C. F. Van Aken, *Chief*

**SPECIAL NOTICE:** For the months of July-September 1957 an attempt is being made to obtain verification from Customs officials for data on all cotton imports. About 90 percent of the total value of the data shown in this report has been verified. This verification resulted in figures being changed significantly from those originally reported for several of the individual commodities. Any revisions to the figures as now shown, found as a result of verification of the remaining 10 percent of the data, will be shown in the revisions section in future reports.

The data contained in this report reflect revisions made subsequent to the release of Report FT 110 for July. These revisions will be released in the revisions section in an early issue of a future Report FT 110.

### SUBSCRIPTION INFORMATION

Prices: Annual subscription (twelve monthly issues) (\$1.00  
additional for foreign mailing)..... \$1.00  
Monthly issues, each..... 0.10

Subscriptions to these reports should be placed directly with the Department of Commerce, Bureau of the Census, Washington 25, D. C.

# GENERAL EXPLANATION

## COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports individually valued \$250 or less covered by informal entries or reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of "imports valued \$250 or less" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

## SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

## VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

## COMMODITY INFORMATION

Information on commodity and groupings of commodities is reported in accordance with the num-

bered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

## COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transhipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

## REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

## SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

## UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES

## Commodity Classifications

Classification Number		Description for groupings of commodities and commodity descriptions	Unit of Quantity	
Commodity Grouping	Commodity		Commodity Grouping	Commodity
		<u>Cotton yarn and cloth not ornamented, etc.</u>		
01		Cotton yarn:	Lb.	
	011	Singles, carded		Lb.
	021	Plied, carded		Lb.
	032	Singles, combed		Lb.
	042	Plied, combed		Lb.
03		Ginghams:	Sq. yds.	
	105	Carded yarn		Sq. yds. and Lb.
	107	Combed yarn		Sq. yds. and Lb.
05		Velveteens in the piece, cut or uncut:	Sq. yds.	
	108	Plain-back		Sq. yds.
	109	Twill-back		Sq. yds.
07		Other cotton fabrics:	Sq. yds.	
		Sheeting:		
	111	Carded yarn		Sq. yds. and Lb.
	112	Combed yarn		Sq. yds. and Lb.
		Poplin and broadcloth:		
	121	Carded yarn		Sq. yds. and Lb.
	122	Combed yarn		Sq. yds. and Lb.
		Print cloth type shirting:		
	131	80 x 80 type, carded yarn		Sq. yds. and Lb.
	141	Other than 80 x 80 type, carded yarn		Sq. yds. and Lb.
		Shirting:		
	151	Jacquard or dobby, carded yarn		Sq. yds. and Lb.
	152	Jacquard or dobby, combed yarn		Sq. yds. and Lb.
		Twill and sateen:		
	161	Carded yarn		Sq. yds. and Lb.
	162	Combed yarn		Sq. yds. and Lb.
		Yarn-dyed fabrics, except ginghams:		
	171	Carded yarn		Sq. yds. and Lb.
	172	Combed yarn		Sq. yds. and Lb.
		Fabrics, n.e.s.:		
	181	Carded yarn		Sq. yds.
	182	Combed yarn		Sq. yds.
09		<u>Made-up goods of broad-woven fabrics</u>		
		Pillowcases, plain:	No.	
	205	Carded yarn		No.
	210	Combed yarn		No.
11		Dish towels, not jacquard-figured, not terry-woven:	No.	
	215	In part of fringes		Lb. and No.
	220	Other than in part of fringes		Lb. and No.

**SPECIAL NOTICE:** For the months of July-September 1957 an attempt is being made to obtain verification from Customs officials for data on all cotton imports. About 90 percent of the total value of the data shown in this report has been verified. This verification resulted in figures being changed significantly from those originally reported for several of the individual commodities. Any revisions to the figures as now shown, found as a result of verification of the remaining 10 percent of the data, will be shown in the revisions section in future reports.

The data contained in this report reflect revisions made subsequent to the release of Report FT 110 for August. These revisions will be released in the revisions section in an early issue of a future Report FT 110.

### SUBSCRIPTION INFORMATION

Prices: Annual subscription (twelve monthly issues) (\$1.00  
additional for foreign mailing)..... \$1.00  
Monthly issues, each..... 0.10

Subscriptions to these reports should be placed directly with the  
Department of Commerce, Bureau of the Census, Washington 25, D. C.

