THE
(OLD)
FARMER'S ALMANACK,

CALCULATED ON A NEW AND IMPROVED PLAN
FOR THE YEAR OF OUR LORD

1951

Being 3rd after BISSEXTILE or LEAP YEAR, and (until July 4)
175th year of American Independence

FITTED FOR BOSTON, AND THE NEW ENGLAND STATES, WITH SPECIAL CORRECTIONS AND CALCULATIONS TO ANSWER FOR ALL THE UNITED STATES.

Containing, besides the large number of Astronomical Calculations and the Farmer's Calendar for every month in the year, a variety of

NEW, USEFUL, AND ENTERTAINING MATTER.

ESTABLISHED IN 1792

BY ROBERT B. THOMAS.

Alas! how swift the moments fly! how flash the years along!
Scarcely here, yet gone already by!—the burden of a song!
See Childhood, Youth, and Manhood pass,—and Age with furrowed brow!
Time was! Time shall be! But alas!—where, where, in time is now?

John Q. Adams—from the 1851 Old Farmer's Almanac.

TO PATRONS & CORRESPONDENTS

Herewith is the 159th consecutive annual edition of The Old Farmer's Almanac. It is for the year 1951, covers Atomic Year 6, and portrays, despite man's confusions and troubles, how the universe continues in certain, predictable fashion to maintain its harmonious rhythms. This observation in itself should be sufficient hope to the courageous that the good life is more than mere promise. There are signs also on earth that we may be emerging from years of scientific and psychoanalytical despair during which the world has been seen as torn and decadent. The age of the material realist, the agnostic, the scoffer has ended and in its place has come that of the mystic and the seer. Dr. Albert Einstein, who needs no introduction as the world's greatest present day scientist, has ably dissolved our misconceptions of a material universe and turned us to new fields in outer space where rebirth is possible.

The steadfastness with which we bind with fetters of love, faith, charity these tiny invisible infinitesimal parts of our Rebirth and Being is in large part but our insistence upon freedom to hear and to follow the dictates of conscience. Doubt not even for one moment the glory of God, of America, of your fellow being, of thyself. Assert this glory in the face of all those who would destroy it. It is only in our weakened faith, in our doubts, that the shadows exist in which Communism dares hide. Profess the American way in thought and in deed . . . there is no time left for intellectual, or other, dallying with the Marxian (so called liberal) concepts which were dead long before the present enlightened age of the mystical—of the acknowledged mystery of Creation—began.

In this issue, David Morton of Deerfield, Massachusetts, has written the poetry on the Calendar Pages; Benjamin Rice of Peterborough, New Hampshire, the Farm Calendars and much else; Loring Andrews of Scituate, Massachusetts the astronomical matter; Abraham Weatherwise, the weather. The Hunting & Fishing Laws were taken from the files of *Outdoors Magazine*. Many governmental and private sources have been of inestimable help. An index appears on page 110. This and the cross references throughout we recommend as being more carefully made than were those of last year.

W. C. Newark, N. J. You ask how many gallons and pounds of water fell in a one inch rain on your acre plot. The answer is 27,154.2 gallons or 226,875 lbs. Next time please include check for the time it takes us to go out and measure such things. L. G. M., Muncie, Indiana: You state no one there seems to know where to get molds or sap buckets for use in making maple sugar. No one here seems to know where to find the price to pay for just the plain syrup. J. H. B., Boston, Mass.: The going price of a complete edition of this Almanac has never been lower than one hundred dollars. Mrs. H. G., St. Louis, Mo.: We can not advise you about the proper time for cutting hair. In our case, certain snide remarks of family or friends are helpful. A. A. B., Chicago, Ill.: As far as we know, the wind on ember days has little to do with the weather three months thence. S. T. P., Portland, Maine.: Only 20 states set their clocks ahead these days for D.S.T. B. G. G., Bozeman, Montana: We agree a rat campaign should be instituted coast to coast. Be sure to include the pink variety.

In conclusion, we wish to express our appreciation of the continued interest in the Almanac on the part of our readers, advertisers, and our many loyal friends of the press, radio, and television. It is hoped we may merit the continuance of this splendid support. Man, however, in these great things can only propose. God is the true disposer. In this then it is by our works and not our words we would be judged. These we hope will sustain us in the humble, though proud, station we have so long held, in the name of

Your ob'd servant,

W. D. Thomas.

MORNING AND EVENING STARS, 1951

(A Planet is called Morning Star when it is above the horizon at sunrise, and Evening Star when it is above the horizon at sunset. More precisely, it is a Morning Star when it is less than 180° west of the Sun in right ascension and Evening Star when it is less than 180° east. When the planet is near conjunction or opposition, the distinction is unimportant.)

Mercury will be favorably situated for being seen as an Evening Star when near its greatest eastern elongations about April 5, August 3, and November 28. On these dates it will set 1 h. 43 m., 1 h. 01 m., and 1 h. 10 m. respectively, after sunset. It will be seen as a Morning Star when near its greatest western elongations about January 23, May 22, and September 16, on which dates it will rise 1 h. 35 m., 0 h. 53 m., and 1 h. 31 m. respectively, before sunrise.

Venus will grace the hours after sunset as an Evening Star from the year's beginning until September 3 when it comes to conjunction with the Sun. From September 3 to the year's end it will be seen in the morning sky as a Morning Star before sunrise. It attains its greatest brilliancy as an Evening Star on July 29 and as a Morning Star on October 10.

Mars is an Evening Star as the year begins and remains such until May 22 when it comes to conjunction with the Sun. Thereafter for the remainder of the year it will be a Morning Star seen in the east before sunrise.

Jupiter will be an Evening Star visible in the western sky after sunset until March 11 when it comes to conjunction with the Sun. Thereafter, until it reaches opposition on October 2, it is a Morning Star. From October 2 until the year's end it is an Evening Star again.

Saturn is a Morning Star from the beginning of the year until March 20. It is an Evening Star from March 20 until September 29. Thence until the end of the year it is once again a Morning Star.

ECLIPSES FOR THE YEAR 1951

In the year 1951 there will be but two eclipses, both of the Sun and both visible in the eastern half of the United States.

I. **An Annular Eclipse of the Sun**, March 7, 1951. The path from points of which the annular phase will be visible follows an all-water route from just east of Australia to its ending in the southern Caribbean except where it crosses New Zealand and Central America. The eclipse will be visible as a partial eclipse from points in the United States except in the western and northwestern parts, Mexico, Central America, the northwestern part of South America and the South Pacific Ocean.

Details of the eclipse of interest to observers in the United States are given below. By magnitude of the eclipse is meant the portion of the sun's diameter covered by the Moon.

	Eclipse begins	Middle of eclipse	Magnitude	Eclipse ends

Sante Fe, N.Mex.	3.05 P.M.	3.37 P.M.	0.10	4.07 P.M.

II. **An Annular Eclipse of the Sun**, September 1, 1951, visible in its annular phase along a path extending from North Carolina across the Atlantic to West and Central Africa to an end-point in Madagascar. As a partial eclipse it will be visible as a dawn and immediately post-dawn event for United States observers living generally east of Longitude 95° W. and at later hours in the day to observers in the Middle and South Atlantic Ocean, Western Europe and Africa.

The central line of the path of annular phase starts near Winston-Salem, N.C. and thence runs eastward to the Atlantic coast at Norfolk, Va. Its width is approximately 80 miles. Observers within that path must needs rise early to see the short-lived annular phase, for the eclipse will already be in that phase as the sun rises or within minutes thereafter.

For observers elsewhere facts about the time and magnitude of the partial eclipse are given below. By magnitude of the eclipse is meant the portion of the sun's diameter covered by the moon.

WEEKEND HOLIDAYS and the WEATHER

None of the weekend holidays except one of 1951 fall on Saturday or Sunday. Four fall on Monday, and one on Friday—thus offering the vacationer at least five full three-day excursions. The full list, the day the holiday is on, and the weather to be expected, for the full time, is given below:

- | | |
|----------------------------------|--|
| January 1. Monday. Cold. | July 4. Wednesday. Rain. |
| Feb. 12. Monday. Plenty of snow. | Sept. 3. Monday. Rain. |
| Feb. 22. Thursday. Overcast. | October 12. Friday. Rain. |
| April 19. Thursday. Overcast. | November 6. Tuesday. Clear. |
| April 23. Monday. Lowery | November 22. Thursday. Changeable. |
| May 30. Wednesday. Rain. | December 25. Tuesday. White. |
| June 17. Sunday. Nice. | (See opposite page for complete list.) |

AN IDEAL PLACE FOR A HAPPY AND RESTFUL VACATION

Spend it at a delightful home in a beautiful New Hampshire residential town. Fine center for visiting points of interest in the White Mountains and Canada. Near all churches, stores, restaurants and golf course. Attractive rooms, excellent beds; a friendly, congenial home. Rates moderate.

RUTH JOY CUMMINGS, Owner

Open from July 1st through September

PRINCIPAL HOLIDAYS, ETC. IN 1951

America has no nationwide holidays. Each state determines its own. In the table that follows (*) indicates these quite generally observed by all states; (**) indicates those for only certain states; and (***) indicates days usually observed in some localities though probably not observed as holidays. Only continental United States is covered here. These dates are also all indicated on right hand calendar pages in abbreviated form.

Jan. 1 (*) New Year's Day	May 10 (**) Memorial Day (N. C. & S. C.)
Jan. 8 (**) Battle of New Orleans	May 13 (***) Mother's Day
Jan. 19 (**) Robert E. Lee's Birthday	May 19 (**) Armed Forces Day
Jan. 26 (**) MacArthur Day (Ark.)	May 20 (**) Mecklenburg Day (N. C.)
Jan. 30 (**) F. D. R.'s Day	May 20 (**) Citizenship Day
Feb. 4 (**) Arbor Day (Ariz.)	May 30 (*) Decoration or Memorial Day
Feb. 6 (**) Mardi Gras	June 3 (**) Jefferson Davis Day (Ala., Ark., Fla., Ga., La., Miss., S. C., Tenn., Tex. & Va.)
Feb. 12 (**) Abraham Lincoln's Birthday	June 14 (**) Flag Day (Mo. & Pa.)
Feb. 14 (**) Admission Day (Arizona)	June 15 (**) Pioneer Day (Idaho)
Feb. 14 (***) Valentine's Day	June 17 (**) Bunker Hill Day (Suffolk County, Mass.)
Feb. 15 (***) Susan B. Anthony Day	June 17 (***) Father's Day
Feb. 22 (*) George Washington's Birthday	June 20 (**) West Virginia Day
Mar. 1 (**) State Day (Nebraska)	July 4 (*) Independence Day
Mar. 2 (**) Texas Independence Day	July 13 (**) Forrest's Day (Tenn.)
Mar. 7 (**) Burbank Day (Cal.)	July 24 (**) Pioneer Day (Utah)
Mar. 15 (**) Jackson Day (Tennessee)	Aug. 1 (**) Colorado Day
Mar. 17 (**) St. Patrick's or Evacuation Day	Aug. 14 (**) Victory Day (R. I.)
Mar. 23 (**) Good Friday (Conn., Del., Fla., La., Md., Minn., N. J., Penn. & Tenn.)	Aug. 16 (**) Bennington, Vt. Battle Day
Mar. 25 (**) Maryland Day	Aug. 30 (**) Huey Long Day (La.)
Mar. 26 (**) Easter Monday (N. C.)	Sept. 3 (*) Labor Day
Apr. 1 (**) State Election (Michigan)	Sept. 9 (**) Admission Day (Cal.)
Apr. 10 (**) Arbor Day (Neb.) 1872	Sept. 10 (**) Election Day (Me.)
Apr. 12 (**) Halifax Day (N. Car.)	Sept. 12 (**) Defender's Day (Md.)
Apr. 13 (**) Jefferson Day (Mo., Okla., Va.)	Sept. 16 (**) Cherokee Day (Okla.)
Apr. 14 (***) Pan American Day	Sept. 17 (***) Constitution Day
Apr. 19 (**) Patriots' Day (Me., Mass.)	Sept. 28 (***) Am. Indian Day
Apr. 21 (**) San Jacinto Day (Texas)	Oct. 1 (**) Missouri Day
Apr. 22 (**) Arbor Day (Nebr.)	Oct. 10 (**) Okla. Hist. Day
Apr. 22 (**) Okla. Day	Oct. 12 (*) Columbus Day
Apr. 24 (**) Arbor & Bird Day (Mass.)	Oct. 31 (**) Nevada Day
Apr. 24 (**) Fast Day (N. H.)	Nov. 1 (**) All Saints' Day (La.)
Apr. 26 (**) Memorial Day (Fla., Ga., Miss.)	Nov. 4 (**) Will Rogers Day (Okla.)
May 4 (**) R. I. Independence Day	Nov. 6 (*) Election Day
	Nov. 11 (**) Armistice Day
	Nov. 22 (*) Thanksgiving Day
	Nov. 23 (**) Repudiation Day (Md.)
	Dec. 7 (**) Delaware Day
	Dec. 21 (***) Forefather's Day
	Dec. 25 (*) Christmas Day

LAST WINTER'S (Nov., Dec., 1949-Jan., Feb., Mar., 1950) WEATHER

The past seven winters were forecast by Abe Weatherwise—The Old Farmer's Almanac long time forecaster—as "Mild," "Turbulent," "Wet," "Old Fashioned," "White, long and cold," "Not so cold but icy," and finally, as "wet." The correctness of the first six of these winters has never been disputed. For the seventh, or last winter, Abe slipped up on his "bitter cold and more storms of rain and snow" for November and December of 1949. He was right however in saying that January 1950 would be "Mild"—February "Stormy," and the Spring "Cold and Late." He was furthermore correct in his year ahead forecast that on Feb. 2, 1950, the Ground-hog would not see his shadow during the day but would see it by the light of the full moon during the evening. Special Observer Francis W. Hatch reported on this day's weather events as follows: (Mr. Hatch works in Boston, lives in Weston.)

"Bedraggled snow from dawn 'till ten,
and then
rain, cold rain
that pelted at my felted hat —
then fog that made the Boston State House dome
wistful in the mist.
driving home
I brooded over slushy ruts and rills
and thought of washed out skiers
in the hills;
but, lo,
after one sustaining drink or so
I stepped out doors
and shining pale above,
shy and luminescent as first love,
in compliment to spirits growing bolder
there perched the moon,
a jewel on my shoulder.
(The moon I must confess in honesty
was shrouded in-dim obscurity.
Behind the dismal veil it held its track,
faithful to the trusty Almanac.)

(ED. NOTE: The dismal veil referred to by Observer Hatch refers no doubt to Boston smoke as other observers of that evening report the moon full and clear.)

The most significant weather event of the Spring of 1950 was the report on March 28th (New York Herald Tribune) from the International Ice Patrol that icebergs were much further south than usual for that date. The Weather Bureau has long felt the need of more weather stations in Arctic areas. The importance of the movements of the ocean currents under the ice cap is not to be denied.

At the end of the winter, Chief Namais of the U. S. Weather Bureau explained that a roving high pressure cell a thousand miles off the Pacific Coast controlled by chain reaction a Bermuda high pressure area to cause another weird winter in which California at times had more snow than New England. Now that the Weather Bureau's thirty day ahead forecasts are well established it is to be hoped that such cells may be recognized in advance of the weeks and months during which their influence is to be felt.

NEXT WINTER'S (Nov., Dec., 1950-Jan., Feb., Mar., 1951) WEATHER

"PLENTY OF SNOW and PLENTY COLD"

November, 1950, will be colder than most years, and along with December, 1950, will have its full share of storms of rain and snow. January, 1951, will start off real cold, and the last half of the month will bring along almost every kind of known winter weather. February will find on the ground more snow than usual, and this snow will stay well into March. The last three weeks of March will have nothing in them which can be spoken of favorably except they brought us three weeks nearer Spring.

In All Kinds of Weather . . .

ENJOY SUNNY WARMTH

Rain. Shine. Snow. Sleet. No matter what the weather, you can be sure of sunny warmth with a Utica Heating System. Prepare for cold days and nights this winter. Install a modern Utica Heating System for economical, dependable radiator heat.

UTICA Heating System for Steam or Hot Water

Choose hot water or steam. Choose oil or coal. There's a UTICA RADIATOR Heating System exactly the right size to meet your requirements. Mail the coupon now for your FREE heating estimate. No obligation.

HOW TO USE THIS ALMANAC

The following Calendar Pages (12-35) have remained practically unchanged in format since the first issue in 1793. Those not familiar with the signs, abbreviations, etc., should realize that the understanding of this time-honored format is easily come by—and contains for the year 1951: the angle of the sun's declination, the times of the change of the moon's phases, sunrise, sunset, day's length, sun dial adjustments, high tides, moon rise, moon set, moon southing, moon's place in the heavens, and the moon's age—for every day in the year. On the right hand pages are expressed, by means of the symbols explained below, the relative positions during the year of the eleven planets including our sun and moon; daily tide heights, and in italic type, coursing down just to the left of the Farm Calendar, the weather which may be expected for the days which the italic sentence covers. On these right hand pages are also indicated all the important religious Holy Days of all faiths—national and state holidays—historic dates—and advice as to when the sap starts to run, birds, return, etc.

