§ 803.6 *General Order No. 6.* (a) The hiring of an individual at a wage or salary rate in excess of the rate properly established in the plant for employees of similar skill and productive ability within the classification in which the individual is employed is an increase in wages or salary within the meaning of Executive Order 9250, and the regulations of the Director of Economic Stabilization, and requires the approval of the National War Labor Board.

§ 803.31 *Schedules.* * * *

II-F *Restrictions on hiring employees at rates in excess of the minimum rate of the properly established rate range for a given job classification—1. Existing establishments.* An employer shall hire employees at the minimum of the properly established rate range for a given job classification; *Provided, however,* That an employee who has special ability and experience may be hired at a rate within the range corresponding to such ability and experience. But an employer may not, within a given year (which shall be the same year as the one used by the employer in calculating the average amount of merit or length of service increases given under section II-C-1 of this General Order), hire more than 25 percent of all the employees hired for any job classification, at rates in excess of the minimum of the properly established rate range for that job classification. In any job classification in which fewer than four employees are hired within the year, one employee who has special ability and experience may be hired at a rate in excess of the minimum rate of the properly established rate range. If, before the effective date of this amendment, an employer has had a plan properly in existence (as defined in this General Order) which provides that some percentage of employees in excess of 25 percent may be hired at rates above the appropriate minimum rate, such provision may be continued in effect. All other employers are subject to the restrictions of this or the following sub-section (II-F-1 or II-F-2).

2. *New establishments or new departments in existing establishments.* An employer shall hire employees at the minimum of the properly established rate range for a given job classification; *Provided, however,* That an employee who has special ability and experience may be hired at a rate within the range corresponding to such ability and experience. - (2) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency or any organized group of persons whether incorporated or not.
- (3) "Producer" means any person engaged in the production of F-12 gas.
- (4) "Supplier" means any person to the extent that he is engaged in the business of distributing F-12 gas to persons using the same for installation in refrigerating or air conditioning systems. The term shall include an equipment manufacturer to the extent that he engages in the sale of F-12 gas which has not been installed in such systems. "System" means any "system" as defined in General Limitation Order L-38.
- (5) "Equipment manufacturer" means any person to the extent that he uses F-12 gas for charging new refrigerating or air conditioning systems or parts of systems manufactured by him. It does

not include affiliates, subsidiaries, branches, divisions or sections or an enterprise, if not actually engaged in the manufacture of systems or refrigerant containing parts of systems.

(6) "Insecticide manufacturer" means any person to the extent that he uses F-12 gas in the production of insecticide.

(7) "User" means any person who installs F-12 gas in a refrigerating or air-conditioning system, other than an equipment manufacturer. It includes suppliers, service agencies, owners or lessees, to the extent that they engage in installing F-12 gas in any system.

(8) "Contract agent" means any person to whom or for whose account F-12 gas is delivered by a producer for distribution to suppliers.

(If the same person, or two or more branches, divisions or sections of the same enterprise, acts in two or more capacities as contract agent, supplier, equipment manufacturer, or insecticide manufacturer, the particular provisions of this order which apply to the respective activities must be followed, to the extent to which the various provisions are applicable to each activity.)

(b) Systems for which no deliveries are permitted. (1) No person (including users, dealers, and other suppliers, and producers) shall deliver, or accept delivery of, any F-12 gas for use in, or for resale for use in any new or used system which is of a type referred to in List A, unless the delivery and use has been specifically authorized in writing by the War Production Board. It will be the general policy of the Board not to authorize delivery and use of F-12 gas for any List A system except in the following cases:

- (i) When the major portion of the space to be air conditioned is used as a radio broadcasting studio, auditorium, hotel, restaurant, cafeteria, school, office or office building, or department store, and one of the following conditions exists: The building is "windowless" or one

in which the windows cannot be opened for ventilation (such as glass brick, or glass set in a fixed frame which was built into the surrounding wall in an immovable way); or the rooms needing air conditioning are interior ones having no other means of adequate ventilation and are either served by a separate system or constitute a major portion of the space regularly occupied by persons and are served by one central system; or

(ii) When the system is used to air condition a room or rooms in a single family residence or a single apartment and its continued operation is essential to protect the life or restore the health of a person suffering from a serious ailment or disease and under care of a licensed physician, and a statement to that effect by such physician is also furnished with the application referred to below.

Application for WPB permission to get F-12 gas for such a use should be made by the owner or operator of the system by letter in duplicate (or in an emergency, by wire confirmed immediately by letter) to War Production Board, General Industrial Equipment Division, Washington 25, D. C., Ref. M-28 giving the address and a description of the building(s) in which the system is located and stating the extent to which the system comes within either of the cases described above, the quantity of F-12 gas needed, and the name and address of the probable supplier. The authorization, if granted, will be sent to the applicant, who should show it to his supplier when requesting delivery.

(2) During the period from November 12, 1943, through August 31, 1944, no person (including users, dealers, and other suppliers, and producers), shall deliver, or accept delivery of, any F-12 gas for use in, or for resale for use in any new or used system of any type (not in List A) unless the system must be operated under one or more of the following conditions:

- (i) Where an air-cooled condenser is used and the ambient temperature is 110° F or higher; or
- (ii) Where the saturated refrigerant temperature corresponding to the suction pressure is less than minus 10° F; or
- (iii) Where aluminum or magnesium alloys or rubber (except synthetic rubber) have been used in construction of the system and come in contact with the refrigerant, and are not easily replaceable; or
- (iv) Where the system is for use aboard ship, or outside of the continental United States by the Army, Navy, Maritime Commission or War Shipping Administration; or
- (v) Where the total operating charge required to operate the system is ten (10) pounds or less of F-12 gas and the system was in operation on November 12, 1943, and is used for food preservation or for storage of penicillin, blood serum,

blood for plasma, blood plasma, biologicals and bacteriologicals; or

(vi) Where the use of no Group 2 or Group 3 refrigerants, as defined in the American Standard Safety Code for Mechanical Refrigeration, ASRE Circular No. 15, ASA-B 9-1939, as approved by the American Standards Association April 20, 1939, is permitted by that Code; or

(vii) Where the system is used in a sealed railroad car or sealed bus.

(The above restrictions apply not only to systems used for ordinary civilian purposes, but also to those owned, operated, or used within the continental United States by the Army, Navy, Maritime Commission or War Shipping Administration, including post exchanges and ships service stores, other than those used aboard ships.)

(3) Attention is called to paragraph (c) (2), which prohibits a supplier from delivering F-12 gas except on certified orders.

(c) *Deliveries by suppliers.* (1) No supplier or any other person (except a producer) shall deliver any F-12 gas for export outside of the continental United States, or for use by any of the following non-retail users (or to any ship yard or other person for use in a system to be delivered to any of them), namely: The Army, Navy, Maritime Commission, War Shipping Administration, post exchanges, ships service departments and activities, equipment and insecticide manufacturers, for new or used systems, or for use in insecticide, without specific authorization from the War Production Board. Subject to the foregoing restriction, any supplier or any other person (except a producer) may deliver F-12 gas to any other person, for use in any new or used system not referred to on List A of this order, if it must be operated under one or more of the conditions stated in (b) (2) (i) to (b) (2) (vii) both inclusive.

No person shall accept from a supplier or other person any delivery of F-12 gas which is prohibited by the restriction in this order.

