The Celtic clan is probably the Welsh *plant*, *plunt*, with a different prefix. The radical sense is obvious, to shoot, to extend.]

1. A vegetable; an organic body, destitute of sense and spontaneous motion, adhering to another body in such a manner as to draw from it its nourishment, and having the power of propagating itself by seeds; "whose seed is in itself." Gen. 1. This definition may not be perfectly correct, as it respects all plants, for some marine plants grow without being attached to any fixed body.

The woody or dicotyledonous plants consist of three parts; the bark or exterior coat, which covers the wood; the wood

which is hard and constitutes the principal part; and the pith or center of the stem. In monocotyledonous plants, the ligneous or fibrous parts, and the pithy or parenchymatous, are equally distributed through the whole internal substance; and in the lower plants, funguses, sea weed, &c. the substance is altogether parenchymatous. By means of proper vessels, the nourishing juices are distributed to every part of the plant. In its most general sense, *plant* comprehends all vegetables, trees, shrubs, herbs, grasses, &c. In popular language, the word is generally applied to the smaller species of vegetables.

PLAYYRIGHT, *n.* A maker of plays. *Pope.*

PLEA, *n.* [*Norm. pleit, plet, plaid, ple*; *plu. plic; plegit*; *Fr. plaider*, to plead; *plai-*

doer, a plea; *It. pinto*, a plea; *piutire*, to plead; *Sp. plegto*, dispute; *pleyter*, to plead; *pleyterador*, a pleader; *Port. pleito, pleitar*; *D. pleit, pleiten*. The Spanish word *pleyto* signifies a dispute, contest, debate, lawsuit, and a covenant, contract or bargain, and *pleyta* is a *plaited* strand of brass. The Portuguese verb *pleitar* signifies to plead, to go to law, to strive or vie. The elements of this word are probably *lat* or *pld*. In the sense of pleading, the word accords with the *Gr. xere*, and in that of striving, with the *L. lis, litis*.]

1. In *law*, that which is alledged by a party in support of his demand; but in a more limited and technical sense, the answer of

the defendant to the plaintiff's declaration and demand. That which the plaintiff alleges in his declaration is answered and repelled or justified by the defendant's *plea*. Pleas are *dilatatory*, or pleas to the action. *Dilatatory* pleas, are to the jurisdiction of the court, to the disability of the plaintiff, or in abatement. Pleas to the action are an answer to the merits of the complaint, which confesses or denies it. 3. To urge reasons for or against; to attempt to persuade one by argument or supplication; as, to *plead* for the life of a criminal; to *plead* in his favor; to *plead* with a judge or with a father.

We receive *pleasure* from the indulgence of appetite; from the view of a beautiful landscape; from the harmony of sounds; from agreeable society; from the expectation of seeing an absent friend; from the prospect of gain or success of any kind. *Pleasure*, bodily and mental, carnal and spiritual, constitutes the whole of positive happiness, as *pain* constitutes the whole of misery.

Pleasure is properly positive excitement of the passions or the mind; but we give the name also to the absence of excitement, when that excitement is painful; as when we cease to labor, or repose after fatigue, or when the mind is tranquilized after anxiety or agitation.

Pleasure is susceptible of increase to any degree; but the word when unqualified, expresses less excitement or happiness than *delight* or *joy*.

The latter practice is frequent among the common people in America to this day; the owner of the liquor taking the cup says to his friend, I *pledge* you, and drinks, then hands the cup to his

guest; a remarkable instance of the power of habit, as the reason of the custom has long since ceased.

This seems to be the Teutonic form of the

Celtic *pledge*, Fr. *pléger*, *pléger*, L. *plico*, Gr. *πλαω*, It. *piegare*, Sp. *plegar*, Fr. *plier*, Arn. *plega*, W. *plygu*, to fold; Sp. *plecto*, a covenant or contract; and the G. *flechten*, to braid, coinciding with the L. *flecto*, to bend, appears to be of the same family. If the elements are *Lg*, as I suspect, *pledge* and *plight* are formed on the root of *lay*, Arn. *laçant*. To *pledge* or *plight* is to lay down, throw down, set or deposit. *Plight* may however be more directly from the root of L. *ligo*, but this is of the same family. See *Moy* and *Ply*.]

1. To pledge; to give as security for the performance of some act; but never applied to property or goods. We say, be *plight*-

ed his hand, his faith, his vows, his honor, his truth or troth. *Pledge* is applied to property as well as to word, faith, truth, honor, &c. To *plight* faith is, as it were, to deposit it in *pledge* for the performance of an act, on the non-performance of which, the pledge is forfeited.

PLIGHT, *n. plite.* Literally, a state of being involved, [*L. plicatus, implicatus, implicatus*]; hence, perplexity, distress, or a distressed state or condition; as a miserable *plight*. But the word by itself does not ordinarily imply distress. Hence,

In most cases, this word is now accompanied with an adjective which determines its signification; as *bad plight*; *miserable or wretched plight*; *as good plight*.

