# COUNTERFEIT DETECTOR

ESTABLISHED 1850,  
By **JOHN S. DYE**

(OFFICIAL ORGAN.)  
**TREASURY EXPERT**

## PERFECT PROTECTION.

Good Money, of the same denomination as the counterfeit, paid Every Yearly

Subscriber, for information of all Counterfeit Bills printed from any engraved plate in imitation of United States Treasury Notes, United States National Bank Bills, Dominion of Canada Notes, or Canadian Bank Bills, received by them in good faith for face value thereof, not mentioned by our special notice or in the latest issue of

**DYE'S GOVERNMENT COUNTERFEIT DETECTOR.**

OFFICE, COR. TWELFTH AND CHESTNUT STS.,  
PHILADELPHIA, PA.

---

## TABLE OF CONTENTS.

Miscellaneous Items .....	2 to 13
Counterfeits and Points of Detection of \$1, \$2, \$5, \$10, \$20, \$50, and \$100 National Bank Bills.....	14 to 26
Counterfeits and Points of Detection of U.S. Treasury Notes and Bonds ....	26 to 36
Counterfeits and Points of Detection of Silver Certificates .....	33
Ten Instructive Sight Guides.....	35
How Counterfeits are produced, Photographic Processes, &c.....	36 and 37
Official List of United States Coins and Description of Counterfeits of same.	38 to 49
Coin Tests, Total U. S. Coinage, &c.....	44
Statement of the Public Debt of the United States.....	50
Stolen United States Bonds.....	51 and 52
Coins and Notes of the Commercial Nations of the World.....	53 to 55
British American Currency .....	56
Banks in British America .....	57 to 60
British American Counterfeits and Stolen and Raised Bills .....	61 to 64
Ready Reference List of U.S. Treasury Notes, weight of coins, etc. . . .	65
Ready Reference List of U. S. National Bank Bills .....	66
Ready Reference List of Canada Currency .....	Page 4 of Cover

# GOVERNMENT COUNTERFEIT DETECTOR.

Issued Monthly at Three Dollars a Year in Advance.

Published with illustrations under supervision of the Secret Service by order of the then Secretary of the Treasury Department of the United States.

Entered according to Act of Congress, in the year 1890, by F. A. LESTER, in the Office of the Librarian of Congress, at Washington, D. C.

Entered at the Post Office at Philadelphia, Pa., as second-class matter.

Vol. XXXIX.

JUNE, 1890.

No. 1

## Counterfeiters Arrested.

The Secret Service have arrested, at Covington Ky. E. K. Mattox alias James Miller who is a confederate of William E. McKinney and George W. Williams, noted coin counterfeiters. The last named was sentenced in December last, to a term of 10 years in the Columbus, Ohio Penitentiary, for counterfeiting.

## A Letter from the Hon. John Jay Knox.

CLAIMING TO BE THE AUTHOR OF THE ACT THAT DEMONETIZED SILVER.

THE NATIONAL BANK OF THE REPUBLIC,  
CORNER WALL STREET AND BROADWAY,  
New York, April 8, 1890. }

Hon. A. J. Warner:

DEAR SIR:—In a leaflet recently printed over your signature you say: "Wipe out the crime of 1873 by which the money standard was unjustly increased," etc., etc.

As I was the author of the act of 1870, which subsequently became the law of 1873, or at least of that section which discontinued the coinage of silver dollars, I respectfully request that you will inform me what you mean by the "crime of 1873" and oblige, yours truly,

JOHN JAY KNOX.

The reply made by Mr. Warner from Marietta, O., under date of April 12th is far too long for insertion herein, but it ends as follows:

I do not believe you knowingly devised any such thing, but were simply made one of the instruments by which this wrong was perpetrated, I am, therefore, I think, more charitable to you than you are to yourself.

I am, very respectfully yours,

A. J. WARNER.

Mr. John S. Bell, Chief of the Secret Service Division of the Treasury, having failed to comply with the request for his resignation, has been dismissed. Mr. Bell was appointed during the last Administration, and then held the office since February, 1888.

## Speaker Reed's Stern Condition.

(Mr. Walker is a gold mono-metallist, but he has also an additional belief and says "that more money means more misery." His remarks were at least very original, yet his ideas did not appear to affect any of the members of Congress in a serious manner.)

*From the Globe-Democrat.*

WASHINGTON, June 6.—There was great hilarity in the House this afternoon when Mr. Walker of Massachusetts, becoming excited in the midst of his silver speech, peeled off his coat and threw it on the chair behind him. About that time Congressman Frank strolled up to the Speaker's desk and asked Mr. Reed if he could have a little time to talk on silver. The Speaker turned from his silent and severe contemplation of Mr. Walker's undignified appearance, and said:

"You can have some time, Mr. Frank—that is, upon a condition."

"All right," replied Mr. Frank. "What is the condition?"

"You must promise me," said the Speaker, in his most solemn manner, "that you will keep your trousers on."

## Congressional.

HOUSE.

Mr. Shively of Ind., introduced a bill (H. R. 10592) to prevent fluctuations of the currency by substituting Treasury notes in lieu of bank notes. Referred to the Committee on Banking and Currency.

The Windom silver bill, which was first offered in the House, was recommended by the House

Committee to pass, but only as amended by this Committee; and there was also a minority report for a bill for the free coinage of silver. On June 5th these bills were before the House for consideration. The House is under such rules that only three amendments could be offered to the Committee bill, and the amendment offered for the free coinage of silver was not allowed. Soon all the bills were abandoned, and a House caucus bill was substituted, while a motion to recommit the bill to the Committee with instruction to report back a bill for free coinage was lost, yeas 116, nays 140; not voting, 71. The caucus bill with the little amendments thereto, was then passed on June 7th; yeas 135, nays 119; not voting, 73.

With hardly an exception Congress has agreed that the total circulation of money is not sufficient, and yet this caucus bill provided that the Treasury notes issued under it could be redeemed again in silver bullion, and thus it was possible for any one to take back the notes and get the bullion; then sell this or other bullion right over again to the Secretary during the next month, and thus in a whole year there might not be an extra dollar added to the total circulation of the country. The Secretary of the Treasury was compelled to purchase \$4,500,000 worth of silver each month. The notes, when redeemed, were to be destroyed, but were to be a full legal tender when outstanding, yet the bullion bars were not to be a legal tender. The act of 1878 was to be repealed, but the Secretary could coin, if necessary, such portion of the silver deposits as might be necessary to redeem the notes thus issued. The caucus bill was a very nonsensical bill, and some of the members said that they only voted for it, knowing that the Senate would never pass it without striking out the objectionable bullion redemption clause.

Long speeches were made by Messrs. Conger, Lind, Walker, Kerr, Blout, Biand, Townsend, Skinner, Moore, Dorsey, McRae, Barnes, Ells, Shively, Wickham, Montgomery, Burton, Lape, Hollman, Heard, Wheeler, Brookshire, Stone, Carter, Beckalew, Payson, Mutchler, Hatch, Bartine, Anderson, Allen, Stone, Dingley and some others.

### Senate.

In the latter part of last month Mr. Ingalls of Kans., introduced by request of the Wage-Workers' Political Alliance of Washington, D. C., a bill (S. 3887) to abolish metal money, and for other purposes.

Mr. Stanford of Cal., a bill (S. 3889) to provide for making loans by the Government and securing the same by liens upon land.

Mr. Cockrell (at the request of the Wage-Workers' Political Alliance of Washington, D. C.), a bill (S. 3925) to provide for the expansion of the currency and for other purposes.

Mr. Plumb (at the request of Mr. W. P. St. John, a leading banker in New York), a bill (S. 3945) to provide for the purchase of silver for use as lawful money. Referred to the Committee of Finance.

Mr. Teller offered a resolution, which was laid on the table, as follows:

*Resolved by the Senate (the House of Representatives concurring), That it is the determined policy of the United States Government to use both gold and silver as a full legal-tender money under the ratio now existing in the United States, or that may be hereafter established by the United States alone, or acting in accord with other nations."*

Mr. Cockrell (by request of the Wage-Workers' Political Alliance) presented a resolution of inquiry in reference to the redemption of U. S. bonds.

"Whereas both of the conditions in said section 3893 do now exist; Therefore,

*Resolved by the Senate of the United States, That the Secretary of the Treasury be, and he is hereby, directed to inform this body at the earliest date possible when he can probably begin to execute the foregoing provisions of existing law."*

On June 10th the silver bill which was received from the House the day before, the bill (H. R. 5381) was referred to the Committee on Finance.

On June 11th, adverse reports were received from the Committee of Finance on bill (S. 3889) to provide for making loans by the Government, and securing the same by liens upon land. Also an adverse report on bill (S. 3887) to abolish metal money and for other purposes.

The House bill (H. R. 5381) was favorably reported, but with amendments, and that it shall be offered in lieu of the bill pending in the Senate, as a substitute.

On June 13th the Senate bill, with its pending amendments, was laid aside and placed upon the table, and the House silver bill was considered before the Senate.

Since last month the silver bills before the Senate have been further and extensively debated. Long speeches being made by Senators Stewart, Morrill, Harris, Pugh, Jones, of Nev., Hiscock, Sherman, Plumb, Cockrell, Evarts, Vance, Morgan, Aldrich, Reagan, Daniel, Allison, Vance and Wolcott.

On June 17th the Senate then proceeded to vote on the amendment to the House silver bill as reported by the Finance Committee.

The first was to strike out the provision that the Treasury notes issued for the purchase of silver "shall be a legal tender in payment of all debts, public and private." The amendment was rejected—yeas, 14; nays, 50; and the provision remains in the bill.

The next vote was on the amendment to strike out the bullion redemption clause. It was agreed to—yeas, 57; nays, 7; the nays being Messrs. Chandler, Frye, Hale, Hiscock, Hoar, Morrill and Sherman.

The amendment to strike the sixth section, for the free coinage of silver when the price was \$1 for 371¼ grains of pure silver, was then rejected—yeas, 16; nays, 46—so the section is retained.

The amendment providing that the act shall terminate at the expiration of ten years was rejected—yeas, 4; nays, 64. The yeas were Messrs. Chandler, Edmunds, Morrill and Sherman.

Mr. Blair (Rep. N. H.) offered an amendment limiting the amount of silver to be coined to \$5,000,000 a month. Rejected—yeas, 12; nays, 46.

### FREE COINAGE.

Mr. Plumb (Rep. Kan.) offered this in lieu of the first section of the House bill:

"That from and after the date of the passage of this act the unit of value in the United States shall be the dollar and the same shall be coined of four hundred and twelve and one-half grains of standard silver or of twenty-five and eight-tenths grains of standard gold; and the said coins shall be legal tender for all debts, public or private; that thereafter any owner of silver or gold bullion may deposit the same at any mint of the United States to be formed into standard dollars or bars for his benefit and without charge; but it shall be lawful to refuse any deposit of less value than \$100, or any bullion so base as to be unsuitable for the operations of the mint."

This was agreed to—yeas, 43; nays, 24, as follows (Democrats in italics):

YEAS—Messrs. Bate, Berry, Blair, Blodgett, Butler, Call, Cameron, Carlisle, Cockrell, Coke, Colquitt, Daniel, Eustis, George, Gibson, Gorman, Harris, Hearst, Ingalls, Jones (Ark.), Jones (Nev.), Kenna, Manderson, Mitchell, Moody, Morgan, Paddock, Payne, Plumb, Power, Pugh, Ransom, Reagan, Sanders, Squire, Stewart, Teller, Turpie, Vance, Vest, Voorhees, Walthall, Wolcott—43.

NAYS—Messrs. Aldrich, Allen, Allison, Casey, Chandler, Cullom, Dawes, Edmunds, Evarts, Frye, Gray, Hale, Hawley, Hiscock, Hoar, McPherson, Morrill, Pierce, Sawyer, Sherman, Spooner, Stockbridge, Washburn, Wilson (Md.)—24.

Several other sections or amendments were also added to the bill and its title also changed, and then the bill as amended passed the Senate—yeas, 42; nays, 25. The bill now goes back to the House.

(Continued from last month.)

\$6—Beaver and Tree.

\$7—Tempest.

$\$3, \frac{1}{2}, \frac{1}{3}, \frac{1}{6}$ —Sun dial.

\$8—Harp.

\$3-90—Fractional Bank Bill.

- \$1—Basket and Acanthus. "*Depressa Resurgit*"—Though pressed down it will
- \$2—Hand and Flail. "*Tribulatio Dicitur*"—Affliction enriches. [rise again.]
- \$3—Heron and Eagle. "*Exitus in dubio est*"—The end is in doubt.
- \$4—Boar and Spear. "*Aut mors aut vita decora*"—Either death or an honorable
- \$5—Hand and Bush. "*Sustine vel abstine*"—Sustain or abstain. [life]
- \$6—Beaver and Tree. "*Perseverando*"—By persevering.
- \$7—Tempest. "*Serenabit*"—It will clear up.
- \$8—Harp. "*Majora Minoribus consonant*"—The greater with the smaller are in
- \$20—Ocean, Waves. "*Vi concitatae*"—Driven by violence. [harmony.]
- \$30—Tomb and Wreath. "*Si recte facies*"—If thou shall do well.
- $\$2\frac{1}{3}$ , etc.—Sun Dial. "*Fugio*"—I fly (therefore) mind your business. (Issued only [in 1776.]

## FIRST ISSUED IN 1778.

- \$40**—Alter and Stars. “Confederation.”  
**\$50**—Unfinished Pyramid. “Perennis”—Everlasting.  
**\$60**—Globe. “Deus regnat exultet terra”—The Lord reigneth, let the world rejoice.

## ISSUED ONLY IN 1779.

- \$35**—Plow in Field. “Hinc opes”—Hence our wealth.  
**\$45**—Bee-hive. “Sic floret respublica”—Thus flourishes the Republic.  
**\$55**—Sun on Field. “Post nubila phoebus”—After the clouds comes the sun.  
**\$65**—Hand and Scales. “Fiat justitia”—Let Justice be done.  
**\$70**—Small Tree. “Vim procellarum quadrennium sustinuit”—For four years it has  
[sustained the force of the gales].  
**\$80**—Large Tree. “Et in secula seculorum florescebit”—It will flourish forever and ever.

The Continental Currency was first authorized by the Second Continental Congress, which was convened at Philadelphia in 1775. These bills were prepared, and printed from a combination of type, with engraved borders, and they have thereon a circular vignette with a Latin motto just above it (a full-sized illustration of the face of a \$3 bill was printed in our last months' issue). The backs of the bills bear an imitation of leaves of various trees, but they are different on each value. Above the leaves is the denomination, below the leaves, on the bill illustrated, are the words “Philadelphia. Printed by HALL & SELLERS, 1775,” and around all is a type border composed of pieces of various patterns evidently intended to add to the difficulty of counterfeiting. The engraved parts were cut on type metal by an English gun engraver named Smithers, and the style of the work was such that the bills were rapidly produced on the ordinary printing presses then in use.

It may be noticed, of course, that the first above illustration, the vignette on the \$6 bills (beaver and tree) is in fact a little odd in its proportions, and therefore this vignette in particular, has been made by some people a subject for a little criticism, inasmuch as it is said to fail to convey the real lesson of the motto, or because it shows such a mammoth beaver gnawing at a tree that there would be under those circumstances but little perseverance required to gnaw the tree down, etc. However, if any of us admit this criticism, then we are confronted with the fact that if the real proportion between a beaver and that tree had been carried out, that then the beaver might have been taken for a mouse under the tree, provided the little animal was noticed at all, and so that in the end, this latter case, might be far worse than the first, for now we can judge what animal is intended to be represented and thus the vignette certainly answered the purpose.

The \$20 bills of the first issue are in size narrower and longer than other bills of the same series, they are also on different paper (white), without the engraved border, and the left end is “marbled” in various colors. The backs of the bills are also different and having a circular vignette at the left end. The \$30 bills were printed on July 24th but the date on the bills remained as before, yet the style of them is similar to lower values of this series but with the face vignette as previously mentioned, but the backs of the bills contain the vignettes that are on both sides of the \$20 bills. About \$1,000,000 in \$30 bills, but only 11,800 \$20 bills, and 49,000 bills of each of the other denominations were printed, or a total amount of the first series, \$3,000,000.

The total amount of the second series, dated November 29th was also \$3,000,000. The third series contain the fractional bills, which have on the backs of them, the circular chain of 13 links and each link bearing the name of a State. Within this chain is a glory of short rays, within this “American Congress” and in centre of all “We are one.” This design is like the one which is struck on tin and other Continental Currency coins. There are three designs of frames to each value of

bills, and marked respectively A, B. and C. The fractional bills were only signed once, and that in red ink. The seventh series of bills is dated at Baltimore. The eighth series is the first to give the name as "United States." The ninth series was dated at Yorktown. The tenth series contained the first \$50 bill, and which has the vignette of the unfinished pyramid consisting of thirteen layers of stone. This device was also adopted as the Great Seal of the United States, and it has grown with the country, one layer of stone for each State. The eleventh and last series gives the name as "The United States of North America," but omitting the city where issued, and as a safeguard against counterfeiting, an oblong band in the left border, and a section (usually diamond shaped) of the vignette is printed in red.

#### THE CONTINENTAL CONGRESS WITH VERY LIMITED POWERS

The Continental Congress at first only existed by the courtesy of the States which sent delegates to Congress, and then these delegates would strictly obey their State governments and thus this made the old Continental Congress nearly powerless. This Congress had no power to institute taxation, nor to properly provide for the redemption of its paper money, but they authorized the emission of paper money on the credit of the union, and in the redemption of which each colony was to bear a part,

On July 10th, 1776 the Articles of Confederation were first reported to the Congress then convened here in Independence Hall, but it was not until 1777 that they were introduced or agreed upon, and then not ratified to become obligatory upon all the States until March 1781. These Articles were such as to then prevent the interferences by the State governments, and gave Congress express power to borrow money and emit bills of credit, and all debts contracted being deemed a charge against the United States for the payment of which they and the public faith were pledged. Even this Congress, though they might declare many things, yet they could not really enforce a law after they had made it. They could not raise money by taxation but only declare what amount each State should contribute to the support of the Government, and then could not enforce the assessment. Nor had they the right to tax or regulate commerce, that great resource to any nation, in fact their laws were mere recommendations to the States, requesting their aid, relying on their patriotism and honor to furnish the aid, and persuading them to do it; and, then if the States chose they could ignore them. Nevertheless the Revolutionary War was successfully conducted under these Articles of Confederation, in fact they were made to serve the purpose, but they were afterward found to be even less suited to the times of peace than of war, and still were continued in force after the Treaty of Peace with England, which was finally signed September 3d, 1783. The new Constitution became the law of the country on the first Wednesday of March 1789, and then in a few weeks after, the old Congress of the Confederation expired for want of a quorum.

It was on September 11th, 1777 that Howe defeated Washington at the Brandywine, and on September 26th he took possession of Philadelphia, and in the next month or on October 24th, 1777, he repulsed Washington at Germantown. Meantime, however, these British successes were more than counterbalanced by the surrender of the British army under Burgoyne to Gates, at Saratoga, and which occurred on October 16th, 1777, but the final surrender, which was practically the end of the war, was the surrender of Cornwallis at Yorktown on October 19th, 1781.

#### THE CONSTITUTIONAL CONGRESS OF 1873, WITH VERY COMPLETE POWERS.

Under the next heading it will be seen how the British and those sympathizing with them were determined to put down the old paper money or the Continental bills; and, inasmuch as the American Congress of 1873, was successful in putting down the gold price of silver in this country, and therewith and correspondingly the prices of all the staple productions of the country; hence, many

of our private people as well as a great number of the present Congressmen, actually believe that that same old British nation succeeded in getting the Congress of 1873 to commit the crime to humanity of demoneizing silver and persistently sticking to the gold basis—and thus appreciating our money and debts 50 per cent, since 1873. Any one knows that it's impossible to get a sufficient quantity of gold alone to answer the purposes of money in the world; also that it is impossible to get sufficient gold and silver both together to answer those purposes, and hence about one-third of all money in the world is simply paper promises. Then again any one knows, after law has made it so, that it is impossible to continue to stick to a dearer basis or metal, without in part at least, demoneizing the other or cheaper metal, although, a nation can swing on to the cheaper basis and not in the least demonetize by law the dearer basis. It is known also that at the time that silver was demonetized here, that a heap of British gold was raised in England, and that at the same time Mr. Ernest Seyd a British banker came over here.

The following is what Mr. Hooper said who had charge of the bill in our House of Representatives, (as per the *Congressional Globe*, Vol. 89, page 2304), and under date of April 9, 1873:

Mr. Ernest Seyd, of London, a distinguished writer, who has given great attention to the subject of mints and coinage, after examining the first draught of the bill, furnished many valuable suggestions which have been incorporated in this bill.

While the committee take no credit to themselves for the original preparation of this bill, they have given to it the most careful consideration, and have no hesitation in unanimously recommending its passage as necessary and expedient.

Well what a pity! that we did not have at that time some of the old kind of American statemen, instead of so many politicians in public offices. For be it remembered that England is not a Republic, and cares but little for her producing classes if her other classes are benefitted; that she was and is a creditor nation and also a non-producer of silver, while America was just the reverse and her interests totally different.

To give the Devil his due, England is no fool, for what she does she does well, and she knows her own intesests as a whole. But it is totally different with a lot of American dupes here trying to ape England and her systems. The truth is that there are a number of persons here who should emigrate back to England or somewhere else, for in sentiment they belong there and not in America. However, our Congress of 1878, in spite of all internal opposition, including a veto by President Hayes, tried to remedy the silver matter some, and now at this present session, amid a war of words or an avalanche of talk, some of the congressmen are trying to do still more to remedy the trouble, on the ground, probably, that it is better late than never. If the people of this nation could only show that they themselves were not also guilty of contributory negligence, and could only fasten the crime on the guilty ones who played the tricks, why undoubtedly those guilty ones would then deserve imprisonment for life, and at the hardest kind of labor, for their remaining days.

Every person should be interested in the silver legislation of 1873, and should, by all means, send 13 cents to W. H. Collins, Chief Clerk of Public Printer, Washington, D. C., and get the *Congressional Record* of the date of June 10th, 1890. In this paper Senator Stewart has now gathered together and has therein printed that old original silver bill with all the amendments, etc., and with considerable other matter connected therewith. He shows or claims that the section then demoneizing silver was never read in either House, nor was that main point known, nor was there ever any debate thereon, and yet it became a law. He also shows the statements of President Grant and a lot of prominent members of Congress showing that they never knew until afterwards that the old standard silver dollar had been quietly dropped out of the U. S. laws, as most every one of course supposed

it would be in the Revised Statutes in addition to the trade dollar. He shows that Congress did not know of the radical changes made to the coinage laws, or that the country was to be put upon only a gold basis. That this great substitution to a gold basis was not known nor debated at all, that it was accomplished surreptitiously, etc., etc. In fact our money was also clinched to the English money by stating that the pound sterling should be valued in U. S. money at 4.866½, although this would not amount to much more than a row of pins if the old free coinage of the silver dollar had not been discontinued.

It is, of course, a fact that the British seem to have been always particularly interested in American finance; and, even at this late day, a part of the present American Congress is, through the efforts of Senator Stewart and a number of others, now searching every way to find out how it was possible, through tricks or otherwise, or through British gold and influence, or through any creditor or other influence, that a modern Congress could be so outwitted, or so ignorant or degenerated or so over powered in 1873—as to first commit the crime of demonetizing silver, by the most quiet and the most peculiar legislative transaction that ever occurred in this country, and then to continue on trying to fight it out on that line. It is known, of course, that thus putting down silver and commodities, was not an ordinary war measure, and meantime Ex-Comptroller Knox, Senator Sherman and some other Government officials are mentioned as being leaders in the scheme. With much truth also has inquiry been made, and what can the States do when a National Congress has undermined the very foundations of Justice, and how can the people be expected to respect any laws emanating from such a source, even though they may be prosecuted and punished for committing an offence a million times smaller and hunted down as a hound hunts a hare. It was proven a long time ago that the British could not over power the old American Congress, by force of arms, or in any other way, and yet some 100 years afterward their subtle influence over a more modern American Congress, in financial matters, is now believed to have been and is yet a matter of great force, though their ways are obscure and cloudy. The gold basis idea, or the silver demonetizing scheme as it is called and well known was at first allowed to easily work its way through Congress some way and the question is how was it done, for the great American nation was thus made to suffer very greatly therefrom, but if using the words in a late speech in Congress “it has cost the producing classes more than all the wars that have afflicted us since the foundation of the Government.”

