sugar for re-export and for livestock feed. Marketing quotas for 1948–52 established under the provisions of the Sugar Act of 1948; for 1953–55 under the provisions of the 1951 amendment and for 1956 under the provisions of the 1956 amendment to that Act. Quota charges compensated by quota credits upon exportation excluded; such quota charges averaged 17 thousand tons annually 1948–56. Charges to liquid sugar marketing quotas of Cuba and the Dominican Republic also excluded; such charges amounted to about 37,000 tons, raw value equivalent, annually.

Commodity Stabilization Service.

¹ For 1916–43, production and price estimates made for Maine, New Hampshire, Vermont, Massachusetts, New York, Pennsylvania, Ohio, Michigan, Wisconsin, and Maryland; beginning 1944, Minnesota added.² Assuming that 1 gallon of sirup is equivalent to 8 pounds of sugar.³ 1916 and 1917 general imports.⁴ Includes maple sirup through Sept. 21, 1922.⁵ A gallon of maple sirup weighs about 11 pounds.⁶ Included with maple sugar through Sept. 21, 1922.⁷ Preliminary.

Agricultural Marketing Service. Imports from reports of the United States Department of Commerce.

¹ Production of cane syrup, sorgo syrup, and edible molasses is of the fall of the preceding year.² Does not include varying quantities produced on nonfarm lands in Somerset County, Maine.³ From 1934 to 1942 inclusive, figures for odd years, except 1941, are from the Bureau of the Census; for even years and 1941 and 1947 quantities are estimated. Data for 1943–53 from the Sugar Division, Commodity Stabilization Service, United States Department of Agriculture.⁴ Data for 1939 on are official figures of Agricultural Marketing Service; previous years' estimates are unofficial.⁵ Bureau of Census series, molasses and sugar sirups, n.s.p.f., less liquid sugar as reported to Sugar Division, Commodity Stabilization Service. ⁶ Not available. ⁷ Preliminary. ⁸ Assumed to be largely refiners' syrup.

Agricultural Marketing Service.

¹ Preliminary.
² For prices on a type basis, see tables 145 and 147.
³ Rounded to hundred acres for inclusion in United States total.⁴ Sales to date (May 1957) insufficient to establish price; evaluated at 1955 crop average price to obtain 1956 farm value in table 143.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 143

¹ Production figures are on a farm-sales-weight basis, exports and imports are on a declared-weight basis.² Prior to 1919 prices are as of Dec. 1.³ Compiled from reports of the Department of Commerce; includes stems, trimmings, and scraps.⁴ General imports 1866-1932; imports for consumption beginning 1933.⁵ Total exports (domestic plus foreign) minus imports. Beginning 1933 domestic exports minus imports for consumption.⁶ Preliminary.

Agricultural Marketing Service. Italic figures are census returns.

¹ Production harvested within the calendar year specified.² Preliminary.³ Not available.⁷ Eastern Europe includes Albania, Bulgaria, Czechoslovakia, Hungary, East Germany, Poland and Rumania.⁸ Recent methods of estimating acreage and production have changed in an effort to improve data; therefore 1935-39 estimates are not comparable with later data. Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign service material, reports of U. S. Agricultural Attachees and Foreign Service Officers, results of office research, and related information.⁴ Less than a five year average.⁵ For Germany, 1945-1956 data are for Germany, Western; for Korea, 1945-56 data are for South Korea only; data for China, Mainland include Manchuria.
⁶ Less than 500 acres.

¹ Stocks as here shown have been converted to a farm-sales-weight basis—the equivalent of weight at the time of sale by growers—thereby making these figures of leaf-tobacco stocks comparable with figures of leaf-tobacco production.

² Stocks on the Island of Puerto Rico are included.

³ Stocks of Types 81 and 90 are not converted to a farm-sales-weight but are shown on the unstemmed weight basis. Stemmed stocks reported have been converted to an unstemmed equivalent. A factor for converting to farms-sales-weight has not been determined.

Agricultural Marketing Service.

1956 ⁶	3.45	.546	2.90	1.37	1.53	15.2

¹ Farm-retail price spreads in this series are calculated from average retail prices for the year beginning July and the average farm prices for the corresponding crop year. Weights used in computing average retail cost and excise taxes for the 4 products are based on July-June tax-paid withdrawals in each year.

² The composite retail cost of the 4 products—cigarettes, cigars, pipe smoking tobacco, and plug chewing tobacco—is a weighted average of the retail cost of the 4 products equivalent to 1 pound of leaf tobacco (farm-sales weight). Retail prices reported by the Bureau of Labor Statistics in September, December, March, and June are averaged for comparison with corresponding crop-year farm prices. Before 1935 BLS prices were collected only twice a year.

³ The farm price is a weighted average of prices of several types of leaf tobacco combined in proportion to their estimated utilization in the 4 products.

⁴ Federal Internal Revenue taxes are weighted by annual percentage weights, based on tax-paid withdrawals, and inflated to allow for estimated State revenue taxes; city taxes are not included.

⁵ Taxes paid by processors from which benefit payments to farmers were made are not included in the computation of these price spreads. Estimates of average rate of taxes on 1 pound of tobacco for the 4 products by crop years were—1933, 3.0 cents; 1934, 4.3 cents; 1935, 2.7 cents.

⁶ Preliminary.

1956 ⁷	23.8	15.9	3.63	10.7	4.3	5.2	9.5	15.3

¹ Simple average of prices of regular-size cigarettes reported by the Bureau of Labor Statistics for September, December, March, and June. Prices were collected in 34 cities 1934-46 and in 18 cities 1947-52.

² Bureau of Labor Statistics. Average of list prices of three manufacturers for popular brands of cigarettes delivered to wholesalers and jobbers—adjusted for cash and trade discounts.

³ Value of 0.065 pound of leaf tobacco (farm-sales weight), calculated from seasonal prices received by growers for three kinds of cigarette-type tobacco. Auction fees have not been deducted.

⁴ Spread between wholesale price, excluding Federal excise tax, and farm value.

⁵ Retail-wholesale spread less average State tax.

⁶ Taxes paid by processors from which payments were made to farmers are not included in the calculations. They amounted to 0.3 cent per package of cigarettes in 1934 and 0.2 cent in 1935.

⁷ Preliminary.

Agricultural Marketing Service.

¹ Preliminary.² Data for 1935-39 All Germany.³ Separate country as of August 14, 1947.⁴ Includes all French possessions in Africa, n.e.i.⁵ Includes Virginia sun-cured tobacco.⁶ Includes all Portuguese possessions in Africa, n.e.i.⁷ Class breakdown not established until January 1949.

Foreign Agriculture Service. Compiled from records of the Bureau of the Census.

CHAPTER III

STATISTICS OF OILSEEDS, FATS, AND OILS

This chapter includes information on cottonseed, flaxseed, olive oil, peanuts, soybeans, tung nuts, margarine, and fats and oils. Most butter statistics are included in the chapter on dairy and poultry statistics. Lard data are mostly in the chapter on livestock.

New tables give statistics on United States exports of cottonseed, cottonseed cake and meal, flaxseed, linseed oil, linseed cake and meal, and soybean cake and meal. Other new series include utilization of peanuts, world production and world exports of fats, oils, and oilseeds, and the supply and disposition of soap and synthetic detergents.

The table on market prices of peanut oil and meal has been dropped.

Table 158.—Cottonseed: Cotton acreage, cottonseed yield, production, farm disposition, season average price per ton received by farmers, and value, United States, 1919–56

¹ Quality information not available for cottonseed produced in Arizona and California, prior to 1952.² These basic factors are combined to form indices of quantity and quality which in turn are used to determine the official grade of cottonseed in accordance with the United States Official Standards for Grades.³ The quantity index measures the oil and cake or meal in the cottonseed, taking into account variations in the quantity of oil, protein, and linters.⁴ The quality index measures the deterioration in oil and meal and takes into account the excesses of moisture and foreign matter.⁵ The average grade is the product of the quantity index times the quality index. The base grade is 100.0.⁶ Samples graded by licensed chemists under the supervision of the U.S. Department of Agriculture.

Agricultural Marketing Service.

¹ The figures shown, August 1919–December 1920, are averages of daily closing prices compiled from annual reports of the Minneapolis Chamber of Commerce; beginning January 1921, averages of daily prices weighted by carlot sales, compiled from Minneapolis Daily Market Record.

² Compiled from reports of the Department of Commerce. Linseed oil converted to flaxseed equivalent on the basis of oil yield per bushel of flaxseed crushed as follows: 1919–1953, 18.75 pounds; 1954, 19.6 pounds; 1955, 19.9 pounds; and 1956, 20.3 pounds.

³ General imports 1919–32; imports for consumption beginning 1933.

⁴ Total imports minus exports. Beginning 1933, imports for consumption minus domestic exports. Re-exports of seed or oil have been reported since December 1922.

⁵ Includes an allowance for unredeemed loans at average loan value; beginning with 1948, also includes an allowance for purchase agreement deliveries valued at the average rate.

⁶ Less than 500 bushels.

⁷ Preliminary.

Agricultural Marketing Service. Italic figures are census returns.

¹ Preliminary.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 167

¹ Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere countries in 1956 is combined with the Southern Hemisphere harvest which begins late in 1956 and ends early in 1957. Estimates do not include China where annual production probably varies from 1 to 2 million bushels.

² Preliminary.³ Acreage includes area for fiber.⁴ Less than 5 years.⁵ Flax and hemp.⁶ Acreage for seed only.⁷ Includes estimates for the above countries for which data are not available and for minor producing countries.⁸ Sown area.⁹ Officially reported figures plus Indian official estimates for unreported tracts for 1935-39 only. Estimates for unreported tracts for 1945-56 not available.¹⁰ Prior to 1945 figures for India include Pakistan.¹¹ 1935 only.¹² Flax grown for seed only.¹³ Less than 500 acres and 500 bushels.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of Agricultural Attachés and other United States representatives abroad, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries.

¹ Less than 500 tons.² Some linseed oil was imported by the Government for reshipment under Lend-Lease. As no duty was required, this was included by Census with the imports for consumption, but when the oil was shipped out, it was included in re-exports. This amount was added to exports as reported by Census.³ Less than 500,000 pounds.⁴ Preliminary.

Agricultural Marketing Service. Production of linseed cake and meal computed by the U.S. Department of Agriculture through 1948. All other data from Bureau of the Census.

¹ Acres grown alone, plus $\frac{3}{4}$ the interplanted acres.

² Mostly hogged.

³ For data on peanut vine hay, see table 389.

⁴ Compiled from reports of the Department of Commerce. Trade data are on the basis of "in the shell," converted at ratio of 1 to $1\frac{1}{2}$ through 1944; beginning 1945, ratio of 1 to 1.55.

⁵ General imports 1919–32; imports for consumption beginning 1933.

⁶ General imports minus total exports (domestic plus foreign) 1919–32; beginning 1933, imports for consumption minus domestic exports.

⁷ Excludes 3,371,850 pounds "free for export."

⁸ Beginning January 1947 includes exports for civilian feeding by the military abroad.

⁹ Preliminary.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 173

¹ Preliminary.

² Crude and refined oil combined as such.

³ Less than 500 bushels.

⁴ Includes 213,000 pounds of oil whose destination is not indicated.

⁵ Includes 229,000 pounds of oil whose destination is not indicated.

Foreign Agricultural Service. Compiled from official records of the Bureau of the Census.

¹ Crude plus refined, unconverted.

² Holdings at producing mills only.

³ Beginning July 1, 1941, exports reported as peanut oil, edible, and peanut oil, crude in this tabulation are added without converting.

⁴ January-August; not separately reported prior to this date.

⁵ Less than 500 pounds.

⁶ Farmers' stock crushed converted to and included with shelled oil stock.

Agricultural Marketing Service. Stocks of peanut oil and trade from Bureau of the Census.

FOOTNOTES FOR TABLE 177

¹ Peanuts in the shell. Southern Hemisphere peanut crops, which are harvested from April to June, are combined with those of the Northern Hemisphere harvested from September through December of the same year.

² Harvested areas as far as possible.

³ Preliminary.

⁴ Less than 5 years.

⁵ Includes estimates for the above countries for which data are not available and for minor producing countries.

⁶ One year only.

⁷ Cambodia.

⁸ Java and Madura only.

⁹ Exports.

¹⁰ Commercial crop.

¹¹ 1937.

¹² 1948-50.

¹³ Production on European farms only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of Agricultural Attachés and other United States representatives abroad, results of office research, and other information.

¹ Includes shipments to Hawaii, Alaska, Puerto Rico, and Virgin Islands, 1943–47; to Puerto Rico and Virgin Islands only beginning 1948. Prior to January 1945, breakdown of exports into shelled and cleaned peanuts was estimated.

² Excludes small quantities for poultry feed and other miscellaneous uses, 1938–43, estimated as the difference between total disappearance of oil-stock peanuts and crushings; 2,801,000 pounds in 1938, 1,846,000 pounds in 1939, 5,092,000 pounds in 1940, 1,992,000 pounds in 1941, 3,971,000 pounds in 1942, and 7,474,000 pounds in 1943. Includes some peanuts sold for seed.

Agricultural Marketing Service. Foreign trade from reports of Bureau of the Census.

¹ Crop year begins about Nov. 1 in the Virginia-North Carolina section; in September in the Southeastern States, and August in the Southwestern States.

² Prices for 1934-42 are for Bunch.

³ Prices are for "quota" stock only. A portion of crop (approximately 6.5 percent of estimated production) moved as "excess" peanuts to Commodity Credit Corporation for crushing into oil and meal at an overall average price of 7.28 cents per pound for all types in all areas. Virginia-North Carolina Virginia type peanuts were declared in short supply, and the excess of this type were sold by CCC for edible purposes at 105 percent of the applicable support price for edible peanuts plus reasonable carrying charges. Proceeds, after all costs to CCC, were prorated proportionately among all producers of Virginia type peanuts delivering these excess peanuts to CCC at oil prices.

⁴ Prices are for "quota" stock only. A portion of crop (approximately 10.6 percent of estimated production) moved as "excess" peanuts to CCC for crushing into oil and meal at an overall average price of 5.96 cents per pound for all types in all areas.

⁵ Prices for 1953, 1954, 1955 and 1956 crops are for "Base Grade" quality as described in USDA price support announcements. Principal quality factors are as follows: Virginia type, 65 percent sound mature kernels with 15 percent extra large kernels; Spanish type 70 percent sound mature kernels; and Runner type 65 percent sound mature kernels.

¹ Years shown refer to years of harvest. Southern Hemisphere crops which are harvested in the early part of the year are combined with those of the Northern Hemisphere harvested the latter part of the same year.

² Harvested areas as far as possible.

³ Preliminary.

⁴ Less than 5 years.

⁵ Acreage harvested for beans.

⁶ Less than 500 acres.

⁷ One year only.

⁸ Java and Madura only.

⁹ Beginning with 1948, South Korea only.

¹⁰ Exports. Local consumption is small.

¹¹ Includes estimates for the above countries for which data are not available and for minor producing countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of Agricultural Attachés and other United States representatives abroad, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries, except as noted.

¹ Preliminary.

Agricultural Marketing Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

¹ Data on tung nuts in Georgia, Florida, Alabama, Mississippi, and Louisiana.

² U.S. Department of Commerce, The Tung Oil Monthly, June 1940.

³ Factory consumption.

⁴ Preliminary.

Agricultural Marketing Service. Data on tung oil from reports of the Bureau of the Census.

Table 197.—Tung nuts: Production and season average price per ton received by growers, 5 principal States, average 1945–54, annual 1955 and 1956

State	Production ¹			Price ¹ for crop of —		
	Average 1945–54	1955	1956 ²	Average 1945–54	1955	1956 ²
Georgia ³	Tons	Tons	Tons	Dollars	Dollars	Dollars
Alabama ³	739	(4)	60	80.63	-----	58.00
Florida	1,506	(4)	1,100			
Mississippi	16,950	6,200	16,500	81.00	64.00	58.00
Louisiana ⁴	34,439	(4)	66,800	80.10	-----	52.00
United States	14,645	(4)	19,000	76.00	-----	54.00
United States	68,279	6,200	103,460	79.65	64.00	53.40

¹ Production and price in terms of air-dried nuts in the husk.

² Preliminary.

³ Prices for Georgia and Alabama have been combined to avoid the possibility of disclosing individual mill operations.

⁴ Less than 5 tons.

⁵ Includes small quantities of tung nuts produced in Texas.

Agricultural Marketing Service. The yield of oil from unhusked tung nuts varies from year to year but is usually estimated at around 16 percent of the weight of the nuts. Production and supply of tung oil appear in table 196.

FOOTNOTES FOR TABLE 195

¹ Total oil pressed in marketing season beginning October of years shown; excludes oil extracted from residue.

² Preliminary.

³ Less than 5 years.

⁴ Territory formerly known as Palestine.

⁵ Refers only to territory formerly known as French Morocco.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of Agricultural Attachés, and foreign service officers, results of office research and related information.

¹ Production adjusted for estimated change in stocks, 1929–47, and for reported changes, 1951–56.² Includes American Red Cross procurement for prisoner-of-war packages, 1943–45; and estimated quantities exported in food packages through CARE and other nongovernmental relief agencies, 1947–56; does not include quantities mailed abroad by individuals.³ 1948–56 excludes shipments to Alaska and Hawaii, not reported after March 1948.⁴ Less than 500,000 pounds.⁵ Not available.⁶ Preliminary.

Agricultural Marketing Service. Totals and per-capita estimates computed from unrounded numbers

FOOTNOTES FOR TABLE 200

¹ Includes imports, which are negligible.² Partly estimated. Shipments to Puerto Rico and Virgin Islands only, after March 1948.³ Includes re-exports to Canada.⁴ Includes military exports for civilian feeding by the military abroad.⁵ Adjusted for changes in U. S. Department of Agriculture stocks.⁶ Includes estimated exports through nongovernmental relief agencies.⁷ Less than 500,000 pounds.⁸ Preliminary.

Agricultural Marketing Service. Compiled from reports of Bureau of the Census and U. S. Department of Agriculture. Prices based on products containing from 20 to 50 percent animal fat, in 1-pound cartons.

¹ Includes oil equivalent of cottonseed, soybeans, peanuts and flaxseed exported for crushing abroad.² Includes commercial exports, voluntary or civilian relief, re-exports, shipments to United States Territories. In 1942 and 1943, includes shipments by United States Department of Agriculture.³ Excludes an estimate of oil equivalent of soap used in synthetic rubber. This use is included in "Other industrial."⁴ Stocks differ slightly from end of preceding year because of minor change in reporting procedure.⁵ Includes a discrepancy of 6 million pounds, by which the reported factory consumption of tung and oiticica oils exceed their domestic disappearance.⁶ Includes Government stockpiling.⁷ Excludes stocks of coconut, palm, castor and sperm oils held by the Government for stockpiling of strategic materials.

Agricultural Marketing Service. Computed from reports of the Bureau of the Census, Fish and Wildlife Service, and United States Department of Agriculture. Totals computed from unrounded numbers.

¹ Computed from factory consumption, foreign trade, and stocks.

Agricultural Marketing Service. Computed from unrounded numbers. Stocks and consumption from Bureau of the Census. Trade from Foreign Commerce and Navigation of the United States. Prices from the National Provisioner and Wall Street Journal (Chicago edition).

FOOTNOTES FOR TABLE 202

¹ Includes butter (fat content), lard, beef fats, cottonseed, peanut, soybean, corn and olive oils, and minor oils such as sesame. Stocks and exports also include margarine, shortening, vegetable stearine and secondary edible oils.² Production and exports also include oil equivalent of exported soybeans, cottonseed, and peanuts for crushing abroad.³ Chiefly coconut, babassu, palm kernel, and palm oils.⁴ Includes shipments to United States Territories.⁵ In some years disappearance cannot be computed from data contained in this table, as adjustments have been made because additional items have been incorporated in stock data.⁶ Preliminary.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census and U. S. Department of Agriculture. Totals and per capita estimates computed from unrounded numbers.

¹ Includes inedible tallow, inedible oils, animal oils not otherwise specified, animal greases and fats, neats foot oil and stock, oleic acid or red oil, and stearic acid.

² Not separately classified prior to July 1941.

³ Included with shelled peanuts prior to January 1945.

⁴ July-December 1951 only. Beginning January 1952 included with "other vegetable oils."

⁵ Preliminary.

⁶ Included with "other vegetable oils."

Foreign Agricultural Service. Compiled from official records of the Bureau of the Census.

¹ Preliminary.² In the case of vegetable oilseeds, oil production has been estimated by assuming for each of the various crops that a certain proportion was crushed for oil. The years shown refer to the years in which the seed was produced and not necessarily when the oil was extracted.³ Estimated on the basis of exports and the limited information available on production and consumption in the various producing areas.⁴ 1934-38 average.⁵ 1946-49 average.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of United States Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

Table 207.—Fats, oils, and oilseeds (fat or oil equivalent): World exports¹, averages 1935–39 and 1945–49, annual 1952–56

¹ Indigenous, exports from producing countries.² Less than 500 tons.³ 1933–37 average.⁴ 1934–38 average.⁵ 1946–49 average.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign service material, reports of United States Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

FOOTNOTES FOR TABLE 208

¹ Includes babassu nuts prior to January 1, 1942.² Less than 500 pounds.³ Less than 500 bushels.⁴ July–December only. Beginning January 1, 1954, not separately classified.⁵ Not separately classified.⁶ Preliminary.

Foreign Agricultural Service. Compiled from official records of the Bureau of the Census.

¹ Based on estimates of the Association of American Soap and Glycerine Producers, Incorporated. Excludes cleansers and liquid soaps.

² Based on factory shipments of 53 companies as reported in the Association's Sales Census who produced 79 to 83 percent of the United States total in census years, adjusted to a United States total basis.

³ Includes only those with characteristics and end uses similar to soap.

⁴ Beginning 1947 includes shipments in CARE packages.

⁵ From Office of Rubber Reserve, R.F.C. through 1954. Estimated for 1955 and 1956.

⁶ Estimates based in part on data given in "Statistical Yearbook of the Quartermaster Corps for 1947."

⁷ Less than one-half pound.

⁸ Preliminary.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 211

¹ Mainly salad and cooking oils. Includes all oils and fats (other than butter, lard, margarine, or shortening) used in mayonnaise and salad dressing, bakery goods, confectionery, commercial roasting and frying, etc.

² Including only the fat content of butter, estimated at 80.5 percent of total weight, and of margarine for which the fat content varies slightly each year.

³ Preliminary.

⁴ Fat equivalent of soap used in synthetic rubber, is included with "Other industrial products." Prior to 1949, most of the fats and oils used in synthetic detergents is believed to have been reported as used in soap. Beginning in 1949, this use of fats and oils is entirely included in "Other industrial products."

⁵ Paints, varnishes, floor coverings, oilcloth, printing inks, core oils, synthetic resins, insulation, linings, packings, coated fabrics (other than oilcloth), caulking, and other protective coatings.

Agricultural Marketing Service. Computed from reports of the Bureau of the Census, Fish and Wildlife Service, and U. S. Department of Agriculture. Totals and per capita estimates computed from unrounded numbers.

¹ Prior to 1949, most of the fats and oils used in synthetic detergents is believed to have been reported as used in soap. Since 1949, this use of fats and oils has been entirely excluded from soap.

² Preliminary.

³ Tallow, inedible, and grease not reported separately.

⁴ Less than 500,000 pounds.

⁵ Mostly babassu oil, except in 1953, 1954, and 1955, when palm-kernel oil was 23, 6, and 5 million pounds respectively.

⁶ Inedible animal stearine, grease (lard) oil, tallow oil, foots and other soap stock, red oil, stearic acid and other fatty acids.

Agricultural Marketing Service. Compiled as follows: Fats, oils, and tall oil, Bureau of the Census; rosin, Naval Stores Report, Agricultural Marketing Service. Totals computed from unrounded numbers.

