THE BUREAU OF ENTOMOLOGY
HANGCHOW, CHEKIANG, CHINA.

A Check List of the Coccinellidae of China

中國瓢蟲科昆蟲名錄

By Chi-Ying Liu, 柳支英

College of Agric., Univ. of Chekiang, Hangchow.

The insects of this family are of considerable economic importance since the group comprises of both beneficial and injurious forms. The utilization of *Rodolia cardinalis* in the control of *Icerya purchasi* is an example too well known among the entomologists. In China several ladybirds are known under natural conditions to keep some scale insects and aphids in check, e. g. *Rodolia limbata* on the mulberry coccid (*Drosicha contrahens* Wlk.), *Rodolia rufopilosa* on *Icerya purchasi*, *Coccinella axyridis* on the wheat aphid and *Synonycha grandis* on the bamboo aphid etc. The few examples mentioned above will suffice to show the rôle they played in nature. On the other hand, several species belonging to the genus *Epilachna* are notorious pests of Solanaceous and Cucurbitaceous plants.

Since 1929 the writer began to collect and study these little hemispherical ladybirds. The list is primarily based upon Korschefsky's catalogue on Coccinellidae (published in *Coleopterorum Catalogus* as pars 118 and 120 in 1931 and 1932 respectively) with some recent additions. It includes, however, many records which are new to China. Most of the localities were based upon the collections of the Bureau of Entomology at Nanking and at Hangchow, of the University of Chekiang and of Dr. C. F. Wu of Yen-ching University. The list contains one hundred and thirty-five species and twenty-five varieties scattered among forty-two genera and will certainly increase if proper attention is given to it.

Thruout the course of the work the writer has received the

helps from the following persons. Prof. G. P. Jung, formerly Director of the Bureau of Entomology at Nanking and Prof. F. C. Woo, formerly Director of the Bureau of Entomology at Hangchow and Mr. C. Y. Wong, Curator of the same institute, generously turned over to me the collections of the respective bureau. Dr. C. F. Wu identified for me the collection of the Bureau of Entomology at Nanking and donated a number of specimens to the same institute and supplied me a list of localities from his private collection. Mr. C. J. Yu furnished me a number of descriptions of about thirty Japanese species from Tokyo in 1930. Prof. M. Chujo of the Entomological Laboratory of Taihoku Imperial University, Formosa, sent me thirteen Formosan species from his personal collection. Dr. H. M. Armitage, Supervisor of Plant Quarantines at San Francisco, California, gave me a number of American specimens. To all of these who have assisted me in one way or another I wish to express my gratitude and appreciation.

Subfamily EPILACHNINAE

Genus *Ballida* Mulsant

B. brahamae Mulsant, 1850. China.

Genus *Epilachna* Redtenb.

E. acuta Ws., 1899. Kansu.

江浙棉作害蟲之寄生及肉食昆蟲

A List of the Parasitic and Predaceous Insects of Cotton Pests In Kiangsu and Chekiang.

李鳳蓀(浙江省昆蟲局蚊蠅研究室) By Li, Feng-swen.

Abstract This List consists of 55 beneficial species and most of them are the result of 4 years collection (1930-1933) of the writer in the cotton fields in Kiangsu and Chekiang.

棉作害蟲之生物防治，年來日益受人注意。如1928年加拿大由歐洲輸入寄生於粟野螟蛾之小繭蜂 *Microbracon brevicornis* Westw. 3,274,500隻，蘇丹由剛果(Kenya)輸入寄生於紅鈴蟲之小繭蜂 *Microbracon kirkpatricki*, 1929年檀香山由臺灣輸入寄生於金龜子 *Adoretus sinicus* 之土蜂等，均其犧牲大者。作者往昔主持江蘇省昆蟲局棉蟲研究所時，曾於重要棉蟲之天敵，加以特別注意(中國棉蟲之已知者達116種，而重要者僅餘20餘種，詳見本局民國二十二年年刊第185—187頁)，來浙後雖改行從事蚊蠅之探討，然仍於公暇繼續此項天敵之採集及觀察。下表即為1930—1933年四年間之結果，共55種，其中以黑蛹寄生蜂 *Sympiesis* sp. 及小繭蜂 *Microbracon* spp. 諸種尤為重要，且有人工保護及繁殖之必要。後者前在江蘇南通時曾見該地之越冬紅鈴蟲幼蟲，受其寄生者達45%，而捲葉蟲幼蟲之為

