Make Your Selection Now for Spring Planting

*WORLD'S CHOICEST NURSERY AND
GREENHOUSE PRODUCTS*

“GROWN IN AMERICA”

IN winter when everything is peaceful and quiet, and the rush of business for a season is lulled, more time and thought can be given to selecting trees and plants for improving the grounds and garden. When looking over a large catalogue, it is very difficult to decide on what is best. Bearing this in mind, we have selected the items here given from our very extensive collections as those that will stand harsh treatment and severe weather better than others. Every plant enumerated has some distinctive character that merits its having a place in any garden. We can personally recommend these plants as those most probable to give satisfaction in every way because, with a little care, amazing results can be accomplished.

BOBBINK & ATKINS
RUTHERFORD NEW JERSEY

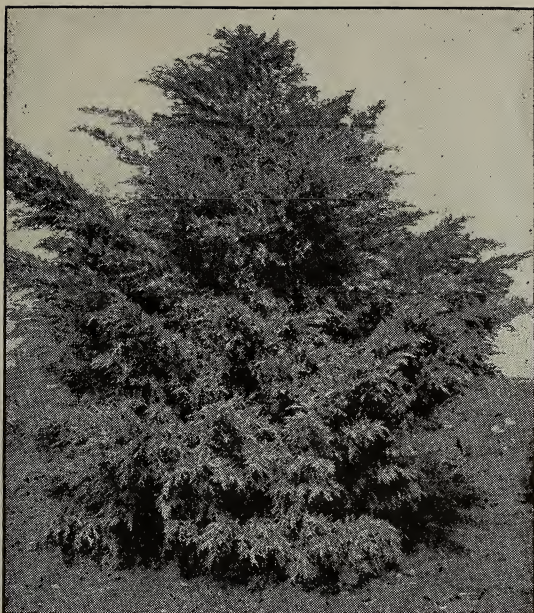

Retinospora squarrosa Veitchii (see page 6)

EVERGREENS

Biota conspicua. As inferred by the name, this beautiful little tree stands out among all others on account of the attractive colors it assumes. From the bright golden hue in spring, it gradually merges into winter clothing of a warm orange-brown shade.

Each		Each
1½ to 2 ft.....\$0 90		2 to 2½ feet.....\$1 50

Juniperus Pfitzeriana

EVERGREENS, continued

Biota nana aurea. Another little Chinese plant that is desirable for the pretty dwarf habit and changing colors. It is very appropriate for the front of borders or outside of groups.

Each	Each
9 to 12 inches...\$0 75	12 to 15 inches...\$1 00

Juniperus Pfitzeriana. When seen this graceful evergreen sells itself. It is one of those plants which have a pleasing soft, appearance, with light gray foliage that seems to harmonize beautifully with anything. Each

Each	Each
1½ to 2 ft.....\$1 00	2 to 2½ ft.....\$1 50
2½ to 3 ft.....	2 50

Juniperus Japonica aurea. An old variety that never looks common because so few things have the solid old-gold appearance which characterizes this plant. Further than this, its rugged method of growing at once makes an agreeable impression.

EVERGREENS, continued

Prices of *Juniperus Japonica aurea*

Each		Each	
2½ to 3 ft.....	\$1 75	3 to 3½ ft.....	\$2 50
3½ to 4 ft.....			3 00

Picea excelsa. This is the parent plant of many of the interesting dwarf and pendulous forms of Spruces. The symmetrical growth and robust habit are taken advantage of by using the tree for decoration at Christmas time. It is particularly suited to our climate of extremes, and is widely used as a windbreak, being dense and ornamental throughout the year.

Each		Each	
2 to 3 ft.....	\$0 40	4 to 5 ft.....	\$1 75
3 to 4 ft.....	75	5 to 6 ft.....	2 75
6 to 7 ft.....			3 50

Pinus divaricata. The most rapid and rugged grower of all the Pines; of great adaptability, succeeding anywhere in either dry or wet locations. For attaining sure success in growing Pines, we would say plant the "Jack Pine."

