GAZETTEER TO MAPS OF BURMA

This Gazetteer, compiled by the United States Board on Geographical Names in conjunction with the Geographic Branch of G 2, General Staff, presents an alphabetical listing and location of place names in Burma. The list is based on maps published by the Survey of India. The 1:63,360 scale series by this agency was employed for most of Burma, and where this series was not available, the 1:253,440 scale series was used. Index maps at the back of this volume indicate the layout of sheets of these two map series used in preparing the gazetteer.

The Gazetteer has been designed to facilitate the locating of natural and cultural features. Names listed have not necessarily been approved by the United States Board on Geographical Names.

All names are arranged in three columns as follows:

COLUMN 1.

Names.—Names are arranged in alphabetical order and are listed with spellings and capitalizations as they appear on the maps. Except for inhabited places, the designation of features named, i. e., stream, mountain, bridge, etc., is given in brackets after the name. In cases where English generic terms or abbreviations thereof form a part of the name, English designations in brackets are not given. For a key to designations and abbreviations appearing in brackets see the table below. A key also is given to abbreviations for English generic terms.

COLUMN 2.

Sheet Numbers.—The sheet numbers given in column 2 are of two different types, and this difference is used to indicate the map series and scale used. Sheet numbers made up of the sequence NUMBER—LETTER—NUMBER (84 G/1) indicates the 1:63,360 series. Sheet numbers containing a LETTER—NUMBER—LETTER SEQUENCE (F–46 P) indicates the 1:253,440 series.

COLUMN 3.

Geographic Coordinates.—In the case of the 1:63,360 series of maps, the latitude and longitude respectively are given for the center of a one-minute quadrangle containing the feature named. The center of a 5-minute quadrangle is indicated for features taken from the 1:253,440 series.