The Moon Signs used by many for planting are given in the next to last column of the left hand pages. Abbreviations used in this column are explained below and correspond to the positions on Moon Sign Man—familiar to many—but never used in this Almanac . . . which has never given credence to astrological matter. However in the last column of the Planting Table which follows these Calendar Pages on page 36 you will find the dates which astrologers use as most favorable for planting.

For the adjustment of the times given, to those of your locality turn to page 103.

CALENDAR PAGE EXPLANATIONS AND SIGNS

On the right hand pages you will find every now and again the symbols given in Tables 1 and 2 conjoined on groups of three to give you what is happening in the heavens. See Abbreviations and Definitions on page 102.

1. Names and Characters of the Principal Planets.

☉ The Sun.	♀ Venus.	♃ Jnpiter.	♆ Neptune.

Disruption, dislocation, everywhere,
Formless and wild, and part at war with part . . .
And, still, the word, the word, at her love-making,
Stubborn and small and sweet in violent air,
Persists in shape and sense, begging the heart:
'Cleave unto me, me, all others forsaking'.

D. M.	D. W.	Aspects, Holidays, Heights of High Water, Weather, etc.	Farmer's Calendar.
1	M.	Circumcision. ⊕ in Underground 9.4 Peri Moon 9.0	Once when I was a small boy at school my teacher, irritated by my thick-headedness remarked that I hadn't brains enough to last me over night (a conviction, by the way, which he carried to his dying day). This, being in class before my gleeful classmates caused me the agonizing embarrassment that only the very young may know—while not in the least clearing up my thick-headedness. At any rate, I have always remembered the remark (and the sting of it), and, I think, turned it to good account.

The full moon, slow and round,
And softly, with no sound,
The unseeing, baleful eye,
Opens in the sky.

The whole east is a bare
And bold, unblinking stare.
And everything abroad
Will turn and look, being awed,

Being stilled, as by some danger,
As by the dead in anger,—
Till later, when a white
Full flower above the night
Is man-and-maid's delight.

This "dead" land of ours is not nearly so dead as it looks. There may have crept into the ground a few feet of frost—more or less—according to the snow cover. And only the oak and the beech leaves hang. But this isn't death. The truth is as old and as hackneyed—as old and as fresh and perennial as snows and frost. Come spring the urgent sap will rise in these ancient trees, and all over the forest floor the seeds, the flowers, the new shoots will burst to life. "Dead" January is just a period of rest and regathering for a little while.

And why not so for us? To farmers this "dead time" can (despite farm business) still be a time of relaxation and regathering. We have now the extra hours that no other season offers.

If we are lucky enough to have turned a fair profit on orchards or small fruits or market gardens, why not take that trip South? Why not, trip or no, make this the time of gathering and regathering information on things that mean most to us? Or, for that matter, things that don't? There is certainly more in this world than we have dreamed of—and when better than now to search it out?

Books, lectures, friends, home, travel can be our thresholds to a new life in "dead January."

What do we mean by *parity* prices as they concern farm products? A parity price is the price of a commodity which will give that commodity the same purchasing power it had at a particular "base" level. It was in 1933 when the first Agricultural Adjustment Act was passed that we began to talk *parity*. Parity price then for farmers, or some part of us farmers, was based on prices of basic commodities as of August 1909 to July 1914. (This base has been changed since.)

The definition of the parity of commodities has essentially the same definition now as then, and it is as easily understood.

We quote from Dr. J. R. Bowring in the Journal of the New Hampshire Horticultural Society: "The Parity price of a commodity is arrived at arithmetically by multiplying the base price by a parity index. This parity index is an index of prices paid in relation to the base period and includes 86 items used in family living and 93 items used in farm production. These items include clothing, household supplies, food, building materials, bricks, tractors, feed, farm machinery, and so on. Allowances for taxes and mortgage interest are also included. Therefore, for example, if the parity index is 250, the parity price will be the price at the base period times 2.5."

We are glad to know this— for we have always wondered just how one arrived at *parity*.

The cut-back shoot declares,
From the rude, broken mouth,
For life! . . . And the dream fares
Intensely, underground,
Where the black root is bound,
Away from the air's south.

There, in the dark, among
Lidless, unbreathing things,
Things without eye or lung,
With nought to breathe or see,
The root shapes what will be
The exquisite flower that brings

A whiteness here to mark
How the root kept the dark.

The commercial grower is becoming more and more convinced that conservation farm ponds will save money and labor and offer protection not only against drought but against fire. Then, too, there is the factor of furnishing water for livestock, fish production, recreation, and true conservation, for many farm ponds put to productive use runoff water that otherwise would be wasted and cause soil erosion.

The idea of irrigation and sprinkling in time of drought is no longer confined to those western growers where irrigation has always been essential, but to other growers everywhere who use their ponds as a direct source for irrigation or for sprinkling—or just as a handy source for their sprayers.

For the most part these ponds (over 175,000 of them since 1937) have originated with the technicians of the United States Soil Conservation Service. Sound advice on where and how to build a pond is essential—and advice on how to maintain the pond once you have it. The Soil Conservation officers in your district will make no charge for this service.

Among the first ABC's for your pond will be to determine whether you have the type of soil that will hold water once impounded.

Don't forget, come May, that with your farm pond you have a first class fishing hole which may not be fished out before you get to it.

The flower, of ignorant grace,
And the wild, illiterate cherry,
Having no vanity-case
Have only the shining river,—
And that is a rapid ferry
Bearing away, forever,
The look of the flower's grace,
And the wild cherry.

Had they but been to school!
They might look over my shoulder
And see, as in a pool,
The mirroring way of verse,—
Where they grow never older,
Where meter and rhyme rehearse
The young, the beautiful
Beheld and beholder.

D. M.	D. W.	Aspects, Holidays, Heights of High Water, Weather, etc.	Farmer's Calendar.
1	Tu.	St. Philip & James ♂ in ♂ Minor Rog. Days { 9.4 } Spring	<p>Memorial Day. There was Colonel Jones on his white horse prancing down flag-lined Main Street, perilous with its cobbles and trolley tracks, and all the great parade stretching behind him. The Grand Army Men in their fading blue—but not too faded then—and the spruce Spanish war veterans in their bright blue and gold, band blaring, and little girls in white and little boys in khaki or blue, and firemen and policemen and more bands.</p> <p>Down Main Street, up Cottage Street, alternately under the good warm sun and through the shadows of the great elms and maples and chestnut trees—shadows as cool as water. The smell of lilacs and lilies-of-the-valley would drift up to us from the garden as we sat on the porch of our great-aunt Mercy (like up-town "sissies"—which we weren't) and watched and heard, and felt our spines tingle with the excitement and strange unrest that is always a parade.</p> <p>We were very young then and did not follow the marchers (as did the happy "townies"), but sat on the porch as the last band moved out of sight and approached the cemetery, and then we heard the music change to the sad, sad beat of the funeral march. And all the town was hushed, till at last the volleys echoed over the graves, and what was left of the great parade came straggling back to disperse at the street corner and the firehouse. So our parade ended. But the thrill remains.</p>

Look, now! . . . Here's royalty again!
 Summer, among us little men . . .
 Compelling the uplifted eye,
 And the bared head, and the hoarse cry:
 'Long live' . . . 'long live' . . . the narrow street }
 Made royal for the royal feet,
 And every innocent heart in town,
 In every breast, kneeling down.

Deer do their full share of damage to our crops—and more. And deer are generally on the increase. Michigan and Wisconsin can tell the story time and again of the complete loss of strawberry crops. Pennsylvania, West Virginia, New York, New England (the country over, for that matter) have seen countless young orchards and other crops either ruined or indefinitely set back.

Now it is evident that the orchardist who sets out a thousand young trees to be browsed by deer or the farmer who plants acres of berries and has them eaten by deer, is not being kept in the orchard business or the berry business simply because the state pays the damages "to date." They both need definite assurance of protection in the future.

Many orchardists have accepted an arrangement whereby the state provides (but does not put up) a deer fence if the owner releases the state from deer damage claims. The fallacy is that few deer fences are complete protection. A deer who couldn't jump twelve feet up and over when pressed (as by dogs) would bury his head in shame under the nearest juniper bush—and he can crawl under any fence somewhere.

Deer repellent sprays are on the market, but there is evidence deer just get used to these. So how to protect our crops? Every farmer with a gun? Longer open seasons on deer? More wardens guarding crops?

Now sing love's tune, under the June moon.

Now, evening and the valley and the river
Are a vast channel for the flowing away
Of all things, here, that were not meant to stay.

And you and I, alone, in the cold starlight,
Are left, and our love is left, that confident wight
Who is teaching us, here, the meaning of forever.

When the price of meat gets too high, good housewives everywhere can just stop buying meat—and the price is sure to come down. But it isn't as simple as that for the farmer and the things he must buy in his business, for he must have his fertilizers, insecticides, fungicides, grains, a variety of all-important machinery, and so on if he is to stay in business. He may have to have these things at any price. All of us farmers remember the unheard of prices we paid during the war for such items as second-hand manure spreaders (as much as several hundred dollars) . . . in fact all of us recall selling some of our old machinery, usually in order to buy something vital to us that our neighbor could spare, at a fat price. (We should certainly be fools to discount the possibility of exactly the same situation again.)

The point of remembering the war days and high prices is that we should have learned something from the experience. There are plenty of farm machinery companies, lots of fertilizer people, and chemical companies galore—all serving the farmer. Such competition ought to make for lower prices. But how many of us think the prices are as reasonable as they should be? Actually now with everything he needs available from many sources, the farmer, like the housewife, is finding the war preparations are gobbling up these needs. America has done it before. "Make do what is on hand."

AUGUST hath 31 days.

[1951

Doe in the street, at noon!
Wildness . . . and strangeness!
And the citizens startled,
And urchins running, with sticks,
And the warden, grim, with his gun . . .
And the doe gone!
And the street, common again;
The citizens busy, the urchins nowhere,
Nor the warden . . .
Only noon, and dullness.

Up to a certain point system on a farm is feasible, important, and quite simple:—all machinery kept in place regular feeding and milking times, daily sweep-up with the barn broom, and so on. Such things are so on any good farm and are taken for granted. But beyond that there can be stretches of farm life where any system may break down. For farming can be the most chaotic, unpredictable, perverse, heart-breaking business in the world.

Farmer Brown is toasting his feet in the oven of a bitter February afternoon—and, in his dreaming and planning, his fat acres are plowed, harrowed, seeded, crops matured and marketed, barns filled—all with the Utopian simplicity of an assembly line.

Farmer Brown is an old fool this afternoon, and he knows it. Get him out in the hay field next July turning some gray, weather-beaten hay that's been rained on three times already before he could get it in—or in the barn during the terrible and unforeseen spring cold wave just at lambing time—just take him about any time except to-day, and you'll find him wading knee deep in unsystematic trouble.

But he'll tell you he doesn't carry trouble with him: "Got a better use for my arms and back." And if things look really bad: "It didn't turn out just as I expected, and I didn't expect it would."

The meadow, gay with flowers, like music gay,
 The wild notes blossoming for the steps of dancers,
 Is drunk with sun and with dark, nether liquors.
 I keep my decorous feet to the sober road;
 The meadow's not for gaberdine and oxfords
 And a tweed jacket—and incipient baldness.
 I hurry on to cocktails, where the hostess
 May know a trick of mixing this and that
 To point the ears, again, and slant the eyes.

My dear "aunt" (by courtesy in the good old New England way) used to have a saying that I have oft repeated to myself—"There is nothing nicer than a little bit of money." I think she was smug about it and really kept her coins and small bills behind the clock or in the cupboard. But then this is but a memory and, financially speaking, I don't know how she "cut up" when she died. I wasn't in on that.

Be that as it may, dear "auntie" was right. What could be nicer than a little bit of money? What *could* be? The funny part of it is that few of us know much about this now. Where would we get that "little bit of money" nowadays to put behind the clock or the television? Mostly we wait till we're overdrawn at the bank and then borrow on the life insurance or go to the finance corporation. What's left for the clock or the television?

But we are philosophers here on the farm. If we are lucky we are carried by the bank till the crop comes in; the fertilizer people will wait us out; the spray and dust people will stay with us until—; and the fellows who supply us with packs and boxes and have agreed to buy our crop: all are as patient as cats at a mouse hole—till the crop comes in.

"Auntie" you were so right about "a little bit of money." But *where* did you find it?

The singer, being such
As loves the naming word,
The singing name of things
That's nearly sight and touch,
Now, naked and absurd,
Sits in his lack, and sings.

Sometimes this month is called "Octembuary"—and it is not entirely a facetious name—for it is a month of startling changes that can leap from Indian summer days into mid winter and combines, indeed, the qualities of four months. The fine old Currier and Ives print—"Home For Thanksgiving"—is a snow scene crisp and blue and white—the old homestead, the sleigh and frosty horse bringing back the son and daughter-in-law and the petticoated youngster.

But November at its best on the farm is made up of those days when the frost is not yet in the ground and the farmer may still be at constructive ground work. Certainly not too late for "stone" work—building of walls or the removing of them—and an ideal time for the use of bulldozers in removing walls and brush around the orchards. Get out what manure you can.

Though spring is generally considered the best time for transplanting of trees and shrubs, it may well be done now if the condition of the ground is suitable.

Begin to get ready for the winter's lumbering, if you plan to do any. Look to your barns and henhouse that all is ship-shape and weather-tight. There will always be something left undone in the orchard—apple drops to pick up and stray boxes and maybe a ladder or two that have been overlooked. Sharpen up the axes and saws and get ready for the woodlot.

It is the sick oyster which produces the pearl.

DECEMBER hath 31 days.

[1951

The wind's
Northeast,
Sharp-toothed
—A beast!

On wind
Come near,
And starved,
—And here

May this,
In lack
Like his,
Bite back!

May this
Lean verse
Be sharp,
—A curse

To bark
And whine
For bones
—And mine!

Christmas can, of course, be as happy in a hotel room, city mansion, or tenement, on sea or land anywhere, as here with us in these frozen hills. But we who have always known country Christmases couldn't find it so. Just take the matter of the Christmas tree. Christmas wouldn't be the same if we had to walk a city pavement and buy a tree at the corner store. To us, getting our own tree on our land is a mighty pleasant business. In truth it's a business that usually starts with us sometime in the summer when we spot our tree "for next Christmas," while we are out picking blueberries.

And as for Christmas wreaths. We make them here in the house and put them on the same frames year after year. What more Christmasy smell (unless it be plum pudding) than in the making of those wreaths — when the whole house is redolent with the clean tang of spruce and balsam? And it almost seems as if the ground pine and the red berries gave forth their own faint earthy aromas, too.

One of my neighbors leaves her Christmas wreath on the door till almost town meeting. She says it makes Christmas last longer. All of us would be sorry if she took it down a mite sooner than that—for we too feel that it keeps Christmas in our hearts all winter.

Merry Christmas, good friends all. Do your chores and have a Happy New Year.

OUTDOOR PLANTING TABLE

Find the latitude of your town or city. Interpolate between columns below to find your planting date. For example, if you live in Grove City, Pa. (Lat. 41°09'35") this would mean the latitude was about halfway between Boston-Phila. So your planting times would also be halfway between. N.B. Plant one week later for every 500 ft. elevation above sea level.

The "Moon Most Favorable" columns give the superstitious times when the phase of moon is "Right" for the crop indicated.

CROP	42°21'44" Boston Latitude		39°56'58" Phila. Latitude		33°45'10" Atlanta Latitude

"ABSORBINE

kept my horse at work"

SAYS MARTIN PAUL

of Pewee Valley, Kentucky

"I thought my horse would be laid up for a week with shoulder gall 'til I tried Absorbine. It helped give relief in a few hours. I'd recommend Absorbine to any farmer like myself."

AND NORWOOD ANDREWS of Moorestown, N. J., says:

"I can't afford to have my horse laid up.

"Whenever I see any signs of lameness on my horses, I use Absorbine for relief. I'm sure it saved me many working hours in the past ten years."

Yes, there's nothing like Absorbine for lameness due to shoulder gall, strains, puffs, bruises. Absorbine is not a "cure-all," but a time-proved help in relieving fresh bog spavin, windgall, collar gall, and congestive troubles.

A stand-by for over 50 years, it's used by many leading veterinarians. Will not blister or remove hair. Only \$2.50 a long-lasting bottle at all druggists.

FOR FORTY DAYS AND NIGHTS . . .

Psychologists agree that in thoughts, as well as actions, we earth people of 1951 are motivated to a large degree (perhaps 70%) by the past. The palsy, for example, is seen as the continuous exercise we once undertook as fishes to keep ourselves afloat. In thought, not the least tenacious and frequent outcropping of legend is seen in our arbitrary acceptance of "forty days" for Lent, the rainy or dry period after St. Swithin's Day, et al.

Upon occasion, the Aztecs—as well as most ancient and honorable civilizations—divided the year into forty day cycles. Hesiod, in the 8th century B.C., proclaimed the disappearance of the Pleiades for forty days and nights as the law of all mankind. There are too many Biblical and other historical references to this forty day period for us, just because we can not explain these, to dismiss them as old wives tales.