前者寄生者亦達43%。又表中所列江浙以外各地所產之諸種，係乃參考而得。

作者蒙美國博物館代為鑑定學名，本局局長張師歸農時賜指導，寄生昆蟲研究室主任觀君汝佐貢獻參考，馬君駿超往廈門採集樣本，（見本刊第三卷第178—182頁）及吳君希澄李君安民助為整理，均此誌謝！

書報介紹

Chen, S. H. [陳世輝] -- Revision of the Halticinae (Col. Chrysomelidae) of Yunnan and Tonkin. (雲南及安屬東京跳繩類昆蟲全誌)(英文) -- *Sinensis*, V:4-5, pp. 225-416, 85 figs. Nanking. Oct. 1934. 文內所述及之跳繩類，共約178種（變種在內），內新種約四十餘；分屬54屬，內新屬四，即 *Sebactoides*, *Looria*, *Letziana* 及 *Aphthonomorpha*。各屬屬，均附有參考文獻，形態及分佈及檢索表。所附插圖亦頗精緻。文末附載菲列賓產之跳繩類計2屬20新種，最末為中國及安屬東京之已知跳繩昆蟲名錄，計64屬238種，計 *Nonarthra* 6種， *Psyllodes* 9, *Eutrepa* 1, *Dibolia* 1, *Tribolin* 1, *Chaetocnema* 19, *Sangariola* 1, *Laboissierea* 1, *Epitrix* 2, *Lipromima* 1, *Harmalica* 1, *Crepidomorpha* 1, *Sinocrepis* 1, *Crepidocera* 3, *Griva* 1, *Pseudodera* 4, *Xutha* 1, *Chalcoides* 3, *Laboissierella* 1, *Liprus* 1, *Podontia* 5, *Ophrida* 4, *Neorthaea* 8, *Nisotra* 1, *Podegricella* 1, *Mentura* 1, *Podegricomela* 4, *Clitea* 2, *Glaucosphaera* 1, *Acrocrypta* 1, *Philopoma* 2, *Hyphasis* 11, *Sebactoides* 1, *Sebacthe* 19, *Laosia* 1, *Pentameris* 1, *Agropites* 2, *Argopus* 4, *Chilocoristes* 2, *Sphaeroderma* 14, *Lesneana* 1, *Jacobyana* 1, *Eucyela* 2, *Parathrylaea* 2, *Omeiana* nom. nov. (*Omeia*) 1, *Iaozeus* 1, *Letzella* 2, *Hesperi* 7, *Luperomorpha* 6, *Ectostria* 1, *Longilaris* 14, *Batophila* 1, *Aphthonomorpha* 2, *Manobdia* 3, *Aphthona* 11, *Phyllotreta* 5, *Lypnea* 1, *Phygasia* 3, *Lactica* 2, *Pseudargopus* 1, *Ochrosoma* 1, *Manobia* 6, *Zipangia* 2, *Haltica* 8.

(馬駿超)

Ho, Wen-chuan (何文俊) -- Taxonomy, Distribution and Economic Importance of chrysomelidae in Szechwan. (四川金花蟲科甲蟲分類分布及經濟上之重要) (英文) -- *Jour. W. China Border Res. Soc.*, 1933-1934, vi, pp. 142-161, Chengtu, 1933. 作者於1932年在成都附近採集之結果，得金花蟲38種，文內所述及者計15種，計 *Sagra petilli* Lacord (蘿蔔) • *S. purpurea* Licht. (蕪菁, White turn-shan) • *Colaspisoma metallicum* Clark. (成都) • *Caryosochus Chinensis* Baly.

(成都), *Chrysomela curvicollis* Mann. (峨眉山), *Eumela cyanicollis* Hope (峨眉山, 灌縣), *Colpocellus howringi* (成都), *Melasoma aeneipennis* Baly (峨眉山), *Oides decimpunctata* Billb. (成都, 重慶), *Rhegmatopala chinensis* Weise (成都), *Agetocera deformicornis* Laboiss. (峨眉山), *Sepharia rubrifemata* Fairm. (峨眉山), *Pedontia lutea* Oliv. (樂山, 重慶), *Ophrida spectabilis* Baly (灌縣), *Phygasia ornata* Baly (峨眉山)。文首附有檢索表, 各種之下, 復詳載其同物異名, 形態分佈。
(馬駿超)

