## GIFU PREFECTURAL GOVERNMENT

24 "Sho" NO.4329

Dec. 7, 1949

SUBJECT: Petition for Use of Designated Reparation Equipments.

TO : The Supreme Commander for the Allied Powers.

Dear Sir,

Concerning the above subject, we received applications as in the annexed from Co. Ltd., Gifu Machinery Manufactory, a designated reparation plant, under our jurisdiction, which was authorized to use by Gifu Military Government Team on Nov. 7, 1946 and has been engaging in the manufacture of wood-working machines and repair of other machines.

Furthermore, it was authorized to make tools and implements 600 pcs. a month and agricultural tools 150 pcs. a month by Economic Scientific Section, GHQ on Nov. 1, 1949 and now concentrating its energies on the production of scroll chucks, in accordance with the demands from India, Siam and other southern nations.

It is in dire need for the plant to use continuously the above-mentioned machines in order to meet such demands completely and to rationalize its production.

So we hereby implore you to give a special permission to it in consideration of the above actual circumstances.

Yours truly,

Kamon Muto  
Governor, Gifu Pref.

4. The outline of applicants company.

a) Description of present production.

This company is now manufacturing the parts of spinning machine, with spindle, ring as main product, by orders from Fuji cotton spinning Co., Toyo cotton spinning Co., Toyoda Automatic loom Co., Minsei cotton spinning mill, Tsuzuki spinning Co. and others.

It is aimed that increase in production, as well as products of more superior quality by complete use of full capacity is materialized, by the assist once of 25 subcontract plants in Nagoya City.

However, the present in-stalled machines are now worn out owing to the use for fifteen or sixteen years since the inauguration of our business and some of them must be repaired because they had been partially destroyed by the air-reid during the war.

Production quantity of spinning machine's parts in October is as follows:

Total production of various kinds of spindle complete: 9013 sets.

Total production of various kinds of rings for spinning: 15,355 sets

Total production of Flyer spindle for expert: 765 sets

b) Number of employee.

No change is seen in number of employee.  
Details in this item is stated in the attached sheet No.4

C. Experience in production.

Period of experience in product in the past.

In production of spinning machine's parts spindle-complete, ring, flyer, roller which was set out in 1922, and in down to the present.

This plant ranked highly in manufacturers of same kinds of products before the war, but we would not help stopping our production during the war time.

However, we reopened the manufacturing of spinning machine's parts after the termination of war.

And, the present products is already surpassed pre-war production in the precision.

We are planning increase in production quantity by new installation of special chemical equipment and new machines.

Monthly production plan for export and domestic use.

1. Total number of various kinds of spindle complete: 15,000 sets
2. Total number of various kinds of ring for cotton spinning: 20,000 sets.
3. Total number of spindle for flyer 5,000 sets
4. And others (arbor, new Blake) : 30,000 sets

5. Reason for necessity of removal.

The present installed machines owned by our company are worn out. Moreover, most parts of lathes must be repaired because they had been partially destroyed by the air-raid during the war.

Even with long year's experience and peculiar technique, we can not expect products of superior quality and increase in production quantity, but for the acquisition of new machine, whose installation in the plant by removal is in application.

1. On the recommendation of Mr. E. C. Grafton, Reparations Property Division, Civil Property Section, GHQ, SCAP, the following two items located at the Fujita Seisakusho K.K. (09-16), 2, Owarizakamachi, Tajimi City, Gifu Prefecture are hereby reported.

2. The two items in question, are termed "Rouletter" by the plant; however they are in reality bullet grooving lathes. Originally these items were included on the original inventory as 09-16-54 SP and 09-16-55 SP. At the time the special purpose attachments were destroyed, the code numbers and the "SP" were removed from the machines and new code numbers (09-16-126 and 09-16-127) assigned to the equipment.

3. On being evaluated, these two items were not included even though they were located in the plant at the time. This equipment is still located in the plant and being maintained.

## H. Reason of Application for Deletion:

1. Immediately after the designation for the reparation plant, in August, 1946, we submitted the application for the permission of conversion to the production of part of spinning machine using the reparation machineries, but it was not approved.
2. We closed the plant, because the application for permission was rejected, and at present we are exclusively engaging in custody and repairing of machineries.
3. In considering about the management of plant after the withdrawal of reparation machineries and utilization of existing leisure machineries, we wish to manufacture the ceramics for the following reasons: This plant was originally constructed as the ceramics works, and also the materials needed for manufacturing of ceramics can be acquired in

-4-

the neighbouring district, thus we have every suitable condition for the ceramics works.

4. For the above mentioned reason, we wish to set up the custody quarters for reparation machineries and deletion quaters, and we hope the latter would be deleted from the designated facility for manufacturing ceramics.

## H. Reason of Application for Deletion:

1. Immediately after the designation for the reparation plant, in August, 1946, we submitted the application for the permission of conversion to the production of part of spinning machine using the reparation machineries, but it was not approved.
2. We closed the plant, because the application for permission was rejected, and at present we are exclusively engaging in custody and repairing of machineries.
3. In considering about the management of plant after the withdrawal of reparation machineries and utilization of existing leisure machineries, we wish to manufacture the ceramics for the following reasons: This plant was originally constructed as the ceramics works, and also the materials needed for manufacturing of ceramics can be acquired in

the neighbouring district, thus we have every suitable condition for the ceramics works.

4. For the above mentioned reason, we wish to set up the custody quarters for reparation machineries and deletion quarters, and we hope the latter would be deleted from the designated facility for manufacturing ceramics.
