THE PRACTICAL NURSERYMAN.

PUBLICATION OFFICE:

HUNTSVILLE,

ALABAMA.

W. F. HEIKES, Editor and Manager.

Issued Monthly. Sent only to those in the trade. Advertisements 10c. a line agate; \$20.00 a page; one-half page \$10.00; one-fourth page \$5.00. Advertisements must be handed in one week before the day of publication. Advertisements for less than \$5.00 will not be accepted. Discounts: 3 times 5 per cent.; 6 times 10 per cent.; 12 times 25 per cent.

TO ADVERTISERS.

The circulation of this Journal will be confined strictly to Nurserymen, Florists and Seedsmen, and only invited advertisements of articles pertaining specially to these trades will be inserted. We guarantee a regular monthly circulation of 4,000.

The Am. Association of Nurserymen

President, Col. U. B. Pearsall, Ft. Scott, Kan.; First Vice President, W. F. Heikes, Huntsville, Ala.; Secretary, Geo. C. Seager, Rochester, N. Y.; Treasurer, N. A. Whitney, Franklin Grove, Ill. Executive Committee: Irving Rouse, Rochester, N. Y., W. J. Peters, Troy, O., D. S. Lake, Shenandoah, Iowa.

Place for next meeting, Niagara Falls, first Wednesday in June, 1894.

Society of American Florists.

J. T. Anthony, Chicago, President; Robert Kift, Philadelphia, Vice-President; Wm. J. Stewart, 67 Bromfield St., Boston, Mass., Secretary; M. A. Hunt, Terre Haute, Ind., Treasurer. Place of tenth annual meeting: Atlantic N. J., August, 1894.

Am. Seed Trade Association.

W. Atlee, Burpee, President; D. I. Bushnell, First Vice-President; S. F. Leonard, Second Vice President; A. L. Don, New York, Secretary and Treasurer. Place of twelfth annual meeting: Toronto, June, 1894. Applications for membership should be addressed to Wm. Meggatt, Chairman membership committee, Wethersfield, Conn.

American Pomological Society.

Hon. P. J. Berckmans, Augusta, Ga., President; Chas. L. Watrous, Des Moines, Iowa, First Vice-President; Geo. C. Brackett, Lawrence, Kansas, Secretary; Benj. J. Smith, Cambridge, Mass., Treasurer. Place of next meeting: San Francisco, Cal.

We purpose to mail this paper to every nurseryman, florist and seedsman in the United States, and to leading firms in the same vocations in foreign countries. We do not solicit subscriptions. If you value THE PRACTICAL NURSERYMAN, please accept it with our compliments.

The Agricultural Department as a General Bureau of Information.

It is not as generally known as it should be that one of the leading functions of the National Agricultural Department is to furnish information on subjects related to agriculture to those who may ask for it.

Not only is the magnitude of the Department of Agriculture underestimated, but also its real value to the farmers throughout the United States. How to use it in order to secure the greatest possible benefit from it, is a matter of importance to the people in general and the farming class in particular.

For information of a general character, the inquiries should be made on a separate sheet of paper, containing the name of the individual, that of the post-office, county and State. These inquires, if simply directed to the Commissioner of Agriculture, Washington, D. C., will be promptly sent to the proper division or bureau for an immediate answer.

Questions relating to the contagious diseases of animals or inquiries for published documents relating thereto, will be referred to Dr. D. E. Salmon, Chief of the Bureau of Animal Industry. Should a fatal disease appear amongst the live stock, a day should not be allowed to pass before the fact is communicated to the Commissioner of Agriculture. Such matters admit of no delay, and experts familiar with contagious diseases should be summoned at once.

If information is wanted in regard to insects that are injurious to the crops of the field, orchard or garden, and the best known methods of preventing their ravages, or in regard to silk culture, write to the commissioner, and he will refer the inquiry to Prof. C. V. Riley, Chief of the Entomological Division.

Should you require information of a statistical character, such as the extent and value of the agricultural resources of any territory or State, or county in such State or territory, or of the relative increase or decrease of the average yields of special crops in special localities, or for

special statistical reports, the request will be referred to Henry L. Robinson, the Chief of the Statistical Division.

