KFL No. 9-34 22 February 1949

To : Hiroshima Military Government Team

Through: Chugoku Liaison and Coordination Office

Subject: Report on returned Machines from [redacted], [redacted], Hiro

1. Reference is made to letter KFL No.223 of Kure Branch, Hiroshima Finance Bureau dated 24 December 1948, subject "Report on accomplished Removal of Machines returned from [redacted], Hiro".

2. The machines listed in the enclosure have been additionally returned to the custody of the Finance Bureau upon further contact from the [redacted], Hiro.

3. The machines were completely moved in on 12 February 1949 to the Mizuno Area for further custody.

4. Judging from the inventory code numbers the machines are thought coming from other prefectures. Necessary contact is therefore being made through the Japanese Channel with the prefectures concerned.

5. The above for your information.

17 January 1949

To : Hiroshima Military Government Team

Through: Chugoku Liaison and Coordination Office

Subject: Application for Temporary Operation of Reparations Machines - Harima Dock, Kure

We herewith apply to you for the permission of the above mentioned subject according to the following details.

1. Machines applied for use:

			(Location)
a. Boiler (tube type),	code No. 11-5(5)-	412, class 1,	Bldg. H-5
" ("),	" "	- 413, class 1,	ditto
Feed water tank,	" "	-9609, class 2,	ditto
b. Boiler	" "	-1160, class 3,	Bldg. H-11
Floating tank,	" "	-10143, class 2,	Bldg. H-18
" " ,	" "	-10144, class 2,	ditto
" " ,	" "	-10145, class 2,	ditto

2. Term for use (a & b above respectively):

a. Six months from the date of permit.
b. One year from the date of permit.

3. Location for use:

a. At the present location.
b. Boiler with code No. 11-5(5)-1160 will be removed for use from Bldg. No. 11 to Bldg. No. 10.
Floating tanks will be removed for use to wreckers on the sea.

4. Responsible custodian:

Toshio Jimbo, Director of Kure Dock, Harima Zosensho K.K.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

HIROSHIMA FINANCE BUREAU

5. Reasons for application(a and b above respectively):

a. The steam hammers now in use at the forging shop Bldg. No. 5 are operated by compressed air, but the operation of compressed air pump is limited due to the shortage of electric power. The temporary operation of the three boilers and feed water tank is therefore needed.

b. The boiler with code No. 11-5(5)-1160 is needed for increasing the capacity of ship repairing.
The three floating tanks are needed for wreckers.

6. Kind consideration on this matter will be greatly appreciated.

13 Jan. 51	Cordinal Request for the Authorized Use of Port Facilities in the Port of Kure	Minister of Transportation

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

13 January, 1951

COPY

TO : General Headquarters, Supreme Commander for the Allied Powers.

FROM : Minister of Transportation

SUBJECT: Cordial Request for the AUTHORIZED USE of Port Facilities in the Port of Kure.

With regard to the use of No.1 Berth and No.1 Transit Warehouse at Docks Area in Kure Port, we had obtained a permission for temporary use thereof from the Hiroshima Military Government Team in March 1948, and since then these facilities have been used and managed by the hand of the Kure Harbor Administration Office, a detached organ of our Bureau.

In the meantime, on November 27 last year, we received from the Chugoku Civil Affairs Region an advice against the furtherance of continuous use of the abovementioned facilities in future on the ground that these facilities fall under 2 C of SCAPIN 2103 (Subject: Revision of Scope of Activities in Former Japanese Naval Shipyards), dated 23 June 1950.

However, the said port has at present no equipment suitable for cargo works of vessels other than the subject facilities, so should the use of the port facilities in question be suspended in compliance with the aforementioned banning clause, it would inevitably cause a serious obstruction in carrying out the cargo works of vessels.

Such being the actual situation, it is requested that your consideration kindly be given to the authorized use of the subject port facilities by the Kure Harbor Administration, Office.

T. Yamazaki
Minister of Transportation.

19 Jan 51
Telephone instant advise that this is approved. RKS

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(Reference)

Verbal Advice Delivered by the Officer in Charge, Economic Div., Chugoku Civil Affairs Team, Concerning Berth and Transit Warehouse

(November 27, 1950)

The validity of SCAP's directive contained in "2C" of SCAP's Memorandum (Subject: Revision of Scope of Activitiens in Former Japanese Naval Shipyards), dated June 23 of the current year is entailed to the port facilities such as warehouse, etc. now under temporary use of the Regional Maritime Bureau.