CHAPTER IV

STATISTICS OF FRUITS, VEGETABLES, MELONS, TREE NUTS, AND BEVERAGE CROPS

These crops are arranged in two major groups within the chapter: (1) Fruits and berries; and (2) vegetables, melons, tree nuts, and beverage crops (tea, cacao beans, and coffee). Also, toward the end of the second group are included summary tables on unloads of both fruits and vegetables.

Fruits and Berries

Estimates of fruit production, in general, relate to the harvested crop although in some years quantities not harvested because of low prices or other economic factors are included. Losses from natural causes, such as windstorms, freezes, etc., are not included in production. Production relates to the total crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to the crop in commercial areas. The estimates for strawberries cover production on acreage grown primarily for sale.

The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when census data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

Two new tables show cold storage stocks of fresh and frozen fruits and juices and canners' and distributors' stocks of canned fruits and juices.

¹ Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of each State.

² Dried and canned are converted to terms of fresh apples on following basis: 1 pound of dried is equivalent to about 7 pounds fresh through 1942 (beginning 1943, 1 pound dried is equivalent to 8 pounds fresh); 1 pound of canned is equivalent to about 2 pounds fresh; 48 pounds fresh equal 1 bushel. No re-exports reported.

³ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

⁴ Excludes apple waste.

⁵ Includes apple waste.

⁶ Domestic exports minus imports for consumption with net imports shown by a minus sign.

⁷ Census returns of total harvested production of all areas in the United States.

⁸ Preliminary.

Agricultural Marketing Service. Data for 1909-33, with production and value on total crop basis, in Agricultural Statistics, 1952, table 220. Italic figures are census returns of harvested production. Foreign trade data from reports of the Bureau of the Census.

FOOTNOTES FOR TABLE 217

¹ For some crops in certain years, production includes some quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit. Apples, peaches, pears, citrus fruit, cranberries, and strawberries, which are estimated in units other than tons, are converted to equivalent tons in this table.

² Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of each State.

³ Preliminary.

⁴ 17 fruits, 1919-23; 18 fruits, 1924-35.

Agricultural Marketing Service.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign service material, reports of U.S. Agricultural attachés and Foreign Service Officers, results of office research, and related information, on the basis of postwar boundaries. Estimates in original units of approximately 1 bushel in the following countries: Australia, Canada, United States, New Zealand, and South Africa. In other countries original estimates, mostly in metric tons, converted to bushels of 48 pounds, except Argentina and Chile in 44-pound boxes. Harvest in the Southern Hemisphere countries is for the spring of the following year.

¹ Production, price, and value for California, Washington, and Utah. The 1954 census reported these 3 States as having 97.8 percent of the 1954 production.

² Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions.

³ Net processed weight.

⁴ Dried apricots are 12½ percent of total dried fruit for salad.

⁵ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis of 5.5 tons fresh to 1 ton dried. Canned converted to fresh at ratio of 55 cases (45 pounds each) packed from 1 ton of fresh fruit through 1938; beginning 1939 at ratio of 60 cases to 1 ton.

⁶ Jan. 1 to June 30; not segregated prior to that time.

⁷ Less than ½ ton.

⁸ Preliminary.

Agricultural Marketing Service. Exports from reports of the Bureau of the Census.

FOOTNOTES FOR TABLE 225.

¹ Preliminary.

² Includes Panama Canal Zone.

³ Included in Republic of Panama.

⁴ Less than 500 bushels.

⁵ Averages are for all Germany.

⁶ Includes pears.

⁷ Includes quinces.

⁸ Includes Lebanon.

⁹ Included in Syria.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign service material, reports of United States Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1955, estimates of such quantities were as follows (tons): Sweet varieties, Idaho, 200; Washington, 2,000.

² Preliminary.

³ Equivalent returns per ton for bulk fruit at the packing-house door.

⁴ Equivalent returns per ton for bulk fruit at the first delivery point.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 233

¹ Production, price, and value for New York, Michigan, Wisconsin, Idaho, Colorado, and California for 1919-23. Montana, Utah, Washington, and Oregon added in 1924 and Pennsylvania and Ohio in 1929.

² Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

³ Not segregated prior to Jan 1, 1922.

⁴ Not segregated prior to Jan 1, 1924.

⁵ Not segregated prior to Jan. 1, 1936.

⁶ Less than 500 pounds.

⁷ Preliminary.

Agricultural Marketing Service. Foreign trade data from reports of the Bureau of the Census.

¹ New York, Pennsylvania, Ohio, Michigan, Wisconsin, Montana, Idaho, Colorado, Utah, Washington, Oregon, and California.

² Differences between "Production" and "Production having value" are economic abandonment.

³ SWEET VARIETIES: Includes fruit used for juice, wine, preserves, and candied cherries for 1938–43. Thereafter these items are included with "brined." Through 1942 some quantities of sweet cherries frozen also are included.

SOUR VARIETIES: Includes fruit used for juice, wine, preserves, and candied cherries through 1948. Thereafter included with "canned."

⁴ Includes small quantities used for juice, wine, brandy, etc. For 1955 and 1956, small quantities frozen are also included.

⁵ Preliminary.

⁶ Includes some quantities brined.

Agricultural Marketing Service.

¹ Preliminary.² Production all of value.³ New York, Pennsylvania, Ohio, and Michigan.⁴ Includes small quantities used for juice, wine, brandy, frozen, etc.⁵ Montana, Idaho, Colorado, and Utah.⁶ Includes small quantities used for juice, jam, jelly, and brined.⁷ Montana, Idaho, Colorado, Utah, Washington, and Oregon.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 238.

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year. In California, picking usually extends from about Oct. 1 to Dec. 31 of the following year (15 months). In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1.

² Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For weight of boxes see page VII and VIII.

³ Differences between "Total production" and "Production having value" consist of fruit unharvested, donated to charity, or not utilized on account of economic conditions.

⁴ Equivalent returns per box at the intake packing-house-door for all methods of sale. When sale represents fruit sold at point other than intake packing-house-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold. Prices are State averages, weighted by production rather than by sales to obtain United States average.

⁵ Includes quantities used for juice, concentrates, grapefruit segments, and other citrus products. In some seasons, includes appreciable quantities of oranges and lemons in California delivered to processing plants which were not utilized, but for which growers received payment.

⁶ Year beginning November for oranges and lemons; year beginning September for grapefruit; year beginning July for limes.

⁷ Imports converted to boxes on the following basis: Oranges, 90 pounds per box; grapefruit, 80 pounds per box; lemons, 76 pounds per box; limes, 80 pounds per box.

⁸ Less than 500 boxes.

⁹ Exports reported in pounds beginning Jan. 1, 1949. Converted to boxes on the following basis: Oranges, 84 pounds per box; grapefruit, 78 pounds per box; lemons, 79 pounds per box.

¹⁰ Production estimated from prospects on July 1, 1957.¹¹ Imports include pomeloes, beginning Jan. 1, 1941.¹² Exports include limes, beginning Jan. 1, 1941.

Agricultural Marketing Service. Foreign trade data from reports of the Bureau of the Census.

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year (15 months). In California picking usually extends from about Oct. 1 to Dec. 31 of the following year. In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1. Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For some States in certain years, production includes some quantities donated to charity, unharvested, or not utilized on account of economic conditions. In 1955, estimates of such quantities were as follows (1,000 boxes): California Navel and miscellaneous oranges, 377; Valencias, 210; Florida tangerines, 200; California, Desert Valleys, grapefruit, 3. ² As estimated from prospects on July 1, 1957.

³ Equivalent returns per box at the intake packing-house-door for all methods of sale. When sale represents fruit sold at point of other than intake packing-house-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold.

⁴ Includes small quantities of tangerines.

⁵ Net content of box varies. In California and Arizona the approximate average for oranges is 77 pounds and grapefruit 65 pounds in the Desert Valleys; 68 pounds for California grapefruit in other areas; in Florida and other States, oranges, including tangerines, 90 pounds and grapefruit 80 pounds; California lemons, 79 pounds; Florida limes, 80 pounds. ⁶ In California and Arizona, Navel and miscellaneous.

¹ Production estimates relate to the crop from bloom of the year shown. Harvesting in Northern Hemisphere countries begins about November, and in Southern Hemisphere countries about May of the following year. Production in foreign countries converted to boxes of the following weights: Oranges 70 pounds; grapefruit and limes 80 pounds; lemons 76 pounds.

² Preliminary.

³ Does not include 19,800,000 boxes of fruit frozen on trees in February 1956. Of this quantity, 6,300,000 boxes were salvaged in domestic consumption and 13,500,000 boxes were either left on trees or salvaged for livestock feed.

⁴ Includes Syria.

⁵ Produced in Palestine.

⁶ Included in Lebanon.

⁷ Includes 400,000 boxes produced in the Gaza Strip.

⁸ Does not include production in areas formerly known as Spanish Morocco and Tangier.

⁹ Not available.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign service material, reports of United States Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Concentrated juices can be converted to approximate single-strength equivalent by multiplying orange and grapefruit concentrate by 7, lemon concentrate by 6, and frozen orange concentrate by 4.

In 1947 an additional 1,440,177 gallons were packed in Florida as a result of a U.S. Department of Agriculture purchase program. It was used for Army relief-feeding in occupied Germany.

² 1,585 gallons produced in Florida, balance in California-Arizona.³ 1,303 gallons produced in Florida, balance in California-Arizona.

Agricultural Marketing Service. Based on data obtained from various canners' associations and individual canners.

¹ Estimates relate to Massachusetts, New Jersey, Wisconsin, Washington, and Oregon.

² Includes the following quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit (barrels): 1949—26,000; 1950—62,100.

³ Mainly for canning, except 128,425 barrels dried in 1943, 61,300 barrels in 1944, and 44,800 barrels in 1945.

⁴ Barrels of 100 pounds.

⁵ Preliminary.

Agricultural Marketing Service.

1956 ⁴							2,707	715	1,992

¹ Production, price, and value for California and Texas only. Texas discontinued in 1952.

² Equivalent returns per ton for bulk fruit at the first delivery point.

³ California dried figs converted to fresh basis at ratio of 3 pounds fresh to 1 pound dried.

⁴ Preliminary.

⁵ Prior to 1944 includes small quantity in-brine; 1944–52 includes in-brine and fresh; 1952 to date dried only.

⁶ General imports, 1919–33; imports for consumption, 1934–41; imports for consumption minus exports, 1942 to date. Net exports shown by a minus sign.

⁷ Less than 500 pounds.

⁸ Includes shipments under the Army Civilian Supply Program, beginning January 1947.

Agricultural Marketing Service. Foreign trade data from reports of the Bureau of the Census.

FOOTNOTES FOR TABLE 250

¹ Production, price, and value for California only. The 1954 census reported date production in California and Arizona in 1954, but of the total production 98.5 percent was in California.

² Equivalent returns per ton for bulk fruit at the first delivery point.

³ Includes 2,300 tons not harvested on account of economic conditions.

⁴ Preliminary.

Agricultural Marketing Service. Imports from reports of the Bureau of the Census.

1956 ¹²	72,641		12,687	59,954	200	54,602

¹ Includes the following quantities unharvested on account of economic conditions (1,000 tons): California, 1922-100; 1925-138; 1926-15; 1927-142; 1928-153; 1930-433, including 316 sold but left on the vines; 1931-10; 1932-154; 1933-3. Other States, 1937-9; 1940-2; 1950-3; 1951-2.

² Equivalent returns per ton for bulk fruit at the first delivery point.

³ The production estimate for California includes 12,000 tons (fresh weight) of raisin varieties lost on the drying trays because of rain damage.

⁴ Preliminary.

⁵ Converted on the basis of country data, using the following weight per cubic foot: Argentina and Chile, 36 pounds; Belgium and Netherlands, 10 pounds; Canada, Italy, and Mexico, 40 pounds; Spain, 24 pounds; Union of South Africa, 16 pounds; and all other, 20 pounds.

⁶ Total exports minus total imports. Beginning 1933, domestic exports minus imports for consumption with net imports shown by a minus sign.

⁷ Included in total production of grapes, fresh basis; 1 ton of raisins equivalent to about 4 tons of fresh grapes.

⁸ Exports and imports of raisins converted to sweatbox, or production basis at the ratio of 1 to 1.08.

⁹ Beginning 1933, imports for consumption.

¹⁰ January-June 1941; first date reported. 1 pound canned equals 0.741 pound fresh.

¹¹ Includes currants beginning January 1943.

¹² Less than $\frac{1}{2}$ ton.

Agricultural Marketing Service. Foreign trade data from reports of the Bureau of the Census.

¹ Baltimore, Boston, Chicago, Cincinnati, Cleveland, Detroit, Jersey City, New York, Philadelphia, Pittsburgh, and St. Louis. From start of season in late May through the entire marketing season ending the following May.

² Mostly lugs. Table stock mostly in packages containing about 28 pounds; juice stock in packages containing mostly 25–40 pounds, with some special packs ranging from 42–50 pounds.

³ Prices are weighted by number of packages sold.

⁴ Table grapes are those packed for sale for table use.

⁵ Juice grapes are those packed for sale for juice purposes.

⁶ Includes varieties not listed in this table.

¹ Production, price, value, and utilization for California only. According to the 1954 Census there is also some commercial production of olives in Arizona but 99.8 per cent of the 1954 production was in California.

² Includes the following quantities unharvested on account of economic conditions (tons): 1932—5,000; 1938—1,500.

³ Includes the olives used for California Spanish Green, Greek style, Sicilian style, chopped, minced, and brine.

⁴ Reported in value only.

⁵ Less than 500 pounds.

⁶ Preliminary.

Agricultural Marketing Service. Imports compiled from the reports of the U. S. Department of Commerce. About 40 gallons of oil are obtained from 1 ton of olives in California. A gallon of olive oil weighs approximately 7.5 pounds.

¹ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

² Net processed weight.

³ Canned peaches are 40 percent of total canned fruit for salad.

⁴ Dried peaches are 21 percent of total dried fruit for salad.

⁵ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 6.5 pounds fresh from 1929 to date; conversion ratios of 5½ and 6 pounds prevailed in earlier years. Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh. 48 pounds of fresh equal 1 bushel.

⁶ January to June; not separately reported prior to this time.

⁷ Less than 500 pounds.

⁸ Preliminary.

Agricultural Marketing Service. Italic figures are Census returns of harvested production. Foreign trade data from reports of the Bureau of the Census.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1955 and 1956 estimates of such quantities were as follows (1,000 bushels): 1955—Virginia, 14; Idaho, 40; Colorado, 75; California, Clingstone, 1,000; 1956—Illinois, 48; Arkansas, 195.

² Preliminary.

³ Includes excess cullage of harvested fruit (1,000 bushels): 1955—Virginia, 30; Colorado, 85; 1956—Colorado, 63; California, Clingstone, 3,167.

⁴ Less than 500 bushels.

⁵ Mainly for canning.

Agricultural Marketing Service.

¹ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

² Prior to 1925 prices are as of Nov. 15.

³ Fresh and canned pears were reported in value only prior to July 1, 1922.

⁴ Net processed weight.

⁵ Dried pears are 16½ percent of total dried fruit for salad.

⁶ Canned pears are 35 percent of total canned fruit for salad.

⁷ Canned pears converted to terms of fresh on the basis that 1 pound canned equals about 1.2 pounds fresh; dried pears converted to terms of fresh on the basis that 1 pound dried equals about 5.5 pounds fresh; 50 pounds fresh equals 1 bushel, except in California, where 48 pounds equals 1 bushel.

⁸ January-June 1929; dried pears not separately reported prior to this date.

⁹ January-June 1930; not separately reported prior to this date.

¹⁰ Prior to June 18, 1930, included with peaches, green, ripe, or in brine.

¹¹ Less than 500 pounds.

¹² Preliminary.

Agricultural Marketing Service. Italic figures are census returns of harvested production. Foreign trade data from reports of the Bureau of the Census.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign service material, reports of United States Agricultural Attachés and Foreign Service Officers, results of office research, and related information. Estimates in original units of approximately 1 bushel in the following countries: Australia, Canada, United States, New Zealand, and South Africa. In other countries original estimates, mostly in metric tons, converted to bushels of 50 pounds, except Argentina and Chile in 44-pound boxes. Harvest in the Southern Hemisphere countries is for the spring of the following year.

¹ Production, price, and value for Florida only.² Mainly exports directly from Hawaii and Puerto Rico to countries other than the United States mainland.³ Crates measuring approximately 12 by 10½ by 33 inches, inside dimensions, and holding about 70 pounds or 24–30 pineapples of medium size.⁴ From 1919–30, crates of 1.96 cubic feet; beginning 1931, crates of 2.45 cubic feet, holding about 70 pounds or 24–30 pineapples of medium size.⁵ Less than 500.⁶ 3 months only. Reporting discontinued Apr. 1, 1948.⁷ Preliminary.

Agricultural Marketing Service. Data on foreign trade and receipts from noncontiguous territories compiled from reports of the Bureau of the Census.

FOOTNOTES FOR TABLE 276

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1955 and 1956 estimates of such quantities were as follows (tons): 1955—Prunes, Idaho, 1,800; Eastern Washington, 1,100; Western Washington, 200; Eastern Oregon, 700; 1956—California, 5,000.² Preliminary.³ Includes excess cullage of harvested fruit (tons): 1955—2,000; 1956—4,000.⁴ The California prune crop (fresh basis) is derived by multiplying the estimate of dried prunes by 2½.

Agricultural Marketing Service.

¹ Preliminary.² The drying ratio in Washington and Oregon ranges from 3 to 4 pounds of fresh fruit to 1 pound dried; in California the drying ratio is approximately 2½ pounds fresh to 1 pound dried.³ Excludes quantities used on farms where grown.⁴ Includes some canned.⁵ Includes some frozen and otherwise processed.⁶ Dry basis.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 278

¹ Production, price, and value for Idaho, Washington, Oregon, and California.² Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.³ Net processed weight.⁴ Dried prunes in salad estimated at 43 percent of total dried fruit for salad.⁵ Exports of dried prunes converted to unprocessed dry weight by dividing by 1.025. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 2½ pounds fresh. Canned prunes converted to terms of fresh fruit on the basis that 1 pound canned equals 0.729 pound fresh. Otherwise prepared or preserved converted to terms of fresh fruit on the basis of 1 pound equals 0.899 pound fresh.⁶ January to June, not segregated prior to this time.⁷ June 1 to June 30, not segregated prior to this time.⁸ July to December 1937; 1938 not available.⁹ January to June 1939; 1938 not available.¹⁰ Less than $\frac{1}{2}$ ton.¹¹ Preliminary.

Agricultural Marketing Service. Foreign trade data from reports of the Bureau of the Census.

¹ Figures for all commodities are on a calendar-year basis, except apples and pears which begin in June of year indicated and end the following year. Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Includes Satsumas and tangerines.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis.

¹ Including shipments from Puerto Rico through 1949. Shipments not available after 1949.² Including spiced peaches which are reported separately beginning 1947.³ Hawaiian pack. Data not available in terms of 24 No. 2½ cans prior to 1940.⁴ In terms of cases of 24 No. 2½ cans.⁵ Preliminary.⁶ Not available.

Agricultural Marketing Service. In addition to the canned fruits shown in this table, considerable quantities of the following products also are canned.: Cranberries, citrus salad, figs, and orange segments.

FOOTNOTES FOR TABLE 288

¹ Excludes quantities not harvested on account of economic conditions and/or excess cullage of harvested prunes. Beginning 1942, excludes prunes used for juice and concentrates.² Preliminary.

Agricultural Marketing Service. Data compiled from official reports of the Department and trade sources. All figures on a natural condition basis.

¹ Excluding citrus concentrates.

² Equivalent cases of No. 2 cans.

³ Data not available.

⁴ Included with fruit nectars.

⁵ Includes 1,450,000 cases of berry juice in 1945 and 4,060,000 cases in 1946.

Agricultural Marketing Service. Based on data obtained from various canners' associations and individual canners.

Citrus juices ¹³		737,322		160,301	897,623
Total	117,646	791,266	122,021	555,491	1,591,950

¹ Includes the commercial pack only and does not include quantities of fruit frozen by industrial users or other types of processors who use all or the largest portion of their frozen pack as raw material for the manufacture of jams, jellies, and other fruit spreads, ice cream, bakery goods, or alcoholic beverages. Also does not include custom freezing for industrial users nor quantities produced in frozen-food locker plants.

² Connecticut, Maine, Massachusetts, New Jersey, New York, Pennsylvania, and Rhode Island.

³ Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

⁴ Illinois, Indiana, Michigan, Minnesota, Nebraska, Ohio, and Wisconsin.

⁵ Arizona, California, Colorado, Idaho, Montana, Oregon, Utah, and Washington.

⁶ Includes some packed in the South.

⁷ Data by regions not available for publication.

⁸ Includes some packed in South and West.

⁹ Includes some packed in the Midwest.

¹⁰ Included with total for the Northeast.

¹¹ Includes small pack in South.

¹² Includes bananas, cranberries, dewberries, elderberries, fruit cup, fruit juices (other than citrus), huckleberries, melon balls, mixed fruits, nectarines, pears, pineapple, and plums. Hawaiian production of pineapple is included with the West.

¹³ See table 243 for packs of concentrated grapefruit and orange juice in gallons, pack-year basis.

Agricultural Marketing Service. Data on all fruits except citrus juices from National Association of Frozen Food Packers; data on citrus from Florida Canners' Association, Lemon Products Advisory Board, and survey by the U. S. Department of Agriculture.

¹ Fresh deciduous fruits, canned juices, and frozen fruits are on calendar year basis, as are fresh citrus fruits for 1939 and 1940 and canned fruits beginning in 1943. Beginning 1941, fresh citrus fruits are on a crop year basis, beginning in November of the preceding year. Canned fruits are on pack year basis prior to 1943 and on a calendar year basis since. Dried fruits are on a pack year. The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by total population adjusted for members of the armed forces not eating out of civilian food supplies.

² Excludes noncommercial apples beginning 1934.

³ Apricots, avocados, bananas, cranberries, figs, grapes, nectarines (beginning 1936), peaches, pears, pineapples; and (including an estimate for noncommercial) cherries, plums and prunes and strawberries.

⁴ Apples, applesauce, apricots, berries, cherries (including brined), cranberries, figs, fruit cocktail and salad, citrus segments, olives (including brined), pineapple, plums, prunes, peaches (including spiced beginning 1936), and pears.

⁵ Grapefruit, orange, blended citrus, lemon and lime, tangerine and blend, pineapple, apple, berry, grape, and prune juices, and fruit nectars. Includes canned concentrated citrus juices converted to a single-strength basis, but excludes all frozen juices.

⁶ Dried apples, apricots, dates, figs, peaches, pears, prunes, and raisins, except for unmerchantable figs, substandard prunes, and prunes used for juice and concentrate (from 1942). Data are in terms of processed dried weight.

⁷ Principally cherries, apples, peaches, apricots, strawberries, other berries, and citrus juices.

⁸ Includes chilled citrus.

Vegetables and Melons

This section contains statistics on potatoes, sweetpotatoes, and commercial vegetables and melons. Acreage and production data in this section are the revised estimates, based on the 1954 census.

A new table shows canners' and distributors' stocks of canned vegetables. A seasonal table on acreage, production, and price of escarole has also been added. The table on cold storage stocks of fruits and vegetables by months has been replaced by a detailed table showing end of season cold storage stocks of frozen vegetables. Detailed estimates of per capita consumption of fresh, canned, and frozen vegetables are presented this year. The estimates of total consumption have been dropped.

For potatoes and sweetpotatoes the estimates of acreage, production, value, and farm disposition pertain to the total crop and include quantities produced both for sale and for use as food, feed, and seed on farms where grown. Potato statistics are shown on a within-year seasonal grouping of winter, early spring, late spring, early summer, late summer, and fall crops, by States. Some States have production in more than one seasonal group.