In our estimate an observer at about 42 degrees North or South Latitude might easily conclude the forty day cycle as one which makes excellent weather forecasting sense. It has, apparently, a definite relation to the obliquity of the sun's rays upon the earth and to the temperatures of the earth's atmosphere—the chief cause of weather.

At the Equator, stable temperatures produce even weather. The winds come steadily from given directions. The rainy season is predicted successfully almost to the minute.

We, at forty-two degrees North could forecast our weather accurately, too, could we determine our normal atmospheric temperatures for any given obliquity of the sun's rays. The accumulated excess or deficiency heat and cold figures from the normal would go far to determine what might be expected in the way of a balancing weather operation by Mother Nature.

The principle is simple and well understood. Precipitation, storms, weather extremes, are Nature's way of maintaining temperature balances. As the Sun leaves us in the Fall, the cooling of our atmosphere brings on bad weather. As it returns to us in the Spring, the warming process does likewise. The apparent "Lag"—or period of adjustment, which is allowed to our atmosphere for catching up with the Sun seems to be approximately forty days.

Our observer, then on the fortieth parallel might arrive at certain definite weather conclusions:

1. That severe "surprise" weather extremes, such as hurricanes and blizzards, are to be looked for only in two of nine seasons.
2. That the forty day legend at Groundhog Day (Feb. 2), at St. Swithin's Day (July 15), at Christmas, and at St. Paul's Day (Jan. 25th) are based on the fact that seasons actually do begin very close to those particular days.
3. That the ancients—as well as ourselves—have some basis in fact for our belief in forty day cycles.
4. That there is some reason to believe that weather can be foretold in the equation between atmospheric temperatures and the obliquity of the sun's rays.
5. That actual weather records along the fortieth parallel actually prove nine seasons a far more accurate measure of weather than do the present zodiacal four seasons which in most places are no measure at all.

A tabulation which an observer might make of the nine seasons along the fortieth parallel—and certain weather extremes which have occurred within these seasons—follows. North or South of the fortieth parallel one would expect these seasons to be fewer in number and of different lengths.

THE NINE SEASONS

1. SPRING. May 1 to June 10.
2. EARLY SUMMER. June 11 to July 15.
3. SUMMER. July 15 to September 1. (Heat and storm records occasional.)
4. EARLY FALL. September 2 to October 15. Sept. 8 to 16, 1944. Great Atlantic Hurricane, Sept. 17 to 21, 1938. New England Hurricane, 1815. New England Hurricane.
5. FALL. October 16 to November 20.
6. EARLY WINTER. November 21 to December 25.
7. WINTER. December 26 to February 1. (Cold and snow records occasional.)

OCCULTATIONS, 1951

There will be three occultations visible to naked eye observers during 1951, although only one of them, that of Regulus (P Leonis) on June 11, occurs under truly favorable circumstances for a selected group of observers. The other two will test the observer's power in one or another respect.

The occultation of Regulus on June 11 will begin at approximately 8.20 P.M. E.S.T. for observers in the Eastern Standard Time belt; the exact time will depend upon the observer's geographical location. Observers along the Atlantic coast will find observation aided by a darker post-sunset sky than observers further west.

A second occultation of Regulus, this time by the bright limb of the moon and hence less easy to observe with the naked eye, will be visible to most observers in the Central Standard, Mountain Standard and Pacific Standard Time zones on October 25. The occultation will begin shortly after 5.30 P.M. C.S.T., 4.30 P.M. M.S.T. and 3.30 P.M. P.S.T., the exact moment depending upon the observer's location.

An occultation of the Planet Venus will test naked eye observers west of the Eastern Standard Time belt. For them this occultation on February 7 will begin before the sun sets and while Venus and the Moon are not far distant from the sun in the sky. For such observers the occultation will begin some time after 3.45 P.M. C.S.T., 2.45 P.M. M.S.T. and 1.45 P.M. P.S.T. Observers in the northeastern part of the United States will have better luck. For them the occultation begins at approximately 6 P.M. E.S.T., just a few moments before the planet sets and approximately one hour after sunset.

EARTH IN PERIHELION AND APHELION, 1951

The Earth will be in Perihelion on January 1, 11 P.M., distant from the Sun 91,345,000 miles. The Earth will be in Aphelion on July 4, 4 P.M., distant from the Sun 94,456,000 miles.

THE NINE SEASONS (Continued from page 38)

8. LATE WINTER. February 2 to March 15. Feb. 9, 1934. Boston low record — 18 deg. (Also Feb. 15, 1817). 1933. U.S. Record low at Yellowstone Park, Wyoming, of 66 below. Feb. 16, 1933. Turners Falls, Massachusetts record low of 30 below. Feb. 24, 1723. Highest tide Boston ever had. Mar. 3, 1907. Nantucket icebound. Mar. 11, 1888. Famous blizzard began with 20.9 inches of snow.
9. FALSE SPRING. March 16 to April 30.

¹Applies to nonresidents. The term "reciprocal" means that the state will extend to a nonresident the identical privileges granted by his home state to nonresident motorists. In some states visitors must register within a specified time. In most states persons who intend to reside permanently must buy new plates and secure new driving license at once, or within a limited period. Acquisition of employment or placing children in public school is often considered intention to reside permanently.

²None on used cars.

³Until expiration of home registration.

⁴Three months before current registration expires.

⁵Use tax on new cars, first registration of used cars.

⁶Bill of sale must be filed.

⁷Permit showing compliance with state compulsory liability insurance law must be obtained after 30 days.

⁸State has compulsory insurance.

⁹\$15 maximum.

¹⁰Registry tax on first registration in state.

¹¹South Dakota does not require. All other states do.

¹²*Only states not requiring examinations for drivers licenses are Idaho, Missouri, and N. Dakota.

From Maine to Florida

farmers depend on

Amoco-Gas

the original special
motor fuel

Permalube Motor Oil

it cleans as it lubricates

Amoco "H. D." Oil

for farm trucks and tractors

Amoco All-Purpose Grease

extra-tough for
lasting protection

Amoco Tires

for Car and Tractor
the tires experience built

*A great name
on the farm*

AMERICAN OIL COMPANY

DIGEST OF LATEST AVAILABLE FISH AND GAME LAWS

Open seasons include both dates, "Rabbit" includes "hare"; "quail" includes "partridge" in South; "grouse" includes Canada grouse, sharptailed, ruffed (known as partridge in North and pheasant in South) and other members of family except prairie chickens ptarmigan and sage hen. As many states do not complete laws for 1951 until after our press date, VERIFY in every case for changes even though the changes from year to year are not as a rule sensational. Limits are daily except those in italics which are seasonal.

♂ males only. † local exceptions. ‡ non-resident exceptions. # Pounds.

MIGRATORY BIRD LAWS

DO NOT HUNT ducks, geese, brant, coot, rails, gallinules, woodcock, or mourning dove until you have studied the laws on these birds issued in September, 1951, by the Fish and Wildlife Service, U. S. Dept. of Interior, Chicago 50, Illinois. The 1949 laws forbade the taking of any jacksnipe, Ross geese, or swan, and in some places, wood ducks, brant, snow geese, mourning dove, woodcock, and Canada geese. Daily bag limits have been running: Geese — East 2, Middle 4, Pacific 6; Ducks — East and near East 4, Midwest and West 5; Wood duck 1; Rails 15; Coot 10 interior, 15 coast, east and west; Woodcock 4; Mergansers 25; Doves and pigeons 10 and Sora, 25. The East has been enjoying special seasons on Scoters and Eider ducks — the West on bandtailed pigeon. Arizona has had a special season on white winged dove. There is no point in trying to list here the very complicated seasons on ducks, geese, etc. They are changed radically every year and as a rule shortened. Opening days in 1949, were:

Ducks, Geese, Brant, Coot: Oct. 7: — Me., Mich., Minn., Mont., N. H., N. D., Wyo. Oct. 14 — Col., Ida., Nev., N. M., Utah, Wisc. Oct. 21 — All remaining states except †Nov. 4 — Conn., Ill., Ind., Mo., Tex., Wash. Nov. 18 — Ariz., Ark., La., Md., Mass., N. J., Tenn. Nov. 29 — Ala., Fla., Ga., Ky., N. C., R. I., S. C., Va.

Rails, Gallinules: Sept. 1 — Most states. Sept. 16 — Minn. Oct. 1 — Fla., Ga., N. C., S. C. Oct. 7 — Me., Mich., Oct. 14 — Wisc. Oct. 15 — Miss. Oct. 21 — N. Y. Nov. 29 — Ala., R. I.

Mourning Dove: Sept. 1 — Most states. Sept. 10 — Neb. Sept. 16 — Ark., Ga., Miss., N. C., S. C., Tenn., Va. Oct. 1 — Texas. Nov. 1 — Del. Dec. 1 — La. Dec. 17 — Ala., Fla.

Woodcock: Oct. 1 — Me., Minn., N. H., Vt., Wisc. Oct. 8 — Ohio. Oct. 10 — N. Y., Pa. Oct. 15 — Md. Oct. 20 — Conn., Mich., N. J. Nov. 1 — R. I. Nov. 10 — Mo. Nov. 15 — Del., Mass. Nov. 19 — Va. Dec. 1 — Ala., Ark., Miss. Dec. 12 — N. C. Dec. 23 — Ga., La.

As much a part of
New England as the
Old Farmer's Almanac.

First National Stores, now serving
more than 500 communities from Maine to New
York, are as much a part of the New England scene as
the Old Farmer's Almanac itself. For First
National Stores are founded on the
time-honored New England traditions of
thrift and fine food.

FIRST NATIONAL STORES

ANECDOTES AND PLEASANTRIES

THE TIN PEDDLER

Jason White has come ter town
 Drivin' his tin peddler's cart,
 Pans a-hangin' up and down
 Like they'd tear themselves
 apart;
 Kittles rattlin' underneath,
 Coal-hods scrapin' out a song,
 Makes a feller grit his teeth
 When old Jason comes along.

Jason drives a sorrel mare,
 Bones and skin at all her j'int's.
 "Blooded stock," says Jase: "I
 swear

Jest see how she shows her
 p'int's!"
 "Walkin's her best lay," says he,
 Eyes a-twinklin' full of fun,
 Named her Keely Motor. Sec?
 Sich hard work to make her
 run."

Jason's just the slickest scamp.
 Full of jokes as he can hold;
 Say's he beats Aladdin's lamp,
 Givin' out new stuff for old:
 "Buy yer rags fer more than
 they're worth.

Give yer bran-new shiny tin,
 I'm the softest man on earth,"
 Says old Jason with a grin.

Jason gits the women's ear
 Tellin' news and talkin' dress:
 Can't be peddlin' forty year
 And not know 'em more or less:
 Children like; sakes alive!
 Why, my Jim, the other night
 Says "When I get big I'll drive
 Peddler's cart like Jason
 White."

From *Cape Cod Ballads*
 by Joseph C. Lincoln

HE KNEW HIS FATHER

"Now, Johnnie," said his
 teacher, "If your father borrowed
 \$100 and promises to pay \$10 a
 week, how much will he owe in
 seven weeks?"

"One hundred dollars," said
 Johnnie.

"I'm afraid you don't know
 your lesson very well," remarked
 the teacher.

"I may not know my lesson,"
 said Johnnie, "but I kuow my
 father."

IT DEPENDS

A philosopher beung asked
 whether life is worth living,
 answered, "That depends on the
 liver."

THE TRAVELER'S PUZZLE

This is an old story, and it
 may amuse our readers to exer-

cise their wits over it. A mau
 was once traveling with a wolf, a
 goat, and a cabbage. He was
 obliged to cross a river in a boat
 so small that he could only take
 one thing at a time, either the
 cabbage, the goat, or the wolf,
 but not two of them together. He
 was somewhat puzzled how to
 manage. If he took the wolf, the
 goat would eat the cabbage while
 he was gone; if he should take
 the cabbage, the wolf would kill
 the goat; if, finally, he should
 take the goat first, the wolf left
 behind would not eat the cab-
 bage, it is true, but what could
 he take over on the second pas-
 sage? Not the wolf, because he
 could not leave him with the goat
 while he went back for the cab-
 bage; not the cabbage for he
 could not leave that with the
 goat while he was gone to get
 the wolf. Finally he hit upon a
 way to do it and did it success-
 fully. How did he do it?

SPEAKING OF PUNS

Some years ago Harvard had
 on its football team two famous
 players in the backfield — Charlie
 Devens and Eddie Mays. During
 the progress of one game the
 following conversation between
 two drunks was overheard.

"Whuzzat carried the ball?"

"Devens."

"Wrong — that was Mays."

"Oh what Devens does it
 Mays?"

YOU THREE

If your nose is close
 To the grindstone rough,
 And you hold it down
 There long enough,
 In time you'll say
 There's no such thing
 As brooks that babble
 And birds that sing.
 Those three will all
 Your world compose;
 Just you, the stone,
 And your darned old nose.

HOW LONG, OH LORD?

A young business man, a dea-
 con in his local church, was go-
 ing to New York on business,
 and while there was to purchase
 a new sign to be hung in front
 of the church.

He copied the motto and di-
 mensions, but, when he got to
 New York, discovered he had
 left the paper behind. Whereupon

FAVORITE BANANA RECIPES

FROM PRIZE WINNING
NEW ENGLAND COOKS

presented by

Chiquita Banana

New England has long been famous for its fine food ... its good cooks. Now some of those cooks have selected their favorite banana recipes for you.

In presenting these **R**ecipes
Chiquita **B**anana hopes **Y**ou
will **E**njoy reading about the
New **E**ngland **C**ooks who
selected them . . . and that **Y**ou
will **T**ry their **F**avorite
Banana **R**ecipes.

These cooks were selected by a staff member of Yankee Magazine who traveled more than 1200 miles in search of New England's fine cooks. He found them by asking local people such as the postmaster, garage man or the local storekeeper for the name of the town's best cook. After obtaining the name of the cook, he set out to interview her. Some lived as far as ten miles from the center of town. Nothing daunted, he found and photographed these prize winning cooks.

NEW BANANA COOKBOOK FREE. For copies of a beautifully illustrated cookbook (one of the few in which all pictures are in full color) try any one of the recipes on the following pages. Tell us on a post-card or in letter how you liked the recipe, and we will send you your free copy of this wonderful new cookbook.

UNITED FRUIT COMPANY
PIER 3, NORTH RIVER, NEW YORK 6, N. Y.

MRS. MARTIN ROZEN, Newport, Rhode Island, is one of the city's well-known cooks. She serves as general chairman of many of the Masonic and Eastern Star suppers and banquets.

MRS. ROZEN'S FAVORITE BANANA RECIPE IS

Banana Bran Nut Bread

- | | |
|--|----------------------------|
| 1 egg, well-beaten | 1½ cups sifted flour |
| 1½ cups mashed ripe bananas*
(4 to 5 bananas) | 2½ teaspoons baking powder |
| ¼ cup melted shortening | ½ teaspoon baking soda |
| 1 cup bran, shredded or flaked | ½ teaspoon salt |
| ½ cup chopped nuts | ½ cup sugar |

**Use fully ripe or all-yellow bananas*

Combine egg, bananas, shortening and bran in mixing bowl. Sift together flour, baking powder, soda, salt and sugar. Add nuts and mix well. Add to banana mixture, mixing only enough to dampen all flour. Turn into a well-greased bread pan (8½ x 4½ x 3 inches) and bake in moderate oven (350°F.) about 1 hour 10 minutes, or until bread is done. Makes 1 loaf.

MRS. ADAMS' FAVORITE
BANANA RECIPE IS

Banana Drop Cookies

- 2¼ cups sifted flour
- 1 cup sugar
- 2 teaspoons baking powder
- ¼ teaspoon baking soda
- ¾ teaspoon salt
- ⅔ cup shortening
- 2 eggs, unbeaten
- 1 cup mashed ripe bananas*
(2 to 3 bananas)
- 1 teaspoon vanilla
- ¼ teaspoon cinnamon
- 1 tablespoon sugar

**Use fully ripe bananas . . . yellow peel flecked with brown*

Sift together flour, sugar, baking powder, soda and salt into mixing bowl. Cut in shortening. Add eggs, bananas and vanilla and beat until thoroughly blended. Drop by teaspoonfuls, about 1½ inches apart, onto ungreased cookie pans. Sprinkle with a mixture of cinnamon and 1 tablespoon sugar. Bake in a moderately hot oven (400°F.) about 12 minutes, or until cookies are done. Remove baked cookies from pan immediately.

Makes about 3 dozen medium-sized cookies.

MRS. RALPH ADAMS, Chester, Vermont, worked her way through Green Mountain Junior College by helping in the kitchen. Her cooking ability has many calls made on it now, since she is the mother of five children and the cook at the Hilton House, Chester, Vermont.

MRS. SARAH F. TOLMAN, Chesham, N. H., has managed her own boarding house for almost fifty years. During that period a great many fortunate guests have enjoyed her good old-fashioned cooking.

