APO 1007

6592

28 July 1949

SUBJECT: "Request for Reclassification and Release of Salvage Equipment in Reparations Plant (Suzuki Shiki Shokki KK, No.300 Takatsuka, Kami-mura, Hamana-gun, Munitions # 37-28, 29)"

TO: Commanding General
Eighth Army
APO 343
Attn: Civil Affairs Section

1. Subject plant is in authorized production of textile equipment. Present production is largely for export. June production amounted to ¥ 43,821,437.

2. There are many class III machines on this plant's inventory, and a large portion of them are suitable only for scrap. The installation is in the peculiar position of finding necessary to sacrifice space required for production to shelter reparations equipment that is suitable only for salvage, while at the same time encountering difficulty in purchasing and transporting to the plant scrap metal for current production requirements.

3. If authorization could be given without delay to scrap this equipment it could be melted down in an electric furnace (cupola) presently in full operation. Operation of the furnace is curtailed during winter months due to electrical shortages.

4. There are 669 class III machines on inventories 37-28, and 37-29. It is proposed to scrap 326 items and retain 343 on inventory as bonafide class III equipment.

5. The inclosure lists the inventory numbers of the salvage equipment and enumerates the parts remaining on each machine.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

BASIC: Ltr, Shizuoka Civil Affairs Team, APO 1007, 28 July 1949, Subj: "Request for Reclassification and Release of Salvage Equipment in Reparations Plant (Suzuki Shiki Shokki KK, No.300 Takatsuka, Kami-mura, Hamana-gun, Munition # 37-28, 29)".

6. This Headquarters recommends that 326 machines at Suzuki Shiki Shokki KK, No.300 Takatsuka, Kami-mura, Hamana-gun, inventories # 37-28 and # 37-29 presently inventoried as class III equipment be reclassified as scrap and released from custody. In event of favorable action this Headquarters would see that each item released from custody is actually broken up and utilized for the purpose requested.

27 April 1949

SUBJECT: Report on Theft at Suzuki-Shiki Shokki KK, Takatsuka Kojo (37-29).

TO : Commanding Officer, Shizuoka Military Government Team.

Report on theft at Suzuki-Shiki Shokki KK, Takatsuka Kojo (37-29) submitted to us by Mr. S. Suzuki, the plant custodian of the above plant, is as follows:-

Items stolen	Quantity	Status
Nuts for assembly of looms	35,130	non-reparations
V-belts	23	"

Period:-

From latter part of January 1949 to latter part of March 1949.

Place of occurrence:-

No. 2 Working Shop.

Offenders:-

1. Takaji Oba, guard, Public Safety Section.
Taking advantage of his position as guard, he stole in 11 attempts during January and March 31,530 nuts and 23 v-belts, estimated at 103,195 yen. The stolen goods were sold.

2. Yasuichi Ono, assembler, No. 2 Working Shop.
He stole and sold 3,600 nuts, estimated at 16,200 yen during January and March.

Dismissal:-

1. Takaji Oba dismissed, dated April 24, 1949.

2. Yasuichi Ono dismissed, dated April 17, 1949.

31-29

Suzuki Shiki Shokki Takatsuka Plant

No.300, Takatsuka, Kami-mura, Hamana-gun, Shizuoka Pref.

July 26, 1948

Subject: Report on "EX" Machinery

To: Headquarters, Shizuoka Military Gov't Team

Thru: Reparation Section, Shizuoka Pref. Gov't

Name of Machine	Capacity	No. of Machine
Machine Tools		
Grinder-Stand & Snagging	2 HP	5
General Purpose Machinery		
Compressor-Horizontal	30 KVA	1
Ditto	40 KVA	1
Total		7

Info file
plant has been evaluated and additional inventory not required

CODE NUMBER 37-29

SUBJECT: PLANT COVER SHEET AND INVENTORY VERIFICATION REPORT.

