Four radio towers were observed in a small settlement on the east central coast of TOKUNO SHIMA. Two earlier target CAP's were instructed to attack three possible control stations, and had left one building rased and two damaged. This flight attacked the two remaining buildings, setting one of them afire with .50 calibres, the remaining structure was of concrete and refused to burn. The highly inflammable nature of the surrounding buildings caused the fires to spread so that two areas of the village were completely burned out.

The antiaircraft fire indicated under section IX above was met at WAN Airfield, KIKAI SHIMA. At the northeast field on KIKAI, medium and light automatic weapons set up a meagre amount of inaccurate fire. Gun emplacements were strafed at each of these fields.

During the remainder of the time the coasts were searched for small craft with negative results.

The two photo planes covered areas of TOKUNO SHIMA Airfield which were attacked by elements of the U.S.S. INDEPENDENCE the following day.
