CURRENT SERIALS RECORDS

NEWLY CATALOGED TITLES

A Selected List

Library

List

No. 78

Supp. 1

NATIONAL AGRICULTURAL LIBRARY
United States Department of Agriculture
Washington, D. C.

Preface

Department employees have urged the National Agricultural Library to issue on a continuing basis a brief current record of newly acquired publications. We have studied various methods now employed to supply current information. Chemical Abstracts and Biological Abstracts use computers to issue permuted titles. At present funds and equipment are not available to use this method. As a stopgap measure we are merely reproducing in the form shown here cards for selected titles cataloged during the period covered. This provides immediate information to those who do not have access to our public catalog. It is not a finished product, but it is an inexpensive and practical means for conveying information.

The present list is a sample developed to obtain reactions from Department users. We would very much like to have your frank comments on the publication and any suggestions that would make it more useful without appreciably adding to the cost.

Its continuing publication on a semi-monthly basis, beyond a few sample issues, will be determined by availability of funds in our 1964 budget as well as by your reactions.

Foster E. Mohrhardt

Foster E. Mohrhardt
Director

Explanatory Note

This is a record of selected publications that have been cataloged and added to the Library collections during the preceding two weeks.

Publications issued at any time and in any language are included, and are arranged under broad subject matter classes.

The Library call number, shown at the left of the entry, should be included in requests for loans. ("Bee Cul" or "B" above the call number indicates that the publication is located in our Bee Culture Branch or Beltsville Branch, respectively, both at Beltsville, Md.)

Requests for loans may be made by submitting National Agricultural Library Request slips (Form AD-245) or, in the Washington, D. C. area, by telephoning the Library on Ext. 3434 (code 111), the Bee Culture Branch, Ext. 291 (DA code 82), or the Beltsville Branch, Ext. 618 (DA code 85).

It is suggested that field personnel, in requesting issues of periodicals for examination, include in the request, "Entire issue desired."