MRS. TOLMAN'S FAVORITE BANANA RECIPE IS

Banana Meat Loaf

- | | |
|-----------------------------------|-----------------------------------|
| 1 pound ground raw beef | 1 cup soft bread crumbs |
| 1 tablespoon chopped onion | ¾ cup mashed firm bananas* |
| 2 teaspoons salt | (1 to 2 bananas) |
| ¼ teaspoon pepper | ½ teaspoon dry mustard |

**Use all-yellow or slightly green-tipped bananas*

Mix together meat, onion, salt, pepper and crumbs in mixing bowl. Combine bananas and mustard. Add to meat mixture and mix well. Form mixture into a loaf and place into a well-greased baking dish (8½ x 4½ x 3 inches). Bake in a moderate oven (350°F.) about 1 hour, or until loaf is done. Four to six servings.

MRS. HARLEY PARKER, Rockport, Mass., was born in Norway and came to this country in 1912. One of her specialties is Norwegian Coffee Bread.

**MRS. PARKER'S FAVORITE
BANANA RECIPE IS**

Banana Spice Layer Cake

(1-Bowl Method)

Before Mixing: Have shortening at room temperature. Grease pans. Set oven at correct temperature (375°F.).

- 2¼ cups sifted cake flour
- 1¼ cups sugar
- 2½ teaspoons baking powder
- ½ teaspoon baking soda
- ½ teaspoon salt
- ⅛ teaspoon ground cloves
- 1¼ teaspoons cinnamon
- ½ teaspoon nutmeg
- ½ cup shortening
- 1½ cups mashed ripe bananas*
(4 to 5 bananas)
- 2 eggs, unbeaten
- 1 teaspoon vanilla

**Use fully ripe bananas . . .
yellow peel flecked with brown*

Sift together flour, sugar, baking powder, soda, salt and spices into large mixing bowl. Add shortening, ½ cup of the bananas and eggs. Beat 2 minutes at slow to medium speed with electric mixer or 2 minutes by hand. Scrape down bowl and beater or spoon frequently during mixing. Add remaining 1 cup bananas and vanilla. Beat 1 minute longer. Turn into 2 well-greased, 8-inch layer cake pans. Bake in a moderate oven (375°F.) about 25 minutes, or until layers are done. Frost with your favorite frosting. Makes 1 cake.

MRS. LONG'S FAVORITE BANANA RECIPE IS

Banana Cream Pie

½ cup sugar	2 egg yolks, slightly beaten
5 tablespoons flour	1 tablespoon butter or margarine
¼ teaspoon salt	½ teaspoon vanilla
2 cups milk	1 baked 9-inch pie shell
3 ripe bananas*	

**Use fully ripe bananas . . . yellow peel flecked with brown*

Combine sugar, flour and salt in top of double boiler. Add milk slowly, mixing thoroughly. Cook over rapidly boiling water until well-thickened, stirring constantly. Cook 10 minutes longer, stirring occasionally. Stir small amount of hot mixture into egg yolks; then pour back into remaining hot mixture while beating vigorously. Cook 1 minute longer. Remove from heat and add butter or margarine and vanilla. Cool thoroughly. Cover bottom of pie shell with small amount of cooled filling. Peel bananas and slice into pie shell. Cover immediately with remaining filling. Top with meringue or sweetened whipped cream, if desired. Makes 1 pie.

MRS. MADELINE LONG, Caribou, Maine, is well known as a professional cook. For years she operated a restaurant. Now she serves delicious dinners to private parties and to large groups.

MRS. ASH'S FAVORITE
BANANA RECIPE IS

Banana Grapefruit Whirl Salad

1 ripe banana*

Salad greens

12 grapefruit segments
(about 1 grapefruit)

**Use fully ripe banana . . .
yellow peel flecked with brown*

MRS. ELIZABETH ASH lives at picturesque Loring's Shanty' in Wickford, Rhode Island. Not only is she an excellent cook, but she enjoys cooking. She often prepares suppers for large church groups.

Peel banana and cut lengthwise into halves. Place one half, cut side up, in center of each of 2 salad plates. Arrange grapefruit segments in fan shape in front and back of banana halves. Garnish with crisp salad greens. Serve with French dressing. Two servings.

MRS. PETER CRAWFORD, Marlboro, Conn., is the local 4-H leader. Her daughter, Helen Abigail, is a senior in high school and last year won the state 4-H foods preparation contest.

THE CRAWFORDS' FAVORITE BANANA RECIPE IS

Banana Tea Muffins

- | | |
|--|--|
| 1 $\frac{3}{4}$ cups sifted cake flour | 1 egg, well-beaten |
| 2 teaspoons baking powder | $\frac{1}{3}$ cup melted shortening or salad oil |
| $\frac{1}{4}$ teaspoon baking soda | 1 cup mashed ripe bananas* |
| $\frac{3}{4}$ teaspoon salt | (2 to 3 bananas) |
| $\frac{1}{3}$ cup sugar | |

**Use fully ripe bananas . . . yellow peel flecked with brown*

Sift together flour, baking powder, soda, salt and sugar into mixing bowl. Mix together egg, shortening and bananas. Add to dry ingredients, mixing only enough to dampen all flour. Turn into well-greased small muffin pans and bake in a moderately hot oven (400° F.) about 20 minutes, or until muffins are done. Serve hot or cold. Makes 16 small muffins.

MRS. IDA M. CALDER, Marblehead, Mass., has been cooking for more than fifty-five years. For years she has cooked for boarders. At one time her boarders numbered twenty-two.

**MRS. CALDER'S FAVORITE
BANANA RECIPE IS**

Banana Fritters

Melted fat or salad oil
2 to 3 firm bananas*
¼ cup flour
Fritter Batter

**Use all-yellow bananas*

To deep-fry, have deep kettle $\frac{1}{2}$ to $\frac{3}{8}$ full of melted fat or oil. To shallow-fry, have $1\frac{1}{2}$ to 2 inches of melted fat or oil in frying pan. Heat fat to 375°F., or until a 1-inch cube of bread will brown in about 40 seconds. Peel bananas and cut each crosswise into 3 or 4 diagonal pieces. Roll in flour. Dip into Fritter Batter, completely coating the banana pieces with the batter. Deep-fry or shallow-fry in the hot fat about 6 minutes, or until well browned. Turn fritters frequently to brown evenly. Drain on a rack. Serve hot with the main course . . . or serve as a dessert with a hot fruit sauce, syrup or sweetened whipped cream. Makes 6 to 12 fritters.

Fritter Batter

1 cup sifted flour	¼ cup sugar
2 teaspoons baking powder	1 egg, well-beaten
1¼ teaspoons salt	⅓ cup milk
2 teaspoons melted shortening	

Sift together flour, baking powder, salt and sugar into mixing bowl. Combine egg, milk and shortening. Add to dry ingredients and mix until batter is smooth.

Important: Have fat at correct temperature (375°F.) before frying. This is a stiff batter, and it makes a crisp fritter which will stay crisp for 15 to 20 minutes. This batter should not be "thinned down."

MRS. JOHN HUNTER, Newington, Conn., teaches English in the Hartford Branch of the University of Conn., while her husband teaches English in Teachers' College, New Britain, Conn. Mrs. Hunter is well known for the many southern dishes that she cooks.

MRS. HUNTER'S FAVORITE BANANA RECIPE IS

Banana Pineapple Salad

- 1 ripe banana***
- 2 slices canned pineapple**
- Salad greens**
- Berries or cherries**

**Use fully ripe banana . . . yellow peel flecked with brown*

Peel banana and arrange a ring of pineapple around each end. Place in the center of the salad plate. Garnish with crisp salad greens, and berries or cherries, if desired. Serve with a sweet or tart dressing. One large salad.

GEORGE WOOL and his son, Martin, of Exeter, New Hampshire, enjoy out-of-door cooking as a hobby. Together they have prepared many a supper over their open-air fireplace.

THE WOOLS' FAVORITE BANANA RECIPE IS

Ham Banana Rolls with Cheese Sauce

4 thin slices boiled ham
Prepared mustard
4 firm bananas*

1½ tablespoons melted butter
or margarine
Cheese Sauce

**Use all-yellow or slightly green-tipped bananas*

Spread each slice of ham lightly with mustard. Peel bananas. Wrap a slice of the prepared ham around each banana. Brush tips of bananas with butter or margarine. Place Ham Banana Rolls into a greased shallow baking dish, and pour Cheese Sauce over them. Bake in a moderate oven (350°F.) 30 minutes, or until bananas are tender . . . easily pierced with a fork. Serve hot with the Cheese Sauce from the baking dish. Four servings.

Cheese Sauce

1½ tablespoons butter or margarine ¾ cup milk
1½ tablespoons flour

1½ cups grated sharp American
cheese

Melt butter or margarine in saucepan; add flour and stir until smooth. Stir in milk slowly. Add cheese and cook, stirring constantly until sauce is smooth and thickened. Makes about 1 cup sauce.

MRS. JAMES C. ROBERTSON, Belfast, Maine, has earned her enviable reputation as an excellent cook by serving on many committees for church suppers.

MRS. ROBERTSON'S FAVORITE BANANA RECIPE IS

Banana Pear Star Salad

1 ripe banana*

4 pear halves, fresh or canned

Cottage cheese

Parsley

Pimiento

**Use fully ripe banana . . . yellow peel flecked with brown*

Peel banana and divide into quarters by cutting once lengthwise and once crosswise. Arrange banana quarters, points out and cut sides down, on a salad plate so that they radiate from the center and divide the plate into four equal sections. Place a pear half in each section between banana quarters, alternating cut side up and cut side down, stem ends toward the center of the plate. Place cottage cheese in center of salad plate. Surround cottage cheese with a ring of parsley and garnish with pimiento. Serve with a tart or sweet salad dressing. One serving.

MRS. CARR'S FAVORITE
BANANA RECIPE IS

*Banana
Apple Betty*

- 2 tart apples,
pared and cored
- 3 firm bananas*, peeled
- $\frac{3}{4}$ cup sugar
- $\frac{1}{2}$ teaspoon cinnamon
- $\frac{1}{4}$ teaspoon salt
- 2 cups soft bread crumbs
- 3 tablespoons melted
butter or margarine

MRS. CHARLES CARR lives in Jamestown, Rhode Island, during the summer months, and during the winter in Sarasota, Florida, where her husband operates a hotel. In raising a family of five children, Mrs. Carr has had a great deal of experience as a cook.

**Use all-yellow bananas*

Slice apples and cut bananas crosswise into $\frac{1}{2}$ -inch pieces. Combine fruit, sugar, cinnamon and salt. Mix bread crumbs with butter or margarine. Place alternate layers of crumbs and fruit into a well-buttered baking dish, using crumbs for top and bottom layers. Cover baking dish and bake in a moderate oven (375°F.) about 40 minutes, or until apples are tender. Uncover. Continue baking 5 minutes longer or until crumbs are browned. Serve hot with cream or fruit sauce. Four to six servings.

HERBERT WHITNEY, Rockport, Mass., is a Navy veteran. During the winter months he cooks in a Boston hotel. In the photograph above, he is shown at his summer job, broiling over The Forge at the Blacksmith Shop Restaurant, Rockport.

MR. WHITNEY'S FAVORITE BANANA RECIPE IS

Glazed Bananas

4 firm bananas*
Lemon juice

Sugar
Butter or margarine

**Use all-yellow or slightly green-tipped bananas*

Peel bananas. Brush well with lemon juice. Roll in sugar. Fry bananas slowly in butter until brown and tender . . . easily pierced with a fork . . . turning them to brown evenly. Serve hot as a vegetable. Four servings.

MISS EDITH J. HODGDON, Northfield, Vermont, has been actively engaged in the food field since 1926. Among famous eating places where she has worked is Salmagundi's in Boston. At present she operates the Little House and Pantry in Northfield.

MISS HODGDON'S FAVORITE BANANA RECIPE IS

Banana Tea Bread

1 $\frac{3}{4}$ cups sifted flour

2 teaspoons baking powder

$\frac{1}{4}$ teaspoon baking soda

$\frac{1}{2}$ teaspoon salt

$\frac{1}{3}$ cup shortening

$\frac{2}{3}$ cup sugar

2 eggs, well-beaten

1 cup mashed, ripe bananas*
(2 to 3 bananas)

**Use either fully ripe or all-yellow bananas*

Sift together flour, baking powder, soda and salt. Beat shortening until creamy in mixing bowl. Add sugar gradually and continue beating until light and fluffy. Add eggs and beat well. Add flour mixture alternately with bananas, a small amount at a time, beating after each addition until smooth. Turn into a well-greased bread pan (8 $\frac{1}{2}$ x 4 $\frac{1}{2}$ x 3 inches) and bake in a moderate oven (350°F.) about 1 hour 10 minutes, or until bread is done. Makes 1 loaf.

Printed in USA, 1950

Continued from page 48

he wired his wife: "Send motto and dimensions."

An hour later a message came over the wire and the new lady clerk, who just came from lunch and who knew nothing of the previous message, read it and fainted.

The message said: "Unto us a child is born. 6 ft. long and 2 ft. wide."

PROBABLY THE ONLY PLACE

In the world where mail is delivered regularly on Sundays is on Manchester Street, up in Manchester, Vt. Here's the story behind it. Abraham Lincoln for some summers stayed in Manchester at the Equinox Hotel, and when he was there his mail was delivered to him on Sundays, just as on week days.

Manchester Streeters continue the custom as a tribute to him.

Dr. Chauncey Depew's recipe for happiness is to keep in touch with the young: "Join in their games, be a partner in their dance, romp the fastest and turn the quickest in the Virginia reel or country dance; go up to the old college, and sit down, and light your pipe, and sing college songs: take the children to the theatre, and howl with them at the roaring farce, and laugh with them at the comedy, and cry with them at the tragedy: be a confidant in their love affairs, and if they are not equal to it, write their love letters, and never stop writing some for yourself."

Ralph Waldo Emerson once said that he hesitated before throwing away the smallest scrap of a newspaper before looking at both sides of it, "lest it should contain some thought or fact or verse worthy of preservation."

A correspondent of the *Springfield Republican* tells the following story of Hannibal Hamlin when a young man: He called a caucus to choose delegates to the Maine conventions, State, county, and congressional. Two persons came, Hannibal himself and John Smith. They elected a full list of delegates, but when it came to their credentials a difficulty arose. Hamlin was chairman of the caucus, and Smith secretary; but how was the gathering to be described? Hamlin said. "Mr.

Smith, write, 'At a large and respectable caucus, so-and-so were chosen delegates to the State convention,' and then put the names," "But, Squire Hamlin, can we call this caucus large and respectable,—only you and me?"—"Why not, Mr. Smith? You are large, and I am respectable; what's the difficulty?" And the credentials were so made out.

The New Pastor: Good morning, my dear child. Is your mamma at home?"

Willie: "Yes, sir, she's at home; but I'm afraid the consolations of religion will be thrown away on her to-day, sir."—"Dear me! And why so?"—"She's having trouble with her jell, sir."—*Cleveland Plain Dealer.*

A DELICATE FLUID

Housekeeper: "That milk you left yesterday was perfectly horrid. It tasted of garlic."

Milkman: "Milk is easily spoiled, Mum. Had you been cookin' garlic?"

"No, we haven't."

"Been keepin' garlic in th' milkpans, may be?"

"We never use it."

"Queer. May be some o' th' neighbors has been cookin' garlic."

"No, they haven't."

"Any visitors at your house yesterday?"

"Not even a caller, except my daughter's French teacher."

"H'm! Better drop French, Mum."—*New York Weekly.*

IN PASSING

The Excellence of Intentions is a distressingly poor cement for the Fragments of Failure.

If you are not too large for the place, you are too small for it.

A pound of pluck is worth a ton of luck.

FATHER'S ESSAY WRITING

Teacher—I am sorry to say it, Henry, but your composition is not worthy of you. The rhetoric is faulty, the logic weak, the statements are based upon misinformation, and the style is lamentably crude.

Henry—My! Won't my dad be mad when I tell him that?

Teacher—But you can tell him you did your very best.

Henry—Did my best nothing. Dad wrote the whole of it himself.

SCIENTISTS AT WORK

Courtesy (in part) U. S. Department of Agriculture

1. **"Feeding through the Leaves."** We had learned in our student days that leaves breathed and were a kind of manufacturing plant for the food sent up to them by the roots. But we didn't know that leaves ate. They do, as the use of soluble nitrates fed directly onto the leaves of any tree or shrub (though especially apple trees) by the customary spray machines has proved. The particular product we have in mind is "Nugreen," put out by DuPont, and consisting of highly soluble nitrogen pellets. Used as it may be with other spray materials, it apparently obviates the need of hand-spread or machine broadcast fertilizers.

The time and money saved by combining the spraying and fertilization operations is obvious. Best time for applications on apple trees would be just at the early pink, late pink, petal fall, and first cover stage—about ten days after the petal fall. Any variation of this schedule should probably not be put off later than the petal fall nor see a last application later than mid June.

Whether the use of so much concentrated nitrogen is what is needed solely year after year for orchardists is a debatable question. Certainly the use of "Nugreen" or any other high nitrate product would not preclude the use of mulch every year or the use of balanced fertilizers as well—or in odd years.

2. **"Seeding by Airplane on Ranges."** After forest and brush fires it is desirable to assure growth of a quick cover as soon as possible. In California, for example, the Forest Service has used planes to sow mustard over burned areas almost as soon as the ashes have cooled.