#### THE DEPRECIATION OF THE BILLS.

Whether the size of the Continental bills, or the mottoes thereon, ever had any effect in striking terror to the hearts of the British when they were in this country is not now positively known, but they and those sympathizing with them were determined to put the bills down.

The Continental paper money for the first year or more after its issue continued at par with coin, but in about two years after, the bills had depreciated to one-half, and in three years to about one-quarter of the value of coin. One of the great obstacles to the success of the bills was the large number of counterfeits which flooded the country, and many of these were issued as a war measure by the British, and as will be seen by the following advertisement taken from the *New York Mercury* of April 14th, 1777.

ADVERTISEMENT.—Persons going into other colonies may be supplied with any number of counterfeit Congress notes for the price of the paper per ream. They are so neatly executed that there is no risk in getting them off, it being almost impossible to discover that they are not genuine. This has been proven by bills to a very large amount which have already been successfully circulated. Inquire of Q. E. D. at the Coffee House from 11 A. M. to 4 P. M. during the present month.

With those issues of Continental bills of May 20th, 1777 and April 11th, 1778, they in fact, had to be actually withdrawn by the Government, and after destroying

about \$20,000,000 of them, the remainder were repudiated on account of the numerous counterfeits in circulation, although these were quite easy of detection. The unsigned bills printed on blue paper, and which are now occasionally met with, are those which were supplied to the banks and other prominent parties, to compare with the suspected counterfeits. The last issue of Continental bills, or the issue of January 14th, 1779 seem never to have been counterfeited, but this fact may be accounted for by the reason that the bills at that time were only accepted of at a discount, at the rate of  $7\frac{1}{2}$  dollars in bills for one dollar of silver, and that then still further depreciation soon followed on afterward.

In Sept., 1779, the bills had depreciated to one-twentieth of their face value and Congress then determined that the total issues should not exceed \$200,000,000, and renewed the declaration that this paper currency should be redeemed in full, and they went to some labor to prove that the States had the ability to redeem it, though Congress itself had not then the necessary power to do it. The following will show the value of the bills in comparison with \$100 in coin for January of each year.

1776—\$100, 1777—\$105, 1778—\$325, 1779—\$742, 1780—\$2,934, and 1781—\$7,400. At the latter date calico thus sold for \$85 per yard, in these bills, handkerchiefs at \$100, and other goods at corresponding prices.

In March, 1780, the paper bills had then depreciated in coin to one-fortieth of their face value, and Congress now required the whole to be brought in for redemption at their market value in coin, and also authorized the issue of new notes bearing interest at 5 per cent, and payable in six years from date in silver and gold. These bills were to be exchanged in the proportion of \$1 of the new emission for \$20 of the old. Some authors put the total of the first emission at \$200,000,000, while others put it as high as \$242,100,176 and this is according to the Treasury statement.

In the latter part of the year 1780 the notes of the old issue had depreciated to one-seventy-fifth of their face value, and practically ceased to circulate in the States north of the Potomac; but, in Virginia and North Carolina they passed for a year longer and finally depreciated to 1000 to 1 and ceased to circulate. In addition to the Continental bills, all of the thirteen Colonies also issued during the war their Colonial paper bills, and the amount they issued has been placed at about \$209,000,000.

It was in January, 1781, that a large part of the American army quartered at Morristown, N. J., mutined for lack of pay, and then declared their intention of departing for their homes, etc., and though that year finally brought victory in October to the American army at York town, yet that year first opened with prospects which were gloomy indeed. Continental money had fallen to about one per cent. of its par value, and in this city in a few months more it lost its purchasing power altogether. Said a Tory paper of May, 1781:

The Congress is finally bankrupt. Last night a large body of the inhabitants, with paper dollars in their hats by way of cockades, paraded the streets of Philadelphia, carrying colors flying, with a dog tarred, and instead of the usual appendage and ornament of feathers, his back was covered with the Congress paper dollars, \* \* \* This example was directly followed by the jailer who refused accepting the bills in purchase of a glass of rum, and afterwards by the traders of the city who shut up their shops, declining to sell any more goods but for gold and silver.

However, the paper money of the nation, notwithstanding the counterfeits and the depreciation of the money, with the paper money of the Colonies in connection therewith, was a means of carrying on the war successfully for a long time. Finally the surrender which was accepted on both sides as the end of the war, was the surrender of Lord Cornwallis at Yorktown, Va., October 19th, 1781.

# THE CANADIAN BANK ACT.

ACTS OF THE PARLIAMENT OF CANADA, 53 VICTORIA.

CHAPTER 31.—AN ACT RESPECTING BANKS AND BANKING.

[Assented to 16th May, 1890.]

Her Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:—

## SHORT TITLE.

1. This Act may be cited as "*The Bank Act.*"

## APPLICATION OF ACT.

3. The provisions of this Act apply to the several banks enumerated in Schedule A to this Act, and to every bank incorporated after the first day of January, in the year one thousand eight hundred and ninety, whether this Act is specially mentioned in its Act of incorporation or not, but not to any other bank, except as hereinafter specially provided.

4. The charters or Acts of incorporation, and any Acts in amendment thereof, of the several banks enumerated in Schedule A to this Act are continued in force, so far as regards the incorporation and corporate name, the amount of capital stock, the amount of each share of such stock and the chief place of business of each bank, until the first day of July, in the year one thousand nine hundred and one, subject to the right of each bank to increase or reduce its capital stock in the manner hereinafter provided; and as to all other particulars this Act shall form and be the charter of each of the said banks until the said first day of July, in the year one thousand nine hundred and one,—subject in the case of La Banque du Peuple to the provisions hereinafter made in respect to that bank: Provided always, that the said charters or Acts of incorporation are hereby continued in force only in so far as they, or any of them, are not forfeited or rendered void under the terms thereof, or of this Act, or of any other Act passed or to be passed, by reason of the non-performance of the conditions thereof, or by insolvency, or otherwise.

5. All the provisions of this Act, except those contained in sections three, six, seven, and seventeen (both inclusive), nineteen to twenty-seven (both inclusive), thirty-three, forty-five and eighty-nine to ninety-six (both inclusive), apply to La Banque du Peuple: Provided, that wherever the word "directors" is used in any of the sections which apply to the said bank, it shall be read and construed as meaning the principal partners or members of the corporation of the said bank; and so much of the Act incorporating the said bank, or any Act amending or continuing it, as is inconsistent with any section of this Act applying to the said bank, or which makes any provision in any matter provided for by such sections other than such as is hereby made, is hereby repealed; otherwise the said Acts are continued in force, subject to the proviso contained in section four of this Act.

6. The provisions contained in sections two, seven, thirty-seven, forty-seven to eighty-eight (both inclusive), and ninety-seven to one hundred and four (both inclusive), apply to the Bank of British North America and the Bank of British Columbia respectively; and the provisions contained in the other sections of this Act do not apply to the said banks.

7. For the purposes of the several sections of this Act made applicable to the Bank of British North America and the Bank of British Columbia, the chief office of the Bank of British North America shall be the office of the bank at Montreal, in the Province of Quebec, and the chief office of the Bank of British Columbia shall be the office of the bank at Victoria, in the Province of British Columbia.

8. The provisions of this Act may be extended to the Merchants' Bank of Prince Edward Island by the Treasury Board, upon the application of the directors of the said bank, before the expiration of the present charter of the said bank; and upon publication in the *Canada Gazette* of the resolution of the directors applying hereunder, and of the minute of the Treasury Board thereon allowing such application, the provisions of this Act shall, from the time named in such minute, or if there is no time named therein, from the date of the publication thereof in the *Canada Gazette*, apply to the said bank; and its charter and Act of incorporation, and any Acts in amendment thereof, shall there upon be extended for the same time and to the extent as if the name of the said bank had been included in Schedule A to this Act.

(In the Act are numerous sections under the head of "Incorporation and Organization of Banks," "Internal Regulations," "Capital Stock," "Shares and Calls,"

‘Transfer and Transmission of Shares,’ ‘Annual Statement and Inspection,’ ‘Dividends,’ ‘Business and Powers of the Bank,’ ‘Returns by the Bank,’ ‘Insolvency,’ ‘Offences and Penalties,’ and ‘Public Notices,’ and also several Schedules showing blank forms.)

## RESERVES.

**50.** The bank shall hold not less than forty per cent. of its cash reserves in Dominion notes; and every bank holding at any time a less amount of its cash reserves in Dominion notes than is prescribed by this section shall incur a penalty of five hundred dollars for each and every violation of the provisions of this section.

2. The Minister of Finance and Receiver General shall make such arrangements as are necessary for insuring the delivery of Dominion notes to any bank, in exchange for an equivalent amount of specie, at the several offices at which Dominion notes are redeemable, in the cities of Toronto, Montreal, Halifax, St. John, N. B., Winnipeg, Charlottetown and Victoria, respectively; and such notes shall be redeemable at the office for redemption of Dominion notes in the place where such specie is given in exchange.

## NOTE ISSUE.

**51.** The bank may issue and re-issue notes payable to bearer on demand and intended for circulation; but no such note shall be for a sum less than five dollars, or for any sum which is not a multiple of five dollars, and the total amount of such notes, in circulation at any time, shall not exceed the amount of the unimpaired paid-up capital of the bank:

2. Notwithstanding anything contained in the next preceding sub-section, the total amount of such notes in circulation at any time of La Banque du Peuple and the Bank of British North America respectively shall not exceed seventy-five per cent. of the unimpaired paid-up capital of such banks respectively, but each of such banks may issue such notes in excess of the said seventy-five per cent. upon depositing, with respect to such excess, with the minister of Finance and Receiver General, in cash or bonds of the Dominion of Canada, an amount equal to the excess; provided always that in no case shall the total amount of the notes of either of the said banks in circulation at any time exceed the unimpaired paid-up capital of such bank; and the cash or bonds so deposited shall be available by the Minister of Finance and Receiver General for the redemption of notes issued as aforesaid, in the event of the suspension of the said banks respectively:

3. If the total amount of the notes of the bank in circulation at any time exceeds the amount authorized by this section, the bank shall incur penalties as follows: If the amount of such excess is not over one thousand dollars, a penalty equal to the amount of such excess; if the amount of such excess is over one thousand dollars and is not over twenty thousand dollars, a penalty of one thousand dollars; if the amount of such excess is over twenty thousand dollars, and is not over one hundred thousand dollars, a penalty of ten thousand dollars; if the amount of such excess is over one hundred thousand dollars and is not over two hundred thousand dollars, a penalty of fifty thousand dollars; and if the amount of such excess is over two hundred thousand dollars, a penalty of one hundred thousand dollars:

4. All notes heretofore issued or re issued by the bank, and now in circulation, which are for a sum less than five dollars, or for a sum which is not a multiple of five dollars, shall be called in and cancelled as soon as practicable.

**52.** The bank shall not pledge, assign, or hypothecate its notes; and no advance or loan made on the security of the notes of a bank shall be recoverable from the bank or its assets:

2. Every person who, being the president, vice-president, director, principal partner *en commandite*, general manager, manager, cashier, or other officer of the bank, pledges, assign, or hypothecates, or authorizes, or is concerned in the pledge, assignment or hypothecation of the notes of the bank, and every person who accepts, receives or takes, or authorizes or is concerned in the acceptance or receipt or taking of such notes as a pledge, assignment or hypothecation, shall be liable to a fine of not less than four hundred dollars and not more than two thousand dollars, or to imprisonment for not more than two years, or to both:

3. Every person who, being the president, vice-president, director, principal partner *en commandite*, general manager, manager, cashier, or other officer of a bank, with intent to defraud, issues or delivers, or authorizes or is concerned in the issue or delivery of notes of the bank intended for circulation, and not in circulation,—and every person who, with knowledge of such intent, accepts, receives or takes, or authorizes or is concerned in the acceptance, receipt or taking of such notes,—shall be guilty of a misdemeanor, and liable to imprisonment for a term not exceeding seven years, or to a fine not exceeding two thousand dollars, or to both.

**53.** The payment of the notes issued or re-issued by the bank and intended for circulation, and then in circulation, together with any interest paid or payable thereon as hereinafter provided, shall be the first charge upon the assets of the bank in case of its insolvency; and the payment of any amount due to the Government of Canada, in trust or otherwise, shall be the second charge upon such assets; and the payment of any amount due to the government of any of the Provinces, in trust or otherwise, shall be the third charge upon such assets:

2. The amount of any penalties for which the bank is liable shall not form a charge upon the assets of such bank, in case of its insolvency, until all other liabilities are paid.

**54.** Every bank to which this Act applies, and which is carrying on its business at the time when this Act comes into force, shall, within fifteen days thereafter, pay to the Minister of Finance and Receiver General, a sum of money equal to two and one-half per cent. of the average amount of its notes in circulation during the twelve months next preceding the date of the coming into force of this Act, or if such bank has not been in operation for twelve months, a sum of money equal to two and one-half per cent. of the average amount of its notes in circulation during the time it has been in operation; and each bank shall, within fifteen days from and after the first day of July, in the year one thousand eight hundred and ninety-two, pay to the Minister of Finance and Receiver General such further sum of money as is necessary to make the total amount so paid by each bank to be a sum equal to five per cent. of the average amount of its notes in circulation during the twelve months next preceding the date last mentioned,—which sum shall be adjusted annually as hereinafter provided:

2. The Merchants' Bank of Prince Edward Island shall, on or before the day upon which it becomes subject to the provisions of this Act, pay to the Minister of Finance and Receiver General such sum as appears to the satisfaction of the Treasury Board to be equal to two and one-half per cent. of the average amount of its notes in circulation during the then preceding twelve months; and shall further pay to the Minister of Finance and Receiver General, within fifteen days from and after the first day of July in the year then next following, such further sum as is necessary to make the total sum paid by the said bank to be a sum equal to five per cent. of the average amount of its notes in circulation from the time the said bank became subject to the provisions of this Act to the first day of July,—which sum shall be adjusted annually as hereinafter provided:

3. The Minister of Finance and Receiver General shall, upon the issue of a certificate under this Act authorizing a bank to issue notes and commence the business of banking, retain out of any moneys of such bank then in his possession the sum of five thousand dollars,—which sum shall be held for the purposes of this section, until the annual adjustment hereunder takes place in the year then next following, at which time the amount at the credit of the bank shall be adjusted by payment to or by the bank of such sum as is necessary to make the amount at the credit of the bank to be a sum of money equal to five per cent. of the average amount of its notes in circulation from the time it commenced business to the time of such adjustment,—which sum shall be adjusted annually as hereinafter provided:

4. The amounts so paid, retained, and kept on deposit as aforesaid shall for a fund to be known as "The Bank Circulation Redemption Fund,"—which fund shall be held for the following purpose, and for no other, namely: In the event of the suspension by the bank of payment in specie or Dominion notes of any of its liabilities as they accrue, for the payment of the notes then issued or re-issued by such bank, and intended for circulation, and then in circulation, and interest thereon; and the Minister of Finance and Receiver General shall, with respect to all notes paid out of the said fund, have the same rights as any other holder of the notes of the bank:

5. The fund shall bear interest at the rate of three per cent. per annum, and it shall be adjusted, as soon as possible after the thirtieth day of June in each year, in such a way as to make the amount at the credit of each bank contributing thereto, unless herein otherwise specially provided, equal to five per cent. of the average note circulation of such bank during the next preceding twelve months:

6. The average note circulation of a bank during any period shall be determined from the average of the amount of its notes in circulation, as shown by the monthly returns for such period made by the bank to the Minister of Finance and Receiver General; and where, in any return, the greatest amount of notes in circulation at any time during the month is given, such amount shall, for the purposes of this section, be taken to be the amount for the notes of the bank in circulation during the month to which such return relates:

7. In the event of the suspension by the bank of payment in specie or Dominion notes of any of its liabilities as they accrue, the notes of such bank, issued or re-issued and intended for circulation, and then in circulation, shall bear interest at the rate of six per cent. per annum, from the day of such suspension to such day as is named by the directors, or by the liquidator, receiver, assignee or other proper official, for the payment thereof,—of which day notice shall be given by advertisement for at least three days in a newspaper published in the place in which the head office of the bank is situate; but in case any notes presented for payment on or after any day named for payment thereof are not paid, all notes then unpaid and in circulation shall continue to bear interest to such further day as is named for payment thereof,—of which day notice shall be given in manner above provided: Provided always, that in case of failure on the part of the directors of the bank, or of the liquidator, receiver, assignee or other proper official, to make arrangements within two months from the day of suspension of payment by the bank as aforesaid for the payment of all of its notes and interest thereon, the Minister of Finance and Receiver General may thereupon make arrangements for the payment of the notes remaining unpaid, and all interest thereon, out of the said fund, and shall give such notice of such payment as he thinks expedient, and on the day named by him for such payment all interest on such notes shall cease, anything herein contained to the contrary notwithstanding; but nothing herein contained shall be construed to impose any liability on the Government of Canada or on the Minister of Finance and Receiver General beyond the amount available from time to time out of the said fund:

8. All payments made from the said fund shall be without regard to the amount contributed thereto by the bank in respect of whose notes the payments are made; and in case the payments from the fund exceed the amount contributed by such bank to the fund, and all interest due or accruing due to such bank thereon, the other banks shall, on demand, make good to the fund the amount of such excess, *pro rata* to the amount which each bank has at that time contributed to the fund; and all amounts recovered and received by the Minister of Finance and Receiver General from the bank on whose account such payments were made shall, after the amount of such excess has been made good as aforesaid, be distributed among the banks contributing to make good such excess *pro rata* to the amount contributed by each: Provided always, that each of such other banks shall only be called upon to make good to the said fund its share of such excess, in payments not exceeding in any one year one per cent. of the average amount of its notes in circulation,—such circulation to be ascertained in such manner as the Minister of Finance and Receiver General decides; and his decision shall be final:

9. In the event of the winding up of the business of a bank by reason of insolvency or otherwise, the Treasury Board may, on the application of the directors, or of the liquidator, receiver, assignee or other proper official, and on being satisfied that proper arrangements have been made for the payment of the notes of the bank and any interest thereon, pay over to such directors, liquidator, receiver, assignee or other proper official, the amount at the credit of the bank, or such portion thereof as it thinks expedient:

10. The Treasury Board may make all such rules and regulations as it thinks expedient with reference to the payment of any moneys out of the said fund, and the manner, place and time of such payments, the collection of all amounts due to the said fund, all accounts to be kept in connection therewith, and generally the management of the said fund and all matters relating thereto:

11. The Minister of Finance and Receiver General may, in his official name, by action in the Exchequer Court of Canada enforce payment (with costs of action) of any sum due and payable by any bank under the provisions of this section.

**55.** The bank shall make such arrangements as are necessary to ensure the circulation at par in any and every part of Canada of all notes issued or re-issued by it and intended for circulation; and towards this purpose the bank shall establish agencies for the redemption and payment of its notes at the cities of Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg and Victoria, and at such other places as are, from time to time, designated by the Treasury Board.

**56.** The bank shall always receive in payment its own notes at par at any of its offices, and whether they are made payable there or not:

2. The chief place of business of the bank shall always be one of the places at which its notes are made payable.

**57.** The bank, when making any payment, shall, on the request of the person to whom the payment is to be made, pay the same, or such part thereof, not exceeding one hundred dollars, as such person requests, in Dominion notes for one, two or four dollars each, at the option of such person: Provided always, that no payment, whether in Dominion notes or bank notes, shall be made in bills that are torn or partially defaced by excessive handling.

(To be continued.)

## Counterfeits of \$1 National Bank Bills.

### DESCRIPTION OF GENUINE BILL.

**FACE OF NOTE.**—Centre: Two females standing in front of an Altar, one of them pointing upward. Right end: 1. Left end: Large ornamental, 1 across, on which is "Secured, &c."

**BACK OF NOTE.**—Centre: Landing of Pilgrims. Right end: ONE, eagle and shield in an oval, ONE. Left end: ONE, Arms of the State in which the bank is located, ONE.

The Treasury number of each One Dollar National Bank Bill is at the left end of the face, the Bank's number at the upper right-hand corner, and the charter number, if any, is in larger figures across the left end and lengthwise at the right end.

### Description of Counterfeits of \$1 National Bank Bills.

State.	City.	Bank.	Check Letter.	Date or Series.	Charter No. of Genuine.
MASS.	Boston.	National Eagle Bank.....	A....	Series of 1875....	993
John Allison, Register; A. U. Wyman, Treasurer.					
Treasury No. 211,944. Bank No. 3,840. Old process photograph. This photograph is the only counterfeit of the One Dollar Bills of the National Banks. Having been done on good paper, the black work fairly reproduced, though the red numbering is inferior, it is in some respects the best early photographic counterfeit, but it was blurred in spots and off color. See "Photographs" as per Index.					

## Counterfeits of \$2 National Bank Bills.

### DESCRIPTION OF GENUINE BILL.

**FACE OF NOTE.**—Centre: Elongated 2 extending two-thirds the length of note and "United States, etc.," on upper part of the 2. Right end: 2 on lower part of the elongated 2. Left end: Female seated holding the American flag, on which is a wreath.

**BACK OF NOTE.**—Centre: Sir Walter Raleigh smoking, six men and boy grouped around a table. Right end: 2, eagle and shield in an oval. Left end: 2, Arms of the State in which the bank is located.

The Treasury number of each Two Dollar National Bank Bill is at the lower left-hand corner of the face, the Bank's number at the upper right-hand corner, and the charter number, if any, is in larger figures across the left end and lengthwise at the right end.

### \$2 SPECIAL POINTS.

State.	City.	Bank.	Check Letter.	Date or Series.	Charter No. of Genuine.
N. Y.	Kinderhook.	Nat. Union Bank.....	A....	July 1, 1865..	929
On the genuine the check letter A at the left of note, near the vignette, has one flourish under it; on the counterfeit there are two flourishes under the check-letter.					
"	Linderpark.	Nat. Union Bank.—(No such bank.)			
"	N. Y. City.	Market Nat'l Bank.....	A....	July 1, 1865..	964
In the genuine issue, over the letters AR of the title MARKET appear three flourishes. In the counterfeit there is only one.					
"	N. Y. City.	Marine National Bank.....	A....	July 1, 1865..	1215
In the genuine note the black panel under the title reads CITY OF NEW YORK; in the counterfeit it simply reads NEW YORK, the CITY OF being entirely omitted from the panel.					
"	N. Y. City.	Ninth Nat. Bank.....	A....	July 1, 1865..	387
and Jan. 2, 1865.					
In the counterfeit THE after OF in the title is omitted. In the genuine, under BANK, appear two flourishes; in the counterfeit there are none.					
"	N. Y. City.	Saint Nicholas Nat'l Bank....	A....	July 1, 1865..	972
In the genuine, NEW YORK over the date of July 1st, 1865, is engraved in italic, sometimes called stump letters; in the counterfeit the NEW YORK is engraved in script.					
"	Peekskill.	Westchester Co. Nat. Bank..	A....	Aug. 15, 1865..	1423
This bank has two bills, check-letters A and B; check-letter A counterfeited. In the counterfeit, under the left check-letter A, there are two flourishes, in the genuine but one.					
PA.	Philadelphia	Sixth National Bank.....	A....	July 1, 1865..	352
No bills from this plate found in circulation.					
R. I.	Newport.	National Bank of R. I.....	A....	Nov. 1, 1865..	1532
The counterfeits on this issue are very inferior and printed from stone. The imprint, "National Bank Note Co., New York," and other small lettering, is hardly legible the letters are so poorly formed, with no approximation to the original work.					

