An action brought at London by the widow of one Howe, who was killed while in the employ of defendants, to recover damages for his death, caused, as alleged, by the negligence of defendants, was settled out of Court. The settlement is understood to have been on a basis of payment to plaintiff of \$1,000 for herself and children.

(Howe vs. McClary; London, January 9th, 1908.)

A settlement out of Court has been effected in the case of Mrs. Philip O'Meara against the Ottawa Electric Company and the Labatt Brewing Company. The action was brought to recover \$10,000 damages for the loss of her husband, who was electrocuted while cleaning bottles in the premises of the Labatt Co., owing to the apparatus having become highly charged with electricity through an alleged defect in a transformer belonging to the Electric Co. The settlement gives the widow \$2,250 and costs, of which the Labatt Co. pays \$600.

(O'Meara vs. Ottawa Electric Co., et al. Ottawa, 9th January, 1908.)

The suit of Matthew McGowan, a lineman, who was injured while in the employ of the Toronto Railway by the overturning of an elevated truck at the corner of Richmond and Yonge streets, on May 25th, last, was settled without a hearing, the Company agreeing to pay him \$1,275. McGowan, who was working on the top of the truck, when it fell, was thrown among some broken paving

stone, breaking a leg and suffering other injuries.

(McGowan vs. Toronto Railway Co., 9th January, 1908.)

### Appeals in Damage Suits Allowed.

John Norman, an ironworker, brought suit to recover damages for personal injuries sustained by him whilst in the employ of the defendants, owing, as alleged, to the negligence of the latter.

Plaintiff was employed to work upon the construction of the new Traders' Bank building, in the City of Toronto, and on the 1st of December, 1905, was injured by falling from the eighth to the sixth storey. At the trial plaintiff was non-suited, and appealed to a Divisional Court, which on 4th June, 1907, set aside the non-suit and directed a new trial holding that there was some evidence of negligence on the part of defendants to submit to the jury. Defendants thereupon appealed to the Court of Appeal, which in turn has allowed their appeal, and restored the judgment of the trial judge. In delivering judgment in the Court of Appeal, Meredith, J. A., said: "Another workman was immediately about to do the work, in doing which the plaintiff was injured, and to do it in a quite safe manner by the use of a ladder, when the plaintiff voluntarily intervened and offered to do, and undertook the doing of, the work, but attempted to do it without using the ladder, and in a much more dangerous manner, and was injured. There was no occasion, so far as the defendants were concerned, for such interposition, nor for the plaintiff doing it without using the ladder; so that the defendants were not guilty of any neglect to provide safe and sufficient means for the performance of the work; it is quite too remote to say that they did neglect to provide other protection not needful for the doing of the work in question when regularly and properly done. If the proper workman had neglected the proper means provided for his safety—the ladder—and had voluntarily attempted to perform it in the dangerous way the plaintiff adopted, how

could he recover? Less so can the plaintiff."

(Norman vs. Hamilton Bridge Works; 23rd December, 1907; C't of Appeal.)

In the case noted at page 929 of the February (1907) number of the *Labour Gazette*, an appeal taken by defendants to the Court of Appeal has been allowed, and the action dismissed. The Court held that plaintiff had entirely failed to satisfy the burden imposed upon him of proving not only the defendants' negligence, and that his injuries resulted from such negligence, the only evidence as to the cause of the accident being that of plaintiff, which was mere guessing and entirely opposed to that of defendants' experts. As to the decision of the Judge in the Court below, to the effect that any claim under the Workmen's Compensation Act was barred by lapse of time, the Court held that it was quite competent to defendants to waive the limitation, although it was not necessary to determine the point, as the Court found that upon the evidence, plaintiff was not entitled to recover in any respect of the case.

(Thompson vs. Ontario Sewer Pipe Co.; 23rd December, 1907; C't of Appeal.)

### Damages Reduced on Appeal.

In the case noted at page 1144 of the April number of the *Labour Gazette*, on an appeal by defendants from the verdict and judgment at the trial, the Court of Appeal held that there could not be any recovery at Common Law, but that the case came within the Workmen's Compensation Act, and reduced the amount found by the jury in the alternative.

(Williams vs. Piggott & Co.; 23rd December, 1907; Court of Appeal.)

### Damages for the Loss of Fingers.

At the Hamilton Winter Assizes, Robert Tucker brought suit against defendants to recover damages for the loss of four fingers in a machine in the course of his employment in the factory of defendants, owing, as alleged, to

negligence of the latter. A jury brought in a verdict in plaintiff's favour for \$800.

(Tucker vs. International Harvester Co., 7th January, 1908.)

### Widow's Suit Settled.

A claim for damages made against the Wabash Railway Company by the widow of Fred. Calvert, a locomotive fireman, who was killed by the explosion of the boiler of the locomotive on which he was working, at Simcoe, last summer, has been settled by the payment of \$2,300 and costs to the widow.

(27th December, 1907; St. Thomas.)

### Fraudulent Employment Agents Convicted.

Henry Williams was recently put upon his trial at the Hamilton Police Court on a charge of receiving money under false pretences. The complainant was Peter Bartosik, who alleged that he went to see Williams on the understanding that he could secure work for him. He was asked to pay \$5, and was given a small sack which he was told to wear on his breast for a certain number of days, after which he would secure a job. He took the charm away, but it apparently failed to work, and Bartosik opened it to find a piece of kid glove filled with sand. An information was then laid, and Williams was found guilty, but allowed to go, his friends having made good the amounts collected by him by fraud. He was obliged, however, to leave the city.

(Rex vs. Williams; 31st December, 1907; Jelfs, P.M.)

Joseph Sageese, who conducted an employment agency on York street, in Toronto, was recently in the Police Court on two charges of obtaining money by fraud, the complainants being two Englishmen named John H. Miller and George W. Shine.

Miller told the Magistrate that Sageese secured \$6 from him. Miller saw an advertisement for camp cooks, and went to Sageese's office to apply for a situation. The accused demanded \$1, and after securing that amount, said that he was giving the position to the highest bidder.

Miller wanted to know how much he would have to give, and Sageese asked for \$6. The complainant paid the money and then Sageese showed him a letter from the contractor who wanted the cooks, stating that Englishmen need not apply. Miller demanded his money back, and called many times, but accused always had some excuse for not returning it. Finally, the matter was put in the hands of the police. In answer to the contention of counsel for the defence that there was no offence shown, the Magistrate said: "Obtaining money by any dishonest means is fraud in my estimation, and I shall not allow it to get abroad that such sharp dealing will be tolerated in this city. I am not imposing a sentence, because the man is a foreigner, and may not understand that the commercial instinct often becomes illegal." The other complainant, Shine, had a similar tale, and paid \$5 to the accused. On repayment to the complainants of the sums received from them, the accused was remanded for sentence until called on.

(Rex vs. Sageese 23rd December, 1907; Dennison P. M.)

### Damages for Death of Son.

On 24th June last, Harry Wright, a telegraph lineman in the employ of the Canadian Pacific Railway Company, while engaged in the course of his employment in inspecting some telegraph wires at Port Hope, was electrocuted by coming into contact with a live wire of the Port Hope Power & Light Company. An action brought by his mother, a widow, to recover damages from the Railway Company and the Power & Light Company, was recently tried before a jury at the Toronto Assizes. Defendants resisted the action, and said that the accident was caused by the negligence of the deceased in failing to wear rubber gloves when he climbed the pole to inspect the wires. The jury brought in a verdict in favour of plaintiff with \$2,500 damages.

(Wright vs. Port Hope El. L. & P. Co., et al.; 21st January, 1908; Britton, J.)

### Criminal Negligence.

On 18th January, a rear-end collision took place in the Grand Trunk Railway

yards at Toronto, resulting in the death of Hyacinthe Larocque, of St. Lazarre, Que., a lineman in the employ of the Great Northwest Telegraph Co., and serious injuries to Maxime Champagne, lineman, and Joseph Prefontaine, a cook, also in the service of the same Company. The men, with others, were in an old passenger coach of the G. T. R. Co., used as a boarding, eating and cooking car, which was attached to a freight train standing on the main line, waiting to pull out for the west, when a light engine bound for Mimico came up from the east and crashed into the rear of the freight, smashing the car in which the men were into kindling wood, and throwing it into the ditch, where the debris caught fire and Larocque's body was partially burned. At a coroner's inquest held to inquire into the circumstances, evidence was given which went to show that the light engine was travelling at a high rate of speed, tender first. Evidence was also given that by the rules of the Railway Company, it was the duty of the rear-end brakeman of the freight train to go back for fifteen telegraph poles with flags and torpedoes to protect his train from collision, and that it was the duty of the conductor to see that the brakemen performed this work. This rule of the company had not been strictly observed, and between this neglect and the carelessness of the driver, the accident occurred. The jury brought in a verdict that "the collision was due to the negligence of A. G. Bryce (engineer of the light engine), Gideon Marks and A. Leddelle (conductor and brakeman of the freight), and that it is objectionable and dangerous for engines and trains to be running rear end first at any time." None of the men implicated were present at the inquest, and warrants have been issued for their arrest on a charge of criminal negligence.

(Inquest re Larocque; 23rd January, 1908; Lynd, Coroner.)

On the 30th September, 1907, James Rigby, while working on a building on Admiral Crescent, in the City of Toronto, was killed by a fall occasioned by the collapse of a scaffold on which he was working.

William Chessar, a foreman carpenter, who was in charge of the work, was placed upon his trial at the General Sessions on a charge of criminal negligence in connection with the erection of the scaffold. Evidence went to show that the scaffold was improperly constructed of weak material, and that the scaffold had been erected under the supervision of Chessar, who selected the material. He was, on 6th December, 1907, found guilty of the charge by a jury, and remanded for sentence. On coming up for sentence, he was allowed to go on suspended sentence under a bond of \$500.

(Rex v. Chessar; 21st January, 1908; Winchester, Co. J.)

#### **Accident Due to Failure to Properly Flag Train.**

An inquest was held on the body of William Small, a fireman, who was killed in a wreck on the C. P. R., at Angler, Ontario, caused by the train running into a place where a rail had been removed from the track by the repair gang. The evidence showed that a flagman had been sent out to warn approaching trains of the danger, but that while on his way to take up his position, he had been caught by the train coming suddenly round a curve while he was on a bridge, and the only way he could save himself was to lie down on the bridge, where he was not seen by the engineer, though he said he waved his flag. The engineer of the train was also killed. The verdict of the Coroner's jury was as follows: "Death was the result of the failure of the sectionmen to properly flag the train, and that the section foreman committed a grave error in opening the track to replace a rail without being assured of proper protection."

(Inquest re Small; 19th December, 1907.)

#### **Train Crew Found Responsible for Accident.**

An inquest was held at Tilsonburg on the body of John J. Walker, a G. T. R. engineer, who was killed in a collision between his train and two Wabash engines, on 2nd January. Evidence of witnesses showed that the Wabash freight

was unable to make the grade between Tilsonburg and Corinth, and with the consent of the despatcher, half was left in the siding at Tilsonburg, while the other half was taken to Corinth, but that nothing was done to protect the train from trains following. The coroner's jury brought in the following verdict: "That the cause of said collision was negligence on the part of the Wabash crew in not properly protecting the rear end of their train; that the despatcher might have prevented the collision if he had given holding orders on No. 95 at Tilsonburg, so that the order board could have been displayed against No. 93" A brakeman on the G. T. R. train, named J. H. McCrea, died of injuries sustained in the accident.

(Inquest re Walker; 8th January, 1908.)

#### Motorman Committed for Trial.

George E. Smith, a Toronto Railway motorman, charged with criminal negligence in having, by neglect of his duty, endangered the lives of the passengers on a car which broke through the gates at a railway crossing, had a preliminary hearing at the Police Court at Toronto recently. On Sunday evening, 29th December, 1907, Smith was in charge of the car, which was travelling west. When the car approached the crossing, the gates were down and a train was passing. The car broke through the gates and ran into the train. Gateman John Clark testified that as well as he could tell in the dark, the car was running at about fifteen miles an hour. It was raining at the time, and the rails were slippery. He said the derailing switch, which sends the car off the track, was in perfect working order at the time. He also said that the car should have stopped before it reached the derailing switch, which it did not. The head roadmaster of the Street Railway Company affirmed the statement of the gateman that all cars must stop before they reach the derailing switch. The Magistrate said he thought that knowing the condition that the rails were in, the accused could have put on the brakes in time to allow for the skidding, and committed him for trial by jury.

(Rex vs. Smith; 9th January, 1908; Denison, P. m.)

#### ALBERTA CASE.

##### Chinese Employment Agent Guilty of False Pretences.

Kan Yan, a Chinese doctor, was recently tried at Calgary on a charge of obtaining money under false pretences from over 100 local workingmen. The accused obtained a fee of \$2 from each of the men, promising them employment at Kelowna, B. C. He was convicted and sentenced to six months' hard labour at the barracks. When sentenced, Kan Yan had \$33 of the money left, and asked the Magistrate to distribute it equally among the men he had defrauded.

(Rex v. Kan Yan; 4th January, 1908; Smith, P. M.)

#### ENGLISH CASE.

##### Injury 'in the Course of his Employment.'

This case raised the question whether a workman who meets with an accident on or about his employers' premises while going to receive his pay is injured "in the course of his employment."

Plaintiff was in the employment of defendants as a collier, and it was part of his contract of employment that the employers should pay him his wages at their pay office. He left work at 5 a.m. on Saturday morning. At 12.00 midday he went for his wages for the past fortnight. He went along a footpath which had been made by defendants for their workmen, and while going along a railway company's line which ran through defendants' premises he was knocked down by an engine and injured. He was not going to resume work till the following Sunday night.

The County Court Judge, before whom the matter came as an arbitrator under the Workmen's Compensation Act, 1897, found that the accident happened on or about the defendants' premises, but that it did not arise in the course of and out of his employment.

The Court of Appeal held that plaintiff was injured "in the course of the employment" within the meaning of the Act, and was entitled to compensation.

(Lowry v. Sheffield Coal Co., Ltd.; 27th November, 1907; Court of Appeal.)

# LABOUR GAZETTE

MARCH, 1908.

## INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF FEBRUARY, 1908.

### I.—GENERAL SUMMARY.

**I**NDUSTRIAL and labour conditions during February, 1908, showed little change as compared with the preceding month. Compared with the corresponding month of 1907, conditions were less buoyant. The number of unemployed was less at several points than in January, owing largely to the heavy snowfalls which necessitated the employment of large numbers of men in the work of removal. In Western Canada and in Nova Scotia, the weather continued exceptionally mild. The announcement of arrangements on an extensive scale for railway construction during the present year had a favourable effect, the outlook being that expenditures in this connection will exceed those of any previous year. Arrangements for the supply of labour were already being made. The money stringency, however, continued, being chiefly felt in the manufacturing industry and in the building trades, in both of which the outlook was less favourable than at the corresponding period of 1907. In the mining industry, the Nova Scotia collieries were very busy, and there was an improvement in the metal mining camps of British Columbia. Lumbering and fishing continued dull, the effect being particularly felt in British Columbia and in the Maritime Provinces. The storing of ice was completed under exceptionally favourable conditions, the quality of the product being excellent and the supply abundant.

### Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during February:—

*Lumbering.*—Some reductions in the general scale have gone into effect in British Columbia.

*Metal and Woodworking trades.*—Piece work prices of piano plate moulders at Guelph, Ont., were reduced. Some 60 iron workers and wood workers employed in industrial establishments at Berlin, Ont., had their wages reduced 10–15 per cent. (1).

*Clothing.*—Tailors at Kingston, Ont., received an increase in wages. At Winnipeg, Man., some reductions in wages went into effect.

*Civic employees.*—Civic employees at St. John, N. B., had their wages increased (2). Some 12 civic employees at Niagara Falls, Ont., received increases in salaries dating from January 1st. Policemen at Brantford, Ont., obtained an increase averaging 15 cents per day.

*Railway construction.*—Labourers (150) employed in railway construction work near Moncton, N. B., had their wages reduced from 16 to 15 cents per hour.

*Transport.*—Teamsters (85) employed

(1) See report of Berlin, Ont. correspondent.

(2) See report of St. John, N.B., correspondent.

by the Ottawa, Ont., Electric Railway Company in removing snow obtained an advance from 20 to 25 cents per load, after a strike.

### Cost of Living.

Butter was higher in price at many points than in some years, but eggs declined somewhat compared with January. Wheat was unsettled, with an upward tendency at the close of the month. White oats were scarce in western Canada and prices advanced. Elsewhere, oats and hay declined in price. Hog products remained depressed. On February 1st, an advance of 2½ cents in the price of canned fruits and vegetables went into effect. At Montreal, Que., the price of bread was advanced one cent per loaf. The price of British Columbia lumber was reduced \$3.00 per thousand feet for rough, \$2.00 for clear, and 75 cents for shingles; the new prices are lower than have prevailed for the past 18 months. Metals were unsettled, some decline on the recent advances having taken place in copper and tin. Paints were dull, but oils and turpentine were upward in price. Wool and yarn prices were somewhat weak. Rents were upwards in Montreal and Quebec, Que.

In the annual report of the Inspector of Hospitals and Charities for Ontario, it was stated that the average cost per patient in Ontario hospitals had increased from 83½ cents per day in 1900 to \$1.08 in 1906, and \$1.16 in 1907.

### Interruptions to Industry.

The number of trade disputes in existence during February was 1 less than in the previous month, and there was a decrease of about 16,895 in the number of working days lost. Compared with February, 1907, there was the same number of disputes, but there was a decrease of about 14,731 in the number of working days lost.

Among industrial establishments, etc., destroyed by fire or through other causes during February, as reported in the press

of the Dominion, the following may be mentioned:—

*Nova Scotia.*—Drug store at Amherst; loss, \$3,000. Dominion Coal Company's store at Dominion; loss, \$28,000. Shoe factory at Halifax; loss, \$10,000.

*Prince Edward Island.*—Newspaper press room at Charlottetown.

Fierce gales on the Atlantic coast during the first days of the month caused heavy damage to fishing outfits and shipping.

*New Brunswick.*—Hotel at Campbellton; loss, \$25,000. Fish factory at Grand Manan. Saw mill at Jaquet River; loss, \$30,000. Grist mill at Hampton; loss, \$1,500. Flour mill at Milltown. Saw mill at Rowena. loss, \$5,000.

A heavy freshet occurred in King's County on February 16 and 17, carrying away several bridges.

*Quebec.*—Saw mill at d'Apic; loss, \$8,000. Carriage factory at Lennoxville; loss, \$4,000. Shoe factory at Masson; loss, \$40,000. At Montreal, an asylum; loss, \$35,000. Canadian Pacific Railway warehouse; loss, \$385.00. Paint shop; loss, \$1,000. Three tenement houses. Wholesale fur factory; loss, \$30,000. Tailor shop; loss, \$4,000. Business block; loss, \$4,000. Convent; loss, \$7,000. Poultry shed at McDonald College; Ste. Anne de Bellevue; loss, \$3,000. Business block at St. Johns; loss, \$40,000. Tannery and two stores at St. Roch de Quebec. Sash and door factory at Sherbrooke; loss, \$8,000. Tannery at Quebec; loss, \$10,000. Stores at Quebec; loss, \$10,000. Tool factory at Three Rivers; loss, \$5,000. Stores at Waterloo.

*Ontario.*—Business block at Athens, loss, \$20,000; cider mill at Aylmer, loss, \$3,000; hotel at Dresden, loss, \$2,800; hotel at Fallsview, loss, \$4,000; store at Galetta, loss, \$8,000; steam laundry at Goderich; hotel at Gananoque, loss, \$1,000; business block at Gore Bay, loss, \$10,000; tailor shop at Hastings, store at Hamilton, loss, \$1,000; tobacco warehouse at Kingsville, loss, \$20,000; stores and lumber at Latchford, loss, \$80,000; business block and 8 stores at New Liskeard, loss, \$15,000; parlor car at Ottawa, loss, \$30,000; paint factory, at Ottawa, loss, \$20,000; tool company's plant at Ottawa, loss, \$16,000; weaving company's plant and junk store at Peterborough; skating rink at Picton; woollen mills, loss, \$2,500 at Stratford; store at Sherston, loss, \$4,000; warehouse and agricultural implements at Otonabee, loss, \$3,000; at Toronto, Ont., stores and residence, loss, \$8,700; garment factory and stores, loss, \$30,000; business block, loss, \$16,000; business block, loss, \$25,000; plate glass storehouse, loss \$2,000; store, loss, \$1,000; perfume factory, loss, \$10,000; apple store-room and school at Trenton, loss, \$3,000; powder works at Tweed, loss, \$25,000; dye works and stores at Wallaceburg; flour and grist mill at Welland, loss, \$10,000; barn at Elmwood.

*Manitoba.*—Stores at Carberry, loss, \$15,000; hotel and stores at Minitonas, loss, \$40,000; elevator and 10,000 bushels of wheat at Winkler.

*Saskatchewan.*—Flour mill, loss, \$23,000, and Chinese laundry at Regina.

*Alberta.*—Business block at Calgary; theatre at Medicine Hat, loss, \$2,000.

*British Columbia.*—General store at Grand Forks, loss, \$5,000.

### Conditions in the Industries and Trades.

Conditions of employment during February in the several industries and trades throughout Canada, as indicated by the reports of correspondents to the *Labour Gazette* and by information received at the Department from other sources, may be briefly summarized as follows;—

**Agriculture.**

Operations were almost wholly confined to caring for live stock, the marketing of produce and the cutting of cordwood. Prices were very favourable. Stocks of grain in elevators were very heavy throughout Western Canada, and receipts were large throughout the month. On February 12th, an Act was passed by the Dominion Government authorizing the expenditure of \$2,850,000 in purchasing seed grain for homestead settlers in the provinces of Alberta and Saskatchewan, the Act being designed for the assistance of those who had suffered by the crop failure of the past year (3). Bills confirming the loan of the Dominion Government, as above, were introduced into the Alberta and Saskatchewan legislatures. Final statistics with regard to the 1907 grain crops of Saskatchewan were issued by the Department of Agriculture of that province. The total production of grain was 53,767,251 bushels, consisting of, wheat, 27,691,601 bushels; oats, 23,324,903 bushels; barley, 13,350,265 bushels; flax, 11,364,716 bushels; speltz, 35,766 bushels. Compared with the production of 1906, the crop of last season shows a net decrease of 9,284,959 bushels, the difference being almost entirely in the case of wheat.

While there was a shortage in most of the cereal crops of the West last year, the flax crop was larger than ever before. This was chiefly due to the fact that flax can be sown later than wheat or other grains, as it matures more quickly.

According to an estimate made by agents of the Canadian Pacific Railway Company, the export of live stock from the Provinces of Saskatchewan and Alberta during 1907 showed a decline compared with 1906. The following is a complete return:—

	1906	1907	Decrease, 1907
Horses.....	19,549	11,352	8,197
Cattle.....	114,651	80,043	34,608
Hogs.....	30,099	29,588	511
Sheep.....	57,024	28,573	28,451

(3) A special article dealing with the Act, and the further steps taken in this connection, is published elsewhere in the present issue.

Mild and damp weather at several points has affected the storing of apples unfavourably. It was stated that the law prohibiting the fraudulent marking of apples would be strictly enforced in future.

A number of important meetings of agriculturists were held during February. The twenty-sixth annual convention of the Dairymen's Association of the Province of Quebec took place at Three Rivers, Que., and the annual meeting of the district of Bedford Association at Cowansville, Que. A convention held under the auspices of the Ontario Department of Agriculture, the Provincial Fruit Growers' Association and the local Farmers' Institute was held at Leamington, Ont., for the purpose of giving a course of instruction to fruit and vegetable growers. A convention of cheese manufacturers and dairymen was held at Ottawa, Ont., at which a system of factory inspection was recommended. The Clydesdale Horse Breeders' Association held its Annual Meeting at Toronto Ont. The National Live stock Association held a convention at Ottawa. The annual convention of the Saskatchewan Grain Growers' Association was held at Saskatoon, Sask., February 12-14; the government control and ownership of elevators, the providing of loading platforms at railway stations, were discussed at length. The executives of the Grain Growers' Association of the three North-west Provinces held a conference later. Other meetings held were, the third annual convention of the Canadian Seed Growers' Association at Ottawa; the annual meeting of the Dominion Sheep Breeders' Association at Toronto, and the annual meeting of the Swine Breeders' Association at Toronto..

**Fishing.**

The catch of smelts and eels in the Maritime Provinces has been smaller than last year, with prices somewhat lower. Preparations for the opening of the lobster season had been begun. Some good catches of coarse fish were reported on the great lakes. In Saskatchewan and Alberta the month was a busy one; the catch of white fish will probably exceed

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

that of 1907 <sup>(4)</sup>. The month was quiet in British Columbia. Catches of herring declined. Whaling continued very active off Vancouver Island. The outlook for sealing was not favourable.

A special commissioner was appointed by the government of Canada to confer with the provincial governments with the purpose of obtaining a mutually satisfactory understanding with regard to fishery questions.

### Lumbering.

Conditions remained quiet throughout Canada. In Nova Scotia it was estimated that the extent of operations was only about one third of that of the preceding year. In New Brunswick, also, there has been a considerable curtailment in the cut <sup>(5)</sup>. A number of men returned from the woods in Quebec and New Brunswick. The heavy snowfall impeded operations in certain portions of Ontario and Quebec, though no serious embarrassment was caused. In the North-west Provinces, large numbers of men were busy getting out ties, contracts having been awarded by the Grand Trunk Pacific and other railway companies for upwards of 5,000,000 ties, only a small part of which has been delivered thus far. The ties called for are 8 feet long with sawed ends, with a face at least 6 inches wide at the narrowest point, and a depth of six or seven inches. Cutting and hewing generally begins in September and continues until the end of March, the hauling season commencing about February 1st and closing on April 1st. The stock of logs and lumber in British Columbia was greatly in excess of the usual supply, especially in the Mountain district. Conditions at the mills showed little change during February.

### Mining.

The Nova Scotia collieries had a very busy month, the output being considerably in excess of that during the corresponding period of 1907. A disastrous explosion occurred in the south levels

of the Port Hood colliery on February 7, ten miners being instantly killed <sup>(6)</sup>. In New Brunswick, important developments in the iron mining industry were announced. <sup>(7)</sup> The asbestos mines of Quebec were busy, but mica mining remained dull. Shipments from Cobalt, Ont., camp were heavy, and operations were active throughout eastern Ontario. Extensive additions to plant were being made by the Canadian Copper Company at Copper Cliff, Ont. Three furnaces were operated by the company throughout the year, except during the month of December, when only two were in blast. Two new furnaces to be erected during the summer of 1908 have been purchased and delivered. Electric power transmitted from Michipicoten Falls was turned on at the Grace mine at Michipicoten during January. It is estimated that about \$100,000 has been collected by the Government of Ontario from the mining tax imposed last year. Conditions about the Alberta collieries were quiet owing to a marked falling off in trade resulting from the mild winter. At the Crow's Nest mines also there was a diminution in production, and the mines at Vancouver Island, B. C., were considerably less active than some months ago, additional men having been laid off during February. In the metalliferous mines of British Columbia conditions were more active than in January. Work at the Granby mines and smelter in the Boundary district was gradually increasing, full staffs and nearly all the furnaces being now employed. The Dominion Copper Company and other concerns, however, were still quiet. At Rossland, B. C., conditions in the mines were fairly active. A resolution was passed by the legislature of British Columbia favouring the appointment of a commission by the Dominion Government to investigate an alleged coal combine.

### Manufacturing.

Conditions showed little change from the preceding month, though an improve-

<sup>(6)</sup> See statement under heading "Industrial Accidents During Month of February," elsewhere in present issue.

<sup>(7)</sup> See report of St. John, N. B., correspondent.

<sup>(4)</sup> See report of Calgary, Alta., correspondent.

<sup>(5)</sup> See report of St. John, N. B., correspondent.

ment in the outlook was reported in certain localities. The volume of orders was considerably less than at the same time in 1907. Cotton mills continued busy, and the outlook for 1908 was regarded as favourable, notwithstanding that a curtailment in production has gone into effect in the New England mills. The Dominion Textile Company, Montreal, Que., was running all its mills on full time, though orders had somewhat fallen off. At the annual meeting held by the Montreal Cotton Company and the Cornwall and York Cotton Mills Company a very successful year was reported, with prospects favourable for 1908. The iron and steel branch continued active, the mills having re-opened at Sault Ste. Marie, Ont., and those at Sydney, N. S., reporting a heavy output. At the annual meeting of the directors of the Nova Scotia Steel and Coal Company, the business of the Company during the past year was reported the largest in its history, notwithstanding that the works at New Glasgow closed down for several weeks at the end of the year. There was an increased output of iron and steel, but a decrease in the output of ore and coal. Steel shipments aggregated 53,632 tons. The sum of \$378,386 was expended on capital account during the year. The annual report of the Montreal Steel Works showed net profits of \$187,640, compared with \$196,198 in 1906 and \$120,798 in 1905; the sum of \$50,000 was added to reserve.

### Railway Construction.

Work was for the most part confined to rock cutting and the assembling of material, and some large gangs were employed in New Brunswick, Quebec and the Northwest Provinces, conditions being unchanged from January (\*). Work on the Detroit river tunnel was proceeding rapidly. Arrangements were already being made in connection with the supply of labour for the extensive operations projected after the opening of spring.

With regard to the amount of railway construction that will be carried out dur-

ing the present year, a number of important announcements were made during February. It was estimated that in the neighbourhood of \$20,000,000 would be spent by the Canadian Pacific Railway Company on branch lines, rolling stock, etc., \$25,000,000 by the Grand Trunk Pacific Railway Company; \$10,000,000 by the Canadian Northern Railway Company, and \$20,000,000 by the Commissioners of the National Transcontinental Railway. A reference in further detail to proposed construction work is as follows;—

It was announced in the Canadian Gazette of February 1, that tenders will be received up to noon March 10, for the construction of 365 additional miles of the National Transcontinental Railway. The distance for which tenders are called is divided into six sections, as follows;—

(1) District "A".—From a point designated on the plans of the Commissioners, about the 58th mile west of Moncton, to the crossing of the Intercolonial Railway at or about mile 97.7, a distance of about 39.7 miles.

(2) District "A".—From a point designated on the plans of the Commissioners at or about the crossing of the Intercolonial Railway by the Transcontinental Railway, at mile 97.7 west of Moncton, to the Tobique River, at or about mile 165.7, less one mile, a distance of about 67 miles.

(3) District "A".—From a point designated on the plans of the Commissioners at or near the Tobique River, to a point shown on the said plans about 2½ miles west of the town of Grand Falls, in the Province of New Brunswick, a distance of about 31.5 miles.

(4) District "B".—From a point designated on the plans of the Commissioners at or near the boundary line between the Provinces of Quebec and New Brunswick, westerly a distance of about 52.4 miles.

(5) District "D".—From a point designated on the plans of the Commissioners about eight miles west of the Abitibi River, crossing, in the Province of Ontario westerly for a distance of about 100 miles.

(6) District "E".—From a point designated on the plans of the Commissioners about 19½ miles west of the crossing of Mud River, near Lake Nepigon, in the Province of Ontario, easterly for a distance of about 75 miles.

It was announced that construction operations would be very actively pursued by the Grand Trunk Pacific Railway in the Northwest Provinces in 1908. The contract for the construction of 126 miles of railway east of Edmonton, to Wolf Creek, was awarded by the Company at a price of approximately \$6,000,000 for the entire contract. In addition, contracts for 200 miles west of Edmonton and 100 miles east of Prince Rupert, the Pacific terminus of the road, will be awarded shortly. The mileage covered by the above was estimated by the presi-

(\*) With reference to the extent of railway construction work during the present winter, see *Labour Gazette* for February, 1908, pages 881-2.

dent of the road to cost in the neighbourhood of \$25,000,000. It is the intention of the Company to complete the Lake Superior branch and the line between Winnipeg and Edmonton during 1908. Debentures for the purchase of rolling stock will be issued shortly.

Railway developments in New Brunswick in the vicinity of the Baie des Chaleurs and the Restigouche river will be very active during the present year. The International railway and the Atlantic, Quebec and Western line will be under construction and will employ large numbers of men. The contract for the large bridge over the Restigouche at Campbellton has been awarded, to cost in the neighborhood of \$600,000. Some 40 miles of the International railway and 130 miles of the Atlantic, Quebec and Western Railway have been already completed.

It was announced that the expenditure of the Canadian Pacific Railway Company on extensions in western Canada would be larger during 1908 than in any previous year. The double tracking of the line between Winnipeg and Fort William is now over half completed, and grading done on other sections of the remaining portion. The work has been hampered by the scarcity of ties, the price of which has greatly increased since the beginning of operations. It is expected that the line will be completed for use in the closing months of the present year. A contract for the reconstruction of elevator D. at Fort William, Ont., to cost in the neighbourhood of \$400,000, has been awarded by the Company. Tenders were also called for the construction of new stock yards for the Company at Montreal, Que. The buildings will give accommodation to several thousands of animals. It was stated that the Canadian Northern Railway Company had devoted \$15,000,000 to the extension of its lines and the improvement of rolling stock and equipment in the western provinces. It was also stated that the company would establish a port at the mouth of French River on the Georgian Bay.

#### General Transport.

Some heavy snow storms in Ontario and Quebec gave extra employment to

train crews, but the month of February, on the whole, was less active for transport employees than February, 1907, except in the Maritime provinces, owing to a general decline in the volume of merchandise in transit. As a result the car supply was abundant, especially in western Canada, where the falling off in the coal trade was felt. The movement of wheat continued heavy, though there was a decrease in the demand for low grade wheat for export. During the five months ended January 31st. the movement of grain from the Western provinces to the head of the lakes exceeded that of the corresponding period of last year by over 2,000,000 bushels. During 1907, 47,636,146 bushels of wheat were shipped from the combined ports of Fort William and Port Arthur, as compared with 44,000,000 in 1906, and 41,000,000 in 1905. Of this amount 80 per cent was shipped in Canadian bottoms last year, against 72 per cent, in the two preceding years.

Half yearly gross receipts of the Grand Trunk Railway Company amounted to £3,762,200 an expansion of £178,200 of which £145,900 was absorbed by an increase in working expenses, which amounted to £2,710,900. Net receipts showed an advance of £28,700 over last year.

Officers of the Dominion government were in communication with railway companies for the purpose of urging that all possible facilities be provided for the prompt conveyance to market of feed wheat.

The following circular was recently issued by the Board of Railway Commissioners for Canada with respect to the protection of wrecking crews:—

#### ACCIDENTS TO RAILWAY EMPLOYEES.

In considering the numerous reports of investigations of accidents, the Board has been impressed with the fact that a large number of railway men employed on wrecking crews are either injured or lose their lives in the clearing of wrecks and the handling of wrecked and disabled engines.

The Board would, therefore, urge upon railway companies the advisability of issuing a circular to their employees warning them that more care should be exercised in the clearing of wrecks, and when coupling or uncoupling of engines which have been injured in wrecks is required to be performed, that the employees engaged in such work be placed under the charge of a responsible foreman, who will direct their movements and see that their lives are not needlessly jeopardized.

The following circular was recently issued by the Ontario Railway and Municipal Board to electric railway companies operating in Ontario, with reference to the qualifications and examination of motormen:—

RE EXAMINERS OF MOTORMEN.

Dear Sirs,—

I have the honour to call your attention to the fact that the Presentment of the Grand Jury at the December Assizes, held at Hamilton, contains the following clauses: "The Grand Jury consider that Electric Railway Companies should be more careful in selecting their motormen, and that a longer service in training should be insisted upon before these men are put in such responsible positions, where the life of the travelling public is in their care."

I have the honour by direction of the Board to remind you that the Board will of course be obliged to withdraw its approval of the appointment of any examiner of motormen who fails in any way to discharge his duties to the satisfaction of the Board, and in such a way as to insure the safety of the public using the highway and the cars. In case of criminal negligence, examiners would probably be subject to criminal prosecution.

During the year ended June 30, 1907, some 46 electric railway companies were in operation in Canada, operating 814 miles, with gross earnings of \$12,635,905 and net earnings of \$4,898,653. A total number of 273,999,404 passengers and 479,731 tons of freight were carried.

At the annual meeting of the Toronto Railway Company the earnings of the company were reported larger than in any previous year. The sum of \$542,000 was paid by the company in mileage rentals, taxes, etc. The total number of passengers carried was 116,946,000, compared with 105,000,000 in 1906.

At the annual meeting of the Winnipeg Street Railway Company gross earnings were reported to be \$1,722,406 during 1907, being \$306,101 more than in 1906. The total number of passengers carried was 20,846,317 a gain of 3,616,763.

The winter port business at St. John, N.B., thus far has been heavier than last year.

The Northern Navigation Company of Ontario held its ninth annual meeting at Toronto, Ont., on January 20, 1908. It was reported that navigation in 1907 had opened on Lake Superior on April 22, and on Georgian Bay on April 29, that is about a week later than in 1906. There was a falling off in passenger business of \$6,000 but an increase in freight business of \$33,000. The net

increase in earnings amounted to \$7,000. The company's fleet in 1907 consisted of 10 steamers valued at \$905,696 compared with 9 steamers, valued at \$750,000 in 1906.

The Trades.

*Building.*—There was little employment in the outside branches during February; the inside branches had a fair month in several localities on repair and finishing work. Plumbers and steamfitters had a good month. The outlook for the coming season was less favourable in the larger cities, including Montreal, Toronto and Winnipeg, than at the corresponding period of 1907.

*Metal and woodworking.*—Employees in industrial establishments were quiet, though there was some improvement compared with January. Horseshoers were busy.

*Printing.*—The allied trades had a good month. Bookbinders were active.

*Clothing.*—Journeyman tailors were better employed than in January, but garment workers and boot and shoe workers were somewhat quiet.

*Leather.*—Tanners and curriers were affected by unsettled conditions in the market for hides and leather.

*Textile.*—The month was active.

*Food and tobacco preparation.*—Bakers had a fair month. Confectioners were becoming busy on Easter trade, the after-holiday trade having been of fair proportions. Millers had a good month. The ice supply of the present winter season has been gathered in excellent condition.

*Miscellaneous.*—Barbers, hotel and restaurant employees, retail clerks, etc., were fairly well employed.

*Unskilled labour.*—Heavy snowfalls in Ontario and Quebec gave employment to large numbers of men in the work of snow removal. The gathering of the ice crop also afforded active employment. In most of the cities, however, the supply of labour was considerably in excess of the demand, though it was expected that with the opening of spring employment would be available for all.

Canadian Trade and Revenue.

*Foreign trade.*—During January, 1908 the total value of imports entered for con-

sumption was \$23,273,475, compared with \$26,519,247 in January, 1907. The total value of imports for the ten months ending January 31, 1908, was \$307,316,720, compared with \$278,124,603 for the corresponding period of 1906-07. Total domestic exports during January, 1908, amounted to \$20,467,317, compared with \$16,721,081 in January, 1907. The total domestic exports for the ten months ending January 31, 1908, amounted to \$214,380,663, compared with \$212,253,637 in the corresponding period of 1906-07. During January, 1908, there were increases in exports of animals and their produce, and under the heading of agriculture and manufactures, and decreases in -products of the mine, the fisheries and the forest.

*Imperial trade.*—According to reports received from commercial agents of the Department of Trade and Commerce, Canada, there were openings for Canadian evaporated apples in the British market. There were several complaints from that market as to the grading and packing of Canadian apples received, and increased care is recommended on the part of Canadian packers. Good openings were reported for British Columbia apples, barley and other cereals in Australasia.

*Domestic trade.*—Trade was steady throughout February, with seasonable goods in fair demand. Wholesalers' orders were not large, but were expected to improve as the spring advances. Country trade was dull in Ontario and Quebec, as a result of the snowstorms, but improved in the closing days of the month. Winter stocks were well cleared out, though in the Maritime and Northwest provinces the mild weather affected sales. Collections were fair, satisfaction being expressed in most localities with the proportion of paper taken up on February 4. Canadian securities remained on low levels. The January bank statement showed a continued shrinkage in circulation and deposits; loans also were curtailed.

The first annual meeting of the Farmers' Bank showed net profits of \$14,350 and total deposits of \$647,000. The bank opened 27 branches and 11 sub-branches during the year. The Standard Bank

reported an increase of readily available assets with a decline in current discounts. The Provincial Bank reported earnings of 12 per cent during the past year, out of which \$50,000 was added to rest account. The net earnings of the Traders' Bank in 1907 were \$569,692, out of which \$100,000 was added to rest account.

*Canadian Revenue.*—Canadian revenue during February, 1908, amounted to \$6,577,027.06, compared with \$7,327,820.49 in February, 1907. For the eleven months ending February 29, 1908, the total revenue was \$87,601,299.37, compared with \$78,977,550.81 during the corresponding period of 1906-07.

The total expenditure on capital account during February, 1908, was \$3,522,988.92, of which the leading items were: Public Works, Railways and Canals, \$2,736,854.98; Militia (capital) \$268,326.83; Railway subsidies, \$267,581.73; and Bounties, \$198,051.22.

#### Notes.

A debate on the subject of *public ownership* was held in the Senate on February 26.

The fourth annual meeting of the *Western Ontario Brickmakers' Association* was held at Blenheim, Ont., on February, 19.

The third annual convention of the *Ontario Retail Hardware Dealers' Association* was held at Toronto, Ont., on February, 12-13.

The tenth annual convention of the *Associated Boards of Trade* of Eastern British Columbia was held at Moyie, B.C., on January 22nd.

The commissioners appointed by the government of British Columbia in August 1907 to enquire into the *irrigation* of land in that province, submitted its report under date of February 10.

At the annual meeting of the *Guelph, Ont., Retail Merchants Association* it was decided to discontinue the weekly half holiday during the summer months, which has been granted employees for a number of years past.

The report of the *Glance Bay, N.S., Co-operative Society, Limited*, for the quarter ending December 31, 1907, showed business for the quarter amount-

ing to \$25,955.07 on which a dividend of 8 per cent was declared to members and 4 per cent to non members.

The annual statement of the *Bell Telephone Company of Canada* showed gross earnings of \$4,829,000 and net earnings of \$1,043,000. At the close of 1907 the company had 111,118 stations, or 15,973 more than in the previous year. It was announced that the company would negotiate with the governments of Saskatchewan and Alberta for the sale of its business in these provinces.

Under the provisions of the Public Health Ordinance regulations were issued by the government of Saskatchewan, under date of January 18, for the *sanitary control* of lumbering, mining, railway construction and other camps. A maximum fine of \$100 and costs, was imposed for violation of the regulations.

The annual meeting and banquet of shareholders of the *Guelph Co-operative Association* was held on February 11. The total share capital of the association is now \$2,765 and the total value of property held \$8,009. A dividend of 8 per cent to shareholders and of 4 per cent to non-shareholders was recommended. The turn-over of the association is now about \$30,000 a year.

A debate on the subject of *technical education* took place in the House of Commons. On February 17th, a resolution was adopted as follows:—

“That in the execution of public works requiring technical knowledge, the government should, as far as possible, utilize the services of young men engaged in the pursuit of technical studies in our Canadian institutions, so as to permit of their applying with profit during their vacations the knowledge acquired by them during the period of tuition.”

Notice was published in the Quebec Official Gazette of the formation of the *Council of Conciliation and Arbitration* for the settlement of labour disputes in the province of Quebec other than those in respect to railway construction or traffic. The membership of the Council is as follows:—Narcisse T. Gagnon, merchant of the city of Montreal, President; John Herbert Lauer, Secretary-Treasurer of the Builders' Association of the city of Montreal, representing the employers; and Omer Brunet, shoe-machine worker of the City of Quebec, representing the employees.

The third annual report of the *Toronto Labour Temple Company* showed a total revenue during the past year of \$11,475 compared with \$10,184 during the previous year. Including the balance on hand at the beginning of the year and subscriptions for stock received during the year, the total revenue was \$15,784. The total expenditure amounted to \$12,399 including \$3,500 paid off the principal of the first and second mortgages on the Temple. A surplus of \$3,778 was carried forward, the indebtedness of the company being now \$16,500. The company's assets are estimated at \$48,834 and its liabilities at \$33,848.

On February 20th, the Right Honourable Sir Wilfrid Laurier, Prime Minister of Canada, gave notice on behalf of the Hon. the Minister of Finance, of a motion to consider a resolution based on the bill introduced by the Hon. the Minister of Trade and Commerce during the 1907 session of the Dominion Parliament to provide for the sale in Canada of *Government annuities*. The resolution was as follows:—

That it is expedient to authorize the sale of Government annuities, to the end that habits of thrift be promoted, and that thereby opportunity be given to the people of Canada to provide for old age by means of Annuities of not less than fifty dollars, nor more than six hundred dollars per year; Annuities to be purchasable either by paying a single sum, or by the payment of a stipulated sum periodically at fixed and definite intervals; the Governor-in-Council, by regulation, to fix the rate of interest to be allowed in the computation of values in tables which are to be the basis of such purchases; such Annuities to be payable after the annuitant has reached the age of fifty-five years, or has become disabled; the moneys paid in by an annuitant to be repayable, should the annuitant die before the annuity is payable, to the heirs of the annuitant, with three per cent interest compound yearly; the property and interest of an annuitant in the contract to be unassignable, and to be exempt from legal process except the contract be entered into and consideration therefor paid with intent to delay, hinder or defraud creditors, and upon establishing such intent in a court of competent jurisdiction, creditors to have the right to receive, if the annuity has not become payable, the amount paid in with three per cent, simple interest; or if the annuity has become payable the present worth of the same; the moneys received to go into Consolidated Revenue Fund, and the moneys payable to be paid thereout; an account, to be known as the Government Annuities Account, to be kept of all moneys received and paid out in connection with annuity contracts, and the assets and liabilities appertaining to the grant of annuities, including among the liabilities the present value of the prospective annuities contracted for up to the end of each fiscal year.

In connection with the above proposal representations were made by the Parliamentary representative of the Trades

and Labour Congress of Canada to the Committee on Banking and Insurance urging the committee to recommend that the Government should undertake the provision of industrial insurance.