For processing vegetables, the estimates of acreage, production, and value for each of the 10 crops relate to production used by commercial canners, freezers, and other processors except dehydrators. These estimates include raw products grown by processors themselves and those grown under contract or purchased on the open market. This production and the actual or equivalent acreage harvested are not duplicated in the fresh market estimates for the same commodities. The production of those vegetables used for processing for which regular processing estimates are not made, is included in the fresh market estimates. Estimates for pimientos were discontinued in 1956.

The Department's regular monthly and annual program of estimates of commercial vegetables for fresh market includes 28 principal vegetable and melon crops in the major producing States. These estimates relate to crops which are grown primarily for sale and they do not include vegetables and melons produced in farm and nonfarm gardens. Although the bulk of the production of the 28 principal vegetable and melon crops is for consumption in the fresh state, data for some commodities include quantities used by processors. Such crops as broccoli, brussels sprouts, cabbage (for dehydration), carrots, cauliflower, celery, garlic, and onions, for which separate estimates for commercial processing are not prepared, are in this category. The commercial estimates of the 28 principal crops for the years 1939 to date include local market production from areas near consuming centers as well as production from well-recognized commercial areas which specialize in producing supplies for shipment to distant markets. Estimates of commercial vegetables for fresh market prepared for years prior to 1939 are not strictly comparable with the series for 1939 and later years as the earlier series pertain largely to important commercial shipping areas and for the most part do not include local market production from areas near consuming centers. The estimates for the years prior to 1939 will be found in Agricultural Statistics, 1952.

Annual estimates of national commercial production of all vegetables are presented in Table 295. For fresh market vegetables they include production for sale of (1) the 28 principal crops in the major producing States for which regular seasonal estimates are prepared, (2) the principal 28 crops in unimportant producing States, (3) greenhouse vegetables in all States, and (4) minor vegetables in all States. These figures show that the regular program of releases of commercial fresh market vegetable estimates for principal crops in major producing States account for about 81 percent of the national commercial output of all fresh vegetables and melons. The total national commercial production of each of the 28 principal vegetable and melon crops and aggregate production of minor vegetables has been published by the Agricultural Marketing Service, but production estimates by States, and comparable data on acreage and value, are not available.

The seasonal nature of the production of vegetables and melons for fresh market and their perishability created a need for information on supplies available during specific periods of the year to facilitate orderly marketing. Vegetable and melon estimates for the 28 principal crops are classified according to the season or period within the season

when the bulk of each crop is usually harvested. The forecasts and estimates of acreage and production therefore provide a measure of supplies available in specific seasonal periods. The seasonal groupings used are as follows:

Seasonal Groups and Subgroups Used for Vegetable and Melon Crops

Dates refer to period of most active harvest

Classifications Most Commonly Used

Winter: January, February, March.

Spring: April, May, June.

Early Spring: April 1-May 15.

Late Spring: May 16-June 30.

Summer: July, August, September.

Early Summer: July 1-August 15.

Late Summer: August 16-September 30.

Fall: October, November, December.

Early Fall: October 1-November 15.

Late Fall: November 16-December 31.

Classifications Used for Certain Short Season Crops

Early Spring: April.

Mid-Spring: May.

Late Spring: June.

Early Summer: July.

Mid-Summer: August.

Late Summer: September.

In practice the beginning and ending of these seasons are not fixed dates but approximations. There is necessarily some overlapping in the marketing seasons for individual crops, and weather frequently disturbs normal harvesting schedules. Consequently, the classifications employed are frequently less precise than the dates indicated.

Table 295.—Vegetables, commercial: Production of all vegetables, United States, 1919-56

Year	For fresh market ¹	For processing ²	Total	Year	For fresh market ¹	For processing ²	Total

¹ Commercial production, including greenhouse production, of all fresh market vegetables in all States. Includes the production shown in table 296 for the 28 principal vegetables. Does not include production for home consumption in farm and nonfarm gardens. Production by States, and acreage and value data not available.

² Production in all States of the 10 principal vegetables for processing shown in table 288, plus pimiento peppers. Production of other vegetables processed included in fresh market series of estimates.

³ Preliminary.

¹ Acreage for fresh market is acreage for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Acreage for processing is acreage harvested.

² Acreage, production, and farm value of the following 28 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honey ball melons, honey dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Of these, broccoli was included for 3 States prior to 1949, 10 States since 1949; brussels sprouts was not included prior to 1949; sweet corn was included for 3 States prior to 1948, 4 States in 1948, and 26 States since 1949. Comparable estimates not available prior to 1939.

³ Acreage, production, and farm value of the following 10 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, spinach, and tomatoes. Production of other vegetables processed included in fresh market series of estimates.

⁴ Production for fresh market includes some quantities not marketed because of low prices or other economic factors which are excluded in computing value.

⁵ Preliminary.

Agricultural Marketing Service.

¹ Production for fresh market includes some quantities not marketed and excluded in computing value.² Production of the following 28 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, Brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honey ball melons, honey dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons.³ Preliminary.⁴ Production of the following 10 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, spinach, and tomatoes. Other vegetables processed included in fresh market series of estimates.

¹ Fresh market and processing asparagus is frequently harvested from the same acreage. Therefore, it is not practical to make individual acreage estimates for these segments.

² Preliminary.

³ Processing only. Includes Indiana, Minnesota, Missouri, Nebraska, Virginia, Arkansas, Wisconsin, and Idaho.

⁴ Fresh market; includes Pennsylvania and Ohio. Processing includes Pennsylvania, Ohio, Indiana, Minnesota, Missouri, Nebraska, Virginia, Arkansas, Wisconsin, and Idaho.

¹ As revised July 1957.

² As revised August 1957.

³ Includes some quantities not harvested or not marketed and excluded in computing value. In 1955 estimates of such quantities were as follows (1,000 cwt.): Late spring, North Carolina, 135; early summer, Kansas, 4; Virginia (Eastern Shore), 67; Kentucky, 18; Texas, 215; late summer, Idaho, 84; Washington, 344; Oregon, 130; fall, Washington, 150.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 345

¹ The following quantities were unharvested and/or not marketed and have been excluded in computing price and value (1,000 hundredweight): 1928—4,477; 1931—40; 1932—1,305; 1937—43; 1939—744; 1943—264; 1950—741; 1951—656; 1953—3,068; 1955—1,147.

² Prices are of eastern potatoes weighted by unloads, seasons September—May. Beginning 1951, price data are for Maine and Long Island potatoes only.

³ Domestic exports minus imports for consumption, with net imports shown by a minus sign.

⁴ Includes shipments under the Army Civilian Supply Program beginning January 1947.

⁵ As revised July 1957.

⁶ As revised August 1957.

Agricultural Marketing Service. Italic figures are census returns. Data for 1866–1918 (in bushels) in Agricultural Statistics, 1952, table 339. Foreign trade data from reports of the Bureau of the Census.

¹ Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Includes casaba, honey ball, honey dew, persian, and mixed melons. Cars of mixed melons may include cantaloups as well as other muskmelons.

³ Not available.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers, throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis.

¹ Fresh vegetable consumption computed from estimated total commercial production for fresh market including estimated greenhouse production. Does not include production for home use. Civilian consumption only, beginning 1941—obtained by dividing the total apparent civilian consumption by total civilian population as reported by the Census. All data for calendar year except dry field peas on crop year basis.

² Includes quantities used in the manufacture of potato chips; excludes canned and frozen. ³ Included in minor vegetables. ⁴ Less than 0.05 pound.

Agricultural Marketing Service.

¹ Excludes soups and baby food. In years 1909–42 calendar-year data are derived from pack-year data by combining proportional parts of each pack year involved. Civilian consumption only, beginning 1941.

² Minor vegetables and, in earlier years, items not shown separately are included in "other."

³ Based on information available for 1944–46, tomato juice comprises approximately 85 percent of the total, combination vegetable juices 13 percent, and other vegetable juices 2 percent. Combination vegetable juice contains approximately 70 percent or more tomato juice.

⁴ Computed as a residual; includes miscellaneous greens, pimientos, potatoes, mixed vegetables, and all items, especially in earlier years, for which no separate data are available.

⁵ Preliminary.

¹ Total crop for processing converted to a canned basis by applying the following factors (cases of 24 No. 2 cans per ton, farm weight): Cucumbers for pickles, 68 cases; cabbage for kraut, 54 cases; and pimientos (1941 to date), 29 cases.

² Equivalent cases of 24 No. 2 cans.

³ Data for tomato catsup, chili sauce, paste, and sauce for 1939 and 1940 are either rough estimates or interpolations.

⁴ Preliminary.

Agricultural Marketing Service. Compiled mainly from reports of the National Canners Association. In addition to the vegetables shown in this table, considerable quantities of the following products also are canned: Baked beans, carrots and peas, corn on the cob, hominy, kidney beans, mixed vegetables, mushrooms, okra, other greens than spinach, potatoes, rhubarb, sauerkraut juice, soups, spaghetti, succotash, sweetpotatoes, and vegetable puree.

FOOTNOTES FOR TABLE 378

¹ Production, price, and value for Oregon and Washington only. The 1954 census reported small quantities of hazelnuts (filberts) produced in several other States in 1954, but 99.9 percent of the total production was in Oregon and Washington.

² Includes the following quantities unharvested on account of economic conditions (tons): Oregon, 1942–100; 1943–100; 1944–100; 1948–200; 1949–100; 1950–650; 1951–250; 1952–220; 1953–100; 1954–150. Washington, 1948–120; 1949–110; 1950–130; 1951–40.

³ Equivalent returns per ton at first delivery point.⁴ Shelled nuts converted to in-the-shell basis at ratio of 1 to 2.22.⁵ Preliminary.

Agricultural Marketing Service. Imports from reports of the Bureau of the Census.

¹ Preliminary.² Bags of 132.276 pounds each.³ Twelve months ending June 30 of year shown.⁴ Includes Cuba, Guadeloupe, Jamaica, Trinidad and Tobago, Panama, and Puerto Rico.⁵ Includes Bolivia and Surinam.⁶ Ethiopian year ending September 10 of year shown.⁷ Three-year average.⁸ Includes Cape Verde, French Togoland, Ghana, Liberia, Nigeria, Sao Thome and Principe, and Sierra Leone.⁹ Twelve months ending April 1 of year shown.¹⁰ Includes Hawaii, New Caledonia, New Hebrides, and Timor.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign service material, reports of U. S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

CHAPTER V

STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

Chapter V deals with hay, pasture, seeds, and various minor field crops. The reader will note a break in the continuity of some of the hay series; this results from a change in the method of estimating prairie or wild hay, which is explained in the footnotes of the appropriate tables. Table 412 shows the seeding rate for a number of specified crops. The State averages represent the latest information available and are based largely on surveys made annually or every few years. The United States average rates are derived by weighting the average for each State by the acreage planted to the particular crop. Rates are not shown for States where the crop is not estimated currently.

The table on international trade for dry edible beans is omitted from this issue.

¹ Beginning 1944, separate estimates discontinued.² Beginning 1944, estimates for 21 States only, as shown in table 390.³ Includes small quantities of kinds of hay in the other columns, in some States where they are not of sufficient importance to estimate separately.⁴ Preliminary.

Table 390.—Hay—Alfalfa and alfalfa mixtures; clover, timothy, and mixtures of clover and grasses; wild; and lespedeza: Acreage and production, by States, average 1945–54, annual 1955 and 1956

¹ Preliminary.

² Excludes sweetclover and lespedeza hay.

³ Includes prairie, marsh, and salt grass hays.

⁴ Small quantities are produced in other States where they are not estimated separately.

⁵ Estimates discontinued—included in "other hay."

Agricultural Marketing Service.

¹ Table includes, besides the ordinary edible beans and beans grown for seed, blackeyes, and garbanzos in California. Soybeans and mung beans are not included.

² Clean basis.

³ Compiled from New York Producers' Price Current, and beginning September 1947 from the New York Journal of Commerce.

⁴ Stocks for 1942–46 and 1950 from official reports, adjusted for U. S. Department of Agriculture holdings. Estimates for other years based on the best sources available.

⁵ General imports 1909–32; imports for consumption beginning 1933.

⁶ Bags of 100 pounds.

⁷ Census yield and production largely uncleaned basis.

⁸ Acreage grown alone.

⁹ Includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate.

¹⁰ Preliminary.

Agricultural Marketing Service. Italic figures are census returns; census figures include all States; other figures principal producing States only. Foreign trade data from reports of the Bureau of the Census.

¹ Years refer to year of harvest in the Northern Hemisphere and include the harvest immediately following in the Southern Hemisphere.

² Preliminary.

³ Production in Mexico is about 60 percent "porquero" type garbanzos used mostly for livestock feed.

⁴ Includes large quantities of porquerotype garbanzos (see footnote 3).

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign service material, reports of United States Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

FOOTNOTES FOR TABLE 416

¹ Years refer to year of harvest in the Northern Hemisphere and include the harvest immediately following in the Southern Hemisphere.

² Preliminary.

³ Subject to adjustment by the Canadian government in line with the 1950 census.

⁴ Garbanzos excluded.

⁵ Included with Syria.

⁶ Includes Lebanon.

⁷ Calendar-year production.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign service material, reports of United States Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

1956 ⁶	24,200	1,586	38,383	44.2	16,969	22,830	—	—	—	31,409

¹ Includes the following quantities not marketed because of economic conditions and/or the marketing agreement (1,000 pounds): 1935, 5,436; 1937, 4,365; 1938, 3,140; 1939, 2,813. Salable allotments under the Marketing Agreement totaled (million pounds): 1949–59; 1950–50; 1951–46, 5; 1952–39, 2. Price and value apply only to the part of the crop which was sold.

² Prior to 1932 prices are as of Dec. 1.

³ Prior to 1937, the Sept. 1 stocks included only those in growers' hands; from 1937 to date, stocks in dealers' hands and in brewers' hands are also included and these have greatly exceeded the growers' stocks. Stocks for 1950–52 do not include hops held by growers which are not available for sale under the Marketing Agreement.

⁴ General imports 1910–32; imports for consumption beginning 1933. Includes hop extract and lupulin 1930–35.

⁵ Total exports (domestic plus foreign) minus total imports; beginning 1933 domestic exports minus imports for consumption, with net imports shown by a minus sign.

⁶ Year beginning July, 1919–32. 1920–31 represent hops used to make cereal beverages containing less than 0.5 percent of alcohol by volume; 1932 includes 867,057 pounds of hops used to make cereal beverages containing less than 0.5 percent of alcohol by volume and 6,900,263 pounds fermented malt liquor containing not more than 3.2 percent of alcohol by weight; 1933 to date, used for fermented malt liquor. Records of the Bureau of Internal Revenue, 1919–25, and 1933 to date; annual reports of the Commission of Prohibition, 1926–29, and Commissioner of Industrial Alcohol, 1930–32.

⁷ Not including 57,936 pounds in 1924, 71,508 pounds in 1925, 960 pounds in 1926, and 6,294 pounds in 1927 used in the manufacture of distilled spirits.

⁸ Preliminary.

CHAPTER VI

STATISTICS OF CATTLE, HOGS, SHEEP, HORSES, AND MULES

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter, meat production, and market statistics for meat animals.

The term "on farms" as used in this chapter includes ranches. Estimated numbers do not include livestock not on farms.

Information on the methods used in making livestock estimates may be found in Miscellaneous Publication No. 703, "The Agricultural Estimating and Reporting Service of the United States Department of Agriculture."

Differences between census inventories and January 1 estimated numbers are large in years when the census relates to a date other than January 1. The census enumerations in 1940 and 1950 were taken as of April 1, the enumerations in 1945 as of January 1, and in 1954 as of October and November. Marketings and slaughter of livestock as well as young stock born during the period between January 1 and the date of enumeration can result in some rather large differences in numbers on farms. For example, hog marketings and slaughter are seasonally big during the first few months of the year and during the last 2 or 3 months of the year. As a result, the number on farms January 1 is substantially different than for either the preceding October or the following April.

Separate estimates for horses and mules are no longer prepared. Therefore, the United States tables on workstock in this issue show separate estimates for years 1867 through 1950. Combined totals are shown from 1920 to date. Numbers in foreign countries will be found in Agricultural Statistics 1955, table 521. Data are not available to bring this table up to date.

New tables have been added to this chapter showing number of cattle and calves on feed for the United States, exports of hides and skins by country of destination for the United States, and world livestock numbers and production of livestock products.

¹ Census or estimate for year shown except that ends of year estimate (October–December) is included under following year for comparisons and totals.

² Preliminary.

³ 2 to 4 years only.

⁴ June.

⁵ July.

⁶ March.

⁷ May.

⁸ Census or estimate for single year.

⁹ Official estimates; may be underestimate of actual numbers.

¹⁰ During period October–December.

¹¹ September.

¹² Includes buffaloes.

¹³ Census Dec. 31, 1934.

¹⁴ Cattle 1 year and older.

¹⁵ October.

¹⁶ Excludes area north of 38°.

¹⁷ Includes estimates for Outer Mongolia.

¹⁸ Number taxed only.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of United States agricultural attachés, and other representatives abroad, results of office research and related information. Estimated totals, include allowance for any missing data for countries shown and for other producing countries not shown.

Table 449.—Cattle and calves: Number on feed, United States, Jan. 1, 1930–57 ¹

Year	Number	Year	Number	Year	Number	Year	Number
	Thousands		Thousands		Thousands		Thousands
1930	3,113	1937	2,759	1944		1951	4,534
1931	3,025	1938	3,336	1945		1952	4,961
1932	2,878	1939	3,303	1946		1953	5,762
1933	3,080	1940	3,633	1947		1954	5,370
1934	2,890	1941	4,065	1948		1955	5,786
1935	2,215	1942	4,185	1949		1956	5,880
1936	3,202	1943	4,445	1950		1957 ²	6,099

¹ Estimates include only cattle being fattened for market as a more or less distinct agricultural enterprise, and exclude small operations incidental to dairy and general farming. Cattle thus fed are presumed to produce carcasses that will grade good or better.

² Preliminary.

Agricultural Marketing Service.

¹ Excludes slaughter in Hawaii and Virgin Islands beginning 1940. Includes slaughter in war-duration ^a.

^a "Fulmer" plants, 1942-46, representing an increase in the number of federally inspected slaughter plants.

² Includes 3,333,570 cattle in 1934, 186,683 in 1935, and 3,500 in 1936, slaughtered for Government account.

³ Includes 1,376,572 calves in 1934, 39,358 in 1935, and 163 in 1936, slaughtered for Government account.

⁴ Preliminary.

Agricultural Marketing Service.

¹ Includes slaughter in plants to which Federal inspection was extended by the Fulmer Act and in plants operating under limited inspection, 1946.

² Includes Elburn, Ill.

³ Includes Jersey City and Newark, N. J.

⁴ Includes Lincoln, Nebr.

⁵ Includes St. Louis National Stockyards, East St. Louis, Ill., and St. Louis, Mo.

⁶ Includes Newport and St. Paul, Minn.

Agricultural Marketing Service. Compiled from inspection records of the Agricultural Research Service.

¹ Excludes slaughter in Hawaii and Virgin Islands beginning 1947.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 457

¹ Under "Public stockyards" are included stockers and feeders which were bought at stockyards markets. Under "Direct" are included stockers and feeders coming from other States from points other than public stockyards, some of which are inspected at public stockyards while stopping for feed, water, and rest en route.

Agricultural Marketing Service.

¹ Weighted average prices of beef steers, sold out of first hands for slaughter. These grade designations became effective Dec. 30, 1950.

² Grade name was changed to Commercial in 1951. Prices shown are approximate equivalent for present grade, estimated as follows: Weighted average of Good 3, Medium 1, 1935-50; reported as Commercial, 1951 to date.

³ This grade designation became effective Mar. 10, 1951.

¹ Census or estimate for year shown except that end of year estimate (October–December) is included under following year for comparisons and totals.

² Preliminary.

³ 2 to 4 years only.

⁴ Census or estimate for single year.

⁵ Official statistics; may be underestimate of actual numbers.

⁶ During period October–December.

⁷ September.

⁸ October.

⁹ Excludes area north of 38°.

¹⁰ Excluding North Viet-nam.

¹¹ 1934.

¹² Number taxed only.

¹³ April.

¹⁴ French zone.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of United States agricultural attachés and other representatives abroad, results of office research and related information. Estimated totals include allowances for any missing data for countries shown and for other countries not shown.

¹ The number of stockyards reporting varies from 63 to 68.² Total rail and truck receipts.³ Rounded total of complete figures.⁴ Covers receipts at 16 to 30 concentration yards and 11 to 14 packing plants and packer direct purchases at additional loading points in interior Iowa and southern Minnesota. Area of coverage expanded in 1947. Segregated truck receipts are not available.

Agricultural Marketing Service. Compiled from reports received from stockyards companies.

¹ Excludes slaughter in Hawaii and Virgin Islands beginning 1940. Includes slaughter in war-duration or "Fulmer" plants, 1942–46, representing an increase in the number of federally inspected slaughter plants.

² Includes the 6,410,866 pigs and sows purchased for Government account under the emergency hog production control program during Aug. 18–Oct. 6, 1933.

³ Preliminary.

Agricultural Marketing Service.

¹ Includes slaughter in plants to which Federal inspection was extended by the Fulmer Act, 1946.

² Includes Elburn, Ill.

³ Includes Jersey City and Newark, N. J.

⁴ Includes Lincoln, Nebr.

⁵ Includes St. Louis National Stockyards, East St. Louis, Ill., and St. Louis, Mo.

⁶ Includes Newport and St. Paul, Minn.

Agricultural Marketing Service. Compiled from inspection records of the Agricultural Research Service.

¹ 1920–41, cold storage holdings as reported by U. S. Department of Agriculture; 1942 to date, factory and warehouse stocks as reported by Bureau of the Census. 1943–46, 1948, and 1951, includes stocks held or in transit by U. S. Department of Agriculture.

² Includes imports, which were less than 500,000 pounds in all years except 1943 and 1952, when 1 and 7 million pounds, respectively, were imported.

³ Includes lard in tushonks as follows: 20 million pounds in 1943 and 1944, 17 million in 1945, and 7 million in 1946; 1947 to date, includes civilian relief and shipments by CARE.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census and the U. S. Department of Agriculture. Totals and per capita estimates computed from unrounded numbers.

FOOTNOTES FOR TABLE 480

¹ Preliminary.

² Commercial slaughter.

³ Inspected slaughter.

⁴ 1939 for Austria and 1938 for France.

⁵ Inspected commercial slaughter.

⁶ 4 years.

⁷ 2 years.

⁸ Slaughter from domestic sources only.

⁹ Year beginning June 1.

¹⁰ Slaughter in towns of more than 5,000 persons.

¹¹ Great Britain only.

¹² Year ended September 30.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material reports of United States agricultural attachés and other representatives abroad, results of office research and related information.

¹ Includes sheep and lambs in commercial feed lots on feed for market.

² Preliminary.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 492.

¹ Lambs saved during the year.

² Excludes interfarm sales.

³ Includes sheep and lambs shipped in from other States and from central markets but excludes intrastate shipments.

⁴ Preliminary.

⁵ Adjustments were made for sheep and lambs shipped in and changes in inventory.

⁶ No adjustments made for cost of sheep and lambs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of sheep, lambs, mutton, and lamb" plus "Value of sheep and lambs slaughtered for home consumption."

⁷ Includes Government purchases.

Agricultural Marketing Service.

¹ Census or estimate for year shown except that end of year estimate (October–December) is included under following year for comparisons and totals.

² Preliminary.

³ Census or estimate for single year.

⁴ June.

⁵ May.

⁶ 2 to 4 years.

⁷ Official estimates; may be underestimate of actual numbers.

⁸ September.

⁹ March.

¹⁰ Spring.

¹¹ Census, Dec. 31, 1940.

¹² One year old and older.

