BOOKS FOR FARMERS AND OTHERS.

In response to inquiries made for books treating on various subjects of interest to the farmer, I publish the following list of works, any of which will be sent post-paid, to any address in the United States or Territories, on receipt of the price.

Allen's (R. L. & L. F.) New American Farm Book.....	2 50	How Crops Feed, by Prof. S. W. Johnson.....	2 00
Allen's (R. L.) Diseases of Domestic Animals.....	1 00	How to make Candy.....	50
American Bird Fancier.....	50	Hunter and Trapper.....	1 00
Amateur Trap Makers and Trappers' Guide.. Paper, 50 cts.; Cloth	75	Herbert's Hints to Horse Keepers.....	1 75
American Cattle, by L. F. Allen.....	2 50	Jennings on Cattle.....	1 75
American Manures, (Bruckner).....	1 50	Jennings on Sheep, Swine and Poultry.....	1 75
American Rose Culturist.....	30	Jennings on the Horse and His Diseases.....	1 75
American Weeds and Useful Plants.....	1 75	Jonsson's How Crops Grow.....	2 00
; Fruit Garden.....	2 50	Johnston's Agricultural Chemistry.....	1 75
Bennett's Rabbit Fancier.....	30	Johnston's Elements of Agricultural Chemistry.....	1 50
Bonner's Method of Making Manures.....	25	Leuchar's How to Build Hot Houses.....	1 50
Breel's New Book of Flowers.....	1 75	Miles on the Horse's Foot.....	75
Bridgeman's Young Gardener's Assistant.....	2 00	My Vineyard at Lakeview.....	25
Brook's Corn and Brooms.....	50	Mrs. Cornelius's Young Housekeeper's Friend.....	1 50
Buist's Flower Garden Directory.....	1 50	Murray's The Perfect Horse.....	4 00
Bureau's New Poultry Book.....	2 00	Norris's Fish Culture.....	1 75
Brown's Cider Maker's Manual.....	1 50	Our Farm of Four Acres..... Paper, 30 cts., Cloth	60
; Canary Birds..... Paper, 50 cts.; Cloth	75	Pardee on Strawberry Culture.....	75
Chorlton's Grape Grower's Guide.....	75	Parsons on the Rose, by Samuel B. Parsons.....	1 50
Cobbett's American Gardener.....	75	Pedder's Land Measurer.....	60
Cole's (S. W.) American Fruit Book.....	75	Phin's How to use the Microscope.....	75
Cole's Veterinarian.....	75	Practical Floriculture, by P. Henderson.....	1 50
Cranberry Culture, by Joseph J. White.....	1 25	Peach Culture (Fulton).....	1 50
Dadd's (George H.) Modern Horse Doctor.....	1 50	Quinn's Pear Culture for Profit.....	1 00
Dadd's American Cattle Doctor.....	1 50	Quinn's Money in the Garden.....	1 50
Dana's Muck Manual.....	1 25	Quinby's Mysteries of Bee Keeping.....	1 50
Eastwood on Cranberry.....	75	Quincy (Hon. Josiah) on Soiling Cattle.....	1 25
Elliott's Western Fruit Grower's Guide.....	1 50	Randall's Sheep Husbandry.....	1 50
Field's (Thomas W.) Pear Culture.....	1 25	Richardson on the Dog..... Paper, 30 cts., Cloth	60
Flax Culture.....	30	Saunders' Domestic Poultry..... Paper, 40 cts., Cloth	75
Flint (Charles L.) on Grasses.....	2 50	Skiffull Housewife.....	75
Fuller's Grape Culturist.....	1 50	Shooting on the Wing.....	75
Fuller's Small Fruit Culturist.....	1 50	Stoddard's American Egg Farm..... Paper, 50 cts.; cloth	75
Fuller's Strawberry Culturist.....	2 50	The Horse (Stonehenge) Am. edition.....	2 00
Geylin's Poultry Breeding.....	1 25	Tim Bunker Papers.....	1 50
Grant's Beet Root Sugar.....	1 25	Thompson's Food of Animals.....	1 00
Gregory on Carrots and Mangolds.....	30	Tobacco Culture.....	25
Gregory on Squashes.....	30	Turner's Cotton Planter's Manual.....	1 50
Gregory on Cabbages.....	30	Waring's Draining for Profit and Health.....	1 50
Gregory on Onions.....	30	Waring's Earth Closets.....	50
Guenon on Milch Cows.....	75	Warder's American Pomology.....	3 00
Harris's Insects Injurious to Vegetation, Ex. Clo.....	4 00	Warder's Hedges and Evergreens.....	1 50
Henderson's Gardening for Pleasure.....	1 50	White's Gardening for the South.....	2 00
Harris on the Pig. By Joseph Harris.....	1 50	Youatt and Spooner on the Horse.....	1 50
Henderson's Gardening for Profit.....	1 50	Youatt and Martin on Cattle.....	1 50
Hop Culture.....	30	Youatt on the Hog.....	1 00
Horse Training Made Easy (Jennings).....	1 25	Youatt on Sheep.....	1 00
How I made \$350 per year by my Bees.....	25		

Cold Frame and Hot Bed.

Early tomato plants in a small way may be raised in flower pots or boxes in a warm kitchen window; so also may egg plants and peppers. When raising them in the house, the pot or box containing the seed should be placed quite near the stove for a few days, and the soil be kept well moistened until the plants begin to break ground, when they may be removed to a warm window. It is best, if practicable, to have but one plant in each pot, that they may grow short and stocky. If the seed are not planted earlier than the first of April for out of door cultivation a cold frame will answer. Cold frames are extensively used by market gardeners to carry lettuce and cabbage plants through the winter. Select the locality in the fall, choosing a warm location on a southern slope, protected by a fence or building on the north and northwest. Set posts in the ground, nail two boards to these parallel to each other, one about a foot in height and the other towards the south about four inches narrower; this will give the sashes resting on them the right slope to shed the rain and receive as much heat as possible from the sun. Have these boards at a distance apart equal to the length of the sash, which may be any common window sash for a small bed, or the length of a usual gardener's sash. If common window sash is used, cut channels in the cross bars to let the water run off. Dig the ground thoroughly, (it is best to cover it in the fall with litter to keep the frost out,) and rake out all stones or clods; then slide in the sash and let it remain closed three or four days that the soil may be warmed by the sun's rays. The two end boards should rise as high as the sash to prevent the heat escaping, and the bottom board of a small frame should have a strip nailed inside to rest the sash on. Next rake thoroughly in guano or phosphate or finely pulverized hen manure, and plant in rows three to six inches apart, depending on whether the plants are to be allowed to remain or are to be transplanted; if the latter then three inches will be sufficient distance. Thin out the tomato plants when quite small, but allow peppers to remain rather thick at first by reason of danger from depredations of the cut worm. As the season advances, raise the sashes an inch or two in the middle of the day and water freely at evening with water that is nearly of the temperature of the earth in the frame. As

the heat of the season increases whitewash the glass, and keep them more and more open until, at about the close of May, just before the more tender varieties are set in open ground, allow the glass to remain entirely off both day and night, unless there should be a cold rain. This will harden them so that they will not be apt to be injured by the cabbage beetle, as well as chilled and put back by the change. If the tomato plants have been well hardened, the stalks will be of a red color. Should the plants be getting too large before the season for transplanting, they should be checked by drawing a sharp knife within a couple of inches of the stalk. If it is desirable to dwarf the tomatoes and thus force them into a compact growth, transplant into another cold frame, allowing each plant double the distance it before occupied.

The structure and management of a Hot Bed is much the same as that of a Cold Frame, with the exception that being started earlier the requisite temperature has to be kept up by artificial means, fermenting manure being relied upon for the purpose, and the loss of this heat has to be checked more carefully by straw matting, and in the far North by shutters also. The front and back are also made higher than in a cold frame.

Horse manure with plenty of litter and about quarter its bulk in leaves, if attainable, all having been well mixed together is thrown into a pile, and left for a few days until steam escapes, when the mass is again thrown over and left for two or three days more, after which it is thrown in the pit (or it may be placed directly on the surface) from eighteen inches to two feet in depth, when it is beaten down with a fork and trodden well together. The sashes are now put on and kept there until heat is developed. The first intense heat must be allowed to pass off, which will be in about three days after the high temperature is reached. Now throw on six inches of fine soil, in which mix a very liberal supply of well rotted manure free from all straw, or rake in thoroughly superphosphate or guano, at the rate of 2000 pounds to the acre and plant the seed as in cold frame. Keep day temperature 70 to 80 degrees and don't allow it to fall below 55 degrees at night. If the temperature exceed 75 degrees the plants are liable to grow spindling and weak. Do not move the sashes to give air immediately after removing the mats in the morning, lest the young plants damp off.

Customers will observe that although the rate of postage still continues double what it was in former years, I have *dropped all charges for postage on my seed*,—with the exception of such kinds as I sell by measure. I do this in return for the liberal patronage I have received, and to meet the exigencies of hard times. My prices I have in many instances lowered, and have uniformly endeavored to make them as reasonable as the quality of the seed I send out will warrant.

JAMES J. H. GREGORY'S Annual Seed Catalogue for 1878.

The past season in the East, has on the whole, been a good seed season, the remarkably warm fall being quite favorable for some of the late varieties.

My seed growing facilities now include six farms, carried on directly under my own supervision, with about one hundred acres in annual tillage. On these I grow about a hundred and fifty varieties of the vegetable seed contained in this catalogue. Besides my Marblehead seed farms, I have three in a neighboring town, also devoted to seed growing. Of these advantages I avail myself to produce complete isolation. All roots, bulbs, &c., intended for seed purposes, are selected with the utmost care.

THE THREE WARRANTS. 1st, That my seed shall be what it purports to be, so far as that I hold myself ready to refill the order anew, gratis, in other seed, should it prove defective in any respect. 2d, That all money sent for seed shall reach me, with the single proviso, that all sums to the amount of one dollar and upwards be sent in the form of a Post Office Order on Marblehead, Registered Letter, Draft, or Cashier's Check. 3d, That the seed ordered shall reach every one of my customers. Thus I warrant everything but the crop, and make the purchase of seed the *safest investment possible*, instead of being what it has so often proved to farmers and gardeners, very unreliable and very vexing.

There happens occasionally an instance, where I have complaint against the vitality of seed, in which the seed was grown by myself that season, and thousands of customers were supplied from the same lot to their satisfaction. Such cases are very obviously of the class where the cause of the trouble was owing to the season, or soil, or manner of planting; in short to some cause utterly beyond my control and consequent responsibility. It is my labor and my anxiety to send out none but the very best of seed, just such seed as I would be willing to plant myself, and the thousands of cheering letters that I open are very pleasant testimony to the success of my undertaking. With all care that it is possible to exercise, mistakes will occasionally, though very rarely, occur; these my customers will always find me ready to rectify in accordance with the promise of my three warrants.

PAYMENT FOR SEED. All sums to the amount of one dollar or upwards should be sent in Cashier's Checks on New York or Boston, Drafts, Money Orders on Marblehead or in Registered Letters. When the value of seed ordered is less than one dollar, the sum sent is at my own risk, and when the value is greater than one dollar, the amount remitted will also be at my risk, provided it be sent by Post Office Order, Draft, Cashier's Check, or Registered Letter. When in making change it is necessary to enclose Postage Stamps, be sure not to moisten them in the least. Money Orders, when of the value of one dollar and upwards, may be purchased at my expense, the cost being deducted from the amount remitted. If Money Orders are not for sale at your office, they can oftentimes be procured at a neighboring town. *Cash must accompany all orders.* When necessary to send specie, wrap it securely in a bit of paper, to prevent it from getting loose and cutting through the envelope.

If any of my correspondents have reason to believe their letters have been stolen on the way, let them address me as John H. Question, and the thief may for a while, at least, be thrown off his track.

I would advise my customers not to order their seed by Express C. O. D., particularly when the orders are small. If the order is

sent through the express, as Express Companies give receipts for all money, the money should be sent with the order. When orders are sent by express without the money, as I have to add the cost of collection and return charges to the cost of the seed to make myself whole, (I do not pay express charges on remittances), my customers will see at a glance that this course is highly unprofitable. *I do not pay express charges*, but I make no charge for boxes used in packing, and where the orders are large will throw in some seed extra.

ADVANTAGES OF BUYING SEED DIRECTLY FROM THE GROWER.—But few seed dealers grow any of the seed they sell,—the business of seed growing and that of seed selling being almost entirely distinct. Hence, as a general rule, seed dealers know only what is told them of the careful selection of seed stock and of the freshness and purity of their seed; now if the person of whom they purchase should be careless, ignorant or dishonest, you who plant have to suffer, as the dealer can only reaffirm what is told him. On the other hand, if the seed dealer grows his own seed, he is able to affirm what *he himself knows* as to its freshness and purity; and thus you who purchase have the invaluable guarantee from his own knowledge. *It is that I may be able to give this guarantee that I raise so many varieties, some of them at double the cost at which I could purchase them.* The public will thus understand how greatly it is for their advantage to sustain me in this effort to combine the business of seed grower and seed dealer.

From what I have said let it not be inferred that I raise all the varieties of seed I sell; I do not; many choice varieties I import from England, France and Germany, some of which cannot be raised in this latitude, others I purchase of reliable dealers, or have grown for me by careful men, whom I supply with stock seed of my own raising.

When writing that seed have failed to reach you, always REPEAT YOUR FIRST ORDER, or send for the same value in other kinds of seed.

BE CAREFUL TO WRITE YOUR ADDRESS IN FULL, giving the STATE as well as the town, for a town of the same name will oftentimes be found in a dozen States. I find by my record that in one season 218 of my customers forgot to sign their names to their letters. Before closing your orders be sure that you have given your address in full, your name, especially, being written very distinctly. Please be particular in this matter.

THE POSTAGE LAW. The law enables me to send seed to the amount of four pounds or less in one parcel to any part of the United States. It matters not how many varieties are sent in the package, provided the weight of the entire lot does not exceed four pounds. If a larger lot is wanted, it may be divided into lots of four pounds each. This law, in effect, brings my seed establishment to every man's door.

Large Orders from Market Gardeners, Dealers, Clubs, and Granges of Husbandry.

Five per cent. discount on all orders allowed for seed to the amount of five dollars and upwards, excepting Onion seed, for discount on which see page 29) whether the order be for packages, ounces, pounds or quarts, either separately or combined; eight per cent. when the amount ordered is as high as ten dollars and under twenty-five; ten per cent. when twenty-five and under forty dollars; and twelve and a half on orders to the amount of forty dollars and upwards. For special discounts on Flower seeds see page 49. Terms to Dealers, Clubs and Granges of Husbandry on application. I do not send out seed to be sold on commission.

Compton's Early Field Corn.

I have grown this new variety, of which I present an engraving from a photograph, on my grounds this season, for the first time. I got two hundred and two bushels of ears from an acre of land, and had not the crows pulled up much of it when young, the crop would probably have been twenty-five or thirty bushels more. This is quite a heavy yield, as every farmer knows, though it is no such crop as Mr. Conrad Wilson's Committee found growing on the grounds of Mr. Compton. The ears are magnificent for size, and almost uniformly filled out finely to the very tips. Whether when yield alone is considered it will prove to be a very decided acquisition I am in doubt, but when earliness is desirable, it is well worthy of very general cultivation on this ground alone, for it is *decidedly the earliest large-eared variety of field corn in cultivation.* The one objection I have to it to offset its great productiveness and earliness, is the size of the cob. Last season's prices were fixed by Mr. Compton, who would allow seedsmen to sell only as his agents. I have this season endeavored to make the price so low that any of my customers may have the opportunity of trying it on their own grounds. For those who have not read

Mr. Compton's letter in my Catalogue of last season, I add the following extract :

"Of the many hundred new varieties of Indian Corn originated by me from seeds of the small ears, found on the blossom branches of old sorts one has proved to be much earlier than those now cultivated, ripening the past season Aug. 14, at which date two lots were cut and put in shock, 76 days from planting. August 16th, a case of it, fully ripe, was put on exhibition at Philadelphia. The variety grows about ten feet in height, and has from two to five ears on a stalk—ears from ten to seventeen inches in length—grain bright yellow. The kernel I did not like nearly so well as of many other kinds, but it certainly was the earliest I had. Last year I got a neighbor to plant it, and report the yield in corn actually shelled and measured. He reported a yield of one hundred twenty-three bushels per acre. I cannot hope that every purchaser will find this corn to be all that is claimed for it, as much of the yield of every crop depends on soil, season, manure and cultivation. Its worth to the farmers of the frosty North can hardly be estimated. By all it was pronounced the largest and finest variety exhibited at the Centennial.

Price of Compton's Corn, shelled from selected ears, per quart, by express, 50 cts.; per mail, 70 cts.; per peck, \$2.00; per bushel, \$5.00; per package, 15 cts.

Longfellow's Field Corn.

This fine field corn I have thought worthy to have its portrait taken. It is the result of careful selection in a family of Massachusetts farmers for forty-five years. The ears are remarkably long, some of them fifteen inches, and oftentimes

two or more good specimens grow on one stock. The cob is quite small. It is the largest kernalled variety of yellow field corn that I have ever found it safe to plant in the latitude of Massachusetts. Per package, 10 cts.; per quart, by express, 35 cts.; by mail, 55 cts. per peck, \$1.00; per bushel, \$3.00.

Log-of-Wood Melon.

This new melon is a variety of the yellow-fleshed musk melon. It grows to the enormous length of *from two to three feet.* the form and general appearance of most of the specimens being very well shown in the above engraving, which was taken from a photograph. Early and prolific, and in quality resembling the common Muskmelon. Per package 20 cts.

Excelsior Melon.

This new melon is early, of large size and fine quality; rind, thin; flesh, of a bright red color; very delicate and sweet. Samples have been grown the past season weighing over forty pounds. It took the first premium at the annual exhibition of the Massachusetts Horticultural Society this season. Per package 15 cts.; per oz., 35 cts.

THE NEW AMERICAN SQUASH!

In the essay which received the premium of the Massachusetts Horticultural Society, the Butman, for quality, is put at the head of all varieties of Winter squashes.

This new squash is the only one of our running varieties known to have originated in the United States. Externally, it is very distinct in color from any other kind in existence, being a bright grass green intermixed with white. In size and productiveness it resembles the Hubbard; it has a thick shell and is thick meated. The color of the flesh is quite striking, being of a light salmon and lemon color combined. It is very fine grained and smooth to the palate. It is remarkably dry, sweet and delicious, with a flavor different from the Hubbard, Marblehead or Turban, being entirely free from the pumpkin-like flavor occasionally found in the Hubbard. I am inclined to the opinion that the period when the Butman Squash is in its prime is from October to January, though as a keeper it is equal to the Hubbard. (Single package, 10 cts; per ounce 20 cts; per pound, \$1.50.)

Gentlemen whose names are well known in the agricultural community, express the following opinions of the quality of this new squash.

"The Butman Squash, though not a beauty externally, yet I must certainly call it the "Queen of Squashes." Excellent in flavor, and so very dry that my wife thought them better by the addition of a little water in cooking.
MARSEILLES, O.
W. W. LANCE.

[From Editor of American Agriculturist.]
NEW YORK, December, 1874.

MR. GREGORY.

Dear Sir:—The Butman Squash was duly received and has been tested. I can say no more than that it seems to me that every good quality of every good squash is in this, concentrated and combined. When you get any better squash, please send it to
Truly Yours,
GEORGE THURPER.

[From the proprietors of the Parker House.]

BOSTON, Nov. 30, 1874.

MR. J. J. H. GREGORY:

Dear Sir:—We have tried the sample of Butman Squash sent us and compared with three others, we think it exceeds them all, and place it as the best we have ever seen. If you have any to dispose of, send us memorandum of price and quantity.

Yours very truly,

H. D. PARKER & Co.

"Your Butman Squash I have found to be all you claim for it. Too much can't be said for the "Marblehead," but the Butman beats it."
New Haven, Conn.
N. JOSLYN.

Danvers Carrot.

In the town of Danvers, Mass., the raising of carrots on an extensive scale, has for years been quite a business—the farmers finding a large market in the neighboring cities of Salem, Lynn and Boston. After years of experimenting they settled upon a variety which originated among them (as did the Danvers Onion) known in their locality as the "Danvers Carrot." It is in form about midway between the Long Orange and Short Horn class, growing very generally with a stump root. The great problem in carrot growing is to get the greatest bulk with the smallest length of root, and this is what the Danvers growers have attained in their carrot. Under their cultivation (see my treatise on Carrots and Mangolds) they raise from twenty to thirty tons to the acre, and at times even larger crops. This carrot is of a rich dark orange in color, very smooth and handsome, and from its length, is easier to dig than the Long Orange. It is a first class carrot for any soil. The seed I offer is from carefully selected stock. Per oz., 20 cts; per lb., \$1 75.

HARDY RIDGE, OR PRESCOTT MELON.

Probably not one person in a hundred seeing the Hardy Ridge when growing would take it for a melon. Nevertheless it is a melon, and one of the very best quality, too. A very popular variety in the markets of London and Paris, the wonder is it has not before this been introduced into the United States. It is prolific, grows to a very large size, is of splendid quality,—being equal to the best cantaloupes, while it is by far the thickest meated of all melons, being in fact, very nearly solid and having but very few seeds. Price, 15 cents per package; per oz., 40 cts.

Cocoanut Squash.

A magnificent little squash for table use, very prolific, yielding from six to a dozen to the vine. In beauty it exceeds every variety of the Squash family; indeed, wherever grown, specimens very naturally find a place on the mantel piece as ornaments to the parlor—not being surpassed in beauty by any of the gourd family. The color is an admixture of cream and orange, the latter color predominating in the depressions between the ribs; while the bottom over a circle of two or three inches in diameter is of a rich grass green. The flesh is fine-grained, very solid, (the squash being remarkably heavy for its size), and the quality excellent, closely resembling Canada Crookneck, but in every way much superior. Price per ounce, 30 cents; per package, 10 cents.

The Marblehead Squash.

This new squash, as a rule, is characterized by a shell of a more flinty hardness than the Hubbard. It is usually thicker and flatter at the top. It has a greater specific gravity. The flesh is of rather a lighter color than the Hubbard, while its combination of sweetness, dryness and delicious flavor is something really remarkable. Its outer color is a light blue.

Packets of seed of this new variety will be sent post-paid, to any address, for 10 cents; per ounce, 20 cents; per lb., \$1.50. Dealers supplied at the usual discount. Each package will have on the label the above engraving reduced in size.

I add extracts from letters received from various farmers and gardeners:—

"The Marblehead Squash seed I had of you produced a very fine crop of the first quality of fruit. I had 1200 lbs. from 15 rods of ground, which was quite satisfactory."
J. M. MERRICK,
Wilbraham, Mass.

"The Marblehead Squash did the best of anything I ever tried to grow; the neighbors all pronounced them first rate, and I think them better than any sweet potato I ever saw."
ROBERT STEWART,
Paulton, Westmoreland Co., Pa.

"The Marblehead is the best squash that I ever had. I raised sixty-three from the package—nice ones they were too. We cut the last on the 23d of March; it was so hard that I had to cut it with an axe. I recommend them to all."
S. B. GREENWOOD,
Wales, Me.

"THE 'MARBLEHEAD' SQUASH. Some weeks ago we received from Mr. James J. H. Gregory, of Marblehead, Mass., the introducer of the Hubbard, specimens of a new squash. The squash was tried by several, and unanimously pronounced to be of the very highest quality."
—American Agriculturist.

Henderson's Early Summer Cabbage.

This new Cabbage is much larger than the Early Wakefield, though not quite so early; so much larger that Market Gardeners in general have concluded that they gain more value in its extra size, than they do in extra earliness of the Wakefield.

For a large extra early variety it is highly recommended. Per lb., \$16.00; ¼ lb., \$4.50; 1 oz., \$1.50; package 20 cts.

Paragon Tomato.

This fine new tomato, for three years in succession, has taken the first prize in its class, at the annual exhibitions of the Massachusetts Horticultural Society—where the critical standard is of the very highest character. The engraving makes a good presentation of its characteristic shape. It is a large sized variety, larger than several of the standard kinds cultivated. The meat is solid and well flavored. In time of ripening it comes between the early and the late varieties. I cannot guarantee that this or any one kind of tomato will do equally well in all localities, but such a magnificent variety as the Paragon is certainly worthy a general trial. Per oz., 75 cts.; per package, 15 cts.

Marblehead Champion Pole Bean.

After testing on my experimental grounds for the past ten years almost every variety of pole bean known, I find this new pole bean excels every other variety in earliness. While, as is well known to market gardeners, the pole varieties do not usually begin to blossom until the first picking has been made on the early sorts of bush beans that were planted at the same date, the Marblehead Champion Pole will be found to be so early as to have beans ready to pick for market as early or earlier than the earliest bush varieties. Per package, 15 cents.

Early Schweinfurt Quintal Cabbage.

Little Pixie Cabbage.

Early Ulm Savoy Cabbage.

Early Jersey Wakefield Cabbage.

Early Winnigstadt Cabbage.

Premium Flat Dutch Cabbage.

Improved American Savoy Cabbage.

Early Wyman Cabbage.

CABBAGES.

For full particulars on Cabbage growing, see my Treatise, advertised in this Catalogue.

For several years I have devoted the first three or four pages of my catalogue to quite a detailed presentation of the standard varieties of Cabbage and Squash. I do this because, having been the original introducer of several of these varieties, the public naturally look to me for the fullest explanation and description of them, and I therefore present these pages for the information of the thousands of new customers who come for the first time each season, rather than for the perusal of old friends, who from personal experience of years know all about their merits.

MARBLEHEAD MAMMOTH.

MARBLEHEAD MAMMOTH. This is without doubt the largest variety of the Cabbage family in the world, being the result of extreme high culture. I have had heads, when stripped of all waste leaves, that could not be got into a two-bushel basket, having a diameter two inches greater! In a former circular I quoted from persons residing in fourteen States and Territories, and also in the Canadas, East and West, expressing their great satisfaction with the Stone-Mason and the Marblehead Mammoth Cabbages, in their great reliability for heading, the size, sweetness and tenderness of the heads. They had succeeded in growing the Mammoth to the weight of thirty and forty pounds, and in some instances over fifty pounds!

This Cabbage will make larger heads in the West Indies and in the extreme South, than any other kind! I have supplied seed to one planter in the W. I. for several years. He says the heads are three or four times as large as he can get from any other kind. Large market gardeners in New Orleans and elsewhere, who have raised them for market on a large scale for several years, inform me that with them they grow to much larger size than any other variety of Cabbage.

STONE-MASON CABBAGE. This Cabbage is distinguished for its reliability for heading, the size, hardness and quality of the heads. Under proper cultivation nearly every plant on an acre will make a marketable head. The heads vary in weight from nine to over twenty pounds, depending on the soil and cultivation. In earliness the Stone Mason is upward of a week ahead of the Premium Flat Dutch and makes a harder head.

STONE MASON.

land and in the vicinity of Albany, N. Y. My stock seed came, originally, from Messrs. Copeland and Fottler, the two gardeners who were the first to raise the Cabbage.

Following will be found some of the recommendations I have received from those who have raised the Fottler's Cabbage. It is very rapidly growing in favor.

"My Cabbage I got from you, through G. S. Ziegler, were the finest I ever saw.—Fottler weighed 16½ lbs." THOMAS J. WILSON.
Eagle Lake, Texas.

"From the seed of Fottler's Early Drumhead cabbage we raised cabbages that weighed 35 to 40 pounds. The rest of the seed did as it was recommended." JACOB F. SELDOMBRIDGE.
Ephrata, Penn.

"Your Cabbage seed have always proved most excellent. The Fottler's Early Drumhead is the best cabbage for general crop that I know of for this climate. With ordinary cultivation it is sure to make fine large heads. Last season I planted my Fottler's in the open air, in May, and raised very fine cabbage weighing from 10 to 20 pounds." WM. K. GOODFELLOW.
Fembina, Dakota Territory.

"The Fottler's Cabbages were the finest I ever saw, every plant producing a perfect head." WM. M. CLARK, M. D.
Cosackie, N. Y.

"These Fottlers were splendid. Every plant made a respectable head weighing from 8 to 25 lbs. each. I shall depend on you for what few garden seeds I use in the future." S. J. WESTON.
West Peterboro, N. H.

"My cabbages were a perfect wonder to all who saw them. The great inquiry was where did you get the seed and what kind are they? Fottler's was my reply. From 15 cents worth of seed purchased of you I have sold \$50 worth, and have two or three hundred heads left yet. Cabbages were a general failure in this town except mine." E. J. WHITNEY.
Westford, Mass.

FOTTLER'S EARLY DRUMHEAD.

"I have raised the Fottler's Cabbage for two years, and think they can't be beat, every plant heading well. I took the first premium easily at the County fair." JAMES HUNTER.
Houlton, Me.

"The Fottler cabbage is my favorite. It headed up uniformly and splendidly." N. A. TAYLOR.
Houston, Texas, Feb. 9, 1874.

LITTLE PIXIE, EARLY ULM SAVOY, SCHWEINFURT QUINTAL. I recommend these three sorts as the best early Cabbages for family use. The first two are the earliest Cabbages grown, being each of them earlier than Early York. Little Pixie heads very hard, and all cook very tender and sweet. The Savoy's are the tenderest and richest flavored of all Cabbages, and for boiling are decidedly the best for family use, being much superior, to the Drumhead and Cone-shaped varieties. Schweinfurt Quintal is decidedly the earliest of all the larger Drumheads; the heads attain to a diameter of from 10 to 18 inches, are very symmetrically formed, and are remarkably tender. When cooked they are very sweet, and quite free from any strong cabbage taste. They

do not head hard, and being so very tender they will not bear transportation in bulk any distance without serious injury; hence I recommend it as a capital Cabbage for early use in the family, but not as a market Cabbage, fitted for all localities, though very valuable for this purpose where the market is near at hand. Packages of either of these forwarded to any address at 10 cents each. (See engravings, Plate 1.)

IMPROVED AMERICAN SAVOY. This is the best of all the Savoy's for the general market. It grows to a large size, is as reliable for heading as the Stone-Mason or Premium Flat Dutch, and has as short a stump as either of these varieties. I heartily recommend it to all those Market Gardeners who grow Savoy's by the acre for the general market. (See engraving, Plate 1.)

EARLY WINNIGSTADT CABBAGE. No variety of early Cabbage, in my experience as a seedsman, has had a more regular and rapid growth in popularity than the Winnigstadt, which I attribute mostly to the fact that it is so remarkably reliable for heading even under very adverse circumstances; I have seen large areas head up hard, almost uniformly, though from the character of the soil when they were planted every cabbage grew stump-footed. The Winnigstadt is also a large sized cabbage among the early kinds, and probably the hardest heading of all the conical varieties. In carliness it comes in about a week later than Early Oxheart. Should the soil of any of my farmer friends be of so sandy a nature that they find it extremely difficult to perfect any variety of cabbage, before bidding a final farewell to the cabbage family I would advise them to try the Winnigstadt. Planted in the latitude of Boston July 1st, the Winnigstadt makes a good cabbage for winter use. (See engraving, Plate 1.)