# GENERAL EXPLANATION

## COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports individually valued \$250 or less covered by informal entries or reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of "imports valued \$250 or less" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

## SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

## VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

## COMMODITY INFORMATION

Information on commodity and groupings of commodities is reported in accordance with the num-

bered classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

## COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

## REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

## SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

## UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

Commodity grouping number	Commodity grouping description and unit of quantity (and commodity numbers included in the commodity grouping)	Quantity	Value (dollars)
	TOTAL IMPORTS	.....	12,200,199
	COTTON YARN AND CLOTH	.....	3,524,107
01	Cotton yarn (011-042) Lb.	2,745	9,881
03	Ginghams (105-107) Sq. yds.	3,682,788	779,183
05	Velveteens in the piece, cut or uncut (108-109) Sq. yds.	1,157,618	934,863
07	Other cotton fabrics, not ornamented (111-182) Sq. yds.	5,637,991	1,800,180
	MADE-UP GOODS OF BROAD-WOVEN FABRICS	.....	1,775,617
09	Pillowcases, plain (205-210) No.	315,854	54,292
11	Dish towels, not jacquard-figured, not terry woven (215-220) No.	1,200,900	50,433
13	Handkerchiefs, whether or not ornamented, etc. (225-230) Doz.	723,650	1,052,141
15	Table damasks and manufactures of (235) Lb.	343,228	429,314
17	Other manufactures of broad-woven fabrics (292-392) Lb.	290,957	189,437
	APPAREL NOT KNIT OR CROCHETED	.....	4,687,917
19	Blouse and blouse and skirt sets, not knit or crocheted (400-420) Doz. <sup>1</sup>	210,928	1,268,828
21	Sport shirts, not knit or crocheted (425-450) Doz.	200,537	1,167,684
23	Dress and work shirts (455-499) Doz.	4,796	41,032
25	Body-supporting garments (503-505) Doz.	75,964	225,620
27	Trousers, slacks and shorts (outer) except as part of blouse and short or blouse and trouser sets, not ornamented, etc. (510-545) Doz.	56,851	529,337

SOL DOLLECK, *Assistant Chief for Systems Development*

Machine Tabulation Division—C. F. VAN AKEN, *Chief*

**SPECIAL NOTICE:** For the months of July-September 1957 an attempt is being made to obtain verification from Customs officials for data on all cotton imports. About 90 percent of the total value of the data shown in this report has been verified. This verification resulted in figures being changed significantly from those originally reported for several of the individual commodities. Any revisions to the figures as now shown, found as a result of verification of the remaining 10 percent of the data, will be shown in the revisions section in future reports.

The data contained in this report reflect revisions made subsequent to the release of Report FT 110 for September. These revisions will be released in the revisions section in an early issue of a future Report FT 110.

## SUBSCRIPTION INFORMATION

Prices: Annual subscription (twelve monthly issues) (\$1.00  
additional for foreign mailing)..... \$1.00  
Monthly issues, each..... 0.10

Subscriptions to these reports should be placed directly with the  
Department of Commerce, Bureau of the Census, Washington 25, D. C.

## COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports individually valued \$250 or less covered by informal entries or reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of "imports valued \$250 or less" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

## SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

## VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

## COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered

classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

## COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transhipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

## REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

## SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

# GENERAL EXPLANATION

## COVERAGE

The statistics shown in this report include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports and is excluded from the data shown in this report. Also excluded is information on imports individually valued \$250 or less covered by informal entries or reported on formal entries (consumption entries only). Information on the possible undercounting of the statistics shown in this report as a result of the exclusion of "imports valued \$250 or less" may be obtained by writing to the Bureau of the Census, Washington 25, D. C. Articles not of cotton but classified for Customs purposes as cotton articles by similitude to cotton under the provision of the Tariff Act of 1930 (as amended) are also excluded.

The general import data represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse immediately upon arrival. These data differ from statistics on an import for consumption basis shown in most United States import statistical publications which represent imports of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, and merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels.

## SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

## VALUATION

The values are in general based on market or selling price and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

## COMMODITY INFORMATION

Information on commodity by groupings of commodities is reported in order of the numbered

classifications presented on page 4 of the July 1957 issue of the report.