¹³ During period October–December.

¹⁴ October.

¹⁵ Number taxed only.

¹⁶ Includes goats.

¹⁷ Estimates for former area of Spanish Morocco are for June 1.

¹⁸ Includes animals under 1 year old.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of United States agricultural attaches and other representatives abroad, results of office research and related information. Estimated totals include allowances for any missing data for countries shown and for other producing countries not shown.

¹ The number of stockyards reporting varies from 63 to 68.² Total rail and truck receipts unloaded at public stockyards.³ Rounded totals of complete figures.

Agricultural Marketing Service. Compiled from reports received from stockyards companies.

FOOTNOTES FOR TABLE 493

¹ Excludes interfarm sales.² Includes sheep and lambs shipped in from other States and from central markets but excludes intrastate shipments.³ Adjustments made for cost of sheep and lambs shipped in and changes in inventory.⁴ No adjustments made for cost of sheep and lambs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of sheep, lambs, mutton, and lamb" plus "Value of sheep and lambs slaughtered for home consumption."

Agricultural Marketing Service.

1955.										
1956 *										

¹ Includes sheep shorn at commercial feeding yards.

² Beginning with 1943 the average price is for the marketing season April-March. Prior to 1943 average prices relate to the calendar year.

³ Production multiplied by season average price.

⁴ For years prior to 1943; includes hair of the angora goat, alpaca, and other like animals.

⁵ For years prior to 1942, apparel wool includes all wool except Donskoi, Smyrna, etc., and similar wools without merino or English blood; for 1942 and thereafter, includes all durable wool. For years prior to 1942, carpet wool includes only Donskoi, Smyrna, etc., and similar wools without merino or English blood; for 1942 and thereafter, it includes all duty-free wool.

⁶ Production minus exports plus imports; stocks not taken into consideration.

⁷ Does not include 222,222 pounds in 1942; 275,476,308 pounds in 1943; 2,725,929

pounds in 1944; 5,372,698 pounds in 1945; and 14,840 pounds in 1946, imported free of duty as an act of international courtesy. Wool so imported consisted almost entirely of wool stored in this country for the British Government, and later reexported. This wool was not available to domestic mills.

⁸ Clean content.

⁹ Preliminary.

¹⁰ Weighted average price for wool sold April 1956 through January 1957.

Agricultural Marketing Service. Imports and exports from Foreign Commerce and Navigation of the United States and other reports of the U. S. Department of Commerce.

Table 505.—Wool: Number of sheep shorn, weight per fleece, production, average price per pound received by farmers, and value of sales, by States, average 1945-54, annual 1955 and 1956

¹ Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields. Includes both pulled and shorn, foreign and domestic wool. Wool was considered as consumed (1) on the woolen system when laid in mixes and (2) on the worsted system when entering scouring bowls. From August 1948 forward, consumption on the worsted system is taken as the sum of top and noil production.

² 53 weeks.

³ Preliminary.

⁴ Domestic and duty-paid foreign.

⁵ Excludes wool consumed on the cotton system and in the manufacture of felt, hat bodies, and other miscellaneous products.

⁶ Duty-free foreign.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census.

FOOTNOTES FOR TABLE 506

¹ For summary purposes wool produced mostly in the spring in the Northern Hemisphere is combined with that produced in the season beginning July 1 or October 1 of the same year in the Southern Hemisphere. Pulled wool is included for most countries at its greasy equivalent.

² Preliminary.

³ Converted "pulled" wool to greasy basis at 1.7.

⁴ Includes estimates for Newfoundland, Netherland West Indies, Guatemala, and El Salvador.

⁵ Rounded to fives of millions.

⁶ Includes the Iron Curtain countries (Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Rumania, and Eastern Germany).

⁷ Based on present boundaries.

⁸ Includes estimates for countries producing 2 million pounds or less, namely Belgium, Denmark, Iceland, Sweden, and Switzerland.

⁹ Includes China proper (22 provinces), Manchuria, Jehol, and Sinkiang (Turkestan).

¹⁰ Includes Pakistan.

¹¹ Includes estimates for Afghanistan, Cyprus, Palestine, Transjordan, Outer Mongolia, Tibet, Nepal, and China.

¹² Includes relatively small production in Bolivia, Colombia, Ecuador, Paraguay, and Venezuela.

¹³ Excludes karakul wool; includes Union of South Africa, Union Protectorate, and South West Africa.

¹⁴ Includes estimates for Kenya, French West Africa, and Togo.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of U. S. agricultural attachés and other representatives abroad, results of office research and other information.

FOOTNOTES FOR TABLE 508

¹ Wools grown in the range areas of Washington, Oregon, the intermountain States (including Arizona and New Mexico) and parts of the Dakotas, Nebraska, Kansas, and Oklahoma. These wools vary considerably in shrinkage and color.

² Open market prices except for January 1944–May 1947, which are Commodity Credit Corporation selling prices.

³ Open market prices except for January 1944–August 1948, which are Commodity Credit Corporation selling prices.

⁴ Wools grown east of the Mississippi River and in the farm areas of the Dakotas, Nebraska, Kansas, Oklahoma, Minnesota, Iowa, and Missouri.

⁵ No quotations August 1939–August 1946. London wool auctions were suspended at outbreak of war. Supplies and prices under Government control.

⁶ 10-month average.

Agricultural Marketing Service. Prices for foreign wools from Kreglinger and Fernau market reports.

Total.....	1,842,629	1,808,840	1,971,971	1,861,035	1,976,002	2,243,645

¹ Meats canned under Federal inspection include the largest part of the canned meat produced in the United States. Net product weight; including weight of nonmeat ingredients of products; for civilian use only since July 29, 1951.

² Canned loins and picnics and chopped beef not reported separately prior to January 1955. Canned loins and picnics were probably reported principally in the canned ham category with part being reported as "all other 20 percent or more." Chopped beef was included with luncheon meat prior to January 1955.

³ Liver product and bacon reported separately prior to January 1955, but have been included in "all other 20 percent or more" for years 1951 through 1954.

Agricultural Marketing Service. Compiled from data of the Agricultural Research Service.

¹ Carcass weight equivalent: Dressed weight of cattle, calves, sheep and lambs; pork excluding lard is carcass equivalent weight of hog products minus an allowance for carcass fat rendered for lard. Edible offals are excluded. Beginning 1940, data exclude meat produced in Hawaii and Virgin Islands. Civilian consumption through 1940 is assumed to be the same as total consumption; for 1941 to date, military takings are excluded.

² Includes lard entering into manufacturing products.

Y. *Neurodegenerative conditions for review*

Agricultural Marketing Service

¹ All meats converted to a carcass weight equivalent; includes beef and veal, pork, mutton and lamb, goat and horse meat; excluded live animals, edible variety meat, lard, rabbit, and poultry meat.

² Preliminary.

³ Includes Newfoundland beginning Apr. 1, 1949.

⁴ 1935–39.

⁵ Not available.

⁶ Partially estimated.

⁷ Includes carcass meat equivalent of live cattle exports prior to 1953.

⁸ Western Germany, beginning Oct. 1, 1949.

⁹ 1931–35.

¹⁰ Imports includes edible variety meat.

¹¹ Trade with the free world only. 1946–50 and 1954 through 1956 estimated, imports based on receiving countries reporting by origin except U.S.S.R. in 1946–50, exports based on supplying countries reporting by destination.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of United States agricultural attachés, and other representatives abroad, results of office research and related information. Estimated totals include allowances for any missing data for countries shown and for other countries not shown.

Table 524.—Meat: United States exports and shipments to Territories, and imports into the United States, carcass weight equivalent, 1940–56¹

Year	Exports and shipments to Territories ²				Imports

1955 ⁵	68	1	126	195	222	(4)	2	175	399
1956 ⁵	117	2	138	257	204	(4)	1	151	356

¹ Carcass weight equivalent of all meat, including the meat content of minor meats and of mixed products. Exports exclude shipments for military-civilian feeding in United States occupied areas. Shipments to Territories include shipments to all Territories through 1948, from 1949-51 shipments to Puerto Rico and Virgin Islands, and for 1952 to date shipments to Puerto Rico, Virgin Islands, and Guam.

² Includes exports and shipments to Territories by U. S. Department of Agriculture, 1941-49.

³ Includes boneless beef 1948 to date, as estimated 1948-53, and reported beginning 1954.

⁴ Less than 500,000 pounds.

⁵ Data for 1952 to date are computed with slightly revised conversion factors.

⁶ Apparent reduction from earlier years is due to change in reporting of data.

⁷ Includes beef procured by USDA and shipped abroad by CARE.

⁸ Preliminary.

Agricultural Marketing Service. Data on imports and commercial exports and shipments are computed from records of Bureau of the Census; those on exports and shipments by U. S. Department of Agriculture are separately estimated from deliveries and stocks.

¹ Includes poultry; excludes minor livestock on farms and livestock and poultry not on farms. Animal units for the 6 principal kinds of livestock were added to give the total shown in each column.² The series, animal units of grain and roughage-consuming livestock, is a separate computation in which the total feed (grain, hay, and pasture) used by the average milk cow in a year is one unit. This is a measure of the quantity of all feed consumed by all livestock.³ Preliminary.

¹ Livestock numbers are census data or estimates during year shown except that data for October-December are included in the year following for comparison and totals.

² Includes water buffalo where important.

³ 1936-40.

⁴ 17 countries.

⁵ Data from FAO.

⁶ Excludes Brazil, Netherlands, and Peru.

⁷ Excludes West Germany and Brazil.

⁸ Excludes Brazil.

⁹ Includes horsemeat in addition to other types shown.

¹⁰ All types.

¹¹ Excludes Brazil and Peru.

¹² Excludes Peru.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of agricultural attachés and other United States representatives abroad, results of office research, and other information.

CHAPTER VII

DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks, and consumption of milk and its products. The two distinct series of numbers of milk cows on farms included in this publication should not be confused. One series entitled "Cows and heifers 2 years old and older kept for milk, January 1" is an inventory number of this specific age-sex classification which is estimated as one of the major groups making up the total cattle population at the beginning of the year. The other series, identified as "Milk cows on farms," is an annual average number of milk cows during the year (excluding any not yet fresh) which is used in connection with determining milk production. More animals are represented in the first series than the latter because heifers 2 years of age which have not freshened are included.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or butterfat content as actually sold, while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, cash receipts, and gross income from chickens and eggs; poultry and egg receipts at principal markets; commercial broiler production; turkey production, disposition, cash receipts, and gross income; liquid and dried egg production; and the National Poultry Improvement Plan.

The estimates of chickens and turkeys on farms in census years differ from the census figures to the extent of the seasonal disappearance in numbers from January 1 to the average date of the enumeration. Estimates relating to inventories, production, and income exclude poultry and eggs which are produced on places not classified as farms.

New tables have been added to this chapter on: Estimated value of concentrate rations fed milk cows during the year; percentage of homegrown feeds by kinds used in concentrate rations fed to milk cows; individual feeds fed to milk cows; and "mellorine" production by States.

¹ Italic figures are from the Census. Figures for census years 1870, 1880, and 1890 represent milk cows; 1900, cows kept for milk, 2 years old and over; 1910, cows and heifers kept for milk, born before Jan. 1, 1909 (1½ months and over); 1920, dairy cattle 2 years old and over kept mainly for milk production; 1925, 1930, 1935, 1940, and 1945, number of cows milked in 1924, 1929, 1934, 1939, and 1944; 1950, and 1954, number of milk cows on place at time of census (enumeration). Census dates were June 1 from 1870 to 1900; Apr. 15, 1910; Jan. 1, 1920, and 1925; Apr. 1, 1930; Jan. 1, 1935; Apr. 1, 1940; Jan. 1, 1945; Apr. 1, 1950 and Oct.-Nov. 1954.

¹ Percentages shown are based on reports of rations fed on May 1 and November 1.

² Not of sufficient importance in milk cow rations. Included in regional and United States averages.

³ Less than 10 years. Only includes years when this grain reported fed.

⁴ Less than 0.5 of 1 percent.

Table 543.—Milk cow rations: Estimated value per 100 pounds of concentrate rations fed during the year and value per ton of hay fed to milk cows February 1, in herds kept by dairy reporters, by States, average 1946-55 and 1956

State and division	Value per 100 pounds of concentrate rations fed during the year		Value per ton of all hay fed to milk cows February 1 ¹		State and division	Value per 100 pounds of concentrate rations fed during the year		Value per ton of all hay fed to milk cows February 1 ¹

¹ Reflects variations in value of baled, chopped and loose hay fed, kinds of hay represented, proportion of hay purchased as well as cost of baling and chopping.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 540

¹ Averages for the October-May feeding period, as reported by about 9,000 dairy correspondents.

² In computing hay equivalents, 3 tons of silage or 2 tons of other roughage were considered equal to 1 ton of hay.

³ Seasonal average condition for Apr. 1-Oct. 1 period.

⁴ Includes citrus pulp fed.

⁵ Data insufficient for stable average.

Agricultural Marketing Service.

¹ All counties in the United States and all areas in Puerto Rico and the Virgin Islands are in the modified accredited area. Areas or counties so designated are those in which tuberculosis does not exist among more than 0.5 percent of the cattle as determined by official tuberculin testing and from which all reactors to the test have been removed.

¹ Preliminary.
² Through 1955, includes an allowance for milk produced by cows not on farms, milk shebet, ice milk, and miscellaneous minor frozen products.
³ Includes ice cream, milk shebet, ice milk, and miscellaneous minor frozen products.
⁴ Milk equivalent of butter and condensed milk used in ice cream.
⁵ Includes dry cream, malted milk, dry part skim milk, dry ice cream mix, and cottage cheese.
⁶ Includes net milk equivalent of butter and frozen dairy products to avoid double counting of milk from which fat was reused in making a second dairy product.

⁷ Includes an allowance for fluid consumption on farms not producing milk in addition to the consumption on farms where milk is produced.
⁸ Net movement of whole milk or cream into export or storage channels. A negative figure represents net imports or net out-of-storage movement during the year.
⁹ Residential, including miscellaneous minor uses and any inaccuracies of independently determined production and use items.

Agricultural Marketing Service.

¹ Annual price is simple average of United States prices for 12 months.² Average price for all milk sold at wholesale to plants and dealers, based on reports from milk-market administrators, cooperative milk-marketing associations, whole-milk distributors, and milk-products manufacturing plants. Annual prices, by States, weighted by estimated volume of all milk sold at wholesale to plants and dealers.³ Based on reports of special price reporters. Annual prices, by States, weighted by estimated volume of cream sold.⁴ Dealers' weighted average buying prices (f.o.b. city) for standard grade milk used for city distribution as milk. This series weighted by population of individual markets replaces the series showing straight average prices of all markets reporting (Agricultural Statistics 1955, table 545).⁵ Includes milk for canned condensed milk. Prices f.o.b. factory.⁶ Does not include Government dairy production payments, October 1943–June 1946.⁷ Series discontinued January 1953.⁸ Preliminary.⁹ Price f.o.b. factory or local receiving station, whichever is the customary place for determining prices.¹⁰ Monthly price and butterfat test obtained by weighting together milk for canning, milk for butter and by-products, and milk for American cheese. Annual averages are simple averages of monthly prices.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 558

¹ Milk sold to plants and dealers and retailed by farmers, plus milk skimmed for sale as cream.² Computed from the value of milk and cream sold divided by the quantity of milk or milkfat utilized in preparation of these products for market.³ Milk used for fluid consumption and home-made butter on farms where produced valued at average per unit returns for milk utilized in all forms of sale.⁴ Value of sales of milk and cream plus value of milk used for farm consumption and farm butter churned.⁵ Milk produced on farms valued in each State at average returns per 100 pounds for milk utilized in dairy products sold. In addition to gross income, it includes the value of whole milk fed to calves.

Agricultural Marketing Service.

¹ Preliminary.² Data not available.³ Totals for 1951–56 do not include farm butter sold since this was not estimated separately.⁴ Milk sold at wholesale and retail, plus milk skimmed for sale as cream, and milk equivalent of farm butter sold.⁵ Computed from the value of milk, cream, and farm butter sold divided by the quantity of milk or milkfat used in the preparation of these products for market.⁶ For 1951–56 includes milk used for all butter churned on farms, including a small quantity which was sold but for which separate data were not available.⁷ Milk utilized for household consumption valued in each State at average returns per 100 pounds for milk utilized in dairy products sold.⁸ Value of milk, cream, and farm butter sold, plus the value of these products consumed in the household on farms where produced.⁹ Milk produced on farms valued in each State at average returns per 100 pounds for milk utilized in dairy products sold. In addition to gross income, it includes the value of whole milk fed to calves.

Agricultural Marketing Service.

Table 559.—Farm dairy products: Quantity sold, price, value of sales and farm use, gross income, and farm value, by States, 1956 (preliminary)

¹ In some markets the prices paid for fluid milk and fluid cream are the same. Includes Class I prices, base or basic prices, and flat prices where effective.

² All prices f.o.b. city. Regional and United States prices are weighted by population of individual markets. This series, which begins with 1935, replaces the series showing straight average prices of all markets reporting.

Agricultural Marketing Service. Compiled from reports secured through the cooperation of milk distributors, producers' associations, and municipal officers.

¹ "Standard" refers to the grade of milk commonly sold in each market. Grades may vary from market to market because of variation of the factors which enter into grade determination.

² Changed from New Haven; prices identical at time of change in 1950.

³ Simple average.

Agricultural Marketing Service. Compiled from reports secured through the cooperation of milk distributors, producers' associations, and municipal officers.

Table 564.—Milk: Average price per 100 pounds paid producers by condenseries for milk of actual milk fat content, to be used primarily for evaporated milk, by geographic divisions, 1948-56¹

Year	Middle Atlantic	South Atlantic	East North Central	West North Central	South Central	North- western ²	South- western ³	United States

¹ Not available.² Excluding American full-skim cheese and cottage, pot, and bakers' cheese.³ Cottage cheese curd includes cottage, pot, and bakers' cheese with a butterfat content of less than 4 percent made by reporting plants. Creamed cottage cheese includes cheese with a butterfat content of 4-19 percent. Cottage cheese curd and creamed cottage cheese should not be added together to get a total cottage cheese figure, for while some of the cottage cheese curd is sold direct for consumption without further processing, a considerable part is creamed within the plant or shipped to another plant for creaming prior to sale.

¹ Includes fluid milk equivalent of cream. Data for 1909-23 are rough approximations of consumption rates. Official milk production and utilization estimates have not been developed for this period. The total apparent civilian consumption for the years 1941-56 was obtained by subtracting military takings from total fluid milk use. The per capita civilian consumption rates were obtained by dividing the total apparent civilian consumption by the number of persons eating out of civilian supplies.² Preliminary.

Agricultural Marketing Service.

¹ Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent civilian consumption was obtained by subtracting ending stocks, shipments, exports, and military takings (1941-56) from the total supply. The per capita civilian consumption for each year was obtained by dividing the total apparent civilian consumption by the number of persons eating out of civilian supplies. Production data on most manufactured dairy products were reported by the Bureau of Agricultural Economics beginning around or somewhat before 1920. For years prior to such reporting, the data shown in the above table were interpolated, using as guides information from Census of Manufactures, market receipts data where available, and BAE estimates for later years.

² Includes both farm and factory-made butter.

³ Includes all kinds of cheese except cottage, pot, and bakers' cheese, and full-skim American.

⁴ The evaporated milk is unskimmed, unsweetened, case goods. The condensed milk is unsweetened (plain condensed) unskimmed, bulk goods; and sweetened condensed milk, unskimmed, case and bulk goods.

⁵ Preliminary.

⁶ Exports and change in stocks exceed production by 1 million pounds.

Agricultural Marketing Service.

¹ Includes butter equivalent of ghee and butteroil. ² Preliminary. ³ Includes butter substitutes prior to 1956. ⁴ Less than 500 pounds. ⁵ Less than a 5-year average. ⁶ Estimate based on data for 11 months or less.

⁷ Not available. ⁸ Southern Rhodesia only.

Foreign Agricultural Service. Prepared or estimated from official statistics, reports of Agricultural Attachés and other United States representatives abroad, and other information.

FOOTNOTES FOR TABLE 577

¹ Preliminary.

² Creamery butter only.

³ Production in federally inspected plants only.

⁴ Less than a 5-year average.

⁵ Made from the milk of cows, buffaloes, sheep and goats.

⁶ Made from the milk of cows, sheep and goats.

⁷ Years ending June 30.

⁸ Includes product weight of ghee in those countries where ghee production is common. Excluding Asia and U.S.S.R. and eastern European countries except Yugoslavia.

Foreign Agricultural Service. Prepared or estimated from official statistics, reports of Agricultural Attachés and other U. S. representatives abroad, and other information.

¹ Data on cross-mated flocks are not truly indicative of the situation since in several States birds in such flocks are reported under the respective purebred heading and in some States those flocks are cross-mated only for a portion of the year to produce broilers; for the remainder of the year they are mated as purebreds for the production of purebred chicks.

² Data not available prior to 1951.

Agricultural Research Service.

¹ Commercial broilers are young chickens of the heavy breeds to be marketed at 2-5 pounds live weight and from which no pullets are kept for egg production. These figures are not included in farm production of chickens.

² Includes value of consumption in households of producers, which is less than 1 per cent of total production.

³ Preliminary.

Agricultural Marketing Service.

¹ Commercial broilers are young chickens of the heavy breeds, to be marketed at 2-5 pounds live weight, and from which no pullets are kept for egg production. These figures are not included in farm production of chickens.² Preliminary.³ Includes value of consumption in households of producers, which is less than 1 percent of total production.

¹ Including an allowance for non-farm (back-yard) production.² Through 1932, total poultry less turkeys; thereafter, less turkeys and ducks.³ Beginning 1941, consumption figures apply only to civilian population.⁴ Through 1950, 88 percent of live weight of production; thereafter, 89 percent.⁵ Less than 500,000 pounds.⁶ Computed on basis of approximately 70 percent of live weight of broilers produced, plus 68 percent of live weight of farm and non-farm chickens.⁷ Preliminary.

¹ Number of pounds of poultry ration equivalent in value at local market prices to 1 dozen eggs, or 1 pound of chicken or turkey, live weight. Simple average of monthly ratios.

² Ratios based on price of all chickens, until 1940 when commercial broilers were excluded.

³ Average of prices paid for commercial feed, excluding broiler mash, and prices received by farmers for grain.

¹ From 1935–43 roasters were reported as spring chickens, 4 pounds and over, and fryers were reported as spring chickens under 4 pounds. Both were reported at various weights, but approximately comparable weights were used to obtain these continuous series. Most of the roasters prices are for less than a full year because of the seasonality of production. Fryer and broiler prices prior to 1936 and most broiler prices after 1943 are for less than a full year.

² From daily quotations in the Chicago Price Current, computed by the Bureau of Agricultural Economics.

³ Reported by the Dairy and Poultry Market News Service; Agricultural Marketing Service.

⁴ Not available. Usually combined with fryers.

⁵ Insufficient monthly average price data to compute yearly average.

Agricultural Marketing Service. Unweighted annual average of daily range of prices from Dairy and Poultry Market News Service.

¹ Total pouls hatched less death loss of pouls and young turkeys during the year.

² Death loss during the year of breeder hens on hand Jan. 1.

³ Turkeys raised less death loss during the year of breeder hens on hand Jan. 1.

⁴ Change in Jan. 1 inventory numbers during the year.

⁵ Turkeys consumed in households of farm producers.

⁶ Value of sales plus value of those consumed in households of producers.

Agricultural Marketing Service.

Agricultural Marketing Service.

CHAPTER VIII

FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm practices, and the financial aspects of farming. Many of the series are estimates developed in connection with the research activities of the department. Others are primarily records of operations, such as certain data from agricultural credit agencies.

For convenience, the tables have been arranged in general groups. These groups, with the beginning table indicated, are as follows:

Farm property, table 624.

