IMPORTANT TO CUSTOMERS

ORDER EARLY.-We would suggest that customers send us their orders as soon as possible after receiving this catalogue, and thus avoid the rush of the planting season. It frequently happens that some articles are not in store when orders are received. In such cases we forward such as are ready, and the balance as soon as possible.

STOCK SEED.—A large part of our seeds are grown for us on contract by special growers, from our own stock, and in locations best suited for their development. Others are secured from strictly reliable sources, and constant effort is made to secure only the best.

ADDRESS, ETC.—Give name of your post office, county and state, sign your name plainly; also specify means of convevance preferred—whether by parcel post, express or freight.

FREE DELIVERY.—We will send by parcel post, to any part of the United States, all Vegetable and Flower Seeds quoted in this catalogue at packet, ounce, quarter-pound and half-pound rates, free of expense to the pur-chaser. All heavy seeds, including Peas, Beans, Corn, Clover Seed, Seed Grain, Roots, etc., are quoted at net prices at our store. Purchasers desiring these by mail are requested to remit an additional amount sufficient to cover postage, at parcel post rates according to zone. Allow two pounds in weight for each quart of Peas, Beans, or Corn. Particular attention is invited to this, as, when omitted, the cost of postage will be deducted from the amount received.

SHIPPING.—We deliver free to Express, Railroad or Boat. All goods travel at the buyer's risk, our responsibility ceases when we take the carrier's receipt. If goods are damaged so sign for them and enter claim with the carrier at once.

BAGS AND PACKING.—No charge is made for boxes or packing on anything, except Flower Pots, Nursery Stock and Hotbed Sash, and this at cost only. Cloth Bags are charged for at cost and if returned in good con-dition charges prepaid, will be credited at price charged.

REMITTANCES.-May be made by Express Money Order, P. O. Money Order or Bank Draft; if stamps or cash send in a Registered Letter. Parties having no account with us—who order goods without remittance— must furnish satisfactory references. Boston preferred.

PRICES. All prices are net without discount and subject to change without notice.

TERMS ARE NET CASH.-All bills on which short credits are allowed are due the first of the month succeeding the date of the purchase.

WE ARE THE ONLY HOUSE IN NEW ENGLAND carrying a full stock of Seeds, Tools, Implements and Repairs for the wants of the RETAIL TRADE EXCLUSIVELY.

GARDENERS' AND FARMERS' SITUATIONS.—We have at all times the names of practical gardeners and farm managers in want of situations on our books. If parties desiring such will write us, we shall be glad to put them in communication with men whom we deem suitable. To aid us in making a selection we ask full particulars. We make no charge for this service.

We give no warranty, expressed or implied, as to quality, description, productiveness, or any other matter of any Seeds, Bulbs or Plants we send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they must at once be returned

Chinese Woolflower

ASTER

No.

935 <u>SENSATION NEW RED.</u> The reddest of all red Asters. The color is a dark, rich garnet which glistens in the sunshine like a live coal. The double flowers averaging about 3 inches in diameter, are borne freely on long stems. Plants of free-branching habit about 18 inches high. Pkt. 15c., ½ oz. 50c.

1028 SINGLE ELEGANCE "GEN'L JOFFRE." The color a brilliant crimson scarlet, makes a fine addition to these beautiful, long petaled, single Asters. So useful as a cut flower. Pkt. 25c.

See pages 32 and 33 for other varieties.

BEGONIA

1183 MARIEMONT BEDDER. This beautiful variety originated on the estate of Mrs. T. J. Emery, Newport, R. I., where it is extensively used in beds and borders. It is the finest bedding variety grown, very compact, with small, reddish-brown foliage and a perpetual bloomer. The flowers are of the most brilliant scarlet and so freely produced that the foliage is almost hidden. If the plants are lifted in the Fall, cut back and taken into the house, they make one of the finest Winter bloomers. Pkt. 15c.

CALCEOLARIA

1306 **BJTTERCUP**. A gorgeous hybrid of the herbaceous or shrubby sort. Its large, vivid golden yellow flowers are produced in great abundance on stout, wiry stems. For bedding out it makes a striking and effective feature in the garden. Pkt. 50c.

CHINESE WOOLFLOWER

1574 CELOSIA CHILDSI. A much admired and effective form of the feathered Celosia, growing 2 to 3 feet high, well branched and each branch terminating with a large head or ball of rich crimson flowers of a silky wool-like appearance, blooming early and lasting till killed by frost. Will keep for weeks when cut, retaining its rich color. Annual of easiest culture. Pkt. 10c.

CHEIRANTHUS

1792 ALLIONI (Alpine Wallflower.) Its dwarf habit and brilliant orange yellow flowers make it an excellent plant for rock gardens and edgings. Pkt. 25c.

COSMOS

2027 DOUBLE PINK BEAUTY. An extra fine strain of this popular annual with beautiful double bright pink flowers. Pkt. 15c., 1/4 oz. 75c.

2028 DOUBLE WHITE QUEEN. Flowers like the preceding, but of a glistening pure white. Pkt. 15c., 1/4 oz. 75c.

FLOWER SEED, NOVELTIES AND SPECIALTIES FOR 1920-Continued

CYCLAMEN

The seed we offer is saved by a leading sepcialist from
selected strains of the very best varieties, and cannot fail to
produce flowers of the largest size, finest substance and most
charming shades of color. July to August is the best time for
sowing. Seedlings should be grown on without any check what-
ever, and when grown cool, the results are more satisfactory.

DELPHINIUM (Annual)

2301 **BLUE GEM.** Among the annual Delphiniums, a characteristic which has long been lacking is a plant of compact and bushy growth which at the same time gives an abundance of bloom. In this selection of ours we claim to combine both. The height of the plant is 9 to 12 inches, and the flower is large and of a beautiful deep blue. Of good compact habit, it makes an excellent pot plant. Pkt. 25c.

EREMURUS

2639 **GOLD MEDAL HYBRIDS.** As a result of over 20 years crossing and recrossing, many new and delightful colors and forms have been produced. These are all July flowering forms, perfectly hardy and like full sunshine, good but not too heavy a soil. 6 to 10 feet. Pkt. 50c.

HELIANTHUS

- 3081 <u>"DAZZLER."</u> (New.) A large flowered cucumerifolius variety about four inches across. Color rich chestnut, tipped orange. Pkt. 25c.

- 4004 **RAINBOW HYBRIDS.** The combination of colors in these New Hybrid Sunflowers is wonderful. It consists of many shades and tints from the most delicate light yellow through all the shades of gold and orange with pinks, reds and browns, much sought for when once seen. Pkt. 15c.

See page 44 for other varieties

HEUCHERA

4064 **CHOICE HYBRIDS.** By careful selection and reselection of a cross of H. Sanguinea and H. Micrantha, a strain has been produced which is much freer flowering and will produce from May to July sheaves of delicate blossoms in every shade of color from white to deep crimson; many of the bright, clear pinks are of exceptional beauty and invaluable as a cut flower. Pkt. 25c.

Cyclamen

HIBISCUS GRANDIFLORUS

4094 **BAINBOW COLORS.** One of the greatest nove ties of recent production comprising many shades from pure white, through pink and rose, some with dary centers, others of solid colors. Flowers 8 to 12 inche in diameter, remaining open practically all day. Heigh 4 to 6 ft., easily grown from seed, living and bloomin for years. Pkt. 25c.

INULA

5116 **GOLDEN BEAUTY.** A new and distinct variety The flowers are clear golden yellow, 2 or 3 inche across, borne on long slender stems, making it mos useful for cutting; plants grow to a height of 1½ to 2 fr Pkt. 25c.

IPOMOEA

5170 **QUAMOCLIT HYBRIDA** (Cardinal Climber, Beautiful and brilliant annual climber, attaining height of 30 feet or more, with Fern-like, lacinate foliage and covered with a blaze of fiery, circular cardinal red flowers in clusters from Midsummer ti frost. Pkt. 25c.

FLOWER SEED, NOVELTIES AND SPECIALTIES FOR 1920-Continued

LOBELIA COMPACTA

No.

5267 BLUE WINGS. A splendid new Lobelia of brilliant effect. The fresh green foliage becomes entirely hidden by a sheet of bloom of a lovely deep ultramarine blue. The individual flowers are unusually large. Pkt. 25c.

MYOSOTIS ALPESTRIS

5647 BLUE EYES. Robust growing, very free flowering and of a telling bright blue color, which is particularly effective when massed. Pkt. 25c.

PENTSTEMON

6264 GRANDIFLORUM EXCELSIOR, MIXED. New strain with very large flowers, colors range from white to deepest scarlet. Pkt. 50c.

POLYANTHUS, PRIMROSE 6759 LARGE-FLOWERED BEDDING HYBRIDS.

(Bunch Flowered Primrose). Extra choice strain, most carefully selected for habit, rich colors, and size of bloom, it is the finest strain procurable for bedding purposes, dwarf upright habit. Pkt. 25c., 1-16 oz. \$1.00.

PRIMULA

6963 MALACOIDES SUPERBA. A new and improved variety, with larger flowers and better habit than the old sort. It is a deep rosy pink in color, and makes a first-class greenhouse plant for Winter decorations. Pkt. 50c.

6964 PRIMULA MALACOIDES SUPERBA, fl. pl.

new form of the preceding with double or semi-double flowers, of deep rosy pink, large size, freely produced and lasting well in bloom. Pkt. 50c.

3760 CHINENSIS, GREY'S GIANT MIXTURE. Our strains of Primulas were among the best exhibited for the past two seasons, and cannot be excelled. Pkt. \$1.00.

See pages 53 and 54 for separate colors and other varieties

SALVIA

'125 SPLENDENS, LILIPUTANA. The dwarfest scarlet; it is not over 10 inches high, of compact, globular habit, and the vivid scarlet flower spikes are produced early in the greatest profusion. Excellent for pots or borders. Pkt. 25c.

130 SPLENDENS, OSTRICH PLUME. The most beautiful of all Salvias. The flowers are in the form of a plume, with which the plant is well covered. The color is the brightest scarlet, more intense than any other variety. Each plume is a bouquet in itself. Pkt. 25c., 1/8 oz. \$1.00.

See pages 55 and 56 for other varieties.

SCHIZANTHUS RETUSUS

227 PINK BEAUTY. Flowers are of an exquisite shade of rose pink, a pure self without any shading or marking whatever. A great advance upon anything of this color yet known. Pkt. 50c.

SCHIZANTHUS WISETONENSIS No.

7226 **SNOWFLAKE.** A great improvement on all older varieties. Plant compact, pyramidal habit and carries hundreds of the purest white flowers, the edges of which are beautifully fringed, and much larger than "Bridal Veil." As a pot plant it has no equal. Pkt. 25c.

7228 **PINK PEARL.** In every respect equal to its parent -the beautiful "Snowflake"-our novelty, while retaining the elegant pyramidal habit and luxuriant wealth of bloom of the latter, differs in the coloring of its flowers. In these the glistening white of the corolla is set off by a broad rosy pink margin on the wing and lip petals. Pkt. 50c.

VERBENA (MAMMOTH)

8196 ROSE QUEEN. Originating from the well-known variety "Helen Willmott" as a result of many years of selection, this superb new variety bears flowers of a lovely delicate rose, a tint somewhat paler than that of its parent. The individual blooms are universally large, often exceeding 1 inch and sometimes attaining 1½ inch in diameter, and as many as 20 to 30 of them are often grouped on a single umbel. Pkt. 25c.