3. Pledge; gage.

POR-CELAIN, n. [*Sp. Port. porcelana; It. porcellana*, signifying *porcelain* and *purslain*, a plant; *Fr. porcelaine*, porcelain, the sea-snail, the purple fish, and *purslain*; *Arm. porceliminen*. Our *purslain* is doubtless from the Latin *portulaca*, as Pliny writes it, or *portulaca*, as others write it. But I know not the reason of the name.]

1. The finest species of earthen ware, originally manufactured in China and Japan, but now made in several European countries. All earthen wares which are white and semi-transparent, are called *porcelains*, but they differ much in their fineness and beauty. The porcelain of China is said to be made of two species of earth, the petunse, which is fusible, and the kaolin, which is not fusible, or not with the degree of heat which fuses the petunse, and that in porcelain the substances are only semi-vitrified, or one substance only is vitrified, the other not. Hence it is concluded that porcelain is an intermediate substance between earth and glass. Hence the second degree of fusibility, of which *emaltescence* is the first, is called by Kirwan the *porcelain state*.

Euclid gave this name to propositions involved in others which he was investigating, and obtained without a direct view to their discovery. These he called *acquisitions*, but such propositions are now called *corollaries*. A porism is defined, "a proposition affirming the possibility of finding such conditions as will render a certain problem indeterminate or capable of innumerable solutions." It is not a theorem, nor a problem, or rather it includes both. It asserts that a certain problem may become indeterminate, and so far it partakes of the nature of a theorem, and in seeking to discover the conditions by which this may be effected, it partakes of the nature of a problem. *Ency.*

In zoology, a cetaceous fish of the genus *Delphinus*, whose back is usually blackish or brown, whence it is called in Dutch, *bruinvisch*, brown fish; the body is thick towards the head, but more slender towards the tail, which is semi-lunar. This fish preys on other fish, and seeks food not only by swimming, but by rooting like a hog in the sand and mud, whence some persons suppose the name has been given to it.

According to other theorists, when the electric fluid is directed outwards from a body, the substance is electrified *positively*; but when it is entering or has a tendency to enter another substance, the body is supposed to be *negatively* electrified. The two species of electricity attract each other, and each repels its own kind.

1. In a philosophical sense, the faculty of doing or performing any thing; the faculty of moving or of producing a change in something; ability or strength. A man raises his hand by his own *power*, or by *power* moves another body. The exertion of *power* proceeds from the will, and in strictness, no being destitute of will or intelligence, can exert *power*. *Power* in man is *active* or *speculative*. *Active power* is that which moves the body; *speculative power* is that by which we see, judge, remember, or in general, by which we think.

Power may exist without exertion. We have *power* to speak when we are silent.

Locke. Reid.

Power has been distinguished also into *active* and *passive*, the *power* of doing or moving, and the *power* of receiving impressions or of suffering. In strictness, *passive power* is an absurdity in terms. To say that gold has a *power* to be melted, is improper language, yet for want of a more appropriate word, *power* is often used in a passive sense, and is considered as two-fold; viz. as able to make or able to receive any change.

2. *Force*; animal strength; as the *power* of the arm, exerted in lifting, throwing or holding.

4. Faculty of the mind, as manifested by a particular mode of operation; as the *power* of thinking, comparing and judging; the reasoning *powers*.

5. Ability, natural or moral. We say, a man has the *power* of doing good; his property gives him the *power* of relieving the distressed; or he has the *power* to persuade others to do good; or it is not in his *power* to pay his debts. The moral *power* of man is also his *power* of judging or discerning in moral subjects.

6. In mechanics, that which produces motion or force, or which may be applied to produce it. Thus the inclined plane is called a mechanical *power*, as it produces motion, although this in reality depends on gravity. The wheel and axle, and the lever, the mechanical *powers*, as they may be applied to produce force. These *powers* are also called *forces*, and they are of two kinds, *moving power*, and *sustaining power*.

7. *Force*. The great *power* of the screw is of extensive use in compression. The *power* of steam is immense.

8. That quality in any natural body which produces a change or makes an impression on another body; as the *power* of medicine; the *power* of heat; the *power* of sound.

Power is no blessing in itself, but when it is employed to protect the innocent. *Swift.*

Under this sense may be comprehended civil, political, ecclesiastical, and military *power*.

12. A sovereign, whether emperor, king or governing prince or the legislature of a state; as the *powers* of Europe; the great *powers*; the smaller *powers*. In this sense, the state or nation governed seems to be included in the word *power*. Great Britain is a great naval *power*.

prezarse, to boast or glory. It appears that *praise*, *prize*, *prize*, are all from one root, the primary sense of which is to lift, to raise, or rather to strain. So in *L. tolla, extollo*, we have *extol*. Now in *Dan. roser*, Sw. *rosa*, signifies to praise, and it may be questioned whether this is *praise* without a prefix. The Latin *pretium*, W. *prid*, is probably from the same root, denoting that which is *taken* for a thing sold, or the *rising* or amount, as we use *high*; a high value or price; corn is *high*. A mind prepossessed with opinions favorable to a person or cause, will not readily admit unfavorable opinions to take possession, nor yield to reasons that disturb the possessors. An exclusive or peculiar privilege. A *royal prerogative*, is that special pre-eminence which a king has over all other persons, and out of the course of the common law, in right of his regal dignity. It consists in the possession of certain rights which the king may exercise to the exclusion of all participation of his subjects; for when a right or privilege is held in common with the subject, it ceases to be a *prerogative*. Thus the right of appointing ambassadors, and of making peace and war, are, in Great Britain, *royal prerogatives*. The right of governing created beings is the *prerogative* of the Creator.