TO : OFFICE OF THE EXECUTIVE FOR REPARATIONS, GENERAL HEADQUARTERS, SUPREME COMMANDER FOR THE ALLIED POWERS, APO 500 (U.S.ARMY)

In compliance with instructions, the following report is hereby rendered on the plant specified below:

1. a.) NAME OF PLANT: Suzuki Shiki Shokki K.K.
   b.) ADDRESS: 1300 Takatsuka, Kami-mura, Hamana-gun

2. PRINCIPAL PRODUCTS OF PLANT:
   a.) PRE-WAR: Munitions, Looms, Auto Parts
   b.) WARTIME: Munitions
   c.) PRESENT: Textile Machinery

3. PHYSICAL CONDITION OF PLANT:
   a.) ESTIMATE PERCENT OF DAMAGE TO BUILDING BY AIR RAID OR FIRE: 40%
   b.) IS NECESSARY PREVENTIVE MAINTENANCE OF EQUIPMENT BEING DONE? YES X NO ___

4. a.) SPOT CHECK COMPLETED ON: 16 January 1948
   b.) TOTAL NUMBER OF ITEMS INVENTORIED AND MARKED: 1284
   c.) TOTAL NUMBER OF INVENTORY SHEETS FORWARDED HEREWITH: 1

5. ELECTRIC POWER SOURCE:
   a.) PURCHASED (PUBLIC UTILITIES) Yes
   b.) SELF POWERED No
   If self powered give following data. HYDRO: ___ THERMAL: ___
   DIESEL: ___ CAPACITY OF PLANT: ___ KILOWATTS

6. GENERAL REMARKS:
   a.) TOTAL NUMBER OF SALVAGE MACHINES (Not included in 4b.) 201
   b.) OTHER PERTINENT INFORMATION: One machine herewith added to inventory is "EX", class I.

Forwarded by Hq 8th Army to SCAP, where recommendations are presently under consideration. Action cannot be expected until review of all selection presently underway is completed.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

HEADQUARTERS
SHIZUOKA MILITARY GOVERNMENT TEAM
APO 1007

JWJ/ky

6 June 1947

SUBJECT : "A PETITION FOR PARTIAL EXEMPTION FROM REPARATIONS FOR CONTINUED PRODUCTION OF TEXTILE MACHINERY."
(Suzuki Shiki Shokki K.K., Takatsuka Kojo, 500 Takatsuka, Kami-mura, Hamana-gun)
(Munitions, SCAPIN 1134, inventory number 37-29)

THRU : Commanding Officer, Tokai-Hokuriku Military Government Region, APO 710

TO : Commanding General, Eighth Army
Headquarters 8th Army, APO 343

1. Forwarded herewith is petition by subject company for exemption of a portion of its equipment from reparations. A previous petition for exemption (19 October 1946) was disapproved.

2. Subject company was formed in 1909 and was established in Hamamatsu in 1920. The management states the Takatsuka plant, which was put into operation in 1939, was constructed to replace the Hamamatsu plant which was no longer suitable for the operations of the company (1921 production 1,625 sets, 1937 5,256 sets of textile machinery). Due to government restriction of the textile equipment industry the plant was converted to munitions production.

3. The company was an important supplier of equipment to the smaller independent weaving establishments in Japan and controlled 90% of the export of sarong looms (mainly to South East Asia).

4. Government substantiated data indicates that 20% to 25% of the general production equipment and 90% of sarong looms (narrow width pattern weaving) remaining in the national textile industry are the product of subject company. In the government plan for rehabilitation of the textile industry the subject company is expected to supply 25% of the necessary production.

5. This company has 1605 inventory items (1281 at plant 37-29, 324 at plant 37-28 in Futamata). Contemplated production of 600 sets of textile equipment monthly would require

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

BASIC: Letter Headquarters Shizuoka Military Government Team, APO 1007, dated 6 June 1947, Subject "A petition for partial exemption from Reparations for continued production of textile machinery." (Suzuki Shiki Shokki K.K., Takatsuka Kojo, 500 Takatsuka, Kami-mura, Hamana-gun) (Munitions, SCAPIN 1134, inventory number 37-29)

the exemption of 856 machines and would give employment to 2000 people. If only the prewar equipment, 477 machines were exempted production and employment would be 50% of the contemplated capacity.