(2) Whenever the owner of a system or any other user wishes to obtain F-12 gas for installation in a system or systems for which deliveries by suppliers are permitted under this order, he may place his order with any supplier for the minimum quantity, which the available cylinder or cylinders permit, necessary to bring the charge in the system or systems up to a normal operating charge. He must certify his order, or the vendor's delivery receipt, by a certificate endorsed on or attached to it, showing that the F-12 gas is to be used for such purposes only, and that he is not holding any empty cylinders not owned by him, which shall be in substantially the following form:

The undersigned purchaser certifies to the seller and the War Production Board that he does not have any F-12 gas cylinders not owned by him, which have been empty for more than 15 days; and that the F-12 gas covered by this order will not be used or resold for any purposes not permitted by Order M-28.

Such certificate, which must be signed by the purchaser or his authorized official, will constitute a representation that what is stated in it is true. A supplier must not deliver any F-12 gas except under certified orders; and he must not make delivery under any order which is certified if he knows, or has any reason to believe that the certificate furnished with such order is untrue, incomplete, or inaccurate. In such a case the supplier must reject the order, and should explain why he is doing so, so that the prospective purchaser can comply with this order. Each supplier must keep all accepted orders and certificates which he receives, for a period of two years, for inspection by the War Production Board. (Certificates in the form required by this order before its amendment on November 12, 1943, may continue to be used for 30 days after that date, in place of the above form.)

This restriction shall not prevent a person who services several systems for which deliveries are permitted by this order from purchasing a cylinder of F-12 gas from a supplier, if the amount purchased is the smallest quantity practicable considering the sizes of the standard commercial cylinders and the amount needed in his current operations.

(3) No "standby charge" or any other quantity of F-12 gas, over and above that needed to bring the total charge in a system or systems up to the normal operating charge, shall be delivered to or accepted by any person for use in a system which he owns, leases, or operates (except the Army, Navy, Maritime Commission or War Shipping Administration): except, however, that a "standby charge" may be maintained for a system which is operated primarily for one of the following purposes: air conditioning or refrigeration for the production and storage of penicillin, or blood serum; or refrigeration for the storage of blood for plasma, or the production or storage of blood plasma.

(d) *Deliveries by producers.* Each producer shall hold his entire inventory of F-12 gas, together with all additional quantities produced or otherwise obtained by him from time to time, for delivery under such orders and for such uses as may be authorized or directed from time to time by the War Production Board. No deliveries of F-12 gas shall be made by a producer except pursuant to specific authorizations or directions heretofore or hereafter issued by the War Production Board.

(e) The provisions of this order shall be followed by every producer, contract agent, supplier, user, equipment manufacturer, insecticide manufacturer, and any other person buying, selling or delivering F-12 gas, without any regard to any preference ratings which have been assigned or which may hereafter be assigned to particular contracts or orders.

(f) *Miscellaneous provisions—(1) Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as issued and amended from time to time.

(2) *Reports.*¹ (i) Each equipment manufacturer who wishes to secure delivery of F-12 gas during any month for charging systems or parts produced by him, or for factory repair and charging of sealed or hermetic condensing units, shall file with the War Production Board, on or before the 15th day of the preceding month a report on Form WPB-3326, prepared in accordance with the instructions for such form.

(ii) Any person wishing to secure F-12 gas during any month for ultimate uses (such as testing coaxial cable for leaks) other than the charging of new or used refrigeration or air conditioning systems or parts or use in insecticide, shall file with the War Production Board, on or before the 20th day of the preceding month, a report by letter, in triplicate, showing the minimum amount required for the month, the purpose for which required, and the amount used during the preceding calendar month for that purpose.

(3) *Violations.* Any person who willfully violates any provisions of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, materials under priority control, and may be deprived of priorities assistance.

(4) *Appeals.* Any appeal from the provisions of this order, or any direction thereunder, shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(5) *Communications.* All reports to be filed and other communications concerning this order should be addressed to: War Production Board, General Industrial Equipment Division, Washington 25, D. C., Ref. M-28.

Issued this 5th day of July 1944.

INTERPRETATION 1

[Interpretation 1 revoked November 12, 1943]

INTERPRETATION 2

(a) Quantities which may be obtained by system owner. Subparagraph (c) (2) permits the owner (or lessee) of a refrigerating or air conditioning system (not on List A) who does his own installation of F-12 gas, to place his order for the minimum quantity "which the available cylinder or cylinders permit", necessary to bring the charge in his system up to a normal operating charge.

The standard commercial cylinders are generally available in sizes which contain four pounds, ten pounds, twenty-five pounds, and one hundred forty-five pounds of the gas, and a particular supplier may not have all four sizes in stock at all times. Questions will therefore arise as to the number and sizes of cylinders which the owner of a system is permitted to obtain, if the particular supplier with whom his purchase order is first placed should not happen to have the sizes of cylinder from which the minimum quantity needed by the system can be furnished the owner.

In such a case, the owner of the system should make a reasonable effort to obtain the minimum quantity which he needs, from some other supplier in his locality, rather than purchase an excessive quantity from the first supplier upon whom he calls. While the order does not prescribe rigid rules as to exactly what effort the purchaser should make in every case, it is required that he do whatever is practicable, under his particular conditions, to obtain the minimum quantity which he needs, and no more.

Where he is located in a large community in which there are a number of suppliers, he should contact several, if necessary in order to obtain the quantity needed. If he hap-

pens to be located in a small community where there is only one supplier who cannot furnish the exact quantity needed and the F-12 gas must be obtained immediately in order to avoid spoilage of a substantial quantity of food, the restriction would not prevent him from obtaining a larger amount, if that is unavoidable without letting his food spoil.

As a guide to the number and size of cylinders which should normally be obtained, for the different quantities of F-12 gas which may be needed in different cases, the following table is furnished:

Pounds of F-12 gas required	Amounts which should be ordered			
	Number of cylinders			
	4 pounds	10 pounds	25 pounds	145 pounds
0-4	1			
5-9		1		
10-14	1	1		
15-24		2 or	1	
25-29	1		1	
30-39	1	1	1	
40-49	1	2	1	
50-59		1	2	
60-69		2	2	
70-79	1		3	
80-89	1	1	3	
90-110		1	4	
111-145				1
146-170			1	1
171-195			2	1
196-220			3	1
221-245			4	1
246-290				2
291-315				2
316-340			2	2
341-365			3	2
366-390			4	2
391-435				3

The above interpretation applies only where the system owner buys his F-12 gas from a supplier, and installs it himself. If he has a service shop install the gas, the shop will always be able to furnish no more than the amount actually needed, from its service cylinders, and there will be no problem.

(b) Installation of F-12 gas in systems or parts held by equipment manufacturers or dealers. Paragraph (b) (1) prohibits deliveries of F-12 gas for systems on List A; (b) (2) prohibits deliveries for any other system, unless it must be operated under one or more of the conditions specified. These restrictions are intended to prevent deliveries of F-12 gas where there is a sale or other delivery of the gas. They prevent an equipment manufacturer or other person from delivering F-12 gas in any new or used system or refrigerant-containing parts if charged with F-12 gas furnished by him after the effective date of the applicable restriction, for any prohibited use.

These restrictions do not prevent the withdrawal and reinstallation of F-12 gas in the course of repairing a used system or refrigerant-containing part, where no additional F-12 gas is added to what was already in the system or part.

Neither do they restrict the delivery of new or used systems or refrigerant-containing parts which had already been charged at the time the applicable restriction became effective; nor do they prevent the owner or lessee of any installed system who had F-12 gas in his possession on the effective date of the applicable restriction, from charging the system with such gas, or having someone else do this charging for him, where no transfer of possession or ownership is involved. PART 3109—MEDICAL EQUIPMENT AND SUPPLIES SIMPLIFICATION

[General Limitation Order L-214, Schedule 2, as Amended July 5, 1944]

CORRECTIVE SPECTACLES

Section 3109.3 Schedule 2 to General Limitation Order L-214 is hereby amended to read as follows:

§ 3109.3 Schedule 2 to General Limitation Order L-214—(a) Definition. For the purposes of this schedule: "Corrective spectacles" means spectacles designed to correct or assist defective vision in which corrective focus lenses are employed.