It is the *prerogative* of the house of peers in Great Britain to decide legal questions

in the last resort. It is the *prerogative* of the house of commons to determine the validity of all elections of their own members. It is the *prerogative* of a father to govern his children. It is the *prerogative* of the understanding to judge and compare.

In the United States, it is the *prerogative* of the president, with the advice of the senate, to ratify treaties.

In this case, the probate of the will belongs to the metropolitan or archbishop of the province, and the court where such will is proved is called the *prerogative-court*, as it is held by virtue of the special prerogative of the metropolitan, who appoints the judge. *Blackstone.*

PRE SAGE, *v. t.* To forebode; to foreshow; to indicate by some present fact what is to follow or come to pass. A fog rising from a river in an autumnal morning *presages* a pleasant day. Hence the error of vulgar superstition, which *presages* good or evil from facts which can have no relation to the future event.

The promise of a visit to my neighbor, gives him a right to expect it, and I am bound in honor and civility to perform the promise. Of such a promise human laws have no cognizance; but the fulfillment of it is one of the minor moralities, which civility, kindness and strict integrity require to be observed.

2. In law, a declaration, verbal or written, made by one person to another for a good or valuable consideration, in the nature of a covenant, by which the promiser binds himself, and as the case may be, his legal representatives, to do or forbear some act; and gives to the promisee a legal right to demand and enforce a fulfillment.

3. A binding declaration of something to be done or given for another's benefit; as the promise of a grant of land. A promise may be absolute or conditional; lawful or unlawful; express or implied. An implied promise, is one which reason and justice dictate. able reward, and will enforce such implied promise.

In grammar, a word used instead of a noun or name, to prevent the repetition of it.

The personal pronouns in English, are *I, thou or you, he, she, we, ye, and they*. The last is used for the name of things, as well as for that of persons. Other words are used for the names of persons, things, sentences, phrases and for adjectives; and when they stand for sentences, phrases and adjectives, they are not strictly *pronouns*, but relatives, substitutes or representatives of such sentences. Thus we say, "the jury found the prisoner guilty, and the court pronounced sentence on him. *This* or *that* gave great joy to the spectators." In these sentences, *this* or *that* represents the whole preceding sentence, which is the proper antecedent.

We also say, "the jury pronounced the man guilty, *this* or *that* or *which* he could not be, for he proved an alibi." In which sentence, *this* or *that* or *which* refers immediately to *guilty*, as its antecedent.

In *law* and *logic*, that degree of evidence which convinces the mind of the certainty of truth or fact, and produces belief. *Proof* is derived from personal knowledge, or from the testimony of others, or from conclusive reasoning. *Proof* differs from *demonstration*, which is applicable only to those truths of which the contrary is inconceivable.

This has neither evidence of truth, nor *proof* sufficient to give it warrant. *Hooker.*

PROPER, *a.* [*Fr. propre; It. proprio or proprio; Sp. propio; L. proprius, supposed to be allied to prope, near; W. priuad, proper, appropriate.*]

4. Noting an individual; pertaining to one of a species, but not common to the whole; as a *proper* name. *Dublin* is the *proper* name of a city.
5. Fit; suitable; adapted; accommodated. A thin dress is not *proper* for clothing in a cold climate. Stimulants are *proper* remedies for debility. 2. Tallness. [*Not in use.*]
3. Perfect form; handsomeness.
PROPERTY, *n.* [This seems to be formed directly from *proper*; if not, it is contracted. The Latin is *proprietas*, Fr. *propriété*, from which we have *propriety*.]
1. A peculiar quality of any thing; that which is inherent in a subject, or naturally essential to it; called by logicians an *essential mode*. Thus color is a *property* of light; extension and figure are *properties* of bodies.
2. An acquired or artificial quality; that which is given by art or bestowed by man. The poem has the *properties* which constitute excellence.
3. Quality; disposition.
It is the *property* of an old sinner to find delight in reviewing his own villainies in others. *South.*
1. The exclusive right of possessing, enjoying and disposing of a thing; ownership. In the beginning of the world, the Creator gave to man dominion over the earth, over the fish of the sea and the fowls of the air, and over every living thing. This

is the foundation of man's *property* in the earth and in all its productions. Prior occupancy of land and of wild animals gives to the possessor the *property* of them. The labor of inventing, making or producing any thing constitutes one of the highest and most indefeasible titles to *property*. *Property* is also acquired by inheritance, by gift or by purchase. *Property* is sometimes held in common, yet each man's right is his share in common land or stock is exclusively his own. One man may have the *property* of the soil, and another the right of use, by prescription or by purchase.