You are advised, therefore, that an application for permission for permanent employment thereof should be filed with ESS, GHQ, SCAP, from the Ministry of Transportation at an earliest possible date, or the continuance of use of such facilities would be cut off as of January 1, 1951.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

APPLICATION FOR MOVEMENT AND AUTHORIZED USE OF DESIGNATED REPARATION MACHINERY AND EQUIPMENT

Date: 22, Dec. 1950

TO: Minister of Finance

FROM: President of Shin-Fuso Metal Industries, Ltd.
Address: Azuchimachi 4-chome, Higashi-ku, Osaka.

1) Name and Location for the plant which intends to use designated reparation machinery and equipment.

Steel Works, Shin-Fuso Metal Industries, Ltd.
219, Shimayacho, Konohana-ku, Osaka.

4) Necessity for movement and use of machinery and equipment.

(1) Our own machineries have been old, and are not good in efficiency and accuracy.

(2) The demand for our products is getting up recently.

(3) These machineries can not be obtain in our country at present.

(4) We can expect an increase of 25 percent in products by using these machineries.

For President.

Hisakazu Hirota

APPLICATION FOR CONVERSION OF DESIGNATED REPARATION PLANT

21 December 1950

TO : Hon. K. Masuda,
Director-General of Reparations Agency.

FROM : T. Suzuki, Mayor of Kure City.

Acc II 11-5 (7)

1) Name of Plant & Code No.:

Name: Part of Mizuno Area in the Ex-Kure Naval Arsenal.
Code No. : 11-5 (7)

2) Location of Plant: Kure City, Hiroshima Prefecture.

3) Category: (Area in red line shown in the attached plan)

Land		5,000.00 tsubo	
Buildings	1. Warehouse	207.39	"
	2. "	92.16	"
	3. "	758.10	"
	4. "	240.00	"
	5. Office	83.85	"
	Total	1,381.49 (bldg. area)	

4) Production: Those warehouses will be used for keeping imported goods and materials, and already have actual results of 400 tons of the Californian rice and 500 tons of ammonium sulphate. According to the brisk action in industry because of the large-scale factories now prospected to come into the ex-Arsenal area, ships will naturally be crowded in the port from abroad and cargoes to be handled are to be expected to leap up in quantity.

5) Necessity for Conversion: This city, since designated to open as a trade port on 1 January 1948, has received a considerable number of national and foreign ships, and made a wonderful contribution in loading and unloading with the excellent wharf facilities. But the only obstacle is the terrible shortage of storing facilities because of almost all existing sheds and warehouses near the wharfs are under occupation of the Allied Forces. Therefore, the existing buildings in the ex-Arsenal area applied hereby were repaired in the year of 1949 as the warehouses for keeping imported goods and materials with the approval of ten million yen bond issue. After the completion in August this year, those buildings, as the municipal warehouses, made a great contribution for stabilizing the citizens' living by custody of the imported rice and ammonium sulphate. We should be very grateful if you would give your favorable consideration for the subject matter.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Note:

(1) The use of the land and buildings was authorized by the Director of Chugoku Finance Bureau on 22 May 1950.

(2) The liaison man in charge of the subject matter:

Name: NAKANURA, Suekichi ...Chief of Economics Dept.

Address: c/o Kure City Hall,
Iwakata-dori 5-chome, Kure.

Tel. No.: Kure - 3491.

.....
T. SUZUKI,
Mayor.

MEMORANDUM FOR: Record

SUBJECT: Harima Shipbuilding, Kure Docks

1. Mr Hattori, Harima Shipbuilding Kure Docks reports that: the company received verbal approval from ESS SCAP to engage in work listed on conversion application, dated 30 November 1950, provided no contract will exceed three (3) months from December, and in each case must report immediately to ESS, SCAP upon acceptance of contract.

2. Harima expects to receive 200 million yen by 1 January 1951 as subsidy for the #3 Tonan Maru near Truck Island. The outstanding accounts payable will then be settled. Presently the largest debt (9 million yen) is to Chugoku Haiden for electric power.