The session of the *Legislature of Nova Scotia* was opened on February 13th. Reference was made in the Speech from the Throne to the general prosperity, the recent financial stringency having affected the business of the province only to a limited extent. The opening of a number of technical schools; the progress made with the erection of the Nova Scotia technical college the establishment of a Department of Industries and Immigration, and the inauguration of an official record of births and deaths in the province were mentioned. The report of the commission appointed to inquire into the feasibility of adopting an old age pension fund for miners would be submitted to the legislature. The government will conclude a contract for the construction of the proposed Halifax and Guysboro railroad during the present year if financial conditions are favourable.

The fourth session of the eleventh *Legislature of Ontario* was opened on February 5. Reference was made in the Speech from the Throne to the continued prosperity of the province, notwithstanding that the harvest was not as abundant as in the previous year; to the completion of the Temicaming and Northern Ontario Railway to a point 208 miles beyond North Bay and the satisfactory earnings of that railway; the development of the mining industry at Cobalt; the transfer of the work of distributing immigrants to the Dominion government; and the establishment of an agricultural farm at Driftwood River north of the height of land. A report on the subject of prison labour will be laid before the legislature, together with bills for the amendment of the mining law, the Shops Regulation act and other measures.

Pursuant to authority granted by the shareholders of the Canadian Pacific Railway Company, *pensions* have been granted from time to time since 1903 to a number of employees who have a specified age limit and who have been in

the service of the company continuously for ten years or more (\*). It was found by experience, however that in some cases the amount of the pension calculated according to the regulations, was insufficient to protect the recipient from want during his declining years, as was intended. The Board of Directors have accordingly amended the pension regulations so as to provide that from January 1st, 1908, and, until further notice, the minimum amount of the pension to be paid shall be \$20.00 per month. A circular to this effect was recently issued by the president to all the officers and employees of the company.

Owing to a steady advance in the price of butchers' meat during the early part of the present winter season, some distress was felt among the poorer members of the Hebrew and foreign classes in Toronto, Ont. At a meeting held in January the current high prices were discussed and a resolution passed requesting the retailers to make a reduction. At a subsequent meeting it was resolved not to patronize stores which did not make the reduction. The result was the retail Hebrew butchers closed their stores, several of them remaining closed for a week. During this interval it was decided by a number of Hebrews to open a store for the purpose of selling meat at actual cost, a subscription being taken up and a store placed at their disposal. On January 14th the store was opened for business and has continued since to sell meat at from 2 to 5 cents less per pound than previously the business amounting to between \$1,200 and \$1,400 per week. An additional store has since been opened. There has been no attempt made to organize on a co-operative basis, action having been taken in the first instance for the special benefit of poor Jews, though all are free to patronize the stores. The committee in charge has adhered to the original plan of selling at cost price. A manager or buyer has been appointed to purchase from the larger wholesale firms. No effort

(\*) A special article dealing with the superannuation and pension fund of the Canadian Pacific Railway Company was published in the January, 1903, issue of the *Labour Gazette*, at page 552.

has been made to earn profits for the repayment of the original subscriptions, which were given for charitable purposes. Whether the arrangement will be continued permanently will, it is said depend on the course of the retail stores.

The Executive Committee of the Legislative Board of the International Brotherhood of Locomotive Engineers and representatives of the various railway labour organizations in Canada, who were instructed by the meeting held at Ottawa during February to interview the Minister of Railways, the Minister of Justice, and the Board of Railway Commissioners in regard to the amendment to the Railway Act, and proposed new rules to govern the operating service of the Dominion railways, met the Ministers of Railways and of Justice on February 21st, with a view

to having the Railway Act amended so as to relieve railway employees of certain liabilities. As the law now is, in case of an accident, the criminal code holds a man liable only for wilful negligence, whereas a railway man comes under the provisions of the Railway Act, which holds him criminally liable for an accident due to forgetfulness or an error of judgment. The deputation asked that the law be so amended as to place railwaymen in this connection on the same condition as other classes. The Railway Act will be thoroughly inquired into, and further conferences held before definite amendments are proposed. The deputation has yet to interview the Board of Railway Commissioners in regard to new rules to govern the operating of railway trains.

## II. REPORTS OF LOCAL CORRESPONDENTS.

### SYDNEY, N.S., AND DISTRICT.

*Mr. John Moffatt, correspondent, reports as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during February were very active considering the season. The weather was favourable with little snow and tended to increase activity in the larger industries including railways and tramways as well as foundries, factories and other works. The steel and coal industries enjoyed general activity. The steel outputs were large, with all departments and mills, the rod mills, excepted, in continuous operation. The Rod mill which was idle for several weeks was started about the middle of the month, and operated four days per week. The output of the furnaces for this winter, and the product of the mills greatly exceeds that of the winter of 1907.

The Nova Scotia Steel and Coal Co., at the annual meeting held during the month reported all of the plant in full operation. The business of the past year, was the largest in the history of

the Company, showing an increase in the output of iron and steel, but a decrease in ore and coal. The steel shipped aggregated 53,632 tons being 25 per cent over the preceding year. The decrease in the coal output was owing to the decision to single shift No. 3 Colliery. The profits for the year 1907, were \$944,790, as compared with \$960,281 for 1906. The amount at the credit of profit and loss account on Jan. 1st, 1907, was \$1,180,783 which with the profits of the year, makes a total of \$2,125,574. After providing for certain special reserves, the balance is now \$792,237, compared to \$650,989, last year. The total assets of the Company are \$13,810,881.

The coal output of the Province for January, 1908, exceeded that for January 1907, by 125,000 tons, nearly every colliery showing an increased output, the largest gain being made by the Dominion Coal Co. All collieries in Cape Breton Island worked steadily. An explosion causing the death of ten men took place at Port Hood Colliery. Apart from the loss of life very little injury was done to the underground workings.

Lingan Colliery is being rapidly de-

veloped and work on the Railway spur continues. The Dominion Iron and Steel Co., opened 100 ft. of a slope on the Cowans area's at Port Morien. A large sized seam of coal was uncovered, when the slope was shut down, until the areas are further projected by bore-holes.

Transportation by rail was heavy, the chief commodities carried being Coal, Steel Ingots and Steel Rails.

Wholesale and retail business was quiet. The outside trades were quiet.

#### CONDITION OF PARTICULAR TRADES.

Conditions in the trades were active except in the building and clothing branches which were quiet. Unskilled labour was well employed.

#### WESTVILLE, N. S., AND DISTRICT.

*Mr. Thos. Hale, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The coal output during January was large, several collieries in the district increasing their outputs compared with those of the corresponding month last year. The same conditions applied, in the main, to collieries in the adjoining counties. The outputs of the different collieries were as follows:—

Dominion Coal Company, C. B. output.....	312,359 tons.
“ “ “ shipments.....	202,063 “
“ “ “ increase*.....	39,141 “
Cumberland Railway and Coal Co., Springhill, N. S. shipments.....	37,015 “
“ “ “ increase*.....	14,588 “
Nova Scotia Steel & Coal Company, C. B. shipments.....	47,750 “
“ “ “ increase*.....	8,021 “
Inverness Railway & Coal Co., C. B. shipments.....	20,422 “
“ “ “ increase*.....	4,487 “
Acadia Coal Co., Stellarton, C. B., shipments.....	29,433 “
“ “ “ increase*.....	3,205 “
Intercolonial Coal Company, Westville, N. S., shipments.....	24,948 “
“ “ “ increase*.....	1,214 “
Total increase at all collieries, 70,656.	

\*Over January, 1907.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were mainly employed attending to stock and winter work.

*Lumbering.*—There was a rush hauling pit timber and logs to the local mills.

*Manufacturing.*—Some departments of the Trenton Steel works were fully employed; others only fairly well.

*Mining.*—At present, owing to storms, there is a shortage of cars. Weather conditions have not impeded business on the seaboard this winter to any great extent, though the reports from the northern part of the country are not so favourable. Connections have been made between the two Allen shafts and it is expected that in the near future the advantages of this improvement will be apparent. The output at the Drummond Colliery, Westville, N. S., for January, 1908, amounted to 28,854

tons of coal; 620 tons of coke; 390 tons of fire-clay, and 38,400 fire-brick. The pay-roll amounted to \$44,000. It was reported in the local newspaper that at the Londonderry Iron Works, Colchester County, N. S., forty men were informed that their services would not be required until the furnace was again started. About fifty men are all that are at present employed at the furnace, coke ovens and coal washer.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Quietness was the rule.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, machinists and engineers, electrical workers and linemen, horseshoers, jewellers, etc., had fair employment.

*Printing.*—The allied trades were fairly active.

*Food and tobacco preparation.*—Ba

kers, confectioners, butchers and meat-cutters were busy, and ice-handlers very busy.

*Transport.*—Conditions generally were favourable.

*Unskilled.*—This class as a rule were inactive.

DISTRICT NOTES.

The Acadia Coal Company is boring a hole about one mile east of the Allen shafts to prove the measures in that district; it is reported that the hole is down a distance of 750 feet, and is at present passing through good shale rock.

HALIFAX, N.S., AND DISTRICT.

*Mr. A. J. Smith, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the past month showed indications of an early opening up of spring activity. Weather conditions have been most favourable. Commercial activity has been a marked feature of the month. Eight thousand two hundred and sixty-three passengers have been landed at the deep water terminus from the 8th of August, 1907 to the 9th of February, 1908. The Nova Scotia Government has decided to put the Nova-Scotia Factories' Act in operation, and Philip Ring has been appointed inspector. He has commenced work.

On February 12, at Clark's Harbour N.S., the district meeting of the Fishermen's Union opened with a good attendance, several stations being represented.

The annual meeting of the Halifax Tramway Company was held during the month. The report of the President and directors states that for the year ended Dec. 31st, last net earnings show an increase of \$4,599.71 over the previous year. The total earnings of the company \$405,452.40, were made up by the following items:—

Passenger receipts.....	\$173,870 64
Light and power earnings.....	173,943 31
Gas earnings.....	56,798 98
Sundry earnings.....	839 47

CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—Conditions during the past month were normal.

*Mining.*—The returns filed at the Mines office during the past year show that the yield of gold from the various mines in Nova Scotia was in excess of the previous year by several hundred ounces.

CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were quiet, but several branches at the end of the month showed signs of renewed activity.

*Metal.*—Normal conditions were reported.

*Woodworking and furnishing.*—These trades were fairly active.

*Printing.*—All were active.

*Clothing.*—Tailors and boot and shoe workers reported conditions normal.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and laundry workers were fairly active.

*Transport.*—Railroad men, freight handlers and ship labourers reported conditions fairly good. Teamsters and expressmen were fairly active.

*Unskilled labour* was dull.

AMHERST, N.S., AND DISTRICT.

*Mr. A. D. Ross correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of February has been exceptionally dull. The various industries have found the local supply of labour fully ample to meet more than the demand and a number of industries were working on short time and some of the men were temporarily laid off. Conditions are now becoming more normal and prospects decidedly brighter, but

there will be no demand for additional help before the end of March. Two industries, Rhode Curry & Co., and the Amherst Boot and Shoe Company, held their annual meetings this month and both reported a prosperous year. The combined output of these industries aggregated nearly \$5,000,000. The combined output of all the industries of Amherst total nearly \$7,000,000. The Victor Woodworking Co., completed its re-organization and will open early in March. Wages have remained without material changes and the month has passed without any labour troubles.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Agricultural products have commanded high prices.

*Lumbering.*—The cut this year will only be about one third of that of the previous year.

*Manufacturing.*—Rather dull conditions prevailed. This statement applies to all industries embracing Cars works, Woollen Mills, Foundries &c.

*Mining.*—Work was exceedingly brisk. One new mine has been opened up by the Empire Coal Co. The Maritime Coal & Railway Company is spending large sums of money in the development of its property. It has sunk a new slope on the Joggins property to the depth of 1,300 feet and purposes going 400 feet deeper before a level will be struck. A number of miners and surface men could find employment in the Cumberland mining sections.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The local supply of labour was more than sufficient.

*Metal.*—Work was fairly steady, but there was no demand for other than local labour.

*Woodworking.*—Car builders had a slack month owing to difficulty in obtaining material. Order have been received to keep present staffs employed until August. More orders are expected before that time. Other lines were fairly active, but the local supply is sufficient to supply all demands.

*Printing.*—A limited number of printers and pressmen could find occupation.

*Clothing.*—Trade was dull, but an improvement is expected next month.

*Leather.*—Trunk and bag makers had steady employment.

*Unskilled labour.*—There was no demand for unskilled labour. The small cut of lumber has thrown upon the market a large number of men who are generally employed in the woods during the winter months.

#### CHARLOTTETOWN, P.E.I., AND DISTRICT.

*Mr. F. J. Nash, correspondent,* reports as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during February, differed very little from that of March, the supply being somewhat in excess of the demand, although there was no serious lack of employment. The month was much milder than the same month last year, enabling more outdoor work to be done, but the scarcity of snow during the latter part of the month and the heavy travelling made business dull for a time. The winter steamers ran regularly during the month, thus preventing the congestion of freight that has happened in other years, and giving employment to a large number of men in Georgetown, the winter port.

#### RE UNEMPLOYMENT.

The usual cessation of out-door activity has not seriously affected the labour situation.

While all have not secured steady employment there has been a good deal of work in connection with the city streets, such as snow shovelling etc. No special effort has been made by the municipality to provide employment. The outlook for the balance of the season is very favourable.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Operations were quiet during the first of the month but during

the latter part the demand for seed oats purchased by the Dominion Government for the North-West, tended to enliven the situation.

*Fishing.*—Smelt and eel fishing was carried on briskly but the result was not equal to last year owing to the drop in prices. Preparations, however, are under way for the opening of the lobster season next April, traps and cans being made for many of the factories.

*Lumbering.*—The few mills of the Island were kept running under normal conditions, supply and demand being well balanced.

*Railroad construction.*—The installation of the heating apparatus in the new car shops of the P. E. I., Railway was completed. Work will be suspended for about a month, but will be resumed in the early part of April.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons had a dull month. Carpenters and joiners were active. Lathers and plasterers, painters and paper-hangers were fairly active. Plumbers, gas and steam-fitters, and stonecutters were active. Labourers had a dull month.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, machinists, electrical men and line men, and sheet metal workers were active. Bicycle workers had a dull month.

*Woodworking and furnishing.*—Woodworkers, upholsterers, carriage and wagon builders, were active.

*Printing.*—Printers, pressmen and bookbinders were active.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and tobacco workers were active.

*Leather trades.*—Tanners, curriers and saddlers were active.

*Miscellaneous.*—Barbers, clerks and deliverymen were active.

*Transport.*—Railroad conductors, trainmen, locomotive engineers, switchmen, trackmen, and longshoremen were

active. Teamsters and expressmen were fairly active.

*Unskilled labour.*—There was a fair demand for unskilled labour.

#### MONCTON, N.B., AND DISTRICT.

*Mr. J. C. Graves, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market during February shewed no material change from January and the corresponding month of last winter. Supply and demand were seemingly well balanced in most lines and the percentage of unemployed was not large in any case. The unusually mild weather existing throughout the entire month very much lessened the strain of winter upon the poorer classes, and also made considerable out-door work possible. All local manufacturing industries were running, some with their usual complement of operatives and a few with reduced staffs. About 270 foreign labourers have been steadily engaged during the winter in excavating for the water system at the new I. C. R., shops. The absence of snow and the exceptionally mild weather has rendered this kind of work possible, and good progress has been made in putting down the mains. These labourers receive 16c per hour. A considerable force of men are also at work upon the steel superstructure of the locomotive shop. Wholesale trade has been up to the average and retail trade good. Some milk dealers have put the price of milk down to six cents but the majority hold at 7c per quart. Real estate has been quiet and rents firm. Labourers upon the G. T. P., suffered a reduction from 16c to 15c per hour commencing with February 1st, about 150 men were affected. No other changes in rates of wages or hours of labour have been noted and relations between employers and employees are cordial.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Work was confined to the getting out of wood and poles and

caring for stock. Market prices were about the same as last month. Hay however was cheaper, retailing for \$11 and \$12 per ton (loose).

*Fishing.*—The smelt fishing season which closes February 15th, was extended to the 22nd. The catch all along the shore was much below the average and shipments as a consequence less than last year's.

*Lumbering.* Good progress has been made but the season's cut is expected to fall a little short of last year's.

*Manufacturing.*—Normal conditions prevailed.

*Railroad construction and employment.*—Construction work upon this end of the Moncton-Chipman section of the Grand Trunk Pacific has been actively carried on. Three steam shovels are now at work in the cuttings and much excavation and filling in has been done.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Quiet conditions as is usual at this season of the year prevailed. Considerable inside work however was carried on and indications point to the coming season surpassing that of last year in activity.

*Metal, engineering and shipbuilding.*—Iron moulders, workers and helpers were fairly busy, machinists and engineers were active with blacksmiths and horse-shoers busy.

*Woodworking and furnishing.*—Woodworkers and upholsters were busy. Barrel factory hands were active and carriage and wagon makers quiet.

*Printing.*—The various branches were very active.

*Clothing.*—Journeymen tailors and garment workers were fairly active.

*Food and tobacco preparation.*—Bakers and butchers were busy. Ice handlers were actively engaged housing next season's supply.

*Leather.*—Quietness prevailed.

*Miscellaneous.*—Barbers, clerks and stenographers were steady. Hotel and theatre employees were active and laundry workers busy.

*Transport.*—Railway crews were active, freight and passenger traffic

being especially good for the season. Carters and expressmen were busy.

*Unskilled.*—Among this class quiet conditions prevailed. Few, however, were unemployed, and there is certain to be a very large demand for unskilled labour as soon as spring sets in. The absence of heavy falls of snow this month cut off an important source of employment.

#### ST. JOHN, N.B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during February was fairly well employed for the season, but the building trades were very dull.

The annual meeting of the shareholders of the Cornwall and York Cotton Mills Company, Limited, was held January 27, and reports of the year's work were considered highly satisfactory, while the prospects for a good year's business were very bright. The usual half-yearly dividend of three per cent was paid.

Cargoes for 55 steamships had been filed up to February 22 at the Custom House. These vessels carried away Canadian goods valued at \$8,322,403 and foreign goods valued at \$3,731,889, making a total of \$12,054,292. The valuation of cargoes sent forth shows an increase of \$2,883,621 as compared with the same number of sailings last year. The total valuation of shipments to the above date last year was \$9,170,671. Wheat shipments to Feb. 22, are in the vicinity of 4,000,000 bushels.

Bank clearings for the five weeks ending February 27, were \$5,423,585, and for the corresponding period last year \$5,526,778, being \$103,193 less in 1908 than in 1907, and \$478,295 greater than for the four weeks ending January 23, of the current year.

At a meeting of the city council on January 31 the clerk of the assessors had his salary increased from \$1,000 to \$1,100, and a clerk in the chamberlain's office was raised from \$600 to \$720.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Reports from Hartland, Carleton County, give the following prices for produce: Hay, \$10.25 to \$11.25; oats 40 cents; potatoes, \$1.50 to \$1.60; eggs, 20 cents a dozen; butter, 20 to 22 cents per lb.

*Lumbering.*—The lumber mills at the foot of the St. John river are beginning to resume operations after an idleness of two months.—W. F. Barnhill has about one hundred men at work in his logging camp and portable saw mill near Hoyt station.—There is a great reduction this year in the lumber cut on the Miramichi and other rivers of the province. Last year there was in the vicinity of 180,000,000 feet of logs cut on the Miramichi and its tributaries for the various lumber and pulp companies doing business in that section of the province. Of the above amount 140,000,000 feet were manufactured into long and short lumber, while the remainder was handled by the pulp and paper companies. This year there is an increase in the amount which will be used by the pulp and paper companies as practically the entire cut of 85,000,000 of the International Paper Company will be shipped to the United States for manufacture into pulp, and about 55,000,000 feet will be used by the pulp and paper companies. The total amount of logs coming out of the Miramichi this year will only be about 110,000,000 feet, and only about 55,000,000 of that amount will be manufactured into long and short lumber. The International Paper Company, on the Richards and Hutchinson properties, is taking out about 40,000,000 feet all of which will be manufactured into pulp. The Miramichi Pulp and Paper Company and Dominion Pulp Company, which have pulp mills on the Miramichi, are taking out about 10,000,000 feet each. On the south-west Miramichi there is a decided reduction in the cut of the lumber companies. The Timothy Lynch Company, which usually cuts upwards of 12,000,000 will have only about 4,000,000 feet this year. Michael Walsh has reduced his cut to 3,000,000 feet. On the Bartholomew, the Alex-

ander Gibson Railway and Manufacturing Company will only take about 5,000,000 feet this year. On the north-west Miramichi, Allan Ritchie's cut will only be about 7,000,000 feet, while Mr. Burchill has reduced his cut to 3,000,000 feet, and the Sinclair Company's cut will be between 6,000,000 and 7,000,000 feet. On the Tracadie and other tributaries the Snowball Company will cut about 14,000,000 feet, while James Robinson, on the Dungaroon and Renous rivers, will cut about 5,000,000 feet. Other small parties on the Miramichi will cut another 5,000,000 or 6,000,000 feet.—The Dalhousie Lumber Company disposed of its property to the St. Maurice Lumber Company of Three Rivers, Quebec. The new owners of the property are preparing to erect mills on the property which will cost upwards of \$150,000, and work will be rushed during the coming summer. It is the intention to install bandsaws and rosin machinery as well. The International Paper Company will take the entire output from the property in question, and most of the cut will be used for pulp wood.

*Mining.*—The Maritime Copper Company's Mine situated at Azor Brook, near St. Martins, was sold on February 8. Negotiations were concluded during the early part of the month for an eighty-year lease of the large iron properties at Lepreau, owned by the New Brunswick Iron Company, to the Dominion Iron and Steel Company, on the basis that the lessees pay a royalty of 25 cents a ton for all ore lifted, whether for shipment or smelting at the mines. A close study of the ore had been made by a number of experts, and it had been pronounced the finest deposit of the kind in Canada. The property, is about two and a half miles square, and is situated on the line of the New Brunswick Southern Railway.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Dullness prevailed, though painters and plumbers were well employed.

*Metal and woodworking.*—The month was active, with a few branches busy.

*Printing.*—Printers, pressmen, and bookbinders were busy.

*Clothing.*—Journeymen tailors were active.

*Food and tobacco preparation.*—Bakers and confectioners were busy. Ice-cutters and cigarmakers were active.

*Miscellaneous.*—Brush and broom makers were busy.

*Transport.*—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen and freight-handlers were busy, ship labourers were active and street railway employees, busy.

*Unskilled.*—This class was dull.

### QUEBEC, QUE., AND DISTRICT.

*Messrs. Edward Little and P. J. Jobin, correspondents, reported as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

Out-of-door employees were considerably more active than in January, unskilled labour being busy during the first half of the month on snow removal, some heavy snow storms having occurred. The refitting of vessels in preparation for the opening of navigation was in full progress. Otherwise the month was quiet. The Montmorency cotton mill was working on short time but was expected to resume activity shortly. Work was resumed on the extension to the Chateau Frontenac. Incorporation was granted to the "Quebec Electric Launderers, Dyers and Cleaners, Ltd.," with a total capital of \$20,000.

Early in the month, the Salvation Army notified the different Charitable Societies that their shelter would be closed on the 6th of February owing to the need of making improvements to the building. A meeting was convened in the St. George's Society Rooms, on the 5th, which the officers of St. George's St. Andrew's and the Irish Protestant Benevolent Society and Clergymen of the different Protestant denominations attended. The object of the meeting was to discuss what means should be taken to deal with the unemployed.

A number of suggestions were made and it was finally decided to forward to the headquarters of the Salvation Army at Toronto a request to keep the shelter in Quebec open for two weeks longer.

#### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—Conditions were favourable in the camps, the snowfall having caused only slight inconvenience.

*Railway construction.*—A large amount of rock cutting was being carried on.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters, painters and plumbers were fairly active; other branches were quiet.

*Metal, engineering and shipbuilding.*—The iron trades were active and boiler-makers were busy. Electrical workers and linemen were active.

*Printing.*—Conditions were busy.

*Clothing.*—Tailors and garment workers were quiet. Boot and shoe workers were active.

*Food and tobacco preparation.*—Ice cutters and drivers were busy. Cigarmakers were active.

*Leather.*—Activity prevailed.

*Miscellaneous.*—Trade was quiet.

*Transport.*—Railway employees were busy. Other branches were dull.

*Unskilled labour.*—This class was well employed.

### SHERBROOKE, QUE., AND DISTRICT.

*Mr. H. Logie, correspondent, reported as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during February were about the same as in January. There has been no further closing down and no employees going on shorter hours. In the Rand Drill factory work seems to be improving, and it is expected that by next month the present staff will be working full time. The conditions at the Jenckes works are about the same. The

retail trade reported business fully up to the average, and payments fairly well met.

Some twelve of the workers employed in the Paton mill refused to do certain work which they claimed was usually performed by other hands. They absented themselves from work for a day, but the majority afterwards returned, the others finding work elsewhere.

Sixteen sewing-machine operators in the Walter Blue & Co., establishment went out about the middle of the month because two of their fellow employees had been discharged. The company contended that business was such that they had to dispense with the men. On the other hand, the men held that the company discharged the men because they were active union men. The company further stated that there was no strike, and that the fourteen men could return at any time up to the 22nd, when, if they did not do so, their places would be filled by others from Montreal. The men offered to give up the union if given a yearly contract. This the firm refused to do, and most of the men returned to work, while the places of the others have been filled.

At a meeting of the City Council on the 24th February, a by-law was adopted to purchase the plant of the Sherbrooke Power, Light and Heat Co., at \$250,000; this by-law will be submitted to the rate-payers for ratification on the 9th of March.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Many farmers were engaged in hauling cordwood, which sells from \$4.50 to \$5.00 per cord.

*Lumbering.*—A large quantity of cordwood is being got out. There is a good demand for men accustomed to work in the woods.

*Manufacturing.*—The manufacturing industry was somewhat quiet. While not running on short time, the woollen mills have not very much work ahead.

*Mining.*—In the asbestos district the pits were being worked to the limit in so far as the weather conditions allow. The mills were running full time.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Trade was quiet, but as soon as the season opens there will be plenty of work. Plumbers were active.

*Metal and engineering.*—Moulders, machinists and all engaged in machine shops were quiet.

*Woodworking and furnishing.*—Cariagemakers were busy. Pattern makers were quiet.

*Printing.*—Printers, pressmen and bookbinders were active.

*Clothing.*—Tailors, garment workers and glove makers were quiet.

*Food and Tobacco preparations.*—Bakers, and confectioners, and cigar makers were quiet. Ice cutters were active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees and hotel and laundry employees were quiet.

*Transport.*—All branches were fairly active.

*Unskilled labour* was quiet.

#### DISTRICT NOTES.

*Graniteville.*—Work has progressed favourably at the quarries this winter and a large number of men were employed.

*East Angus.*—The paper mill was closed for a few weeks, but the pulp and saw mills were running well. The mill company has seventeen teams on the road.

#### THREE RIVERS, QUE., AND DISTRICT.

*Mr. Joseph J. Ryan, correspondent* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was not employed to as great extent as the two last months, although the large amount of snow kept a number of carters and labourers busy. The factories have been running with the same degree of activity as last month. A force of carters and men have hurried the cutting of ice. The ice was not as thick as in previous years, so it required more work to fill the same stor-

ages. Wholesale and retail trade has been rather quiet.

A number of men are returning from the woods where they have been employed cutting logs for lumber Coy's. They report an excessive amount of snow in the woods this winter rendering their work more difficult and the cost of the timber greater.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy cutting wood and carrying same to the market, with hay, straw and grain, for which they obtained good prices, although hay, was lower than in January.

*Lumbering.*—Most of the lumbering firms were still busy in the woods.

*Manufacturing.*—Manufactories were running as during previous months.

*Railroad construction.*—Very little work was done on the new railroads this month. A few gangs were working on the approaches of concrete culverts made last fall.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Outside workers were quiet but the indoor branches were well employed.

*Metal, engineering and shipbuilding.*—Bicycle repairers and horseshoers had active employment. Blacksmiths, boiler makers, ship labourers, and sheet metal workers were busy; the other branches were fairly well employed.

*Woodworking.*—Woodworkers, upholsterers, varnishers and polishers were active; the remaining branches were fairly well employed.

*Printing.*—These crafts reported favourable conditions.

*Clothing.*—Glove makers were active and boot and shoe workers were busy, but other classes were quiet.

*Food and tobacco preparation.*—There was great activity in this group.

*Leather.*—Quietness prevailed.

*Miscellaneous.*—Hotel restaurant and theatre employees were quiet; the other branches were busy.

*Transport.*—Railway employees were busy. Employees on the ice breaker

“Glacial” were very busy. Cab drivers had a fair month. Teamsters and expressmen had plenty of work.

*Unskilled labour* was quiet.

#### ST. HYACINTHE, QUE., AND DISTRICT.

*Mr. V. Phaneuf* correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

In general, the condition of the labour market was dull. The trades were very quiet, there being little work on hand and little prospect of work for some time yet. The metal trades had a dull month, the staffs being reduced in several factories. In one of the factories the wages of a portion of the employees were reduced by from \$1.00 to \$1.50 per week, until things become more settled. The boot and shoe trades were also dull, the Ames Holden Company having closed the doors of its factory for some time; nearly 275 persons were idle in consequence.

The tanneries reduced their output owing to market conditions, the price of hides being low and leather prices uncertain. Sash and door factories were fairly busy having kept full staffs at work. The woollen factory was very active during the month, as was also the organ factory, the latter working some overtime. A new company, to manufacture iron bedsteads is negotiating with the municipal council as to inducements to open a factory; about 100 men would be employed and about \$60,000 would be paid in yearly salaries. It was stated that the Grand Trunk Railway Company will build sidings from its junction at Ste. Rosalie to the station of the Canadian Pacific Railway at St. Joseph village, St. Hyacinthe. The garment working factory was running briskly with a full staff. Retail trade was fairly active but not as active as the preceding month or in the corresponding month of last year. Wholesale trade also suffered from stagnation, but a reaction is looked forward to in the

next few months. Banks reported a busy month with easy collections. There have been no changes in wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were very favourable, produce bringing high prices. Potatoes increased 20 cents per bushel, butter was selling at 32 cents per pound, eggs 35 cents per dozen; other farm produce found a ready sale. Farm help was not in demand.

CONDITION OF PARTICULAR TRADES.

*Building.*—Dullness prevailed.

*Metal.*—Blacksmiths and horseshoers reported a good month; the other branches were dull.

*Woodworking.*—Woodworkers had a fair month. Upholsterers, polishers, varnishers and carriage workers were busy.

*Printing.*—Activity was reported.

*Clothing.*—Owing to the fact that the ready-made clothing season opened earlier than usual, the clothing trades were very busy.

*Food and tobacco preparation.*—With the exception of cigarmakers who were dull the various branches were busy.

*Miscellaneous.*—Barbers, clerks, delivery, hotel, restaurant and laundry workers were active.

*Transport.*—Railway employees had a good month. Carters, hackmen and expressmen were active.

*Unskilled labour.*—In the beginning of the month this class was idle but was fairly well employed towards the end.

DISTRICT NOTES.

*Sorel.*—Messrs Duhamel and Bros'. new boot and shoe factory was employing about 40 hands and orders were plentiful.

*St. Jean.*—It was stated that the Singer Manufacturing Company, which, owing to the stringency in the financial market, dismissed about three quarters of its employees, has been daily re-engaging new hands and in a few weeks will

be running to full capacity. The Standard Drain Pipe Company will commence rebuilding next spring. This company has made a special arrangement with the city by which it is granted an exemption of taxes for ten years and additional fire protection. The company, on the other hand is to resume operations on a more extended scale than formerly, during ten months each year. The poultry raisers' association of the Iberville district known as the St. John Poultry Association held its annual exhibition on February, 11-13.

MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Pelletier, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

February was more active than January. Building operations have shown more activity, but the supply of labour exceeded the demand.

The Standard Shirt Co., Ltd., opened its new addition on the 14th February with a ball and banquet to the employees over 1,200 attended. These new additions will give employment to over 500 working people.

The city council of Maisonneuve has granted an exemption of taxes for the period of ten years to a company which will built a paper box factory at a cost of \$25,000. The factory will employ 75 to 100 workmen.

Thirty-five building permits were issued in January, '08, at an aggregate value of \$78,650. This includes 27 permits for new buildings to cost \$55,650. There were 8 permits for alterations or repairs, to cost in all \$23,000.

Realty transfers during the week of Feb. 15th, took place as follows:—

St. Louis Mile End.....	\$ 40,755
Maisonneuve.....	26,300
Outremont.....	3,470
De Lorimier.....	12,485
Westmount.....	8,275
Montreal.....	268,786
	<hr/>
	\$ 360,071

CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were more active than in January.

*Metal.*—Electrical workers were quiet; the other branches were fairly active.

*Woodworking and furnishing.*—Carriage and wagon makers and car-builders were active. Pattern makers were quiet.

*Printing.*—Activity prevailed in the various trades.

*Clothing.*—Boot and shoe workers were dull.

*Food and tobacco preparation.*—Activity prevailed in these lines.

*Leather.*—Quietness prevailed.

*Miscellaneous.*—These trades were active.

*Unskilled labour.*—The supply of unskilled labour exceeded the demand.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Although an accurate forecast of building operations during the coming season is as yet impossible, the increasing activity of the past few years in this line will not be witnessed this year. The number of building permits issued since the beginning of the present year shows a decrease as compared with last year. The prices of building material and the scale of wages have not declined. The financial stringency will be felt in the case of the larger and more expensive edifices.

The moving season is in full activity and it was stated that tenement houses would be insufficient for the need. Rents are abnormally high and nearly beyond the reach of families with small incomes. Money invested in the construction of workingmen's lodging houses would earn a good revenue.

The excise duty on importations in the port of Montreal during the month of January showed a reduction of \$63,844.24 as compared with the corresponding month of last year. Large increases have occurred in all branches in the city

post office. The increase of revenue for the month of January compared with the same month in 1907 showed an increase of \$8,339.85. Registered matter furnished a revenue of \$116,948 during January, 1908, compared with \$103,578 during January, 1907.

The percentage of receipts paid to the city by the Montreal street railway Co., is based on the following scale:—

Up to	\$1,000,000.....	4%
From	\$1,500,000 to 2,000,000.....	8%
"	2,000,000 " 2,500,000.....	10%
"	2,500,000 " 3,000,000.....	12%
Over	\$3,000,000.....	15%

The recent heavy snowfalls have materially affected the receipts and expenses of the company. The company's report for January showed the receipts to have been \$285,515, or \$9,125 less than in the preceding month, and the working expenses to have been \$10,193 more than in December.

CONDITION OF PARTICULAR TRADES.

*Building.*—Quietness prevailed.

*Metal, engineering and shipbuilding.*—Horseshoers were active. Jewellers were fairly busy, but the other branches were dull.

*Woodworking.*—Conditions were quiet.

*Printing.*—These crafts were busy.

*Clothing.*—Business was quiet.

*Food and tobacco preparation.*—Bakers, confectioners, butchers, meat cutters, ice cutters and drivers were active.

*Leather.*—These trades were busy.

*Miscellaneous.*—Barbers, hotel, restaurant and laundry employees were active. Furriers and clerks were busy.

*Transport.*—Cab drivers, hackmen, teamsters, draymen and expressmen were busy. Steamboatmen and ship labourers were quiet.

*Unskilled labour.*—Dullness prevailed.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been little change in the condition of the labour market since

January. Conditions were somewhat quieter, on account of dullness in the paper industry. Orders for the finished product have not been as plentiful as usual and about a score of employees were laid off temporarily at Eddy's. Other departments, however, were busy, the usual staff of girls and men being employed. The cement company again expressed its intention of enlarging its plant so as to double the present capacity and manufacture 5,000 barrels per 24 hours. The plant is at present undergoing large improvements to cost \$250,000, but the proposed enlargement would cost in the neighbourhood of \$500,000. The Ottawa Forwarding Company's shipyards in Hull employ 50 hands, at wages of \$2.00 a day. This rate is a year-round one. A large quantity of repair work is being done. The Mathews Pork Packing establishment is now turning out 21 different kinds of prepared meats and employs 150 hands. This establishment is very busy as is also the Walters' axe factory and the Hanson woollen mills. The axe handle factory which was burned down last fall, throwing half a dozen men out of employment is being rebuilt and will soon resume operations. Ice cutting and snow shovelling were two abundant sources of employment and gave work to approximately 300 people.

#### DISTRICT NOTES.

*Masson.*—The large boot and shoe factory, employing about 75 hands, the chief industry of this town, was burnt down in February. The plant was only erected during last year and was valued at \$40,000.

#### OTTAWA, ONT., AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Opportunities of employment were rare during February. Most of the local industries were obliged to curtail

operations, and many of them laid off hands. In other cases, such as clothing factories' employees worked only half time. Anchor ice at the Chaudiere caused a cessation of work in J. R. Booths' pulp mill for a short period, and at other times parts of the machinery were thrown idle for lack of power. Shipping was dull owing to quietness in the outside lumber markets and to the falling off in orders for local manufactured products. This led to a reduction of the number of railway employees and others engaged in transportation. Some of them have since been taken back. The expenditure for snow cleaning by the Ottawa Electric Railway Company to date, is \$25,000 and by the city \$15,000. The snow-fall this season has been twice as heavy as last year. The Electric Railway Company estimates that its expenditure has been doubled. The city last year spent only \$14,000 for removing snow. The additional outlay in 1908 has been a great relief to the labouring class.

As a result of about half the 85 snow haulers of the Ottawa Electric Railway Company going on strike February 4, for five cents increase, or 25 cents a load, the company made an advance of two cents. Next day the strike was repeated and the Company granted the full demand.

The building contractors of Ottawa have organized the Ottawa Builders' Exchange with between 75 and 100 members. The object is to encourage a fraternal spirit among the contractors and to have some means whereby they can all act as a unit in matters of common interest.

#### RE UNEMPLOYMENT.

The number of unemployed in the city was numerous in all branches. The lowering of wages in the lumber camps by from five to eight dollars per month caused many of the hands to return earlier than usual. Factories, foundries, railway shops, building contractors, etc., reduced their staffs owing to dullness in trade, resulting from the money stringency outside of Canada. Work on the proposed Grand Trunk hotel and station, which was expected to employ a few hundred men, has been delayed. These

circumstances combined to swell the number of the unemployed of Ottawa. Among those seeking work were many new arrivals from England who feel the lack of employment more than those accustomed to the country. There are comparatively few cases of poverty.

The Men's Rescue Mission has only forty inmates. The ordinary unemployed man will not work for lower wages than last year and he is not complaining. The corporation of Ottawa is prosecuting as much work as the weather will permit in order to relieve the situation, but has done nothing special in this respect. Reports from all industries indicate that there will be improved conditions commencing early in March. The first relief will be the sending away of a few hundred river-drivers and it is expected building will become active on the Grand Trunk hotel and station. Several large sewers must be constructed owing to the annexation of new territory by the city. The railway shops, foundries and factories expect to restore the portions of their staffs laid off, and the usual activity in the lumber mills is counted upon.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Market deliveries of agricultural supplies consisted chiefly of pork, beef, butter and eggs which sold at the firm prices that have ruled all winter. At a convention of dairy-men held in Ottawa, on February 6, and attended by about 500 farmers from Eastern Ontario and Western Quebec, a resolution was passed endorsing the inspection of cheese factories and the establishment of farmers' exchanges to replace cheese boards.

*Lumbering.*—The heavy snowfall did not affect lumbering, but the delivery of supplies was made difficult. Manufacturers expect to receive as much for next season's cut as was paid last year. About 2,000 cars of logs have been brought by rail to the city to be sawed in the summer.

*Railroad construction.*—The Canadian Northern Railway branch has been built to within three and a half miles of the city.

#### CONDITION OF PARTICULAR TRADES.

The several trades were quiet.

#### DISTRICT NOTES.

*Carleton Place.*—The ratepayers, endorsed a by-law to grant exemption from municipal taxation for a term of ten years to the Waterloo Knitting Mills Company, Limited.

#### KINGSTON, QNT., AND DISTRICT.

*Mr. Wm. Kelly, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was a marked improvement in the condition of the labour market during February, owing to the very heavy snow falls, ice harvesting, and increased operations in the various dry-docks and shipyards. To a large extent traffic on the various railways was impeded, and in some cases stopped. Many branches of business were affected. The management of the electric railway conferred with the civic council with respect to an abandonment of the line until spring, but at a special meeting of the city council it was decided not only to re-open the entire line, but to keep it open. Accordingly a large staff of men and teams were employed for some days removing the snow. The rate of wages paid to men and teams for removing snow was as follows:—Men, 14 and 3-4 cents per hour, and teams, per nine-hour day, \$3. The harvesting of ice was successfully carried out and provided a good deal of employment. During the month the wharf at Richardson's elevator was extended some fifty feet. The shipyards and dry-docks were the scene of much activity. Davis and Sons are building a steam yacht and a tug. The steamer "Mississquoi" is also being widened. The Kingston Shipping Company, recently incorporated, is having built at Dumbarton, Scotland, a steamboat to be named the "Catarqui." It will be a full-sized Welland Canal

bulk freight steamer, with triple expansion engines, cylinders 18 inches, 30 and 40 inches in diameter by 33 inches stroke, and length 256 feet.

At the regular annual meeting of the directors of the Kingston and Pembroke Railway Company the business for the past year was considered satisfactory, and it was decided to carry out further improvements. At the annual meeting of the Rideau Lakes Navigation Company a dividend of four per cent was declared.

During the month an interesting statement was printed in regard to the registration and revenue of Queen's University; during the session of 1876-77 there were 130 students registered at the university; 372 during session of 1886-87; in 1896-97, 564, and in 1906-07 there were 1,139 students registered.

As a result of the new pension system adopted by the Grand Trunk Railway Company, two Kingston men over sixty-five years of age will be retired.

On the 6th of February the rate of wages demanded by the Kingston Tailors Union was granted by all the shops involved, and the hands are returning to work, largely under former conditions. The strike was inaugurated last September, and cost the union about \$7,000. There were no changes in the rates of wages or hours of labour, or strikes or lockouts during the month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Quietness was general largely on account of the snow blockade.

*Fishing.*—Inactivity was the rule.

*Lumbering.*—Quiet conditions prevailed.

*Manufacturing.*—Active conditions were general.

*Other industries.*—All other industries were quiet.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Dullness prevailed.

*Metal, engineering and shipbuilding.*—These trades showed increased activity in many lines.

*Woodworking and furnishing.*—Conditions were active.

*Printing.*—Printers and allied tradesmen were busy.

*Clothing.*—The trades were dull.

*Food and tobacco preparation.*—Bakers and butchers found trade quiet, but ice-handlers were active. Cigar-makers were also quiet.

*Miscellaneous.*—Barbers, clerks, hotel and laundry workers were somewhat quiet.

*Transport.*—Quietness was the rule in these trades, mainly owing to heavy snow blockades, etc.

*Unskilled.*—Employment was rather dull, but unskilled labour was in more demand than in the preceding month.

#### DISTRICT NOTES.

*Picton.*—Service on the Central Ontario Railway was badly crippled, and the night service at times cancelled. The stage mail service to the surrounding district was greatly impeded. The heavy falls of snow caused considerable damage to property.

*Deseronto.*—The Rathburn Company has a contract to supply 50 box cars for the Intercolonial Railway. The Angrove Foundry, Kingston, has the contract for supplying the castings. The total cars furnished by these companies to the Intercolonial Railway to date number 250.

*Loughboro.*—The Loughboro Mica Company, capitalized at \$40,000 has been incorporated with offices at Toronto.

#### BELLEVILLE, ONT., AND DISTRICT.

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

February was very dull for nearly all classes of labour, especially unskilled. Owing to the heavy snow-fall, business was very dull. All roads leading to the city were blocked during the greater part of the month, preventing the farmers from marketing their produce and raising the price of the limited amount offered. A large number of men were

employed in removing the snow from the streets and roofs of buildings. Outside of snow-shovelling unskilled labour had little to do. For several days the trains that convey the workmen from this city to their employment at the cement works were discontinued. About 400 men are employed at the Lehigh Cement Company's works, and 300 at the Belleville and Toronto Company's plant. The rolling mills are still inoperative, this is causing hardship to the employees, most of whom are married men. Nearly all the other industries were running, but a few were on short time. The Grand Trunk Railway Company gave employment shovelling snow to large numbers of men. The Brass and Steel Goods Manufacturing Company had a busy month, also the Belleville Hardware Company and the foundries and woodworking establishments. The harvesting of the ice crop, which is an excellent one, gave employment to a large number. A large number of skilled workmen were still employed on the hotel "Quinte." It is understood that local capitalists will erect large lime kilns, in the spring at a cost of about \$25,000.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Hay and straw remained scarce and sold at high prices.

*Fishing.*—Large quantities of rough fish were caught during February, particularly cat-fish.

*Lumbering.*—Snow impeded this industry, but conditions are likely to improve shortly.

*Manufacturing.*—Conditions were fairly active in nearly all branches.

*Mining.*—Activity prevailed.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Operations were practically at a standstill, though painters and decorators were employed in large numbers at the hotel "Quinte", and plumbers and gasfitters were active.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, machinists and engineers were well employed. Boilermakers, blacksmiths, etc.,

had active employment, many being employed in the construction of the new gas-holder.

*Woodworking and furnishing.*—Nearly all branches reported an active month, as nearly all the furniture and furnishing for the hotel "Quinte" and Corby Library are being manufactured in the city. The car works at Deseronto were giving employment to a large number.

*Printing.*—Printers, pressmen and bookbinders were employed full time.

*Clothing.*—Journeymen tailors reported a fairly active month, but not as good as in the same month last year.

*Food and tobacco preparation.*—Bakers, butchers, meat cutters, ice-handlers and cigar makers were active.

*Leather.*—Harness makers were not busy.