5. Possession held in one's own right. *Dryden.*
6. The thing owned; that to which a person has the legal title, whether in his possession or not. It is one of the greatest blessings of civil society that the *property* of citizens is well secured.

8. An estate; a farm; a plantation. In this sense, which is common in the United States and in the West Indies, the word has a plural.
The still-houses on the sugar plantations, vary in size, according to the fancy of the proprietor or the magnitude of the *property*. *Edwards, W. Indies.*
I shall confine myself to such *properties* as fall within the reach of daily observation. *ib.*
9. Nearness or right. Here I disclaim all my paternal care, Propinquity and *property* of blood. *Shak.*
10. Something useful; an appendage; a theatrical term. I will draw a bill of *properties*. *Shak.*
High pomp and state are useful *properties*. *Dryden.*

11. Propriety. [*Not in use.*]
Literary property, the exclusive right of printing, publishing and making profit by one's own writings. No right or title to a thing can be so perfect as that which is created by a man's own labor and invention. The exclusive right of a man to his literary productions, and to the use of them for his own profit, is entire and perfect, as the faculties employed and labor bestowed are entirely and perfectly his own. On what principle then can a legislature or a court determine that an author can enjoy only a *temporary property* in his own productions? If a man's right to his own productions in writing is as perfect as to the productions of his farm or his shop, how can the former be abridged or limited, while the latter is held without limitation? Why do the productions of manual labor rank higher in the scale of rights or *property*, than the productions of the intellect?

PROPERTY, *v. t.* To invest with qualities, or to take as one's own; to appropriate. [*In aukward word and not used.*] *Shak.*

crevices in their hives to prevent the entrance of cold air. &c. Pliny represents it as the third coat; the first he calls *commotis*; the second *pisoceros*; the third, more solid than the others, he calls *propolis*.

This account of the propolis may not be perfectly correct, as authors do not agree in their descriptions of it.

PROPO NENT, *n.* [*L. proponens; pro and pono, to place.*]

PROPORTION, *n.* [*L. proportio; pro and portio, part or share.* See *Portion*.]

1. The comparative relation of any one thing to another. Let a man's exertions be in proportion to his strength.
2. The identity or similitude of two ratios. *Proportion differs from ratio.* Ratio is the relation which determines the quantity of one thing from the quantity of another, without the intervention of a third. Thus the ratio of 5 and 10 is 2; the ratio of 2 and 16 is 2. *Proportion* is the sameness or likeness of two such relations. Thus 5 is to 10, as 2 to 16, or A is to B, as C is to D; that is, 5 bears the same relation to 10, as 2 to 16. Hence we say, such numbers are in *proportion*.
3. In *arithmetic*, a rule by which, when three numbers are given, a fourth number is found, which bears the same relation to the third as the second does to the first; or a fourth number is found, bearing the same relation to the second as the first does to the third. The former is called *direct*, and the latter, *inverse proportion*.
4. Symmetry; suitable adaptation of one part or thing to another; as the *proportion* of one limb to another in the human body; the *proportion* of the length and breadth of a room to its height.
5. Equal or just share; as, to ascertain the *proportion* of profit to which each partner in a company is entitled.
6. Form; size.
7. The relation between unequal things of the same kind, by which their several parts correspond to each other with an equal augmentation and diminution, as in reducing and enlarging figures.

[This more properly belongs to *ratio*.]

Harmonical or musical proportion, is when, of three numbers, the first is to the third as the difference of the first and second to the difference of the second and third. Thus 2, 3, 6, are in harmonical proportion; for 2 is to 6 as 1 to 3. So also four numbers are harmonical, when the first is to the fourth, as the difference of the first,

and second is to the difference of the third and fourth. Thus, 24, 16, 12, 9, are harmonical; for 24 : 9 :: 8 : 3.

PROPORTION, *n.* [*See Reciprocals, and Reciprocal ratio.*]

2. To form with symmetry or suitableness, as the parts of the body.

PROPORTIONAL, *a.* [*It. proporzionale; Fr. proportionnel.*]

Proportional, in *chemistry*, a term employed in the theory of definite proportions, to denote the same as the weight of an atom or a prism. [See *Prime*.]

Proportionals, in *geometry*, are quantities, either linear or numeral, which bear the same ratio or relation to each other.

- 9. Tall; lusty; as handsome with bulk. [*Low and not used.*] *Shak.*
- 10. In *vulgar language*, very; as *proper good*; *proper sweet.* [This is very improper, as well as vulgar.]

Proper receptacle, in botany, that which supports only a single flower or fructification; *proper perianth* or *involucre*, that which incloses only a single flower; *proper flower* or *corol*, one of the single florets or corollets in an aggregate or compound flower; *proper nectary*, separate from the petals and other parts of the flower. *Martyn.*

PROPERNESS, *n.* The quality of being proper. [*Little used.*]

- 2. Tallness. [*Not in use.*]

PROPERTY, *n.* [This seems to be formed directly from *proper*; if not, it is contracted. The Latin is *proprietas*, Fr. *propriété*, from which we have *propriety*.]

