THE EUROPEAN MAILS.

DETAILS OF FOREIGN INTELLIGENCE.

The Anglo-French Alliance Threatened.

Our foreign files received by the *Europa* furnish some interesting details of political and general intelligence.

Fox, Henderson & Co., the eminent contractors, have failed. Liabilities £350,000, of which about one-half is unsecured.

The Neapolitan question remains precisely as it did, the only additional incidents being that the government of Naples has addressed a circular, of a moderate tone, to its diplomatic agents, and that the King has sent Monsieur Thomas d'Aconit, a Frenchman in his confidence, to Paris on a secret mission.

A dispatch states—although, perhaps, on no authority—that to the French request to evacuate the Danubian Principalities the Ottoman Porte returned a flat refusal.

The matter of the Principalities has assumed prominence over other topics. The French government journals assert definitely and explicitly that the Porte has demanded, in due form, that the Austrians shall evacuate the Principalities and the British the Black Sea, but that they, by a secret understanding, refused to leave. The English journals, under the immediate inspiration of the government, deny, on the contrary, that any such demand has been made by the Porte.

The journals generally—British, French and German—speak in undisguised terms of the completion, or progress toward completion, of an alliance between England and France, and between France and Russia. The opinion of the leading papers on this subject will be found in another column.

The Swedish Chambers have been opened by a speech from the King promising liberal measures. A very doubtful rumor was current that King Oscar would visit St. Petersburg.

The Turkish ministry yet hold office—the sultan having refused to accept their resignation.

News from Bombay to October 3, mentions that the expedition against Persia was still in preparation, but had not sailed. Inundations and cholera had ravaged the Punjaub and Sindh. From Shanghai, dates are to September 11. The season's supply of tea had not arrived. In short, further successes of the foreigners are reported.

BRITAIN.—*The Anglo-French Alliance Failing to Please.*—The news is important as records the changing aspect of relations between France and England. Public rumor hesitates to say that an Anglo-French alliance is necessary to counteract the intrigues and alliance between Russia and Austria; but information being kept carefully from the public, we have no means of knowing how far these new alliances have progressed. Such hints as are given on the subject are taken from the Paris correspondence of the London journals.

The *Times* Paris correspondent says:

"Whether very founded or not, the opinion exists here that Russia does therefore exert herself to prevent the conclusion of peace on more than one point, but since that time has been completely reconciled to the Western Powers, and has come to terms with Russia and the Western Powers that it is not possible for Austria to break with Russia on the Danube and Transcaucasian line. That feeling of deep sentiment prevails between the Emperor Napoleon and the Emperor Alexander is equally believed, and it is said that the Emperor Napoleon has declared that he would be a treacherous ally and friend to Austria on the one hand, and Russia on the other, should he, under such circumstances, refuse to march to the assistance of the Principalities, in case Austria should attack them. Further successes of the foreigners are reported.

BRITAIN.—*The Anglo-French Alliance Failing to Please.*—The news is important as records the changing aspect of relations between France and England. Further successes of the foreigners are reported.

"The Question of the Principalities—Austria Refuses to Leave.

The Paris *Pays* states that the Austrian cabinet has answered to the demand of [illegible] evacuation of the Principalities by a positive refusal.

The Paris *Pays* having reiterated its assertion that the Porte has demanded the Austrian evacuation, the London *Globe* (ministerial) says:

"The assertion of the *Pays* is a ludicrous misrepresentation of the facts. The treaty of Paris was signed only a few months ago, and has scarcely been put into operation for a few months, but as soon as possible, and by this time, certain questions have arisen. They have been carried over to the exclusive keeping of Austria, and it is not Austria who has refused to evacuate. Before the Austrian troops withdrew, a convention was concluded under Austrian between Turkey and Russia, which has been settled, but it has not been made public, and until the boundary line shall be clear and certain, it is not to be expected that the guard placed on the north of the Danube will be withdrawn. In the view of the Turkish government we need scarcely say that the convention on behalf of that government is the interest of Austria is the re-

The *Morning Post* (also government) says that the *Globe* on its statement is in contradiction of the *Pays*'s notice, the Paris *Journal des Debats* corresponds.

"There is no truth to the extent to which the *Morning Post*, which states that the [illegible] was a reason to the Black Sea [illegible] that the government of the country by the treaty of peace, requiring [illegible] of the British government, [illegible] matters are clear. Not [illegible] declarations to the contrary [illegible] in Vienna, they persist in [illegible] Turkey has demanded simultaneously and repeated intervals, the [illegible] of the Principalities by Austria [illegible] Sea by England. If the [illegible] he had not the character [illegible] form, they expressed at [illegible] in the clearest manner."