Should you require published reports, or information in regard to the most suitable grasses for culture in any special locality, in any State or territory, or if you should want any grasses, grains, seeds or plants identified and correctly named, wrap the specimens in paper, tie with a string and forward by mail, at the same time write a letter to the secretary, and both will be referred for answer to Chief of the Botanical Division.

Should information or special reports in regard to tree culture, popularly called "forestry", the preservation and value for commercial purposes of the various kinds of trees growing in your own or other localities; or any other information relating directly thereto, write to the Secretary of Agriculture, who will refer your inquiries to Prof. B. E. Fernow, Chief of the Forestry Division.

Should you wish for information or printed matter relating to the adulteration of food, the examination of textile fibres, butter and its substitutes, or in regard to the varieties of mushrooms suitable for food, apply to the Secretary, who will refer the inquiries to Dr. Thos. Taylor, Chief of the Microscopical Division.

Information relating to fruit culture, both of a general and specific character, can be had by request of the commissioner.

If information be desired as to the food habits, the distribution and migrations of North American birds, in relation to agriculture, horticulture or forestry, or published documents relating to the same, apply to the commissioner. The Chief of the Ornithological Division is Dr. C. H. Merriam.

For special information in regard to fungus diseases of plants, such as mildews, blights, smuts, rusts, which annually involve the loss of many millions of dollars to farmers and fruit growers, write to the Secretary. Prof. B. T. Galloway is the chief of this recently established Mycological Section.

If postage stamps or cash are forwarded to the department, they will be returned to the sender, as the department is not allowed to charge for services rendered. The agricultural department is principally for the benefit of the agricultural classes, but indirectly benefits the commercial classes also. The Secretary of Agriculture and his assistants are your servants, who, though working with the brain instead of the hand, are not unmindful of their duty to the agriculturists of the nation, who are

the principal owners of the property of which the Secretary of Agriculture has the oversight and care.

Iowa Peach History.

A Hardy Variety Which Alone has Been Successful—Its Qualities—Future Prospects.

H. W. Lathrop, Iowa City, Iowa, writes Orange Judd Farmer: Forty or fifty years ago the climate of Iowa was considered fairly well adapted to peach raising. But the severe winters of 1855-6 and 1856-7 completely destroyed the peach orchards of the State, which so thoroughly discouraged the fruit growers that few peaches have since been raised except in the extreme southern part of the State until quite recently. At present Iowa gives promise of success as a peach growing State, especially the southern three-fourths of it. In 1851 Dr. Barrows of Davenport sold to Jacob Friday a farm lying in Scott county, upon which were three peach trees. Mr. Friday lived upon this farm until above five years ago. During that time he raised peaches from those three trees and those propagated from them, his annual crop often exceeding 100 bushels. Mr. Friday says that these same trees

NEVER FAILED TO PRODUCE A FULL CROP

except during the seasons following our most severe winters, and that there were very few of the 38 years spent on that farm in which he did not harvest a good crop of fruit. About 30 years ago a man living about four miles north of Muscatine, got some trees from Mr. Friday, and has been raising peaches ever since. Some twelve years ago this gentleman had a very successful crop, and Abner Branson, of West Branch, got a peck of the fruit and planted the pits in his nursery. From this planting Dr. J. I. Bailey of the same place got a half dozen trees, and they have produced a good crop every year since they began bearing, some years bearing five bushes to the tree. All of the trees are profuse bearers, and unless the fruit is thinned out, or the branches are propped, they will be broken. In character the fruit is larger than medium size, a free stone, with a small pit and white flesh. A peculiarity of this variety is that the trees become hardened before the close of autumn.

At a meeting of the South Eastern Horticultural Society, held at West Branch in December, 1892, this fruit was first given public recognition; being brought to the notice of the society by Dr. Bailey, it was christened the "Bailey," placed on the list of fruits and recommended for general cultivation. A notable characteristic of this fruit is that it reproduces itself from seed without variation.

THE HUNTSVILLE WHOLESALE NURSERIES.

Our Superintendent writes that every acre of ground on the place is planted full and that we will have to buy or rent ground for at least one hundred thousand stocks. There are one thousand acres in the nursery tract, of which about eight hundred and fifty acres are tillable. All blocks cleared last fall and this spring have been replanted. We speak of this because this vast area of unbroken blocks, forms the most remarkable display of nursery stock ever seen in one establishment in this or any country. The oldest of this stock will be only two years old next fall. Besides this we have planted this spring forty acres at Biloxi, Miss., where we are making a specialty of Roses, Mulberries and Figs. We are always ready to name prices.

