PARIS, MARCH 5.

We copy the substance of an important document published in the Moniteur of the 5th. It is in relation to a convention between the republics of 1792 and 1848, which is of little consequence in arriving at the result.

The French Revolution has this entered into its definitive period. France is Republican. The French Republic has no government to be known by the law of nations, it exists as it is, as well as by the law of nations, it exists as it is, as well as by the law of nations, it exists as it is.