8202 SCARLET QUEEN. Flowers of the most vivid scarlet, similar to that of V. hybrida "Defiance," but with a large and distinct white eye which occupies almost half the surface of the corolla. The blooms often exceed an inch in diameter and succeed each other for a very long period, so that nothing finer can be conceived for striking bedding effects. Pkt. 25c.

ZEA JAPONICA

8374 RAINBOW. Beautifully striped foliage in choice colorings. Pkt. 10c.

ZINNIA

8501 GIANT ACHIEVEMENT. A distinct variety pro-

ducing in abundance very large, double flowers partially tubular at the base and expanding in cactus-like form at the tip, displaying a rich variety of color, mostly in the warm shades, the reverse side of petals are of a varying lilac tint, giving a rare and beautiful combination of color never before seen among Zinnias. Pkt. 25c.

ZINNIA ELEGANS ROBUSTA

8502 **ROSE KING.** A variety bearing flowers of a beautiful carmine rose tint, a color which did not hitherto exist in this section. The flowers are of immense size, probably surpassing those of any other Zinnia, often attaining a diameter of 6 to 7 inches. Pkt. 25c.

Specialties in Vegetable Seeds

ASPARAGUS WASHINGTON

Washington Asparagus is as far as possible an extremely resistant, vigorous and high-yielding strain of giant Asparagus. The plants represented in its pedigree of the last three generations are the best found in a ten-year search among millions of plants tested. By best, we mean the ones that have produced offspring, uniform, rust-reindicates tenderness. A more uniform market type has not been seen among other so-called varieties that were in any degree rust-resistant.

Seed: Pkt. 25c., oz. 40c., 1/4 lb. \$1.25, lb. \$4.00, postpaid.

Roots: We offer this year a limited quantity of carefully-selected year-old roots. 100 \$3.00. Orders will be filled until our limited stock is exhausted.

BEANS

BUNDANCE. An extra-early variety, producing a heavy crop of long, stringless pods of excellent flavor. For forcing in the greenhouse during Winter it cannot be surpassed. Pkt. 25c., pt. 60c., qt. 90c. ABUNDANCE.

FRENCH'S DWARF HORTICULTURAL. An improved form of the Dwarf Horticultural, producing long pods, beautifully splashed with bright crimson. Pkt. 25c., pt. 45c., qt. 80c.

WEBBER WAX, or "CRACKER JACK." A high quality, flat-podded, stringless variety of the season of Wardwell's Kidney Wax. Pods 6 to 61/2 inches long, quite broad and uniformly curved, fleshy, stringless and brittle, with little fiber. Plant more vigorous and pro-ductive than Wardwell's. Color of pod is a decided bright yellow. Pt. 40c., qt. 75c.

BEET

EARLY WONDER. The most perfect model of an extra arly round Beet. The flesh is deep blood-red crimson. It is an ideal all season Beet, for while it grows a nice size beet early it retains its tender quality throughout the season. Pkt. 10c., oz. 30c., 1/4 lb. \$1.00.

CARROT

DANVERS HALF-LONG IMPROVED. Special strain. Grown for us by a leading market gardener in Dan-vers. Pkt. 15c., oz. \$1.00, 1/4 lb. \$3.50.

CELERY

NEWARK MARKET. The plants are strong and stocky with green foliage showing a slight tinge of yellow in the inner leaves. The stalks are very large and heavy, broad, crisp, solid, tender and of a most excellent nutlike flavor. This strain blanches very quickly and easily when boarded up; free from rust. Pkt. 25c., oz. \$2.00.

CORN, SWEET

GOLDEN GIANT. With its 12- to 16-rowed ears and deep golden yellow kernels is the most desirable yellow sweet Corn yet introduced. The stalks are short, sturdy and frequently produce two ears. Seed offered this year has been carefully grown in Massachusetts. 2 oz. 35c., 4 oz. 50c., 8 oz. 85c., 16 oz. \$1.50.

LETTUCE

- FRENCH, UNRIVALLED. Suitable for growing at any season. A sure heading variety forming large, compact heads, and slow to run to seed. Similar to Big Boston, being lighter green in color and not tinged with brown. Pkt. 10c., oz. 30c., ½ lb. 75c. SUTTON'S SUPREME. A fine Lettuce of the Drum-
- head type, and a marked advance on other varieties of the same class. Attains a large size, with a firm heart, which remains good for a long time before starting seed stems. Leaves prettily edged with red. Pkt. 25c.

MELON

- H. H. ROGERS. The finest outdoor Melon in cultivation, Fruit is of a large, globular shape, rich salmon-flesh, exquisite flavor. Pkt. 15c., oz. 50c. HONEYDROP IMPROVED. Flesh deep orange color
- very thick and sweet, with a delicious flavor; good size and very productive. Pkt. 15c., oz. 50c., 1/4 lb. \$1.50.
- **ROYAL JUBILEE.** A splendid oval, green-fleshed Melon, raised at the Royal Gardens, Windsor; skin almost white and elegantly netted. The flavor of the dark green flesh, which is delicious, is much ap-preciated by connoisseurs. The plant is of robust habit and sets freely. Pkt. 50c.
- SUTTON'S KING GEORGE. New forcing variety. A unique, bright salmon or scarlet-fleshed Melon of extraordinary thickness, surpassing that of any other variety; skin buff yellow and evenly netted. The plant is strong and short-jointed in habit; foliage large, dark and of great substance; shape oval. Pkt. 50c.
- SUTTON'S SUPERLATIVE. Fruit of medium size, almost round and very beautifully uetted. Flavor unusually rich, flesh scarlet, emerging into a beautiful green tint near the skin. Plant robust and sets fruit very freely. Pkt. 50c.

SPECIALTIES IN VEGETABLE SEEDS-Continued

PARSLEY

DOBBIE'S EXHIBITION. This Parsley has long been

recognized as a standard exhibition sort. It is remarkable for its large, fine leaves and close habit. The seed offered has been saved from selected plants only. every one of which was a perfect specimen. Pkt. 25c., oz. 60c.

ΡΟΤΑΤΟ

SPAULDING ROSE. A valuable early Potato of exceptional quality, resembling the Green Mountain in form but having a pinkish skin. Cooks white and mealy. Will give best results on light soils.

UNCLE GIDEON'S QUICK-LUNCH POTATO. The

tubers are nearly globular in form; they run the most uniform in size, color and quality of any extra early Potato. The eyes are shallow, with a pinkish cast around each eye, while the smooth, brownish-white skin is also flaked rosy crimson. Although maturing so quickly, it is an immense cropper, producing very few small tubers, the crop invariably finishing perfectly even in size. Price on application.

SQUASH

ROTHERSIDE ORANGE. This new and quite distinct form of Vegetable Marrow is globe-shaped, slightly flattened at the ends and when ripe takes a deep golden color. Instead of the rather insipid watery flesh of ordinary varieties it is firmer in texture and possesses a delicate flavor that pleases all who have tried it Pkt. 15c.

TOMATO

BOUNTIFUL RE-SELECTED. A Tomato of superior flavor, perfect in shape; of good size and free cropper. The fruit is bright red in color and very solid, excellent for forcing or ourdoor culture. Pkt. 20c., oz. \$2.00.

CROCKFORD'S ALASKA, or "NEW TRELLIS."

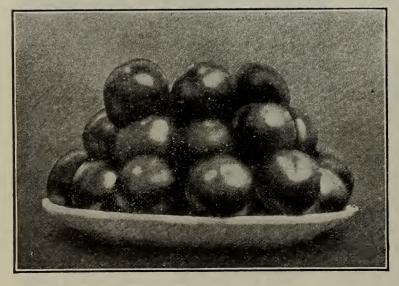

Without doubt the finest forcing Tomato on the market. Also the best for outdoors if grown on trellises. Rich deep color, solid flesh. Pkt. 50c.

- LISTER'S PROLIFIC. This variety combines all the essential qualities of productiveness, size, flavor, and color, whether planted out or grown in greenhouse. The clusters of fruit are borne in great profusion, and are remarkable for the number they carry; smooth and of a rich scarlet color. Pkt. 25c., oz. \$2.50.
- MYSTIC BEAUTY "CROCKFORD'S." A cross between Bonny Best and Alaska, fully as large as Bonny Best: ripens 10 days earlier and of a much deeper color. One of the best outdoor varieties. Should be grown on stakes. Seed limited. Pkt. 50c.
- ORANGE SUNRISE. The superb new Tomato we now offer is the result of a cross between the best of the red and yellow varieties and bears fruits of a bright orange color. It is equally suitable for indoor or outdoor culture. Pkt. 50c.

December 1, 1919.

Gentlemen: Pleased to say all seeds purchased from you were very satisfactory this year. The Beans, Peas, Beets, Squash and other vegetables were the delight and pride of my employer. Yours truly, (Signed) C. J. CODY, With Samuel C. Howes Estate, Newton, Mass.

Gentlemen:

Crockford's Mystic Beauty

East Seattle, Wash.

THOMAS J. GREV CO.,

Boston, Mass.

Gentlemen:

Last Spring I bought some of your special greenhouse forcing Comet Tomato plants from a friend and I never had nor saw better Tomatoes. I had a very heavy crop of first-class fruit and the commission house paid me better prices for them than any other Tomato on the market.

I am enclosing an order for some of this seed which kindly forward at your earliest convenience.

Respectfully yours,

(Signed) S. E. SANFORD

General List of Vegetable Seeds of Superior Quality

Awarded highest honors by the Massachusetts Horticultural Society for the best collection of vegetables, *i. e.*, a silver medal in 1914 and 1915; and award of \$100 cash prize 1916, and Silver Medal 1919.

Report of Vegetable Committee, 1914, Duncan Finlayson, Chairman: "Collection of Vegetables exhibited by seedsmen, a silver medal. This prize was awarded to the Thos. J. Grey Company, Boston, for a collection of eighty-nine varieties of vegetables, all correctly labeled. It was one of the most comprehensive collections of vegetables ever staged at Horticultural Hall and credit is due the T. J. Grey Co. for the artistic and educational way they were displayed." Our 1916 Prize Collection had 225 varieties.

We deliver free of expense to the purchaser to any point in the United States all seeds quoted in this list at packet, ounce, $\frac{1}{2}$ pound, $\frac{1}{2}$ pound and 1 pound rates by mail. SEEDS BY MAIL.

ARTICHOKE

One ounce will produce about 500 plants.

Sow seeds in April in good, rich soil, in drills 10 to 12 inches apart and about 1 inch deep. Plants should be protected from freezing during Winter, and the following Spring they should be transplanted, setting them 3 feet apart in moist, rich soil. Upon the approach of Winter the stems and leaves should be cut away and the bed covered so as to prevent freezing. Artichokes can also be cultivated

as annuals by sowing seeds in hot bed in January and producing strong, vigorous plants, which should be trans-planted into moist, rich soil in May.

Large Green Globe. The best variety; heads large and scales tender and excellent. Pkt. 25c., oz. \$1.00. Jerusalem Artichoke (Helianthus tuberosus). Cultivated for its tubers. Qt. 40c., pk. \$2.50.