Population and employment, table 643.

Farm production and distribution, table 648.

Prices and income, table 675.

Costs and expenses, table 690.

Credit and loan programs, table 711.

Stabilization and price support programs, table 740.

New tables are presented on land utilization, pasture and grazing land, farm ownership transfers, number of farm workers, farm mortgage debt, and interest charges on the farm mortgage debt. Tables on silage production and storage replace those on hay and straw handling methods. New tables have been added for the first time on stabilization and loan programs: International Wheat Agreement sales and export payments; export and domestic disposition of commodities by group and type of disposition; realized cost of programs of supporting farm prices and income, national acreage allotments; and Soil Bank acreage and conservation reserve. A table on annual consumption of fertilizer by States has been dropped.

Table 624.—Economic trends: Data relating to agriculture, United States, 1910-56

1925	6,371,640	924,319	48.6	344,549	49,468
1930	6,288,648	986,771	51.8	359,242	47,880
1935	6,812,350	1,054,515	55.4	295,624	32,859
1940	6,096,799	1,060,852	55.7	321,242	33,642
1945	5,859,169	1,141,615	59.9	352,866	² 53,889
1950	5,382,162	1,158,566	60.9	344,399	³ 75,261
1954	4,782,416	1,158,192	60.8	332,870	³ 97,583

¹ Acreages are for preceding year except for 1954. Prior to 1925, this column shows the total acreage of crops for which figures are available, except for 1920, when 14,502,932 acres of corn cut for forage were excluded (most of this was probably duplicated in the acreage of corn harvested as grain). Beginning with 1925, the figures represent the total cropland harvested.

² Estimate derived from the index of farm real estate values applied to 1940 and 1950 Census values. 1945 Census reported a total value of land and buildings of \$46,389 million.

³ Based on sample data from 1950 and 1954 Censuses. The 1954 Census was enumerated in October and November of that year.

Agricultural Research Service. Compiled from reports of Census of Agriculture, Bureau of the Census.

Total.....	1,024	947	979	916	848	844	763	745	746
Grand total ⁸	1,903	1,903	1,903	1,903	1,903	1,905	1,905	1,904	1,904

¹ Compiled from census reports, and publications and records of the former Bureau of Agricultural Economics and public land administering and conservation agencies.

² Total acreages of farmland and nonfarm land are for the calendar year indicated. Except in 1954, acreages of cropland and pastureland usually relate to the preceding year.

³ Cropland used for crops includes cropland harvested, crop failure, and cultivated summer fallow. To find land available for crops in recent years add cropland used for crops, cropland idle or in cover crops, and cropland used only for pasture. In 1949, cropland used only for pasture was 69 million acres. In 1954 it amounted to 66 million acres.

⁴ Grassland pasture consists of all open or nonforested pasture in farms, including cropland used only for pasture in 1945-54, and plowable pasture in earlier years.

⁵ Grazing land not in farms consists of land used chiefly for grazing and includes open or nonforested grazing land, idle grassland in first decades, forest and arid woodland, and shrub and brush grazing land in all years.

⁶ Forest land outside farms not used for grazing excludes forested areas in parks, wildlife refuges, military areas, recreation sites, and arid woodland, brushland, and forest land used for grazing.

⁷ Other land outside farms includes urban, industrial, and residential areas outside farms; parks and wildlife refuges; military lands; roads; railroads; ungrazed desert, rock, swamp, and other unused and waste land.

⁸ Remeasurement of the land area of the United States in connection with the 1950 census indicated an approximate total land area of 1,904 million acres. Total areas previously were reported as 1,905 million acres in 1940 and 1945; 1,903 million acres 1860 to 1935; and 1,884 million acres in 1850.

Agricultural Research Service.

Table 628.—Land utilization: Land in farms and land not in farms, by States, 1954

¹ As of Mar. 1. Rounded totals of unrounded State figures, excluding Columbia. Values for intercensal years are estimates derived from index of land values per acre and adjusted for changes in acreage of land in farms.

² Census of Agriculture.

Agricultural Research Service.

FOOTNOTES FOR TABLE 629

Federal and State rural land used for farming and grazing under lease or permit or otherwise used for farming or grazing. Includes Federal and State land used for farming and grazing which is reported as farms, as well as land not in farms and ranches.

³ Does not include 48 million acres of Indian land used for farming and grazing.
⁴ Less than 500 acres.

Agricultural Research Service.

¹ Includes foreclosures, assignments, bankruptcies, and related defaults.² Includes inheritances and gifts, administrator's and executor's sales, and miscellaneous and unclassified sales.

Agricultural Research Service.

FOOTNOTES FOR TABLE 635

¹ Indexes are based on deposits of member banks of the Federal Reserve System located in places of less than 15,000 population. Annual indexes are simple averages of monthly indexes which are based on average amounts of daily deposits. In preparing indexes for groups of States the amounts of monthly deposits for each State are weighted by the cash farm income of each State in the base period.

² Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, Washington, and Wisconsin.

³ Michigan, Wisconsin, and Minnesota.⁴ Ohio, Indiana, Illinois, Missouri, and Iowa.⁵ North Carolina, South Carolina, Georgia, Alabama, Mississippi, Arkansas, Louisiana, and Oklahoma.⁶ Average of 11 months.⁷ Average of 7 months.⁸ Mississippi, Arkansas, and Louisiana.⁹ North Dakota, South Dakota, Nebraska, and Kansas.¹⁰ Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, and Nevada.

¹ Revised.² Includes all crops held on farms for whatever purpose and crops held off farms as security for Community Credit Corporation loans. The latter on January 1, 1957, totaled \$1,058 million.³ Postulated valuation for 1940, plus purchases minus depreciation since then.⁴ Includes loans held and loans guaranteed. Although these are noncourse loans, they are included as liabilities because borrowers must either repay in cash or deliver the commodities on which they were based. The values of the underlying commodities are included among the assets; hence the loans must be included as liabilities to avoid overstating the amount of proprietors' equities.⁵ Loans of all operating banks, the production credit associations, and the Farmers Home Administration, and discounts of the Federal intermediate credit banks for agricultural credit corporations and livestock loan companies.⁶ Loans and credits extended by dealers, merchants, finance companies, individuals, and others. Estimates based on fragmentary data.

Agricultural Research Service.

¹ Including rice and alfalfa threshers in 1935 and thereafter.² Row cultivators, tractor-drawn or mounted; beet or field cultivators not included.³ Census was not taken.⁴ 1941 and later figures for milking machines include only the number of vacuum-pump units for stationary and portable milking machines. Figures for previous years combine the single and double milker units, and the vacuum-pump units.

¹ Simple averages of monthly employment during the last full calendar week ending at least 1 day before the end of the month.

² Includes farm operators doing 1 or more hours of farm work and members of their families working 15 hours or more during the survey week without cash wages.

³ Includes all persons doing 1 or more hours of farm work during the survey week for pay.

Agricultural Marketing Service.

¹ Data relate to persons 14 years of age and over in the civilian noninstitutional population at or near the end of the year. This series differs from the hired workers series shown in Table 645 which gives an annual average based on employment during the last week of each month. Comparable estimates not available for 1953. No survey taken in 1955.

Agricultural Marketing Service. Based on data from enumerative sample surveys made by the Bureau of the Census for the Agricultural Marketing Service.

¹ Includes harvested acreage of 43 crops for which separate planted estimates are not available. See footnote 6 in table 649.

² Count of 59 crops based on crops included from 1949-53. These are: all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, dry field peas, soybeans for beans, cowpeas for peas, peanuts picked and threshed, sorgo for sirup, sugarcane, sugar beets, potatoes, sweetpotatoes, tobacco, broomcorn, artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honey ball melons, honey dew melons, kale, lettuce, onions, green peas, green peppers, pimientos, shallots, spinach, tomatoes, and watermelons. Honey ball melons were dropped in 1954 and pimientos in 1956. In early years fewer crops were being estimated but the addition or dropping of crops generally has little effect on the total. Red clover seed, alsike clover seed, lespedeza seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage.

³ Preliminary.

¹ Includes acreage planted in preceding fall for harvest in the year shown.² Grain and sweet sorghums for all uses, including sirup.³ Acreage seeded in preceding fall.⁴ Preliminary.⁵ Acreage in cultivation July 1.

⁶ Count of 43 crops based on crops included from 1949-53. These are: rye, hay, sweetclover seed, timothy seed, soybeans for beans, cowpeas for peas, peanuts picked and threshed, tobacco, sugarcane, broomcorn, and 29 commercial vegetables [11 for processing: asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes; 28 for fresh market: artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honey ball melons, honey dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons]. Honey ball melons were dropped in 1954 generally has little effect on the total. Alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts picked and threshed, has been deducted. The harvested instead of the planted acreage of rye is included because most of the rye acreage not harvested is planted to other crops or used for pasture. Excludes grains cut for hay because part of the acreage shown as planted to wheat, oats, and barley is included in grain hay.

⁷ Includes crops listed separately in this table, plus those mentioned in footnote 6. (Sorghums counted as 3 crops—grain, forage, and sirup.)

¹ Preliminary.² Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes. Estimates for pimientos discontinued beginning with the 1956 crop.³ Count of 28 crops based on crops included from 1949-53. These are: artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honey ball melons, honey dew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Honey ball melons were discontinued beginning with the 1954 crop. In early years fewer crops were being estimated, but the addition or dropping of crops generally has little effect on the total. Excludes farm gardens. Acreage for harvest, including mature acreage abandoned or only partially harvested because of low prices or other economic factors.⁴ Totals are for crops shown in preceding columns. Alfalfa seed, red clover seed, alsike clover seed, and lespedeza seed are included in the count of crops, but the acreage is not included because mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts picked and threshed, has been deducted. Other crops not included are hops, spelt, hemp, velvetbeans, various legumes and other crops harvested by livestock, minor crops, and fruits and nuts. The acreages shown include some crops harvested in succession from the same land.⁵ Apples (all apples, 1929-33; in commercial areas only, 1934-56), peaches, pears, grapes, cherries, plums, prunes, apricots, figs, nectarines, olives, avocados, cranberries, dates, persimmons, pomegranates, oranges (including tangerines), grapefruit, lemons, limes, walnuts, almonds, and filberts.

Agricultural Marketing Service.

Total 79 crops ¹⁴									

¹ Preliminary.
² Includes acreage seeded in preceding fall.

³ Acreage seeded in preceding fall.
⁴ Acreage in cultivation July 1.

⁵ Bats of 100 pounds (cleaned).

⁶ Acres grown alone, plus $\frac{1}{2}$ the interplanted acres.
⁷ All purposes.

⁸ Averages 1949-54.
⁹ 1,000 trees tapped.

¹⁰ Includes some quantities not harvested.
¹¹ Fresh basis.

¹² For breakdown between fresh market and processing, see individual crop tables.
¹³ Includes fresh market production equivalent tons in the shell and processing production equivalent tons shelled.
¹⁴ Includes crops listed in footnote 2, table 648. Farm value also includes apples, (commercial crop), peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, all prunes, apricots, figs, olives, almonds, walnuts, pecans, maple products, and hops.

¹⁵ Total values do not include revisions made after December 1956 which are shown in this table.

Agricultural Marketing Service.

¹ Production of livestock and livestock products for human use, horses and mules excluded.

² Includes clippings, wool, mohair, and for 1940 to date, honey and beeswax. These items are not included in the separate groups of livestock and products shown.

³ Cattle and calves, sheep and lambs, and hogs.

⁴ Butter, butterfat, whole milk, retail milk, and milk consumed on farms.

⁵ Chickens, eggs, commercial broilers, chickens, and turkeys.

⁶ Includes production of hay, seeds, pasture, and cover-crop seeds, and some miscellaneous crop production not included in separate groups of crops shown. Coverage of production of seed and miscellaneous crops is more complete from 1940 to date than for prior years.

⁷ All corn, oats, barley, and sorghum grain.

⁸ All hay, sorghum forage, and for 1940 to date, sorghum silage.

⁹ All wheat, rye, buckwheat, and rice, sweetpotatoes, dry edible beans, dry field peas, truck crops for processing, and farm gardens.

¹⁰ Potatoes, sweetpotatoes, dry edible beans, dry field peas, truck crops for fresh market, and farm gardens.

¹¹ Fruits, berries, and tree nuts.

¹² Sugar beets, sugar cane for sugar and seed, sugarcane syrup, sorghum syrup, maple sugar, and maple syrup.

¹³ Cotton lint and cottonseed.

¹⁴ Soybeans, peanuts picked and threshed, peanuts hogged, flaxseed, and for 1940 to date, tung nuts.

¹⁵ Italy and concentrates only.

¹⁶ Preliminary.

Agricultural Research Service.

1956 ⁷	326	53	8	1	264	1,57	168	

¹ Acreages for producing export products and horse and mule feed include acreages used to produce the seed used to grow the crops exported and the feed used to produce export livestock products and to keep horses and mules.

² Area in crops harvested (excluding duplication) plus acreages in fruits, tree nuts, and farm gardens.

³ Acreages for crop exports from 1919 to 1939 relate to exports for year beginning July 1, or month representing beginning of crop season. Acreages for producing livestock exports from 1919 to 1939 relate to livestock products exported during the specified year, beginning July 1. Acreages for crop exports and lend lease, beginning with 1940, are for calendar years as are livestock exports and lend lease.

⁴ Feed computations for farm horses and mules assume decreasing quantities of grain per head since 1920 and decreasing quantities of hay per head since 1940. From 1931 on, the acreage required to feed all nonfarm horses and mules has been rounded to 1 million acres.

⁵ Includes products used by our military forces in this country and abroad, and by our domestic civilian population.

⁶ Includes persons in our military forces in this country and abroad.

⁷ Preliminary.

Agricultural Research Service.

FOOTNOTES FOR TABLE 656

¹ Covers food and nonfood farm commodities. Relationships were developed from quantitative data on supply and use of unprocessed and processed farm commodities multiplied by average prices in 1947-49. All values were adjusted to farm values.

² Includes seed, feed, industrial alcohol, alcoholic beverages, etc.

³ Excludes deliveries for export of the U. S. Department of Agriculture.

⁴ Deliveries of the U. S. Department of Agriculture plus change in USDA stocks. Represents net quantities withdrawn from commercial channels.

⁵ Includes civilian feeding in areas occupied by our Armed Forces.

⁶ Federal Farm Board exports.

⁷ Preliminary.

Agricultural Marketing Service.

¹ Total persons supplied with agricultural products from United States farm production divided by farm employment. Total persons supplied in the United States is obtained by dividing value of farm production minus value of agricultural exports by per capita level of support. Total persons supplied abroad is calculated by dividing value of United States agricultural exports by per capita level of support in the United States. Per capita level of support is derived by dividing total population into value of farm production minus value of agricultural exports plus value of agricultural imports.

² Includes persons in our military forces in this country and abroad.

¹ Reports of cooperatives are included either for the calendar year or for fiscal years ending between July 1 of the calendar year shown and June 30 of the following calendar year, with limited exceptions.

² Includes independent local cooperatives, centralized cooperatives, and federations of cooperatives. Cooperatives are classified according to their major activity. If, for example, more than 50 percent of a cooperative's business is derived from marketing activities, it is included as a marketing cooperative. Prior to 1950 total dollar volume of the marketing cooperatives was classified as marketing business even though portion of this volume was derived from handling supplies or performing services for patrons. Similarly, the total volume of arm supply cooperatives was classified as farm supply business even though a portion of their business originated from the sale of various farm commodities or from performing trucking and other services for patrons. In 1950, the method of reporting was revised so that cooperatives reported sales of each major commodity marketed, the value of each major type of supply purchased, and receipts from major types of services performed for patrons. Beginning with 1950, the total marketing volume, therefore, consists only of the value of products actually marketed and farm supply volume consists only of the value of individual supplies purchased.

³ In 1950 a separate category was set up for cooperatives whose major activity is providing services related to marketing and farm supply activities.

⁴ Includes members (those entitled to vote for directors) but does not include nonvoting patrons. (Some duplication exists because some farmers belong to more than one cooperative.)

⁵ Charges for services in which no duplication occurs.

⁶ Includes the value of farm supplies sold to or purchased for patrons and service receipts for cooperatives rendering essential services either in marketing or farm supply purchasing. See Agricultural Statistics 1953, page 588, footnote 6, for additional information.

⁷ The estimated gross business figures for 1950-51 and subsequent years cannot be compared with the estimated business for previous years because in previous figures not all of the supply sales at the wholesale level for other cooperatives or terminal market sales for local cooperatives were included. Estimated gross business, however, includes all business reported between cooperatives, such as the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local cooperatives.

⁸ The estimated net business figures for 1950-51 and subsequent years cannot be compared with the estimated business for previous years because previous figures included some supply sales at the wholesale level for other cooperatives and some terminal market sales for local cooperatives. Estimated net business represents the value at the first level at which cooperatives transact business for farmers. It does not include the wholesale business of farm supply cooperatives with other cooperatives or terminal market sales for local cooperatives.

⁹ Preliminary.

Farmer Cooperative Service. Based on records from cooperatives reporting to the Service.

Trucking, cotton ginning, storage, grinding, locker plants, miscellaneous.....	³ 4,802	⁴ 195,479	⁴ 195,479
Total.....	³ 9,887	12,456,349	9,626,258

¹ Represents value at the first level at which cooperatives transact business for farmers. Does not include wholesale business of farm supply cooperatives with other cooperatives or terminal market sales made by regional cooperatives for local associations.

² Includes forest products, fur pelts, hay, hops, nursery stock, tung oil, and other farm products not separately classified.

³ Because many cooperatives do more than one type of business, these totals are less than the number that would be obtained by adding the number of cooperatives handling individual items or performing individual services.

⁴ Charges for services in which no duplication occurs.

Farmer Cooperative Service. Based on records from cooperatives reporting to the Service.

FOOTNOTES FOR TABLE 669

¹ Includes cooperatives doing business in States other than those in which their headquarters are located and cannot be totaled because of duplication.

² Represents value at the first level at which cooperatives transact business with farmers. Does not include wholesale business of farm supply cooperatives with other cooperatives or terminal market sales made by regional cooperatives for local associations.

Farmer Cooperative Service.

Table 671.—Farmers' cooperatives: Types, number, and memberships, United States

Type	Year or date of data	Associations	Estimated memberships or participants
Marketing and farm supply:		Number	Number
Marketing	1954-55	¹ 6,316	4,212,890
Farm supply	1954-55	² 3,344	3,322,360
Miscellaneous services ³	1954-55	⁴ 227	67,880
Services:			
National farm loan associations ⁵	June 30, 1957	1,052	⁶ 367,293
Production credit associations ⁶	June 30, 1957	497	481,485
Banks for cooperatives ⁷	June 30, 1957	13	⁷ 3,074,444
Rural credit unions	Jan. 1, 1957	490	133,963
Rural electric cooperatives	June 30, 1957	906	4,153,820
Rural health cooperatives ⁸	June 30, 1956	17	179,694
Farmers' mutual fire insurance companies	1955	1,700	3,000,000
Production:			
Mutual irrigation companies ⁹	1950	9,374	137,880
Dairy herd improvement associations	Jan. 1, 1957	1,700	41,638
Dairy-cattle artificial breeding associations	Jan. 1, 1957	¹⁰ 56	480,000

¹ When associations marketing farm products but principally engaged in providing some other services are included, the total is 7,098.

² When associations purchasing farm supplies but principally engaged in providing some other services are included, the total is 7,208.

³ Includes general trucking, storage, grinding, locker plant, and other services.

⁴ When associations providing miscellaneous services but principally engaged in marketing or farm supply activities are included, the total is 4,802.

⁵ Includes Puerto Rico.

⁶ Represents the number of Federal Land Bank loans outstanding.

⁷ Estimated members of associations borrowing from banks for cooperatives.

⁸ Estimate of number of associations in which farmers have controlling interest.

⁹ Seventeenth Census of the United States, 1950; estimated membership from Sixteenth Census of the United States, 1940.

¹⁰ Number of cooperative bull studs.

Farmer Cooperative Service.

Table 672.—Purchase and indemnity operations: Obligations to encourage the exportation and domestic consumption of agricultural commodities, 1955-56

Commodity	Year beginning July 1, 1955	Year beginning July 1, 1956	Commodity	Year beginning July 1, 1955	Year beginning July 1, 1956
Direct distribution (purchases):			Indemnity payments:

1956	97.66	61.40	36.26	63	41.39	7.37	34.22	18

¹ These estimates are for a market basket containing quantities of farm food equal to the average annual purchases per wage-earner and clerical-worker family in 1952. The market basket contains 7 groups of commodities. Additional information concerning the contents of the market basket and methods of estimating market-basket data are given in "Farm-Retail Spreads for Farm Products," U. S. Dept. Agr. Misc. Pub. 741, 1957.

² Retail costs are calculated from retail prices published by the Bureau of Labor Statistics.

³ The farm values, or payments received by farmers for products equivalent to the foods in the market basket, are calculated from prices received by farmers. The farm values of processed products are adjusted by subtracting imputed values of byproducts. Payments to producers under provisions of the Sugar Act are not included. They amount to about 40 cents for sugar in bakery products and not more than 63 cents for sugar in the miscellaneous products group—a little more than \$1.00 for the market basket.

⁴ The farm-retail spread is the difference between retail cost and farm value. Taxes paid by sugar manufacturers on the quantity of sugar in the market basket amount to about 66 cents each year.

Agricultural Marketing Service. Not comparable with data published in earlier issues of Agricultural Statistics.

¹ The retail-cost estimates represent the cost at retail-store prices of all domestic farm foods that were both sold by farmers and bought by civilian consumers in this country. Farm food products sold in the form of meals are included but are valued at what the food would have cost in retail stores. Farm value is adjusted to eliminate imputed value of nonfood by-products. The marketing bill, or total marketing margin, is equal to the difference between the farm value and retail cost except for the years 1932-35 and 1943-46 in which the marketing bill for some groups is adjusted for processor taxes or Government payments to processors.

² Includes vegetable-oil products, sugar, and other miscellaneous food products in addition to the five commodity groups shown separately.

³ The estimated farm values of milk, eggs, fruits, lard, and vegetable shortening used in bakery products were deducted from the farm values of other commodity groups and added to the farm value of the bakery and cereal products group.

⁴ Preliminary.

Agricultural Marketing Service.

¹ Season average prices for crops and wool; weighted calendar year averages for livestock and livestock products other than wool. Unless otherwise noted these are averages for marketing season or calendar year computed by weighting State prices by quantities sold, or by production for those commodities for which virtually all of the production is sold.

² Effective parity prices as computed currently using base prices in effect and indexes for months indicated. Parity prices shown are those used in connection with a price support determination when applicable, otherwise the parity price based on data for the month preceding the start of the crop marketing season for crops and for December of the previous year for livestock and livestock products.

³ Preliminary.

⁴ Following year.

⁵ Types 42-46 and 51-56 included in base period price.

⁶ Weighted calendar year averages.

⁷ Previous year.

⁸ State prices weighted by production to obtain United States average.

⁹ Average local market price for wool sold; does not include incentive payment to bring season average return to 62 cents per pound.

¹⁰ December 1 price.

¹¹ Equivalent on-tree returns for all methods of sale.

¹² Season averages relate to all methods of sale. Parity prices are primarily for fresh use.

¹³ Equivalent per unit returns for bulk fruit at first delivery point.

¹⁴ Prices for fresh use for important processing States and average prices for all methods of sale for other States.

¹⁵ Packing-house door returns for fresh consumption for Pacific Coast States, average prices for fresh use for New York and Michigan, and average prices for all methods of sale for other States.

¹⁶ Includes California dried prunes.

¹⁷ Prices include average Government payments to farmers authorized by the Sugar Acts.

¹⁸ Continental United States only. ¹⁹ December 1 prices for all States except Louisiana which is a season average.