*Miscellaneous.*—Barbers, delivery employees and furriers were busy. Hotel and theatre employees found employment active, also laundry workers.

*Transport.*—Railway crews had a quiet month owing to the heavy falls of snow. On some of the branch lines trains were discontinued for some days. Cabmen, carters and teamsters were busy.

*Unskilled.*—Inactivity prevailed.

#### PETERBOROUGH, ONT., AND DISTRICT.

Mr. W. J. Johnson, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The month of February in Peterborough and district has been notable for snow storms and the tying-up of traffic and business on the railways and country roads. This has been a favourable circumstance for the unemployed. The railway companies had to shovel out all lines leading from the city two or three times, and the same conditions applied to the public streets. Employment was otherwise very dull with many men of all classes idle, and likely to remain so until the opening of spring, when it is expected matters will again become normal. Several men are still

busy cutting stone at the armouries, and a few others are employed at the Collegiate Institute and Normal school. Other members of the building trade were quiet. During the latter part of the month transportation has been more brisk. Retail trade has been fair, considering the weather. Wages are practically unchanged and the labour market free of unrest.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The agricultural industry was quiet.

*Fishing.*—Quietness was the rule.

*Lumbering.*—In the several camps activity prevailed.

*Manufacturing.*—In most of the industries work was fairly active, but orders were not plentiful.

*Mining.*—Conditions were dull.

*Railroad construction and employment.*—Snow shovelling gave a lot of extra employment.

*Other industries.*—The Peterborough Hamilton Agricultural Company was very active getting out agricultural implements for the coming season. The J. J. Turner & Sons were also very active. The several canoe shops were active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Dullness was general.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, machinists and engineers were active in some shops. Linemen were active during the later part of the month, and electrical workers when weather permitted outdoor work. Jewellers also were active. Sheet metal workers had active employment in some shops, and the rest of the trades found conditions somewhat dull.

*Woodworking.*—Woodworkers, upholsterers, car builders and coopers were dull. Varnishers, polishers and pattern makers were active the latter at the Canadian General Electrical plant.

*Printing.*—The trade has been fairly well employed although the month has been dull from a business standpoint.

*Clothing.*—Journeymen tailors, garment workers, and hat makers had good

employment, and boot and shoe workers were active.

*Food and tobacco preparation.*—Activity was the rule.

*Leather.*—Activity prevailed in the saddlery and collar making branches, but was somewhat quiet in the harness branch.

*Miscellaneous.*—Clerks and stenographers were somewhat quiet, with other trades active.

*Transport.*—Railroaders were active removing snow and keeping lines open. Steamboatmen and ship workers were quiet, cabmen, carters and expressmen dull, and street railwaymen active.

*Unskilled.*—Inactivity was the rule.

#### DISTRICT NOTES.

During the past month the many snow storms made the roads almost impassable, and a great deal of time was spent by the farmers in keeping them open. Only one good market was held during the month, when considerable hay, wood, straw and beef was offered. Business in general throughout the district was very dull. In some parts considerable woodcutting is being done,

*Campbellford.*—A new industry has been secured, viz., a rolling mill. The Company was given 5 acres of land, exemption from taxes, 1000 h-p at \$10 per h-p., and an additional 500 h-p at \$12 per h-p, for 10 years. The Company agrees to build and equip a plant to cost \$60,000 to manufacture sheet and bar steel, employing 100 hands for at least 11 months of each year, to be in operation on or before January 1, 1909.

*Oshawa.*—There were about 300 unemployed, and the authorities have already spent in the way of relief about \$1,000. The municipality is providing all the civic work possible.

#### TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was no substantial improvement in conditions during February,

large numbers of workers in all lines of industry being without employment and many of them dependent upon charity. The building trade is duller than usual at this season, the number of new permits issued being small as compared with recent years. The restriction of output in connection with manufacturing continues. Every effort has been put forth by the regular charitable associations and others for the relief of destitution, this has averted the worst consequences of the scarcity of employment.

The Associated Charities on the 26th, submitted a proposition to the Board of Control to the effect that the Associated Charities and the City Relief Office be amalgamated in one central organization with an office at the City Hall, the City Relief Officer and his assistant to perform the duties at present carried on by them, and the secretary of the Associated Charities to look after the branch of the work at present carried on by that organization; and that all organizations receiving municipal grants for out-door relief shall submit lists of persons aided for the prevention of overlapping and as a guide to other organizations. The plan is under consideration by the Board of Control.

On the 17th, 500 men registered at the Civic Labour Bureau, marched to the City Hall and complained that they could not get work. Out of 700 looking for work that day only 20 were employed. It was stated that the city was employing about 400 men. It developed that the \$5,000 voted to the City Engineer's department for supplying work had not been expended on employing applicants at the Labour Bureau, but had provided work for men on the regular staff.

The subscriptions raised by the Globe for a relief fund in aid of the destitute in the suburbs amounted to upwards of \$18,000, which is considered sufficient for the needs of this class until the opening of spring.

The report of Joseph Thompson, Civic Commissioner of Industries for 1907, stated that 2117 letters were received asking for information as to industrial conditions in Toronto. The sum of

\$986,000 was spent during the year on new factories and \$238,000, on factory additions. The monetary conditions had kept a number of industries from locating in Toronto, but it was hoped that this was only temporary.

Building permits were taken out in January representing an approximate value of \$474,453, as against \$782,166 for January, 1907.

Receipts of the Toronto Railway Co., for January were \$271,772, as compared with \$259,459 for January, 1907.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have had little to do beyond the care of stock and marketing produce. Preparations were being made for spring work. A good many farmers intend to sow alfalfa, the cultivation of which has been much discussed. There have been a number of enquiries for farm labourers, but comparatively few of the unemployed in Toronto are suited for farm work.

*Manufacturing.*—This industry was generally quiet, the output being as a rule regulated by the orders, which so far have been considerably smaller in volume than usual. The American Abell Engine & Tresher Co., which usually employs about 550 men, has laid off all but 50 and will do little manufacturing this season, the reason assigned being the quantity of stock remaining unsold in the West.

The Sanitol Chemical Laboratory Co., of St. Louis, Missouri, have leased a factory building and will shortly open a large branch establishment.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were generally slack, there being a good deal less work than usual at this season. Plumbers were active on repair work. The stonemasons and bricklayers have ratified an agreement with the employers to continue the present rate of wages, 50c, for an 8 hour day, until May 1st, 1911. The unions engaging not to enter into any sympathetic strike in case of trouble with other classes of employees. The

Plumbers Union were negotiating with the employers with a view of terminating the strike.

*Metal, engineering and shipbuilding.*—Machinists, iron moulders, blacksmiths, boiler-makers, sheet metal workers and structural steel workers found trade dull and a good many were out of work. Brass workers were generally well employed. Silversmiths and jewellers were quiet.

*Woodworking.*—Conditions were generally quiet. Piano makers reported a slight improvement over last month, but a large percentage idle.

*Printing.*—Printers and bookbinders had a quiet month with a number out of work.

*Clothing.*—Garment workers were more actively employed than last month, working on spring deliveries. Custom tailors found work slack. Boot and shoe workers were quiet.

*Food and tobacco preparation.*—These trades as a rule had steady work. Ice-cutters were busy.

*Leather.*—Conditions were similar to those in January with many out of employment.

*Miscellaneous.*—Hotel and restaurant employees, barbers and laundry workers had a fair month, clerks, salesmen, delivery men, stenographers, etc., were slack, and many in these lines were seeking work.

*Transport.*—Those engaged in railway work had a fair month, with much extra help temporarily given work on account of heavy snowfall. Street railway men were active.

*Unskilled labour.*—There was a large number of unemployed though many have left the city and found work elsewhere.

## NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, correspondent, reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in February showed but little change from January. The

number of idle men was about the same, some lines of employment being duller and others slightly more active. There were still many idle men in every trade and few opportunities of employment. Freight traffic was good. Retail trade was dull and wholesale trade was consequently affected. A few changes were made in the salaries of civic employees, to date from the beginning of the year. Work was commenced on the second factory building for the Sanitary Can Co.

### RE UNEMPLOYED.

In general the condition of the unemployed was rather better than in January. Snowshovelling and ice-packing made work for a considerable number and there were more men working in factories. Municipal relief work has been heavier than for several years past, but aside from employing the poor in shovelling snow on the streets, no general relief measures have been needed or undertaken.

### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Manufacturing concerns showed slightly increased activity over January. A silverware factory which had been running short hours, resumed full time. The neckwear factory was busy. The Carriage Mountings Co., advertised for apprentices. The Electrical Development reduced the number of its employees on February 1st.

*Railroad construction and employment.*—Railway employment was steady. Extra labourers were engaged in shovelling snow and packing ice.

### CONDITION OF PARTICULAR TRADES.

*Building.*—A few carpenters, bricklayers and plumbers were working, but there were a great many idle men in every trade.

*Metal.*—Foundry work was dull for a time, but machine shop men were well employed. Linemen were quiet and electrical workers very quiet.

*Printing.*—Printers were quiet.

*Food and tobacco preparation.*—Ice-cutters and packers were very active for a few weeks, but the season's work was completed before the end of the month. A hundred and fifty men were employed for two weeks in packing ice for the Michigan Central railway.

*Miscellaneous.*—Hotel and restaurant employees were quiet.

*Transport.*—Railway men were all steadily employed. Yard and track men were busy. Teamsters were active.

*Unskilled labour.*—There was very little employment.

#### DISTRICT NOTES.

*Dunnville.*—By-laws to fix assessments on a knitting mill and an ice company's property were approved by the electors.

*Port Colborne.*—Fifty men were thrown out of employment when the brass works shut down. The large new cement plant was being rushed to completion and will be in operation in March.

*Welland.*—The shipyard and engine works were very busy. A steel hull was launched and others were being built. Many orders for hoisting engines and machinery were on hand. Tenders were invited for building a hospital. The public school is to be enlarged.

#### ST. CATHARINES, ONT., AND DISTRICT.

*Mr. Jas. A. Wiley, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

February was a quiet month for labour, the heavy snow fall having impeded travel. The railways have experienced great difficulty in keeping their lines open and have given employment to large gangs of men to clear the tracks. Snow also made it difficult for farmers to get into the city, and as a result prices of all kinds of farm produce were high. There was very little change in the condition of employment in the building trades, not more than fifty per cent being em-

ployed. The factories with a few exceptions, reduced their staffs, giving as a reason for doing so shortage of orders and over stockage. The problem of looking after the needy and those out of employment was solved by the appointment of a central relief committee, which has given employment to all who were in pressing need. In all, 90 were given employment by this committee in clearing away snow from ditches and the side of the roads. The churches, labour organizations, and charitable bodies have helped the relief committee materially with contributions. Mr Prince Woodruff established a soup kitchen in the west end of the city, and the Salvation Army by the establishment of another in the east end were able to serve meals to about 200 people daily. The Salvation Army and the different churches also distributed clothing, fuel, etc. The distress was not considered alarming or beyond control. The City Council has entered into contract with the Falls Power Company for lighting the city, arc lamps will now cost the city \$39.50 per lamp per year. Business was quiet.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Under the auspices of the Farmers' Institute a series of lectures are being delivered throughout the district, demonstrating the proper methods of planting fruit trees and harvesting fruits and other crops. The amalgamation of the various fruit growers associations into the Niagara Peninsula Fruit Growers Association is assured.

*Railway construction.*—An electric railway, to be known as the Dunville, Wellingport and Beamsville Electric Railway will be built.

*Other industries.*—The Independent Canners' Association has been formed in Toronto. The Independent Telephone Company, which commenced business in the Niagara district a little over a year ago, has proved a success. At the annual meeting of the Niagara District Company, statements were submitted showing receipts \$10,914.13, as against \$5,981.89 liabilities. The company's plant after ten months is worth \$9,000; the subscribers number 200.

## CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were quiet with prospects somewhat brighter. A local firm has secured the contract for the erection of 30 new houses to be built during the coming season.

*Metal and engineering.*—All branches were active.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers, polishers, woodcarvers, carriage and wagon makers were active.

*Printing.*—Activity prevailed.

*Clothing.*—Journeymen tailors, boot and shoe-makers found conditions dull.

*Food and tobacco preparation.*—Activity was the rule.

*Leather.*—Tanners and curriers, and leather workers were active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, furriers, hotel and restaurant employees, and laundry workers had active employment.

*Transport.*—All branches of transport-ation were active.

*Unskilled.*—This class was better employed for February than for the preceding month, ice cutting, snow shovelling from streets and railways furnishing the bulk of employment.

## DISTRICT NOTES.

*Port Dalhousie.*—The Niagara, St. Catharines and Toronto Navigation Company has gangs of men at work on the steamers "Garden City" and "Lake Side" overhauling and fitting them out for the coming season.

*Vineland.*—Arrangements are being made to establish a canning factory at Vineland; some of the machinery is already installed.

*Thorold.*—The new power-house at the junction of main line of Niagara, St. Catharines and Toronto Railway and the Welland division is now in operation, with equipment from the factory of the Canadian General Electric Company, Peterborough.

*Merriton.*—The Lincoln Paper Mills Company has again granted a bonus of 6 per cent to its employees. Some 50 hands benefited by the bonus.

## HAMILTON, ONT., AND DISTRICT.

*Mr. S. Landers, correspondent* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour during February was not well employed. Of the large number of unemployed men in the city about 200 were sent away by a local contractor to work on the G. T. Pacific. Wholesale and retail trade was fair and there were no changes in hours or rates of wages, although the foundrymen and the moulders have been negotiating for some time on the question, the employers desiring to reduce wages.

The incorporation of the Young & Winfield Company, limited, with a capital of \$40,000 was announced in the Ontario Gazette. A charter has also been granted the Oneida Lime Co., Hamilton, capital \$20,000. A new company for the manufacture of duplicating writing presses has been organized by a number of Hamilton business men with headquarters in this city. The incorporation of the Hamilton Brewing company is announced. It is capitalized at \$250,000, with head office at Hamilton.

## CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Conditions were only fair during the month.

*Railway construction.*—A few men were employed on the electric roads in the western part of the city.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Work in the building trades has been very slack.

*Metal.*—Moulders, iron workers and machinists were slack. Electrical workers. Metal polishers, boilermakers and sheet metal workers were fairly active. Horseshoers were also active.

*Woodworking.*—Woodworkers and carriage and wagon makers were fairly active, but pattern makers were slack.

*Printing.*—Printers were active. Pressmen and bookbinders were fairly well employed.

*Clothing.*—Journeymen tailors and garment makers were slack. Boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and butchers were active, with ice-cutters busy. Cigarmakers were fairly active.

*Miscellaneous.*—Barbers were active and broom makers busy.

*Transport.*—Railway employees were active. Longshoremen were slack. Street railway employees were active. Teamsters, cabmen, carters, expressmen were also active.

*Unskilled labour* was slack.

DISTRICT NOTES.

*Dundas.*—Industries were working with partial staffs. Work in the machine-shops and the clothing factory was only fair. There were many idle men. The town stone quarries were opened to give work to residents.

BRANTFORD, ONT., AND DISTRICT.

*Mr. J. C. Watt, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has not changed greatly since last month. February did not compare favourably with the corresponding month last year. The factories on the whole show no improvement over last month, though two were busier than during the same month last year. Merchants had a fair month. The pressure of the money stringency and the large accounts that are being carried for those out of work is complicating the situation. An increase in wages was granted to the members of the police force averaging 15c. per day. The new scale is:—

First year men.....	\$1.70	per day
Second year men.....	1.80	"
Third year men.....	1.90	"
Fourth and Fifth year men.....	2.00	"
Fifth year class A.....	2.15	"
Sergeants.....	2.50	"

The Chief received an increase from \$1,400 to \$1,550 per year. These in-

creases take effect March 1st, 14 men being affected.

RE UNEMPLOYMENT.

There are about 500 unemployed in the city at present. About 700 have made application to the city engineer for work. Many of these, however, are working part of the time cutting wood, ice, etc., but fully 500 are out of work. Three shifts of 40 men each have been engaged for one week at a time, by the city on sewer construction, but it will be some time before those applying last can be given work. A few are breaking stones in the city yards. The Young Women's Christian Association supply each day, soup for those who call. An average of 30 have called during the past two weeks. It is not now expected that conditions will be better before work outside can be commenced, when from current reports there will be plenty of work. The city relief officer spent more money during February than for any previous month in the history of the city.

CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Two factories employing about 1,600 men were busier than during the corresponding month of last year. Some were very slack, running on short time and with reduced forces.

CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, lathers and plasterers found trade very dull. Carpenters and joiners, painters and decorators were quiet. Plumbers, gas and steamfitters were active.

*Metal, engineering and shipbuilding.*—Iron moulders, blacksmiths and core-makers in several shops were busy; in others they were quiet. Machinists and engineers were active. Electrical workers and linemen were quiet; metal polishers, buffers and platers, stove mounters, boiler-makers and sheet metal workers were active. Horseshoers were busy.

*Woodworking and furnishing.*—Carriage and wagon makers were not very

busy. Patternmakers were active. Coopers found trade dull.

*Printing.*—The allied trades were busy.

*Clothing.*—Journeyman tailors and tailoresses were active.

*Food and tobacco preparation.*—Bakers and confectioners were busy. Cigar-makers and tobacco workers were active in one shop and quiet in others.

*Leather.*—Leather workers and saddlers were active.

*Miscellaneous.*—Barbers, clerks and delivery employees were fully employed, as usual. Hotel and restaurant employees and laundry workers were busy.

*Transport.*—Railroad trackmen and freight handlers were active. Street railway employees, teamsters and draymen were busy. Expressmen found employment dull. Cab drivers and hackmen were active.

*Unskilled labour.*—There were about 400 unskilled labourers unemployed.

#### DISTRICT NOTES.

*Paris.*—Conditions were about the same as last month. The mills were running steadily and competent female operatives could find lucrative employment. Activity in the building trades is expected this season. Buildings are being fitted up for a new piano and organ factory; about 35 men will be employed.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions generally showed a slight improvement over January, but were far from active, there being a noticeable number of men out of work and a larger number working short time. While few new men are being taken on in any of the large shops conditions have improved in nearly all lines. Only a small amount of repair work was done in the building trades, but prospects for the coming season have improved. Retail trade was dull, badly blocked roads being one of the causes.

Two new factory propositions were under consideration by a committee of the City Council, one to erect a flax mill to employ 20 to 30 hands and the other a jewelry factory to employ 50 hands. No settlement has yet been reached in the upholsterers strike. Piano plate moulders working piece work in one shop reported a cut in piece prices.

During the month heavy snowstorms badly blocked railway traffic in this section and gave considerable employment to labourers shovelling snow.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades had a quiet month, the only works of any extent under way being steamfitting and other work on the new armouries and the alterations to the City Hall. Prospects for the summer are a little brighter than they were last month.

*Metal.*—Iron moulders, machinists and machinist's helpers had a quiet month, with short time in some shops and reduced staffs in others. Tube mill workers lost two weeks while stock-taking and repairs were under way.

*Woodworking.*—Woodworkers had a very dull month. Piano and organ workers worked about half time. Upholsterers have been on strike. Carriage workers were quiet.

*Printing.*—Printers were active.

*Clothing.*—Journeyman tailors and garment workers had a quiet month.

*Food and tobacco preparation.*—Bakers and confectioners were active as were cigar makers.

*Textile.*—Tapestry and ingrain carpet weavers had a busy month.

*Unskilled labour.*—Unskilled labour was in little demand, the only out-door work being ice harvesting and snow shovelling.

#### BERLIN, ONT., AND DISTRICT.

*Mr. R. F. Gofton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during January was quiet, and

though somewhat more active than in the preceding month, did not compare favourably with the corresponding month of last year. Shoveling snow, particularly on the railways, provided employment for a large number of labourers. Several industries were embarrassed for a few days by a shortage of fuel, which had been delayed by the snow blockades on the railways. The factory of the Berlin Steel Go-Cart Company was completed and is in operation and the Felt Company expects to have its plant in operation shortly. The Kaufman Rubber Company will erect its factory by day labour; the building is to be four stories high, 60 by 200 feet, and will cost about \$65,000. The employees of the S. Brusbakes and J. Kaufman had their wages reduced, the former 10% and the latter 15c per day. The employees of the P. Giess foundry also had their wages reduced 10 per cent. The employees of the firm of Leppert & Company had their wages reduced, but the firm later reintroduced the old scale.

#### RE UNEMPLOYMENT.

Ex Mayor A. Bricker, who has charge of the relief committee rooms, reports that they have had 56 families in need of help. Of this number six have got employment, and there are 10 single men who are being cared for. All cases are promptly investigated and their needs cared for. The committee have abundance of clothing for men, women and children and bedding and fuel and food are being provided for them all.

There are about nine hundred unemployed workmen in Berlin, an unusually large number compared with former years. This condition is mainly attributable to the money stringency and the hesitation of the various industries to recommence operations, or run their establishment to full capacity. The majority of trades ceased their usual activity at least two months earlier than usual. A number of farm labourers, who came to the city too late to make proper provisions for the winter, have been assisted by the authorities. A

Citizen's Relief Committee has been organized. The society has already received a total of \$596.00 from the municipal council, beside many gifts in the way of barrels of flour, baskets of biscuits, wood, coal, clothing and bedding. It was reported that about forty families were in want.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy hauling wood to market. The price was \$7.00 per cord, and for hay \$16 to \$18 per ton.

*Lumbering.*—Was somewhat quiet.

*Manufacturing.*—With a few exceptions manufacturing establishments experienced a quiet month.

*Railroad construction and employment.*—The railway companies were busy keeping lines open.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Quiet conditions were the rule. Plumbers, gas and steamfitters reported favourable conditions of employment.

*Metal, engineering and shipbuilding.*—Electrical workers, linemen and steam engineers, blacksmiths and horseshoers were active, and others employed in the metal trades found conditions quiet.

*Woodworking and furnishing.*—Conditions were more or less quiet.

*Printing.*—Printers, pressmen and bookbinders reported a busy month.

*Clothing.*—Journeymen tailors and garment workers reported a quiet trade, with boot and shoe workers active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat-cutters reported a good month, and cigar-makers and tobacco workers an active one.

*Leather.*—Quiet conditions prevailed.

*Miscellaneous.*—Barbers, clerks, delivery employees and laundry workers were busy.

*Transport.*—Street railway employees and cabmen were busy.

*Unskilled.*—There was a large number out of employment.

## WOODSTOCK., ONT., AND DISTRICT.

Mr. W. N. McElheran, correspondent, reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

February showed an improvement over the preceding month in many fields of labour, though conditions were not by any means active as yet. Manufacturers were doing their best to keep as many men employed as possible, but it was apparently impossible to put on full staffs full time. No new factories or buildings of any description were started. The Knitting factory and Braid and Edging employees were busy during the month.

Express and freight handlers reported a heavy shrinkage in the volume of business as compared with the corresponding month a year ago. Retail trade was hampered, partly by the impassable condition of the roads, but largely owing to the shortage of cash among the wage-earners resulting from enforced lay-offs and short hours. It was reported that in some of the factories schedules had been cut down for those doing contract work.

The heavy snows made work for many unemployed men. The radial railway as well as the steam roads made every effort to keep their lines open. The north and south railroad lines were blocked for about three days but the east and west lines were kept open, though trains were running very late. Passenger traffic showed a decided falling off.

The local agent for the placing of farm hands and domestics in the district reported an active demand already for help during the coming year.

## RE UNEMPLOYMENT.

Beginning in November, 1907, there was a general inclination among manufacturers to reduce their staffs. The causes which led to this action were the cancelling of orders on western shipments, together with the difficulty experienced in getting finances to carry on establish-

ments. This district is largely devoted to woodworking, and every manufactory was more or less affected. It has been estimated that in all the trades about 500 men were thrown out of employment for certain periods. The municipality tried to alleviate the condition as much as possible by starting road-work, and succeeded in giving a number of men employment for a time.

It will take some time to get back to normal conditions. No extreme cases of hardship have been reported, but the demands upon the charity committee of the City Council have been the greatest in its history.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were idle during the winter months, the cold weather making their work impossible. Carpenters having indoor work were not very numerous. The sawmills were busy. Painters and decorators had some orders which kept them busy but the activity was largely confined to the getting out of estimates. Plumbers were quiet. One firm completed the work at the new offices of the Ingersoll Packing Company.

*Metal.*—Moulders were practically idle the whole month. Those in Ingersoll at the Nixon works were working short time. Wire fence workers were busy getting ready for spring deliveries. A new loom was being installed in the Standard Wire Fence Co's Works. Horse-shoers reported a quiet month. Jewelers reported the manufacturing end as being fair, but the retail trade was not active.

*Woodworking.*—Woodworkers noticed an improvement. The staffs generally were being added to but nothing near the normal number of men were employed. In the furniture trade about two-thirds of the usual staff was working by the end of the month. Wagon makers were being taken on again but not in large numbers. Orders for furniture showed an improvement over the preceding month. Piano and organ makers were working short time and found no difficulty in getting out all orders. Church organ makers while

steadily employed, were not as busy as for the preceding month.

*Printing.*—Printers were busy, particularly towards the end of the month.

#### STRATFORD, ONT., AND DISTRICT.

*Mr. Jos. T. Carlin, Correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during February was more active than in the previous month. Trade was not equal to that of the corresponding month of last year, but the factories have bright prospects for the spring. Snow shovelling gave work to a large number of the unemployed. Extra men were engaged in the Grand Trunk yards shovelling snow. The country roads were in an almost impassable condition for heavy loads, the greater part of the month. This affected trade adversely, though wholesale and retail merchants report business satisfactory.

The customs returns for the month of January, 1908, totalled \$17,715.47, showing an increase of \$8,508.63 over the corresponding month of 1907. No change in the rate of wages or hours of labour was reported and no unrest in the labour market.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Market prices were as follows:—

Butter, 28 to 30cts per lb.  
Eggs, 28 to 30cts per doz.  
Apples, 50c. to \$1 per bag.  
Potatoes, 90c. to \$1 per bag.  
Turkeys, 14 to 15cts per lb.  
Chickens, 35 to 40cts each.  
Barley, 80 cents per bush.  
Peas, 70 to 80 cents per bush.  
Oats, 48cts per bush.

*Manufacturing.*—None of the factories were busy and a few were very slack with working staff reduced.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were quiet.

*Metal.*—These trades were dull with

the exception of blacksmiths and boiler-makers.

*Woodworking and furnishing.*—Woodworkers were dull, but coopers were fairly busy.

*Printing.*—Printers and pressmen reported business active.

*Clothing.*—Journeyman tailors were fairly active; garment workers were dull.

*Food and tobacco preparation.*—Bakers, butchers and cigar-makers were busy. A number of men and teams were engaged in cutting and storing ice.

*Miscellaneous.*—Barbers, clerks and delivery employees were busy. Hotel, restaurant and laundry workers were active.

*Transport.*—Railway employees were active, though suffering inconvenience from the snow blockade. Cab drivers, draymen and teamsters were busy.

*Unskilled.*—There was a large number out of employment.

#### LONDON, ONT., AND DISTRICT.

*Mr. Alex. Wootton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have not improved during February, and local factories continued to run short hours or with curtailed staffs. There were four failures of firms, viz: The Canada Fire Engine Co.; The Wagoner Ladder Co.; The Pandora Cap Company, and the Amalgamated Oil Company. In each case the business will be wound up. The sum of \$800 was spent by the city to give work to some of the unemployed. Teams and men were employed hauling snow from the streets on which street cars run. It was decided by the city that teamsters should receive \$3.50 per day and labourers \$1.25; but the teamsters refused to work unless given their usual wage of \$4.00 a day, the labourers receiving \$1.50. A number of labourers were also employed by the city breaking stone for use on the city streets; others were sawing wood in the city wood yards, through an arrange-

ment by the Charities' Aid Society. In the early part of the month the heavy snow storms completely blocked some of the railways in this districts and a lot of extra work was made to clear the tracks. The outlook for the coming summer is not as bright as for the past few years. The ice men have stored a good harvest. The Real Estate Owners Association, at a recent meeting, decided on an increase of from 10% to 15% in rents.

The annual meeting of the London Street R'y. Co., showed a million more passengers carried in 1907 than in 1906.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Workers at these trades, with few exceptions, were idle.

*Metal, engineering and shipbuilding.*—Iron moulders were slack, nearly all working short time. The Rolling Mills have resumed operations, giving the iron workers employment. The Bolt and Hinge Works have also started again with a reduced force. Machinists and electrical workers were slack. Metal polishers, brass workers, stove mounters and boiler-makers were working short time.

*Woodworking and furnishing.*—Carriage and wagon workers reported conditions dull. Car builders continued to work with a reduced force. Coopers reported trade slack.

*Printing.*—Printers and pressmen were all working, and trade was good.

*Clothing.*—Journeymen tailors reported trade fair. Garment workers were slack. Boot and shoe workers were busy.

*Food and tobacco preparation.*—The Toasted Corn Flake Factory has resumed operations with a reduced force. The two biscuit and candy factories continued to work short time. Cigar-makers were not busy.

*Leather.*—Tanners and curriers were busy.

*Transport.*—The railroads have had a hard month, and everyone was busy owing to extra work on snow plows and double headers. Teamsters were slack.

*Unskilled labour.*—This class, especial-

ly the new comers, has suffered considerably through inability to procure work, there having been a large number idle all winter.

#### ST. THOMAS, ONT., AND DISTRICT.

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was quiet during February, showing little change from the preceding month. There was very little work in the building trades, more men being idle than has been known for some time. On account of the severe storms many labourers were employed shovelling snow on the steam and electric railways. Transportation on the railways was active and the men employed in the traffic departments were compelled to work overtime. Many of the merchants complained that the month has been exceptionally quiet. Undoubtedly the reduction in hours in the Michigan Central Shops had much to do with the quietness which prevailed in business circles. Although there have been a number out of work, very few cases of distress have been reported.

A reduction of twenty-three men was made in the Michigan Central Shops during the month. In the Pere Marquette Shops there was more activity than has been evident since the establishment of the shops in St. Thomas. About forty additional men were added to the force during the past month. This increase in force was made on account of the new arrangement whereby the repair work for the Wabash railway is being done in the Pere Marquette Shops. It is expected that a still larger force will be employed at a later date and that there will be more overtime made than during February. The fact that the Pere Marquette Company found it necessary to increase its force, counteracted the reduction made in the Michigan Central Shops, giving the men who were laid off, an opportunity of finding work in this city.

While a number of local industries have not been as busy as during the preceding month, they report spring orders coming in rapidly, and expect that factories will soon be working about full time.

There is a scarcity of houses renting at from eight to ten dollars per month. Mechanics find it hard to meet the high rate of living and as a result there is a constant demand for suitable houses at a lower rent rate.

A communication was received from the Hon. the Postmaster-General, stating that steps would be taken towards the establishment of Free Postal delivery in St. Thomas. As a result the Council will arrange at an early date to have the streets properly named and numbered so that the service can be inaugurated with as little delay as possible.

It has been announced that the Southwestern Traction Company will extend its line as far east as Aylmer as soon as weather conditions will permit. Passenger traffic between London and Port Stanley has continued good during the winter months.

A very good showing was made by the Light, Heat and Power Department in the last report submitted to the Council. It has been announced that a surplus of \$16,000 will be turned into the City Treasury. This surplus is taken after payment on debenture debt and taxes is made and after all expenses and liabilities are met.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Work was quiet in this district. The markets were well attended by buyers and sellers.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Quietness prevailed.

*Metal.*—Iron moulders, iron workers, machinists and blacksmiths reported a steady month.

*Woodworking and furnishing.*—The different branches were not actively employed.

*Printing.*—Printers had a quiet month.

*Clothing.*—Journeymen tailors were quiet.

*Transportation.*—Railway employees in the traffic departments were very busy during the month of February, many of the men making as high as thirty-five days with overtime.

*Unskilled labour.*—Quietness prevailed.

#### CHATHAM, ONT., AND DISTRICT.

*Mr. Alex. Gregory, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has been exceedingly quiet. With exception of the harvesting of the ice crop and the few employed on the Electric Ry. there has been practically no employment. The Associated Charities have been called upon to assist in relieving the distress of several.

The outlook for the building trades for the coming season is not very encouraging. During January and February no requests were made for building permits. In many cases the skilled mechanics have had their wages cut 10%, while the costs of building material in every branch remains as in 1907, and the probabilities are that only a limited amount of building will be done the coming season. With one or two exceptions the factories are still on short time, and one by one are gradually adopting the 10% cut in wages. On Feb. 15, the Wolverine Brass Works commenced operations employing a large number of men. As this is a new industry, the probabilities are that the men will receive steady employment at 10 hours a day for some time. If satisfactory arrangements can be made with the city for railroad facilities the city will soon have a box factory that will employ 50 or 60 men and boys.

#### CONDITIONS OF PARTICULAR TRADES.

*Building.*—The different trades were very quiet during the month the only work being repairs and a few buildings

being finished. Plumbers were very busy mostly on repair work.

*Metal.*—Horseshoers were very busy all the month.

*Woodworking.*—These trades were fairly well employed, mostly on stock.

*Printing.*—Printers reported trade good in the jobbing department.

*Clothing.*—Journeymen tailors were slack.

*Food and tobacco preparation.*—Bakers reported trade fair.

*Miscellaneous.*—Barbers were quiet.

*Transport.*—Freight handlers reported dullness.

*Unskilled labour.*—There was no demand.

## SAULT STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The supply of labour during February was slightly in excess of the demand. Banks reported a stringency in money. Merchants reported trade quiet.

### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—The lumber camps began breaking up at the end of the month, and it was stated that the saw mill would open in the beginning of March. The season's cut has been sold ahead. The veneer mill and the pulp mill were running steadily.

*Manufacturing.*—The Northern Foundry & Machine Company started operations during February. They will engage in a general foundry and machine shop business. The steel plant commenced full operations on January 31, after two weeks close down for necessary repairs. The iron works including foundry, machine shops, blacksmith shop, etc., were dull. The Canadian Logging Tool Company reported prospects as bright, orders coming in plentifully. This concern has been operating less than a year and expects to enlarge its plant shortly.

### CONDITION OF PARTICULAR INDUSTRIES.

In the *printing, miscellaneous* and *transport* trades normal conditions were reported.

*Clothing.*—Business was quiet with journeymen tailors.

*Food and tobacco preparation.*—Cigar makers and tobacco workers were fairly well employed. Ice cutters and drivers were busy, but bakers and confectioners were quiet.

## WINNIPEG, MAN., AND DISTRICT.

*Mr. John Appleton, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Conditions have undergone no material change since last month. Outdoor work generally is hard to procure except in the woods and upon railroad construction. In the city there appear to be a lot of men who desire employment but who will not accept offers to go to the country to work for farmers or into the woods to work for contractors. General trade is dull and the factories are not working to full capacity. Staffs are lower than they were a year ago and they will be kept as low as possible until circumstances appear to be favourable for a satisfactory crop. Bank clearings in the early part of the year showed an advance over the corresponding period of last year but towards the close of February they showed a decline. Collections were reported as only fair but loan companies say that interest charges are being well met. The banks also reported that collections are quite as good as they expected.

An association of the various charitable organizations has been formed with a view to diminishing the amount of indiscriminate charity practised in the city. This association is composed of representatives from existing organizations. It has been decided to establish a bureau of information to investigate thoroughly every application for help and every reported case of necessity

and preserve in systematic and accessible form, for charitable organizations, benevolent persons and the agencies of civic relief, full information regarding those applying for or receiving assistance. In addition, a bureau of information will be established to provide the needy without cost, information regarding employment, means of self-help, and sources of relief. This bureau of information will co-operate with civic relief works at present existing, or in future to be established.

The newly formed society also contemplates the appointment of a relief superintendent, with office at the City Hall, and whose salary and necessary expenses shall be provided by the city. Such officer is to be appointed by the Mayor on the recommendation of the executive committee of the Associated Charities which shall also define his duties. Already active steps have been taken to procure a suitable person to fill this office.

#### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—As many men as usual are being employed in the woods taking out ties and cutting fire wood. In the early part of the season operations were handicapped somewhat by the lack of snow but some light falls have improved conditions.

*Railroad construction.*—Experienced men have no difficulty in getting work on the rock cuts that are being made for the C. P. R. double track between Winnipeg and Lake Superior. The Grand Trunk Pacific is also employing large numbers of men. For the spring the outlook appears to be bright. Preparations are being made for extensive grading of new lines and a large number of men will probably be required upon the mountain sections of both the Canadian Northern and the Grand Trunk Pacific lines.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Practically all building operations are suspended at this season of the year and the prospect for normal activity at the present time is not very bright. In the outlying sections of the city there are several houses that have

not had tenants for some time. Until the increase in population overtakes the supply of dwellings it is not probable that building operations will be as active as for the last year or two. One or two large buildings are in prospect, notably an expensive new bank building and a union depot. It seems certain that these will be proceeded with as soon as the weather will permit.

*Metal and engineering.*—In the engineering trades the outlook is not by any means bright. Orders are not very numerous and difficulty is being experienced in keeping the present small staffs in full employment. Prospects may improve however as the spring opens out.

*Woodworking.*—Woodworkers find that the demand for their product has declined in sympathy with the diminished building activity.

*Printing and allied.*—Dullness prevails, and there is little hope of any material improvement for some time.

*Clothing.*—Conditions have been very depressed. February is usually a busy month but travellers are not getting the orders this year that they were able to place at the factories last year. The result is that the number of hands employed is less than usual and in one or two cases there has been a slight cut in wages.

*Food and tobacco preparation.*—In the food and tobacco preparation industries there is a normal activity, although the demand for the products both as to tobacco and bread seems to be less than usual for the time of the year.

*Leather.*—Dullness prevails. Usually there are about 175 hands employed in the factories but at the present time there is not more than fifty. Towards the end of the month conditions improved somewhat.

#### BRANDON, MAN., AND DISTRICT.

*Mr. S. P. Stringer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was practically the same as last

month, although prospects for the coming season have brightened considerably. On the railways the conditions were also the same, as the continued fine weather and the absence of snow blockades has permitted the employment of large numbers of extra men. About 15 to 20 men have been employed removing the old bridge preparatory to the erection of a new one, the construction of which will provide employment for a number of workmen. During the latter part of January business conditions were somewhat quiet, and a considerable number of men were out of employment, but there was a marked improvement in business in February.

The following list of new buildings to be erected in the spring will give an idea of the prospects for those engaged in the building trades: Court house, \$80,000; drill hall, \$50,000; C. P. R. Co's., depot extensions, \$25,000; St. Michael's convent, \$30,000; bridge, \$60,000; Canadian Northern Railway Company's depot and yard, \$60,000. Local real estate dealers reported a fairly brisk movement in farm lands in the Brandon district, and an increased demand for city lots.

The following return with regard to trade and industry in Brandon was compiled by the Board of Trade, based upon statistics furnished by local merchants:—

Total value of goods manufactured.....	\$2,088,000
Wholesale and jobbing.....	2,882,000
Dry goods, clothing, furnishing, retail.....	890,000
Groceries, retail.....	590,000
Hardware.....	385,000
Books and stationery.....	75,000
Drugs and druggists' sundries.....	117,000
Furniture.....	148,000
Lumber.....	227,000
Harness and saddlery.....	35,000
*Implements and machinery.....	245,000

Total business of all kinds.....\$ 7,741,000

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Arrangements for the distribution of seed grain to the western farmers were nearly completed. Copies of the prize list of the Winter Fair to be held in Brandon on March 10 to 13, were

\*Number of carloads of implements and machinery transferred, 260.

being distributed. Some of the foremost lecturers in the East, and some professors from United States colleges will give lectures on the live stock industry. Exhibits have been already promised from points in Alberta and Saskatchewan, in addition to a large number of feeders of Manitoba. The railway companies have agreed to a single rate for Manitoba and Saskatchewan. The Brandon Winter Fair immediately precedes that at Regina, stockmen are thus enabled to exhibit at both fairs without returning home.

*Manufacturing.*—Flour millers are making extensive alterations and repairs to plants.

*Railroad construction and employment.*—There is no railroad construction being carried on at present, and consequently not much employment.

CONDITION OF PARTICULAR TRADES.

*Building.*—Inactivity prevailed.

*Metal.*—All found employment quiet, with the exception of machinists and boilermakers, who were active.

*Woodworking and furnishing.*—Quietness prevailed.

*Printing.*—Printers and pressmen found employment active.

*Clothing.*—Conditions were somewhat dull, but will improve as spring approaches.

*Food and tobacco preparation.*—No special activity was evidenced.

*Leather.*—Conditions were quiet.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees and laundry workers were active.

*Transport.*—Freight traffic was somewhat light, but passenger traffic was fairly heavy.

*Unskilled.*—A number were unemployed, although many found employment in removing the bridge on First street.

DISTRICT NOTES.

There are prospects that an abundant supply of natural gas will soon be secured from the Riding Mountain district. A flow has been struck 150 feet down, 18 miles north of Neepawa.

*Rapid City.*—Petroleum gum has been discovered within 8 miles of Rapid City. The Harding flour mill, which has been closed, is about to be opened up again by a joint-stock company, formed among local merchants and farmers.

#### MOOSEJAW, SASK., AND DISTRICT.

*Mr. Jas. R. D. Bastien, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

During January and February there was little or no employment for labour in many of the industries of the district. Employment in the railway service was never so inactive since 1895. About 50% of railway employees are set back and reduced in rank owing chiefly to the mild weather. There is little traffic on the Soo line compared with last year. In all other industries there was little demand for labour, but there has been little or no hardship experienced by any one in the district reported. Fuel has been plentiful, but recently increased in price, costing now \$8 per ton for the Lethbridge coal, which is mined 375 miles west of this city. The prices of all commodities have considerably decreased compared with the prices prevailing a year ago.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There was little demand for farm help.

##### CONDITION OF PARTICULAR TRADES.

*Building, metal, woodworking.*—Inactivity was the rule in these trades, excepting with blacksmiths and horse-shoers, who were fairly well employed.

*Printing.*—Dullness was general.

*Clothing.*—These trades had fair employment.

*Food and tobacco preparation.*—Fairly busy conditions prevailed.

*Leather.*—Employment was more or less dull.

*Miscellaneous.*—Barbers were busy, clerks and stenographers fairly so, but others found employment dull.

#### REGINA, SASK., AND DISTRICT.

*Mr. Hugh Peat, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during February has been very dull. The reports from local unions have not improved since last month, and the same conditions obtain in all branches of the building trade. Very mild weather prevailed so that the real hardships of winter have not been experienced by the unemployed.

The prospect of an early start being made on the new Parliament buildings and on the land titles offices in the spring is good; this will provide employment for a number of men who are now idle. Building operations will also be commenced on the new provincial jail early in the spring but the season will be well advanced before there will be a demand for more labourers in any of the several branches than those who are already in the city and district. The schedules of the local building trades unions have been handed to the secretary of the Trades and Labour Council and are now in the hands of the secretary of the Builders' Exchange. An early conference between the two bodies is expected.

##### RE UNEMPLOYMENT.

The number of unemployed in the city is about the same as last month. The Provincial Government and the City Council are still endeavouring to provide sufficient work in order to ensure relief from actual want, and the several efforts in this direction have so far proved satisfactory. The Regina Relief Society is still continuing its work and although an increasing number of cases of destitution were reported they were all well taken care of. The society intends to continue the work till such time as the general opening up of business in the spring will provide work for all. The society has now forty-eight cases under its care, and the number has increased

at the rate of one per day during the last two weeks.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The final report of the grain crops of Saskatchewan for the past year has been issued by the Department of Agriculture. Compared with the production in 1906 the crop of last season shows a net decrease of 9,284,959 bushels, the difference being almost entirely in the case of wheat, although the quantity of oats threshed was not quite as large as in the previous year. All the other grains show an increase, amounting in the case of flax to 654,027 bushels, an increase over the figures of 1906 almost equal to the whole flax crop of that year.

*Fishing.*—There has been a large increase in the amount of fishing carried on in the province this winter compared with last, particularly in the lakes lying within the settled portion of the province. More than double the number of licenses have been in force. This is largely due, to the partial failure of the crop, which led to many taking up fishing who are generally employed in the marketing of grain. The most of the winter fishing is done from Dec. 15th to Jan. 15th, after which as a rule the fish move into deeper water, while the increasing depth of ice and severity of weather renders fishing more difficult. The catch varies greatly with the skill and experience of a fisherman, but the average of a regular hand has been well up to last year. Prices have ruled about the same,—5 cents a pound for white fish and pickerel at the railway shipping points in the north, while the same is paid on the ice at lakes in the south.

#### CONDITION OF PARTICULAR TRADES.

*Building.* — Bricklayers, masons, lathers and plasterers, painters, plumbers, and builders' labourers were very dull.

*Metal.*—Electrical workers were very quiet; sheet metal workers were dull.

*Printing.*—The general condition of

the trade was quiet. There has been little, if any, improvement since Christmas.

*Food and tobacco preparation.* Cigar-makers were very dull.

*Miscellaneous.*—Several new barber shops have opened for business, but the condition of the trade is only fair.

#### CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brocklebank, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

During the present month there has been little if any change in labour conditions. Some workmen that were unemployed during January have found employment, but others have been laid off where the employer has completed his contract. It is generally expected that with the opening of spring most of the unemployed will secure work. The contractors who are constructing the Grand Trunk Railway are already engaging men for work west of Edmonton. There will be considerable building done throughout the district.

Both passenger and freight traffic has improved over last month, though somewhat slacker than during the corresponding month of 1907. There was no improvement in bank clearings, which showed a falling off compared with a year ago. Wholesale trade has been light compared with the corresponding month a year ago. The retail merchants reported a slight decrease in business.

Wages remained about the same as in 1907, except in the case of a few workmen employed by the city, whose wages were slightly reduced. The city has given some employment in the way of relief.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers and ranchers have had a very easy winter, as there has not been a day when they had to feed their stock, the winter being a very mild one.

*Fishing.*—The fishing industry was being carried on to a considerable extent in the central part of the province, and fish were being shipped from and around Ponoka in large quantities.