ASPARAGUS

One ounce will produce 200 plants.

A deep, rich, mellow soil is best adapted to the growth of Asparagus. It may be grown from seed or propagated by roots. Sow as early in the Spring as the ground will admit, in drills from 12 to 14 inches apart, and cover 1 inch deep; when the plants are well up, thin to 3 inches apart in the drills. Keep the plants free from weeds during Summer, and protect slightly during Winter.

The following Spring the roots will be ready to trans-plant into permanent beds; the roots should be set in rows 3 to 4 feet apart, and 1 foot apart in the rows; the crown of the root should be 4 to 6 inches below the surface of the ground. A fair crop may be expected the third year from the seed, or in one to two years when roots are used, according to the age of the roots planted. By planting two-year-old roots a fair crop may be obtained in one year, and after that a full crop every year.

Conover's Colossal. A standard variety, large and of excellent flavor. Pkt. 10c., oz. 30c., ¼ lb. \$1.00. Giant Argenteuil. An early, large variety from France. Less likely to rust than others.Pkt.25c., oz. 30c., ¼ lb.\$1.00

Reading Giant. A variety of recent introduction, very large and free from blight. Pkt. 15c., oz. 50c., ¼ lb. \$1.75. **Palmetto.** One of the earliest; of large and fine growth.

Pkt. 10c., oz. 30c. Asparagus Roots. Strong, two-year-old plants. Cono-

ver's Colossal and Palmetto, each \$1.00 per 100, \$8.00 per 1000. Giant Argenteuil, \$1.25 per 100, \$10.00 per 1000. Reading Giant, \$1.75 per 100, \$15.00 per 1000.

BEANS, Dwarf or Bush

One quart will plant 100 feet of drill. One and one-half bushels will plant one acre.

A warm, light soil is best adapted to the growth of Bush Beans, but they will do well in almost any situation unless it is very wet. Plant in rows 2 to 3 feet apart, dropping the beans 3 inches apart and covering 2 inches. Keep the ground free from weeds and cultivate often. Never disturb the vines when wet, as the pods will become rusty. All the varieties are tender and must not be planted until the soil is dry and warm.

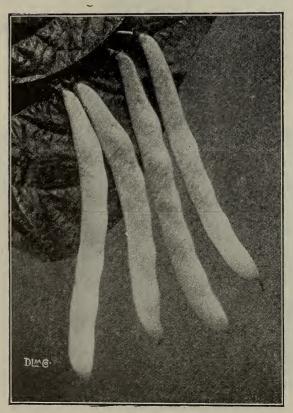

If by mail add Parcel Post rate to cover postage. One quart weighs about 2 pounds. We furnish 20c. packets of all Beans except where noted.

Long Island Improved. Very compact heads; produc-tive. Pkt. 15c., oz. 40c., ½ lb. \$1.25.

BROCCOLI

One ounce will produce 2000 plants.

This vegetable closely resembles the Cauliflower. A very rich, deep soil is required to grow the Broccoli to perfection; the seed should be sown early in the Spring, and the plants transplanted into rows 3 feet apart, with 2 feet between the plants.

Italian Purple Sprouting. An early maturing variety yielding a profusion of purple sprouts of delicious flavor. Pkt. 15c., oz. 65c.

White Cape. Heads compact, good size, and of a creamy white. Pkt. 25c., oz. \$1.75.

CABBAGE

One ounce produces about 3000 plants.

For early use a sowing may be made in the hotbed in February or March, and for Winter use seed should be sown in For early use a sowing may be made in the hotbed in the hotbed in the residuary of Match, and for white disc seed should be sown in the open ground in May or June. When the plants are 5 or 6 inches in height, transplant into rows 3 to $3\frac{1}{2}$ feet apart, setting the plants from 2 to 3 feet apart in the rows, according to the variety. A deep, rich, loamy soil is best adapted to the growth of this crop, and if large, fine heads are expected, the land must be prepared by very heavy manuring. A handful of wood ashes thrown into the forming heads will not only keep off the cabbage-fly, but will assist the growth of the plants to a capaidactive. the plants to a considerable extent. Slug Shot is equally effective.

- All-Seasons. An early drumhead, sure heading solid variety. Desirable for early or Fall use. Pkt. 10c., oz. 40c., 1/4 lb. \$1.50.
- All-Head. Earliest of the large Cabbages; heads uniformly solid. Pkt. 10c., oz. 50c., 1/4 lb. \$1.75.
- American Improved Savoy. The favorite curled Savoy Cabbage of finest quality, and an excellent keeper. Pkt. 10c., oz. 40c., 1/4 lb. \$1.50.
- Autumn King. The heads are of enormous size and very solid. It has few outer leaves, and owing to this fact, it is claimed that it will produce a greater weight of crop from the same space of ground than most other late Cabbages. Pkt. 15c., oz. 50c., 1/4 lb. \$1.50.
- Charleston, or Large Wakefield. This strain is about one week later than early Jersey Wakefield but the heads are fully one-half larger; will not burst when ripe. Pkt. 15c., oz. 75c., ¼ lb. \$2.75.
 Copenhagen Market. As early as Charleston Wake-
- field. Very solid. Excellent market sort. Pkt. 10c., oz. 50c., 14 lb. \$1.75.
- Danish Ball Head. A Winter Cabbage. Extra hardheaded and of fine quality. Pkt. 15c., oz. 50c., 1/4 lb. \$1.75.

- Cabbage Plants. See page 24.

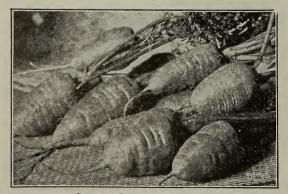

Carrots, Danvers Half-Long Improved, Special Strain

CARROT

One ounce will sow 100 feet of drill; three pounds required for one acre.

The Carrot flourishes best in a good, light, well enriched loam. Where there is a choice of situations, heavy and wet soils should be avoided, and preference given to the light and dry. For an early crop sow as soon as the ground is in good working condition; plantings for general crop may be made as late as June, but early crop sow as soon as the ground is in early, small-sized varieties may be sown in drills 10 inches apart, but the larger sorts require at least 18 inches between the rows; cover about $\frac{1}{2}$ inch deep, and when the plants are well up, thin to 3 to 4 inches apart. As an agricultural root, the Carrot is unsurpassed for feeding stock.

- Chantenay Half-Long, Stump-Rooted. The best sort for bunching, stump-rooted, and a good color at all stages of growth. Oz. 35c., 1/4 lb. \$1.25.
- **Danvers Half-Long.** The best variety for general crop; is of rich color and a good keeper; yields largely and is easily harvested. Oz. 30c., 1/4 lb. \$1.00, lb. \$3.00.

Woods Hole, Mass., Sept. 12, 1919. T. J. GREY CO., Boston, Mass. Gentlemen: You will doubtless be pleased to hear that I was again successful at Barnstable County Show this year in obtaining out of sixteen entires, six firsts, six seconds and three thirds. I consider my success was due to the good seed that your firm sends out. (Signed) JAMES GOODFELLOW, Head Gardener to Chas. R. Crane, Esq.

Cauliflower, Earliest Dwarf Erfurt

CAULIFLOWER

One ounce will produce 3000 plants.

The Cauliflower, like the Cabbage, requires a deep, rich soil, and seldom succeeds well when grown on land long under cultivation. Sow the seed in the hotbed in March and transplant into the garden in May; set the plants in rows and cultivate the same as Cabbage. If the season is dry, water often, as Cauliflowers cannot be grown to perfection without plenty of moisture.

- Danish Perfection. A very early variety of the Dwarf Erfurt type. The leaves are long, stand straight up making the inner leaves curl over and protect the head. All the heads mature the same time, making it possible to clear the ground at one cutting. Pkt. 25c., oz. \$4.00, ¼ lb. \$15.00.
- Early Snowball. Grey's Selected. A favorite variety, very sure to head. This strain has given excellent satisfaction during the many years we have sold it, and we believe no better strain can be found. Pkt. 25c., oz. 85.00, ¼ lb. \$16.00.
 Earliest Dwarf Erfurt. One of the earliest varieties;
- Earliest Dwarf Erfurt. One of the earliest varieties; very dwarf, with large, white, compact heads of finest quality. Excellent for forcing. Pkt. 25c., oz. \$5.00, 1/4 lb. \$16.00.
- Early Dwarf Danish, or Dry Weather. A choice strain that comes to maturity very evenly; a favorite for first crop with many growers. Pkt. 25c., oz. \$4.00, 1/4 lb. \$15.00.
- Lenormand's Short-Stem. A large, late short-stemmed variety. Pkt. 10c., oz. \$1.50, ¼ lb. \$5.00.

Veitch's Autumn Giant. Heads very large, white and compact; well protected by foliage; will remain suitable for use a long time. Pkt. 10c., oz. \$1.00, 1/4 lb. \$3.00.

CHERVIL

Curled Chervil. Cultivated like Parsley. The young leaves are used for flavoring soups and salads; and are also used for garnishing. Pkt. 10c., oz. 40c., 1/4 lb. \$1.50.

CHICORY See Endive, page 11.

- Large-Rooted Magdeburg. Roots when dried and roasted are used as a substitute for coffee. Pkt. 10c., oz. 20c., 1/4 lb. 60c.
- Withoof, or French Endive. Plant in May or June in drills. Thin to 6 inches apart. Early in the Fall the roots should be removed, the tops cut off to within $1\frac{1}{2}$ inches of the neck, the roots make a uniform length of 8 or 10 inches. They should then be planted in trenches somewhat below the level of the ground. Trenches should be filled with light soil, or if a quick growth is desired, should be covered with horse manure several inches deep. In about four weeks the leaves will be ready for use. Pkt 10c., oz. 40c., $\frac{1}{4}$ lb. \$1.25.

Chives.

In frequent demand for soups and salads. Pkt. 25c. Plants 20c. per clump.

Giant Pascal

CELERY

One ounce will produce about 4000 plants.

Sow the seeds in March or April in a hotbed or coldframe. As soon as the plants are 3 inches high, transplant into a prepared border, setting them 4 inches apart. When grown 6 inches, and fine stocky plants, set in richly manured, deep soil, in rows 3½ feet apart, and about 9 inches from plant to plant. Water, if dry weather follows transplanting. During the next two months all the attention required is to keep down weeds. Afterward earth up a little and continue doing so at intervals until only the tops of the leaves are visible late in Autumn. Never hoe or earth up when the plants are wet.

CRESS, or PEPPER GRASS

One ounce will sow 100 feet of drill.

A popular salad, which should be sown early in Spring very thickly in shallow drills—and at short intervals, for succession, as it soon runs to seed.

- **Extra Curled.** The best variety grown; leaves are beautifully cut and curled; highly prized for garnishing. Pkt. 10c., oz. 20c., 1/4 lb. 50c., lb. \$1.50.
- Water. This wholesome salad may be grown in any moist situation, but more successfully by the edge of a running brook. The seed may be sown in May, on the ground where it is intended to be grown and the thinnings transplanted. The plants should be set not less than a foot apart. The Cress will be fit for gathering the second year. Pkt. 10c., oz. 75c.

CORN, Sweet, or Sugar

One quart will plant 200 hills; ten quarts will plant one acre in hills.