²⁰ Shelled basis. ²¹ Simple calendar year average. ²² Sold by farmers directly to consumers.

Agricultural Marketing Service.

¹ This summary indicates the average prices at which the Commodity Credit Corporation has supported agricultural commodities during the marketing year beginning in the year shown. The mandatory commodity group indicates only those commodities for which support was mandatory during 1957. The summary excludes gum naval stores and some crops which have not been supported in recent years.

² Basis $\frac{1}{4}$ -inch middling.

³ Limited to dark-fired (type 22) tobacco.

⁴ Adjusted type support level not available.

⁵ Average support price for year not available.

⁶ Support levels were as follows: April 3, 1941-Aug. 28, 1941, \$8.33; Aug. 29, 1941-Nov. 26, 1942, \$8.29; Nov. 27, 1942-April 9, 1943, \$12.60; Oct. 1, 1946-March 31, 1947, \$13.00; April 1, 1947-Sept. 30, 1947, \$14.90; Oct. 1, 1947-March 31, 1948, \$15.50; April 1, 1948-Sept. 30, 1948, \$16.20; Oct. 1, 1948-March 31, 1949, \$16.40; April 1, 1949-Sept. 30, 1949, \$16.10; Oct. 1, 1949-March 31, 1950, \$15.80.

⁷ Loan rates, also supported by purchase program. Beginning purchase price, 1944, \$0.2085; 1945, \$0.2090. Purchase price was increased five points each month, for seven months in 1944 and for ten months in 1945.

⁸ Loan rates were not announced even though support was mandatory, because prices were considerably above support.

⁹ Support levels were as follows: 1942, \$0.76-\$0.81; 1943, \$1.01-\$1.09; 1944, \$1.09-\$1.10; 1946, \$1.15-\$1.23; 1947, \$1.42-\$1.53; 1948, \$1.65-\$1.67. Lower support level applied to early and intermediate crop; higher support level to late crop.

¹⁰ Average support shown is for commercial area only. Support outside commercial area was 75 percent of the rate that would reflect the U. S. average level, except that in 1956 it was 82.5 percent for corn. In 1956 a support rate of \$1.25 was in effect for farmers in the commercial area who were not in compliance with acreage limitations.

¹¹ Commercial area only, for compliance with acreage limitations; for noncompliance-\$1.10; support outside commercial area was \$1.27 per bushel.

Table 679.—Wholesale prices: Index numbers, by groups of commodities, United States, 1926-56

Agricultural Marketing Service. Compiled from reports of the Bureau of Labor Statistics. Beginning January 1947, data represent the revised sample and the 1947-49 weighting pattern. Prior to January 1947 index is based on the month-to-month movement of the various individual products price series included in the former index. Data for 1909-51 on the 1910-14 base published in Agricultural Statistics 1952, table 695.

PRICES RECEIVED BY FARMERS

571

Table 680.—Prices received by farmers: Index numbers by groups of commodities and ratio of prices received to prices paid by farmers, United States, 1910-56

[1910-14=100]

Year	Food grains	Feed grains and hay	Cotton	Tobacco	Oil-bearing crops	Fruits	Commercial vegetables for fresh market	Potatoes, etc. ¹	All crops	Meat animals ²	Dairy products ²	Poultry and eggs	Wool	Livestock and livestock products ²	All farm products	Ratio of prices re- ceived to prices paid by farmers ³

¹ Potatoes, sweetpotatoes, and dry edible beans.² Wartime subsidy payments made to producers under programs designed to maintain ceiling prices as established under the Emergency Control Act of 1942 are included for the period July 1945-June 1946 on beef cattle, sheep and lambs, and for the period October 1943-June 1946 on wholesale milk, retail milk, and butterfat.³ Includes interest, taxes, and wage rates. This ratio will not necessarily be identical to a weighted average percent of parity for all farm products largely because, pursuant to law, parity prices for some commodities are on a transitional basis.⁴ Preliminary.

Agricultural Marketing Service. The price series for individual commodities are averages for all classes and grades of the commodity being sold in local farm markets on or about the 15th of each month. In computing the group indexes, prices of individual commodities have been weighted by average quantities sold during 1937-41.

1956 ³	268	317	200	274	403	304	278	264	150	421

¹ The overall index is known as the Parity Index which is the Index of Prices Paid by Farmers including Interest, Taxes, and Wage Rates.

² Simple average of quarterly indexes seasonally adjusted.

³ Preliminary.

Table 682.—Prices paid by farmers: Prices, by commodities, United States, average 1947-49, annual 1953-56¹

Commodity and unit	Average 1947-49	1953	1954	1955	1956
	Dollars	Dollars	Dollars	Dollars	Dollars
Food:					
Round steak, per pound.....	.0747	.0784	.0772	.0776	.0770
Hamburger (beef), per pound.....	.455	.472	.418	.412	.406
Bologna, per pound.....	.482	.519	.502	.488	.481
Bacon, sliced, per pound.....	.631	.702	.708	.552	.502
Salt pork, per pound.....	.415	.413	.418	.357	.345
Fat back, per pound.....	.276	.274	.277	.237	.229
Ham, whole, per pound.....	.664	.697	.692	.613	.604
Pork chops, per pound.....	.636	.729	.740	.669	.662
Pork sausage, per pound.....	.507	.527	.508	.436	.450
Lard, per pound.....	.273	.211	.254	.199	.200
Vegetable shortening, per pound.....	.380	.311	.325	.321	.329
Salad dressing, per pound.....	.353	.324	.332	.324	.318
Peanut butter, per pound.....	.368	.444	.462	.496	.492
Margarine, per pound.....	.396	.290	.294	.282	.284
Milk, fluid, per quart.....	.194	.228	.223	.227	.234
Milk, evaporated, per 14½ ounce can.....	.140	.147	.141	.143	.148
Butter, packaged, per pound.....	.784	.777	.714	.708	.731
Cheese, American, per pound.....	.554	.594	.567	.561	.570
Eggs, per dozen.....	.595	.614	.495	.558	.536
Flour, per 25-pound sack.....	1.98	2.09	2.12	2.14	2.12
Bread, white, loaf, per pound.....	.132	.162	.169	.173	.179
Macaroni, packaged, per pound.....	.187	.215	.225	.229	.234
Wheat flakes, packaged, per pound.....	.266	.311	.314	.319	.321
Soda crackers, packaged, per pound.....	.248	.262	.270	.272	.279
Corn meal, per pound.....	.0687	.0807	.0752	.0740	.0709
Corn flakes, packaged, per pound.....	.224	.290	.290	.291	.293
Rolled oats, packaged, per pound.....	.121	.138	.139	.142	.147
Rice, packaged, per pound.....	.185	.192	.182	.181	.180
Baking powder, canned, per pound.....	.180	.222	.224	.228	.232
Salmon, pink, per 16 ounce can.....	.548	.530	.520	.565	.617
Corn, canned, per pound.....	.149	.178	.168	.162	.170
Peas, canned, per pound.....	.144	.174	.176	.178	.179
Beans, dry, Navy, per pound.....	.163171	.159
Potatoes, Irish, per 10-pound bag.....	.516	.477	.481	.500	.597
Cabbage, per pound.....	.0635	.0672	.0642	.0710	.0711
Lettuce, per head.....	.158	.172	.172	.196	.186
Tomatoes, fresh, per pound.....	.215	.259	.237	.250	.289
Apples, per pound.....	.123	.156	.155	.153	.153
Bananas, per pound.....	.162	.170	.173	.174	.173
Grapefruit, each.....	.0667	.0899	.0866	.0910	.0956
Lemons, 360's, per dozen.....	.486	.523	.499	.493	.524
Oranges, 216's, per dozen.....	.419	.451	.492	.450	.509
Sugar, per 10-pound bag.....	.988	1.06	1.04	1.04	1.05
Sirup, table, per pound.....	.137	.155	.160	.161	.168
Candy, non-chocolate, without nuts, per pound.....	.352	.326	.326	.329	.334
Coffee, per pound.....	.522	.897	1.11	.924	.994
Tea, Orange Pekoe, packaged, per pound.....	1.12	1.27	1.33	1.53	1.59
Tobacco:					
Smoking tobacco, packaged, per pound.....	1.03	1.14	1.16	1.16	1.16
Cigarettes, per package of 20.....	.186	.222	.222	.227	.232
Clothing and yard goods:					
Men's clothing:					
Overalls, bib, per pair.....	3.13	3.39	3.34	3.32	3.43
Shirts, cotton, work, each.....	1.79	1.82	1.83	1.84	1.92
Undershirts, sleeveless, each.....	.604	.624	.635	.640	.659
Shorts, per pair.....	.724	.750	.762	.768	.785
Union suits, heavy, cotton, each.....	2.28	2.61	2.69	2.63	2.70
Gloves, canvas, work, per pair.....	.347	.358	.355	.352	.360
Jackets, leather, each.....	19.80	21.40	21.20	20.60	20.90
Jackets, wool, each.....	9.26	11.70	12.10	12.40	13.30
Socks, cotton, work, per pair.....	.264	.296	.302	.304	.312
Shoes, work, per pair.....	5.82	6.78	6.93	6.98	7.33
Boots, rubber, knee-length, per pair.....	5.01	6.05	6.14	6.26	6.57
Suits, wool, 1 pair pants, each.....	39.30	42.10	42.30	42.40	42.70
Trousers, extra, woolen, per pair.....	9.91	10.90	11.00	11.00	11.00
Trousers, cotton, per pair.....	3.41	3.87	3.88	3.85	3.96
Shirts, broadcloth, each.....	2.97	2.94	2.98	3.01	3.06
Overcoats, all wool, each.....	33.40	37.90	37.70	37.80	38.50
Hats, felt, each.....	5.78	5.81	5.83	5.97	6.40
Shoes, dress, per pair.....	7.49	8.44	8.63	8.70	8.98
Overshoes, rubber, per pair:					
With buckles or zipper.....	4.65	5.26	5.31	5.50	5.74
Without buckles or zipper.....	2.37	2.63	2.84	2.93	3.07
Boys' clothing:					
Suits, wool, 6-12 years, each.....	14.30	16.40	16.80	16.90	17.40

Spiketooth harrows, steel bar, per section.....	19.70	28.20	28.40	29.30	31.80

Table 682.—Prices paid by farmers: Prices, by commodities, United States, average 1947-49, annual 1953-56¹—Continued

Commodity and unit	Average 1947-49	1953	1954	1955	1956
	Dollars	Dollars	Dollars	Dollars	Dollars
Farm machinery—Continued					
Cultivators, 2-row, tractor, each	195.00	253.00	253.00	262.00	273.00
Manure spreaders, 2-wheel rubber tires, each	332.00	423.00	428.00	438.00	458.00
Corn planters, 2-row, plain, each	148.00	223.00	231.00	234.00	238.00
Grain drills, tractor-drawn, 12-tube, each	332.00	484.00	482.00	485.00	510.00
Grain drills, tractor-drawn, 20-tube, each	475.00	674.00	674.00	684.00	722.00
Mowers, tractor, 7 ft., each	235.00	312.00	316.00	318.00	338.00
Hay rakes, side delivery, each	236.00	365.00	369.00	384.00	414.00
Pick-up balers, automatic tie, P.T.O., each					1,710.00
Combines, self-propelled, 12 ft., each	4,310.00	5,420.00	5,400.00	5,520.00	5,820.00
Combines, auxiliary engine, 12 ft., cut, each	2,580.00	3,380.00	3,460.00	3,540.00	3,640.00
Combines, 5-6 feet cut, P.T.O., each	1,140.00	1,480.00	1,500.00	1,500.00	1,580.00
Forage harvester, row crop, each		1,680.00	1,680.00	1,750.00	1,770.00
Corn picker—huskers, 2-row, each	1,210.00	1,530.00	1,540.00	1,670.00	1,840.00
Hammer mills, each	174.00	206.00	208.00	219.00	242.00
Cream separators, electric, each:					
551 pound capacity	128.00	150.00	152.00	154.00	160.00
750 pound capacity	188.00	230.00	236.00	245.00	256.00
Single milker units, each	96.90	116.00	116.00	119.00	121.00
Milker pumping installations, each	135.00	160.00	159.00	162.00	166.00
Farm wagons, for rubber tires, less tires, each	143.00	157.00	160.00	163.00	171.00
Power sprayers, boom type, tr. mtd., each	147.00	188.00	188.00	183.00	188.00
Gas engines, 1½ horsepower, each	88.60	67.60	65.20	64.30	64.60
Electric motors, ¼ horsepower, each	22.10	19.20	19.20	19.40	20.00
Farm supplies:					
Axes, each	3.31	4.52	4.84	5.37	5.91
Hammers, each	1.84	2.46	2.62	2.86	3.13
Pitchforks, 3-time, each	1.81	2.51	2.66	2.83	3.06
Pitchforks, 4-time, each	2.18	2.96	3.14	3.37	3.72
Hoes, each	1.28	1.83	1.93	2.03	2.14
Scythes, each	4.78	6.01	6.06	6.20	6.40
Hand sprayers, each	7.77	8.66	8.72	8.72	8.88
Milk cans, each	8.24	11.40	11.80	12.20	12.60
Milk pails, each	1.30	1.78	1.79	1.85	2.01
Brooders, oil burning, each	24.20	30.00	29.60	30.90	33.20
Brooders, electric, each	38.40	45.40	44.60	45.00	46.50
Rope, manila, per pound	.544	.710	.699	.704	.705
Bindet twine, per pound	.250	.319	.280	.249	.231
New baskets, round stave, bushel, with cover, per dozen	3.53	4.16	4.07	4.01	4.40
Horse collars, leather, each	8.99	9.40	9.12	9.02	9.32
Lead arsenate, per pound	.315	.375	.363	.360	.361
Paris green, per pound	.545	.618	.614	.616	.680
Calcium arsenate, per pound	.142	.136	.133	.123	.125
Fertilizer:					
Mixed fertilizer:					
0-20-20, per ton		65.20	65.00	64.10	63.20

6-8-8, per ton		47.30	45.30	44.40	43.00
10-20-0, per ton		86.00	88.50	84.80	82.60
Nitrate of soda, per ton	60.30	67.80	64.00	62.60	62.20
Sulphate of ammonia, per ton	68.00	69.80	68.40	66.00	61.80
Ammonium nitrate, per ton		89.00	91.40	88.10	83.40
Superphosphate, 18% P ₂ O ₅ , per ton	27.50	30.20	29.60	30.00	30.40
Superphosphate, 20% P ₂ O ₅ , per ton	31.20	34.40	34.80	35.00	35.20
Superphosphate, 45% P ₂ O ₅ , per ton		77.00	78.00	77.70	76.70
Phosphate rock, per ton		21.60	21.60	21.10	21.30
Ammonium phosphate, 16-20, per ton		95.40	95.40	93.40	91.90
Muriate of potash, per ton	55.50	55.60	53.40	51.90	51.40
Agricultural limestone, per ton	3.75	4.11	4.14	4.20	4.34
Livestock:					
Feeders and stockers:					
Cattle and calves, per 100 pounds	21.50	17.00	17.90	17.70	16.00
Lambs, per 100 pounds	22.80	18.90	18.80	18.40	18.40
Hogs, per 100 pounds	23.40	22.80	23.30	16.70	15.60
Baby chicks, straight run, per 100	15.40	16.50	15.60	15.40	15.00
Turkey poult, each	.797	.663	.620	.618	.638
Feed:					
Alfalfa, hay, baled, per ton	33.50	35.50	34.40	33.70	32.50
Other hay, baled, per ton	29.40	33.10	31.70	30.70	29.50
Cotton seed meal, per 100 pounds	4.45	4.31	4.30	4.08	3.77

See footnotes at end of table.

Table 682.—Prices paid by farmers: Prices, by commodities, United States, average 1947-49, annual 1953-56¹—Continued

Commodity and unit	Average 1947-49	1953	1954	1955	1956
	Dollars	Dollars	Dollars	Dollars	Dollars
Feed—Continued					
Soybean meal, per 100 pounds	4.76	4.74	5.32	4.33	4.01
Linseed meal, per 100 pounds	4.69	4.88	4.82	4.51	4.20
Meat scrap, per 100 pounds	6.33	5.35	5.98	5.03	4.73
Tankage, per 100 pounds	6.62	5.45	6.22	5.23	4.78
Bran, per 100 pounds	3.36	3.36	3.16	2.98	2.95
Middlings, per 100 pounds	3.61	3.46	3.32	3.16	3.09
Mill run, per 100 pounds	3.28	3.28	3.01	2.91	2.80
Corn meal, per 100 pounds	4.17	3.87	3.83	3.59	3.55
Corn gluten, per 100 pounds	3.85	3.79	3.77	3.43	3.32
Hominy feed, per 100 pounds	3.87	3.70	3.70	3.42	3.42
Scratch grains, per 100 pounds	4.51	4.36	4.32	4.16	4.08
Laying mash, per 100 pounds	4.84	4.88	4.90	4.59	4.48
Broiler growing mash, per 100 pounds	5.20	5.26	5.31	5.00	4.95
Poultry ration cost, per 100 pounds	3.97	3.87	3.87	3.61	3.55
Chick starter mash, per 100 pounds	5.25	5.32	5.46	5.14	5.04
Mixed dairy feed:					
Under 29 percent protein, per 100 pounds	4.07	4.09	3.97	3.77	3.71
16 percent protein, per 100 pounds	3.91	4.01	3.89	3.70	3.65
18 percent protein, per 100 pounds	4.11	4.08	3.95	3.75	3.66
20 percent protein, per 100 pounds	4.21	4.22	4.21	3.98	3.89
24 percent protein, per 100 pounds	4.48	4.49	4.39	4.15	4.01
29 percent and over, protein, per 100 pounds	4.88	4.94	4.99	4.50	4.33
Stock salt, per 100 pounds	1.23	1.44	1.47	1.49	1.52
Seeds:					
Barley, per bushel	2.31	2.26	2.09	2.03	1.91
Cowpeas, per bushel	6.27	6.82	6.39	7.86	4.35
Corn, hybrid, per bushel	10.30	11.20	11.00	11.00	10.90
Corn, open-pollinated, per bushel	5.02	5.97	5.58	5.56	5.05
Oats, per bushel	1.78	1.67	1.68	1.56	1.41
Potatoes, per 100 pounds	4.64	4.70	2.66	4.04	4.14
Rye, per bushel	2.91	3.15	2.68	2.54	2.42
Soybeans, per bushel	4.37	4.24	4.64	4.22	3.73
Wheat, per bushel	2.92	2.88	2.86	2.94	2.88
Alfalfa, common, per 100 pounds	51.60	41.90	37.30	45.80	31.48
Alfalfa, certified Grimm, per 100 pounds	60.10	49.80	42.20	53.20	35.60
Alfalfa, certified Ranger, Buffalo and other improved varieties, per 100 pounds		54.80	44.50	55.80	37.10
Alsike clover, per 100 pounds	51.00	45.00	31.20	44.70	37.60
Red clover, per 100 pounds	59.50	43.40	41.00	65.20	45.30
Sweetclover, per 100 pounds	21.30	16.80	17.60	23.00	17.60
Common ryegrass, per pound	.148	.153	.171	.156	.136
Kentucky bluegrass, per pound	.782	.905	1.65	1.05	.805
Lespedeza, Korean, per 100 pounds	12.00	23.70	27.40	24.60	10.70
Sudangrass, per 100 pounds	11.70	18.10	11.20	15.90	10.00
Timothy, per 100 pounds	15.50	22.30	22.30	27.90	18.60
Austrian winter peas, per 100 pounds	8.95	6.74	6.90	7.36	7.61
Hairyvetch, per 100 pounds	23.50	19.50	18.00	19.30	20.00

¹ Annual average of prices at independent and chain stores. Prices paid by farmers are collected for the most part from retail establishments located in small cities, towns, and in rural areas through using questionnaires sent and returned by mail.

² Prices are the average for 2-door sedans sold prior to 1955. Model designations include Ford Custom, Chevrolet 150, Plymouth Plaza and comparable model designations for earlier years.

³ Prices are the average for 2-door sedans sold by Ford, Chevrolet, and Plymouth prior to 1955 and 4-door Buick Special. Model designations include Ford Custom 300, Chevrolet 210, Plymouth Savoy, Buick Special and comparable models for earlier years.

⁴ Prices are for 1½ ton prior to 1955 including Ford and Chevrolet.

⁵ Includes Ford, Chevrolet, International, and Dodge pickups.

Agricultural Marketing Service.

¹ Payments under rental and benefit, soil conservation, price adjustment, price parity, Sugar Act, Wool Act, Soil Bank, and production programs.

² Value of farm products consumed directly in farm households.

³ Includes an allowance for maintenance and interest on the value of farm dwellings and for a proportionate share of taxes on farm real estate and insurance on farm buildings. In most years the rental value is 9-11 percent of the estimated value of farm dwellings.

⁴ Cash receipts from farm marketing, Government payments, value of home consumption and rental value of farm homes.

⁵ Includes Government payments.

Agricultural Marketing Service.

Sugar beets	152,728	—	152,728				

¹ Amount of money received by farmers during the calendar year from the sale of farm products and from Government payments.

² Quantities of farm products consumed directly in farm households, valued at the average price received by farmers for the sale of similar commodities.

³ Cash receipts include value of home consumption, which is less than 1 per cent of total production.

⁴ Ducks, geese, guineas, quail, pheasants, turkey hatching eggs, and all other.

⁵ Value of home consumption determined by applying milk-equivalent price received for products sold to total home-consumed milk; not available by separate items.

⁶ Honey, horses, mules, beeswax, bees, goats, minks, silver foxes, rabbits.

⁷ Turnips, okra, radishes, squash, green onions, parsley, collards, mustard greens, parsnips, turnip greens, rhubarb, hot peppers, horseradish, pumpkins, rutabagas, dandelion greens, Chinese cabbage, salsify, kohlrabi, watercress, Swiss chard, all other.

⁸ Not available for individual commodities except where shown.

⁹ Raspberries, blueberries, blackberries, currants, loganberries, boysenberries, youngberries, gooseberries, dewberries, all other.

¹⁰ Persimmons, pineapples, pomegranates, mangoes, tangelo, black walnuts, quinces, chestnuts, kumquats, coconuts, loquats, guavas, bananas, citron, all other.

¹¹ Sweet corn for seed, sugar-beet seed, Bermuda grass seed, sunflower seed, birdfoot trefoil seed, rough winter peas, lupine seed, millet foxtail seed, sesame for seed, canary grass seed, bluestem seed, alyce clover seed, hairy indigo, dallis grass seed, all other.

¹² Safflower, castor beans, lentils, ramie for fiber, dill for oil, wormseed, guar, hemp fiber and seed, ginseng, flax fiber, all other.

¹³ Payments under agricultural conservation, Sugar Act, Wool Act, and Soil Bank programs.

¹ The series on income of the nonfarm population and total national income are those previously developed for use in comparison with income of the farm population. They are based on U. S. Department of Commerce estimates of nonagricultural income, with appropriate adjustments to improve their comparability with farm income.

Agricultural Marketing Service.

¹ Cash wages and value of perquisites.² An adjustment to realized net income to deduct sales out of inventories or to add increases in inventories from current production. Computed by valuing changes during the year in numbers of livestock and in quantities of crops on farms (excluding crops under Commodity Credit Corporation loan), at a average calendar-year prices.³ Interest charges payable during the calendar year on outstanding farm-mortgage debt.⁴ Gross rent to nonfarm landlords minus their share of expenses.

¹ Includes estimated cash outlay for building repairs and maintenance rather than depreciation allowance.

² Includes proportionate share of all Government payments payable to landlords. ³ Preliminary.

Agricultural Research Service.