6. Criteria of Operational Directive 5/5 Headquarters Eighth Army 24 September 1946:

(a) Operational Directive 5/5 Section III paragraph 1(c)(1) (definition) is applicable.

(b) Operational Directive 5/5 Section III paragraph 1(c)(2) (criteria for selection) is partially applicable. The management states the Takatsuka plant was constructed in 1939 for production of textile machinery to replace the Hamamatsu plant which had been out grown. This company operated 892 machines in 1939. After conversion to munitions production (1940) there was an increase of over 100% to a total of 1800 machines as of August 15, 1945. The only special equipment observed is shell turning lathes which convertible to civilian production by changing the chuck. Annual increment of equipment is shown in annex No.7 to the petition. Annual increment of equipment as to use is shown in annex No.8 to the petition. The Takatsuka plant has been re-converted to civilian production since December 1945.

7. This Headquarters feels that should the prewar equipment of this company (477 items) be exempted the company would be in a position to satisfy a portion of the reparations needs of the South East Asiatic Countries for the rehabilitation of their textile industries (over 7,000 sets of this company's products were in use in those countries before the war). Domestically the production of it's special type equipment for the smaller weaving establishments will assist in the reconstructing of textile production on a broad basis in competition to the large plants which are more suitable for war-conversion and which tend to concentrate employment in limited areas.

8. This Headquarters believes the plant is an important

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

BASIC: Letter Headquarters Shizuoka Military Government Team, APO 1007, dated 6 June 1947, Subject: "A petition for partial exemption from Reparations for continued production of textile machinery." (Suzuki Shiki Shokki K.K., Takatsuka Kojo, 500 [illegible], Kami-mura, Hamana-gun) (Munitions, SCAPIN 1134, inventory number 37-29)

factor in the production of textile equipment and recommends that consideration be given to the exemption of 477 machines (1936-37 equipment of company) for the continuance of civilian production.

4 JUNE 1947

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

BASIC: Letter, Headquarters Shizuoka Military Government Team, Subject: "A Petition for Partial Exemption from Reparations for Continued Production of Textile Machinery. (Suzuki Shiki Shokki K.K., Takatsuka Kojo, 500 Takatsuka, Kami-mura, Hamana-gun) (Munitions, SCAPIN 1134, inventory number 37-29)", dated 24 May 47.

2nd W/Ind

Headquarters, Shizuoka Military Government Team, APO 1007, 31 May 1947

TO : Commanding Officer, Tokai-Hokuriku Military Government Region, APO 710

1. Reference paragraph 1 1st W/Ind the code number of Suzuki Shiki Shokki K.K., Takatsuka Plant is 37-29 as indicated in basic letter. The error in the prefectural letter giving the number of the Futamata plant (37-28) has been corrected.

2. Reference paragraph 3 1st W/Ind, criteria of Operational Directive 5/5 Section III paragraph 1(c)(1) applies to the plant and it is presently designated as a munitions plant under SCAPIN 1134. Criteria of Operational Directive 5/5 Section III paragraph 1(c)(2) does not apply to the plant as it has been reconverted to civilian production since December 1945. All equipment is not used at present, but unused special equipment (mainly shell turning lathes) are convertible to standard machines for civilian production. As far as Operational Directive 5 Section III 2(f) is concerned, this Headquarters gave the applicants original petition for removal October 1946 a favorable recommendation only because of apparent importance to the civilian economy, as this Headquarters is of the belief that the management's statement that the plant was originally organized to replace the Hamamatsu plant for the production of textile machinery may be questioned due to the date it went into operation (1939) and to the fact that within a year its production was mainly munitions.

3. The present petition is forwarded for action without recommendation because such information as is know here regarding exemption of such facilities is that consideration is given on a purely technical application of eriteria above referred to and this Headquarters can neither refute nor prove the managements statements regarding the purposes of the original organization of the Takatsuka plant.

Headquarters 8th Army, APO 343

1. Forwarded herewith is petition by subject company for exemption of a portion of its equipment from reparations. A previous petition for exemption (19 October 1946) was disapproved.