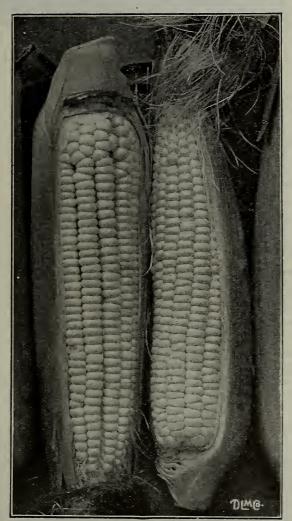

We furnish 15c. packets of all varieties of Sweet Corn free of postage by mail. For other quantities add Parcel Post rate if to go by mail. One quart weighs about 2 pounds.

Corn requires a mellow, loamy, well pulverized soil, and frequent hoeings. Flant in hills 3 feet apart each way, dropping five or six kernels in each hill, or plant in rows 3 to 4 feet apart, and thin the plants out to 8 or 9 inches in the row. From the beginning of May until the middle of July successive planting can be made every two or three weeks, and by properly selecting the varieties a continued supply can be had until frost kills the plants.

Corn Pocahontas

CORN SALAD, or FETTICUS

One ounce will sow 100 feet of drill.

This excellent salad may be had the year round. Sow in September, in drills 8 inches apart, covering the seeds lightly and protect from frost by a light covering of hay or litter. The seed may also be sown in Spring.

Large-Seeded. The most popular variety grown. Pkt. 10c., oz. 30c., 1/4 lb. \$1.00.

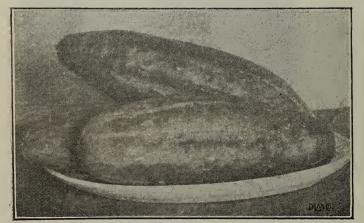

Arlington White Spine

CUCUMBE

One ounce will plant about 50 hills. One and one-half pounds to one acre.

For very early use seed may be started in heat and the plants set out in May. Pieces of inverted sod are an excellent medium for starting and growing early Cucumber plants, as they can be readily lifted from the hotbed to the garden without disturbing the young plants growing upon them. For main crop, plant in hills 4 feet apart, in the end of May. Make the hills rich with well rotted manure, and keep the young plants safe from the striped bug by dusting with dry plaster, or powdered Hellebore. Leave four strong plants to each hill.

- Arlington White Spine. One of the finest Cucumbers for forcing and one of the most perfect in shape, size, color and quality, and is very brittle and crisp. Pkt. 15c., oz. 30c., ¼ lb. \$1.00.
 Boston Pickling. The best pickling variety yet intro-
- duced; very productive; quick growing, superior color and quality; the most popular variety among the market gardeners. Pkt. 10c., oz. 20c., 14 lb. 60c.
- **Cool and Crisp.** Extra early and very prolific; long, straight, slender and dark green. Pkt. 10c., oz. 20c., 1/4 lb. 60c.
- Cumberland. Fine pickling variety. Pkt. 5c., oz. 20c., 1/4 lb. 60c.
- Davis' Perfect. Highly recommended; dark, rich, green in color, crisp and tender. Pkt. 10c., oz. 25c., 1/4 lb. 75c.
- Early Russian. Earliest variety known; fruit small, about 5 inches long; quality fine. Pkt. 10c., oz. 25c., 1/4 lb. 75c.
- Early Frame, or Short Green. Medium size, very early and good for pickling and slicing. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 60c.
- Early Cluster. Fruit small and borne in pairs; light green, great bearer; a standard sort. Pkt. 10c., oz. 20c., 1/4 lb. 60c
- **Everbearing.** Begins to fruit very early, and continues to blossom and set fruit until killed by frost; good as a pickler or slicer. Pkt. 10c., oz. 20c., 1/4 lb. 60c.

Cool and Crisp

- Forcing (Private Stock). Longer than our Arlington White Spine, and very uniform in shape and color. Especially recommended for forcing. Pkt. 25c., oz. \$1.00.
- Improved White Spine. The best variety for table use
- Japanese Climbing. Fruit about 10 inches long; thick and of fine flavor. Skin dark green, flesh pure white; can be grown on trellises and fences. Pkt. 10c., oz. 25c., ¹/₄ lb. 75c.
- Long Green. Prickly; firm, crisp, dark green; excellent
- table variety. Pkt. 10c., oz. 25c., ½ lb. 75c.
 Tailby's Hybrid. Valuable for forcing; grows uniformly straight and smooth; a cross between the White Spine and an English Frame variety. Pkt. 10c., oz. 20c., 1/4 lb. 60c.
- West India Gherkin. Used for pickling purposes; a small, oval-shape variety; has the appearance of a burr. Pkt. 10c., oz. 25c., 1/4 lb. 90c.

English Frame Varieties

The following are excellent varieties for growing in forcing houses:

Duke of Edinburgh, Rollinson's Telegraph, The Rochford, Epicurean, Tender and True. Each, per pkt. 50c.

DANDELION

One ounce will sow 200 feet of drill; two pounds will sow an acre

Extensively used as early Spring greens, and considered very healthful. Sow seed in May or June, in any good soil, in drills 15 inches apart, upon beds made smooth with the rake. Cover very lightly and press the earth firmly upon the seed. Cultivate during the Summer to keep seed. down the weeds. Cover with litter upon the approach of severe weather, and remove the covering early in Spring. If spare frames are at hand, they may be used to advantage by setting them over a portion of the bed, and forcing the Dandelions under them, thus forwarding a portion of the crop. Dandelions make an excellent salad if blanched by earthing up, or placing boards to exclude the light.

American Improved. A stocky, thick-leaf hardy variety, grown largely for the Bostor market; the best for general use. Pkt. 20c. oz. \$1.00, 1/4 lb. \$3.50.

EGGPLANT

One ounce will produce 100 plants.

Sow in hotbeds very early in Spring, and transplant when 2 inches high into a second bed or into small pots. If that is not done, thin to 4 inches apart. Do not plant out till the weather becomes perfectly settled and warm. Cool nights or wet weather will check them. Keep some back in frames for a second planting, in case of weather changing unexpectedly. Keep plants watered for a few days if the sun is hot when put out. Set out plants 3 feet by 2.

- Black Beauty. Very early and as large as New York Improved. Rich purplish black color. Pkt. 15c., oz. 85c.
- Black Pekin. Fruit globular, almost black in color, fine grained, and delicately flavored. Pkt. 10c., oz. 75c.
- Early Long Purple. A very early, hardy and productive variety of good quality. Pkt 15c., oz 85c.
- New York Improved. A leading market variety; fruit large, oval, very productive. Pkt. 15c., oz. 85c.

ENDIVE

One ounce will sow 150 feet of drill.

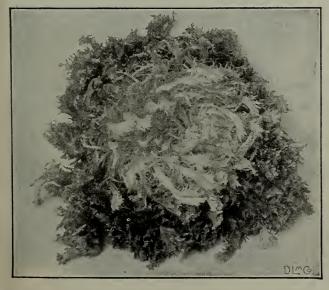

A rather moist soil is preferred. Sow early in the Spring in drills 12 inches apart, and thin out the plants to 10 inches apart in the drills as soon as they are large enough to handle. Before using, the plants must be blanched, which is accomplished by gathering the leaves to a point at the top and tying them together with matting or any soft material. It makes a most delicious salad.

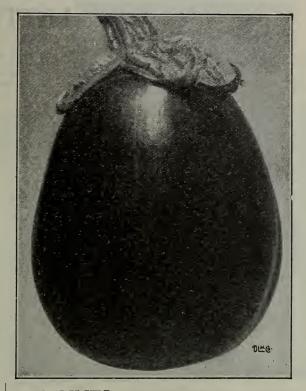

Broad-leaved Batavian. Leaves broad; light green, and require to be tied up for blanching. Pkt. 10c., oz. 30c., 1/4 lb. \$1.00.

Green Curled. A very hardy, dark green, closely curled variety, tender and crisp. Pkt. 10c., oz. 35c., 1/4 lb. \$1.00. Moss Curled. Beautifully curled, and when well de-

veloped resembles a tuft of moss. Pkt. 10c., oz. 35c., 1/4 lb. \$1.00.

Witloof. See Chicory, page 7.

FENNEL, Florence, or Naples (Finocchio di Napoli)

Sow in Spring in rows 16 to 20 inches apart and thin to 5 or 6 inches apart. Water freely. Pkt. 15c., oz. 50c.,

KALE, or BORECOLE

One ounce will produce 1500 plants. Of all the Cabbage tribe this is the most tender and delicate. Early plants may be started in the hotbed, or the seeds may be sown in the open ground in April or May; transplant in June, into rows, and cultivate the same as Cabbage. Sea Kale should be blanched either under large pots or by banking up with sand.

- **Dwarf Green Curled.** One of the best; very hardy and improved by a moderate frost. Pkt. 10c., oz. 25c., 1/4 lb. 75c. Sea Kale. Pkt. 5c., oz. 30c.
- Winter, or Siberian Greens (Sprouts). Sow in August or early in September in rows 1 foot apart and cultivate like Spinach. A hardy variety. Pkt. 10c., oz. 25c., 1/4 lb. 75c.

KOHL-RABI

One ounce will sow 200 feet of drill.

This vegetable, the popularity of which is rapidly increasing, combines the virtues of the Turnip and Cab-bage, but excels both in nutritive, hardy and produc-tive qualities. The seed may be sown in June in rows 18 inches apart, and the plants thinned out to 8 or 10 inches.

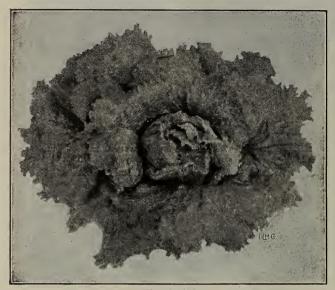

Purple Vienna. Similar to the following, except in

color. Pkt. 10c., oz. 50c., 1/4 lb. \$1.50.
 White Vienna. The earliest and best table or market variety. Pkt. 10c., oz. 50c., 1/4 lb. \$1.50.

LETTUCE

One ounce will produce about 3000 plants.

Lettuce succeeds best in rich and comparative moist soil. and is most crisp and tender if grown in cool, moist weather. The more rapidly the plants are grown, the more tender and brittle will be their quality. For early use, sow under glass in February or March, and transplant into a previously prepared hotbed; rows at least 12 inches apart, according to the varieties. Sowing may be made in the open ground as soon as all danger from frost is over; if a continuous supply is desired during the season, make sowing every two or three weeks until September.

MUSHROOM

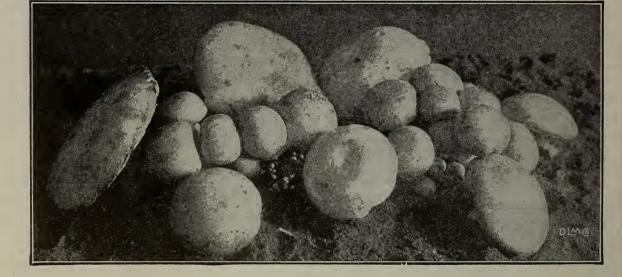

One pound of spawn is sufficient for nine square feet of bed.