Each		Each	
2 to 3 ft.....	\$0 75	4 to 5 ft.....	\$1 75
3 to 4 ft.....	1 00	5 to 6 ft.....	2 50

Pinus montana and **montana Mughus.** These dwarf-growing Pines are extremely useful for planting near the home, to give the fresh, resinous Pine odor so refreshing. They remain quite dwarf and compact, and are very hardy.

Montana	Each	Mughus	Each
1 to 1½ ft. spr..	\$0 50	8 to 12 in. spr....	\$0 50
1½ to 2 ft. spr..	1 25	1 to 1½ ft. spr....	1 25

Retinosporas, as a family of evergreens, should be used extensively. Many forms and varieties can be harmoniously arranged among other evergreens with great effect. They greatly differ in appearance, and we would recommend especially these forms; *Retinospora pisifera* and its golden variety *Aurea*; the feathery *Retinospora plumosa*, also with a golden form, and the light yellow *Sulphurea* variety. Another highly decorative Cedar is the soft-looking *Retinospora squarrosa Veitchii*.

Retinospora pisifera and **Retinospora pisifera**

2 to 3 ft.....	\$1 25	4 to 5 ft.....	\$3 00
3 to 4 ft.....	2 00	5 to 6 ft.....	4 50

Taxus repandens. The Yew that is coming into just popularity for low hedges, banks, rock-gardens, etc. For such work this beautiful spreading Yew cannot be duplicated. It keeps low and compact, and makes a magnificent specimen of a shining, soft green shade, beautiful all the year.

	Each		Each
1½ to 2 ft. spr..	\$1 75	2½ to 3 ft. spr....	\$3 50
2 to 2½ ft. spr..	2 50	3 to 3½ ft. spr....	5 00

Thuja occidentalis. The basis of all evergreen planting. Hardy and beautiful at all times, the old American Arborvitæ is known almost universally.

	Each		Each
5 to 6 ft.....	\$2 50	6 to 7 ft.....	\$3 25

Tsuga Canadensis. There is probably no evergreen that is used for such a variety of purposes as the Hemlock. As a specimen, its symmetry and graceful habit is effectively shown, but it is equally as desirable for evergreen hedges. With clipping, a dense growth is formed, making a hedge that cannot be excelled in practical use and neatness.

	Each		Each
2 to 3 ft.....	\$1 00	4 to 5 ft.....	\$3 50
3 to 4 ft.....	2 00	5 to 6 ft.....	4 50

Rhododendrons, with their burst of glory in spring, transform our nurseries into a Paradise. On the shady side north of the house, the Rhododendron is perfectly at home, growing where it is difficult to make most plants exist. Our collection, "grown in America," is one of the most select. Prices on application.

Boxwood. Those who have experienced the familiarity of old-fashioned plants will know and appreciate the old, old Boxwood. Slow, but sure in growing, with a delicate aroma that is peculiar to itself, the Boxwood will stand distinctly alone for growing in your mind. Prices on application.

Cotoneaster horizontalis. A very distinct shrub of a flat trailing habit, having small, round, lustrous green leaves almost evergreen. The branches and leaves are regularly arranged, giving a striking effect. In winter the bright red berries are very attractive.

	Each	Doz.
15 to 18 in. spread.....	\$0 75	\$7 50
9 to 12 in., pot-grown.....	25	2 50

Pyramidal Boxwood

Acer platanoides globosum. 10-year head

TREES AND SHRUBS

Acer platanoides is perhaps the most extensively planted tree in this country, not without reason. For street or lawn, the Norway Maple stands first. It grows straight and strong, and develops a finely proportioned head which affords a good shade. The leaves are large, deep green in color, leaf out early and persist on the tree until very late autumn. We have a standard form with a round head, named **Globosum**, which is very attractive and useful for lawn purposes.

	Each	Doz.	100
8 to 10 ft.....	\$0 75	\$7 50	\$50 00

TREES AND SHRUBS, continued

Æsculus Hippocastanum. As a flowering tree, the Horse-Chestnut excels. The panicles of white flowers are from 8 to 10 inches long and stand erect, showing their beauty to the best advantage against the dark green, divided leaves. It forms a rugged, beautiful tree that lives to a good age. See illustration, page 9.

