OTTAWA, CANADA, January 19, 1916

SIR:

I beg to submit, herewith, a report entitled "Dictionary of Altitudes in the Dominion of Canada," second edition. The first edition was compiled by myself when Chief Geographer, Department of the Interior.

The present edition has been greatly enlarged, the elevations have been thoroughly checked and verified, and brought up to date.

"Dictionary of Altitudes" is supplementary to "Altitudes in Canada," and the original intention was to issue it as Part II of same. Owing to the size of the latter it was, later, deemed advisable to publish the Dictionary as a separate volume.

"Altitudes in Canada" is more useful to civil engineers; but the arrangement is not a convenient one for the general public, particularly for anyone desiring to know the altitude, say, of a railway station, and ignorant of the name of the railway line on which it is situated.

The arrangement of the present volume is alphabetical, by provinces and territories, the locality being given by counties in the case of the eastern provinces and by latitudes and longitudes in the western provinces and territories where the county system has not been adopted. The latitudes and longitudes have been taken from the latest maps and charts.

I desire to express my indebtedness to Miss Inez Campbell, who has ably assisted in correcting proofs and checking the data included therein.

Respectfully submitted

JAMES WHITE

AUTHORITIES

The following is a descriptive list of the principal authorities quoted in the within report, with short notes as to the methods employed in the determination of the altitudes accredited to them.

ADMIRALTY CHARTS (ADMIR. CHART)

Heights credited to this source were determined by angles measured with a sextant.

BAILLAIRGÉ, W. D.

These elevations are the results of spirit levelling.

BARLOW, A. E.

The elevations credited to this source were measured with the aneroid.

INTERNATIONAL BOUNDARY COMMISSION, CANADIAN SECTION, (BDY. COM. CAN.)

The elevations in the Alaska-Yukon coast-strip, accredited to this authority, were determined trigonometrically; in the vicinity of the 49th parallel, the results are from spirit levelling.

BOUCHETTE, JOSEPH

These elevations were measured with mercurial barometer.

BOUNDARY COMMISSION (BDY. COM.)

All elevations accredited to this authority are barometric and were determined by the earlier International Boundary Commissions charged with the determination of the boundary between Canada and the United States, except Alaska.

BREITHAAPT, W. H.

These results are from spirit levelling.

BUREAU OF MINES, ONTARIO (BUREAU MINES)

These elevations were measured with the aneroid.

BURWELL, H. M.

Heights credited to this source are the results of spirit levelling.

CANADIAN NIAGARA POWER COMPANY (C.N.P.Co.)

These elevations are the results of spirit levelling.

CARRUTHERS

Exploration of country between Omineca and Findlay rivers, British Columbia; determined by aneroid.

CHACE, W. G.

Elevations under this authority are the results of spirit levelling.

CHALLIES, J. B.

These results are from spirit levelling.

CITY ENGINEERS (CITY ENG.)

To this source are credited the elevations of bench marks, city data, etc., in the various cities. They have been measured with a spirit level. On the sea coast they have been directly referred to sea level; elsewhere, they depend either upon the precise levels of the Geodetic Survey or upon what is considered to be the most accurately determined railway station.

U. S. COAST AND GEODETIC SURVEY (COAST SURV.)

Elevations credited to this source were determined by angles measured with a sextant

COLEMAN, PROF. A. P.

All determinations are barometric.

COLLIE, N.

These elevations are barometric and are, in most instances, too high.

COMMISSION OF CONSERVATION (CONS. COM.)

The elevations credited to this source are from spirit levelling based on precise level bench marks in vicinity.

DEPT. OF LANDS, FORESTS AND MINES, ONTARIO (CROWN LANDS)

These elevations were measured with an aneroid.

DAWSON, S. J.

Exploration of the country between lakes Superior and Winnipeg. These altitudes were obtained by levelling the principal falls and rapids and estimating the fall in the current and smaller rapids. They have been checked and corrected at several points by railway levels.

DEEP WATERWAYS COMMISSION (D. W. COM.)