2. Subject company was formed in 1909 and was established in Hamamatsu in 1920. The management states the Takatsuka plant, which was put into operation in 1939, was constructed to replace the Hamamatsu plant which was no longer suitable for the operations of the company (1921 production 1,625 sets, 1937 5,256 sets of textile machinery). Due to government restriction of the textile equipment industry the plant was converted to munitions production.

3. The company was an important supplier of equipment to the smaller independent weaving establishments in Japan and controlled 90% of the export of sarong looms (mainly to South East Asia).

4. Government substantiated data indicates that 20% to 25% of existing general production equipment and 90% of sarong looms (narrow width pattern weaving) are the product of subject company. In the government plan for rehabilitation of the textile industry the subject company is expected to supply 25% of the necessary production.

5. This company has 1605 inventory items (1281 at plant 37-29, 324 at plant 37-28 in Futamata). Contemplated production of 600 sets of textile equipment monthly would require

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

BASIC: Letter Headquarters Shizuoka Military Government Team, APO 1007, dated 24 May 1947, Subject "A petition for partical exemption from Reparations for continued production of textile Machinery." (Suzuki Shiki Shokki K.K., Takatsuka Kojo, 500 Takatsuka, Kami-mura, Hamana-gun) (Munitions, SCAPIN 1134, inventory number 37-29)

the exemption of 856 machines and would give employment to 2000 people. If only the prewar equipment, 477 machines were exempted production and employment would be 50% of the contemplated capacity.

6. This Headquarters feels that should the prewar equipment of this company (477 items) be exempted the company would be in a position to satisfy a portion of the reparations needs of the South East Asiatic Countries for the rehabilitation of their textile industries (over 7,000 sets of this company's products were in use in those countries before the war). Domestically the production of it's special type equipment for the smaller weaving establishments will assist in the reconstructing of textile production on a broad basis in competition to the large plants which are more suitable for war-conversion and which tend to concentrate employment in limited areas.

7. The petition is forwarded for appropriate action.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

SHIZUOKA PREFECTURAL GOVERNMENT

21 May, 1947.

SUBJECT: Petition for Exemption of Takatsuka Plant, Suzuki-type Loom Mfg. Co.,Ltd., from Reparations List.

THRU : Headquarters, Shizuoka Military Government Team.

TO : General Headquarters,
Supreme Commander for the Allied Powers.

We hereby beg to petition earnestly for the exemption of Takatsuka Plant, Suzuki-type Loom Mfg. Co.,Ltd. (#37-29) in this prefecture from Reparations Lists for the following reasons.

1. Suzuki-type Loom Mfg. Co.,Ltd. formerly had exported looms such as the sarong weaving machines, preparation machines, dyeing and finishing machines to the South Asiatic Countries. The company held the position of important exports manufacturer in Japan, especially with the sarong weaving machines covering 95% of all these machines exported to the South Asiatic Countries. In view of the forthcoming situation under which Japan must re-establish foreign trade, it is considered that the maintenance of this company is essential for Japan as the manufacturer of the reciprocal commodities for the imports such as foods and other essential materials.

2. In Japan's weaving industry circles, the small scale weaving factories had held the considerable portion of this industry and had kept its position against the large scale weaving plants attached to the spinning factories by the particular measures of management and the weaving technique, manufacturing the special high-grade cloths such as twilled fabric, striped fabrics and coloured yarn fabrics which are unfit for the large scale manufacturing factories. And these cloths had been exported principally to the South Asiatic Area. The looms to manufacture these cloths are the special machines different from those used in the large scale weaving factories and the majority of these machines in this country, especially 90% of the sarong weaving machines, had been supplied by the Suzuki-type Loom Mfg. Co.,Ltd. while the other manufacturers had produced but little quantity, and moreover the products of this company had been recognized to be most excellent of all.