For commodities or groupings of commodities for which the unit of quantity pounds is reported, the weight represents the net weight of the commodity rather than the weight of the cotton component of the commodity only.

## COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was produced or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Where it is known that the country is the country of shipment instead of origin, the country is footnoted in this report. Countries reported by the importer as country of origin may sometimes represent the country of shipment instead of origin for merchandise which is transshipped before it reaches the United States. Extra care is being taken to detect this type of reporting error, however. Countries are reported as defined in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A, Statistical Classification of Commodities Imported into the United States. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

## REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report will be shown in the back of subsequent issues of the report.

## SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics in general will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. Copies of this publication are available for reference at Public Libraries. Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of United States Foreign Trade Statistical Publications is also available. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

# ACCURACY OF THE DATA ON IMPORTS OF COTTON MANUFACTURES

## VERIFICATION OF THE DATA ON A 10 PERCENT BASIS BEGINNING OCTOBER 1957

For the months of July-September 1957 an attempt was made to obtain verification from Customs officials for data on all cotton manufactures, and about 90 percent of the total value of the data shown in imports for those months was verified by Customs officials prior to publication of the data. Beginning with imports for the month of October this verification procedure has been limited to a 10 percent sample of cotton import shipments. This change in procedure was based on the assumption that by October, importers would be able to report their imports in reasonably accurate terms, since they would have had three months in which to become familiar with the new commodity classifications. The verification of the 10 percent sample for October and subsequent months has two purposes: (1) errors made by importers and found in this 10 percent sample are being called to the attention of the importers so that they will not make similar errors on future importations; (2) the 10 percent sample gives some information as to the accuracy of classification of total imports as reported by the importer.

In view of the limited number of items in the universe (and in the sample) for many of the individual commodity classifications, the 10 percent verification provides more information as to the degree of reliability on a cumulative basis than on a monthly basis. As a result, the data for October through December are being published as cumulative data in Report FT 130. It is planned to publish the data for 1958 on a monthly basis. However, the sample verification results will be shown on a cumulative basis beginning with the results for the October 1957 data.

## ANALYSIS OF THE 10 PERCENT VERIFICATION

Based on the 10 percent sample for the period October-December 1957, it appears that the classifications for about two percent of the importations have been declared incorrectly by importers. However, the average value of the shipments reported incorrectly was about half the average value of all cotton manufactures imported so that only about 1 percent of the value of the imported cotton manufactures is reported incorrectly in the statistics. It should be noted that the effect of the errors on figures for individual commodities or commodity groupings may actually be greater than the dollar value of the errors themselves, since one error frequently means that one of the commodities or groupings

is overcounted, and another is correspondingly undercounted. On the other hand there is, of course, some cancellation of errors in the figures for individual classifications.

Of the 20 commodity groupings shown on page 5 of this report, the following 12 had 20 or more items in the sample. Only one of these (17) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity grouping 17, there were 4 errors out of 21 in the sample. For the other 11 there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20.

03	15	21	35
07	17	27	37
13	19	31	39

Of the 112 individual commodity classifications under which cotton manufactures are classified, 102 had transactions reported for the period October-December 1957. Of the 102, the following 12 had 20 or more items in the sample. Only one of these (692) had net overcounting or undercounting in a ratio of as much as 1 out of 20 in the sample. For commodity 692 there were 2 errors out of 32 in the sample. For the other 11, there were either no errors found in the sample of 20 or more, or errors were found in a ratio of less than 1 out of 20.

107	181	230	705
161	182	235	905
171	225	692	915

The value overcounting or undercounting for any individual commodity or commodity grouping might of course be higher or lower than the item overcounting or undercounting, although on the average it could be expected to be lower since the average value for errors was lower than the average value for non-error shipments.

The comparison of error items found to total items in the sample for commodity groupings or commodities with less than 20 in the sample is not particularly meaningful. As stated earlier in this article, information on the results of the sample verification will continue to be shown on a cumulative basis, beginning with results for the October 1957 data, in subsequent issues of Report FT 130. Information on the proportion of items in error will then be shown for additional commodity groupings and commodities as the cumulative sample reaches 20 for each of them.

# UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES, BY GROUPINGS OF COMMODITIES

OCTOBER-DECEMBER 1957