The determinations accredited to this source are partly from information supplied by the Canadian Commission and partly from the report of the United States Commission; the results being derived from the levelling of the Commission and from the work of the United States Lake Survey, with additions and corrections by the commissioners.

DRESSER, JOHN

These elevations were measured with an aneroid.

EVANS, E. A.

Elevations credited to this source are the results of spirit levelling.

GANONG, PROF. W. F.

The elevations credited to this source were measured with the aneroid.

GEODETIC SURVEY OF CANADA (GEOD. SURV.)

These elevations are the results of lines of precise levels carried along lines of railways.

GEOLOGICAL SURVEY OF CANADA (GEOL. SURV.)

All the elevations given under this authority are barometric or trigonometric resting upon barometric bases, except in the Lake Simcoe district, Ont.

HANBURY, D. T.

Exploration in Northern Canada. Elevations were measured with an aneroid.

HARKNESS, R. B.

Elevations credited to this source are from railway location surveys.

HILL, A. J.

Elevations credited to this source are the results of spirit levelling.

HIND, PROF. H. Y.

Assiniboine and Saskatchewan Exploring Expedition, 1858. Elevations were determined barometrically.

HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO (H. E. P. C.)

The results are from spirit levelling for proposed railways.

INTERNATIONAL JOINT COMMISSION (I. J. C.)

These elevations are the results of spirit levelling from precise level bench marks in vicinity.

INTERIOR, DEPT. OF

The lines of levels run by this Department cover a large portion of Manitoba, Saskatchewan and Alberta from the Canadian Northern main line northward. The elevations of railway stations and bench marks accredited to this authority are based upon precise levels; other altitudes are based upon spirit levelling.

IRRIGATION SURVEY (IRRIG. SURV.)

The results are from spirit levelling and from trigonometric work by the Irrigation Branch, Dept. of the Interior.

JOBE, MARY L.

Elevations credited to this source were determined barometrically.

UNITED STATES LAKE SURVEY (LAKE SURV.)

These elevations are the results of exact levels.

DEPARTMENT OF LANDS, QUEBEC

All elevations are from barometric determinations.

LOVELACE, E. S. M.

These elevations are from barometric determinations.

MILITIA, DEPT. OF

The elevations credited to this source are from spirit levelling.

MILES, E. L.

These elevations are the results of spirit levelling.

ONTARIO POWER COMPANY (O. P. Co.)

These results are from spirit levelling.

O'SULLIVAN, H.

Most of these heights were obtained by levelling the falls and rapids in streams and estimating the rise or fall due to the current in the intervening stretches.

OUTRAM, JAMES

These results are from barometric determinations.

PALMER, HOWARD

Elevations were determined barometrically and by vertical angles.

PUBLIC WORKS, DEPARTMENT OF (PUB. WORKS)

Elevations of railway stations and bench marks accredited to this source are based upon precise levels by the Superintending Engineer, Canadian Geodetic Levelling. Other elevations are from spirit levelling.

DEPT. OF PUBLIC WORKS, ONTARIO (PUB. WORKS, ONT.)

Elevations credited to this source are based upon spirit levelling.

RAILWAYS AND CANALS, DEPARTMENT OF (RYS. & CANALS)

These results are based upon spirit levelling.

ROGNASS, T.

The results credited to this source are from spirit levelling.

SURVEYOR-GENERAL (SURV. GEN.)

These elevations are from spirit levelling or are trigonometric; when given to tenths of a foot, they are based upon precise levels.

TIDAL AND CURRENT SURVEY (TIDAL SURV.)

These altitudes are based upon long-time observations of the tides in the locality.

TORONTO POWER CO. (T. P. Co.)

These results are from spirit levelling.

UNITED STATES GEOLOGICAL SURVEY (U. S. G. S.)

These results are based upon precise levels.

UPHAM, W.

These results are from barometric determinations.

VASILIEF

These elevations were determined by sextant angles.

VREELAND, F. K.

These results are from barometric determinations.

WARDEN, B. R.

Elevations under this authority are the results of spirit levelling.

WHEELER, A. O.

The elevations credited to this source were determined by the photo-topographic method.

WILCOX, W. D.

Elevations were determined barometrically and by vertical angles.