# Counterfeits of \$5 National Bank Bills.

## DESCRIPTION OF GENUINE BILL.

**FACE OF NOTE.** Centre; United States and Title of Bank. Right end; 5, Columbus introducing America to Europe, Asia and Africa, the countries represented by females. Left end; FIVE, Columbus discovering America.

**BACK OF NOTE.** Centre; Landing of Columbus. Right end; FIVE, spread eagle, 5. Left end; FIVE, arms of the State in which the bank is located, 5. Ends and border printed in green.

Change made in bills of new design, series of 1882.

**FACE OF NOTE.** Right end; 5. Left end; vignette portrait of Garfield. Border; all changed.

**BACK OF NOTE.** Centre; brown lathe-work, having in its centre the charter number in large figures set in green lathe-work. Rest of back all printed in brown.

The Treasury number of each Five Dollar National Bank Bill is at the upper right-hand corner of the face, the Bank's number at the lower left-hand corner, and the charter number is in larger figures across the left end and lengthwise at the right end. With bills of new design, series of 1882, the charter number is also in several places in the border, on the face, and in large figures in centre of back.

## Description of Counterfeits of \$5 National Bank Bills.

### \$5 GENERAL POINTS.

**Boyd plates.** The counterfeit \$5 Bills of National Banks in Illinois were printed from one series of plates engraved by Ben Boyd, and captured by the Secret Service, October 29th, 1875. All this issue of counterfeits may be instantly detected by comparison of the lower right corner of the back of the same with the genuine. On the genuine the vertical line dividing the vignette from the coat of arms, if continued downwards, would pass through one of the little figures "5" in the lower margin. In the counterfeit the same line would pass between two of the figures, thus:—

The adjoining cut is published by special permission of Chas. J. Folger, Secretary of the Treasury, given under date of December 14, 1882.

GENUINE PLATE—DOUBLE SIZE.

COUNTERFEIT (BOYD PLATE)—DOUBLE SIZE.

The adjoining cut is published by special permission of Chas. J. Folger, Secretary of the Treasury, given under date of December 14, 1882.

**White plates.** The counterfeit \$5 Bills of National Banks in Massachusetts were (excepting the photographs), all printed from one series of plates engraved by Irvine White, in 1875-6, and captured by the Secret Service, June 26, 1876. All this issue of counterfeits may be instantly detected by comparison of the lower left face of same with the genuine. On the genuine the vignette of Columbus discovering America on left end of bill is well engraved and complete. In the counterfeit the same is imperfect, notably the end of the ship's rail on which a sailor is leaning shows no mark of a joint where it rests upon the upright stanchion, and the vertical line between the stanchion and knee is indistinct. Also on the back of genuine bill, at lower left-hand corner, two vertical lines divide the State coat of arms from the large center vignette, and the line nearest the vignette, if continued downwards, would pass through the middle of one of the little figures "5" in the lower margin; but on the counterfeit it would not quite touch the little "5."

**Ulrich plates.** The counterfeit \$5 Bills of National Banks in Pennsylvania were printed from one series of plates engraved by Chas. F. Ulrich, the same being afterwards used with extra "title lines" to print counterfeits of the same denomination of bills on The National Bank of Pawling, Pawling, New York, and The National State Bank of Troy, Troy, New York, and captured by the Secret Service, April 1, 1880. All this issue of counterfeits may be instantly detected by comparison of portions of vignette at right end of bill and of work at left upper corner of bill with genuine. On genuine, vignette at right end of bill, the moustache of the male figure Columbus curls downward before the ends turn upwards. In counterfeit, as printed, the moustache stands out straight right and left from the upper lip as if waxed. On genuine, in work at left upper corner of bill, letter "F" in word "Five" touches the small ornament in the corner of border of bill. In counterfeit it does not by about the sixteenth of an inch.

**Unknown plates.** The counterfeit \$5 Bills of The Manufacturers' National Bank of Amsterdam, New York, and The Fort Stanwix National Bank of Rome, New York, were both printed from one series of plates engraved by some unknown artist, and not as yet captured. All this issue of counterfeits may be instantly detected by comparison of the general style of engraving and of portions of vignettes with genuine. In counterfeit, the appearance of the bill is fair and the expression of the same as a whole deceptive; but when closely examined the engraving is found defective in many small details and poorly finished. On genuine, in vignette at left end of bill, the distance from edge of sail to where stay ropes are made fast upon the yard-arm is two-sixteenths of an inch, and thence to the point of the yard-arm two-sixteenths of an inch. In counterfeit, the point where stay ropes are made fast upon the yard-arm is three-sixteenths of an inch from edge of sail, and upon the plate for the same, as first engraved, was at the end of the yard-arm. Subsequently the plate was retouched and the point of the yard-arm merely extended three-sixteenths of an inch, making the yard-arm in counterfeit two-sixteenths of an inch longer than on genuine.

On genuine, vignette, back of note, the line of the horizon is distinct above the head of the central figure Columbus. In counterfeit the line of the horizon falls to appear, or is shown on a level with the crown of the head of Columbus.

## Counterfeits of \$10 National Bank Bills.

### DESCRIPTION OF GENUINE BILL.

**FACE OF NOTE.**—United States and Title of Bank—10, half-nude female seated on spread eagle in clouds—TEN, Franklin drawing lightning from the clouds with a kite, boy seated.

**BACK OF NOTE.**—De Soto discovering the Mississippi—10, spread eagle 10—10, Arms of the State in which the bank is located—10.

The Treasury number of each Ten Dollar National Bank Bill is at the upper right hand corner of the face, the Bank's number at the lower left-hand corner, and (unless on bills of new design of 1882) the charter number is in larger figures across the left end and lengthwise at the right end.

**\$10 GENERAL POINTS.**

The counterfeits of the Ten Dollar Bills of National Banks in Indiana, were printed from one series of plates engraved by Miles Ogle, and captured by the Secret Service, January 7th, 1877. The engraving is coarse, especially in vignette, lower left corner face of bill. All yet seen bear Bank Number 1496, Treasury Number, B 165,167. On counterfeit, in border, upper left end of bill, the word "Currency" is lettered in reverse and appears to be spelt backwards.

The counterfeits of the Ten Dollar Bills of National Banks in Pennsylvania, were printed from one series of plates engraved by Nat. Kinsey, and captured by the Secret Service, September 26th, 1867. On counterfeit the post in vignette, lower left corner, was made perfect or plain; the genuine at  $\frac{1}{4}$  inch from the ground shows a knot hole or nick. This issue bears no Charter number.

The counterfeits of the Ten Dollar Bills of National Banks in New York, were printed from various original plates, or from electrotypes of the same, all of which have been captured by the Secret Service, in different portions, part August 1st, 1866, and the rest at several subsequent dates. The engraving upon these plates is from fair to good, yet similar defects are to be observed in all. The lathe-work is irregular, as may be seen in the counters "10" on right upper corner face of bills, where the small heart-shaped centers are variable and the work incomplete. The title lines of various banks used with these plates are generally shaded in an irregular and faulty manner and the details of engraving in vignettes imperfect. On the counterfeit in the counter "TEN," left hand upper corner of bills, the heavy white line formed in the lathe-work just above the "TEN" is continuous, and merely touches the top of "E." On the genuine the same line is disconnected above "E," and the ends turn down and enter the top of "E" at points about one-sixteenth of an inch apart. On the counterfeit in vignette, lower left corner face of bills, the post was made perfect or plain; the genuine shows a knot hole, or nick on the corner of the same, one-fourth of the length of the post from the ground.

**\$10 SPECIAL POINTS.**

Note “General Points” already given. Lettering and shading of title lines imperfect, being darker than genuine. In the word PHILADELPHIA (directly under the words Register of the Treasury) the capital letter “P” extends below the base line of the other letters. On the genuine the letters are all in line at the bottom.
- VT.** *Barre. Nat'l Bank of Barre*. Stolen. Red pointed Seal....2109  
Ten Dollar Bills of this bank, bearing bank numbers from 911 to 936, inclusive, and Treasury numbers from 932,805 to 932,830, inclusive, were stolen from the bank unsigned; signatures forged, and the bills put in circulation. The bank claims exemption from payment on account of these bills, upon authority of the decisions of the law officers of the U. S. Treasury Department.

# Counterfeits of \$20 National Bank Bills.

## DESCRIPTION OF GENUINE BILL.

**FACE OF NOTE.**—United States and Title of Bank—20, allegorical representation of Loyalty, Liberty bearing national flag, farmers, artisans, etc., rallying around the flag—20, Battle of Lexington.

**BACK OF NOTE.**—Baptism of Pocahontas—20, eagle and shield XX—20, arms of the State in which the Bank is located—XX.

The Treasury number of each Twenty Dollar National Bank Bill is at the upper right-hand corner of the face, the Bank's number at the lower left-hand corner, and (unless on bills of new design of 1882) the charter number is in larger figures across the left end and lengthwise at the right end.

## Description of Counterfeits of \$20 Nat'l Bank Bills.

### \$20 GENERAL POINTS.

The counterfeits of the Twenty Dollar Bills of National Banks in the State of New York, are all from one series of plates, the issue having been varied by the use of skeletons and extra title lines to imitate the bills of eight different banks, until October, 1870, when all the plates were captured by the Secret Service.

In the vignette, lower right corner, face of bill, appears the goddess of Liberty rallying the people. Over her head LOYALTY is inscribed. On the genuine, the inscription is legible and clear, but on the counterfeit, hardly to be seen. On genuine, the details of the figure of the goddess are plain, but on the counterfeit the smaller points are very indistinct or not to be seen, and the toes are missing. The features of the figures around the goddess are very much blurred, and the general expression of the faces wild and unnatural. On the back of the counterfeit, the lathe-work is irregular and defective.

The counterfeits of the Twenty Dollar Bills of National Banks in the States of Connecticut, Indiana and Pennsylvania, one bank in each State, are all from one series of plates captured by the Secret Service, May 7, 1867. The engraving of these plates was coarse, and the bills from them are dark and blurred. The foliage to the right of figures "20," upper left end of counterfeit, is coarse, bunched and heavy; on the genuine, it presents a soft, vapory appearance. On counterfeit, in vignette of battle of Lexington, lower left corner, face of bill, the musket lying on the ground appears to be thrust through the leg of the fallen man, and the features of the kneeling woman are defective, the eyes mere dots. On the back of counterfeit, the lathe-work is very coarse, scratchy and irregular, and the details of the other work incomplete.

The bank claims exemption from payment on account of these bills, upon the authority of the decisions of the law officers of the U. S. Treasury Department.		

Counterfeits of \$50 National Bank Bills.

**DESCRIPTION OF GENUINE BILL.**

**FACE OF NOTE.**—United States and Title of Bank—50, allegorical representation of Victory: three figures in a cloud, soldier kneeling, praying for victory—50, Washington crossing the Delaware.

**BACK OF NOTE.**—Embarkation of the Pilgrims—50, arms of the State in which the Bank is located, L.

The Treasury number of each Fifty Dollar National Bank Bill is at the upper right-hand corner of the face, the Bank's number at the lower left-hand corner, and (unless on bills of new design of 1882) the charter number, if any, is only in larger figures across the left end and lengthwise at the right end.

**\$50 GENERAL POINTS.***Applying to ALL the Counterfeit 50's.*

On the counterfeit, in the vignette, upper right end corner face of bill, the uplifted arm of the central figure representing "VICTORY" ends in a stump without a hand at the bottom of the shading of the large figure "5" in "50," while on the genuine the thumb and fingers are defined. On the counterfeit, in the vignette, lower right end corner face of bill, the end half of the extra long finger of the right hand of the praying soldier is made to point downward to his right foot. On the genuine the finger being bent more, the same points toward his left foot.

On the back of counterfeit, in the coat of arms of the State of New York, left end center of bill, the bandage crosses the forehead of the figure of justice, leaving the eyes exposed and open. On the genuine the eyes are hidden by the bandage which covers them.

GENUINE PLATE—DOUBLE SIZE.

The cut to the left is published by special permission of Chas. J. Folger, Secretary of the Treasury, given under date of June 6, 1883.

The cut to the right is published by special permission of Chas. J. Folger, Secretary of the Treasury, given under date of June 6, 1883.

COUNTERFEIT (ULRICH PLATE)—DOUBLE SIZE

The counterfeits of the Fifty Dollar National Bank Bills, of banks in the State of New York include all as yet issued, and were produced from one series of plates made by Charles F. Ulrich, and captured by the Secret Service in April, 1880. The original plate was an imitation of the bills of the Central National Bank of New York City. The title line was changed to the Third National Bank, Buffalo, New York; the National Broadway Bank, New York City; and the Tradesmen's National Bank, New York City. By various alterations of the bills printed in imitation of those of the banks above named, several other spurious issues have been made to appear, as may be noted in the list of counterfeits on which "Special Points" are given hereafter. The lathe-work on this series of plates was very well done; the best result being obtained at the corners and on the back of the bills.

**\$50 SPECIAL POINTS.**

State.	City.	Bank.	Check Letter.	Date or Series.
MASS.	LYNN.	NAT'L CITY BANK.		Stolen.
		The Fifty Dollar Bills of this bank, bearing bank numbers from 121 to 150, inclusive, and Treasury numbers from 66,796 to 66,825, inclusive, were stolen from the Treasury Department at Washington unsigned; signatures forged, and the bills put in circulation. The bank claims exemption from payment on account of these bills, upon the authority of the decisions of the law officers of the U. S. Treasury Department.		
N. J.	JERSEY CITY.	FIRST NAT'L BANK.		Stolen.
		The Fifty Dollar Bills of this bank, bearing bank numbers from 671 to 750, inclusive, and Treasury numbers from 19,609 to 19,688, inclusive, were stolen from the Treasury Department at Washington unsigned; signatures forged, and the bills put in circulation. The bank claims exemption from payment on account of these bills, upon the authority of the decisions of the law officers of the U. S. Treasury Department.		
N. Y.	BUFFALO.	THIRD NAT'L BANK.	A	March 10, 1865.
		The Charter Number, if any, is 850; the counterfeit bears various figures as charter numbers. None genuine bearing other charter number than 850. None genuine signed "L. E. Chittenden, Register of the Treasury."		
"	NEW YORK CITY.	CENTRAL NAT'L BANK.	A	April 15, 1864.
		The Charter Number of this bank is 376; the counterfeits bear various figures as charter numbers. None genuine bearing other charter number than 376. None genuine, signed "L. E. Chittenden, Register of the Treasury," and having the imprint, "Printed at the Bureau of Engraving and Printing, U. S. Treasury Dep't," in the upper left-hand corner of the bill.		
"	NEW YORK CITY.	MECHANICS' NAT. BANK.	A	April 20, 1865.
		The charter number of this bank is 1250. Imitations of its fifty dollar notes have been made by erasing the title "Tradesmen's National Bank" from counterfeit bills and working in the name of this bank. Such altered counterfeits bear the charter number 905. None genuine bearing other charter number than 1250. Note "General Points" already given.		
N. Y. CITY.	METROPOLITAN NAT'L BANK.		A and C	January 10, 1865.
		The charter number of this bank is 1121. Imitations of its fifty dollar bills have been made by erasing the titles "National Broadway Bank" and "Tradesmen's National Bank" from counterfeit bills and working in the name of this bank. Such altered counterfeits bear respectively charter numbers 687 or 905. None genuine bearing other charter number than 1121. Note "General Points" as already given.		

*\$50 Special Points continued.*

<i>State.</i>	<i>City.</i>	<i>Bank.</i>	<i>Check Letter.</i>	<i>Date or Series.</i>
N. Y.	N. Y. CITY.	NAT'L BANK OF COMMERCE.	A and C	January 10, 1865. The Charter number of this bank is 733. Imitations of its fifty dollar bills have been made by erasing the title, "National Broadway Bank," from a counterfeit bill and working in the name of this bank. Such altered counterfeits bear the Charter Number 687, and the names of "J. L. Everett, Cashier," and "F. L. Palmer, President." The genuine titles of this bank bear only the Check Letter A. None genuine bearing other Charter Number than 733. Refuse all dated Jan. 10, 1865.
"	N. Y. CITY.	NAT'L BROADWAY BANK.	A and C	January 10, 1865. The genuine fifty dollar bills of this bank all bear the Check Letter A. The plates from which the counterfeits on this bank were printed, are the same as had been used to print the \$50 notes on the Central National Bank, of New York City, and the Third National Bank, of Buffalo, New York, with this exception: the imprint, "Printed at the Bureau of Engraving and Printing," which appeared on the two notes last mentioned, was omitted in printing the counterfeit on the Broadway Bank, of New York City. The date was also changed to correspond with the genuine issue of the Broadway Bank. These counterfeits bear the true Charter Number of this bank, 687. Note "General Points" already given.
"	N. Y. CITY.	TRADESMEN'S NAT'L BANK.	A and D	April 20, 1865. The genuine fifty dollar bills of this bank all bear the Check Letter A. The plates used in printing the counterfeit notes on the Tradesmen's National Bank, are the same we have described in "Special Points" on the National Broadway Bank. The date was changed to correspond with the genuine issue of the Tradesmen's Bank. These counterfeits bear the true Charter Number of this bank, 905. Note "General Points" already given.
"	NEW YORK CITY.	UNION NAT. BANK.	A	April 15, 1864. The charter number of this bank is 1278. Imitations of its fifty dollar bills have been made by erasing the title "Central National Bank" from counterfeit bills and working in the name of this bank. None genuine bearing other charter number than 1278. None genuine signed "L. E. Chittenden, Register of the Treasury." Refuse all dated April 15, 1864.

## Counterfeits of \$100 National Bank Bills.

### DESCRIPTION OF GENUINE BILL.

**FACE OF NOTE.**—United States and Title of Bank—100 C female seated with wings, allegorical representation, maintenance of Liberty and Nationality—C, 100, men in row boat, two vessels in back.

**BACK OF NOTE.**—Signing Declaration of Independence—100, eagle in oval, C—100, arms of the State in which the Bank is located, C.

The Treasury number of each One Hundred Dollar National Bank Bill is at the upper right-end corner of the face, the Bank's number at the lower left-hand corner, and (unless on bills of new design of 1882) the charter number is in larger figures across the left end and lengthwise at the right end.

*Description of Counterfeit \$100 National Bank Bills.***\$100 GENERAL POINTS***APPLYING TO ALL THE COUNTERFEIT 100's FROM THE*

**SMITH PLATES**—On the face of genuine bills, at the right upper corner the space between the edge of the wing of the Goddess of Liberty and the shading of the C is about the 16th of an inch. On all these Smith Plate counterfeits the distance between the edge of the wing and the shading of the C is but about half the distance, or the thirty-second of an inch.

On the genuine bills the sailor, standing in the bow of the boat, has a fair face with a partly opened mouth; but on all these Smith Plate counterfeit bills the same man has a very widely opened mouth, and eyes of large black dots resembling the eye-holes of a skeleton head.

GENUINE PLATE—DOUBLE SIZE.

The cut to the left is published by special permission of Chas. J. Folger, Secretary of the Treasury, given under date of April 10, 1883.

The cut to the right is published by special permission of Chas. J. Folger, Secretary of the Treasury, given under date of April 10, 1883.

COUNTERFEIT (SMITH PLATE)—DOUBLE SIZE.

On the back of the genuine bills, in the upper lettered panel, on the third line, right, the words OTHER DEBTS are properly spaced. In the counterfeit the R in OTHER joins the D in DEBTS, and the D is raised above the top of the other letters preceding.

The counterfeits of the Hundred Dollar Bills of The National Exchange Bank of Baltimore, Maryland, The Merchant's National Bank of New Bedford, Massachusetts, The National Revere Bank of Boston, Massachusetts, The Pittsfield National Bank of Pittsfield, Massachusetts, The Second National Bank of Wilkesbarre, Pennsylvania, and The Pittsburgh National Bank of Commerce, of Pittsburgh, Pa., were all printed from one series of plates, which were engraved in Brooklyn, N. Y., by Charles H. Smith, for William E. Brockway, by whom they were surrendered to the Secret Service, November 25th, 1880.

**\$100 GENERAL POINTS***APPLYING TO ALL THE COUNTERFEIT 100's FROM THE*

**ULRICH PLATES**—On the face of all genuine bills, in right lower corner of bill under the hand of the Goddess of Liberty, and in a sun-burst, appears the word MAINTAIN. On all these Ulrich plate counterfeits the same read MAINIAIN, the top cross of the "T" being omitted. This defect is generally mended by reprint, pen or pencil, but not so as to deceive close observers.

On the genuine bills the sailor, standing in the bow of the boat, has a medium-sized head and face with a partly opened mouth; but on all these Ulrich Plate counterfeits the same man has a large broad head and face, a closed mouth, and a broad full forehead.

On the back of the genuine bills, the lettering of the several panels is properly punctuated. In the counterfeit in the lower panel containing a quotation from the law against counterfeiting, on second line, after the word IT a comma is omitted, also after the word PRINTED on the fourth line in same panel.

The counterfeits of the Hundred Dollar Bills of The First National Bank of Boston, Mass., The Central National Bank of the City of New York and The Ohio National Bank of Cincinnati, State of Ohio, were all printed from one series of plates, which were engraved by Charles F. Ulrich in 1886 and captured by the Secret Service near Cincinnati, Ohio, March 14, 1887.