(b) Restrictions on the use of nickel and nickel-bearing alloy.¹ No person shall incorporate any nickel or nickel-bearing alloy in the manufacture of corrective spectacles (or any part thereof) except to the extent permitted below:

(1) Nickel silver (containing not more than 10% nickel in the alloy) may be used in any part of metal spectacleware (including oxford-type spectacleware) and xylonite spectacleware.

(2) Nickel silver (containing not more than 18% nickel in the alloy) may be used in screws and dowels for metal spectacleware and xylonite spectacleware.

(3) Pure nickel or any nickel-bearing alloy may be used in:

(i) Pad-arm assemblies for metal spectacleware;

(ii) Arms (of the type not fastened to the lens) on semi-rimless metal spectacleware; and

(iii) Plating of "white metal" spectacleware.

(c) Restriction on the eyesize of metal frames. No person shall manufacture any metal frame for corrective spectacles which has an eye with a circumference or periphery of more than 144.5 mm. There is no restriction on the shape of the eye, but the circumference or periphery of the eye must not be greater than 144.5 mm.

(d) Exception for Army and Navy orders. The restrictions of this schedule do not apply to the manufacture of corrective spectacles (or any part thereof) to fill orders or contracts from or for the account of the Army or Navy of the United States, if such spectacles (or parts) are manufactured in conformity with the specifications applicable to the particular order or contract.

[F. R. Doc. 44-9870; Filed, July 5, 1944; 11:21 a. m.]

¹ NOTE: The former editions of this schedule restricted the use of all metals in corrective spectacles. This amendment has the effect of removing those restrictions with respect to all metals except nickel and nickel-bearing alloy and also permits the use of nickel and nickel-bearing alloy in certain parts not permitted by the previous editions of the schedule.

PART 3159—BISMUTH

[Conservation Order M-276, as Amended July 5, 1944]

BISMUTH

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of bismuth for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3159.1 *Conservation Order M-276*—(a) *Definitions*. For the purposes of this order:

(1) "Bismuth" means: (i) Refined bismuth in such forms as bars, ingots, pigs, sticks, slabs, cakes, moss powder, or other shapes, suitable for production of industrial or medicinal products; or

(ii) Any primary alloy containing more than 0.5% bismuth (by weight) which has been produced in the normal process of refining non-ferrous ores or concentrates, bullion, residues, or flue dust, suitable for production of finished bismuth-bearing alloys.

(2) "Producer" means any person who produces bismuth as a primary or secondary metal or as by-product in the conduct of any enterprise.

(3) "Distributor" means any person regularly engaged in the business of buying and selling bismuth.

(4) "Consumer" means any person who uses bismuth in the manufacture of alloys, solders, compounds, salts, mixtures, medicinal products, or other bismuth-bearing materials.

(c) *Restrictions on deliveries*. (1) Notwithstanding any contract or agreement to the contrary or the receipt of any preference rating, no person shall deliver bismuth after July 1, 1944; except as follows:

(i) To a producer or distributor; or

(ii) To Metals Reserve Company, to any other corporation organized under section 5 (d) of the Reconstruction Finance Corporation Act as amended (15 U.S.C., section 606 (b)), or to any duly authorized agent of any such corporation; or

(iii) To a consumer if the amount delivered, together with all other amounts received by that consumer during the calendar month, does not exceed 100 pounds; or

(iv) Pursuant to specific authorization of the War Production Board based on the application of the consumer on Form WPB-2278, or otherwise.

(2) No person shall accept delivery of bismuth in violation of the provisions of paragraph (a) (1) above.

(3) No distributor shall accept delivery of bismuth without specific authorization of the War Production Board if the inventory of the distributor is, or will by virtue of such acceptance become, in excess of the practicable minimum working inventory reasonably necessary to meet deliveries of bismuth on the

basis of the distributor's current rate of sale.

(d) *Restrictions on use*. Notwithstanding any contract or agreement to the contrary or the receipt of any preference rating, no consumer shall, after July 1, 1944, put into process or change the form or shape of bismuth except as follows:

(1) In amounts of less than a total of 100 pounds in any month; or

(2) Pursuant to specific authorization of the War Production Board for all amounts over a total of 100 pounds, based on the application of the consumer on Form WPB-2278, or otherwise.

(e) *Reports*. Any distributor or consumer who on the first day of any calendar month has in his possession or under his control a quantity of bismuth in excess of 100 pounds, or who has received or used in the preceding month a quantity of bismuth in excess of 100 pounds, shall file a report on Form WPB-2278 with the War Production Board. This report shall be filed in accordance with the instructions to the form. The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(f) *Communications*. All communications concerning this order should be addressed to: War Production Board, Tin-Lead Division, Washington 25, D. C., Ref.: M-276.

(g) *Violations*. Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and, upon conviction, may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control, and may be deprived of priorities assistance.

PART 3290—TEXTILE, CLOTHING AND LEATHER

[Conservation Order M-138, as Amended July 5, 1944]

ISTLE

§ 3290.261 *Conservation Order M-138*—(a) *Definitions*. For the purposes of this order:

(1) "Istle" means raw unprocessed pita and palma istle of the grade "fair average quality" only.

(2) "Istle product" means yarn, roving, or twine or products made therefrom processed from "istle," alone or in combination with other fibers.

(4) "Damaged istle" means "istle" that has been rejected by Defense Supplies Corporation, or "istle" upon which an adjustment has been made by an insurance adjuster as a result of any kind of damage making a given bale or bales unsuitable, wholly or in part, for use in the manufacture of products permitted by this order.

(5) [Deleted July 5, 1944]

(6) [Deleted July 5, 1944]

(b) *Importation of istle*. The importation of istle and istle products is subject to the provisions of General Imports Order M-63 as amended from time to time.

(i) Rope.

(ii) Twine, provided only palma istle is used.

(iii) Any product for ultimate delivery to, or for incorporation into any material for ultimate delivery to the Army or Navy of the United States, the Maritime Commission or War Shipping Administration.

(iv) Any product, for the manufacture of which any istle or istle product is allocated in accordance with paragraph (e).

Any processor or dealer who has in his possession damaged istle defined in paragraph (a) (4), or istle products defined in paragraph (a) (2) that are damaged, shall report to the War Production Board the nature of the damage and the quantity not suitable for the manufacture of the products, or for the end uses permit-

ted by this order. The report shall be by letter setting forth all pertinent facts, including a statement of the portion of each bale or package actually damaged. After making that report and receiving from the War Production Board an acknowledgment which does not object to his claim of damage, he may then use or dispose of the portion of each bale or package, actually damaged and so reported, free from the restrictions of this order. (Note: See paragraph (i).)

NOTE: Paragraphs (e) and (f), formerly (d) and (e), redesignated July 5, 1944.

(i) *Reports.* Any person who acquires or puts into process any istle shall report on Form WPB-914, formerly PD-469-Part 1, as required on the form. The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942. Persons affected by this order shall file such other reports and questionnaires as may from time to time be required, subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(j) *Communications.* All reports required to be filed hereunder and all com-

munications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Textile, Clothing and Leather Bureau, Washington 25, D. C., Reference: M-138.