3. Harima has an outstanding account receivable of 20 million yen for repairs to BCOF war vessels.

Application for Movement and
Authorized Use of Designated Reparation
Machinery and Equipment.

Date 11 Dec. 1950

To : Ministry of Commerce and Industry

From: President of Bansei Gomu Kogyo Sho.

Address: 590 Shinonome-cho Hiroshima-shi.

1) Name(Code No.) and location for the plant which intends to use designated reparation machinery and equipment.

Bansei Gomu Kogyo Sho (non-reparation)
590 Shinonome- cho, Hiroshima-shi.

2) Name (Code No.) and location of the plant where designated reparation machinery and equipment to be used actually exist.

Former Kure Navy Arsenal(11-5)
Miyahara-dori Kure-shi.

3) List of designated reparation machinery and equipment to be moved and used.

As per attached list.

4) Necessity for movement and use of machinery and equipment.

This plant lossing its factory and machines by A-bomb was compelled to close down, till August 10th this year when business was started again at 590 Shinonome-cho Hiroshima City, according to the earnest request of former employees and parties concerned who are repatriators and war-suffers.

Installing under-mentioned facilities, rubbers to repair automobile tires were mainly produced but it is impossible to meet the original aims with this production only. Using subject machines mentioned in this application table-covers, slippers and mud-guards of clogs, designed with colors, reproduced mainly of old rubbers will be produced appling special technique. Believing this plan appropriate for the rehabilitation of Japanese economy and also for the relief of unemployment, investigation has been carried out to purchase such machines in the public market however it was found difficult to obtain them promptly.

Approval of movement of subject machines to the applied location and its use(upon repair) will be deeply appreciated.

Worker	8(within 6 persons investors)	

2) Type of production and quantity.

Rubbers to repair automobile tires.
4750 tons monthly

3) Reason for use of subject machines.

Making use of the experience of managing rubber industry for over 30 years till the end of the war, it is intended to produce various products as mentioned in the "necessity for movement and use of machinery and equipemnt" of subject application. However prompt purchase of such machines are difficult from the public market.

If the use is granted increasement of 5 regular employees and 10 side job employees are required which will help unemployment relief.

4). Effect of approval of the application.

Presently 4750 tons of rubbers to repair automobile tires are produced monthly, with the approval 1200 tons could be increased monthly without adding any employees.

Mug guards of clogs 25000 pairs monthly and slippers 12000 pairs could be produced. Furthermore 5 regular employees and 10 domestic side job employees will be increased.

APPLICATION FOR CONVERSION OF
DESIGNATED REPARATION PLANT

30 November 1950.

TO : Minister of International Trade and Industry.
Minister of Transportation.

FROM : Chief of Kure Dock, Harima Shipbuilding Works, Ltd.
Address : Miyahara-dori, Kure-City, Hiroshima Prefecture.

1) Name of plant and Code No :

Kure Naval Arsenal 11-5(5).

2) Location of Plant: Miyahara-dori, Kure-City, Hiroshima Prefecture.

3) Category: A part of the Shipbuilding and Engineering Sections of Kure Ex-Naval Arsenal.

4) Production:

(A) Present: Works of ship repairs and others, specially Authorized.

(B) Planned:

Kind of planned production	Schemed Amount of production per month
i. Manufacture of chemical and mining industrial machinery and installation	220 Ton ¥24,200,000.
ii. Machining of parts of industrial machinery and installation	180 Ton ¥24,400,000.
iii. Manufacture of diesel engines	1,300 HP ¥19,500,000.
iv. Steel structural works for land use.	880 Ton ¥58,000,000.
v. Manufacture of electric machinery and installation	4,500 Set ¥8,100,000.
vi. Lumber sawing works	1,100 M^3 ¥8,000,000.
vii. Emergency and minor repairing works of ships in general	10,000 G.T. ¥6,300,000.
viii. Salvaging and scrapping works of ships in general	Undesided
Total	¥148,500,000.

(G. Sato), Director
Kure Dock, Harima Shipbuilding Works, Ltd.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

THE PLAN OF CONVERSION
OF BUSINESS OF KURE DOCK,
HARIMA SHIPBUILDING WORKS, LTD

30TH NOVEMBER 1950.