CANNON BALL CABBAGE. This Cabbage is so called because the head is as round, and almost as hard and heavy, as a cannon ball. I pronounce it as forming the *roundest, hardest and heaviest* head in proportion to its size, of any cabbage known. It matures about ten days later than the Early York. While about all varieties of early cabbage make rather soft heads, this, though early, makes the hardest heading cabbage known. The heads when fully grown attain to the size of from six to eight inches in diameter. Put up in packages at 10 cents each, or ounce packages at 40 cents each.

I present below a few extracts from the many letters received from customers, relative to my Marblehead Mammoth, Stone-Mason, Cannon Ball, Winnigstadt, Schweinfurt Quintal, and Early Wyman Cabbages, etc.

"I send the weight of a part of the vegetables raised on this farm in 1877 from your seeds:—Red Drumhead Cabbage, 30 lbs.; Fottler's Drumhead Cabbage, 40 lbs.; Marblehead Mammoth Drumhead Cabbage, 50 lbs."—GEO. N. ENGLISH, *Sheridan, Clare Co., Mich.*

"Having tested your Early Wyman Cabbage two seasons, I wish to let others know that they are superior to any other variety I have ever grown. I have heads of this season's growth weighing 10 and 12 lbs. each, and the quality is excellent. They are the tenderest cabbage known in this town."—L. P. WALKER, *Union, Maine.*

"The package of Marblehead Mammoth Cabbage seed you sent me last spring did finely. I raised the largest heads of cabbage from them I ever saw grown in this country. They excited my neighbors and some are old cabbage growers."—J. W. CLOUSE, *Card Hill Post Office, Tenn.*

"I raised cabbages from your Marblehead Mammoth that weighed 45 pounds. Last year my Swede turnips from your seed weighed 31 lbs. I carried them through Oconto showing them with the American colors planted in them."—JOHN WINDRASS, *Pensaukee, Wis.*

"Your Marblehead Mammoth beat all the cabbage in this town, many of the plants measuring three feet across when they commenced to head. Your Little Pixie was very nice; we had good solid heads May 20th."—HENRY GERICKE, *Heaton, Mo.*

"The Marblehead Dutch Cabbage that I had of you last spring was the best cabbage I ever grew; it appeared to be perfectly pure and headed up nearly to a plant."—W. L. CONOVER, *La Fayette, Ind.*

"Your seeds are splendid. We had splendid cabbage last year. Those Cannon Balls were the best cabbage that we ever had."—BENJ. P. MARSHALL, *Unity, N. H.*

"We find your cabbages to be as good as you represented them to be. The Cannon Ball, Pixie, Stone Mason and Winnigstadt did splendidly. We had no success in raising cabbage until we began having seed from you."—MRS. G. A. MORRILL, *West Alton, N. H.*

"I must acknowledge that your early Wyman and Wakefield cabbages are the right kind for this hard woodland. This is the second year I have raised them. I find the one half was not told me, for I believe every seed came forth, and all are matured. I have already sold all I have. People all say I have the best lot of cabbage ever seen in this vicinity. They are also of good flavor and size."—WEARE, *N. H.*

PAGE R. MERRILL.

"As this is, I think, the 8th season we have ordered seeds from your house, I feel it my duty to tell you that in no case were we disappointed in either name, quality or purity. All vegetables, and most especially Cabbages,—Mammoth, Stone-Masons, Fottler's, Winnigstadt, and Cannon Ball presented a striking contrast to those generally raised in our neighborhood. Last year I ordered heavily and divided among friends who were astonished at results, and are now ordering of you for themselves."—DANIEL LUTZ, *Millersburg, Ind.*

"My cabbages produced from seed purchased from you are the admiration of the whole neighborhood. In fact, all your seed are far superior to any ever introduced into this country, and any one has only to become acquainted with them to use no other."—J. M. FORD, *Spring Cottage, Miss.*

"In the spring of '74 I sent twenty-five cents to Marblehead, Mass., and received twenty-five cents' worth of Marblehead Mammoth Cabbage seed. The cabbages would surprise even a man 'raised on the Wabash.' 'Big,' 'busters,' 'smashers,' were the remarks of every one. We made a barrel of kraut, and the neighbors had hardly a cabbage as big as your first."—W. O. HOPKINSON, *Royal Centre, Ind.*

"I raised the past season, from seed purchased from you, heads of Fottler's Early Drumhead that weighed 45 pounds apiece. I had an acre of Fottler's and Premium Flat Dutch that were the best lot I ever saw together. Scarcely a plant failed to head, notwithstanding the green worms were very bad about here."—JOHN D. MILLER, *Elmira, N. Y.*

"The seed you sent me last year gave great satisfaction, particularly your Marblehead Cabbage. They were marvellous. They grew to the weight of 48 lbs. and 2 oz."—SAMUEL BAKER, *Ottawa, Canada.*

"You sent me a package last year of the Early Schweinfurt Quintal, and it was the best cabbage we ever raised. I could sell it readily at twenty-five cents per head. Some heads weighed 36 lbs."—GEORGE SWARTZ, *Orbissonia P. O., Pa.*

"I planted some of your Fottler's Drumhead and Early Winnigstadt last spring, and they were excellent, every plant giving a good head."—I. P. SHOEMAKER, *Beverly, N. J.*

"I have got out and heading up nearly 40,000 cabbages from seeds obtained of you—the largest cabbage crop ever grown in the state. They are looking splendidly."—H. M. STRINGFELLOW, *Galveston, Texas.*

"Your Wyman Cabbage is the Cabbage for this place. I transplanted in April 300 plants, commenced to sell on 12th of July; on the 25th of September had sold 2550 lbs. at 5 cts. per lb. They weighed from 5 to 13 lbs. each. I do not write this as an advertisement, but to say that I have faith in your seeds."—CHARLES MAYNARD, *Hay Fork, Cal.*

My customers at the South will please observe the following:

"Your Stone Mason cannot be beat for early Spring. I have raised them to weigh 16 lbs. Our inhabitants never saw such large ones grow South before."—J. S. STEBBINS, *Riceboro, Ga.*

"Mr. H. J. Van Pelt, of Mandarin Point, Florida, has been very successful in vegetable raising. Yesterday he deposited in our office a cabbage which weighs 38 pounds. It is solid and perfectly formed, of the Marblehead Mammoth variety. The seed were sown in September last, transplanted in October on an area of three-fourths of an acre, fertilized with 500 pounds of Fish Guano, procured of Mr. J. W. Hawkins, of this city, composted with swamp muck, and applied broadcast and in the hill. He commenced marketing the first of April and finished yesterday. The cabbage have varied from 10 to 20 pounds in weight. Total receipts from three-fourths of an acre, over \$400. The seed was procured from Mr. Gregory, of Marblehead, Mass., who makes cabbage a specialty."—*Jacksonville [Florida] paper.*

"I think it would be a difficult matter to find a finer lot of Cabbages than those I have growing from the Little Pixie, Cannon Ball and Winnigstadt seeds obtained from you in the winter."—W. S. HARLEY, *Walterboro, S. C.*

"The paper of your Mammoth Cabbage seed sent me last summer was duly received, and from them I raised the largest and finest cabbages that I have ever grown, in a trial of about 40 years."—J. S. JONES, *Griffin, Ga.*

"I send enclosed a slip from the 'Galveston News,' showing the style of Cabbage your Mammoth produced this winter. The heaviest weighed 20 lbs., which far exceeds anything raised here before."—H. M. STRINGFELLOW, *Galveston, Texas.*

The Hubbard and American Turban Squashes, &c.

THE HUBBARD SQUASH. As the original introducer of the Hubbard Squash, I offer to the public seed taken from squashes

THE HUBBARD SQUASH.

grown specially for seed. Let me not be understood as saying my seed is *perfectly* pure, for, as every farmer who has had experience knows, *perfect* purity in the Squash family is impossible; but the seed I raise is nearly perfectly pure,—as near as the utmost care by isolation for years can make it, and the great difference in purity between this and the average seed of the market, every farmer who has tried it knows.

AMERICAN TURBAN SQUASH. I have sent this fine Squash out as the best of all fall squashes, as good for fall as the Hubbard is for winter.

Let it be but fairly tested and *beyond all question* it will rank by far the driest, the sweetest, the finest grained and richest flavored of all fall Squashes.

I have full faith that the Turban will soon be adopted throughout the United States as the best of all fall Squashes.

I note that by one or more of the Philadelphia seed firms the Turban Squash is spoken of as a showy variety of but little value for domestic use. It is very evident that they have confounded the

showy but worthless *French* Turban with the *American* Turban Squash. I give extracts from a few letters which show how the *American* Turban is appreciated.

"I think your Turban Squash is the best fall squash I ever ate. We had them till January, and my neighbors that tried them said they were the best squashes they ever saw."
Windsor, Me. LEVI B. SIBLEY.

"I unhesitatingly pronounce the Turban Squash the very best squash that grows. I have kept them into January."
Greenvale, Iowa. MRS. MARTHA WOLF.

"I have had Turbans this month (March), just as good as they were last November."—A. W. VALÉNTINE, Bethel, Maine.

"The American Turban Squash is just the thing it is represented to be. One squash is worth a dozen eggs in the way of making egg custards, and no person should be without them that likes something good to eat."
Shady Grove, Washington Parish, La. S. E. RANKIN.

MAMMOTH SQUASH AND SQUASHES FOR FEEDING TO STOCK. Mammoth Squashes, though of but little value for table use, on rich land in those sections where roots are but little cultivated, are very profitable as food for cattle. I give the substance of letters received from a few of my correspondents, that my friends may be able to compare notes. A half acre of these Squashes have averaged 75 lbs. each in weight. Among prolific varieties for stock, the Vegetable Marrow holds high rank. I have raised fourteen tons on a single acre of land.

I hold these at 15 cts. per package—per ounce 50 cts.

"The seeds received from you last spring gave good satisfaction. Among other seeds received from you was one package of the Mammoth Yellow Chili Squash, which grew to the weight of 192 lbs. Was of a handsome shape and of a deep rich orange color."
Portsmouth, N. H. JAMES B. PICKERING.

"We raised the Mammoth Squash to weigh 120 lbs. I sent several pieces to my neighbors and they thought it very nice. I made pies of it and they were splendid."
Pleasant Hill, Kansas. MARY B. SPARKS.

"I got two seeds of your Mammoth Chili Squash, and from them I raised nine squashes weighing 640 lbs. The largest of them weighed 239 lbs."
David City, Nebraska. H. Y. DUEMER.

"One vine of Mammoth squash from seed of you gave us one squash weighing 164 lbs., another of 145 lbs., and several of 30 to 50 lbs."
Canada, Ohio. J. O. NOTESTEIN.

"From the package of Mammoth Yellow Chili Squash seed had of you last spring, I can report several squashes weighing over 100 pounds each, and one weighing two hundred and thirty-eight pounds (238), this, too, notwithstanding a very cold, wet season."
Vanbrater, Iowa. W. HESTER.

"I had good success in raising Mammoth squashes last year from seed I got from you. I had three that weighed 115½, 137 and 139½ lbs., and several others from 75 up to 104, all from three vines."
Farm Hill, Minn. JAMES ARNOLD.

Canada Victor Tomato.

This remarkably early tomato which I introduced four years ago will be found to excel in the most desirable characteristic, of having much of the fruit ripen at once, presenting ripe fruit before other varieties, but remarkable also, in excelling all others in *earliness of ripening the great bulk of the crop*, a trait of great value to the market gardener.

The result of a test of its merits on a large scale, has been a thorough endorsement of the good qualities shown in form-

er trials, when I found it the *earliest of twenty-five varieties*. The fruit is not only the earliest of all, but in nearly all locations, of large size, symmetrical and handsome, while in ripening it has no green left around the stem, a great fault with many kinds otherwise good. The fruit is heavy, full meaty and rich, between round and oval in shape, and red in color; it is distributed very evenly on the vines.

I offer headquarters seed this season by the package, ounce and pound. For seed of my own growing, saved from selected specimens—per package, 10 cents; per ounce, 50 cts.; per lb. \$5.00. I have again had a special selection of seed stock made for me, from a crop grown in Canada, by the originator; a few bushels of the very earliest being selected for seed from a field of two acres. This seed is 15 cents per package, and \$1.25 per ounce. Dealers supplied at a discount.

What the public have very generally found it to be, will be pretty conclusively shown from the testimonials that follow which I have extracted from letters of commendation that my customers have sent me.

I have to thank my customers for a score of recommendations of the Canada Victor Tomato,—all free-will offerings. I regret that want of room will allow me to publish but few of them,

"The seeds I had of you last year all proved good. I had ripe Canada Victors the 10th day of June."
 North Reading, Mass.
 W. H. RYER.

"I planted seven varieties in my hot bed at the same time. All had the same treatment, and were transplanted to the open ground on the same day. All were situated exactly alike in the field, having the same treatment. I took great pains to have the test as fair as possible because I wished to discard all but the most profitable early market variety. I picked the first ripe Tomato on the 12th of July, from the Canada Victors. From that time they began to ripen regularly, and on the 20th of July I picked 16 ripe tomatoes of good size from one vine. On the 17th of July I picked the first Trophy, and also the first Hathaway's Excelsior; July 22d, Gen. Grant and Essex Early; July 25th, Boston Market, and July 26th, Arlington. I had about 300 Victor plants, and about 2000 of all other varieties. From the time of picking the first tomatoes to the 1st of August, I had picked more ripe tomatoes from the Canada Victor 300 plants than from the 2000 of the six other varieties. The Victor thus proved to be beyond all comparison the most profitable early tomato. This characteristic, in my opinion, is what gives the Victor its great value as a market variety. The experience of the last season has proven to me, at least, that the Canada Victor is the only early tomato of any value whatever that I am acquainted with, and I shall grow no other as an early variety. One word as to the quality. The commission merchant whom I shipped to in Wilmington supplied a large hotel, and he wrote me that he got 15 cents per crate more for the Canada Victor than the others. They canned so well and he was told at the hotel, 'they were so nice for slicing.'"
 Felton, Delaware.
 R. W. HARGADINE.

"I have grown the Victor Tomato now for 8 years. It is a cross between Cook's Favorite and Large Red. I have taken special pains to save no seed except from the earliest and very best shaped tomatoes; this has made a decided improvement upon it. With me, it is fully a week ahead of anything I have tried, and I have tried nearly all kinds. The Early York and Hubbards Curled are the earliest with me, but are fully a week behind Victor. I have tried Orange Field, Maupay's Superior, Cedar Hill, Keyes' Prolific, Cook's Favorite, Hathaway's Excelsior, and, in fact, every kind that I thought was likely to succeed. The Victor Tomato is a very solid tomato, weighing 60 lbs. to the bushel, plump weight. It is first class in point of flavor. Moreover it has the remarkable quality of keeping its flavor late in the season; what I mean is, that when ripened in cool, wet weather, it is of fair flavor

when other varieties are quite insipid, and almost or quite useless. This, in part, is accounted for from the fact that it seldom cracks open like other tomatoes, but keeps sound. This is a very valuable feature to us here, where our seasons are short, and are troubled with frosty nights, sometimes every month in the summer. If you wish to make use of any of my statements you are at perfect liberty to do so."
 Ontario.
 S. H. MITCHELL.

"The Conqueror with us has proved early, smooth, and very productive, but in size and solidity is inferior to the Canada Victor, which latter, all things considered, is yet our best early tomato for market or home use."
 TILLINGHAST BROS., La Plume, Pa.

"I tested your Canada Victor Tomato grown from your extra selected seed, with Conqueror and Keyes' Prolific for the first time this year. It was fully a week ahead of Conqueror, and at least 10 days ahead of Prolific."
 R. W. HARGADINE, Felton, Kent Co., Del.

"I must say a few words about your Canada Victor Tomato. I bought of you two papers and realized over fifty dollars on the two papers. They are two weeks earlier than any I have ever planted."
 Kearneysville, West Va.
 WM. SMAGRUDER.

"The Canada Victor Tomato that I got of you last spring gave great satisfaction. I had about twenty plants and they bore tomatoes enough for three ordinary families. They surpass any tomato for earliness that I have tried, and I have tried a good many kinds, and for sweetness and flavor they can't be excelled."
 Mrs. JANE P. JOHNSON.
 Briscoe Run, West Va.

"CANADA VICTOR. We tried this new tomato last season, and our opinion is that it will occupy the same place as an early variety that the Trophy does as a medium and late sort. It is the most uniformly smooth of any of the flat varieties—is very solid and ripens up to the stem without a green spot. We expect to have a good many acres in tomatoes the coming year, and shall plant but two sorts, Canada Victor and Trophy. We are satisfied that we have found the best sorts for our use, and shall experiment no more."
 W. F. Massey in Am. Farmer.

"I had a package of 'Canadian Victor Tomato' from you last year, which gave great satisfaction, and I think stands fall frost better than any other variety. After my neighbors lost theirs, all frozen down, the Canadian Victor grew and ripened for over two weeks."
 Arnov P. O., Ontario.
 ALEX'R GARDNER, P. M.

Tailby's Hybrid Cucumber.

Mr. Tailby made this choice new variety by his skill and perseverance in crossing the Early White Spine on one of the largest of the English Frame varieties. These English Frame cucumbers are much larger than our American varieties, some of them growing to thirty inches in length, but they are so tender that they cannot usually be relied upon in open air cultivation in this country. In Tailby's Hybrid however, we have a perfect success in hardiness, as it proves to be equally hardy with our American varieties. In size it is much larger than White Spine, while it retains all the smooth beauty of its English parentage. In yield it is unsurpassed by any, and equalled but by few of our most prolific sorts. A crop of them for size, beauty and number is a sight to behold. Price, 35 cts. per ounce, 15 cents per package.

The editor of the *Rural New Yorker* who has been testing

this with other varieties on his extensive experimental grounds gives the following as the result:

"The results of our cucumber experiments this season, may be summed up in a very few words. We choose Tailby's Hybrid for cucumbers and Green Prolific for pickles."

Cream-Fleshed, Sculptured-Seeded Melon.

In size about medium, color much like Phinney's, but darker and more regularly striped; flesh very tender and melting, sweet and delicious. Melons quite thin shelled, but first-rate keepers notwithstanding. The seed present a singular appearance, as though engraved with oriental characters. Price 15 cents per ounce; 6 cents per package.

Kenney's Minnesota Amber Sugar Cane.

In some parts of the West there is at the present time a great deal of interest manifested in what is called a new Sugar Cane. I have not raised the new variety myself, but presume it is a new Sorghum yielding a larger per-cent. of syrup and sugar than any of the older sorts. In the history given of it, there seems to be a doubt as to its origin, but if it prove half as valuable as some writers state, it must be a great boon to the North and Northwest. The seed I send out I have obtained directly from headquarters. Per pound, 75 cts.; per $\frac{1}{4}$ pound, 25cts.; per package, 15 cents.

RARE, NOVEL, OR VERY DESIRABLE.

Among the New, Rare or Desirable Vegetables, I would call particular attention to the following.

While most of these new and rare vegetables will be found to be of universal value, others may vary in quality with the soil and locality. As a general rule we are not rendered capable of passing judgment on a new vegetable by the result of a single trial. Oftentimes the most we learn from the result of planting one season is what are possibly the merits or demerits of it; a second may develop what are probably its merits or demerits; and usually a third season will be required to enable us fully to determine its value, and give the new-comer its true place in the vegetable garden. Take Mexican Sweet Corn for an example; should the first season of experiment be wet and cold at the time it matures for table use, this variety being more sensitive in its habits, than the old standard sorts, may be more affected in its quality than they, and not superior to them in sweetness. Now let the next season be a hot and dry one, and the same corn, having a season more congenial to its tropical origin, will develop its full quality and demonstrate its full claim to the rank given it in my catalogue. So with many of the varieties of our Tomatoes; from an extended cultivation of many kinds, I am fully convinced that though some have been overpraised, yet with a majority an experience of three years would reverse or greatly qualify the hasty opinions often expressed of them, from a trial of but a single season.

New Vegetables for 1878. The following are the more rare and valuable vegetables which I introduce into my catalogue for the first time this season.

	Price per P'k'ge		Price per P'k'ge
<p>HEARTWELL EARLY MARROW CABBAGE. A distinct and excellent variety of an Early Cabbage, both for the garden and for marketing purposes. The hearts are extremely firm, weighing from 4 to 6 lbs., with scarcely any loose outside leaves, the flavor particularly mild and melting.....</p>	15	<p>you will make inquiry of the leading inhabitants of this county you will find that Hyde's Egyptian Sweet Corn has a reputation fully equal to the representations herein made." Per quart, postage paid, 90 cents; per pint, postage paid, 50 cents.....</p>	15
<p>EARLY BLEICHFELD GIANT CABBAGE. Highly commendable, short-stemmed sort with very large and solid dark green heads. This variety bears, on the whole, great resemblance to the favorite Schweinfurt Cabbage; it is quite as early as that sort and, in one respect, far superior to it inasmuch as the heads, owing to their great solidity, remain fit for use during a far longer period; they are very tender and of excellent flavor...</p>	25	<p>BISMARCK CUCUMBER. A cross between the White Spine and Long Green, of even color, straight, tender, crisp and of fine flavor. 35 cents per oz.....</p>	15
<p>ALGIERS CANTELOPE. Allied to the Hardy Ridge—but longer in shape. Flesh remarkably thick, the melons being nearly solid. In quality superior to the yellow fleshed muskmelon.....</p>	25	<p>GREEN PROLIFIC PICKLING CUCUMBER. Selected with great care by one of the largest growers of pickling cucumbers in the country. Per oz. 25 cents.....</p>	10
<p>WATER CHESTNUT. To be grown in muddy brooks. The form of the Water Chestnut is very beautiful, and as it can be kept indefinitely it makes an elegant little ornament for the parlor table.....</p>	15	<p>SATISFACTION LETTUCE. A new English variety, large and unusually tender, remaining in head a long time.....</p>	15
<p>EGYPTIAN SWEET CORN. Of this new variety of sweet corn which has made quite a stir in the region where it is grown, not having as yet tested it myself, I give the following history and description from Mr. Hyde, the introducer of it. "The spring of 1868 I succeeded in procuring 8 grains of this variety of corn which was represented as coming from Egypt. Favorable seasons the ears grow very large and very prolific. During the summers of 1874 and 1875 I sold this corn at \$4 per hundred ears for table use. Last season and this I put the price down to \$3 per hundred, wholesale, and could not supply the demand, and I have orders now for next summer for all that I can sell in a green state at \$3 per hundred delivered daily for table use. I received first premium for this corn at all County Fairs that I sent it for exhibition in this state. It has a sweet, rich, delicious flavor that I have never found in any other variety, and is exceedingly tender. For canning I think it far superior to any other variety. I have packed about 400 dozen and have sold all I put up at \$2 50 a dozen cans which is more than any other canned corn will bring in America. If</p>	15	<p>GOLDEN FLESHED WATERMELON. The flesh of this Melon is of a rich honey color and the flavor sweet and rich. Slices alternating with those of the scarlet fleshed variety make a pleasing show on the table. Shape nearly round. Size above the average.....</p>	15
		<p>CARTERS' LITTLE WONDER PEA. Of this new English Pea Messrs. Carter & Co. state "We are satisfied that a trial of this Pea will fully establish its title to be called a Little Wonder, whilst its remarkable qualities will speedily insure its universal cultivation. It is best described as a wrinkled marrow, as early as the Advancer, with pods like the finest type of Veitch's Perfection. Height 20 to 24 inches, very robust habit, wonderfully prolific and of fine flavour. We consider it distinct, desirable and likely to supersede Advancer, the seed being larger and the Pea quite distinct from it.".....</p>	25
		<p>CARTER'S CHALLENGER PEA. Messrs. Carter & Co., the distinguished seedsmen of England, highly recommend this new pea as being one of the handsomest, most prolific, and best flavored varieties in cultivation. It is a magnificent exhibition Pea, and will speedily find favor amongst growers for market by reason of its fine, handsome pods, productiveness and dwarf habit. It is a dwarf, dark-green marrow, growing about 2 to 2½ feet in length, and the entire haulm is literally covered with pods. We have not as yet had the opportunity of testing it on our experimental grounds.....</p>	25

	Price per P'k'ge		Price per P'k'ge.
CARTERS' COMMANDER-IN-CHIEF. A grand Pea for exhibition and general purposes in cultivation. It is a green, wrinkled marrow of exquisite flavour, with fine, slightly curved pods sometimes containing 10 large Peas. During the past two seasons the long and handsome pods of Commander-in-Chief, carrying a beautiful bloom have been prominent at the principal Vegetable Competitions in England.....	15	sufficient to feed a pair of cattle for twenty-four hours. In our northern countries it is doubtful whether it will be available for forage, but it will certainly find its place in large gardens as a decorative plant, for sown in spring in pots and planted in May in the open ground, it will produce a mass of shoots forming a large bunch of more than a yard in diameter by three yards in height.....	20
NEW GOLDEN PEA. The pods of this new Pea are of a delicate yellow when sufficiently matured for green shelling for the table—the Peas also being of a delicate straw color. Good cropper. Unique.....	15	YELLOW VICTOR TOMATO. A beautiful golden Tomato, in earliness and shape resembling Canada Victor. Per oz., 50 cents.....per package	15
RUSSIAN VERY LARGE WHITE WINTER RADISH. The largest of all winter Radishes. Sown in June it easily produces roots weighing 3 lbs.....	15	LITTLE GEM TOMATO. A prolific variety and desirable for those who wish a small, nice Tomato a little larger than the Plum Tomato.....	10
TEOSINTE. Much has been spoken lately in the agricultural and horticultural papers of this gigantic graminæa, both as an ornamental as well as a forage plant. It is a native of Central America; perennial in hot climates, it will not stand our winters; resembles Indian Corn in aspect and vegetation, but produces a great number of shoots, growing 3 to 4 yards high, thickly covered with leaves, and yielding such an abundance of forage, that one plant is estimated to be		CLAWSON WHEAT. This new variety of Wheat is well worthy the attention of the agricultural public. Extensive cultivation has demonstrated the following points in its favor—"it is not liable to rust, is hardy, stands winter well, stands up well and heads well. It withstands the Hessian Fly better than most kinds and <i>has proved to be almost midge proof.</i> The heads bend over and these shed moisture. It yields better under similar circumstances than other varieties and the flour and grain rank well in quality. Price per bushel per express at purchaser's expense \$3.00; per peck \$1.00; per lb. per mail 35 cents. A winter variety.	10

The following are the more rare and novel of the select varieties of vegetables of former years.

