Treason is the highest crime of a civil nature of which a man can be guilty. Its signification is different in different countries. In general, it is the offense of attempting to overthrow the government of the state to which the offender owes allegiance, or of betraying the state into the hands of a foreign power. In monarchies, the killing of the king, or an attempt to take his life, is treason. In England, to

imagine or compass the death of the king, or of the prince, or of the queen consort, or of the heir apparent of the crown, is high treason; as are many other offenses created by statute.

In the United States, treason is confined to the actual levying of war against the United States, or in adhering to their enemies, giving them aid and comfort.

Constitution of U. States.

Treason in Great Britain, is of two kinds, high treason and petit treason. High treason is a crime that immediately affects the king or state; such as the offenses just enumerated. Petit treason involves a breach of fidelity, but affects individuals. Thus for a wife to kill her husband, a servant his master or lord, or an ecclesiastic his lord or ordinary, is petit treason. But in the United States this crime is unknown; the killing in the latter cases being murder only.

U.

U is the twenty first letter and the fifth vowel in the English Alphabet. Its true primary sound in Anglo Saxon, was the sound which it still retains in most of the languages of Europe; that of oo in *cool, too*, answering to the French *ou*, in *taur*. This sound was changed, probably under the Norman kings, by the attempt made to introduce the Norman French language into common use. However this fact may be, the first, or long and proper sound of u, in English, is now not perfectly simple, and it cannot be strictly called a vowel. The sound seems to be nearly that of *eu*, shortened and blended. This sound however is not precisely that of *eu* or *yu*, except in a few words, as in *unite, union, uniform*; the sound does not begin with the distinct sound of *e*, nor end in the distinct sound of *oo*, unless when prolonged. It cannot be well expressed in letters. This sound is heard in the unaffected pronunciation of *annuity, numerate, brute, mite, dispute, duke, true, truth, rule, prudence, opportunity, infusion*.

Some modern writers make a distinction between the sound of u, when it follows r, as in *rude, truth*, and its sound when it follows other letters, as in *nute, duke*; making the former sound equivalent to *oo*; *rood, trooth*; and the latter a diphthong equivalent to *eu* or *yu*. This is a mischievous innovation, and not authorized by any general usage either in England or the United States. The difference, very nice indeed, between the sound of u in *nute*, and in *rude*, is owing entirely to the articulation which precedes that letter. For example, when a labial precedes u, we enter on its sound with the lips closed, and in opening them to the position required for uttering u, there is almost necessarily a slight sound of e formed before we arrive at the proper sound of u. When e precedes u, the mouth is open before the sound of u is commenced. But in both cases, u is to be considered as having the same sound.

In some words, as in *hull, full, pull*, the sound of u is that of the Italian u, the French *ou*, but shortened. This is a vowel.

U has another short sound, as in *turn, run, sun, turn, rub*. This also is a vowel.

It is prefixed generally to adjectives and particles, and almost to pleases. In a few instances, it is prefixed to verbs, as in *unbound*, *unbind*, *unharness*. - V is the twenty second letter of the English Alphabet, and a labial articulation, formed by the junction of the upper teeth with the lower lip, as in pronouncing *va*, *et*, or, *vain*. It is not a close articulation, but one that admits of some sound. It is nearly allied to *f*, being formed by the same organs; but *v* is vocal, and *f* is aspirate, and this constitutes the principal difference between them. *V* and *v* were formerly the same letter, derived no doubt from the oriental *vau* or *vaua*, but they have now as distinct uses as any two letters in the alphabet, and are therefore to be considered as different letters. *V* has one sound only, as in *very*, *vote*, *lavish*.

VEGETABLE, n. [Fr. from *vegeter*, L.

1. A plant; an organized body destitute of
sense and voluntary motion, deriving its
nourishment through pores or vessels on its
outer surface, in most instances adhering
to some other body, as the earth, and in
general, propagating itself by seeds. Some
vegetables have spontaneous motion, as
the sunflower. Vegetables alone have
the power of deriving nourishment from
inorganic matter, or organic matter en-
tirely decomposed.