- 1. A peculiar quality of any thing; that which is inherent in a subject, or naturally essential to it; called by logicians an *essential mode*. Thus color is a *property* of light; extension and figure are *properties* of bodies.
- 2. An acquired or artificial quality; that which is given by art or bestowed by man. The poem has the *properties* which constitute excellence.
- 3. Quality; disposition.

It is the *property* of an old sinner to find delight in reviewing his own villainies in others. *South.*

- 1. The exclusive right of possessing, enjoying and disposing of a thing; ownership. In the beginning of the world, the Creator gave to man dominion over the earth, over the fish of the sea and the fowls of the air, and over every living thing. This

is the foundation of man's *property* in the earth and in all its productions. Prior occupancy of land and of wild animals gives to the possessor the *property* of them. The labor of inventing, making or producing any thing constitutes one of the highest and most indefeasible titles to *property*. *Property* is also acquired by inheritance, by gift or by purchase. *Property* is sometimes held in common, yet each man's right is his share in common land or stock is exclusively his own. One man may have the *property* of the soil, and another the right of use, by prescription or by purchase.

- 5. Possession held in one's own right. *Dryden.*

I shall confine myself to such *properties* as fall within the reach of daily observation. *ib.*

Propinquity and *property* of blood. *Shak.*
- 10. Something useful; an appendage; a theatrical term.
I will draw a bill of *properties*. *Shak.*
High pomp and state are useful *properties*.
Dryden.

II. PROPRIETY. [*Not in use.*] *Candem.*
Literary property, the exclusive right of printing, publishing and making profit by one's own writings. No right or title to a thing can be so perfect as that which is created by a man's own labor and invention. The exclusive right of a man to his literary productions, and to the use of them for his own profit, is entire and perfect, as the faculties employed and labor bestowed are entirely and perfectly his own. On what principle then can a legislature or a court determine that an author can enjoy only a *temporary property* in his own productions? If a man's right to his own productions in writing is as perfect as to the productions of his farm or his shop, how can the former be abridged or limited, while the latter is held without limitation? Why do the productions of manual labor rank higher in the scale of rights or property, than the productions of the intellect?

PROPERTY, *v. t.* To invest with qualities, or to take as one's own; to appropriate. [*In awkward word and not used.*] *Shak.*

One that makes a proposal, or lays down a proposition. *Dryden.*

PROPORTION, *n.* [*L. proportio; pro and portio, part or share. See Portion.*]

1. The comparative relation of any one thing to another. Let a man's exertions be in proportion to his strength.

2. The identity or similitude of two ratios. *Proportion* differs from *ratio*. *Ratio* is the relation which determines the quantity of one thing from the quantity of another, without the intervention of a third. Thus the ratio of 5 and 10 is 2; the ratio of 8 and 16 is 2. *Proportion* is the sameness or likeness of two such relations. Thus 5 is to 10, as 8 to 16, or A is to B, as C is to D; that is, 5 bears the same relation to 10, as 8 does to 16. Hence we say, such numbers are in *proportion*. *Encyc.*

Proportion, in *mathematics*, an equality of ratios. *Day.*

The term *proportion* is sometimes improperly used for *ratio*. The ratio between two quantities, is expressed by the quotient of one divided by the other: thus, the ratio of 10 to 5 is 2, and the ratio of 16 to 8 is 2. These two equal ratios constitute a *proportion*, which is expressed by saying, 10 is to 5 as 16 is to 8; or more concisely, 10 : 5 :: 16 : 8. [*See Ratio.*]

D. Olmsted.

3. In *arithmetic*, a rule by which, when three numbers are given, a fourth number is found, which bears the same relation to the third as the second does to the first; or a fourth number is found, bearing the same relation to the second as the first does to the third. The former is called *direct*, and the latter, *inverse proportion*.

4. *Synonymy*; suitable adaptation of one part or thing to another; as the *proportion* of one limb to another in the human body; the *proportion* of the length and breadth of a room to its height.

Harmony, with every grace,
Plays in the fair proportions of her face. *Mrs. Carter.*

5. Equal or just share; as, to ascertain the *proportion* of profit which each partner in a company is entitled.

6. Form; size. [*Little used.*]

7. The relation between unequal things of the same kind, by which their several parts correspond to each other with an equal augmentation and diminution, as in reducing and enlarging figures. *Encyc.*

[This more properly belongs to *ratio*.]

Harmonical or musical proportion, is when, of three numbers, the first is to the third as the difference of the first and second to the difference of the second and third. Thus 2, 3, 6, are in *harmonical proportion*; for 2 is to 6 as 1 to 3. So also first numbers are *harmonical*, when the first is to the fourth, as the difference of the first

and second is to the difference of the third and fourth. Thus, 24, 16, 12, 9, are *harmonical*, for 24 : 9 :: 8 : 3. *Encyc.*

This is the established language with respect to the parliament of Great Britain. PROROGUE, *v. t. prorog*. [Fr. *proroger*; L. *prorogare*; *pro* and *rogare*. The latter word signifies to ask, or to propose; but the primary sense is to reach, to stretch forward; and this is its import in the derivative *prorogare*.]