(k) *Violations.* Any person who willfully violates any provision of this order or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

PART 3290—TEXTILES, CLOTHING AND LEATHER

[Conservation Order M-217, Direction 1]

PART 3293—CHEMICALS

[Allocation Order M-340, as Amended July 5, 1944]

MISCELLANEOUS CHEMICALS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of the chemicals subject to this order for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3293.491 Allocation Order M-340—

(a) *Definitions.* (1) "Subject chemical" means any chemical listed in Appendix A, as therein defined.

(2) "Producer" means any person engaged in the production of any subject chemical and includes a person who imports any subject chemical or has it produced for him pursuant to toll agreement.

(3) "Distributor" means any person who buys any subject chemical for the purpose of resale without further processing and without changing the form thereof.

(4) "Supplier" means a producer or distributor.

(b) *Restrictions on deliveries.* (1) On and after the applicable effective date stated in Appendix A, no supplier shall deliver a subject chemical to any person except as specifically authorized or directed in writing by War Production Board. No person shall accept delivery of a subject chemical which he knows or has reason to believe is delivered in violation of this order.

(2) Authorization or directions as to deliveries to be made by suppliers in each calendar month will generally be issued by War Production Board prior to the beginning of such month, but may be issued at any time. They will normally be issued on Form WPB-2947 (formerly PD-602) which is to be filed by the supplier with War Production Board as explained in paragraph (g) below.

(3) If a supplier is authorized or directed by War Production Board to deliver a subject chemical to any specific customer or group of customers, but is unable to make the delivery either because of receipt of notice of cancellation or otherwise, the subject chemical shall revert to inventory, and shall not be delivered, or used, without further instructions.

(c) *Exceptions for small deliveries.* (1) Specific authorization in writing of War Production Board is not required for delivery by any supplier to any person in any calendar month of a subject chemical in a quantity not exceeding the quantity stated in Column 3 of Appendix B.

(2) The aggregate quantity of a subject chemical which any supplier may deliver in any calendar month pursuant to paragraph (c) (1), shall not exceed:

(i) The quantity which he has been specifically authorized, upon application pursuant to Appendix D, to deliver on small orders; or

(ii) If he is a distributor, the quantity which he acquired upon certification that it was required to fill small orders or the quantity which he acquired himself on such a small order, or

(iii) If he is a distributor who customarily delivers exclusively on small orders, any quantity.

(d) *Exceptions for deliveries for other reasons.* Specific authorization in writing of War Production Board is not required for delivery of a subject chemical by any supplier to any other person for a purpose stated in Column 4 of Appendix B.

(e) *Restrictions on use.* (1) On and after the applicable effective date stated in Appendix A, no supplier shall use a subject chemical except as specifically authorized or directed in writing by War Production Board.

(2) Each person who with an order for a subject chemical furnishes a certificate required by paragraph (f) shall use the subject chemical delivered on such order only as specified on such certificate except as otherwise specifically authorized or directed in writing by War Production Board.

(3) War Production Board may from time to time issue directions with respect to the use or uses which may or may not

be made of a subject chemical to be delivered to, or then in inventory of the prospective user.

(f) *Supplier to obtain from customer a certificate of use.* No supplier shall in any calendar month (beginning in the case of each subject chemical with the calendar month in which the order becomes effective as to that chemical as stated in Appendix A) deliver to any person a greater quantity of such subject chemical than is stated in Column 3 of Appendix B, unless he shall have received from such person a certificate as to the use for which such person is ordering such subject chemical. Such certificate shall be substantially in the form and shall be subject to the instructions stated in Appendix C and shall be in the hands of the supplier not later than the 15th day of the month preceding the month in which delivery is to be made. It need not be filed with War Production Board. A supplier must not deliver a subject chemical where he knows or has reason to believe the purchaser's certificate is false, but in the absence of such knowledge or reason to believe he may rely on the certificate.

(g) *Applications by suppliers for leave to deliver or use.* (1) Each supplier requiring authorization to make delivery of, or to use, a subject chemical during any calendar month shall file application on or before the 20th day of the preceding month. The application should be made on Form WPB-2947 (formerly PD-602) in the manner set forth in the general instructions appearing on that form, subject to the special instructions contained in Appendix D. If there is an inconsistency between the general and special instructions, the special instructions must be followed.

(2) War Production Board may issue to any supplier other and further directions with respect to preparing and filing Form WPB-2947 (formerly PD-602).

(h) *Miscellaneous provisions—(1) Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of War Production Board, as amended from time to time.

(2) *Violations.* Any person who willfully violates any provision of this order or who, in connection with this order willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(3) *Communications to War Production Board.* All reports required to be filed hereunder and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Chemicals Division, Washington 25, D. C. Ref: M-340.

SECTION 1. *Applicability.* Except for those sales exempted by paragraph (a)

*Copies may be obtained from the Office of Price Administration.

of this section, this regulation shall apply to all sales within the United States and to all deliveries, whether immediate or future, pursuant to said sales, of the following commodities:

Babassu oil meal, oil cake, sized cake and pellets;

Copra oil meal, oil cake, sized cake and pellets;

Ouricuri oil meal, oil cake, sized cake and pellets;

Palm kernel oil meal, oil cake, sized cake and pellets;

Sesame oil meal, oil cake, sized cake and pellets.

(a) *Exempt sales*—(1) *Export sales.* This regulation shall not apply to any export sale. The maximum price for such sales shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation, as amended.

(2) *Emergency purchases.* This regulation shall have no application to any purchase by the United States or any of its agencies under such circumstances of emergency as to make immediate delivery imperative, and as to render it impossible to secure or unfair to require immediate delivery at the maximum price which would otherwise be applicable, if such purchases and deliveries are made pursuant to the provisions of section 4.3 (f) of Revised Supplementary Regulation No. 1 to the General Maximum Price Regulation as amended: *Provided, however,* That the Administrator may, by order, waive the reporting of any part of the information required by section 4.3 (f) in connection with a particular purchase or group or purchases upon determining that such information may not reasonably be required under all the circumstances, and he may, in lieu thereof, require the reporting of other information more suited to the circumstances.

Sec. 2. *Sales at other than maximum prices.* (a) Regardless of any contract of obligation, no person shall sell or deliver, and no person shall, in the course of trade or business, buy or receive any of the products covered by this regulation at prices above the maximum prices established by this regulation nor shall any person agree, solicit, offer or attempt to do any of the foregoing: *Provided, however,* That certain agreements to raise prices are permissible, as provided for in subparagraph (1) of this paragraph.

(1) Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be

given by an order of the Administrator or of any official of the Office of Price Administration having authority to act upon the pending request for a change in price or to give the authorization.

(b) Prices lower than the maximum prices established by this regulation may, of course, be charged or paid.

Sec. 3. *Evasion.* Any method whereby a seller obtains greater consideration than the maximum price, or whereby he gives less than the consideration due the buyer for the maximum price is an evasion of this regulation, and therefore prohibited; and any offer or agreement which accomplishes or attempts to accomplish such a result is equally prohibited.

Sec. 4. *Documents, records and reports.* (a) Every seller, and every purchaser in the course of trade or business, shall keep for inspection by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, complete and accurate records of every sale and purchase covered by this regulation.

(b) Every person making a sale covered by this regulation shall, for each such sale, prepare an invoice or bill of sale in duplicate. He shall retain one copy for his file and give one copy to his customer. Each such invoice or bill of sale must state the name and address of the buyer and seller, the sales price and the maximum price, the kind and grade of commodity and quantity sold, its guaranteed protein content, if any, and some indication as to whether it was sold bulk or sacked. In addition, every processor and jobber preparing such an invoice or bill of sale, must state thereon the point of production of the commodity and he must separately state any charges included in the sale price for sacks or containers, and for transportation (in excess of those charges included in the base price) and any markup included in such price.