YARD LONG BEAN. A curious bean of very dark and glossy foliage. The pods grow two feet and upwards in length.....	15	EXTRA EARLY DWARF ERFURT CAULIFLOWER. (Seed specially selected.) Very early, hardy, dwarf and compact; larger than Walcheren. The best for forcing and for general purposes as an early variety. Its compact habits admit of a large number being raised on a given area. I grew some heads for seed stock this season, that measured 18 inches in diameter.	50
DWARF WHITE EDIBLE PODDED BEAN. A new variety from France. Bean kidney shaped.....	15	BOSTON MARKET CELERY. This is the short, bushy, compact, solid celery, for which Boston Market is so famous.....	10
KENTUCKY WONDER BEAN. The most productive variety, (Lamberson's perhaps excepted) that I have ever known. The vines take to the pole exceedingly well and the pods grow in clusters of three or four, being remarkably long, round and pulpy, covering the poles from top to bottom. So enormous is the crop that in garden soil they have averaged a quart of dried beans to each pole. I do not recommend it as a shell bean, but as a snap bean it is a "Wonder!" as every market gardener will find.....	15	CHUFAS. These very closely resemble in sweetness and richness of flavor a cocoa nut. Very prolific, a single one yielding over two hundred. Plant one foot by eighteen inches.....	6
LAMBERTSON'S WHITE BEAN. Mr. Lamberson's new bean is remarkably prolific; pods of good length and snap well. The beans are <i>white</i> in color. A capital sort for marketmen who want a bean that will give an immense crop of good snap beans.	15	MARBLEHEAD MAMMOTH SWEET CORN. My Mammoth has taken the first prize at two of the Annual Exhibitions of the Massachusetts Horticultural Society, the ears exhibited weighing, as gathered from the stalk, between two and three pounds each. This is a very sweet corn for family use. I offer packages from selected ears.....	15
BASTIAN'S EARLY BLOOD TURNIP BEET. A new Beet, earlier than Bassano with a beautiful blood-red color when boiled. Very handsome in shape. This new beet has grown rapidly in popularity with market gardeners.....15 cts. per oz.	6	GENERAL GRANT CORN. This is the sweetest of all the late varieties I am acquainted with. The ears are very large and the kernels shrink wonderfully when dry.....	10
BERBERRY SEED. For details, see page 16.....	6	QUAKER SWEET CORN. This is a late variety. It is the sweetest white variety I have yet found. Kernels resemble closely Stowell's Evergreen, and are unique in shape.....	10
SILVER-HULL BUCKWHEAT. A new variety offered as an improvement on the common Buckwheat. The grain is of a grey color, while the corners are much less prominent and the husk is thinner, thus saving fifteen per cent. of waste in the process of manufacturing. A gentleman writing from a large buckwheat growing district, under date of Sept. 12th, says:—"The ordinary buckwheat will not probably exceed one third of an average crop in our county, while the "Silver Hull" will perhaps average two-thirds.....	10	PRATT'S EARLY CORN. This is the earliest corn of marketable size. It is an acquisition for marketmen as a first early to come in before Crosby's, Moore's or Narragansett. The ears are of a fair market size, well filled.....	10
CRANE'S EARLY WYMAN CABBAGE. Market gardeners will find this very solid strain of the Wyman Cabbage an improvement in making harder heads than the common sort.....	15	COMPTON'S CORN. (See page 2.).....	15
MARBLEHEAD MAMMOTH CABBAGE. For a description please see sixth page.....	15	MAMMOTH FIELD CORN. A white field corn claimed to be the largest kind raised in the Western States. From twenty to forty rowed. Ears, when dry, weigh a pound and a half....	6
MARBLEHEAD DUTCH CABBAGE. My customers will find this an improvement on the common Flat Dutch, in its producing a remarkably symmetrical, round and handsome head; firmer and harder than the ordinary Flat Dutch....per oz. 50c.	10	LONGFELLOW'S CORN. (See page 2.).....	10
HENDERSON'S EARLY SUMMER CABBAGE. See page 4.....	20	CHINESE LONG NETTED CUCUMBER. It is a fine long variety with attenuated neck and prettily reticulated skin. Very prolific and hardy. Flesh thick and firm.....	25
		TAILBY'S HYBRID CUCUMBER. See page 9.....	15
		NORBITON GIANT CUCUMBER. This is one of the frame varieties, sent out by the English seedsman as "The finest, longest and most prolific cucumber cultivated" I have grown them longer than an ordinary flour barrel.....	20

	Price per P'k'ge		Price per P'k'ge
RUSSIAN NETTED CUCUMBER. A native of the Ukraine country and very prolific; surpasses all others in hardness; middle size, flesh white, and the skin covered with a pretty brown network which imparts to the fruit a peculiar appearance.	15	when dry. Grown from seed, it was two inches in diameter by the 15th of July.	15
SNAKE CUCUMBER. A very long variety, (I have raised them six feet in length,) growing coiled up, having much the appearance of a large snake. Fine specimens will sometimes bring \$5.00 each as curiosities.	20	GIANT ROCCA ONION. This is a Mammoth Onion sent out by one of the English seed firms. To get the fullest development of size it should be grown for sets the first season, then stored to be planted for a second season's growth.	10
DANDELION, NEW LARGE LEAVED.	15	WHITE GLOBE ONION. This, when well grown and well cured, is the handsomest of all onions, bringing at times double the price of any other sort in the New York market. It requires a long season in the North, and to keep the color pure white should be pulled as soon as it begins to dry down and be cured in the shade, say in a barn where there is a good draught of air.	10
VERY EARLY DWARF EGG PLANT. A new French variety of Long Purple. Earliness in the egg plant family is exceedingly desirable, and in this new sort we have an acquisition.	15	FERN LEAVED PARSLEY. A most beautiful thing. Valuable as a decorative plant. Resembles a beautiful moss.	15
SCARLET CHINA EGG PLANT. Highly ornamental.	15	HANCOCK EARLY PEA. A new American pea of the first early class. See third page of cover.	10
BONNET GOURD, DISH CLOTH GOURD OR LUFFA. The peculiar lining of the fruit, so tough, elastic and enduring, has given it its name. The vine is very ornamental, having dark green foliage with silvery shade, and large yellow blossoms in clusters. It requires a frame or support. The seeds should be started in hot bed.	15	LAXTON'S SUPERLATIVE PEA. Messrs. Carter, the English seedsmen, speak of this new pea as follows:—"The largest and finest podded pea yet raised; indispensable as an exhibition pea; pods have been grown 7 inches in length and are much larger than the parent pea, Laxton's Supreme, which has taken the first prize for several years." Second early, color and flavor unsurpassed.	15
ORNAMENTAL GOURDS. The packages contain seeds of Apple, Orange, Pear, Quince, Bottle, Egg, and other varieties. Peculiar, attractive and ornamental. Don't mature too high.	10	POPULAR PEA. An improved Champion of England, very prolific and fine flavored.	15
SUGAR TROUGH GOURDS. These grow to the capacity of several gallons, and will last years as sap vessels, or for holding liquids.	15	SUTTON'S EMERALD GEM PEA. This new first early pea is quite distinct from all others, and is undoubtedly one of the finest varieties in cultivation. The peas retain their green color when cooked and are of a delicious marrow-like flavor, much superior to most early sorts.	10
FRISBY'S KALE. A distinctive variety of hardy winter greens, highly ornamental when raised as a foliage plant, and when cooked delicious and tender. The surface of the leaves are studded with miniature cress leaflets.	15	WILLIAM 1ST PEA. This is another of the new English Peas which Messrs. Carter claim to be "The finest Early Pea known, combining flavor, earliness and productiveness, with appearance." It has long, handsome, well filled, greenish pods.	10
ALL-THE-YEAR-ROUND LETTUCE. Very hardy, crisp eating, and compact. May be sown for succession all the year round, and will head finely any month in the year if protected from extreme cold.	15	TREE PUMPKIN OR ZAPPALITO FROM BRAZIL. This is of a bushy habit of growth and bears its fruit in a cluster near the root of the vine, eight or ten to the plant. Excellent for pies. It resembles the Turbau Squash in shape.	15
TRUE BOSTON CURLED LETTUCE. Good, (but not of the best in quality,) and the most elegant of all the Lettuce family in its habit of growth. It has the form of a rosette. Very popular.	10	"NIGGER PUMPKIN." This is a true strain of the old fashioned black warted shelled pumpkin of old times. The "pumpkin pie" pumpkin of our grandmothers.	6
EGYPTIAN LETTUCE. A large, spreading summer variety; color light green tinged with brown; very handsome. Not inclined to run to seed. Quality first rate.	15	BUTMAN SQUASH. (See page 3.)	10
LOG-OF-WOOD MELON. (See page 2.)	20	MARBLEHEAD SQUASH. (See eng. and description, page 4.)	10
SILVER-NETTED MUSK MELON. Very productive, uniform in size and high flavored. Holds a high rank in the West.	10	CAMBRIDGE MARROW SQUASH. Earlier than the Boston Marrow. The skin has a remarkably deep orange color which makes the squash very attractive to the eye. Popular with marketmen. Quality inferior.	10
HARDY RIDGE MELON. (Refer to page 3.)	15	CONQUEROR TOMATO. Handsome. Resembling somewhat Cauada Victor, but not as large, solid or early. Vines small.	10
SHAW'S GOLDEN SUPERR MELON. This is indeed a superb melon, not in size, for it is small, too small in most localities for a market sort, but for family use, where quality is the great desideratum, it much excels the green citron and cannot be surpassed. Very prolific.	10	LIVINGSTON'S ACME TOMATO. This is a purple variety of the Peach or Pepper class; a good kind for canning.	15
SILL'S HYBRID MUSKMELON. This has all the earliness and sweetness of the White Japan, but is more spicy and delicious. Very vigorous and productive. The flesh is of salmon color. No garden should be without it.	6	POWELL'S TOMATO. Of good size; round, smooth, solid, and ripens well around the stem. We must look to this or one equally good to take the place of the Boston Market, which has within a year or two, lost some of its fine characteristics.	15
EXCELSIOR MELON. (See page 2.)	15	FOOTE'S HUNDRED DAYS TOMATO. Fruit small and irregular. The forte of this tomato is its remarkable earliness, and its excellent keeping qualities when ripe, surpassing in this most other kinds.	10
PHINNEY'S WATERMELON. This is one of the varieties I have introduced. Red-fleshed, early and excellent. Those who could not succeed with other kinds of watermelons have succeeded well with this. It stands transportation remarkably well.	6	GOLDEN SWEDE TURNIP. A new variety having a small top fine root and thin riud; solid and nutritious; ranks high in England.	8
SCULPTURED SEEDED CREAM FLESHED WATERMELON. A new melon from Japan. The flesh, which is very sweet, is of a delicate cream color. The seed are singularly sculptured with marks resembling oriental characters.	6	VEGETABLE CATERPILLARS. Two varieties, large bodied and hairy. These are curious seed vessels of low growing plants, which strongly suggest the animal caterpillar. Used to decorate side dishes.	10
CHINESE HULLLESS OATS. These thresh directly from the straw, as clear as wheat, without a particle of hull or chaff adhering, the grain being much larger than common oats when hulled, and weighing as high as fifty-five pounds to the measured bushel. Earlier than the common varieties of oats. Authorities differ as to their value when compared with the common oat. 2lbs., \$1.00; per bushel of 32 lbs., by express, \$3.50.	15	VEGETABLE SNAILS. Singular seed vessels of low growing plants, which have striking resemblance to the snails of the garden.	10
NEW QUEEN ONION. I find that this new onion is decidedly the earliest of all varieties. It does not grow to a very large size, but sufficiently large to bunch while green, and with extra liberal manuring I doubt not it will make a good sized onion		WHITLOOF. A most distinct and entirely new vegetable, somewhat resembling Chickory in habit. It produces a moderate sized and beautiful white heart, in shape similar to Cos lettuce; the top, either boiled or eaten as a salad, or the root boiled will be found a valuable acquisition.	10

Agricultural Treatises.

A New Treatise.

CARROTS, MANGOLD WURTZELS AND SUGAR BEETS: WHAT KINDS TO RAISE: HOW TO GROW THEM AND HOW TO FEED THEM. BY J. J. H. GREGORY, Marblehead, Mass.

The increased attention given to the raising of roots for feeding to stock, particularly the Carrot and Mangold Wurtzel, has led me to write this treatise. I have endeavored to follow the manner presented in my other works, and give that minuteness of detail in every step of progress, from the seed to the matured crop, that is generally desired by the public. While this work is more particularly intended for persons of limited experience, yet it gathers up so much of experience and observation, covering so much ground in the growing and handling of these two standard crops, that I should be disappointed if about every grower did not find within its covers some facts of more value to him than the cost of the book. Single copies by mail, thirty cents.

CABBAGES: AND HOW TO RAISE THEM. BY JAMES J. H. GREGORY, Marblehead, Mass.

This treatise gives all the minute instructions so valuable to the beginner. It begins with the selecting the ground, and carries the reader along step by step, through the preparing of the soil, manuring, ploughing, planting, hoeing, weeding, gathering the crop, storing and marketing it, with a hundred minute details embracing every department of the subject.

To prepare myself the more thoroughly to write this work I experimented on foreign and native varieties of cabbage for four years, raising not far from seventy kinds. The gist of my experience will be found in this treatise. It is illustrated by several fine engravings. I have added a page on the green worm that is causing so much trouble in some localities. Price 30 cents.

ONION RAISING: WHAT KINDS TO RAISE, AND THE WAY TO RAISE THEM. BY J. J. H. GREGORY, Seed Grower, Marblehead, Mass.

This work, which I issued in 1865, has been warmly recommended by some of the best authorities in the country, and has gone through fourteen editions. It treats on Onions raised from seed, Potato Onions, Onion Setts, Top Onions, Shallots, and Rareries, the Onion Maggot, Rust, the merits of the different varieties of Onions, instructions in seed raising, and how to tell good seed,—beginning with the first step of selecting the ground, and carrying the reader along step by step through the preparing of the soil, manuring, ploughing, planting, hoeing,

weeding, gathering the crop, storing and marketing it, with a hundred minute details embracing every department of the subject.

Illustrated with thirteen engravings of Onions, Sowing Machines and Weeding Machines.

Single copies sent by mail, prepaid, for thirty cents. Seed dealers and booksellers supplied at the usual discount.

SQUASHES AND HOW TO GROW THEM. BY JAMES J. H. GREGORY, Marblehead, Mass.

This treatise is of about the same size and style as my treatise on "Onion Raising," and contains several illustrations, including a section of my squash house, with full directions for erecting one. In plan and thoroughness it is similar to my Onion treatise, *very minute and thorough*. Beginning with the selection of soil, it treats of the best way of preparing it; the best manures and the way to apply them; planting the seed, protecting the vines from bugs and maggot, the cultivating, gathering, storing and marketing of the crops,—giving hundreds of minute details so valuable to inexperienced cultivators. I have written this and my other treatises on the theory that what the public want is *minuteness and thoroughness of detail*. The price of this is thirty cents sent by mail post paid. Dealers supplied at a discount.

If after reading either of these works, any person thinks he has not had his money's worth, let him return them and I will return the money, as I intend that every man shall have his *quid pro quo*.

A First Class Book for Farmers and Gardeners.

"AMERICAN MANURES."—BY WM. H. BRUCKNER.

This is one of the boldest works issued from the Agricultural Press; it handles without gloves the ignorance, conceit and rascality that has so much to do with the manufacture of the Phosphates and other artificial fertilizers of the day. By the analysis given in this work we find that we have been paying from \$40 to \$60 per ton for many phosphates whose real value is from \$10 to \$30 per ton. Besides this, it presents in a very clear way, so that any farmer can easily understand it, the whole matter of manures and their application. Every farmer will find it a capital work for himself and his growing boys. It is a sort of an agricultural college between two covers. In its estimate of the value of the Superphosphates it allows no value for the insoluble portion; which is a correct estimate for those farmers who buy fertilizers only for what can be got from them the first season. I will send this book of 260 pages by mail, prepaid, to any of my customers at the publisher's price, viz: \$1 50.

THE HANSON LETTUCE.

The above cut represents a sectional view, showing the inside of this truly superior Lettuce, the heads of which grow to a remarkable size, and are deliciously sweet, tender and crisp,

even to the outer leaves. The heads are very large. A single one is frequently large enough for an ordinary sized family; the color is of a most beautiful green without, and white within, and is free from any bitter or unpleasant taste found in some varieties. The heads weigh from 2½ to 3 lbs., and measure to outer leaves 18 inches in diameter. This variety is not recommended for forcing, but for outdoor cultivation it cannot be excelled, if grown in well manured and cultivated ground. Per package, 15 cents.

"Your seeds give satisfaction, especially the Hanson Lettuce. I had some heads that weighed 3 lbs., trimmed." CARL A. BUSCH.
Monee, Hill Co., Ill.

"I raised the Hanson Lettuce last year that weighed 3 lbs. to the head after it was trimmed." PAUL M. BARKER.
Newport, R. I., March 29, 1875.

"Myself and neighbors agree that the Hanson Lettuce is the finest we ever saw. One head is plenty for a large family at one meal." GREGOR C. McLEOD.
Wesley, Tex., May 18, 1874.

"As to the Hanson Lettuce, you don't half praise it. I raised one head that measured twenty-five and a half inches in diameter." MRS. LOUISE M. LENNON.
Bloomingdale, N. Y., March, 1875.

Norbiton's Giant Mangold Wurtzel.

Long Smooth Beet.

Bastian's Half Long Beet.

Bastian's Early Blood Turnip Beet.

Egyptian Beet.

Early Bassano Beet.

Moore's Concord Corn.

Potato Onions.

Large Red Onion.

Improved Large Yellow, or Cracker Danvers Early Yellow Onions.

Phinney's Watermelon.

The Yokohama Squash.

When writing that seed has failed to reach you, please repeat your first order.

ASPARAGUS.

Sow the seed in the seed bed late in the fall or in the early spring, as soon as the ground can be worked, in drills one foot apart, covering the seed about one inch deep. Thin the plants to three inches in the row. The roots may be removed to the permanent bed when one or two years old. In preparing the ground no pains should be spared, as a well established and carefully cultivated bed will continue in good condition for twenty-five years or more. Select deep, rich, mellow soil, and trench the Asparagus two feet deep, using a liberal quantity of well decomposed manure, with a small admixture of common salt. Set the roots about two feet deep, using a liberal quantity of well decomposed manure. Apply a dressing of manure in autumn (rotten kelp so that the crowns will be three or four inches below the surface of the ground). In the spring, taking care not to injure the roots, dig the same into the ground in the spring, taking care not to injure the roots. The bed will produce shoots fit for cutting the second or third year after transplanting. An occasional application of salt will be found beneficial.

Conover's Colossal. The largest variety grown. 10 6

BEANS.

Dwarf, Snap or Bush.

Select light, warm soil, and plant when danger from frost is past in the spring, in drills two to two and a half feet apart, dropping the beans about two inches apart in the drill, and cover one inch deep. Keep the ground clean and loose by frequent hoeing, but do not draw the earth around the plants. Avoid working among the vines when they are wet, as it will tend to make them rust.

Early Pejee. Very early, hardy and prolific; will bear more pickings than any other bean. 30 60 10
 Early China, or "Red Eye." An old, popular, early variety. 30 60 10
 Early Valentine. Pod long, round and tender; excellent, standard early bean in Middle States. 30 60 10
 Early Mohawk. Very hardy, early and productive. 30 60 19
 Early Yellow Six Weeks. Very early and productive; a standard sort. 30 60 10
 Early Rachel. A long, straight-podded, early kind; grown for the New York market. 30 60 10
 Dwarf Wax. Pods mostly yellow. Early; for a snap bean, superior. 40 70 10
 Dwarf German Wax. Long variety. (New.) More productive than the Round variety. 40 70 10
 Dwarf German Wax. Round. A great acquisition; white pods, very early, first rate; beans pure white. 40 70 10
 Dun Cranberry. One of the very best for stringing; yield first rate; early, good either as a green or dry shell bean. 40 70 10
 Refugee, or Thousand to One. A very prolific bush sort. 30 60 10
 Intermediate Horticultural. A half bush variety, very prolific; an excellent substitute for the pole Horticultural; a superior sort for market gardeners. 25 65 10
 Yellow Eye. One of the best varieties for baking. Remarkably vigorous, healthy and prolific. 20 50 6
 Dwarf White Edible Pod. (New.) (French.) See page 11. 40 70 15
 Concord Bush. (New.) A fine, early, bush variety. 40 70 10
 White Pea Bean. True. Round in shape; fine for baking. 30 60 10
 Navy or Pea Bean. A small, almost round variety, very productive. A standard sort for field culture. 20 50 6
 White Medium. White bush variety, largely used by government. 20 50 6
 White Marrow. A standard sort for field cultivation; early. 20 50 6

Pole, or Running Varieties.

Set the poles three by four feet apart, and plant six to eight beans, with the eyes downward, around each pole, thinning to four healthy plants when they are up. They require the same soil and treatment as the dwarf varieties with the exception that they crave stronger soil, and do best in a sheltered location.

Marblehead Champion. (New.) To be used as a string bean. (See page 4.) package only 15
 Early Lima or Sieva; called also Frost Bean. This is two weeks earlier than the Large Lima. 60 90 15
 Mottled Cranberry. Long podded, very productive; a very popular bean for garden cultivation. 45 75 10
 London Horticultural, or Wren's Egg. Productive, pods elegantly striped—excellent string or shell. 50 80 10
 Rhode Island Butter. I esteem this bean as one of the very best raised in the North, to eat green-shelled. 40 70 10
 Kentucky Wonder. (New.) See page 11. package only 15
 Lamberson's White. (New.) See page 11. package only 15
 Australian Runner. (New.) Fine. Very early. Pods of an extraordinary length. 50 80 10
 Large Lima. As a shell bean surpasses all in quality; too late for the extreme North. 50 80 10
 Dreer's Improved Lima. Rather later but more prolific than Large Lima. 65 95 15
 Indian Chief or Black Algerian. Always in order for stringing; pods almost transparent, of a yellowish-white. 55 85 10
 Boston Market Pole Cranberry. The Boston marketmen cultivate this as the most prolific Pole Cranberry Bean for market. 50 80 15
 Concord Bean. This new pole bean is the most elegant of all beans. It takes exceedingly well to the poles, is healthy and very prolific; excellent either as string or shell, resembling the Horticultural to which it is related, though it takes better to the poles than that variety, and is considerably earlier. 40 70 10
 Cascknife. A white pole bean of great richness either as green shelled or when baked. 40 70 10
 Yard Long. (See page 11). package only 15
 Giant Wax. Always a snap bean; a variety that is never stringy at any stage of growth. Pods of a yellowish-white color, very long and remarkably tender. An acquisition. 75 1 05 10
 White Pole Cranberry. A capital late variety, particularly as a string bean. 45 75 10
 Painted Lady. Either for ornament or use. package only 15

ENGLISH BEANS. Broad Windsor. Large and excellent.

These thrive best in rich, moist soil and cool situation. Plant in early spring, two or three weeks earlier than the common beans, in rows two feet apart and six inches apart in the row, covering two inches deep. Pinch off the tops of the plants when the young pods first appear.

BEEF.

Select a deep, rich, sandy loam, and manure with well decomposed compost. Sow in drills fourteen to sixteen inches apart, and cover one inch deep. When the young plants appear, thin to four or five inches apart. For early use, sow as soon as ground can be worked in the spring; for autumn use, about the middle of May, and for winter use, from the tenth to the twentieth of June, according to variety, the long varieties requiring more time to mature than the round, early kinds. When sown late increase the quantity of seed. When young, the plants make excellent "greens". To preserve during winter, cover with earth to keep from wilting. When cooking, boil new beets one hour, and old ones two hours or more. The Mangold Wurtzels are grown principally for stock, and as they grow larger require more room. They should be sown in drills two and a half feet apart, and the plants be thinned to twelve or fifteen inches in the row. One ounce of seed will sow about one hundred feet of row.

Table Varieties.

Egyptian. Earlier than Bassano. Tops remarkably small. Excellent for market purposes. I heartily recommend this valuable variety to the attention of market gardeners, who seek to combine earliness, size and symmetry. 15 6
 Early Bassano. One of the earliest. 12 6
 Bastian's Early Blood Turnip. Has the earliness of the Bassano, but is of a much darker color when young. (See p. 11) 15 6
 Early Blood Turnip. A standard sort; good for summer or winter. 12 6
 Hatch's Early Turnip. Somewhat flat in shape; quite a favorite with some of the market gardeners around Boston. 12 6
 Dewing's Early Blood Turnip. Very symmetrical; free from fibrous roots; dark red. This has taken several first premiums at the Massachusetts State Fair. 12 6
 Simon's Early Turnip. This is a very early variety, size of Blood Turnip, somewhat flat in shape, growing very smooth, and of excellent quality. It is about as early as Early Bassano, but of a deeper red. 12 6
 Yellow Turnip. A very early sort, about as early as Bassano; of a beautiful golden yellow color. 12 6
 Bastian's Half Long Blood. A new Philadelphia sort of a fine dark color; a good grower. 15 6
 Henderson's Pine Apple. (New.) Excellent for family use. 15 6
 Long Smooth Dark Blood. Excellent for winter use; smooth skinned; flesh dark red. 10 6
 Dell's Ornamental Dwarf. This has leaves of a peculiarly deep, rich red color, and is cultivated in Europe as an ornament in the flower garden; grows partly above ground. package only 10

In sending orders be careful to write your address in full.

BEET.		
Mangold Wurtzels, Varieties for Feeding Stock.		
Improved American Sugar or Lane's. A long white variety of Mangold Wurtzel, for stock.....	10	6
Vilmorin's Improved French White Sugar. This is the variety cultivated by the French for the manufacture of sugar. Of six varieties of beets tested for sugar at the Farm of the Maine Agricultural College last season my seed of this variety gave the highest per cent. of sugar.....	12	6
Carter's Orange Globe Mangold Wurtzel. The best variety of Yellow Globe.....	10	6
Carter's Mammoth Mangold Wurtzel. Said to excel in size.....	10	6
Yellow Ovoid Mangold Wurtzel. The Ovoid Mangolds grow more symmetrical and freer of rootlets than the long sorts. They are heavier, bulk for bulk.....	10	6
Red Giant Ovoid Mangold Wurtzel. Very large, oval shape; pulls up very free from dirt.....	10	6
Norbiton Giant Mangold Wurtzel. A new English variety which tends less to a hollow neck than the old Long Red kind.....	10	6
Red Globe Mangold Wurtzel. } White Sugar. } Yellow Globe Mangold Wurtzel. } The Globe Mangolds succeed better than the long sorts on sandy soil. All the varieties of Mangolds are excellent food for cows, to increase the flow of milk. Farmers should begin to feed them towards the close of winter and in the spring.....	10	6
BERBERRY	15	6
One of the best shrubs for hedges. Perfectly hardy. Never winter-kills and grows on any soil; makes a thick, close, impenetrable hedge that will turn cattle, and promises to become the hedge plant of North America. The berries make excellent preserves. As the seeds of the Berberry do best when planted in the berry, I will receive orders and file them to be filled in the fall, as soon as the fruit is matured, when I will send the berries at prices named above with a page of full directions for making a hedge, and for preserving the fruit.		
BORAGE	20	6
This is a profuse flowering plant, which is grown principally for bees, or as ornament in the flower garden. Sow in early spring in rich soil, and thin plants to one foot apart. It readily bears transplanting, and when thus treated produces more flowers in proportion to its foliage.		
BRUSSELS SPROUTS		
A class of plants allied to the Cabbage family, producing great numbers of small heads or sprouts on the main stem of the plant, which are used in the manner of Cabbages. Plant in rich soil in hills two feet apart each way, and thin to one plant to the hill.		
Scrymger's Giant Dwarf. (New.) In habit close headed and compact..... package only	20	10
Dwarf Improved.....	25	6
Dalmeny Sprouts. A hybrid between Drumhead Savoy and Brussels Sprouts.....	25	10
BROCCOLI.		
The Broccoli are closely allied to the Cauliflower family, so nearly so that the Walcheren variety is sometimes classed with Cauliflower. They require similar cultivation and treatment to Cauliflower.		
Waicheren White. One of the very best varieties.....	75	10
Large White Early French. A standard French variety.....	50	10
Knights' Protecting. Dwarf, very hardy; heads very large for the plants.....	50	10
Purple Cape. Late, large, compact.....	50	10
Early Purple. Early, excellent; color deep purple.....	40	10
Elletson's Mammoth. A large English variety.....	50	10
CABBAGE.		
Cabbage will thrive on any good corn land, though the stronger the soil the better they will develop. New land is preferable. Plough deep and manure very liberally. The early sorts bear planting from eighteen inches to two feet apart in the rows, with the rows from two to two and a half feet apart. The large varieties to be from two to four feet apart in the rows, with the rows from two and a half to four feet apart, the distance varying with the size. The crop should receive as many as three hoeings and three cultivatings. Cabbage will not usually follow cabbage or turnips successfully in field culture, unless three or four years have intervened between the crops. For late fall marketing, plant drumhead sorts from June 10th to 20th. For full and minute information in every department of Cabbage culture, see my treatise on "Cabbages, and How to grow them."		
Earliest Varieties.		
Early Bleichfeld Giant. New. (See page 10.)..... package only	25	
Heartwell Early Marrow. New. (See page 10.)..... package only	15	
Henderson's Early Summer. (New. See page 4.).....	1 50	20
Crane's Early. (New.) (For des. see page 11.)..... package only	15	15
Early Nonpareil. A choice very early sort.....	15	6
Carter's Little Pixie Savoy. This variety closely resembles in earliness and size the Little Pixie.....	25	6
Wheeler's Coconut Cabbage. (New. A new sort, conical in shape, making fine hard heads; one of the best of the English early market varieties.....	40	10
Early York. One of the earliest; an old standard sort.....	20	6
Large York. An improvement in size on Early York; a little later.....	20	6
Early Jersey Wakefield. (True.) Resembles Oxheart. A standard early cabbage in Boston and New York markets.....	70	15
Little Pixie. A small, very tender and sweet cabbage, of the pointed heading family. It is earlier than Early York and heads hard, and from its small size a great number can be matured on a small area of land.....	30	10
Sugar Loaf. A popular early variety.....	25	6
Early Oxheart. An excellent early sort.....	25	6
Early Wyman. This new cabbage was originated by Captain Wyman, of Cambridge, Mass. It is allied to the early Wakefield, is about as early but grows to double the size; very popular with market gardeners as an early market sort. (See page 7.)	70	15
Cannon Ball. The hardest heading of all early sorts.....	40	10
Early Ulm Savoy. One of the earliest; unsurpassed in quality; capital for family use.....	40	10
Second Early.		
Fotter's Early Drumhead. The earliest hard heading drumhead. This has given great satisfaction in every section of the United States. (See page 6.).....	45	15
Early Winnigstadt. Heads large, cone-shaped and solid; one of the very best for all soils.....	35	10
Large French Oxheart. Popular as an early cabbage.....	30	6
Schweinfurt Quintal. The earliest of all large drumheads; grows from a foot to eighteen inches in diameter; does not head very hard, but is remarkably tender. The heads are very handsome, and almost as rich as the Savoy class.	50	10
Early Dark Red Erfurt. (New.) Early, head round and very solid.....	40	10
Late Kinds.		
Marblehead Dutch. (New. See page 11.).....	50	10
Dax Drumhead. (New.) A very large late round heading variety.....	40	10
Improved American Savoy, Extra Curled. Very reliable for heading; more finely curled than Improved American Savoy, which renders it very desirable for market gardeners and for family use.....	40	10
St. Dennis Cabbage. A large late drumhead, makes a very solid head. Popular in Canada.....	35	10
Green Glazed. A standard variety in the South.....	35	10
Marblehead Mammoth Drumhead. (See page 6) The largest cabbage in the world.....	60	15
Bergen Drumhead. A standard in New York market.....	35	10
Stone Mason Drumhead. (See page 6) The great market cabbage in Boston market.....	45	10

For Price List of Potatoes see page 51.

	Price	Price per Ounce	Price per Pk'g
CABBAGE.			
Premium Flat Dutch. Large and excellent for winter; very extensively grown		40	10
Improved American Savoy. An improvement on the old Green Globe Savoy; very reliable for heading. Very sweet and tender—much esteemed for family use. An excellent sort for market gardeners		40	10
Drumhead Savoy. A cross between Savoy and Drumhead—very large		35	10
Red Dutch. The old variety for pickling		30	6
Red Drumhead. Larger than Red Dutch and more profitable; heads round; very reliable for heading, very hard under high cultivation		40	10
Savoy, for Greens. The Savoy class of Cabbages make the best greens		10	6
CARROT.			
Carrots thrive best in rather a light loam. The ground should be well manured with fine, well rotted or composted manure, six or eight cords to the acre, and be thoroughly worked quite deep, by two ploughings made at right angles with each other. Also cultivate and drag if there are any lumps, and then rake level, burying all remaining lumps and stones. Plant in rows fourteen inches apart, and thin plants to five or six inches in the rows. Plant from the middle of April to middle of May, to insure crop; though good success is often met with if planted as late as 10th of June. As the dry spells which sometimes prevail at that season are apt either to prevent the germination of the seed, or to burn the plants as soon as they appear above ground, it is therefore advisable to increase the quantity of seed, which under the circumstances will give the crop a better chance. Keep very clean of weeds.			
Danvers. (New.) (See page 3.)		20	10
Early Very Short Scarlet. The earliest and smallest of all varieties; of special value for forcing		15	6
Early Scarlet Horn. The early short variety for forcing; excellent for the table; color very deep orange		15	6
Carter's Improved Early H.C.n. A distinct variety combining the form of the Early Scarlet Horn with the size of the Early Horn		15	6
Short Horn. The standard early variety; sweeter than Long Orange and more solid. Good to color butter		15	6
Improved Long Orange. Of a darker, richer color than Long Orange		15	6
Long Orange. The standard field carrot; good for stock		12	6
Large Altringham. Bright orange; grows a little above ground		12	6
Large White Belgian. Largest of all, white and most productive; good for horses; entire crop can be pulled by hand		10	6
Yellow Belgian. Grows partly out of ground. A capital sort for late keeping		12	6
CAULIFLOWER.			
Pursue the same course as with Cabbage, manuring rather heavier and hoeing oftener. Cauliflowers covet the cool, moist weather of the fall months to perfect themselves			
Autumnal Late Giant. (New.) Very large headed and extremely productive			25
Italian Early Giant. (Autumnal.) Fine, large, white-headed and early	1 50		25
Carter's Dwarf Mammoth. A premium English variety; very early, with head remarkably large for so dwarf a variety	1 50		25
Dwarf Early La Maitre. A new French sort, making fine large heads	2 00		25
Improved Early Paris. A choice American grown variety, extensively planted by the market gardeners around Boston	1 00		15
Early Paris. A standard early variety	1 00		15
Early Erfurt. A choice German variety	1 50		15
Extra Early Dwarf Erfurt. Extra choice. Specially selected. (See page 11)	4 00		50
Fitch's Early London. The best strain of this standard English sort		75	15
Early Dutch. A very early kind		1 00	15
Nonpareil. One of the earliest varieties, resembles Improved Early Paris		1 00	15
Lenormand's Short-Stemmed Mammoth. Dwarf, large and fine. The largest variety and one of the most reliable for general cultivation	1 50		25
Large White French. A very fine, large white cauliflower		75	15
Stadholder. Fine; large size; late		1 00	15
CELERY.			
Plant seed in hot bed or very early in open ground. Transplant four inches apart, when three inches high, in rich soil finely pulverized; water and protect until well rooted, then transplant into rows five or six feet apart either on surface or in well manured trenches a foot in depth, half filled with well rotted manure. Set the plants from eight to twelve inches apart. To blanch draw earth around the plants from time to time, taking care not to cover the tops of the center shoots.			
Sandringham Dwarf White. Most dwarf of all; very solid; white		30	10
White Solid. A standard sort		25	6
Boston Market. Short, compact and solid—very popular; almost the only variety sold in the Boston market. (See page 11)		50	10
Turnip Rooted. The root of this is eaten		25	6
Carter's Crimson. Dwarf, solid and crisp; a first class variety		30	10
Turner's Incomparable Dwarf White Solid. Popular in England, and extensively grown by the New York market men. In dwarf habit next to Sandringham		25	6
CHICKORY.			
Pursue the same manner of cultivation as for Carrot. If to be used as a salad, blanch the leaves by covering so as to exclude the light. If raised for its root, dig at about the same time as Carrots, wash the roots and then slice them, either way, and dry thoroughly by artificial heat.			
Large Coffee Rooted. Used as a substitute for coffee		20	6
CHUFAS, or Earth Almonds. (See page 11.)			
		15	6
COLLARDS or COLEWORTS. True Southern			
		20	6
A class of plants closely allied to the Cabbage family, which are somewhat extensively used in the South, when small, as greens. Sow in early spring in drills one foot apart, covering the seed half an inch. The young plants are ready for use as soon as they have attained sufficient size, but if it is desired to keep them in good condition, thin the plants to six or eight inches apart, and pull off the larger leaves before using.			
CORN.			
Corn revels in a warm and rich soil. Do not plant before the ground has become warm—nothing is gained by it. Drill cultivation is more profitable than hill cultivation. The smaller varieties may be planted with the drills two and a half feet apart, and the stalks thinned to ten inches apart; the larger sorts should have the drills four feet apart, and the stalks a foot apart in the rows, and the largest varieties eighteen inches apart. Use some rich manure in the drills. Frequently stir the earth about the roots by hoe or cultivator, but do not draw it up around the stalks.			
Sweet Varieties for Family use and Marketing in a green state.			
Egyptian Sweet. New. (See page 10)		70	90
Quaker Sweet. (New.) (See page 11.) First rate to plant in the garden for a very late sort		40	60
Forty Days. Earlier than our standard early corn, and will be found desirable in Northern latitudes as an extremely early sort for a flint variety		40	60
Pratt's Early. Here we have a capital sort for marketmen who are looking about for the earliest sort, growing to a fair market size. An acquisition. (See page 11)		35	55

Quart by Exp's Quart by Mail.