Ho, Wen-chun [何文俊] & Pei, Da-si [彭達詩] -- A Preliminary List of Butterflies of Szechwan. (四川蝶類名錄) (英文) -- *Jour. W. China Border Res. Soc.*, 1933-1934, IV, pp. 162-195. Chengtu, 1933. 本文係就 G. M. Franck 司鐸(約1430件), D. C. Graham 博士, 及作者(約370件)在四川採集結果, 累集而成(各次採集之地點, 計為重慶, 成都, 巫山, 茂州, 灌縣, 鄱縣, 溫江, 雅州, 打箭爐, 穆坪, 松潘, 峨眉及叙府)共208種, 計鳳蝶科23種, 粉蝶科28種, 斑蝶科4種, 眼蝶科60種, 環紋蝶科6種, 紋蝶科101種, 長喙蝶科6種, 小灰蝶科36種。每種之下, 附有原始記載出處, 异名, 在四川之分佈及發生期。
(馬駿超)

Prout, L. B. -- New Species and Subspecies of Geometridae. (尺蠖蛾科新種論) (英文) -- *Novit. Zool.*, xxxix:2, pp. 99-136. Tring, 1934. 文內共述及新種 75, 新屬 1, 其中採自中國者為 *Hydrelia laetivirga* (四川) *Alcis arisema frencki* (四川), *Ephoria auratilis* (灌縣)。(轉錄 *Lingnan Sc. J.*, xiv, p. 373. 1935.)
(馬駿超)

Netolitzky, F. -- Europaeisch-Asiatische *Bembidion*-Arten unter besonderer Berücksichtigung der Typen von Solsky [歐亞*Bembidion* 屬步行蟲論] -- *Koleop. Rundsch.*, xx:1-2, pp. 63-74. Wien, 1934. 文內共述及 *Bembidion* 屬昆蟲 24 種, 內新種若干, 而 *B. (Peryphus) serorum* sp. n. 則採自甘肅省之蘭西與 Hwei-si 及河北省。(轉錄 *Lingnan Sc. J.*, xiv, p. 372. 1935.)
(馬駿超)

Uvarov, B. P. -- Notes on Acrididae from South China. (華南蝗蟲論) (英文) -- *Lingnan Sc. J.*, xiv:2, pp. 297-270, 2 figs. Canton, Apr., 1935. 文內共述及華南產之蝗蟲共 7 種, 即 *Pteragonista infumata* Willemse (廣州, 羅浮山), *Aulacobothrus latripes* (Wlk.) (廣州), *Tristria laevata* Stal (香港), *Oxya dominata* (Wlk.) (廣州), *O. tintamai* sp. nov. (羅浮山, 3800-4000 尺), *Euprepocnemis hokutensis* Shir. (廣州, 羅浮山), *Apocnemis splendens* (羅浮山)。其中一新種之模式標本(雌雄)存英國博物院, 另一雄蟲存嶺南大學。
(馬駿超)

Hoffmann, W. E. -- Notes on the Life-history of *Neojurtina typica* Dist. (Hemip... Pentatomidae) [一種臭椿象之生活史] (英文) -- *Lingnan Sc. J.*, XIV: 2, pp. 261-266, 2 pl., 2 refs. Canton, Apr., 1935. 此種椿象分佈於安南之東京、婆羅洲及香港, 為害一種冬青 *Ilex cinerea* Champ.。文內於生活史有簡短之敘述, 並