(c) Upon demand every such person shall submit such records and files to the Office of Price Administration and keep such further records as the Office of Price Administration may from time to time require.

Sec. 5. *Enforcement.* Persons violating any provisions of this regulation are subject to the license revocation and suspension provisions, civil enforcement actions, suits for treble damages and criminal penalties as provided in the Emergency Price Control Act of 1942, as amended.

Sec. 6. *Licensing.* The provisions of Licensing Order No. 1, licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sales for which his license has been suspended.

Sec. 7. *Protests and petitions for amendment.* Any person seeking an interpretation or an amendment of, or desiring to file a protest against any pro-

visions of this regulation, may do so in accordance with Revised Procedural Regulation No. 1, as amended, issued by the Office of Price Administration.

SEC. 8. Definitions. Except as otherwise provided in the articles of this regulation dealing with maximum prices, when used herein the following terms shall have the following meanings:

"Your transportation cost" means:

(a) When you employ a common carrier, contract carrier, or other carrier for hire or compensation:

(1) If the shipment originates at a point in the United States, the charges (exclusive of loading charges not customarily included in such transportation charges) which you actually incur;

(2) If the shipment originates outside the United States, the charges which you actually incur, not exceeding the lowest rail rate of freight applicable to the shipment from the point of entry to the point at which your customer assumes further transportation expenses;

(b) When you do your own hauling, the reasonable value of the transportation service (exclusive of loading), not in excess of the maximum price you could lawfully charge for a like service if you performed it as a contract carrier;

"Less-than-carload lot" means any lot of less than 60,000 pounds other than a carload shipment or a pool car lot. It includes any delivery by or into a truck.

"Unit of protein" equals one per cent of protein and "each unit of protein or fraction thereof" means the number of full units, if any, plus an additional unit for any fractional unit.

SEC. 9. Maximum prices for bulk sales of listed meal products—(a) By domestic processors. If you are a domestic processor, your maximum price varies with the location of the production plant and depends upon whether you transport and unload the lot prior to sale. The following prices are your maximum prices if you deliver in a lot of 60,000 pounds or more and for carload shipments and pool car lots. If you actually deliver a less than carload lot you may add \$1.00 per ton to the maximum prices set forth below in subparagraph (1) and (2).

(1) If the production plant is located in the United States at a point of entry, your maximum price is the base price

provided in section 10, plus your transportation cost from the production plant.

(2) If the production plant is located at any point in the United States other than a point of entry, your maximum price is the base price provided in section 10, plus your transportation cost from the production plant and plus a freight allowance equal to the lowest per ton all rail carload freight rate on the listed meal product to the production plant from the point of entry of the raw material.

(3) In any case where you unload the lot into a warehouse or store operated by you as a separate place of business not located at the production plant and you sell from such warehouse or store, your maximum price is the appropriate maximum price for the location of the production plant, figured under subparagraphs (1) or (2) above, plus one of the following maximum per ton markups:

(1) If you sell to a feeder from a store \$5.50 per ton;

(ii) In all other cases \$2.50 per ton.

(b) *By jobbers, wholesalers, retailers and car door sellers.* Under the definitions in section 8, you are a jobber, wholesaler, retailer or car door seller when you are selling a lot which you have purchased. If you have unloaded the lot into a warehouse or store, you are a retailer as to that portion of it which you sell to feeders from your store, and a wholesaler in all other cases. When you operate a store but you sell without having unloaded the lot into a warehouse or that store, you are a car door seller as to that portion which you sell to feeders in less than carload lots. You are a jobber as to all other sales of a lot you have purchased. If you are any such seller, your maximum price is the sum of the following:

(1) The maximum per ton price your supplier could have charged on the sale to you if he had given you and fulfilled on delivery the same protein guarantee that you are giving your customer, plus,

(2) Your transportation cost, if any, and,

(3) If no seller of the same class as yours has already handled the lot, the applicable one of the following markups:

Jobber.....	\$1.00 per ton for deliveries in pool car lots
	.75 per ton for all other deliveries
Wholesaler.....	2.50 per ton
Car door seller..	3.50 per ton
Retailer.....	5.50 per ton

(c) *By importers.* You are an importer, with respect to any lot manufactured outside of the United States, if you are the first person to whom such lot is delivered in the United States and if you sell such lot within the United States. If you are an importer your maximum price is determined as follows:

(1) If you are the processor of the lot your maximum price is the base price plus your transportation cost from the point of entry to the point at which you deliver to your customer.

(2) If you are not the processor of the lot, and if you sell it without having unloaded it into a warehouse or store, your

¹Subject to the approval of the Bureau of the Budget in accordance with Federal Reports Act, 1942.

maximum price is the base price plus your transportation cost from the point of entry to the point at which you deliver it to your customer, plus one of the following maximum mark-ups:

- (1) If you are selling it to a feeder in a l. c. l. lot, and you operate a store (although you have not unloaded this lot into your store)----- \$3.50 per ton
- (ii) In all other cases----- \$1.00 per ton for delivery in a pool car lot; \$0.75 per ton for all other deliveries

(3) If you sell the lot after having unloaded it into a warehouse or store, your maximum price is the base price plus

your transportation cost from the point of entry to the point at which your customer takes delivery, plus one of the following maximum mark-ups:

- (1) If you sell to a feeder from a store----- \$5.50 per ton
- (ii) In all other cases----- 2.50 per ton

Sec. 10. Base per ton prices for all listed meal products. Base prices for all listed meal products depend upon the giving and fulfilling of a guaranteed minimum protein content.

(a) Where you guarantee, at the time of sale, that the lot will contain, at a minimum, the standard protein content listed below for the commodity, and you fulfill that guarantee by delivering a lot with at least such standard protein content, base per ton prices are as follows:

	Protein guarantee	Base price	
		Oil cake or oil meal	Sized cake or pellets
Copra products.....	20% or more protein.....	\$45.50	\$47.00
Babassu products.....	22% or more protein.....	45.50	47.00
Ouricuri products.....	28% or more protein.....	45.50	47.00
Palm Kernel products.....	18% or more protein.....	45.50	47.00
Sesame products.....	40% or more protein.....	72.50	74.00

(b) Where you guarantee, at the time of sale, that the lot will contain, at a minimum, any specified protein content less than the percentage shown above for the commodity, and you fulfill such guarantee by delivering a lot with at least the minimum protein content you guaranteed, you determine the base price by deducting from the appropriate price in paragraph (a), \$0.75 per ton for each unit of protein or fraction thereof by which the actual protein content of the lot is under the guarantee shown above for the same commodity.

(c) If at the time of sale, you guarantee any minimum protein content and you do not fulfill such guarantee, you determine your base price by dividing the base price that would be applicable if the guarantee had been fulfilled by the number of units guaranteed, and multiplying that result by the number of full units of protein in the lot.

(d) If, at the time of sale, you do not guarantee any minimum protein content, you figure your base price by multiplying the actual number of full units

of protein in the lot by the base price per unit shown for the commodity in the table below:

Product:	Base price per unit of protein
Copra products.....	\$2.25
Babassu products.....	2.05
Ouricuri products.....	1.60
Palm kernel products.....	2.50
Sesame products.....	1.80

Sec. 11. Increases for sacks. If you sell any lot in sacks or packages, your maximum price is your maximum price for the same lot, bulk, plus the reasonable market value, not to exceed the lawful maximum price, of the sacks or packages at the time of delivery.

This regulation shall become effective July 5, 1944, except that it shall have no application to sales and deliveries of sesame products until September 3, 1944.