For Price List of Strawberries and Asparagus see page 49.

	Price	Price	Price
	Quart by Exp	Quart by M ¹	per Pk'gs
CORN.			
Early Dwarf Sugar. Grows about three feet high; ears quite small but very early.			
Early Minnesota Sweet. One of the very earliest sorts of sweet corn, with ears of suitable size for market purposes.	40	60	10
Early Narragansett. One of the earliest; kernels very large; ears large in diameter, and of medium length.	30	50	10
Bates's Extra Early Sweet. A variety good for market or for table use; one of the earliest.	35	55	10
Darling's Early. An old standard. We have better sorts now.	35	55	10
Moore's Early Concord Sweet. A new early corn, from 12 to 16 rows. Remarkably handsome; quite popular. Awarded a silver medal by the Mass. Horticultural Society.	30	50	10
Crosby's New Early Sweet. First rate every way, either for market or family use.	35	55	10
Mexican Sweet. The sweetest and tenderest for table use of all varieties I am acquainted with.	35	55	10
Golden Sweet. Of fine quality and peculiar flavor; a cross between the sweet and field varieties.	40	60	15
Asylum Sweet. Ears large and of first rate quality. Second early.	40	60	10
Large Red Cob Sweet. An old standard sort. Ears remain a good while in fit state for use.	35	55	10
Stowell's Evergreen Sweet. Excellent; keeps green till cold weather; ears large; a standard late variety.	35	55	10
Gen. Grant. An acquisition because of its extreme sweetness. Late, comes in after Stowell's. The best for fodder. (See page 11).	30	50	10
Marblehead Mammoth Sweet. The largest variety grown. (See page 11).	50	70	10
Sweet Fodder Corn. Sweet corn is preferred to the yellow kinds by our best farmers for fodder. For bush. rates see p. 28	50	70	15
Tuscarora. A flour corn; ears and kernels very large.	25	45	6
	30	50	6
Varieties for Field Cultivation and Popping.			
Compton's Early Field. (New. See page 2.)	50	70	15
Longfellow's Field. New. See page 2.)	35	55	10
Adams' Early. A favorite in the south. The earliest of all the Dent sorts.	30	50	6
Improved Early Yellow Canada. A first rate corn when the seasons are short.	25	45	6
Lamson's Early Yellow Field. An excellent variety for latitude of New England; ears quite large and well filled out; two hundred and fourteen bushels of ears have been grown on an acre.	30	50	6
Hundred Days Dent. Early; ears large and well filled. Capital for the Middle and in favorable seasons for Southern New England states. Will ripen in one hundred days in a good corn season.	25	45	6
Mammoth Field. (P. 11.) A large white gourd seed variety, claimed to be the largest kind raised in the Western States	30	50	6
Silver Laced Pop. The handsomest of all varieties of pop corn, and decidedly a growing favorite.	35	55	10
Nonpareil, or Pop. The popular variety for parching.	35	55	10
Dwarf Golden Pop. Small, but ornamental, and a favorite with the little folks; excellent for popping.	30	50	6
Egyptian Pop. Tenderer when popped than the common variety.	70	90	15
BROOM CORN.			
Any good corn land will grow Broom Corn. Plant in rows three feet apart and thin to eight inches in the row.			
Dwarf. Grows from four to four and one half feet high. Desirable.	40	60	10
Evergreen. A standard variety.	30	50	10
Improved Evergreen. An improvement on the above by careful selection of stock for years. Not as tall as Evergreen; brush fine and bright colored.	40	60	10
CRESS.			
Plant on rich soil, finely pulverized, in drills six or eight inches apart. That grown in the cool of the season is of the best quality. To be used as salad before the flowers appear.			
Curled. The best sort.			per oz
Plain or Common.			10
Water Cress. To be planted along the borders of shallow water courses.			6
			10
CUCUMBER.			
The vines require a warm location. Plant after the ground has become warm, in hills four feet apart for the smaller varieties, and five feet for the larger sorts. Manure with ashes, guano, or some well rotted compost, working the manure just under the surface. Sprinkle vines with plaster or air-slacked lime to protect it from hugs. The frame cucumbers can be successfully grown in the open air in the country by giving them well sheltered location, plenty of manure, and having hills six by six.			
Green Prolific. (New.) See page 10.		25	10
Bismarck. (New.) (See page 10.)		35	15
Chinese Long Notted. (New. See page 11.)		package only	25
Russian Notted. (New.) (For description see page 12.)		35	15
Tailby's Hybrid. (New.) (For description see page 9.)		35	15
Rollisson's Telegraph. (New.) One of the most prolific of the forcing varieties.		package only	20
Norbition Giant. (See page 11). The longest prize frame cucumber known.		package only	20
English Prize Cucumbers. Carter's Champions; Ston House. These yield but very few seed, and are great favorites in England. Each variety per package.			25
Gen. Grant. The hardiest and probably the most prolific of the English Frame varieties. In England the climate is not hot enough to grow cucumbers in the open air.			20
Early Russian. The earliest of all varieties; grows about four inches long.		15	6
Early Cluster. Bears mostly in clusters; very early and productive.		12	6
Improved White Spine. Great bearer; excellent for early forcing, or for out door cultivation; standard in Boston market. My stock is from one of the best Boston market gardeners.		12	6
Early Frame. Early, short, prolific.		12	6
Long Green. An old standard sort.		12	6
Short Green. An old standard.		12	6
Improved Long Green Prickly. Excellent variety, growing 18 or 20 inches long; makes a hard brittle pickle.		25	6
West India Gherkin. A very small, elegant, peculiar sort, for pickles only, prolific to an extraordinary degree. Difficult to get the seed to germinate.		30	10
New Jersey Hybrid. The largest of all white spined varieties.		15	6
Eight Varieties Mixed.		20	6
Boston Pickling. A medium, long variety; the standard for pickling in Boston market.		15	6
Short Pickling. Very desirable for a short pickle.		15	6
Early White Japan. (New.) A variety recently introduced from Japan, exceedingly productive; resembles White Spine, but turns to a richer creamy white color, and is earlier.		20	6
Long Green Turkey. A fine long variety, a little larger at seed end than Long Green.		15	6
Snake. I have grown these six feet in length, coiled up like a snake. (See page 12.)		package only	20
DANDELION.			
This vegetable has become very popular as an early healthful green, and the roots also are used when dried as a substitute for coffee. Its use in either of these forms is particularly recommended to those who are inclined to any disease of the liver. Sow in May in drills one foot apart, covering the seed half inch deep. A rich soil is preferable, but this plant will thrive anywhere.			
New Large Leaved. (See page 12.)		package only	15
Common.		per 1/2 lb., \$1.25	40
			10

For Price List of Seeds in Quantities see pages 27 and 28.

	Price per ounce	Price per P'k'ge
EGG PLANT.		
Plant the seed in March, in a hot-bed, or, for family use, in flower pots, in a warm window. Transplant in open ground after weather has become warm and settled, in rows two feet apart each way. They require a rich soil and as favorable a location for warmth as the garden will afford.		
Long White China. A very delicate and beautiful long white variety. Highly esteemed by amateurs.....	package only	15
Very Early Dwarf. A new French variety of Long Purple; extra early. (See page 12).....	package only	15
Striped Guadaloupe. Long in shape and elegantly striped; very ornamental and edible.....	package only	15
Black Pekin. A new variety of Round Purple. Blackish violet leaves; fruit very large.....	package only	15
Long Purple. Earlier and more productive, but smaller, than Round Purple.....	package only	15
New York Improved Round Purple. An excellent variety, surpassing in size of fruit.....	package only	15
Scarlet China. (New. See page 12.) A fine ornamental variety.....	package only	15
ENDIVE.		
For early use sow as soon as the ground can be worked in the spring, in drills fifteen inches apart, and thin plants to six or eight inches in the row. A succession may be obtained by sowing every two or three weeks until midsummer, when it will be proper time to plant for fall and winter use. Any common garden soil will do, but a rather moist situation is preferable. To blanch the leaves gather them carefully together when perfectly dry and tie with matting or any soft fibrous material. Another method is to invert flower pots over the plants. The leaves are very highly esteemed for use as salads.		
Loudon Green Curled. Very popular.....	25	6
Fine Curled Mossy. Very ornamental.....	30	10
Broad Leaved Batavian. A large summer variety.....	25	10
GOURDS.		
Hercules Club. Grows 4 to 6 feet in length.....	package only	10
Sugar Trough. (See page 12).....	package only	15
Double Bottle.....	package only	10
Dipper.....	package only	10
Angora.....	package only	10
Dish-Cloth Gourd. (See page 12).....	package only	15
Fancy and Ornamental. Mixed varieties. (See page 12).....	package only	10
GARLICS.		per pound 40 cents
Plant the bulbs on exceedingly rich soil, in rows or in ridges fourteen inches apart and six inches apart in the rows. They are cultivated for their flavor, (which is similar to the onion but more powerful,) and are used in stews, soups, &c.		
KALE, or BORECOLE.		
Plant in hills two by three feet apart, and thin to one plant to the hill. Select deep, rich soil, and cultivate as Cabbage. Some of the varieties are very ornamental, and scattered singly are attractive in the flower garden, being finely curled and variegated with green, yellowish white, bright red and purple. The tender leaves are used as Cabbage.		
Frisby's Crested. (New. See page 12).....	package only	15
Green Curled Tall Scotch. (New. See plate on page 32.) One of the best varieties.....	25	10
Sea Kale. The young shoots when blanched are exceedingly delicate, being much superior to Broccoli.....	package only	10
Carter's Garnishing. Both ornamental and useful. This will produce many new varieties of high colored plants.....	package only	15
Ornamental Kale, four elegant varieties. For ornament or the table.....	package only	15
Dwarf Green Curled, or German Greens. Very hardy; a standard market sort.....	15	6
Cottager's. A new English variety.....	20	6
Jersey Cow Kale. For cattle only; growing very rank.....	30	10
Field Kale. For cattle. Can be cut several times during the season.....	30	10
Abergeldie. A new dwarf variety, curled as fine as parsley; of delicate, mellow flavor.....	30	10
KOHL RABI, or TURNIP CABBAGE.		
Prepare ground as for Cabbage, then plant about the first of June in rows two feet apart, thinning plants to twelve inches in the row. To preserve over winter treat as turnips. When young their flesh is tender and resembles a fine ruta бага with less of a turnip flavor. When fully matured they are excellent for stock.		
Early White Vienna. A standard early kind.....	30	6
Large Purple. Very large, hardy and productive; for stock.....	30	6
Neapolitan Curled. (New).....	40	10
LEEK.		
Select good onion soil, manure liberally, and plant in April in drills made six or eight inches deep and eighteen inches apart, and thin to nine inches apart in the drill. Gradually draw the earth around the plants until the drills are filled level with the surface. Draw for use in October. To be used in soups or boiled as asparagus.		
Large Musselburg Leek.....	40	10
Broad Scotch, or Flag. A large and strong plant; hardy; color deeper than Rouen.....	25	6
Very Large Rouen. A new French variety; best of all for forcing.....	30	6
Extra Large Carentan. (New.) A very fine extra large winter variety.....	package only	15
LETTUCE.		
Lettuce covets a rich and rather moist soil. The rows should be about twelve inches apart and the plants thinned to ten or twelve inches apart for the heading varieties. The more rapid the growth the better the quality. Some varieties are peculiarly adapted for early culture, others for summer growth.		
Satisfaction. New. (See page 10).....	package only	15
Egyptian. (New. See page 12).....	package only	15
All-the-Year-Round. New. (See page 12).....	package only	15
Black Seeded Tennis Ball. Hardy, excellent for early crops; earlier than Silesia; large heads. My stocks of this and White Tennis Ball are from one of the first gardeners near Boston. A favorite in Boston market.....	35	6
Hanson Lettuce. (See page 13).....	50	15
White Tennis Ball, or Boston. (White seed.) The variety so extensively grown by the Boston marketmen during winter for marketing in February and March. A fine early sort—small heads, very hardy; used for winter culture.....	30	6
Early Curled Simpson. Resembles Silesia, but is more curled and not so early.....	30	6
Early Curled Silesia. Very early; very tender and sweet—a popular variety for hot-beds and early out-door culture.....	25	6
Early Butter Head. A most excellent sort—a great favorite.....	35	6
True Boston Curled. The most elegant Lettuce of all. (See page 12).....	35	10
Drumhead. Very large; heads crisp and tender. A standard sort.....	20	6
Large India. Resembles Drumhead but later; of fine quality.....	40	10
Brown Genoa Cabbage. Of medium size, round head stained with red about the top. One of the best for either summer or winter use.....	35	6
Improved Spotted Cabbaging. A fine head variety; color green shaded with brown; quality first rate; one of the finest for the table.....	package only	10
Large Princess Head. A new, very fine German variety, which does finely in the United States.....	35	6
Perpignan. Heads sometimes seven inches in diameter. One of the best summer varieties.....	35	6
French Imperial Cabbage. A fine large-headed variety; one of the very best for family use, as it does not run quick to seed.....	35	6
Versailles Cabbage. A fine summer variety; light green; makes large heads.....	35	6
Bossin. A new French variety; large; late; color dark green.....	35	6
Neapolitan Cabbage. A fine summer variety.....	35	6

For List of New Novelties see pages 10, 11

	Price per ounce	Price Per p'k'g'e
LETTUCE.		
Six Choice Varieties.....	package only	15
White Paris Cos. Best of all the Cos varieties.....	35	6
Kingholm Cos. Stands the summer heat splendidly and heads without tying; makes fine large heads.....	package only	10
Green 'Fat' Cabbage. A fine summer cabbage variety; dark green; heads small, but do not run to seed quick.....	package only	15
Victoria Cabbage. One of the best English cabbage varieties.....	package only	10
MARTYNIA.		
Plant on any rich, garden soil, two by three feet apart, leaving only one plant in a place. It produces an abundance of large, showy flowers, and the young pods, when sufficiently tender to be easily punctured by the nail, are used for pickles.	30	6
MELON.		
Select warm and light soil—a poor light soil is better than a cold and rich one. Thoroughly work the soil, manure with guano, phosphate or a rich compost, having the hills six feet apart for the musk varieties, and eight or nine for water melons. Do not excavate hills, but work the manure just under the surface, as the roots of all vines naturally seek warmth. Pinch the more vigorous vines from time to time, and work in guano or phosphate between the rows. Plant a dozen or more seeds in each hill, but do not leave over two plants. Sprinkle young plants liberally with plaster or air-slacked lime.		
Musk Varieties.		
Log-of-wood. New. (See page 2).....	package only	20
Algiers Cantaloupe. (New.) See page 10.....	package only	25
Silver Netted. (New.) See page 12.....	30	10
Christiana. (True.) Remarkable for early maturity.....	15	6
Improved Cantaloupe. (New.) A very early, large round sort; first rate for market.....	20	6
Hardy Ridge. (New.) (See page 3) A remarkably thick fleshed melon, of good quality. A most vigorous grower.....	40	15
Sill's Hybrid. (True.) Salmon colored, flesh rich, sweet and delicious. (See page 12).....	20	6
Torrey's. Green fleshed; large; earlier than Casaba.....	20	6
Shaw's Golden Superb. (See page 12).....	20	10
Skillman's Fine Netted. Of delicious flavor—early.....	15	6
Early Nutmeg. Green fleshed, highly scented; mine is the Boston variety, which is earlier than the Nutmeg grown further South.....	15	6
Long Yellow. Large, sweet, productive; a well known sort.....	15	6
Green Citron. Green fleshed; sweet, melting, and rich flavored.....	15	6
Ward's Nectar. Early, exceedingly prolific, sweet, rich, and delicious; green fleshed.....	20	10
Early Jenny Lind. An early sort; favorite with gardeners.....	15	6
New White Japan. Flesh greenish white; early and prolific; delicious.....	15	6
Pine Apple. Oval shaped, rough netted, thick fleshed, juicy and sweet.....	15	6
Casaba. (New.) A very large, long, green fleshed melon, of delicate flavor, thick fleshed, melting and delicious; has been grown to weigh 15 lbs. An acquisition.....	20	10
Arlington. (New.) Green fleshed.....	20	10
Watermelon.		
Golden Fleshed Water. New. (See page 10).....	package only	15
Excelsior. (New. See page 2).....	35	15
Ferry's Peerless. (New.).....	20	10
Vick's Early. (New.).....	20	10
Ice Cream, True, White Seeded. A very early melon of superior quality. Very popular.....	15	6
Jackson, or Strawberry. (New.) A great favorite in the Middle and Southern States. Delicious, seeds white tipped with red.....	20	6
Gipsy. A very large and very productive water melon. A great favorite in New Jersey as a market melon.....	15	6
Bayard Taylor. A remarkably large, foreign sort, which matures well in this country.....	20	6
Cream Fleshed Sculptured Seeded. (See page 9.) New; early, remarkably sweet, with singular seed.....	15	6
Mountain Sweet. Early, solid, sweet and delicious; one of the best for northern cultivation.....	12	6
Joe Johnston. (New.) A first class Southern melon; large, round in shape, has a dark green, striped, thin rind and is of the finest flavor; worthy of an extensive trial.....	25	10
Mountain Sprout. Long, striped, scarlet flesh; one of the very best.....	12	6
Phinney's. For hardness, vigor, and productiveness, unexcelled; early, very reliable, red-fleshed. (See page 12).....	20	6
Citron. For preserves; very hardy and productive.....	15	6
New Orange. Improved in size—the rind will peel like an orange when fully ripe.....	15	6
MUSTARD.		
Sow in drills one foot apart, and cover seed half inch deep. Thrives readily in almost any soil. Water frequently in dry weather, and for a succession sow every two weeks during the season. Used principally as Cress for salads.		
White or Yellow. For salad or medicinal purposes.....	10	6
NASTURTIUM.		
Plant in May in rows; the climbing varieties to cover some arbor, or fence, or climb or twine around the house; the dwarf kind in hills or in rows four feet apart. The leaves are used for salad, and the seeds when soft enough to be easily penetrated by the nail, for pickles. If each dwarf is kept by itself the plants show a display of symmetry.		
Tall. An ornamental climber.....	15	6
Dwarf.....	20	6
OKRA, or GUMBO.		
Select warm and rich soil and plant when the ground becomes warm, in rows two feet apart, thinning plants a foot apart in the row. The pods are used to thicken soups, being gathered when young. In the North they require the warmest locations and it is better to start them in a hot-bed.		
Early Dwarf. White, small and round; pods smooth.....	15	6
Long Green. Later and more productive.....	15	6
ONION.		
In some parts of the country the term "Silver Skin" denotes a white variety—in other parts a yellow variety. Please indicate in your order which you want. The soil should be rather light, and free from large stones. Apply from eight to twelve cords of rich, fine compost to the acre. Plough not over five inches deep, and work well with cultivator. Plough again at right angles with first furrows, and cultivate again. Now rake level and fine, and plant seed in rows fourteen inches apart at rate of four pound to the acre. Keep very clean of weeds. When ripe, pull and dry a few days before storing. For full particulars in every department for the cultivation of the Onion, see my work on "Onion Raising."		
Southport White Globe. Remarkably handsome; great cropper, but would not advise to raise it north of southern Connecticut. (See page 12).....	35	10
Marzajole. A silvery white skinned variety, possessing the best qualities desirable for culinary purposes.....	40	10
Yellow Strasburgh, or Large Yellow. A late standard variety.....	20	6
Mammoth Tripoli. One of the largest of the giant foreign varieties; of mild flavor.....	package only	15
Nasbey's Mammoth. An Italian variety excelling in size and mild flavor.....	package only	10
Giant Rocca. A new Italian variety. (See page 12).....	40	10
Large Flat White Italian. A mild flavored onion; grown from sets it attains to a very large size.....	50	15
Early Red Globe. One of the earliest and most productive and handsomest of all the red sorts.....	25	10
Early Cracker. A decided improvement on Large Yellow, being much earlier and a fine cropper; the kind for a short season.....	25	10
White Portugal. Mild flavored, not a good keeper; best for summer.....	25	10

The specimens of corn are not fancy sketches, but were all engraved from photographs which I had taken from specimens grown on my farms. No. 1, Marblehead Mammoth Sweet Corn; 2, Moore's Early Concord Corn; 3, Mexican Sweet Corn; 4, Crosby's Early Sweet Corn; 5, Early Narragansett Sweet Corn; 6, Pratt's Early Sweet Corn; 7, Extra Early Dwarf Sugar Corn. See pages 17 and 18.

Boston Market Celery.

White Solid Celery.

Beginning at the left hand, the smallest Cucumber is the Early Russian, then follow Short Horn, Early Cluster, (two specimens), White Spine, Long Green, and Improved Long Green Prickly.

Chinese Rose Winter Radish.

Casaba Muskmelon.

Nutmeg Melon.

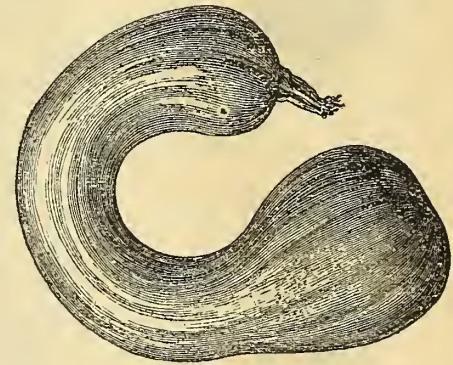

Sill's Hybrid Muskmelon

Russian Netted Cucumber.

Bell Pepper.

Crookneck Squash.

Drumhead Lettuce.

Egg Plant.

Cayenne Pepper.

In sending orders be careful to write your address in full.

	Price	Price per Ounce	Price per p'kg
ONION.			
Large Red Wethersfield. Pleasant flavored, grows very large, keeps well ; hardy.....	15		10
Early Flat Red. A capital sort where the seasons are short. A very quick grower.....	25		10
Southport Red Globe. A great cropper. Very popular in New York market; is late; would not advise to raise north of southern Connecticut.....	25		10
New Queen. A new English white onion, the earliest of all varieties (See page 12).....	45		15
Danvers Yellow. (True.) Large, round, earlier than Large Yellow, very profitable; 1100 bushels have been raised from one acre.....	25		10
Potato Onions. The bulbs of these are planted.....		per quart 40 cents	
Onion Setts. From these most of the early onions are raised.....		per quart 50 cents	

PARSLEY.

Select rich soil and sow the seed in drills one foot apart, covering half inch deep. As the seed is usually from fifteen to twenty five days in vegetating, it will be necessary to sow early. Thin plants to four inches apart when two inches high. The beauty of the plant may be increased by several successive transplantings. It is used principally for flavoring soups, &c., and for garnishing in its natural state.

Fern Leaved. (New.) (See page 12.).....	30		13
Dickson's Prize.....		package only	10
Dwarf Curled. Finely curled; good for edging table ornament.....	10		6
Myatt's Garnishing. Double curled.....	25		6
Dunnett's Selected. A new English sort.....	15		6
Drummond's Scotch Curled. (Selected.) Fine for garnishing.....	25		6
Carter's Champion. Moss curled; (New.) elegant for garnishing.....	25		6
Carter's Covent Garden Garnishing. Probably the best of its type.....	25		6

PARSNIP.

Give the richest and deepest soil to the long varieties of Parsnip; the Turnip sort will grow well on shallow soil. Make the soil very fine, and plant the seed in rows eighteen inches apart, thinning plants to five inches in the rows. The seed should be planted half inch deep. To keep well in the ground over winter, draw a little earth over the tops.

Sutton's Student. An English variety.....	12		6
Round Early, or Turnip. A new French sort. excellent for shallow soil, shaped like a turnip.....	15		6
Large Dutch. Large and sweet. A standard variety.....	10		6
Hollow Crowned, or Guernsey. The hollow crowns are considered superior in quality to the other varieties.....	10		6
Abbot's Improved Hollow Crowned. A standard English variety.....	12		6
Maltese Parsnip. A new, long English variety.....	10		6

PEAS. Of the numbers printed against the Peas, No. 1 indicates first early class, 2 second early and 3 late class. Those marked with a star (*) are wrinkled varieties, the sweetest of all; but as they are liable to rot need to be planted thicker than the round sorts. For notes on Peas see third page of cover.

Very Dwarf. These very low varieties require no sticking.

The tall sort will run too much to vine if liberally manured, it being better to depend on the richness of land that has been previously in good cultivation. Have the dwarfs, that grow not over fifteen inches high, in rows two feet apart; those varieties attaining the height of from two to three feet, in rows three feet apart; and the rows of the tallest sorts, four feet apart.

	Quart by Exp's	Quart by Mail.	
1 *Carter's Extra Early Premium Gem. A new early dwarf wrinkled pea, sent out by Messrs. Carter & Co., seedsmen, of London, as an improvement on Little Gem. More prolific and longer podded.....	45	75	10
1. Tom Thumb. One of the very earliest; very productive; pods well filled. Height of vine ten inches.....	40	70	10
2. *McLean's Little Gem. A wrinkled pea nearly as early as Tom Thumb; quality first rate. Twelve inches.....	40	70	10
1. McLean's Blue Peter. Early; of fine quality; pods larger than Tom Thumb, but not so numerous. Ten inches.....	60	90	15
2. Commodore Nutt. A remarkably dwarf variety of the sugar or string pea; to be snapped like beans. Ten inches.....			15
2. Drew's Dwarf. This is a branching variety, each pea making three or four vines. This pea differs from all others in form; medium early. Peas remarkably large and a prolific cropper. Needs to be planted very early.....	50	80	10

Dwarf.

All varieties under this class will do without bushing, but on rich, garden soil they will generally do better when bushed.

3. Carter's Challenger. (New.) (See page 10.....			package only	25
2. Carter's Little Wonder. (New.) See page 10.....			package only	25
1. Hancock. This is a new seedling of American origin. A first early. (See page 12.).....	40	70		10
1. Laxton's No. 1. (New.) Earlier than Alpha, with straight pods.....	60	90		15
2. *Laxton's Quality. A second early, wrinkled pea. Highly recommended by the Royal Horticultural Society.....	50	80		15
1. William Ist. (New.) (For description see page 12.).....	50	80		10
2. Fill-Basket. (New.) A large, very handsome and productive sort; very prolific.....	50	80		15
1. Sutton's Emerald Gem. (New.) (For description see page 12.).....	50	80		10
1. Philadelphia Extra Early. The standard early variety in Philadelphia markets. Of very fine quality.....	35	65		10
1. Carter's First Crop. Earliest of all; pods smaller and more numerous than Dan O'Rourke. Two and one-half feet.....	40	70		10
1. Extra Early Dan O'Rourke. One of the earliest standard market varieties; very productive. Two feet.....	35	65		10
1. Kentish Invicta. A new English variety, very early and of great promise. Crop ripens all together. Two and one-half feet.....	40	70		10
1. *Laxton's Alpha. One of the new English wrinkled sorts, distinguished for earliness, productiveness and good quality. In yield it probably surpasses any of the early sorts.....	40	70		10
1. Caractacus. Messrs. Waite & Co., the English seedsmen, send this out as the earliest of all peas. It is adopted by the Boston marketmen as one of the best first early peas. Two feet.....	40	70		10
1. Early Kent. This will be found to be a very fine pea of the early class; a keen competitor for market gardeners with the early English sorts. Three feet.....	30	60		10
1. Dexter. A new American pea, selected as being extra early. Worthy of a trial by gardeners. Two and one-half feet.....	40	70		10
2. *McLean's Advancer. A wrinkled pea—about one fortnight earlier than Champion of England, equal to it in quality, fully as productive, while it grows but two-thirds as high; everything considered, the best of the second earlies for market purposes. Two and one-half feet. Very popular.....	40	70		10
2. *Hair's Dwarf Mammoth. One of the best for family use—low and bushy in its habit of growth; peas very large, wrinkled and sweet. Eighteen inches.....	40	70		10
2. Brown's Dwarf Marrowfat. The earliest of all marrowfats; dwarfish habit. A first class American variety. Two feet.....	45	75		10
3. *Yorkshire Hero. A large late wrinkled dwarf; peas remarkably large and fine; a most capital sort for the kitchen garden. Two and one-half feet.....	40	70		10
3. *McLean's Premier. An English wrinkled pea, pods and peas very large; sent out as being of very superior quality and productiveness. A nice family pea. Two and one-half feet.....	45	75		10
2. Dwarf Blue Imperial. An old standard sort; two feet.....	30	60		10

When writing that seed has failed to reach you, please repeat your first order.