An experimental device that has given favorable results is the planting of "Pelleted" seeds. Seed is mixed with soil and the soil formed into small balls—like marbles or large shot. Each pellet is roughly a quarter of an inch in diameter and contains about half a dozen grass seeds. This method is so new that foresters have not yet had time to test it thoroughly or to make counts of the grasses that result from such seedings. But the pellets can be scattered fairly evenly by plane, and the small balls of earth break down to provide some covering for the seeds.

The use of seeding by plane is not efficient, or sufficient, unless the fire has left enough ash, as in heavy timber or brush fires, to assure some coverage of the seeds. Grass fires practically denude the soil of cover, and in these cases the familiar ground methods of seeding still are the more successful.

3. **"The Orange Situation."** Up to 20 years ago orange crops had ranged below 1,200,000 tons a year. Recent crops have been about four times that quantity. Consumption of the fresh fruit has more than doubled in the two decades, and now the consumption of the processed orange products has increased from a trifling supply to a quantity greater than the total crop of 20 years ago.

4. **"Topcrop — The Commercial Stringbean."** Topcrop is the winner of the 1950 Gold Medal among the All-America selections—and has proved its high quality for eating fresh, for canning, and for freezing—with a higher yield (nearly double) than the common varieties. From the commercial grower's point of view it is wonderful, because he will get the full yield of this great crop in two pickings. As Topcrop comes into bearing in 7 weeks, repeated plantings every ten days or two weeks are desirable.

5. **"Re-Use of City Water."** Wherever man has tapped natural reserves of water extensively, the water tables of our land have fallen. This is as true in the West as in the East. As true, in principle, for irrigation, as for the providing of great cities like New York or Los Angeles with their water. The subject is one for sermons—or volumes—or simple paragraphs. Or a sentence. **We can exhaust our natural water supplies.**

We can do these things to halt or offset overuse of water: distribute run-off water from mountain areas in the West to the plain areas where waters rush through—fan the waters out, or hold them back, to the end that they shall sink into the naturally thirsty soil

and so provide again the kind of water deposits that California has fast been draining dry with its artesian wells; return all water used (everywhere possible) to the ground water supply; hold within watershed potentials at all times the use of water for city and industrial purposes; spread the gospel that our land is the sponge from which we wring out water, be it by rivers, dams, artesian wells, or surface wells . . . and we can exhaust these.

6. **"The Old Chestnut Again."** The old New England Chestnut and the Old Farmer have faith in each other. The Old Farmer doesn't believe the chestnut trees of New England and the East are things of the past—the pure strain. The chestnut trees of our youth despite years of blight are not all dead yet (the stumps at least) — and there are new young shoots unblighted—some of them bearing chestnuts. These reports are from many authenticated sources in New England. Chinese chestnuts may be introduced in the southeast, and perhaps as far north as the New England States, and these, sweet and good-keepers, are apparently blight resistant. Speculatively, may they not be coming in just when our chestnuts are on their way back?

Chestnuts of the "old strain" may or may not be able to shake off the blight. Logically they should be able to—after all these years of dying—and now to spring anew and produce seedlings!

7. **"More Artificial Insemination."** At the beginning of the year more than 2,400,000 cows in more than 300,000 herds are enrolled for artificial insemination. The Bureau of Industry estimates that about 10 percent of all dairy cows in the United States will have been bred artificially in the past year.

The primary advantage of artificial insemination is, of course, from the much wider use of the very best sires. The artificial breeding association can afford to select sires of highest quality, such as the individual owner of a producing herd could not expect to use because there are not enough sires of superior quality to go around.

8. **"Pill For Lobsters."** Hitherto lobsters caught in Maine or anywhere else along the eastern seaboard might be transported to western markets only in barrels with ice and seaweed—with an average loss of 10 to 30 per cent of the lobster weight depending on the heat during shipment. Now Joseph R. MacDonald, executive of the Live Pak Foods Company of Boston, has devised a pill which will produce artificial salt water of just the kind that will keep eastern lobsters alive and full-weighted till they reach their furthest destination. Lobsters cannot live in Pacific water, polluted water or fresh water, and so Mr. MacDonald's pill—or "gunk" as he calls it—combines the particular saltiness of North Atlantic waters with other chemicals required for healthy lobsters—and a certain small amount of this added to any fresh water will turn it into a proper carrier medium for lobsters anywhere. Eventually tanks of water so treated placed strategically all over the country will allow eastern seaboard lobsters to "swim" across the continent.

9. **"Seeds from Canada."** The United States Department of Agriculture report on importations of agricultural seeds emphasizes the close relation of farming north and south of the Canadian border. For the fiscal year ending June 30, 1949, the three crops for which imports of seed were greatest were sweet clover, alfalfa and oats. Of the more than 20 million pounds of alfalfa seed, Canada supplied more than 19 million pounds with the greater part of the remaining coming from the Union of South Africa. Canada also supplied nearly all of the more than 13 million pounds of imported oat seeds.

10. **"More Drying, More Rot of Sugar Beets."** Though moisture and decay generally are thought to be a team of cause and result, it isn't so in the case of sugar beets according to John O. Gaskill, sugar beet specialist. He finds that the more the beets are dried before storing, the more they are subject to rot. Excessive drying cracks the cells of the beets makes them vulnerable to the attacks of various organisms.

11. **"Niacin, Thiamine, Riboflavin and Iron."** These, say the United States Department of Agriculture, are what have provided the "enrichment" of cereal foods in late years. About 65 percent of all the

white flour sold as flour, bread and other cereal products in 1948 was enriched. At least 25 states now require enrichment of white bread, rolls, and flour.

12. "Creeping Tractors." To slow down a tractor to 1 mile in 8 hours was just what the market needed—for particular purposes: the transplanting to nursery rows the tree and shrub seedlings grown in seed beds to supply planting stocks for windbreaks and for planting in woodlands and forest farms. Such "creeping" was properly the care of a Nursery Manager (pun intended)—Tom Bradley of the Soil Conservation Service—in charge of the tree nursery near Zanesville, Ohio. He altered a tractor into a creeper by setting the engine of his tractor just enough ahead on its frame so that he could introduce an automobile transmission into the power line. Then by operating both the regular tractor and the newly added transmission unit in low gear the machine could move steadily forward at 10 feet a minute. This is as fast as skilled workers can feed the tiny trees into the transplanting machines. The tractor hauls 5 of these units and permits a driver and 5 plaut handlers to get young trees into the nursery transplanting bed at the rate of about 10,000 an hour.

13. "Metal Ladders and Electricity." Because of their strength and light weight, ladders made of aluminum or similar metals have become increasingly popular among fruit growers. However, unlike older types, metal ladders are excellent conductors of electricity.

The Farm Service Division of the Detroit (Mich.) Edison Company suggests, therefore, that special caution be taken to prevent contact with electric lines running through or alongside orchards, for such contact may result in serious, even fatal, accidents.

14. "Organic Gardening." Ray Koon, in the May 1950 issue of *Horticulture*, states: "The organic champions claim that chemical fertilizers are ruining our soils and undermining the health of man and animals and are responsible for nervousness, heart trouble, gall stones, ulcers, arthritis, rheumatism and cancer. This is not proven!

"Another indictment against chemical fertilizers is that they are killing off our earthworms, those faithful underground toilers, so beneficial to the soil. The falsity of this claim has been proved again and again. The most recent report on this comes from the U.S.D.A. Research Station at Beltsville, Md., as a result of carefully controlled experiments: 'Earthworms thrive and do a better job of soil building on well-fertilized land. More benefit is obtained from fertilizer when earthworms are present.' So it works both ways.

"The defenders of the organic theory say that bugs and blights are not so likely to attack plants grown without fertilizer. Pests just don't like the taste of unfertilized plants, it seems. This is not true. It is true that healthy plants are better able to resist pest attacks than are unhealthy plants, but we grow such plants in soil well-balanced as to both organic matter and chemical plant food.

"And right there is the secret of successful farming and good gardening—the maintenance of a proper balance between organic materials and chemical fertilizer.

"Louis Bromfield, well-known author and the proprietor of Malabar farm in Ohio, recognizes the importance of a humus-packed soil, and has improved his impoverished acres by turning under tons of vegetable matter. But he says: 'Do not think for a second that I belong to what is called the organic farming group. It is impossible for this country to do without chemical fertilizer and in great quantities.'

THE BEST BOOK to "Look It Up In" is THE LINCOLN LIBRARY

In 2286 pages with pictures, this book answers all your questions on geography, history, fine arts, civics, literature, science, industry, commerce, and all school subjects. Gives the facts . . . brief, quick, complete . . . easy-to-find, easy-to-read. . . Choice of 1 or 2-Volume editions. . . both good values.

Leading educators and librarians give it highest praise; ask your school principal. Needed in every home for scholars from 6th grade thru college. Write for descriptive booklet. You need it now; you'll use it for years.

HOW RIGHT HE WAS

"In fifty years," said a man in the Cincinnati Inquirer in 1877, "perhaps 25, the buffalo will be a rarity.

"They are doomed to extinction. Driven to the West, now hemmed in by settlers, the country crisscrossed by railroads, they haven't a chance.

"Over 150,000 are used legitimately each year by trade and as many again are killed for sport.

"But we live only for the present, and your grandchildren and mine will be going to a zoo and paying 50¢ each to have a look at a piece of buffalo skin. The history of the last century tells the same story, yet we continue to kill and slaughter."

How soon now may we be writing a similar story about the woodcock, the golden trout, the wild goose, and the pileated woodpecker—and others of our wild life friends? Or how many years before our children pay to see a maple?

LOOK

for Rupture Help

Try a Brooks Patented Air Cushion appliance. This marvelous invention for most forms of reducible rupture is GUARANTEED to bring you heavenly comfort and security, day and night, at work and at play, or it costs you NOTHING! Thousands happy. Light, neat-fitting. No hard pads

or springs. For men, women, and children. Durable, cheap. Sent on trial to prove it. Not sold in stores. Beware of imitations. Write for Free Book on Rupture, no-risk trial order plan, and Proof of Results. Ready for you NOW!

YOU CAN HEAR HARRY COMING?

Some years ago some idle wit collected figures giving the distances to which sound is conveyed under favorable atmospheric conditions. He reported that J. J. Stranahan of Erie, N. Y. heard the noise of the train and its whistle on the trestle at Erie, nineteen miles distant. W. J. M. of San Pablo, Calif. could hear clearly on calm Fall days the rumble of cars and the train whistle from a trestle eighteen miles distant. J. H. S. said he could hear frequently the railroad shop whistle at Grand Island from his home in Orville, 28 miles distant. C. V. Swarthout, Cape Vincent, N. Y. frequently heard the whistle at Kingston, Ontario, twenty miles away. Carpenters working on the roof of a Jaffrey, New Hampshire church are said to have heard the cannon at Bunker Hill—sixty-five miles away.

PALACE OF ICE

Built by the direction of Anne, Empress of Russia, in 1739 to honour the nuptials of Prince Galatzin with a peasant girl was The Palace of Ice. The bride and bridegroom had to pass their wedding night in a room the walls of which, all the furniture, and even the bed itself were wholly of ice.

LUCKY FRIDAY

Friday is a lucky day for the U.S. Christopher Columbus sailed for America on Friday, August 21. He discovered America on Friday, October 12. On Friday, Jan. 4, 1493, he returned to Spain, and arrived safely on Friday, March 13. On Friday, Nov. 22, he arrived safely again on our shores, and on Friday, June 13, 1494 he discovered this continent. On Friday, March 5, 1496, Henry VIII gave John Cabot his commission. On Friday, Sept. 7, 1565, Melendez founded St. Augustine. On Friday, Nov. 10, 1620, the Mayflower reached Provincetown and Plymouth on Friday, the 22nd. Saratoga surrendered Friday, Oct. 17, 1777. Yorktown surrendered Friday, Sept. 19, 1791. John Adams moved for U.S. Independence on Friday, July 7, 1776. The Newfoundland cable was laid safely by Friday, July 27, 1866.

FOR MEN OVER 35 MALE HORMONES NOW AVAILABLE ON 30-DAY TRY-OUT TEST

If you are over 35 you may have a male hormone deficiency. Science discovered this can be the cause of unhappiness and lowered power in your remuneration. Don't risk spoiling what can easily be the best part of your life. Make this test and see whether it solves your problems. Send today for Hudson Male Sex Hormones. Our money-back guarantee protects you from financial risk. Take these handy tablets for 30 days. If you feel no benefits—if your home life, your business life are not made happier because of these benefits, we will gladly refund the full purchase price. *Thousands of gratified users.* References: Dun & Bradstreet. Just send \$5 and a 30-day supply will be sent you in plain wrapper via airmail.

MAIL TEST COUPON NOW

MAYWOOD PHARMACAL CO. Dept. FA-11
1065 E. Anaheim Blvd., Long Beach 13, Calif.

Please send 30-day supply of genuine Male Sex Hormones. If I use them as directed for 30 days and feel no benefits, you guarantee to return my five dollars without argument.

I enclose \$5 in Cash Check Money Order

Send C.O.D. and I will pay postman

I would prefer the double strength tablets, enclosed is \$9 for a 30-day supply

"OLD WHITTLES"

La Crosse, Wis.

The Voiage and Trabaile of Sir John Maundeville, Knight.

In 1356 A.D. John Maundeville, an Englishman, penned by hand in four different languages an account of travels he had made over a period of 34 years. Excerpts from this book taken from a 1725 English edition, now out of print, follow. The spelling in these excerpts has been modernised, the construction remains like the original. The woodcuts reprinted here are identical with the originals. The original runs some 316 pages in type and is much sought by scholars everywhere. Owners of this edition of the Almanac should realise that these excerpts constitute the only available American or English "Maundeville," as well as a first edition in the modernised spelling.

Much of Maundeville is incredible and fantastic but the border land of this strange, "real," world of the present day—a world of changing frontiers, discovery, and invention—is certainly no less incredible than that of Sir John.

"John Maundeville departed from his country (England) in the year of Christ 1322; and as another Ulysses, returned home, after a space of 34 years. . . . In the time of his travaile he was in Scythia, the greater and less Armenia, Egypt, both Lybyas, Arahia, Syria, Media, Mesopotamia, Persia, Chaldaea, Greece, Illyrium, Tartary, and divers others kingdoms of the world."

Sir John speaks:

Of the Land Of Tartary and the Great Khan

Now I have told you of some of the ways, by land and water that men go to Jerusalem; yet there is one way entirely by land unto Jerusalem—and that is by France. But the way is full long and perilous. And whoso goeth that way, he must through Alamayn (Germany) and Prussia; and so unto Tartary. This Tartary belongs to the great Khan.

This is a poor land and beareth but little fruit. For there groweth little of corn or grain or beans or peas; but beasts be there enough. And there the people eat nought but flesh without bread; and they drink the broth thereof, and also they drink the milk. And all manner of wild beasts they eat—wild dogs, cats, racoons, and all other wild beasts. And they have no wood or else little. And therefore they warm themselves and cook there over horse dung and cow dung, and of other beasts, dried against the sun, and princes and others eat but once in the day; and that but little, and they be right foul folk and of evil kind.

And in summer falleth many tempests and many hideous thunders and lightnings that slay much people and beasts. It is a country not worthy for honnds to dwell in. It is a country to sow to thistles and briars and broom and thorns—for no other thing is it good.

Adam and Eve

Of the Beliefs of Saracens

Of the Saracens I shall tell of a book Mahomet wrote that is called the Alkaron. In which book is written, among other things, that the Good shall go to Paradise and the Evil to Hell. And if a man is asked what Paradise means, he says Paradise is a place of delights where man shall find all manner of fruits in all seasons and rivers running of milk and honey and of wine and of sweet water; and they shall have fair houses and noble made of precious stones and of gold and of silver; and that every man shall have 80 wives, all maidens; and he shall have ado with them every day, and he shall find them always maidens. . . . Mahomet loved well a good hermit, and so often went Mahomet to this hermit that all his men were wroth; for he would gladly hear this hermit preach and keep his men awake all night. Therefore his men thought to put this hermit to death; and so it befell upon a night that Mahomet was drunken of good wine, that he fell asleep; and his men took his sword out of its sheath while he slept, and therewith they slew this hermit and put the sword all bloody in the sheath again. And at morrow when he found the hermit dead, he was full sorry and wroth and would have done his men to death; but they all with one accord said that he himself had slain him while he was drunken and showed him his sword all bloody. And he trowed they had spoken truly. And then he cursed the wine and all those that drink it. And therefore Saracens that be devout drink no wine—but some drink it privily.

At the hill of Garasoun, in Deluze, Egypt, where Abraham would have sacrificed his son Isaac

Of the Land of Job

The land of Job is a full fair country, plenteous of all good things. There be hills where men get great plenty of Manna, in greater abundance than in any other country. This Manna is called Bread of Angels; and it is a white thing that is full sweet and right delicious, and more sweet than honey or sugar; and it cometh of the dew of Heaven that falleth upon the grass in that country; and it congeleth

and becometh all white and swete; and men putteth it in medecines for rich men to make the stomach relax, and to purge evil blood, for it cleanseth the blood and putteth out melancholy.