NOTE: The record-keeping provisions of this regulation have been approved by the Bureau of the Budget, in accordance with the Federal Report Act of 1942.

Issued this 5th day of July 1944.

CHESTER BOWLES,
Administrator.

Chapter XIII—Petroleum Administration for War

PART 1503—PRODUCTION

[Petroleum Dir. 19¹]

CONSERVATION AND DEVELOPMENT OF PETRO- LEUM IN DISTRICT FIVE

The fulfillment of the requirements for the defense of the United States threatens to result in a shortage of petroleum for defense, for private account, and for export; and the following directive is deemed necessary and appropriate in the public interest, to promote the national defense, to provide adequate supplies of petroleum for military and other essential uses, and to assure for the prosecution of the war the conservation and most effective development of petroleum in District Five.

Sections 1503.4 to 1503.10, inclusive, (Recommendation No. 19), are hereby amended to read as follows:

§ 1503.4 *Petroleum Directive 19*—(a) *Definitions.* (1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not.

(2) "Petroleum" means crude oil, condensate, or natural gasoline.

(3) "District Five" means the States of Washington, Oregon, California, Nevada, and Arizona, and the Territories of Alaska and Hawaii.

(4) "Director in Charge" means the Director in Charge of District Five.

(5) "District Director of Production" means the Director of Production, District Five.

(6) "Production Committee" means the Production Committee for District Five.

(b) *Production and allocation schedules.* (1) The Petroleum Administrator or Deputy Petroleum Administrator each month will certify the quantity of petroleum to be produced in District Five. The Production Committee, in collaboration with the District Director of Production or a staff representative of the Petroleum Administration for War designated by the District Director of Production for such purposes, shall then prepare, for submission to the Petroleum Administrator, allocation schedules for the production of petroleum from the various fields, pools, and wells in District Five in conformity with the maximum efficient rate of production for the fields,

pools, and wells, and to secure proper distribution among such fields, pools, and wells of the total amount of production certified for District Five.

(2) The allocation schedules submitted to the Petroleum Administrator shall be predicated upon a consideration of the following factors, in so far as each is applicable:

(i) Gas-oil ratios,

(ii) Water production, and the rate and manner of encroachment of water,

(iii) Reservoir pressures,

(iv) Other factors bearing upon the efficiency of production operations under recognized engineering practices and principles of conservation, and

(v) In so far as consistent with the foregoing factors relating to the prevention of waste or efficient production operations, distribution which will not cause unreasonable discrimination in favor of one field, pool, or well as against any other field, pool, or well, and in this connection the following factors shall be taken into account:

(a) The kind and quality of petroleum produced in the various fields, pools, or wells in relation to current requirements,

(b) The availability of transportation,

(c) The effect of reducing rates of production on the continuity of production from any field, pool, or well, and

(d) Maximum production for large wells and minimum production for small wells.

(3) No production shall be allocated in the schedules which will result in production from any field, pool, or well at a rate in excess of the maximum rate at which it can be operated in accordance with recognized engineering practices and principles of conservation, except where the Petroleum Administrator or Deputy Petroleum Administrator has certified that the national war program requires that there be produced a greater amount of the type of petroleum being produced in any such field, pool, or well.

(4) No allocation schedules shall be submitted which provide that the amount of petroleum allocated for production from any field, pool, or well may be produced from any other field, pool, or well, except that a transfer of allocation from one well to another well or wells in the same pool and within the same lease, unit, or area wholly within the limits covered by a cooperative plan of development may be provided for when such transfer is specifically authorized by the Petroleum Administrator or Deputy Petroleum Administrator. Unless authorized as provided for herein, the amount of petroleum allocated for production from each well may be produced only from the well to which the allocation is made.

(c) *Additional functions of Production Committee.* The Production Committee shall from time to time make recommendations to the Petroleum Administration for War relating to the discovery, development, and production of petroleum and natural gas in District Five for one or more of the following purposes:

(1) To assure the proper development, production, and utilization of the re-

serves of petroleum and natural gas in District Five;

(2) To accomplish the most effective use of critical materials with respect to production operations;

(3) To eliminate the drilling of unnecessary wells;

(4) To prevent physical waste above ground and underground;

(5) To assure that natural gas produced in conjunction with crude oil is used primarily for the efficient recovery of crude oil;

(6) To encourage and foster the exploration for and discovery of petroleum and natural gas reserves at a rate not less than that by which known reserves are being depleted;

(7) To bring about orderly development of new pools or fields, including proper well-spacing, and the making of unit or cooperative agreements for development, pressure maintenance, or repressuring designed to effectuate the maximum practical recovery with a minimum expenditure of critical materials; and

(8) To encourage drilling of new wells in proven pools or fields when such wells are needed for the most efficient operation of the pools or fields as a whole, taking into account the availability of critical materials and other pertinent factors.

(d) *Administration of directive.* (1) The Production Committee shall maintain such staff and appoint such persons as may be necessary to carry out its duties, responsibilities, and functions under this directive, and may appoint such subcommittees as it may consider necessary for investigations of, and reports on, specific problems. The Production Committee may propose to the Petroleum Administrator the appointment of such standing subcommittees as it may consider necessary in connection with the performance of the Production Committee's duties, responsibilities, and functions under this directive, and may submit nominations for membership on such standing subcommittees. Operating expenses of such Committees or Subcommittees shall be met as provided in § 1500.7 (j) of this chapter, as amended or supplemented, or as provided in any other recommendation, directive, or order of the Petroleum Administration for War, which may be issued as a substitute therefor.

(2) All proposed allocation schedules shall be submitted by the Production Committee to the Director in Charge, who shall then submit to the Petroleum Administrator, through the National Director of Production, the schedules, together with accompanying data and information in support of the schedules, and the comments and recommendations of the Director in Charge. The Director in Charge may delegate to the District Director of Production the powers, authority, and discretion of the Director in Charge as provided for in this subparagraph.

(3) No schedule, whether it be a schedule as originally submitted or as modified by the Petroleum Administrator or Deputy Petroleum Administrator, shall become effective until approved by the

¹ See War Production Board Certificate, 206, *infra*.

Chief Counsel, and until the Petroleum Administrator or Deputy Petroleum Administrator has directed that the schedule be made effective.

(4) When a schedule becomes effective, it shall be binding on all persons, and no person shall produce during any period designated by the Petroleum Administrator or Deputy Petroleum Administrator any petroleum from any field, pool, or well in District Five in excess of the amount authorized to be produced by him as set forth in the schedule issued for the period by the Petroleum Administrator or Deputy Petroleum Administrator; and no person shall knowingly store, sell, market, purchase, receive, accept, transport, or cause to be transported in any manner any petroleum, or any part thereof, which is produced from any field, pool, or well contrary to or not in conformity with the provisions of any schedule issued by the Petroleum Administrator or Deputy Petroleum Administrator as provided for herein.

(e) *Appeals.* Any person effected by this directive or any action taken hereunder who considers that compliance therewith or the results thereof would work an exceptional and unreasonable hardship upon him, or that the terms of this directive have not been followed in its application to him, may appeal to the Director in Charge, Petroleum Administration for War, 855 Subway Terminal Building, Los Angeles 13, California, setting forth pertinent facts and reasons why he considers himself entitled to relief. If dissatisfied with the decision of the Director in Charge, such person may appeal within fifteen days after receipt of notice of the Director's decision to the Petroleum Administration for War, Interior Building, Washington 25, D. C.

(E.O. 9276, 7 F.R. 10091; E.O. 9319, 8 F.R. 3687)

Issued this 3d day of July 1944.

Deputy Petroleum
Administrator for War.

