FLOWERS FOR WINTER AND SPRING BLOOM.

WE ASK SPECIAL ATTENTION TO THE THREE ELEGANT HOUSE PLANTS SHOWN
ON OUR FIRST PAGE.

They are splendid ornaments for living room or conservatory, and are among the choicest things offered this season. All flower lovers want them.

The NEW CRIMSON CHENILLE PLANT

(*Acalypha Sanderi*), or COMET PLANT. Price, 50c., postpaid.

This is indeed a wonderful novelty—nothing like it ever seen before. It makes a neat, handsome plant, 12 to 15 inches high, has bright, glossy, green leaves, and flowers like beautiful crimson, tassels 8 to 12 inches long, looking as if made of rich **Crimson Chenille or Silken Plush**. It is very easily grown, requires no special treatment and blooms nearly all the time. When winter is past, set out in the flower bed, and it will bloom the whole season. It likes good, rich soil, all the sunshine it can get and moderate heat and moisture.

A First-class Novelty, sure to be in great demand. We send strong plants, some already in bloom. Price, 35c. each; 3 for \$1.00, postpaid. Larger Size Plants, 50c. each, by express only.

EXTRA SIZE PLANTS, from six inch pots, and loaded with streaming crimson tassels. very handsome, and valuable for special decoration in churches, fairs, festivals, etc. Will retain their beauty for weeks and be a constant source of wonder and admiration to all. Price, \$1.00 each; \$9.00 per Doz., by express only.

New Emerald Feather Asparagus.

(*Asparagus Sprengerii*).

This is one of the handsomest and most valuable Evergreen Trailing Plants we have, for house and conservatory culture. It is especially desirable for window pots, vases, baskets, etc., makes beautiful sprays of lovely green feathery foliage. Very useful for bouquets, wreaths, and all kinds of floral decorations. It is a strong, vigorous plant, easily grown, requires but little care and is a charming ornament for the parlor or conservatory. Strong Plants, 15c. each; 3 for 40c.; Doz., \$1.50 postpaid.

New Dwarf Calla Lily—Little Gem.

(Imported Bulbs, specially Prepared for Winter Flowering)

The True Little Gem Calla Lily is justly esteemed one of our most beautiful winter-blooming plants, but, as grown in this country, it is sometimes slow to bloom, and we have therefore imported from Europe, especially for our Colored Plate Collection, **Extra Fine Dry Bulbs**, specially prepared for winter flowering. These will start up as soon as potted and bloom, sometimes before the leaves come.

DIRECTIONS.—Use small size pots, as Callas bloom best when pots are full of roots. When done blooming dry off and set away three or four months to rest, then re-pot in fresh earth and they are ready to bloom again. They get larger and finer with age. Price, 15c. each; 3 for 40c.; \$1.50 per Doz., postpaid. **SPECIAL OFFER**.—The set of three, 1 Chenille Plant, 1 Emerald Feather Asparagus, and 1 Imported Little Gem Calla, only 50c. postpaid, or 3 Collections for \$1.35.

IMPORTANT NOTICE. In reply to frequent inquiries, we would say we have no connection whatever with any other company. Do not be misled because you see the name, Dingee & Conard Co., unchanged. Neither Alfred F. Conard or Antoine Wintzer have any connection with that concern, but long since left it entirely, and though that Company still retains Mr. Conard's name because they think it their interest to do so and cannot legally be prevented, he has severed all connection with them years ago. All communications intended for Alfred F. Conard or Antoine Wintzer should be addressed to **THE CONARD & JONES CO.**, West Grove, Pa., where they will receive prompt and careful attention. Please be careful to always address

THE CONARD & JONES CO., Flower Growers, West Grove, Pa.

When winter is over set out in the flower bed, and it will bloom profusely the whole season. We recommend it as sure to please, both for winter and summer bloom. Very sweet and handsome. 15c. each; 2 for 25c.; \$1.50 per Doz.

Grand New Hardy
Hybrid Tea Rose = = **Clara Barton**

New Hardy Hybrid Tea Rose, Clara Barton. C. & J. Co., 1899.