We desire our friends to note the Box Lots advertised in this list and to favor us with their further orders. It will be seen by reference to our list printed in the March Number of THE PRACTICAL NURSERYMAN, that our sales have been good—we think fully equal to former years. We have nearly a month remaining in which to dispose of this surplus. Many find it a great advantage to be able to buy of us for shipment at a day's notice, and our cold storage facilities enable us to hold stock in fine dormant condition until the first of May. Much of what we have now left is very suitable for lining out, and we ask attention to our liberal terms to those who may wish to avail themselves of this opportunity.

Our experience the past year confirms us in our uniform belief that it is always better to hold to the hopeful side in business affairs, keeping well within prudent bounds. Notwithstanding the financial stress of the past few months and the low price of farm products, the merchantable nursery stock throughout the country will have been pretty closely sold out by the time spring is past. The success of the coming year depends so much upon the courage and activity of tree agents, that all who dispose of their stock in that way, should employ good men, a few more of them, and pay them well.

Unsolicited Commendations.

ILLINOIS, March 28, 1894.

"The box 'Parsley' to hand to-day. Opened up in fine shape. Are pleased with the trees. Our customers all say they never saw such finely rooted trees."

OHIO, March 26, 1894.

"The two boxes, 500 Ea. Richmond cherry, and 500 Keiffer pears, came in just before the blizzard. As I open them, they show to be in good order and satisfactory. I am sorry I did not order two boxes more."

ILLINOIS, March 21, 1894.

"The box of Cherry trees 'Oppose' received. I am well pleased with them."

KANSAS, March 22, 1894.

"The box of peach trees opened in fine condition, the grade is high. I am well pleased with them."

ILLINOIS, March 23, 1894.

"The trees were received in good order."

ALABAMA, March, 23, 1894.

"The box of trees received. I am much pleased with them in every respect."

KANSAS, March 27, 1894.

"I got the box all right, in good order. All O. K."

ILLINOIS, March 20, 1894.

"Trees arrived here Monday morning and we have them unloaded and part unpacked. So far they are in good order and all right." (2 car loads.)

COLORADO, March 10, 1894.

"We just received word from Texas that the bill of trees that the writer ordered of your Mr. Heikes arrived on the 3d inst. They were in good condition though so long on the road, and our man who has charge of the planting tells me they are the best trees he has seen."

MISSISSIPPI, March 14, 1894.

"The peach trees were received some two weeks ago, and have them lined out in many rows nicely, and am well pleased with them. I have handled fruit trees five or six years and know what a tree is, and will say that yours are the best rooted and nicest handled trees I have ever seen."

NEBRASKA, March 19, 1894.

"Your boxes came all right. The cherries were fine. I am well pleased."

Terms and Conditions Governing Quotations in the Price List of the Huntsville Wholesale Nurseries.

RATES.—As we send this list to the trade only, we make the difference in prices between the 10, 100 and the 1,000 rates very slight—simply sufficient, as a rule, to cover the difference in the expense of handling in the smaller numbers. We uniformly tie in bunches of 10, when consistent with the order, and we suggest to our customers to make their orders for varieties in multiples of ten as far as practicable. Orders for 50 and not over 300 trees, if for not less than 10 of a variety, will be charged at the rate per hundred. Orders requiring 300 trees or more, and not less than 10 of a variety, will be filled at the lowest quoted prices. Orders for less than 10 trees of one variety, will be charged at the rate per ten.

SEASON.—Our packing and shipping season begins by the 20th of September, and continues until about the first of March.

We have great advantages to offer here in early shipments for the North in Spring. We do not accept orders for trees we do not grow, as we never buy trees to sell again. You can depend upon us for fresh dug trees. Each order is taken up separately, and not until it is wanted for shipment.