## \$100 SPECIA POINTS.

- | State. | City.        | Bank.   | Check Letter. | Date or Series. |
|--------|--------------|---|---------------|-----------------|
| MASS.  | BOSTON.      | FIRST NATIONAL BANK.<br>L. E. Chittenden, Register; F. E. Spinner, Treasurer.<br>On genuine, under large panel BOSTON, each side of "Will Pay" appear two flourishes (four in all). In counterfeit the same are omitted. On genuine the various inscriptions are properly punctuated. In counterfeit the comma after Boston engraved in script, is omitted, also the period after the abbreviation "Feb y" in date. See genuine points, Ulrich plates.  | A             | Feb. 2, 1864.   |
| "      | BOSTON.      | NATIONAL REVERE BANK.<br>S. B. Colby, Register; F. E. Spinner, Treasurer; H. Blasdate, Cash'r; Sam'l H. Walley, Pres't.<br>On the genuine hundreds of this bank the N of NATIONAL CURRENCY, upper center of bill, touches the scroll ornament of the left top border. In the counterfeit the same does not reach the scroll by one-sixteenth of an inch. See general points, Smith plates.  | A             | July 20, 1865.  |
| "      | LYNN.        | NATIONAL CITY BANK.<br>The Hundred Dollar Bills of this bank, bearing bank numbers from 121 to 150, inclusive, and Treasury numbers from 66,796 to 66,825, inclusive, were stolen from the Treasury Department at Washington unsigned; signatures forged, and the bills put in circulation. The bank claims exemption from payment on account of these bills, upon the authority of the decisions of the law officers of the U. S. Treasury.  |               | Stolen.         |
| "      | NEW BEDFORD. | MERCHANTS' NAT. BANK.<br>S. B. Colby, Register; F. E. Spinner, Treasurer; P. C. Howland, Cashier; C. R. Tucker, President.<br>On the genuine the hair line under the President's name, if extended, would pass just above the top of the period under the "r" in Cash'r. In the counterfeit the same line would strike the middle of the letter "r" in Cash'r. On the genuine the ground-work of the vignette in lower right corner of bill does not reach the end border by one-sixteenth of an inch. In the counterfeit the ground-work of the same vignette extends to within a hair's breadth of the end border. See general points, Smith plates.        | A             | Feb. 14, 1865.  |
| "      | PITTSFIELD.  | PITTSFIELD NAT. BANK.<br>S. B. Colby, Register; F. E. Spinner, Treasurer; E. S. Francis, Cashier; John V. Barker, Vice-President. Signatures of bank officers printed in different colored inks, as if written.<br>On the genuine hundreds of this bank the lower loop of the S in the signature of S. B. Colby touches the yard-arm and the sail of the frigate Niagara. In the counterfeit the same loop clears the sail of the vessel by one-sixteenth of an inch. See general points, Smith plates.   | A             | July 20, 1865.  |
| MD.    | BALTIMORE.   | NAT. EXCHANGE BANK.<br>S. B. Colby, Register; F. E. Spinner, Treasurer.<br>On the genuine the small heart-shaped figure at the left end of the panel BALTIMORE in title shows seven lines. In the counterfeit the same shows eight lines. On the genuine the hair line for writing the Cashier's signature almost touches the O of Cashier. On the counterfeit the hair line does not reach the C by one-sixteenth of an inch. See general points, Smith plates.  | A             | July 1, 1865.   |
| N. J.  | JERSEY CITY. | FIRST NAT'L BANK.<br>The Hundred Dollar Bills of this bank, bearing Bank numbers from 671 to 750 inclusive and Treasury numbers from 19,609 to 19,688 inclusive, were stolen from the Treasury Department at Washington, unsigned, signatures forged, and the bills put in circulation. The bank claims exemption from payment on account of these bills upon authority of the decisions of the law officers of the U. S. Treasury Department.  |               | Stolen.         |
| N. Y.  | N. Y. CITY.  | CENTRAL NAT'L BANK.<br>L. E. Chittenden, Register; F. E. Spinner, Treasurer.<br>On the genuine, under the panel CITY OF NEW YORK, appear four flourishes. In the counterfeit the same are omitted. See general points, Ulrich plates.   | A             | April 15, 1864. |
| OHIO.  | CINCINNATI.  | OHIO NATIONAL BANK.<br>L. E. Chittenden, Register; F. E. Spinner, Treasurer.<br>On the genuine the outer white line extending the length of the panel enclosing CINCINNATI is of the same width as the white parallel lines running through the body of the panel. In the counterfeit the white line around the panel is broader than those through the body of the panel. See general points, Ulrich plates.   | A             | Dec. 22, 1864.  |
| PENK.  | PITTSBURGH.  | PITTSB'G NAT. BK. OF COMMERCE.<br>John Al son, Register; Jno. C. New, Treasurer; Joseph H. Hill, Cash'r; Alfred Patterson, Pres't.<br>On the genuine the signatures of the officers of the bank are written. On the counterfeit the name of the Cashier is printed and that of the President written. The genuine is printed on Government localized fibre paper, a very close imitation of which is used in making the counterfeit, but the fibre in the same is not so widely distributed as in the genuine, is tender, and cannot be picked out unbroken. Numbering nearly perfect. Color of figures and seal excellent. See general points, Smith plates. | A             | Series of 1875. |
| "      | WILKESBARRE. | SECOND NATIONAL BANK.<br>L. E. Chittenden, Register; F. E. Spinner, Treasurer; E. A. Spalding, Cash'r; Abram Nesbitt, Vice-President.<br>On the genuine the names of the officers of the bank are written. On the counterfeit the same are printed. See general points, Smith plates.   | A             | Nov. 2, 1863.   |

Beware of United States Treasury Notes, or imitations of the same, of the series, denomination, and check letter given in the preceding table; they are counterfeited or counterfeits. Both the genuine and counterfeit notes of dates of 1862 and 1863 are signed L. E. Chittenden, Register, and F. E. Spinner, Treasurer; and those of Series of 1869 are signed John Allison, Register, and F. E. Spinner, Treasurer.

United States Treasury Notes are printed four on a sheet and lettered respectively, A, B, C, or D. Each Note also bears a Treasury number—one of a series. On notes lettered A, this will be 1, or a number divided by four leaves one remainder; on notes lettered B, it is 2, or a number divided by four leaves two remainder; on notes lettered C, it is 3, or a number divided by four leaves three remainder; on notes lettered D, it is 4, or a number divided by four leaves no remainder.

Divide the number by four; if the result differs from the foregoing, the note is counterfeit. If the results agree, the note may be counterfeit nevertheless, and reference must be made in such a case to the following:

## Descriptive List of Counterfeits of U. S. Notes. ONES.

**\$1 B C D.** Dated August 1, 1862; Act of July 11th, 1862. Two similar counterfeits, both poor. Engraving coarse. Vignette head of Chase very badly done, the mouth crooked, the eyes blurred, and the expression unnatural. Numbering irregular and off color. Imprint of Bank Note Company very imperfect. The ones in circles in the top and bottom border of note almost illegible. The lathe-work quite defective. Receivable in payment of all loans. Plates captured.

**\$1 D.** Series of 1875. Act of March 3, 1863. John Allison, Register; A. U. Wyman, Treasurer. A poor counterfeit, but of passable appearance at a distance, or in a poor light. Engraving coarse, lines broken and uneven. Vignette of head of Washington very badly done. Lettering imperfect. Numbering very irregular. On the back an attempt has been made to imitate fibre by printing. In the inscription on the back, a number of words are mis-spelt. Specimens of this counterfeit seen have been an eighth of an inch longer than the genuine.

## TWOS.

**\$2 A B C D.** Dated August 1, 1862; Act of July 11, 1862. A poor counterfeit. Engraving coarse. Vignette head of Hamilton very badly done. Shading of large letters in United States badly engraved. Lettering uneven. Imprint of National Bank Note Company almost illegible. Lathe-work defective, lines indistinct. Receivable in payment of all loans. Lithograph. Materials captured.

**\$2 D.** Series of 1875. Act of March 3, 1863. Treasury number, 8347504. John Allison, Register; A. U. Wyman, Treasurer. A poor counterfeit, printed on plain paper by the old photographic process. See page 20.

**\$2 D.** Series of 1880. B. K. Bruce, Register; A. U. Wyman, Treasurer. A poor counterfeit, and seems to be the product of a wood cut. The picture of the Capitol in centre of note is a mere outline of the same. Numbering fair, lettering in border and back poor. Legal Tender on back reads Legal Lender in counterfeit. Paper soft and dark. This counterfeit first appeared March, 1886.

## FIVES.

**\$5 A.** Dated March 10, 1862; Act of February 25, 1862. Series 90. Convertible note. The best of the counterfeits of the five dollar Treasury Notes of 1862 and 1863. Engraving coarse, but the vignette head of Hamilton presents a fair expression. The lathe-work around the large figure 5, in right upper corner of note, is defective. Lathe-work on back of note also faulty. Plates captured.

**\$5 A.** Dated March 10, 1863; Act of February 25, 1862. Series 114. Convertible note. A poor counterfeit. All genuine notes dated March 10, 1863, are non-convertible.

**\$5 A D.** Dated March 10, 1863; Act of March 3, 1863. New series, and new series 70. Inferior counterfeits. The engraving on the face of the notes is very coarse; vignette statue of Liberty, left end of notes, looks like a cheap wood engraving. Vignette head of Hamilton, right end of notes, coarse, of very poor appearance, and not a likeness. Signature of L. E. Chittenden, Register, engraved in coarse lines, not a *fac-simile* of genuine. Numbering very poor. Imprint of American Bank Note Company imperfect. Lathe-work around the figure 5 on the counters and on the back of notes very defective.

**\$5 A D.** Dated March 10, 1863; Act of March 3, 1863. New series 77. A passable counterfeit. The engraving on the face of the note is coarse. The lathe-work around the figure 5, on the counter, right upper corner face of bill, is very defective. The vignette of Hamilton, right lower corner, though poorly engraved, presents a fair expression, and is to a certain degree a likeness. Vignette statue of Liberty, left end of bill, "scratchy" and unfinished in detail, and lacking the cross lines in shading. About the feet of the statue a few rough lines alone appear, instead of the sharply-defined folds of drapery shown on the genuine. Lathe-work on back of note faulty, the lines not traceable in the green tint.

**\$5 A D.** Dated March 10, 1863; Act of March 3, 1863. New series 77, and new series Good counterfeits of these series. Engraving quite well done; general appearance comparatively good; very likely to deceive unless carefully examined. The lettering of these counterfeits is well engraved and the shading regular, yet heavier than on genuine. The lathe-work around the figure 5 on the counter, right upper corner face of bill, appears good at first sight, yet when inspected is found to lack the very fine continuous lines of the genuine. The vignette of Hamilton is almost as finely engraved as the genuine, and presents a very fair likeness. The vignette statue of Liberty, left end of note, is not so carefully finished; the general features of the statue and its drapery are discernable, but details are imperfect or wanting. On the left hand of the figure (the side toward the body of the note) the drapery below the knee does not show the ornamental ball-tassels as prominent as on the genuine. Lathe work on back of note defective.

**\$5 C.** Series of 1875. Act of March 3, 1863. John Allison, Register; A. U. Wyman, Treasurer. Dangerous counterfeit. General appearance good. Printing well done. Lettering generally clear and regular. Lathe-work a good imitation of genuine. Shading of words United States in title coarse and "scratchy." Center vignette, emigrant family, coarsely engraved. Vignette head of Jackson in lower left of note badly done; the face has a scared or startled expression, unlike the firm, calm, intelligent look of the genuine. In the upper left corner of note the "Series of 1875" lacks the flourishes which appear above and below "1875" on the genuine. Imprint of Bureau, Engraving and Printing, irregular and imperfect, and several letters are incomplete or broken; after the word Bureau is a period instead of a comma as in genuine, and the & is blotted at the top where the genuine distinctly shows a clear open space in a loop. The genuine notes of this series are all on fibre paper. This is poorly imitated in the counterfeit by fine lines printed only on the space at the left end of back of note. Plates captured.

**\$5 D.** Series of 1875. Plate 12, and Plate 14. Act of March 3, 1863. Both Treasury numbers, B8058120. John Allison, Register; A. U. Wyman, Treasurer. Two passable counterfeits, from plates made by the old photographic process. All imprints are about a quarter of an inch shorter than the genuine. The perspective in the center vignette of emigrant and family is very bad, the lathe-work lettering and border are blurred in several places, and the vignette head of Jackson, in lower left corner of note, does not show the fine dotted lines of the genuine. Plate 12 is printed on an imitation of localized fibre paper, rather heavy, but equal to genuine in appearance, made by cementing a thin back to a thicker face sheet with fibre in place between them.

Plate 14 is printed both on plain paper, and on an imitation of localized fibre-paper. The seal, Treasury numbers, and charter numbers, as well as the whole of the back were copied and appeared in black on the photographs; these were then tinted more or less by hand in attempted imitation of the colors of the genuine; the black can be seen under the tints, the tint on the seal is blotted and covers the white lines which appear in the genuine. Numbering blurred with color. On the back of notes the tinting is badly done, often incomplete and the whole note is off color.

**\$5 A.** Series 1875. Act of March 3, 1863. Treasury number, B3420232. Plate 22. John Allison, Register; A. U. Wyman, Treasurer. Photograph. Printed on plain paper, coarse and heavy. Seal and cycloid work very pale. Numbering fair. Lathe-work on back, and in two counters on face, so blurred hardly a line can be seen. The green ink and red numbers are very good so far as the shade of color goes. The note on face has a blurred appearance and is very dark. Of the same length as the genuine. Not dangerous, but deceptive.

**\$5 B.** Series of 1880. B. K. Bruce, Register; A. U. Wyman, Treasurer. The paper is thin and soft, being unsized, and lacking the parallel silk threads of the genuine note. The medallion of Jackson in lower left corner of note is badly executed. The letter "y" in the Treasurer's name is a "g" in the counterfeit. This counterfeit first appeared in March, 1886.

**\$5 B.** Series 1880. W. S. Rosecrans, Register; James W. Hyatt, Treasurer. A very poor wood cut production. Paper, soft and thin and lacking the silk threads. Vignette of Jackson a poor likeness. Words "Bureau of Engraving and Printing, Washington, D. C.," are reversed, beginning at the lower right hand end, instead of the upper left hand end. All the lathe work is very poor.

## TENS.

**\$10 B C.** Dated March 10, 1862; Act of February 25, 1862. Series 19. "Exchangeable for six per cent. U. S. bonds." A poor counterfeit. Engraving coarse, blurred generally, especially in the vignette head of Lincoln, where the eyes have a wild, staring expression. In the imprint of the National Bank Note Company, the first "a" in "Nation" is smaller than the adjoining letters, and the imprint is about a sixteenth of an inch above the border of the note. On the genuine, the panel inscribed "National Bank Note Company" touches the hair line inside of border. There are eight or ten different counterfeits of this denomination, act and date, some of which are almost equal to the genuine. Plates captured.

**\$10 B C.** Dated March 10, 1862; Act of February 25, 1862. New series 23. "Receivable in payment of all loans." A good counterfeit; close imitation of the genuine, well calculated to deceive. Engraving good, but somewhat coarse on the vignettes. Lathe-work excellent. Numbering well done. Imprint of Na-

tional Bank Note Company almost perfect. On genuine, under the wing of the eagle in vignette center are four clean cut feathers. In the counterfeit, the feathers are blurred and indistinct at that point. On the genuine, the line on which the Treasury number is printed ranges below the words "New Series" to the right of the figures. In the counterfeit, the line, if continued, would strike "New Series" below the middle of the letters. Plates captured.

**\$10 B C.** Dated March 10, 1862; Act of February 25, 1862. Series 52. "Exchangeable for six per cent. U. S. twenty years bonds." A good counterfeit. Vignette head of Lincoln fairly engraved, but a poor likeness; hair coarse, fine lines in drapery irregular. Imprint of National Bank Note Company, lower left corner of note, in a good style of plain lettering, but irregular, especially in the word "NOTE," where the letter "T" appears leaning forward at a lower angle than the adjoining letters.

**\$10 A B C D.** Dated March 10, 1863; Act of March 3, 1863. New Series 7, Series 19, New Series 23, New Series 52, and New Series 53. Counterfeits in general well done, especially in engraving of vignettes. The center vignette of a spread eagle, is, however, comparatively inferior, presenting a somewhat scratchy appearance; and the figure of a woman artist on right end of face of counterfeit is imperfect in detail and faulty in shading. The lath-work of these counterfeits is defective in the green tint center of face of the same and in the green medallion counters inscribed 10. On the genuine, to the left of figures 10 on green counters, are four green dots. In the counterfeits but three such dots are plainly visible.

**\$10 C.** Series of 1875. Act of March 3, 1863. An extensively-circulated counterfeit. In the engraving of vignette head of Webster the face has a surly expression. On the genuine the lines of shading across the breast of Webster's coat are uniform in drawing, equally spaced and regular. In the counterfeit the lines of shading on the body of the coat are much finer, and those on the lapel much coarser than the genuine. Thus the counterfeit also differs from the genuine in showing *both* coarse and fine lines of shading on the breast of Webster's coat, as may best be seen around the upper button hole and on the adjoining part of the coat, as illustrated in the cuts here presented.

GENUINE PLATE—DOUBLE SIZE.

The cut to the left is published by special permission of Chas. J. Folger, Secretary of the Treasury, given under date of July 14, 1883.

The cut to the right is published by special permission of Chas. J. Folger, Secretary of the Treasury, given under date of July 14, 1883.

COUNTERFEIT PLATE—DOUBLE SIZE.

On the genuine note the inscription WASHINGTON, D. C., center of bill, is in open-faced italic caps and small caps, the letters W and D. C. being larger than the others. In the counterfeit the inscription WASHINGTON, D. C. is in the same kind of type but the letters are all of the same size. On upper center of border the inscription "This note is a legal tender for ten dollars" is badly spaced on the counterfeit, the words "for" and "ten" joining each other. All genuine notes of this series are on distinctive fibre paper; the counterfeits are on plain paper, the fibre in the original issues of counterfeits being imitated by fine lines on the back, which are printed, or drawn with a pen. The latest issue of counterfeits of this description are printed on an imitation of fibre paper, made with very coarse threads or hairs in the body of the same.

**\$10** D. Series of 1880. Signed B. K. Bruce and A. U. Wyman, but the small words "Register of the Treasury" and "Treasurer of the United States," which should be under the signatures, are omitted on the counterfeit, also the words "Engraved and printed at the Bureau of Engraving and Printing" and "Act of March 3rd, 1863." On the right end, back of notes, all the small lettering which should appear there about the legal tender quality, penalty for counterfeiting, &c., is also all omitted. Lathe-work very poor, some notes on the back have no attempt at lathe-work, only the outline made and the green color being put on as with a brush. Other notes seen have the lathe-work partly imitated but very poorly done. The inks and color used on the notes can be rubbed off or the work disfigured by applying moisture with finger or sponge. The general appearance, however, of the face of the note, is fair, but the quality of the work will not bear close inspection. The paper is poor, and lacks the fibre and the two parallel silk threads.

In the vignette of Webster, on the lapel and body of the coat adjoining, the lines of shading there are uniform but not level on the lapel, while at the same time the white lines of such shading are about as broad or coarse as the black lines between them, thus counterfeits here present a very different appearance from genuine.

**\$10** L. Series of 1880. Signed B. K. Bruce and Jas. Gilfillan. These notes are slightly different in all their parts from the notes just mentioned. They are, however, of the same general appearance and quality of work, bear all the defects just mentioned about the \$10 notes of ebeck letter D, and none are genuine with a check letter "L" thereon, but the L may easily be changed to a D.

## TWENTIES.

*For a General Point*—To detect all the old counterfeit 20's of dates 1862 or 1863, notice on the face of notes the little small lines or dots crossing lengthwise at the top and bottom part of the large green figures 20; these lines are known to those of our craft as telegraph lines. On genuine notes they are distinct, uniform and straight across the figures 20. On the great majority of, as well as the best, counterfeits, these lines are lacking. Only a few of the very poorer counterfeits have them at both the top and bottom part, and even by these lines alone these notes can be detected, as such lines are very imperfectly and coarsely done.

**\$20** A B C. Dated March 10, 1862; Act of Feb. 25, 1862. Series 6 and Series 24. "Exchangeable for six per cent. twenty years bonds." Dangerous counterfeits. Engraving coarse generally. Imprint of American Bank Note Company, New York, very imperfect. Numbering good. Lathe work very defective, especially in medallion counters around larger figures 20 on face of note. Plates captured.

**\$20** A B C D. Dated March 10, 1862; Act of February 25, 1862. New series 7. An inferior but passable counterfeit. Engraving quite coarse and faulty. The hands of the Goddess of Liberty are shapeless and out of form. In the center foreground of vignette the drapery of the figure seems to reach the earth, and but a few irregular marks indicate where the foot appears on the genuine. The lines of the shield though tolerably clear at the top are too heavily shaded at the bottom. The inscription "Payable at the Treasury of the U. S. At New York" underneath the vignette is very imperfect, as are the imprints of the two bank note companies below. Lathe-work exceedingly defective. Plates captured.

**\$20** A. Dated March 10, 1863; Act of March 3, 1863. "Exchangeable for six per cent. twenty years bonds." A poor counterfeit. Lathe-work very defective. The back of this note is "muled," or mismatched with its face. No genuine Twenty Dollar U. S. Treasury Note issued under the Act of March 3, 1863, was "convertible" or had on its back the words "Exchangeable for six per cent. bonds."

**\$20** A. Dated March 10, 1863; Act of March 3, 1863. New series. A very poor counterfeit. Vignette of Goddess of Liberty badly done. Shading of large letters "United States" on face of note coarse and "scratchy." Lathe-work exceedingly defective, especially on back of note. Lithograph. Materials captured.

**\$20** A. Dated March 10, 1863; Act of March 3, 1863. New, series 19. A poor counterfeit. Engraving quite coarse. The fingers of the left hand of Goddess of Liberty appear broken and the foot is not at all well defined. Imprint of bank note companies very imperfect. Lathe-work very defective. Plates captured.

**\$20** A B C D. Series of 1875. Act of March 3, 1863. John Allison, Register: John C. New, Treasurer. A dangerous counterfeit if taken at first glance, but will not bear close examination. The outlines of this counterfeit are supposed to have been produced by some modification of the photographic process, and the finish and details by the skillful and artistic use of pens and brushes. The portrait of Hamilton finely executed, but the back-ground a mass of black washed

in, nearly the proper shade, but lacking the fine lines which make up the ground work of the genuine. No attempt at lathe-work in the center surrounding the figures "20"—of similar nature to the hack-ground of portrait.

Another \$20 note, Series of 1875. Letter B, appeared in June 1884 and is about the same class of a note. Signed John Allison as Register and Jas. Gilfillan as Treasurer. None genuine signed Jas. Gilfillan as Treasurer. At top center on face of note the fine imprint, "Engraved and printed at the Bureau Engraving and Printing" is also omitted on the counterfeit.

**\$20 A B C D.** Series of 1878. Act of March 3, 1863. John Allison, Register; Jas. Gilfillan, Treasurer. A passable counterfeit but will not bear close examination. Made by a plate process in outline and finished much the same as counterfeit of 20, series of 1875, just described. Done on a paper nearly a perfect imitation of the genuine. Inks almost the same shade of genuine.

**\$20 A B C D.** Series of 1880. In general looks the counterfeits are dangerous notes, colors excellent, but moisture applied with finger or sponge will disturb the inks. At top centre, face of note, the words "Engraved and Printed at the Bureau Engraving and Printing" are omitted. The paper lacks the two parallel silk threads and the silk fibre, yet all are nicely imitated by ink lines. A similar class of counterfeits to those of series of '75 and '78. Examine pen-made lathe-work around large 20 in centre face of note.

## FIFTIES.

**\$50 C.** Dated March 10, 1862; Act of February 25, 1862. Series 1. One of the "convertible" series. An inferior counterfeit. Engraving badly executed. Vignette head of Hamilton defective, the nose of the portrait runs to an unnatural sharp point and there is a peculiar "dish" to the countenance not seen in the genuine. Numbering imperfect. Plates captured.

**\$50 A B C D.** Altered note. Very dangerous. Made by raising genuine \$2 Treasury notes. By error, certain Treasury 2s and 50s bear the same vignette head of Hamilton. On genuine fifties the vignette head of Hamilton is at the top of the note, on the twos and the raised note, it is at the bottom. The vignette head of Hamilton has often been cut from genuine twos, the back removed and the face neatly cemented over the inferior work of poor counterfeit fifties, which were thus made passable.

**\$50 A B C D.** Dated March 10, 1863; Act of March 3, 1863. New series 1. Patented 30, June, 1857. Two different counterfeits, but both poor. Face of notes from different plates, but with same backs. Engraving of vignette head of Hamilton coarse and defective. On the face of notes in the counters bearing the large figures 50 are white lines surrounding smaller italic 50s. On the genuine, one of these white lines crosses the space inside the large 0. In one of the counterfeits, this line does not cross the large 0, and the space inside the same is occupied only by the back-ground. But in both counterfeits on the hack of notes the small counters inscribed 50, which form the border of the back and the inside space, though octagonal, are crooked in outline and lack the perfect form of the genuine and surrounding all these small 50s are the words fifty, fifty, yet in both counterfeits these words are perfectly illegible. Plates captured.

**\$50 A B C D.** Dated March 10, 1863; Act of March 3, 1863. New series 1. Patented 30, June, 1857. Dangerous counterfeit. Engraving good in general. Vignette head of Hamilton very finely done. The buttons on Hamilton's vest not as distinct as on genuine. In the counters bearing the large figures 50 are white lines surrounding smaller italic 50s. On the genuine, one of these white lines crosses the space inside the large 0. In the counterfeit this line does not cross the large 0, and the space inside the same is occupied only by the back-ground. On the back of the genuine, the counters inscribed 50 forming the border of the greenhack and of the inside space are octagons having obtuse angles. In this counterfeit the outlines of the small counters described are almost perfect circles.

**\$50 A C D.** Dated March 10, 1863; Act of March 3, 1863. New Series 2. Patented April 28, 1862, above the check letter. A splendid counterfeit, one of the most dangerous in existence. Inks and printing nearly equal to the genuine, Numbering perfect. The buttons on the vest of Hamilton are not as distinctly prominent as on genuine. In the counters bearing the large figures 50 are white lines surrounding smaller italic 50's. On the genuine, one of these white lines crosses the space inside the large 0. In the counterfeit, this line does not cross the large 0, and the space inside the same is occupied only by the back-ground. On the back of

counterfeit near lower left corner two of the counters in the border are partly merged and a cipher being omitted, the figures read "550." On the genuine the same counters are not so much merged, and the figures read "50 50." On the genuine the small counters inscribed "50," which form the border of the green back and of the inside space are octagons with obtuse angles. In the counterfeit the outlines of the small counters described are almost perfect circles. Plates captured.