Of the Land of the Amazons

Beside the land of Caldea is the land of the Amazons. And in the realm is all women. For some time there was a king in that country and men married. But it so befell that the king had war; the which king was slain and all the good blood of his realm. And when the queen and all the other noble ladies saw that they were widows, and that all the royal blood was lost, they armed themselves, and, as witless creatures, they slayed all the men of the country that were left. For they would that all the women were widows as the queen and they were.

From that time forwards they never would suffer man to dwell among them longer than 7 days and 7 nights; nor that any child that were male should dwell among them longer than he were weaned. If the child be a female they do away with one of its breasts with a hot iron; and if it be of a woman of great lineage they do away with the left breast that it may better bear a shield; and if it be of a woman of simple blood, they do away with the right breast so that it may shoot a bow.

In Ethiopia

In that country is a well that in the day is so cold that no man may drink therefrom; and in the night it is so hot that no man may suffer his hand therein. In Ethiopia be many kinds of folk. In that country be folk that have but one foot; and they go so fast it is a marvel; and the foot is so large that it shadoweth all the body against the sun when they would lie and rest them. In Ethiopia when the children be young and little, they all be yellow; and they wax of age, that yellowness turneth to be all black.

In India — of the Well that changes its odor every hour of the day

Above the city of Polombe is a great mountain, and at the foot of the mount is a fair well and great that hath the odor and taste of all the spices; and at every hour the odor changeth and so also the taste. And whoso drinketh 3 times, without eating, of that water, he is free of all manner of sickness and will always be young. I have drunken 3 or 4 times, and methinketh, I am the better for it. Some men call it the Well of Youth, and say that the well cometh out of Paradise, and therefore it is of such virtue.

Where the father eateth the son, or the son the father, the husband the wife, or the wife the husband

In this isle it so befalleth, that if the father or the mother or father of any of their friends be sick, anon the son goeth to the priest and asks the idol if his father, mother, or friend is like to die of that sickness or not. And if the devil that is within the idol answer the sick one shall live, they keep him well; and if he say that he shall die, then the priest goeth with the son and with the wife of him that is sick and they put their hands upon his mouth, and stop his breath and so slay him. And after that they chop the body all in small pieces, and pray all their friends to come eat of him that is dead; and they send for all the minstrels of their countryside and make a solemn feast. And all that be of his kin, or claim to be his friends, and they come not to that feast, then are they shamed and outcast forever.

Here in this land they eat man's flesh to deliver the man of pain. For if the worms of the earth eat him, then shall the soul suffer great pain. When the flesh is thin, then say the friends they have done great sin to have let him linger so long and to suffer so much pain. And when they find the flesh fat, they say it is a good thing to have sent him so soon to Paradise; and that they have not long suffered him to endure in pain.

Of Folk Marvelously Disfigured

In one isle are folk whose stature is of a cursed kind, that have no heads; and their eyes be in their shoulders. And in another isle be folk that hath lips so great that when they sleep in the sun, they can cover all their faces with their lips. And in another isle be folk with great ears and long that hangeth down to their knees. And when one entereth again into the land of the great Khan there be folk of little stature but three span long. They marry when they be one half year of age and beget children. And they live only but 6 or 7 years at the most. And he that lives 8 years men hold him right passing old.

Of the Great Khan of Cathay

In the city of Caydon in Cathay is the seat of the great Khan in a marvelous great palace, the walls of which are two miles around; and within the walls it is full of other palaces. And in the garden of the great palace is a great hill, upon which there is another palace. And all about the palace and the hill be many trees bearing many different fruits. And all about the hill be dykes both great and deep: and beside them be great vineyards, and in these vineyards so many wild geese and ducks and swans and herons, that they be without number. And all about these dykes and vineyards is the great gardeu, full of wild beasts; so that when the great Khan will have sport to take any of the beasts or the fowls, he will not chase them but shoot them from his windows without leaving his room.

The Isle of Strange Beasts

There be an isle that hath many beasts. There be in that country many camels that is a beast as little as a goat, and liveth by the air alone and eateth nought nor drinketh nought at any time. And he changeth his color many times, all manner of colors that he list, save only red and white. There be also in that country passing great serpents, some 120 feet long, and they also of diverse colors. And there be others that have crests upon their heads and they go upright upon their feet, and they keep their jaws open from which always they drop venom. And there be wild swine as big as oxen in our country and unicorns as great as wild swine here. And there be lions all white, and a beast that is greater than a horse that men call Odenthos: and they have a black head and 3 long horns trenchant in the front and sharp as a sword; and the body is slender. And he is a full felonous beast, and he chaseth and slayeth the elephant.

Return Home

I John Maundeville Knight above (although I be unworthy), departed from our countries and passed over the sea the year of grace 1322, have passed through many lands and many isles and many countries, and searched full many strange places and been in many a right good honourable company, and at many a fair deed of arms (albeit I did none myself from mine insufficiency) now am I come home (in spite of myself) to rest: for gont and arthritis distract me. Thus taking solace in my wretched rest, recording the time passed, I have put these things in this book, the year of grace 1356 in the 34th year that I departed from our countries.

WORD CHARADES

(For answers turn to page 96)

1

My second wakes when by my
first
The Birds are set a-singing,
And with the echo of their joy
The forest deep is ringing.

My whole, a dainty fragile thing,
Braved wind and wave and tide,
And now enshrined in history's
page
It lives, a nation's pride.

St. Nicholas Magazine

(The following Charades are all
taken from *At the Sign of the
Sphinx* by Carolyn Wells)

2

On either side the river lie
Long fields of barley and of rye;
My first blows free beneath the
sky,
And through the field the road
runs by
To many-towered Camelot.

There she weaves by night and
day
A magic web of colors gay;
She dare not from my second
stray,
The Lady of Shalott.

The gemmy bridle glittered free,
Like to some branch to stars we
see;
Perhaps it was my whole to thee,
O bold Sir Lancelot!

3

Demure, modest, and meek,
In my whole she rode by,
With my first on her cheek,
And a smile in her eye.
And when she had passed,
I said, "She's a dear,
And her critic my last
To say she is queer."

4

Beneath the sharp axe Queen
Mary knelt,
And often its blows my first has
dealt
To kings and queens and chick-
ens.

The hour for my whole to each
must come,
My first of my second is thought
by some
The finest work of Dickens.

5

Though hardly a path of glory,
My first leads to the grave;
Unless by giving my second
Both life and health we save.

My third is of very small value,
The favorite haunt of a mouse;
My whole you will find in the
kitchen
Of every well-ordered house.

6

Sweet Priscilla at my side
Gayly o'er the waves we ride.
As we banter on the yacht,
She is happy, I am not;
For beneath my first, her eyes
Frown and smile and tantalize.
Though she rules my very soul,
She is governed by my whole.
If she'd only marry me,
How contented I would be;
If I heard our wedding-bell,
If my second on us fell,
Gayly then away I'd ride
Sweet Priscilla at my side.

7

My first's a sum of money that I
have never seen
Though I have earned it often
and spent it too, I ween.

When money is my second 'tis
often hard to get;
My second is a pretty sight, al-
though it's rather wet.

My whole's a sad misfortune
caused by a summer rain;
It makes much trouble in my
first, and goes against the
grain.

8

To win my first men struggle all
their lives,
Yet willingly present it to their
wives.

The wise man no great fortune
has amassed,
But lives his life contented with
my last.

An infant is my whole at early
age;
And Lot's wife was my whole on
Scripture's page.

Query

I read in one of your numbers an article on the amount of hard drink consumed at the installation of a pastor in the early days. Now I can not find it although I have looked back many years. Can you help me?

Warner M. Van Norden
7 West 57 St.
New York City.

Ed. Note: We have searched this Almanac's files for such a story as Mr. Van Norden suggests but we are unable to find anything at all like it. If any reader knows about such a shocking proceeding, please write him.

HANCOCK, NEW HAMPSHIRE

OLD FASHIONED PUZZLES

From St. Nicholas Magazine

(Answers to appear on page 96)

1. Double Acrostic

1. The subject of your thoughts I tell.
2. A word that speaks a long farewell.
3. A native of a distant land.
4. I mean to seize with sudden hand.
5. And I to take with trust the true.
6. In Italy, my home, I grew.
7. Me, before all, should men pursue.

Initials

Never found on land or sea;
But in mid-air look for me.

Finals

Piercing darkness, golden bright,
Giving life and shedding light.

2. Enigma

I am composed of thirty-eight letters: My 30, 4, 21, 5, 24, 38 is a city in the United States. My 1, 22, 9 is a domestic animal. My 6, 34, 19, 13 is the name of a month. My 14, 17, 31 is an insect. My 6, 7, 28, 33, 35, 21 are employed in court. My 29, 18, 20, 12, 5 is one of the five senses. My 23, 36, 28, 25, 32, 27, 18, 20, 12, 11 is a number. My 26, 33, 35, 29, 10 is a useful animal. My 30, 2, 37 is a weapon used by the Indians. My 15, 3, 8, 34, 16 is to endow. My whole is an old saying.

3. Riddle

Take the name of a useful animal, insert a consonant, and find the name of a celebrated mountain; then insert a vowel, and find a confection.

4. Geographical Acrostic

1. A famous watering-place. 2. A fresh water lake in Central Africa that Livingstone investigated. 3. One of the oldest cities in Asia. 4. A large island in the Northern Ocean, famous for its boiling springs and subterranean fires. 5. An empire that has four hundred millions of inhabitants and the Oldest government now

in existence. 6. A range of mountains whose tops are covered with perpetual snow, and the country all around covered with perpetual verdure. 7. A river and gulf of Siberia. 8. A frozen northern country. 9. A land you and I love. 10. The country where Scott and Burns were born. The initials of the above will give you the name of one whom we hope you are glad to see.

Beheaded Rhymes

Fill the first blank with a certain word; the second, by the same word minus its first letter; the third, by original word minus first two letters; and in like manner the lines of the second stanza:

I

The princess who once tried
to....
Her fair hand wounded with
the....
A magic sleep, she then fell....
And thus for years she lay;

II

Until, to break the slumber....
Ere her sweet soul by it were....
A noble knight, by true love....
Kissed all the spell away.

Cross-Word

My first is in crow, but not in hawk;
My second is in landing, but not in dock;
My third is in horse, and also in mule;
My fourth is in govern, but not in rule;
My fifth is in patch, but not in mend;
My sixth is in tear but not in rend;
My seventh is in trouble, but not in grief;
My eighth is in robber, but not in thief;
My ninth is in saw, but not in seen;
My whole is the name of a wicked queen.

All Named Smith?

Every man has two parents, four grandparents, eight great grandparents, sixteen great-great grandparents, etc. If we call one generation 30 years and carry out the above calculation to the Norman Conquest each person in England must have had 32 million ancestors. Carry the calculation farther back and soon you will pass beyond any population which ever existed on the globe. A thousand years from now brings the number up to 1,024,000,000.

Here's to You!

The drinking of healths originated during the Danish occupation of Britian. The Danes frequently stabbed Englishmen while in the act of drinking. It finally became necessary for the English, in view of the constant repetition of this dastardly mode of assassination to enter into compact by these mutual pledges of security for each other's health and preservation. Hence the custom of pledging each other's health. Next time you toast a friend, remind him then it is just a promise you won't stab him until later!

IF YOU**GET UP NIGHTS****Check These Symptoms For KIDNEY TROUBLE**

If you get up many times during the night to go to the bathroom, you may have non-organic Kidney Trouble. Some of the symptoms, in addition to getting up nights are, bladder weakness, burning passage, leg pains, circles under eyes, loss of pep, nervousness, headaches, dizziness. You may need a reliable, stimulantdiuretic like KED-NEX PILLS to help Nature remove irritating excess acids, poisonous wastes and certain germs. This cleansing flushing action helps alleviate many pains, aches, soreness, stiffness—helps reduce night and day calls—allows you to enjoy and benefit by restful sleep. So order KED-NEX PILLS today, but send no money. Pay postman \$2 plus postage and C.O.D. charges. If you send cash with order we pay all postal charges. **MONEY BACK IF NOT HELPED.** YOU can order KED-NEX PILLS with confidence for if you are not helped by the very first box we'll give you back your money. Rush name and address NOW.

RECIPES— KITCHEN HINTS —

FARM FARE FOR CITY LIVING

MAINE CLAM CHOWDER

- | | |
|-------------------------------|-----------------|
| 1/4 pound salt pork | 1/2 pint milk |
| 2 medium sized onions | 1/2 pint cream |
| 1 1/2 quarts fresh clam broth | 6 ounces butter |
| 2 medium size potatoes | salt and pepper |
| 1 pint fresh clams | |

Dice and saute the salt pork. Chop the onions and add to the salt pork and continue cooking for about five more minutes. Add the clam broth . . . then the cubed potatoes and cook for about 20 minutes longer. Add the chopped clams and cook for five more minutes . . . then add milk and cream and bring to a boil. Lastly add butter and salt and pepper to taste.

PECAN MUFFINS

- | | |
|---------------------------|---------------------------|
| 2 cups flour | 1/2 teas. salt |
| 3 teaspoons baking powder | 1/2 cup pecans, chopped |
| 1/2 teas. nutmeg | 1 cup milk |
| 1/2 teas. cinnamon | 1 beaten egg |
| 1/4 teas. ground clove | 1/4 cup melted shortening |
| 1/4 cup sugar | |

Sift all the dry ingredients together. Stir in the nuts. Combine the milk and egg and stir into the dry mixture. Add the melted shortening and pour into greased muffin tins and bake in a 425° F. oven for about 25 minutes.

BOSTON COOKIES

- | | |
|--------------------|---------------------------|
| 8 teaspoons butter | 2 cups flour |
| 8 teaspoons lard | 2 teaspoons baking powder |
| 1 cup sugar | 1/4 teas. salt |
| 1 egg, well beaten | 2 teaspoons vanilla |
| 1/4 cup milk | |

Cream the butter and the lard together. Add the sugar, egg and milk to creamed mixture. Sift and add the dry ingredients. Add vanilla. Roll thin and cut with large round cutter. Bake in a 375° F. oven for about six minutes.

DURGIN PARK BLUEBERRY CAKE

- | | |
|-----------------------|--|
| 3/4 cup sugar | 1 1/4 cups blueberries that have been washed and drained |
| 2 beaten eggs | 1 T. melted butter |
| 3 cups flour | 1 1/2 cups milk |
| 3 teas. baking powder | |
| 3/4 teas. salt | |

Mix the sugar with the beaten eggs. Sift the flour, the baking powder and salt and add. Stir in the blueberries, melted butter and milk. Beat just enough to mix. Bake in a 400° F. oven for about thirty minutes.

PARKER HOUSE TRIPE

Cut fresh tripe in four inch squares. Season to taste with salt and pepper and sprinkle with flour, then dip into pure olive oil and sprinkle with bread crumbs. Broil slowly for two or three minutes on each side or until the crumbs are brown. Serve with

A FEAST

FOR FOLKS WHO KNOW

HAVE YOU KNOWN the savory aroma that filled the air of an olden-time New England kitchen when a pot of day-long-baked beans came sizzling from the oven?

Then it's for *you* that B & M Beans are baked—*really baked* in down-east ovens *all day long*, from the traditional New England pork-and-molasses recipe.

The only difference—you need merely re-heat B & M Baked Beans and serve them.

MUSTARD SAUCE

Saute 1 T. minced onion in 3 T. butter. Add 2 T. cider vinegar and simmer for five minutes. Moisten 2 Teaspoons dry mustard with 1 T. water and blend. Then add 1 cup brown gravy. Allow to simmer for a few minutes and serve very hot.

NANTUCKET CORN PUDDING

1 egg	$\frac{1}{2}$ T. melted butter
1 cup milk	Few grains of cayenne
$\frac{1}{2}$ teaspoon salt	1 cup cooked corn
1 teaspoon sugar	

Beat the eggs; add the milk, seasonings, butter and corn. Turn the mixture into a buttered baking dish. Bake in a moderate or 350° F. oven for about 40 minutes or until the mixture will not adhere to a silver knife when inserted in the center. Serve as a main course dish.

HOUSEHOLD HINTS

Stain Removal: Always start with an ample supply of cleaning pads made of absorbent cotton materials and cleaning cloths (when possible) made of the same material as the garment to be cleansed. Treat all stains as soon as possible . . . this prevents setting! Always test the cleaning agent on a small piece of the material found on inside seams or if necessary, at the hemline.

Chewing Gum: Scrape off as much as possible. Dampen cleaning cloth with carbon tetrachloride and apply with a circular rubbing motion.

Coffee: Soak the stain immediately in cold water, wash in mild soapsuds and rinse thoroughly. If the fabric is not washable sponge with cold water, allow to dry . . . if stain still remains use non-inflammable cleaning fluid.

Egg: Use soap and cold water. Hot water has a tendency to harden the egg hence may set the stain.

Fruit Stains: Act immediately. Use cold water. If the garment is washable soak in cold water and then sponge with bleach water. If the garment is not washable sponge with cold water, or soak stained portion in cool water and then apply a few drops of white vinegar.

Grass: Rub with heavy suds, using a soft brush if fabric is washable. If not, sponge with alcohol if fabric will stand the test.

Greasy Food: Scrape off excess with spatula; sponge with carbon tetrachloride and launder.

