As the largest gross earnings were made in the year 1873, a comparison of the aggregates and results of that year with those of 1880 is here given.

	1880.	1873.
Gross Earnings	\$ 18,749,461	\$19,414,509
Operating Expenses	10,418,105	13,746,598

Net Earnings	8,331,356	5,667,911
Tons freight moved one mile	1,851,166,018	1,053,927,189
Rate per ton, per mile	Cent 0.750	Cent 1.335

These figures show that we had to do eighty per cent. more work to earn a dollar in 1880 than we did in 1873. In other words, the public obtained transportation for 180 tons freight in 1880 for the same money they paid for 100 tons in 1873.

The following table shows the freight business for eleven years 1870—1880.

FREIGHT.

1879	7,541,294	229.9	1,733,423,440	11,288,261	.642	.398	.244
1880	8,360,336	221.7	1,851,166,018	14,077,294	.750	.435	.315

As compared with 1879 the freight business of 1880 show the following changes :

	1880.	1879.	Increase.	Per cent.
Tons carried.....	8,350,336	7,541,294	809,042	10.73
Tons, one mile.....	1,851,166,018	1,733,423,440	117,742,578	6.79
Earnings.....	\$14,077,294	\$11,288,261	\$2,789,033	24.71

The Passenger business which had, in common with that business on other principal roads, shown a steady decline since 1873 shows this year an increase. A comparison with 1879 is here given :

	1880.	1879.	Increase.	Per ct.
Number passengers carried.....	3,313,485	2,822,121	491,364	17.40
Number passengers carried one mile.....	176,148,767	141,162,317	34,986,450	24.79
Earnings.....	\$3,761,008.06	\$3,138,003.59	\$623,004.47	19.86

A noticeable feature of the gain in passenger business, is that it is largely caused by the heavy immigration from foreign lands to the cheap fertile lands of the West, insuring a continuance of the marvellous growth in the production of food to be moved to the sea board.

The passenger business for the eleven years 1870—1880 is shown in the following table :

OPERATING EXPENSES.

The road was operated in 1880 for 55.56 per cent. of the earnings. This included all outlay, as nothing was charged to construction or equipment. Besides the addition to the property already mentioned, there was included in the operating expenses the cost of 7,590 tons steel rails, increasing the number of miles of track laid with steel from 1,082 to 1,125. The side tracks were increased 12 miles. The passenger equipment was all supplied with the automatic brake, and other improvements looking towards the highest standard of efficiency and safety, were made.

CONCLUSION,

The transactions of the year show the correctness of the opinion expressed in previous reports, and which had for a long time been held by all reflecting railroad managers—that success was to be found in a large volume of traffic at low rates.

The Board of Directors, at the declaration of the dividend payable Feb. 1st, 1881, resolved to make dividends quarterly—the first one to be paid on May 1st, 1881.

President.