*Mining.*—The coal mines throughout the district were not being operated to their full capacity, presumably because the demand materially decreased this winter compared with last.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators, stone-cutters and builders' labourers found conditions of employment dull. Plumbers and gasfitters were quiet.

*Metal and engineering.*—Machinists, engineers, electrical workers and linemen, blacksmiths, boiler-makers, sheet metal, workers horseshoers and jewellers were quiet.

*Woodworking and furnishing.*—Woodworkers, carriage and wagon makers, and car builders were quiet.

*Printing.*—Printers, pressmen and bookbinders, and photo engravers were quiet.

*Clothing.*—Journeymen tailors, garment workers, hat makers, boot and shoe workers found employment quiet.

*Leather.*—Quiet conditions prevailed.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees were somewhat quiet. Laundry workers were active.

*Transport.*—Railroad conductors, locomotive engineers and train crews generally, together with telegraphers, switchmen, trackmen and freight-handlers were quiet.

*Unskilled.*—This class was dull.

#### EDMONTON, ALTA., AND DISTRICT.

*Mr. J. A. Kenny, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions showed an improvement over those of last month. There

was an increased demand for unskilled labour compared with February a year ago. This condition was due to the starting of the work of clearing the right-of-way for the Grand Trunk Pacific Railway west of the city, and the preparing for grading and other railway operations in the spring. A number of men recently left the city to cut ties for different contractors. A considerable number of men were also employed laying sewer pipe. By-laws authorizing the expenditure of \$386,500 were carried by the rate-payers by large majorities on the 24th instant. They were for extensions to the street railway system, street paving, electric lighting, telephone, fire protection, isolation hospital, and the city's share of the cost of building the traffic floors of the Canadian Pacific Railway high level bridge, viz., \$42,500. The city authorities are at present negotiating for an automatic telephone system, which is to be installed in April next. About one hundred men and teams will be required to freight supplies out to the supply-houses along the line of the Grand Trunk Pacific Railway; these will be furnished from the city and surrounding country. The piers for the bridge to be constructed at Clover Bar will be finished by the 15th of March, and ready for the steel superstructure.

Wholesale and retail trade was fair for this season. Arrangements are now being made whereby Edmonton will obtain more favourable rates. The reduction of five cents per hundred pounds in class 5, and eight cents per hundred pounds on agricultural implements and machinery will place Edmonton on the same basis, with regard to freight from the east as Winnipeg. The new rates will come into effect on the 15th of March.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters, bricklayers, masons, lathers, plasterers, painters, plumbers, steamfitters and builders' labourers were indifferently employed, with the supply of workmen exceeding the demand.

*Metal.*—Electrical workers, linemen, sheet metal workers, and all branches of

skilled metal working were more than supplied with suitable workers.

*Printing.*—Printers and pressmen were fairly active.

*Food and tobacco preparation.*—Cigar-makers found employment fairly active.

*Miscellaneous.*—Hotel employees and barbers had fair employment.

*Unskilled.*—The supply exceeded the demand.

#### NELSON, B.C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during February throughout the Kootenay district was very dull, the supply of both skilled and unskilled labour exceeding the demand by about 1,500 men. About 400 of these are residents of Nelson, of whom about 50 are without money. A considerable number are being kept by the different hotels, and in some isolated cases are receiving assistance from the Ladies' Auxiliaries of different religious denominations.

The mines in the free milling district south of Nelson and adjacent to Salmo, are shipping freely, particularly the "Arlington," "Emerald" and "Nugget." The St. Eugene mine at Moyie, B.C., is employing about 365 men and is making a large output. The payroll of the Crow's Nest Pass collieries for February was about \$185,000, being a reduction of about \$20,000 as compared with the months of December or January.

There are about 200 unemployed men around Fernie, about 50 of whom are receiving financial aid from the local union of the United Mine Workers of America, those working being assessed 1% of their wages to help the unemployed members.

#### NEW WESTMINSTER, B.C., AND DISTRICT.

*Mr. D. J. Stewart, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market showed an improvement over last month, a considerable number of men being employed by the city in sewer work. There were however a large number of idle men in the city and district, though conditions are expected to improve so that in a short time there will be sufficient work available for all. No shortage is expected in the labour market this year, the general opinion being that the output in all lines will be less than in 1907. Construction has commenced on a sawmill to cost \$150,000. A contract has also been let for the construction of a new telephone building; with the completion of this building the service will be improved. A company has secured rights for the construction of a second gas plant, to cost about \$35,000. About 6000 emigrants, brought from England under the auspices of the Salvation Army, will arrive in the province within the next few months.

Some prosecutions have already taken place under the Natal Act, which has recently been enacted by the provincial Government, the offenders being sent to gaol for twelve months. The act calls for an educational test from all emigrants wishing to enter the Province.

The B. C. Loggers association has adopted a new schedule of wages for logging camp hands as follows: White cook, \$65.00 per month; assistant cook, \$30.00; man and wife as cook and assistant, \$80.00 per month; Chinese cook, 1st, \$45.00; 2nd, \$35.00; string teamster, \$70.00 per month; teamster, two horses, \$40.00; signal boy, \$20.00 per month; daily men, \$5.25 per week for board; blacksmith, \$3.00 per day; helper, \$2.00 per day; boom-man, first \$3.00 per day; second, \$2.50 per day; greaser, \$2.25 per

day. The rules of the association allow of increases where it is considered necessary.

An association to be called the Dominion Civil Servants' Association has been formed in this city, with the object of improving working conditions. The Association has a membership of about fifty, all permanent employees of the Dominion Government being eligible. Similar associations have been formed in Vancouver, Victoria, and Nanaimo; also at points along the line of the C. P. R., east to Winnipeg, Man.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There was general activity preparing for spring work, the weather being all that could be desired for ploughing, &c.

*Fishing.*—A few fish are being taken and for these a ready market and good prices are being obtained.

*Lumbering.*—Trade which has been on the decline since October last, is again showing signs of activity, and a couple of mills which had ceased operations for a time, have again started up.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The different branches were very quiet but with prospects of an improvement in the near future.

*Metal.*—Iron moulders, machinists, engineers, electrical workers, blacksmiths and boiler-makers were quiet. Electric car builders were active, but only a limited number of men were employed.

*Woodworking.*—Shingle weavers were dull.

*Other trades.*—The printing and clothing trades were quiet. Bakers, butchers, and cigarmakers were active, with clerks and stenographers dull and laundry workers quiet. Street railway employees and expressmen were fairly active.

*Unskilled labour* was very dull.

#### VANCOUVER, B. C., AND DISTRICT.

*Mr. Geo. Bartley, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during February was on the whole the dulllest in ten years. There were not so many men idle as in January, but this was due to the large numbers leaving for the interior and northern parts of the province.

A deputation from the Trades and Labour Council waited on the Provincial Government at Victoria regarding the fair wage clause and free school books. A deputation from the Council also waited upon a committee of the city council to protest against letting the tender for police clothing, which will be made at Montreal, without the union label.

James Stark & Sons have purchased the property at the northeast corner of Hastings and Abbott streets, 132 x 66, for \$175,000, and will build a six-storey building in 1909.

Bank clearing for the week ending February 20th amounted to \$2,984,316. For the same period in 1907 the clearings were \$3,390,904.

Fresh eggs are now selling at 35c. a dozen. Hams were cheaper, but the price of bacon remained unchanged. Hay dropped from \$22.00 to \$20.00 per ton.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—With the exception of the finishing of a few large buildings, practically nothing is being done. The outlook is that the amount of building for the coming season will not exceed that of last year.

*Metal, engineering and shipbuilding.*—The moulding and machine shops further reduced their staffs. Wallace's shipyards at North Vancouver have again been opened up, but only a few men were put to work.

*Woodworking and furnishing.*—Business was reported very quiet, with about 50% of the workmen idle.

*Printing.*—The printing trade was quiet, a number of newspaper compositors being idle and the job offices running with reduced staffs.

*Clothing.*—Tailors and garment workers reported trade very quiet, with a large number seeking employment.

*Food and tobacco preparation.*—Butchers and meat cutters were well employed, but bakers reported conditions dull, and cigarmakers about 75% of their members out of employment.

*Miscellaneous.*—Barbers, hotel and restaurant employees reported a number out of work, with prospects uncertain, but laundry workers were well employed. A large number of clerks and delivery employees were looking for work.

*Transport.*—Railway trackmen and freight-handlers reported a number of men idle, with prospects uncertain.

*Unskilled.*—This class found employment very dull.

## VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

During February there have been a number of unemployed, particularly in the building trades and among unskilled labourers, but it is expected that in another month practically all will have found employment, as many new buildings are in contemplation. As for unskilled labour, the city has now a staff of about two hundred and fifty laying wooden paving and other street work, and the number will be doubled as soon as the work of laying cement sidewalks and putting in new water mains is commenced. There has been no special work provided for the purpose of giving the unemployed work by the city. The bulk of the unemployed consists of newcomers to the city. There has been a decrease in the price of rough sized and ship-lap lumber of \$2.00 per thousand feet. Business, both wholesale and retail, has been good, and there was no unrest in the labour market. The total

amount of building permits issued up to February 18th was \$56,575, as against \$54,625 last month, making a total of \$111,200. Hams, both American and B. C., have been reduced to 20c. per pound, and fresh eggs are now down to 40c. per dozen.

### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—All the mills in and around Victoria were running full time, and the prospects are for a busy season. Not more than twenty per cent of the employees in the mills are white men. In the logging camps practically all the hands are white men.

*Sealing.*—It is not expected that there will be a large fleet of sealers from Victoria this season, but it is understood that the schooners will have all white crews. Owing to the scarcity of seals in the unprotected waters and the low price of skins on the London market, this industry is declining.

*Shipbuilding.*—All local yards were very busy. At the B. C. Marine Railway and the Victoria Machinery Depot there is much repair work going on, as well as a quantity of new construction work. In wooden shipbuilding, the union yard of Alex. Watson has just launched a river boat for the Hudson's Bay Company, and is now busy constructing a river steamer for the Grand Trunk Pacific Company. The union wage is \$4.00 for eight hours.

*Railroad construction and employment.*—The only railroad work going on in the district is the usual track repair work, but it is expected that now the City Council and the C. P. R. have come to an understanding in the Store Street matter, that this company will begin work very soon on its new freight terminal and lay the track from the present station, about five hundred yards to the new yards. This should give employment to a lot of men.

*Other industries.*—In all the other industries conditions were active, all running full time, though with plenty of applicants for employment.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons to quite a number were busy, but there

were many idle who will probably be working in a short time, when the building season opens up. There were also numerous carpenters and joiners out of work. The painting and decorating trades were not very busy as yet. Plumbers found plenty of work on new buildings. There was not much work for stonecutters, but builders' labourers were kept well employed, about seventy-five per cent of the total number usually employed now being kept working.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers had enough work to keep them busy. A number of machinists who have recently come to town have found ready employment. This is a dull season for marine engineers, and there are a number of idle men here waiting for navigation to open up in the northern waters. Telephone linemen were very busy laying new cables. Stove mounters and moulders were kept busy at the Albion stove works. Boilermakers and iron ship builders were all busy at the different yards, as were also ship carpenters and caulkers. Sheet metal workers were kept well employed. Horseshoers and blacksmiths were fairly busy, though there were plenty of men to do the work. Jewellers found trade brisk, notwithstanding that this is considered a dull time of the year.

*Woodworking and furnishing.*—Woodworkers, upholsterers varnishers and polishers were busy, though idle men of the latter calling have been seen. Carriage and wagon makers reported trade in a healthy state. Pattern makers had all the work they could do.

*Printing and allied.*—The printing business still kept very busy in both job and newspaper branches, and the prospects were bright for another good year. Although the Government printing office has installed two linotypes, the staff of compositors has not been reduced. Book binders were regularly employed.

*Clothing.*—Journeymen tailors and garment workers were all doing well.

*Food and tobacco preparation.*—Bakers, butchers and meat cutters stated that the trade was in a normal condition. Cigar making was not as brisk as before the end of last year.

*Unskilled.*—While there were many employed, there was about one hundred who desired employment, only getting odd jobs here and there. It is expected that they will all be employed when the building and other business starts up.

#### NANAIMO, B.C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in this district has shown no change since last month there being a large number of men idle, with not much prospect of work. The city authorities are trying to find work for those in actual want but cannot do much until the weather improves for outdoor work. The wholesale and retail merchants are feeling the depression heavily as the people are only purchasing the actual necessities at the present time. There have been no changes in hours of labour or rates of wages except in the lumber trade, where there has been a gradual falling off.

#### CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—Herring fishing is gradually falling off, the fish getting scarcer. There has been a very large catch this year, principally by Japanese. The whaling station on the Gulf is working steadily.

*Mining.*—There is hardly any employment in the lumber camps at present. The local sawmill has been quiet. Outside of the sash and door factory Chinamen are principally employed.

*Mining.*—There is little work in the quartz mines at present. The coal mines in this city are only working four days per week. At the other coal mines in the district there has been considerable slack time with the exception of Cumberland, which is working steadily, principally with Oriental labour.

*Railroad construction.*—The railway company has not started grading as yet but is getting ready to start soon. The

clearing of the right-of-way is being pushed, Japanese being chiefly employed.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Plumbers were fairly active, but the trades generally were dull.

*Metal.*—Machinists and engineers, blacksmiths and carriage makers were quiet.

*Transport.*—Teamsters and expressmen were quiet.

*Unskilled labour* had little work.

### INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF FEBRUARY.

**D**URING the month of February, one application for the establishment of a Board of Conciliation and Investigation was received in the Department, namely, on behalf of the employers, Messrs. John March, John Howells and Stevens Bros., dealt with as one, in a coal mining industry carried on at Woodpecker, Alta. The number of employees directly concerned is estimated at 72, and that of persons indirectly interested at 29.

Of applications received prior to the beginning of February, proceedings in connection with which remained unfinished at the close of the preceding month, there were the following, namely: (1) On behalf of the employees, being railway carmen, of the Grand Trunk Railway Company of Canada; (2) On behalf of the employees of the Temiscaming and

Hudson Bay Mining Company of Cobalt Ont.; (3) On behalf of the employees of the Dominion Coal Company, Limited, of Cape Breton, C. B.; (4) on behalf of the employees of the Hamilton Street Railway Company, the Hamilton and Dundas Railway Company, and the Hamilton and Burlington Radial Railway Company. The applications in the case of the Grand Trunk Railway carmen and the employees of the Temiscaming and Hudson Bay Mining Company were disposed of during the month, reports having been received from the Boards established to deal with them. The reports in question are printed in the present article, which contains also a statement of proceedings during the month in connection with all applications not disposed of.

#### I.—SETTLEMENT OF DIFFERENCE BETWEEN GRAND TRUNK RAILWAY COMPANY AND ITS CARMEN.

**T**HE Department received on February 28th, the report of the Board of Conciliation and Investigation established to deal with the difference between the Grand Trunk Railway of Canada and the carmen in its employ. The result of the discussion and enquiry before the Board was the conclusion between the parties of an amicable agreement on all points, the same being signed by the members of the Board and by the representatives of the disputing parties.

The Board consisted of Professor Shortt, Kingston, Ont., chairman; Mr. Wallace Nesbitt, K. C., Toronto, and Mr. J. G. O'Donoghue, Toronto. The number of employees directly affected by the difference was estimated at 800. The

difference related to rules and regulation of hours and wages, the demand of the men, as set forth in a schedule attached to the application, requesting, among other changes, an increase in wages.

The Board met at Montreal on the morning of February 25th, and the agreement was concluded and signed at seven o'clock the same evening. The Chairman of the Board, in a covering letter to the Department accompanying his report, stated that most of the grievances brought to the attention of the Board were matters of administration, "and it was judged inexpedient to attempt to deal with them by adding to the articles of the general schedule of Regulations and Rules." "However," added Professor Shortt,

“as expressing the desire and intention of the Company to deal fairly with the men in these matters, Mr. Fitzhugh (third vice-president of the Grand Trunk Railway Company) addressed to me, as chairman of the Board, a letter declaring his intention to have these matters looked into and equitably adjusted.” The letter referred to accompanies the report. Concerning the procedure before the Board, the Chairman says: “The matters in dispute were discussed in a frank, friendly and informal manner. Most of the matters brought forward were disposed of in the course of the discussion, and the remainder were settled by an agreement reached at the close of the proceedings.”

#### Text of Formal Agreement.

The text of the formal agreement was as follows:—

We, Professor Adam Shortt, J. G. O'Donoghue and Wallace Nesbitt, members of the Board of Conciliation appointed under the Industrial Disputes Investigation Act, 1907, in a dispute between the carmen in the employ of the Grand Trunk Railway Company of Canada and the Grand Trunk Railway Company of Canada, beg to report that we met on the 25th day of February, 1908, at the Board Room of the Grand Trunk head offices in the city of Montreal, and heard the parties fully.

The shop rules of the Grand Trunk, which rules are hereto annexed, were found by us to be fair and reasonable. The schedule of pay promulgated by the

Grand Trunk was also deemed and considered under all the circumstances to be fair and reasonable, and we award that the same be the rules and rate of pay governing the parties.

ADAM SHORTT, Chairman.  
J. G. O'DONOGHUE,  
WALLACE NESBITT.

We accept the above award.

GRAND TRUNK RAILWAY  
COMPANY, by E. H. Fitzhugh,  
3rd vice-President.

S. M. NICHOLS, chairman, B. R.  
C. of A., joint protective board, Grand  
Trunk Railway.

#### Mr. Fitzhugh's Letter to the Chairman.

Following is the text of Mr. Fitzhugh's letter to the Chairman of the Board:—

#### GRAND TRUNK RAILWAY SYSTEM.

Montreal, Que.,  
Feb. 25, 1908.

Dear Professor Shortt,—

In reference to the discussion with the carmen this afternoon, I desire to say that I shall at once personally inquire into the reasons for the laying off of Messrs Firs and Plummer. I shall give directions for enquiries to be made at once to ascertain if greater precautions can be taken and where, to ensure the protection of the car repairers while at work on the sidings, and to see if locks can be provided as suggested. I will also inquire into the suggestions re the coupling of engines at points discussed. I will also see what can be done re the retaining of married men in preference where possible in places where reductions of staff are necessary. We do not agree in any case as to passes, but this is a matter of courtesy, and all departments are treated alike.

Yours truly,

E. H. FITZHUGH,  
3rd Vice-President.

## II.—THE SILVER MINING DISPUTE AT COBALT, ONT.—FINDINGS OF THE BOARD—RECOMMENDATIONS FOR SETTLEMENT.

THE Department received on February 13, the report of the Board of Conciliation and Investigation established for the adjustment of differences between the Temiscaming and Hudson Bay Mining Company, Limited, and the engineers, miners and labourers, in the employment of the Company and being members of Cobalt Miners' Union No. 146 Western Federation of Miners. The

Board consisted of Prof. S. J. McLean, Toronto (Chairman); Mr. M. F. Pumaville, New Liskeard, Ont., and Mr. C. B. Duke, Cobalt, Ont. The sessions of the Board were held at Cobalt, on February 5, 6, and 7. The application for the establishment of a Board was received in the Department on January 17, and the number of employees concerned was stated to be 50. The difference was

said to be due to the action of the employing company in notifying the men that after the 16th December there would be a reduction of 25 cents per day in the case of each employee.

The Board presented a unanimous report in which was recommended the adoption of the principle of a wage scale based in some measure on the market price of silver. This, it may be remembered, was the feature also of the findings of the Board to which was referred the dispute at the St. Eugene mine, a silver-lead mining property at Moyie, B.C. The report was accepted for the employees by Messrs James McGuire and A. L. Botly, president and secretary respectively of the Local Union. At the close of the month word had not been received from the company, but work was proceeding at the mining property concerned. The selling price of silver during February ranged at a figure which under the system recommended would establish a scale of wages about equal to that offered by the Company after the proposed reduction.

**Report of the Board.**

The findings of the Board were as follows:—

IN THE MATTER of the Industrial Disputes Investigation Act, 1907, and of a dispute

Between

The Temiscamingue and Hudson Bay Mining Company, Limited,

*Employers.*

And

The Engineers, Miners and Labourers, members of Cobalt Miners' Union No. 146, Western Federation of Miners, Mining Department of Industrial Workers of the World;

*Employees.*

Which was referred under the Industrial Disputes Investigation Act to a Board of Conciliation and Investigation established and appointed by the Minister of Labour on January 31, 1908, and composed of the following members: C.

B. Duke, Cobalt. M. F. Pumaville, New Liskeard. S. J. McLean, Toronto,  
*Chairman.*

“ We the members of the said Board, having held various sessions in the town of Cobalt, and having carefully considered the evidence and arguments of both parties to the disputes, and having paid due attention to all matters which in our opinion are pertinent to the question in dispute, and having taken as the probable range of the price of silver during the current year a variation of from fifty to sixty cents per ounce, unanimously agree on the following award, which we earnestly recommend to the adoption of both parties to the dispute.

That the wage scale adopted by the Cobalt Miners' Union No. 146, in July 1907, a copy of which scale is hereto appended, be operative when the price of silver varies from any price in excess of 55c per ounce up to 60c per ounce, and that when the price of silver is between 50c and 55c inclusive per ounce there should be a deduction of 25c. per day from the standard wages as established in the scale above mentioned.

Dated at Cobalt, the 7th day of February, A.D. 1908.

(Sgd) S. J. McLEAN,  
*Chairman.*

“ C. B. DUKE,  
“ M. F. PUMAVILLE.

The following scale was adopted unanimously for all mines in the district:—

Carpenters.....	\$3.50
Mechanics.....	3.50
Pipe fitters.....	3.00
Blacksmiths.....	3.50
Helpers.....	2.75
Engineers, nine hours.....	3.25
Over nine hours, 32½c. per hour.....	
Firemen, nine hours.....	2.75
Over nine hours, 27½c. per hour.....	
Ore sorters.....	2.75
Hammermen.....	3.00
Teamsters.....	2.75
Hoistmen, nine hours.....	2.75
Over nine hours, 27½c. per hour.....	
Cage or bucketers.....	2.75
Other labour on surface.....	2.50
<i>Underground.</i>	
Timbermen.....	\$3.50
Machine men.....	3.50
Helpers.....	3.00
Cage or bucketers.....	2.75
Other underground labour.....	2.75

Miners ask that not more than 60 cents per day be charged for board; miners in shafts 25 cents extra per day; in wet shafts mine owners to furnish oil clothes to the men. Surface to work 9 hours and all underground work to be 9 hours. Cook's minimum wages per month \$75.

 No. 146 W. F. of M.

### III.—A COAL MINING DISPUTE AT WOODPECKER, ALTA., REFERRED FOR ADJUSTMENT.

THE Department received on February 10 an application for the establishment of a Board of Conciliation and Investigation for the adjustment of differences between John March, John Howells and Stevens Bros., coal mine operators at Woodpecker, Alta., (dealt with as a whole) and their employees, being members of the local union of United Mine Workers of America. The application was received from the employers; the number of employees concerned was estimated at 72, the persons indirectly concerned at 29.

The differences were said to relate to various demands of the union concerning wages and conditions of labour in the mines. A reply received from the men

concerned in the application represented the smallness of seam and other physical difficulties connected with the mines at Woodpecker, as being a reason for asking a higher schedule of wages than that being actually paid. The Board established by the Minister was constituted as follows: W. E. Bullock, appointed on the recommendation of the employers; Frank W. Sherman, appointed on the recommendation of the employees, and the Honourable Mr. Justice Stewart, of Calgary, Alta., chairman, appointed on the recommendation of the foregoing members. The Board was finally constituted on February 25, and a statement of its proceedings had not been received at the close of the month.

### IV.—BOARDS CONSTITUTED IN HAMILTON STREET RAILWAY AND DOMINION COAL COMPANY CASES.

THE Board established to adjust the differences between the Hamilton Street Railway Company (and allied companies) and its employees was completed during the month, being finally constituted as follows: His Honour Judge Monck, county judge of Wentworth, chairman, appointed by the Minister in the absence of a joint recommendation from the members appointed on the nomination of the parties concerned; Mr. W. Bell, K. C., Hamilton, Ont., appointed on the recommendation of the employers concerned; Mr. J. G. O'Donoghue, Toronto, appointed on the recommendation of the employees concerned. It was understood that the investigation before the Board should be-

gin at Hamilton during the first week in March.

The Board established in the case of the differences between the Dominion Coal Company and its employees was also completed during the month, being finally constituted as follows: Professor Shortt, Kingston, chairman, appointed in the absence of a joint recommendation from the members appointed on the nomination of the parties concerned; J. Dix Fraser, New Glasgow, N. S., appointed on the recommendation of the employing company, and Dr. A. S. Kendall, M. P. P., Sydney, N. S. \*

\* Word was received in the Department before going to press that our agreement covering every point in dispute had been considered before the board.]

V.—STATEMENT OF PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—COPY OF RETURN TO PARLIAMENT.

ON Thursday, February 27th, a return was laid on the table of the House of Commons by the Honourable the Minister of Labour, giving information respecting the operation of the Industrial Disputes Investigation Act, 1907, from the date of its enactment. The return was called for by an Order of the House dated December 12th, in response to a motion by Mr. Ralph Smith, M.P. The order called for a return showing:—

1.—The number of disputes dealt with under the Industrial Disputes Investigation Act, 1907, to the 1st of December, 1907.

2.—The dates at which the several applications for the operation of the Act have been received.

3.—Names of the parties concerned in the several disputes.

4.—Name of the party making the application.

5.—Locality of dispute.

6.—Number of persons affected.

7.—Nature of dispute.

8.—Names of members of Board of Conciliation and Investigation where same has been established.

9.—Date on which Board was established.

10.—Date of sittings of Board.

11.—Result of the reference of the dispute under Act.

Copy of the Return.

The return to parliament was as follows:—

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

Statement of Proceedings from March 22, 1907, to February 15, 1908.

Applications concerning disputes in mines and public utilities.						Application concerning disputes in industries other than mines and public utilities.	Total references under Act.
29						1	30
Concerning mines and smelters.			Concerning transportation and communication.			Disputes referred by consent of parties concerned under sec. 63 of I. D. I. Act 1907.	30
18			11				
Coal Mines	Metalliferous Mines		Railways	Shipping	Street Rys.		
15*	3		8†	2	1		
Strikes averted or ended.....	13**	3	8	2	1	1	28
Strikes not averted or ended.....	1††	0	0	0	0	0	1††
	14	3	8	2	1	1	29

\*In the case of three of these applications the disputes were settled before the Board had been constituted.

†The Boards were distributed among the various classes of railway employees as follows: Locomotive Engineers 1; Machinists 1; Firemen and Engineers 1; Freight Handlers 1; Telegraph operators 2.

\*\*There are still pending in connection with the various applications for investigations, viz: 2 in the case of coal mining disputes; 1 in the case of railways, and 1 in the case of street railways.

††Only one strike occurred in cases when a dispute had been referred to a Board, but in one instance a second Board established to investigate other differences between the same parties was in session when the strike was declared. Hence the difference of 1 between the sum of the figures in this column and the figures at the head of the column.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

Applications for Boards of Conciliation and Investigation.

A.—MINES, AGENCIES OF TRANSPORTATION AND COMMUNICATION, AND OTHER PUBLIC SERVICE UTILITIES.

MINING AND SMELTING INDUSTRY.

1.—COAL MINES.

Date of receipt application.	Parties to Dispute	Party making application	Locality.	No. of persons affected.	Nature of Dispute.	Names of Members of Board (C) Chairman; (E) Employer; (M) Men.	Date on which Board constituted.	Date of Receipt of report of Board.	
1907 April 8	† Cumberland Railway and Coal Company and employees.....	employer *	Springhill, N. S.....	1,700	Concerning employment of non-union workmen.....		1907		On April 1, employees went on strike. It was alleged by employers that they were under impression that the mines of Nova Scotia were exempt from provisions of Act. When it was explained Act applied to all Canada, employees returned to work April 8. Difficulty amicably settled. No Board constituted.
April 9	† Canada West Coal & Coke Company and employees...	employees	Taber, Alta.....	150	Concerning hours of labour.....				On April 1, employer locked out employees. Employer alleged that this was done in ignorance of provisions of Act. When informed of provisions of Act by department mines were re-opened on April 18. Subsequently an amicable settlement was effected through intervention of Mr. J. D. McNiven, Fair Wages Officer of Department. No Board constituted.

April 9 (†) Western Coal Operators Association and employees..	*employees	Concerning terms of joint agreement, including wages schedule and other conditions of employment..	Sir Wm. Mulock, K.C.M.G., (C)**	April 22	April 30, May 6	Employees went on strike in the several mines, while proceedings were pending in connection with the establishment of the Boards of Conciliation and Investigation, in consequence, it was alleged, of misunderstandings which arose through ignorance of the provisions of the Act. The Deputy Minister of Labour left for Fernie on April 19, to explain to the parties the provisions of the law. While in Fernie, the parties consented to his intervention as a conciliator under the Conciliation Act 1900 and an agreement was effected on May 4. The Boards convened at Fernie on April 30, but adjourned proceedings pending investigations by the Deputy Minister. On May 6 the Boards reconvened to receive from the parties a formal statement that the differences had been adjusted, a further cessation of work being thereby averted. An important feature of the settlement was the establishment of a standing committee of conciliation between the employers and employees, to which future differences were to be referred.

Pacific Coal Company.....	Bankhead, Alta.....	400				

†It is important to note in connection with these disputes that the *Industrial Disputes Investigation Act* was not assented to till March 22, 1907. It was some weeks later before copies of the Act were available for distribution. Its provisions in consequence were not fully known by the parties at the time these disputes occurred.

\*Applications for a Board were received also from the employers, parties to this dispute.

\*\*Appointed by the Minister under sec. 8, sub-sec. 4, of the I. D. L. Act, in the absence of a joint recommendation by the two members first appointed.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—Continued.

Date of receipt application.	Parties to Dispute	Party making application	Locality.	No. of persons affected.	Nature of Dispute.	Names of Members of Board (C) Chairman; (E) Employer; (M) Men.	Date on which Board constituted.	Date of Sittings of Board.	Date of Receipt of report of Board.	
May 8	Cumberland Railway & Coal Company and employees...	employees	Springhill, N. S.	1,700	Concerning payment for work in counter levels and stone in pillar work.....	The Hon. Mr. Justice Grahame (C) † P. S. Archibald, (E) R. B. Murray, (M)	May 17	May 23, 24, 29 and July 3 & 4.	July 13	Board being unable to effect a settlement by conciliation, presented a report signed by the Chairman and Mr. Archibald. Minority report was presented by Mr. Murray. The recommendations of the Board were not accepted by the employees. The strike which was threatened prior to the application for Board on May 8 was averted for the time being and took place on August 1, continuing until October 31, when the employees returned to work on the conditions recommended in the report of the Board. Amicable settlement, including agreement as to conditions of employment and establishment of a standing committee of conciliation effected between parties while Board was in process of constitution, strike being thereby averted.
May 27	Alberta Railway & Irrigation Company and employees of coal mines.....	employees	Lethbridge, Alta.	400	Concerning conditions of employment.....					
July 12	Cumberland Railway and Coal Company and employees.....	employees	Springhill.....	1,700	Concerning wages and other conditions of employment.....	His Honour Judge Patterson (C)** P. S. Archibald (E) R. B. Murray, (M)	July 27	July 31, Aug. 1, Sept. 9 and 12.	Sept. 21	Employees declared a strike on Aug. 1 in reference to question of payment of stone in pillar work, having refused to accept the recommenda-

tions of the Board appointed May 17 to deal with this subject. In virtue of this strike, proceedings before the Board were suspended until Sept. 9, when the Board sat for two days, and presented an interim report. The strike ended on October 31, the employees returning to work on the conditions recommended in the report of the first Board.

The Board presented a unanimous report, which though not formally accepted by the parties formed the basis of an agreement subsequently reached by them and reported to the Department, a strike being there-  
by averted.

The report of the Board was accompanied by a minority report by Mr. Sherman. Though neither report was formally accepted by the parties, a settlement was reached in consequence of the inquiry by the Board, and a strike thereby averted.

Differences adjusted, and agreement concluded before Board, dating from December 9, 1907, until March 31, 1909, a strike being thereby averted.

Union did not formally accept the recommendations of the Board, but the members, with the exception of a few, signed individual agreements to the employers, based on the recommendations of the Board, and a further cessation of work during the season was thereby averted.

On May 26 employees went on strike, alleging subsequently that they had no knowledge of the existence of the provisions of the Act. Mr. V. Dubreuil, Fair Wages Officer of the Department, was sent to Halifax to explain the provisions of Act. A Board was requested as a result of the explanations given, and while being constituted the dispute was amicably settled, Mr. DuBreuil lending the good offices of the Department as a conciliator. A further cessation of work was thereby averted as was also the necessity of further proceedings in connection with the establishment of the Board.

Concerning wages, Increase of 5 cents per hour demanded by men, 2½c offered by companies, but refused.....

†Appointed by the Minister under sec. 8, sub-sec. 2, of the I. D. I. Act in the absence of a recommendation from the party concerned.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—Continued.  
B.—INDUSTRIES OTHER THAN MINES, AGENCIES OF TRANSPORTATION AND COMMUNICATION AND OTHER PUBLIC UTILITIES

Date of receipt application.	Parties to Dispute	Party making application	Locality.	No. of persons affected.	Nature of Dispute.	Names of Members of Board (C) Chairman; (E) Employer; (M) Men.	Date on which Board constituted.	Date of Sittings of Board.	Date of Receipt of Report of Board.
Aug. 26.	Montreal Cotton Co., and employees.....	employees	Valleyfield, Que. ....	2,200	Conditions and wages.....	Hon. Mr. Justice Fortin, (C)** Duncan McCor- mick, K.C. (E) W. Paquette (M)	Sept. 4... Sept. 5, 10, 11, 16....	Sept. 5, 10, 11, 16....	Sept. 24.

F. A. Acland, Secretary of the Department, and Mr. V. DuBreuil, Fair Wages Officer, visited the scene of the dispute and explained the provisions of the Act to the parties with special reference to the sections enabling a dispute in any industry other than that of a mine or public utility to be referred, by mutual agreement between the disputing parties, to a Board of Conciliation and Investigation. As a result of the explanations and efforts at conciliation on the part of the officers of the Department, an application for a Board was forwarded to the Minister, the employees in the meantime returning to work on August 26. The Board was duly established, with the result that the differences were adjusted, and an agreement concluded before the Board dating from September 17, 1707, to be effective until May 4, 1908, and thereafter until either side was given a written notice of cancellation of the same. A feature of the agreement was the establishment of a permanent Committee of Conciliation, to which it was agreed that all subsequent disputes should be referred.\*

The employees went on strike on August 13, and the good offices of the Department were requested with a view to effecting a settlement. Mr.

\* This dispute was referred to a Board of Conciliation under section 63 of the Act, which provides that "in the event of a dispute arising in any industry or trade other than such as may be included under the provision of this Act, and such dispute threatens to result in a lockout or strike, or has actually resulted in a lockout or strike, either of the parties may agree in writing to allow such dispute to be referred to a Board of Conciliation and Investigation, to be constituted under the provisions of this Act." &c. Applications referring to disputes in this class of industry were received also in the cases of W. A. Marsh & Co., Boot and Shoe Manufacturers, Quebec; the Rosamond Woollen Company, Almonte, Ont.; the Eastern Townships Manufacturing Company; St. Hyacinthe, Que.; L'Association Internationale des Ouvriers en Fourrures, Montréal; the Davidson Manufacturing Company Montreal, and A. Gravel Lumber Company, Etchemin, Que.; but the parties concerned not agreeing to refer their differences for adjustment according to the provisions of the Act, no action was taken by the Minister.

\*\* Appointed by the Minister under sec. 8 sub-sec. 4, of the I. D. I. Act in the absence of a joint recommendation by the two members first appointed.

## VI.—ENQUIRY IN PARLIAMENT CONCERNING PROCEEDINGS UNDER THE ACT TO DATE.

THE following enquiry was made in the House of Commons on February 20, by Mr. E. M. MacDonald, M. P., Pictou.

1. How many applications for Conciliation Boards have been made under the Industrial Disputes Investigation Act since it became law?

2. How many Boards have been constituted under the Act?

3. How many disputes have been settled, without a strike, when the provisions of the Act have been invoked?

The following answers were given by the Hon. the Minister of Labour.

1. Twenty-nine in the cases of mines and other industries connected with pu-

blic utilities; one in the case of industries other than those connected with public utilities.

2. Twenty-six in the case of mines and other industries connected with public utilities.

3. All disputes referred to Boards with one exception have been settled, strikes being thereby completely averted or immediately terminated. The strike of coal miners at Springhill, which lasted from August 1st, to October 31st., is the only instance in which any cessation of employment has followed a reference to a Board under the Act. Four inquiries are now proceeding.

## VII.—ACT REVIEWED IN COURT OF APPEAL—COBALT CONVICTION SUSTAINED IN AMENDED FORM.

AN interesting appeal case, arising out of proceedings under the Industrial Disputes Investigation Act was decided in the Divisional Court at Osgoode Hall, Toronto, on February 13, when Mr. Justice Magee rendered judgment in the case of Rex vs. McGuire.

The case will be remembered as that in which one James McGuire, president of the Cobalt Miners' Union, No. 146, of the Western Federation of Miners, was sentenced to pay a fine of \$500, or in default of payment, to submit to six months' imprisonment. The case was heard at Cobalt, September 6 and 7, before Mr. R. H. C. Brown, local police magistrate, and was reported in the October issue of the *Labour Gazette* in an official communication to the Registrar of Boards of Conciliation and Investigation, in accordance with section 67 of the Industrial Disputes Investigation Act. In this communication, prepared and forwarded by the police magistrate himself, it was stated that McGuire was charged with inciting the employees of the Nipissing Mining Company to go on

strike, contrary to section 60 of the Industrial Disputes Investigation Act. The official statement of the case proceeded as follows: "McGuire was found guilty and fined \$500, and in default of payment, six months with hard labour. The proceedings before me were conducted by Crown Attorney Browning of North Bay. There was another charge against the said McGuire for inciting the employees of the Cobalt Lake Mining Company to go on strike; eleven charges against Robert Roadhouse for inciting employees of the different mines to go on strike, and two charges against William Hewitt for going on strike. In all these cases I have reserved decision pending the appeal to the High Court in the McGuire case."

The conviction was appealed, and was argued on appeal by E. E. A. DuVernet for the defendant, J. R. Cartwright, K. C., Deputy Attorney General for Ontario, for the Crown, and J. Lorne McDougall, Haileybury, for the informant. The motion to quash the conviction was made on the grounds, (1) that the magistrate had no jurisdiction; (2) that the only

remedy was to recover the penalty by civil action; (3) that the defendant should have been allowed the right of trial by jury; (4) want of evidence, etc. The principal objection argued was that the magistrate had no jurisdiction to try the case under the Industrial Disputes Investigation Act, 1907, as the Act was not invoked by either the mine owners or the workmen, and was not therefore in force at the time when the offence was alleged to have been committed. The Divisional Court, after hearing argument, reserved judgment, and on the 13th February, as stated, the conviction was amended as to the term of imprisonment in default of payment of fine, the sentence being reduced from six months to three months, and since the conviction was thus held to be defective, the Court decreed there should be no costs. The conviction was also amended as to the manner of statement of the offence charged, the conviction being held to be invalid in this respect also.

In the course of a somewhat exhaustive analysis of the Act, so far as its provisions bore upon the case under appeal, the Court made the following comments relating to the measure generally. "The legislation is tentative, broad and beneficial, and it cannot be expected to cover at once all the little difficulties which may be imagined to arise. No doubt, where legislation is passed to obviate or remedy some particular evil, or bring about some particular result, Courts have so construed the words of the enactment as to limit them to the purpose intended, although those words read literally as they stand might have a wider effect, and if allowed to apply beyond the intendment, bring about results not contemplated and unjust."

"\* \* \* \* \* The limited class of industries to which the Act applies affords the strongest indication of the purpose of Parliament, and the strongest reason why there should be no interruption of the work. They are 'mining properties' and 'agencies of public service utility.' As regards the latter, upon which the community depends for daily and constant necessary service, the public

interest in and need for their unbroken operation is manifest, and in the case of railways, Parliament set forth some of the evils resulting from lockouts and strikes in the preamble to the Railway Labour Disputes Act, 1903. The Criminal Code had previously made mere breaches of contract in the case of railways and other utilities criminal offences when to the public detriment. As regards coal mines, apart from damage to the same, the loss and privation which may result to manufacturers and consumers at large through wide sections from a general interruption of production is a matter of recent history and common knowledge. Parliament has seen fit, doubtless for good reasons, some of which readily occur to one, to include silver and other mines in the same category in this Act, and they cannot be separated in interpreting it.

"The right of temporary interference with private liberty of action by the prohibition of lockouts and strikes during the period of actual investigation as justified by the interest of the community being asserted by Parliament, there would be the less reason for non-interference before such investigation with a strike which, while it might be disastrous, could only be short-lived, in as much as it could be so soon ended by the opposite party invoking the aid of the Act. In so far as the public interest is concerned in any restriction, it justifies even more the temporary prohibition *ab initio* than a mere interruption of the strike. The policy of the Act therefore does not assist, but equally with its terms is opposed to the defendant's contention."

#### Text of Judgment.

In view of the fact that this is the first occasion on which a case under the Industrial Disputes Investigation Act, 1907, has been the subject of a judgment in the Superior Courts, it will be of interest to examine the grounds advanced by the Court for its decision, and the text of the judgment is therefore printed in full, being as follows;—

The conviction which it is sought to quash states the offence to be that of

“having unlawfully incited the employees of the Nipissing Mining Company to go on strike.” No reference is made in it to any statute, and it is conceded that unless it is warranted by “The Industrial Disputes Investigation Act, 1907,” there is no authority for it.

Section 60 of that Act declares that any one who incites “any employee to go or continue on strike contrary to the provisions of the Act” is guilty of an offence and liable to a fine. Then to find what is meant by going on strike we turn (in this case) to section 56, which makes it unlawful for any employer to declare or cause a lockout, or for any employee to go on strike on account of any dispute, prior to or during a reference of such dispute to a Board of Conciliation and Investigation under the provisions of the Act. For the meaning of these words, “employer,” “employee,” “dispute,” “lockout” and “strike,” we must turn to section 2.

Except in the single case of an agreement mentioned in section 63, that Act is limited in its operation to certain specified industries. In case of dispute between an employer and one or more of his employees which they are unable to adjust, the Act (s. 5 and 21) provides that either party may make application to the Minister of Labour for the appointment of a Board to which the dispute may be referred. It becomes the duty of such Board (s. 23) to endeavour to bring about a settlement, and to that end make enquiries and suggestions. If the parties agree to a settlement (s. 24) or agree to be bound by the Board’s recommendation (s. 62) then such settlement or recommendation may be made a rule of Court with whatever effect that may have. But if the parties do not do either, then the Board has no compulsory powers and can only report (under s. 25) the result of their investigations and efforts with their suggestions and recommendations to the Minister, who makes it public (under s. 29). Thereafter the parties are left to public opinion and their own good sense or obstinacy, and the Act declares (in s. 56) that nothing therein shall be held to restrain a lockout or strike in respect of any dispute which has been duly referred

to a Board and dealt with under section 24 or 25, that is by agreement of settlement or by a report. As it is “going on strike contrary to the Act,” which under s. 60 must not be incited, it is argued for the defendant that if the strike would not be contrary to the Act, that section could not apply. It is therefore upon s. 56 that the broadest question raised in this case turns in order to see if the strike is within it. It is said that in other pending cases the same point is involved. For the defendant, it is urged that although strikes are prohibited thereby prior to or during a reference, that only means provided either party has asked for a reference, and that this restrictive provision of the Act is only intended to take effect if the machinery of the Act is going to be used. On the other hand, it is said that Parliament manifestly intended that in these particular industries that conciliative and investigatory machinery must be used before the extreme and disturbing expedient of a lockout or strike can be resorted to by either party. Leaving aside the possibility even under the defendant’s contention of a man, before an application for a reference, inciting to a strike to be made after and in spite of either, let us look at the meaning of s. 56. It is not of moment to consider at what exact stage from the Minister’s decision to establish a Board down to their first meeting, a reference may be said to begin. Prior to that stage, there must not in these industries be a lockout or strike “on account of a dispute.” That seems plain enough, and to contemplate one and only one whole period of prohibition—extending from the dispute to the reference and to provide for peace during that interval. According to the argument for the defendant, that must be divided into two periods—one between the dispute and the application and the other between the application and the reference. I find nothing in the Act requiring or authorizing such a construction. If it be asked how can anything be said to be prior to something which never occurs, the answer is that the party himself can make it occur, and until he or some one does, his conduct is controlled.

It is true that section 56, even as inter-

preted by section 2, cannot be taken literally. It would, so taken, prevent a strike where fewer than ten employees are effected by a dispute. But as section 21 declares there cannot be a reference in such a case, it is manifest the prohibition before a reference cannot be intended.

It is true also that prohibition of a strike before an application might seem to be an undue interference with personal right in some cases. The Act does not declare all strikes to be illegal. On the contrary, it recognizes without reproaching their possibility, requires proof (s. 15) that "the necessary authority" to declare one has been obtained before application for a reference, declares (s. 56) that it does not prevent them as a last resort, and imposes a penalty (s. 57) if the employer seeks under cover of its provisions delay which would postpone that ultimate right. Sec. 590 of the Criminal Code also prevents prosecution for conspiracy in refusing to work. And yet in the case of an employer reducing wages, and the men desiring to cease work and the employer being ready to get others to take their places, and neither party wishing to invoke the Act, a strike would be prevented if s. 56 applied, and the men would be driven to make application for a reference, although they were not the parties disturbing the status quo, and although the Act, (s. 5) only purports to be permissive in allowing the application. Whether in view of the definition of "strike" in s. 2 as being "done as a means of compelling their employer to accept terms of employment," although its meaning is not limited, sec. 56 would apply, and whether refusing to work on new terms not accepted would be a strike, are other questions. But at least the words of the section are broad enough not to make a distinction between the period preceding and that after the application. Then, too, under s. 16, an application for a reference, if the men are all members of a trade union, must be signed by two officers of the union duly authorized by a majority vote at a meeting called for that purpose. If the employees interested cannot persuade a majority, perhaps not interested though obstinate, to make an application, what are they to do?