At present, the matter rests.

The Isle of Serpents and Belgrad.

A Paris correspondence mentions that the Russian Embassador had proposed the [illegible] respecting the Isle of Serpents, [illegible] to be settled at Constantinople. [illegible] was inclined to listen to [illegible] which would be a kind of compromise between the previous desire of Russia and [illegible] France, and the views of the British government.

The Neapolitan Difficulty.

The Neapolitan Minister of Foreign Affairs has sent a circular to his diplomatic agents relative to the facts in the dispute with France and England. The document is said to be drawn up in a conciliatory tone. Beyond this we have no new incident.

Miscellaneous.

Dr. Kane has had an interview with the Admiralty.

The British government has presented a gold medal, with this inscription:

"Presented by the British government to Captain Champion, of the American ship *Fortune*, in the generous and prompt assistance rendered by the British barque *Rose*, 15th October, 1856."

The United States frigate *Merrimac* sailed from Southampton on the 30th for Brest.

The Russian, French and Sardinian Ministers are on a visit to Lord Palmerston's house at Broadlands. Those were the party of "friends" who accompanied his lordship the other evening, to take a look at the outside of the *Merrimac*.

A deputation from the British Association for the advancement of Science, has had an interview with the government to urge the reception of steam communication with the interior of Africa by the River Niger and its tributaries, as opened out by the late successful expedition under Dr. Baikie.

A new Roman Catholic chapel, from designs by E. W. Pugin, in the decorative style, and dedicated to Our Lady of Help and St. Peter of Alcantara, has just been dedicated by Cardinal Wiseman at Shrewsbury.

The Lord Mayor of London has remitted a further sum of 25,000 francs for relief of the sufferers by the recent inundations in France, making a total contribution from London of 500,000 francs.

A dispatch states—although, perhaps, on no authority—that to the French request to evacuate the Danubian Principalities the Ottoman Porte returned a flat refusal.

The matter of the Principalities has assumed prominence over other topics. The French government journals assert definitely and explicitly that the Porte has demanded, in due form, that the Austrians shall evacuate the Principalities and the British the Black Sea, but that they, by a secret understanding, refused to leave. The United States frigate *Merrimac* sailed from Southampton on the 30th for Brest.

Every Man a Physician.

It is said that the Duke of Ferrara, Alphonso de Este, at one time proposed in a familiar way, the question: "In what are you skilled?" He was answered by one, shoemakers, another tailors, a third carpenters, mariners, pettifoggers and laborers. Gonelle, his famous buffoon, said there were more physicians than any other class of men, and made a bet with the Duke, who denied it, that he would prove it in twenty-four hours. The following Gonelle did: he had lodgings, wearing a great night-cap, and a cravat round his chin; then a hat over all, and his mantle drawn up over his shoulders. In this attire he took a route leading to the palace of his Excellency, through Angel street. The first one he met asked him what was the matter; he replied that he had a raging toothache. "Ha! my friend," said the other, "I know the best receipt in the world against it," and he told him. Gonelle described the name on his tablet, pretending that he was writing down his receipt. A step further on he found two or three together, who all asked the same question, and each one gave him a remedy. He inscribed their names as the first, and thus he pursued his way very gingerly to the end of the street, not meeting a single person who did not offer him a different receipt from the rest, each one saying that his was well established, certain and infallible. He wrote down the names of all. Coming to the lower court of the palace, he found himself surrounded by gentlemen, (for they all knew him) who, after learning his affliction, compelled him to take their receipts, which they said were the best in the world. He thanked them all, and wrote down their names. When he entered the chamber of the Duke, his Excellency cried out: "Ah! what have you got, Gonelle?" He replied very piteously: "Toothache, the worst that ever was." To which his Excellency replied: "Ha! Gonelle, I know a thing that will drive off the pain without touching the tooth. Antonio Musa Solamavula has never employed a better. Do so, and so, and inconclusively you will be healed." Suddenly Gonelle threw down his head-dress, and his attire, crying out: "And you also, my lord, are a physician. Look at my list, and see how many others I have found between my lodgings and your palace. Here are nearly two hundred, and I have only passed through one street. I will engage to find ten thousand in this city. If I go everywhere. Find as many persons in any other business."

CITY INTELLIGENCE.

AMUSEMENTS.—At *Crisp's Gaiety*, two pieces, "Rob Roy" and "Miss," are to be performed this evening.

At the *St. Charles Theater*, "Camille" will be repeated, with the drama of "The French Spy."