Mushrooms are more easily cultivated than many people imagine, and may be grown in any dark room or cellar mashio in site the persture can be maintained at from fifty to sixty-five degrees. For the bed, use a mixture of horse manure and good fresh loam in equal proportions. Before being placed in the bed let this material be thoroughly mixed, and well turned three or four times to sweeten in some dry place. Upon a dry, firm bottom, proceed to make the bed, by spreading a thin layer of the prepared mixture and pound it firm till the bed is eight inches thick. Leave the bed, by spreading a thin layer of the prepared mixture and pound it firm till the bed is eight inches thick. Leave it thus for about a week, or till the temperature of the bed has subsided to ninety or ninety-five degrees. Then make holes about 10 inches apart, and put in each a piece of spawn about the size of an egg. Cover the holes and press the soil solid and smooth. Let the bed remain in this condition ten days. Then cover with 2 inches of fresh loam. Over this place a few inches of straw. If the temperature is right, Mushrooms will appear in six to eight weeks from time of spawning. The bed will continue bearing about a month. After the first crop is gathered, spread over the bed an inch of fresh loam, and moisten with warm water. In the event of the surface of the bed getting very dry at any time, it should be moistened freely with water at a temperature of eighty to eighty-five degrees.

ONION

One ounce will sow 100 feet of drill. Four or five pounds to the acre.

The Onion thrives best in light, loamy, mellow, soil; and, unlike most kinds of garden vegetables, succeeds well when cultivated on the same land for successive years. The seed should be sown as early in the Spring as the ground is in good working condition, in drills 14 inches apart; and covered 1/4 inch deep. Unless the plants stand very thick they need not be thinned out much, as they will crowd each other and find room to grow. Keep free from weeds, but be to this crop, as will soon be observed by the dark and healthy change of color given to the plants. The Onions will ripen early in September, and after being gathered and exposed to the sun for a few days for drying, they will be ready for storing or the market.

PARSNIP

One ounce will sow 100 feet of drill. Five to six pounds to the acre.

Sow in April or early in May, as Parsnips require a long season to mature. Their cultivation is otherwise the same as directed for Carrots. They may be dug in the Autumn and stored for Winter use, but if left in the ground till the following Spring they are very much improved in flavor. Sow a liberal quantity of seed, as from its nature it does not always come up well.

Arlington Long White. A good variety for general use; long and smooth. Pkt. 10c., oz. 30c., 1/4 lb. \$1.00.

Early Round. The earliest variety in cultivation, of good flavor but of small size. Pkt. 10c., oz. 30c., 1/4 lb. \$1.00.

Grey's Perfection PARSLE

One ounce will sow 150 feet of drill-

Parsley succeeds best in rich, mellow soil, and as the seed germinates slowly—sometimes remaining in the earth four or five weeks before the plants appear-the sowing should be made as early in Spring as the ground is in working condition. Can also be sown in hotbed in February. When the plants are 2 or 3 inches high, thin them out to 8 or 10 inches apart. The leaves of the curled varieties are used for garnishing, also for flavoring soups and stews. Double Curled. Dwarf, finely curled; excellent for table and edgings. Pkt. 10c., oz. 25c., 14 lb. 75c.

Hollow-Crowned

PEAS

One quart will sow 100 feet of drill. One and one-half bushels per acre.

Peas succeed best in light, rich soil; dwarf varieties require liberal manuring, the tall varieties requiring less; they also succeed best under a low temperature. The early round, smooth varieties should be planted as early in Spring as possible, while the wrinkled sorts, which are more tender. will do better if planted after the ground becomes warmer. Sow in drills, 2 to 3 feet apart, according to variety, and cover early sowings about 2 inches; later plantings should be covered 3 to 4 inches. Make the drills deep enough to allow room for the manure, which should be scattered along the bottom of the drill and then covered thinly with soil before sowing the Peas, so that they will not come in contact with it. Successive plantings can be made every ten days up to the middle of July. For the later plantings the early varieties are preferred.

If ordered to go by mail, add Parcel Post rate to cover postage. We furnish 25c, packages of all kinds of Peas, except where noted, free postage. One quart weighs about 2 pounds.

POTATOES

Eight to ten bushels will plant one acre.

Owing to unsettled Market Conditions prices will be given on application.

A good, sandy loam produces the best Potatoes, but they can be grown on all kinds of soil. New or pasture land, with the turf freshly turned, produces the finest crop. Make furrows of good depth, 3 feet apart. Scatter a liberal dressing of phosphate or decayed stable manure along the drill, and set the seed about 10 inches apart in the rows. Cover with about 2 inches of soil, and begin to cultivate when the plants are well up. At each successive hoeing, bring additional soil about the plants. A change of seed is advisable.

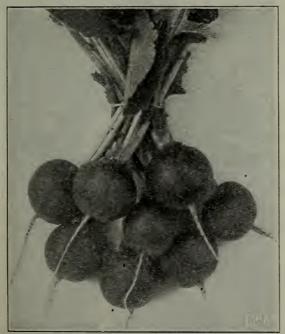

- Albino. Early white; a new, early variety and a good cropper. The skin and flesh are extremely white, maturing about the same time as Early Rose.
- Beauty of Hebron. A very productive variety of fine
- quality; good either as an early or general crop Potato. ovee. Early and productive. Fine quality; flesh white Boyee. and dry.
- Tubers large, smooth and of best quality; Delaware.
- white and yields well. arly Rose. The well-known variety; early and prolific. **Early Rose.** The well-known variety; early and prolific. **Gold Coin.** Tubers oblong, skin white; quality excellent,
- and a large yielder. Green Mountain. We can recommend this variety as one of the best for all purposes.
- Irish Cobbler. Cream white color and of excellent quality. A vigorous grower, early, ripens uniformly, and keeps well.
- **New Queen.** Flesh white and quality good; early and productive. In shape and color it resembles the Beauty of Hebron.
- Uncle Gideon's Quick Lunch Potato. The tubers are nearly globular in form; they run the most uniform in size, color, and quality of any extra early potato. The eyes are shallow, with a pinkish cast around each eye, while the smooth, brownish-white skin is also fiaked rosy crimson. Although maturing so quickly, it is an immense cropper, producing very few small tubers, the crop invariably finishing perfectly even in size.

PUMPKI

One ounce will plant 20 hills. One pound 250 hills.

Sow in good soil in May, when the ground has become warm, in hills S or 10 feet apart each way; or in fields of Corn, about every fourth hill. The Pumpkin is not so particular in regard to soil as the Melon or Cucumber, but in other respects is cultivated in a similar manner. If planted in hills by themselves, thin out the plants when beginning to run, to three in each hill.

- Connecticut Field. A large yellow variety, productive, | and grown for feeding stock. Pkt. 5c., oz. 15c., 1/4 lb. 50c., lb. \$1.50.

Early Scarlet Globe

- Nantucket, or Negro. An exceedingly prolific variety of dark green color. It has a hard shell, and is one of the sweetest Pumpkins in cultivation. Pkt. 10c., oz. 20c., 1/4 lb. 60c.
- Sugar. A small fine-grained, sweet Pumpkin; very pro-lific, and a fine table variety. Fkt. 5c., oz. 15c., 1/4 lb. 50c., lb. \$1.50.
- Winter Luxury. Flesh thick. sweet and excellent for pies. Pkt. 10c., oz. 25c., 1/4 lb. 75c.

One ounce will sow 100 feet of drill.

For very early use seeds can be sown in frames in February, making successive sowings every two or three weeks. Sow also in the open ground the last of April in light, rich, sandy soil, selecting a warm or sheltered location. Later sowings can be made at intervals during the Summer in a moist location where they can grow quickly. Sow broadcast or in drills. Seeds of Winter Radishes should be sown during Midsummer, and the Radishes can be kept during Winter if covered with sand and placed in a cool cellar.

- Chartier Long Scarlet. Large size; clear rose color. with white tips; grows fast; crisp and tender. Pkt. 10c., oz. 25c., 1/4 lb. 75c.
- Early Crimson Giant. Grows to a large size without becoming pithy. Excellent for forcing. Pkt. 10c., oz. 25c., 1/4 lb. 75c.

- and of good quality. Pkt. 10c., oz. 30c.

RHUBARB

One ounce will produce about 750 plants.

Rhubard succeeds best in deep, rich loam; the richer its condition, and the deeper it is stirred, the better, as it is scarcely possible to cultivate too deeply or to manure too highly. It is propagated by seeds, or by division of the stately possible to that the test of by division of the highly. It is propagated by seeds, or by division of the roots—the latter being the usual method. Sow the seed in drills 18 inches apart, and thin out the plants to 9 inches apart in the drills. When the plants are one year old transplant into beds, setting the plants 5 feet apart each way. Do not cut until the second year and give a liberal dressing of manure every Fall.

Linnæus. The earliest and best for garden use; not as coarse and fibrous as the larger sorts. Pkt. 10c., oz. 50c., 1⁄4 lb. \$1.00.

Victoria. The variety in general use for the market; yields immense crops. Pkt. 10c., oz. 60c., ¼ lb. \$1.25. Roots. Either variety; each 15c., doz. \$1.50.

SALSIFY, or VEGETABLE OYSTER

One ounce will sow 50 feet of drill.

A very delicate and nutritious vegetable, especially esteemed for its peculiar oyster flavor. Sow the seed early in Spring, in drills 12 inches apart and 1 inch deep, thinning out the young plants to 6 inches. The roots will be ready for use in October, when a supply should be taken up and stored like Carrots. Those remaining will suffer no injury by being left in the ground till Spring.

Iong White French. Pkt. 10c., oz. 35c., ¼ lb. \$1.25.
 Maamoth Sandwich Island. Tender and delicious; very superior. Pkt. 10c., oz. 30c., ¼ lb. \$1.00.
 Spanish Salsify (Scolymus Hispanicus). Golden Thistle or Spanish Oyster Plant, large size and very productive; mild flavor. Pkt. 20c., oz. 60c.

SPINACH

One ounce will sow 50 feet of drill. Twenty pounds will sow an acre.

Spinach may be grown on any ordinary soil. It is grown both as a Spring and Summer crop. For early use sow in August or September, in drills 12 to 14 inches apart. At the approach of cold weather cover lightly with straw, or any handy litter. Uncover when the plants begin to make a new growth in Spring. For Summer use sow early in Spring, in same way as above, using rather less seed. If the plants stand too thick, thin to 3 or 4 inches apart. A liberal dressing of good manure should be used. The land can hardly be made too rich.

Packets 5c. except where noted.

- Long Standing. Dark green; the longest standing before running to seed. Oz. 15c., 14 lb. 50c., lb. \$1.75.
 New Zealand (Tetragonia expansa). A plant of a different genus, but of similar character and use as Spinach. Makes a low spreading plant from which delicious, tender greens can be gathered the entire Summer. May be started in a hotbed and transplanted or sown out of doors when the ground is warm, allowing 2 feet between the plants. Pkt. 10c., oz. 25c., 1/4 lb. 85c., lb. \$2.50. Round Thick-leaved. Leaves large, thick and fleshy;
- Round Thick-leaved. Leaves large, thick and fleshy; the variety generally grown for market, and equally good for Spring or Fall sowing. Oz. 15., ¼ lb. 50c., lb. \$1.75.

SQUASH

One ounce of the small-seeded variety will plant 40 hills; of large-seeded, 15 hills.