SHIPPING DIRECTIONS.—We respectfully beg our patrons to furnish us with explicit *directions as to shipping*, and the mode of conveyance by which they desire trees forwarded. When no particular directions are given, we forward according to the best of our judgment. *But in no case do we assume any responsibility as to safe delivery and condition of Trees and Plants after a proper shipment by us.*

RELEASE.—When pre-payment of freight is not required, we will Release and Guarantee, and take forwarder's receipt and mail to consignee. It is left to the option of the shipper of trees over some railroads, whether he will release them or not under the clause "Value less than \$5.00 per 100 lbs." If released under this clause, the freight is less on roads governed by this classification, and we will assume it to be proper to make this release, without reference to the value of the trees, unless instructed to the contrary. This clause does not apply upon roads under some of the district classifications, and because of this confusion we will not be held responsible for any oversight to release, unless instructed by our customers. Claims for delay or loss must be made to the forwarders.

PACKAGES.—The cost of package must be added to the prices quoted in this list, as follows: Boxes 30 inches square, from 7½ to 9 feet long, as the trees may require, each \$2.50; boxes 24 inches, \$2.00; boxes 18 inches, \$1.50; bales from 25c to 75c each.

PACKING.—Goods will be packed in moss, and especial care taken to insure their arrival in the best condition.

ASSORTMENTS.—We do not require customers to take an assortment they do not wish; but will sell one variety alone if desired. If any substitution can be allowed, either in grade or variety, it should be so stated when making the order. As a rule we do not substitute without permission.

CAUTION.—We accept all orders upon the condition that they shall be void, should any injury befall the trees from frost, hail, storm, fire, or other causes over which we have no control.

TERMS.—Cash. When desired we will allow 30 to 60 days from date of shipment, to responsible, prompt-paying customers. Parties with whom we have had no business trans-

actions, will save time by sending reference. Bank, if possible, with order. We wish it expressly understood that payment is expected from the first collections made, and the time named is only intended as so many days of grace in which to make returns. To northern customers, who wish to lay in stock for Spring trade, we will ship late in Fall or early in Spring, and allow time for payment till May 15th. If shipment is required in the Fall for Spring use, a note is to be given upon receipt of the trees. We do not allow any discount for cash, but we make our prices low to command cash, or prompt returns. In orders when the time is not mentioned, 30 days is to be understood. Interest at the rate of 8 per cent per annum must be paid on over-due accounts. Should prices be changed, either higher or lower, during the season, the prices ruling at the time the order is made, are expected to stand.

FORMS OF PAYMENTS.—All bills are payable at the office of the seller, and remittances should be made by drafts on New York, Chicago or St. Louis, or by money orders on some Express Company, or by postal orders. We will, however, accept checks from those of our customers who may be located at places having no banking, express or postal facilities, provided they make them in every case payable "with exchange," or add ¼ of one per cent to the amount of the bill for the cost of collection.

GRADES.—We grade very carefully, in some cases by caliper, in others by height. When graded by both caliper and height, the caliper must govern, as the height then named is, only to be considered approximately. When graded by height or caliper, we include the lower number and exclude the higher. Instance: in a grade of 4 to 5 feet trees, the 4 feet trees are included, but not the 5 feet trees. If 5 feet trees are wanted, the 5 to 6 feet grade must be ordered.

GUARANTEE OF GENUINENESS.—While we exercise the greatest diligence and care to have all our Trees, etc., true to label, and hold ourselves in readiness, on proper proof, to replace all trees, etc., that may prove untrue to label, free of charge, or refund the amount paid, in is mutually understood and agreed to, between the purchaser and ourselves, that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for said trees, etc., that shall prove untrue.

ACCEPTANCE.—Notice should be sent us by telegraph, at our expense, if there is any cause of complaint, or should the trees be refused, stating reasons. Claims for deduction, from whatever cause, will receive consideration only when made promptly upon the receipt of the trees. If trees show any signs of shrivelling upon arrival, they can usually be restored by being thoroughly watered and buried entirely under the ground for two or three days. Should there be any frost in the trees upon arrival, they should not be removed from the box until the frost is all out. The box should be placed in the cellar or protected in some other way. The presence of frost in the boxes is not to be considered an evidence of bad condition, as we pack to secure the trees against damage, if the frost is allowed so come out in the natural way. Goods will be considered accepted if removed from the boxes in which they are packed, without notice of complaint to us, and without our orders for their disposition.

Bulletin No. 5.

Shipments from St. Louis
AT ONE DAY'S NOTICE.