After years of careful trial and hybridizing the most beautiful varieties, we at last succeeded in obtaining this **GRAND NEW CONSTANT-BLOOMING ROSE**, which has attracted so much attention, and proved of such remarkable beauty and value that we requested permission of

MISS CLARA BARTON President of the World's Red Cross Society = =

to give it her name, in remembrance of the noble work she has done in the cause of humanity all over the world. This permission was kindly granted, coupled with the suggestion that it be called simply "**CLARA BARTON**." This we have therefore done, and believing that it will be found one of the most beautiful and highly valued Roses now known, we take great pleasure in introducing it to all lovers of beautiful Roses as one of the choicest varieties of which we have any knowledge. The flowers are quite large, perfectly double, and wonderfully sweet. The color is delicate flesh pink. It is a tremendous bloomer, loaded with flowers the whole season, and quite hardy. Extra fine, both for bedding and house culture. **Price, strong plants, 35 and 50c. each, postpaid. Two-year size, 75c. and \$1.00 each, by express.**

BULBS FOR WINTER FLOWERING

Of all flowers for house culture and Winter bloom, bulbs are the most beautiful, and the easiest to grow. They are absolutely sure to bloom—Hyacinths, Tulips, Narcissus, Crocus, Scillas, Iris, Ixias, Sparixias, etc., besides being entirely hardy in open ground, will bloom beautifully during Winter when kept in pots in-doors, and are in fact among the finest Winter-blooming flowers we have. Bulbs for house culture and Winter bloom should be potted as early as convenient, from September to January—any soil that is suitable for other plants will grow nice bulbs. Old, well-rotted manure is the best fertilizer. Pots or boxes of any convenient size may be used. Small bulbs can be set very close together, sometimes several in a pot; large ones need room in proportion to their size. Do not plant too deep, one inch under ground is about right for most kinds *in-doors*;—when potted, water thoroughly and set away in a cool, dark place for two or three weeks, to rest and give the roots time to start, then take to the living room or wherever they are to remain—they don't require much heat, an up-stairs room suits them nicely. Water only when they need it, *but be sure they do not get dry at the bottom*. They will soon begin to bloom, and then their lovely flowers and exquisite fragrance will surprise and delight all who see them.

Bulb Diagram.

Bulbs in Open Ground

Tulips, Hyacinths, Narcissus, Crocus, Snow Drops, Scillas, Ixias, Sparixias, etc., are the finest bulbs for Fall planting in open ground, as they are entirely hardy and make a splendid display of gorgeous flowers very early in Spring, almost before the snow is gone. Their flowers are exquisitely beautiful and always highly valued because they come before all others. The culture is very simple, and what is better, they are absolutely sure to bloom. Other flowers may fail, but bulbs never.

Bulbs do not require very rich soil and will succeed well in any ordinary ground; when convenient, it is well to spade up the ground, so that it will be a little higher than the surrounding surface, and keep water from collecting on it. If the soil is poor, a liberal quantity of old, well-rotted manure should be spaded in or applied to the top as a mulch.

TIME TO PLANT. September, October, November and December are the best months for planting bulbs in the open ground. Set them from one to six inches apart, according to variety and size, and from one to three inches deep. The bulb diagram above shows the proper depth and distances apart for the different varieties.

WINTER PROTECTION. These bulbs are entirely hardy and will do without any protection, but if convenient to give the bed a light covering of leaves or litter after planting, the flowers will come earlier and be finer. The covering should be removed as soon as the plants show through in the Spring.

TREATMENT AFTER BLOOMING. When pot bulbs are done blooming they can be set away in any cool, dry place and left a few weeks to mature, after which they may be shaken out of the soil and stored away till time to plant again in the Fall. They may not make as fine flowers the second season as the first, but will usually do quite well for two or three years. Bulbs in open ground, when done blooming and well matured, may be lifted and dried off, and then treated exactly like those from pots.

True Chinese Sacred Lily.

Chinese Sacred Lily.

The Great Chinese Sacred Lily is one of the most popular winter-flowering bulbs; vast quantities are brought from China every year. The bulbs are very large and each one sends up from five to twelve flower stems, which bear great clusters of large pure white wax-like blossoms, with yellow centres, and of a rich delicious fragrance. About one bulb in three will produce double flowers, the others single, as shown in the engraving. They grow nicely in pots of ordinary soil, but the best and quickest way to bloom them is in water. Fill a bowl or some similar vessel with pebbles or small stones, in which place the bulb, setting it about one-half its depth, so that it will be held firmly, then fill with water to the top of the pebbles, and place in a warm sunny window. The bulb will at once commence a rapid growth and bloom in two or three weeks. Ours are the genuine Chinese Sacred Lily, grown in China. Cheaper bulbs are offered, but they are an inferior grade, and not to be compared with these in beauty. Ours are the genuine variety, grown in China. Price, extra large quick blooming bulbs, by mail, postpaid, 12 cts. each; 3 for 35 cts.; \$1.35 per doz.