	Price per quart	Price per k'g'o
PEAS.		
Tall Varieties. All these need bushing.		
3. *Carter's Commander-in-Chief. New. (See page 11.).....	package only	15
3. New Golden. New. (See page 11.) Per 1-2 pint, 30 cents.....		15
3. Laxton's Superlative. (New.) (For description see page 12.).....	per quart, by express, 50 cents	80
3. *Popular. (New.) (For description see page 12.).....	per quart, by express, 45 cents	75
3. Dwarf Sugar. A string pea; pods edible. My variety is of dwarfish habit, with fine large pods. Four feet. qt. by exp., 50 cents		80
3. Laxton's Supreme. One of the green marrow class, yielding remarkably long and well-filled pods. A fine late family garden pea. Five feet.....	per quart, by express, 50 cents	80
3. *Laxton's Quantity. (New.) A wrinkled marrow of fine flavor, characterized by a robust habit and great productiveness. Five feet.....	per quart, by express, 50 cents	80
3. *Champion of England. An old favorite; rich flavored and very productive. Four to five feet. per quart, by express, 35 cents		65
3. Black Eyed Marrowfat. A favorite in the Boston market; large pod; prolific; capital for market. Three to four feet.....	per quart, by express, 20 cents	50
3. Missouri Marrowfat. Not so tall as Large Marrowfat; very productive and a favorite pea with marketmen. Three to four feet.....	per quart, by express, 30 cents	60
3. Large White Marrowfat. A standard late sort.....	per quart, by express, 25 cents	55
PEPPER.		
Peppers should be started in a cold frame or hot-bed. Transplant the young plants into the open ground towards the close of May in a very sunny location, having the rows eighteen inches apart; thin plants a foot apart in the rows. The ground should be made very rich, either by high manuring before plants are transplanted, or by liberal application of guano, or liquid manures afterward.		
Spanish Monstrous. New. On good soil will grow six inches long and two inches in diameter.....	package only	15
Chili. Sharply conical, about two inches in length and one-half inch in diameter. Of a brilliant scarlet color when ripe.....	40	6
Long Yellow.....	40	6
Large Bell. A standard sort.....	35	6
Cayenne. Small, long and tapering; very hot; best for seasoning pickles.....	35	6
Large Sweet Mountain. Very large and excellent for mangoes.....	50	10
Cherry. Small, smooth and round; a great bearer.....	35	6
Squash, or Flat. A great favorite; large and thick fleshed; the best for pickling.....	35	6
Long Red, or Sante Fe.....	package only	10
PUMPKIN.		
Cultivate as Squash, which see for general directions.		
Nigger. (New.) (For description see page 12.).....	20	6
Tree. (New.) (For description see page 12.).....	package only	15
Large Field. Good for stock.....	per quart 50 cents	6
Sugar Pumpkin. Smaller than Large Field, but fine grained and sweeter; first rate either for the table or stock.....	15	6
Cheese. A small rather early sort.....	10	6
Michigan Mammoth. A soft shelled variety, excellent for stock. It grows very large and is a heavy cropper.....	35	10
RADISH.		
For early use sow in spring, as soon as the ground can be worked, in drills six to ten inches apart, covering seed half inch deep. Thin plants an inch apart in the row. As the roots are more succulent and tender when grown quickly, a rich, moist soil should be preferred and frequent watering in dry weather will be found beneficial. For a succession sow every two weeks. The Olive shaped varieties are more tender, sweeter and earlier than the long kinds, and not so apt to be worm eaten.		
Russian White Winter. New. (See page 11.).....	package only	15
Carter's Selected Long Scarlet. Sent out by Messrs. Carter & Co. as the best variety of Long Scarlet. Has proved a favorite among market gardeners around Boston.....	12	6
French Breakfast. A beautiful variety of the Olive radish, scarlet at the body and white at the extremity.....	12	6
Wood's Fine Frame. Excellent for cultivation under glass; very early. A favorite with English market gardeners. In shape between Olive and Long.....	12	6
Covent Garden. A fine selection of Long Scarlet. This new sort is considered the best of all the Long Scarlet varieties.....	12	6
London Particular Long Scarlet. Held in high esteem in Loudon market; fine, long scarlet.....	12	6
Early Scarlet Olive Shaped. Very early and handsome; quick growth, tender, excellent. A favorite.....	12	6
Yellow Summer Turnip. An early and excellent summer variety.....	12	6
Early Rose Olive. Differs from Early Scarlet Olive in color only.....	12	6
Red Turnip Rooted. A standard early, very popular in markets of New York.....	12	6
White Turnip Rooted. For summer and winter use.....	12	6
Black Spanish. Fine long, late variety; stored for winter use.....	12	6
Black Spanish. Round variety.....	12	6
Chinese Rose Winter. By far the best for winter use. Grows large and tender.....	20	10
Raphanus Caudatus, or Rat-tailed Radish. Pods grow to a foot or more in length, and are edible.....	package only	15
California Mammoth White. (New.) A new winter sort, eight to twelve inches long, and two inches in diameter in the largest part. From the Chinese in California. An acquisition.....	20	10
RHUBARB.		
Sow the seed in drills eighteen inches apart and cover one inch deep. Thin the plants to six inches apart. When the plants are one year old prepare the ground for the final bed by trenching two feet deep, mixing a liberal quantity of manure with the soil. Set plants four feet apart each way. Do not cut until the second year, and give a dressing of manure every fall. If it is desired at any time to increase the bed, the roots may be taken up in the spring and divided.		
Linnæus. Large, tender, and of excellent flavor. A well-known market variety.....	30	15
Mammoth. The largest of all.....		15
SALSIFY, or VEGETABLE OYSTER.		
Sow in early spring on light, rich soil, in drills fourteen inches apart and thin the plants to three inches in the row. The roots will be ready for use in October and will sustain no injury by being left in the ground during the winter. When cooked the flavor somewhat resembles the oyster and is a good substitute for it.		
SORREL. Large Leaved French.		
Sow in hot-bed early in the spring, and transplant to the open ground, on warm, mellow soil, when the soil has become warm, setting the plants in rows two feet apart and about sixteen inches apart in the row. As the seed is rather slow to germinate, it should be watered liberally in the hot-bed.		
SPINACH.		
For summer use sow early in spring, in drills eight inches to one foot apart, covering the seed one inch deep. Select rich soil, and manure liberally. A succession may be obtained by sowing at intervals of two weeks through the season. For very early spring use sow in August and protect the plants through the winter by a thick covering of clean straw or some similar, light covering. Spinach is used principally as greens for boiling, and is very highly esteemed for this purpose.		
New Zealand. Makes a very large plant and will endure drought; best quality.....	15	6
Prickly Seeded. The hardiest variety; thick leaved—for fall sowing.....	10	5
Pound Leaved. The popular summer variety.....	10	5
Extra Large Round Leaved. (New.).....	12	6

For Price List of Potatoes see page 51.

SQUASH.

All vines delight in warm and rich soil. Prepare the ground by thoroughly pulverizing. Manure at rate of six or eight cords to the acre, working it just under the surface with the cultivator or gang plough. Plant in hills nine to ten feet apart for running varieties, and five or six feet apart for bush sorts; work some rich, fine manure into each hill. Plant seed and leave two plants to the hill. Keep well covered with plaster or air-slaked lime in early stages of growth. Cultivate frequently until runners are well started. For full particulars in every department, see my work "Squashes and How to grow them."

White Early Bush. The earliest sort.....	12	6
Summer Crookneck. Early, fine for summer use.....	12	6
Golden Bush. A fine early summer sort.....	12	6
Vegetable Marrow. The standard English squash; a fair summer variety with us; a heavy cropper; good for stock.....	15	6
Cambridge Marrow. (New. See page 12.).....	20	10
Boston Marrow. A standard fall squash; of a rich orange color, and very productive.....	15	6
American Turban. Decidedly the best of all fall squashes. (See page 8).....	20	10
"The Butnan." (New.) (For description see page 3).....	20	10
Marblehead Squash. (New.) For full description (see page 4).....	20	10
Hubbard. The standard winter squash. (See page 8.).....	20	6
Cocoanut. (See page 4.) A half-bush variety of small size, but remarkably heavy and very prolific; fine grained and of a very rich, chestnut-like flavor. This squash is worth raising as an ornament for the parlor.....	30	10
Yokohama. This squash has the flavor of the crookneck class, but is finer grained and much superior in quality.....	10	10
Mammoth Yellow. Weighing from 100 to 300 pounds.....	50	15
Canada Crookneck. The small, well-known, excellent kind.....	20	6
Large Winter Crookneck. The old standard sort, the best of keepers.....	15	6

SUNFLOWER.

Sow thinly in drills three feet apart and thin to one and one-half feet apart in the row.

Common.	10	6
Mammoth Russian. A fine variety. Valuable for poultry or vegetable oil. Flowers very large.....	10	6

SWISS CHARD.

Plant and cultivate as Beets. The tops while young are boiled as greens and the centre leaf cooked and served like asparagus.

Ornamental Varieties. These leaf vines are white or brilliant scarlet and yellow, and are planted in England scattered through flower plots with fine effect.....	10	6
Common Chard.	15	6

TOMATO.

With the single exception of Tomato De Laye all of the varieties of Tomatoes are of my own growing from carefully selected stock.

Sow the seeds in March or April in the hot-bed or in pots in a sunny exposure in the house. If it is desired to make very healthy, stocky plants, they may be transplanted or repotted when about two or three inches high, to dwarf and give them more room. When five or six inches high, if the ground has become warm, transplant them to the open ground, on a rainy or cloudy day if possible, if not, the young plants should be liberally watered and shaded from the hot sun. The richer the soil the more handsome and plentiful the fruit will be, but if it is desirable to have the fruit ripen as early as possible select rather light, poor soil and a sunny location. Trimming off the laterals, training to a stake and propagating by slips, are believed by many to promote earliness. Set the plants four feet apart each way, upon mounds of earth, to allow the foliage to open and let the sun in amongst the fruit. A cheap trellis made by driving three stakes around the plants and encircling them with three or four barrel hoops makes a very nice support for training them on in the garden. Checking the growth of the vines by pinching off the ends will be found beneficial, after the fruit has begun to set.

Yellow Victor. New. (See page 11).....	50	15
Little Gem. (New.) A small variety, claimed to be extra early.....	40	10
Powells. (New. See page 12.).....	60	15
Foote's Hundred Days. (New.) See page 12.....	60	10
Conqueror. (New.) See page 12.....	40	10
Livingston's Acme. (New.) See page 12.....	15	10
Alliance. A large purple tomato, resembling "Lester's Perfected" in type, but an improvement on that fine old variety.....	10	10
Paragon. (New.) (For description see page 4).....	75	15
Robert. (New.) An early variety, but not so early with me as Canada Victor.....	40	10
Canada Victor. (New.) For full description of this fine, new tomato see page 8.....	50	10
Canada Victor. Extra selected seed. (See page 8.).....	25	15
Hathaway's Excelsior. The best of the spherical, round tomatoes, being quite early, uniformly round, very solid, of excellent quality and very productive.....	40	10
Arlington. (New.) Of large size, quite smooth and solid; late.....	40	10
Charter Oak. (New.) A very handsome, large round variety.....	40	10
Essex Early Round. Very early, round and solid. A capital sort for early market; very popular in eastern Massachusetts.....	40	10
Hubbard's Curled Leaf. This tomato so closely resembles Early York that I consider it but a strain of that variety.....	40	10
Trophy. A magnificent new variety. Particularly valuable in the home garden.....	50	10
Gen. Grant. Remarkably smooth, symmetrical and solid. A popular market sort around Boston.....	40	10
Orangefield. A new English variety of a rich fruity flavor.....	40	10
Early York. Very early, dwarf and productive.....	40	10
Keyes' Early Prolific. One of the earliest; bears its fruit in large clusters of medium sized tomatoes.....	40	10
Yellow Fig. Pear shaped, and used to preserve as figs.....	40	10
Cherry. Flavor unsurpassed. Fruit small, but a wonderful cropper.....	10	10
Fejee. Very similar to Lester's Perfected.....	40	10
Mammoth Chihuahua. Grows to weigh as high as two pounds each. More curious than useful.....	5	10
Cook's Favorite. Roundish in shape and quite solid when fully ripe.....	40	5
Boston Market. I now have a first rate strain of this variety; early, large, smooth and solid.....	40	10
New White Appie. Sweet, with a rich, fruit-like flavor. Highly ornamental for the table.....	10	10
Large Yellow. Large and of a sweetish and peculiar flavor.....	40	5
Large Smooth Red. The standard kind; good for market purposes.....	40	5
Tomato De Laye. The new French upright variety; large and of superior quality, but a shy bearer.....	10	10
Tilden. First class on low, rich soil; of large size, thick meated, smooth and of high flavor.....	40	5
New Mexican. New, large, round; a good variety for the South.....	45	5
Strawberry, or Ground Cherry. (Alkekengi.) Grows enclosed in a husk; excellent for preserves; will keep with husks all winter.....	10	10
Yellow Plum. Small, elegant. Nice for preserves.....	10	10
Currant. Very elegant; resembles long bunches of currants; very ornamental.....	10	10

TURNIP.

For early use sow the small sorts as soon as the ground can be worked in the spring, in drills fourteen inches apart—the Rutabagas thirty inches. As the seed is very fine it should be covered but slightly, excepting in very dry weather. Select light, and if possible, new soil, and manure with plaster and ashes, or phosphates. Should the young plants be troubled with insects, a sprinkling of the same will be found beneficial. Of the early varieties thin the plants to six inches apart and the Rutabagas to one foot. For fall and winter use the early kinds should be sown from the middle of July to the middle of August, and the Rutabagas from the middle of June to the first of July, using from one to one and a half pounds of seed to the acre. Turnips are very extensively used as winter feed for cattle and sheep. "Swede" and "Rutabaga" being synonymous terms, the names below, given as they are generally used, will be readily understood.

English Varieties.		
Early White Dutch, or Early Flat Dutch. Allied to the White Top; of medium size and quick growth.....	10	6

For List of Rare and Novel Vegetables see pages 10, 11 and 12.

Price per ounce. Price per P'k'ge

TURNIP.

English Varieties.

Early Red Top. Fine, sweet, mild, rapid grower; very early and popular.	10	6
Early White Top. Differs from Red Top only in color.	10	6
Improved Yellow Globe. Fine for family use or for field culture. An excellent American variety.	10	6
Orange Jelly. A round, yellow English turnip of finer quality than Golden Ball.	10	6
Yellow Finland. Very elegant; less eaten by worms than most sorts.	12	6
Long White Cowhorn. Matures quickly, carrot shaped, fine grained and sweet.	15	6
Devonshire Grey Stone. A fine white English kind for fall use for stock.	10	6
White Tankard. One of the English varieties—in shape resembling a tankard. White-fleshed; a very heavy cropper.	10	6
Jersey Navet. A new English variety of white turnip; an underground turnip; early, very sweet.	10	6
Green Top Aberdeen. Round, yellow-fleshed and firm; a good keeper. This variety in earliness and for stock purposes is half way between the early varieties and the Rutabaga.	15	6

Swedes, or Rutabagas. The crop of English varieties is very short this year.

Golden Swede. (New.) See page 12.	15	8
American Rutabaga. Popular among our market gardeners both for table and for feeding stock. Flesh very solid. A first-rate keeper.	10	6
Laing's Improved Swede. One of the earliest swedes; a handsome variety of excellent quality. Yellow fleshed. For the table.	10	6
Large White French or White Swede. A white market rutabaga.	10	6
Sweet German or Russian. Large, white, sweet, excellent—a first rate keeper.	10	6
Skirving's Purple Top Rutabaga. A standard field variety for stock and fine for family use. Yellow fleshed.	10	6
Shamrock Swede. A popular English sort. Short neck and oblong in shape. Yellow fleshed.	10	6
London Purple Top Swede. Short neck and round in shape; grows to a larger size than Skirving's and has a shorter neck. Yellow fleshed.	10	6
Carter's Imperial Swede. Messrs. Carter & Co. rank this as the best of their swede turnips.	10	6

VEGETABLE SNAILS. See page 12. package only. 10

VEGETABLE CATERPILLARS. See page 12. package only. 10

WATER CHESTNUT. (Trapa Natans.) New. To be grown in the mud of a brook; edible. See page 10. package only. 15

WHITLOOF. New. (See page 12.) package only. 10

GRASS, AND CLOVER SEEDS, &c.

HUNGARIAN GRASS. A magnificent forage crop for light land. On land in high condition, two crops may be grown the same season. Price per express, at purchaser's expense, per peck, 80 cents; per bushel, \$2.00.

GERMAN MILLET. A heavier cropper than Hungarian, leaves broader and stalks stouter; it requires strong land, whereas Hungarian will do well on light land. Price per express, at purchaser's expense, per peck, \$1 00; per bushel, \$3 00.

Lawn Grass. Flint's mixture of fine grasses. From Grasses and Forage Plants. By Hon. C. L. Flint, Sec. Mass. State Board of Agriculture.	per quart, 50 cents.	Red Clover.	per pound 35 cents.
Lawn Grass. Common Mixture.	per quart, 30 cents.	Rape Seed.	per quart 55 cents.
White Hull Buckwheat. (New.) (See page 11.)	per pound 35 cents.	Giant Summer Rye. Kernels enormously large; a spring rye. 60 cts. pt.	
Chinese Hulless Oats. (New.) (See page 12.)	per pound 50 cents.	Winter Rye. A fine sample.	per peck 70 cents; per bush. \$2.00.
Prosteier Oats. (See third page of cover.)	per pound 35 cents.	White Clover.	per pound 75 cents.
Excelsior Oats. (See third page of cover.)	per pound 35 cents.	Perennial Rye Grass.	per quart 35 cents.
Orchard Grass.	per quart 30 cents.	Timothy Grass.	market price.
Alsike Clover.	per pound 50 cents.	Red Top Grass.	market price.
		Grafting Wax.	per pound 55 cents.
		Cranberry Vines. See third page of cover.

SUPERIOR ONION SEED.

Sow in early Spring in drills 14 inches apart, using 4 lbs. of seed to the acre.

 My stock of Onion Seed is raised with peculiar care, none but the very best and earliest onions being selected for seed stock, and from these I select carefully, by hand, my seed onions. *Not an ounce of seed is sent out from my establishment that is not perfectly reliable.* Exercising such care, I claim for it a quality superior to most of that in the market, which is raised either from very small, refuse onions, from large and coarse onions, or, again, from such onions as the seed grower chances to have on hand—either of which qualities tends to produce poor onions. All the onion seed of my own growing is raised in locations perfectly isolated, and the *yellow sorts will be found to be almost entirely free of any mixture with red.* There is a good deal of cheap, California grown seed in the country this season which I have good reason to believe is as poor in quality as it is low in price. Below I add a few extracts from the many letters received from my customers.

Early Round Danvers Yellow Onion. The Danvers Onion excels in earliness, and yields more than the Flat Red or Yellow sorts. Over 1000 bushels have been raised on an acre. It commands in Boston market a readier sale than the Red sorts, and brings a higher price in the market.

Early Flat Red. One of the very earliest, hardy and reliable. A capital sort for the extreme north where other sorts are too late to bottom and ripen well.

Early Red Globe, or Danvers Red. This ripens two or three weeks earlier than Red Wethersfield. Scullions are almost unknown with this onion when grown from most carefully selected seed stock, it being as reliable for bottoming well as Winnigstadt Cabbage is to make a head.

Southport Late Red Globe. This variety of Late Red is very popular in the markets of New York, where it sells at a higher price per barrel than the common Red Wethersfield. Being much rounder it measures better, and for this reason also is more profitable for market gardeners to grow. It is quite late, and I therefore do not recommend it for farmers who live north of southern Connecticut.

White Globe. As white and handsome as a newly made snow-ball; sells half as high again as other sorts. Too late to grow north of southern Connecticut. Should be dried in an airy and shady place.

The Early Cracker Onion is the earliest of all my Yellow sorts and an excellent kind to raise where the seasons are short.

 **PEDIGREE ONION SEED.** 

An observing intelligent farmer claimed that earliness, reliability for bottoming, smallness of neck can be as thoroughly inbred in an onion, as capacity to transmit her good qualities can be inbred in a cow or in any class of animals. What is possible to attain to in this matter my customers find in my onion seed, as shown in the *extracts from letters given below.* Those who have never raised onions from seed raised from stock so carefully selected will be equally surprised and pleased at the result.

 An axiom that every onion grower soon learns, *"cheap onion seed is always dear."*

 THE SOUTH CAN RAISE ONIONS the same year from the black seed. I would particularly desire to call the attention of my patrons in the *South* to the fact that *seed grown as far north as my farms are located will as a rule produce in the Southern States full sized onions the first season*, without resorting to the expensive and slow method of sowing seeds for setts, which must be planted another season to get the fully developed onion, as is the ordinary practice at the South. Please observe that several of the recommendations given below are from Southern States; and the onions were matured *full sized the first year* from my black seed. My customers in Texas have written me that they have grown onions the first year from black seed of my raising, in one instance, three inches in diameter, and in another weighing a pound each.

"The seeds I have purchased of you for three years have given satisfaction in every respect. I gathered over four hundred bushels per acre of Danvers Yellow Onions and of Early Flat Red. A. BRADLEY. Lampasas, Texas.

"The Onion seed were superior to any I ever had. Where in the garden is economy so misdirected as in buying cheap onion seed?" Mott's Corners, N. Y. S. W. SEAMAN.

"Please send me two pounds of Early Round Yellow Danvers Onion seed. I can get seed in my own neighborhood for two dollars per pound, but prefer yours at four dollars. The seed I got of you last year did well. From three pounds of seed I grew 430 bushels." Perry, Ohio. N. P. WATTS.

"Your Onion seed I think is superior to any in the market. My Yellow Danvers and Round Red which I raised last year from seed purchased of you, was awarded the first premium at the County Fair, last fall." Hawley, Minn. J. B. STETSON.

"The Early Cracker Onion seed I had of you last year did nicely for this part of the State. I raised some that were six inches in diameter, and I think they are just the sort to raise where the season is as short as it is here." Sedgwick, Me. JAMES A. DODGE.

"The seed I purchased from you last spring gave entire satisfaction, although the season was a very bad one. I think I will make 200 bushels of nice full grown onions from the four pounds of Early Cracker seed you sent me." Bonsacks, Va. JOHN F. WILLIAMS.

"I have bought seeds of you for 6 years, and had rather pay \$2 per lb more for your own Onion seed than for any other kind." Turner Mills, Iowa. A. T. AYERS.

I have had extra good luck with all the seeds I have received from you. Onions do remarkably well, your seed being the only seed from which we can raise good onions the first year." Ahneepe, Wis. J. M. L. PARKER.

"I have raised here from your Danvers Onion seed bulbs averaging three inches in diameter, the first year from seed. Had as good success as I ever had in the best onion growing section of Vermont." Rural Bower, Greensville Co., Va. FRANK M. GAGE.

"I have bought Danvers Yellow Onion seed from you the last three years, and it has proved true to name every time. I could have bought onion seed last year for from one to two dollars per pound, but I was afraid of it. My experience is, good seed true to name is cheap at almost any price. I have tried many others' seeds, but I must say none that proved so true as yours." Oswego, N. Y. HENRY SIVERS.

"I must say that all the seeds purchased of you did extra well, especially the Danvers Onion, which grew larger from the seed than any onion around here grew from the sets." Phillipsburg, Warren Co., N. J. JAMES MCGOWAN.

"From your Danvers Onion seed planted in February of last year, I grew specimens weighing over one pound each." San Saba, Texas. J. W. FLEMING.

"Your Danvers Onions grew better than those from the seed I raised on my own farm. It was the largest crop of onions I ever saw grow. I measured off three square rods of them in which there was not much difference; one of the pieces had eight bushels, wanting ten pounds, which is ahead of anything I ever saw in line of onions." L. F. JOSLIN. Frankfort, New York.

Implements for Cultivation of Onions and other Vegetables.

MATTHEWS' SEED DRILL, No. 1.....	\$12 00
" " " No. 2.....	10 00
MATTHEWS' HAND CULTIVATOR.....	6 00
MATTHEWS' COMBINED SEED DRILL AND CULTIVATOR; this } drill is intended for small patches of vegetables. }	12 00
SCUFFLE HOE.....	1 00
DOUBLE WHEEL HOE.....	1 50

The prices of these implements are those at which they are retailed at the seed stores in the large cities, at which rates I will superintend without charge the purchasing and forwarding of any of these machines to the address of any person ordering them.

Matthews' Garden Seed Drill.

The new drill was invented by Mr. E. G. MATTHEWS, the inventor and manufacturer of the HOLBROOK "REGULATOR" SEED DRILL, and has been remodelled and improved for 1877. Time and experience have

enabled him to improve upon that and produce in this new machine one, which, though closely resembling that, is greatly superior to it, or any other drill I am acquainted with. It is tasty in appearance; simple in principle; may be operated with ease and rapidity; is thoroughly constructed throughout, and there are no parts subject to unusual wear.

The Agitator is an ingenious and effective device, without springs, cams, gears or belts to get out of order, wherein it surpasses the Holbrook machine.

A simple contrivance gauges the deposit of the seed with mechanical accuracy to the depth required. Its Adjustable Markers answer the double purpose of markers and legs.

Full directions for use on the cover of each machine. Price, boxed and delivered at cars or boat, \$12 00.

Matthews' Hand Cultivator.

THE MATTHEWS' HAND CULTIVATOR is an improved implement for garden and field use, to destroy and prevent the growth of weeds between the rows of Beets,

Carrots, Onions, Turnips, or other row crops, and for flat cultivation generally. It is light, durable, simple, and easy to operate. Price \$6.00 delivered as above.

patches of vegetables are planted. The large drill, having a larger wheel and other advantages, is the implement for market gardeners and those who plant largely. Among the good

not break like the iron ones in market. 5th, the cultivator can be gauged to run the desired depth by raising or lowering the wheels, which are held in place by one bolt and thumb nut. 6th, it is arranged to receive

With the Cultivator is combined a seed sower, which this season has been improved in several particulars, suitable for use where small patches of vegetables are planted. The large drill, having a larger wheel and other advantages, is the implement for market gardeners and those who plant largely. Among the good points of this implement, single and combined, are the following:—1st, it has two wheels, causing it to run steady. It weeds a width of from six to fourteen inches. 2d, the teeth are held to the frame by a bolt and nut, instead of a key, and being arranged with side guards can be run close to the rows. 3d, it is made of the best seasoned white oak, and is strong and durable. 4th, the frame being wood (instead of cast iron), it does

a neat and reliable seed drill attachment, by removing the side arm only, making at \$12.00 the cheapest combined Drill and Cultivator ever offered. 7th, the seed drill attachment need not be removed when used as a cultivator, unless the operator prefers to do so; simply throw it out of gear by removing belt or chain. 8th, it is neatly boxed for shipping without charge.

Excelsior Weeder.

A handy and efficient tool in the flower and vegetable garden, to be used when weeds are small. Express, 30 cts.; mail, 40 cts.

Noyes' Hand Weeder.

This is an excellent little implement for hand weeding in bed saucers such as onions, carrots and the like; it is especially valuable when the ground is hard or baked. It is much preferable to the bent hoop

knives, which are often used. To test its value I sent for my own grounds I sent for a couple and put them in the hands of two of my boys to try; they liked them so well I sent for a dozen and we have had them in use for several years, to our great satisfaction. The price of them sent by express is 40 cents each; per mail, 50 cents.

Gray's Garden Sprinkler

As the Potato Beetle is known to have been in Colorado over fifty years, it is hardly probable that he will disappear for years from any part of the United States that he once invaded. Gray's Sprinkler is an excellent apparatus for distributing Paris Green. It holds over two buckets of water, has metal shelves within, so arranged as to prevent the Paris Green from settling at the bottom while the motion given when walking will keep it well mixed with the water. Five acres can be gone over in one day with less waste of the Paris Green than by most of the processes in use. The Sprinkler can be used for common garden purposes. Full printed directions sent with each.

Price of the Sprinkler boxed ready for transportation..... \$9 00

North Branch, July 8. MESSRS. GRAY & Co.:—Your Bug Poisoner saved me one pound of Green to every acre. With it I poisoned 4 1/2 acres with 4 1/2 pounds of Green. It would have taken eight or nine pounds of Green, a barrel of flour and five days work the other way. I poisoned them in six hours. It works perfectly. I would recommend it to the use of all potato growers. THOMAS FRAKE.

The Eagle Corn Husker.

This little implement made of leather and stout wire and fastened to the hand and forefinger is a capital help in husking the stouter varieties of corn. By mail, postpaid, 20 cents.

ATOMIZER.

This is a valuable article for showering a fine spray of carbolic acid or solution of tobacco on the leaves of plants to destroy injurious insects. It is also used to diffuse perfumes and disinfectants in the sick room, and for inhaling various medical preparations. The metal parts are nickel plated. Price, by mail, postpaid, \$1.00.

Beginning at the left hand, the smallest carrot is the Scarlet Horn, then follow Short Horn, Long Orange, White Belgian, Altringham, and Improved Long Orange, in their order.

Kohl Rabi.

Cos Lettuce.

The above Tomatoes I have had engraved from photographs taken from specimens grown on my own grounds. No. 1, is the Mammoth Chihuahua; No. 2, Trophy; No. 3, Essex Early; No. 4, Tilden; No. 5, Canada Victor; No. 8, Boston Market; No. 9, General Grant; No. 10, Keyes' Early; No. 11, Charter Oak; No. 12, Orangefield; No. 13, Early York.

Salsify.

Early Paris Cauliflower.

Hercules Club Gourd.

West India Gherkin.

Green Curled Tall
Scotch Kale.

London Green Curled Endive.

Laing's Swede Turnip.

Brussels Sprouts.

Turnip Rooted Celery.

FOR NOVELTIES IN FLOWERS SEE PAGES 45 AND 46.

CHOICE VARIETIES OF FLOWER SEEDS.

I have aimed to include in my collection of Flower Seed standard varieties, with the addition of such kinds as have proved a real acquisition in floriculture. Many varieties that are usually advertised separately, I have thought best to include in a single package under the name of "mixed varieties." My three warrants I also throw around my flower seed, for it is my design that they shall be equally rollable with my vegetable seed. Let me remind my friends that flower seed, being for the most part very small in size, require extra precaution in the preparation of the soil, depth of planting, and protection from extremes of cold and wet. Do not, as a rule, plant in the open ground before the weather has become settled; better wait until the middle of May. Before planting, the soil should be made very fine and be well enriched. Then, seed the size of sweet peas may be planted three-quarters of an inch to an inch deep, and the very smallest seed should be planted barely under the surface, having fine earth sifted over them and slightly packed with the hand or a strip of board pressed upon it. It will keep the moisture in and facilitate vegetation if a newspaper is spread over the surface, after planting, and kept down with stones for two or three days. Thin out the plants when very small with a bold hand, and after they have attained to the height of two inches, thin again boldly. Give each plant plenty of room, according to its habit of growth; a very common mistake is to crowd too much. Special rates when large amounts are ordered by Clubs. Terms to Dealers on application.