FOOTNOTES FOR TABLES 688 AND 689

¹ Twenty-five of the 29 types of farms represent the average of the most common sizes of farms of the type in the general region indicated. The averages are thus not affected by the activities of operators on farms larger or smaller than the group described. Four of the farms represent commercial family-operated farms larger or smaller than the average size of the type in the area. These are the large-scale and small cotton farms in the Mississippi Delta area and the small tobacco and large tobacco-cotton farms in the Coastal Plain, North Carolina. The data for these farms pertain to the size and type of farm specified.

² Total sales plus Government payments, perquisites, and change in inventory of livestock and crops.

³ Includes all cash production expenditures plus depreciation and change in inventory of service buildings, machinery, and equipment.

⁴ Estimated average value Jan. 1 of land and buildings times average farm mortgage interest rates in the specified area plus average value Jan. 1 of livestock, machinery and equipment, and inventory of feed grains and hay times average short-term interest rates.

⁵ Not applicable.

Agricultural Research Service.

¹ Includes Government distribution and secondary- and trace-nutrient fertilizers but not liming materials.

² Calculated from the quantities of each grade and kind of fertilizer shipped and the analyses published by Fertilizer Control Authorities for the respective States.

³ Preliminary.

⁴ Does not include gypsum, sewage sludge, other than activated sludge, soil sulphur, nor materials containing less than 5 percent total plant nutrients classed by this State as "minerals."

⁵ Not available.

⁶ Alaska, Hawaii, and Puerto Rico; 1954 and 1955 totals do not include Alaska. The consumption of commercial fertilizers in other Territories is negligible.

Table 694.—Fertilizers: Quantities of commercial fertilizers consumed and their average plant-nutrient content, United States, 1919–56¹

Sold for direct application to soil ⁶	1,026,326	774,016	825,547	-----	-----	-----

¹ Lime from oyster shells included with quicklime from limestone.² Beginning 1953, value no longer quoted separately.³ Supplied by Fish and Wildlife Service, U. S. Department of Interior.⁴ Used includes manufacture of superphosphate, phosphates, phosphoric acid, phosphorous, and ferro phosphorous; for direct application to the soil; as a fertilizer filler; stock and poultry feed; undistributed exports; and other minor uses. ⁵ Included sintered matrix. ⁶ Included in total phosphate rock.

Agricultural Marketing Service. Compiled from reports of the Bureau of Mines.

Agricultural insecticides, fungicides, etc., not elsewhere classified ¹	88,990	165,015	87,606	66,788	94,571	111,366	101,234

¹ These statistics only partially cover production of pesticides, since a number of commodities are not reported either to the Bureau of the Census or to the U. S. Tariff Commission.

² Production of the gamma isomer content in benzene hexachloride totaled 17.1 million pounds in 1951, 12.8 million pounds in 1952, 8.8 million pounds in 1953, 11.5 million pounds in 1954, 10.7 million pounds in 1955, and 14.7 million pounds in 1956.

³ Not available.

⁴ Partly estimated. Includes such commodities as allethrin, aramite, aldrin, chlordane, dieldrin, dithiocarbamate fungicides, lindane, malathion, methoxchlor, toxaphene, endrin, captan, etc.

⁵ In 1953 and 1954 pyrethrum extract also was imported; data on amounts are not available.

⁶ Benzene hexachloride and composition, containing 1 percent or more gamma isomer, reported on a gamma isomer content basis.

⁷ Prior to 1952, DDT, benzene hexachloride, and weed killers were included in this category. Beginning Jan. 1, 1953, "Sulfur formulations 20% and over sulfur," and "Agricultural sulfur, not elsewhere classified," were reported separately; in 1953 these items totaled, respectively, 26.9 million pounds, and 23.3 million pounds; in 1954, 13.5 million pounds, and 31.9 million pounds; and in 1955, 10.8 million pounds and 26.4 million pounds.

U. S. Department of Commerce. Compiled from data supplied by the Bureau of the Census, the U. S. Tariff Commission, and the Bureau of Mines.

FOOTNOTES FOR TABLE 699

¹ Includes Federal use taxes, 1942-45.

² 1924-44, taxes on motor fuel used in automobiles and trucks only; thereafter, also includes taxes on fuel used in farm tractors.

³ Preliminary.

⁴ On July 1, 1954, farmers became eligible for refunds of Federal taxes on fuel used for nonhighway purposes.

¹ In computing the average rates, each Farm Credit district is given equal weight, but within each district the rate is weighted by number of days it is in force.

² Contract rates on loans through national farm loan associations. Temporarily reduced rate in effect between July 11, 1933, and June 30, 1935, was 4.5 percent, and between July 1, 1935, and June 30, 1944, was 3.5 percent.

³ Weighted average face rates of bonds outstanding on Dec. 31 each year, excluding bonds owned by the issuing agency.

⁴ Average market yields on representative outstanding issues.

⁵ These rates represent interest on loans (less patronage refunds) plus loan service fees, costs of record searches, filing and releasing mortgages, etc., paid by borrowers, expressed as a percent of the average balance of loans outstanding during the year.

⁶ Prior to 1939 these data represent averages computed by giving each Farm Credit district equal weight, but within each district the rate is weighted by the number of days it was in force. Beginning with 1939 the annual interest income on loans, discounts, and notes receivable is expressed as a percent of the average balance of such items outstanding during the year.

⁷ Weighted average face rates of debentures issued during the year.

⁸ Board of Governors of Federal Reserve System.

⁹ Annual averages of prevailing open-market rates in New York City.

¹⁰ Annual ranges in discount rates on advances secured by Government obligations maturing or callable beyond 1 year and discounts of and advances secured by eligible paper.

¹¹ Excludes recording and filing fees paid to county and other public recording offices.

¹² Comparable representative data not available.

¹³ A rate of $\frac{1}{2}$ percent was effective from Oct. 30, 1942–Apr. 23, 1946, on advances secured by Government obligations maturing or callable in 1 year or less.

Table 706.—Farm fire losses: Amount of loss, United States, 1940–56¹

¹ For companies with at least 50 percent of their insurance on farm property.

² Number of companies for which data could be obtained. Variations from year to year may not represent real variation in number of companies operating.

³ Excess of assets over liabilities. Most farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves.

⁴ Preliminary.

⁵ Estimates based on sample of companies; not available by States.

Agricultural Research Service. Data for 1934–41 from Farm Credit Administration. All data compiled from published state reports, supplemented by information from state insurance officials, officers of farmers' mutuals, and others.

¹ Number of farms on which the insured crop was planted, including duplication where both the landlord and tenant are insured. Insured farms on which no insured crop was planted are not included.

² The insured's share of the planted acreage on the farm.

³ Less than 500 acres.

⁴ Includes a combination of commodities varying by counties.

Federal Crop Insurance Corporation.

FOOTNOTES FOR TABLE 708

¹ Preliminary. Includes companies with at least half of their insurance on farm property. In recent years, about 85 percent of their total insurance has been on farm property. Data for some companies not available at time of publication.

² Number of companies for which data were obtained; not necessarily complete for any state.

³ Excess of assets over liabilities. Most farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves.

⁴ No mutual fire insurance company with as much as half of its insurance on farm property.

¹ Excludes Territories and possessions unless otherwise noted.² 1930 to date includes regular mortgages, purchase-money mortgages, and sales contracts; before 1930, includes regular mortgages only. Mortgages in process of foreclosure were estimated for 1951 and 1952.³ Loans held by Corporation were made on its behalf by Land Bank Commissioner. Authority to make new loans, except incidental to liquidation, expired July 1, 1947. On June 30, 1955, loans of the Federal Farm Mortgage Corporation were sold to the 12 Federal land banks.⁴ Joint-stock land banks began liquidation May 12, 1933. Includes banks in liquidation.⁵ Data for 1939-41 include only tenant-purchase loans and direct soil and water loans to individuals. Thereafter, data also include farm-development (special real estate) loans beginning 1942; farm-enlarge loans beginning 1944; project-liquidation loans beginning 1945; farm-housing loans beginning July 1950; and building improvement loans beginning 1955. Data also include loans for these purposes from State Corporation trust funds.⁶ Estimates based on direct reports from life insurance companies, official reports submitted to State Insurance commissioners, "Best's Life Insurance reports," "Spectator Life Insurance Yearbook," and data from Life Insurance Association of America and Institute of Life Insurance. Includes legal reserve companies only. 1930 to date includes regular mortgages, purchase-money mortgages, and unpaid principal sales contracts; before 1930, regular mortgages only.⁷ Before 1935, open State and national banks; 1935-47, insured commercial banks; and 1948 to date, all operating commercial, savings, and private banks. Beginning 1956, includes soil and water conservation loans insured by the Farmers Home Administration.

¹ Continental United States only.² Loans on regular mortgages only, excluding purchase money mortgages and sales contracts.³ Loans by the Land Bank Commissioner were made on behalf of the Federal Farm Mortgage Corporation. Authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of refinancing loans previously made by the Land Bank Commissioner. Liquidation of Commissioner loans was completed June 30, 1955.⁴ Placed in liquidation May 12, 1933. Loans made during liquidation are included with mortgages recorded by miscellaneous lenders.⁵ Includes tenant purchase, farm enlargement, farm development, building improvement and project liquidation loans, loans primarily for refinancing purposes, and similar loans from State Corporation trust funds. Figures represent amounts advanced for project liquidation loans and amounts obligated for all other types of loans. Data for 1944 include all project liquidation loans made from inception of program through Dec. 31, 1944, no breakdown by years being available for such loans prior to that date. Does not include insured farm ownership loans.⁶ Amount obligated. Data for 1950 include all loans obligated from beginning of farm housing program in November 1949–Dec. 31, 1950.⁷ Amount obligated. Does not include insured soil and water conservation loans.⁸ Estimates based on reports from counties including 30–50 percent of the farms in the United States. Includes purchase money mortgages and sales contracts to the extent they were recorded.

¹ Continental United States only.² Loans on regular mortgages only, excluding purchase money mortgages and sales contracts.³ Includes purchase money mortgages and sales contracts to the extent they were recorded.

Farm Credit Administration.

FOOTNOTES FOR TABLE 714

¹ Includes regular mortgages, purchase-money mortgages, and sales contracts. Includes mortgages in process of foreclosure.² Includes United States legal reserve companies only. Includes regular mortgages, purchase-money mortgages, and sales contracts.³ Includes tenant-purchase, farm-enlarge, farm-development, project-liquidation, farm-housing, and direct soil and water conservation loans to individuals, and loans made for these purposes from State Corporation trust funds.⁴ Includes loans held by all operating commercial, savings, and private banks, individuals, and miscellaneous lenders. State estimates are approximate and should be used only as general indicators of the amount of mortgage debt held by this group. See table 719 for State data on loans held by all operating banks (classified by location of bank rather than by location of security).

Agricultural Research Service.

---	--	--	---	--	---	--

¹ Continental United States only.

² All operating banks. Includes loans to individuals guaranteed by the Commodity Credit Corporation; beginning 1942, includes certificates of interest in pool of growers' notes. Beginning 1954 excludes certificates based on loans to cooperatives which are included in table 719. For 1956 no such certificates were reported.

³ Excludes loans from the Agricultural Marketing Act revolving fund. This program is in liquidation and no loans were outstanding Jan. 1, 1953.

⁴ Loans "made" include renewals.

⁵ Excludes loans guaranteed by CCC. Beginning 1947, also excludes loans held by associations in liquidation.

⁶ Excludes loans to and discounts for production credit associations, regional agricultural credit corporations and banks for cooperatives. Includes loans guaranteed by CCC.

⁷ Excludes loans guaranteed by CCC.

⁸ Also includes production and subsistence, rural rehabilitation, construction, and wartime adjustment loans, and such loans from State Corporation trust funds beginning Apr. 1, 1942.

⁹ Includes production, economic, special emergency, special livestock, flood and wind-storm restoration, flood damage, fur, and orchard loans; and loans of the Regional Agricultural Credit Corporation.

¹⁰ Also includes drought relief and orchard rehabilitation loans.
¹¹ Loans "outstanding" during 1947-56 were exclusively to soil and water associations. Does not include insured soil and water conservation loans.

¹² Loans "outstanding" are cumulative net advances minus principal repayments; loans "made" are net advances to borrowers.

¹³ Approximately 1/4 of the individuals served by these cooperatives are farmers.

¹⁴ Principally loans to public bodies and to power companies.

¹⁵ Loans to commercial telephone companies.

¹⁶ Excludes pooled loans against which certificates of interest were issued and loans guaranteed by CCC held by other lending agencies.

¹⁷ Not available.

¹⁸ Cumulative amounts obligated. Data for amounts held unavailable.

¹⁹ Cumulative from 1934 through 1937.

²⁰ Cumulative from 1935 through 1937.

Agricultural Research Service.

¹ Includes loans of national and state commercial, mutual savings, stock savings, and private banks. Loans are classified according to location of bank and therefore, are not strictly comparable with data for other lenders, which are classified according to location of farm.

² Includes soil and water conservation loans insured by the Farmers Home Administration.

³ Includes loans guaranteed by the Commodity Credit Corporation and certificates of interest in pool of CCC loans. \$542,189,000 and \$362,127,000 of the certificates held on Jan. 1, 1955, and July 1, 1955, respectively, were reported by CCC as based on pooled loans to cooperatives. There were no such certificates outstanding for 1956. On Jan. 1, 1957, such certificate totaled \$61,105,000.

⁴ Alaska, Hawaii, Mariana Islands, Puerto Rico, Samoa (American), and Virgin Islands.

¹ Includes Puerto Rico.² Excludes purchase money mortgages and real estate sales contracts.³ Land Bank Commissioner loans were made on behalf of the Federal Farm Mortgage Corporation. The authority to make Land Bank Commissioner loans expired June 1, 1947, except for limited purpose of refinancing loans previously made. Because Commissioner loans were completely liquidated as of June 30, 1965, no further loans were made or refinanced after that date.⁴ Includes renewals.⁵ Does not include advances in connection with the Commodity Credit Corporation program.⁶ Interagency transactions which are excluded from the net total.

¹ Includes tenant purchase, farm enlargement, farm development, and building improvements, and project liquidation loans and loans primarily for refinancing purposes.

² Loans from Corporation trust funds and farm development loans from "Loans, grants, and rural rehabilitation" funds are also included.

³ Amount advanced for project liquidation loans and obligated for all other types of loans. Includes subsequent loans to borrowers who received an initial loan in a prior year.

⁴ Includes tenant purchase, farm enlargement, farm development, and building improvement loans and loans primarily for refinancing purposes.

⁵ Amount obligated. Includes subsequent loans to borrowers who received an initial loan in a prior year.

⁶ Amount obligated less principal repayments for Jan. 1, 1949 and 1950; loan advances less principal repayments for Jan. 1, 1951-57.

⁷ In addition to farm housing loans reported in this table, farm housing grants in the amount of \$363,674 were made.

⁸ Includes project liquidation loans advanced from beginning of program through 1944.

⁹ Loans obligated from beginning of insured program in October 1947-December 1948.

¹⁰ Loans obligated from beginning of farm housing program in November 1949-December 1950.

¹ State totals represent data for borrowers incorporated within the State.

² United States totals for other types of borrowers are: Public Power Districts, 49 borrowers, \$176,485,300; municipalities and other Government authorities, 26 borrowers, \$30,885,339; power companies, 24 borrowers, \$14,342,199.

³ Funds loaned to corporate borrowers for relending to individuals. Includes wiring, plumbing, and refrigeration installations.

⁴ Includes miles energized and consumers served, shown in tables 732 and 733.

¹ Includes loans made directly by Commodity Credit Corporation and loans made by banks and other lending agencies under Commodity Credit Corporation obligations to purchase. Renewals and extensions of loans previously made are excluded. 1956 data for loans through December 31, 1956, only.

² Partly estimated.

³ Loans to the Cotton Producers Pool were second lien advance on cotton in the pool. The 1933 advance was \$20 per 500-pound bale and the 1934 advance was an additional \$10 on cotton remaining in the pool. The number of bales involved is excluded from the quantities placed under loan.

Commodity Stabilization Service, Commodity Credit Corporation data for loan programs not active in recent years may be found in Agricultural Statistics, 1952, table 760.

¹ Includes loans made directly by Commodity Credit Corporation and loans made by banks and other lending agencies under CCC obligation to purchase. As far as possible, loans have been distributed according to the location of producers receiving the loans. Direct loans to cooperative associations for the benefit of members have been distributed according to the location of the association.

² Includes loans to cotton cooperatives and the 1933 cotton loan for which State data are not available.

¹ National acreage allotments proclaimed by the Secretary under the Agricultural Adjustment Act of 1938 except as follows: Cotton, peanuts, and rice national acreage allotments have been adjusted in certain years to include increases provided by special legislation; tobacco figures are a total of individual allotments since a national acreage allotment is not proclaimed for tobacco. In the case of wheat entries do not include special adjustments, such as those for Durum, required by special legislative provisions. ² The commercial corn area included the following numbers of counties: 1938-566, 1939-586, 1940-599, 1941-623, 1942-623, 1943-623, 1950-837, 1954-834, 1945-805, 1956-840, and 1957-894. ³ Other types of tobacco generally have been and are subject to allotments. ⁴ Acreage allotments under the Agricultural Conservation Program. Where acreage allotments were in effect under both the Agricultural Conservation Program and the Agricultural Adjustment Act of 1938, only AAA acreage allotments are shown. ⁵ Marketing quotas and acreage allotments under AAA of 1938 suspended. ⁶ Acreage allotments terminated. ⁷ Suspended and replaced by 51 million acres base acreage. ⁸ Preliminary.

¹ The basis for the costs reflected in this table is as follows: (1) For activities financed from appropriated funds, the expenditures less receipts arising from the activities so financed; and (2) for Commodity Credit Corporation and Federal Crop Insurance Corporation corporate funds, the net gains or losses from operations and the interest cost to Treasury on Government-subsidized capital. Interest cost to Treasury on Government-subsidized capital of corporations has been computed on the basis of the average rate incurred by Treasury on the public debt in each of these years.

² Represents realized loss under Price Support Program.

³ Excess of credits, deducted in obtaining total.

⁴ The expenditures under this program are for payment of the difference between the price specified in the International Wheat Agreement and the domestic price of wheat.

⁵ Represents the net realized cost of commodities shipped to foreign countries in accordance with the provisions of the Agricultural Trade Development and Assistance Act (P.L. 480, 83d Congress, as amended). The total cost for 1956, amounting to \$624,226,712, is reduced by a credit of \$319,323,232 for foreign currencies collected under this program through June 30, 1956. The credit consists of the U. S. dollar proceeds (\$10,793,477) from sales of foreign currencies, and the U. S. dollar equivalent of (1) foreign currencies used for purposes authorized by Section 104 of the Act (\$97,367,539), and for other disbursements; and (2) foreign currency balances on hand at June 30, 1956 (\$210,961,926).

⁶ Represents the expenditure of foreign currencies for developing new foreign market for United States agricultural commodities, as authorized in Section 104(a) of Public Law 480, 83d Congress, as amended.

⁷ Primarily Section 32 operations; includes the cost of commodities purchased and distributed to the school lunch program but excludes cash payments to schools for part of their school lunch program expenditures during fiscal years 1943 to 1949 inclusive.

⁸ Includes (1) Average allotments and marketing quotas program, (2) Parity payments; (3) Agricultural Adjustment Act of 1933 and related Acts; (4) Agricultural Marketing Act Revolving Fund, and payments to stabilization corporations for losses incurred; and (5) Miscellaneous, including five miscellaneous programs as follows: (a) Distribution costs on CCC stocks and hay for emergency feed program; (b) net operating results of the Federal Surplus Commodities Corporation which operated from 1935 to 1942 for the purpose of purchasing, processing, storing, handling, transporting, and disposing of surplus agricultural commodities and products for relief; (c) retirement of cotton pool participation trust certificates; (d) removal of surplus cattle and dairy products; and (e) transfer of hay and pasture seeds to Federal land administering agencies.

¹ Diversion rate applies when shift of general cropland to conservation uses reduces soil bank crops (primarily row and grain crops) to extent of acreage placed in conservation reserve. The nondiversion rate, 30 percent of diversion rate, applies on small farms where these crops are not reduced. Both rates apply to larger farms with all eligible land in the conservation reserve program.

² \$50 or less.
Commodity Stabilization Service.

FOOTNOTES FOR TABLE 748

Commodity Stabilization Service.

CHAPTER IX

AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various resources, particularly soil, water, and timber. Data on the production, supply, and distribution of Naval Stores is included because of its close association with forestry statistics.

The table showing Soil Conservation Service assistance with referrals from the Agricultural Conservation Program Service has been dropped.

Table 751.—Agricultural Conservation Program: Assistance to farmers for carrying out conservation practices, United States and Territories, by program years, 1936–56¹

Program year	Assistance	Program year	Assistance	Program year	Assistance
	<i>1,000 dollars</i>		<i>1,000 dollars</i>		<i>1,000 dollars</i>
1936.....	60,732	1943.....	215,242	1950.....	252,006
1937.....	90,791	1944.....	293,867	1951.....	246,100
1938.....	93,919	1945.....	231,068	1952.....	2 227,650
1939.....	117,078	1946.....	267,555	1953.....	2 190,496
1940.....	116,008	1947.....	244,748	1954.....	3 146,949
1941.....	123,960	1948.....	124,503	1955.....	4 192,602
1942.....	168,087	1949.....	223,855	1956.....	5 222,032

¹ Includes assistance under naval stores program. Administrative expenses not included.

² Includes assistance for supplementary farmland restoration program.

³ Includes assistance for supplementary emergency wind erosion control program.

⁴ Includes assistance for supplementary emergency wind erosion control and emergency flood programs.

⁵ Includes assistance for supplementary emergency wind erosion control and emergency flood programs, and emergency coffee grove restoration program.

¹ Turpentine places under naval stores conservation program not included in "participating farms" but number of payees included in "payees." Farms participating in manager-type pooling agreements are included in "participating farms" but only the managers are included in "payees." Also includes data with respect to supplementary emergency programs.

² Cropland on participating farms as percentage of the cropland acreage in States. Includes data with respect to supplementary emergency programs.

³ Rounded totals of unrounded data.

⁴ Does not include program funds used for nondeductible services, SCS 5 percent agreements, or naval stores conservation program.

⁵ \$500 or less.

Agricultural Conservation Program Service.

Table 753.—Agricultural Conservation Program: Selected conservation practices performed,¹ by States and Territories, 1955—Continued

State or Territory and division	Controlling competitive plants on noncropland to improve protective cover	Developing springs or seeps for livestock water to permit a better distribution of grazing	Constructing and develop- ing new wells for livestock water to permit a better distribution of grazing	Constructing new storage- type dams, and reservoirs to control erosion, conserve runoff and to permit a better distribu- tion of grazing	Leveing irrigated land to prevent erosion and conserve water	Drainage to dispose of excess water to permit a system of conservation farming ⁶	Applying liming materials to permit growth of crops which protect and conserve soil ⁷

¹ Data includes completed practices only. ² 0.5 acre or less. ³ Includes only the acreage across which terraces have been constructed. ⁴ Includes surfacing clod-forming subsoil to control wind erosion. ⁵ Includes supplementary emergency program. ⁶ Extent applies only to that acreage for which the practice performance completed under the 1955 agricultural conservation program provided adequate drainage facilities. Does not include data relative to drainage systems damaged by flood which were restored under the agricultural conservation program. ⁷ All liming materials have been converted to a standard ground limestone equivalent.

Soil Conservation Service.

FOOTNOTES FOR TABLE 758

¹ For specific procedure on organization of soil conservation districts, reference should be made to soil conservation district laws in each of the States.

² Upon request, the United States Department of Agriculture enters into memoranda of understanding with districts for such assistance from departmental agencies as may be available.

³ Includes 10 State cooperative grazing districts.

⁴ Includes the Imperial Irrigation District.

¹ Soil surveys of the Soil Conservation Service showing kinds of soil, slope, degree of erosion, and present land use are used to determine land capabilities for conservation planning and treatment of entire farms and ranches and of group enterprises, including about 75 million acres of standard soil surveys.