- 成蟲幼蟲各齡(除第三四齡外)及卵各期之形態，就後特詳。
 (馬曉輝)
- Tinkham, E. R. -- Preliminary Notes on Injurious Rice Grasshoppers of the Genus *Quitta* stal from South China and Cochin China (Ortho: Acrididae) [華南及交趾支那之 *Quitta* 屬稻蝗] (英文) -- *Entomol. Sc. J.*, XIV:2, pp. 321-328, 4 tabs., 2 refs. Canton, Apr., 1935. 此為華南及交趾支那之 *Quitta* 屬稻蝗之分布及形態之初步觀察。所述者計 *Q. oryzae* Uv. (交趾支那), *Q. mitrata* stal? (羅浮山, 香港), *Q. sp.* (廣州), *Q. n. sp.* (交趾支那)。
 (馬曉輝)
- Li, L. Y. [林來榮] -- A Preliminary Report on the Occurrence of *Telenchus semipenetrans* Cobb in the Roots of citrus Nursery Plants of South China, [華南橘苗之線蟲調查初步報告] (英文) -- *Entomol. Sc. J.*, XIV:2, pp. 331-33, 10 refs. Canton, Apr., 1935. 此種線蟲分布於廣東之海豐, 上華, 河源, 蘭嶼, 舊會, 羅崗, 潮州, 汕頭。其在華南之寄主如 *Citrus reticulata* Tanaka, *C. grandis* Osbeck, *C. limonum* Osbeck, *C. microcarpa* Bunge, *C. nobilis* Loire, *C. sinensis* Osbeck, *Fortunella* sp. 以及雜種檸檬。
 (馬曉輝)
- Dubrovolny, C. G. -- Studies on the Nematode Parasites of the American Cockroach, *Periplaneta americana* [寄生於美洲蜚蠊之線蟲] (英文) -- *Trans. Kansas Acad. Sc.*, XXXVI, pp. 213 (abstr.), Manhattan, Kansas, Apr., 1933.
 (馬曉輝)
- Falls, O. -- Sex Attraction in *Semina eucropia*. [天蠶蛾之性物誘惑] (英文) -- *Trans. Kansas Acad. Sc.*, XXXVI, pp. 215-217, 1 fig. Manhattan, Kansas, Apr., 1933. 著者以一種天蠶蛾 *Semina eucropia* 試驗之結果：未交尾之雌蛾，能誘致雄蛾（距離至大）之來集，已交尾者則否；原係未交尾雌蛾附近之雌蛾，於該雌蛾交尾時，其他雄蛾即離去。
 (馬曉輝)
- Evans, J. W. -- Notes on the Behaviour of the Larval Communities of *Perga dorsalis* Leach (Hym., Tenthredinidae). [一種新脊鋸之羣居性] (英文) -- *Trans. Roy. Ent. Soc. London*, LXCI (1933), pp. 455-460, 5 figs., 11 refs. London, Dec., 1934. 此篇解述新脊鋸之羣居，各個體間之關係，雖較天社蝶科等昆蟲為密切，且母蟲與其幼蟲間偶或合羣，然而並非胡蝶，蝶，蜜蜂等高等構造昆蟲之社會生活之羣形。
 (馬曉輝)
- Etringham, H. -- On Some Further Remarkable Structures in Trichoptera, [數種毛翅目之特異結構] (英文) -- *Trans. Roy. Ent. Soc. London*, LXCI (1933), pp. 409-414, 1 pl., 6 refs. London, Dec., 1934.
 (馬曉輝)
- Jones, F. M. -- Further Experiments on Coloration and Relative Acceptability of Insects to Birds. [鳥類對昆蟲色彩之喜好相關試驗續誌] (英文) -- *Trans. Roy. Ent. Soc. London*, LXCI (1933), pp. 415-41, 2 pl. London, Dec., 1934.
 (馬曉輝)

Mc Atee, W. L., et al. -- Relative Acceptability of Insects to Birds. (鳥類對於昆蟲之相屬喜好性) (英文) -- *Proc. Roy. Ent. Soc. Lond.*, VIII:2, pp. 113-116, (1933); XI:2, pp. 21-37, (1934). London, Dec., 1934. (馬駿超)

本局消息

一、建廳派員指導棉稻推廣區治蟲工作 建設廳以各縣棉業改良實施區，雙季稻推廣區，整純系稻實施區各辦事處，均經紛紛呈報成立，所有實施工作，亦將次第實施，關於各該處防治蟲害問題，極為重要，取應派員負責指導防治，以免害蟲滋生，昨派第一區農場治蟲專員瞿光宇常川駐杭縣純系稻實施區辦事處，沈祖仁常川駐杭縣棉業改良實施區辦事處，趙崇定常川駐海寧縣純系稻實施區辦事處；第二區農場治蟲專員郎仁常川駐嘉興縣純系稻實施區辦事處，周羽儀常川駐海鹽縣純系稻實施區辦事處；第三區農場治蟲專員鍾王模常川駐吳興縣純系稻實施區辦事處，覃鳳常川駐長興縣純系稻實施區辦事處；第四區農場治蟲專員章成憲常川駐慈谿縣雙季稻推廣區辦事處，周經模常川駐鎮海縣雙季稻推廣區辦事處，楊福山常川駐慈谿縣棉業改良實施區辦事處；第五區農場治蟲專員劉望常川駐蕭山縣雙季稻推廣區辦事處，何其名常川駐餘姚縣雙季稻推廣區辦事處，樓永厚常川駐嵊縣雙季稻推廣區辦事處；第六區農場治蟲專員郭銑常川駐臨海縣雙季稻推廣區辦事處；第七區農場治蟲專員湯春揚常川駐義烏縣純系稻實施區辦事處；第十區農場治蟲專員周成章常川駐平陽縣雙季稻推廣區辦事處。特別注意指導該處防治蟲害工作，仍兼顧原負責各縣指導任務，並飭各區農場轉飭該員等赴日前往云。(5月3日杭州東南日報)