PROSE, *v. t.* To write in prose. *Milton.*

PROSECUTE, *v. t.* [*L. prosecutus, prosecutus*; *pro* and *sequor*, to follow, *Eng. to seek.* See *Essay.*]

1. To follow or pursue with a view to reach, execute or accomplish; to continue en-

deavors to obtain or complete; to continue efforts already begun; as, to *prosecute* a science; to *prosecute* an undertaking. The great canal in the state of New York has been *prosecuted* with success.

That which is morally good is to be desired and *prosecuted.* *Withins.*

This word signifies either to *begin* and *carry on*, or simply to *continue* what has been begun. When I say, "I have devised a plan which I have not the courage or means to *prosecute*," the word signifies to *begin* to *execute.* When we say, "the nation began a war which it had not means to *prosecute*," it signifies to *continue* to *carry on.* The latter is the genuine sense of the word, but both are well authorized. We *prosecute* any work of the hands or of the head. We *prosecute* a purpose, an enterprise, a work, studies, inquiries, &c.

2. To seek to obtain by legal process; as, to *prosecute* a right in a court of law.

3. To accuse of some crime or breach of law, or to pursue for redress or punishment, before a legal tribunal; as, to *prosecute* a man for trespass or for a riot. It is applied to civil suits for damages, as well as to criminal suits, but not to suits for debt. We never say, a man *prosecutes* another on a bond or note, or in assumption; but he *prosecutes* his right or claim in an action of debt, detinue, trover or assumption. So we say, a man *prosecutes* another for assault and battery, for a libel or for slander, or for breaking his close. In these cases, *prosecute* signifies to *begin* and to *continue* a suit. The attorney general *prosecutes* offenders in the name of the king or of the state, by information or indictment.

Prosecute differs from *persecute*, as in law it is applied to legal proceedings only, whereas *persecute* implies cruelty, injustice or oppression.

PROSECUTED, *pp.* Pursued, or begun and carried on for execution or accomplishment; a scheme; pursued for redress or punishment in a court of law, as a person; demanded in law, as a right or claim.

PROSECUTING, *ppr.* Pursuing, or beginning and carrying on for accomplishment; pursuing for redress or punishment; suing for, as a right or claim.

Thus in subtraction, if the difference between two numbers, added to the lesser number, makes a sum equal to the greater, the correctness of the subtraction is *proved*. The Italian *provvianda* is probably composed of *pro* and *vivanda*, victuals, from *vivere*, L. *vivo*, to live, and from *vivanda* the French have *viande*, Eng. *vind* and *vind*. Whether the French *proviende* and Norm. *provender* are from the same source, may be doubted. The German *proviant* may be formed from the L. *provindo*, Sp. *prover*, Port. *prover*. Qu. L. *proventus*. It is said that *provend*, *provender*, originally signified a vessel containing a measure of corn daily given to a horse or other beast. This and that here refer to the whole member of the sentence.

In *England*, this practice was restrained by statutes of Richard II. and Henry IV.

More sharp and penal laws were devised against *provisors*; it being enacted that whoever disturbs any patron in the presentation to a living by virtue of any *provisor*, such *provisor* shall pay fine and ransom to the king at his will, and be imprisoned till he renounces such provision. *Blackstone.*

Q U A

Q is the seventeenth letter of the English Alphabet; an articulation borrowed from the oriental *koph* or *qaph*, Ch. and Heb. φ , Samaritan φ , Syriac φ , Arabic φ Kaf.

It is supposed to be an articulation more deeply guttural than that of K; indeed it might have been pronounced as we pronounce *qu*; for we observe that in the Latin language; from which the moderns have borrowed the letter, it is always followed by *u*, as it is in English. This letter is not in the Greek alphabet. In our mother tongue, the Anglo Saxon, this letter is not used; but in the place of *qu*, *cu*, or more generally, *co* is used; as in *civic*, quick; *cicn*, queen. This letter is superfluous; for *ku* or *ko*, in English, have precisely the same sounds as *qu*. It is alleged that in expressing *q*, the cheeks are contracted, and the lips put into a canular form, for the passage of the breath; circumstances which distinguish it from *k*. This appears to be a mistake. The position of the organs is entirely owing to the following letter *u*; and *question* and *quest* are pronounced precisely alike, and with the same configuration of the organs. For *qu* in English, the Dutch use *kw*, the Germans *qu*, the Swedes use *kw*. The Gothic has a character which answers to *qu*. It appears then that *q* is precisely *k*, with this difference in use, that *q* is always followed by *u* in English, and *k* is not. *Q* never ends an English word. Its name *cue*, is said to be from the French *queue*, a tail.

As a numeral, *Q* stands for 500, and with a dash, *Q*, for 500,000.