At a session of the Interstate Commerce Commission, Division 3, held at its

office in Washington, D. C., on the 3d day of July, A. D. 1944.

It appearing, that shipments of sand, gravel, or aggregates in carloads originating at various points and destined to Dalhart, Texas, for use on government construction at Dalhart are being weighed on railroad track scales, thus impeding the use, control, supply, movement, and distribution of cars; in the opinion of the Commission an emergency exists requiring immediate action to avoid a shortage of equipment and congestion of traffic: *It is ordered, That:*

Carloads of sand, gravel, or aggregates destined to Dalhart, Texas, for use on government construction at Dalhart not to be weighed. (a) No common carrier by railroad subject to the Interstate Commerce Act shall weigh, or permit to be weighed, any shipment of sand, gravel, or aggregates in carloads, on any railroad track scales when such traffic originates on or after the effective date of this order at any point and is destined to Dalhart, Texas, for use on government construction at Dalhart, except that a limited number of cars may be weighed as is necessary to obtain average weights. The operation of all tariff rules or regulations insofar as they conflict with the provisions of this order is hereby suspended.

(b) *Announcement of suspension.* Each of such railroads shall publish, file, and post a supplement to each of its tariffs affected hereby, in substantial accordance with the provisions of Rule 9 (k) of the Commission's Tariff Circular No. 20 announcing the suspension of provisions in such tariffs conflicting with this order. (40 Stat. 101, sec. 402, 41 Stat. 476, sec. 4, 54 Stat. 901; 49 U.S.C. 1 (10)-(17))

It is further ordered, That this order shall become effective at 12:01 a. m., July 5, 1944, and that a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

By the Commission, Division 3.

PART 197—TRANSPORTATION OF EXPLOSIVES
AND OTHER DANGEROUS ARTICLES

Subchapter A—General Rules and Regulations

Subchapter B—Carriers by Motor Vehicle

[Ex Parte Nos. MC-13, MC-3; No. 3666]

MOTOR CARRIER SAFETY REGULATIONS, REVISED

At a session of the Interstate Commerce Commission, Division 3, held at its

office in Washington, D. C., on the 24th day of June, A. D. 1944.

In the matter of Regulations Governing the Transportation of Explosives and Other Dangerous Articles by Motor Vehicle; Ex Parte No. MC-13.

In the matter of Regulations for Transportation of Explosives and Other Dangerous Articles; No. 3666.

In the matter of Need for Establishing Reasonable Requirements to Promote Safety of Operation of Motor Vehicles Used in Transporting Property by Private Carriers; Ex Parte No. MC-3.

It appearing, that by an order herein of April 20, 1943 (8 F.R. 6479) the Regulations for Transportation of Explosives and Other Dangerous Articles by Land and Water in Rail Freight, Express and Baggage Services, and by Motor Vehicle (Highway) and Water, Including Specifications for Shipping Containers, which embody Part 7, Regulations Applying to Shipments Made by Way of Common and Contract Carriers by Public Highway, were extended to private carriers engaged in interstate or foreign commerce, subject to Part II of the Interstate Commerce Act, and also to common, contract, and private carriers of property engaged in intrastate commerce; and

It further appearing, that by another order herein of April 20, 1943 (8 F.R. 6481) the regulations prescribed by the Commission as Part 7 of the Motor Carrier Safety Regulations, Revised, governing the transportation of explosives and other dangerous articles by common and contract carriers by motor vehicle in interstate or foreign commerce, also were made applicable to private carriers of property by motor vehicle in interstate or foreign commerce and to common, contract, and private carriers with respect to such transportation in intrastate commerce; and

It further appearing, that by an order herein of August 27, 1943 (8 F.R. 12143) the transportation in intrastate commerce of inflammable liquids by common, contract, and private carriers was excepted from the requirements of the said orders; and

It further appearing, that the American Petroleum Institute has shown that certain intrastate motor carriers otherwise exempt from the requirements of the two said orders of April 20, 1943 (8 F.R. 6479, 6481), including private carriers transporting inflammable liquids, also engage in short-haul retail distribution of liquefied petroleum gases in containers other than cargo tanks, thereby subjecting themselves to applicable requirements of the two said orders; and

It further appearing, that the retail distribution of liquefied petroleum gases referred to usually is incidental to the principal transportation business of the motor carriers involved; that the greater part of such distribution is, and heretofore has been, performed by carrier members of self-regulated associations in a manner generally conducive to safety of operation; and, therefore, may be relieved from compliance with the present regulations without materially

affecting standards of safety: *It is ordered, That:*

Motor-vehicle transportation of liquefied petroleum gases in intrastate commerce. After the date of this order, the transportation by motor vehicle in intrastate commerce of liquefied petroleum gases named and described in Parts 2 and 3, respectively (49 CFR 73 and 75) of Regulations for the Transportation of Explosives and Other Dangerous Articles by Land and Water in Rail Freight, Express and Baggage Services, and by Motor Vehicle (Highway) and Water, effective January 7, 1941, as amended, in containers other than cargo tanks, by common, contract, and private carriers, shall not be subject to the provisions of the two said orders of April 20, 1943 (8 F.R. 6479, 6481), as amended; *Provided, however,* That the containers other than cargo tanks so used shall conform in all respects with those authorized for use under regulations prescribed in section 302 (n) (1) to (n) (9), in said Parts 2 and 3 (49 CFR 73 and 75).

It is further ordered, That this order shall be effective forthwith and shall continue in effect until the further order of the Commission; and

It is further ordered, That a copy of this order be served upon all the parties of record herein, and that notice of this order be given to the general public by depositing a copy of it in the office of the Secretary of the Commission at Washington, D. C., and by filing a copy with the Director, Division of the Federal Register.

(Sec. 233, 41 Stat. 1445; sec. 204, 49 Stat. 546, 54 Stat. 921; 55 Stat. 863; 56 Stat. 1022; 18 U.S.C. 383, 49 U.S.C. 304, 50 U.S.C. 121)

Pursuant to Executive Order 8989, as amended, § 500.74 of General Order ODT 18A, as amended (8 F.R. 14477; 9 F.R. 116), is hereby amended to read as follows:

§ 500.74 *Issuance of special permits by rail carriers.* The chief operating officer or division superintendent of the initial line-haul rail carrier, or the chief operating officer or division superintendent of the initial switching rail carrier, where no line-haul service is to be performed, may issue a special permit authorizing the acceptance and forwarding of carload freight which is not loaded in accordance with the loading requirements of this order, in a specific case where, in his judgment, because of the unusual character of the lading, undue car detention or other unusual circum-

stances, he believes compliance with the loading requirements of this order would result in the inefficient use, or unduly retard the efficient use, of cars or locomotives, or, in a specific case, where, in his judgment, such permit is required for reasons of military necessity. Reports of all special permits issued by the chief operating officer or division superintendent of each rail carrier shall be made by the chief operating officer of each such rail carrier to the Office of Defense Transportation, Washington 25, D. LEASING OF PUBLIC LANDS FOR HOME SITES, ETC.

JUNE 27, 1944.

On May 16, 1944, the Secretary of the Interior classified and opened, under the act of June 1, 1938 (52 Stat. 609; 43 U. S. C. sec. 682a), for leasing as home, health, convalescent, and business sites, subject to the right-of-way for U. S. Highway Nos. 91 and 466, the following-described public land in the Carson City, Nevada, land district:

NEVADA No. 6

MOUNT DIABLO MERIDIAN

T. 21 S., R. 61 E., sec 28, SW $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres.

This land is located about 6 miles south of Las Vegas, Clark County. The highway mentioned above invades the subdivision along the west side.