Soil Conservation Service.

Table 761.—Soil conservation practices: Newly applied in soil conservation districts, with Soil Conservation Service assistance, 1952-56¹

Practice	Unit	1952	1953	1954	1955	1956
Contour farming	Acres	2,891,991	3,923,547	3,274,225	2,933,728	2,987,204
Cover cropping	do	3,241,038	4,813,326	4,555,724	4,094,088	3,865,252
Stripcropping	do	793,517	811,102	981,965	939,834	1,005,930
Seeding range and pasture	do	2,872,987	2,769,310	3,148,321	3,062,129	3,406,247
Pond construction	Number	64,268	58,766	86,421	75,965	89,593
Tree planting	Acres	173,583	235,259	276,029	320,183	372,326
Terrace	Miles	60,717	46,850	50,698	44,955	59,800
Diversion construction	do	5,221	4,381	5,179	7,079	5,835
Drainage	Acres	1,568,433	1,508,062	1,602,474	1,441,945	1,437,911
Irrigation land preparation	do	452,253	404,685	474,687	480,054	645,464
Improved water application	do	567,741	1,031,684	1,101,292	1,850,415	1,598,526

¹ These data are for first-time application only and do not include duplication of acreage for reapplication or maintenance of those same practices year after year.

Soil Conservation Service.

a. Roadside erosion control.....	Miles.....	30	61	242
b. Revegetation:				
1. Grasses and legumes.....	Acres.....	2,085	4,568	10,480
2. Woody plants.....	Acres.....	5	148	5,914

¹ As authorized by the Soil Conservation Act of 1935 (Public Law 46, 74th Congress) implemented by the watershed protection item in the Department of Agriculture Appropriation Act of 1954.

² These projects comprise 3,300,900 acres in 32 states.

³ In addition to the structural measures shown, many land treatment measures were installed in the projects as a part of the accelerated soil and water conservation program in districts where located.

⁴ Estimated total quantities as of date of report.

Soil Conservation Service.

Table 765.—Flood prevention: Improvement works completed in authorized watersheds with assistance of the Forest Service, years ending June 30, 1956 and 1957, and cumulative to June 30, 1957¹

Practices and measures ²	Unit	Total completed or acquired

¹ Forest land area includes (a) lands which are at least 10 percent stocked by trees of any size and capable of producing timber or other wood products, or of exerting an influence on the climate or on the water regime; (b) land from which the trees described in (a) have been removed to less than 10 percent stocking and which have not been developed for other uses; (c) afforested areas; and (d) chaparral areas. Does not include orchard land. The minimum area that qualifies as forest land is one acre in the East and 10 acres in the West. Roadside, streamside, and shelterbelt strips of timber, in addition to meeting above requirements, must be at least 120 feet wide to qualify as forest land.

² Commercial forest land area is forest land which (a) is producing, or physically capable of producing, usable crops of wood (usually sawtimber), (b) economically available now or prospectively, and (c) not withdrawn from timber utilization.

Forest Service.

¹ Net volume in cubic feet of live sawtimber trees and live poletimber trees from stump to a minimum 4-inch top (of central stem) inside bark.

² Net volume in board feet, International $\frac{1}{4}$ -inch rule, of live sawtimber trees of commercial species. Sawtimber trees of commercial species contain at least one merchantable sawlog as defined by regional practice and which are of the following minimum diameters at breast height: Eastern region; Softwoods 9.0 inches and hardwoods 11.0 inches. Western regions; all species 11.0 inches.

Forest Service.

FOOTNOTES FOR TABLE 770

¹ Estimates of timber cut include logging residues as well as growing stock material removed as timber products. Volumes refer to growing stock inventory and are in cubic feet roundwood excluding bark and in board feet log scale International $\frac{1}{4}$ -inch rule and represent the net cubic foot volume of live sawtimber and poletimber trees from stump to minimum 4-inch top (of central stem) inside bark and the net board foot volume of the sawlog portion of live sawtimber trees (from stump to merchantable top) cut or killed in logging. Individual columns may not add to total because of rounding.

² Includes box and shingle bolts, excelsior bolts, turnery, dimension and handle stock, chemical wood, and other such miscellaneous products.

Forest Service.

¹ Timber cut refers to net inventory volume cut or killed in logging and converted to timber products or left as logging residues.

² The considerable excess of cut over growth for most western softwoods is not entirely due to overcutting. Growth is at a low level partly because 40 percent of the commercial forest area consists of old-growth timber which contributes little to net annual growth.

³ Less than 0.5 million cubic feet.

Forest Service. From Timber Resource Review.

¹ Includes National forests, purchase units, experimental areas and land utilization projects.

National forests.—Areas established as national forests by legislative or executive action. Acres shown as national forest land, and other land administered by the Forest Service include small administrative sites outside of proclaimed boundaries and those portions of land utilization projects and other areas over which the Forest Service has supervision located within the national-forest boundaries. Land utilization and other areas located outside the national forests and under Forest Service supervision are not included; such areas are listed under the classifications "Land utilization projects" and "Other areas."

Purchase units.—Areas established by the Secretary of Agriculture with the concurrence of the National Forest Reservation Commission but not formalized by legislative or executive action. Acreage shown as national forest land, and other land administered by the Forest Service include all administrative sites outside the established boundaries and those portions of the land utilization projects and other areas over which the Forest Service has supervision located within the established purchase unit boundaries. Land utilization and other areas located outside the boundaries and under Forest Service supervision are not included; such areas are listed under the classification "Land utilization projects" and "Other areas."

Experimental areas.—Areas outside of the exterior boundaries of national forests or purchase units which have been reserved and dedicated to forest or range research and experimentation by legislative or executive action. The Massabesic Experimental Forest in Maine and the McNeill Division of the Harrison Experimental Forest in Mississippi, which have both purchase unit and experimental area status, are included only in the experimental area summaries.

Land utilization projects.—Lands outside the national forests and purchase units that are administered by the Forest Service in pursuance of certain national programs of land utilization and adjustment. Does not include land utilization project lands that are managed by the States or State agencies under lease or cooperative license agreement.

² Lands within the unit boundaries in private, State, county, and municipal, etc., ownership, and Federal lands over which the Forest Service has no jurisdiction.

Forest Service.

¹ Payments under the Acts of May 23, 1908 (as amended) and July 24, 1936, are 25 percent of total receipts remaining after deducting (a) payments to Arizona and New Mexico on account school-section lands administered by Forest Service, (b) appropriations of receipts under laws authorizing such appropriations for acquisition of lands in specified national forests or portions thereof, and (c) receipts from an area of the Superior National Forest, Minnesota, on account of which the State (for the counties) is paid $\frac{3}{4}$ percent of the appraised valuation in lieu of 25 percent of the receipts.

² Includes \$597,133 representing 25% of Tongass (Alaska) Suspense Account receipts for the years beginning July 1, 1947-55.

³ Includes \$132,982 representing 25% of Tongass (Alaska) Suspense Account receipts in year beginning July 1, 1956.

¹ Reports of Bureau of the Census.

² Barrels of 50 gallons.

³ Trade estimates.

⁴ Total supply less exports and Mar. 31 stocks.

⁵ Beginning with 1930, includes turpentine used in producers' plants in production of stocks.

unclassified derived products. Prior to 1937, figures are for calendar years.

⁶ Chiefly unreported retail sales.

Agricultural Marketing Service.

¹ Includes "B wood resin" produced in refining FF wood rosin to paler grades. Beginning Sept. 1, 1950, "B wood resin" used in making paper size is included in paper and paper size. All other "B wood resin" is included in chemicals and pharmaceuticals.

² Barrels of 50 gallons.

³ Drums of 500 pounds net weight.

⁴ Included in "other industries."

⁵ Some rosin previously included under soap transferred to rubber category.

¹ Weighted average Savannah Exchange price through 1950. Beginning with 1951 weighted average price compiled by the Market News Service in Savannah, Ga.

² Six cents subtracted from turpentine prices for 1932-39 as previously published in Agricultural Statistics to eliminate cost of package.

³ Unit: 1 barrel (50 gallons) of turpentine plus 1,400 pounds of rosin.

Agricultural Marketing Service.

CHAPTER X

CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food by both rural and urban people, retail price levels, and other aspects of family living of farm people. Data presented here on quantities of food available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income, tables 677-679.

Tables on diets of North Central rural families and family food expenditures have been replaced with tables on quantity and value of food used at home and on nutritive value of diets.

Per capita consumption figures for food items appearing in this chapter have been revised using the Bureau of Census estimates of population without adjustments for underenumeration, (as given in table 790). This has resulted in raising the averages approximately 1.39 percent for all years. They also incorporate revisions resulting from information provided by the Census of Agriculture and Census of Manufacturers for 1954.

Table 790.—Population: Number of people eating from civilian food supplies, Jan. 1 and July 1, 1910-57

Year	Jan. 1	July 1	Year	Jan. 1	July 1

Agricultural Marketing Service. Estimates based on published and unpublished records of the Bureau of the Census. Figures for 1910-1916 and 1920-1939 are total population resident in the United States with no allowance for small number of armed forces then overseas. Estimates of population eating from civilian food supplies from 1941 to January 1946 are civilian population plus the number of armed forces eating from civilian supplies; those since July 1946 relate to civilian population only.

¹ Indexes based on data from the appropriate Censuses of Agriculture. The index for a given area is the unweighted average of the index values for all counties or combinations of counties in that area except where otherwise noted. These indexes are based on the following items: (1) Percentage of farms with electricity; (2) percentage of farms with telephones; (3) percentage of farms with automobiles; and (4) average value of products sold or traded in the year preceding the census (adjusted for changes in purchasing power of farmer's dollar). The index has a mean value of 100 for the United States in 1945 and a value of zero when all of the items in a county have a value of zero.

² Indexes were not computed for several counties in Arizona and New Mexico, and 1 in Utah for certain years because the treatment of Indians on reservations was not comparable. Therefore, State averages are not shown for Arizona and New Mexico and the averages for Utah do not take 1 county into account.

1956 ³	81	114	165	98	84	95	88	111	88	103

¹ Derived from data on per capita consumption of individual foods, using estimates of retail weights multiplied by average retail prices in 1947-49. Civilian consumption only, 1941 to date.² Fat cuts of pork are in the "Meats, poultry, fish" group.³ Preliminary.⁴ Includes frozen vegetables, canned soups, and canned baby foods.

Agricultural Marketing Service.

Table 793.—Approximate consumption of food per capita, retail-weight equivalent, by major food groups: Total in pounds and in comparison with 1947-49 average, 1909-56¹

Year	Dairy products, excluding butter		Eggs (⁴)	Meats, fish, and poultry (⁵)	Fats and oils, including fat cuts and butter (⁶)	Dry beans and peas, soya products (⁷)	Potato and sweet-potato toes (⁸)	Citrus fruit and tomatoes (⁹)	Leafy, green and yellow vegetables (⁸)	Other vegetables and fruit (⁸)	Flour and cereal products (⁹)	Sugars and sirups (¹⁰)	Coffe, tea, and cocoa (¹¹)	Total	
	Milk-equivalent (²)	Product weight (³)												Retail weight equivalent 1947-49 = 100	Poundage index

¹ Estimated from per capita data by means of average loss factors with the addition of estimates of supplies from rural and urban home gardens and of minor food items. Civilian consumption only, beginning 1941.

² Fluid whole milk equivalent based on calcium content. One quart of fluid milk weighs 2.15 pounds.

³ Sum of approximate retail weights.

⁴ Allows for breakage from farm to retail.

⁵ Excludes bacon and other fat pork cuts; includes edible offal, game, and small quantity of noncommercial fish; poultry on eviscerated basis.

⁶ Product weight except for "other edible fats and oils," which represents oils used in salad dressings, etc.

⁷ Nuts on a shelled basis.

⁸ Includes fresh and processed items and produce of rural and urban home gardens. Product weight except for concentrated citrus juices which are on a single strength basis in the citrus and tomato group.

⁹ Excludes corn sugar and syrup.

¹⁰ Excludes sugar used in condensed milk, frozen dairy products (except ice cream), and processed fruits and vegetables.

¹¹ Includes coffee on roasted basis and chocolate liquor equivalent of cocoa and chocolate products.

¹² Preliminary.

¹ Quantities of nutrients computed on the basis of estimates of apparent per capita consumption (retail basis), including estimates of produce of rural and urban home gardens. No deduction has been made in nutrient estimates for loss or waste of food in the home or for destruction or loss of nutrients during the preparation of food. Civilian per capita only, 1941 to date.

² Beginning 1941, data include estimates of the quantities of these nutrients added to prepared cereals, white flour, and bread.

³ Preliminary.

Agricultural Research Service.

¹ Based on the nutritive value of food brought into the kitchen for household use, making allowance for inedible waste such as bones, pits, stems, peels, and skins, and some fat normally trimmed away, and for average cooking losses of thiamine, riboflavin, niacin, and ascorbic acid. No deduction was made for losses due to spoilage, poor handling, excessive peeling and trimming, or during storage of leftovers, or for quantities of edible foods that may have been discarded or fed to animals. There is likewise no allowance for small quantities of minerals (especially calcium) that were probably obtained from drinking water and baking powder. The recommended amounts per nutrition unit (equivalent adult male, 21-34 years) are: Protein 75 grams, calcium 0.8 gram, iron 12.0 milligrams, vitamin A value 5,000 international units, thiamine 1.5 milligrams, riboflavin 1.9 milligrams, niacin 15 milligrams, and ascorbic acid 75 milligrams.

² Housekeeping households of 1 or more persons.

³ Because the sample was not self-weighting, the total for all urbanizations is obtained by applying weights of 1, 1, and $\frac{1}{4}$ respectively to the number of urban, rural nonfarm, and rural farm households shown in the table.

Agricultural Research Service. Compiled from Household Food Consumption Survey 1955.

FOOTNOTES FOR TABLE 796

¹ Housekeeping households of 1 or more persons.

² Net money income after income taxes, 1954.

³ Approximately the quantity of fluid milk to which the various dairy products (except butter) are equivalent in calcium.

⁴ Includes the fresh equivalent of home-canned and home-frozen food.

⁵ Single strength equivalent of fresh, frozen, canned, and powdered juices.

⁶ Foods purchased, home-produced, and received as gift or pay; purchased and home-produced food shown separately for rural farm families only because food of urban and rural nonfarm families was mainly purchased; little food of either rural or urban families was received as gift or pay.

Agricultural Research Service. Compiled from Household Food Consumption Survey, 1955. See table 798 or number of households.

f

FOOTNOTES FOR TABLE 797

¹ Housekeeping households of 1 or more persons.

² Includes the fresh equivalent of home-canned and home-frozen food.

³ Includes coffee, tea, chocolate, soft drinks, alcoholic beverages. For tea and alcoholic beverages money value refers to purchases during the week rather than quantities used.

⁴ Includes nuts, peanut butter, soups, catsup, pickles, puddings, baby foods, leavening agents, seasonings. For seasonings and leavening agents money value refers to purchases during the week rather than quantities used.

⁵ Foods purchased, home-produced, and received as gift or pay; purchased and home-produced food shown separately for rural farm families only because food of urban and rural nonfarm families was mainly purchased; little food of either rural or urban families was received as gift or pay. Home-produced food and food received as gift or pay were valued at prices paid for purchased food.

⁶ Less than \$0.005.

Agricultural Research Service. Compiled from Household Food Consumption Survey, 1955. See table 798 for number of households and table 796 for household size.

¹ A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities, and support school lunch programs. Sponsors of school lunch programs are reimbursed by the Government for local purchases of food on a basis of the quality and quantity of meals served. The program was started in February 1943. The figure for 1946 does not include the sum of \$9,694,703, expended under authority contained in Section 5 of the National School Lunch Act to provide nonfood assistance for the school lunch programs. Approximately 39,000 schools purchased lunchroom equipment under this program. Total cost in subsidy payments by the Government does not include costs of administration of the program.

² Provides for distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 329, 74th Congress, approved Aug. 24, 1935, as amended. Beginning in 1949, data include Commodity Credit Corporation commodities distributed pursuant to Section 416, Public Law 439, 81st Congress, approved Oct. 31, 1949. In the fiscal year beginning July 1, 1949, schools received potatoes in accordance with Section 3, Public Law 471, 81st Congress, approved Mar. 31, 1950.

³ Total cost to the Government of the commodity as delivered to the distributing agency; includes cost of purchase, handling, warehousing, and transportation, but does not include costs of administration of the program.

⁴ Distribution of commodities acquired by the Government and distributed under provisions of Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946.

⁵ A program to increase the consumption of fluid milk in schools and child-care institutions authorized under the Agricultural Act of 1954, as amended. Program was initiated in September 1954.

⁶ Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 329, 74th Congress, approved Aug. 24, 1935, as amended. Beginning in 1949, data include Commodity Credit Corporation commodities distributed pursuant to Section 416, Public Law 439, 81st Congress, approved Oct. 31, 1949. In the fiscal year beginning July 1, 1949, potatoes were distributed under provisions of Section 3, Public Law 471, 81st Congress, approved March 31, 1950. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States.

⁷ Preliminary.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 801

¹ In this tabulation, "peak participation" is the participation during the month of the year when the largest number of persons participated in the program; "average participation" is the average for the 12 months of the fiscal year.

² Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended, under Section 416, Public Law 439, 81st Congress, as amended; and under Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States. Eligible recipients includes school lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies.

³ A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities, and support school lunch programs. Sponsors of school lunch programs are reimbursed by the Government for local purchases of food on basis of the quality and quantity of meals served. The program was started in February 1943.

¹ Preliminary. Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved August 24, 1935, as amended. Part of the distribution to school lunch programs, 111,397,033 pounds costing \$14,659,931, consisted of commodities distributed under provisions of Section 6 of the National School Lunch Act. The data also include distribution under Section 416 of the Agricultural Act of 1949, Public Law 439, 81st Congress, approved October 31, 1949, for schools, institutions, and welfare cases. Section 416 distribution to these outlets was 501,087,304 pounds, at a cost to the Government of \$68,166,446. Distribution to ultimate eligible recipients is accomplished thru cooperating distributing agencies in States. Eligible recipients include school lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies.

² Total cost to the Federal Government of the commodity as delivered to the distributing agency; it includes the cost of purchase, handling, warehousing, and transportation, but does not include costs of administration of the program.

¹ These rates do not include charges for the amortization of investment in lines or charges for line extensions where such are levied by the utility.

² The data on energy used for farms west of the 100th meridian vary year by year, depending on the proportion of the total consumption used for irrigation pumping. As more nonirrigation consumers are served the average consumption is reduced. Hence, the figures for the West are not strictly comparable to those for the East.

¹ The number of farms receiving central-station electric service from REA borrowers and all other suppliers as of June 30, 1957, is based on the annual estimates of unelectrified farms made by REA. Although not strictly comparable, this estimate is shown as a percentage of the total number of farms reported by the 1954 Census of Agriculture.

Rural Electrification Administration.

FOOTNOTES FOR TABLE 803

¹ Reflects retail prices of goods and services commonly bought by average families with moderate income in 46 urban areas of the United States. Beginning January 1953 this index became the official index released monthly by the Bureau of Labor Statistics.

Agricultural Marketing Service. Compiled from data of the Bureau of Labor Statistics.

¹ State totals represent data for borrowers incorporated within the State.

² Includes route miles of line to be constructed or rebuilt.

³ Excludes route miles of line to be rebuilt.

CHAPTER XI

MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter contains miscellaneous data which do not fit into the preceding chapters. Included here are summary tables on foreign trade in agricultural products; weather data pertaining to farming; statistics on fishery products; refrigerated warehouse space; and freight rates on transportation of agricultural products. Only two tables are carried on weather but more complete information can be secured from the Weather Bureau, U. S. Department of Commerce. Additions to this chapter include tables on acreage and production of world crops, and Hawaiian statistics on land utilization, marketings and value of crops and livestock; and livestock numbers.

Foreign Trade in Agricultural Products

The term "foreign trade" applies to trade between the United States, including its Territories, and foreign countries. Trade between continental United States and its Territories is referred to as "shipments." Alaska, Hawaii, Puerto Rico, and, since January 1, 1935, the Virgin Islands are Territories. Beginning January 1, 1940, trade with foreign countries through the customs district of the Virgin Islands is not included in United States trade statistics. Figures for shipments out of the Territories include small quantities to other Territories. In statistics of foreign trade, forest products and distilled liquors are considered nonagricultural products, as distinct from strictly agricultural products.

Separate figures are not being compiled by the Bureau of the Census on exports under various special economic-aid programs but these exports are included in figures appearing in this publication. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the Territories and possessions, and shipments between the Territories and possessions. Effective January 1, 1950, also excluded from the dollar value is the export subsidy paid to private United States exporters on shipments of domestically produced agricultural commodities. The export subsidy programs have included the following commodities: Wheat, wheat flour, raisins, prunes, apples, oranges, canned juice, honey, cotton, unshelled filberts, and fresh pears. These subsidies have applied only on exports to certain countries or under certain programs and are usually in effect for limited periods.

Imports for consumption include imports for immediate consumption plus withdrawals from bonded warehouses. In the classification of agricultural imports into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

¹ Beginning January 1942, the value of agricultural exports includes "food exported for relief or charity by individuals and private agencies." These figures, for which separate commodity detail is not available, include a small amount of certain foodstuffs other than agricultural. They were not included in census reports as agricultural prior to 1949.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ Excess of imports.

⁴ Preliminary.

Foreign Agricultural Service. Compiled from official records of the Bureau of the Census and the U. S. Tariff Commission.

FOOTNOTES FOR TABLE 810.

¹ Based on data for 122 agricultural import classifications.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ 1942-45 includes wool (ordinarily dutiable) imported free as an act of international courtesy.

⁴ Preliminary.

¹ Unless otherwise indicated, the years shown refer to years of harvest in the Northern Hemisphere countries. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crops harvested in the Northern Hemisphere in 1936 are combined with Southern Hemisphere harvests which began late in 1936 and end in the first half of 1937.

² Converted by weight and feeding value.

³ Year beginning January 1.

⁴ 32 countries: North America, Europe excluding USSR, Japan and South American countries.

⁵ 25 countries. Excludes Mainland China, which is the world's largest producer.

⁶ 15 countries. Prepared or estimated on the basis of official statistics of Foreign Agricultural Service.

Attaches and other representatives abroad, results of office research, and other information.

Table 813.—World crops: Production of fruits and miscellaneous crops, averages 1935-39 and 1945-49, annual 1953-56¹

¹ Unless otherwise indicated, the years shown refer to years of harvest in the Northern Hemisphere countries. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crops harvested in the Northern Hemisphere in 1956 are combined with Southern Hemisphere harvests which begin late in 1956 and end in the first half of 1957.

² Foreign production in equivalent boxes: oranges 70 pounds; grapefruit 80; lemons 76.

³ Includes U. S. unshelled, divided by 2.

⁴ Year beginning January 1.

⁵ 1947-51 average.

Foreign Agricultural Service.

¹ Transportation bill for all years and revised railroad freight rate indexes beginning 1945 are on a calendar year basis. Earlier freight rate indexes are on crop years beginning July. The change from crop to calendar year (1945 to date) was made to increase comparability with other index series.² Estimates of total expenditures by shippers for transportation (except local hauling) of farm products for civilian consumption by rail and truck, including private trucks. Year-to-year variations are caused by changes in rates, changes in volume shipped, length of haul, and some additional minor factors.³ All index number series beginning with 1945, and those for livestock, meats, and fruits and vegetables prior to 1945 are of the weighted aggregative type. They are based upon averages of rates in effect during the year. Annual averages are computed by weighting the applicable monthly rates by the estimated proportion of annual shipments moved thereon, assuming an average seasonal distribution of shipments. In constructing the combined index, group indexes were weighted by average revenues for 1947-49.⁴ Revised. ⁵ Preliminary.
