HOVEYS'
ILLUSTRATED
CATALOGUE
OF
NEW AND RARE
PLANTS.
1879.

NOTICE.

FOR the forty-fifth year we have the pleasure of presenting our new catalogue, with the addition of a large number of new and beautiful plants, personally selected last summer from the great collections of France, England, and Belgium. Such as we have exhibited the past year, have been awarded numerous first-class prizes.

Please give attention to the following:

ORDER SHEET. Use this in all cases, as it saves us time and insures the correct filling of orders.

NAME AND ADDRESS. Be careful to write your name in full, with post-office address, county, and State distinctly written. Please also address Hovey & Co., 16 South Market Street, Boston, Mass., as our letters are often mis-carried.

EXPRESS. All plants will be sent by express unless specially ordered otherwise. We do not advise sending by mail, only when a few plants are wanted, or where there is no express office. We can send much larger, stronger, and better plants by express, which are sure to give better satisfaction.

Purchasers not familiar with the varieties will find it for their interest to leave the selection to us, as it is often difficult to judge of the merits of varieties by descriptions. We shall in all cases make the best selection possible.

NO CHARGE FOR BOXES, BASKETS, OR PACKING PLANTS.

PAYMENTS. Orders from unknown correspondents, unless accompanied by a remittance or satisfactory reference, will be sent C. O. D. Remittances may be made by Draft, Registered Letter, or Post-Office Money Order, at our risk.

As our business includes both Seeds and Plants, as well as Fruit Trees, Ornamental Shrubs, Evergreens, Vines, etc., orders for both may be sent together, and additional express charges saved. All such orders, however, should be made out on separate order sheets.

Our Seed Catalogue free on Application.

Our Nurseries and Greenhouses are at Cambridge, two miles from the city; but our friends and customers who would like to visit our grounds can do so, in a short time, by horse-cars from Bowdoin Square, which run directly there every ten minutes.

Our catalogue of Bulbs is published in August.

COLEUS.

The introduction of the Coleus as a decorative plant has changed the aspect of our gardens. By their grand masses of crimson, bronze, and gold or green foliage, effects are produced which no array of the gaudiest flowers accomplishes. For planting in detached groups, or for forming ribbon lines, they are unequalled. Our warm summers are just suited to them, and their growth is so rapid that, in a few weeks, they form a mass of magnificent foliage. Heretofore we have been mostly indebted to foreign cultivators for new varieties, but new seedlings of our own growth are among the most distinct and beautiful. ROSES.

Our plants are upon their own roots, and are mostly grown in pots for the better convenience for transporting at any season and the certainty of their growth. It is well known that roses transplanted from the open ground often fail to grow; and of those that succeed, scarcely any of them bloom the first season. Those from pots take root at once, and flower abundantly. Purchasers leaving the selection to us will get a fine assortment of varieties, and generally better plants.

To obtain a fine display of roses, the soil should be well enriched with old manure, covering the ground in autumn four inches deep. If the season is dry, give them plenty of water, and occasionally liquid manure.

HYBRID PERPETUAL ROSES.

The name would indicate that they are perpetual bloomers, but this is uncertain. They flower with the June roses, in great perfection, but the succeeding bloom is very limited; if the autumn is fine, quite a number of blooms open; but in the average of years only a very few scattering flowers appear after June. Still they are

magnificent roses, and many of the new varieties are unsurpassed in depth and brilliancy of their color.

ORCHIDS.

These lovely plants are yet but little cultivated, undoubtedly, in a great degree, from the general impression that they are difficult to manage, requiring special care and a house expressly for them. Nothing is more erroneous. Many of the most beautiful kinds are no more difficult to grow than ordinary hothouse plants, and some of them flourish in a warm greenhouse. A few experiments with some of the cheaper kinds will show that all the supposed difficulties of treatment will soon disappear. Our collection comprises about forty varieties.

Ten varieties, our selection, \$20.00.

Extra large plants of some of the varieties can be supplied.