Grease: (Automobile, Road Oil, etc.) Remove excess with dull knife. Rub lard into the spot until no more grease is picked up. Scrape off and launder. If fabric is not washable sponge with carbon tetrachloride or take as quickly as possible to an expert cleanser.

Indelible Pencil: If fabric is washable and will pass the test then soak in alcohol. If stain remains then stretch the fabric over a bowl filled with hot water and apply bleach water.

Iodine: If washable fabric is to be treated sponge with a dilute solution of ammonia. (Six drops of ammonium hydroxide in $\frac{1}{2}$ measuring cup of water.) If on heavier fabric apply a paste of raw starch and warm water. Allow to dry and brush off. Repeat if necessary.

Iron Rust: Stretch the fabric over a bowl of steaming hot water. Moisten the stains with clear water and apply lemon juice with a medicine dropper. Rinse and repeat if necessary. Or sprinkle stain with salt, moisten with lemon juice and expose to bright sunlight. If fabric is not washable take to expert cleaner.

Lipstick or Rouge: Sponge with carbon tetrachloride.

Mercurochrome: Wash out as quickly as possible with clear water. If this does not work take to a professional cleaner as this is one of the most difficult stains to remove.

Mildew: Soak in a solution of bleach water. Sometimes stains of this nature can be removed by washing and then allowed to dry in the sun.

Mud: Allow to dry thoroughly. If stain remains sponge with alcohol and launder.

Nail Polish: If the stain is on polish a regular polish remover may be applied. Do not use this method on rayon or silk.

Perspiration: Launder promptly. If the color has changed hold the stain over a bottle of ammonium hydroxide. If the color has gone nothing can be done.

Rich, flavory, fresh White House Coffee vacuum packed in air-tight tins and jars, or buy it in the triple-sealed package for economy.

Save the box tops. Write for our list of available merchandise premiums.

WHITE HOUSE COFFEE

Box 1871 BOSTON, (5) MASS.

Salad Dressing: Sponge with cold water and dry. Remove remaining grease with carbon tetrachloride. If a rayon material sponge with carbon tetrachloride.

Stain: Moisten stain with clear water and place in the direct sun light. Repeat if necessary. If fabric is not washable a good cleanser is your best bet.

Water Spots: With such fabrics as velveteens, velvets or corduroys water spots can be removed by steaming garment in a closed bathroom with a tub filled with steaming hot water. (A wonderful way of banishing wrinkles from clothes when traveling.)

HOUSEHOLD HELPS

To Read Electric Light Meters: The pointer on the extreme right measures the units in kilowatt hours; the one to the left of it measures units in tens of kilowatt hours . . . the next measures in hundreds and the pointer on the far left, thousands. Read your meter from left to right. (If any pointer lies between two figures use the smaller number.)

To Keep Clothes from Freezing in the Winter: Simply add a large handful of table salt to the rinse water.

To Clean Neckties: Place in a glass jar filled with cleaning fluid. Put on jar rubber, screw cap on tightly and shake jar until dirt is loosened.

Clotheslines: Before using new one boil for thirty minutes. This minimizes stretching and tangling. To clean boil again in a strong salt solution or wrap the line around a washboard and scrub with brush and soap.

To Water Plants while away: Use a special wick made for this purpose or a home made one that you have made from cheesecloth or burlap. Place this wick in the hole in the bottom of the container. The rest of the watering wick rests in water in a partially covered container that supports the pot. The wick works like a lamp wick that carries oil to the flame.

Fly Catcher: Flies like string for a roost. Dip the string in a strong solution of insecticide that is strong with DDT. Just hang this string or several from the ceiling or from a light cord. Remember . . . it takes a little time for the insecticide to take effect but you'll notice that there are fewer flies around.

POMANDER BALL

Make from apples, oranges or lemons. Select firm fruit and stick with whole cloves covering the entire surface. Hang in a clothes closet or place in a dresser drawer.

POTPOURRI

10 cups dried rose petals	½ ounce each: {	Ground cloves
3 ounces orris root		Cinnamon
		Allspice

Mix the ingredients thoroughly and allow them to mellow in an earthenware crock for several weeks before transferring to smaller jars. This is the potpourri base and you may add herbs, spices or dried blossoms of your own preference. (The rose petals should be picked just after the dew has dried off them. Spread them on a window screen. Dry these petals in a cool airy room, never in the direct sunlight. When dried, rub them into a powder and then blend with the other ingredients.)

Rat Control

The total food consumed by rats costs us \$400,000,000 each year. In addition, rats cause damage to houses of another \$600,000,000.

It is no disgrace to have rats—it is to keep them. The female rat has from 18 to 98 offspring each year. Best time for a poison campaign is Fall. To catch a rat, appeal to its thirst, hunger, sex, or curiosity. Remember it can reach up to 18 inches, jump up 3 feet, and out-over 15. They'll burrow down 5 ft., or climb a vertical wall or rusty 3 inch pipe.

To do away with them, keep all garbage in metal containers with close fitting tops. Abolish nests & hiding places. Ratproof your buildings with screen doors—also screen all windows, vents, transoms, exhaust openings, basement drains, any openings in foundations or roofs, chimneys, ventilators.

Red squill baits or traps are best for ridding the house of the rat. Use traps of course when there are pets or children around or you don't want unseemly odors.

SPEEDS RUG MAKING

Braid-Away

A "Third Hand" for Braiding
and All Kinds of Sewing.

Braid-Away is an unbelievably useful holder that saves time, fingers and labor in braiding rugs, ripping, folding, hemming, fringing, untangling yarn, etc. It holds any material at the

correct tension — while you use BOTH hands for faster, better, neater work. Braid-Away fastens on edge of sewing table. Attractive, sturdy, simple, nothing to adjust or get out of order; cannot injure the most delicate material. If you want easier hand sewing, firm flat uniform braids, you'll be delighted with a Braid-Away. Mailed postpaid on receipt of \$1.50. Satisfaction guaranteed.

Dept. Store Buyers
Please Note

Summer clothes, we understand go on sale in most of our American department stores, during the last week in March and first week of April. Now the weather forecast of The Old Farmer's Almanac—see page 17 and 19 for these two weeks can not by any stretch of the imagination be taken as authoritative or final. So we do not want you buyers to become unduly alarmed by the forecast Abe Weatherwise has made for these two weeks—namely, "Rains ice cubes"—and "Temperature drop might kill the apple crop." And in any event, if you buyers knew the weather of those two weeks was to be cold and rainy, we doubt very much whether you would reduce your clothing orders very much. However, we do know that a good many buyers to keep this forecast at hand and are guided by its long range look at the weather. That which we suggest is that you remember that it could be cold and rainy these two weeks—and then let the boss decide how much of a gamble he is willing to take on putting in heavy stocks.

Some View

Chuck Harrington, states the Mount Washington Observatory Bulletin of Feb. 1950, a co-worker on Mount Washington, accompanied an icing technician from Boston to Great Falls, Montana. From there the pair angled across British Columbia—thence to Fairbanks and Juneau.

"Shortly after passing Mt. McKinley"—the icing technician reports "we had the uncanny experience of a simultaneous view—a sunset in the west and a sunrise in the east."

Origin of Prayer

Mrs. Harry E. Felton of Worcester, Mass. informs us that the prayer which was used on page 97 of last year's edition of the Almanac was written by Dr. Reinhold Niebuhr, Union Theological Seminary, New York City. He wrote it in 1932 as the ending to a longer prayer. In 1934 his friend, Dr. Howard Robbins asked permission to use that part of the prayer in a compilation he was making at the time and which appeared later as a book of prayers.

Aurora Borealis

H. P. Rowell of So. Lancaster, Mass. writes us that he does not believe the Aurora Borealis was seen in this world before 1564. He believes this fact places the Aurora among the other signs which the Lord said would be in the heavens as a sign of His second coming.

"There shall be signs in the heavens" (Dark Day of May 19, 1780, moon turned to blood the same night.—Falling of stars Nov. 13, 1833) "and on earth distress of nation—men's hearts failing them for fear, for looking after those things that are coming on earth."

Mr. Rowell suggests the reading of Joel and Nahum—as well as the November 1947 issue of the American Geographic Magazine.

Mr. Rowell wants to know why Henry Hudson and his men, in their efforts to locate a passage to India in the sections of our planet where we now see the Aurora, did not see the Aurora.

6. Cross-Word.—Cleopatra.

1950 CYPHER CONTEST

None of the many solutions submitted to us came anywhere near solving the cypher in the 1950 Old Farmer's Almanac. The number was 1—1,1314. 1 stands for page one of the title page. The dash is a minus sign; hence, the cypher referred to Page one minus 1 or the inside front cover or the advertisement of The John Hancock Mutual Life Insurance Company—lines 13 and 14. Because this puzzle cypher was not solved, no prize was awarded. Instead, we offer double last year's prizes; namely, first prize, fifty dollars, second prize, thirty dollars, third prize, ten dollars. The contest this year has No. 112-34. This number refers to two lines of type on a certain ad page of this edition. You are to submit the best two line rhyme you can think of in not over 13 words to go with these two lines. Yankee Magazine staff is the sole judge. Entries remain the property of Yankee, Inc. and none will be returned. Winners will be announced in the 1952 Old Farmer's Almanac.

RHEUMATIC PAINS MAKE THIS TEST FREE

If you'll just send me your name and address, I'll mail you ABSOLUTELY FREE a generous trial test supply of the NEW IMPROVED CASE COMBINATION METHOD with full instructions for the transient and palliative relief of those annoying aches and pains commonly associated with and symptomatic of RHEUMATISM, SCIATICA, ARTHRITIS and NEURALGIA conditions. No matter how long you have had those pains and aches you owe it to yourself and your dear ones to try my new Improved Case Combination Method. IT DOESN'T COST YOU ONE PENNY TO TRY IT, SO SEND YOUR NAME AND ADDRESS TODAY TO

Paul Case, Dept. OFC, Brockton 64, Mass.

Suffer Varicose LEG SORES?

IF you suffer pain and misery of Varicose Ulcers, or Open Leg Sores, send away at once for FREE Booklet "THE LIEPE METHODS FOR HOME USE." Tells all about this 40-year-old method, praised and endorsed by thousands. Liepe Methods, Dept. 402 3250 N. Green Bay Ave., Milwaukee, Wisconsin.

GIFT SUGGESTION!

For that new born baby of Uncle Jim or Aunt Sue—or even for Gramp—or Ma—a Life subscription to this Almanac would be much appreciated. Send Five Dollars. Yankee, Inc., Dublin, N.H.

POSTAL RATES.—DOMESTIC

June 15, 1950

New legislation is again being proposed as we go to press, which may affect these rates.

First Class Matter may be forwarded from one Post Office to another without additional postage, but other matter must have new postage.

LETTERS AND POSTAL CARDS.—FIRST CLASS.

Letters and Written and Sealed Matter, 3 cents for each ounce, local and non-local, except that drop letters are subject to 1 cent for each ounce when deposited for local delivery at offices not having letter-carrier service, provided they are not collected or delivered by rural or star-route carriers.

Post Cards and Private Mailing Cards which comply with Departmental requirements01

Business Reply Cards or Letters, consult Post Office.

NEWSPAPERS AND PERIODICALS.—SECOND CLASS.

Entire Newspapers or Magazines containing notice of 2nd class entry, when mailed by the public; for each two ounces or fraction, regardless of distance or weight01

Fourth class rate applies when it is lower than second class.

MERCHANDISE AND MISCELLANEOUS.—THIRD CLASS.

(Limit of weight 8 ounces.)

Merchandise, incomplete copies of newspapers, printed and other mailable matter, 2 cents for first two ounces, 1 cent each additional.

Identical pieces of third-class matter may be mailed under permit in bulk lots of not less than either 20 pounds or 200 pieces, at the rate of 14 cents a pound, or fraction thereof, in case of circulars, miscellaneous printed matter, and merchandise, and 10 cents a pound, or fraction thereof, in the case of books or catalogs having 24 pages or more, seeds, plants, etc., with a minimum charge of 1 cent a piece in either case. Apply to postmaster for permit. The bulk mailing fee is \$10 per calendar year. Minimum charge for pieces of odd size or form, 3 cents.

Books, catalogues mailed in packages not exceeding 8 oz. in weight (must be of 24 or more pages and substantially bound, with at least 22 pages printed, seeds, cuttings, bulbs, roots, scions and plants, 2 ounces or fraction015

Catalogs and Similar Printed Advertising Matter, in bound form having 24 or more pages, weighing over 8 ounces but not exceeding 10 pounds.

Permissible Additions to and Enclosures with Parcel Post: Marks, numbers, names or letters for description purposes may be placed on fourth-class matter. Books may bear a simple manuscript dedication or inscription not in the nature of personal correspondence. A written or printed invoice or descriptive inscriptions indicating price, style, stock number, size, date of order, etc., may be enclosed. Inscriptions such as "Merry Christmas," or the like may be written on the parcel or a card enclosed therein.

A letter addressed to correspond with the address on the parcel may be tied to or otherwise securely attached to the parcel so as not to interfere with the address thereon. Stamps to cover postage on the parcel must be affixed to the wrapper and postage for the letter must be affixed to the envelope.

Sealing: Fourth-class matter may be sealed provided it bears a printed label "Merchandise—Fourth-class mail," together with the inscription "Postmaster: This parcel may be opened for postal inspection if necessary."

SPECIAL CLASSES—DOMESTIC MAIL

Special Handling.—Fourth-class matter only.

Parcels of fourth-class matter endorsed "Special Handling" will be given the most expeditious handling, transportation, and delivery practicable (but not special delivery) upon payment, in addition to the regular postage, of the following charge:

	Cents
Up to 2 pounds	15
Over 2 pounds up to 10 pounds	20
Over 10 pounds	25

The special handling charge applies to all parcels containing day-old fowl, package bees carried outside mail bags, or baby alligators, and to any other parcels which it is desired to have so treated.

Special-Delivery Fees (all classes of mail including air mail):

	First class (cents)	Second, third, or fourth class (cents)
Up to 2 pounds	15	25
Over 2 pounds up to 10 pounds	25	35
Over 10 pounds	35	45

The prepayment of the foregoing fee on second-, third-, or fourth-class mail entitles it to the most expeditious handling and transportation practicable, and also entitles it to special delivery at the office of address. Particularly recommended for perishable matter and other parcels, especially air parcels, likely to reach offices of address too late for regular delivery.

Registered Mail.—Fees for indemnity limited to:

\$5.....	\$0.25	\$200.....	\$0.60	\$700.....	\$1.20
\$25.....	.35	\$300.....	.70	\$800.....	1.30
\$50.....	.40	\$400.....	.85	\$900.....	1.40
\$75.....	.45	\$500.....	1.00	\$1,000.....	1.50
\$100.....	.50	\$600.....	1.10		

Domestic registered mail is subject to surcharges in addition to regular registry fees when declared value exceeds maximum indemnity.

Insured Mail (third and fourth classes).—Fees for indemnity limited to:

	Cents		Cents
\$5.....	5	\$50.....	20
\$10.....	10	\$100.....	25
\$25.....	15	\$200.....	30

C. O. D. Mail—Unregistered (third and fourth classes and sealed matter of any class bearing postage at the first-class rate).—Fees for collections and indemnity limited to:

	Cents		Cents
\$2.50.....	20	\$100.....	55
\$5.00.....	25	\$150.....	60
\$25.00.....	35	\$200.....	65
\$50.00.....	45		

Money Orders (limit \$100 each).—Fees for orders from—

	Cents		Cents
\$0.01 to \$5.....	10	\$10.01 to \$50.....	25
\$5.01 to \$10.....	15	\$50.01 to \$100.....	35

Postal Notes (limit \$10 each).—Fee 8 cents each. Postal notes are valid for two calendar months from last day of month of issue and are payable thereafter only by means of a duplicate note, application for which may be filed at any post office. Applications must be filed within 1 year from the last day of the month of issue.

By manufacturers on our Clearing House List. Increase your income at home by making plastic products for companies. Everyone tells you where to buy it! We tell you where to sell it! No experience required. For details, write to Plastic Service Guild, Dept. F, 233 Condor St., E. Boston, Mass.

RHEUMATIC PAINS ARTHRITIS SCIATICA

**Agonizing Miseries Relieved in Minutes Without
Taking Medicine . . . OR NO COST TO YOU!**

Here's Proof of Amazing Relief!

"Had such pain I couldn't sleep. It sure was a Godsend."—Mr. F. K., Flemington, N. J. "Received Ortho-Rub last Thursday. It's a great pain reliever."—G. M., Garden Prairie, Ill. "Sure has helped my knees." F. H., Uniontown, Ky.

When horrible pain strikes your legs, arms, back or body—don't suffer any longer! You may not have to stuff yourself with bad-tasting, habit-forming medicines. NOW you can get FAST symptomatic relief by just applying ORTHO-RUB WHEREVER IT HURTS YOU. ORTHO-RUB is a scientific, powerful formula containing a combination of pain relievers often recommended by Doctors. ORTHO-RUB acts FAST, as a counter-irritant analgesic that helps chase miseries away. You will say "THANK GOD!" for the blessed relief from those agonizing torture symptoms often associated with MUSCULAR RHEUMATIC PAINS, ARTHRITIS, SWOLLEN OR STIFF JOINTS, SCIATICA, BACKACHE, SPRAINS, or COLDS due to fatigue, over-exertion or exposure.