No.	Price per Pk'g'o	No.	Price per Pk'g'o
1	10	15	
Abronia Umbellata (See Plate)..... Handsome, trailing annuals, with clusters of sweet-scented flowers resembling the Verbena. Fine for baskets or for the garden. Sow seed under glass and set the plants eighteen inches apart. Bloom from August until October.		Amaranthus, Salicifolius. This comparatively new annual is exceedingly beautiful, both in form and color. As a foliage plant it is one of the finest in cultivation. Plant of a pyramidal form, two or more feet in height. Leaves long, narrow and wavy, changing in color from a brouzy green to a brilliant scarlet, as the plant attains age. From its graceful appearance, this is sometimes called "Fountain Plant.".....	
2	5	16	15
Aconitum. (Monkshood)..... A hardy perennial, grows well in any good soil, even when in the shade.		Ammobium Alatum. A very desirable white Everlasting Flower. Showy for the border and makes very pretty dried flowers. Hardy annual, two feet.	
		17	10
Acroclinium. The most beautiful of the everlasting flowers. For Winter bouquets, cut as soon as they begin to expand. In a garden of more than two hundred varieties of flowers planted at the same time, this was the first to bloom. Half-hardy annual.		Anagallis, Mixed. Beautiful trailing hardy annuals about six inches high, and very desirable for small beds, edging, baskets, &c.	
3	10	18	5
Acrolinium Roseum. Bright Rose.....		Anterrihium. (Snap-Drayon).....	
4	10		
Alba. Pure White.....		A very showy and hardy perennial, about two feet high, and flowering well the first season. Sow the seeds early, in pots or under glass, and transplant six inches apart.	
5	5	19	15
Adonis Flower. A hardy annual with very pretty foliage, producing bright red flowers. Set plants one foot apart. Grows about one foot high and blooms for a long time.		Aristolochia, Mixed. Highly ornamental and attractive climbers, with curiously shaped flowers of the most varied and beautiful colors. The flowers resemble a Dutchman's pipe. Hardy perennial.	
6	5	20	10
Agrostemma, Mixed Very pretty, free-blooming, hardy annuals, growing about one foot high, making a showy bed and fine for cutting. Can be easily transplanted, and should be set five or six inches apart.		Asperula Azurea. This is a new flower, of recent introduction. A profuse-flowering, hardy annual of Dwarf habit, with fine foliage and deliciously fragrant, bright sky-blue flowers; continues in bloom till frost. Well adapted for shady places.	
7	5		
Ageratum, Mixed Hardy annuals for beds or borders and nice for cutting. Grow about one foot high, and continue in bloom all summer. Set six inches apart.		Aster. Very beautiful and popular hardy annuals, growing from ten to eighteen inches high. For profusion of flowers and richness of display, the Asters are unrivalled. Sow the seed early in the spring under glass or in pots in the house, and transplant into rich soil, about one foot apart.	
Alonsoa. A very ornamental bedding plant; flowers freely from June till the frost—a half hardy annual.		21	15
8	10	22	10
Alonsoa Grandiflora, (large flowered,) deep scarlet, two feet high.....		23	30
9	10	—, Dwarf fiery scarlet. New, (for description see page 45.).....	
Warszewiezi, bright crimson, from Chili, one and a half feet high.....		24	62
		25	20
Alyssum. Very fragrant, free-flowering, pretty plants for beds, edging or rock-work. Much used for bouquets on account of their delicate, honey-like fragrance.		26	20
10	5	27	25
Alyssum, Sweet. White, very sweet, hardy annual blooms freely all summer.....		28	20
11	5	29	20
Saxatile. Yellow, extremely showy. A hardy perennial.....		30	20
		31	15
Amaranthus. Ornamental foliaged plants, producing a striking effect as centres of flower beds or mixed in with flowers. They are most brilliant on poor soil. Half-hardy annual.		32	10
12	10	—, German, Double Quilled and Striped. (See Plate.) Twenty splendid varieties mixed.....	
Amaranthus Bicolor Ruber. (New.) Very fine; the lower half of a leaf a fiery red scarlet, the upper half maroon. It is sometimes tipped with yellow; said to be unsurpassed by any ornamental leaved plant.....		33	10
13	5	—, Globe Flowered, Double German. Twelve splendid varieties mixed.....	
Tricolor, (Joseph's Coat.) Leaves scarlet, yellow and green, beautiful, two feet.....			
14	5		
Melancholicus. (See Plate.) Blood-red foliage of brilliant beauty when lighted by the sun. Fine for rib-boning or grouping. From Japan, one and a half feet			

No.		Price per P'k'ge	No.		Price per P'k'ge	
34	Aster, Boltze's New Dwarf Bouquet , about eight inches high, are very double, rich and free-flowering, very fine for pots or beds. Six splendid varieties mixed.	15	55	Browallia, Blue , with white centre. Very brilliant and beautiful, one and one-half feet.	10	
35	Truffaut's French Peony-Flowered Perfection . Very large and splendid. Perfect in form, size and fulness of flower. One of the very best of the Asters. Eighteen splendid varieties mixed.	10	56	—, Mixed . One-half foot.	10	
36	—, Pyramidal, Large and Double . These are similar in style to the Peony variety, but more branching, with splendid, large, extra, double flowers. Very showy. Sixteen varieties mixed.	10	57	Bryonopsis Laciniata . (See Plate.) An elegant climber, with <i>Ivy-like foliage</i> and brilliant scarlet fruit exquisitely marked with white. Ten feet. Half-hardy annual.	10	
37	—, Hedgehog, (or Needle) , with white centre. Six splendid varieties mixed.	10	Calceolaria.			
38	—, Giant Emperor . A tall, strong growing variety, with immense flowers. Flowers few, but very double and often four inches in diameter. Twelve fine varieties mixed.	10	58	Flowers highly decorative; very desirable, indeed invaluable, for the house, greenhouse and the garden. Seeds should be started in pots, but not under glass. Half-hardy perennials. Calceolaria, Tigridus . (See Plate.) A new spotted variety, <i>extra fine</i> .	35	
39	—, Dwarf Double . A very desirable variety, of a handsome, compactly branching, bouquet-like form; the best for dwarf groups. Several varieties mixed.	15	Callirhoe.			
40	—, Dwarf Pompon Bouquet . (See Plate.) A beautiful Aster with neat, pompon flowers. Many very fine varieties mixed.	10	59	Beautiful, free-flowering plants, beginning to bloom when small and continuing throughout the summer and fall; excellent for beds or masses when sown thick. Hardy annual. Callirhoe, Pedata . Rich purple crimson, with white eye, two feet.	10	
41	—, Above varieties mixed .	15	60	—, Involverata . A trailing variety of great beauty; large purple crimson flowers; desirable for hanging baskets.	10	
42	Azalea . (<i>Finest varieties mixed</i>).	25	61	Canary Bird Flower . A highly ornamental creeper, with exceedingly beautiful yellow fringed flowers and finely divided foliage; a general favorite. Half-hardy annual.	10	
43	Bachelor's Button (<i>Centaurea</i>). A showy, hardy annual, about two feet high—succeeding well in any soil. Set six inches apart.	5	Candytuft.			
44	Balloon Vine . Ornamental climbing plant, remarkable for an inflated membranous capsule, (<i>white</i> in color) from which it derives the name of Balloon Vine. Suitable for the greenhouse or out-door decoration. Half-hardy annual.	10	62	A well known hardy annual, very useful for bedding and bouquets, and also for pot culture.	25	
Balsams.			63	Candytuft, New Carmine .	5	
Most magnificent, and popular half-hardy annuals, from one and one-half to two feet in height. Sow the seed early in frames, and transplant to a well enriched border, one foot apart.			64	—, White .	5	
45	Balsams, Double Yellow . (New.)	20	65	—, Purple .	5	
46	—, Camelia-flowered, Carmine . (New.) Splendid new luminous color.	25	66	—, Crimson .	5	
47	—, Double Mixed Camelia Flowered .	10		—, Fragrant .	5	
48	—, Spotted, Rose-Flowered, Mixed . (See Plate.) Very large flowered, double and with perfectly formed flowers; from six to eight fine varieties, all spotted with white.	15	Canterbury Bells.			
49	—, Dwarf Camelia Mixed . From eight splendid double varieties; one-half foot.	10	67	Well known biennials, growing about one foot high, producing beautiful bell-shaped flowers. Set six inches apart.	5	
50	Baptisia Australis . A handsome plant of the easiest culture; flowers blue and white. Hardy perennial two feet.	5	68	Canterbury Bells, Blue Single .	5	
51	Bartonia Aurea . A showy, hardy annual, growing about two feet high, bearing very brilliant yellow flowers. Thin plants to six inches apart.	5	69	—, White Single .	5	
52	Bellis Perennis . (<i>Double Daisy</i>).	10		—, Double Mixed .	10	
53	Black-leaved Beet . <i>Intensely black foliage</i> , very glossy and elegant; highly ornamental as a foliage plant.	5	Catch-fly. (Silene)			
54	Bocconia frutescens . Beautiful foliageed greenhouse plant, suitable for lawns in Summer.	15	70	A hardy annual about one foot high;—produces brilliant flowers in great profusion in early summer.	5	
Browallia.			71	Catch-fly, Red .	5	
Very handsome, profusely blooming plants, covered with rich and strikingly beautiful flowers; grows freely in rich soil. Very desirable grown in beds; one and one half feet. Half-hardy annual.				—, White .	5	
			Centranthus.			
			72	Exceedingly pretty, free-flowering, hardy annuals, from six inches to one foot high, and very effective in beds or borders.	5	
			73	Centranthus, Rose .	5	
			74	—, White .	5	
			Chelone Barbata . A hardy perennial, about three feet high, bearing long spikes of scarlet bells. Flowers from July to September; of easy culture.			10
			Chrysanthemums.			
			75	Handsome hardy annuals about two feet high, blooming from July to October.	5	
			76	Chrysanthemums, Double White .	5	
			77	—, Double Yellow .	5	
				—, Mixed .	5	
			Cineraria.			
			78	A well known greenhouse favorite. Remarkable for its free-flowering habit and beauty of foliage. May be had in splendid bloom throughout the greater portion of the year.	25	
			79	Cineraria, Fine Mixed .	25	
				—, Maritima . Flowers yellow, leaves large and silvery; an ornamental foliageed plant, fit for edgings, in which case it should be kept from flowering. It forms a fine contrast, in ribboning, with <i>Perilla Nankinensis</i> . One and one-half feet.	10

80	Cissus, Discolor	15		Coreopsis. (Calliopsis.)	
	A red-leaved hot-house climber, very brilliant and handsome. A great acquisition. Requires strong heat and a moist atmosphere. Particularly adapted to the hot-house, but will thrive in the parlor by frequently showering the leaves.			One of the most showy of all annuals, the colors being so striking as seldom to be passed without remark.	
	Clarkia.		104	Coreopsis, Drummonds. Large yellow flowers, with crimson centre.....	5
	A very pretty, hardy annual, about eighteen inches high—blooming from June to September. Set six inches apart.		105	—, Mixed varieties. Yellow and brown and velvety-brown.....	5
81	Clarkia, Rosa	5	166	Cosmidium, Burridge's	5
82	—, White	5		An elegant annual, growing about two feet high, with rich, brilliantly colored flowers.	
83	—, Purple	5		Cypress Vine.	
84	—, Mixed	5		Most beautiful and popular tender climber, with very delicate fern-like foliage and numerous flowers.	
	Clematis.		107	Cypress Vine, Scarlet. Very brilliant.....	5
	Beautiful, hardy climbers, unrivalled for covering arbors, fenees, verandahs, &c; will succeed in any good garden soil.		108	—, White	5
85	Clematis, Cirrhosa. One of the new varieties, perfectly hardy, a very rapid climber, literally covering itself with large bunches of white, sweet-scented flowers. Twenty-five feet.....	25	149	Dahlia, Mixed	15
86	Clianthus Dampieri. (Glory Pea.)	25		Seeds saved from very fine named sorts mixed, from France. Half-hardy perennial.	
	One of the most attractive plants in cultivation.			Datura. (Trumpet Flower.)	
	A shrubby climber, with neat foliage and drooping clusters of large, rich, scarlet, pea-shaped flowers, 3 inches in length. Each flower is beautifully marked with a black, cloud-like blotch. It requires a dry, warm soil and should be watered but sparingly. Remove to the house when cold weather comes.			A showy, half-hardy perennial, producing large, sweet-scented, trumpet-shaped flowers. The roots should be removed to the cellar in autumn. Two and a half feet.	
	Clitoria.		110	Datura, Wright's. Flowers bell-shaped, of extraordinary size, white bordered with blue. Two feet.....	10
	Splendid, free-flowering, greenhouse climbers, with large, elegant, pea-shaped flowers. Particularly adapted for training on trellis-work, wire globes, &c. Perennials.		111	—, Humilis Double. Double flowers of a rich, golden yellow, a magnificent, free-flowering, sweet-scented variety.....	10
87	Clitoria, Cælestis. Sky-blue; from East Indies.....	10		Delphinium.	
	Cobea Scandens. (See Plate.)			Flowers remarkable for their great beauty, diversity of shades and striking appearance. Hardy perennials.	
	A magnificent, climbing plant of rapid growth, producing large, purple, bell-shaped flowers; adapted for out door growth in Summer, also for the house and greenhouse. The seeds are apt to rot in the open ground, hence should be started in the house. Place the seed edgewise in planting. Tender perennial.		112	Delphinium Candelabrum. (See Plate.) A new and elegant variety of <i>Larkspur</i> . The branches are beautifully curved, (pointing upwards,) diminishing in length as they approach the top of the centre spike, thus giving the plant the appearance of a candelabra. Flowers brilliant and varied.....	15
88	Cobea Scandens	10	113	—, Formosum. (See Plate.) New, flowers remarkably large and brilliant; color exquisite blue and white; will flower the first season from seed. Two feet.....	10
89	—, Alba	25	114	—, Chinese. Mixed. Two and a half feet.....	5
	Cockscomb.		115	—, Elatum. (See Larkspur.) Blue, two feet.....	5
	Very singular and attractive half hardy annuals, about two feet high.		116	—, Hybridum. Fine mixed, splendid.....	10
90	Cockscomb, Cristata Variegata. New and beautiful. Gold and Crimson Variegated, (see page 46).....	20	117	Dicentra Chrysantha	15
91	—, New Japan	15		A handsome plant for rockeries.	
92	—, Crimson. Tall, very fine (pure.).....	5		Dictanus. (Fraxinella.)	
93	—, Dwarf Mixed. Very beautiful.....	10		Handsome, fragrant, free-flowering, herbaceous plants, suitable for mixed borders. The leaves have a very pleasant smell like lemon peel, when rubbed. The seeds frequently remain dormant for several months. Hardy perennials.	
94	—, Feathered. New and very fine for bouquets.....	10	118	Fraxinella, Mixed. Two feet.....	5
95	Colous. (New and finest varieties Mixed) (See Plate.)	35	119	Erysimum Peroffskianum. (See plate.)	5
	These gorgeous colored plants with their variegated foliage, are deservedly called the most popular plants in cultivation. Their leaf markings are rich and varied. No garden, basket, vase nor collection of flowers is complete without them. Start the seed in a hot bed or pot in the house and transplant when warm weather comes.			A very showy, hardy annual about eighteen inches high—bearing spikes of deep orange-colored blossoms. Blooms from June to September.	
96	Collinsia, Mixed	5	120	Erythrina or Coral Tree	25
	Beautiful, hardy annuals, very pretty when grown in a mass. Thin plants to three inches apart.			This magnificent half-hardy shrub, with its fine leaves and most brilliant scarlet flowers is a great acquisition. The gorgeous spikes of scarlet flowers from one to two feet long with which it covers itself bear a resemblance to Coral. Although a tropical plant, it grows freely out of doors if placed in a warm situation. Cut it down to the ground before frost and protect in a cool, dry cellar during winter.	
97	Collomia, Scarlet	5		Eschscholtzia.	
	A very pretty annual, producing heads of bright red flowers.			A very showy, hardy annual about one foot high, blooming from June until September. Produces a brilliant effect at a distance when grown in a mass.	
	Columbine, (See plate.)		121	Eschscholtzia, Yellow	5
	A well known, showy, hardy perennial, about two feet high, blooming in May and June.		122	—, White	5
98	Columbine, Mixed	5	123	—, Tenuifolia	5
99	—, California. (Aquilegia Chrysantha),	25	124	—, Mixed	5
	Convolvulus.			Eternal Flower. (Helichrysum.)	
	Beautiful and showy half hardy annuals, producing an abundance of rich colored flowers. Set plants one foot apart. Blooms from July until autumn.			A hardy annual, very ornamental in the garden and very desirable for winter bouquets, as they will retain their form and color for years if gathered and dried when first open.	
100	Convolvulus, Minor, Dwarf Mixed. (See Plate.) ..	5	125	Eternal Flower, Yellow	5
101	—, —, Striped. Blue, beautifully striped with white...	5	126	—, Mixed	5
102	—, —, Double. New and beautiful; from France...	10			
103	—, Major. (Morning Glory.) Fine varieties mixed. A well-known, beautiful, climbing annual, suitable for covering arbors, trellises, &c. Blooms from July until autumn.....	5			

No.		Price per P'k'ge	No.		Price per P'k'ge
127	Eupatorium. (<i>Fraserii</i>)..... Shrubby plants whose flowers are indispensable for bouquets. The flowers are white growing in graceful feathery sprays and are admirable for mixing in with bright colored flowers. Hardy perennial.	10		Godetia. Very attractive, hardy annuals of easy culture, about one foot high, flowering in July and August.	
128	Euphorbia, or Snow on the Mountain A very pretty variegated foliaged plant, leaves edged with pure white. Tender annual.	5	148	Godetia, Lady Albemarle. New. (For desc. see p. 45.)	15
129	Evening Primrose A well-known, showy perennial, one and a half feet high, blooming the first year from the seed.	5	149	—, Mixed.....	5
	Feverfew. (<i>Matricaria</i> .) A beautiful, half-hardy perennial, well adapted for beds.		150	Grasses, Ornamental. The Ornamental Grasses are most desirable for bouquets both for Summer and Winter. For Winter use, cut about the time of flowering, tie up in small bunches and dry in the shade.	
130	Feverfew, Double White. Very fine. One foot.	10	151	Grasses, Ornamental, Agrostis Nebulosa. The most delicate, fine and feathery of the Ornamental Grasses.	10
131	—, Golden Feather. (For description, see page 46)...	15	151	Hardy annual.....	
132	Flax, Crimson. (<i>Linum Grandiflorum</i>)..... A beautiful, half-hardy annual, one foot high and very effective and showy for bedding purposes. Set plants one foot apart.	5	152	—, —, Eragrostis Elegans, ("Love Grass,") An exceedingly pretty and highly ornamental grass. Grows one to two feet. Hardy annual.....	5
133	Forget-me-not. (See plate)..... A very pretty, little, hardy perennial, about six inches high. Will thrive best in a cool, moist situation, and is well adapted for bedding or rockwork.	5	153	—, —, Isolepis Tenalla. One of the grasses which is a great favorite for baskets, vases, etc. Very graceful. A perennial.....	25
134	Foxglove, Mixed. (<i>Digitalis</i>)..... A hardy biennial, growing three to four feet high and very ornamental in the garden or amongst shrubbery, as it produces tall spikes of blue and white, bell-shaped flowers.	5	153	—, —, "Job's Tears." This well known variety of tropical grass is so called from the appearance of its shiny, pearly fruit, which resembles a falling tear. Half-hardy annual.....	5
135	Fuchsia, or "Ladies' Ear Drop." (<i>Finest and newest varieties mixed</i>)..... Elegant flowering plants of easy culture in pots for parlor decoration or the garden. In the garden they require a slightly shaded situation. Soil should be rich. Half-hardy perennial.	33	154	—, —, Pampas Grass. The most stately and magnificent ornamental grass in cultivation, producing numerous long, silken plumes of flowers. When planted on lawns the effect is very fine. Flowers the second season; requires to be carefully covered during the winter, as it is not quite hardy.....	15
136	Gaillardia, Mixed. (See Plate)..... Hardy annuals, universally admired for their fine display. Grow about eighteen inches high, and bloom all summer.	5	155	—, —, Quaking Grass. This graceful shaking grass is very elegant in bouquets and may be dried and kept a long time; perfectly hardy. Sow in open ground any time in spring. Hardy annual.....	5
	Gaura. An exceedingly handsome and free-flowering plant, continuing in bloom the whole summer. Of light and graceful habit, bearing spikes of white and red tinted flowers; a profuse bloomer. Succeeds best in sandy loam. Half-hardy annual.			Gypsophila. Elegant free flowering little plants, succeeding in any soil. Well adapted to rockwork and edging. Ladies will find this desirable for ornamenting their hair.	
137	Gaura, Lindheimeri. White with pink calyx; from Texas. Two feet.....	5	156	Gypsophila Paniculata. Remarkably hardy, dwarf plant, covering itself with small white flowers. Very desirable from their tenacity of life. I have known a cluster of these flowers to live three days without water and without showing signs of wilting. Ladies will find this very desirable for ornamenting their hair, also for button-hole bouquets. Hardy perennial.....	5
138	Geranium, Fancy, Splendid Mixed Geum. Handsome, free-flowering, long-blooming and remarkably showy plants. Succeeds best in a sandy loam. Hardy perennials.	23	157	—, Muralis. Beautiful, dwarf plant, neat and remarkably pretty, with starry pink and white flowers which completely cover the plant. Very fine for hanging baskets. Hardy annual, one half-foot.....	10
139	Geum, Mixed Gilia. Early and free-flowering, hardy annuals, growing from six inches to one foot high, and very desirable for planting in masses or detached patches.	10	158	Hawkweed, Mixed. (<i>Crepis</i>)..... A class of attractive hardy annuals, one foot high, of easy culture. Sow in early spring and thin plants eight inches apart.	5
140	Gilia, White	5		Heartsease, or Pansy. (See Plate.) A well-known and universal favorite; properly a biennial, but may be perpetuated by cuttings or by dividing the roots. It blooms early the first season and produces a profusion of brilliant flowers from early spring until winter. It will thrive well anywhere, but prefers a moist, shady situation.	
141	—, Rose	5	159	Heartsease, or Pansy. (<i>Fine mixed</i>).....	5
142	—, Tricolor	5	160	—, (<i>Pure Yellow, Large Flowered</i> .) The brilliancy and beauty of this Pansy make it a great favorite.....	20
143	Globe Amaranths. (See Plate.) Tender annuals about two feet high, very ornamental in the garden. The flowers will retain their beauty for a long time if gathered and dried as soon as they are open. Start early in hot-bed, and transplant one foot apart in the border when the weather becomes warm.	5	161	—, (<i>Extra choice mixed</i> .) These varieties are very superior.....	15
144	—, Purple	5	162	—, (<i>Finest, very large stained</i>).....	25
145	—, Variegated	5	163	—, King of the Blacks. Deep Coal Black.....	20
146	—, Mixed	5	164	—, Pure White	20
147	Gloxinia, (grandiflora) A superb class of greenhouse and in-door plants, producing, in great profusion, elegant flowers of the richest and most beautiful colors. The variety I send out is very choice and is one of the new varieties, with vigorous foliage and very large flowers in the best and liveliest colors. Stove perennial.	50	165	—, Oddie, or Five Blotched. A new and beautiful Prize Pansy, of great variety of color and markings, each petal being most beautifully blotched or marked. The seed I send out is from the celebrated Benary, and is extra choice and true.....	25
			166	—, Emperor William. (For description see page 46.)	25
			167	Heliotrope, Mixed	19
			168	Helipterum Sanfordi A new variety of everlasting flowers of great beauty; of dwarf, tufted habit, producing large, globular clusters of bright golden yellow flowers, excellent for winter bouquets.	10

No.		Price per P'k'ge	No.		Price per P'k'ge
169	Hibiscus Africanus. A showy and beautiful, hardy annual, eighteen inches high, blooming from June to September. Set eighteen inches apart.	5	194	Lavender This herb I consider desirable for the flower garden from the pleasing fragrance of its leaves. Perennial.	5
	Hollyhocks.			Leptosiphon. (See Plate.)	
170	Hollyhocks, English Prize. <i>Very highly recommended.</i> The seed I have was saved from one of the finest collections in England, and is of <i>twelve prize varieties.</i> Hardy perennial.	15		The most desirable of plants for edgings; very beautiful with their numerous and many colored flowers; also suitable for rock-work, and nice for pot plants; succeed in any light, rich soil; from California. Hardy annual.	
171	—, Tall Double Mixed. A great improvement on the old variety. Showy perennials, four to six feet high, very effective amongst shrubbery.	5	195	Leptosiphon Mixed. Colors <i>dark maroon, orange, lilac, purple, crimson, violet, golden yellow and white.</i> Exceedingly pretty.	10
172	—, Dwarf Chinese. Showy, hardy annual variety, two and a half feet high. Start early in hot-bed and transplant one foot apart.	5		Lobelia.	
173	Honesty. (Lunaria.) A hardy biennial, two feet high, flowering the second year in May and June. The flowers are succeeded by singular, semi-transparent seed-vessels that are quite ornamental and may be kept for a long time.	5		Exceedingly pretty, profuse-blooming plants; their delicate, drooping habit and the profusion of their charming little flowers render them exceedingly ornamental. Very fine for hanging baskets. Hardy annual.	
174	Humea Elegans. A magnificent, showy, half-hardy biennial, four to eight feet high, blooming the second year through the summer and autumn. Very ornamental in the garden and pleasure ground.	25	196	Lobelia, Pumila Magnifica. New. (For description see page 45.)	25
175	Hyacinth Bean. (Dolichos.) Tender, climbing annual from the East Indies, producing clusters of brilliant flowers.	5	197	—, Rosea Oculata. <i>Rose, with white eye.</i>	20
176	Ice Plant. (See Plate.) A singular-looking, tender annual with thick, fleshy leaves, that have the appearance of being covered with crystals of ice. Start early in pots and transplant into light, sandy soil, in a warm situation.	5	198	—, Erinoides. <i>Blue.</i>	5
	Ipomea. (See Plate.)		199	—, Erinus, Mixed. <i>Blue, white, and blue and white marbled.</i>	10
177	Very beautiful and popular climbers; deservedly so from the fine foliage and the brilliant and varied hues of its many flowers. Fine for covering old walls, stumps of trees, &c. Annuals.			Lophospermum.	
178	Ipomea Atriviolacea, <i>violet, bordered with pure white; superb.</i>	10	200	Lophospermum Hendersonii. Flowers of <i>rosy crimson, fine.</i> Ten feet.	15
179	—, Elegantissima. One of the richest of the Ipomeas; <i>blue</i> with intense purple centre in the form of a star, with broad, pure white margin.	15	201	Love-lies-bleeding. (Amaranthus Caudatus.) A hardy annual, three to four feet high, with pendant spikes of <i>blood-red</i> flowers, which at a little distance look like streams of blood. Desirable for grouping on lawns.	10
180	—, Limbata. <i>Blue, elegantly marked with white.</i>	10	202	Love-in-a-mist. (Nigella.) A curious, hardy annual about one foot high, with finely cut leaves and singular flowers.	5
181	—, Nil Grandiflora. A very beautiful variety from Germany.	10	203	Lupins, Mixed. Showy, hardy perennials, two to three feet high, producing tall spikes of attractive flowers.	5
182	—, Coccinea. (Star Ipomea.) A beautiful, climbing, tender annual, closely allied to the Morning Glory, producing a profusion of <i>bright scarlet</i> flowers.	10		Lychnis.	
	Ipomopsis.		204	Very handsome and highly ornamental perennials of easy culture.	
183	Most beautiful plants with long spikes of dazzling flowers. Half-hardy biennials.		205	Lychnis Fulgens. Bright <i>scarlet</i> , from Siberia. One and one-half feet.	5
184	Ipomopsis, orange, from California; three feet.	10	206	—, Sieboldi. <i>White, fine; one and one-half feet.</i>	15
	Jacoea. (Senecio.)			—, Hybrida, mixed. Beautiful, with large flowers varying in color from the <i>brightest scarlet to blood-red, purple, orange and white.</i>	20
185	A very gay-colored, showy class of hardy annuals, very effective for bedding. Grow about one foot high.			Malope.	
186	Jacoea, Double, White.	10	207	Handsome, half-hardy annuals, about two feet high. Set eighteen inches apart. Well adapted to mixed borders.	
187	—, Double, Dark Blue.	10	Malope, Mixed.	5	
188	—, Double, Mixed.	10		Malva (or Mallow.)	
189	Kale, Ornamental. Four elegant varieties. Very desirable as a foliage plant.	15	208	Showy and desirable plants with pretty, salver-formed flowers.	
	Larkspur.		209	Malva Minita. Very desirable with its bright <i>scarlet</i> flowers. It blooms freely all the season. Half-hardy annual.	5
190	Very beautiful, hardy annuals, producing dense spikes of flowers, which are very decorative either in the garden or when cut for vases. Set ten inches apart.			Marvel of Peru, Mixed. (Mirabilis.)	5
191	Larkspur, Tall Double Rocket.	5		The old and well-known Four o'clock. A fine plant with flowers of various colors, making a fine summer hedge when set one foot apart. Grows two feet high. The roots may be preserved like Dahlias during the winter. Half-hardy perennial.	
192	—, Stock-flowered. (See plate.) Eight varieties mixed	5		Marigold. (Tagetes.)	
193	—, Hyacinth-flowered. (See Plate.) A curious and very beautiful variety, strongly resembling a Double Hyacinth. Twelve fine varieties mixed.	10	210	Extremely showy, half-hardy annuals, one to two feet high, well adapted to garden culture, blooming profusely through the season. Set one foot apart.	
	Tricolor Elegans. A very double variety of very handsome colors and most beautifully striped. Two and one-half feet.	10	211	Marigold, African.	5
	These two last named varieties may be considered as great acquisitions to the garden.		212	—, Pot. (See Plate.) This variety of marigold is well worth much praise. The flowers are large, very brilliant and double; in color varying from a deep orange to a pale lemon and have a dark maroon centre. They begin blooming very early and continue till after the heavy frosts. They sow their own seed and thus perpetuate themselves.	5
			213	—, —, French	5
			214	—, —, gold-striped, new and fine.	10
				—, —, Double, Dwarf. <i>Yellow, new and fine.</i>	10