Used as an abbreviation, *Q* stands for *quantity*, or *quantum*; as among physicians, *q. pl.* quantum placed, as much as you please; *q. s.* quantum sufficit, as much as is required, or as is sufficient.

Among mathematicians, *Q. E. D.* stands for *quod erat demonstrandum*, which was to be demonstrated; *Q. E. F.* *quod erat faciendum*, which was to be done.

In the notes of the ancients, *Q.* stands for *Quintus*, or *Quintus*; *Quint.* for *Quintilis*; and *Quas.* for *quæstor*.

In English, *Q.* is an abbreviation for *question*.

1. That property of any thing which may be increased or diminished.

Cheyne. Johnson.

This definition is defective, and as applicable to many other properties as to quantity. A definition strictly philosophical cannot be given. In common usage, *quantity* is a mass or collection of matter of indeterminate dimensions, but consisting of particles which cannot be distinguished, or which are not customarily distinguished, or which are considered in the aggregate. Thus we say, a *quantity* of earth, a *quantity* of water, a *quantity* of air, of light, of heat, of iron, of wood, of timber, of corn, of paper. But we do not say, a *quantity* of men, or of horses, or of houses; for as these are considered as separate individuals or beings, we call an assemblage of them, a *number* or *multitude*.

2. An indefinite extent of space.

3. A portion or part.

If I were sawed into *quantities*. [*Not in use.*]

4. A large portion; as a medicine taken in *quantities*, that is, in *large quantities*.

5. In *mathematics*, any thing which can be multiplied, divided or measured. *Dry.*

Thus *mathematics* is called the science of quantity. In algebra, quantities are known and unknown. Known quantities are usually represented by the first letters of the alphabet, as *a, b, c*, and unknown quantities are expressed by the last letters, *x, y, z*, &c. Letters thus used to represent quantities are themselves called quantities. A simple quantity is expressed by one term, as *+a*, or *-abc*; a compound is expressed by more terms than one, connected by the signs, *+* plus, or *-* minus, as *a+b*, or *a-b+c*. Quantities which have the sign *+* prefixed, are called *positive* or *affirmative*; those which have the sign *-* prefixed are called *negative*.

6. In *grammar*, the measure of a syllable; that which determines the time in which it is pronounced. *Holder. Encyc.*

2. Restraint of intercourse to which a ship is subjected on the presumption that she may be infected, either for forty days or for any other limited term. It is customary for the proper officers to determine the period of restraint at their discretion, according to circumstances. Hence we hear of a *quarantine* of five days, of ten, of thirty, &c. as well as of forty. We say, a ship performs *quarantine*, or rides at *quarantine*. We also apply the word to persons. The passengers and crew perform *quarantine*.

3. In law, the period of forty days, during which the widow of a man dying seized of land, has the privilege of remaining in the mansion house.

RELIGION, *n. religion.* [Fr. *Sp. religion*; It. *religione*; L. *religio*, from *religo*, to bind anew; *re* and *ligo*, to bind. This word seems originally to have signified an oath or vow to the gods, or the obligation of such an oath or vow, which was held very sacred by the Romans.]

1. Religion, in its most comprehensive sense, includes a belief in the being and perfections of God, in the revelation of his will to man, in man's obligation to obey his commands, in a state of reward and punishment, and in man's accountability to God; and also true goodness or piety of life, with the practice of all moral duties. It therefore comprehends theology, as a system of doctrines or principles, as well as practical piety; for the practice of moral duties without a belief in a divine lawgiver, and without reference to his will or commands, is not religion.

2. Religion, as distinct from theology, is godliness or real piety in practice, consisting in the performance of all known duties to God and our fellow men, in obedience to divine command, or from love to God and his law. James 1.

Religion will attend you—as a pleasant and useful companion, in every proper place and every temperate occupation of life.

Buckminster.

3. Religion, as distinct from *virtue*, or *moral-ity*, consists in the performance of the duties we owe directly to God, from a principle of obedience to his will. Hence we often speak of *religion* and *virtue*, as different branches of one system, or the duties of the first and second tables of the law.

Let us with caution indulge the supposition, that morality can be maintained without *religion*.

Washington.

4. Any system of faith and worship. In this sense, religion comprehends the belief and worship of pagans and Mohammedans, as well as of christians; any religion consisting in the belief of a superior power or powers governing the world, and in the worship of such power or powers. Thus we speak of the *religion* of the Turks, of the Hindoos, of the Indians, &c. as well as of the christian *religion*. We speak of *false religion*, as well as of *true religion*.

5. The rites of religion; in the plural.

REWARD, *n. t. a. as use.* [Norm. *regarder*, to allow; *regarde*, fees, allowances, perquisites, rewards; *regardez*, awarded.]

In these words there appears to be an alliance with *regard*. But in the Fr. and Norm. *gardon*, a reward, and *gardonneur*, to reward, this alliance does not appear.

So the Italian *guardonare*, to reward, is evidently a compound of the *L. dono* with another word, and apparently with the Sax. *withar*, *G. wider* and *wider*, *D. weder*, answering to *L. re*, denoting return.