	Each

14 to 16 ft., 3 to 4 in. diameter.....	3 00
15 to 17 ft., 4 to 5 in. diameter.....	4 00

Japanese Flowering Cherries in their oriental beauty cannot be described. They flower profusely, and for the soft harmonious shadings should be included in every shrub planting.

	Each		Each
4 to 5 ft.....	\$1 75		5 to 6 ft..\$2.50 to \$4 00

Lindens grow like natives of this country and, in fact, *Tilia Americana* is an American tree. They are comparatively fast growers, and always form a clean, straight stem, with a well-shaped, spreading head. There are two other varieties worthy of mention, namely, *Tilia Europæa* and *Tilia argentea*. The latter has beautiful, heart-shaped leaves with a silvery under-surface and deep green above.

These Lindens give great satisfaction when used in any way—some of the finest avenues in this country are of Lindens.

Americana and Europæa—

	Each
10 to 12 ft.	\$2 00

	Doz.		Doz.
3 to 4 ft.....	\$3 00	4 to 6 ft.....	\$5 00
6 to 8 ft.....			7 50

Magnolias, with their large, dignified flowers of all shades of rose, blooming before the leaves appear, are naturally very conspicuous, with the large, cup-shaped blooms borne on the naked stems. The foliage gives quite a tropical effect by reason of the size and fresh color.

	Each		Each
3 to 4 ft.....	\$2 50	4 to 5 ft.....	\$3 50
5 to 6 ft.....			4 50

Malus. The Flowering Crabs are as prolific in blooming as the Japanese cherries, and the pretty shades and delicate substance of the flowers have made them a favorite wherever known.

	Each		Each
3 to 4 ft.....	\$0 60	4 to 5 ft.....	\$0 85
5 to 6 ft.....			\$1.25 and 1 50

Fruit Trees and Bushes have claimed much of our attention in the past few years and, as a result, we have a collection of the best and most recent varieties of fruits which are described on, page 110 of our Illustrated General Catalogue. You will find also trained trees in many different forms for walls and fences, which, apart from the very interesting study they offer, are very practical and convenient trees, as the fruit borne on them ripens well and is easy to gather. Prices on application.

HARDY HERBACEOUS PERENNIALS

All plants offered here are strong, field-grown plants, except where noted. You will find these all described in our General Descriptive Catalogue.

Prices, except where noted, 15 cts. each, \$1.50 per doz., \$10 per 100

Anchusa Italica, Dropmore Variety. 25 cts. each, \$2.50 per doz., \$18 per 100.

Althæa (Hollyhocks). Double; separate colors. 20 cts. each, \$2 per doz., \$12 per 100.

Flowers of Hardy Pinks

HARDY PERENNIALS, continued

Aster ericoides, Novæ-Angliæ, ptarmicoides, sub-cærulea and White Queen.

Chrysanthemums. Hardy. In 100 varieties, out of 2½-inch pots. \$1 per doz., \$6 per 100.

Dianthus barbatus. In separate colors. \$1 per doz., \$8 per 100.

Newport Pink.

Hibiscus Moscheutos Hybrids. Our new Hybrid Giant-flowering Marsh Mallows are still ascending in magnificence and popularity. The soft coloring of the flowers harmonizes with almost any color scheme. The colors range from pure white to intense crimson, and the season of flowering is from July to late autumn. Not only are the blooms decorative, but the foliage as well, for it reaches such a size as to give quite a tropical effect. The plants average over 6 feet in height, and in shrubbery they are quite conspicuous. As to soil and position, they grow almost anywhere.

Our stock is unlimited in quantity and of the highest quality. All the roots offered will bloom profusely next summer.

Phlox decussata, Mrs. Jenkins

Our **Plant-Tubs, Window-Boxes** and **Garden Furniture** are made with two aims in view—to last longer and to be more shapely than any others. In order to accomplish this, we use only heart cypress wood, which is close-grained, does not warp, shrink, twist or swell, and being naturally oily, can be painted without a “filler” or covered to imitate sandstone.

Your wishes can be carried out in detail, and you have every confidence in recommending our plant tubs and rustic furniture. **Ask for our Plant Tub Catalogue.**

Rhododendron Catawbiense

We are certain that you will be well pleased with, and profit by, a visit to our extensive nurseries at any time, as there is always something of unusual interest, either in our greenhouses or outside.