Therefore, the maintenance of this company is necessary for Japan by all means not only for the restoration of the war-lost looms to the extent to meet the rehabilitation plan of Japanese Government but for the promotion and keeping of the small and medium scale weaving enterprises, which should be the foundation of Japan's industries, along lines with economic democratization against the large scale enterprises, and for the increase of production of the export cloths.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(cont'd)

3. If the production of Suzuki-type Loom Mfg. Co.,Ltd. be blocked by the evacuation of machines and equipments, it results that the exportation of both looms and cloths should be greatly hindered and even the supply of the machine parts for the exported looms to the South Asiatic Area should be impossible, so that not only the rehabilitation and maintenance of Japan's weaving industry should be menaced with the decline but the same industry of the South Asiatic Area should get severe blow.

4. As the great parts of equipments of weaving industry centered in Hamamatsu City of this prefecture were lost at the war and the remaining machines need repairs as the result of severe operations during the war, the large expectations for the restoration of these equipments are now placed on the operation of Suzuki-type Loom Mfg. Co.,Ltd. The maintenance of this company is quite necessary also for the rehabilitation of weaving industry.

We shall be much obliged if this petition will be favorably considered by your Headquarters.

T. Kobayashi

T.KOBAYASHI
Governor,
Shizuoka Pref. Gov't.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

To : Headquarters Shizuoka Military Government Team

From: Director of Machinery Bureau,
Ministry of Commerce and Industry 9th May, 1947.

Subject: Application for Exemption frpm Designation of Reparation Control to Suzuki Shiki Shokki Kabushiki Kaisha, Takatsuka Kojo. (The Suzuki Type Loom Mfg. Co., Ltd., Takatsuka Plant.) as privatly-owned munition plants.

We beg to certify that in the textile machinery equipments now existing in Japan, the makes of the above mentioned company occupy a position to such a high percentage as under:

Cotton Weaving Machines	20%
Preparing Machines	20%
Dyeing & Finishing Machines	25%
Salon Looms	90%

Besides it is officially contemplated that the same company shall act such an important role in the rehabilitation of Japan's Textile Industry, in accordance with the Three-Year-Plan, as to manufacture the new units of the following machines:-

Cotton Looms	25% (of the whole plan)
Dyeing & Finishing Machines	25% (ditto)

Furthermore, this company has a promising programme for the future to export a great deal of its world famous cotton looms and parts thereof toward the Dutch East Indies and many other countries where it has mastered an excellent fame on its products for a long time already.

Yours obediently,

(D. Saito)

Director of Machinery Bureau,

Ministry of Commerce and Industry.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

SUZUKI SHIKI SHOKKI KABUSHIKI KAISHA

300 Takatsuka, Kamimura, Hamanagun, Shizuoka Pref.

10 May 1947.

SUBJECT : Petition for Exemption of Machinery from Reparation List.

TO : Supreme Commander of Allied Powers.

THRU : Shizuoka Military Government Team.

The Takatsuka and Futamata Plant of this company were put on reparation list by GHQ on 13 August 1946 and on October 1946 a petition for the deletion of Takatsuka Plant was presented to the Supreme Commander of Allied Powers. However, on 4 April 1947 this petition was denied. Therefore, for re-establishment of Japanese industry and promotion of export from the following reasons, the company is presenting a new petition for the partial exemption of machinery in Takatsuka Plant from the reparation inventry.

Reasons for Exemption from Reparation

1. This company, since its establishment in 1909, has been devoting itself to the production of looms, preparatory, dyeing and finishing machines and has contributed greatly to the development of Japan's weaving and spinning industry. The total number of weaving machines which were in Japan before the war, has been decreased 70% due to the war disaster and also due to scrapping of them for the establishment of new enterprises. Of the remaining weaving machines in Japan at present, 20% of cotton looms, 20% of preparatory machines, 25% of dyeing machines, and 90% of Sarong Looms are the products of this company. Moreover, the number of looms exported to South-Eastern Asiatic Countries by this company before the war, totals 7,618 sets and if the repairs parts for these machines are not supplied by this company, it is likely that they will stop operating sooner or later and thus, it is a responsibility of this company to supply these repair parts. Also, since they are all patented products, the repair parts of other manufacturers are not suitable.

Due to these circumstances, orders for large number of repair parts are at present being received by this company from allover Japan. Also, thru GHQ a large order came from the Government of Indonesia, naming this company to supply the repair parts, as is shown in the attached list No. 4 . The list shows the necessary amount of repair parts, needed for looms in Indonesia for a period of one year.