**\$50** B. Series of 1869. Act of March 3, 1863. A superior and dangerous counterfeit. Excellent general appearance. Engraving good. Vignette portrait of Henry Clay a fair likeness. Numbering well done. Lathe-work a fine imitation of genuine, nearly perfect. On the genuine, between "Series of" and "1869," at upper left face of note, is a flourish, which is omitted from the counterfeit unless pen-made. On back centre of genuine note, at top of large 50, two stars emerging show five points each; two stars bottom of 50 four points each. On counterfeit the star top of large 5 in 50 shows six points; the star top of 0 in 50, and two stars bottom of 50, five points each. All genuine notes are printed on distinctive fibre paper, counterfeits on plain paper. Plates captured. *Handle with Care.*

**\$50** D. Series of 1875. Act of March 3, 1863. A pen-made counterfeit of good appearance, artistically finished with the brush. A moistened thumb applied to the Treasury numbers or green tint on back of note removes the color.

## ONE HUNDREDS.

**\$100** A B C. Dated March 10, 1862; Act of February 25, 1862. Series 1. "Exchangeable for U. S. six per cent. twenty years bonds." A dangerous, though defective, counterfeit. Engraving coarse. Vignette of spread eagle upon a rock badly done, the plumage "scratchy." On the genuine the *stem* of the feather in the eagle's tail near the left claw is very distinct. In the counterfeit the stem of the feather described is almost or quite invisible. The figures used in numbering are much longer or "deeper" than in genuine, are imperfect, and the printing off color. On the back of the genuine, in the scroll work on both sides of the circle, the figures appear repeatedly in regular order thus—on the left hand "001"; right hand "100." On the counterfeit the figures are just reversed and stand thus—left hand "100"; right hand "001."

## FIVE HUNDREDS.

**\$500** A B C D. Series of 1869. Act of March 3, 1863. An exceedingly dangerous counterfeit. Some on fibre paper. Engraving and general execution equal to genuine. Upon the appearance of this counterfeit the Treasury issued enlarged photographs of the same, and of the genuine for comparison, to aid detection. The buttons on the coat of Adams *are not as round* as on the genuine, particularly the upper one nearest the lapel, which button is quite oblong. The three middle toes of the figure of Justice are shorter and are of about one-third of the whole length of the exposed foot; on the genuine the same are in length full one-half or more of the exposed foot. The scale held aloft in the left hand has the upright of the beam a little larger and if not inked, shows plainly from the beam to the end of the third finger; on the genuine it shows only to about the bottom of the hand. In the counterfeit, in the ornamental work around the lower Treasury numbers, between the vignette and the upper corner of the N or letter forming part of the numbers, is a small oblong but *complete* loop; in the genuine the same is like an oblong loop disconnected at its left end, and then the top lines or top half part of the loop extending at least one-third beyond the lower half-part. Nearly all the genuine notes have been retired. *Best receive these notes, only as bills for collection.*

## ONE THOUSANDS.

**\$1000** A B C D. Dated March 10, 1862, and March 10, 1863; Act of March 3, 1863. An exceedingly dangerous counterfeit; nearly a perfect imitation. Engraving almost or quite equal to genuine. Lathe-work in the border and corner of the face of the note a little defective, and the words "Act of March 3, 1863" are a little coarser than the genuine. The points of difference are so very slight that a direct and very careful comparison of the genuine with the counterfeit is necessary to detect. Upon the appearance of this counterfeit the Treasury issued enlarged photographs of the same and the genuine for comparison to aid detection. Upon the original plate of the genuine first issue of this note the date was by mistake engraved March 10, 1862. This error was copied by the engraver of the counterfeit and notes thus printed. Afterwards the genuine issue was made to bear the proper date, March 10, 1863. This too was copied, and counterfeit notes issued accordingly. Very few genuine are in circulation. *Receive these notes only as bills for collection.*

## Counterfeits of Silver Certificates.

**\$1** D. Series 1886, W. S. Rosecrans, Register, and James W. Hyatt, Treasurer. In counterfeit the whole end border on left end face of note appears light, more of a uniform shade from top to bottom, and thus it lacks the contrast of several dark lathe-work designs with lighter parts intervening, as on genuine. Portrait of Martha Washington fair, but work not as fine as genuine. No actual silk thread lengthwise of note. In small words "Treasurer of the United States" the "e" in "the" is imperfect or far too high. "Engraved and Printed, &c.," not as clear cut as genuine.

**\$2** C. Series of 1886. The general appearance of the note is very bad. The vignette of General Hancock is exceedingly poor, and background very scratchy. In the counter in the upper right hand corner of face—containing the figure "2"—the geometric lathe work is not discernible, while in the genuine it is very distinct. The Check Letter C, next to the vignette of Hancock, is very indistinct, and it is omitted *altogether* on the right end of the note. The small letters in border of face are very indistinct. On the back of the note the lathe work is so poor that a cursory glance would at once enable one to determine its false character, and the words "Bureau Engraving and Printing," in small panel, lower centre of back, can hardly be deciphered.

**\$5** A. Series of 1886; W. S. Rosecrans, Register, and James W. Hyatt, Treasurer of the United States. Good counterfeit except the portrait of Grant. The color of Treasury numbers, seal, and on the back of note being good, though those numbers are longer and larger. The counterfeit portrait of Grant lacks that stern look and life-like expression of genuine, but instead has a blank, flat look; a different set to the eyes; his right eye in particular being wider open, and not deep set as in genuine. Has also a whitish beard with a dark-colored moustache, the appearance of a longer or not so broad a head and face, and altogether a different look and expression from the genuine. The counterfeits are on different kinds of paper, some of it being good both in thickness and color, and another kind is thinner than genuine, more flimsy, of an old or yellowish shade of color, but all the paper lacks the silk thread, although this is nicely imitated by a line lengthwise on the back of the note. A dangerous bill to the general public, or to all persons if the portrait of Grant is much worn. This counterfeit is known as the Johnson plate five.

**\$5** D. Series 1886. W. S. Rosecrans, Register, and James W. Hyatt, Treasurer. The portrait of Grant has a fair expression, but the work coarse; the background of portrait lacks the uniform cross line work of genuine, but has on his left side only irregular lines running perpendicularly, and on his right side little short white lines "picked" in. In small words "Register of the Treasury" the word "Register" is out of line or much higher than the other words. Lathe-work counters very good. No actual silk thread lengthwise of the note. This counterfeit is known as the Italian five.

**\$10** Series of 1880. This very inferior counterfeit (signed G. W. Schofield, Register, and James Gilfillan, Treasurer) appeared in July, 1884, and is supposed to have been printed from a poor wood-cut. Lathe-work poor. Paper inferior, and sometimes of two thin layers with silk thread placed between. Check Letters A and D, have been noticed and probably all the Check Letters have been inserted. Some of the very small lettering on the notes have been omitted. On the back of bill, near the top, from this portion of a sentence "and all public dues, and when so received may be reissued" the word "all" is entirely omitted, and the words "when so" are tied together as one word.

**\$10** Series of 1880. Act Feb. 28, 1878. Signed B. K. Bruce, Register; A. U. Wyman, Treasurer. A poor counterfeit. The words "Engraved and printed at the Bureau of Engraving and Printing" on right end of genuine note are omitted on the counterfeit. No attempt to form the small letters in border on face of note. Check letter in upper left corner omitted, but traces of one on lower right end that resembles a "C."

**\$10** Series of 1880. A very poor counterfeit. Signed B. K. Bruce and A. U. Wyman, but the small words "Register of the Treasury" and "Treasurer of the United States" are omitted on the counterfeit, also other small lettering on the face of bill. Lathe-work very bad, on the back of the note only a daubing of ink. Vignette of Robert Morris very badly done. The paper is poor and lacks the fibres and the two parallel silk threads. Check Letter C has been noticed.

**\$10** Series of 1880. A very poor counterfeit. Signed B. K. Bruce, Register; Jas. Gilfillan, Treasurer. The stone, from which part of it was printed, is of the coarsest grain, and the workmanship of the crudest character. The words "there have been deposited with" and "payable at his office to the bearer on demand" are all in script type, and are the only clear lines in the note, all else being blotchy, blurred and soiled. Treasury number B376780X, probably the same on all.

**\$10** PENWORK. Done by the same method as the 20's. Work coarse and sketchy, still effective.

**\$10** D Series of 1880. Photographic Process Counterfeits. The tens all bear the Treasury number B109016, Letter D, and the twenties, B675114, Check Letter B.

The Seal and X's, which in the genuine are of pink color, have also been photographed and produced in black on the counterfeits, then colored by hand in a bungling manner, the black underneath being easily discernible, giving the appearance of dirty red to the work. This color is readily disturbed by the application of moisture.

**\$20** C Series of 1880. A good counterfeit. Signed B. K. Bruce, Register, and Jas. Gilfillan, Treasurer. In this counterfeit silver certificate, which is shorter than the genuine note, there is no distributed fibre or parallel silk threads in the paper as in the genuine, and the paper itself is thick and stiff. The words "silver certificate" appear in panels twice in the upper border on the face of the note. In the panel to the left in the counterfeit the letters R T and F in the word certificate are engraved the "wrong side up." In the counterfeit there are no periods dividing the initials in K. B. Bruce. On the lower left corner the check letter C is without an accompanying number, and in the name Gilfillan only the first "i" is dotted. On the back of the note the word "taxes" is plainly spelt "tares" and the word "Engraved" is spelt "Engravod." The color of the seal is brick red, it should be verging on brown. It has been definitely ascertained that only two sets of Treasury numbers have been used on said certificates, viz., B1467X and B1487415X. This counterfeit appeared in March, 1884.

One issue of these certificates are printed on thinner paper, and with better ink and color to the seal than as above described, otherwise they are the same.

**\$20** PENWORK. First appearance of these \$20 certificates was in May, 1881. The paper is of ordinary bank note quality, being thinner than that upon which the genuine certificate is printed, and in color darker. The counterfeiter has drawn two parallel lines throughout the length of the note. There are so many defects and omissions in the spurious certificate when compared with the genuine that it would be futile to enumerate them, seeing they are the product of the pen and not of the plate. The Treasury number can be wiped off by the aid of a damp sponge.

Numerous other \$20 silver certificates of this pen and brush work have appeared since the above. They are of the series of 1880, and include all the check-letters. The paper is thinner than the genuine, but these notes are very deceiving in their general look. Each note differs from another and from the genuine in many points. All should be detected by general look and quality of work, ink and paper. Especially examine closely the lines of shading on the coat of Commodore Decatur.

## Ten Instructive Sight Guides.

### U. S. NOTES.

1. Of date 1862 and 1863, have no jute or fibre in the paper.  
Of Series 1869, 1874, 1875 or 1878 are printed on a distinctive fibre paper known as the Wilcox patent.  
Of Series 1880, are printed on the new paper, having a red and blue silk thread running from end to end, one at the top and the other at the bottom of the notes, and shreds of red and blue silk fibre scattered through the paper, and known as the Crane patent.
2. All counterfeits of U. S. Notes, dated 1862 or 1863, bear the Red Pointed Seal.
3. All U. S. Notes, Series of 1880, bear the large Brown or large Red Seal, and all Notes bearing these Seals can be taken with entire freedom from suspicion, excepting the \$2 and \$5 poor counterfeits, the Webster-head \$10 poor counterfeits and the \$20 counterfeits of this series.

### NATIONAL BANK BILLS.

4. Very few National Bank Bills bearing the Red Pointed Seal have any fibre in the paper.  
Of Series of 1875 (all of which have the Red Scalloped Seal), are either printed on jute fibre paper, or the new silk line paper, the same as used for the U. S. Notes, Series of 1880.  
Of Series of 1882, bearing the Brown Scalloped Seal, are also printed on the same silk line paper as the U. S. Notes, Series of 1880.
5. All the counterfeit National Bank Bills bear the small Red Pointed Seal, except the several Photographs and the Pittsburgh, Pa., 100's, the latter are of the series of 1875, and have the Red Scalloped Seal; and except also the Norwalk, Conn., 5's, the Cincinnati, O., 10's, and the New Orleans, La., 10's, all of which are of the series of 1882, and have the brown back and brown Scalloped Seal.
6. All the new issues, Series of 1882, having brown backs, and bearing the Brown Scalloped Seal on the face, can be handled with entire freedom from suspicion; excepting the photographs, and excepting also the Norwalk, Conn., 5's, the Cincinnati, O., 10's, and the New Orleans, La., 10's.

### SILVER CERTIFICATES.

7. Of Series 1880, having the Large Brown Seals, the only dangerous counterfeits are on the \$20 issue.
8. All Silver Certificates of Series 1886 have a *small* red plain bordered seal, or the *large* Reddish Seal bordered with lathe-work points, and all bills having those seals are free from suspicion, except the \$1, \$2 and \$5 certificates, and all these counterfeits have the small seal.  
No gold certificates of any kind are yet counterfeited.
9. The Check-letters, A B C D, etc., referred to in the body of this DETECTOR, are all printed in black on the face of the U. S. Notes and National Bank Bills, as well as on the Dominion of Canada Bills.
10. The Dufferin issue of the Dominion of Canada One and Two Dollar Bills have the following distinctive features on the back and face: Those made payable on the back at Toronto, have red; Montreal, blue; St. John, black; and Halifax, green figures on the face. The late issues of the Dominion One, Two and Four Dollar Bills have not the above distinctive features.

## COUNTERFEITS OF COMPOUND INTEREST NOTES AND U. S. BONDS.

**\$10** Compound Interest Note. Act of June 30, 1864—October 15, 1864. Letter C. Number 198380. Photograph, of the brownish color of old fading photographic work.

	Letter.	DATE.	Captured.
<b>\$50</b> Series of 1864. Compound Interest Note . . . . .	<b>C</b>	July 15, 1864	July, 1866.
<b>\$50</b> Series of 1865. Compound Interest Note. . . . .	<b>D</b>	May 15, 1865	July, 1866.
<b>\$50</b> Series of 1865. 5-20 Note, Eagle Vignette . . . . .	<b>C</b>	July 15, 1865	April, 1866.
<b>\$100</b> Series of 1865. Compound Interest Note . . . . .	<b>B</b>	May 15, 1865	March, 1866
<b>\$1000</b> Series of 1861. U. S. Bonds. Sixes of 1881. Exceedingly dangerous, well-executed counterfeit. Handle all \$1,000 U. S. Bonds, of Acts July 17th and August 5th, 1861, with greatest care. The genuine vary in size. Counterfeits seen bear only coupons maturing Jan. 1, 1881. On counterfeit, in the \$1,000 counter of nine sections, each side, portrait of Chase in the section at left of lower ball of the figure 1 in 1,000, the letter S in "Stat" is entire. In the genuine only the upper half of the S is seen. The hair line around portrait on counterfeit shows a break of 1-16 of an inch. Counterfeit differs from genuine in mitreing of four corners of green border: In title, "United States of America," ruled shade left side spur of letter "U" in counterfeit are seven short lines, forming slight shade under that part of the letter. On genuine are ten lines. The signature on lower right hand of counterfeit engraved, printed in grayish-colored ink, traced over with pen and ink. Signature of genuine written.		Act of July 17, 1861 and Aug. 5, 1861.	
<b>\$1000</b> 7-30 United States Bonds. Very dangerous. Matured. Interest ceased. Outstanding total of genuine very small. Best decline all. The Treasury Department redeemed \$90,000 of these counterfeit bonds before their character was discovered.	<b>B</b>	June 15, 1865	Nov. 21, 1867
<b>\$1000</b> 5-20 of 1862. Fourth series. One of the best specimens of counterfeiting work ever made. It is believed no printing was ever done from the plate which was made.		Washington, May 1, 1862.	Nov. 21, 1867

## Genuine Bills and their Counterfeits.

### HOW GENUINE BILLS ARE PRINTED.

The United States Government prints all the paper money of the nation, from plates generally made four in a set and lettered respectively A, or B, or C, or D, in a few cases certain banks have been supplied with bills lettered respectively E, or F, or G, or H. These are called "check letters" and appear in various places upon the face of notes or bills according to their issue and denomination.

### HOW COUNTERFEITS ARE PRODUCED.

When making counterfeits of paper money by use of engraved plates, the counterfeiter produces but one plate upon which he copies but one bill of one check letter of the genuine set. Counterfeiters seldom use the same plate on two or more check letters of the same denomination of bills of the same national bank, but when the counterfeit has become notorious they change the issue, inserting, by the use of "skeleton plates," extra title lines, coats of arms, and other changeable pieces, the name of another and unsuspected bank not always in the same State as the first, upon which no counterfeit of that denomination has yet appeared.

Whenever a counterfeit (not a photograph, lithograph, acid etching, or pen-made bill), of any National Bank bill appears, the genuine, which has been counterfeited, rapidly disappears from circulation.

All National Bank bills, or imitations of the same, of the denomination, letter and date noted in the List of Counterfeits given in "Dye's Government Counterfeit Detector" should be refused, unless proved good by reference to the conclusive Points of Detection published in the same book.

## CHARTER NUMBER OF GENUINE.

On all National Bank bills, old or new, issued through the United States Treasury since 1874, and previous to the bills of new designs issued in 1882, the charter number of the bank of issue only appears in the largest of the figures upon the face of the bill; across the left end of the same and lengthwise at the right end; and thus a few of the old bills bear no charter number as they have not been through the Treasury since 1874. On all genuine National Bank bills the charter number will be the same as the figures to the right of the name of the bank in the List of Counterfeits; if these numbers differ refuse the bill; if they are the same the bill may be counterfeit.

## BILLS EXEMPT FROM SUSPICION.

All the counterfeits of the ONE Dollar bills of National Banks, are imitations of the issue of a bank in one State (Mass.); all of the TWOS in three States (N. Y., R. I., Penna.); all of the FIVES in eight States (Ill., Mass., Conn., Mich., N. Y., Pa., Vt., Wis.); all of the TENS in four States (N. Y., Ind., O., Penna.); all of the TWENTIES in four States (N. Y., Conn., Penna., Ind.); all of the FIFTIES in one State (N. Y.); all HUNDREDS in five States (N. Y., Mass., Penna., Ohio, Md).

Thus it is evident that the National Bank bills of nearly three-fourths of the United States are entirely exempt from suspicion, and may be taken in perfect confidence the instant the name of the State or its coat of arms can be seen upon a bill. Still further, all fifties of National Banks in the United States are exempt from suspicion, except those of two cities (N. Y. and Buffalo) in one State (N. Y.); and the fifties of all National Banks in Buffalo are exempt from suspicion, except those of one bank (the Third National), and of these, all are exempt except those bearing the check letter A—and so on discriminatingly. See also point 5, page 35.

## THE PHOTOGRAPHIC PROCESSES.

By the "old" photographic process used in producing counterfeit bills and notes, the seal and numbers (unless previously removed), as well as the whole of the back of the note, were copied and appeared in black on the photograph. These were then tinted with pens and brushes by hand in attempted imitation of the colors of the genuine. On counterfeits thus produced, the black can be seen under the tint, which, on the seal, is blotted and covers the white lines that appear in the genuine. The numbering is also blurred with color and the tinting on the back of the note is badly done and often incomplete. The only plate used in this process is the ordinary glass "negative," and the printing is done by sunlight on "sensitized" paper. Of course the same number will be shown on all copies from the same negative; but as a negative of any note can be made in a few minutes the detection of photographic counterfeits depends upon a critical observation of their character and appearance. There are various photographic processes known to counterfeiters, from some of which danger is to be apprehended; but the black part of all notes printed from "negative plates" by sunlight, may be removed by a solution of cyanide of potassium, and unless perfectly new is off color, and shows the reddish brown peculiar to faded photographs.

By the "new" photographic process used for producing counterfeits of bills and notes, the seal and numbers and the color work on the back, whether pink, carmine, chocolate, or green, are first entirely removed from the note to be imitated. All but the back having been washed out of the note a negative of the same is taken and from that photographs are printed by sunlight on "sensitized" paper. To produce the color work on these photographs an engraved cut or plate of the seal and the tinted part of back is used and the tints are clearly "surface printed." in their places. The numbers are also printed in colors from separate engraved figures used in combination and changeable, so that unlike the numbers photographed and then tinted by hand in the old process, these figures are well done and run in a series. This "new" process is far more dangerous than the "old."

# OFFICIAL LIST OF UNITED STATES COINS.

*Historical, Descriptive and Statistical; compiled expressly for Dye's Government Counterfeit Detector; to which has been added a full account and description of all dangerous Counterfeits and mutilations of the same.*

## LAWS OF THE UNITED STATES.

*Penalty for fraudulently defacing, mutilating, impairing, diminishing, or lightening gold or silver coin of the United States, or any foreign countries, made current in the United States by law—*

That, if any person shall fraudulently, by any art, way, or means whatsoever, deface, mutilate, impair, diminish, falsify, scale, or lighten the gold or silver coins which have been, or shall hereafter be coined at the Mints of the United States, or any foreign gold or silver coins which are by law made current, or are in actual use and circulation as money within the United States, every person so offending shall be deemed guilty of a high misdemeanor, and shall be imprisoned not exceeding two years, and fined not exceeding two thousand dollars.

*Penalty for making or uttering coin in resemblance of money.*

Every person who, except as authorized by law, makes or causes to be made, or utters or passes or attempts to utter or pass, any coin of gold or silver or other metal, or alloys of metals, intended for the use and purpose of current money, whether in the resemblance of coins of the United States or of foreign countries or of original design, shall be punished by a fine of not more than three thousand dollars or by imprisonment not more than five years, or both.

## COUNTERFEITS OF COINS.

Counterfeits of Coin are mostly of one of the two following kinds: 1st. Pieces struck in steel or other dies: 2nd. Pieces cast in plaster of paris or other molds, or formed in the same by electrical deposition of metals.

The first class of counterfeits of coin; those produced by means of dies, are some times in appearance fac similes of the genuine; being struck from authentic legal dies which have been stolen: as far as known, this applies only to imitations of foreign coin. In dies which have been feloniously made for the purpose of producing counterfeits, there are variations to a greater or less degree from the original, sufficient, except in a few rare instances, to at once cause the detection of the pieces struck in them, when the same are carefully compared with a genuine coin or a fac simile of the type and variety imitated.

The material generally used in the coinage of such counterfeits of gold coin as are struck in dies, is a debased compound of silver and gold. For counterfeits of silver coin, made in a die, the material generally used is silver debased by an undue alloy of copper. To these base pieces, a good external color is given, by scrubbing them with aqua ammonia, or by boiling them in dilute sulphuric acid, or some other kind of "pickle." In this process, the liquid menstruum dissolves the copper with which it comes in contact, and leaves a surface of fine silver. Counterfeits, thus made and finished, present a fine appearance, and have a sonorous ring very nearly resembling that of the genuine coin. The composition of gold and copper, or silver and copper, used in the various counterfeits of coin ranges from 150-1000ths to 750-1000ths fine, while the standard gold and silver coins of several principal nations are 900-1000ths fine. Unless very thoroughly pickled, counterfeits of a low grade will, when rubbed, show by the color exposed, their excess of copper; or they may be detected by the regular tests, as given in this article hereafter. To the composition of the counterfeits of silver coin, different metals, zinc, tin, nickel, &c., &c., are sometimes added to improve the color. The richer the metal of any counterfeit coin, the more difficult it is to distinguish the same from the genuine. To detect the best counterfeits of coin, requires a careful examination and close comparison of the impress of the die with the genuine. Counterfeits, made of the compositions described, are necessarily too large or too light and the more alloyed with copper, the lighter they must be according to their size. The cause of this is the excess in gravity of gold and silver over copper. In gold, the disparity of its gravity with copper is so great as to be most obvious. Standard silver (900-1000ths fine), compared with distilled water, has a gravity of 10.30, while that of copper is but 8.80. By ascertaining the specific gravity of a sonorous coin, the amount of gold or silver it contains may be learned very nearly. The precise method of ascertaining the amount of precious metal contained in a coin, is by chemical assay; though an approximate estimate of the same may be obtained by fusing a part of the coin under the flame of a blow pipe; by which, most of the base metal in alloy is dissipated. The foregoing observations apply to most cases, nevertheless, so familiar have counterfeits made themselves with the science of metallurgy, that they have produced dangerous counterfeits of both gold and silver coin, of base metals, yet very nearly or exactly the size and weight of the genuine.