The portions of the land not covered by one pending application under the act are subject to application for lease under the act, based on the above-mentioned classification, by any qualified persons, in accordance with 43 CFR 257.1-257.25 (Circ. 1470a, August 10, 1942). Any application filed should describe the land applied for according to the rectangular system of surveys.

Lessees will be required to construct, within a reasonable time after execution of the lease, substantial improvements having a value of not less than \$500.

Leases will be for a period of 5 years, at an annual rental of \$5 for home, health, and convalescent sites, payable in advance yearly. The rental for business sites will be in accordance with a schedule of graduated charges based on gross income. Leases will provide for ingress and egress. Any water which has been developed on the W $\frac{1}{2}$ SW $\frac{1}{4}$ SW $\frac{1}{4}$ SW $\frac{1}{4}$ of the subdivision will be accessible to lessees under the act to such extent as the water may be available for domestic purposes. Any lease offered for that tract will carry a stipulation to that effect.

The Register of the district land office will make appropriate notations upon the records of his office and acknowledge receipt hereof.

Commissioner.

[Small Tract Classification No. 56]

WYOMING

LEASING OF PUBLIC LANDS FOR HOME AND BUSINESS SITES

JUNE 29, 1944.

On June 15, 1944, the Secretary of the Interior classified, under the act of June 1, 1938 (52 Stat. 309; 43 U.S.C. sec. 682a), the following-described public land in the Cheyenne, Wyoming, land district:

WYOMING No. 5

SIXTH PRINCIPAL MERIDIAN

T. 35 N., R. 65 W., sec. 3, NW $\frac{1}{4}$ SE $\frac{1}{4}$, S $\frac{1}{2}$ SE $\frac{1}{4}$, 120 acres. (Subject to rights-of-way for Ohio Oil Company pipe line, Cheyenne 043163 and Wyoming State Highway, Cheyenne 063848).

The land is located in the central portion of Niobrara County, approximately 48 miles northwest by road from the town of Lusk. The settlement known as Lance Creek, sometimes called Gateway, is in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of the section.

These lands have been classified only for leasing, as home and business sites, except certain tracts which may be found to be necessary for community use.

The lands to be leased will not be opened for leasing until after a plat, to be prepared for that purpose only, has been approved, accepted, and officially filed in the Cheyenne district land office. Various of the designated tracts shown upon the plat will embrace the existing individual improvements as far as possible.

Ten applications for tracts in the area have been received. Where necessary, appropriate action will be taken for the adjustment of these applications to the tracts shown by the plat in question.

Such tracts as may be determined as necessary for community use will be set aside for that use, no structures to be erected or maintained thereon without permission of this office. These tracts can not be leased for such purpose under the act of June 1, 1938, *supra*, since that act does not provide therefor.

Leases will provide for ingress and egress. No buildings or advertising signs

shall be erected or maintained on the right-of-way of any constructed road or on areas described in leases providing for ingress and egress.

Lessees will be required to erect, within a reasonable time after execution of the lease, substantial improvements having a value of not less than \$500. Leases will be at an annual rental of \$5 for home sites, payable in advance yearly. The rental for business sites will be in accordance with a schedule of graduated charges based on gross income. Ordinarily, leases are for a period of 5 years.

The Register of the district land office will make appropriate notations upon the records of his office, and acknowledge receipt hereof.

Commissioner.

FEDERAL POWER COMMISSION.

[Docket No. IT-5903]

IDAHO POWER CO.

NOTICE OF APPLICATION

JULY 3, 1944.

Notice is hereby given that on July 1, 1944, an application was filed with the Federal Power Commission, pursuant to

section 203 of the Federal Power Act, by Idaho Power Company, a corporation organized under the laws of the State of Maine and doing business in the States of Idaho, Nevada and Oregon, with its principal business office at Boise, Idaho, seeking an order authorizing the purchase and acquisition of the electric facilities of West Coast Power Company located in the State of Idaho. The properties to be acquired include approximately 413 miles of electric transmission and distribution lines, and six small power plants having total installed name-plate ratings of 2,378 kilovolt-amperes. The operation of some of these plants may be discontinued by the Applicant, except as they may be retained for standby purposes. The order applies to such fresh fruit and vegetable items as are now or may hereafter be subject to the pricing provisions of MPR 285 and Appendices H and I of Maximum Price Regulation 426. The only sellers who are subject to this order are those wholesalers who price under Maximum Price Regulation 285 and secondary jobbers and service wholesalers, as those terms are used in Appendices H and I of Maximum Price Regulation 426.

(b) *Establishment of delivery zones.* (1) The free delivery zone established by this order shall be the area comprising the Cities of Bloomington and Normal, located in the County of McLean and State of Illinois.

(3) *Delivered sales beyond the free delivery zone.* For deliveries beyond the free delivery zone the seller may add to the maximum price for delivered sales in the free delivery zone the sum of 20¢ per cwt. The cwt. charge on commodities covered by Appendix H and Appendix I shall be figured on the basis of gross weight.

(d) *Differentials for non-delivered and delivered sales of items under Maximum Price Regulation 285—(1) Non-delivered sales and delivered sales in the free delivery zone.* For non-delivered sales and for delivered sales in the free delivery zone the maximum price shall be the maximum delivered price computed under Maximum Price Regulation 285 for the type of sale being made. Discounts and price differentials including any differentials or discount for f. o. b. non-delivered sales must be maintained.

For the purposes of section 12 of Public Law No. 603, 77th Congress (56 Stat. 357), I approve the Directive; and after consultation with you, I hereby find and so certify to you that the doing of any act or thing, or the omission to do any act or thing, by any person in compliance with Petroleum Directive 19 is requisite to the prosecution of the war.

However, because paragraph (d) (4) of the directive does not call for collaborative action on the part of industry, it is not my intention to extend the statutory

immunity to action taken under that paragraph.

"BEAR"

DETERMINATION OF VESSEL OWNERSHIP

Notice of determination by War Shipping Administrator pursuant to section 3 (b) of the act approved March 24, 1943 (Public Law 17—78th Congress).

Whereas on October 5, 1943, title to the vessel "Bear" (211114) (including all spare parts, appurtenances and equipment) was requisitioned pursuant to section 902 of the Merchant Marine Act, 1936, as amended; and

Whereas section 3 (b) of the act approved March 24, 1943 (Public Law 17—78th Congress), provides in part as follows:

(b) The Administrator, War Shipping Administration, may determine at any time prior to the payment in full or deposit in full with the Treasurer of the United States, or the payment or deposit of 75 per centum, or just compensation therefor, that the ownership of any vessel (the title to which has been requisitioned pursuant to section 902 of the Merchant Marine Act, 1936, as amended, or the Act of June 6, 1941 (Public Law 101, Seventy-Seventh Congress), is not required by the United States, and after such determination has been made and notice thereof has been published in the FEDERAL REGISTER, the use rather than the title to such vessel shall be deemed to have been requisitioned for all purposes as of the date of the original taking: *Provided, however*, That no such determination shall be made with respect to any vessel after the date of delivery of such vessel pursuant to title requisition except with the consent of the owner, * * *; and

Whereas no portion of just compensation for the said vessel has been paid or deposited with the Treasurer of the United States; and

Now therefore, I, Emory S. Land, Administrator, War Shipping Administration, acting pursuant to the above-quoted provisions of law, do hereby determine that the ownership of said vessel, spare parts, appurtenances and equipment is not required by the United States, and that, from and after the date of publication hereof in the FEDERAL REGISTER, the use rather than title thereto shall be deemed to have been requisitioned, for all purposes, as of the date of the original taking.