SEND NO MONEY!

If you've been trying all sorts of remedies without success—get a jar of ORTHO-RUB Ointment without risking a penny. SEND NO MONEY! Just your name and address. When ORTHO-RUB arrives, use as directed. Just deposit with postman \$2.00 plus postage (or send \$2.00, we pay postage). If you don't get wonderful relief IN MINUTES, return unused portion for full refund of purchase price. Order NOW!

ORTHO INC., Dept. 104RC
2700 Broadway, New York 25, N.Y.

ABBREVIATIONS

Abbreviations used on calendar pages 12-35

- Aph.** — Aphelion . . . Planet revolving about Sun reaches point in its orbit farthest away from the Sun.
- Apo.** — Apogee . . . Moon reaches point in its orbit farthest from Earth.
- Conj.** — conjunction . . . moment of closest approach to each other of any two heavenly bodies.
- El.** — elongation . . . apparent angular distance of a member of the solar system from the Sun as seen from the Earth.
- Inf.** — Inferior . . . Inferior conjunction is when the Planet is between the Sun and the Earth.
- Peri.** — Perigee . . . Moon reaches point in its orbit closet to Earth.
- Peri.** — Perihelion . . . Planet revolving about the Sun reaches point in its orbit closest to Sun.
- Stat.** — stationary . . . when the apparent movement of a Planet against the background of Stars stops — just before same comes to opposition.
- Sup.** — Superior . . . Superior Conjunction is when the Sun is between the Planet and the Earth.

USE THIS ALMANAC ANYWHERE IN THE U. S. A.

The times given on the left hand calendar pages (12 to 34) are calculated (every astronomer must have some starting place) exactly for the latitude (42 deg. 22 min. north) and longitude of Boston and in EASTERN STANDARD TIME which is the time of the 75th meridian West of Greenwich, England.

To overcome the difficulties of presenting one almanac which shall be useful not only for the spot where the astronomer is standing but also for other places, it has been customary to present three or four extra latitude columns — which at best give but a small measure of the desired accuracy. The Old Farmer's Almanac adopted a unique, copyrighted system of its own some years ago whereby the times as given may be corrected for wherever you happen to live by the use of the Almanac Data tables on pages 104 through 109.

Opposite the times given on the left hand calendar pages (12-34) for each day in the year for the Rising and Setting of the Sun, Moon and Planets you will find a capitalised letter of the alphabet. Turning to pages 108 and 109 you will find columns for each of these letters as well as number of cities listed. If you live in one of those cities, simply read off the minus or plus number of minutes in the column under the alphabetical letter and correct the times given on pages 12-34. If your city is not listed, enter the corrections table on pages 108 and 109 in that section, the longitude of which is nearest your town's and, using your town's latitude, interpolate between the corrections shown for various latitudes for figures to insert in Columns A to Q for your town in the space below.

Modify these figures by four minutes for each degree of difference of longitude between the longitude of your town and the longitude of the table chosen as nearest it. Add this modification if your town's longitude is greater than the table's longitude, subtract it if it is lesser.

The net figures resulting from this modification will be those to use in correcting the Almanac figures for Boston to give the standard times for your town. The figure for insertion in the Moon column (M) is derived by interpolating between longitudes to fit the longitude of your town.

Do You Suffer Distress From

'PERIODIC'

FEMALE WEAKNESS

and feel so nervous
several days before?

Do female functional monthly ailments make you suffer painful distress, make you feel so nervous, so strangely restless, tired and weak—at such times (or a few days just before your period)?

Then start taking Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. No other medicine of this type for women

has such a long record of success. Pinkham's Compound not only relieves this monthly pain but also pre-period nervous tension and cross, irritable emotions—of this nature. It has such a comforting antispasmodic action on one of woman's most important organs. Regular use helps build up resistance against such female distress. Truly the woman's friend!

NOTE: Or you may prefer

with added iron.

LYDIA E. PINKHAM'S Vegetable Compound

EXAMPLES OF HOW TIMES GIVEN PAGES 12-34 ARE TO BE CORRECTED FOR YOUR HOME TOWN

Sunrise and Sunset. The times of sunrise and sunset at Boston on April 11 are read directly from columns 4 and 6 on page 18. The key letters adjacent to these times, in columns 5 and 7, are indices to the table on page 108 whereby the times of sunrise and sunset at Boston are converted into those for other key cities, to wit:—

BOSTON			HOUSTON, TEXAS		
Sunrise	5:11	A.M.E.S.T.	Sunrise (Boston)	5:11	A.M.E.S.T.
Key Letter		G	Correction (Column G, page 108)	+ :49	
			<hr/>		
			Sunrise (Houston)	6:00	A.M.C.S.T.
Sunset	6:21	P.M.E.S.T.	Sunset (Boston)	6:21	P.M.E.S.T.
Key letter		K	Correction (Column K, page 108)	+ :24	
			<hr/>		
			Sunset (Houston)	6.45	P.M.C.S.T.

Sun Fast. The column headed "Sun Fast" is of primary use to sundial enthusiasts. The figures therein tell how fast on each day the time indicated by a *properly adjusted and graduated* sundial will be of the time indicated by a clock. On April 11 sun time in Boston will be 15 minutes Fast of Eastern Standard Time. The time indicated by a sundial located elsewhere than in Boston is converted to clock time by applying two corrections, the "Sun Fast" correction for Boston and that for the locality given in Column I of the table on page 108 or 109.

Dawn and Dark. The approximate times dawn will break and dark descend are found by applying the length of twilight taken from the table below to the times of sunrise and sunset given on the calendar pages. The latitude of the locality determines the column of the table from which the length of twilight is to be selected. See pages 108, 109 to interpolate your latitude.

BOSTON (Latitude 42° 22' N.)			NORFOLK, VA. (Latitude 36° 51' N.)		
Sunrise	5:11	A.M.	Sunrise	6:02	A.M.
Subtract length of twilight (Column 4 of table)	1:39		Subtract length of twilight (Column 4 of table)	1:28	
<hr/>			<hr/>		
Dawn breaks	3:32	A.M.E.S.T.	Dawn breaks	4:34	A.M.C.S.T.
Sunset	6:21	P.M.	Sunset	6:56	P.M.
Add length of twilight	1:39		Add length of twilight	1:28	
<hr/>			<hr/>		
Dark descends	8:00	P.M.E.S.T.	Dark descends	8:24	P.M.C.S.T.

LENGTH OF TWILIGHT

Subtract from time of sunrise for dawn.

Add to time of sunset for dark.

Latitude	25°N to 30°N	31°N to 36°N	37°N to 42°N	43°N to 47°N	48°N to 49°N
	h m	h m	h m	h m	h m
Jan. 1 to Apr. 11	1 20	1 26	1 33	1 42	1 50
Apr. 11 to May 3	1 23	1 28	1 39	1 51	2 04
May 3 to May 15	1 26	1 34	1 47	2 02	2 22
May 15 to May 26	1 29	1 38	1 52	2 13	2 42
May 26 to July 23	1 32	1 43	1 59	2 27	—
July 23 to Aug. 4	1 29	1 38	1 52	2 13	2 42
Aug. 4 to Aug. 15	1 26	1 34	1 47	2 02	2 22
Aug. 15 to Sept. 6	1 23	1 28	1 39	1 51	2 04
Sept. 6 to Dec. 31	1 20	1 26	1 33	1 42	1 50

Length of Day. The figures in the column headed "Length of Day" give directly the length of time the Sun will be above the horizon at Boston. The length of day in other localities is found by subtracting the time of sunrise from that of sunset for each locality. (See *Sunrise and Sunset* above).

BOSTON		HOUSTON, TEXAS	
Length of day (From calendar pages)	13h 11m	Sunset Sunrise	6:45 P.M. 6:00 A.M.
		Length of Day	12h 45m

Moonrise and Moonset. The procedure for finding the times of moonrise and moonset follows that for finding those of sunrise and sunset except that the constant additional correction taken from Column **3** on pages 108, 109 must be applied.

BOSTON		HOUSTON	
Moonrise Key letter	11:10 P.M., E.S.T. Q	Moonrise (Boston) Correction (Col- umn Q, page 109) —:10 Correction (Col- umn 3 , page 109) +:04	11:10 P.M.
		Moonrise (Houston)	11:04 P.M., C.S.T.

Moon Souths. The time the moon souths in Boston is converted to the time it is due south in a locality other than Boston by applying the appropriate corrections from Columns I and **3** on page 48.

BOSTON		HOUSTON	
Moon souths	3:51 P.M.E.S.T.	Moon souths (Boston) Correction (Col- umn I, page 109) +:37 Correction (Col- umn 3 , page 109) +:04	3:51 P.M.
		Moon souths (Houston)	4:32 P.M., C.S.T.

The other information concerning the Moon contained on the left hand Almanac pages applies without correction throughout the United States.

Risings and Settings of the Planets. The times of the rising and setting of the naked eye Planets with the exception of Mercury are given for Boston in the table on page 4. The procedure for converting these times to those of other localities follows that for converting the times of sunrise and sunset given on page 104.

Concord, N. H.	May 7 — Oct. 3		

WEATHER TABLE, For foretelling the Weather through all the lunations of each year, forever.

This table, and the accompanying remarks, are the result of many years' actual observation, the whole being constructed on a due consideration of the attraction of the sun and moon, in their several positions respecting the earth, and will, by simple inspection, show the observer what kind of weather will most probably follow the entrance of the moon into any of its quarters, and that so near the truth as to be seldom or never found to fail.

This weather table will answer very well for anywhere in the United States. It is taken from the 1849 issue of The Old Farmer's Almanac and was widely used before the advent of the Weather Bureau.

The weather forecasts as given on the right hand pages of the Farm Calendars on pages 13 through 35 are strictly for Boston and East of the Hudson River. These forecasts contain elements which rise in the proximity of this region to the sea and to the paths of tropical storms. The application of these forecasts to middle western, western, and southern regions will not bring any reasonable degree of accuracy. However, for a rough rule of thumb if you insist on using the forecast on pages 13-35, you may subtract one day for each time zone West of the Hudson to compensate for the Easterly path of continental storms. For every hundred miles north or south of 42 degrees latitude, add a five degree temperature (colder if north, warmer if south) differential and for every 1000 feet above sea level consider your locality as five degrees cooler than the weather as given.

WEATHER TABLE FOR ANYWHERE

Moon	Time of Change	In Summer	In Winter
If the new moon, 1st quarter, full moon, or last quarter happens.	From Midnight to 2 A.M.	Fair	Hard frost, unless wind be S. or W.
	From 2 A.M. to 4 A.M.	Cold, with frequent showers	Snow and stormy
	From 4 A.M. to 6 A.M.	Rain	Rain
	From 6 A.M. to 8 A.M.	Wind and Rain	Stormy
	From 8 A.M. to 10 A.M.	Changeable	Cold Rain if wind be W.; Snow if E.
	From 10 A.M. to Noon	Frequent Showers	Cold & high wind.
	From Noon to 2 P.M.	Very rainy	Snow or rain.
	From 2 P.M. to 4 P.M.	Changeable	Fair & mild.
	From 4 P.M. to 6 P.M.	Fair	Fair.
	From 6 P.M. to 8 P.M.	Fair — if wind N.W. Rain — if S. or S.W.	Fair & frosty if wind N. or N.E.: Rain or snow if wind S. or S.W.
	From 8 P.M. to 10 P.M.	Same as from 6 P.M. to 8 P.M.	
	From 10 P.M. to Midnight	Fair	Fair & frosty.

Observations. — 1. The nearer the moon's changes, first quarter, full, and last quarter are to *midnight*, the fairer will it be during the next seven days.

2. The space for this calculation occupies from ten at night till two next morning.

3. The nearer to *midday*, or *noon*, the phases of the moon happen, the more foul or wet weather may be expected during the next seven days.

4. The space for this calculation occupies from ten in the forenoon to two in the afternoon. These observations refer principally to the summer, though they affect spring and autumn nearly in the same ratio.

5. The moon's change, first quarter, full and last quarter, happening during six of the afternoon hours, i.e., from four to ten, may be followed by fair weather; but this is mostly dependent on the *wind*, as is noted in the table.

6. Though the weather, from a variety of irregular causes, is more uncertain in the latter part of autumn, the whole of winter, and the beginning of spring, yet, in the main, the above observations will apply to those periods also.

7. To prognosticate correctly, especially in those cases where the *wind* is concerned, the observer should be within sight of a good *vane*, where the four cardinal points of the heavens are correctly placed.

The above table was originally formed by Dr. Herschell, and is now published with some alterations founded on the experience of Dr. Adam Clarke.

TO THE WEATHER-WISE

Dr. Foster, of Bruges, who is well known as a meteorologist, declares that, by journals of the weather kept by his grandfather, father, and himself, ever since 1767, to the present time, whenever the new moon has fallen on a Saturday, the following twenty days have been wet and windy, in nineteen cases out of twenty.

TIDE CORRECTIONS

To obtain the time and height of high water at any place, apply the differences in accordance with the sign given to the daily predictions for Boston (Commonwealth Pier). Where a value in the "height difference" column is preceded by an*, the height at Boston should be multiplied by this ratio.

Example: The figures for Full Sea in Columns 11 and 12 of the left hand Almanac pages 12-34 are the times of high tide at Commonwealth Pier in Boston Harbor. The heights of these tides are given on the right hand pages 13-35. The heights are reckoned from Mean Low Water: each day has a set of figures—upper for the morning—and lower for the evening. Since Gulf ports are not beset with the tidal problems of ports on the open ocean, the conversion of the times of the tides at Boston to those of Miami is given by way of illustration.

See page 18, column 11.

JORDAN MARSH COMPANY

NEW ENGLAND'S LARGEST STORE

invites you to its

100th

ANNIVERSARY

Because New England — past and present — has made our future possible — we hope all New Englanders will join us in our great year-long 1951 Centennial Celebration. A hundredth anniversary is rare in the mercantile world and we are bursting with pride over ours. Our 1951 calendar is crammed full of exciting events, activities, displays, and merchandising offerings. Our every effort during 1951 will be devoted to making it the most rewarding year in the memories of the New England shopper.

HERE'S MY **ALMANAC**
AND GUIDE TO THE "DRINK-OF-THE-MONTH"

January	Cold nights! Drink Clicquot Club <i>Ginger Beer</i>
February	Still cold! Try Clicquot Club <i>Golden</i>
March	Spring's coming! Drink that good old tonic drink, Clicquot Club <i>Sarsaparilla</i>
April	Showers! Offset by Clicquot Club <i>Pale Dry</i>
May	Warmer! Try Clicquot Club <i>True Fruit Raspberry</i>
June	Summer's ahead! Stock up with Clicquot Club <i>Lemon & Lime</i>
July	Hot! Make tall drinks with Clicquot Club <i>Tom Collins Mixer</i>
August	Ditto! Ditto for Clicquot Club <i>Lime Rickey</i>
September	Still warm! Cool off with Clicquot Club <i>Orange</i>
October	Glorious! Drink Clicquot Club <i>Root Beer</i>
November	Turkey time! Serve Clicquot Club <i>Cola</i>
December	Holidays ahead! Keep plenty of Clic- quot Club <i>Sparkling Water</i> on hand!

WHERE ELSE WOULD YOU FIND IT . . . ?

Chester Dutton, long time auctioneer in these parts, always asks this question when he has on his auction table some particularly fine piece. The item at hand just is not to be found other than there and at that moment.

Thousands of others ask the same question after they have looked over a copy of YANKEE Magazine . . . and the hundreds of items in it which just are not found anywhere else. YANKEE is not on sale at the news stands everywhere. It is hard to find because it is sold by subscription only. Furthermore, you won't find quotations from it in any of the so-called "digest" magazines either.

YANKEE Magazine is a true reflection of the gracious American way of life. Your subscription to it is in a sense your affirmation of this way of life—one of the ways you have telling Stalin and his racketeer "comrades" you haven't any idea of giving in to them either on the fighting or the home front.

So, don't let this opportunity go by (it is made up for you by the publisher of The Old Farmer's Almanac, and it comes to you, just as the Almanac does, from the building shown above.)

THIS IS IT: For only One Dollar (Cash, Stamps, or Money Order) we will send you the next six monthly issues of YANKEE. To **ORDER:** Just fill out the coupon below, enclose One Dollar, and mail to Yankee, Inc., Dublin, New Hampshire.

Cordially yours,

Robb Sagendorph,

President, Yankee, Inc.

YANKEE, INC., DUBLIN, NEW HAMPSHIRE, U.S.A. . . . Yes, Yankee, I want the next six issues of Yankee Magazine. I enclose One dollar.

Name

Street

City Zone State

P.S. If you prefer not to clip the coupon, your order in a letter or on a card will do as well. Free sample copy, of course, of YANKEE if you'd like to have a look first.

"ARM & HAMMER" and "COW BRAND" BAKING SODAS

● Both are U.S.P. Bicarbonate of Soda, classified as official remedies by the Council on Pharmacy and Chemistry of the American Medical Association.

● Both are acceptable to the Council on Dental Therapeutics of the American Dental Association for use as dentifrices.

● For generations, of course, they have been recognized as essential aids to good cookery.