Gold coins are sawed asunder and the interior removed, the cavity being then filled with less costly material; sometimes they are bored from the edges, and the holes afterwards plugged with cheap composition. All kinds of coins of the precious metals are dishonestly bored, filed, clipped, sweated, abraded and made light; the criminal operator finding a profit in the considerable portion of bullion thus removed from the several pieces.

The second class of counterfeits of coin, those cast in plaster of paris or other molds, or formed in the same by electrical deposition of metals, are usually very good fac simile representations of the coins used as patterns in the process of their manufacture. The metals from which counterfeits of coins are cast, are various, such as platinum, silver, copper, tin, iron, brass, bronze, nickel, zinc, antimony, bismuth, &c., in different forms of composition. The more common varieties of this class of counterfeits, are made as follows: A complete cast of a genuine coin is taken, in plaster of paris, after the method used in the art of stereotyping, to make a mold. The plaster of paris mold is then moderately baked and filled with whatever base composition is to be used, in a melted state. When

the metal cast becomes sufficiently cool, the mold is taken apart, the casting is removed, and if sound and perfect, finished up and, in general, washed in a solution of silver or electroplated with the same metal. These counterfeits are usually under weight, and being too soft, lack the sonorous ring found in the denser metal of the genuine coin.

For the last few decades, the more scientific counterfeiters have been enabled to make effective use of the electro-galvanic current for the deposition of metals in producing counterfeits of coin. In this process, a matrix is first prepared, by pressing the side of a perfect genuine coin, into lead, or some other soft metal; the same being, perhaps, in a semi fluid state of fusion at the instant. Upon the interior surface of the matrix thus formed, a uniform electro deposit of copper is made, which, in the manner well known to electrotypers and those familiar with the action of the electric current, adapts itself to every feature of the type or variety in the matrix. When the deposit has been made sufficiently thick, the battery is stopped and the disk produced removed, finished and polished. One piece is made for the obverse and one for the reverse of the coin, and these are brazed or soldered together, and the edges finished to imitate the genuine. Otherwise, the counterfeit is deposited entire. Last, the copper piece imitations are electroplated with silver, when they are ready for circulation. The counterfeits of coin made in this way are usually considerably lighter than the genuine, and though of good color, show the fine lines of the device, lettering, &c., rounded and indistinct; moreover, a slight scratch or a little abrasion and wear removes the silver surface exposing the copper.

## GOLD AND SILVER COINS.

*All Mutilated Coins are uncurrent. Foreign Coins are not a legal tender.*

*R. S.*—"Sec. 3585. The gold coins of the United States shall be a legal tender in all payments at their nominal value, when not below the standard weight and limit of tolerance provided by law for the single piece, and, when reduced in weight below such standard and tolerance, shall be a legal tender at valuation, in proportion to their actual weight." "Sec. 3505. Any gold coins of the United States, if reduced in weight by natural abrasion not more than one-half of one per centum below the standard weight prescribed by law, after a circulation of twenty years, as shown by the date of coinage, and at a ratable proportion for any period less than twenty years, shall be received at their nominal value by the United States Treasury, and its offices, under such regulations as the Secretary of the Treasury may prescribe for the protection of the Government against fraudulent abrasion or other practices."

Silver dollars (except the trade dollar) are unlimited legal tender. Silver half dollars, quarter dollars and dimes, since 1879, are a legal tender when offered in sums not exceeding ten dollars. There is no allowance for abrasion or wear; silver coins must be of coinage weight. Silver twenty-cent pieces, half dimes and three-cent pieces, though their coinage is discontinued, are yet a legal tender.

All fractional silver coins and also minor coins, if not mutilated, will be exchanged into lawful money by the U. S. Treasurer or any Assistant-Treasurer, if presented in sums or multiples of \$20: the Treasury Circular also states that reduction by natural abrasion is not considered mutilation. Mutilated U. S. silver coins, when exceeding the amount of three dollars, will be purchased at the Mints as silver bullion at market price of same.

### HOW TO DETECT BASE COINS AND COUNTERFEITS.

Coin is tested by its weight, dimensions, appearance, ring and quality of metal. The scale and gauge give the two first; the third is taken by comparison; the last, except in coins of platinum, is to be ascertained by the use of the United States Mint Fluid Coin Tests, constantly used in the United States Mint, and formulas for which are printed herein and on the back of the receipts given to subscribers for DYE'S GOVERNMENT COUNTERFEIT DETECTOR.

To detect base pieces, or counterfeits of standard coins, compare their weight, size, impress, device, color, reeding, ring and general appearance with that of the genuine of the same period and coinage. To further test the piece, if necessary, prick its edge with a knife; if metal is discovered not the color of the genuine the piece is fraudulent or counterfeit. With most people the ring of a coin is a very critical test, provided the coin is balanced upon the end of the finger and struck by another good coin on the surface near the edge; as with some of the counterfeits simply a ring on the counter will not detect them; and, there are also exceptions even in the ring of genuine coins, as the ring may be dead because the planchets were cracked or flawed when being made. To all suspected coins, seeming to be genuine, apply the acid tests, using, of course, for gold coins the gold fluid test, and for silver coins the silver fluid test, taking care to have a clean surface and to touch the worn corner of the edge of the coin, or if very heavily plated reach the body of the piece through a little cut; if the metal exposed is discolored by the chemical action the coin is base or counterfeit. Upon standard or genuine metal the respective fluid test described has no observable effect; but gold or silver of a low grade is soon discolored, and base metal at once made black by its action when properly applied. The fluid test, however, has no effect upon platinum.

## Double Eagle.—\$20.

Authorized to be coined, act of March 3, 1849. Weight, 516 grains; fineness, .900. Deviation in weight allowed in coinage, .5 of a grain. Deviation in fineness allowed in assay, .001; lowest, .899; highest, .901. Coinage commenced, 1850. Unless artificially reduced in weight, should continue current for fifty years from date of coinage. Allowance for natural abrasion, 2.58 grains. Least legally current weight, 513.42 grains. For total amount coined, see page as per index.

### COUNTERFEITS OF THE DOUBLE EAGLE.

The Double Eagle of the United States is a broad thick coin, and has, therefore, been tampered with to make a false piece, which Treasury experts declare: "the worst fraud we have to deal with." To effect this, the double eagle is sawed from the edge into two or three parts, leaving the obverse and reverse with all their impressions and inscriptions untouched. The central part is removed by the saw or turning tool, to the value of about \$15, and the cavity filled nearly to the edge of the piece and to the original thickness, with platinum, a very heavy metal, about one-third the value of fine gold. The edge of the disk of platinum is then covered in by a soldered rim of gold; the whole coin thus presenting a genuine surface and being almost without fault as to weight, diameter, thickness and ring. The edge is at last quite perfectly renewed by use of a "nurling machine," and the spurious piece is ready for fraudulent circulation. What with the two genuine outsides; the false inside; the new ribbed rim and the solder, there are present no less than four separate pieces and five distinct metals, all joined together with such nicety, that unless put carefully on their guard, none but an expert can tell the spoiled coin from the perfect genuine piece. This method of degradation has been used, not only on double eagles, but, as is more remarkable, on eagles, half eagles, British sovereigns, and even quarter eagles. The platinum filling is sometimes alloyed with silver. The most noticeable defect of this kind of false coin is that—THE "RING" IS NOT PERFECT.

Experts also bore deep holes in the edges of the double eagle, drilling out about seven dollars' worth of gold. The holes are then nearly filled with cheap composition and the opening soldered up with gold. Reeding nicely fixed over. The "ring" of the piece is almost destroyed.

Counterfeits of the Double Eagle have been made from gold excessively alloyed with copper, the surface being gilded or electroplated with gold of standard fineness. The pieces thus produced are either too light or too large, and the color of the surface, especially when worn, is not the same as that of the genuine. Such pieces are not as dangerous as the filled coins.

The dates of the counterfeits of the double eagle are as follows:

1850—Weight, 360 grains, or 156 grains light. Gold fineness, about .500.

1880—Weight, 296 grains; composition metal gold plated. A very poor coin.

## Eagle.—\$10.

Authorized to be coined, act of April 2, 1792. Weight, 270 grains; fineness, .916 $\frac{2}{3}$ . Deviation in weight allowed in coinage, .5 of a grain. Deviation in fineness allowed in assay, .001; lowest, .899; highest, .901. Coinage commenced, 1795. Weight changed act of June 28, 1834, to 258 grains. Fineness changed act of June 28, 1834, to .899,225. Fineness changed act of January 18, 1837, to .900. Unless artificially reduced in weight, should continue current for thirty-five years from date of coinage. Allowance for natural abrasion, 1.29 grains. Least legally current weight, 256.71 grains.

### COUNTERFEITS OF THE EAGLE.

There are numerous counterfeits of the eagle, either cast of base metal in a mold and gilded, made of gold excessively alloyed with copper or other metals, and surface gilded or washed, or struck of platinum or other metal in a die, and then plated with gold of standard fineness. There are also many pieces of this denomination which have been filled or otherwise made by the same processes used upon the double eagles and half eagles herein described. The eagles coined before 1805 were extensively counterfeited, but specimens of that false issue are rare at this time. From 1805 to 1837, inclusive, no eagles were coined for circulation.

The dates of the counterfeit of the Eagle are as follows:

Dates prior to 1805 extensively counterfeited.

- 1841—Weight, 235.2 grains, or 22.8 grains light weight. Mint mark, O.  
 1847—Weight, 252 grains; a good counterfeit. New Orleans mint mark, O.  
 1849—Weight, 228 grains; gold excessively alloyed with other metals.  
 1855—Weight, 265 grains, platinum heavily gold plated. The acid test has no effect upon platinum, but the light color of the inside metal is easily seen if the edge of the coin is a little worn.  
 1861—Weight, 154 grains, or 104 grains light; coin gold plated.  
 1877—Weight, 178 grains; plated coin, thicker than the genuine, and has on it letter S, in imitation of the San Francisco mintage.  
 1879—Weight, 165 grains: plated coin, the inside metal is like type metal, and which has on it sharp impressions, but the plating fails to adhere to it properly, as the whole plating can be easily peeled off or removed.  
 1880—Weight, 150 grains; composition metal gold plated. Letter S.  
 1881—A plated coin, date 1881 and light in weight.

## Half Eagle.—\$5.

Authorized to be coined, act of April 2, 1792. Weight, 135 grains; fineness, .916 $\frac{2}{3}$ . Deviation in weight allowed in coinage, .25 of a grain. Deviation in fineness allowed in assay, .001; lowest, .899; highest, .901. Coinage commenced, 1795. Weight changed, act of June 28, 1834, to 129 grains. Fineness changed, act of June 28, 1834, to .899,225. Fineness changed, act of January 18, 1837, to .900. Unless artificially reduced in weight, should continue current for twenty years from date of coinage. Allowance for natural abrasion, .64 of a grain. Least legally current weight, 128.36 grains.

### COUNTERFEITS OF THE HALF EAGLE.

There are numerous counterfeit of the half eagle, made in the same way as those of the eagle, and many pieces of this denomination have been filled or otherwise made by the same processes used upon the double eagle and eagle, already described. One piece—a half eagle of date 1844 with silver filling—weighed just 129 grains. Its gold part weighed 84 $\frac{1}{2}$  grains and was .915 fine; value of gold, \$3.30. Its inside silver planchet weighed 44 grains and was .897 fine; whole value, \$3.40. This same class of half eagles of other dates—1845, 1847, etc.—have been found in some cases to weigh 10 or 12 grains under weight, and in some cases a little over weight; one piece had the obverse gold planchet .902 $\frac{1}{2}$  fine, and the reverse one .901 $\frac{1}{2}$  fine. These coins of silver filling have the inside silver planchet made of a little less than the proper diameter of the coin; so that, after the silver and the two gold planchets are soldered together, the projecting rim of one of the gold plates is bent up to meet the other gold one of correct diameter, and thus it forms the edge of the coin, and making the whole coin of right diameter, when the same is then finished by a blow in a coining-press, and the effect of the blow is visible on the silver planchet. These coins have also about as good a general appearance in every way as the genuine; though rather a dull sound in ringing, but not as if flawed; and where their weight is kept up they are a little thicker than the genuine. There are also half eagles and other denominations of gold coin with a different filling, done in different ways. Some are filled with platinum and are exceedingly dangerous, being of good ring and of the same weight, diameter, and thickness of the genuine coin; such are of later dates, by about fifteen years or more, than the pieces with silver filling just mentioned.

Numerous other counterfeit of the half eagle are struck in well-executed dies, with weight correct, or very nearly so. They are dangerous when new; but if somewhat worn on the edges, they will show the platinum or other metal underneath the plating, while a number of the counterfeit do not vary sufficiently from the genuine to be detected by any of the gauge-seales or "coin detectors" which ignorant or unprincipled dealers advertise as "entirely reliable" and "affording complete protection against counterfeit coin." Those half eagles composed of gold excessively alloyed with copper or other metals will vary from about .800 to .500 fine. One of the latter kind, weighing 67.27 grains, was sent to the director of the Mint for assay, and the composition was found to be gold 493.7 fine, and silver 238 fine, the mixture being alloyed with tin and copper, the value of the precious metals being \$1.37. These coins, however, can easily be detected by hand alone, even in the dark, as such are 63.73 grains, light weight. Those counterfeit half eagles of .800 gold fineness are very deceptive coins; they stain but slightly when tested by the acid test, but such coins nevertheless contain over \$4 worth of gold.

The dates of the counterfeits of the Half-eagle are as follows :

Some dates prior to 1821 are also counterfeited.

- 1821—Eight grains light weight, and also larger in diameter and thicker than genuine coin. In head of Liberty, chin very long. In the word United the capital N is reversed, thus,  $\mathbb{N}$ . Intrinsic value of metal, about half that of genuine.
- 1834—Gold excessively alloyed with copper and other metals; a little light in weight.
- 1837—Base metal gold plated; about 50 grains light.
- 1838—Weight, 125 grains, or 4 grains light. Gold value, \$2.75.
- 1839—Base metal gold plated; very light weight.
- 1843—Brass gilt; well executed but very light. Dahlonega, Ga., Mint mark, D. Also, one of mint mark O; a heavily-plated struck piece,  $49\frac{1}{2}$  grains light.
- 1844—Platinum, gold plated. No mint mark. Very dangerous if plating is not worn. Counterfeits about 5 grains too light. Some  $\frac{1}{2}$  grain too heavy.
- 1844—Weight, 128.9 grains; specific gravity, 15.9, genuine are about 17.20, gold fineness, 805 $\frac{1}{2}$ ; silver, 23; value, \$4.47. Reeding faulty but very fair; color good, a trifle yellowish. Examined and assayed at the Philadelphia mint.
- 1845—Value of metal, about  $\frac{2}{3}$  of the face value; a good counterfeit, but light weight.
- 1847 } Platinum gold plated; weight same as genuine; ring good; very dangerous until  
1848 } worn, when they show the platinum on the edges. The acid test has no effect
- 1851, 1853 } Gold excessively alloyed with copper and other metals; all light weight  
1855, 1857 } from 4 to 14 grains.  
1858, 1860 }
- 1856—No mint mark; fineness, 704; value, \$3.85; a trifle light weight; reeded edge excellent; copper and silver as alloy
- 1861—Plating thin, no mint mark in imitation of the Philadelphia mintage; light weight, but a well cast piece.
- 1862—Gold fineness, 762; a little light in weight.
- 1869—Platinum well plated with gold; struck piece, and of size and weight nearly correct. Very dangerous when new.
- 1872—No mint mark. Fineness, 848. Weight, 128.8 grains. Value of gold, \$4.70. A very fine counterfeit every way. Reeding is of as good if not a better quality of work than genuine, though of a less number of reeds than is usual. Coin a trifle large in diameter, more convex on the surface, and a very little off color. Ring good.
- 1872 } Gold excessively alloyed; coins a few grains underweight  
1875 }
- 1880 } Cast pieces and gilded; weight, but 60.6 grains; proper diameter, but thickness  
1881 } greater.
- 1881—Brassy color and weighs 76.5 grains.
- 1881—No mint mark. Weight, 127.4 grains; specific gravity, 16.3; 8-thousandths of an inch too thick; gold fineness, about 800; value of gold, about \$4.38; a struck piece, with reeding irregular; raised edge, or milling very slightly done; some with dimly struck impressions serving the idea of a worn coin, and these coins stain slightly under the acid test. Similar coins of this date, assayed at the Philadelphia mint, proved to be of gold fineness, 798; copper, 153; silver, 38; platinum, 11; value, \$4.43; specific gravity, 16; weight, 128.7 grains, or .3 of a grain below the standard weight.
- 1882—Similar to those of 1881, but the reeding, milling, etc., well executed; fineness, about 800.
- 1882—No mint mark; a plated piece; weight, 103 grains; too thick; coin looks well when new, and on some the reeding is very good.
- 1885—No mint mark. It is said to have been struck up in a die; it has a good appearance, but is light weight.

### Three Dollar Piece.—\$3.

Authorized to be coined, act of February 21, 1853. Weight, 77.4 grains; fineness, .900. Deviation in weight allowed in coinage, .25 of a grain. Deviation in fineness allowed in assay, .001; lowest, .899; highest, .901. Coinage commenced, 1854. Unless artificially reduced in weight, should continue current for fifteen years from date of coinage. Allowance for natural abrasion, .38 of a grain. Least legally current weight, 77.02 grains.

## COUNTERFEITS OF THE THREE DOLLAR PIECE.

The coinage of three dollar pieces has been, as may be noted, quite limited, yet this denomination of gold coin has been considerably counterfeited, the false coin being struck in a die from base metal, and so perfectly executed as to be dangerous. In color this counterfeit is a close imitation of standard gold, and a careful comparison of the general appearance and device of the false piece with that of the genuine coin is necessary to detect the difference between them. Genuine three dollar pieces are sometimes swedged with fraudulent intent between plates of copper until of the diameter of the half eagle, when, the device and general appearance of the pieces being well preserved, they are placed in rolls among half eagles, and, unless detected, pass for five dollars.

To detect counterfeits of the three dollar piece use the regular tests given under the head of TESTS FOR COIN, as directed in the paragraph entitled HOW TO DETECT BASE GOLD COINS AND COUNTERFEITS.

**Quarter Eagle.—\$2½.**

Authorized to be coined, act of April 2, 1792. Weight, 67.5 grains; fineness, .916⅔. Deviation of weight allowed in coinage, .25 of a grain. Deviation of fineness allowed in assay, .001; lowest, .899; highest, .901. Coinage commenced, 1796. Weight changed, act of June 28, 1834, to 64.5 grains. Fineness changed, act of June 28, 1834, to .899,225. Fineness changed, act of January 18, 1837, to .900. Unless artificially reduced in weight, should continue current for fifteen years from date of coinage. Allowance for natural abrasion, .32 of a grain. Least legally current weight, 64.18 grains.

## COUNTERFEITS OF THE QUARTER EAGLE.

There are numerous counterfeits of the quarter eagle, made in the same way as those of the eagle, and even quarter eagle pieces have been filled or otherwise made by the same processes used upon the double eagle and half eagle already described. Quarter eagle filled pieces of date 1843 weigh from 1 to 9 grains light; one piece was a little over weight. Such have on them the letter O, which represents the Mint-mark of the New Orleans Mint.

The dates of the counterfeits of the Quarter-eagle are as follows :

1843 } Heavily-plated pieces, about 22 grains light.

1844 }

1846—No mint mark. Weight, 48 grains instead of 64½ grains; copper and silver; heavily gilt.

1851—Weight, 61 grains, or 3½ grains light. The nose of the Goddess of Liberty is very different from that on the genuine coin.

1852—Gold excessively alloyed with other metals. A little light weight.

1853—Weight, 42½ grains. No mint mark.

1856—Below standard fineness, and light weight by a few grains.

1858—Plated piece. No mint mark. Weight, 45.9 grains.

1858—Brass. No mint mark. Well struck piece, but 25 grains too light and of brassy color.

1861—Weight, 42 grains; heavily gold plated.

1862—Platinum heavily gold plated; full weight and very dangerous unless coin is worn, thus exposing the grey metal especially on the edges.

1866—Poor coin; fair weight; letters "s" in States reversed.

1874—Gold, excessively alloyed with copper or other metal. Reeding irregular. Coins about 25 grains too light.

1879—Weight, 51½ grains; good appearance but no ring.

**The Gold Dollar.—\$1.**

Authorized to be coined, act of March 3, 1849. Weight, 25.8 grains; fineness, .900. Deviation in weight allowed in coinage, .25 of a grain. Deviation in fineness allowed in assay, .001; lowest, .899; highest, .901. Coinage commenced, 1849. Unless artificially reduced in weight, should continue current for about thirteen years from date of coinage. Allowance for natural abrasion, only .13 of a grain. Least legally current weight, 25.55 grains.

## COUNTERFEITS OF THE GOLD DOLLAR.

The Gold Dollar, of 1849, was .5 of an inch in diameter, and .025 of an inch thick, and coined up to 1854. Counterfeits of the gold dollars of the first pattern are numerous. Gold dollars since 1854 (new pattern) are .55 of an inch in diameter and .018 of an inch thick.

The dates of the counterfeits of the gold dollar are as follows:

1851, 1852, 1853, 1854, 1856, 1857, 1861.

Those of date 1854, plated pieces old pattern, and with no mint mark; were 14.2 grains, 15.8 grains and 16.9 grains, instead of 25.8 grains; a fair sample in weight of the counterfeit dollars of nearly all the dates.

U. S. MINT TEST FOR GOLD COIN.

- Strong Nitric Acid 6½ drachms.
- Muriatic Acid ½ drachm, or 10 m. or drops.
- Pure Water 1¾ drachm, or 100 m.

TEST FOR SILVER COIN.

- Nitrate of Silver 24 grains.
- Nitric Acid 10 m. or drops.
- Water 1. ounce.

Observe the action of a drop of the fluid test on genuine coin. If the counterfeit coin is heavily plated and not worn scrape the edge before applying the test, then if the coin is of base metal it will at once turn black. See page 39.

For convenience use the regular coin test bottle of hollow stopple, or one having the glass stopple sharp pointed and reaching far down into the bottle. Any Druggist can prepare the compounds at a trifling expense to the purchaser.

TOTAL MONEY CIRCULATION.

(EXCLUSIVE OF MINOR COIN.)

For July 1, 1889. (the figures are taken from Report of the Director of the Mint &c.) the total amounts and the different kinds of U. S. money in the United States with the ownership and location of same are shown as follows:—

	Total in U. S. Treas.	In U. S. Treasury. Net Cash.	In National Banks	In Other Banks and in General Circulation.	Total Money.
Gold Coin.....	\$237,586,792	120,456,563	82,651,610	293,829,958	\$614,068,360
“ Certificates.....	36,918,323		69,517,790	47,612,439	
Gold Bullion in Treasury...	65,995,145	65,995,145			65,995,145
Silver Dollars.....	279,045,351	21,889,786	6,788,730	47,670,569	333,502,650
“ Certificates.....	5,474,181		12,452,057	244,703,508	
Subsidiary Silver.....	25,124,672	25,124,672	4,495,681	46,981,483	76,601,836
Silver Bullion in Treasury..	10,444,443	10,444,443			10,444,443
Legal Tender Notes.....	47,196,825	30,241,825	97,456,832	202,027,359	346,681,016
Certificates of Deposit....	240,000		16,955,000		
Old Demand Notes.....				56,442	56,442
National Bank Notes.....	4,158,330	4,158,330	27,715,587	179,505,046	211,378,963
Fractional Paper Currency.					6,916,690
<b>Total.....</b>	<b>\$712,184,062</b>	<b>\$278,310,764</b>	<b>\$318,031,287</b>	<b>\$1,062,386,804</b>	<b>\$1,665,645,545</b>

In the above total amount of money, a certain amount of same is kept from actual circulation and held as security for the above-mentioned notes; and just in the case of the legal tender notes, \$100,000,000 of coin is thus held in the Treasury by the Government.