Are they to be deprived of a reference, and yet compelled to work on indefinitely on terms unsatisfactory to them, and from which there is no promise of relief? The construction asked by the defendants would obviate such a difficulty by making the application or notice of it the commencement of the restraint. Such a case may be unprovided for, and if it should arise, a solution would doubtless be found outside of legal construction. Discontinuance of work is not necessarily a strike, and membership in a union need not continue. The legislation is tentative, broad and beneficial, and it cannot be expected to cover at once all the little difficulties which may be imagined to arise.

No doubt, where legislation is passed to obviate or remedy some particular evil or bring about some particular result, courts have so construed the words of the enactment as to limit them to the purpose intended, although these words read literally as they stand, might have a wider effect, and if allowed to apply beyond the intendment, bring about results not contemplated and unjust. But here the question is, can it be said that the intent was to limit the sanction of the Act to a period depending upon the will of one party to the dispute? There is nothing in the Act to show that it is out of regard for the rights of the workmen that the employer is restrained from a lockout, or out of regard for the rights of the latter that the former are restrained from a strike. Neither may have broken any contract, and there may be no question of civil rights between them. Why then should the lawful conduct of either be restrained at the will of the other, and only during the time that will is operative? We must look deeper to find the purpose of the legislature before we can say their words should be limited to that purpose.

The prohibition in s. 60 against inciting to "continue" on strike, which might seem to contemplate an existing one, is accounted for in s. 63, which directs a strike in other industries to cease upon notification of the Minister's decision to refer. The title of the Act which was sought to be invoked against the defend-

ant sheds no light, for it refers to "settlement" as well as "prevention," and in any view the Act attempts both.

I find nothing in the Act to show that even the possibility of a strike in these industries before an application for reference was considered. On the other hand, an application before a strike is manifestly contemplated in s. 15, which requires the application to be accompanied by proof that strike will be declared. In the industries to which the Act applies, the prohibition is against coming on strike—in the others (s. 63) the strike is to cease. To give time for reference and adjustment, s. 57 requires thirty days' notice of any change affecting conditions of employment, and although that section is only levelled against disturbance during the reference the words used are significant, "the relationship of employer and employee shall continue uninterrupted by the dispute."

But outside of all this, the limited class of industries to which the Act applies affords the strongest indication of the purpose of Parliament and the strongest reason why there should be no interruption of the work. They are "mining properties" and "agencies" "of public service utility." As regards the latter, upon which the community depends for daily and constant necessary service, the public interest in and need for their unbroken operation is manifest, and in the case of railways, Parliament set forth some of the evils resulting from lockouts and strikes in the preamble to the Railway Labour Disputes Act, 1903. The Criminal Code had previously made mere breaches of contract in the case of railways and other utilities criminal offences when to the public detriment. As regards coal mines, apart from damage to the same, the loss and privation which may result to manufacturers and consumers at large through wide sections from a general interruption of production, is a matter of recent history and common knowledge. Parliament has seen fit, doubtless for good reasons, some of which readily occur to one, to include silver and other mines in the same category in this Act, and they cannot be separated in interpreting it.

The right of temporary interference with private liberty of action by the prohibition of lockouts and strikes during the period of actual investigation, as justified by the interest of the community being asserted by Parliament, there would be the less reason for non-interference before such investigation with a strike which, while it might be disastrous, could only be short-lived, inasmuch as it could be so soon ended by the opposite party invoking the aid of the Act. In so far as the public interest is concerned in any restriction, it justifies even more the temporary prohibition *ab initio* than a mere interruption of the strike. The policy of the Act therefore does not assist, but equally with its terms, is opposed to the defendant's contention.

To come then to this particular conviction. As already mentioned, it makes no reference to the Act. It is impossible to gather from it that the defendant has been guilty of any offence. Under some circumstances, it is by this Act made unlawful to incite some employees of some employers to go on strike, but not all employees nor under all circumstances.

Outside of the Act, even where it may be unlawful in the sense of being actionable, it might not be a criminal offence or even if a criminal offence, it might not be the subject of summary conviction.

There is nothing in this conviction to show that the Nipissing Mining Company is such an employer as the Act applies to, nor that its employees who were incited were such as there referred, nor that the strike was to be as required by s. 56, "on account of a dispute," and that such a dispute as the Act refers to, nor that the strike incited was to be "prior to or during a reference."

All these are essential matters necessary to be proved in order to constitute the offence. None of them are matters of qualification, exception or proviso as to which questions might be raised upon whom the onus of assertion or proof would lie. Yet upon all of them the conviction is silent.

I am leaving out of consideration any special meaning of the words "go on strike," and assuming that the Act does not limit the ordinary use of them to

which the object of enforcing compliance with demands or redress of grievances seems to be attached. It was argued that as the conviction states that the defendant "unlawfully" incited, that must mean that the strike would be unlawful, and therefore contrary to the Act, but such an effect cannot be given to it. There might be lawful or unlawful means, or unlawful but not criminal means, used to incite to do a lawful or non-criminal act. See *R. v. Goodfellow, C. A.*, 1906, 11 O. L. R., 359, and see *Paley on Conviction*, 8 Edn., 196 and 200, as to the use of the word "unlawfully" being insufficient to make up for the absence of the allegations to shew that the Act is unlawful.

The information stated the charge in the same way as the conviction does, but has the added words, "against the form of the statute in such case made and provided." These words were in all probability inserted and intended to refer, as they usually do, to the offence charged against the defendant, that is, to the incitement, and not to that which the employee was incited to. But they would not as to the incitement supply the circumstances necessary to make it an offence.

*R. v. James*, 1902, 1 K. B., 540; 2 *Hale Pleas of the Crown* 170, *Paley 8th, Edn.* 196; *ex parte Hopkins* 66 L. T. N. S. 53; *Rex v. Jukes*, 8 T. R. 536. But as they stand, the prosecution would be entitled to the benefit of the agreement that they immediately follow the words "to go on strike," and therefore should be taken to refer to them. At the hearing before the Police Magistrate, before any evidence was taken, this construction was claimed in answer to the objection of defendant's counsel, so that the defendant had notice that it was intended thereby to charge that the strike which he incited was contrary to the Act. I do not think that carries the matter any further against the defendant, for it should still have shown in what way the strike incited would be contrary to the Act,—but at least it comes nearer stating his offence in the words of the statute creating it, and he was not misled in fact upon his trial.

The word "employees," used in both the information and conviction, has, in

sections 56 and 60 of the Act, a precise and limited meaning given to it, as perhaps the word "strike" has not under section 2. This limited meaning of employees carries with it throughout the Act the nature of the work and of the employer's business, and the number of his employees. But though its use in the Act itself carries that precise meaning with it, the Act does not give the word that precise meaning in other documents, or warrant its being taken in other than the ordinary acceptation. There might well be employees such as civil engineers or mining experts not doing either clerical or manual work, and therefore not within either sec. 56 or sec. 60.

Even if we could apply sec. 523 of the Criminal Code, 1906, which declares that the description of any offence in the words of the Act creating the offence, or any similar words, shall be sufficient, this conviction does not do that, for it omits the essential assertion that the strike incited was contrary to the Act.

The conviction therefore on its face is bad, for not stating any offence. It cannot be said that what it alleged could not be an offence, but it might or might not be, and therefore it cannot be said that the defendant was convicted of one.

It was also objected to it that the Act did not authorize a summary conviction with imprisonment as a result of non-payment of the penalty, and that s. 61 merely directed that the procedure for enforcing the penalty should be that prescribed by Part XV of the Criminal Code, 1906, relating to Summary Convictions. Section 60 does not merely impose a penalty, but declares the inciting to be an offence, and the Interpretation Act, (s. 28,) declares that every Act shall be read as if an offence punishable on summary conviction were referred to as an offence and the Criminal Code shall apply. This objection cannot be given effect to.

The conviction imposes a fine of \$500 and in default of payment, imprisonment for six months. It was conceded by the Deputy Attorney-General that this term of imprisonment was unauthorized, and should not be more than three months under s. 739 of the Criminal Code.

The conviction thus being invalid in

two respects as it stands, what should be done with it? Section 65 of the Industrial Disputes Investigation Act, 1907, only cures defects of form or technical irregularity, even if this could be said to be a proceeding under the Act. The Criminal Code, however, in s. 723, provides that no information or conviction under Part XV shall be deemed insufficient for not naming or describing with precision any person or thing, and in s. 724, that no objection shall be allowed to any information for any alleged defect therein in substance or in form. And by s. 1124 no conviction shall be held invalid for any irregularity, informality or insufficiency therein if the Court, upon perusal of the depositions, is satisfied that an offence of the nature described in the conviction has been committed, over which the justice had jurisdiction, and that the punishment is not in excess of that which might be lawfully imposed, and even if the punishment be in excess, the Court has the like powers as under sec. 754 might be exercised by a Court on an appeal from the conviction. Under s. 1125, the generality of this curative provision is not restricted, but is to include inter alia the omission to negative circumstances which would make the Act complained of lawful. When we turn to s. 754 we find that the Court to which an appeal is brought is enabled, notwithstanding any defect in the conviction, and notwithstanding that the punishment is in excess of what is lawful, to hear and determine the charge upon the merits, and to modify the decision of the justice, and to make such other conviction or order as the Court thinks just, and may by such order exercise any powers which the justice might have exercised.

Now if under sec. 1124 we turn to the depositions, it was conceded before us that there was sufficient evidence to war-

rant a conviction under sec. 60 of the Act, 1907, if there could be a conviction under s. 56 before an application for a reference—it being admitted on the deposition that there was no such application.

That being so, should the amendment be made as regards the statement of the offence and the punishment? In *Rex v. Hayes*, 1903, 5 O. L. R. 198, where the conviction did not allege, as was necessary, that the defendant “knowingly” did what he was charged with, the Court considered that was not an irregularity, informality, or insufficiency within s. 1134 (then s. 889 of the Criminal Code of 1892) which could be amended, but in that case the depositions did not warrant the amendment, and so the conviction was quashed. In *Rex v. Boomer*, 10 O. W. R. 978; *Rex v. Crandall*, 27 O. R. 63; *Rex v. Smith*, 31 O. R. 224, and in other cases, the absence of evidence also prevented the necessity of deciding as to amending. In *Rex v. Meikleham*, 11 O. L. R. 366, an amendment was allowed in the statement of the offence in the conviction, the defendant having admitted facts making him guilty of the offence as amended. In that case the conviction as it stood did not necessarily charge an offence, neither does this conviction. That was the decision of a Divisional Court. The allegations omitted from this conviction are quite as essential as the *Scienter* in *R. v. Hayes* \* \* \* which was also before a Divisional Court, but as the conviction in the latter case failed also upon the evidence, I think *R. v. Meikleham* should be followed, and the conviction be amended, both as to the statement of offence and the term of imprisonment which should be reduced to three months.

As the conviction was defective, there should be no costs.

## LEGISLATION WITH REGARD TO CHILD AND FEMALE LABOUR IN CANADA.

**L**EGISLATION in Canada with regard to child and female labour has been framed for the most part with the object of restricting or protecting the employment of the classes named in certain specified branches of industry. Being, therefore, a matter which has to do largely with civil rights, the legislation in question falls, in accordance with the terms of the British North America Act, (sec. 92), within the jurisdiction of the provincial legislatures, and has not been directly dealt with by the Dominion parliament.

The particular branches of employment in which the regulation of child and female labour is provided for in Canada are, in the main, employment in factories and workshops, and in coal and metalliferous mines. In each of these branches, provisions of a distinctive character are in force. In nearly all, however, the clauses relating to child and female labour are very similar, and the two classes may be fitly taken up together. It will be well, therefore, to deal with the subject as a whole, in accordance with the following classification:

I. Legislation with regard to child and female labour in factories.

II. Legislation with regard to child and female labour in workshops.

III. Legislation with regard to child and female labour in mines.

IV. Miscellaneous and pending legislation with regard to child and female labour.

In the following article a resumé of existing legislation in the several provinces is given under each of the above headings.

### Employment of Women, Children and Young Girls in Factories.

The leading provisions defining the conditions under which women and children may be employed in factories in Canada may be briefly summarized as follows, according to the several provinces, viz., Ontario, Nova Scotia, New Brunswick,

Manitoba and Québec, which have enacted legislation of this character:\*

*Ontario.*—Under the Ontario "Act for the Protection of Persons Employed in Factories," (1) the term "woman" is defined as meaning "a woman of eighteen years and upwards." A "child" is stated to mean "a person under the age of fourteen years," and the term "young girl" as meaning "a girl of the age of fourteen and under the age of eighteen years." (2) In general terms, the employment of children in any factory, except one engaged in the business of canning or dewatering fruits and vegetables, and other work incidental thereto, is absolutely forbidden. (3) In factories considered by the Lieutenant-Governor-in-Council as dangerous or unwholesome, the employment of young girls, and of boys up to the age of 16, is likewise forbidden (4). In the case of canning factories, the employment of boys and girls under fourteen is allowed during the months of July, August, September and October, in the work of gathering and preparing fruits or vegetables; but the room in which the children are employed must be separate from that in which the cooking, dewatering or other processes connected with the preparation of the product are carried on. (5) Provisions with regard to evidence as to employment and age are included in the Act, it being incumbent on the defendant in any case where doubt arises to prove the age of the child or young girl. (6) Employment in a factory in this connection is defined as including the cleaning of machinery or any other process connected with manufacture (7).

The penalty for employing a woman, child or young girl in any establishment

(\* ) A special article dealing with legislation in Canada for the protection of persons employed in factories, as a whole, was published in Vol. I. of the *Labour Gazette*, pp. 104 and 182.

(7) R. S. O. Chap. 256, Sec. 7.

resulting in permanent injury to health is fixed at a maximum fine of \$100 or imprisonment for six months <sup>(8)</sup>.

It is in further definition of what is likely to cause permanent injury to health, that the provisions of the Act relating to hours of labour are inserted, the working day for women, children and young girls being limited to ten hours and the week to sixty hours, unless a different apportionment of the hours of labour per day is made for the purpose of giving a shorter day's work on Saturday. By an amendment passed in 1904, however, in no case are working hours in any one day to be later than half-past six in the evening, unless by special permission in writing by the inspector <sup>(9)</sup>. The employment of these classes at night is thus expressly forbidden. An hour is always to be allowed at noon, and if the factory inspector so directs, a separate room is to be provided by the employer in connection with the factory for use as a dining and eating room by the employees, the inspector being further allowed discretion to refuse entirely to give permission to any woman, child or young girl to take meals in any room in which a manufacturing process is being carried on <sup>(10)</sup>. This provision, however, does not apply where persons are employed at home or in dwellings which might by reason of the work carried on be considered to be a factory within the meaning of the Act, but in which mechanical power is not used, and the persons employed are members of the same family dwelling therein <sup>(11)</sup>. Certain exemptions from the foregoing provisions as to hours are also allowed in exceptional cases, as in the case of accidents to motive power or machinery, or where the custom or exigencies of certain trades entail loss of labour, or require longer hours to be worked. In no case, however, may a child or young girl be employed before six in the morning, or later than nine in the evening, or for more than twelve and a half hours on any one day, or for more than seventy-two hours in any one week.

The exemption, moreover, must not be extended over a larger period than thirty-six days in any year, and an additional intermission of not less than forty-five minutes is to be allowed during its continuance for the evening meal <sup>(12)</sup>. An additional safeguard in cases where this exemption is permitted is provided in a section requiring employers to keep a daily register of the hours worked by women, children and young girls under the exemption. A notice of the hours between which these classes may be employed must be hung up in a conspicuous place in the factory, according as the inspector directs <sup>(13)</sup>.

The safety of child and female employees in factories is provided by a section which prohibits children from being allowed to clean machinery while in motion. Young girls and women, further, are not to be allowed to clean mill gearing while in motion, and neither a child or young girl is to be allowed to work between the fixed and traversing part of any self-acting machine while in motion <sup>(14)</sup>.

A special provision is inserted in the Ontario Act carefully defining who is to be considered the employer in cases where the machine about which women or children are employed belongs to some one other than the operator of the factory, and is hired by the latter in connection with the manufacturing process. The law states that the employer in this case is to be considered as the operator of the factory. <sup>(15)</sup>.

That factories in which children and young girls are employed are regarded as on a quite different basis from others is shown by a provision which sets forth at length the exemptions from certain provisions of the Act, allowed in establishments in which these classes are not employed. A system of notice is required where employers desire to change from one basis to another, and such change cannot be made oftener than once every three months, unless for special causes. <sup>(16)</sup>

<sup>(8)</sup> R. S. O. Chap. 256, Sec. 8.

<sup>(9)</sup> O. S. 1904, Chap. 26, Sec. 2.

<sup>(10)</sup> R. S. O. Chap. 256, Sec. 9.

<sup>(11)</sup> R. S. O. Chap. 256, Sec. 26.

<sup>(12)</sup> R. S. O. Chap. 256, Sec. 11.

<sup>(13)</sup> R. S. O. Chap. 256, Sec. 13.

<sup>(14)</sup> R. S. O. Chap. 256, Sec. 14.

<sup>(15)</sup> R. S. O. Chap. 256, Sec. 25.

<sup>(16)</sup> R. S. O. Chap. 256, Sec. 26.

An amendment to the Act passed in 1904 requires young girls in factories during working hours to wear their hair rolled or plaited and fastened securely to their heads or confined in a close-fitting cap, so as to avoid contact with working machinery or moving shafting or material <sup>(17)</sup>.

Separate sets of water closets with separate approaches must be provided for male and female employees in all factories <sup>(18)</sup>. This provision is repeated in the Nova Scotia, New Brunswick and Manitoba Acts.

Parents of children or young girls employed in contravention of the Act are held liable to a maximum penalty of \$50.00, or imprisonment not exceeding three months <sup>(19)</sup>.

*Nova Scotia.*—The Nova Scotia Factories Act is in its essentials identical with that of Ontario. The age limit for employment in a factory is placed at fourteen years. "Child," "young girl" and "woman" are similarly defined <sup>(20)</sup>, and the same exception is made with regard to the application of the Act to private dwellings in which industrial processes are carried on <sup>(21)</sup>. The health of women and children is guarded under a similar penalty <sup>(22)</sup>. With regard to the hours during which they may be employed, contraventions of the Act in Nova Scotia are punishable by a fine of \$100.00 or imprisonment not exceeding six months. Ten hours a day and sixty hours a week are the maximum allowable, except in cases where a different apportionment of the hours per day have been made for the purpose of giving a shorter day's work on Saturday <sup>(23)</sup>. An hour is to be allowed for the noon day meal, and a dining and eating room is to be provided by employers, as in Ontario, if the inspector directs <sup>(24)</sup>. During July, August, September and October, boys and girls under fourteen may be employed

in connection with the fruit canning industry, in a room separate from that in which the cooking or canning of the fruits is carried on <sup>(25)</sup>. The prohibition of employment of girls under eighteen and boys under sixteen in dangerous or unwholesome establishments is provided for <sup>(26)</sup>. The burden of proof as to the age of a child lies, in Nova Scotia, with the defendant <sup>(27)</sup>, and the provisions as to what persons are to be deemed employees is the same as in Ontario <sup>(28)</sup>. An exemption from the hours above specified is permitted, as in Ontario, in cases of accident to machinery or motive power, or where the exigencies of certain trades demand it, though no woman, child or young girl may be employed before six in the morning or after nine in the evening, and in no case for more than twelve and a half hours in any one day, or seventy-two and a half hours in any one week, the exemption not to comprise more than thirty-six days in any twelve months <sup>(29)</sup>. Provision for a time allowance for a second meal and with regard to the keeping of a register by the employer, and the posting of notices by the inspector are the same as in Ontario <sup>(30)</sup>. With regard to the personal safety of employees, young girls and women are not allowed to clean mill gearing in motion, nor are the former to be permitted to work between the fixed and traversing part of any self-acting machine while in motion <sup>(31)</sup>. As in Ontario, parents of children or young girls employed in contravention of the Act are held liable to a maximum penalty of \$50.00 or to imprisonment not exceeding three months. <sup>(32)</sup>

*New Brunswick.*—The New Brunswick Factories Act, passed in 1905, defines the term "woman" as "a woman over eighteen years of age," "child" as "a person under the age of fourteen years," and a "young girl" as "a girl above the

age of fourteen and under the age of eighteen years" (33). Children are absolutely forbidden to be employed in factories except in special cases authorized in writing by the inspector. (34), and in dangerous or unwholesome establishments the employment of girls under the age of 18 years and of boys under the age of 16 is forbidden (35). Women and young girls are not to be employed for more than 10 hours a day or 60 hours per week, unless a different apportionment of the hours is made for the purpose of giving a shorter day's work on Saturday. An allowance of one hour each day for meals is also obligatory (36), and if employment is continued to a later hour than 7 p. m., an allowance of another 45 minutes for an evening meal must be made between 5 and 8 p. m. o'clock (37). The exceptions allowed to the above rules with regard to hours are similar to those in Ontario, except that the latest hour to which a woman or young girl may be employed is 10:30 in the evening, instead of 9 (38), and the maximum total of hours of labour per day and per week is 13½ and 81 respectively, instead of 12½ and 72½ respectively as in Ontario (39). The provisions with regard to the keeping of a record of extra hours worked are also identical. A notice of the hours between which young girls and women may be employed must be hung up conspicuously in the factory, as the inspector may require (40). A young girl or woman is not to be allowed to work between the fixed and traversing parts of any self-acting machine while the same is in motion by mechanical power (41). In the section of the Act which deals specifically with the safeguarding of machinery, the employment of a child in the management or control of an elevator is expressly forbidden, a provision not found in the

Ontario Act (42). The terms of the Act relating to young girls being, during meal time, employed in a factory, or allowed to remain in a room thereof, are not to apply to persons employed at home in dwellings in which mechanical power is not used, and in which the only persons employed are members of the family, living therein. Parents of children or young girls employed in contravention of the Act are liable to a maximum fine of \$25 and costs, with the alternative of two months' imprisonment (43).

*Manitoba.*—The Manitoba Factories Act, like those of Nova Scotia and New Brunswick, is very similar in general effect to that of Ontario with regard to the employment of child and female labour, though as originally framed it was more stringent in certain particulars. The expression "child" was originally defined as "a person under the age of sixteen years," and a "young girl" as a girl of the age of sixteen years and upwards and under the age of eighteen years. By an amendment of 1904, however, a "child" was defined as a male person under the age of fourteen years and a female person under the age of fifteen years, while a "young girl" was defined as a girl of the age of fourteen years and under the age of eighteen years (44). The term "woman" has the same significance as in Ontario. The prohibition against the employment of these classes has no exception named, as in the Ontario statute, to cover the business of canning or dessicating fruits (45). The employer, as in Ontario, is held liable where the health of a child is likely to be injured. though the penalty is less severe, being only \$50 (46). In the case of young girls, the penalty is the same, viz., \$100 (47). The same regulations are in force in the two provinces with regard to the employment of boys and girls in dangerous or unwholesome factories (48), with regard

to the evidence of employment, and the requiring of notices of changes in the system of employment<sup>(49)</sup>. The several sections of the Act placing restrictions on hours of labour in factories apply only to young girls and women in Manitoba. These classes, under the latest amendment to the law, are not to be employed for more than nine hours in one day, or more than fifty-four in one week, unless for the purpose of getting a shorter day on Saturday. Originally, the day was limited to eight hours and the week to forty-eight hours. An hour during noon is to be allowed for meals, and the provision with regard to the taking of meals within a factory is the same as that of Ontario<sup>(50)</sup>. The circumstances under which exemptions from these provisions are allowed are identical with those named in the Ontario Act, though in Manitoba no young girl or woman may be employed before seven in the morning or after 10 in the evening, or for more than twelve hours in any one day, or seventy-two and a half hours in any one week, with similar provisions as to time allowance for the evening meal, the keeping of a register by employers and the posting of notices by inspectors<sup>(51)</sup>. The provisions of the Manitoba Act with regard to the safety of employees are also identical with those of the Ontario statute, except in that the restrictions, as in the case of hours of labour above, apply only to young girls and women, and do not specifically refer to children<sup>(52)</sup>. In Manitoba the provision exempting the application of the Act to private dwellings is made to apply to all other provisions of the Act, and not, as in Ontario, to certain specific provisions<sup>(53)</sup>.

*Quebec.*—The Quebec Factories Act, as passed in amended form in 1894, and as subsequently altered<sup>(54)</sup> differs somewhat in general plan from the similar legislation of the other provinces, though in many

<sup>(54)</sup> Q. S. 1894, Chap. 33; 1903, Chap. 30; 1907, Chap. 39.

important particulars its provisions are identical. The word "child" is defined as meaning "a boy under fourteen years of age," the words "young girl" as meaning "a girl over fourteen years and under eighteen years of age," and the term "woman" as meaning "a woman of eighteen years and upwards." With regard to the employment of children, women and young girls and the hours of labour, such employment in establishments classified by the Lieutenant-Governor-in-Council as dangerous, unwholesome or inconvenient, is prohibited unless the age of employees is over sixteen years in the case of boys and over eighteen years in the case of girls and women. In all other establishments, the age limit for boys was originally placed at twelve years and for girls at fourteen years, and employers were required to furnish the inspector with a certificate of age signed by the parents or lawful guardians of any child in his employ. These provisions were made more stringent in 1904 and again in 1907, the limit being finally placed at fourteen years for both boys and girls, and inspectors being empowered to require verification of certificates by affidavit<sup>(55)</sup>. Additional means of insuring that the age limit of children shall not be exceeded is secured by a provision allowing the inspector to have an examination of the child made by a physician, whose advice as to age or physical fitness may be made a basis for the discharge of a child<sup>(56)</sup>. A very important provision was added to this portion of the law in 1907, when the employment of a child or young girl less than 16 years old, not able to read and write, was forbidden unless in attendance continually at a night school as long as the employment continues or the inability in question exists. At the same time, it was forbidden to receive any child or young person into an industrial establishment as an employee if unable to read and write or without a certificate from the principal or teacher of a night school to the effect that the young per-

<sup>(55)</sup> Q. S. 1894, Chap. 33 Sec. 3023; 1907, Chap. 39, Sec. 2.

<sup>(56)</sup> Q. S. 1894, Chap. 33; Sec. 3024; Stat. 1907, Chap. 39, Sec. 2.

son is attending the same. <sup>(57)</sup>. Generally speaking, the hours of labour for a child or young girl is limited to ten per day and sixty per week, with an hour allowed at noon for meals. In no case, moreover, may the working day for this class begin before six in the morning or end after nine at night. The clause allowing exemption to the above provisions takes account specifically only of interruptions to regular work from accidents to motive power or machinery, no reference being made to trade exigencies. The period for the above exemption is limited to six weeks, during which no longer than twelve hours a day or seventy-two hours a week must be worked <sup>(58)</sup>. The names, ages and exact addresses of women and children employed must be kept in a register by the employer, and the period of each day and week noted during which the children are employed, and the hour at which they commence and finish working <sup>(59)</sup>. These registers are to be always at the disposal of the inspectors, and the penalty for refusing to keep a register by the employer is placed at \$30.00, with imprisonment for three months in default of payment <sup>(60)</sup>. Parents and guardians of children employed in contravention of the Act are liable to a fine of \$50.00 or imprisonment not exceeding three months in default of payment, unless this employment has been without their consent and is not due to negligence on their part <sup>(61)</sup>.

#### **Tabular Statement of Leading Provisions of Factories Acts with Regard to Child and Female Labour.**

With a view of showing at a glance the leading provisions of the different provincial Factories Acts above mentioned, with regard to the employment of women, children and young girls in Canada, the accompanying tabular statement has been

prepared, the more important provisions of the several laws being briefly set forth by provinces under a number of headings. It will be seen from the table that all five Acts contain the same definition of the terms "woman" and "young girl," and fix the same age limit for the employment of children in dangerous or unwholesome establishments. In defining the term "child," the statutes of Nova Scotia, New Brunswick, Ontario and Manitoba are identical; in Quebec, the term is narrowed to include only boys under fourteen years of age. The Quebec statutes, however, fixes the same limit for employment in ordinary establishments as in Nova Scotia, New Brunswick and Ontario, viz., fourteen for both sexes; while in Manitoba the limit is fourteen for boys and fifteen for girls. Nova Scotia and Ontario make exemption from this age limit in the case of fruit or vegetable canning establishments. With regard to maximum hours of labour allowed in any case for women, children and young girls, Nova Scotia, New Brunswick, Ontario and Quebec are identical in placing these at sixty per week. In Manitoba the maximum is fifty-four per week for young girls. With regard to exemption, from these provisions, the Quebec Act does not specifically allow trade exigencies to count in this connection. Where longer hours are permitted, the working day must be confined between 6 a.m. and 9 p. m., except in Manitoba and New Brunswick, where the limits set are from 7 a.m. to 10 p.m. and from 6 a.m. to 10:30 p. m. respectively. The maximum week is seventy-two and a half hours in all of the provinces except in Quebec, where it is seventy-two, and in New Brunswick, where it is 81. The Quebec Act differs from the others also in not including specific provisions for the protection and safety of children and young girls about machinery; and neither the Quebec or the New Brunswick Act specifically mention a penalty to cover cases in which the health of children or young girls is threatened with permanent injury by conditions arising out of their employment.

### Employment of Women, Children and Young Girls in Shops.

Four of the provinces of the Dominion, namely, Ontario, Nova Scotia, Manitoba and British Columbia have enacted legislation regulating employment in shops and places other than factories, and in all cases express reference is made to conditions under which children or young persons may be employed in these establishments. A brief summary of the leading provisions of this legislation is as follows:—

*Ontario.*— In the Ontario Shops Regulation Act the terms “woman”, “child” and “young girl” are interpreted as in the factories act, namely, as “a woman of eighteen years and upwards” “a person under the age of fourteen years” and as “a girl of the age of fourteen years and under the age of eighteen years” respectively. <sup>(62)</sup>

The age limit for employment in shops is placed at ten years of age <sup>(63)</sup>.

Explicit regulations are laid down with regard to the hours of labour of women, children and young girls. The working day for these classes must not begin before seven in the morning or continue after the hour of six in the evening, except on Saturdays or on a day preceding a statutory holiday, when work may be continued until 10 o'clock in the evening. An hour for the noon-day meal is to be allowed, and where employment is prolonged after six in the evening an additional intermission of forty-five minutes for an evening meal is provided for. Work may be prolonged until ten in the evening upon one day of the week other than Saturday as an alternative to the longer employment on Saturday, in which case employment must cease on the Saturday at six in the evening. In view of the demands of the Christmas trade, the provisions of the Act are not operative between December 14th and 24th in each year. <sup>(64)</sup>

Clauses are inserted in order to prevent children and young girls employed

for a full number of hours in factories from working after hours in shops, though these classes may after working a certain portion of the day in a factory complete the number of hours allowed under the factories act of employment in shops <sup>(65)</sup>. A fine ranging from \$10.00 to \$25 may be imposed on an employer for employing persons contrary to these provisions, with imprisonment in default of immediate payment for a period of from one to three months <sup>(66)</sup>.

A register of women, children and young girls must be kept in shops where these classes are employed and must at all times be open to the factory inspector <sup>(67)</sup>.

Female employees in shops are to be provided with seats for use when not necessarily engaged in the duties of the shop, and no rule, threat or other contrivance way be employed to prevent the use of these seats. The penalty named is a fine of \$10 to \$25 with costs or one to three months imprisonment <sup>(68)</sup>.

The burden of proof with regard to the age of a child or young girl lies with the defendant in any action brought under the Act <sup>(69)</sup>.

The exceptional care taken for the protection of women and children under the Act is shown by the fact that the provision which states that the employer shall not be liable in respect of a repetition of the same offence from day to day to any larger fine than that fixed by the act, makes express exception of cases where the offence is one of employing two or more children, young girls or women contrary to the provisions of the Act <sup>(70)</sup>.

*Nova Scotia.*—In Nova Scotia a “young person” under the Shops Act <sup>(71)</sup> is defined as meaning “any boy under the age of fourteen and any girl under the age of sixteen years, not including persons ordinarily employed as drivers of delivery wagons or vehicles”. The

<sup>(62)</sup> R. S. O. Chap. 257, Sec. 8.

<sup>(63)</sup> R. S. O. Chap. 257, Sec. 9.

<sup>(64)</sup> R. S. O. Chap. 257, Sec. 10.

<sup>(65)</sup> R. S. O. Chap. 257, Sec. 11.

<sup>(66)</sup> R. S. O. Chap. 257, Sec. 29.

<sup>(67)</sup> R. S. O. Chap. 257, Sec. 30.

<sup>(71)</sup> N. S. Revised Statutes, Chap. 124.

<sup>(68)</sup> R. S. O. Chap. 257, Sec. 4.

<sup>(69)</sup> R. S. O. Chap. 257, Sec. 6.

<sup>(70)</sup> R. S. O. Chap. 257, Sec. 7.

term "woman" is not defined, and female labour as such is taken special cognizance of only to the extent that employers are requested to provide seats in shops, as in Ontario. <sup>(72)</sup> The provisions of the act do not apply to shops in which the only young persons employed are members of the family dwelling in the building of which the shop forms part <sup>(73)</sup>. The maximum hours of employment allowed are 72 in any one week, made up of 14 on Saturdays and 12 on other working days; this includes meal hours. Other apportionment may be made to give shorter hours on any one day. One hour is allowed for the noon-day meal and 45 minutes for another later meal <sup>(74)</sup>. The penalty for violation of the above provision is a maximum fine of \$20 with imprisonment for one month in default of payment, both for employers and for parents who wilfully connive at a violation of the Act <sup>(75)</sup>. A notice referring to the provisions of the Act and stating the number of hours in the week during which a young person may be employed must be posted in every shop in which young persons are employed <sup>(76)</sup>. Employers charged with offences against the Act may have the person actually guilty summoned, and upon proving such person to be guilty, shall be exempt <sup>(77)</sup>. The burden of proof as to the age of any young person lies on the defendant in any action <sup>(78)</sup>. A person shall not be liable for a repetition of an offence against the Act from day to day beyond the largest penalty or imprisonment, except for offences which occur after an information has been laid, or where the charge is that of employing two or more young persons contrary to the Act <sup>(79)</sup>. In summary proceedings for offences under the Act, the information must be laid within one month after the commission of the offence. The name of the osten-

sible employer or the title of the firm is regarded as sufficient <sup>(80)</sup>.

*Manitoba.*—The Manitoba Act defines the expression "young person" as meaning any boy under the age of fourteen years and any girl under the age of sixteen years, but does not include persons whose usual employment about a shop is that of a driver of a delivery wagon <sup>(81)</sup>. These classes must not be employed in or about a shop for more than seventy-four hours in any one week, or for more than fourteen hours including meal times on Saturday, or for more than twelve hours including meal times on other days, unless a different apportionment of hours has been made for the purpose of giving a shorter day's work on some other day of the week. An hour is to be allowed for the noon-day meal, and not less than forty-five minutes for an evening meal, between five and eight o'clock, in cases where employment is prolonged after seven in the evening <sup>(82)</sup>. A fine of \$20.00 may be imposed on employers guilty of an infringement of this provision, the alternative in default of immediate payment being imprisonment not to exceed one month <sup>(83)</sup>. The parent who consents to the employment of a young person, contrary to the Act is liable to a similar penalty, and a similar penalty is likewise provided for failure on the part of the employers in providing suitable seats for female employees <sup>(84)</sup>. A notice of the above provisions of the Act with regard to hours must be exhibited in a conspicuous place in every shop in which any young person is employed. These provisions of the Act do not apply to shops in which the only persons employed are members of the same family who dwell therein, or in a house to which the shop is attached <sup>(85)</sup>. The burden of proof with regard to the age limit of children lies with the defendant in any action <sup>(87)</sup>.

\* Including meal hours.

A provision with regard to the repetition of offences similar to that mentioned in the Ontario law above is included in the Manitoba Statute, while the section relating to procedure is similar to that of Nova Scotia <sup>(88)</sup>.

*British Columbia.*—The British Columbia Shops Regulation Act, passed in 1900 <sup>(89)</sup> is similar in outline to those of Manitoba and Ontario, though different in a number of important particulars. A "young person" is defined as "any boy or girl under the age of sixteen years" <sup>(90)</sup> this being a more lenient application of the Act than in either of the other provinces. No age limit, however, is stated as in Ontario, under which employment is absolutely forbidden, but in the matter of hours of labour the restrictions of the British Columbia Act, limiting the total to 11 in one day on the first five days of the week, 13 on Saturdays and 66½ for the entire week, are lower than in either Manitoba or Ontario <sup>(91)</sup>. Provision is made for an allowance of one hour for the noon-day meal each day, and in cases where employment is continued later than 7 p. m., an allowance of 45 minutes for another or evening meal, between the hours of 5 and 8 p. m., is made <sup>(92)</sup>. The penalty imposed on employers for infraction of the provision with regard to hours is a maximum of \$50 and a minimum of \$20 with costs, for each person employed, with imprisonment not exceeding one month in default of immediate payment of such fine and costs <sup>(93)</sup>. Parents of children employed in contravention of the Act are liable to a similar penalty. <sup>(94)</sup> Employers in shops where young persons are employed are, if required, to exhibit in a conspicuous place a notice referring to the provisions of the Act and stating the number of hours in the week during which a young person may be lawfully employed <sup>(95)</sup>. The employer of young persons, however, is given power to

exempt himself from the above penalties if he can prove that another person than himself is the actual offender, and that the offence was committed without his knowledge, consent or connivance <sup>(96)</sup>. In cases, moreover, where the only young persons in an establishment are members of the same family, dwelling in the same building, or members of the employer's family, dwelling in a house to which the shop is attached, the preceding provisions do not apply <sup>(97)</sup>. The proof of the age of the young person lies upon the defendant in any action. The restriction as to cumulative penalties is similar to that contained in the Ontario and Manitoba Acts, the offence of employing two or more young persons contrary to the Act being excepted from the restriction <sup>(98)</sup>. Separate water closets with separate approaches for male and female employees in shops are enjoined in the British Columbia Act <sup>(99)</sup>.

#### Tabular Statement of Leading Provisions of Shops Acts re Child and Female Labour.

The accompanying tabular statement will show, in a form permitting of easy reference and comparison, the provisions of the different shops regulation acts in force in Canada. It will be seen that while the age limit under which employment is regulated is highest in British Columbia, Ontario is the only province in which a limit is set below which employment is prohibited. Penalties for contraventions of the Act are also highest in British Columbia, and the regulations as to hours most lenient, though Ontario alone defines the hours within which employment must be carried on, and ensures that factory work shall not be engaged in to an excessive degree in conjunction with employment in a shop.

#### Employment of Women and Children in Mines.

All of the provinces of the Dominion, with the exception of New Brunswick,

<sup>(99)</sup> B. C. Statutes, 1900, Chap. 34, Sec. 26.

Prince Edward Island and Manitoba, have enacted legislation with regard to child and female labour in mines. In Ontario and Quebec the provisions have reference only to metal mines, and in Saskatchewan and Alberta only to coal mines. In Nova Scotia and British Columbia both coal and metal mines come within the scope of the law with regard to the employment of these classes. A summary of the various enactments is as follows:

*Nova Scotia.*—In Nova Scotia, no boy under the age of twelve years may be employed in or about a coal mine, whether above or below ground<sup>(100)</sup>. Further, no boy of twelve years, or under the age of sixteen may be employed, either below or above ground, for more than fifty-four hours a week, or more than ten hours a day, except in case of accident or emergency. A week in this connection is deemed to begin at midnight on Saturday night and to end at midnight on the succeeding Saturday night. Boys of the age specified, moreover, must be able to read and write, must be familiar with the rules of arithmetic as far as and including division, and must furnish a certificate to that effect from a duly licensed teacher. A provision is added requiring teachers to grant the certificate mentioned after examination without fee upon the application of any boy desiring to seek employment in a coal mine<sup>(101)</sup>.

In the metalliferous mines of Nova Scotia the employment of boys under twelve years of age is also prohibited, whether above or below ground. Boys over twelve and under the age of sixteen may not be employed for longer than ten hours per day, or fifty-four hours per week, the term "week" being defined as in the Coal Mines Regulation Act. A similar proviso with regard to an educational test, as in the Coal Mines Act, is in force<sup>(102)</sup>.

Under both the Coal and Metalliferous Mines Acts, the employment of persons other than males of more than eighteen years of age is forbidden about engines

in shafts or levels, though in cases where such an engine is worked by an animal, the driver of the animal may be of fourteen years or over. The latter clause, however, does not apply to operations known in the mines as counter or back balances<sup>(103)</sup>. Misrepresentation as to age on the part of parents or guardians is provided against<sup>(104)</sup>.

*British Columbia.*—The Metalliferous Mines Act of British Columbia prohibits the employment of boys under twelve and of women and girls underground. Boys under sixteen may not be employed underground for more than ten hours a day or fifty-four hours a week. A person in charge of hoisting machinery must be a male of at least eighteen years of age. A register must be kept of all boys of the age of twelve and under the age of sixteen, and of all such young persons under the age of sixteen employed underground, and of all women and children employed above ground<sup>(105)</sup>.

The provisions of the Coal Mines Regulation Act of British Columbia with regard to the employment of child or female labour are more stringent in a number of particulars than the above. The employment of boys under 12 years of age in any capacity in or about a mine is forbidden, and women and girls of any age may not be employed below ground<sup>(106)</sup>. A boy of the age of thirteen and under the age of fourteen may be employed below ground, but only in mines in which the Minister of Mines, by reason of the thickness of the seams, considers such employment necessary. In any case the boy may not be so employed for more than five days in any one week, nor for more than six hours in any one day<sup>(107)</sup>. A boy of twelve years of age and under the age of fourteen is not allowed to be employed underground for more than thirty hours a week, or more than six hours a day. Moreover, there must be an interval in the employment of boys or young

<sup>(103)</sup> R. S. N. S. Chap. 19, Page 224, and Chap. 20, Sec. 19.

<sup>(106)</sup> R. S. N. S. Chap. 19, Sec. 58, and Chap. 20, Sec. 27.

<sup>(105)</sup> R. S. B. C. Chap. 135, Secs. 12-14.

<sup>(106)</sup> R. S. B. C. Chap. 138, Secs. 3 and 4.

<sup>(107)</sup> R. S. B. C. Chap. 138, Sec. 5.

<sup>(100)</sup> N. S. Statutes, 1902, Chap. 6, Sec. 1.

<sup>(101)</sup> R. S. N. S. Chap. 19, Secs. 17 and 18.

<sup>(102)</sup> R. S. N. S. Chap. 20, Secs. 5, 6 and 7.

persons of not less than eight hours between the period of employment on Friday and the period of employment on the following Saturday, and in other cases of not less than sixteen hours between each period of employment. Employment is deemed to begin at the time of leaving the surface and to end at the time of return to the surface, and a week is deemed to begin at midnight on Saturday night and to end at midnight on the succeeding Saturday night. No boy under fourteen years of age is allowed to work below ground for more than six hours in any one day<sup>(108)</sup>. As to the employment of women, young persons and children above ground in connection with mines, it is explicitly provided that no child under the age of twelve years may be so employed; that the regulation of the Act with respect to boys under fourteen years of age shall apply to every child so employed; that the regulations of the Act with respect to male young persons under fourteen years of age shall apply to every woman and young person so employed; that no woman, young person or child be employed between the hours of nine at night and five on the following morning, or on Sunday, or after two o'clock on Saturday afternoon, and that intervals for meals be allowed to women and children amounting in the whole to not less than half an hour during each period of employment which exceeds five hours and not less than one hour and a half during each period of employment which exceeds six hours. The provision<sup>\*</sup> forbidding employment after two o'clock on Saturday afternoon may be waived by the Minister of Mines in writing;<sup>(109)</sup>. A register of boys and male young persons employed in mines must be kept<sup>(110)</sup>. The immediate employer of any boy or male young person under fourteen years of age must, before employing such boy or person, report the fact to the manager of the mine or his agent<sup>(111)</sup>. Young persons under eighteen years of age are not to be employed about hoisting engines or ma-

chinery, but where such machinery is worked by an animal, the driver may be twelve years of age or over<sup>(112)</sup>. Penalties for the contravention of the above provisions and for misrepresentation by parents or guardians are provided<sup>(113)</sup>.

*Saskatchewan and Alberta.*—Prior to the creation of the Provinces of Saskatchewan and Alberta, the Coal Mines Regulations Ordinance of the Northwest Territories forbade the employment of boys under twelve years of age and of girls and women of any age in the workings of a coal mine<sup>(114)</sup>. A register showing the age and address of employees in such mines was required for production at any reasonable time when requested by a mine inspector. Persons in charge of any engine or machinery used about the shaft of a mine were required to be males of at least eighteen years of age. Penalties for non-compliance with these provisions and for misrepresentation as to age by parents or guardians are added.<sup>(115)</sup>

These provisions still remain in effect without amendment in the Province of Saskatchewan. In Alberta, however, a Coal Mines Act was passed in 1906 which, in addition to the provisions cited above, prescribed an educational test in the case of boys over the age of twelve and under the age of sixteen. In order to be employed in or about a coal mine in Alberta, boys under sixteen must be able to read and write, and must have an elementary knowledge of arithmetic under certificate of a Provincial school teacher, provision being made for the holding of examinations by the latter without fee with a view to the granting of the certificate in question<sup>(116)</sup>.

