Oita Ken

The explanation on the pavement repairing works.

(1) Intervals and areas, prearranged the works

Main road in Oita and Beppu Cities(refer to attached paper)

Oita City 7,420 sq. meter

Beppu City 8,445 "

(2) Decision of the working methaod and the course up to date. At present, the great parts of road surface are the concrete pavement and we intend to cover extremely cracked places and pot holes with Asphalt Emulsion.

As the repairing with concrete takes many days to protect after working and prevent the traffic, we intend to repair with Asphalt Emulsion as said above. As we have no plant as to Asphalt Concrete and it is difficult to realize, so it is impossible to use Asphalt Concrete.

Compared with these, as the Asphalt Emulsion is liquid state, the warks are very easy and we can work without preventing the traffic, so we intend to adopt this method.

As we have no plant as to Asphalt Concrete and it is difficult to realize, so it is impossible to use Asphalt Concrete.

Compared with these, as the Asphalt Emulsion is liquid state, the works are very easy and we can work without preventing the traffic, so we intend to adopt this method.

As we received the imformation in which we would be distributed the Asphalt Emulsion last year from the Home Ministry,we expected the arrival of the said materials from manufacturing company, but we cannot receive yet and then we have negatiated with them often, but we cannot recognizethe possibility of realization.

Accordingly as there is a manufacturing factory of Asphalt Emulsion at Kamegawa-cho, Beppu City, we negatiated the said factory, but the factory is now closed due to the shortage of many sorts of raw materials. Then we planned to entrust to manufacture by the raw materials which will be got by the prefectural office.

Namely, as we know that there are Asphalt among released materials from Sakanoichi Military Arsenal, so we get these and design the method of Manufacture.

Now, we enumerete the main materials, needed during the manufacturing process as follows.

(i) Asphalt

(ii) Coal

(iii) Materials of Emulsion

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 77501/3

Vegetable oil 1700 liters

Caustic Soda (NaOH)

Out of abovementioned materials, Asphalt-100tons and Coal-50tons are to be delivered to the wark. The vegetable oil are necessary 1700l in quantity and as they were listed on the list of released goods from army, so they are under negotiation with authorities by us.

(It is expected to be at Hita Branch, Fukuoka Military Supply Depot)

In short, we will undertake to manufacture after we have succeeded to receive the vegetable oil and got the actual goods, because we can't manufacture for the want of the vegetable oil at present.

(Now, it is douftful whether we succeed to get them or not, and when we cannot get them, it takes considerable days.)

(3) Important materials and machineries for the pavement repairing.

(i) Asphalt Emulsion	200 tons	Be managing to get
(ii) Aggregate (Broken Stone)	700 Cub. metres	Under manufacturing
(iii) Gasoline		Being stocked
(iv) Macadam Roller(8 tons)		Being prepared, able to be used.

(4) Prearranged date to set on and finish the work.

(i) Prearranged date to set on the work.

It will depend on whether the vegetable oil will be got or not to be able to

REPORT ON LABOUR TROUBLE IN COMMUNICATIONS.

The Communications Employees Union, being dissatisfied with the reply of the Minister of Communications to the demand they made, on the 20th of Nov. 1946 applied for the mediation of the Central Labour Committee. The union demanded the creation of the minimum wage system, the giving allowance to meet the shortage of living expenses of the employees and immediate conclusion of a labour treaty and so on. And again the Union was not satisfied with the propoaale of the mediation made by the Committee, refused it, and declared on the 23th of Dec. 1946 the fighting for accomplishing their purpose. They are carrying on the joint fight in co-operation with the Unions of employees in other departments of the governments and self-governing offices. We are present you a report on the details of the truble for your reference in the same cover.

Yours respectfully,

made by the Committee, refused it, and declared on the 28th of Dec. 1946 the fighting for accomplishing their purpose. They are carrying on the joint fight in co-operation with the Unions of employees in other departments of the governments and self-governing offices. We are present you a report on the details of the truble for your reference in the same cover.

Yours respectfully,

N. Isono, Director,
Kumamoto Bureau of Communications

P.S.

According to the recent news, the union will go on strike on and after Feb. 1st. And I am very anxious that all communication services---- except communication services in the interest of the Occupation Forces--- will be stopped against the demand of the public.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

LABOUR DISPUTE IN CONNECTION WITH COMMUNICATIONS

1. The National Communications Employees Union demanded on the 20th of November the soluton of the dispute from the Minister of Communications by the resolution passed at the general meeting held in Kyoto in the latter part of October.

The items of their demand are as follows:----

(1) The creation of the minimum wage system (Minimum ¥600) based on the present economical conditions, (2) immediate payment of an additional allowance to cover the shortage of living expenses (¥1,000 for each man, ¥2000 for each dependent excluding tax), (3) abolition of the 300 yen limit, (4. the immediate conclusion of a labour treaty, (5) the abolition of all discriminating treatment, (6) the hastening of abolition of the special post office system, (7) the amplification and strengthening of the measures for well-being of the employees and education of them (8) the immediate abolition of salary tax, ## (9) no special handling of the New Year Mail.