2. In a more limited sense, vegetables are
such plants as are used for culinary pur-
poses and cultivated in gardens, or are
destined for feeding cattle and sheep.
Vegetables for these uses are such as are
of a more soft and fleshy substance than

ing; growing; as plants.

VEGETATION, n. [Fr.] The process of
growing, as plants, by means of nourish-

ment derived from the earth, or from wa-
ter and air, and received through roots
and leaves. We observe that *vegetation*
depends on heat as the moving principle,
and on certain substances which constitute
the nutriment of plants. Rapid *vegeta-
tion* is caused by increased heat and a
rich soil.

2. Vegetables or plants in general. In June,
vegetation in our climate wears a beautiful
aspect.

Vegetation of salts, so called, consists in cer-
tain concretions formed by salts, after so-
lution in water, when set in the air for
evaporation. These concretions appear
round the surface of the liquor, affixed to
the sides of the vessel.

2. In plants, a tube or an assemblage of
tubes, through which the sap is transmit-
ted along the leaves. The term is more
properly applied to the finer and more
complex ramifications, which interbranch
with each other like net-work; the larger
and more direct assemblages of vessels
being called *ribs* and *nerves*. Veins are
also found in the calyx and corol of flow-
ers.

The vessels which branch or variously
divide over the surface of leaves are called
veins.

3. In geology, a fissure in rocks or strata, filled
with a particular substance. Thus met-
allic *veins* intersect rocks or strata of oth-
er substances. Metalliferous *veins* have

traced eighty miles. Many species of

1. Swiftness; celerity; rapidity; as the velocity of wind; the velocity of a planet or comet in its orbit or course; the velocity of a cannon ball; the velocity of light. In these phrases, *velocity* is more generally used than *celerity*. We apply *celerity* to animals; as, a horse or an ostrich runs with *celerity*, and a stream runs with *rapidity* or *velocity*; but bodies moving in the air or in *etherial* space, move with greater or less *velocity*, not *celerity*. This usage is arbitrary, and perhaps not universal.

2. In *philosophy*, velocity is that affection of motion by which a body moves over a certain space in a certain time. Velocity is in direct proportion to the space over which a body moves. Velocity is *absolute* or *relative*; *absolute*, when a body moves over a certain space in a certain time; *relative*, when it has respect to another moving body. We apply *conqueror* to one who subdues countries, kingdoms or nations; as, Alexander was the *conqueror* of Asia or India, or of many nations, or of the world. In such phrases, we cannot substitute *victor*. But we use *victor*, when we speak of one who overcomes a particular enemy, or in a particular battle; as, Cesar was *victor* at Pharsalia. Food for human beings, prepared for eating; that which supports human life; provisions; meat; sustenance. We never apply this word to that on which beasts or birds feed, and we apply it chiefly to food for men when cooked or prepared for the table. W.

W is the twenty third letter of the English Alphabet. It takes its written form and its name from the union of two V's, this being the form of the Roman capital letter which we call U. The name, *double u*, being given to it from its form or composition, and not from its sound, ought not to be retained. Every letter should be named from its sound, especially the vowels.

W is properly a vowel, a simple sound, formed by opening the mouth with a close circular configuration of the lips. It is precisely the *ou* of the French, and the *u* of the Spaniards, Italians and Germans. With the other vowels it forms diphthongs, which are of easy pronunciation; as in *well, want, will, duell*; pronounced *ooell, ooant, ooill, dooell*. In English, it is always followed by another vowel, except when followed by *h*, as in *when*; but this case is an exception only in writing, and not in pronunciation, for *h* precedes *u* in utterance; *when* being pronounced *hoen*. In Welsh, *w*, which is sounded as in English, is used without another vowel, as in *fiel*, a fool; *dwn*, dun; *dwb*, mortar; *gun*, a gun, and a gown.

It is not improbable that the Romans pronounced *w* as we do *u*, for their *uolvo* is our *vallow*; and *uolo, velle*, is the English *will, G. wollen*. But this is uncertain. The German *v* has the sound of the English *f*, and *w* that of the English *v*.

W, at the end of words, is often silent after *a* and *o*, as in *law, saw, low, sow*. In many words of this kind, *w* represents the Saxon *g*; in other cases, it helps to form a diphthong, as in *now, row, new, crew*.