二、派員調查桑蠶 嘉興及桐鄉近年受桑蠶之害殊烈，幸賴治蟲人員努力防治，得逐漸減輕，茲據實地調查；嘉興七星鄉蠶場鄉墾靈鄉之南草蕩間為桑蠶最盛之區，本年則為害甚輕，每株土僅見三五頭，桑葉發育良好；桐鄉之太平鄉日暉鄉，較嘉興稍重，在宜橋鄉之周家橋及樓上門等處，則較烈，惟面積均甚小；長興之夾浦亦有發現，為害甚輕，，春葉無常發育；吳興之西門外發生最劇，惟面積亦小。

三、幾種桑蟲之生活近狀 人紋燈蛾第一化，產出卵數最多達1122粒，共經過十日產卵；桑蛀蟲越冬幼蟲活動後，已有蛀第四孔者，連越冬前蛀孔數，有達17個之多；桑極蟲(害桑莖之天牛，在蘇杭一帶以之養鳥)越冬幼蟲已于四月中旬化蛹；黑翅基黃蟲(前在長興採來)越冬卵已於四月十三日孵化，現已着手飼養考查其生活習性；桑蠅卵已於四月27日開始孵化，較之往年約早一個半月；桑蠶已於四月下旬成行羽化，亦較往年提早半月至。

四、檢得三種寄生蜂 在易溪及莫裕所採得之桑蠶卵塊，已發現長腹葉蜂，現已進行此蜂生態之考究；去年在七堡未來紅蜘蛛，現已羽化斑蜂一種，為 *Pristomerus vulnerator* Panz.；在吳興及無錫等處，採得之桑尺蠖，其幼蟲被寄生甚多，檢係小繭蜂，已於四月繼續羽化，係 *A. panteles* W.之一種。

五、派員講演臭蟲防除法及配製家庭殺蟲劑 新生活運動促進會主辦之撲滅杭州市五蟲運動宣傳週第二日，由本局派農用室顧玄赴省立廣播電台講演『臭蟲

防除法上，協同宣傳；並配製家庭殺蟲藥劑，以爲撲滅臭蟲實驗之用，其配方爲洋酒五加侖，除蟲菊一磅半，四氯化碳一磅半。

六、採收除蟲菊 本局所栽植之除蟲菊，生長茂盛，均已開花，現已分期採收，以作試驗。

七、確定稻病防治試驗計劃 植物病理研究室確定本年度稻作病害防治試驗計劃爲：(一) 穀種消毒預防試驗，(二) 藥劑撒佈防治試驗，(三) 糜蠅肥料與稻熱病關係試驗，(四) 抗病稻種選擇等四項。其第一及第四兩項，所用之種籽，已於上週分別下種。

八、函飭治蟲人員努力工作 近來稻蟲棉蟲果蟲桑蟲及森林害蟲蔬菜害蟲等，漸次發現，爲防患於未然計，特函飭各縣治蟲人員，努力治蟲工作，並探寄普通昆蟲標本來局，以明浙江省各種昆蟲之分佈。

九、灌水注油治螟試驗 稻蟲研究室所作灌水注油治螟試驗，其中之浸水日期試驗組，已於四月告竣，茲將結果列後：

浸水 日期	檢 查 數	二化螟				三化螟				大螟			
		生	死	共	死亡率	生	死	共	死亡率	生	死	共	死亡率
10	1000	12	6	18	33.33%	18	71	89	79.78%	..	8	8	100%
20	1000	10	4	14	28.57%	..	60	60	100%	3	4	7	57.14%
30	1000	3	3	9	66.67%	..	79	79	100%	2	3	5	60.00%
40	1000	2	6	8	75.00%	..	84	84	100%	2	2	2	100%
50	1000	..	15	15	100%	..	86	86	100%	3	3	3	100%
共計	5000	27	37	46	57.81%	18	380	396	95.48%	5	20	25	80%

