Carthage, Missouri

Member of

Missouri Association of Nursery Men

SLOGAN:

"Every Plant a Live One When Delivered"

MISSOURI STATE PLANT BOARD

Office of Chief Inspector, Columbia, Missouri
CERTIFICATE OF NURSERY INSPECTION

No. 1c 10

Issued 10-1-29

This is to certify that in accordance with the provision of the Missouri Plant Act of 1925 the nursery and premises thereof belonging to H.W. Jenkins. of Carrhage, Mo. have bren inspected by a duly authorized inspector and were found to be apparently free of injurious insects, pesis, and plant diseases. This certificate is not transferable and may be revoked for cause

This certificate expires September 1, 1930.

K. C. SULLIVAN, Chief Inspector

"Ring out the old, ring in the new,
May nineteen thirty bring to you
All kinds of fortune, good and true.
May everything you plant grow strong,
May every weed give up its song,
May summer with you linger long,
May all who owe you Pee Dee Que
Each last red cent they owe to you
And keep your sky line ever blue."

Jewell News

All this and more are our wishes to all our customers and friends for a prosperous 1930.

Terms of Sale

Cash with order, or good bank references. When your order is unpacked, if found not satisactory, repack and return at once, at our expense, with a statement why, and it will either be duplicated or your money refunded. All small packages go by Parcel Post, charges prepaid on 1st, 2nd and 3d zones. Beyond that, customers must pay all transportation charges.

Bulky packages all go by Express, charges paid by customer. All plants sold that prove untrue to label, Replaced Free, on proof of same. No claims allowed or considered after 10 days from day of shipment.

We accept all orders on the express condition that the customer must be satisfied or no sale. We have made that offer for a number of years, and no plants have ever come back yet. (Write to the Carthage Post Master and ask if that is true.)

> Ready to serve you, Jenkins Nurseries, Carthage, Mo.

Seasons Notes

The growing season of 1929 was a very erratic one. We had all kinds of weather to contend with. In all our experience in nursery work, extending over forty years, continual rains, from March to the middle of June, made it the worst time to get anything planted or cultivated that we ever passed through. This followed by an extremely hot and dry July and August. At one time it began to look like all our plants would die from the drought, but the rains came in time to save the most of them. An ideal Fall followed, and nature has evened things up, so we are back normal again, and we find that all shrubs and plants, while hardly up to their usual size in tops, have developed an extra good root system, and that is of more importance than a big top. So you may expect some extra

fine rooted plants that should grow right off if they are properly planted and cultivated.

Strawberries

We expect to dig and pack as fine a lot of strawberry plants this spring as we ever sold, and if you don't think so when you see them, return and get your money back. We have two more varieties to offer this spring than last. Premier, an extra early variety, a fine plant

and a large berry. Progressive (Everbearer) berries, medium size, extra quality. We expected to have plenty of the Mastoden variety, but it just would not make any runners, and new plants and the plants we set out last April froze up in November, full of big green berries. We

had berries from both Progressive and Masfor our table till the tenth of November.

Our supply of plants is limited. The stock of plants all over the state is less than usual.

This last Fall, on two trips that took us from Carthage, through Kansas, via Fort Scott, Kansas City, Kansas, Leavenworth to Wathena, back by St. Joe Excelsior Springs, Kansas City, Lees Summit, Harrisonville and Nevada, we only saw one new strawberry bed, near Leavenworth. The other trip, via Springfield, Clinton, Sedalia to Boonville and back by Warrensburg and Pleasant Hill, Missouri, we did not see a single new bed, but lots of old ones.

That plants are scarce and berries will be much higher in price is a safe bet for 1930.

Varieties

PREMIER—Plant stocky, clean foliage, good root system. Doesn't make an over supply of plants. Very early and productive of large, smooth shape conical light red berries. Resembles the Haverland in some ways. A splendid home berry.

Per 100 250
Price of Plants, Parcel Post \$1.00 2.00

HAVERLAND--(P) Plant stocky and healthy but requires a good soil and good care, but is wonderfully productive. Sets so many berries the fruit stalks can't hold them up off the ground. For this reason in a very wet season berries will rot if not kept well picked. Berries are large, long, pointed in shape, well colored and smooth; a fine variety for home use or local market.

Per 100 250 500 1000 Price, parcel post prepaid \$1.00 2.00 3.50 6.00 Price of plants Express paid by customer, 5.00

SENATOR DUNLAP—This variety originated in Illinois. Is a strong vigorous growing plant, healthy; makes lots of runners and new plants that have long roots and it will stand more drought than other varieties. It is a strong staminate variety, a good fertilizer for the

Haverland—very productive of large, well shaped high colored berries. The most popular berry in central and north Missouri. You will not go wrong in planting this for home use or local market.

Per 100 250 500 1000 Price, parcel post prepaid \$1.00 2.00 3.50

Price by Express paid by customer ____ 5.00 AROMA—Plant stocky and healthy. Don't make as many runners or plants as the Dunlap, but a plenty. Berries large, smooth, conical in shape, well colored, ripens late. The Aroma is the commercial berry of the Ozarks that is Shipped to New Orleans or Winnipeg, Denver or Boston by the train load. Not so productive in North Missouri.

Per 100 250 500 1000 Price, parcel pst prepaid \$1.00 2.00 3.50

Price by Express paid by customer ____ 5.00 PROGRESSIVE— (Everbearer) Plant healthy. Makes a fair supply of runners and new plants but no extra ones. The new plants begin bearing soon as large enough. Berrie round, dark red and of a very high quality. The best tasted berry of them all. Bears till frozen up.