## Standard Silver Dollar.

Authorized to be coined, act of April 2, 1792. Weight, 416 grains; fineness, .892 & 89-208. Deviation in weight allowed in coinage, 1.5 grain. Deviation in fineness allowed in assay, .003; lowest, .897; highest, .903. Coinage commenced, 1794. Weight changed, act of January 18, 1837, to 412.5 grains. Fineness changed, act of January 18, 1837, to .900. Coinage discontinued, act of February 12, 1873. Total amount coined previous to act of February 12, 1873, \$8,045,838. Coinage re-authorized, act of February 28, 1878; a new pattern, but same weight and fineness as dollars of 1837 and subsequent years. For total amount coined see page as per index.

### COUNTERFEITS OF THE STANDARD SILVER DOLLAR.

Various dates up to 1873 were counterfeited. They were generally composed of compound metal or brass, having a keen ring like glass, and unless silver plated and unused were of a brazen color, yet near the proper weight and specific gravity. Others of like dates were of white metal but not so perfect, being underweight or oversized.

All dates since 1878 are counterfeited. There are innumerable kinds and quantities of counterfeit dollars. Many white metal coins of these dates, nearly the size of the genuine coin, have an excellent impress, good color, and fine general appearance when fresh from the mold; but very soon assuming a leaden spotted color after being handled, unless well covered with silver. Most of these coins are from 95 to 125 grains too light, a light weight that can be readily detected by hand alone without the aid of scales. Some of them are of right size, others a little too thick to pass through the ordinary slots or gauges used for detecting the improper diameter and thickness of coins. Many of them plainly show the imperfections usual with molded coins, having spots of a rough sanded appearance, with figures and letters, with the centers of same filled up with the metal, or parts not clean cut like the impressions from a die, while numbers of them have the reeding poor and imperfect, and ring very bad. One dollar coin of date 1884, with no mint mark, weighs, however, 347 grains, or  $65\frac{1}{2}$  grains too light; it has a short, sharp ring, is a little too thick to pass through the ordinary gauges, and its reeding runs diagonally across its edge. Those dollars made from German silver are very light weight, and if new are so heavily plated with silver as to resist the acid coin test, unless deeply scraped before applying the acid.

Dangerous dollars of date 1883, no mint mark, weigh 360 grains, or about 50 grains too light; heavily plated with standard silver; fine general appearance in every way; have a fair ring; are about 260 fine or contain 15 or 20 cents of silver; the size is correct by the ordinary gauges.

Other dangerous dollars of date 1883, no mint mark, are heavily plated, weigh  $378\frac{1}{2}$  grains; some only 30 grains too light; general appearance as good as genuine; specific gravity 8.40, genuine are 10.20 to 10.30; ring good on a counter, but not the true ring when balanced upon the finger. One dated 1884 is of same class of coin, weighing 375.4 grains. In size none of this class can be detected by the ordinary slots or gauges, though the counterfeits are a little too thick but not on the edge. Weigh, ring, or scrape and apply the acid test and pay little attention to dates as all are counterfeited.

A few molded dollars date 1882, no mint mark, weigh 460 grains,  $47\frac{1}{2}$  grains too much; for diameter they are a little too small; for thickness they will pass through ordinary gauges for same; thinly plated; ring poor.

NOTE—Old silver dollars of certain dates command high premiums, especially the following:—Date 1794; obverse, profile of Liberty facing right; reverse, eagle in a wreath, and on the edge of coin, "one dollar or unit .90 hundred cents." Date 1798; obverse, bust of Liberty facing right, with 13 or 15 stars; reverse, small eagle on clouds in a wreath. Date 1804; obverse, bust of Liberty facing right; reverse, national arms, etc. Date 1836—C. Gobrecht—stars on reverse: also 1830 and 1839—stars on obverse only, obverse, Liberty seated facing right; reverse, flying eagle. Dates 1851, 1852, 1854, 1858; obverse, Liberty seated facing right; reverse, eagle standing, and without words "In God we trust." This motto was put on our coins only since 1866. Alterations of dates are numerous. Thus, 1850 and 1853 have been altered to 1851 and 1852, and 1801 changed to 1804, as the latter, if genuine, would probably be worth six or seven hundred dollars.

With dollars of 1878, those with nine leaves on olive branch, and eagle with 8 tail feathers have been represented to be worth anywhere from two to twelve dollars; but the fact is, thousands of them were coined, though if such coins are in good condition, uncirculated, they may be sold to those who want them for about 75 cents premium, and the same way with those coins of 1878 having but 7 feathers in eagle's tail. Those of 1878 are of uniform value with the coinage of succeeding years, and all proofs, or even uncirculated coins, are worth a small premium to those who want them.

The coinage of the Silver Dollar began 1794, free coinage and a full legal tender, and up to 1836, but \$1,439,517 of that piece had been coined. No more silver dollars were coined until 1836, when \$100 were coined. In 1838 only pattern pieces were coined. In 1839, \$300 were coined. In 1849 \$51,005 were coined, and the coinage continued in moderate sums every year until 1858, when no silver dollars were coined, unless proof pieces. Larger amounts were coined the succeeding years, until 1873, when the coinage was discontinued. Again re-authorized February 28, 1878, as a legal tender to any amount, but bullion purchased at market rates and coinage limited, a new pattern of the silver dollar was provided, and coinage of the same resumed, and up to October 1st of the same year, 210,212,500 of the new pattern were coined.

## Trade Dollar.

Authorized to be coined, act of February 12, 1873. Weight, 420 grains; fineness, .900. Deviation in weight allowed in coinage, 1.5 grain. Deviation in fineness allowed in assay, .003; lowest, .897; highest, .903. Only "proofs" were struck of date 1873. Coinage commenced, 1874. Trade dollars are a legal coin but not now a legal tender. Demonetized July 22, 1876, and the Secretary authorized to limit the coinage thereof. Amount coined to close of fiscal year ended June 30, 1876, \$15,418,450. Coinage suspended by Secretary of the Treasury, February 22, 1878. Total amount coined to close of fiscal year ended June 30, 1878, \$35,959,360. Proof pieces executed during the calendar year 1879, \$1,541, in 1880, \$1,987; and in 1881, \$960, etc., etc., up to 1884.

By Act of March 3, 1887, and their value was then about 80 cents, they were redeemed dollar for dollar until Sept. 3, 1887. The amount so redeemed was \$7,689,036. Said Act then also repealing all laws for their coinage and issuance.

For present value, see coins and notes of the world, as per index

### COUNTERFEITS OF THE TRADE DOLLAR.

The Trade Dollar of all dates has been variously, repeatedly and extensively counterfeited. They are mostly of type metal, and many were circulated in the East Indies, China, Japan and other countries, and are usually from 95 to 130 grains light. Some of the counterfeits are of excellent ring and good general appearance, but very soon show the dark color after being handled; and some have a smooth, greasy, or quicksilver feeling when rubbed between the thumb and fingers.

A few of the counterfeits weigh 417 grains, or only 3 grains too light. They are of silver excessively alloyed with other metals, and have a ring somewhat defective. Apply the acid test.

NOTE.—The trade dollar was authorized by act of February 12, 1873, a legal coin of the United States, a legal tender in all sums not exceeding \$5, and the only silver dollar then authorized to be coined, as the standard dollar coinage was thereby repealed. At the time of the above authorizing act neither silver nor gold was in full use as money in the United States, unless west of the Rocky Mountains, where trade dollars were first put in circulation, the currency at other places being upon a paper basis. The gold dollar was then quoted here at about \$1.14, while a trade dollar would then be worth as silver bullion about \$1.16, and would cost about 1½ cents to coin it; including coinage, and if quoted in gold at London price, it would then be worth about \$1.04 in gold. Specie resumption was January 1, 1879.

The trade dollar, when thus authorized, was intended for exportation abroad; especially to China, Japan, and other Oriental countries, where, in competition with the Mexican silver dollar, which it excels in intrinsic value as bullion, by (.002) two-tenths of a cent, the trade dollar had a popular circulation; and thus making a foreign market for American silver. The joint resolution of Congress of July 22, 1876, demonetizing the trade dollar is in these words: "That the trade dollar shall not hereafter be a legal tender, and the Secretary of the Treasury is hereby authorized to limit from time to time the coinage thereof to such an amount as he may deem sufficient to meet the export demand for the same." At this time of demonetization of coin, gold was quoted in paper at about \$1.03; but silver bullion if quoted in gold at the London price only—at an average of 52¾ pence, though the highest quotation in 1876 was 58½, and the lowest 46¾ pence—would show the bullion in the trade dollar to be worth about 91 cents in gold. On October 15, 1877, the trade dollar coinage was discontinued at the mint at Philadelphia, though afterwards coined at the mints in the west, but finally suspended February 22, 1878. The present average bullion value of full weight trade dollars is noted in list of coins and notes of the commercial nations of the world as per index.

## Half Dollar.

Authorized to be coined, act of April 2, 1792. Weight, 208 grains; fineness, .892 & 89-208. Deviation in weight allowed in coinage, 1.5 grain. Deviation in fineness allowed in assay, .003; lowest, .897; highest, .903. Coinage commenced, 1794. Weight changed, act of January 18, 1837, to 206.25 grains. Fineness changed, act of January 18, 1837, to .900. Weight changed, act of February 21, 1853, to 192 grains. Weight changed, act of February 12, 1873, to 12.5 grams, which are equal to 192.90+ grains.

### COUNTERFEITS OF THE HALF DOLLAR.

The Half Dollar has been fearfully counterfeited; false half dollars of every kind may be found of almost any date since they were first coined. Very dangerous counterfeits of the silver half dollars are of dates 1841, 1842, 1843, 1860, 1872, 1876 and 1877, all these are made of compound metal or brass, struck in a die, and heavily silver plated; they are generally well executed, having a fair impress, and are of good color when new; when the plating is somewhat worn they present a brazen color, and all have a sharp, keen ring like glass; some of those dated 1841, 1842 and 1872, are the exact size and weight of the genuine half dollar, and can not be detected by a scale or gauge. One piece, dated 1876, is a minute trifle oversize, and but 1.4 grain light weight. Another struck piece, of same date, with no mint mark, weighs 201.7 grains, or 8.8 grains overweight: the reeding is well done; general appearance good, but the letters a little defective, especially the word "Liberty" on the shield of the Goddess of Liberty; when worn the coin shows the brass metal underneath the plating; and is a little too thick to pass through the ordinary gauges. One dated 1877 is but very little oversize and but 7.7 grains light.

Well made counterfeits, of a composition of silver, copper and zinc, and intrinsically worth about 17 cents, have been passed in great numbers, though from 7 to 10 grains light weight. Others of German or nickel silver, and sometimes silver plated, are handsome pieces, but light weight unless oversized; one of these, dated 1823, having the lettered rim, is an excellent imitation; one also dated 1830, with the lettered edge, weighs 191 grains, or is 17 grains too light, and has a false ring. A counterfeit half dollar, dated 1868, weighs 191 grains, or but 1 grain too light; it is of proper thickness, but a little too large in diameter. Another one of same date, mint mark S, weighs 13.6 grains too heavy; it is .025 inch too small in diameter, .018 inch too thick, and of .784 fineness. The reeding on this coin is irregular and shallow, surface of coin greasy; specific gravity 10.07, should be 10.30.

Coins made in a mould of white metal, or of type, or other metal, are of every date, and many of them, when new, are of a good color, as well as a good appearance if well moulded; but all have a dull ring, or one unlike that of the genuine coin, and weigh from 22 to 58 grains underweight. Some are of right size, others a little too thick to enter the ordinary gauges used for size of coins; one, however, of proper size by these gauges, and dated 1862, with Mint mark S, weighs but 19 grains underweight; it has a good appearance, fair reeding, a little sharper glass like ring than genuine when balanced upon the end of the finger, but on a counter the ring is excellent.

## Quarter Dollar.

Authorized to be coined, act of April 2, 1792. Weight, 104 grains; fineness, .892 & 89-208. Deviation in weight allowed in coinage, 1.5 grain. Deviation in fineness allowed in assay, .003; lowest, .897; highest, .903. Coinage commenced, 1796. Weight changed, act of January 18, 1837, to 103.125 grains. Fineness changed, act of January 18, 1837, to .900. Weight changed, act of February 21, 1853, to 96 grains. Weight changed, act of February 12, 1873, to 6.25 grams, which are equal to 96.45+ grains.

### COUNTERFEITS OF THE QUARTER DOLLAR.

The Quarter Dollar has been extensively counterfeited, and the false pieces are of almost every date, since it has been coined. The most dangerous counterfeits are dated 1858 and 1860, of compound metal or brass, struck in a die, and heavily silver plated, having the exact weight of the genuine coin. One dangerous piece, dated 1853, upon assay, was found to consist of a composition partly iron; it was heavily silver-plated, had a fair ring, varied but little from the true size, but was somewhat light. One piece, of date 1861, having a fair appearance of genuine silver but a little sharper ring, is of 15 grains underweight. Counterfeits of the quarter dollars of 1857 and 1861, have been common, being made of a composition consisting mostly of tin. Others of various dates have been made of soft, base metal, or composition, some of lead; such pieces are from 20 to 30 grains light.

## Twenty Cent Piece.

Authorized to be coined, act of March 3, 1875. Weight, 5 grams, which are equal to 77.16+ grains; fineness, .900. Deviation in weight allowed in coinage, 1.5 grain. Deviation in fineness allowed in assay, .003; lowest, .897; highest, .903. Coinage commenced, 1875. Coinage discontinued, act of May 2, 1878. Total amount coined, \$271,000.

### COUNTERFEITS OF THE TWENTY CENT PIECE.

Very few counterfeits of the Twenty Cent piece have been put in circulation.

## Dime.

Authorized to be coined, act of April 2, 1792. Weight, 41.6 grains; fineness, .892 & 89-208; value, 10 cents. Deviation in weight allowed in coinage, 1.5 grain. Deviation in fineness allowed in assay, .003; lowest, .897; highest, .903. Coinage commenced, 1796. Weight changed, act of January 18, 1837, to 41.25 grains. Fineness changed, act of January 18, 1837, to .900. Weight changed, act of February 21, 1853, to 38.4 grains. Weight changed, act of February 12, 1873, to 2.5 grams, which are equal to 38.58+ grains.

## COUNTERFEITS OF THE DIME.

Counterfeits of the Dime are numerous and of various dates. False dimes of compound metal or brass, struck in a die and silver washed or plated, dated 1848, have been passed freely. Counterfeits, made of soft white metal, some of them at least, are, in appearance, close imitations of the genuine coin, and so far almost defy detection. A false dime, of 1875, made of antimony, lead and zinc, has all the bright color and fine appearance of a newly struck genuine coin. False dimes, of various dates, are in circulation; many are poor, but some are well executed, good impress, fair color when new, but if worn, soon become brazen, tin-like, or leaden in color, besides being generally underweight or oversized; they usually weigh from 3 to 12 grains light, and, if of the cheap, soft metal, can be bent or even broken by the fingers. One dime, of date 1884, is about proper size, has excellent reeding, and weighs  $36\frac{1}{2}$  grains, or only 2 grains light.

### Half Dime.

Authorized to be coined, act of April 2, 1792. Weight, 20.8 grains; fineness, .892 & 89-208; value, 5 cents. Deviation in weight allowed in coinage, 1.5 grain. Deviation in fineness allowed in assay, .003; lowest, .897; highest, .903. Coinage commenced, 1794. Weight changed, act of January 18, 1837, to 20.625 grains. Fineness changed, act of January 18, 1837, to .900. Weight changed, act of February 21, 1853, to 19.2 grains. Coinage discontinued, act of February 12, 1873. Total amount coined, \$4,906,946.90.

## COUNTERFEITS OF THE HALF DIME.

Very few counterfeits of the Half Dime have been put in circulation.

### Silver Three Cent Piece.

Authorized to be coined, act of March 3, 1851. Weight, 12.375 grains; fineness, .750. Deviation in weight allowed in coinage, .5 of a grain. Deviation in fineness allowed in assay, .003; lowest, .897; highest, .903. Coinage commenced, 1851. Weight changed, act of March 3, 1853, to 11.52 grains. Fineness changed, act of March 3, 1853, to .900. Coinage discontinued, act of February 12, 1873. Total amount coined, \$1,281,850.20.

## COUNTERFEITS OF THE SILVER THREE CENT PIECE.

Counterfeits of the Silver Three Cent piece were once quite numerous, made of compound metal or brass, struck in a die and silver washed, they are generally close imitations of genuine, and, when new, well calculated to deceive.

## MINOR COINS OF THE UNITED STATES.

*R. S.—“Sec. 3587. The minor coins of the United States shall be a legal tender at their nominal value for any amount not exceeding 25 cents in any one payment.”*  
*If mutilated, there is no provision for the redemption of minor coins. See also under the head of GOLD AND SILVER COINS.*

### FIVE CENT—(NICKEL).

Authorized to be coined, act of May 16, 1866. Weight, 77.16 grains; copper, 75 per cent.; nickel, 25 per cent. Deviation in weight allowed in coinage, 3 grains. Deviation allowed in metal, 2.5 per cent. of nickel; (actual, much less.) Coinage commenced, 1866. New pattern in 1883, at first without, and afterwards with the word “cents” thereon.

COUNTERFEITS.—Very fine counterfeits of the Nickel Five Cent piece, of the old pattern, have been made and struck in a die; they are of the same color, weight and alloy of the genuine, and almost defy detection. Other fine counterfeits of this piece are numerous. Struck pieces, of date 1875, are of good color, of true weight, but imperfect in the lettering, especially in the words “States of,” as the letters S and O too closely join each other.

Other fine struck pieces, many of good color, and of different dates, weigh from 66 to 74½ grains; they are all slightly imperfect in the form or spacing of the letters on the obverse side of the coin.

With numerous counterfeits of both the old and new pattern, cast in a mold, most of them lack the sharp, distinct impress given by a good die to genuine coin, and being rough and of a leaden color, they become black and dirty in appearance, and usually weigh from 60 to 75 grains; a few, however, weigh 78½ grains.

#### THREE CENT—(NICKEL).

Authorized to be coined, act of March 3, 1865. Weight, 30 grains; copper, 75 per cent.; nickel, 25 per cent. Deviation in weight allowed in coinage, 2 grains. Deviation allowed in metal, 2.5 per cent. of nickel; (actual, much less.) Coinage commenced, 1865.

COUNTERFEITS.—Counterfeits of the Nickel Three Cent piece are very numerous, and some of them well calculated to deceive. One dated 1865, is a fair counterfeit, while others are inferior; being cast pieces, they lack the sharp, distinct impress given by the die to a genuine coin, and being rough, soon become black and dirty in appearance.

#### TWO CENT—(BRONZE).

Authorized to be coined, act of April 22, 1864. Weight, 96 grains; copper, 95 per cent.; tin and zinc, 5 per cent. Coinage commenced, 1864. Coinage discontinued, act of February 12, 1873. Total amount coined, \$912,020.00.

#### CENT—(COPPER).

Authorized to be coined, act of July 6, 1787. Coined for the United States, by James Jarvis, at New Haven, Conn. Authorized to be coined, (by the United States Mint,) act of April 2, 1792. Weight, 264 grains; copper. Weight changed, act of January 14, 1793, to 208 grains. Deviation in weight allowed in coinage, 2 grains. Coinage commenced, 1793. Weight changed, by Proclamation of the President, January 26, 1796, in conformity with the act of March 3, 1795, to 168 grains. Coinage discontinued, act of February 21, 1857. Total amount coined, \$1,562,887.44.

#### CENT—(NICKEL).

Authorized to be coined, act of February 21, 1857. Weight, 72 grains; copper, 88 per cent.; nickel, 12 per cent. Coinage commenced, 1857. Coinage discontinued, act of April 22, 1864. Total amount coined, \$2,007,720.00.

#### CENT—(BRONZE).

Authorized to be coined, act of April 22, 1864. Weight, 48 grains; copper, 95 per cent.; tin and zinc, 5 per cent. Deviation in weight allowed in coinage, 2 grains. Coinage commenced, 1864.

#### HALF CENT—(COPPER).

Authorized to be coined, act of April 2, 1792. Weight, 132 grains; copper; "Not a legal tender." Weight changed, act of January 14, 1793, to 104 grains. Coinage commenced, 1793. Weight changed, by Proclamation of the President, January 26, 1796, in conformity with the act of March 3, 1795, to 84 grains. Coinage discontinued, act of February 21, 1857. Total amount coined, \$39,926.11.

#### COUNTERFEITS OF THE CENT AND HALF CENT.

Even the cents of each kind, as well as the half cents, have been counterfeited, and the small copper and bronze currency extensively corrupted. The counterfeits of the copper cent are excellent copper imitations, and were struck from dies, originally made for the purpose of manufacturing copies of unique and rare cents of such dates as commanded high premiums among collectors, numismatologists and antiquarians. False cents, imitations of the genuine copper coin, have also been cast of various metals, but these pieces are generally rough and poor copies, some of them being of brass or of white metals, evidently executed by workmen merely to show their skill in the art of "found-ing." The counterfeits of the half cent are of the same general character as those of the cent. Cast pieces, in imitation of the nickel cent, are either of a leaden or brazen color, and usually weigh from 55 to 70 grains. Fair counterfeits, in imitation of the bronze cent, are made of pure copper, and struck in a die, but the color of the metal will generally distinguish such.

# Stolen United States Bonds.

## TREASURY DEPARTMENT.

WASHINGTON, D. O., June 2, 1890.

Registered Bonds of the following Acts, numbers, and denominations are caveated upon the Books of this Department at this date, viz:

ACT OF JANUARY 28, 1847.

\$200 each—1620 1710 2132 2270 2271  
2455.  
300 each—1697 1698 1699.  
500 each—2987 3085.  
1000 each—7422 7598 7599 8430.  
5000 each—3044.

ACT OF FEBRUARY 8, 1861.

\$1000 each—43 44 2749 5221 6125.  
5000 each—2280.

ACT OF MARCH 2, 1861, "OREGON WAR."

\$50 each—270.  
100 each—276 682.  
500 each—1014 1089.

ACT OF JULY 17, 1861.

\$50 each—1181 1267.  
\$100 each—30 31 888 5928 5930 6451 8069  
8070 8071 8072.  
500 each—933 1394 1867 4303 6848.  
1000 each—2463 2533 6833 6861 8081

# COINS AND NOTES

## OF THE

# COMMERCIAL NATIONS OF THE WORLD.

This list of the legal tender and various uncurrent coins of the commercial nations of the world is of strict business importance and reliability. The coins named, unless designated as being "no longer current," are those in legal and actual circulation, and with quotations for uncurrent coins not inclusive of ancient pieces seldom seen outside cabinets and museums. The values here given are the current values of the United States coins and the exchange value of the foreign gold and silver coins corrected each month for DYE'S GOVERNMENT COUNTERFEIT DETECTOR. See note on page 55.

### UNITED STATES.

##### SILVER COINS.

Two Kroner.....	— .53
Krone.....	— .26
Half Krone.....	— .13
Quarter Krone.....	— .06

The bullion value of the Silver Krone is about 24 per cent. less.

In Denmark bank notes and silver coins are each at par with the gold coins.