KURE DOCK
HARIMA SHIPBUILDING WORKS, LTD.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

1. Outline of the Plan

This plan is designed to convert the main substance of business of the Kure Dock of the Harima Shipyard which specializes at present in ship repairs to the production of machinery and steel structures for use on land, without effecting any great alteration in its present equipment and technique.

2. History of Kure Dock

The reactivation of the former Kure Naval dockyard was authorized by SCAP memorandum AG 561 GD (SCAPIN 451) of 15 December 1945, and on 1 April 1946 the Kure Dock started operation as a sheer peace industry using a part of the shipbuilding and engine departments of the dockyard. Ever since it has primarily been engaged in the salvage and scrapping of inoperable naval vessels located in Kure area, and in the salvage and major repair of inoperable merchant vessels.

3. Reasons for Necessity of Conversion

However, by a new memorandum SCAPIN 2103 dated 23 June 1950, the Kure Dock was requested to cease the shipbuilding activities at the end of this year, and as to a future operation program it was called upon to file an application. If things are left as they are, the closure of the dock is feared to be inevitable. The stoppage of function of the Dock means the callapse of the principal industry of Kure City; therefore, we should make every effort to draw up quickly a conversion plan of the Dock, for the purpose of stabilizing the living of the citizens.

The activities of the Dock having been thus restricted, the amount of its work has gradually decreased, The first step to reorganize the enterprise was therefore to cut down its payroll of 4500 by 1600 in last September. On the other hand, every effort was made in drafting of conversion plan keeping close contact with the Committee on Emergent Measure for Unemployment in Kure City and under the guidance of all official agencies concerned. The outline of the plan was included as one of the major item in the above mentioned Committee's recommendation for the conversion of former Kure Naval Arsenal facilities submitted to the Japanese Government at the end of September. Since then, however, the plan has undergone further studies and it has been partially changed.

The following plan contains close examination in order to convert most reasonably the main substance of business of the Dock yard, which was established suitably as a shipbuilding facility, and to decide the manufacturing item and amount of production and the number of employees, utilizing the outstanding characters of our facilities and techniques.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

4. Various Factors to be Considered in the Conversion program.

(a) Equipment

The former shipbuilding facilities are equipped with steel processing high-precision machines of large size, spacious assembly plants and devices for conveying heavy goods, which may be used, with little alteration, for the efficient manufacture at low price of large-sized steel structures, etc.

As to the engine construction facilities which are featured with large-sized and small-sized machine-tools of high efficiency and precision, it is especially to be noted that they are equipped with large-sized gear-cutters, planers, jig borers, etc. of superior capacity, exceedingly suitable to the manufacture of machines for industrial purposes.

Therefore, we are sure that the machines and apparatus now in use will function admirably in manufacturing industrial machines and steel structures, thus making the enterprise possible.

(b) Technique

Since a majority of the Dock's personnel have years' experience and are highly skilled in the manufacture and repair of ships, machines and precision apparatus of various kinds, it is expected that they will display their competence in the designing as well as processing and assembling of machines and steel structures.

This is how we have come to be convinced of the possibility of gradual conversion of the substance of our business while retaining the present personnel and technique after dismissal of 1600 workers in this Sept.

(c) Locational Advantage

The Port of Kure—directly connected with the heavy industry districts of Osaka—Kobe and Northern Kyushu by the Inland Sea watercourse—has a rosy future as a trade port. Again, the city, with engineering facilities of the former Navy being gradually converted for peace time industries, is destined to become an industrial center. Accordingly, it is up to the Kure Dock to decide on the nature of its future business on the basis of its location; and it is most desirable that the Dock is converted into a form of facility necessary to a trade port.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(d) Marketability of Produce

In deciding upon the substance of business consideration must also be given to the marketability of machines, steel structures, and other products.

Viewed from past results and technical performance, it is expected that in the production program after conversion is carried out, products of a high quality will be turned out at low price in view of the prevailing industrial standard of Japan. However, there being comparatively few establishments of the same nature in the Chugoku and Shikoku areas, it is anticipated that demand will be great for industrial machines and steel structures which are needed for the maintenance and construction of various production facilities chiefly engaged in chemical industry, especially for the setting up of plants moved to the place with the conversion of the former naval port.