*Ontario.*—The Ontario Mines Act prohibits the employment underground in mines of boys under fifteen years of age. Except in mica trimming works, no girls or women are to be employed at mining work, or allowed to be for the purpose of employment at mining work about or

<sup>(116)</sup> Alberta Statutes, 1906, Chap. 25, Secs. 6 and 7.

near a mine. <sup>(117)</sup>. Boys of the age of fifteen, and under seventeen years must not be employed in a mine for more than eight hours in any one day or for more than forty-eight hours in any one week, and are not to be allowed below ground at all on Sundays. In reckoning this period of employment, the time between leaving and returning to the surface is to be considered as a period of employment. The term "week" means the period between midnight on Sunday night and midnight on the succeeding Saturday night <sup>(118)</sup>. A register of the boys of this age employed must be kept by the owner of the mine or agent of every mine, and to be open for inspection to the inspector, and a special report by the immediate employer of every boy of the age specified must be made to the owner or agent of the mine of his intention to employ the boy in question <sup>(119)</sup>.

Additional safeguards are provided by the Act as to the age of persons to be employed in connection with certain machinery. Engines, windlasses, or other machinery employed in moving persons down or along shafts must be in charge of a male of at least twenty years of age, except when the engine is worked by an animal, in which case the driver of the animal must not be under sixteen years of age <sup>(120)</sup>. The responsibility for contravention of any of the above provisions is laid upon both the owner and the agent of the mine <sup>(121)</sup>. Parents who make false representations as to the age of their children employed about an engine or windlass as above are liable to the penalty prescribed for violation of the Act, and the boy must be immediately discharged <sup>(122)</sup>.

*Quebec.*—No women or girls may be employed in the working of any mine

<sup>(122)</sup> R. S. O. Chap. 36, Sec. 65; Statutes 1906, Chap. 11, Sec. 197.

in Quebec, and no male child under fifteen years of age in the underground works of any mine or quarry. For male children fifteen years of age but under seventeen years of age, the working week must not consist of more than forty-eight hours, and must not include any Sunday labour. Boys of less than twenty are not to be employed in working machinery in or near a mine unless the machinery is put in motion by horses or other animals, in which case their driver may be sixteen years of age <sup>(123)</sup>. The maximum penalty imposed for violation of the above is placed at \$20 and costs for each offence <sup>(124)</sup>.

The New Brunswick and Manitoba Mines Acts have no provisions with regard to the employment of women and children.

#### **Tabular Statements of Leading provisions of Coal and Metalliferous Mines Acts with Regard to Child and Female Labour.**

In the accompanying tabular statements the leading provisions of the law with regard to the employment of child and female labour in mines are set forth in a form admitting of easy comparison. It will be seen that female labour is not mentioned in the Nova Scotia Acts. Of the different coal mining regulation acts, the most stringent is that of British Columbia. With regard to metalliferous mining, there is a pronounced similarity between the Nova Scotia and British Columbia Acts on the one hand and the Ontario and Quebec statutes on the other, the latter being considerably more stringent.

#### **Additional Provisions re Child and Female Labour**

In addition to the above, provisions of a miscellaneous character with regard to the employment of women and children are found in the statutes of certain of the provinces.

<i>Nova Scotia:</i>	Boys under 12 yrs. in and about coal mines. ....	Boys under 16 not to work more than 10 hrs. per day, or 54 hrs. per week, except in case of accident or emergency. ....	From midnight Satur- day to midnight on succeeding Saturday.	Boys under 16 must be able to read and write and be familiar with arithmetic as far as including division	Males over 18	14 yrs.	Operations known as counter or back balances.	
<i>Saskatchewan:</i>	Boys under 12 yrs. and women and girls of any age in the workings of a coal mine. ....				Males over 18			Register showing age and address of employees to be kept.
<i>Alberta:</i>	Boys under 12 yrs. and women and girls of any age in the workings of a coal mine. ....			Boys under 16 must be able to read and write and must be familiar with arithmetic as far as including divi- sion. ....	Males over 18			Register showing age and address of employees to be kept.

Register of women, boys and young persons employed above or below ground to be kept, and notice of employment of boys to be given.

Boys under 12 yrs. in and about coal mines; women and young girls below ground; boys of 13 and under 14, except in mines sanctioned by Minister...	Boys under 14 not to work overground or underground, and girls and women not to work overground more than 30 hours per week or 6 hrs. per day, with intervals of 16 hrs., except between Fridays and Saturdays, when intervals must be at least 8 hrs.; women, girls and children not to work between 9 p.m. and 5 a.m. of following morning or on Sundays, or after 2 p.m. Saturdays.....	From midnight Saturday to midnight on succeeding Saturday..	Persons over 18	12 yrs.
--	--	---	-----------------	---------

Under the provisions of the Ontario Liquor License Law, a bartenders' license may not be issued to a woman, or to any person not of the full age of twenty-one years, and of good character <sup>(125)</sup>.

The employment of children as express or despatch messengers, as vendors of newspapers and small wares, and as boot-blacks, is placed, under the Consolidated Municipal Act of Ontario, of 1903, under the regulation and control of the local Boards of Commissioners of Police <sup>(126)</sup>.

A boy apparently under fourteen and a girl under sixteen may be apprehended under the Act for the protection and reformation of neglected children if found employed in any brewery, or in any shop, saloon, tavern or other place where intoxicating liquors are made, bottled or sold. <sup>(127)</sup>.

In a schedule appended to an Act to incorporate the Yarmouth and Digby Electric Railway Company, Ltd., passed by the Nova Scotia Legislature in 1902, it was stipulated that no person should be allowed to drive a car unless of the full age of twenty-one years <sup>(128)</sup>.

**Enforcement of the Law.**

With regard to the steps taken to enforce legislation with regard to child and female labour, and the extent to which the legislation has been effective in protecting the classes in question, numerous references will be found in the reports issued from time to time by the various factories' inspectors appointed by provincial governments to carry out the law. A resumé of the more important findings and recommendations of the inspectors in this connection was published in the *Labour Gazette* for November, 1904, pp. 496-8. The reports of mines' inspectors contain similar references.

**Kindred Legislation.**

In addition to the legislation reviewed above, acts of a more general character for the protection of women and children have been passed in several of the pro-

<sup>(125)</sup> Ontario Statutes, 1903 p. 394.

<sup>(124)</sup> N. S. Statutes, 1902, p. 482.

vinces. These have reference to such aspects of the subject as apprenticeship, the rights of minors (†), the treatment of neglected and dependent children, industrial schools and reformatories, childrens' aid societies, the punishment of juvenile offenders, the support of illegitimate children, the treatment of immigrant children, the regulation of maternity boarding houses, etc., The Province of Ontario, in particular, has a large body of legislation dealing with these and kindred matters, with a special officer in the case of the Act regarding neglected and dependent children to secure enforcement. The Criminal Law and other measures enacted by the Dominion parliament, also contain special clauses with reference to the status of children as distinguished from adults. While intimately associated with the condition of women and children under the Canadian law, these Acts are not considered here, inasmuch as they do not specifically refer to employment and the position of the classes in question in the industrial as distinguished from the social and general life of the community.

### Compulsory attendance at School.

An exception to this method of treatment may be made in the case of the laws of the several provinces having reference to compulsory attendance at school. In connection especially with the enforcement of the Factories and Shops Acts, the age limit to which attendance at school is made obligatory has proved a matter of first importance in securing the rational application of the law. In provinces, for example, in which the age below which employment is forbidden is higher than that at which attendance at school may cease, it has been found in many instances difficult to obtain a satisfactory enforcement of the law with regard to child labour. It may, in fact, be asserted that the question of the employment of children who might other-

wise be in idleness and without restraint, and of children whose parents are destitute and in need of the assistance which the earnings of their children render, have proved among the most perplexing of the problems which a strict enforcement of the law entails. The following statement, accordingly, of the age in the several provinces below which attendance at school is compulsory will be of special interest in connection with the foregoing review.

*Nova Scotia.*—Children between the ages of 6 and 16 years, if physically and mentally capable, must attend school for at least 120 days in the school year, but a child over 12 years of age, who passes a satisfactory examination in grade seven of common school work, and any other child over 13 years of age who has attended school 60 days during 14 consecutive weeks in the preceding year, if necessity requires him to work, may be exempted from the above provision on permission of the local School Board <sup>(129)</sup>.

*New Brunswick.*—A comprehensive Act providing for the compulsory attendance of children between the ages of 7 and 12 years at school, was passed in the year 1903. Provision was made in a special way under the Act with reference to the employment of children below the school age <sup>(130)</sup>.

*Quebec.*—The payment of the fees of school children is compulsory, but there is no provision under the law compelling the attendance of children at school <sup>(131)</sup>.

*Ontario.*—Under the terms of a special Act respecting truancy and compulsory school attendance, every child between the age of 8 and 14 years must attend school for the full term each year, unless he has passed the entrance examination for high schools, or under certain other specified conditions. The employment of school children during school hours is prohibited under a penalty of \$20, unless the child is required in husbandry, or in urgent or necessary household duties, or for the necessary maintenance of himself

† (†) A special article dealing with Legislation in Canada with regard to apprentices and minors was published in the *Labour Gazette* for February and March, 1902, Vol 2, pp.470 and 526 respectively. For a further statement re the protection of wages of minors, see also the *Labour Gazette* for October, 1906, p. 387.

<sup>(129)</sup> R. S. N. S. Chap. 55, sec. 6; see also statutes N. S., 1903-4, chap. 60, sec. 20.

<sup>(130)</sup> The Act was reviewed at length in the *Labour Gazette* for June, 1906, at page 1351.

<sup>(131)</sup> Stat. Que. 1899, chap. 99, sec. 247; see also under heading "Employment in factories" above; see also the *Labour Gazette* for June, 1907, page 1384.

TABULAR STATEMENT SHOWING LEADING PROVISIONS OF THE LAW IN THE DIFFERENT PROVINCES, CANADA, WITH REGARD TO THE EMPLOYMENT OF WOMEN, CHILDREN, ETC., IN METALLIFEROUS MINES.

Province	Classes of which employment is forbidden	Hours of Labour.	Definition of term "week" in preceding section.	Educational test prescribed.	Class to which employment about joining engines in shafts and levels is limited.	Age limit for driver of animal work-engines mentioned in preceding section.	Operations to which preceding section does not apply.	Additional safeguard.
<i>Nova Scotia:</i>	Boys under 12 yrs. above and below ground.	Boys under 16 yrs not to work more than 10 hrs. per day or 54 hrs. per week except in case of accident or emergency.	From midnight Saturday to midnight of succeeding Saturday.	Boys under 16 must be able to read and write and must be familiar with arithmetic as far as and including division.	Males over 18 yrs.	14 yrs.	Operations known as counter or back balances.	
<i>Ontario:</i>	Boys under 15 not to be employed underground; girls and women not to be employed about or near a mine except in mica trimming works.	Boys under 17 not to be employed more than 8 hrs per day or 48 hrs. per week and not to be allowed below ground on Sunday.	From midnight Sunday to midnight of succeeding Saturday.		Males over 20 yrs.	16 yrs.		A register of boys under 17 to be kept, open to the inspector. Notice of intention to employ a boy under 17 must be given to inspector.
<i>Quebec:</i>	Boys under 15 not to be employed underground; women and girls not to be employed in the working of a mine.	Boys under 17 not to be employed more than 8 hrs, per day or 48 hrs. per week and not to be allowed below ground on Sunday.			Males over 20 yrs.	16 yrs.		
<i>British Columbia:</i>	Boys under 12 and women not to be employed underground.	Boys under 16 yrs not to work underground more than 10 hrs a day or 54 hrs a week.			Males over 16 yrs.			A register to be kept of boys under age of 16 and of women employed above or below ground.

or some person dependent on him. The Act also provides for the appointment of truancy officers and defines their duties. The onus of proof as to the age of the child lies with the defendant in any action <sup>(132)</sup>

*Manitoba.*—Under the Manitoba Public School Act it is declared that every person in rural municipalities between the ages of 5 and 16 years, and in any cities, towns and villages between the ages of 6 and 16 years, shall have the right to attend some school. Attendance, however, is not compulsory <sup>(133)</sup>.

*Saskatchewan and Alberta.*—The attendance at school of children between the ages of 7 and 12 years inclusive, is compulsory for a period of at least 16 weeks each year, 8 weeks of which time must be consecutive. Provision is made for the investigation of cases of non-attendance, and the appointment and proceedings of truancy officers <sup>(134)</sup>.

*British Columbia.*—Every child from the age of 7 to 14 inclusive must attend some school or be otherwise educated for six months in every year. Exemption is granted in case the child has reached a standard of education of the same or greater than that to be obtained in the public schools of British Columbia <sup>(135)</sup>.

### Legislation Pending.

The subject of child and female labour has received increased attention during the past year in the Provinces of Ontario and British Columbia. In the former province, a special committee of the Legislature was appointed in February, 1907, for the purpose of conducting an investigation into the administration of the law with reference to child labour. A report was presented during March embodying a comprehensive series of recommendations (\*). Following this report, bills were introduced during the present session of the Legislature, containing proposed amendments to the Factories and Shops Regulation Acts, having for their object the further regulation of hours of employment for boys in factories and to further restrict the employment of children in shops and canning factories. In British Columbia, a Factories Act containing extended restrictions on the employment of women and children in industrial establishments was introduced into the Legislature during February. None of these measures had been finally adopted at the end of the month.

(\*) For statement re appointment of Committee see the *Labour Gazette* for March, 1907, p. 1008. A report of the proceedings of the Committee and a resumé of its findings were published in the *Labour Gazette* for April, 1907, p. 1122.

## DOMINION LEGISLATION, 1908—SEED GRAIN FOR THE PROVINCES OF ALBERTA AND SASKATCHEWAN.

ON February 12th an appropriation act was assented to by the Honourable the Deputy to His Excellency the Governor-General, providing for the granting of a sum of \$2,850,000, to be expended in purchasing seed grain for

homestead settlers in the provinces of Alberta and Saskatchewan. The following schedule, which is appended to the Act, sets forth the several charges to be made in this connection:

SCHEDULE.

SUMS GRANTED TO HIS MAJESTY BY THIS ACT FOR THE FINANCIAL YEAR ENDING 31ST MARCH, 1908, AND THE PURPOSES FOR WHICH THEY ARE GRANTED.

No. of Vote.	Service.	Amount.	Total.
Miscellaneous.			
279	To provide an amount to purchase seed grain for homestead settlers in the Provinces of Alberta and Saskatchewan; the cost of said seed grain to be repaid by the settlers with interest at the rate of 5 per centum per annum, and until repayment, to be a lien or charge upon the lands of the settlers held under homestead entry.....	\$ 585,000.00	
280	To provide an amount to enable the Government of Canada to advance to the Government of Alberta, by way of loan, a sum for the purchase of seed grain for settlers.....	440,000.00	
281	To provide an amount to enable the Government of Canada to advance to the Government of Saskatchewan, by way of loan, a sum for the purchase of seed grain for settlers.....	1,825,000.00	
			\$2,850,000.00

A detailed account of the sums expended under the Act must be laid before the House of Commons during the first fifteen days of the next session of Parliament.

Five other acts relating to railway companies were assented to at the same time as the above.

**Order-in-Council Passed.**

Previous to the passing of the above, a memorandum dated January 30, 1908, from the Minister of Finance, recommending the legislation, was passed by His Excellency the Governor - General-in-Council. The memorandum set forth the circumstances to meet which the legislation was recommended in part as follows:

The difficulty, according to the information furnished, has arisen through the character of the season of 1907. Owing to a late spring and consequently delayed seeding operations; owing to, in many places, continued and prolonged moisture which prevented the early ripening of the crop, and owing to severe frost affecting the crops in a large portion of these two provinces, the crop of grain is such that in many sections it is wholly unfit for seeding purposes, or is such as would make its use for seeding purposes very inadvisable, and if it is used the crop returns for next season would be imperilled.

It is stated that in certain areas the crop has been abundant and fully matured and is quite satisfactory for seeding purposes, but according to information from the officers of the Seed Division of the Department of the Agriculture, who have made tests of many samples of the grain, there are other areas in which there is practically no grain fit for the seeding operations of the spring of 1908. \* \* \* \* \*

The Minister observes that, unless prompt action is taken to cope with this situation, the grain crops of the coming year of the two Provinces of Saskatchewan and Alberta will probably be most seriously reduced, and he believes it to be the duty of the public authorities to take immediate steps to avert what would be a disaster affecting the welfare of the whole Dominion. If action should be delayed until the period of the year in which farmers generally arrange for the purchase of their seed grain, it would be impossible for the farmers of these two Provinces, by any individual effort, to secure good seed grain for their spring's seeding. \* \* \*

The Minister also desires to point out that, while many of these farmers are in a good financial standing, it may be found in numerous instances that they will not have the cash available this winter or spring to meet the cost of their seed. This is due largely to the prosperity of the country which has been maintained during the last few years.

The farmers of the Provinces of Saskatchewan and Alberta have, until this season of 1907, been so well satisfied with the profits and results of their agricultural operations that they have hastened to invest their surplus cash and earnings in their business, in the way of the purchase of more land, more implements, more stock, and more buildings, and many of them have not laid by for such an unforeseen contingency as has occurred this year.

The Minister would further submit that the season of 1907 has been so exceptional in its character, and the failure of the crops, in the various sections of the West hereby to be assisted, has been so unexpected in every way, that a condition of affairs has arisen there which calls for extraordinary action to meet the situation.

The Minister observes, that apart from the question of any responsibility that may be said to rest upon the Dominion Government as respects the settlers who occupy homesteads under the Dominion Lands Act, the duty of making provision for such supply of seed grain might properly fall upon the Governments of the Provinces of Alberta and Saskatchewan.

The Minister realizes, however, that under present financial conditions the resources of these Provincial Governments are unequal to the demands of the occasion. Under favourable conditions the Provincial Governments could probably arrange to obtain the requisite advances from Canadian Banks. But while there are signs of im-

provement, the situation is not such as to warrant a belief that the Canadian Banks could be relied on to provide the necessary funds. The Provinces having been but recently organized under their new constitutions, have not yet had time to establish their credit in the money markets of the world. The Minister, therefore, feels that if this urgent need of seed grain is to be promptly met, it will have to be through the co-operation of the Dominion and Provincial governments.

The memorandum concluded by setting forth that before the advances recommended are made, the Provinces of Saskatchewan and Alberta must authorize the loans, the same to be repaid by March 31, 1909.

It may be added that a bill confirming the loan of the Dominion government was subsequently introduced into the Alberta Legislature.

### Regulations and Instructions.

Regulations respecting the purchase and distribution of seed grain in accord-

ance with the above legislation were issued by the Hon. the Minister of the Interior during February. Circulars with a view of ascertaining the extent of the need, and instructions as to the procedure to be followed in making application for seed grain advances were also sent out. Repayment of all advances must be secured in the case of homesteaders who have not yet received recommendations for patent, by a lien upon their homesteads, and by those who have received recommendation for patent, or are owners or occupants, or have agreements of sale for purchased land, by security to the Provincial Government satisfactory to that Government.

The price to be charged will be the first cost of the grain, with the cost of cleaning sacking and transportation. Interest on advances will be charged at the rate of 5 per cent. per annum.

## OLD AGE PENSIONS AND MINERS' RELIEF SOCIETIES IN NOVA SCOTIA— REPORT OF SPECIAL COMMISSION.

THE commission appointed under the provisions of the Act passed by the Nova Scotia legislature in 1907, intitled "An Act respecting old age pensions and miners' relief societies," for the purpose of examining into and reporting upon the feasibility of adopting some scheme of providing old age pensions for workmen, and in particular for such workmen as have by themselves, or in conjunction with their employers, established benefit and relief societies, and of examining and reporting upon the organization and administration of existing miners' relief societies, submitted its report under date of February 7, 1908 (\*). The commission held meetings at various points throughout the province over a period of four months, beginning in September, 1907, and a considerable amount of information was obtained by means of correspondence.

### Findings of the Commission.

The matters submitted to the commission fell under the following heads:—

\* A reference to the Act was published in the *Labour Gazette* for July, 1907, p. 73. For statement reappointment of commission see *Labour Gazette* for October, 1907, p. 356.

I. The feasibility of adopting some scheme providing old age pensions for workmen;

II. And particularly for such workmen as have either by themselves or in conjunction with their employers established Benefit or Relief Societies.

III. The organization and administration of Relief Societies formed under the Provisions of Chapter 23, Revised Statutes.

### Old Age Pensions.

The commission found that a general scheme for old age pensions was not now feasible in Nova Scotia, or likely to be so in the near future. The fact that the number of aged men per thousand is very high in Nova Scotia, higher, indeed, than in any other of the provinces of the Dominion, and that the financial ability of the province is limited, were put forward as the basis of the commission's opinion in this connection.

### Pensions for Members of Relief Societies

The Commissioners are unanimously of opinion that were it not for the present Relief Societies and the local conditions, which have grown up around them, the ideal system would be to organize one Society of all the colliery workers of Nova

Scotia providing the benefits of the present Societies and adding thereto total disability and old age pension features. There are, however, many difficulties in the way, apart from local conditions, and the Commission recommend, if a total disability and pension scheme is adopted, that however its local administration is worked out, its funds be kept separate and distinct from the present relief funds. It considers that no extended argument is necessary to justify the adoption of some scheme in the province whereby men who have been totally disabled in the coal mines, or have reached old age with its consequent inability to earn a livelihood, should share in the benefit of a fund to which they have been the main contributors. The report adds that the Government may well justify itself in making a contribution to this scheme based to some extent on the portion paid by the men themselves, the coal mines being the greatest provincial asset. With regard to the most practical means of establishing disability and pension fund, the Commission are of the opinion that Chapter 23 of the Revised Statutes, should be recast, and that a permanent board, to be called the Pension Board, should be formed which should have wide powers

of framing regulations for the organization and administration of the scheme, the same to be subject to the approval of the Governor-in-Council.

#### Organization and Administration of Miners' Relief Societies.

The report of the Commission sets forth the results of an extended examination into the organization and administration of existing miners' relief societies. There are at present in Nova Scotia sixteen of these societies. Several anomalies in administration are pointed out in the report. The chief weakness of the societies is stated to be their entire lack of co-operation. It is recommended in this connection that the colliery workers of Nova Scotia, some 12,000 in number, should be organized into one large society with local branches, and that the Government take over the care and management of the funds of the several societies in excess of \$1,000. The creation of an emergency or disaster fund was also recommended. A draft bill is submitted to provide for the establishment of the Nova Scotia Colliery Workers' Provident Society in accordance with the above findings.

#### FACTORY AND SHOP ACTS OF THE BRITISH DOMINIONS.\*

A USEFUL handbook has recently been issued by the Industrial Subcommittee of the Victoria League, containing a summary of the factory and shop acts of the British Dominions. In the preface it is said that the object of the volume is to help in the realization of higher standards in industrial conditions by a comparison of the industrial laws, the Mother Country being able to show to the younger countries the errors to avoid, while the daughter States can lead the parent State to a more hopeful and original treatment of problems which threaten alike the welfare of all.

The volume is divided into three parts. Part I contains a general view of the English law. Part II relates to the laws of New Zealand and Australia, and Part III to Canada. A summary of the Cape

of Good Hope law is also given, and a number of tables and charts illustrating industrial conditions in Great Britain, New Zealand and Australia, and Canada. There is also a carefully compiled index, which adds much to the usefulness of the book.

The factories and workshops in Great Britain and Ireland are regulated by the Factory and Workshop Act of 1901, a consolidation of previous statutes. This Act is said to be more complicated than any Colonial statute. It provides for the regulation of factories, textile and non-textile; workshops, docks, wharves and warehouses, buildings in course of con-

\*The Factory and Shop Acts of the British Dominions, a handbook compiled by Miss Violet R. Markham, together with a General View of the English Law, and a preface by Mrs. H. J. Tennant, London. Eyre Spottiswoode. Pages, 181. Price, two shillings and sixpence.

struction, and railway lines or sidings used in connection with a factory. Provisions are made for the preservation of the health and safety of employees, for the regulation of the hours of employment, for the restriction or prevention of the employment of children, and the restriction of deductions from wages. The administration of the Act is vested in the Home Secretary.

It is stated that the New Zealand Shops and Offices Act, the administration of which is vested in the Minister of Labour, regulates minutely the hours of occupation in different types of shops,

the types being determined by difference of district and population, as well as by the character of the business carried on. In New South Wales provision is made for the supervision and regulation of factories, bakehouses, laundries, dye works and shops. A special feature of the law of Victoria lies in the fixing of wages by Special Boards in 49 of the principal trades. The legislation of Tasmania relates principally to the employment of women and children. No factory law exists in British Columbia or in the Cape of Good Hope, and there is practically no Shop Act in the Province of Quebec.

**THE PEOPLES' BANK (CO-OPERATIVE) OF LEVIS, QUE.**

THE seventh annual report of the executive committee of "La Caisse Populaire de Lévis, Que.," for the year ended November 30th, 1907, was recently published. The following statement with regard to the operations of the bank during the past year is given:

The following table shows the total receipts of the bank since its establishment on December 6, 1900, to November 30th, 1907:

**FINANCIAL STATEMENT.**

ASSETS		
Loans.....		\$ 58,549.95
General expenses.....		412.58
Cash on hand.....		7,389.71
		<b>\$ 66,352.24</b>
LIABILITIES.		
Paid-up capital.....		\$ 48,337.69
Deposits.....		11,184.25
Interest on deposits.....		13.78
Dividends.....		206.22
		<b>\$ 59,741.94</b>
Total liabilities.....		<b>\$ 59,741.94</b>
Entrance fees.....	\$ 519.20	
Reserve fund.....	2,254.28	
Provident fund.....	379.03	
Surplus.....	579.79	
		<b>\$ 3,732.30</b>
Total.....		<b>3,732.30</b>
Profits.....		<b>2,878.00</b>
		<b>\$ 66,352.24</b>

Paid-up capital.....		\$ 59,058.55
Entrance fees.....	\$ 1,393.50	
Profits.....	9,835.82	
		<b>11,229.32</b>

The two last amounts are divided as follows:—

Reserve fund.....	\$ 2,254.28	
Provident fund.....	379.03	
Surplus.....	579.79	
Interest on deposits.....	608.95	
Dividends.....	3,530.08	
General expenses.....	892.57	
Unappropriated amounts.....	2,984.62	
	<b>\$ 11,229.32</b>	
Savings deposits.....		\$751,044.04
Loans repaid.....		218,543.21
		<b>\$339,875.12</b>

Disbursements were as follows:

Withdrawal of shares....	\$ 10,720.86
Withdrawal of deposits....	39,859.79
Loans.....	277,093.16
Interest on deposits.....	595.17
Dividends.....	3,323.86
General expenses.....	892.57
Cash on hand.....	7,389.71
	<b>\$ 339,875.12</b>

The statement shows that the assets of the bank have increased by \$22,822.44 during the past year, as compared with an increase of \$7,500 in the preceding year. Paid-up capital and deposits have increased by \$21,085.86. Profits amounted to \$2,878.00, an increase of \$669.00 over those of the previous year.

The general business of the bank increased from \$232,197.00 to \$339,875 or \$107,678 during 1907, this being the

largest increase yet recorded. Total loans also increased during the year by \$22,197.00.

During the course of the year His Excellency, Earl Grey, Governor General of Canada, paid the bank several visits and made application to become a shareholder. Upon the granting of his application he also became a depositor. This kindly interest in the affairs of the bank had the effect of largely increasing the number of shareholders, 5,192 new shares having been subscribed for during the year.

During the course of the year the bank instituted a plan of saving for

pupils of the schools of Levis, St. Joseph and St. Romuald. Deposits of one cent and over may be made by the school children. The deposits during less than three months from this source amounted to \$964.00.

**IRON AND STEEL BOUNTIES,  
CANADA, 1907.**

THE following statement of bounties on iron and steel paid by the Dominion government during the calendar year 1907 is published by courtesy of the Department of Trade and Commerce, Canada:—

**CHANGES IN WAGES AND HOURS OF LABOUR, CANADA, 1907.\***

Wages during the first ten months of the calendar year 1907 were upward to a marked degree, the tendency in this direction being more pronounced than in 1906, or in any previous year since 1903. This upward movement was most notable during the second quarter of the year, in which over 17,000 railway employees, 9,000 textile workers and 5,000 miners received advances. In the first quarter, some 6,000 miners and 2,000 railway employees were increased, and in the third quarter, some 2,500 miners, 2,400 printers and 3,400 railway employees received ad-

vances. In the fourth quarter the general tendency of wages was downward, the cause being the falling off in industrial activity resulting from the stringency in the money market. Unskilled labour, lumbermen, factory hands and metal miners in British Columbia were the classes chiefly affected. In the case of the metal miners, it may be remarked

\*The following article is based on the quarterly articles dealing with changes in wages and hours of labour published in the May, August, November, 1907, and February, 1908, issues of the *Labour Gazette*, together with certain supplementary information obtained since the close of the calendar year.

that the decline followed upon an advance granted earlier in the season. In the lumbering industry, also, though the wages of employees in the camps of Ontario and the Eastern Provinces were reduced during the autumn months, river drivers and sawmill hands during the spring season obtained very sub-

stantial increases. With regard to factory employees and unskilled labour, a comprehensive return was not obtained.

In the accompanying tabular statement, an analysis is presented showing aggregate returns of the changes of the year in the several industries and groups of trades:—

TABLE SHOWING, BY INDUSTRIES AND GROUPS OF TRADES, APPROXIMATE RESULTS OF CHANGES IN WAGES AND HOURS OF LABOUR AMONG SKILLED EMPLOYEES, CANADA, REPORTED TO THE DEPARTMENT OF LABOUR DURING THE CALENDAR YEAR 1907 (\*).

Industries and groups of trades.	Number of workpeople effected.	Total increase in weekly earnings.	Total decrease in weekly earnings.	Total increase in hours of employment per week.	Total decrease in hours of employment per week.
Lumbering.....	2,100		\$ 4,200		
Mining.....	16,580	\$ 10,900.00			400
Building.....	8,724	1,706.75			8,105
Metal, engineering and shipbuilding.....	2,339	2,825.50			1,850
Woodworking.....	481	113.75			1,405
Printing and allied.....	2,648	249.00			14,697
Clothing.....	303	501.50			
Leather.....	370	355.45			90
Textile.....	9,863	8,225.00			3,000
Food and tobacco preparation.....	1,430	1,480.00			750
General transport.....	2,881	3,238.00			
Railway employees.....	22,245	21,500.00			7,290
Street railway employees.....	5,686	5,786.00			
Retail clerks.....	386				
Civic employees.....	1,631	213.00			
Miscellaneous.....	38	19.00			

(\*). It is not to be assumed that the above represents a comprehensive statistical return of every change in wages or hours of labour that went into effect in Canada during 1907. Doubtless there were a number of changes of which information did not reach the Department. As an index, however, of the general tendency of wages during 1907, the return is accurate and reliable.

A special feature of the year, as above remarked, was the number of advances granted to railway employees. A list of the more important increases granted was as follows: Conductors in the employ of the Canadian Pacific and Quebec Central Railway companies; baggage-men and brakemen in the employ of same companies; locomotive engineers in the employ of the Quebec Central, Canadian Pacific, Michigan Central, Grand Trunk and Temiscaming and Northern Ontario Railway Companies; locomotive firemen in the employ of the Quebec Central, Michigan Central, Canadian Pacific and Temiscaming and Northern Ontario Railway Companies; railroad telegraphers in the employ of the Canadian Pacific, Temiscaming and Northern Ontario and

Grand Trunk Railway Companies; trainmen in the employ of the International Railway Company; switchmen and yardmen in the employ of the Grand Trunk and the Canadian Pacific Railway Companies; maintenance-of-way men in the employ of the Canadian Pacific, Canadian Northern, Intercolonial and Grand Trunk Railway Companies; freight handlers in the employ of the Grand Trunk and Intercolonial Railway Companies; carmen, car shop hands, boilermakers, machinists, etc., in the employ of the Canadian Pacific, the Michigan Central, Intercolonial and Grand Trunk Railway Companies.

Street railway employees obtained increases at the following points: St. John, N. B.; Montreal, Hull, Que.; Ottawa,

Niagara Falls, St. Catharines, Toronto and St. Thomas, Ont., and New Westminster, Vancouver and Victoria, B. C.

Among the coal mining companies which granted new scales of wages were the following: Alberta Railway and Irrigation Company, Lethbridge, Alta.; Canada West Coal and Coke Company, at Taber, Alta.; the Domestic Coal Company and Duggan, Huntrod & Company, Limited, at Taber, Alta.; Strathcona Coal Company, Strathcona, Alta.; Crow's

Nest Pass Coal Company, Fernie and Michel, B. C., and other companies included in the Western Coal Operators' Association; Hillcrest Coal and Coke Company, Hillcrest, B. C.; Hosmer coal mines at Hosmer, B. C.; St. Eugene Mining Company of Moyie, B. C.; Western Fuel Company, Nanaimo, B. C., and the Wellington Coal Company at Extension, B. C.

The increases in the building trades, according to classes, were as follows:—

INCREASES IN BUILDING TRADES, 1907.

Class.	Number of workpeople affected.	Total increase in weekly earnings.	Total decrease in weekly earnings.	Total increase in hours of employment per week.	Total decrease in hours of employment per week.
Stone and granite cutters.....	\$ 330	\$ 425.00			
Bricklayers and masons.....	2,350	3,570.00			3,840
Plumbers.....	407	1,025.75			165
Gas fitters.....	35		36.25		
Lathers.....	150	412.50			
Carpenters.....	2,850	6,284.00			760
Painters.....	1,440	2,157.50			
Builders' Labourers.....	1,162	1,831.75			

INCREASES IN WAGES GRANTED DURING 1907 TO EMPLOYEES OF THE VARIOUS DEPARTMENTS OF THE DOMINION GOVERNMENT.

IN connection with the review above presented of changes in wages and hours of labour taking effect throughout Canada during the calendar year 1907, it is of interest to note in a special way the extent to which employees of various classes of the Dominion Government were included in the movement for higher rates of remuneration.

In the statement given below a detailed account will be found of the more important increases in schedule which were granted by the several departments of government during 1907, no reference being made to increases occurring under the authority of previous statutes or regulations.

It will be seen that altogether several thousand employees of the Government received increases in wages during 1907 to the aggregate extent, in the case

of the Department of Railways and Canals, of approximately a quarter of a million dollars annually, in the case of the Department of Customs of \$160,000 annually, and to a considerable, though less extent in certain other departments.

Department of Customs.

The salaries of officials in the outside service of the Department of Customs, Canada, were increased during the year by about \$160,000.

Department of Public Works.

Some 45 caretakers, watchmen, mechanics, labourers and carters received increases in wages during 1907.

Post Office Department.

Country postmasters throughout Canada, whose salaries are based on the revenue of the offices, had their salaries

increased to the following scale of remuneration, which became effective on April 1st 1907:—

*Salary.*—Fifty per cent. on the first \$1,000 of revenue, 30 per cent. on all over \$1,000 and up to \$10,000, and 20 per cent. on all over \$10,000 of revenue, the minimum scale to be \$35.

*Allowance for night duty.*—An allowance will be paid for night duty when a Postmaster is required to be on duty after 9 p. m. or before 7 a. m. The minimum allowance will be \$10 and the maximum \$100, according to the time employed and the work done.

*Allowance for forward duty.*—The rate of remuneration will be 12½ per cent. on the revenue of the office for which direct or indirect forward duty is performed.

*Allowance for rent, light and fuel.*—This allowance is to be increased by 25 per cent. Therefore, if a Postmaster is now receiving \$100 under this head, he will receive \$125 under the new scale.

Prior to the change the scale was as follows:

*Salary.*—Forty per cent. on the first \$800 of revenue, 25% on all over that amount up to \$10,000, and 15% on all over \$10,000, with an additional 10% increase.

*Allowance for night duty.*—An allowance was paid for night duty when a Postmaster was required to be on duty after 10 p. m. or before 6 a. m., the minimum allowance being \$6 and the maximum \$60, according to the time employed and work done.

*Forward allowance.*—The rate of remuneration was 10 per cent. on the revenue of the offices for which direct forward duty was performed, and 5 per cent. for indirect forward duty; that is, where the forwarding was done through a second forward office.

*Rent allowance.*—As stated in the accompanying circular, the allowance for rent has been increased by 25%.

The number of offices affected by the change is about 11,500.

#### Department of Militia and Defence.

Some increases were made to caretakers of armouries and to some employees of the Dominion arsenal for special causes.

#### Department of Indian Affairs.

Agents, sub-agents, interpreters, clerks, inspectors, farmers, etc., to the aggregate number of 39 had their salaries increased by from \$60 to \$300 per annum.

#### Department of Trade and Commerce.

Seventeen employees of this Department, engaged in the grain inspection service in western Canada received increases in pay, the average rate being \$115 per month for experienced men. The employees are paid direct from Ottawa. The increase amounted to from 25% to 30%.

#### Department of Marine and Fisheries.

During the present fiscal year a number of increases were granted or continued to workmen employed by the De-

partment of Marine and Fisheries, Canada, at the Charlottetown, P. E. I., Quebec, Que., Ottawa, Ont., and Victoria, B. C., agencies of the Department. Among the classes affected were foremen and overseers at Charlottetown, and miscellaneous building employees at Ottawa, Ont., and Victoria, B.C. The following comparative statements set forth the several changes in detail and indicate the general level of wages at the different localities mentioned:—

TABLE OF RATES OF WAGES PER HOUR PAID AT AGENCY OF DEPARTMENT OF MARINE AND FISHERIES, QUEBEC, QUE., 1897, 1903 AND 1907.

Class of Labour.	Wages 1897.	Wages 1903.	Wages 1907.	Wages 1907*

## Department of Railways and Canals.

A number of very important increases in wages went into effect among employees of the Intercolonial and Prince Edward Island Railways and on the Government canal system during 1907.

Early in the year the following increases among clerks employed on the I. C. R., were granted, the changes dating from September 1, 1908:

STATEMENT OF INCREASES GRANTED TO I. C. R. CLERKS  
DATING FROM 1ST SEPTEMBER, 1906.

Freight handlers employed by the I. C. R., at Halifax, N.S., received two increases in wages during 1907. An increase in accordance with the following schedule was voluntarily conceded from April 1, 1907.

Class.	No	Old Rate.	New Rate.
Freight foremen.....	3	\$55.00 per month	\$57.50 per month.
Freight checkers.....	7	45-\$50 per month	\$52.50-\$55 per m.
Freight porters.....	40	\$1.40 per day...	\$1.50 per day.

By an agreement effected under the Conciliation and Labour Act., during September, 1907 a further increase also dating from April 1, was granted to employees of this class as follows:—\*

- Foremen (3) to receive \$60 per month.
- Checkers (13) to receive \$52.50 per month.
- Junior checkers (12) to receive \$47.50 per month.
- Porters (22) to receive \$1.50 per day for first year's service and \$1.60 per day thereafter.

From April 1, 1907, *Employees in the mechanical department* of the I. C. R., system had their wages increased as follows:—

Class.	No.	Old Rate.	New Rate.
Machinists.....	397	\$13.92 per wk.	\$15.08 per wk.
Boilermakers.....	109	14.50 "	15.66 "
Blacksmiths.....	104	12.76 "	13.92 "
Tinsmiths.....	18	12.76 "	13.92 "
Enginehouse men	248	7.54 "	8.12 "
Carmen.....	696	12.18 "	13.34 "
Labourers.....	129	7.54 "	8.12 "

*Maintenance-of-Way Employees* were also increased from April 1, as follows: \*\*

Class.	No.	Old Rate.	New Rate.
Foremen.....	262	18½c. per hr.	20 c. per hr.
Trackmen.....	1,340	14 c. "	15 c. "
Carpenters.....	17	20 c. "	22½c. "
Blacksmiths.....	8	22 c. "	24 c. "

The aggregate amount of the above and other miscellaneous advances is estimated at \$221,351.86 per annum.

\*For statements with reference to proceedings in this connection see the *Labour Gazette* for August and September, 1907, pp. 180 and 289 respectively.

\*\*The full text of the new agreement was published in the *Labour Gazette* for February, 1908, p. 997.

Increases were granted to employees on the Welland and Rideau Canals as follows:—

*Rideau Canal:*

Class.	Old Rate.	New Rate.
Stonecutters.....	43c. per hour..	44c. per hour.
Masons.....	45c. per hour..	47c. per hour.

*Welland Canal:*

Class.	No	Old Rate.	New Rate.
Lock and bridge masters and tenders.....	172	\$45 per month..	\$50 per month.
Foremen carpenters.....	5	\$2.80 per day...	\$3.10 per day.
Carpenters and divers.....	20	\$2.25 per day...	\$2.50 per day.

IMMIGRATION AND COLONIZATION.

Recent Immigration Returns.

IMMIGRATION through ocean ports during January, declared for Canada, was as follows:—

IMMIGRATION RETURNS DURING JANUARY, 1908.

	Male.	Female.	Children under 12.	Total.
Immigrants..	1,632	668	505	2,805
Returned Canadians.....	394	75	30	499
Tourists.....	61	17	16	94
Totals.....	2,087	760	551	3,398

A summary of immigration proper through ocean ports, declared for Canada, from April, 1907, to January, 1908, is as follows:—

IMMIGRATION BY OCEAN PORTS, APRIL, 1907—JANUARY, 1908.

	Male	Female	Children under 12	Total.
April.....	24,972	5,052	4,414	34,438
May.....	24,744	7,153	6,858	38,755
June.....	18,107	7,171	7,041	32,319
July.....	11,841	4,695	4,410	20,946
August.....	8,584	4,431	3,921	16,936

October.....	6,939	3,640	3,018	13,597
November....	5,376	2,632	2,101	10,109
December....	3,886	1,284	929	6,099
January.....	1,632	668	505	2,805
Total.....	114,166	40,781	36,261	191,208
Corresponding months of 1906 and 1907.....				135,115
Increase 1907-08.....				56,193
Percentage of increase....				42%

The following is a statement of immigration from the United States from April, 1907, to January, 1908, (ten months), compared with the corresponding months of 1906 and 1907

IMMIGRATION FROM UNITED STATES, APRIL—JANUARY, 1908-07, 1907-06.

By rail.....	April	9,106	44,840 4,807	
	May	6,324		
	June	4,702		
	July	4,796		
	August	3,683		
	Sept.	3,412		
	October	4,171		
	Nov.	3,656		
	Dec.	2,572		
	January	2,418		
	By highway, April to January...			
	Total.....			49,647
Corresponding mos. of 1906-07.		51,322		
Decrease, 1906-07.....		1,675		
Percentage of decrease.....		3%		

The total immigration to Canada from April, 1907, to January, 1908 (ten months) compared with corresponding months of 1906-07 was as follows:—

TOTAL IMMIGRATION TO CANADA, APRIL—JANUARY, 1907-08, 1906-07.

1907-08.		240,855
Via ocean ports.....	191,208	
From the United States.....	49,647	
1906-07.		186,337
Via ocean ports.....	135,015	
From the United States.....	51,322	
Increase, 1907-08.....		54,518

**Homestead Entries During January, 1908**

The following statement shows the number of homestead entries made in January, 1908, compared with January, 1907:—

STATEMENT SHOWING THE NUMBER OF HOME STEAD ENTRIES MADE DURING THE MONTH OF JANUARY, 1908, AS COMPARED WITH JANUARY, 1907.

Agency.	1908	1907	In-crease.	De-crease.
Battleford.....	117	83	34	
Brandon.....	3	9		6
Calgary.....	85	88		3
Dauphin.....	42	23	19	
Edmonton.....	266	176	90	
Estevan.....	21	66		45
Humboldt.....	117	80	37	
Kanloops.....	14	5	9	
Lethbridge.....	173	84	89	
Moose Jaw.....	195		195	
New Westminster.....	5		5	
Prince Albert.....	79	42	37	
Regina.....	90	243		153
Red Deer.....	98	82	16	
Winnipeg.....	56	50	6	
Yorkton.....	92	80	12	
Total.....	1,453	1,111	549	207

It will be seen that there has been a net increase in the number of homestead entries made in January, 1908, of 342.

**Nationalities of Homesteaders.**

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, Saskatchewan, Alberta, and British Columbia, during the month of January, 1908, were as follows:—

NATIONALITIES OF HOMESTEADERS, IN JANUARY, 1908.

Nationalities.	No. of Entries.
Canadians from Ontario.....	150
“ Quebec.....	19
“ Nova Scotia.....	5
“ New Brunswick.....	14
“ Prince Edward Island.....	1
“ Manitoba.....	43
“ Saskatchewan.....	27
“ Alberta.....	27
“ British Columbia.....	4
Persons who had previous entry.....	182
Newfoundlanders.....	
Canadians returned from the United States...	26
Americans.....	342
English.....	233
Scotch.....	53
Irish.....	18
French.....	11
Belgians.....	6
Swiss.....	3
Italians.....	1

Roumanians.....	
Syrians.....	
Germans.....	29
Austro-Hungarians.....	172
Hollanders.....	6
Danes (other than Icelanders).....	6
Icelanders.....	6
Swedes.....	20
Norwegians.....	22
Russians (other than Mennonites and Doukhobors).....	26
Mennonites.....	
Doukhobors.....	
Chinese.....	
Japanese.....	
Persians.....	
Australians.....	
New Zealanders.....	
Total.....	1,453

Representing 3,289 souls.

Of a total of 386 entries made in January, 1908, by persons coming from the United States, there were 106 from North Dakota, 61 from Minnesota, 22 from Iowa, 21 from Michigan and 18 each from South Dakota and Illinois.

**Lands Patented in January, 1908.**

An abstract of letters patent covering Dominion lands situated in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory, issued by the Department of the Interior during January 1908, is as follows:—

Nature of Grant.	January, 1908.	
	No. of Patents.	No. of Acres.
British Columbia Homesteads..	2	319.40
British Columbia Sales.....	5	175.60
Homesteads.....	1,092	173,196.77
Hudsons' Bay Co.....		
Military Homesteads.....	1	320.00
North-west half-breed grants...	13	2,077.00
Parish sales.....		
Quit claim special grants (440.92 acres).....	3	
<b>Railways:</b>		
Canadian Northern Railway.....	381	783,281.28
Can. Pac. Ry. grants.....	1	161.50
C. P. R. grants, Souris branch.....	1	160.00
Grand Trunk Pacific Ry.....	2	34.27
Manitoba and South Eastern Railway.....	211	328,501.74
Man. South Western Col. Ry....	20	4,488.88
Qu'Appelle Long Lake and Sask. Rd. and Steamboat Company.....		
Sales.....	35	3,459.99
School Lands Sales.....	10	1,596.12
Special Grants.....	5	83.58
Yukon Territory Sales.....	4	289.51
Totals.....	1,786	1,298,145.64

In January, 1907, the number of patents issued was 1,119, covering an area of 202,210.54 acres, showing an increase for the month of January, 1908, of 667 in the number of patents issued, and of 1,095,935.00 acres in the area patented.