2. The reply to their demand was delivered on the 25th of November, but no definite plan was stated for the solution of the troubles except giving up the special handling of the New Year Mail was promissed. The Minister said that he would do his best for the realization of the demands of the Union. With his statement the Union was not satisfied, therefore, the Union refered the case to the Central Labour Committee, which was accepted formally on the 27th of November. On the following day the Committee decided at its general meeting to arbitrate in this dispute.

A Commission for the mediation was formed on the 29th of November. The Medi-

definite plan was stated for the solution of the troubles except giving up the special handling of the New Year Mail was promissed. The Minister said that he would do his best for the realization of the demands of the Union. With his statement the Union was not satisfied, therefore, the Union refered the case to the Central Labour Committee, which was accepted formally on the 27th of November. On the following day the Committee decided at its general meeting to arbitrate in this dispute.

A Commission for the mediation was formed on the 29th of November. The Mediation Commission began on the 2nd of December, investigations into the matter, and presented terms of arbitration, and urged the Union to accept these terms.

3. The proposed terms by the Mediation Committee specified two things, payment and labour treaty. Regarding payment, the following items were regarded reasonable: (1) One thousand yen (¥1,000 including tax to a man, two hundred yen (¥200) for his wife, and one hundred yen (¥100) for each dependent, for the purpose of covering the shortage of their living expenses.

(2) The government should form a Committee for investigation into payment, and a Committee for the better treatment of the employees in the Government and Self-Government Offices, which jointly will decided on a proper wage system founded on a living standard in order to assure the lowest standard of living.

The Government should take a special step as a temporary measure before the establishment of a proper wage system to enable the employees to make both ends meet.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

It should be noticed that no definite figures are stated in connection with this proposed measure. 3) The abolition of the ¥500 limit and the imposition of tax on the salary should be left to the discretion of the Government.

4) Direct negotiations should settle the matters concerning the abolition of the discriminating treatment, the abolition of the special post office system and the broadening and strengthening of the well-being, and educational facilities of the employees. In connection with a labour treaty, a mediation plan was suggested in details. What was not taken up in the proposed plan was left to be settled by direct negotiations of the parties concerned.

4. The Union, after discussion in the Central Assembly of the representatives on the 26th and 27th of December, informed it to the Central Labour Committee that the Union would reject the proposal of the Committee, on the ground that as to a labour treaty, the union had no opposition, in general, but all the other items of the proposal they could not accept. The reason for which the Union rejected the proposal of the mediation were as follows: the sum stated by the proposal to cover the shortage of the living expenses was less than that demanded by the Union, and the sum actually they received at the year end was less than the sum proposed by the Mediation Committee; the amount they recieved on an average to a man ¥1000 (lowest ¥700 including tax), which included the family allowances; the minimum wage system being wholly left in the hands of the Government, and as to the provisional measures, there was no figures given and further, the improvement of the special post office system was proposed while the Union demanded the abolition

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

cover the shrtage of the living expenses was less than that demanded by the Union, and the sum actually they received at the year end was less than the sum proposed by the Mediation Committee; the amount they recieved on an average to a man ¥1000 (lowest ¥700 including tax), which included the family allowances; the minimum wage system being wholly left in the hands of the Government, and as to the provisional measures, there was no figures given and further, the improvement of the special post office system was proposed while the Union demanded the abolition of the system.

5. In the meantime the Minister of Communications replied that efforts would be made for the solution of the dispute along the line of the proposal of the mediation. In such way the parties concerned were brought to stand pat face to face and the mediation resulted in failure. The Union as a consequence declared on the 28th of December to fight and also decided to reopen negotiations with the Minister after the New Year's holidays. The Union seems to use every effort to realize the creation of the minimum wage system, to demand an additional payment to cover the shortage of living expenses, and the abolition of the special post office system. They may operate the right of strike if necessary.

6. Last but not least, this is not the fight of the National Union of the Communications Employees alone, but also of the other Unions of the Government employees. Five labour unions, National Union of Communications Employees, the Federation of the National Railways Employees Unions, the League of all Japan

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Government and Municipal Labour Unions, the League of all Japan Public Organizations, and the Union of Educational personnel created on the 26th of November, a "Committee on the Joint Fight of All the Unions of the employees in the Government and Self-government Offices in Japan." and are carrying on a vigorous fight for getting enough income for their living. This dispute being really the fight by all the employees in all branches of the Government and Self-government offices against the Government. The fight is comprehensive and far-reaching, no doubt, therefore, the settlement of it may be a matter of considerable difficulty.