The Spanish and Portuguese have the Latin word with a different prefix; *Sp. galardón*, a reward; *galardonar*, to reward; *Port. galardam, galadoar*. The Armoric has *garredon, garredoner*. Reward appears to be from the Norman.]

Properly strained; stretched to straightness; hence;

1. Straight. A *right line* in geometry is the shortest line that can be drawn or imagined between two points. A *right line* may be horizontal, perpendicular, or inclined to the plane of the horizon.

2. In morals and religion, just; equitable; accordant to the standard of truth and justice or the will of God. That alone is *right* in the sight of God, which is consonant to his will or law; this being the only perfect standard of truth and justice.

In social and political affairs, that is *right* which is consonant to the laws and customs of a country, provided these laws and customs are not repugnant to the laws of God. A man's intentions may be *right*, though his actions may be wrong in consequence of a defect in judgment.

3. Fit; suitable; proper; becoming. In things indifferent, or which are regulated by no positive law, that is *right* which is best suited to the character, occasion or purpose, or which is fitted to produce some good effect. It is *right* for a rich man to dress himself and his family in expensive clothing, which it would not be *right* for a poor man to purchase. It is *right* for every man to choose his own time for eating or exercise.

- RIGHT, n.** Conformity to the will of God, or to his law, the perfect standard of truth and justice. - Your eyes are always in the *right*. *Prior.*

A deed vests the *right* of possession in the purchaser of land. *Right* and possession are very different things. We often have occasion to demand and sue for *rights* not in possession.
6. Just claim by courtesy, customs, or the principles of civility and decorum. Every man has a *right* to civil treatment. The magistrate has a *right* to respect.

S.

S, the nineteenth letter of the English Alphabet, is a sibilant articulation, and numbered among the semi-vowels. It represents the hissing made by driving the breath between the end of the tongue and the roof of the mouth, just above the upper teeth. It has two uses; one to express a more hissing, as in *sabbath*, *sack*, *sin*, *this*, *thus*; the other a vocal hissing, precisely like that of *s*, as in *music*, *wise*, pronounced *muzic*, *wizic*. It generally has its hissing sound at the beginning of all proper English words, but in the middle and end of words, its sound is to be known only by usage. In a few words it is silent, as in *isle* and *viscount*.

In abbreviations, S. stands for *societas*, society, or *socius*, fellow; as F. R. S. fellow of the Royal Society. In medical prescriptions, S. A. signifies *secundum artem*, according to the rules of art.

In the notes of the ancients, S. stands for *Scelus*; SP. for *Spurius*; S. C. for *senatus consultum*; S. P. Q. R. for *senatus populusque Romanus*; S. S. S. for *stratum super stratum*, one layer above another alternately; S. V. B. E. Q. V. for *si vales, bene est, ego quoque vales*.

But the christian church very early begun and still continue to observe the first day of the week, in commemoration of the resurrection of Christ on that day, by which the work of redemption was completed. Hence it is often called the *Lord's day*. The heathen nations in the north of Europe dedicated this day to the sun, and hence their christian descendants continue to call the day *Sunday*. Thus baptism is called a *sacrament*, for by it persons are separated from the world, brought into Christ's visible church, and laid under particular obligations to obey his precepts. The eucharist or communion of the Lord's supper, is also a *sacrament*, for by commemorating the death and dying love of Christ, christians avow their special relation to him, and renew their obligations to be faithful to their divine Master. When we use *sacrament* without any qualifying word, we mean by it,

verb in Arabic, *سَأَخ*, signifies to *sink*, Goth. *sigean*. The sense of the root is to throw or thrust. Class Sg. No. 23. Pers. *sachan*, a word, speech.]

1. To speak; to utter in words; as, he *said* nothing; he *said* many things; he *says* not a word. *Say* a good word for me.

It is observable that although this word is radically synonymous with *speak* and *tell*, yet the uses or applications of these words are different. Thus we say, to *speak* an oration, to *tell* a story; but in these phrases, *say* cannot be used. Yet to *say* a lesson is good English, though not very elegant. We never use the phrases, to *say* a sermon or discourse, to *say* an argument, to *say* a speech, to *say* testimony.

A very general use of *say* is to introduce a relation, narration or recital, either of the speaker himself or of something said or done or to be done by another. Thus Adam *said*, this is bone of my bone; Noah *said*, blessed be the Lord God of Shem; If we *say* we have no sin, we deceive ourselves. *Say* to the cities of Judah, behold your God. I cannot say

what I should do in a similar case. *Say* thus precedes a sentence. But it is perhaps impracticable to reduce the peculiar and appropriate uses of *say*, *speak* and *tell*, to general rules. They can be learnt only by observation.

2. To declare. *Gen. xxxvii.*

[NOTE.—This verb is not properly intransitive. In the phrase, "as when we say, Plato is no fool," the last clause is the object after the verb; that is, "we say what follows." If this verb is properly intransitive in any case, it is in the phrase, "that is to say," but in such cases, the subsequent clause is the object of the verb, being that which is said, uttered or related.]