No.		Price per Pk'ge	No.		Price per Pk'ge
	Maurandia. (See Plate.) An elegant, half-hardy, climbing perennial, well adapted to the conservatory or trellis work in the garden. Start early in pots, transplant when the weather becomes warm. Flowers the first year from the seed and continues to bloom through the season. Desirable for hanging baskets.		246	Nirenbergia, Large flowering. A new species from the Andes. It deserves to become a general favorite both for the open garden in summer and the greenhouse in winter.	25
215	Maurandia, Barclayana. Rich, violet flowers.	5	247	Nolana, Mixed. (See Plate.) Very pretty, trailing hardy annuals, fine for rock-work, hanging baskets, or for bedding. Select light rich soil.	5
216	—, Mixed. Violet, white, rose and pink.	10		Obeliscaria. Showy plants with novel and rich colored flowers, having curious acorn-like centers; succeed in any common garden soil. From Texas. Half-hardy perennial.	
	Mignonette. A hardy annual, eight inches high. A general favorite on account of its delightful fragrance. Blooms throughout the season. Sow from middle of April to middle of June. Thin to six inches apart.		248	Obeliscaria Pulcherrima. Fine, rich, velvety crimson, edged and tipped with yellow. One-half foot.	5
217	Mignonette, Miles' Hybrid Spiral. New. (For description see page 45)	50		Oxalis. A splendid class of plants with richly colored flowers and dark foliage suitable for hanging pots or rustic baskets. Particularly adapted for the parlor where they bloom in mid-winter. Half-hardy perennials.	
218	—, Sweet. per ounce 25 cents.	5	249	Oxalis Rosea. Rose colored flowers, blooms abundantly. From Chili. One-half foot.	10
219	—, Grandiflora. An improvement on the old variety in size.	5	250	—, Tropaeoides. Deep yellow flowers with brown leaves; a very interesting variety. One-half foot.	10
220	—, Victoria. New. (For description see page 46.)	25	251	Oxlip, Sweet Scented, Mixed.	15
	Mimulus. (Monkey Flower.) A hardy annual of the easiest culture, about nine inches high, producing a profusion of very pretty flowers. It is perennial in the greenhouse and may be easily propagated by cuttings. Select a moist, rather shaded location.			Parsley. I would recommend Curled Parsley as fine for edgings for the flower garden, fine for vase bouquets, and particularly desirable for flowers arranged in flat dishes.	
221	Mimulus, Cardinalis. Scarlet, from California; one foot.	5	252	Parsley, Dwarf Curled.	5
222	—, Hybridus. (See Plate.) New; splendidly spotted and marbled in the most varied manner, rivaling the Calceolaria in the variety of its brilliant colors.	25	253	—, Fern Leaved. A most beautiful thing. Invaluable as a decorative plant. Resembles a beautiful moss.	25
223	Mimulus, New Double. Spotted, a beautiful variety for pot culture. Flowers double, of a brilliant yellow, spotted, striped and mottled with crimson. This, aside from its beauty, is very desirable from its remaining in bloom much longer than the single sorts.	50		Pentstemon. A very ornamental perennial, with long and graceful spikes of richly colored tubular flowers. To insure bloom the first year, seed should be started early in March and planted out in May.	
	Momordica. Trailing plants with ornamental foliage and golden yellow fruit which, when ripe, opens, disclosing its seeds and brilliant carmine interior. Planted on rock-work or stumps of trees and allowed to ramble, it produces a very striking effect. Half-hardy annuals.		254	Pentstemon, Choice varieties mixed.	20
224	Momordica Charentia, or Balsam Pear.	5	255	Perilla Nankinensis. A half-hardy annual, with beautiful dark purple foliage forming a delightful contrast with the lively green of the other plants in the garden or conservatory.	5
225	Morning Glory. (See Convolvulus Major.)	5		Petunia. Favorite, hardy annuals, succeeding well in any rich soil. For the brilliancy and variety of their colors, their abundance of flowers, and the long duration of their blooming period, they are indispensable in any garden, and are also highly prized for growing in pots for the greenhouse or sitting room.	
	Mourning Bride. (Seabiosa.) A class of very pretty, hardy annuals, from one to two feet high—suitable for bedding or bouquets.		256	Petunia, Hybrida Compacta Elegantissima. New. (For description see page 45).	30
226	Mourning Bride, Mixed.	5	257	—, Fringed. Brilliant crimson. (New) (For description see page 46.)	25
227	—, Double. Cherry color. (New) (For description see page 46.)	15	258	—, Fringed. Satiny white, blotched with purplish crimson. (New) (For description see page 46.)	25
228	—, Dwarf. Six splendid varieties, mixed.	5	259	—, Fringed and Veined. Rose veined with black. (New) (For description see page 46.)	25
229	Musk Plant. (Mimulus moschatus.) Much esteemed for the strong musk odor of its leaves. It has a yellow bloom. Tender perennial.	5	260	—, Fringed. Largest flowered, mixed. (New) (For description see page 46.)	25
	Nasturtium, Hardy Annual.		261	—, Fine Mixed.	5
230	Nasturtium, Tall mixed.	5	262	—, Extra Choice Mixed.	15
231	—, Purplish-violet. (Tom Thumb.) New. (For description see page 46.)	25	263	—, Buchanan's Hybrids. (See plate.) From the finest named flowers; beautifully blotched, marbled and variegated. Flowers of extra size as well as beauty.	25
232	—, "Ruby King" Pure pink shaded with carmine.	37	264	Phaseolus. (Scarlet Runner Bean.) A popular climbing annual, with spikes of showy scarlet, white or variegated flowers. Extensively grown to cover arbors and to form screens: of very vigorous and rapid growth.	5
233	—, "Spott'd King" Bright yellow blotched with chocolate.	15		Phlox. A most brilliant and beautiful hardy annual, about one foot high, well adapted for bedding, making a dazzling show through the whole season. It succeeds well on almost any soil.	
234	—, Scheuerianum. Straw colored striped with brown. Very beautiful.	10	265	Phlox, Heynholdi Alba. New. (For description see page 45.)	30
235	—, Spit-fire. New. Very fine; bright fire-red. Flowers very freely and makes a strikingly showy appearance.	15	266	—, Drummond's. All colors mixed.	5
236	—, Dunnett's New. Orange.	5	267	—, Drummond's Grandiflora Splendens. (New) For description see page 46.	10
237	—, Atropurpurea. Dark blood crimson.	5	268	—, "Fireball." New. (For description see page 46.)	25
238	—, Coccineum. Brilliant scarlet.	5	269	—, Pure white.	10
239	—, Dwarf Mixed.	5	270	—, Bright scarlet.	10
240	—, Dwarf Scarlet.	10	271	—, Crimson, striped with white, very beautiful.	15
241	—, Rose.	10	272	—, Splendid, red with white eye.	10
242	—, White. (The pearl.)	10			
243	—, Yellow.	10			
244	—, King of Tom Thumb's. Deep scarlet blossom, bluish green foliage, new and fine.	10			
	Nemophila. (See Plate.) Charming, hardy, low annuals, producing an abundance of extremely delicate and beautiful flowers. Very useful for bedding or for pot culture. Sow early in pots and transplant into a cool, rather moist situation.				
245	Nemophila Mixed.	5			
	Nirenbergia. Charming little plants which flower profusely during the whole summer; exceedingly valuable for hanging baskets, rustic vases and edgings; from South America. Half-hardy perennials.

No.	Price per Pk'ge	No.	Price per Pk'ge
Sweet Peas. (<i>Lathyrus Odoratus</i>.)		Verbenas.	
Very ornamental, hardy annuals, desirable for their delightful fragrance and beauty. Fine for covering fences or walls, or for growing in little clumps supported by sticks. By picking off the pods as soon as they appear, the blossoms may be continued the whole season. Per ounce 25 cents.		Well-known and universally popular bedding plants, blooming all summer. May be treated as half-hardy annuals. Sow the seed early under glass and transplant one foot apart. Tender perennials.	
315	Sweet Peas, White..... 5	320	Verbena, Fine Mixed..... 10
316	—, Black..... 5	331	—, Finest Mixed..... 15
317	—, Scarlet..... 5	Virginian Pigmy Stock.	
318	—, Scarlet striped with white..... 5	Extremely pretty, profuse-flowering, little plants, remarkably effective in small beds, baskets or edgings. Hardy annuals.	
319	—, All colors mixed..... 5	332	Virginian Stock, White. One-half foot..... 5
Sweet Williams.		333	—, New Rose. One-quarter foot..... 5
Well-known, showy and beautiful, hardy perennials, about one foot high, making a most splendid appearance in May and June.		334	Viscaria, Mixed, or "Rose of Heaven." (See plate.)..... 5
320	Sweet Williams, Mixed..... 5	Very pretty, profuse-flowering, half-hardy annuals, producing a fine effect in beds or mixed borders, and growing readily in any soil.	
321	—, Double Mixed..... 15	Wallflowers.	
322	—, Auricula Eyed..... 10	Very fragrant and ornamental, half-hardy perennials, suitable for back-ground and amongst shrubbery.	
323	Tassel Flower, Scarlet. (<i>Cercaria</i>)..... 5	335	Wallflower, Mixed..... 5
A beautiful, half-hardy annual, with small, tassel-like flowers, blooming profusely from July to October.		336	—, Double Mixed..... 15
Thuabergia. (See Plate.)		Xeranthemum.	
Very ornamental, trailing or climbing, half-hardy annuals, admirably adapted for trellises or rustic work or for the conservatory. A great acquisition for hanging baskets. Start early under glass. Tender annual.		Very showy, free-flowering everlasting flowers, valuable for winter bouquets. Hardy annuals.	
324	Thuabergia, Coccinea. <i>New</i> . A deep scarlet variety of this beautiful free-flowering climber..... 25	337	Xeranthemum, Double, White..... 5
325	—, Mixed. Flowers white and salmon, with rich maroon centres..... 10	338	—, —, Purple..... 5
326	Tritoma Uvaria, or Red Hot Poker Plant. (See Plate.)..... 25	339	—, Dwarf Double, Purple..... 5
No flower excites more attention at Horticultural Fairs than this. It is a splendid evergreen perennial, producing flower stems four or five feet in height, surmounted with spikes of red and yellow flowers exceedingly striking. Admirably adapted for forming groups upon lawns or in a flower-bed, also suitable for culture in large pots. Remove the plants to the cellar in Autumn.		340	—, Dwarf Double, White..... 5
327	Tropæolum Mixed..... 10	Zinnia. (See Plate.)	
Half-hardy annuals, very ornamental, and easily cultivated as climbers, producing an abundance of richly colored flowers. These are selected from the finest English varieties.		A most splendid class of hardy annuals, succeeding well in any soil and making a very brilliant show. Start early in pots or under glass and transplant one foot apart. The same flowers will retain their beauty for weeks and a profusion will be produced until frost.	
328	Umbilicus Sempervivum. <i>New</i> . (For description see page 45)..... 15	341	Zinnia, Tail. Finest varieties double mixed..... 10
329	Venus Looking-Glass, Mixed..... 5	342	—, Double White..... 15
A very pretty, hardy, annual succeeding well in any soil. Grows about one foot high, and is well adapted to borders or edgings.		343	—, Haageana. <i>Comparatively New</i> ; of dwarf, branching habit; each petal yellow flushed with orange. An exceedingly valuable plant for flower beds, edgings or borders..... 10
		344	—, Double Sulphurea Striata. <i>New</i> . Sulphur-colored, striped with scarlet. Very showy and beautiful when distinct in its colors..... 25

CLIMBING PLANTS.

Aristolochia..... 15	Highly ornamental with curiously shaped flowers of the most varied and beautiful colors. The flowers resemble a Dutchman's pipe.	Clanthus Dampieri. (<i>Glory Pea</i>)..... 25	One of the most attractive plants in cultivation. A shrubby climber, with neat foliage and drooping clusters of large, rich, scarlet, pea-shaped flowers, 3 inches in length. Each flower is beautifully marked with a black, cloud-like blotch. It requires a dry, warm soil and should be watered but sparingly. Remove to the house when cold weather comes.
Balloon Vine..... 10	A climber remarkable for an inflated, membranous capsule, (white in color,) from which it derives the name of Balloon Vine. Suitable for house or out-door decoration. Half-hardy annual.	Clitoria..... 10	Splendid, free-flowering, green-house climber, with large, elegant, pea-shaped blossoms. Particularly adapted for training on trellis-work, wire-globes, &c. Perennial.
Bryonopsis Laciniata..... 10	An elegant climber with <i>Ivy-like foliage</i> and brilliant scarlet fruit exquisitely marked with white. Ten feet.	Cobea Scandens..... 10	A magnificent climbing plant of rapid growth, producing large, purple, bell-shaped flowers; adapted for out-door growth in summer and also for the house.
Canary Bird Flower..... 10	A great favorite, with its exceedingly beautiful yellow, fringed flowers and finely divided foliage. Half-hardy annual	Convolvulus..... 5	A well-known, free-flowering class of climbers, with brilliant and varied colored flowers, growing freely in almost any situation. See page 37.
Cissus..... 15	A red-leaved climber, very brilliant and handsome. A great acquisition. Requires strong heat and a moist atmosphere. Particularly adapted to the hot-house, but will thrive in the parlor by frequently showering the leaves.	Cypress Vine.	
Clematis..... 25	A beautiful, hardy climber, unrivalled for covering arbors, fences, verandahs, &c. Of rapid growth and literally covering itself with large bunches of white, sweet-scented flowers. Twenty-five feet.	One of the most popular of all tender climbers. Graceful foliage of a dark, rich green, thickly studded with small, beautiful flowers.	
		Cypress Vine, White. Very appropriate for the cemetery..... 5	
		—, Scarlet. Brilliant and beautiful..... 5	

Hyacinth Bean 5
 Quick growing, ornamental climbers from the East Indies, producing clusters of brilliant flowers.

Ipomea
 Of all delicate climbers this perhaps ranks pre-eminent. In whatever situation it may be placed, it is sure to meet with universal admiration. See page 39.

Lophospermum 15
 An exceedingly elegant climber with large and handsome foxglove-like flowers. Very desirable for hanging baskets.

Maurandia 10
 These superb climbers cannot be too highly recommended. Particularly adapted for hanging baskets or for training on columns out-doors.

Momordica 5
 Trailing plants with curious, ornamental foliage, and *golden yellow* fruit, which, when ripe, opens, disclosing its seeds and *brilliant carmine* interior. Beautiful for stumps of trees, rockwork, &c.

Nasturtium
 A well-known and exceedingly ornamental class of profuse flowering plants. The seeds are excellent when pickled; but for this purpose should be gathered when young. See page 40.

Phaseolus, (*Scarlet Runner Bean*) 5
 A popular climbing annual with spikes of showy *scarlet, white* or *variegated* flowers. Of very rapid growth.

Rockcistus 10
 A very *fine* climber. *Leaves of many different colors. Brilliant and very handsome.* Requires a great deal of heat and a moist atmosphere.

Scypanthus 10
 A very ornamental, free-flowering climber, with curious *yellow* flowers, producing a fine effect trained against verandahs, trellises, &c.

Thunbergia 10
 One of the most beautiful and showy of all climbers. Excellent for hanging baskets and house decoration, for which this should be much more generally used. Start under glass. Very profuse-flowering; flowers of a rich, *bright orange* and *pure white*, each with *dark maroon eyes*.

Tropæolum, Mixed 10
 These are selected from the finest German varieties. Fine climbers.

Desirable Novelties which we offer this season for the first time.

Dwarf Turban Aster, (New) 15
 Very dwarf, with dark nearly black foliage. Flowers very handsome; carmine mixed with white.

Trophy Asters, *Mixed Varieties*, (New) 10
 As hardy as the old Globe Asters; profusely branched, forming fine self-supporting globular bushes, studded with beautiful symmetrically formed flowers. The habit of the plant is extremely handsome, its height about twenty inches and perfectly constant. All the varieties are double, brilliant and true in color.

Godetia Lady Albemarle, (New) 15
 This charming Annual is a cross between Godetia Whitneyi and G. Lindleyana. It far surpasses either of its parents in extreme beauty of colouring of the flowers, and symmetry of habit.
 Plants about one foot high, branching from the bottom, and growing in a pyramidal form; flowers large, frequently measuring 3½ to 4 inches across, and of the most intense glowing carmine color. The edges of the petals slightly suffused with delicate lilac, and being produced in the most wonderful profusion, and for a long period, the plants have the most brilliant and charming appearance.
 It is perfectly hardy, and if sown out of doors in Autumn will bloom early in the following summer.

Lobelia Pumila Magnifica, (New) 25
 This is by far the finest form of Lobelia in cultivation. The habit of the plant resembles the fine foliaged Pumila variety, while the flowers are of immense size, and of the richest ultramarine blue color.

New Mignonette; Miles's Hybrid Spiral 50
 This new Hybrid Spiral Mignonette, raised by Mr. Miles, and which

has been so much admired by the Trade and Public generally is far superior to any other in cultivation, the habit being dwarf and branching, with spikes often attaining a length of from 8 to 14 inches. By pinching the side shoots the centre spike attains a length of from 18 to 21 inches. The odor of this variety is superior to any other in cultivation. It is much hardier, and well adapted for market purposes.

Petunia Hybrida Compacta Elegantissima, (New) 30
 This new variety forms a dense globular bush of about 10 to 12 inches in height, and 14 to 15 inches in diameter, covered thickly with flowers of all colors and shades, which are peculiar to the Petunias. As a bedding plant, especially in sunny spots, this sort is unsurpassable and very effective, and it can be further recommended as a window or market plant, on account of its very regular habit and abundance of well shaped flowers.

Phlox Heynholdi Alba, (New) 30
 The flowers of this beautiful new variety are wholly snow-white. It is, indeed, the purest white Phlox yet raised, well adapted for pot culture.

Umbilicus Sempervivum, (New) 15
 From Kurdistan, a small unique form of sempervivum; the second year it throws up a large umbel of beautiful blood-red flowers; the whole plant changes then from green to red. A capital plant for carpet gardening. The plant is a beauty in its way, and it would be impossible to say too much of it. Its hardiness has not yet been tested, but probably it is hardy throughout the Middle States. Sow in boxes or pans, and plant out in the following summer, its flowers attaining a height of six inches.

ALSO OTHER NEW & DESIRABLE FLOWERS.

Aster, Dwarf, Fiery-Scarlet, (New) 30
 A new variety, highly recommended for the brilliancy of its color, not before known among Asters.

Aster, "Prince of Novelties", (New) 62
 This splendid novelty is strikingly distinct, and must prove a great acquisition. *The outer ring of the flowers is of a bright crimson lake, the inner ring splashed irregularly with rose; center, pure white.*

Aster, Peony Flowered, *Dark purple-red; magnificent* 20

Aster, Peony Flowered, *Black-brown; very beautiful color* 20

Aster, "Goliath" 25
 An acquisition of extremely vigorous growth, forming large bushes from two to two and a half feet in height, *profusely* covered with flowers *immense* in size, measuring upwards of five inches in diameter, and very double. The seed which I offer is a fine mixture of *white, rose, dark blue, ash grey and crimson*.

Aster, "Meteor" 10
 A beautiful novelty. The plant is completely studded with small, globular, extremely double flowers, *bright crimson* in color. *Extremely showy and brilliant.*

Aster, "The Queen's Cockade" 15
 This gem differs in habit from any other kind of Aster. The plant is of robust growth with self-supporting habit, profusely branched, representing a perfect globe of great regularity, about one foot high, densely studded with extremely double flowers of a *bright deep satiny rose*, having a *well defined, pure white centre*.

Aster, Washington, *White* 20
 Flowers very globular and extremely pure in color.

Aster, Washington, Peach-Bloom 20
 Flowers very globular and extremely delicate in tint. Seed scarce.

Balsam, *Double yellow* 20

Balsam, *Carmine-rose* 25
 Camelia-flowered. *Splendid, new luminous color.*

New Carmine Candytuft 25
 Of great brilliancy. A splendid novelty.

Cobea Scandens, *Alba* 25
 White flowered variety of that famous climber.

California Columbine, (*Aquilegia Chrysantha*) New 25
 A California species, large and handsome, the color being of a waxy yellow. Remarkably fine.

Cockscomb, cristata variegata	20	Pansy, Emperor William	25
<i>Beautifully variegated with gold and crimson, the golden yellow as well as the deep crimson being of the most brilliant hues. It attains a height of three feet. Should be sown early.</i>		One of the most valuable of the large growing pansies. Flowers of a rich ultramarine blue, with a well defined eye. The large blooms are borne well above the foliage.	
Dicentra Chrysantha	15	Fringed Petunia, Brilliant crimson, splendid. (New.).....	25
A handsome plant for rockeries. Of fine foliage, above which rises a branch of golden yellow flowers, each nearly an inch in length.		Fringed Petunia. (New.).....	25
Golden Feather Feverfew	15	<i>Satiny white, blotched with purplish-crimson; beautiful.</i>	
One of the ornamental foliaged plants. Very desirable for vases and baskets to mix in with other plants.		Fringed and Veined Petunia. (New.).....	25
Ipomea, Bona Nox. (<i>Evening Glory</i>).....	15	<i>Rose, veined with black; extremely pretty.</i>	
This very interesting plant is, as its name indicates, allied to the "Morning Glory," but differs from it in choosing the evening for its time of blooming. It is also <i>deliciously fragrant</i> . The flower is pure white and very large. Soak the seed in warm water several hours before planting.		Fringed, largest-flowered Petunia. (New.).....	25
Lobelia Rosea Oculata	20	In great variety, mixed.	
A very handsome rose variety with white eye. An acquisition.		Phlox Drummondii Grandiflora Splendens. (New.).....	10
Mignonette, New Victoria	25	Flowers large, handsomely rounded and of great substance; color vivid, with a pure white disc; habit of growth free and robust.	
This new mignonette produces large spikes of flowers of a more brilliant red color than any ever before grown.		"Fireball" Phlox. (New.).....	25
Mourning Bride, Double Cherry-color. (New.).....	15	A splendid new dwarf variety. Grows in large robust bushes quite covered with brilliant-red flowers till late in Autumn, giving the bush the appearance of a Fireball.	
Produces bright cherry-colored flowers; an acquisition.		Pink, Carnation, Dwarf Fiery-Red.	35
Nasturtium, Purplish-Violet, (Tom Thumb) (New.).....	25	Extremely double and full-blooming. Of great value for market gardeners.	
Nasturtium, "Spit-fire."	15	Hardy Primrose. (New.).....	20
Very fine; bright fire-red. Flowers very freely and makes a strikingly showy appearance.		A remarkably pretty and varied strain of these popular flowers, embracing a great variety of colors.	
Nasturtium, "Ruby King."	37	Salvia Grandiflora Bicolor. (New.).....	25
This promises to be a great acquisition. Pure pink, shaded with carmine; of dark foliage.		The foliage is variegated with white, and the flowers are white and rose with scarlet lip.	
Nasturtium, "Spotted King,"	15	Variegated Sunflower. A great novelty.....	15
One of the Tom Thumb varieties, with bright yellow blossoms, each petal distinctly blotched with chocolate.		The flowers and end of the stalk are very nicely striped with golden yellow.	
Sweet Scented Oxlip. In beautiful colors mixed.....	15	Thunbergia Coccinea	25
		A deep scarlet variety of this beautiful free-flowering climber.	
		Zinnia, double sulphur^a striata	25
		<i>Sulphur colored, striped with scarlet. Very showy and beautiful.</i>	

BULBS.

We this season annex to our Flower Catalogue a list of Bulbs which we offer to our patrons. We have endeavored to make a judicious selection, offering only such as are most desirable both for their beauty and their adaptation to general culture. Unless otherwise specified we will send the bulbs out in September, *carefully keeping on file all orders received for them previous to that time.*

GLADIOLUS BULBS. (Ready in April.)

These showy flowers are very easily raised, and with their tall spikes and brilliant colors of almost every variety, simple and blended, make one of the most magnificent displays of the flower garden. By planting from May till July, a continuous succession of flowers will be secured. In planting have the rows about a foot apart, the bulbs six inches apart in the row and two or three inches below the surface. Orders will be put on file as received and filled in April.

SPLENDID NAMED SORTS.

Adonis, light red and yellow, stained with carmine	10	John Bull, yellowish white, very fine	15
Arclimedes, light red, lower petals buff	15	Lord Byron, brilliant scarlet, stained with pure white, magnificent ..	20
Aristotle, carnation rose, flecked or blotched with carmine	15	Madame Biuder, pure white, carmine rose stripes on lower petals ..	40
Berenice, rose and variegated red, with purplish carmine	20	Marie, pure white, with deep carmine blotch	35
Brenchleyensis, deep scarlet, splendid for clumping	10	Mars, beautiful scarlet	15
Calypso, rose with a beautiful white throat, slightly striped	20	Meyerbeer, brilliant scarlet, flamed vermilion	35
Celine, rosy white ground marbled rosy carmine	15	Napoleon III., bright scarlet, the centre of the petals white striped ..	20
Charles Dickens, a delicate rose striped with a darker rose, very fine ..	35	Nelly, white, flamed with carmine rose	20
Conde, light orange red, white blotch	25	Nestor, light yellow, lower petals darker, striped with red	45
Couranti fulgens, brilliant crimson	10	Pegasus, light salmon, stained with carmine and violet	15
Don Juan, orange fire-red, spotted with yellow	10	Penelope, blush white, streaked carmine	20
Edith, carnation rose, with dark stripe	15	Prince Imperial, peach blossom pink, with violet stains	20
Eldorado, clear yellow, lower petals streaked red	30	Princess of Wales, white, flaked with rosy crimson	25
Galathea, blush white, carmine blotch	15	Romulus, brilliant dark red, with pure white blotch	30
Goliath, light red, striped with carmine	15	Thalia, white, flamed and streaked with carmine	25
Greuze, intense cherry, blotched with white	15	Vesta, pure white, and purplish carmine, on yellow ground	25
Ida, white ground, slightly tinged with rose, lower petals light yellow ..	30	Vulcan, velvety scarlet purple, shaded violet purple in center	20
Imperatrice, white, tinted blush, bright carmine, rose blotch	15	Zenobia, rose, tinted with violet, large white blotch, very fine	55

BULBOUS PLANTS.

Narcissus.

Hyacinth.

Crocus.

Single Tulip.

Gladiolus.

Double Buttercup.

Dahlia.

Double Tulip.

Japan Lily.

TUBEROSES. (Ready in April.)

We have a fine lot of **Tuberoses from France**. In planting, remove the small offsets around the main root, and plant a single tuber in a pot five or six inches wide. They should be started in April and afterwards transplanted to the open ground for summer blooming in the garden. Use good loam and leaf mould with good drainage.

First quality bulbs.....15 cents each; \$1.50 per dozen.
Second quality bulbs.....10 cents each; \$1.00 per dozen.

HYACINTHS. (Plant in October and November.)

DOUBLE RED AND ROSE.

<i>Allida Catherine</i> , deep rose, very early.....	20
<i>Bouquet Royale</i> , bluish pink, red eye.....	25
<i>Grootvorst</i> , delicate blush, very double.....	25
<i>Perruque Royale</i> , rose, large bells.....	35
<i>Princess Royale</i> , rich crimson, extra.....	25

DOUBLE WHITE.

<i>A la mode</i> , pink eyed, fine truss.....	30
<i>La Deesse</i> , white, yellow eye.....	25
<i>Nannette</i> , yellow centre.....	20
<i>Sceptre d'Or</i> , white, orange scented.....	25
<i>Sultan Achmit</i> , large, very double, late.....	30

DOUBLE BLUE.

<i>Belle Mode</i> , bright blue, beautiful.....	25
<i>Duchess de Normandy</i> , dark blue.....	30
<i>Pasquin</i> , delicate porcelain, violet eye.....	30

DOUBLE YELLOW.

<i>Bouquet d'Orange</i> , reddish yellow.....	30
<i>Goethe</i> , bright, very double, fine.....	30
<i>Ophir d'Or</i> , light yellow, fine, late.....	25

SINGLE RED.

<i>Amy</i> , bright carmine, compact truss.....	20
<i>Emelina</i> , bright rose, fine.....	30
<i>Madame Hodshou</i> , dark red, striped.....	25
<i>Norma</i> , delicate pink, large bells.....	25
<i>Sultan's Favorite</i> , rich bright rose.....	20

SINGLE WHITE.

<i>Blanchard</i> , white, purple eye.....	30
<i>Hannah Moore</i> , pure white.....	25
<i>Mammoth</i> , white, large bells.....	25
<i>Queen of the Netherlands</i> , splendid.....	30

SINGLE BLUE.

<i>Argus</i> , deep blue, white eye.....	35
<i>Blue Mourant</i> , dark blue, black eye.....	25
<i>Charles Dickens</i> , bright blue, splendid.....	25
<i>Grand Lilac</i> , beautiful, silvery lilac, large.....	25
<i>Regulus</i> , porcelain, large truss.....	25

SINGLE YELLOW.

<i>Adonia</i> , lemon yellow, good form.....	25
<i>Alida Jacoba</i> , rich, canary yellow.....	25
<i>Heroine</i> , light yellow, tipped with green.....	25
<i>Rhinoceros</i> , orange yellow.....	30
<i>Victor Hugo</i> , light orange yellow.....	40

Single Hyacinths, Mixed, 12 cts. each; \$1.25 per doz.
Double " " 12 cts. each; \$1.25 per doz.

JAPAN LILIES.

These superb lilies are perfectly hardy, flowers elegant and fragrant, flowering during July and August, and forming one of the principal features of the flower garden. Each. Per doz.

<i>Lilium Album</i> , Pure White.....	.50	\$5 00
<i>Lilium Roseum</i> , White, spotted with rose.....	.25	2 50
<i>Lilium Auratum</i> , Golden-rayed Japan lily.....	.50	5 00

AMARYLLIS—(Red Jacobean Lily).

This is always a favorite from the striking elegance of its scarlet velvet flowers. Start in the house in March and plant out in May in rich ground; roots are preserved like Dahlias during the winter. Each 25

MADEIRA, OR MIGNONETTE VINE—(Ready in April).

A beautiful climbing plant of rapid growth, adapted to out-door growth in the summer or the house in the winter. It completely covers itself with long racemes of deliciously fragrant white flowers. Plant the tuber out of doors in the Spring, and it will commence to grow at once, and if in a sheltered place, very rapidly. In the autumn cut off the tops, dig up the tubers and put them in the cellar, where they will keep as well as potatoes—or take up the bulbs and pot them for the house, where they will thrive to a wonderful extent. Tubers, each 10 cents.

SMILAX—(Ready in April).

There is no climbing plant in cultivation that surpasses this in beauty and grace of habit and foliage. Its cultivation has now become a speciality in every greenhouse, where it is extensively employed in all descriptions of floral decorations. Good bulbs, 25 cents; large bulbs, 50 cents.

LILY OF THE VALLEY. (Ready in April).

A great favorite because of its delicious color and low growth, bearing graceful bows of fairy-like lily bells. Each, 5 cents; per doz., 50 cents.

SCARLET ANEMONE. (New.)

This splendid variety is almost unknown in horticulture: no plant can compete with it in beauty and brilliancy in the early spring. Flowers large and of a *dazzling vermilion*—in bloom from February to April—very valuable for bouquets. Plant bulbs in open ground in September—during winter give the plants protection with leaves. The root may remain in the ground for several years. Per bulb, 25 cts.

DOUBLE PERSIAN BUTTERCUPS—(Ranunculus).

Splendid mixed varieties. Plant in November. Each, 5 cents; per doz., 50 cents.

CROCUS.

The Crocus is a universal favorite, and, excepting the Snowdrop, is the

earliest of all spring flowers, displaying its bright blossoms early in March. Plant in November.

All Colors Mixed. Per doz., 25 cents; per 100, \$1.25.

CROWN IMPERIALS.

An old-fashioned class of plants liked because of their highly ornamental character and early blooming. Plant in November. Mixed varieties. Each 25 cents; per doz., \$3.00.

NARCISSUS.

Remarkably showy, spring-flowering bulbs, possessing a delightful fragrance. Plant in November.