—*— **SURPLUS STOCK** *—

—FROM THE—

Huntsville Wholesale Nurseries,
HUNTSVILLE, ALA.

We have for the past fourteen years offered in assorted lots, at St. Louis, in Spring, such stock as we had in surplus. The plan has been satisfactory to our customers and ourselves. Herein is a schedule of what we now have in St. Louis for immediate shipment. This stock is exclusively our own growing at Huntsville, Alabama, fresh dug this Spring, and packed in the best manner, in moss, and warranted in fine condition. Everything is fine of the grade, with full fibrous roots, and not culled, as we adhere to a strict system of grading.

Below the Blizzard Line.

Our Nurseries are far enough south to escape the severe freezing weather. Everything is bright, green and fresh—sound to the tips. Nearly all the sorts offered are standard sorts, such as most nurserymen can use in assortment with their own growing. Orders should be sent in as early as possible; but the stock need not be shipped until wanted, as we are prepared to hold it here in good condition. We have nothing for sale not offered on this list.

It will be noticed by some of our correspondents that we have refused orders the past season for several articles listed. Our fear of overselling, and some countermands, account for this. We ask attention to the small-sized trees offered, for transplanting into nursery rows. All of the small trees, as well as the large ones, are very nicely rooted, and everything is young, smooth and bright.

We can refer to nurserymen who have bought of us in nearly every State and Territory. We have given satisfaction, and guarantee it for these shipments.

Terms—Cash with order, or 30 to 60 days from date of shipment to responsible, prompt-paying parties. Address W. F. HEIKES, Manager, Room 37 Republic Building, St. Louis, Mo., until May 1st.

For convenience in telegraphing for assorted lots, a cipher is given. The cipher word stands only for one box in cases where there are more than one in the same assortment.

Address **W. F. HEIKES, Manager,**
Room 37. Republic Building, ST. LOUIS, Mo.

ST. LOUIS, MO., March 31st, 1894.

For usual conditions concerning risk of transportation, claims, etc., see Huntsville Wholesale Nurseries pages in *The Practical Nurseryman*.

ASSORTED LOTS.

We offer the following assortments, in box lots, at very low prices, to insure quick sales, as we do not open or repack anything in St. Louis. The stock is of the same quality as that sent out by us heretofore. Each box contains an assortment as shown. In ordering one or more boxes, should the particular lots desired be sold, please state what substitution will be allowed. The prices quoted include the cost of boxes and the freight from Huntsville to St. Louis or East St. Louis—the transfer charges at these points are to be paid by the purchaser. When the post office address and railroad station differ always give explicit marks for the boxes when ordering.

PERFECT DORMANT CONDITION.

This spring has been very favorable for digging and shipping, and everything is in fine dormant condition. The cold storage plants here have been greatly extended and improved the past year, and the new system of refrigeration enables us to hold our trees in a lower temperature than heretofore. This will insure a perfect dormant condition until the close of the season. We have brought to St. Louis this spring, thirty-four car loads, including packed orders and surplus stock.

CUT PRICES.

 We have reduced prices on some boxes of Cherries and Plums.

THE HUNTSVILLE WHOLESALE NURSERIES PRICE LIST.

BUDDING BRANCHES.

Do not confound us with any other Southern nursery. Some trees offered from the South are not in dormant condition. When you see them do not conclude that our trees are in the same plight. We have immense cool cellars at Huntsville and dig before the trees begin to bud. Remember the legend—HEIKES-HUNTSVILLE-TREES.

A STUMP PULLER. SHADE TREES.

In the Genuine Smith Grubber we claim the most perfect machine ever invented for pulling trees, stumps, cleaning timber-land, moving buildings, and for work where a windlass is necessary.

We claim that in proper use the machine will pay for itself in a week; inexperienced hands have averaged one-half acre a day in close timber with this machine; it practically does away with the labor of ten men; trees are pulled out of the ground more rapidly than two men can chop them down; it requires but one minute to pull a tree six and seven inches through!

More than 5,000 of these machines have been sold since the first patent was issued, in 1882. No purchaser has ever entered a complaint. We challenge such! Our machine is a pronounced success.

We have just tried your machine in pulling Black Jack and Old Field Pine. It is more powerful than we supposed, and the effective work done with it is surprising.—W. F. HEIKES.