Squashes being very tender and sensitive to cold should not be planted until the weather becomes warm and settled. Plant in well-manured hills, in the same manner as Cucumbers and Melons, the bush varieties 3 or 4 ft. apart each way, and the running kinds from 6 to 8 ft. apart. Sow 8 to 10 seeds to a hill, thinning out, after they have attained their rough leaves, and danger from bugs is past, leaving two or three of the strongest plants in each hill.

ГОМАТО

One ounce will produce 1500 plants.

Seed should be sown in a hotbed about the first week in March, in drills 5 inches apart. When the plants are about 2 inches high they should be set out 4 or 5 inches apart in another hotbed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set out in the open ground; they are planted for early crops on light, sandy soil, at a distance of 3 feet apart, in hills in which a good shoveful of rotted manure should be mixed. On heavy soil, which is not suited for an early crop, they should be planted 4 feet apart. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established.

TURNIP

One ounce will sow 150 feet of drili. One and one-half pounds per acre.

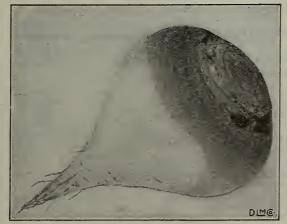

Turnips do best in highly enriched, light, sandy or gravelly soil; sow the earliest varieties as soon as the ground can be worked in the Spring, in drills 12 to 18 inches apart. Seed can also be sown broadcast, using one pound to the acre. For a continuous supply through the season, sowings should be made every two weeks until the last of July, from which time until the middle of August the principal sowings are made for Fall and Winter use. Swedish or Ruta-Baga Turnips are largely grown for a farm crop, as well as for the table; make sowings from the 10th of June until the last of July, in drills 2 to 3 feet apart, and the plants when well up should be thinned to from 8 to 10 inches apart. They are best preserved in a pit or cellar during the Winter, and are excellent for the table early in Spring.

MILLETS

Prices subject to change with the market.

Valuable for green fodder or hay, maturing in fifty to seventy-five days from the time the seed germinates, producing an abundant yield of forage, relished by all kinds of stock; should be sown in June and July. They must be cut while in blossom to make a good hay.

- German, or Golden. A valuable annual hay and fodder crop, more productive and coarser than the Hungarian; medium early, 4 to 5 feet high. Sow 1 bus. to the acre. Bus. \$5.00.
- Japanese (Panicum Crus Galli). Grows taller and stools out more freely than the Common Millet: very productive. If sown early and cut, usually produces a good second crop. It has produced in Massachusetts six tons dry hay per acre; highly recommended. Sow 20 lbs. per acre. Lb. 25c., 100 lbs. \$20.00.
- Hungarian Millet (Panicum Germanicum). An annual forage plant, early and productive, growing 2 to 3 feet high, with an abundance of foliage, often yielding 2 to 3 tons per acre. Sow 1 bus. to the acre. Bus. \$6.00.

LAWNS

The following simple directions may be found useful to those who are not familiar with lawn making:

The soil should be of good depth, moderately rich, and in many cases the land should be carefully drained. Grading should be done and the soil thoroughly pulverized by careful harrowing and raking. Some good fertilizer—pure ground bone, wood ashes or a specially prepared lawn fertilizer—should be used. After spreading the fertilizer, the surface should be carefully raked and rolled. The rolling often develops uneven spots which should be leveled before the seed

is sown. After sowing, the ground should again be lightly raked and rolled. The selection of seed is important. Use only such mixtures as are free from weed seeds, and such as will produce a firm, strong turf and a fine growth. A liberal quantity is necessary to secure good results (not less than 64 pounds per a min, storing that a min a time growth. At most quantity is necessary to set the good results (not ress than or points per acre). The best time to make a lawn is from the middle of August through September. If seed is sown at this season, the grass will become strong enough to withstand the Winter, and a good lawn is assured the following season. If seed cannot be sown at this time, it should be sown as early as possible in the Spring.

Boston Lawn Grass Seed. This mixture is composed of such varieties as long experience has shown to be adapted

- to produce a permanent heavy turf. Weighs 16 lbs. per bus. Per lb. 35c., 16 lbs. CHOICE GRASS

Many growers of grass seeds offer several grades of each variety, varying greatly in price. We do not recommend nor do we sell the inferior grades. Those which we offer are strictly High Grade, and the prices at which we offer them should not be compared with those quoted for inferior grades.

Prices may change as the season advances. If to go by mail, add Parcel Post rates to cover postage.

- Awnless Brome Grass (Bromus inermis). Recommended for dry, arid soils where other grasses do not grow. In nutritive value is much inferior to many other sorts, but is very permanent and therefore useful for some locations. Cannot supply.
- Beach Grass (Ammophila arundinacea). Valuable for sowing on railway banks, seashore, etc. Its strong, creeping roots hold the drifting sands, and protect against wind and wave. This grass is usually propagated by wind and wave. This grass is usually propagated by transplanting in the Fall. When seed is used it should be sown in the Spring, and covered with brush until the seed becomes established. Cannot supply.
- **Creeping Bent** (Agrostis stolonifera). One of the most valuable lawn grasses because of its short growth and deep green, fine-leaved foliage. Its stoloniferous roots form a strong, close, enduring turf, which is not injured by being frequently walked on. Per lb. 85c.
- Crested Dogstail (Cynosurus cristatus). Good for permanent pasture for sheep; is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns; 35 lbs. to the acre. Lb. 50c., 100 lbs. \$48.00.
- Hard Fescue (Festuca duriuscula). Admirable pasture grass of fine quality; thrives well in dry situations; 30 lbs. to the acre. Lb. 75c., 100 lbs. \$70.00.
- Hungarian Grass. See page 25. Italian Rye Grass (Lolium Italicum). Thrives in any soil, yields an early and abundant crop, valuable for mixing with other pasture grasses; sow 50 lbs. per acre. Lb. 30c., 100 lbs. \$28.00.
- Kentucky Blue (Poa pratensis). Also called "June Grass;" an early grass of much value; will do well upon any ordinary soil; stands the heat of Summer remarkably well. For pastures and lawns it has no superior, giving that peculiar, rich shade of bluish green so much admired in the best lawns; also making a very close, velvety turf. It is usually sown mixed with other fine grasses; when used alone, 30 to 40 lbs. per acre. Blossoms in June. Fancy clean seed. Lb. 50c., 100 lbs. \$48.00.
- Lime Grass (Elymus arenarius). Has wide-spreading, thickly-matted roots which tend to hold drifting sands. Valuable for seashore and embankments. Cannot supply.
- Meadow Fescue (Festuca pratensis). This is excellent for hav when sown with other grasses, such as Orchard grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils; sow 40 lbs. per acre. Lb. 50c., 100 lbs. \$45.00.
- Meadow Foxtail (Alopecurus pratensis). One of the best and earliest of pasture grasses; thrives best in moist localities; 30 lbs. to the acre. Lb. 70c., 100 lbs. \$65.00. Millet. See page 25.
- Orchard (Dactylis glomerata). One of the earliest grasses; yields immense crops and is excellent for pasture or hay; should be cut as it is coming into bloom, and will produce a heavy second crop; one of the best grasses. Sow 40 lbs. per acre. Lb. 55c., 100 lbs. \$50.00.
- Perennial Rye Grass (Lolium perenne). A valuable grass for pastures or meadows, also very valuable where mixed with other grasses for lawns, golf links, etc. The seed is large and heavy, and produces a good growth in five or six weeks. It is also well suited to a variety of soils, and makes excellent hay when grown with red Clover. We offer an extra choice lot of seed. Lb. 30c., 100 km S22 00 100 lbs. \$28.00.
- Red Top (Agrostis vulgaris). A valuable native permapays well for high cultivation; 10 to 12 lbs. per bus. Sow 40 lbs. per acre, if alone. Lb. 25c., 100 lbs. \$22.00.

### ASTERS

For best results Asters should have a good rich soil and plenty of moisture. As the roots are produced near the surface, a mulching during hot weather is very beneficial. The location of the bed should be changed every year. No. Pkt

Fast-growing, hardy annual, with dark bronze foliage and deep yellow flowers, best suited to edgings, rockwork, vases, etc.  $6 \text{ in}....\frac{1}{4}$  oz. 50c. .10 PANSY. Too much importance cannot be attached to the culture of these beautiful plants. For early Spring blooming the seed should be sown in July or August and the plants protected during Winter. Early Spring-sown seed will give fine blooms during Summer and Fall. A good, cool, rich soil is essential. Rotted cow manure is the best fertilizer for them, and one cannot use too much of it. No fertilizer of a heating nature should be used; give plenty of water through dry weather. You cannot grow good Pansies under trees. Grey's Prize Exhibition Strain. This splendid mixture represents the highest 6095 perfection of large-flowering, new highcolored sorts; their brilliancy and richness are most striking. 1% oz. \$2.50, 1/4 oz. \$4.00

6100 Grey's Special Mixture. A grand mixture of the finest varieties, and one of the richest ever sent out; very striking and recommended for market growing.. 1/4 oz. \$1.75, oz. \$6.00

### MIXED FLOWER SEEDS FOR WILD GARDENS

"Wild Gardens" have proved a marked success; and we are in receipt of the most satisfactory evidence of the estimation in which they are held. Anyone who has cultivated flowers knows the constant attention necessary in the care of well-laid-out beds and borders. To those who cannot give this care, the "Wild Garden" presents a substitute which, for its unusual and varied effects, cheapness, and the small amount of labor necessary for its construction, has no rival. "Wild Garden" seeds are a mixture of over one hundred varieties of flower seeds, and, being mixed together, can be offered at a much less price than when sold in separate packets. ## LILIES

In the flower garden Lilies rank first in importance. They are stately and beautiful, matchless in form and variety of color, while possessing the most agreeable perfume, and for general effect they have no rivals. Bulbs should be planted 6 in. deep in a well-drained, deep, loamy soil made rich with thoroughly rotted manure, and an inch of clean sand placed under and over the bulbs when setting.

Lilium speciosum

Tuberose

#### MADEIRA VINE

A rapid-climbing plant, with beautiful, wax-like, light green leaves and feathery white flowers, with a delicious fragrance resembling Mignonette. The culture is simple: the roots need but to be planted and a trellis or strings given the vine to climb on. 8c. each, 85c. per doz., \$6.00 per 100.

### MILLA BIFLORA

One of the loveliest and most desirable bulbs known. The flowers are borne on stems, two to three in number, of pure waxy white, and 2 in. in diameter. It will throw up as many as six flower stalks from one bulb, and continue in bloom a long time. 7c. each, 75c. per doz. \$5.50 per 100.

#### TUBEROSE

A bulbous plant of the easiest culture and most delight ful fragrance, suitable for the Summer garden or house culture throughout the year. They should be started early in pots, using good, rich, loamy soil, and when the weather is suitable, transplanted into the garden. The variety offered is the one most extensively grown, being much superior to all other sorts.

Excelsion Pearl. A superior strain, with very large double white flowers, produced in great abundance. Extra strong roots. \$1.25 per doz., \$9.00 per 100.

#### MONTBRETIA

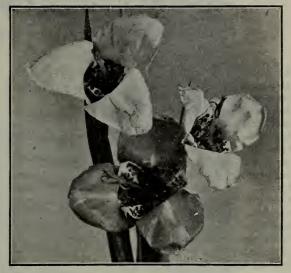

One of the best and brightest Summer-flowering bulbs, sure of becoming firm favorites wherever grown. Planted in clumps from April to June they produce numerous graceful spikes of brilliant star-shaped flowers. Hardy with protection.

