ARMY BARRACKS WEST OF KAWASAKI

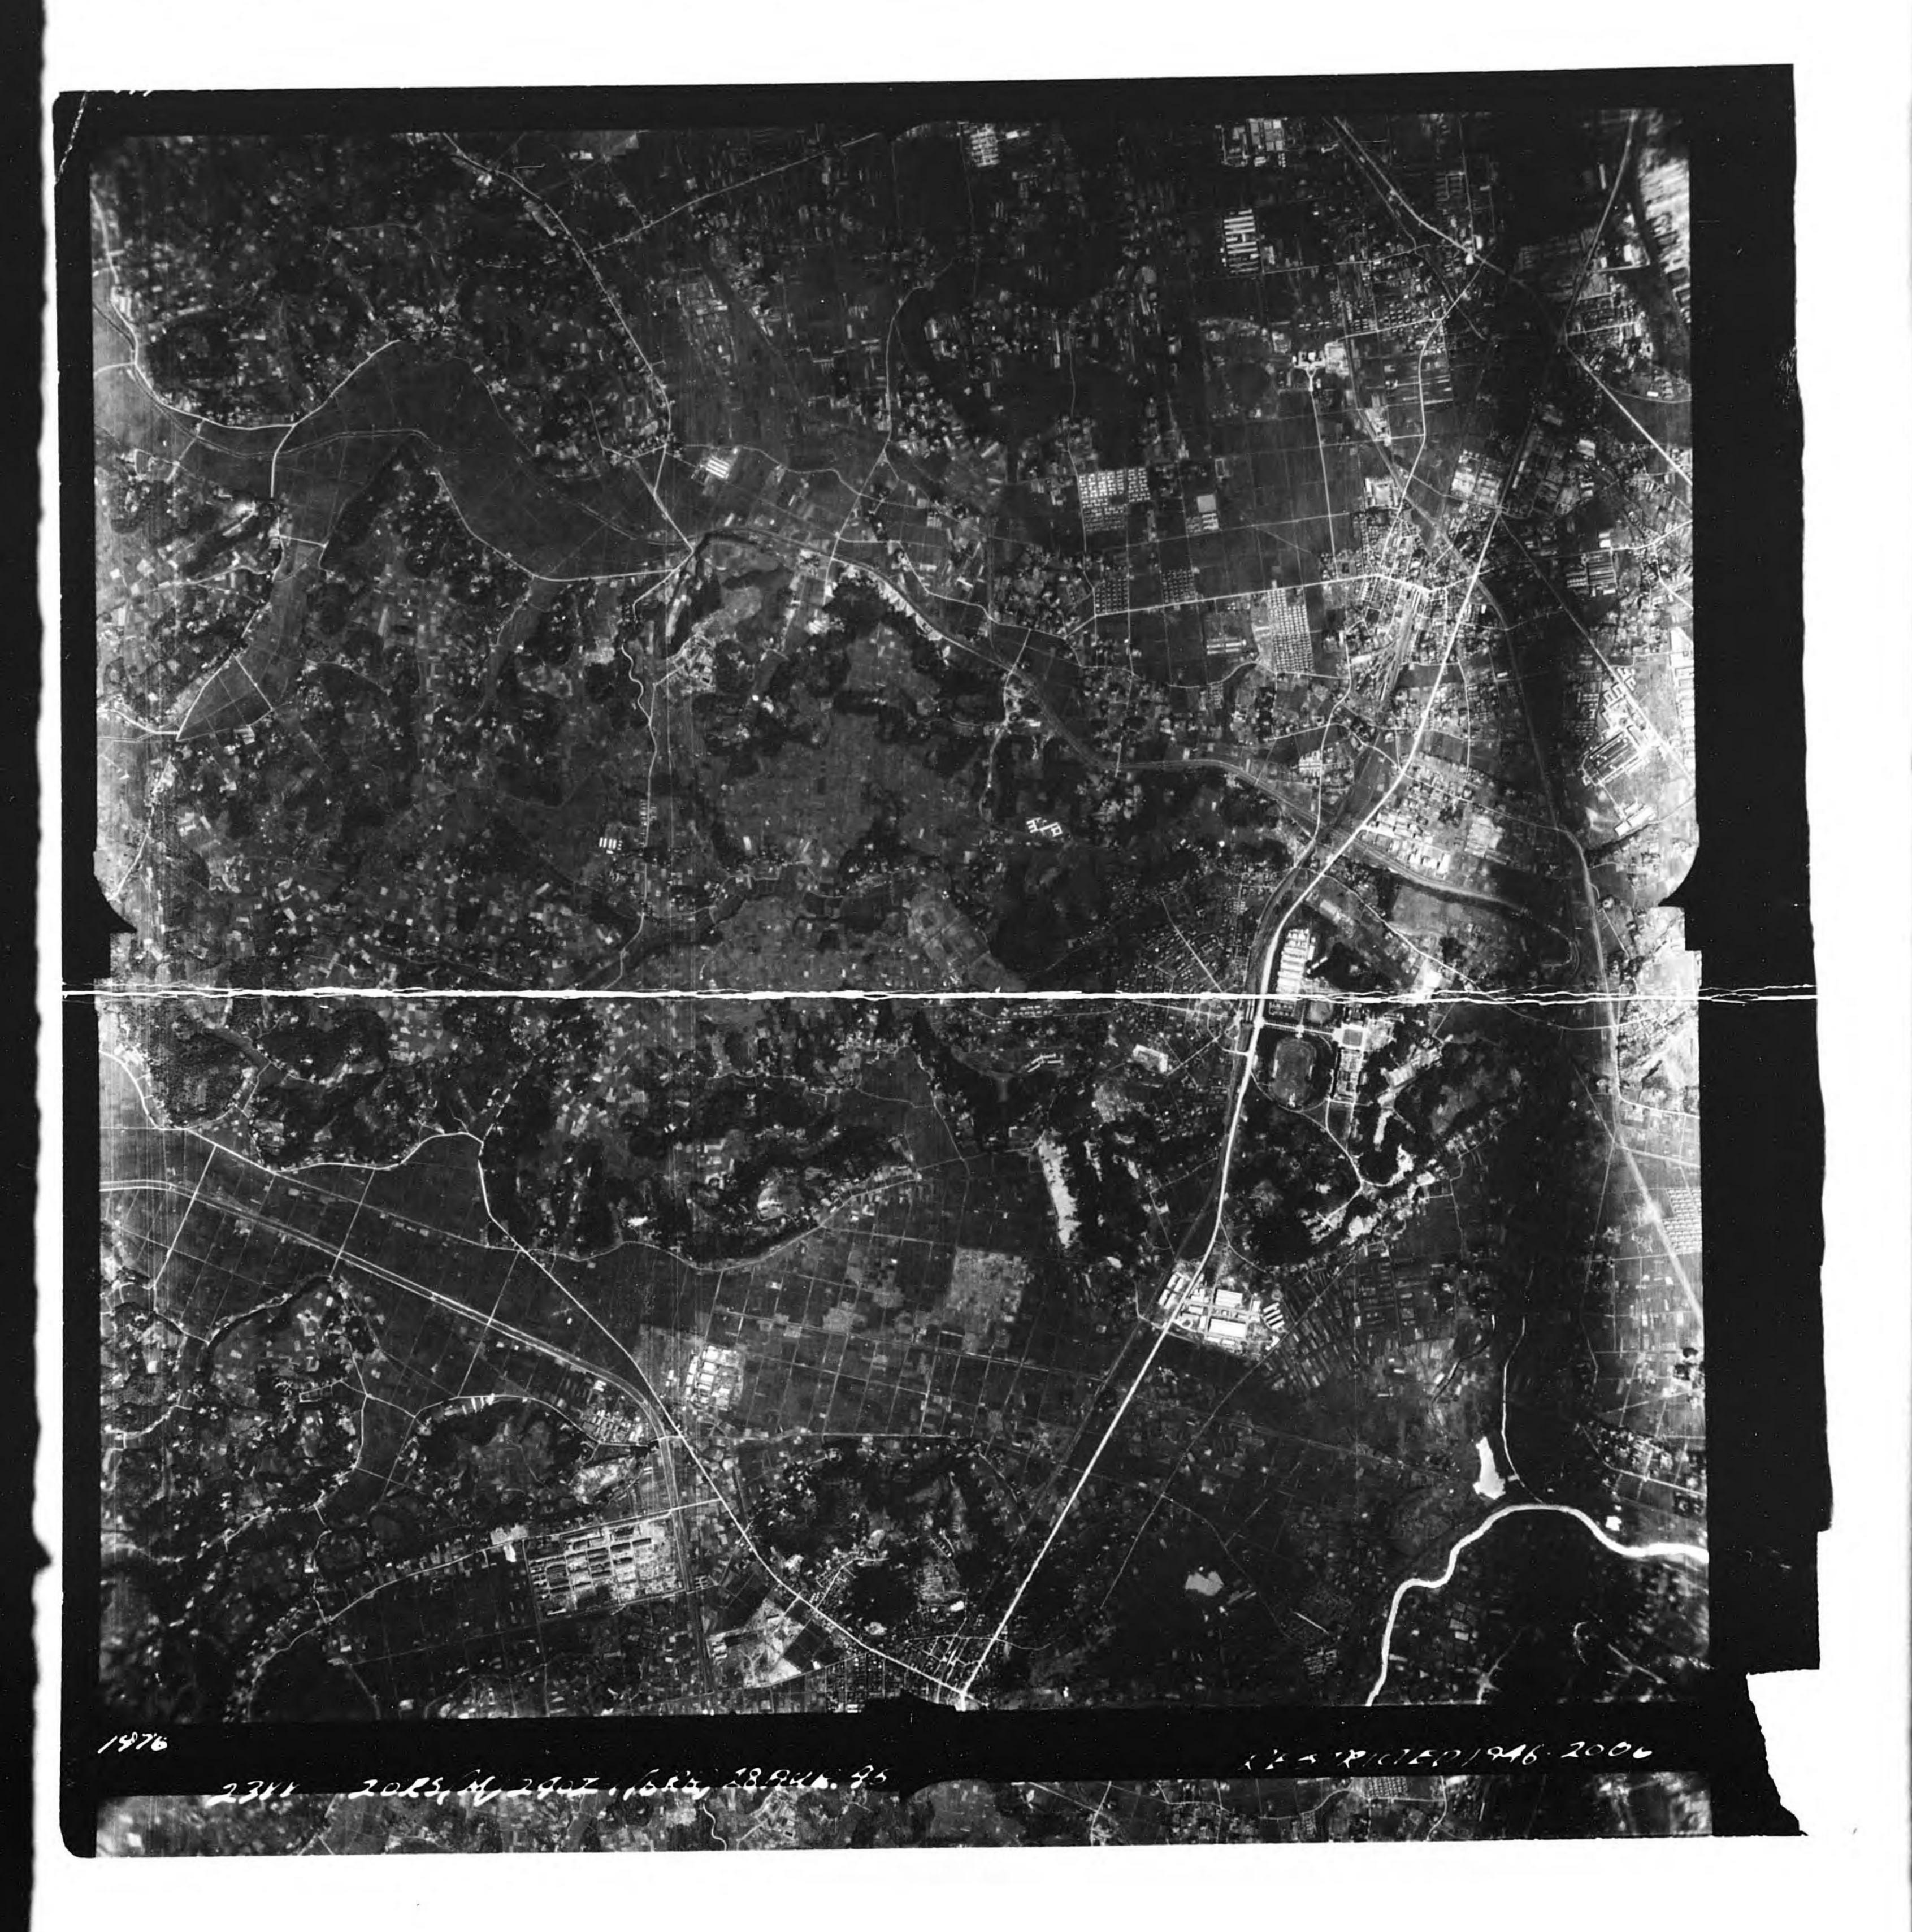

Team: PIC-J

Photos: PIC-J-16:4-6

J-Sketch-34

Extensive tunnel work U/E. Tunnels run through hill with cross tunnels connecting them. Several camouflaged barraks type buildings on E side of hill. Spoil spread out on W side.

That of Cohen for Camouflage + underground Claffen

Target N-X5
N-REPSRT-5

GUN BATTERY WEST OF TOKOROZAWA AIRFIELD

* * *

This position was never completed.

All construction was with the aim of complete concealment and added safety.

All barracks were to be underground, The command post was underground. All gun positions were defensed. All installations were interconnected by underground passages.

The gun position most nearly completed was 18' 6" square depressed 6'. It had a concrete base with underground connections to barracks and command post.

This position was constructed so that a small shed 22' 6" square and 15' high mounted on rails could be slid forward over the gun protecting it from aerial observation.

There were a total of eight positions in various stages of construction.

Information concerning caliber of guns to be installed, fire control methods, or supplementory automatic weapons could not be obtained.