#### Note.

Upward of five hundred emigrants sailed from Great Britain during Feb., under the auspices of the Salvation Army, for distribution in British Columbia.

### EXCLUSION OF UNDESIRABLE ASSISTED IMMIGRANTS.

FOR some time past it has been noted by the Immigration Branch of the Department of the Interior, Canada, that the least desirable class of immigrants received from the United Kingdom have been among those sent out by charitable and benevolent associations whose operations are outside of the supervision of the Canadian Immigration Department in Great Britain. With a view still further to prevent the immigration of undesirable classes in this connection, an order in council was approved during February whereby, after April 15th next, any person who comes to Canada on assisted passage, whether by public or private funds, will be subject to exclusion from this country unless he has been inspected by the officer representing the Canadian Government Emigration Department in London and has a certificate to that effect from the assistant Superintendent of Immigration. The text of the order in council in which full details are given as to nature of the restriction and the reasons for which it was adopted is as follows:—

CERTIFIED COPY OF A REPORT OF THE COMMITTEE OF THE PRIVY COUNCIL, APPROVED BY HIS EXCELLENCY THE GOVERNOR GENERAL ON THE 25TH FEBRUARY, 1908.

On a memorandum dated 26th February, 1908, from the Minister of the Interior, stating that a very considerable number of emigrants arriving in Canada from the British Isles have either been rejected at Canadian ports or afterwards deported from Canada as undesirables, for causes named in the Immigration Act;

That during the year 1907 there were some 141 rejections and 441 deportations of British emigrants.

That among the many charitable and philanthropic associations actively engaged in the British Isles in sending and financially assisting immigrants to Canada, are some whose work is chiefly among the unemployed, destitute and incompetent classes in the congested centres of population.

While the Minister does not contend that some of these immigrants may not make successful citizens of Canada, nevertheless it is true that it is not the object of these associations to encourage the immigration of the really competent, industrious and ambitious man so long as he succeeds in supporting himself, and that their operations are confined almost exclusively to the class from which it is very unlikely that the needs of Canada can be properly supplied.

The class referred to includes not only the unemployed, but a large proportion of those who are a drag in the labour market from misfortune, incompetence or indifference. In the case of these it is no alleviation of their condition to transfer them here, because our experience is that they simply continue in the same condition, and are a detriment to Canada.

While the associations engaged in this work often claim, and perhaps endeavour to use discrimination in the matter of selection, in effect it is found that emigrants are sent here who are entirely unsuited to the conditions prevailing in this country, and who are unlikely to succeed even under the most favourable circumstances.

The work of these associations does not come under the supervision of the Canadian Immigration Department in the British Isles, and it is very advisable that more effective measures should be adopted, supervisory and restrictive, in regard to the undesirable classes.

It might be mentioned that the Department of the Interior exercises a degree of supervision over a certain very limited class of immigrants, who are sent out by the Poor Law Guardians. If the Guardians of a district are satisfied that a person, who has been a charge on them, is really capable of working his way in Canada, or elsewhere, under new conditions, and with a fair start, they secure an appropriation from public monies for the purpose of the emigration of such person. When an emigrant is sent out in this way, it is imperative that the consent of the Assistant Superintendent of Emigration for Canada be obtained. In this way the Department exercises some control. Independent inquiry is made, a medical certificate is obtained, and other precautions taken to make sure of the suitability of the emigrant.

The Minister is of the opinion that a similar system of inspection should be extended to all charitable and philanthropic societies or organizations operating in England, whether using public money or funds provided by public generosity, so that persons whom they propose sending to Canada may be subject to inspection by the officer representing the Canadian Government Emigration Department in London, as to their antecedents, both morally and physically, and as to their general suitability for settlement in Canada; such persons to be allowed entry into Canada only upon presentation of a proper certificate from the Assistant Superintendent of Emigration; and to be subject to exclusion and deportation in the usual way, should they succeed in gaining admittance to Canada in contravention of the regulations.

The Immigration Act (Sec. 10) provides that:—

“The Governor-in-Council may, on the recommendation of the Minister, make such orders and regulations, not inconsistent with this Act, as are considered necessary or expedient for the carrying out of this Act according to its true intent and meaning and for the better attainment of its objects.”

The Minister therefore recommends that an Order-in-Council be passed prohibiting, from and after the fifteenth day of April, 1908, the landing in Canada of any person whose passage has been paid, wholly or in part, by any charitable organization or out of public monies, unless it is shown that the authority in writing of the Assistant

Superintendent of Emigration for Canada in London, has been obtained for the emigration of such person, and that such authority has been acted upon within a period of sixty days.

The Committee submit the same for approval.

RODOLPHE BOUDREAU,  
Clerk of the Privy Council.

THE HONOURABLE

THE MINISTER OF THE INTERIOR.

### Statement of Persons Sent out by Charitable Societies during 1907.

In connection with the above, the statement given below with regard to the number of persons sent to Canada by certain charitable societies in Great Britain during 1907, will be of interest. The statement is attached to a special report dealing with the aims and methods of charitable organizations promoting emigration to Canada from the British Isles, prepared by Mr. J. Bruce Walker,

Assistant Superintendent of Emigration, and published by the authority of the Minister of the Interior, Canada, during February.

#### STATEMENT OF PERSONS SENT OUT BY CERTAIN CHARITABLE SOCIETIES DURING 1907.

East End Emigration Fund.....	6,096
(The above figures include those sent out by the East End Fund for the Central Unemployed Body).	
Self-Help Emigration Society.....	506
(Either the whole or the greater part of the passage of these people was provided by the emigrants or those interested, small grants only being made by the Society.)	
The Salvation Army.....	406
(Fares wholly or partially advanced).	
The Church Army.....	1,595
(Of the above, 1,519 received financial assistance from the Church Army Funds.)	
The Church Emigration Society.....	663
The Central Unemployed Body.....	2,842
(The above figures do not include 2,573 persons sent out by the East End Emigration Fund).	
The Central Emigration Board.....	228

### INDUSTRIAL ACCIDENTS DURING THE MONTH OF FEBRUARY, 1908.

Under this heading account is taken of such accidents only, as were sustained by workmen in the course of their employment and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 266 individual workpeople in Canada during the month of February, 1908, were reported to the Department of Labour. Of these, 89 were fatal and 177 resulted in serious injuries. In addition, 4 fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before February, 1908. The number of fatal accidents reported in February, 1908, was 88, being 5 less than in the previous month and 7 more than in February, 1907.

Of 107 returns received during the month giving the ages of the victims of industrial accidents, 8 referred to persons under twenty-one years of age, 31 to persons between twenty-one and forty-five, 12 to persons over forty-five years, 56

persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

#### STATEMENT OF ACCIDENTS DURING FEBRUARY 1908, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed	Injured	Total.
Agriculture.....	11	15	26
Fishing and hunting.....	2	1	3
Lumbering.....	6	17	23
Mining.....	17	19	36
Building trades.....	1	1	2
Metal trades.....	4	37	41
Woodworking trades.....	1	6	7
Printing trades.....	1	1	2
Clothing trades.....	4	4	8
Textile trades.....	2	2	4
Food and tobacco preparation.	1	5	6
Railway service.....	24	28	52
Navigation.....	2	1	3
General transport.....	4	11	15
Civic employees.....	7	7	14
Miscellaneous.....	11	14	25
Unskilled labour.....	6	8	14
Total.....	89	177	266

#### Nature of Fatalities and Accidents.

The chief disasters of the month were the killing of ten mine workmen on No. 1 colliery, Port Hood, N. S.; the death of

nine workmen in a dynamite explosion at Ile Perrot, Que.; a railway wreck at Turcot Village, Que., and the derailment of a train near Ottawa, Ont., both causing the death of two train hands; and the killing of two underground managers at No. 1 colliery at Sydney Mines, N. S.

#### Mining Disaster at Port Hood, N. S.

On the morning of February 7th, shortly after the men had descended to work, an explosion took place in one of the balances of the south level of No. 1 colliery, Port Hood, N. S., causing the instant death of ten miners. On February 16th, a coroner's jury rendered a verdict in the matter:—\*

#### Explosion at Ile Perrot, near Vaudreuil, Que.

On February 11, between the hours of noon and one o'clock p. m., an explosion of about two thousand pounds of nitroglycerine occurred at the works of the Standard Explosives, Limited, on Ile Perrot, in the vicinity of Vaudreuil, Que., instantly killing nine workmen and injuring several others. (\*)

#### Railway Wreck at Turcot Village, Que.

On the evening of February 1, the Grand Trunk Railway passenger train bound from Montreal to Ottawa, in the midst of a snowstorm, crashed into two locomotives standing on the main line at Turcot Village, Que., and the engineer and brakeman of the Montreal-Ottawa train were killed. The coroner's jury found that the necessary precautions had been taken by the crews of the engines that were in the yard, but that the wind had blown out the red lamp used in protecting the rear of the engines when the Montreal-Ottawa train collided with them. As the deaths were due to the storm and not to negligence, a verdict of excusable homicide was rendered.

(\*) For the verdict rendered by the coroner's jury in this matter, see under heading Recent Legal Decisions elsewhere in the present issue.

#### Fatal Accident near Ottawa, Ont.

On the night of Saturday, February 15, by the breaking of an eighty-pound rail on the line of the Grand Trunk Railway, regular passenger train No. 27 from Montreal to Ottawa was derailed five miles east of the city of Ottawa, Ont., and in the wreck which followed the engineer and fireman of the locomotive drawing the train were killed, and the baggageman and express messenger seriously injured.

#### Mining Disaster at Sydney Mines, N.S.

On the morning of February 13th, the cage of No. 1 colliery at Sydney Mines, N. S., in which an underground manager and overman were descending, broke away, falling 780 feet to the bottom of the shaft and instantly killing both men. On February 22nd, the coroner's jury, which sat on the case rendered the following verdict:—

That Malcolm Stewart and John Dorsay came to their deaths on the morning of the 13th of February, between the hours of seven and eight o'clock.

First. That the accident was caused by Engineer John Egan being mistaken by the signals due to the similarity of the sounds of the rappers in the engine room, which caused him to mistake the bottom rapper for the top.

Second. That the Walker hook failed to act, it breaking because of the defective hawse pipe.

Third. That owing to the chairs failing to perform the work required of them.

The accident occurred in the main shaft of No. 1 colliery of the Nova Scotia Steel and Coal Company at Sydney Mines.

The jury recommend,—

First. That the practice rapping back to the cage in motion be discontinued, this accident proving the practice to be dangerous.

Second. That a gong be substituted for one of the rappers in the engine room.

#### Record by Industries and Trades.

*Agriculture.*—There were 11 fatal and 15 non-fatal accidents during February, 1908. In January, 1908, there were 12 killed and 16 injured, and in February, 1907, 12 killed and 24 injured. Of the fatalities, 4 were caused by railways, 2 each by falls, by exposure and live stock, and 1 by being struck by a flying object. Of the non-fatal accidents, 5 were caused by exposure, 3 by falling material, 2 each by machinery and falls, and 1 each by a runaway, by a collision and by live stock.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE, SERIES F., No. 52.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF FEBRUARY, 1908.

Trade or Industry.	Locality.	Date.	No. Killed.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer	Prince Edward Co, Ont.	Feb. 3	1	Frozen to death.
"	Thornton, Ont.	" 10	1	Frozen to death.
"	Glanford, Ont.	" 13	1	Struck by flying object, died of pyæmia.
"	Cobalt, Ont.	" 19	1	Tree fell on him.
"	Dover, Ont.	" 19	1	Run over by train.
"	Brockville, Ont.	" 18	1	Tree fell on him.
"	Goderich, Ont.	" 15	1	Struck by train.
"	Montreal, Que.	" 21	1	Struck by train.
Farmer's wife.	Carberry, Man.	" 11	1	Trampled to death by horse.
Farmer's son	Carleton, Ont.	" 18	1	Kicked in abdomen by horse.
"	Swansea, Ont.	" 17	1	Struck by train at crossing.
<i>Fishing and hunting—</i>				
Fisherman	Shelburne, N. S.	" 9	2	Drowned, dory capsized.
<i>Lumbering—</i>				
Saw mill hand	Kamsack, Sask.	" 3	1	Caught in belting.
"	Latchford, Ont.	" 19	1	Run over by train.
Logger	Indian Lorette, Que.	" 1	1	Tree fell on him.
"	Lynn Valley, B. C.	" 3	1	Tree fell on him.
"	Near Quebec, Que.	" 13	1	Tree fell on him.
"	Lake Beauport, Que.	" 13	1	Logs rolled on him.
<i>Mining—</i>				
Miner	New Aberdeen, N. S.	" 3	1	Fell down shaft, 950 feet.
"	Port Hood, N. S.	" 7	10	Explosion in mine.
"	Fernie, B. C.	" 8	1	By falling material.
"	Glace Bay, N. S.	" 17	1	Struck by train of empty cars.
"	Cobalt, Ont.	" 17	1	By explosion in mine.
"	Westville, N. S.	" 18	1	Struck by box of coal.
Underground managers	North Sydney, N. S.	" 13	2	Cage fell 780 feet in shaft.
<i>Metal trades—</i>				
Foundryman	Port Arthur, Ont.	" 8	1	Caught in shafting.
Rolling mill worker	Sydney, N. S.	" 11	1	Caught in belting.
Electrical worker	Cartierville, Que.	" 24	1	Electrocuted.
Structural iron worker	Revelstoke, B. C.	" 24	1	Fell 50 feet from bridge.
<i>Woodworking and furnishing trades—</i>				
Woodworker	Sault Ste Marie, Ont.	" 20	1	Fell into vat of scalding steam and alcohol.
<i>Food and Tobacco Preparation—</i>				
Grist mill worker	Picton, Ont.	" 11	1	Caught in belting.
<i>Railway Employees—</i>				
Engineer	Turcot, Que.	" 3	1	In head-on collision.
"	Carlsbad, Ont.	" 15	1	In derailment.
"	Woodstock, Ont.	" 28	1	Run over by train.
Fireman	Turcot, Que.	" 3	1	In head-on collision.
"	Carlsbad, Ont.	" 15	1	In derailment.
Sectionman	West Lorne, Ont.	" 7	1	Run over by train.
"	Hagersville, Ont.	" 8	1	In rear end collision.
"	St. Romuald, Que.	" 1	1	Struck by snowplough.
Car shop worker	Richmond, Que.	" 7	1	Run over by train.
Construction hand	Bras d'Aspic, Que.	" 10	1	By explosion of dynamite.
"	Kalmar, Ont.	" 7	2	By explosion of dynamite.
"	Deception, Ont.	" 6	1	By explosion of dynamite.
"	Sheba, Ont.	" 17	1	By falling sand bank.
"	L'Islet, Que.	" 8	1	By explosion of dynamite.
"	La Tuque, Que.	" 26	1	By explosion of dynamite.
"	La Tuque, Que.	" 12	1	By explosion of dynamite.
Brakeman	Toronto, Ont.	" 4	1	Fell from train.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE, SERIES F., No. 52.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF FEBRUARY, 1908.

Trade or Industry.	Locality.	Date.	No. Killed.	Cause of Fatality.
Brakeman	Bridgeburg, Ont.	Feb, 17	1	Run over by train.
"	Saskatoon, Sask.	" 19	1	Run over by train.
"	Nelson, B. C.	" 21	1	Caught between cars
"	Dexter, Ont.	" 24	1	Fell from car.
"	West Robson, B. C.	" 20	1	Run over by train.
Porter on parlour car	Chapleau, Ont.	" 18	1	In a derailment.
<i>Navigation—</i>				
Ferryman	Prince Albert, Sask.	" 5	1	Run over by train.
Fireman on vessel	St. John, N. B.	" 24	1	Found smothered in bunk.
<i>General transport—</i>				
Bus driver	Prince Albert, Sask.	" 15	1	In a runaway.
Carter	Levis, Que.	" 24	1	In a runaway.
"	Swansea, Ont.	" 17	1	Run over at crossing.
"	Sillery, Que.	" 28	1	Sleigh fell on him,
<i>Miscellaneous—</i>				
Explosives, workers in	Ile Perrot, Que.	" 11	9	Explosion of nitro-glycerine.
Paper box maker	London, Ont.	" 22	1	Fell down elevator shaft.
Grocer	Quebec, Que.	" 20	1	Frozen to death.
<i>Unskilled labour—</i>				
Labourer	Ottawa, Ont.	" 3	1	Drowned, fell into flume at power-house.
"	Turcot, Que.	" 14	1	Struck by train.
"	Fort William, Ont.	" 18	1	Smothered in grain bin.
"	Vancouver, B. C.	" 20	2	Explosion of dynamite.
"	Windsor Mills, Que.	" 25	1	Run over by train.

FATAL ACCIDENTS HAPPENING IN PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN FEBRUARY.

Farmer	Folly Mountain, N. S.	Jan. 31	1	Struck by train at crossing.
Logger	Port Moody, B. C.	" 31	1	Tree fell on him.
Brakeman on ore train	Copper Cliff, Ont.	" 25	1	Run over by train.
Railway fireman	Comber, Ont.	" 30	1	By explosion of boiler.

*Fishing and hunting.*—There were 2 deaths due to drowning and 1 accident due to exposure, compared with 5 deaths in the previous month, and 2 deaths and 1 injury in February, 1907.

*Lumbering.*—In this industry, death resulted through accident to 6 workmen, while 17 others were injured during February, 1908, compared with 8 killed and 13 injured in January last, and 7 killed and 11 injured in February a year ago. Four of the deaths were caused by falling material, logs, trees, etc., 1 by machinery and 1 by railways. Of the other accidents, 5 each were caused by machinery and by falling material, 4 by explosions, by tools and 1 by a runaway.

*Mining.*—During February, 17 workers

in this group were killed by accident and 19 injured, compared with 4 killed and 18 injured in the preceding month, and 9 killed and 10 injured in February, 1907. Eleven of the deaths were due to an explosion in colliery No. 1, Port Hood, N.S., as above described; 3 were due to falls, 2 to railways and 1 to falling material. Ten of the minor accidents were due to explosions, 4 to falling material, 3 to falls, 1 to live stock and 1 to railways.

*Building trades.*—There were no fatalities in this group during February, and only 1 minor accident caused by asphyxiation. In January there were 1 fatal and 7 non-fatal accidents, and in February, 1907, 2 killed and 7 injured.

*Metal, engineering and shipbuilding*

*trades.*—The record in these trades in February, 1908, was 4 killed and 37 injured. In January last it was 3 killed and 30 injured, and in February last year, 6 killed and 28 injured. Machinery was responsible for 2 deaths, electric shock for 1 and a fall for another. Nineteen of the minor injuries were due to machinery, 5 to falls, 4 to falling material, 3 each to explosions and to molten metal, 2 to electricity and 1 to an elevator.

*Woodworking trades.*—During February, a woodworker at Sault Ste Marie, Ont., fell into a vat of scalding steam and alcohol and was fatally injured, while there were 5 minor injuries caused by machinery and 1 by a fall. In the preceding month, there were 1 killed and 11 injured, and in February, 1907, 7 injured.

*Printing trades.*—A pressman at Toronto, Ont., had his hand crushed by a press. In January there was 1 accident, and in February, 1907, 4 accidents.

*Clothing trades.*—Four workmen were injured during February, compared with 1 killed and 1 injured in the preceding month, and 2 injured in February of last year. Two of the accidents resulted from a fire in a factory and 2 from machinery.

*Textile trades.*—Two workers in this class were injured by machinery, against 1 killed and 9 injured in January, and 1 killed and 6 injured a year ago.

*Food and tobacco preparation.*—In February, 1 workman was killed and 5 injured, compared with 1 killed and 4 injured in the previous month, and 1 killed and 5 injured in February, 1907. A grist mill employee at Picton, Ont., was caught in belting and killed, and 3 other workmen were injured by machinery and 2 by exposure.

*Railway service.*—Twenty-four railway employees met death by accident in February and 28 were injured, compared with 29 killed and 26 injured in January, 1908, and 30 killed and 26 injured in February, 1907. Seven of the deaths were due to explosions, 7 to being run over by cars, 3 to collisions, 2 to derailments, 2 to falls and 1 each to being struck by an engine, to falling material and to being caught between cars. Five each of the minor accidents were due to being struck by cars, to falls, and to derailments, 3 each to collisions and to being caught between cars,

2 each to machinery and to falling material, and 1 each to an explosion, to exposure and to being run over.

*Navigation.*—In this class 2 workmen were killed and 1 injured, compared with 7 killed and 1 injured in the preceding month, and 2 killed and 3 injured in February, 1907. A ferryman at Prince Albert, Sask., was run over by a train and killed, and a fireman on a vessel at St. John, N. B., was found smothered in his bunk. A sailor at Quebec, Que., was seriously injured by being struck by a steering wheel.

*General transport.*—During February, 4 workmen were killed and 11 injured. In January 5 were killed and 10 injured, and in February, 1907, 3 were killed and 8 injured. Two of the fatalities were caused by runaways and 1 each by being run over and by falling material. Of the other accidents, 5 were caused by falls, 3 by runaways and 1 each by live stock, by being run over and by falling material.

*Civic employees.*—Seven of these employees were injured during February, as against 3 killed and 8 injured in January and 18 injured in February, 1907. Five of the injuries were received at fires and one each was caused by live stock and flying material.

*Miscellaneous.*—Eleven fatal and 14 non-fatal accidents happened during February compared with 3 fatalities and 8 non-fatal accidents in the previous month, and 3 fatalities and 11 other accidents during February, 1907. Nine of the deaths were caused by the explosion at Ile Perrot, near Vaudreuil, Que., mentioned above, and 1 each was caused by a fall and by exposure. Four of the accidents were caused by machinery, 3 by falls, 2 each by elevators, by falling material and by explosions, and 1 by fire-arms.

*Unskilled labour.*—The record was 6 killed and 8 injured. In the month previous 10 workmen were killed and 9 injured, and in February of last year, 14 were killed and 3 injured. Two each of the fatal accidents were due to railways and to explosions, and 1 each to drowning and to being smothered in a grain bin. Falling material caused 3 of the minor accidents, railways 2, and an explosion, a fall and flying material, 1 each.

**EDWARD MEDAL FOR COURAGE  
AWARDED TO A CANADIAN.\***

**D**URING the month of February it was announced that His Majesty the King had been pleased to allow Miss Marguerite Jane Lamb, of Newcastle-on-Tyne, England, to receive an Edward medal of the first class in recognition of

(\* ) A special article dealing with the institution of the Edward medal by His Majesty the King was published in the *Labour Gazette* for February, 1908, p. 969.

the gallant action of her brother, the late George H. Lamb, who lost his life in endeavouring to save the lives of five men at a fire which occurred in the mine of the Strathcona Coal Company at Strathcona, Alta. (†) Mr. Lamb descended the shaft three times, and died from the injuries he received in his attempt to save the men.

(†) A reference to this disaster was published in the July, 1907, issue of the *Labour Gazette*, p. 91.

**FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING  
FEBRUARY, 1908.**

The following is a list of contracts awarded by the Department of Public Works, the Department of Railways and Canals, and the Department of Marine and Fisheries which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

**Department of Public Works.**

**T**RAINING pier on Bonaventure river, Que., name of contractors, A. Noel and H. Roy, Bonaventure, Que., date of contract, January 29, 1908; amount of contract, \$24,500.

**FAIR WAGES SCHEDULE.**

Trade or Class of Labour.	Rate of Wages. Not less than:
Foreman carpenter.....	\$2.25 per day of 10 hours.
Carpenters.....	1.50 " 10 "
Blacksmiths.....	2.00 " 10 "
Blacksmiths' helpers.....	1.25 " 10 "
Ordinary labourers.....	1.25 " 10 "
Driver with one horse & cart	2.00 " 10 "
Driver with two horses and wagon.....	3.00 " 10 "

Post office and building at Ladysmith, B.C., name of contractors, Parfitt Bros., Victoria, B.C., date of contract, February, 3, 1908; amount of contract, \$28,353.

**FAIR WAGES SCHEDULE.**

Trade or Class of Labour.	Rate of Wages. Not less than:
Stonecutters.....	\$5.00 per day of 8 hours.
Stonemasons.....	5.00 " 8 "
Bricklayers.....	5.00 " 8 "
Builders' labourers.....	3.00 " 8 "
Plasterers.....	5.00 " 8 "

Driver, 1 horse and cart....	3.50 " 10 "
Driver, 2 horses and wagon..	5.00 " 10 "

Crib wharf and stone approach at Rossport, Ont., name of contractor, C. H. Sherwood, Port Arthur, Ont., date of contract, February 6, 1908; amount of contract, \$7,288.00.

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages, Not less than:
Foreman carpenter.....	\$3.75 per day of 10 hours.
Carpenters.....	3.00 " 10 "
Blacksmiths.....	3.00 " 10 "
" helpers.....	2.25 " 10 "
Labourers.....	1.75 " 10 "
Driver, 1 horse and cart....	3.50 " 10 "
Driver, 2 horses and wagon..	5.00 " 10 "

Wharf at Mills Point, N.B., name of contractor, A. W. Fawcett, Woodstock, N.B., date of contract, February 6, 1908; amount of contract, \$19,825.00

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages, Not less than:
Foreman carpenters.....	\$2.25 per day of 10 hours.
Carpenters.....	1.75 " 10 "
Blacksmiths.....	2.00 " 10 "
Blacksmiths' helpers.....	1.25 " 10 "
Ordinary labourers.....	1.25 " 10 "
Skilled labourers.....	1.50 " 10 "
Driver, 1 horse and cart....	2.00 " 10 "
Driver, 2 horses and wagon..	3.00 " 10 "

Approach to crib at St. Francis, I. O., Que.; name of contractor, Nap. Trudel, St. Irénée, Que., date of contract, February 11, 1908; amount of contract \$16,038.00.

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages, Not less than:
Foreman carpenter.....	2.50 per day of 10 hours.
Carpenters.....	2.00 " 10 "
Blacksmiths.....	2.00 " 10 "
Blacksmiths' helpers.....	1.25 " 10 "
Driver, 1 horse and cart....	2.00 " 10 "
Driver, 2 horses and wagon..	3.00 " 10 "
Labourers.....	1.50 " 10 "
Drillers.....	1.75 " 10 "
Powderman.....	2.00 " 10 "

Public building at Shelburne, N.S., name of contractors, A. Hood and W. Brooks, Shelburne, N.S., date of contract, February 12, 1908; amount of contract, \$22,500.00.

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages, Not less than:
Carpenters.....	\$1.75 per day of 10 hours.
Painters.....	1.75 " 10 "
Tinsmiths.....	1.75 " 10 "
Bricklayers.....	3.00 " 10 "
Masons.....	2.50 " 10 "
Stonecutters.....	2.50 " 10 "
Plasterers.....	2.00 " 10 "
Plumbers.....	2.00 " 10 "
Builders' labourers.....	1.50 " 10 "
Common labourers.....	1.25 " 10 "
Driver, 1 horse and cart....	2.00 " 10 "
Driver, 2 horses and wagon..	3.00 " 10 "

Completion of wharf at Pointe aux Tremble, Que., name of contractor, O. Poliquin, Portneuf, Que., date of contract, February 8, 1908; amount of contract, \$22,490.00.

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages, Per Day of 10 Hours, Not less than:
Foreman carpenter.....	\$ 2.25
Carpenters.....	1.75
Blacksmiths.....	2.00
Blacksmiths' helpers.....	1.25
Ordinary labourers.....	1.25
Driver, 1 horse and cart....	2.00
Driver, 2 horses and wagon..	3.00

Department of Marine and Fisheries.

The construction of a wooden fog-alarm building at Cabot Head Light-station, Georgian Bay, Bruce County Ontario.

Name of contractor, J. Candlish Kennedy of Owen Sound, Ontario. Amount of contract \$2,463.00. Date of contract, 7th December, 1907.

FAIR WAGES SCHEDULE.

Class of Labour.	Rate of Wages, Not less than:
Carpenters.....	\$.25 per hour, 10 hours per day.
Painters.....	.25 " 10 "
Masons.....	.40 " 9 "
Bricklayers.....	.40 " 9 "
Labourers.....	.17½ " 10 "

Post Office Department.

The following orders for supplies were given subject to the regulations for the suppression of the sweating system, the securing payment of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of Order.
Making metal dating stamps and type, and making other hand stamps and brass crown seals.....	\$ 723.46
Making and repairing rubber dating stamps and type, also other stamps.....	94.65
Supplying stamping material and wooden boxes and repairing stamping pads.....	1,379.81
Repairing Post Office scales.....	4.50
Supplying mail bags.....	731.51
Repairing mail bags.....	1,365.98
Making and repairing mail locks and supplying mail bag fittings.....	1,021.65
Supplying street letter boxes and steel portable letter boxes, and repairing portable letter boxes, railway mail clerks' tin travelling boxes and parcel receptacles.....	487.21
Making and repairing miscellaneous articles of Postal Stores.....	63.75
Making up and supplying articles of official uniforms.....	1,358.50

TRADE DISPUTES DURING THE MONTH OF FEBRUARY, 1908.

The month of February was comparatively free from industrial disputes in Canada, none of the few that occurred having reached serious dimensions. One dispute of long standing was definitely settled early in the month, and in the case of another, general industrial conditions ceased to be affected.

Analysis of Trade Disputes During the Month.

*Number and magnitude.*—The total number of trade disputes reported to have been in existence in Canada during February was 10, a decrease of 1 compared with the previous month, and the same number as in February, 1907. There were about 14 firms and 1,744 employees affected by these disputes, about 5 firms and 300 employees having been affected by the strikes which began in the course of the month.

*Loss of time in working days.*—The loss of time to employees through trade disputes during February was approximately 4,730 working days, compared with a loss of 21,040 days in January and 18,876 in February, 1907.

*Trades affected by new disputes.*—The following table shows the trades affected by the new disputes of the month, and the number of workpeople involved in each group of trades:—

Trades.	Number of Disputes.	Number of workers.
Mining.....	1	22
Textile trades.....	2	177
Clothing trades.....	1	16
Unskilled labour.....	1	85
	5	300

*Localities affected by new disputes.*—The new disputes of the month occurred in the following provinces of the Dominion:—

Province.	Number of Disputes.
Nova Scotia.....	1
Quebec.....	3
Ontario.....	1
Total.....	5

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	Number of disputes.
For higher wages.....	2
Against discharge of employees.....	1
Against a reduction in wages.....	1
Against conditions of employment.....	1
Total.....	5

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE, SERIES C., No. 86.

TABLE OF TRADE DISPUTES DURING THE MONTH OF FEBRUARY.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.				Date of commencement.	Date of termination.	Result.
			Directly.	Indirectly.	Directly.		Indirectly.				
					Fe-males.	Males.	Fe-males.	Males.			
<i>Mining—</i> Coal miners.....	Coal Creek, B. C.....	A dispute over the question of timbering.....	1		1,025		100		Jan. 29	Feb. 1	Dispute adjusted under agreement of May 4, 1907, and work resumed.
<i>Metal and Shipbuilding trades—</i> Boilermakers and helpers.....	Hallifax, N. S.....	For increase in wages, mechanics from \$2.50 to \$3.50, helpers from \$1.80 to \$2.50 per day..	1		89		100		Sept. 25		No settlement reported, but conditions ceased to be affected.
<i>Woodworking and furnishing trades—</i> Upholsters.....	Guelph, Ont.....	Objection to reduction in wages.	1		16		1		Jan. 10		No settlement reported at end of month, but places of many strikers were filled.
<i>Clothing trades—</i> Tailors.....	Kingston, Ont.....	Against declaration of employers for open shops, following a demand for higher wages and shorter hours.....	5		17		33		Sept. 23	Feb. 6	Settlement reached by negotiations. Increase in wages granted.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH

<i>Food and tobacco preparation—</i> Cigarmakers.....	Montreal, Que.....	Strikers alleged employers had repudiated an agreement; employers stated that they had decided to conduct an open shop.....	1	50	13	Jan. 14	No settlement reported at end of month.
--	--------------------	---	---	----	----	---------	---

DISPUTES WHICH BEGAN DURING THE MONTH.

<i>Mining—</i> Gold miners.....	Baddeck, N. S.....	Objection to reduction in wages.	1	22		Feb. 21	No settlement reported at end of month.
<i>Textile trades—</i> Textile workers....	St. Hyacinthe, Que..	Demand for increase in wages. Strikers alleged that bed work was unequally divided.....	1	15	150	Feb. 24	No settlement reported at end of month; strikers were ready to return under former conditions, but employers would not take them back.
Textile workers....	Sherbrooke, Que.....	Refuse to do certain work usually performed by other hands	1	12		Feb.	After being out a day most of the strikers returned to work others found work elsewhere.
<i>Clothing trades—</i> Garment workers...	Sherbrooke, Que....	Against discharge of employees.	1	16		Feb. 17	Most of the strikers returned to work, places of others were filled.
<i>Unskilled labour—</i> Snow haulers.....	Ottawa, Ont.....	Demand for advance from 20 to 25 cents per load for hauling snow from street to dump.....	1	85		Feb. 4	Increase in wages conceded.

\* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or have had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention, moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

*Methods of settlement.*—Of the 10 disputes in existence during February, 5 were definitely terminated, and industrial conditions ceased to be affected by another, leaving 4 still in existence at the close of the month. In three cases, settlements were reached through negotiations between the parties concerned, in one of these the matter in dispute being adjusted under an agreement subsisting between the Company and its employees. In another case most of the strikers had secured work elsewhere and conditions ceased to be affected. In the remaining two work was resumed by most of the strikers, the places of others being filled.

*Results of disputes.*—Of the 6 disputes that were terminated, 2 resulted in favour of the employers, 2 in favour of the employees, in 1 a compromise was reached, and in one the result was indefinite.

#### **Disputes Which Commenced Prior to the Beginning of the Month.**

The trade disputes in existence during February, which began in previous months, affected coal miners at Coal Creek, B. C., tailors at Kingston, Ont., boilermakers and helpers at Halifax, N.S., cigarmakers at Montreal, Que., and upholsterers at Guelph, Ont. A brief account of these disputes is given below:—

#### **Strike of Coal Miners at Coal Creek, B.C.**

On January 29, a strike of coal miners employed by the Crow's Nest Pass Coal Company, Limited, took place at Coal Creek, B. C., the cause of the dispute being a question as to the timbering of the mines. According to a report received from the Company, about 1,025 men were directly affected by the dispute, and 100 were indirectly affected. In a report received from the men, it was stated that the dispute arose from the new management of the company introducing a new system of timbering, by which the fire boss would dictate where and when timbers should be put up, the miners alleging that this system would take away from the miner the right conferred on him by the Coal Mines Regulation Act of British Columbia, to secure his working

place, to ensure his own safety. In the settlement which was reached on February 1, it was agreed that each miner should put in timber as he thought fit to keep himself safe. But if a miner put in timber to an excessive amount, the management reserved the right to decline to pay for them, in which case the miner might refer the matter for settlement as provided for by the section in the agreement of May 4, 1908, entitled "Settlement of Local and General Disputes." On February 1, the dispute was adjusted in accordance with the terms of the agreement which was signed by the Company and its employees on April 1, 1907.

#### **Settlement of Strike of Tailors at Kingston, Ont.**

On February 6, there was reached a definite settlement of a dispute affecting tailors at Kingston, Ont., which began on September 23, 1907. The dispute arose from a declaration of the employers for the principle of "open shops," the declaration having been made on the opening of negotiations regarding wage changes. There were 7 firms, 25 male and 50 female workers originally involved in this strike. By the terms of settlement the rate of wages demanded by the Kingston Tailors' Union was granted, and the hands returned to work, largely under former conditions. It was reported that the strike cost the Union about \$7,000, while the trade of the employers was greatly reduced. The demands of the strikers were granted by 2 firms in October, and in the following month the other employers claimed that work was going on satisfactorily in their shops.

#### **Strike of Boilermakers and Helpers at Halifax, N.S.**

While no settlement was reported with regard to a strike of boilermakers and helpers employed on the graving dock at Halifax, N. S., who stopped work on September 25, conditions ceased to be affected by the dispute. About 89 men were directly involved and 100 indirectly. The cause of the dispute was a demand for higher wages, the mechanics asking

for an increase from \$2.50 to \$3.50 per day, and the helpers from \$1.80 to \$2.50 per day.

#### **Strike of Cigarmakers at Montreal, Que.**

A strike of cigarmakers at Granda Hermanos y Co, which took place at Montreal, Que., on January 14, continued throughout the month. The cause of the dispute was the decision of the firm to conduct "an open shop". The strikers further alleged that the employers had repudiated an agreement. About 50 men were directly, and 13 were indirectly affected by this dispute.

#### **Strike of Upholsterers at Guelph, Ont.**

No settlement was reached with regard to a strike of upholsterers at Guelph, Ont., who stopped work on January 10, on account of their objection to a reduction in wages. There were 16 men directly affected by this dispute, and one was indirectly affected.

#### **New Disputes.**

The new disputes of the month comprised strikes of textile workers at St. Hyacinthe, Que., garment workers and cigarmakers at Sherbrooke, Que., snow haulers at Ottawa, Ont., and gold miners at Baddeck, N. S.

#### **Strike of Textile Workers at St. Hyacinthe, Que.**

On February 25, a strike of employees of the Penman Manufacturing Company took place at St. Hyacinthe, Que. According to a report received from the Secretary of the Union, about 15 persons were affected directly, and 150 were indirectly affected. The dispute arose from a demand of six employees working on the stocking machines for an increase in wages of half a cent per dozen. It was further alleged by the employees that there was an unequal distribution of bed work, and that one of the female workers was discharged for refusing to take the place of those of the six strikers, the others working in that department then

went out. It was reported at the end of the month that the strikers were ready to return to work under the former conditions, but that the Company did not wish to take them back under any consideration. No settlement of the dispute was reached during February.

#### **Strike of Garment Workers at Sherbrooke, Que.**

A strike of 16 garment workers took place at Sherbrooke, Que., about February 17, on account of the discharge of two employees, members of the local Garment Workers' Union. The Company contended that owing to the state of business, these men had to be dispensed with, while the employees held that they had been discharged because they were active Unionists. On February 22, most of the strikers returned to work, and the places of others were filled.

#### **Strike of Textile Workers at Sherbrooke, Que.**

About 12 textile workers, employees of the Paton mills at Sherbrooke, Que., went on strike, having refused to do certain work which they claimed was usually performed by other hands. After being out for a day, most of the strikers returned to work, and the others found work elsewhere.

#### **Strike of Snow Haulers at Ottawa, Ont.**

On February 4, about 85 snow haulers employed by the Ottawa Street Railway Company stopped work with the view to obtaining an advance from 20 to 25 cents per load for hauling snow from the street to the dump, in order to compensate them for the increased cost of living, and of provender for their horses. After some conferences between representatives of the Company and the men, the increase in pay was conceded and work was resumed on February 6.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of February, and which have been reported to the Department.

## REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during February, 1908.

### DOMINION REPORTS.

#### The Dairying Industry.

Report of the Dairy and Cold Storage Commissioner; year ending March 31, 1907. Ottawa, King's Printer, 1908. Pages, 174.

The Report of the Dairy and Cold Storage Commissioner for the year ended March 31, 1907, contains a review of the progress of dairying in Canada, in which it is said that there are no indications that the amount of cheese available for export from Canada, will show any material permanent increase in the near future, the tendency to make butter, when conditions are favourable, offsetting any increase. The dairy production was stationary in Ontario, Quebec and Prince Edward Island. In Nova Scotia there was a decline, but there was some progress in New Brunswick and in the western provinces. The exports of butter for the year ended June 30, 1906, amounted to 34,031,525 pounds, of the value of \$7,075,539, and the exports of cheese for the same period amounted to 215,834,543 pounds, to the value of \$24,433,169.

### BRITISH REPORTS.

#### Cost of Living and Wages in the United Kingdom.

Report of an Enquiry by the Board of Trade into Working Class Rents, Housing and Retail Prices, together with the Standard Rates of Wages prevailing in certain occupations in the principal industrial towns of the United Kingdom. London, Wyman and Sons, 1908. Pages, 669. Price, 6s.

A valuable report has been issued by the British Board of Trade on the cost of living of the working classes in the United Kingdom, and the rates of wages in certain occupations, in the principal industrial towns. For purposes of comparison, the figures relating to London are made the basis, and are given the index number 100. It is shown that the rents of 72 English and Welsh towns range

from 32 to 81 per cent. of the rents of similar dwellings in London. In order to compare the cost of living in other respects, an estimate is made of the quantities of selected commodities consumed by an average working class family in a week, and the cost of these is compared for the different localities. With respect to these prices, London ranks tenth, but if rent and prices are combined, the cost of living is shown to be slightly greater in London than in any other part of England and Wales. An analysis of the relations between the wages in certain trades and the cost of living fails to show any law of connection between them. Real wages, in comparison with the cost of living, are highest in Lancashire and Cheshire, London and the Midland Counties ranking next.

### UNITED STATES REPORT.

#### Work of the Bureau of Corporations.

Annual Report of the Commissioner of Corporations to the Secretary of Commerce and Labour for the fiscal year ended June 30, 1907. Washington, Government Printing Office, 1908. Pages, 7.

The Report of the United States Commissioner of Corporations for the year ended June 30, 1907, gives a brief summary of the work of the Bureau of Corporations during this period. There was a continuation of the investigations already begun with regard to the petroleum, tobacco and steel industries, and investigations were commenced concerning the character and operations of the International Harvester Company, the cause of the high prices of lumber, the causes of fluctuations and differences in the price of cotton, and the effect of patents granted to employees of the United States upon the cost of the patented articles to the Government. The object of the Bureau is stated to be to set before the President, Congress and the public reliable information as to the operation of the great interstate corporations, and it is believed that with such information the great corrective force of public opinion

can be intelligently and efficiently directed to the industrial evils. It is recommended that some system of administrative supervision be established by the Federal Government over all the great interstate corporations, so that information necessary for publicity may be obtained.

**RECENT LEGAL DECISIONS AFFECTING LABOUR.**

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

**NOVA SCOTIA CASE.**

**Inquest on Victims of Coal Mine Disaster.**

AN inquest was held to enquire into the cause of the death of six miners and four loaders who were killed by an explosion in the Port Hood Coal Company's mines at Port Hood on 7th February last. After an exhaustive enquiry the Coroner's jury returned the following verdict:—"We find that the deceased, Malcolm Beaton, Allan R. McDonald, Lachlin Gillis, John A. Campbell, William McKenzie, and the four Bulgarians came to their deaths on the morning of the 7th day of February,

1908, at or about the hour of 7 o'clock, near the southern ends of the upper and lower levels of No. 3 lift south in the Port Hood coal mines by an explosion of some explosive mixture."

An examination made since the inquest revealed an empty powder can completely shattered at the place of the explosion, and it is probable that this exploded in some way and set fire to the gas in the level which in turn exploded.

(Inquest re Beaton et al; 15th February, 1908; Cameron, Coroner).

**NEW BRUNSWICK CASE.**

**Civil Servants Liable for Municipal Taxes**

A test case to determine the liability of Civil Servants to pay Municipal taxes has recently been determined in favour

of the right of the Municipality to assess as income the salaries of Government officials, and collect taxes thereon. The City of St. John assessed Frank Abbott, a Dominion Customs officer for income in respect of the salary paid him for his services. An appeal was taken by Abbott from such assessment, on the ground that the income of a Dominion Government official is not taxable. The Court held, however that the assessment was right and dismissed the appeal.

(City of St. John v. Abbott; 7th February, 1908; Supreme Court, New Brunswick.

### QUEBEC CASES.

#### Coroner's Jury Finds Conductor Negligent.

An inquest was held to investigate the cause of the death of Herbert Symonds, a G. T. R., fireman, who died as the result of injuries sustained in a rear-end collision between two freight trains at Ste. Martine Junction, which occurred on 30th January. One of the trains was stationary when the other train came up and ran into the standing train, the deceased being pinned in the wreckage of the second engine and so injured that he died later. The jury brought in the following verdict:—

"That we, the undersigned jury, having heard the evidence, declare that Herbert Symonds, fireman, died in the General Hospital on February 2nd from injuries sustained in a collision between two freight trains on January 29. The accident happened because the train under the control of Conductor William F. Bottomley was not properly protected."

In his evidence, Conductor Bottomley admitted that he did not use torpedoes to protect the rear of his freight train. After his train had been stationary near Ste. Martine Junction for several minutes, he said he gave the signal to his engineer to go ahead, when he noticed a train coming behind. Then he seized a lantern and ran back to give a signal, but the train did not stop. He said he did not think the rear train was so close behind his own.

(Inquest re Symonds; 4th February, 1908; Biron, Assistant Coroner.)

#### Case for Railway Commission.

An inquest was held at Melbourne to inquire into the circumstances surrounding the death of Frank McDougall, an employee of the G.T.R., who was killed at the shops at Richmond on 7th February, by being caught between the tender of an outgoing engine and one of the shop doors. After hearing the evidence, the jury returned a verdict of accidental death, but thought the matter ought to be investigated by the Railway Commission as evidence was produced that some of the doors in question left barely room on one side for an engine to clear itself in entering or passing out of the shop.

(Inquest re McDougall; 8th February, 1908; Bachand; Coroner.)