New Garden Fruits FOR Fall Planting

New Dwarf Bismarck Apple.

ENGRAVED
FROM A
PHOTOGRAPH.

New Dwarf Bismarck Apple. We again take pleasure in recommending this wonderful New Dwarf Apple for planting in gardens and yards where fine fruits are desired, but not room for large trees. Has now been fully tested in this country, and proved to be a most valuable variety; very remarkable for its dwarf growth, and surpassing all others in early bearing. Little trees, not over a foot or two high, will frequently bear large apples a few months after planting, and it seems certain they can be expected to bear abundantly in a very short time. They are so dwarf they can easily be grown in pots or boxes if desired, but are especially recommended for small gardens and yards where there is not room for large trees. You can grow them in any vacant corner, and have some delicious fruits of your own. The apples are of large size, beautiful rich golden-yellow, streaked with red; they ripen early, and are of most delicious quality. We can recommend the Bismarck Apple as a most valuable variety for situations noted above. May be planted only three or four feet apart along fences or buildings, and should soon bear abundantly.

Price, nice One-year Trees, 25c. each, 6 for \$1.25, \$2.50 per doz., postpaid. Larger size, 35c. each, \$3.50 per doz. by express at purchaser's expense.

3 Luscious Japan Plums

Too much cannot be said in favor of these delicious Japan Plums. They make nice little low-headed trees, and will usually mature a crop the second year after planting. Scarcely any other fruit trees will bear so quickly and abundantly, and few fruits are more delicious in flavor and quality. They are especially desirable for planting in gardens and yards where there is not room for large trees. They are easy to grow, require no special treatment, and may be depended upon to bear regularly every year. We offer three of the very best varieties.

NEW JAPAN PLUM, THE HALE—Noted for large size, great productiveness, and excellent quality. Orange yellow, mottled cherry red, exceedingly beautiful and attractive. Nice one-year trees, mailing size, 15 cts. each, \$1.50 per doz., postpaid. Two-year trees, 25 cts. each, \$2.50 per doz. by express.

ABUNDANCE—Beautiful lemon yellow, with bright cherry red bloom; very large egg-shaped, delicious flavor, most abundant and regular bearer. Nice one-year trees, 15 cts. each, \$1.50 per doz., postpaid. Two-year trees, 25 cts. each, \$2.50 per doz. by express.

RED JUNE—Highly valued for early ripening and excellent quality, deep purplish red, very handsome and attractive, and the best of the early sorts. Nice one-year trees, 15 cts. each, \$1.50 per doz., postpaid. Two-year trees, 25 cts. each, \$2.50 per doz. by express.

The Three Varieties, one each, mailing size, only 40c., postpaid.
The three in two-year size, 65c. by express.

New Strawberry-Raspberry Or Tree Strawberry

This is one of the most beautiful fruits ever seen; berries the size and shape of the largest strawberries; bright, rich, shining scarlet, with an exquisite bloom; makes lovely jam, jellies and tarts, having a delicious flavor entirely different from any other fruit; bears the first season, and gets larger and stronger every year. Came from Japan, and tested for two years here; the bush grows from eighteen inches to two feet high, is entirely hardy and will do well everywhere, regardless of heat and drought. We cordially recommend it. 10 cts. each, 3 for 25 cts., 75 cts. per doz.

New Gooseberries For Fall Planting

AMERICAN TRIUMPH—The best American Gooseberry. An enormous bearer, and remarkably free from rust and mildew; large size, with their very thin skin and fine flavor, always scarce and high. 20 cts. each, \$2.00 per doz., postpaid; \$1.65 by express. Two-year plants, \$2.50 per doz. by express.

RED JACKET GOOSEBERRY—Fruit, large dark rich red, excellent quality, and a tremendous bearer; hardy and highly recommended. 20 cts. each, \$2.00 per doz., postpaid; \$1.65 by express. Two-year size, \$2.50 per doz. by express.

Japan Giant Chestnut

Of the many good fruits introduced from Japan, none are more worthy than the Japan Giant Chestnut. The tree is quite ornamental, hardy and very productive, of dwarf compact habit, and begins to bear so young that the little trees are frequently loaded with fruit while in the nursery rows. The nuts are of enormous size, about four times as large as the common chestnut, and always sell at a high price. The Japan Giant Chestnut is a tree that everyone should plant. It is the best chestnut yet introduced, and will give immense satisfaction, whether planted for profit or for home use. Price, postpaid, 25c. each.