Per 100 250 500 1000 \$2.00 4.00 7.50

GANDY—Is a strong grower. Makes long runners and lots of plants. Very large leaves and extra strong fruit stems that holds the berries well up off the ground. The berries are large, conical in shape, fine color and have a very large green cap which forms a contrast to the red color of the berries that makes a box of berries very attractive to the eye. Its only weakpoint is not productive. Does better the second year than the first. The best late variety.

Per 100 250 500 1000 Price, parcel post prepaid \$1.00 2.00 3.50 6.00 Price by Express paid by customer ______ 5.00

BLACKBERRIES

EARLY HARVEST—Small bushy canes, hardy and productive. Berries medium size—always ripe at wheat harvest.

Per 25 100

Price _____ \$1.00 250

RASPBERRIES

Raspberries are divided into two families—the Black which propagate from the tips and the Reds from the roots.

Anthracrose, on account of so much rain the past year. This disease was unusually bad on the paspberry canes and the supply of tip plants is very short this spring.

VARIETIES

CUMBERLAND—This was called by the originator "The Business Black Cap." It is a very productive variety, medium to late in ripening. The berries are large. Originated in the Cumberland Mountains of Pennsylvania.

Per 25 100

Price for tip plants by Express, paid by customer ______ 2.0

Price for tip plants by parcel post \$1.00 2.50

LATHAM—A new red variety which originated in Minnesota. We bought our stock to start with direct from the introducers, the Andrews Nursery Company, of Faribault, Minnesota, and find it is all that was claimed for it. Thrifty vigorous grown plants, free from Mosaic or root gall. Is productive. Produces a large, round berry that is firm and well colored and doesn't ripen its crop all at one time. A promising variety, safe to plant.

SHERIDAN (The New Grape)

DESCRIPTION—Large berries, shouldered up tight into compact, solid, long, round bunch. Very heavy in weight. Thicker skin than Concord. Does not crack or shell when fully ripe. Is a shiny jet black color, has few seeds and is of a delicious flavor. The vine is a good grower, very productive, and ripens its crop 2 weeks later than the Concord. The Perfect 100% Grape.

Price, Each ______.50

HISTORY

The Sheridan originated at the New York Experiment Station, some 6 years ago, (don't know its parentage). Mr. B. H. Esterly of Carthage is a member of the New York Fruit Testing Ass'n., and was sent some sample vines to test here in Ozark Grape country. He has now fruited it 3 years and it fully justifies the above description. A plate was entered at the Missouri State Fair, 1927, and won the Blue Ribbon as Best Plant of ANY Variety.

Mr. Esterly has placed all his vines and cuttings in our hands to propagate, and we are proud of the chance to have a hand in its dissemination, and now offer a limited number of vines for the first time, with the utmost

confidence in its future, that when once fully known that it will be crowned King of American Grape

Read what Mr. McCormick, a prominent Carthage groceryman says about the Sheridan.

McCORMICK GROCERY COMPANY

Carthage, Mo., Jan. 18th, 1929.

Mr. B. H. Esterly, Carthage, Mo.

Dear Sir:

I wish to say with reference to the Sheridan grapes from your vineyard which we had at our store last fall, that they were of an unusually good quality, large and compact bnches and of an extra good favor. They will undoubtedly make a good shipper as well as being a splendid grape for home use.

Yours very truly,

W. R. McCORMICK.

The above description was given in our last spring's list, and while the vines did not grow and do as well as we expected, nor were the grapes as good as the previous years, but we still stand by what we said that we honestly believe here is what the American people want and need, a perfect late grape.

ORNAMENTAL HEDGING

An ornamental hedge speaks for itself. It marks the boundary for the lawn and gives it a back ground and adds to the beauty and increases the value of the property as much or more than any improvement you can make.

SHRUBS AND FLOWERS

The American people are appreciating more and more the importance of planting shrubbery and flowers and hedging, around their homes.

A well planted lawn and a fruitful garden are a good index into the character of its owner and indicate a happpy home.

Planting shrubs is a good investment, not only pays dividends in the pleasure derived from the accomplishment, and the satisfaction that would come to the owner of a well planted home, but nothing you can do will increase the value of your residence property as well selected shrubs and flowers. Such a home will sell far quicker and for much higher price than for a home otherwise just as good, yet lacking the landscape work.

We are making shrubs and hedging a specialty this Spring and offer the following list of hardy, desirable plants at very reasonable prices.

H. W. Jenkins, Washington, D. C., 1-13-1930 Carthage, Mo.

Dear Friend:—You want my honest opinion of the Japanese Cherries. These trees were given to Mrs. Taft by the Japanese Gov. during the administration of President Taft, and were planted here to border the Lagoon in Potomac Park, and add to the beauty of Mirror Lake, which is a part of the Lincoln memorial plan. These trees when in full boom, at their best make a picture of indescribable beauty. Thousands come annually to enjoy the sight, and I too have enjoyed them immensely. I have written you rather at length because of my interest in you and your work.

Sincerely yours,

W. L. NELSON, M. C.

H. W. Jenkins, Washington, D. C., 1-27-1930. Carthage, Mc.

Dear Mr. Jenkins:—Replying to yours of 1-20, asking for my opinion of Japan Cherries in Potomac Park, will say that the beauty of these blossoms is almost indescribable, and in the spring and early summer, when in bloom, thousands of tourists drive here to see them.

Very sincerely yours, JOE J. MANLOVE, M. C.

UNSOLICITED TESTIMONIALS

Dear Mr. Jenkins: Boonville, Mo., 4-3-29

My order of roses came through in fine shape. I do hope I will have luck with them. They are such fine bushes.