十、稻蝗卵埋土深度與幼蟲出土之關係試驗 四月上旬，稻蟲研究室在農場附近地上，曾將稻蝗卵分組埋於土中，又將每組深度，分成一寸二分至六寸，待後觀察其能孵化之深度。

十一、整蠶卵之野外考查 稻蟲研究室於四月二十日及二十七日，見整蠶之卵塊，多產於田岸坡上部份之沙質土壤中，深度約有六十餘公分，卵塊長度約有三十至四十公分，每卵塊有卵50粒左右。

十二、講授驅除五蟲方法 五月四日省會公安局及市政府衛生科，特派衛生醫士及衛生稽查，共三十餘人，來局聽講驅除五蟲方法及注意事項，當即派藥劑室主任顧玄，詳加指導。

十三、派員查勘蝗蝻 五月八日杭縣治蟲人員電告本局，謂市縣交界處之七八兩堡等處，發現蝗蝻，本局爲明瞭真相以便防治起見，曾派員二度查勘，結果未見發生。

各縣消息

遂安

一、續辦實施區 該縣自去年開始辦理實施區，嗣因天氣亢旱，於八月底即行結束；本年仍繼續辦理，區址設縣南安陽鄉，面積約一千餘畝，已擬具預算呈覽，於五月一日開始工作。

龍游

發現鐵甲蟲

該縣西門外一帶，發現鐵甲蟲甚多，正在交尾產卵期中

，縣府當即分飭各鄉鎮長及各保長等，通知所屬農民，一體注意防治。（5月6日杭州東南日報）

紹興

東關發現鐵甲蟲

紹興東關一帶之秧田，發鐵甲蟲為害，現正交尾

產卵，治蟲人員正在力謀防治。

雲縉

麥收預估五成

該縣去歲旱災慘重，嗷嗷待哺之災黎，滿望今歲麥收

豐稔，以資補救；無如春雨連綿，以致妨礙麥之發育，發生黑穗，估計收

成，僅有五成云。（4月28日東南日報）

天台

小麥收成可慮

該縣小麥為主要食糧，有所謂『小麥收成熟，食糧半年足』之謠。今歲春雨綿綿，以致麥花濕爛，麥穗發黑，俱呈秀而不實之

現象。據一般老農云，收成至多五成云。（4月28日東南日報）

麗水

考查檻毛蟲

麗水縣長兼舊處屬治蟲辦事處主任丘遠雄，以處屬各縣

境內多山，森林害蟲，向極嚴重，尤以檻松毛蟲為害最烈，此次為明瞭該

蟲等為害實況起見，特諭治蟲專員蔣超，朱國亮，崔伯泉，及督促員項鴻飛，會同省

昆蟲局指導員夏開圃，前往發生地域實地考查，並勸令農民從速防治。（5月9日杭州

東南日報）

國內消息

蚌收買鳳蝶

蚌埠公安局收買老鼠蒼蠅，預防疫病。（5月9日杭州東南日報）

河北元氏麥穗霉黑

該縣自春迄今，雨量異常缺少，致

麥苗底葉已乾枯，上層葉表露出白色小點，莖甚矮，現已抽穗，穗復間有霉黑者，秋

收勢將減少。（5月3日天津大公報）

國際消息

日本農學臨時大會植物病理學部會議演要旨

本年十一月廿三日，鹿兒島高等農林學校舉行廿五週年紀念

典禮，翌日日本農學臨時大會乘機召開大會；是日午前在講堂

中舉行特別講演，午後一時改開植物病理部會，出席會員共十四人，內講演者十一人

，至五時半後始行散會。其演講題如下：(1)麥黑銹菌中間寄主植物之研究(出田新)，

(2)梨赤星病菌之性(河村榮吉)，(3)煙草梗折病病原菌研究(瀧元清透)，(4)*Phytophthora Nicotianae* Breda de Haan 菌及其寄生性之研究(津曲彥壽)，(5)煙草空洞病之病理

解剖(摘要)(木場三郎)，(6)榆木材變色原因及其防止之研究(北島君三)，(7)柑橘瘡瘍病之病菌形成研究(常谷幸榮)，(8)鹿兒島地方發生小麥銹病研究(內藤壽)。(錄自

日本植病學會報第四卷第3.4號第236頁)

(崔伯泉)

昆蟲學術語辭典著手編纂

昆蟲學術語辭典新編現正編纂中，現正徵集最近數年所創用之新名詞及其出處，凡欲與聞此事者，可向 Parker & Smith, Avenue

Godillot, Hyères, Var, France 接洽云。(Ent. News, xlvi, p. 84, Mar., 1935.)