Single Varieties Mixed. Per bulb, 5 cents; per doz., 50 cents.

Double Varieties Mixed. Per bulb, 10 cents; per doz., \$1.00.

**Collections of Flower Seeds,
BY MAIL, FREE OF POSTAGE.**

For the convenience of those who are unacquainted with the different varieties of flowers, or who prefer to leave the selection to us, we offer the following Collections. They contain new seed and desirable varieties, such as we recommend.

Persons thus purchasing can make a great display in their flower beds, and at a much less price than when ordering by separate packages.

These Collections are always to be of our own selection, and not subject to any discount from prices given below.

- COLLECTION A, contains twenty-five choice varieties of Annuals,..... \$1 00
- COLLECTION B, contains twelve varieties of extra fine Annuals, including choice French Asters, Double Camelia Balsams, Double German Stocks, and fine Double Zinnias..... 1 00
- COLLECTION C, contains ten extra choice varieties of Annuals and Perennials, embracing many of the most desirable ones in cultivation..... 1 00
- COLLECTION D, contains six packets of choice, selected seeds of the finest Large Pansies, finest Carnation and Picotee Pinks, choicest Verbenas, Prize Petunias, &c..... 1 00

Any one remitting \$3.00 will receive the four Collections postage free.

The following additional collections will also be sent at the prices annexed, *free of postage.*

- COLLECTION E, contains fifty varieties of the best Annuals, Biennials, and Perennials..... \$2 50
- COLLECTION F, contains one hundred varieties of Annuals, Biennials and Perennials, including some new and desirable sorts..... 5 00
- COLLECTION G, contains ten select varieties of Greenhouse seeds..... 2 00

Purchasers who prefer to make their own selections of Flower Seeds are referred to the following Prices:

The seeds will be forwarded *by mail, postpaid* to any address in the United States or Canada, on receipt of the amount of the order.

- Purchasers remitting \$1.00 may select Seeds, *in packets*, at Catalogue prices amounting to..... \$1 10
- Purchasers remitting 2.00 may select Seeds, *in packets*, at Catalogue prices amounting to..... 2 25
- Purchasers remitting 3.00 may select Seeds, *in packets*, at Catalogue prices amounting to... 3 50
- Purchasers remitting 4.00 may select Seeds, *in packets*, at Catalogue prices amounting to..... 4 75
- Purchasers remitting 5 00 may select Seeds, *in packets*, at Catalogue prices amounting to..... 6 00
- Purchasers remitting 10 00 may select Seeds, *in packets*, at Catalogue prices amounting to..... 12 50
- Purchasers remitting 20 00 may select Seeds, *in packets*, at Catalogue prices amounting to..... 26 00
- Purchasers remitting 30 00 may select Seeds, *in packets*, at Catalogue prices amounting to..... 40 00

No variation whatever will be made from the above rates. Prices to Dealers whose orders exceed the above amounts will be given upon application.

Quantities of seed required for a given length of drill.

This table is probably as correct as such general statements can be made.

Asparagus 1 oz. to 60 ft. of drill	Parsley... 1 oz. to 150 ft. of drill
Beet.....1 oz. to 50 "	Parsnip...1 oz. to 200 "
Beans dwf. 1 qt. to 100 "	Peas...1 qt. to 100 "

Carrot....1 oz. to 150 ft. of drill	Radish....1 oz. to 100 ft. of drill
Endive...1 oz. to 150 "	Salsify...1 oz. to 70 "
Okra.....1 oz. to 40 "	Spinach...1 oz. to 100 "
Onion....1 oz. to 100 "	Turnip...1 oz. to 150 "
Onion Sets 1 qt. to 20 "	

CONOVER'S COLOSSAL ASPARAGUS.

Roots One year old. Price per 100, \$1.25; per 1000, \$10.00; per mail, per 100, \$2.50; small roots, per 100 per mail, \$1.60.

Two years old. Price per 100, \$1.50; per 1000, \$12.00; the two year roots are too bulky to send by mail.

Horseradish Setts. Per 100, \$1.00; per 1000, \$7.00; per 100, per mail, \$1.50.

STRAWBERRY VINES.

BELLE. New. Took first prize at Mass. Horticultural Society Exhibition in June, 1877; per 100, by mail, \$2.00.

CAROLINE. New. Like the above, one of Mr. Moore's new seedlings; per 100, by mail, \$2.00.

WILSON'S ALBANY. The great market berry; does well everywhere.

CHARLES DOWNING. Vigorous, hardy and productive: fruit uniformly large, juicy, and of excellent flavor.

JUCUNDA. Fruit very large and heavy; often commands highest price in the market. Requires rich soil and high cultivation.

LADY OF THE LAKE. One of Mr. Scott's Seedlings. Very popular around Boston.

HOVEY'S SEEDLING. An old and very much esteemed variety.

GREEN PROLIFIC. A good variety for light soils; very hardy; fruit very sweet.

BLACK DEFIANCE. Very early; large, deep scarlet fruit.

Price for each of the last seven varieties: \$3.00 per 1000; \$1.00 per 100; per 100 per mail, \$1.40.

VARIETIES OF POTATOES.

THE EARLY OHIO.

This first-class potato is the first of my own introducing since I several years ago sent out the Excelsior. Meanwhile, I have received from kind friends, on an average, about fifty new seedlings a year. To all of these I have given a careful and conscientious trial of their merits, on my experimental grounds, planting them with note book in hand, and following their growth and development, with note book, throughout the season. Among such a multitude of varieties, I have found

THE EARLY OHIO.

many that were almost decided acquisitions, but were either too similar to varieties already well known; yielded too many small potatoes, or potatoes that were prongy, ran to too sharp a point, or were in some other way badly shaped for market; had too many or too deeply sunken eyes; were of poor quality or too prone to rot. Ultimately I have found but three out of over two hundred seedlings that have proved themselves to be decided acquisitions—the EARLY OHIO, the Dunmore, and Burbank's seedling, of which see more farther on. The Ohio is one of the numerous seedlings of the Early Rose, but while almost all of these are so like their parent as to be undistinguishable from it, the EARLY OHIO, while in color like the Early Rose is, in shape, distinct, being round-oblong instead of oval-oblong, so that side by side it is readily distinguishable. Eyes about as numerous as those of the parent, while the brows are rather more prominent. On the largest specimens, the cluster of eyes at the seed end are located slightly one side of the longer axis. Quality excellent. Grown side by side with the Early Rose, it proved a week earlier, while the yield was a third greater.

The result of a careful trial of its merits, side by side with all the new seedlings now before the public, besides over thirty new varieties sent me from various localities in New England, the Middle and Western States, each of which being sent as a new seedling of special promise, leaves the Ohio in the same high rank it previously held; 1st, a decidedly earlier than Early Rose, and 2nd, as emphatically a better cropper than any other variety equally early, and equalled by but two of the later varieties. I add extracts from letters received from farmers residing in several States. One grower who tried over twenty of the standard varieties, early and late, found that the Ohio excelled them all in cropping qualities.

"The Early Ohio Potato I got from you proved to be the best of any I have cultivated. They have three good recommendations—earliness, superior quality and an excellent cropper."

R. F. SHILLING, Rural Dale, Ohio.

"Early Ohio is the earliest, handsomest and best early I have ever grown, after 15 years' observation and experience—growing few small ones, and making a first class size for table use. If there is any objection, it is that they average too large. They are dry and white when cooked. As an early market potato, it almost literally drives every other out or use. When Early Rose sold at 30c. per bushel, parties would pay 50c. for Early Ohio, and declare that they would rather do it than have the Early Rose at 25c. It keeps well into the summer for an early potato. They were planted last year as late as July 10th, and made as large a crop as Early Rose planted early in May. The yield this year was 335 bushels per acre by measure." From W. S. L., in Country Gentleman,

Mr. TILLINGHAST, in his new work, writes as follows of the Ohio:—
"This is, all things considered, the best very early potato we have ever grown. It is of recent introduction. It is a seedling of the Early Rose and is named after the state in which it originated. It is of nearly the same color as its parent, but differs in shape, being more nearly round. It grows to a large size, is very productive and of first rate quality. A decided acquisition."

"I must brag a little on the one pound Early Ohio potatoes. I raised 226 pounds of extra large potatoes. I also weighed 16½ pounds from one hill. I planted one eye to the hill three by four feet apart."

Havana, Ill.

A. H. JONES.

"The Early Ohio is the early potato for this climate. There is no early variety that will compare with it. It is the earliest of all, a splendid cropper, and of superior quality."

Little Sioux, Iowa,

J. L. PERKINS.

"The quality and size of your Early Ohios were excellent. Planted side by side with the Early Rose I think I can safely say that they are about a week earlier."

Haverhill, Mass.

J. R. NICHOLS, M. D.

"I obtained from Mr. Gregory, of Marblehead, last spring, some seeds of the Early Ohio. Planted side by side with the Early Rose, the Early Ohios were out of the ground first. They have proved decidedly to advantage. They were good for use, I think, ten days in advance of the Early Rose, certainly a week or more. I value them highly. I think they are of better flavor than the Early Rose."

Strafford Co., N. H.

A. G. COMINGS.

"I purchased one pound of Ohio Earlies of you last Spring. I raised 240 lbs of potatoes of fine size and shape. They were earlier than Early Rose, and were dry and good flavored. Oct. 19th we had a mess of them; they were good as ever. We think a great deal of them. I think you underestimate them in your catalogue."

Sandwich, Ill.

ANDREW GRAHAM.

DUNMORE.

I give this season a portrait of the Dunmore potato, believing, after another year's careful trial, that it was well worthy of having it taken.

This new seedling—a white skinned and white fleshed variety, which originated in Vermont, tested in my experiment-

al plot side by side with over forty varieties, in every requisite of a first-class potato, ranks but second to the Burbank. The public will find that it is far superior in its yield, size of the tubers, their handsome appearance and fine floury quality either boiled or baked, to several of the varieties that have recently become famous. I would recommend all potato fanciers to try the Dunmore. As the same potato varies on different soils, possibly on some soils the Dunmore may give greater satisfaction than the Burbank Seedling.

On my own grounds, this season, the crop has been remarkably large. Some of the potatoes weighed two pounds each, and were perfect in shape. Mr. Tillinghast, in his book just published, speaks as follows of the Dunmore :

“This is another valuable new variety of Mr. Gregory's introduction. It is a large, smooth, round, white potato, of beautiful appearance, fine quality and enormous yielding propensities. We have grown many specimens weighing two pounds each, and have not yet seen a hollow one. Its general appearance somewhat resembles the Peerless, but it surpasses that well known variety in both yield and quality.”

BURBANK'S SEEDLING.

This, like the Early Ohio, is a seedling of Early Rose, but is of Massachusetts origin. Unlike its parent it is white skinned. The remarkable productiveness of this new seedling will be seen in the fact that the first year from the seed ball the yield was three pounds three ounces, all large sized potatoes! Since then it has yielded 36 pounds to a rod of row, has averaged a bushel to nine hills, and 435 bushels to the acre. Planted side by side with Early Rose, New York Late Rose, Peerless and Brownell's Beauty, it has excelled them all in yield. In beauty of form it is unexcelled, the proportions being all that can be desired, and is never hollow hearted. It has the good characteristic of yielding almost no small potatoes; while but five-sixths of the Early Rose, growing side by side, were of market size, of the Burbank forty-nine fiftieths were marketable. It has but few eyes, which are sunk but little below the surface. In quality it is fine grained, of excellent flavor either boiled or baked, is dry and floury, in fine is all that can be desired. It ranks between the very early and very late varieties.

In brief, the argument for sending out the new seedling is as follows : 1st, its exceptionally great productiveness ; 2d, the first class quality of the potato ; 3d, the capital trait for market, that it produces almost none of unmarketable size ; 4th, its hardy vigor ; 5th, it does not grow hollow hearted even when weighing over a pound to a single potato ; 6th, the proportions and appearance are so attractive it will draw the attention of marketmen.

BURBANK'S SEEDLING.

“The Burbank's Seedling purchased of you last year has answered your recommendations fully. I do not know of a handsomer or better potato.”

R. H. L. JEWETT, *Faribault, Minn.*

“The Burbank's Seedling potatoes are away ahead, for yielding, of anything I ever saw. Planted by the side of others, with the same cultivation, it yielded three hundred fold more than any other kind excepting the Dunmore and Excelsior. I should have made money to have paid \$20 per bushel last year, and planted all Burbank's Seedling. From the one pound you sent me I raised, without any manure or any fertilizers whatever, 187½ lbs., and not an unsizable potato in the lot. Early Rose on same ground, only gave (same number of hills) about 8 to 10 lbs., Excelsior 8½, Peach Blow 43, Peerless 10 lbs.”

H. O. BAILEY, *Hammonds, Pa.*

“The 15 lbs. of Burbank's Seedling bought of you, yielded from the single peck 18½ bushels of large potatoes, unsurpassed in beauty and quality. No care or manuring was given them more than the other parts of the field, except they were cut finer.”

N. C. SNELL, *Madbury, N. H.*

“Now as to the Burbank's Seedling, the season has been unfavorable, and the grasshoppers killed them before they were matured, but for all that, they gave good satisfaction; they realized at the rate of 420 bushels to the acre, and 98 per cent. marketable potatoes. I consider them a potato of rare excellence as a late variety.”

Little Sioux, Iowa.

J. L. PERKINS.

The Burbank Seedling was planted with all my other new sorts, and so far as a single trial is concerned, has beat them all handsomely in yield, appearance and quality, the three great essentials in a potato.

Rome, Oneida Co., N. Y.

JONATHAN TALCOTT.

I have tested over a thousand varieties of potatoes but the Burbank excels them all, growing the handsomest potatoes I ever saw, while their quality was fully equal to their looks.

Haverhill, Mass.

ANDREW LACKEY.

RELIABLE FERTILIZERS.

Cash must accompany all orders for Fertilizers.

My customers sometimes ask me what special manure I would recommend from among the scores of fertilizers in the market. Those of us who have read the appendix of Bruckner's work on American Manures (see page 13 of Catalogue) know that most of these are nearly worthless. The average value of fifteen phosphates as analyzed by Prof. Bruckner is 17.93, while the average selling value is \$50.06. The average value of seventeen superphosphates, as analyzed by Dr. Nichols, was \$16.35 per ton, and their average selling value was \$51.25!

I have personally examined with care into the manures manufactured by Mr. Bowker, Mr. Charles North at Somerville, and the Riverside Phosphate Works. I find that at each of these establishments the manures now made are a thoroughly honest article — not a particle of adulteration of any kind being used, and everything being put in the best condition possible for application to crops. At Mr. North's establishment, the blood, heads and waste bones, together with the intestines of hogs, are subjected to a pressure of sixty pounds of steam to the square inch in a large apparatus, from which they come out dry. They are then ground, bolted and barreled. At the Riverside Phosphate Works the materials used are butchers' bones and dead animals. These, after being cooked under pressure at a high temperature, have sufficient sulphuric acid added to dissolve the bones, and when dry all is ground and bolted until quite fine. These are the materials and the processes of manufacture at each of these establishments. Every thing is fair and above board and open to the inspection of any who may choose to call and examine.

The analyses of these manures, as made by our best chemists, are as follows:

Mr. North's fertilizer (known as Animal Dust):

Ammonia,	9 to 10 per cent.
Phosphoric acid,	12.15 per cent.
Price per ton,	\$45 00
Price per barrel of 200 lbs.,	5 00
Price per bag of 100 lbs.,	3 00

Riverside Phosphate:

Ammonia,	5 per cent.
Phosphoric acid and superphosphates, of which 12.76 is soluble in citrate of ammonia.	17 per cent.
Price per ton,	\$45 00
Price per barrel of 200 lbs.,	5 00
Price per bag of 100 lbs.,	3 00

Should any of my customers desire a reliable article, I will supply either of these fertilizers at the above prices, which are the same at which they are retailed at the different establishments, landing them on boats or cars in Boston, with no extra charge for bags or barrels. I have last of all used ten tons on my own farms in one season with very satisfactory results.

A glance will show that each of these manures is a reliable article—the first two being remarkably rich in ammonia, while the second is as remarkably rich in soluble phosphates. Ammonia is the more stimulating article in manures, while the phosphates are the more lasting in their effects. *These manures should never be brought in direct contact with the seed.* If applied broadcast harrow in; if in the hill stir it into the soil before planting the seed. In very dry seasons, all special fertilizers, such as Guano, Bone dust and Phosphates, do not give as satisfactory results as in seasons of average moisture. For grass, use 300 to 500 lbs. per acre, applying just after grass has started and before a rain.

STOCKBRIDGE'S FERTILIZERS.

"Feed the Plant and the Plant will Feed You."

STOCKBRIDGE'S MANURES were originated by Prof. Levi Stockbridge, Professor of Agriculture in the Massachusetts Agricultural College, and are manufactured by Messrs. Bowker & Co. These manures are made according to the analysis of plants for different crops by formulas worked out by Prof. Stockbridge, and aim to supply that plant food in an available form which is not obtained from the soil or air in sufficient quantity. In these manures the fact is also recognized, that plants like animals differ and require different food or in different proportions to insure the best results and at the least cost.

They have been extensively used for Five Years, and were

Used in 1877 on over 10,000 Acres,

with very satisfactory results, many farmers raising from 75 to 100 Bushels Shelled Corn per acre, and with like results on other crops. Five years of actual trial in the field has shown this mode of fertilization to be a *great practical success.* As the STOCKBRIDGE MANURES supply the principal elements of plant food which crops remove,

They do not exhaust the Soil,

but actually leave it richer, for being composed largely of chemicals, they have a strong chemical action on the soil, and liberate other food besides producing wonderful results.

PLEASE REMEMBER

That each manure being compounded for a certain crop, will carry out that crop equally as well as stable manure. In short, the STOCKBRIDGE MANURES, based as they are on the analysis of the crops, does away with *guess work* in fertilization. Further, they contain no *weed seeds* and often cost less than the *hauling* of stable manure and are much more quickly applied.

THEREFORE THE FARMER WHO USES STOCKBRIDGE MANURES

- Will supply his crops with what is required to insure the best results—
- Will not exhaust his soil but make it richer by developing other plant food—
- Will save Time, Labor and avoid Weed Seeds—
- And will be sure of getting as good results as with the best stable manure.

Pamphlet for 1878 mailed Free,

containing the experience of farmers all over the country who have used these manures, and other valuable information.

To be used Broadcast.

Potato, for 1 acre, 2 bags, 400 lbs.	\$10.00

CHOICE VARIETIES OF PEAS.

From the numerous varieties of Peas, I would call special attention to the following sorts:

HANCOCK EARLY. Tested side by side, the past year, with fifteen of the earliest varieties, this proved in purity, earliness, productiveness and quality, to be one of *the very best*.

HAIR'S DWARF MAMMOTH. Peas and pods very large; a wrinkled variety, popular for the family garden.

YORKSHIRE HERO. This is one of the best of the new late peas for family use, the pods growing to a large size and filling out plump to the end. It is a good cropper, and has all the sweet, marrow-like flavor of the wrinkled kinds.

The **EXTRA EARLY DAN O'ROURKE I** recommend this season for its purity, and as the best of all varieties of Dan O'Rourke to raise for market; for, as most gardeners know, there are several varieties sold under that name, which differ in earliness, in yield, in dwarf habit and in size and fullness of pod. **CARTER'S FIRST CROP** is about a week earlier than **DAN**

O'ROURKE, but the pods are smaller. A further trial, by market gardeners, has brought the **CARACTACUS** into high favor. The pods are of a good size for an early pea and well filled. **MCLEAN'S ADVANCER** is a *first rate* second-early for market or family use; pods large, well filled and numerous. One of the sweet, wrinkled class.

BROWN'S EARLY DWARF MARROWFAT PEA, will be found to be the earliest and most dwarf of all Marrowfats.

ALPHA. This dwarf wrinkled pea in yield probably surpasses any of the first early sorts; it is distinguished for earliness, productiveness and sweetness. A decided acquisition. Market Gardeners are much pleased with this as a first early.

WILLIAM THE FIRST. About as early as Tom Thumb, pods long and of a peculiar dark, rich, bluish green. A good pea either for market or family use.

Cape Cod, or

Bell Cranberry.

Mansfield Creeper

Prices of Cranberry Plants Rooted.

I have arranged with a reliable grower to supply Cranberry Plants at the following rates:—

10,000 plants by Express, freight paid by purchaser, sufficient for one-acre at two feet apart.....	\$25 00
IF sent by mail, prepaid by me.....	30 00
5,000..... " " " " per 1000.....	3 50
1,000..... " " " " ".....	4 00
100..... " " " " per 100.....	50

Mansfield Creeper, a new upland variety, habit and growth different from other varieties—these are furnished by cuttings, or shoots—take root freely, and are as safe in planting as rooted varieties..... Price per 100 60

Full directions for cultivation sent with each lot ordered. No plants sent C. O. D.

EATON BLACK BELL CRANBERRY. Berries are not very large, but uniform in size, and of dark color. The plant is very productive. It ripens by the 5th of September, *two or three weeks earlier than other varieties*, which gives them a higher price in the market. Plants furnished by the 100 or 1000. Price per 100, per mail, 60 cts.

EXCELSIOR OATS. This new white oat is warmly endorsed by Hon. Levi Bartlett, a distinguished agricultural writer, and highly recommended for the size of the grains, the weight per bushel, and for its great productiveness. These oats were distributed by the Department of Agriculture at Washington in 1869. This is a white bush Oat, but very distinct from the Probsteier. It is a very early variety, ripening ten or twelve days in advance of the common oat. The yield per acre has not been quite equal to the Probsteier, but they are heavier, weighing sometimes 42 lbs. to the measured bushel. Price per express—at purchasers expense—
Per bushel (of 32 lbs.) \$1.50 | Per peck - - - \$.70
Per half bushel - - - 1.00

WHITE PROBSTEIER OATS. These are a German oat, well adapted to this climate, and so far have not shown that inclination to deteriorate or "run out" that is usually exhibited by other heavy varieties. It is somewhat taller than the common variety, of strong rank growth, the leaves being very long and wide, and of an unusually dark green color. The straw is *Coarse and Strong and not liable to lodge*. This is also a bush Oat, the grain being distributed on all sides of the heads, which are large and well filled. The kernels are large and plump, and enveloped in a *soft, thin, white husk*. It ripens two or three days later and yields much better than the common variety. The yield has varied from 56 bushels to 98 bushels per acre; the average for six years being a little over 74 bushels per acre. They sometimes weigh 39 lbs. to the measured bushel. Price same as Excelsior.

Quantity of Seed for an Acre.

Seedsmen vary much in their directions for the quantity of seed to be planted to the acre. In the following list I give the quantities of the more common sorts used by practical farmers:

Dwarf Beans, in drills.....	1½ bushels
Peas, that make small vines.....	1½ "
Peas, that make large vines.....	1½ "
Beets, in drills.....	4 pounds
Cabbage, in hills.....	8 ounces
Cabbage, in bed to transplant.....	2 "
Carrots, in drills.....	1½ pounds

Musk Melon, in hills.....	1 to 1½ lbs.
Mangold Wurtzel, in drills.....	4 pounds.
Onion, for bulbs, to sell green or to trace, in drills.....	6 to 8 lbs.
Onion, for dry bulbs, in drills.....	4 lbs.
Onion seed, for Setts, in drills.....	30 pounds
Onion Setts, in drills.....	10 bushels
Potatoes, in drills, cut, depends on number of eyes.....	8 to 14 do.
Radish, in drills.....	5 pounds
Spinach, in drills.....	10 to 15 lbs.
Sage, in drills.....	4 to 6 lbs.
Squash, running varieties, in hills.....	2 to 2½ lbs.
Tomato, in bed to transplant.....	2 ounces.
Turnip, in drills.....	1 to 1½ lbs.

TESTIMONIALS.

My friends are oftentimes pleased, without any solicitation of mine, to write me the results of their trials of my seed. Here are extracts from a few which I have taken the liberty to publish. *They are from forty-two different States and Territories.*

"Pardon me for taking so much of your valuable time, but I wanted to tell you how splendidly all the seeds have done that bore your stamp."
MINNIE H. ROBERTSON, *Carrollton, Kentucky*

"I sent to you for seed in 1860, and I sent again in 1869, and received good seeds."
P. W. WEBB, *Tecumseh, Nebraska.*

"Old Pete says you are the best seedsman in this world's paradise. The old man lives with Samuel Purchase, in the town of Olive, and his equal for gardening is not found in our whole county, both as for quantity and quality; and the old man says the whole secret is, he gets his seeds from you."
MRS. VICTORIKE HICKMAN, *Grand Haven City, Mich.*

"Your seeds are just what you represent in every instance."
W. R. PRICE, *Courtney, Texas.*

"To any one wanting garden or flower seed I can with perfect safety and assurance recommend them to Gregory, Marblehead, Mass."
B. F. HOLCOMB, *Vandalia, Ill.*

"The Turnip seeds I bought of you proved to be of fine quality."
JAMES M. CONNAWAY, *Rockford, Alabama.*

"The seed which I procured in the spring have given entire satisfaction, especially the Lettuce and Onions and Cabbage."
REV. JOHN H. RICE, *Memphis, Tenn.*

"I must give you the justice to say that your garden seeds are the finest I ever had."
V. E. WOOD, *Ivy Depot Va*

"The seeds sent me by you last year all gave entire satisfaction. The Canada Victor Tomato was splendid, being about ten days earlier than other varieties."
L. C. FORGY, *Lagro, Ind.*

"Your seeds, so far as I have tested them for the past two years, have given entire satisfaction."
L. W. GRAFTON, *Salem, Ohio.*

"Your seeds gave the best satisfaction of any that I ever bought. I found them pure, true to name and germinating promptly."
D. L. TALCOTT, *Osage, Iowa.*

"I sent to you last spring for the Marblehead Mammoth Drumhead Cabbage seed and Hubbard and Marblehead Squash seeds, and they did finely with me."
DENNIS HUNTLEY, *Brunswick, Minn.*

"Your seed do better in this section than any other. I speak knowingly, as I have tested a great many during the past few years."
C. P. ELGIN, *Corinth, Miss.*

"Your Marblehead cabbage seed purchased from your house last season proved to be the best in this section of the country."
HENRY HOWARD, *Walla Walla, Wash. Ter.*

"I had Gen. Grant Tomato seed from you last season, and find them the best of any yet tried for this climate."
C. P. ROGERS, *Frederica, Del.*

"I planted your Canada Victor seeds after my other tomatoes were up and had about eight leaves on them, and the Victor beat them getting ripe by two weeks."
LUCY ROBINSON, *Oregon.*

"This will be the fifth year we have sold your seed, and we are happy to say that they have given general satisfaction."
W. C. & D. STEVENS, *Newton Junction, N. H.*

"Your seeds were as usual *first rate*. I have the finest field of Cabbages raised in this section, Winnigstadt, Premium Flat Dutch and Stone Mason."
J. P. JAMES, *Jacksonville, Fla.*

"I say Gregory's seeds are the best and I don't care who knows it, and I recommend my neighbors who want seeds to Gregory."
NATHANIEL COX, *Hightstown, N. J.*

"My cabbages this year were a perfect wonder to all who saw them. From \$3.50 worth of cabbage seeds purchased of you, I have sold nearly \$250 worth of cabbages, and have plenty left yet for my own use."
JOHN MARTIN, *Parkville, Mo.*

"The seed I bought from you last spring were the best lot of seed I ever bought. They were 'all right.'"
GEO. S. POWELL, *Catawba, N. C.*

"I have grown Sill's Hybrid Muskmelon for two years past, and would say that the quality of the fruit is truly *delicious*."
GEO. W. STETSON, *Barre, Mass.*

"Your Yellow Danvers Onion seed is the best I have ever planted. Your Marblehead Mammoth Cabbages do very well here. I have had several heads that weighed 32 lbs."
ALONZO FORBES, *Jolon, Cal.*

"I have for the past three years sent to you for seeds and have always found them what Andrew Jackson would call O. K."
G. W. CATE, *N. Montpelier, Vt.*

"I desire to see your seeds scattered all over this country, as they are unqualifiedly good as my experience shows clearly."
GEO. C. ROSE, *Turkey Creek, Kansas.*

"The California Mammoth White Radish was very nice. There were one or two that were 18 inches long and 5½ inches through."
WM. H. TAYLOR, *Barnes, Pa.*

"I obtained some Saudringham Celery seed from you last year, and I find it far superior to any I ever saw for early marketing."
PAUL M. BARKER, *Newport, R. I.*

"Your Marblehead Mammoth Cabbages are mammoth in size, delicious and very tender."
DR. WM. T. WILLIAMSON, *Sisterville, W. Vir.*

"The Canada Victor Tomato and Marblehead Squash, that I procured of you, were two *grand* acquisitions to my garden."
CHAS. SPENCER, *Mchawk, N. Y.*

"The Dahlia seed I had of you last year produced some of the most beautiful Dahlias ever seen."
MRS. CHAS. FARNHAM, *N. Castine, Me.*

"I have used your garden seeds and they are the best that I have ever used. *I have raised thirty tons of the Mammoth Cabbage to the acre.*"
A. J. BARRETT, *Dayton, Nevada.*

"I think it would be a difficult matter to find a finer lot of Cabbages than those I have growing from the Little Pixie, Cannon Ball and Winingstadt seeds obtained from you in the winter."
W. S. HARLEY, *Walterboro, S. C.*

"I tried a packet of Fottler's last spring, and they did splendidly in sod freshly broken without manure."
B. F. ZIMMERMAN, *Monument, Col.*

"Your seeds give me great satisfaction. I consider it cheaper to buy of you than to raise my own."
J. RAINS, *Washington, Idaho.*

"Your Cabbages and Onions astonish the inhabitants. No one would believe that I grew the onions from seed, as they have made so many fruitless attempts to raise them in this section. I was never better satisfied."
J. S. STEBBINS, *Riceboro, Ga.*

"Last season I raised a very good patch of cabbage, about two tons of Fottler's Early Drumhead. I weighed several heads after taking away the loose leaves, and found many which weighed 33 lbs."
REES R. LEWELLYN, P. M., *Fountain, Utah.*

"We are happy to say we have always found your seeds perfectly reliable. Never in a single instance have they failed to germinate or be true to their kind."
S. W. NASH, *Wallingford (Conn.) Community.*

"I can safely recommend your seeds to the confidence of any community."
C. G. LYNCH, *Crupton, Md.*

"I have had sufficient experience with your seeds to know they can be relied on, which I can't well say of others."
L. L. C. ELLIOTT, *Camden, Arkansas.*

"Your seeds have always given entire satisfaction, and it is a pleasure for me to recommend them to my neighbors."
H. C. KIBBE, *Fairwater, Wisconsin.*

"Your Hubbard Squash, Phinney Watermelon and Trophy Tomato are ahead of anything we ever had here."
NEPTUNE LYNCH, *Horse Plains, Montana Territory.*

"Your Orange Jelly Turnips are a splendid Turnip and stand the winter well."
JAMES E. FORD, *Shady Grove, La.*

✂ If any of my friends wishing for Circulars to distribute to their neighbors, will write me to that effect, I will send extra copies free. ✂