To add to this, since it is possible to supply products of good quality at low price thanks to the long experience, superior technique and highly efficient machines as mentioned above, it is believed there is no cause for fear about availavility of markets.

5. Concrete Plan for Conversion.

(a) Principal Substance of Business after Conversion

Taking into consideration the factors stated above,
i. the principal substance of business should be shifted from ship repairs to other peace industries, e.g. the manufacture of industrial machines and steel structures;
ii. produce should be such as has lasting demand and has moderate marketability;
iii. minimum ship repair must be performed in this dock yard for the vessels entering Kure authorized as a trade port, having no other facility except the Dock.
iv. conversion must be carried out without major alterations to the present facilities or technique, and must make possible the financial as well as technical independence of the new enterprise.

If a plan is to be drawn up to determine the type of future business with the foregoing in consideration, the items as set forth on the attached table No.1 should be taken up. Expected amount of production, required personnel, and required number of the machines and tools now in use which are designated for reparations are also listed after studying facilities and market conditions.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

It shows that according to the program, 89 percent of the total capacity is to be used for the production of industrial machines and apparatus and steel structures, leaving only 6.5 for ship repairing.

In other words, with ship repairing removed from its line of business, the Kure Dock would necessarily have to fall back chiefly on machine industry, and that with great confidence in its operational success both technically and financially. It would be practically impossible from the financial point of view to shift to other industries, such as light industry, unless drastic alteration is effected in the present facilities.

(b) Gradual Shift to Conversion.

The period of conversion may be divided into 3 stages. (Attached tables Nos. 1 & 2 relate the outline of these stages, while Nos. 3 & 4 show the change in number of cases to be handled and that of personnel required.)

1st. Stage (present to the end of April 1951):
preparation for a changeover of facilities and technique will be carried out while operation is continued centering around the reconversion of S.S. Yamazono Maru and other orders in hand. Moreover to supplement the amount of works, it is most desirable to be authorized to repair merchant vessels besides works specially authorized.

2nd. Stage (1951 fiscal year):
Work concerned with ships will be limited to running repair and scrapping, while mechanical work will be made a regular business by degrees. The amount of general ship repair will be near the maximum that can be obtained in the shipping market. The number of cases of manufacture of machines and steel structures and of ship repair to be handled during the year is estimated to be respectively 458,000 and 120,000 in man-days.

3rd. Stage (1952 fiscal year):
Ship repair busines s will be gradually decreased, the capacity thus saved being used in the production of machines. At the end of the year machines and steel structures will occupy 85 percent of the total production. The number of cases of manufacture of machines and steel structures and of ship repair to be handled during this year is estimated to be respectively 468,000 and 81,000 in man-days.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Stage following the 3rd (after April 1953):
At the beginning of this stage the substance of business will become just as planned; that is, the production of machines and steel structures will correspond to 89 percent of the total production, thus completing the conversion. Ship repairing work will be limited to such degree as to maintain the capacity by which the running repair of vessel in the trade port is possible.

Attached table No.5 shows the distribution of personnel by function.

6. Conclusion.

After the shipbuilding industry is divorced from the Kure Dock, the manufacture of industrial machines and land steel structures is considered to be most fitted to the Dock as an enterprise which is, from the technical and economic stand-point, practicable to turn to, by making the most of the qualities of its equipment. Some preparations will have to be made in respect of technique and equipment before shifting to the new structure. For that purpose it is necessary to supplement the amount of work by obtaining authorization for running ship repair and for work on the Special Procurement, besides the already authorized one. In this way the Kure Dock will in the near future be regenerated as a plant which is primarily designed for the production of industrial machines and land steel structures and which, as a facility attached to a trade port, has only a capacity for repairing ships.

It may be added that according to the present plan conversion is scheduled to be completed in 30 months.

7. Postscript.

It is reported that an American Company has recently been negotiating with authorities concerned, with the intention of leasing the shipbuilding facilities of the former naval Arsenal at Kure in order to construct some large oil tankers for its own use.

If that plan is approved, we are proposed to change our plan, mentioned in the above, so as to meet such new development, considering from the higher standpoint the merits that such enterprise contribute to the self support of Japanese economy in large and the prosperity of the City of Kure in particular.