##### BANK NOTES.

1, 5, 10, 50, 100, 500 and 1000 Kroner or Crowns.

\*The fineness of North Carolina Gold Coins varied but little during the mintage of O. Bechtler, from 1830 to 1842. His coins of 20 carats fine are stamped "N. C. Gold," usually, those of 21 carats "Carolina Gold." The weight of the "N. C." Five Dollar Gold piece ranges from 138 to 140 grains, and the "Carolina" at from 132 to 134 grains. After 1842 the mint passed into the possession of A. Bechtler, and his name appeared upon its coinage instead of that of O. Bechtler. The only marked effect which this change produced upon the gold coins from 1842 to 1848, when that establishment was abolished, was a considerable deficiency in value as compared with former emissions.

**FINLAND.**

# BRITISH AMERICAN CURRENCY.

## DOMINION OF CANADA.

The seat of Government of the Dominion of Canada is in Ottawa, Province of Ontario, where the Public Buildings form three sides of an oblong hollow square, the Parliament buildings being on the north side, facing inward. The offices of the Finance Department are located in the eastern building, with Sir S. L. Tilley as Minister of Finance, John Mortimer Courtney as Deputy-Minister of Finance, and Fred. Toller as Comptroller of Currency. No bills of any denomination are actually issued to the public from this department in Ottawa, but are issued through the sub-offices of the Receiver-General at the following points, each of which is in charge of an Assistant-Receiver-General, viz. :—

Montreal, P. Q.....	E. J. Barbeau, A.R.G.
Toronto, Ontario.....	C. J. Campbell, A.R.G.
St. John, N. B.....	R. W. Crookshanks, A.R.G.
Halifax, N. S. ....	J. R. Wallace, A.R.G.
Victoria, B. C.....	John Graham, A.R.G.
Winnipeg, Manitoba.....	H. M. Drummond, A.R.G.

The system of paper money of Canada is similar to that of the United States, consisting of Dominion notes, which now amount to \$15,000,000, while the note circulation of the different banks amounts to about \$37,000,000, the whole volume being subject to contraction or expansion, as circumstances may warrant. The issue of Dominion notes is limited to \$20,000,000, for which specie and Government securities are held.

### CANADIAN BILLS—GOVERNMENT ISSUE

PROVINCE OF CANADA.—Bills recalled and going out of circulation—\$1 \$2, \$5, \$10, \$20, \$50, \$100, \$500, \$1000.

DOMINION OF CANADA.—Present Government issue—Scrip, 25 cents; bills of \$1, \$2, \$4, \$5, \$10, \$20, \$50, \$100, \$500, \$1000.

Some issues of "Dominion of Canada" Bills are backed "Payable at Toronto, Montreal, St. John, Halifax or Victoria, but later issues have engraved, through the centre of the green printed design on the back, the words "DOMINION OF CANADA," and are redeemed by any of the Assistant Receivers General throughout the Dominion.

The Bills of the Banks of Canada and British Provinces in distant centres of trade are subject to a discount by Brokers in the United States and Canada, and at the following rates, the highest rates prevailing in the winter months and at points most distant from the place of issue or redemption :—

# BANKS IN BRITISH AMERICA.

Bills of Issue purporting to be on any Canadian Bank not mentioned in this List are either entirely worthless or of doubtful value, and should be handled only as "Bills for Collection."

DYE'S GOVERNMENT COUNTERFEIT DETECTOR, of the United States, gives this List of Parent Banks in business in the British Dominion for the protection of all its subscribers from doubtful, broken, and worthless institutions, which previously existed in the Provinces, their bills being still in circulation and used by dishonest persons. These parent banks, however, have branches in other provinces, and bills are issued therefrom, but this fact of a different location will appear upon the bill.

The bills of the United States National Banks are all secured by deposit of United States Bonds with the National Government, which guarantees the currency though the banks may fail; hence a List such as we give of U. S. National Banks having bills counterfeited is all safety requires, as the bills of the former State and private banks are entirely superseded by the money of the National Banks.

Banks in this List having Counterfeit Bills are marked with a \*

	W. A. Weeks, Pres. ; F. Mitchell, Cashier.	
Summerside....Prince...	SUMMERSIDE BANK.....	\$1, \$2, \$5, \$10.
	A. MacMillan, Pres. ; R. C. McStavert, Cashier.	
Rustico.....Queens.†	FARMER'S BANK OF RUSTICO.....	\$1, \$2, \$5.
	Jos. Gallant, Pres. ; Adrien Doiron, Cashier.	

DISCOUNTS.—For discount rates in distant provinces see page 56.

The banks in the Province of Prince Edward Island are working under their old charters, obtained before confederation. These charters give the banks the privilege of issuing bills of smaller denominations than Five Dollars. The charter of the Merchants Bank of P. E. I. expires May 1, 1892. The charter of the Summerside Bank expires May 1, 1890.

†The Farmer's Bank of Rustico (capital about \$8,000,) is continued under the Dominion Government until 1891, its circulation is limited and its reliability may be fairly questioned.

DISCOUNTS.—For discount rates in distant provinces see page 56.

Since July 1, 1881, none of the banks in the Provinces of N. B. and N. S. have been privileged by the Canadian Government to issue bills other than \$5 and their multiples, except the People's Bank, Fredericton, N. B., and the St. Stephen's Bank, St. Stephens, N. B., which are working under their old charters obtained before confederation, and which two charters each expire May 1, 1890.

## British Columbia.

Victoria.....		BANK OF BRITISH COLUMBIA.....	\$5, \$10, \$20, \$50, \$100
		W. C. Ward, Manager,	
"		BANK OF BRITISH NORTH AMERICA (Branch).	

Bills of branch banks in British Columbia are redeemable there only, and are subject to discount in distant provinces. For rates of discount see page 56.

NOTE.—The banks of British Columbia come under the same restrictions } as the banks in the Provinces of Ontario and Quebec.

## Banks Merged into other Banks.

- City Bank of Canada, Montreal, P. Q., merged into the Consolidated Bank of Canada, Montreal, Q. C. See banks in liquidation.
- Royal Canadian Bank, Montreal, P. Q., merged into the Consolidated Bank of Canada, Montreal, P. Q. See banks in liquidation.
- Commercial Bank of Canada, Kingston, Ont., merged into the Merchants' Bank of Montreal, the bills of the former being redeemed by the latter.
- Gore Bank of Niagara, Hamilton, Ont., merged into the Canadian Bank of Commerce, Toronto, Ont., the bills of the former being redeemed by the latter.
- The Niagara District Bank, St. Catharine's, Ont., merged into the Imperial Bank of Toronto, Ont., the bills of the former being redeemed by the latter.
- The St. Lawrence Bank, Toronto, Ont., merged into the Standard Bank of Toronto, Ont., the bills of the former being redeemed by the latter.
- Union Bank of Prince Edward Island, Charlestown, P. E. I., merged Oct. 3, 1883, into Bank of Nova Scotia, Halifax, N. S. Bills of former redeemed by latter.

### Banks in Liquidation.

Consolidated Bank of Canada, Montreal, P. Q.	Bills will be redeemed at par in Montreal, until about 1890, but all tens are worthless, having been stolen unsigned and signatures forged.
Exchange Bank of Canada, Montreal, P. Q.	Suspended Sept 17, 1883. Bills redeemed at par in Montreal. Brokers are paying 95 per cent.
Stadacona Bank, Quebec, P. Q.	Bills redeemed at par in Quebec.
Pictou Bank, Pictou, N. S.	" " " Pictou.
Central Bank of Canada, Toronto, Ont.	" " " Toronto.
Federal Bank of Canada, Toronto, Ont.	" " " "
Maritime Bank of the Dom. of Can., St. John, N.B.	" " " St. John.
Brokers are paying 95 to 99 per cent.	

### Banks in Receivers' Hands or Suspended.

Bank of Upper Canada, Toronto, Ontario, in the hands of the Canadian Government as Receiver.	Bills are worth about 70 per cent. in Toronto, Ontario. Final report for settlement and final closing of this bank will probably be soon made, after which the bills will be worthless.
Bank of London in Canada, London, Ont.	Suspended Aug. 19, 1887. Bills redeemed at par in London. Brokers are paying about 95 to 98 per cent.

### Failed Banks.

### Closed Banks.

The Metropolitan Bank, Montreal, P. Q., went into liquidation about 1876 and redeemed all of its outstanding notes that were presented before the final closing up of the Bank's business.
The Bank of the People, Toronto, Ont., organized about 1835, under the Scotch banking system, by Sir Francis Hincks and Charles Beaty, of Toronto, withdrew from business in a few years, but redeemed all its outstanding notes. The bill plates were deposited with the Montreal Bank, Montreal, P. of Q.
The Provincial Bank of Canada, Stanstead, P. Q., early established under the Free Bank Act, withdrew from business January, 1864, its notes being redeemed and the securities returned by Government.
Zimmerman's Bank, Elgin, Ontario, established in 1854 under the Free Bank Act, became the Chartered Bank of Clifton by Act of Parliament in 1858. The notes of the Zimmerman Bank were redeemed and securities returned by Government.
Central Bank of New Brunswick, Fredericton, N. B. The bills of the Central Bank are now worthless for the time of redemption expired in January, 1882.
Bank of Prince Edward Island, Charlottetown, P. E. I. Final closing up April 28, 1887, and final dividend paid; hence, any bills now outstanding are worthless

## COUNTERFEIT STOLEN AND RAISED CANADIAN BILLS. ONES.

### DOMINION OF CANADA.

1 Portrait of Jacques Cartier. Red numbers. Letter D. Dated Ottawa, July 1st, 1870. "Payable at Toronto" on the back. In the counterfeits in the vignette-portrait in the upper left end of note there is a white streak running from the ear to the chin, and defining the line of the jaw-bone. There are three issues of these counterfeit bills, the difference being principally in the size of the red figures, but in no instance are the figures exactly like those used on the genuine bills. The lathe-work around the "1" on the right face of the bill is bad when examined under the glass, while the large green "1's" on the face are more blurred than on the genuine.

1 Portrait of Lady Dufferin. Letter A. Payable at Montreal. Dated 1st June, 1878. A very poor counterfeit on very soft paper and numbers in *green*. A later issue of the counterfeit is on stiff white paper. No part of the note will bear close inspection. Vignette portrait and all lathe-work very coarse work. On the left end, face of bill, the circle of lathe-work surrounding the large "1" has only alternate small squares of light and dark, the light squares being finely speckled.

### BANK OF BRITISH NORTH AMERICA, St. John, N. B.

1 Lithograph, old. "New Brunswick" across end of bill.

### BANK OF MONTREAL, Montreal, P. Q.

1 Old counterfeit. Right upper corner, 1 on ships under full sail. Left upper corner, two Indians and shield.

### BANK OF TORONTO, Toronto, Ont.

1 Vignette: Lumberman axe and log.

### UNION BANK OF PRINCE EDWARD ISLAND, Charlottetown, P. E. I.

1 Dated 1st January, 1872. Photograph poorly done. No. 30252. Green letters in ONE and red letters in "Canada Currency" are very badly printed or painted on the face. Easily detected because of its faded appearance.

None of the above banks now issue \$1 bills.

## TWO'S.

### DOMINION OF CANADA.

2 Portrait of Lord Dufferin. Letter B. Blue numbers. Payable at Montreal. Dated June 1st, 1878. Very dangerous counterfeits, and both the face and back of notes are good. Portrait of Lord Dufferin, a good imitation of that on the genuine note, though the forehead appears a little too broad or full. Paper fair but a little harsh and yellowish. Color of blue numbers as good as genuine, but part of them are not of the true shape.

On the face of bills the imitation lathe-work in the large green figures 2 is poor, and in the lower half of each of these figures 2 there are on the genuine bills four upright zigzag lines, formed by the peculiar shape or joining of the fine lathe-work lines; but on the counterfeit notes these four engraved zig-zag lines are very prominent, and the two centre ones do not touch one another as on the genuine bills. In the imprint "British American Bank Note Co., Montreal," the dots over the "i's" are omitted, and the letters different and unequally spaced, the e and r in American being widely separated.

2 Dufferin Issue. Letter C. Red numbers. Payable at Toronto. Dated June 1st, 1878, which date in some cases has been changed. *Same defects as mentioned in the above paragraph* A dangerous counterfeit, excepting the poor centre vignette of Lord Dufferin, and the imitation lathe-work in those large green 2's. Most all the other work on the bill is about as good as some genuine. Vignette portrait coarse, expression of the face unlike the genuine, eyes and nose poor, and lower lobe of the ear, in width up and down, is far too narrow. When the vignette of Lord Dufferin is worn this note is very dangerous. Paper fair, but in some cases very good. The color of the red numbers on some of these notes is very bad and on others quite fair.

### BANK OF MONTREAL, Montreal, Quebec.

2 Vignette: View of Niagara Falls, railcars and bridge.

2 Ottawa Branch. Dated March 1, 1852. Ottawa printed in red across the bill: coarse engraving.

BANK OF TORONTO, Toronto, Ont.

2 Vignette: Shield, Lion and Unicorn.

QUEBEC BANK.

2 Toronto, Ont., Branch. Old issue, dated 1860. Issues of this bank after 1863 had green backs.

UNION BANK OF PRINCE EDWARD ISLAND, Charlottetown, P. E. I.

2 Plate A, dated 1st Jan'y, 1872, and numbered differently in blue or green ink. Photograph, old issue. Large letters in TWO are badly printed or painted in green or blue inks on the face, which is the case with the red letters in "Canada Currency."

2 New Issue. Letter A. Dated March 1st, 1875. Coarse engraving, similar to an inferior wood cut. Fully one-quarter inch shorter than the genuine bills. "British American Bank Note Co., Montreal," is entirely omitted in the center portion of the bottom border. The line "Dominion of Canada" over vignette-engraving of dog and safe is without any shading, which is also the case with the lines "of Prince Edward Island" and "on demand" beneath. Back of note bad, and unlike genuine. Lathe-work patterns very coarse. Title of bank very poor.

None of the above banks now issue \$2 bills.

## FOURS.

BANK OF BRITISH NORTH AMERICA.

4 St. John Branch, N. B. Old issue. Photograph and very pale. They are all supposed to be numbered 74981.

CITY BANK, Montreal, P. Q.

4 Vignette—Vulcan, anvil, etc. Right end, woman, lion and unicorn. Left end, lion, etc.

DOMINION BANK, Toronto, Ont.

4 Old issue. Dated Feb. 1st, 1871. Letter B. Lathe-work around "4" is defective on close inspection, and has a fine white line running round inside of the black border line, which is not in the genuine bills. There is also a white line around the hair portion of Prince Arthur's head, which serves to separate it from the back-ground. Cashier's signature, W. H. Holland, Jr., is engraved, while on the genuine bills it is written.

4 Bank of Upper Canada, altered from 4 of Bank of Western Canada.

4 Raised from 1. New Government Issue, with vignette-portrait of Lady Dufferin in the center. Very badly done, but calculated to deceive.

## FIVES.

BANK OF BRITISH NORTH AMERICA, Montreal, P. Q.

5 Old issue. Letter D. General appearance good, but quality of the work will not bear close inspection. Lathe-work presents a coarse appearance. "British American Bank Note Co., Montreal," badly done, many of the letters are irregular, poorly spaced and varying in size. Engravings on face of counterfeit are all coarsely engraved and defective. On lower left end Britannia seated has her right hand resting upon a shield, the lower rim of which is well defined by a clear *white* line on the counterfeit, which does not appear on genuine bill. The *day* of the date of July, 1877, is omitted on the first issue of counterfeits, but often supplied with pen and ink. Later issues, however, have "5th" inserted and printed.

5 Kingston Branch. Very old issue. Dated 1st May, 1875. Genuine notes of this date are numbered from 30000 to 36000 inclusive, while the counterfeits, so far as detected, have all been numbered between 20000 and 30000. Lathe-work in small circular design on each side of the "5" is defective under inspection with the glass. There is no shading about the oval designs in the border, while in the genuine there is. It is positively asserted that half a million dollars' worth of these notes were issued and mostly circulated in the fur regions of Upper Canada, many of them being used in the purchase of peltries. The genuine bills of this issue are nearly all withdrawn from circulation.

5 Quebec Branch. Very old issue. Photograph very pale. FIVE in large letters across the centre of green-tinted design of lathe-work is badly printed thereon in green ink. They are all supposed to be numbered 44490. Dated 22nd Nov., 1871.

BANK OF MONTREAL, Montreal, Que.

**5** *Twenty-five Shillings.* Old Plate. Refuse all bills of this kind.

**5** Old counterfeit. Vignette in upper right corner, steamer; left end, cattle; 5 in centre of lower right corner.

BANK OF NOVA SCOTIA, Halifax, N. S.

**5** Dated Halifax, N. S., July 5, 1877. Letter B 126304. Very rough pen and brush work. Not dangerous.

BANK OF TORONTO.

**5** Port Hope (Branch) issue. Photograph. Check letter E; dated July 1st, 1880; number 45831, and by changing the figure 1 to 4 some have number 45834. The color is a purple-brown. Date is very indistinct, as well as the counters and vignettes, which have a dim appearance, usual in photographs. The green FIVE across lower center face of bill is painted over with a green water color. The figures in the numbers are painted in red water color, and the letters in PORT HOPE across each end are also painted in blue ink, signed Wm. Gooderham, President.

**5** Peterborough (Branch) issue. Photographs. Only about twenty of these notes were made, numbers on all 29356. Easily detected on account of their brownish tint.

CANADIAN BANK OF COMMERCE, Toronto, Ont.

**5** Old issue. Letter C. Dated May 1st, 1871. Signature of E. J. Smith, Cashier, is heavily printed, while on the genuine it is written. In the oval portrait in the center the Queen's face is turned more to the front than in the genuine, thus showing the whole of her left eye and a portion of the temple beyond very distinctly, while in the genuine the farther corner of her left eye is scarcely seen, her face being more in profile than in the counterfeit. On the Queen's right hand the ring on her finger is very indistinct, while in the genuine it is very plainly seen. The general engraving of the portrait is coarse and much inferior to that on the genuine bills.

MARITIME BANK, St. John, N. B.

**5** Rough pen and brush work.

UNION BANK OF PRINCE EDWARD ISLAND, Charlottetown, P.E.I.

**5** Photograph poorly done. Plate A. Easily detected by the brownish faded appearance.

## TENS.

BANK OF BRITISH NORTH AMERICA.

**10** Ottawa Branch, Ottawa, Ont. Photograph, and very poor. Numbered 16279, which is most probably the case with the whole of them. The printing of "Ottawa" on each corner is poorly done.

CITY BANK OF MONTREAL, Montreal, P. Q.

**10** Vignette—British Coat of Arms Left end, male bust. *Parliament* spelt "Parliment."

CANADIAN BANK OF COMMERCE, Toronto, Ont.

**10** Dated May 1st, 1871. Letter D. These very dangerous counterfeits have "capital \$6,000,000," and are signed W. Cooke, cashier. Under all the letters of the words TEN DOLLARS are five black parallel lines of shading; on the genuine notes there are only four such lines. The lion's face has also on the counterfeit note more of a scared or startled expression, and his right ear is not so prominent and pointed. Lathe-work but little defective; in both counters **10**, especially when viewed with a glass, parts of it lack the unbroken and continuous lines of the genuine. The green color on the back of this issue of notes is too light, and the blue numbers on the face of note are also a little light in color. Notes well printed on good paper and very dangerous.

CONSOLIDATED BANK OF CANADA, Montreal, P. Q.

**10** *Stolen.* All Tens are worthless, the bills having been stolen unsigned and signatures forged, they are usually signed W. Irwin as Cashier. Bank in liquidation.

LA BANQUE NATIONALE, Quebec, P. Q.

**10** The several specimens seen bear the check letter A. The counterfeit vignettes all very coarsely done, as are the large 10's and the counters in both upper corners. The lettering is much better and deceptive. In the genuine bills the P in "Prest" comes directly over the D in DIX in the bottom border, while in the counterfeits the P comes over the IX.

MARITIME BANK, St. John, New Brunswick.

**10** Dated St. John, New Brunswick, Oct. 5, 1881. Letter A; numbered 00737. Very rough pen and brush work. Not dangerous.

**MERCHANTS' BANK OF CANADA, Montreal, P. Q.**

**10** Photograph. Letter D. Number 83993. Capital \$6,000,000. The green tint on the face and back of note is rubbed on over the purple photographic tints with an oil green crayon pencil, which gives the green a yellowish tone and the work a blurred appearance. Only one of these notes have been seen so far, and the negatives are captured and destroyed.

**MERCHANTS' BANK OF HALIFAX, Halifax, N. S.**

**10** Dated 1st January, 1874. Photograph and Lithograph combined. Purplish tint in the photographic part, the 10—TEN—10 being done in red and green ink by lithography, and badly blurred. The vignette of ship under sail is very coarsely done, while in the genuine it is very fine and distinct. The back is badly lithographed, but the genuine backs are so badly colored but they quickly fade, and become worn and indistinct. It is not believed that many of these counterfeits ever got into circulation.

**10** Old issue. Dated 1st January, 1874. A counterfeit of engraved and lithograph work, having blurred and dark look. The words "Cash'r" and "Pres't," and the name of bank note printers, "Blades, East & Blandes, London," are all omitted. The back of note is also lithographed, and printed in a yellow-red shade of ink.

**ONTARIO BANK.**

**10** Old Issue. Letter A. Dated Bowmanville, Nov. 1st, 1870. In the lathe-work designs in each upper corner of note there appears a fine white line just inside of the black border line which is not visible in the genuine bills. The foliage in the engraving of the woodsman chopping down the tree is indistinctly worked up, being rather blurred in its details. In the genuine bill the woodsman has a very neat moustache on his upper lip, while in the counterfeit there is simply a black mark defining his mouth, having no visible moustache above it. There are two issues of these counterfeits, on some of which the imprint of the "British American Bank Note Company, Montreal and Ottawa" does not appear underneath the green-printed design on the backs. Best decline all on the "A" plate.

**PEOPLE'S BANK OF NEW BRUNSWICK, Fredericton, N. B.**

**10** Photograph poorly done. Plate A. Easily detected by its brownish faded appearance.

**10** raised from **1**. New Government Issue. Vignette—Lady Dufferin. Note scraped with a knife and the alterations of the figures and large characters are done with pen and ink, the border and other parts of note made indistinct by ink lines scattered over. There are no genuine \$10 Dominion notes.

**10** raised from **4** CANADIAN BANK OF COMMERCE, Toronto, Ont. The alterations are made with pen and ink, being very neatly done and well calculated to deceive those who are careless in handling money. The borders of the genuine Fours and Tens are totally different.

**10** raised from **5** CANADIAN BANK OF COMMERCE, Toronto, Ont. New Issue. The green ink "V"s on the face of the note to the left and right of the President's portrait are not wholly removed. The altered parts are done by the "bugging" process, which shows very plainly upon holding the bill up to the light. The border and back designs of these Fives are totally different from genuine Tens.

**10** raised from **5** IMPERIAL BANK OF CANADA, Toronto, Ont. Alterations are made with pen and ink, and poorly done. The border designs of the genuine Fives and Tens are different on the ends and easily distinguished.

---

## COUNTERFEITS.

**20 25** and **50** Cent Canada Silver Pieces; extensively counterfeited.

£ British Sovereign. Very dangerous. Platinum, heavily plated with gold. The metals in these coins are worth less than two dollars. Weight of genuine coin, 123.27 grains; fineness, .916 $\frac{2}{3}$ . Weight of the counterfeit of date 1872, 113 grains.

£50 Notes—Bank of England—dated "1883, May 16, London, 16 May, 1883,"  $\frac{25}{100}$  before the numbers. Very dangerous counterfeit notes, but paper thinner, water-mark patterns more indistinct, and the wave lines less broken than in the genuine notes. Blue or red words or letters put on with rubber stamp and hence variable.

£100 and £500 Notes, each dated London, Aug. 16, 1883, are also said to be dangerously counterfeited, as well as the £10 notes.