"Cum quis accipiebatur præfecturam wapentachi, die statuto in loco ubi conveniant congregari, omnes majores natu contra eum conveniebant, et descendente eorum de equo suo, omnes assurgabant ei, ipse vero erecta lancea sua, ab omnibus secundum morem ferudus accipiebatur: omnes enim quotquot venissent cum lanceis suis ipsis hastam tangebant, et ita eis confabulabant per contactum armorum, pace palam concessa. *Wapno* enim arma sonat; *tac*, tactus est—hac de causa totus ille conventus dicitur *wapentac*, eo quod per tactum armorum suorum ad invicem confederati sunt."]

1. A contest between nations or states, carried on by force, either for defense, or for revenging insults and redressing wrongs, for the extension of commerce or acquisition of territory, or for obtaining and establishing the superiority and dominion of one over the other. These objects are accomplished by the slaughter or capture of troops, and the capture and destruction of ships, towns and property. Among rude nations, war is often waged and carried on for plunder. As war is the contest of nations or states, it always implies that such contest is authorized by the monarch or the sovereign pow-

er of the nation. When war is commenced by attacking a nation in peace, it is called an *offensive war*, and such attack is *aggressive*. When war is undertaken to repel invasion or the attacks of an enemy, it is called *defensive*, and a defensive war is considered as justifiable. Very few of the wars that have desolated nations and deluged the earth with blood, have been justifiable. Happy would it be for mankind, if the prevalence of christian principles might ultimately extinguish the spirit of war, and if the ambition to be great, might yield to the ambition of being good. Preparation for war is sometimes the best security for peace. *Anon.*

1. A fluid, the most abundant and most necessary for living beings of any in nature, except air. Water when pure, is colorless, destitute of taste and smell, ponderous, transparent, and in a very small degree compressible. It is repositied in the earth in inexhaustible quantities, where it is preserved fresh and cool, and from which it issues in springs, which form streams and rivers. But the great reservoirs of water on the globe are the ocean, seas and lakes, which cover more than three fifths of its surface, and from which it is raised by evaporation, and uniting with the air in the state of vapor, is wafted over the earth, ready to be precipitated in the form of rain, snow or hail.

Water by the abstraction or loss of heat, becomes solid, or in other words, is converted into ice or snow; and by heat it is converted into steam, an elastic vapor, one of the most powerful agents in nature. Modern chemical experiments prove that water is a compound substance, consisting of a combination of oxygen and hydrogen gases, or rather the bases of ponderable water of those gases; or of about two volumes or measures of hydrogen gas and one of oxygen gas. The proportion of the ingredients in weight, is nearly 85 parts of oxygen to 15 of hydrogen. *Lavoisier. Vauquelin. Fourcroy.*

WIS'DOM, *n.* s as z. [Sax. *id.*; wise and dom; G. *weisheit*, [wischood]; D. *wijsheid*;

Sw. *wisdom* and *wisheit*; Dan. *wisdom* or *wisdom*. See *Wise*. *Wisdom*, it seems, is from the Gothic dialect.]

1. The right use or exercise of knowledge; the choice of laudable ends, and of the best means to accomplish them. This is wisdom in *act, effect, or practice*. If wisdom is to be considered as a *faculty* of the mind, it is the faculty of discerning or judging what is most just, proper and useful, and if it is to be considered as an *acquisition*, it is the knowledge and use of what is best, most just, most proper, most conducive to prosperity or happiness. Wisdom in the first sense, or *practical wisdom*, is nearly synonymous with *discretion*. It differs somewhat from *prudence*, in this respect; *prudence* is the exercise of sound judgment in avoiding evils; *wisdom* is the exercise of sound judgment either in avoiding evils or attempting good. *Prudence* then is a species, of which *wisdom* is the genus.

Wisdom gained by experience, is of inestimable value.

It is hoped that our rulers will act with dignity and *wisdom*; that they will yield every thing to reason, and refuse every thing to force.

The *wisdom* of the world, artificial or affected eloquence; or learning displayed in teaching. 1 Cor. ii. ii.