## **AQUATICS**

The cultivation of aquatics is of the simplest; their requirements are sunshine, water and plenty of rich soil. They are divided into two classes, hardy and tender; the former may be planted in ponds, lakes or sluggish streams, early in the Spring, and, under the same conditions as our native Water Lily, they will grow luxuriantly and flower profusely the entire season; provide the same conditions in artificial ponds or tanks, and the results will be equally satisfactory. Plant the tender varieties at the approach of warm weather and when the water is warm. The plants can be grown in pots where protection can be afforded them until safe to transfer to Summer quarters. The after-treatment is the same as for the hardy varieties. When grown in tubs, only the moderate growers should be selected. In storing in tubs through the Winter, they should be kept where it is not warm enough to excite growth or so cold as to freeze.

## Select List of Hardy Perennial Plants

We would recommend those who have never undertaken the culture of hardy plants to commence with a few vaieties most easily grown, and gradually increase their collections from season to season, and, our word for it, it will lead to a confession that there is nothing in the way of bedding-out or ribbon gardening which can compare in any way to he beauty and refined charm of this class of plants. We can furnish a good selection of hardy plants, which may be expected to give successional bloom throughout the Spring, Summer and Fall months, and, if the choice is left to us, will take special care to select such varieties as afford the most satisfactory results.

Our connections with the best and leading nurseries at home and abroad put us in a position to furnish he very best of all hardy nursery stock. We also furnish estimates on the laying out, planting and imrovement of private estates, and furnish experienced gardeners to carry out the work. We shall be pleased o correspond with those contemplating improvements or planting hardy stock of any sort. Any sorts not listed can be furnished at lowest prices

## Flowering and Ornamental Hardy Shrubs

This class of plants does more for our gardens and grounds, to make them look attractive and homelike, than all other classes combined. It gives us beautiful foliage of many kinds, flowers from April to November, and clothes the lawn with that abundance of branches and leafage which is no necessary to any feeling of sectusion or privacy in our home grounds.

## Fruit Trees

## APPLES

Nothing is so injurious to newly planted fruit trees, especially to those which have made a very vigorous growth the year before, and have long shoots of new wood, as to leave them full length. The very best trees suffer most by leaving all the top on. Don't be afraid to cut.

\$1.50 each, \$15.00 per doz.

### PEACHES

Keep the leading branches well pruned back, and in the Spring prune back all shoots of the previous year's growth, thus insuring sound and well-furnished heads with bearing wood, weak shoots being reduced one-half and stronger ones from one-third up, being careful to retain an adequate supply of fruit-buds. Keep the ground clean and well worked about the trees, and give an occasional dressing of wood ashes.

## **CURRANTS**

On account of Pine Blister Rust, which is said to spread from these plants, we have discontinued selling Currants

## **BLACKBERRIES**

To keep a blackberry bed in good productive condition, the old, weak and dead wood should be cut out every season to give strength to the young shoots for the next year's bearing. In Spring the weakest suckers should be removed, leaving five or six of the strongest in each hill; the ground should be spaded and a top dressing of manure given. Rows 5 feet apart and plants 4 feet apart in the rows.

Owing to the ruling which forbids the importation of Grapes from abroad we are unable to supply varieties for growing under glass.

## **STRAWBERRIES**

The strawberry will grow in any good garden soil where the ground has been thoroughly prepared. For family use we recommend planting them in double rows, 1 foot apart each way and 5 feet between the double rows, allowing a sufficient number of runners to grow into the wide passage to cover about  $1\frac{1}{2}$  feet on each side; all the rest should be pinched off. It is advisable to cover the plants in Winter with litter, which should be removed as soon as the plants commence to grow in Spring.

#### Layer plants in Spring, \$2.00 per 100, \$17.50 per 1000, except where noted. Pot-grown plants after Aug. 1.

Abington. Strong grower and great yielder. The bright red berries are of very large size, firm and fine flavor. Early to medium.

- Barrymore. Awarded silver medal and three first pre-miums by the Massachusetts Horticultural Society, in 1908. A great berry for all purposes. Large size, rich, dark, glossy crimson color; conical shape; flesh red and quality excellent. Medium.
- Brandywine. Large, roundish, conical, bright, glossy crimson berries, firm and solid; excellent quality and fine flavor. Medium.
- Commonwealth. Large, glossy crimson berry, of excellent quality, a great cropper and one of the latest.
- Excelsior. Good size, glossy dark red of excellent flavor and very early.

Glen Mary. Very large, highly colored, firm, and ranks with the best in flavor. Medium to late.

Golden Gate. New seedling, resembles the Marshall and will succeed where the Marshall fails. It produces strictly fancy, firm fruit clear to the end of the season, of a rich crimson color.

Marshall. Large, rich crimson, and fine flavor. One of the most popular sorts. Medium.

Nick Ohmer. Largest size, regular form, excellent flavor, firm, and a deep glossy red. Medium.

Warren. Dark blood red, extra size, broad and flattened at tips, borne in large clusters. Medium.

#### THREE NEW VARIETIES

Raised from seed by the late S. D. Warren of Weston, and claimed by him to be as near rust-proof as possible, with fruit far superior to the older sorts.

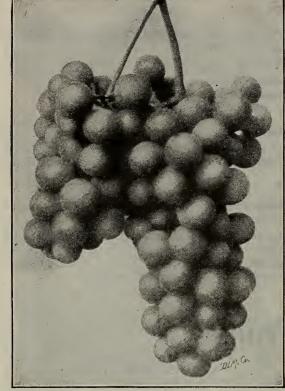

Arabine. Extra early, very large bright red of high quality, very robust grower and heavy cropper. \$2.50 per 100.

- **Roosevelt.** A vigorous midseason variety, larger than Marshall, of most excellent quality and color. A superior sort. \$2.50 per 100.
- Hiawatha. This new late sort ripens a few days ahead of the Commonwealth, which it surpasses in size, color and flavor. It succeeds where others fail. \$2.50 per 100.

#### EVERBEARING STRAWBERRIES

**Progressive.** Considered one of the best perpetual-bearing Strawberries. The fruit is rich and sweet, a deep red inside and out; of good medium size and quite firm. \$3.00 per 100.

Superb. Perfect blossoms. Enormous crops in June, and in September same plants are filled with fruit. It does not fruit on new runners. The berries are large and a rich dark red. \$3.00 per 100.

All prices subject to change without notice.

stronger frame than the ordinary type of disk harrow, being made of a heavy angle steel cross bar, to which draft links are fastened. The tongue braces are solidly riveted to the cross bar and the casting under the tongue, taking all torsional strain off the tongue. The draft links are exceptionally strong and are bent upward so that the frame is high from the ground, raising the ends of the set lever bar high enough so trash does not catch on them. The scrapers are all of the paddle type and can be locked on or off the disks by means of levers convenient to the feet of the driver. Price, complete with pole, \$50.00. For fore carriage, \$8.50 additional. For transportation truck, \$8.50.

#### INTERNATIONAL CUTAWAY DISK HARROW

The International Cutaway Harrow has the same features as the regular disk harrow. The difference is in the cutaway disks and scrapers. Price for 16 in. disk, \$53.00.

#### ONE HORSE YANKEE PULVERIZER

No. 1. Having eight 16 in. plain or cut-out steel disc, which cuts 4 ft. wide.

Potato Digger and Shovel Plow combined...... 15.00

#### THE CHICOPEE POTATO HOE

**.s** made to meet the demands of large growers of potatoes, being designed both for hilling and covering purposes. The blades are of steel and can be tilted upward to assist in shaping the hill, also can be moved upon the crossbar when necessary. The frame is of hard wood, thoroughly constructed and braced. The handles are adjustable to suit the height of the user and can be moved to right or left so that the operator may walk between the rows. Price \$15.00.

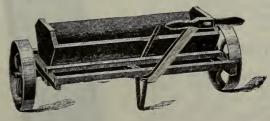

#### THE ECLIPSE WEEDER

Each tooth can be raised to different heights. By raising the teeth on rear bar and adjusting teeth on center bar so the points on the three bars will come in line, all the teeth can be made to stand upright or perpendicular for hard scratching. By raising teeth on front bar and also on middle bar to correspond, any desired slant of teeth can be obtained for light work. Price, \$16.00.

#### ECLIPSE CORN PLANTER AND FERTILIZER DISTRIBUTOR COMBINED

For planting field or ensilage corn, beans, peas or beet seeds, in hills or drills with check. Will accurately distribute all commercial fertilizer, wet as well as dry, pulverized hen manure, plaster, ashes and other fertilizers of like consistency, with a certainty. Has concave places each side of plow, which are of great importance in placing moist earth on the seed, just before the fertilizer is dropped each side of seed. A great advantage in a dry season. Price, \$36.00.

#### FERTILIZER SOWER, THE STEVENS' HAND

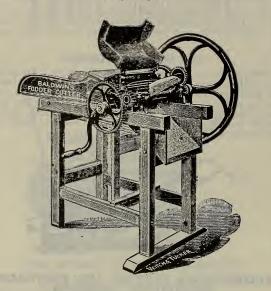

Does the work perfectly, sowing all kinds of lawn dressing and other commercial fertilizers, wood ashes, lime, etc., in large or very small quantities. It can also be successfully used for fertilizing strawberry beds, and other garden or field work; is excellent for sifting wood or coal ashes, sawdust, or dry sand on icy walks; will also sow damp sand by removing two blades. The hopper is 34 in. long and holds  $1\frac{1}{2}$  bus. Weight of machine, 83 lbs. It is well made and nicely painted. Price, \$15.00.

## FARM AND GARDEN TOOLS AND IMPLEMENTS-Continued

#### CHAMPION ROOT CUTTER

Made with a steel shaft, with sections of knives fastened to it and arranged so that a rotation of knives is continually passing a bed knife, with cross knives passing between the section of knives, cutting always near the center shaft and making it easy to cut, and fine enough for cattle or sheep. Will cut 60 bus. per hour. No. 1, \$12.00; No.  $1\frac{1}{2}$ \$14.00.

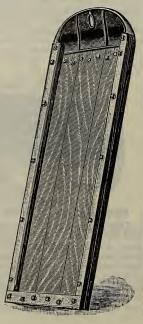

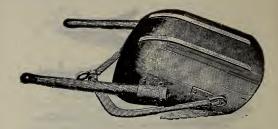

#### THE BALDWIN IMPROVED AMERICAN FODDER CUTTER

This cutter in many sections is the standard machine, owing to the small power which is required in its operation. Machines can be had in various sizes with either one or two knives, either for hand or power. Price, \$40.00.

#### STONE BOATS AND HEADS

Strongly bolted, heavy wood work; total length 7 ft, width 29 and 33 inches. This boat has a cast head. The wood part is made from rock maple and the whole thing is thoroughly well bolted, making the very best pattern of stone boat in the market. The heads are sent out without bolts unless ordered. Prices: Stone Boats, 29 in., \$12.00; 33 in., \$14.00; Stone Boat Heads, 29 in., \$7.00; 33 in., \$8.00.