2. Immediately after the termination of war, this company was granted permission to reconvert and during December 1945 to April 1947 has manufactured for home use 795 looms, 257 dobby machines, 105 preparatory machines and 22 finishing machines, as shown in the attached list No. 2.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Moreover, as of 30 April 1947, the company has received order for 2,235 looms, 1,118 dobby machines, and 291 preparatory machines. Above figures are included in 62,122 sets of new and repaired machines to be produced in the first year of the 3 year plan, for 170,666 sets of the Japanese Government to restore weaving industry and must be manufactured by all means to re-establish Japan's weaving industry. This company is shouldering the responsibility of manufacturing 25% of cotton looms and 25% of dyeing and finishing machines in the 3 year plan of Japanese Government for restoraion of weaving industry and at present, the company has a production capacity for a total of 600 sets per month of looms, preparatory, dyeing and finishing machines.

3. This company, during the years from 1932 to 1941, has exported to Indonesia, China, India, Siam, Burma, French Indo-China and other countries 7,618 looms, 279 preparatory machines and 13 finishing machines, a total of 7,910 machines. Of these types of machines, this company controls 95% of the exported Sarong looms and Suzuki Type Sarong looms became very well known among the textile industry circles.

Consequently from the above mentioned fact, orders for 700 and 200 of this company's looms have come from the Government of Indonesia and Hongkong respectively thru GHQ and it is expected from now on that a great number of orders will come to this company. Moreover apart from the above orders, the company is at present fulfilling the order for the export of 50 cotton looms to Indonesia with the assistance of the Japanese Government. The export plan of looms of this company is to complete the manufacture of 700 looms for Indonesia, mentioned above, this year and then will be able to proceed as is shown in the attached list of Plan for the Export of Looms. The above plan will be fulfilled if raw materials are to be allotted to the company and if permission for operation is granted by GHQ. Also, this company has many patents for machines used in weaving sarong, dortie, gingham, table cloth etc. and is manufacturing much better looms than other companies, and is exerting its utmost effort in manufacturing superior looms for export.

4. Japan's small and medium-sized spinning and weaving companies have expanded and become essential because, instead of producing simple and efficiency-first textile, as is done in large spinning mills, produced high-class thread-dyed pattern cloths and twilled cloths which require special technique in their production. For the production of these high-class textiles, specially designed looms are necessary and for these special types of loom this company has been inventing, designing, and devising to satisfy the requests of the weavers. Moreover, besides encouraging foreign trade, the company believes that it has rendered valuable services to the weaving industry of Japan. Thus, as stated above, this company does not supply looms in large quantities to large spinning and textile mills whose aim is to produce only plain goods, but is supplying a considerable number of looms to small and medium-sized spinning and weaving companies which produce high-class textile.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

5. During the war, this company has continued to manufacture looms and also continued in its exprimentations and has taken 43 patents for new inventions as shown in the attached list No. 6. The company would like to be recongnized of the fact that throughout the war, this company not only continued to manufacture looms but has made great effort towards peaceful industry. These patents are mostly 4-shuttle automatic looms and to-day this company considers that it's single-shuttle and 4-shuttle automatic looms are the best in the world.

6. There are only few manufacturers of dyeing and finishing machines in Japan and this company firmly believes that it's plant is essential for the manufacture of these machines.

7. At present, there are 965 employees working very hard towards production. If this company's macines and equipments are taken and removed for reparation it would take at least two years for obtaining and installing new machines to renew operation, and all employees will be thrown out of employment and their families will be reduced to beggary. These industrious workers and their families will be saved, if you will be kind enough to grant us partial exemption of machinery from reparation. Fortunately, if 856 machines necessary to meet the production plan of the company, be exempted from reparation, the number of employees required would be about 2,000 which means work for about 1,000 more people and should relieve a little of the unemployment situation of Japan to-day. If 477 machines, which the company owned before the war, be exempted from reparation, 965 employees will be freed from the trouble and hardship which result from unemployment.