WISE, *a.* s as z. [Sax. *wis*, *wise*; G. *weisen*; D. *wys*; Sw. *vis*; Dan. *vis*; Sax. *wisdom*; G. *wissen*, to know; Sans. *wid*.] This in Dutch, is *weten*, to know, which is the Goth. Sax. *witan*, Eng. to *wit*. So that *wise*, *wit*, *wetl*, *wet*, are all from one root, or dialectical forms of the same word; Ir. *fois*, *foas*, knowledge; W. *gwys*, *gwys*, Sans. *widya*, intelligence. In general, the radical sense of *know* is to reach or to hold, from extension, stretching. In this case, it may be to show, to disclose, from a like sense; for in Sw. *visa*, Dan. *viser*, G. *weisen*, D. *wysen*, is to show. In this case, L. *video*, *visum*, which seems to be connected with this word, may coincide in origin with *wide*. *Wistful*, attentive, eager, is from reaching forward.]

1. Properly, having knowledge; hence, having the power of discerning and judging correctly, or of discriminating between what is true and what is false, between what is fit and proper, and what is in-

proper; as a *wise* prince; a *wise* magistrate. Solomon was deemed the *wisest* man. But a man may be *speculatively* and *not practically* wise. Hence,

rule by which their uses may be distin-
guished. It is observed by Johnson that
with seems rather to denote an instru-
ment, and *by* a cause; as, he killed an en-
emy *with* a sword, but he died *by* an ar-
row. But this rule is not always observ-
ed.

With, in composition, signifies for the most
part opposition, privation; or separation,

In this sentence, *without* is a preposition still, but followed by a member of a sentence, instead of a single noun. It has no property of a connective or conjunction, and does not fall within the definition. You will not enjoy health, this fact following being removed, or not taking place; you use exercise. WOULD, *WUD*, *pret. of will, G. wullen, L. volo.*

Would is used as an auxiliary verb in conditional forms of speech. "I *would* go, if I could." This form of expression denotes *will or resolution*, under a condition or supposition.

You *would* go, { denote simply an event,

The condition implied in *would* is not always expressed. "By pleasure and pain, I *would* be understood to mean what delights or molests us—"; that is, *if it should be asked what I mean by pleasure and pain, I would* thus explain what I wish to have understood. In this form of expression, which is very common, there seems to be an implied allusion to an inquiry, or to the supposition of something not expressed.

Would has the sense of *wish or pray*, particularly in the phrases, "*would* to God," "*would* God we had died in Egypt," "*would* that ye knew what conflict I have," "*would* that I could *wish* such a thing, if that was, I could have. Here also there is an implied condition.

Y A R

Y, the twenty fifth letter of the English Alphabet, is taken from the Greek υ . At the beginning of words, it is called an articulation of consonant, and with some propriety perhaps, as it brings the root of the tongue in close contact with the lower part of the palate, and nearly in the position to which the close ϕ brings it. Hence it has happened that in a great number of words, ϕ has been changed into y , as the *Sax. gear*, into *year*; *geornian*, into *yearn*; *gyllan*, into *yield*; *gealce*, into *yellow*.

In the middle and at the end of words, y is precisely the same as i . It is sounded as i long, when accented, as in *defy*, *rely*; and as i short, when unaccented, as in *vanity*, *glory*, *synonymous*. This latter sound is a vowel. At the beginning of words, y answers to the German and Dutch y .

 Under **REDOUTABLE**, in *redoubtable*, dele *b*.
 Under **PALK**, dele *b*. before *Trumbull*.
 Under **Dispatch**, in the Introduction, add: Dr. Johnson himself wrote *dispatch*. The word thus written occurs twice in his Dictionary under *Send*, and five times under *Speed*, and this orthography has been continued to the present time. It has been transcribed into all the dictionaries made from Johnson's, at least into all which I have examined, even down to Chalmers and Jameson. When a word of more syllables than one has not the usual mark of accent, the pointed vowel designates the accented syllable; as in **REPROACH**, **REMOVE**.
C before *f*, is mute; as in *brick*, *sick*.

In the first volume, there are a few mistakes in the orthography of the Arabic words; and probably some inaccuracies have occurred in expressing the Ethiopic vowels. These and other literal errors however cannot be numerous, and to the English reader they are not of importance.