#### AMERICAN STEEL DRAG SCRAPER

Our late addition of a steel drag scraper is of an improved pattern and made without seam or lap, pressed from a single plate of steel. The bowl is well rounded at the sides and curved upward to form the back. They are strong and substantial and made in three sizes. No. 1, 7 cu. ft., \$14.00; No. 2, 5 cu. ft., \$13.00; No. 3, 3 cu. ft., \$12.00.

#### EDDY NO. 666 REVERSIBLE SULKY PLOW

The 1916 model has the roller-bearing Foot Trip. It enables you to lift your plow by the slightest pressure of the foot—not several complicated auxiliary parts for transmitting power—but one part only.

Our Special Spring Clevis keeps the line of draft in the right position every minute, no matter how rough or stony the ground.

The Special Tilting Device keeps the seat comfortable on the steepest slope.

All levers are in convenient reach. Castings of tough malleable iron. Bails, axles and wheels are of steel. Removable dust-proof boxes. Adjustable tongue. Width of furrow regulated by a lever from the seat. Entire plow is light of draft and of weight, yet extra strong. Price, \$110.00.

#### MANURE SPREADER, INTERNATIONAL

By using a manure spreader, time is saved and manure is made to produce better results. Ten or fifteen loads of manure spread per acre with a machine produce better results than 20 to 30 loads spread by hand, for the reason that the manure is spread evenly, covering every inch of ground, making every ounce count, whereas when spread with a fork it is often done unevenly, many places receiving too much and others not any.

No. 8. The smallest size, This is designed for use in truck gardens, vineyards and in places where the ordinary size spreader could not be used to advantage. It can be used to advantage on soft or uneven ground, and is equipped

### MANURE SPREADER, INTERNATIONAL

with a two-horse hitch. Will spread 35 to 40 bushels. No. 9. This machine is especially designed for use on small tracts and for truck gardeners who desire a spreader that will do as efficient work as the larger machine, and yet draw much lighter. With this machine manure can be spread thick or thin, and can be equipped with lime hood or drilling attachment for distributing lime or spreading manure in rows. Will spread 45 to 50 bushels per acre. Prices on application. Send for descriptive circular.

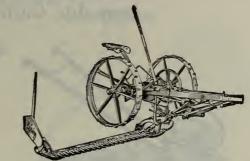

### MOWER, DEERING AND MCCORMICK ONE-HORSE

This gives entire satisfaction on farms, salt meadows and orchards. Many of the parks use it. It is fitted with ball bearing rollers, long wooden pitman, forged steel couplings, a positive and direct stroke. Its action perfectly free, which makes it the most durable, easy of handling and lightest draft mower made. Cuts  $3\frac{1}{2}$  and 4 feet. The foot lift cannot be surpassed. The knives and section are made from a special grade of steel. They are stamped with the name, a satisfactory guarantee. Price, each \$75.00.

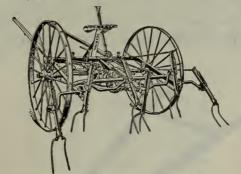

### HAY RAKE, DEERING AND MCCORMICK

A rake must be strong, simple and durable to make it valuable. These rakes are noted for those qualities. They are constructed of the best steel. The angular steel parts are hot riveted instead of bolted, which renders it less liable to get out of repair. The wheels are interchangeable, and are the strongest ever put on a rake. The teeth are made of the finest oil-tempered spring steel. Operator may adjust the rake to regulate the height of the teeth and the time of their return to the ground. Combined pole and thills are furnished with every rake. Price, each \$42.00.

MOWER, DEERING AND McCORMICK, TWO-HORSE

Weight properly distributed is absolutely essential in mowers to insure machines that will do satisfactory work under all conditions. The working parts of these Mowers are made of the best steel, malleable and wrought iron. The pitman is long and strong, made of well seasoned second-growth hickory. The wheels are high and powerful, are connected by a heavy steel axle. The frame is staunch and wide, striding the cut grass, so that the wheels travel in a clear track. Roller and ball bearings make these mowers so light in draft that it is a worthy example of the well-known line of machines. These Mowers have a perfectly floated cutter bar; a coil spring not only assists the operator in raising the cutter bar off the ground to permit the bar to float with perfect ease and freedom. Price each, \$80.00.

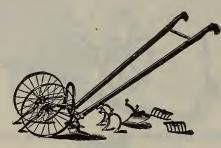

#### HAY TEDDER, INTERNATIONAL

Every farmer can secure a first-class quality of hay if he uses an International hay tedder. Tedded hay brings higher prices in the market, for the reason that it is cured in the correct way, and therefore makes a better dry feed for cattle and horses.

The main frame is made from one single piece of heavy angle steel, to which a cross sill of tubular steel and a center cross bar of heavy angle steel have been riveted. The thill frame is also made of one piece of angle steel. Rivets are used instead of bolts and nuts which are often a source of trouble. This construction gives the tedder an unusual stability, and enables the machine to successfully withstand the severe strains to which it is constantly subjected while in operation.

The steel forks on the International tedder are of a fine quality of spring steel. They operate very smoothly. When the forks on the International tedder come in contact with obstructions, breakage is prevented by long, flexible springs which permit the fork to be pushed back. When the obstruction has been passed the fork returns automatically into the regular tedding position. Only the best quality of oil-tempered spring steel is used in the construction of the forks. Price \$65.00.

## Iron Age Garden Tools and Seeders

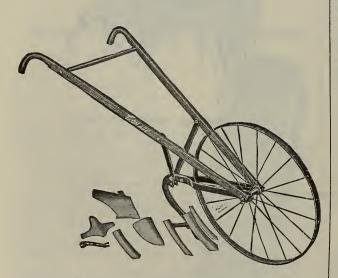

NO. 301 R DOUBLE AND SINGLE WHEEL HOE

At a glance one can see the great usefulness of this tool. The garden or farm is incomplete without at least one of them. In cultivating onions, beets, turnips, radishes, etc., it is invaluable; saves hours of hard labor and does the work better than several men could do it in the same time. One great advantage which this double wheel hoe possesses is that it can be made into a single wheel hoe in a moment's time. An axle is sent with every double wheel hoe for this purpose. The wheels are 16 inches high, enabling the wheel hoe to run easily and without yielding to the depressions of the soil, as a low wheel will do. The frame being made of tubing coupled to malleable castings gives great strength, together with lightness. All the tools shown in the cut go with the machine for the price, \$12.00.

In order to accommodate those who have only use for the wheel hoe for hoeing, we offer the machine described above, with hoes only, at \$7.75.

VICTORY WHEEL PLOW AND CULTIVATOR. \$5.00.

## NO. 19 C. SINGLE WHEEL CULTIVATOR AND PLOW

If you have never tried a wheel hoe for your garden, get one of these and see how easy it is to keep your ground under perfect cultivation. The distinctive feature of this tool is the high steel wheel measuring 24 inches with landside plow, scuffle hoe and cultivator teeth, complete, \$6.00.

### SKABOO CULTIVATOR

A complete 5 shovel cultivator with detachable double point, reversible shovels. Adjustable from 10 to 14 inches in cutting width. A garden tool that will please the most exacting. Weight 21 lbs. Price \$6.00.

### **NO. 2 CLIMAX CULTIVATOR**

This Garden Cultivator has made a reputation and the 24 inch high wheels make it an implement which will serve any purpose desired. Price \$5.00.

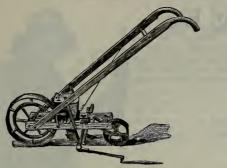

### NO. 306 COMBINED HILL AND DRILL SEEDER DOUBLE AND SINGLE WHEEL HOE

Many men should use combination tools for two reasons: They save in first cost and they take up less room. Thousands of gardeners have found this to be true of

Thousands of gardeners have found this to be true of No. 306. Of course, most market gardeners prefer to have separate tools always ready to do each separate piece of work—drills, wheel hoes, wheel plows, etc. We have them in great variety, to suit each purpose in a particular way. Complete \$19.00.

### FARM AND GARDEN TOOLS AND IMPLEMENTS-Continued

### THE NEW MODEL SEED DRILL

This we consider the simplest and best drill on the market. The diamond-shaped adjustable hole regulates the discharge, and can be made larger or smaller as occasion requires. No other drill has this advantage. The seed cut-off claps up underneath the hole; it does not slide under the same, as in other similar drills; on this account it does not clog nor cut the seed. It has a broad wheel and a covering roller. The opening plow is adjustable in depth. The whole make-up of the drill is simple. It can be worked by any one. Price \$13.00.

### PLOWS, HUSSEY HARD METAL

Superior workmanship, strength, durability, lightness of draft, thoroughness of work, scouring capacity in every kind of soil, steadiness in the ground, and facility of adaptation to all kinds of work, are the qualities possessed by the Hussey Plows which have made them such favorites among farmers and dealers.

Among the recent improvements added to our plows, we might mention that we are using a solid steel cutter, and steel truck straps. We have lengthened the iron strap under the beam so that it now extends from the standard to the clevis.

Thomas J. Grey Co., Boston, Mass. Gentlemen:—Received the Chicopee No. 100 Landside Plow you shipped me O.K. Have used it several times already and do not feel that I can say too much in praise of it. If a man has need of plows, he does not realize all he is missing if his stock does not include a "Chicopee Landside." Respectfully yours. (Signed) JAMES G. DEVINE.

## Pomona Spray Pump

The Pomona has sufficient capacity to supply two leads of hose and four nozzles. The plunger, plunger connection, gland, valves, valve seats and strainer are of solid bronze. All working parts are simple and so located that they can be easily removed and cleaned. The air chamber is of steel and has a large capacity, making it easy to maintain the pressure and giving smooth operation. The lever can be adjusted for a 3, 4 or 5 inch stroke, the adjustment being obtained by removing and replacing a single bolt. The agitator is very simple but effective, and is operated by the pump lever. Price

A. T. DE LA MARE CO. INC., HORTICULTURAL PRINTERS, 438 TO 448 WEST 37TH STREET, NEW YORK

Mulford Cultures contain pure, tested strains of active, vigorous nitrogen-fixing bacteria, for inoculating seeds of legumes or soil.

Mulford Cultures are scientifically prepared and tested with the utmost care and skill. Enormous numbers of these very valuable and desirable bacteria are thus available to you in every package of Mulford Culture and may readily be applied to your seed. The sealed bottle insures purity.

Legumes offer the best-known means of maintaining soil fertility and rejuvenating over-cropped and worn-out fields. They add both humus and nitrogen to your soil and thus increase your yield of wheat, cotton, corn and other non-legume crops.

Alfalia plant on left not inoculated. Plant on right inoculated with Mulford Culture for Alfalfa. All other conditionsidentical. This contrast speaks for itself.

The U.S. Department of Agriculture and many State Agricultural Experiment Stations recommended inoculation of legumes with nitrogenfixing bacteria to induce a prompt "catch" and increases your yield.

Mulford Cultures are prepared for Alsike Clover Alfalfa Crimson Clover Burr Clover **Cow Peas** Sweet Clover Soy Beans **Red Clover** Peanuts

Vetch Velvet Beans Sweet Peas **Garden** Peas Garden Beans

Lima Beans Lespedeza Beggar Weed and others

Always specify on your order what crop you want to inoculate, as there is a different strain of bacteria for each legume.