At the *Orleans Theatre*, the opera "Les Mousquetaires de la Reine" will be given.

At Spalding and Rogers' *Amphitheatre*, on St. Charles street, the Campbell Minstrels give a day performance at 10 o'clock, and another at night.

At *Vanauken's Museum*, No. 107 St. Charles street, numerous curiosities and beautiful wax figures, &c., are on exhibition at all hours.

CHARITY HOSPITAL.—The following is the report of this institution for the week ending yesterday evening, the 21st inst., at 6 o'clock:

Admissions	181
Discharges	161
Deaths	20
Remaining	497

CITY ASSESSMENT.—*Second District.*—We have been kindly furnished with the following statement of assessment for the city of New Orleans:

Total assessment of Second District, including real estate, slaves, horses, carriages and capital	$21,072,350
Total, Fourth Representative District	3,130,550
Fifth	8,345,400
Sixth	5,585,799
Total assessment, Second District	$21,742,650
Total assessment of last year	21,253,550
Excess for this year's assessment	$2,489,100

FIRST DISTRICT COURT.—*Trial of Adam Scott and Mrs. Sinclair.*—As our readers must generally know, the prisoners in this case stand charged, the first as principal, the latter as accessory to the murder of her husband, Levi Sinclair, by means of arsenic administered on Sunday, May 21, 1855, at their residence on Josephine street, Fourth District.

The accused began an iron and tinware store on Tchoupoutoulas street, and was supposed to have a large amount of money at command. He lived in apparent happiness with his second wife, Theresa, who had been housekeeper to the first. He had no children by either of them, and had taken Scott to board with him as an apprentice to the business, and made him his bookkeeper. It was but shortly after this that Sinclair took sick and died. Dr. Bastinelli's testimony and that his analysis corroborated, declaring that he found a large quantity of arsenic in the stomach of the deceased. Dr. Copes, being called in to attend Mrs. Sinclair, who was then in a state of convulsions—the nearest I could approximate the nature of the symptoms—and making that statement to Dr. Bastinelli, who was present, the latter gave a correct representation at the time. Convulsions proceed from a variety of causes. Arsenic may act in different ways; upon the stomach, and then in destruction of the stomach and bowels; and, by means of excessive purging, the system is described as highly satisfactory, as well in an economic as in a moral point of view. The King declares that public opinion in Sweden now throughout supports these measures for the suppression of drunkenness, which was otherwise drawing into a national evil. Another paragraph of the speech promises that a bill will be brought in by government with the object of defending, in the commercial policy of the country, in the direction of free trade.

Latest News.

[By Telegraph from London to Liverpool.]

RUSSIA AND PERSIA.—London, Saturday, November 1.—Russia has definitely exposed Persia from the payment of the indemnity for the year 1857.

The *Times* throws the greatest possible doubts on statements via Trieste and published in last night's *Globe*, adding that in the opinion of those best qualified to judge, the Shah had not only not yielded, but was not likely to do so.

Telegraphic accounts from St. Petersburg dated Thursday, state that during the past three days there had been six degrees of frost.

Ice was expected to come down the river the next day, in which case the navigation would be suspended earlier than usual.

9,000 sacks of tallow still remained on the quay at St Petersburg.

[From the London Times City Article.]

MONDAY, Friday evening.—The English funds opened steadily this morning at the improved prices of yesterday, and subsequently exhibited increased animation.

The report that the *James Baines* had arrived with £700,000 in gold caused an additional demand. It is found that this report was incorrect. To-morrow (Saturday) a hundred will be despatched to the Stock Exchange.

In the discount market at the bank to-day there was a very active demand. It was not, however, beyond what was anticipated for the end of the month. There has been an absence of gold withdrawals.

[From the Daily News City Article.]

LONDON, Friday evening.—The tendency of the bullish is still upward. The market opened at a reduction of a quarter, but quickly recovered and closed at 1 per cent. higher than yesterday. Most descriptions of railway stock were also quoted higher.

To-day's advance in consols was stimulated by some large speculative purchases, but the investments of the public have also even continued. Money was easy in the stock exchange at 4@4¼ per cent., for loans on consols. Up to the close of the settlement in shares and foreign stocks, there has been little demand for money. In the discount market to-day there was a steady demand at full rates, but an absence of pressure.

The three per cents. are reported by telegraph at closing to-day at Paris at about 4 per cent. higher than yesterday. The purchases appear chiefly to have been on speculation.

Stay of the English Fleet in the Black Sea.

MARSEILLES, Oct. 21.—Intelligence from Constantinople of the 26th states that in reply to a demand by Baron Boutenieff, the Russian Ambassador, Lord Lozens has stated that the English squadron will remain in the Euxine until the signature of the treaty of Paris are fully carried out.