From the reasons stated above, this company is presenting a petition for the exemption from reparation a total of 856 machines, as listed in attached sheet No. 9. These machines are absolutely necessary for the company's plan to manufacture monthly 300 sets of textile machinery in order to restore Japan's textile industry and to promote foreign trade. If this is not approved, the company would like to request at least 477 machines (shown in attached list No. 10.) which the company owned before the war, to be exempted from reparation. In this case, however, the company's monthly production capacity for looms, preparatory machines, dyeing machines etc., will be reduced to 300 sets.

Kindly grant to this company's petition your favourable consideration.

Signed M. Suzuki

Michio Suzuki,
President,
Suzuki Shki Shokki K.K.

Netherlands Military Mission Japan,
c/o Foreign Liaison Section G-2.

No. : 0-2-142

Annexed table No. 4

Tokyo, 8th June, 1946.
(dispatched June 10)

To : The Economic & Scientific Section,
SCAP. Tokyo.

Attention : Dr. S.M.Fine
Major F.E.Pichelle.

With reference to discussion on 5th inst, with Lt. General Schilling and the writer, please find herewith details of looms required by N.E.I. :

1. Non automatic Suzuki looms with weftchanging up to 4 shuttles, type A or C : width 36", with 3-cylinder motion for saving shuttle-changing-designcards.

2. Non automatic Suzuki looms, same as Nr. 1, but 62" width.

3. Non automatic Suzuki plain loom, width 50", suitable for excenters twill, drill, sateen, etc. up to 4/1.

4. Non automatic Suzuki plain loom, width 70", same as Nr. 3; width split-motion.

All looms suitable for individual motor-drive; 36" and 50", ½ HP, 220/380, 50.; 52" and 70" 3/4 HP, 220/380, 50 per.

If possible looms built on such a manner, that completing with fixing of Dobby's (up to 16 or 18 shafts) will be possible.

According to information obtained 700 of these looms would available in Japan in the course of the present year.

An offer of this kind would only become attractive if looms were accompanied by the necessary accessory machinery as follows:

A. Yarnpreparing machinery
   1. Warpspoolers,
   2. Weftpinners,
   3. Warping machines,
   4. Slashing machines,
   5. Drawing-in Frames.

B. Finishing machinery

Further details can be given should you require them, we shall be much obliged to learn whether the above are available.

Yours very trully
J.B.D.Pennink

Re : Subject Rayon Looms

Would you please indicate availability and price of the latest rayon looms manufactured by the Suzuki Shokki K.K. Hamamatsu.

200 looms are required with one shuttle with beam stand, 50 looms with four shuttles (Type 5P).

In addition 2 sets of weft spooling machines (Type K) spindle No. 40, 2 sets of winding machines (Type G), 7 sets of warp winding and beaming machines (Type M) and 10 ring dribting frames are required.

I am attaching a catalogue and photograph which may be of assistance.

Your Truely

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

EXPORT PLAN OF WEAVING MACHINERY

Name & Location Of the company : Suzuki Shiki Shokki Kabushiki Kaisha,
(The Suzuki Type Loom Mfg. Co. Ltd.)
300, Takatsuka Kamimura Hamanagun Shizuokaken.

Name of Loom : Suzuki's "A" Type 44" reed space Cotton Loom with one side four shuttle box.

Destination to be desired : D.E.I. (Java)

Per a set :

price in 1936	650	yen
present price	45,000	"
net weight	1,030	kgs.
gross weight	1,330	"
cubic measure	about 21	cub.m.

Possible Quantities to export :

1948	Jan.-Mar.	300	sets
"	April-June	400	"
"	July-Sept.	500	"
"	Oct.-Dec.	500	"
1949	Jan.-Mar.	600	"
"	April-June	600	"

Remarks :

We have exported several thousands looms to D.E.I. early since 1933. Namely we have exported many various type of looms and preparing machines different in size but above sarong loom was typical of all, and we have occupyed monopolistic standing there.

Accordingly we are earnestly desiring to continue to supply the parts of consumption, while meeting their new demands hereafter.