The concession of the Turkish railways has been granted the Houses of Stieglitz and Hope, Periere and Hottinguer, and some other German bankers.

MARYLAND.—*Official.*—The following is the official vote of Maryland:

COUNTIES.	*President*—1856. Fillmore.	Buchanan.

Worcester	1,224	1,424
	47,462	39,115
	39,115	
Fillmore's majority	8,347	

FILLMORE received in the whole State 281 votes.

Every Man a Physician.

It is said that the Duke of Ferrara, Alphonso de Este, at one time proposed in a familiar way, the question: "In what are you skilled?" He was answered by one, shoemakers, another tailors, a third carpenters, mariners, pettifoggers and laborers. Gonelle, his famous buffoon, said there were more physicians than any other class of men, and made a bet with the Duke, who denied it, that he would prove it in twenty-four hours. The following Gonelle did: he had lodgings, wearing a great night-cap, and a cravat round his chin; then a hat over all, and his mantle drawn up over his shoulders. In this attire he took a route leading to the palace of his Excellency, through Angel street. The first one he met asked him what was the matter; he replied that he had a raging toothache. "Ha! my friend," said the other, "I know the best receipt in the world against it," and he told him. Gonelle described the name on his tablet, pretending that he was writing down his receipt. A step further on he found two or three together, who all asked the same question, and each one gave him a remedy. He inscribed their names as the first, and thus he pursued his way very gingerly to the end of the street, not meeting a single person who did not offer him a different receipt from the rest, each one saying that his was well established, certain and infallible. He wrote down the names of all. Coming to the lower court of the palace, he found himself surrounded by gentlemen, (for they all knew him) who, after learning his affliction, compelled him to take their receipts, which they said were the best in the world. He thanked them all, and wrote down their names. When he entered the chamber of the Duke, his Excellency cried out: "Ah! what have you got, Gonelle?" He replied very piteously: "Toothache, the worst that ever was." To which his Excellency replied: "Ha! Gonelle, I know a thing that will drive off the pain without touching the tooth. Antonio Musa Solamavula has never employed a better. Do so, and so, and inconclusively you will be healed." Suddenly Gonelle threw down his head-dress, and his attire, crying out: "And you also, my lord, are a physician. Look at my list, and see how many others I have found between my lodgings and your palace. Here are nearly two hundred, and I have only passed through one street. I will engage to find ten thousand in this city. If I go everywhere. Find as many persons in any other business."

Henry Mitchell swore—I am Deputy Coroner. I had Smelser's body exhumed; Dr. Copes opened it. Some of the contents were taken out and sealed in a clean jar, which I took, and, in company with Dr. Sabatier, delivered to Dr. Bertrand, the chemist. The jar in Court is the one I gave to the latter gentleman.

Cross examined—The jar was sealed by myself at the burying ground. Dr. Copes having put the remains into it, I sealed it with plaster of Paris. I received the jar from Mr. Morehouse; think Dr. Batchelor saw it before it was sent. Would have brought it to the cemetery if a burial, and we all having met there by chance. I was present all the time of the exhumation, and saw certain notes had with charges to tamper with the remains consigned. The latter having been kept safely by me, was delivered next day to Dr. Bertrand.

Dr. Bertrand sworn—I have been a chemist for thirteen years. I recognize the jar in Court as the one given me in July last by the Deputy Coroner, and containing parts of the stomach, liver, contents, three ribs and the spleen of a man with one lung. It had been in my possession ever since. When first received, the stomach being entirely decomposed, I dissolved it in water, and then proceeded to the analysis. The remains were dried by steaming and evaporation, and then reduced with sulphuric acid and nitre, when the gas produced, burning with a violet blue flame, I knew that I was dealing with a poisonous substance. I then used the Marsh process, and the result (as tests showed) was the production of arseniuret, precisely the same being obtained with arsenic. I then used the Reinsch process, and on the surface, and produced by metallic action from the remains in the jar, such are the result when combined with arsenic. I repeated the experiment on the 19th inst., taking a fair proportion of the contents of the stomach, liver, &c., and the result was the same. I have no doubt whatever that arsenic was administered to the deceased, and that it was the cause of death. I have had a long experience in chemical analysis, and have no doubt of the correctness of my conclusions. Dr. Copes was present during the whole of the analysis. Dr. Batchelor was present at the first. Dr. Copes was present at the second. Dr. Batchelor was present at the third. Dr. Copes was present at the fourth. Dr. Batchelor was present at the fifth.