#### Jury Exonerates Crew of Train.

An inquest was held at Montreal on the body of Walter J. Scott, a brakeman on a suburban train, who was run over by the International Limited at Strathmore Station on the G. T. R., on 28th January and killed. After hearing the evidence the jury returned the following verdict:—"After having heard the evidence, we declare that Walter James Scott died at Strathmore from wounds received having been struck by a Grand Trunk Railway train. The accident occurred because the train under the control of Henry Weitley should have stopped at Strathmore, but did not do so on account of the storm which prevented him from seeing the local train soon enough to stop, and not being able to judge whether the train was moving or stopped. Under the circumstances Engineer Henry Weitley is excused."

(Inquest re Scott; 31st January, 1908; Biron, Deputy Coroner.)

#### Jury Exonerates Railway Fireman.

An inquest was held at Montreal to investigate the cause of the death Arthur Mills and Robert Smith, engineer and fireman respectively in the employ of the G. T. R., who were killed in a collision between the Ottawa west-

bound express and two locomotives that had been coupled together and were standing on the main line in Turcot Village yard on 1st February. When the accident occurred Fireman Donald Munroe, of one of the stationary engines, had gone down the track to flag the approaching train. When called to give his evidence, Munroe was informed by the Coroner that he need not give evidence unless he desired to do so, as he might be charged with a crime, and the evidence he would give could be used against him. Munroe said he had nothing to fear, as he had done his very best to signal the train and had no hesitation in giving his evidence. He said he went back a distance of fifteen poles with a red lantern; that he first signalled the engineer, and when he received no reply from him ran across the track and waved his lantern on the fireman's side. He said he swung his lantern so hard that it went out, and as a last resort he threw it against the window of the cab as the engine passed him. He did not use tropedoes because he had no time, and owing to the snow-storm he did not see the engine until it was about one hundred yards from him. Other evidence was given along the same lines, and it was also shown that the rules of the Railway Company had been observed with reference to the precautions taken to prevent the collision. In reviewing the evidence the Coroner remarked that Munroe had given his evidence in the most straightforward way and that it was apparent he was telling the truth. The jury returned a verdict of excusable homicide.

(Inquest re Mills and Smith; 7th February, 1908; McMahan, Coroner).

### Jury Finds Negligence.

At an inquest held to inquire into the circumstances surrounding the death of Edward Gelly, who lost his life on the 24th January, in a collision between a train of the Great Northern Railway and one of the Quebec & Lake St. John Railway near River Pierre Junction, the Coroner's jury brought in the following verdict—"Died of a fracture of the

skull caused by a collision between two trains of the Q. & L. St. J. R., at River Pierre. We find that the Quebec & Lake St. John Railway Company is guilty of negligence in the keeping in repair of their engines."

(Inquest re Gelly; 27th January, 1908).

### Appeal for Early Closing By-law Dismissed.

In the case noted at page 697 of the December 1906, of the *Labour Gazette*, an appeal was taken by the city of Montreal from the judgment quashing the early-closing by-law passed by the city and judgment was recently given dismissing the appeal, and affirming the judgment of the Judge of first instance.

(Beauvais v. City of Montreal; 17th February, 1908; Court of Appeal).

### Inquest on Victims of Powder Explosion.

An inquest was held to determine the cause of the death of the nine workmen who were killed by an explosion at the works of the Standard Explosives Company, Limited, which occurred at Ile Perrot, near Montreal, on the 11th February. After an exhaustive enquiry the jury returned the following verdict:—

"We, the undersigned jurors, after having heard the evidence, declare that Pierre Menard, J. Baptiste Robillard, Joseph Rozon, Urgel Lauzon, Arthur Legault, Fortunat Trepanier, David Dumberry, Joseph Henripin and George Narge Rousseau have all met death at Ile Perrot, on February, 1908, following an explosion of nitro-glycerine which took place at that date in one of the buildings of the Standard Explosive Company, Limited.

"It is impossible to state the immediate and positive fact which caused the explosion, but it seems evident that it was caused by some thing falling in or against a vat containing nitro-glycerine".

"It is also evident that there can not have been any crime in the actual case, as there was nothing defective which could have led to the belief that an explosion would occur."

The Provincial Inspector of Factories

called as a witness testified that the plant of the Company was equipped with all necessary means to protect the lives of employees.

(Inquest re Menard et al; 15th February, 1908; McMahon, Coroner).

### Strikers Fined for Assault on Non-Striker.

Joaquin Morra and Salvador Herrera were recently convicted on a charge of assault upon Jose Esquerada, a fellow workman, and sentenced each to pay a fine of \$10 and costs, or in default of payment to one month in jail. The accused were among the cigarmakers who struck work at the cigar factory of Granda Hermanos Y. Ca. The victim, Esquerada, also a Cuban, did not go out on strike. On the 28th January, Morra, Herrera and another man, Martinez, appeared at the door of Esquerada's house, invited him to come out, and asked him if he was going to go to work. When he replied in the affirmative they assaulted him. Esquerada had his temple and the back of his head badly cut and was left lying on the sidewalk. In sentencing the accused the Judge said:—"You were on strike. Nobody cared whether you were on strike or not. You can be on strike for a year if you like, but you must not interfere with the rights of citizens."

(Rex v. Morra et al; Montreal, 12th February, 1908; Choquet, J.)

### Appeal in Damage Suit Dismissed.

In the case noted at page 941 of the February, 1906, number of the *Labour Gazette*, and at page 212 of the August, 1906, number, and at page 342 of the September, 1907, number, it will be remembered that at the trial before a jury the latter found that the contractor Martineau, who was sued jointly with the Light and Power Co., was not responsible for the accident which killed plaintiff's husband, but that the Light and Power Co., were, and that judgment went against the latter for \$8,000. On appeal the Court of Appeal held that the company was not responsible and dismissed the action, which judgment was affirmed by the Privy Council, the latter

Court intimating that if there was any liability for the accident it rested on the contractor Martineau, who had been absolved by the jury of all blame. The plaintiff thereupon took an appeal from the verdict and judgment at the trial in favour of the contractor to the Court of Appeal, which appeal was recently dismissed.

(Dunphy v. Martineau; 17th February, 1908; Court of Appeal).

### Interpretation of Words "Without Prejudice."

In the case noted at page 864 of the January number of the *Labour Gazette*, an appeal was taken by defendant to the Court of Appeal from the judgment of the Court of Review reversing the judgment at the trial in defendant's favour. The Court of Appeal has allowed the appeal and the action stands dismissed. In giving judgment, Trenholme, J., said: "The offer of November 11th, 1904, was subject to ratification by the directors. It was never ratified. Another position was offered plaintiff, he accepted it, drew the salary (the same salary as he would have had as manager) attached to it, and I am of opinion thereby waived his rights. The words "without prejudice" in plaintiff's letter affected his rights and preserved them only so long as negotiations were in progress, and when the proposition made to him was accepted by him the privilege preserved by his letter written "without prejudice" became extinguished. There was a contract of novation. Stewart accepted a totally different position to the one he claimed. He entered into the discharge of the duties of the position and remained there for seven months, and was requested to resign after one month's notice (another condition accepted by him). How can he pretend to his rights under his letter to the Company in the face of these facts? There was a new contract between the parties."

Taschereau, C. J., said:—"The words "without prejudice" are applicable only in the case of a proposition not as yet accepted by the other party. When the negotiation is terminated by an agree-

ment the privilege created by the letter written "without prejudice" ceases.

(Stewart v. Nelson; 17th February, 1908; Court of Appeal).

#### Damages for Death.

Plaintiff, a widow, brought an action in the Superior Court at Quebec to recover damages for the death of her husband, who was killed while in the employment of defendant. Deceased was working on the ground floor of defendant's provision store, when another employee working on the third floor while shifting bags of seed, threw one off his shoulder and it fell too near an opening leading to the floors below and partly slipped down. Before it fell completely through the opening the workman above caught the bag by one of the lugs and whilst holding it shouted to those below to look out. Deceased, hearing the shout, stepped under the opening to look up and was hit by the falling bag and knocked down, his head coming in violent contact with the floor. He died ten days afterwards of inflammation or congestion of the brain. The Court found that there was common fault and divided the damages and awarded plaintiff \$600 and costs.

(Cote v. Tanguay; 3rd January, 1908).

#### Damages for Loss of Fingers.

Plaintiff brought suit in the Superior Court at Montreal to recover \$1,500 damages for personal injuries sustained by him while in the employ of defendants, owing as alleged to the negligence of the latter. While at work on the 1st August, 1907, assisting in the unloading of the S. S. "Montreal," plaintiff had one finger of the right hand cut off and the fore-finger crushed. Two gangs were at work, one bringing up iron wheels and the other bars of steel from the same hold. Plaintiff, who was working with the gang bringing up the wheels was on a ladder between the two gangs, when one of the bars being raised by the other gang caught his hand on the ladder and caused the injury. Plaintiff claimed that according to the rules when two gangs are working one holds the loads which should

have been brought up alternately and not simultaneously. A jury found defendants at fault and awarded plaintiff \$350. as damages.

(Lefebvre v. C. P. R. Co.; 30th January, 1808; Lafontaine, J.)

#### Damages for Crushed Hand.

Plaintiff, as tutor to Antoinette Desrosiers aged 16 years, brought action in the Superior Court at Montreal to recover \$3,000 damages on account of the girl having had one of her hands crushed by some machinery while working in defendants' paper-box factory. The Court found that the accident was due to the defective condition of the machinery, and maintained the action to the extent of \$250.

(Labelle v. The Miller Bros. Co., Ltd., 3rd February, 1908; Loranger, J.)

#### Damage Action Settled out of Court.

After one trial at which the jury disagreed, and when half-way through the second trial, an action brought in the Superior Court at Montreal by James Mills, formerly janitor of the Redpath Library, against the corporation of McGill University to recover damages for the loss of three fingers, while in the employ of defendants, was settled, the plaintiff receiving an amount which was not made public. The accident occurred while plaintiff was using a planer in making cases for the shipment of books, and he claimed that he was not supposed to do that sort of work, but that he was ordered to do it, although he had been given no instructions as to the working of the planer. Defendants alleged that plaintiff represented himself as an experienced carpenter, and that he undertook the making of the cases voluntarily.

(Mills v. McGill University; 15th February, 1908; Guerin, J.)

#### Judgment in Damage Action Confirmed.

In the case noted at page 1029 of the March 1907, number of the *Labour Gazette*, an appeal by defendants from the judgment at the trial has been dismissed.

(Matte v. Meldrum Bros., Ltd.; 31st January, 1908; Court of Review).

## ONTARIO CASES.

### Verdict of Coroner's Jury on Victims of Dynamite Explosion.

A coroner's jury at Kenora, Ont., brought in the following verdict on January 17th, with respect to a fatal dynamite explosion in connection with the construction of the Transcontinental Railway: (†)

"That M. Dell, Besaraba, M. Gavan and Mazurki came to their death through an explosion of dynamite at Thompson L. Eagn's camp 3, T. C. R. construction work, cause of said explosion being unknown, as all the men at work at the time were killed. We would recommend government inspection of the men in charge of the handling of explosives on all railway construction work or other large works in order to endeavour to lessen the number of accidents from this cause."

### Importance of Having Agreements in Writing.

Two suits to recover wages were recently tried and disposed of in the Division Court in the county of Elgin. In the first case plaintiff agreed with defendant to serve him as a farm labourer for a year to run from a future named date, for the sum of \$180, and in the second case the agreement was the same with the exception that the remuneration was to be \$250. The Statute of Frauds prohibits recovery upon any contract not to be performed within a year, unless such contract be in writing signed by the party to be charged, or some one authorized by him. In each case the plaintiff, after serving for a few months, left the defendant's employ in the summer without justifiable cause, after having received a portion of his wages, but not the full proportion of the year's wage to which he would be entitled, if regard were had simply to the length of time he had served. Upon this calculation \$15, would be due to plaintiff in the first case, and \$50, to plaintiff in the second case. Suit was in each case brought for wages for the period of actual

service, as on a quantum meruit. Both defendants disputed the claims and set up a breach of their contract by the plaintiffs as a complete defence. After reserving judgment the Judge rendered a written judgment covering both cases, in which he reviewed the law at length, and came to the conclusion that no recovery could be had for acts of part performance by a party who has himself repudiated the contract, and that this was equally so in cases where there was a written agreement, and in those where there was none, as in the cases in hand, where the doctrine of part performance was invoked. In dealing with a contention of the plaintiff in one of the cases that he had a right to terminate his contract, if it existed, by a month's notice, according to the well known rule applicable to domestic servants, and if that was the case the deduction of a month's wages might be made in lieu of the month's notice which was not given. The learned Judge said as to this, that apart from the question as to whether a farm labourer is a domestic servant, the contention failed for the reason stated in Smith's Master and Servant, 5th ed., p. 65 as follows:—"But it is conceived to be perfectly clear, notwithstanding a notion to the contrary, which is believed to be not uncommon, that a domestic or other yearly servant, wrongfully quitting his master's service forfeits all claim for wages for that part of the current year during which he has served, and cannot, after having wilfully violated the contract according to which he was hired, claim the sum to which his wages would have amounted had he kept his contract, merely deducting therefrom one month's wages."

The actions were accordingly dismissed.

(Collins v. Smith; Campbell v. McWilliams; 3rd February, 1908; Ermatinger, Co. J.)

### Of Interest to Members of Fraternal Societies.

An interesting case was recently disposed of in Court at Ottawa, as to liability in case of non-payment of dues. The action was brought by St. Bridget's Court of the Catholic Order of Foresters

† A report of this disaster was published in the *Labour Gazette* for February, 1908, page 1,006.

against one of its members. Defendant defaulted payment of dues, which were paid to the High Court by St. Bridget's Court according to custom. The amount of the dues paid to the High Court by the Local Court, together with the Local Court dues, amounted to \$44.94. Defendant refused to pay these, as he claimed that from the time he defaulted a payment he became no longer a member and was not enjoying any of the benefits of the order afterwards. He had never instructed the Local Court to pay his High Court, dues for him. The judge found that he was enjoying the benefits of the Society and was insured during the time his dues were being paid by the Local Court. While the plaintiffs had failed to establish that they had been instructed by defendant to pay his fees, the request was implied by law. He therefore gave judgment for the full amount claimed and costs.

(St. Bridget's Court, C. O. F., v. Butterworth; 19th February, 1908; MacTavish, Co. J.)

### Plumbers' Combine.

An echo of the prosecution of the Plumbers' Association for an illegal combination in restraint of trade was heard in the Assize Court at Toronto recently. Plaintiffs, a firm of plumbers, sued defendants to recover \$698.92 as balance on an account for installing fire-extinguishing apparatus in the latter's factory. The defendants resisted payment, alleging that the contract on which the claim was based was void, as the plaintiffs had entered into an illegal conspiracy to prevent competition among the tenderers. Sums amounting to \$4,000 had already been paid to plaintiffs by defendants, on the contract and they filed a counter claim asking for the return of the amount or some part of it. The case for the defence arose out of the recent conviction of the Plumbers' Association as being an illegal combine in restraint of trade, but the presiding Judge refused to admit general evidence about the Plumbers' Association and the Plumbers' Supply Company as part of the defendants' case, saying that evidence of a general conspiracy had nothing to do with the particular contract in dis-

pute and that unless the evidence showed that the tenderers for this particular contract compared their tenders he could not admit it. The jury brought in a verdict for \$600.

(McGuire v. Cobban Mfg. Co.; 19th February, 1908; Falconbridge, C. J.)

### Jury Condemn Drill Runner and Mine Management.

An inquest was held at Cobalt to enquire into the cause of the death of Constant Courtout, who was killed at the Right-of-Way mine on 14th February. Courtout, who was a machine helper, set up a drill in the southwest crosscut from the main drift of No. 1 shaft at the 75 foot level, and drilled into an old hole, where it is supposed a small portion of powder remained in the bottom of the hole and failed to explode, and when Courtout drilled into it an explosion occurred, killing Courtout and seriously injuring Emile Bernier, a drill runner, who was working with him. The Coroner's jury brought in the following verdict:—"Constant Courtout came to his death from an explosion of dynamite as the result of incompetency on the part of Emile Bernier, drill runner, also gross negligence on the part of the mine management in not having the end of the abandoned shaft examined before sending men in to work." The jury further censured the management for employing incompetent miners.

(Inquest re Courtout; 17th February, 1908.)

### Defence of Want of Notice of Accident Fails.

Action under the Workmen's Compensation for Injuries Act for personal injuries sustained by plaintiff, a workman in defendants' mill, owing, as alleged to the negligence of defendants or their servants. Plaintiff, a young man 25 years of age, had been a day and a half employed in the mill of defendants at a wage of \$9 a week, when the accident happened in which he was injured. There was a perpendicular elevator with belt and steps thereon revolving from top to bottom floor of the mill. It was used both by the men and also for the

carriage of goods, etc. The steps are the width of the band or belt, i. e., 14 inches or so, and were 12 inches thick. Plaintiff was set to work by the foreman on the lower storey taking off bags of crushed oats which were carried from the second storey, and handing them over to another workman to be weighed. Plaintiff was a new hand at the work, and on the second day he was put to work for the first time at this kind of elevator and was hurt a few minutes after, by a bag falling off the step of the elevator. It was not an uncommon thing for bags to fall off the elevator, and while defendants sought to show that plaintiff had been warned of the danger, the trial judge held that the foreman should have taken more pains to advise him of the danger and the means of safety, and he found the defendants guilty of negligence in this regard and awarded plaintiff \$400 damages.

Defendants contended that the notice of accident required to be given by the act was given too late, the 12 weeks having expired on the 8th of May, while the accident happened on the 12th, February. Notice was only given on the 18th May, or ten days too late. They set this fact up by way of defence, but themselves did not give the notice required to be given by the Act, Sec. 14, that they intended to rely on the want of notice as a defence, until after the case had been called on the list and had been put to the foot of the list. This was on 23rd January, and the case was again called on, the 27th January, when it was put off on the application of defendants, they not being ready to proceed, although plaintiff was. The Act, sec. 14. requires the defendant's notice to be served "not less than 7 days before the hearing of the action," so that on 27th January, when plaintiff was ready to go on, the 7 days had not expired. The trial Judge held that under the circumstances the notice should have been served 7 clear days before the 27th January, and declined to give effect to the defence based upon the want of notice of accident by plaintiff, as to which he said the defendants were in no wise

or in any sense prejudiced in their defence by the omission.

(Potter v. McCann; 15th February, 1908; Boyd, C.)

### Damages for Death of Railway Watchman.

Plaintiff sued under the provisions of the Fatal Accidents Act to recover damages for the death of her husband, who was killed on the night of 14th October, 1907, owing as she alleged to the negligence of defendants, and the action was brought for the benefit of the plaintiff and four children of the deceased. He was a watchman in the employment of the defendants at the Colborne Street crossing of their railway in the city of London. According to the evidence, deceased was last seen alive a few minutes before his dead body was discovered between the rails of a track called the "Old Port" and five or six feet from the west side of Colborne Street. When seen alive deceased was on the sidewalk on the east side of Colborne Street, between Taylor's and Walker's tracks, carrying his lamp. On this night, which was said not to be very dark, a train crew was engaged in making up a train, which came from the old Grand Trunk yard, and was then backed eastward in order to put two cars on the "Old Port" track, west of Colborne Street; it was then pulled across Colborne Street eastward till the engine which was at the head of it was beyond Burwell Street, the next intersecting street east of Colborne Street; two cars were then backed on to the old Grand Trunk track. After this was done, the train went eastward on that track about 100 feet east of Colborne Street; two cars were kicked off and ran across Colborne Street; the brakeman was on the top of the westerly car, standing about twelve feet from the east end of it, he had a lamp in his hand and glanced westward, not looking as he said for anyone, thinking, as he also said, that it was not his business to look when there was a watchman on the crossing; he made no signal and gave no warning that the cars were in motion, but was on the car apparently

for the sole purpose of stopping the cars by the application of the brakes when they had gone the distance they were intended to go west of Colborne Street; there was no light on the crossing, but there was one on Bathurst Street and another on York Street, each distant from 150 to 175 feet from the tracks crossing Colborne Street; no one was stationed on either of the cars that were being kicked off, to warn persons, and the engine bell was not ringing. When the deceased was found, his head was severed from his body, which had evidently been run over by a car. The trial Judge held that the inference could properly be drawn that the deceased was knocked down and run over by the two cars which were being kicked across Colborne Street, and that the deceased was not aware of the approach of the moving cars; that defendants were guilty of negligence in that they failed to discharge their duty not to subject the deceased to unnecessary danger and that deceased was not guilty of contributory negligence. He also held that Section 276 of the Railway Act, providing for the stationing of persons on trains or parts of trains moving reversely to give warning to persons crossing the tracks, was applicable as regards deceased. Judgment was given in plaintiff's favour for \$900 damages.

(Lamond v. G. T. R.: 21st February, 1908; Meredith, C. J.)

#### Appeal in Damage Suit Dismissed.

In a case noted at page 737 of the December number of the *Labour Gazette*, an appeal was taken by plaintiff from the judgment at the trial dismissing the action. In dismissing the appeal the Court held that, granting that there was initial negligence on the part of defendants in failing to plant a flag 24 poles distant from the broken rail, yet upon a review of all the evidence it is impossible to displace the judgment appealed from. The warnings given to the deceased engine driver were the planting of the red flag 1,800 feet (14 poles) distant, and beyond that four rails in length, a torpedo on the track. This flag could be seen about 450 feet before coming to it,

and shortly after passing the flag the place could easily be seen in the light of day, where the men were working at the repairs on the track. For the last 1,200 feet there was an up-grade, which terminated just at the place of repair, which was on the level. The expert said that a train of this size, at this rate of speed, could be stopped in 460 feet by proper service application of the brakes, and after getting down to the slow speed could have been readily stopped within 30 feet. The evidence leads to the belief that the driver misapprehended the situation, mistook his duties, and violated several plain rules of the company. The single torpedo explosion and the red flag are each signals to stop, whereas the driver's response was as for a green and a red flag which means "proceed with caution", as that is what the driver did until the engine ran off and he was killed. This is shown by the gauge of the air brakes, which showed that there was not sufficient service application to stop the train. This the deceased failed to do, either from mistake, disobedience or other inexplicable cause. No blame in this regard can rest on the company, for all the appliances were in efficient order. Besides this, the section foreman ran down the track about 150 yards waving his hand and hat violently, and the other men also gave warning, standing where the repairs were being made. The necessity of prompt decision is of vital importance in railway administration. The man in charge of an engine is not to reason why when a signal is given; his duty is prompt and accurate obedience. Here he had ample opportunity, with entire safety to have stopped the train in due course by a gradual and full application of the brakes so as to get a full-set brake, and this without doing any injury to the plant of the Company.

(Fanning v. C. P. R. Co.; 19th February, 1908; Divisional Court.)

#### Motorman Acquitted of Criminal Negligence.

George C. Smith, who was committed for trial on a charge of criminal negligence in running into a freight train at the

Queen Street east crossing of the G. T. R., as noted at page 1 of the February number of the *Labour Gazette*, was tried at the General Sessions for the County of York. After the evidence was in, the presiding Judge directed the jury to acquit the prisoner, the Crown having failed to prove the charge. The accused was acquitted accordingly.

(Rex v. Smith; 14th January, 1908; Winchester, Co. J.)

### Jury Finds Death Accidental.

An inquest was held at St. Catharines to determine the cause of the death of Conductor A. E. Campbell, who was killed in a train wreck at Merritt on the line of the G. T. R., on 27th January. A through freight coming down over the Welland division met with a mishap just as it approached McKenzie's crossing, about three hundred yards east of the station. An axle on one of the cars snapped and the rear end of the train was thrown into the ditch and a portion of the train strewn over the main line tracks. A second fast freight just at this moment approached from Niagara Falls, crashed into the wrecked train and demolished several freight cars. Campbell, conductor on the Welland division train was thrown under a car when the first crash came and instantly killed. After hearing all the evidence the Coroner's jury returned a verdict that the death was accidental and no one was to blame.

(Inquest re Campbell; 30th January, 1908; Merritt, Coroner.)

### Jury Finds Negligence of Person Unknown

An inquest was held to enquire into the circumstances surrounding the death of William Neish, a fireman on the Michigan Central R. R., who was killed while on duty on 30th January at Ruscombe. Evidence shewed that Neish was killed by jumping from his engine after an explosion in the fire-box, but that his scalds were sufficient to cause death. The explosion was due not to a bursting flue, but to the crown sheet pulling away from the stay bolts and dropping. Experts declined to say if this was due to defective workmanship

or to the sheet being burned. The jury rendered a verdict to the effect that Neish's death was due to negligence on the part of some party unknown to the jury.

(Inquest re Neish; 5th February, 1908; McNiven-Coroner.)

### Engineer, Conductor and Motorman Committed for Trial.

In connection with the case noted at page 102 of the February number of the *Labour Gazette*, warrants were issued for the arrest of engineer, conductor and motorman respectively on a charge of manslaughter. After a preliminary hearing in the Police Court the accused were committed for trial.

(Rex v. Moran et al; 7th February, 1908; O'Keefe, P.M.)

### Fraudulent Apple Packing.

In the Police Court at Trenton the case of G. Alger and F. A. Ferguson on a charge preferred by the Government Inspector of improper marking of apples, was heard. The principal witness for the prosecution was Inspector Gandy of St. John, N. B., who examined the apples in question and swore positively that the packing was fraudulent and the packages over-marked. Alger, one of the accused, was not present. Ferguson was convicted, and announced his intention to go to jail rather than pay a fine, and the heavy costs necessary in bringing testimony from New Brunswick.

(Rex v. Alger & Ferguson; 6th February, 1908; O'Rourke, P. M.)

Geo. E. Alger, of Frankford, was convicted in the Police Court at Trenton of offering for sale 59 barrels of apples packed contrary to the provisions of the Inspection Act. Evidence was given that the packages contained a large percentage of small, defective and inferior specimens. The Magistrate, in pronouncing sentence, said that had it not been the first offence of the defendant he would have imposed the maximum penalty. As it was he imposed a fine of 50c. a package.

(Rex v. Alger; 27th January, 1908; O'Rourke, P. M.)

Five apple dealers were recently fined \$10 and costs each in the Police Court at Brighton for violations of the Dominion Fruit Marks Act. There have been many prosecutions in that locality, and in nearly every case the shippers and packers have pleaded guilty, and paid their fines. At the conclusion of the cases, the Government Inspector gave a short address to the large number of fruit dealers present, explaining sections of the Act and making clear that the object of the Department in prosecuting the offenders was not to persecute certain individuals but to uphold the integrity of the apple trade at home and abroad.

(7th February, 1908; Wade, P. M.)

R. J. Graham, fruit shipper of Belleville, recently pleaded guilty in the Police Court to three charges of violating the Fruit Marks Act in selling, offering, exposing or having in his possession for sale, fruit marked higher than its quality would warrant. He was fined 25 cents a barrel for all such fruit. Three packers in Mr. Graham's employ, T. J. Thompson of Springbrook, James Marchen of Tweed and L. Emmerson of Tweed, pleaded guilty to packing the fraudulently marked fruit, and were fined \$5. each and costs.

(Rex v. Graham et al; 13th February, 1908; Masson, P. M.)

At Brighton recently Robert Wade, a fruit shipper, who, it was alleged, had sent a number of barrels of fraudulently marked fruit to Montreal, was convicted and fined 25 cents a barrel for 72 barrels and the costs.

(Rex v. Wade; 12th February, 1908; Wade, P. M.)

### Fraudulent Use of the Mails.

On the instructions of the Post Office authorities, Daniel Murray was arrested at Toronto on a charge of fraudulent use of the mails. Accused had been flooding the Province with circulars, describing himself as Murray & Co., manufacturing jewellers, 129 Queen Street East, offering \$25 worth of Jewellery for \$6.—50 cents down and the balance to be paid in monthly instalments of 50 cents. When the detectives searched

the premises at Queen Street East they found no trace of jewellery, but there was about \$16 in money received in answer to advertisements, this representing some first instalments of 50 cents paid on the jewellery. After a hearing in the Police Court, Murray was convicted and sentenced to 30 days in jail.

(Rex v. Murray; 7th February, 1908; Denison, P. M.)

William J. Francis was recently arrested at Toronto on a charge of using the mails for fraudulent purposes. He had been for some time past advertising indiscriminately for stenographers, book-keepers and other clerical female workers, not only in Toronto, but in the neighborhood of Sault Ste. Marie. The matter was brought to the attention of the Post Office authorities by a young woman who had answered one of the advertisements only to find that he had no position at his disposal. A search of the accused's room resulted in the finding of over a hundred letters from different people, most of them replies to advertisements of non-existent positions. After an investigation the Post Office Inspector, who laid the charge, found that there was no criminal intent on the part of accused, and he withdrew the charge.

(Rex v. Francis; 18th February, 1908; Denison, P. M.)

### Breach of Lord's Day Act.

Louis Birks, a newsboy, was recently fined \$40 in the Police Court at Hamilton, for selling American newspapers on Sunday, 12th January, contrary to the provisions of the Lord's Day Act. Birks did not deny the offence, but a plea was made on his behalf that he had as much right to sell papers on Sunday as on any other day. The Magistrate imposed the maximum fine, because Birks had been disobeying the law, the police, and the Courts by persisting in selling papers on Sunday, after being cautioned.\*

(Rex v. Birks; 11th February, 1908; Jelfs, P. M.)

### Claimed Damages for Arrest while Picketing.

At the Jury Assizes at Toronto recently an action was tried in which

\*For a record of a former conviction of Birks for the same offence, see page 1144 of the April, 1907, number of the *Labour Gazette*.

plaintiff, a young machinist, through his father sought to recover \$1,000 damages from defendants for false arrest. In his evidence the young man said that he was one of the striking machinists, and for several weeks had acted as a picket outside the defendants' workshop, and on 12th August last at the instance of one of defendants, he was arrested by a plain clothes officer and placed under custody. In the Police Court he was discharged, as no information was laid against him. The defendants denied that they had ordered any criminal prosecution to be instituted against the young man. After the conclusion of the plaintiff's case the presiding Judge took the case from the Jury and dismissed the action.

(Plant v. Jones & Moore Electric Co.; 19th February, 1908; Falconbridge, C. J.)

#### **New Trial of Damage Action Ordered.**

Action by a workman under the Workmen's Compensation Act to recover damages for the loss of an eye caused by the bursting of an alleged defective anvil under a steam hammer that he was operating. At the trial before Mabee, J., plaintiff recovered a verdict for \$1,500 damages. Defendants appealed and asked for a new trial on the ground of improper admission of evidence. During the cross-examination of the manager of the defendant company, counsel for the plaintiff, against the strong objection of counsel for defendants, and after being warned by the trial Judge that he must be prepared to take the risk, was allowed to prove the fact that the defendant company was insured against accidents, and that the guarantee company, to which the defendants paid their premium, had to stand between them and loss. The Court held that this evidence was improperly admitted, and that it could not be said that it did not affect the result, and ordered a new trial.

(Lougheed v. Collingwood Shipbuilding Co.; 31st January, 1908; Divisional Court.)

#### **Damage Action Settled.**

An action brought by the widow of James S. Irvine, a baggage-man in the

employ of the C. P. R., who was killed in a wreck at Moor Lake in November last, to recover damages for his death, alleging negligence on the part of the Railway, has been settled out of Court by payment to the plaintiff for herself and children of the sum of \$2,437.48.

(Irvine v. C. P. R.; 8th February, 1908).

#### **Judgment in Damage Action Confirmed.**

In the case noted at page 870 of the January number of the *Labour Gazette*, a Divisional Court has dismissed an appeal taken by plaintiff from the judgment at the trial dismissing the action on motion for non-suit.

(Whiteman v. Hamilton Steel & Iron Co.; 11th February, 1908).

#### **Consent Judgments in Damage Actions.**

Arthur Tarry, an employee of defendants at East Toronto, was killed in the railway yards in February, 1907, leaving one son an infant. A consent judgment was approved by the Court on behalf of the infant, by which plaintiff was awarded \$950 damages and \$250 from the Grand Trunk Insurance and Provident Society, the money to be paid into Court for the benefit of the infant.

(Tarry v. G. T. R. Co.; 16th February, 1908; Britton J.)

In an action brought by the widow and three children of Thomas Aughton, a scaffold maker in the employ of Brown & Love, contractors, who was killed by a fall from the fifth storey of the Confederation Life building on November 14th last, a consent judgment has been entered in plaintiff's favour for \$250, the judgment being approved by the Court on behalf of the infant plaintiff's. Of the sum awarded, \$50 goes to the widow, and \$200 is paid to the Official Guardian, to be by him applied in his discretion from time to time for the maintenance of the infants.

(Aughton v. Dominion Bridge Co.; 10th February, 1908 Britton, J.)

#### **Damage Action Settled.**

Plaintiff's husband was killed while working in defendants' factory, but the

death appeared to have been purely accidental. By consent, however, the parties agreed that judgment should be entered for plaintiff for \$875 and costs. Of this sum \$500 to be applied in paying balance due on house built by deceased, and balance to be paid to plaintiff for her own benefit. House not to be sold without sanction of Court.

(Liptrott v. Whitman & Barnes Co.; 29th January, 1908; Mulock, C. J.)

### **New Trial Ordered.**

In the case noted at page 739 of the December, 1907, number of the *Labour Gazette*, on an appeal by plaintiff from the judgment at the trial dismissing the action, a new trial of the cases has been ordered by the Court.

(Curtis v. Michigan Central R. R. Co.; 29th January, 1908; Divisional Court.)

### **Appeal in Damage Suit Dismissed.**

Plaintiff sued to recover damages for the loss of an eye and two fingers while in the employ of defendant, owing as alleged to the negligence of the latter. At the close of the case motion was made to non-suit the plaintiff, but judgment on such motion was reserved, the case being allowed to go to the jury who rendered a verdict for plaintiff for \$300. Subsequently, on the 19th October, 1907, Falconbridge, C. J., gave judgment on the motion for non-suit dismissing the action. Plaintiff appealed, but his appeal has been dismissed with costs.

(Hamill v. Nicholson; 30th January, 1908; Divisional Court.)

In the case noted at page 620 of the November, 1907, number of the *Labour Gazette*, appeals by plaintiffs from the judgments dismissing the actions after the trial have been dismissed.

(Ede v. Canada Foundry Co.; Lynn v. the same; 1st February, 1908; Divisional Court.)

### **New Trial of Damage Action.**

Plaintiff, a labourer employed by defendants, brought action to recover damages for personal injuries sustained by him while in the employment of defendants, owing, as alleged, to

the negligence of the latter. Plaintiff alleged that he was ordered to dry some dynamite, and that while so engaged the dynamite exploded and he lost the sight of one eye and was otherwise injured. Defendants, besides denying that the injury was caused by an explosion of dynamite, alleged that plaintiff was injured by an explosion of detonating caps which he was carrying in his pocket, contrary to orders, and that it was caused by his own negligence. At the trial plaintiff failed to obtain leave to amend by charging defendants with negligence, causing injury to him by the explosion of caps. At the trial the jury found that the plaintiff's injury was not caused by an explosion of dynamite, and the presiding judge, Judge Britton, J., on 4th October, 1907, entered judgment dismissing the action. Plaintiff appealed and the Court has allowed the appeal and granted the amendment asked for at the trial and ordered a new trial.

(Pascal v. Nicholson; 13 February, 1908; Divisional Court.)

### **Fraudulent Employment Agent Convicted**

H. Chapman was recently arrested at London while fleeing to the United States, and brought back to Toronto, where he was wanted on a charge of obtaining money by false pretences from a number of Italians. On the pretence that he would secure work for them at Queen's University for which it would be necessary for them to have uniforms, he secured sums ranging from \$7 to \$15, from his victims. He represented that they would get \$2.50 a day and their most arduous duties would be wearing splendid uniforms and answering the bell for dinner. After pleading not guilty, Chapman changed his plea to guilty and was sentenced to 13 months in the Central Prison.

(Rex v. Chapman; Chapman; 19th February, 1908; Denison, P. M.)

### **Employment Agent Loses Action for Conspiracy.**

An action to recover \$5,000 damages from J. Ross Robertson, proprietor of the Evening Telegram, C. O. Knowles,

news editor and J. C. Boylen, a reporter of the paper came up for trial at Toronto recently. The plaintiff was D. J. Van Dusen, who runs an employment agency in the city, under the name of the New Method Employment Bureau. He alleged that the defendants entered into a conspiracy to injure his business on November 21st, 1906. Boylen and Hall, another reporter, were directed to investigate complaints into the methods employed by Van Dusen in his business. Hall went up to the Bureau on November 21st to ask for a position. He paid \$1 and was sent to a firm on Wellington Street for a book-keeper's job, and was told by the firm that the position had been filled some time before, so Hall returned and reported the fact to Van Dusen. A week later Boylen went to the Bureau and asked for a book-keeper's position. He paid \$1 and was sent to the Wellington Street firm, where he received the same answer as Hall. Hall then swore out an information charging Van Dusen with fraud. In the Police Court the case was dismissed, but it was followed by the publication of an article in the Telegram which Van Dusen claimed damaged his business. At the close of the plaintiff's case the presiding Judge nonsuited the plaintiff and dismissed the action. In doing so the Judge said that the defendant Robertson had only done his duty in investigating the complaints which came into his newspaper office about the methods of the plaintiff, who used his advertising columns.

(VanDusen v. Robertson et al; 12th February, 1908; Mabee, J.)

#### Cases Under Ontario Factories Act.

On Dec. 27th, action was brought against the owner of a building occupied as a cigar factory in Toronto for not providing the necessary lavatory accommodation as required by sec. 15—16 Ontario Factories Act. The information was laid by A. W. Holmes, Factory Inspector, before Magistrate Kingsford. On hearing the evidence the Magistrate gave defendant one week in which to provide the necessary accommodation, at the end of one week satisfactory progress

had been made, and an extension of another week was added. As the work was completed within the time allowed the case was withdrawn at the instance of the inspector.

The Manitoulin Ranch & Lumber Company operates a saw mill at Meldrum Bay on Manitoulin Island. About Nov. 15 a boy 10 years of age was brought from Meldrum Bay to Gore Bay to have a surgical operation performed on his head, a portion of which had been taken off by a saw while he was at this company's mill. This accident to a child under school age was brought to the notice of the resident school inspector, and on inquiry it was found that a large number of boys under 14 years of age had been employed in this mill all summer. Shortly after this (Nov. 28) a report came from Little Current that a boy twelve years old had been caught in a machine shaft in a mill there and killed. Later, five informations were sworn against this company for violation of various provisions of the act.

The cases were held at Meldrum Bay on Nov. 27. Police Magistrate Price of Gore Bay, presiding. The following is a summary of the results:—

(1) For employing Nelson Smith a boy 10 years of age contrary to the provisions of R. S. O. 1897 Chap. 256. It appeared from the evidence that this boy had been employed in the shingle mill, a department of the company's saw mill, and while working there had had a portion of his hand taken off. He had also been employed by the company at other work in the mill. Conviction was secured for the limit \$50.00 and costs.

(2) For employing Lawrence Russ, a boy 11 years of age contrary to the provisions of R. S. O. 1897 Chap. 256. This boy was employed to operate a buzz saw cutting bands for shingles. This is considered a hazardous job for an adult. Conviction was secured for \$30.00 and costs.

(3) For employing Leslie Russ a boy ten years of age contrary to the provisions of Chapter 256, R. S. O. This boy was employed turning shingle butts, and also took turns in relieving Lawrence

Russ in operating the buzz saw. A judgment for \$10.00 and costs was obtained.

(4) An information had been laid against the company for keeping their factory in a condition so as to endanger the health and safety of their employees, contrary to the provision of the act. The company having been impressed by the cases first heard, the prosecution thought it well not to press this last charge and the case was withdrawn.

(5) On Dec. 4th, Mr. A. W. Holmes, Inspector of Factories laid information in ten cases, against Messrs. Moulthrop, Sharp and Jackson of Little Currant and the Wolverine Lumber Co., before Magistrate Price of Gore Bay which resulted as follows.

(1) For failure to send written notice of the death of one George Jones killed in their mill at Little Currant to the Inspector of Factories as provided by sec. 22—23—24 Ontario Factories Act, fined \$50.00 and costs.

(2) For having in their employ a boy 12 years of age contrary to the Act, for carrying water to the mill and drawing slabs to a conveyer, fined \$50.00 and costs.

(3) For having in their employ a boy 12 years of age, fined \$5.00 and costs.

(4) For employing a boy 13 years, of age, \$1.00 and costs.

Prosecutions against the Wolverine Cedar and Lumber Co., were brought as follows.

(1) For failure to furnish notice to the Inspector, of accident in mill, fined \$10.00 and costs.

(2) For having in their employ a boy 12 years of age fined \$5.00 and costs.

(3) For having in their employ a boy under 14 years, fined \$5.00 and costs.

(4) For having in their employ a boy under 14 years, fined \$5.00 and costs.

Prosecutions were brought at Little Currant against parents for permitting their boys under the age of 14 years to work in the saw mills. John Smith and John Stewart were each fined \$1.00 and costs.

## SASKATCHEWAN CASE.

### Engineer Acquitted of Charge of Manslaughter.

As the result of the verdict of a Coroner's jury, Robert Hinchey, an engineer in the employment of the C. P. R., was arrested on a charge of manslaughter through criminal negligence in connection with a collision between two trains near Fushimi siding on the morning of October 30th, 1907, and after a preliminary hearing was committed for trial at the Assizes. The collision resulted in the death of Charles Britt, a fireman, and N. J. Robinson, an express messenger, both on the train which accused was driving. Hinchey, who was the engineer of the eastbound passenger local, received orders to wait at Fushimi siding until eight o'clock for extra freight No. 1314. At four minutes to eight the collision occurred between the freight and the passenger trains a mile and a quarter east of the siding. At the trial all the witnesses for the Crown agreed as to the time, but the defence built up a case on expert evidence to the effect that standard watches with stem wind and set are unreliable. Accused went on the stand and stated that his watch was 20 seconds out on leaving Moose Jaw. At Fushimi siding his time half a minute past eight and he ran through thinking that the freight was holding at Pilot Butte. He had a new engine and the packing around the inspirator blew out. While fixing this the wreck occurred. Other railwaymen testified that their watches often gained slightly within a few miles, and were generally unreliable. The baggageman testified that after the wreck he looked at Hinchey's watch, which was eight minutes fast. The jury returned a verdict of "not guilty".

(Rex v. Hinchey; 31st January, 1908; Regina Assizes).

## BRITISH COLUMBIA CASES.

### Natal Act Declared Ultra Vires with Respect to Japanese.

Two Japanese were recently arrested at New Westminster on a charge of violation of the Natal Act recently passed by the Provincial Legislature, in

entering the Province without complying with the requirements of the Act. They were each fined \$500, and sentenced to twelve months' imprisonment. They refused to take advantage of the option granted by the Magistrate that each furnish security in two sums of \$250 and take their liberty on condition of their immediately leaving the Province, being resolved to test the validity of the Act under which they were arrested. Subsequently Habeas Corpus proceedings were taken on their behalf in the Supreme Court of British Columbia with the result that the Act has been declared to be in conflict with Dominion legislation on the same subject matter and therefore *ultra vires* of the Province. In rendering his decision to this effect, the Hon. Chief Justice Hunter of British Columbia, spoke in part as follows:—

#### HIS LORDSHIP'S DECISION.

"It is, as I understand it, admitted at the outset that the applicants here are subjects of the Emperor of Japan, and they come to court questioning the validity of their detention under the act which has been recently passed by the British Columbia legislature, which, for the sake of brevity, I shall refer to as the Natal Act.

Now, so far as I can see, it is not necessary on the present occasion to consider how far the Natal Act is repugnant to the provisions of the Canadian Immigration Act. My present impression is, although it is not necessary for me so to decide, and I desire to guard myself against being understood as having arrived at any definite judicial conclusion about the matter, my present impression is that the Natal Act cannot be said to be repugnant to the Dominion Immigration Act. No section has been pointed out to me which lays down a standard by which the rights of any person seeking admission into Canada can be measured, i. e., which says who shall be allowed in, or who shall be kept out, excepting certain provisions which include certain persons, such as criminals, idiots paupers, beggars, prostitutes, and so forth; and which are of a negative character.

Now, inasmuch as the British North America Act permits the enactment of laws relating to immigration by the local legislatures insofar and so long as they are not repugnant to any act of Canada, I am not prepared to say from the cursory glance I have had of the Canadian Act that the provisions I have just alluded to in the Dominion Act as the Natal Act appear merely to add to the list of excluded persons.

#### CONSTITUTIONALITY UNDECIDED.

At any rate, I have come to the conclusion that it is not necessary for me to decide on the present occasion whether the act is *intra* or *ultra vires* of the local legislature. I have only to consider on the present occasion how far the provisions of this act interfere with or nullify the act known as the Japanese Treaty Act, which was passed in 1907 by the parliament of Canada. Now, that act recites the treaty which exists between the Imperial government and the Japanese government, and proceeds to enact that the provisions of that treaty are sanctioned—that being the expression that is used in the act. I think it must be plain that when the Dominion parliament sanctioned this treaty between the imperial government and the emperor of Japan, that they intended to make the provisions of that treaty a part of the law of Canada.

#### DOMINION'S POWERS.

And then the only question is, have they that power? I have no doubt under the combined operation of sec. 132 and sec. 95 of the B. N. A. Act, that the Dominion parliament had the power. Sec. 95 provides that the parliament of Canada has power from time to time to make laws in relation to agriculture in all or any of the provinces, and in relation to immigration in all or any of the provinces; and that any law of the legislature of the province relative to agriculture or to immigration shall have effect in and for the province so long and so far only as it is not repugnant to any act of the parliament of Canada; and the other section empowers the parliament of Canada to

make any law necessary or proper to secure the performance of Canada's obligations as a part of the empire, in other words, to confirm by positive law that which otherwise would rest on convention or agreement only.

That being so, the question at once comes up as to whether the provisions of the Natal Act in any way nullify, or are contradictory to the provisions of the act of the parliament of Canada, which is known as the Japanese Treaty Act.

The provisions of the Natal Act lay down certain conditions upon which any person seeking to enter the province may enter, which conditions must be complied with before admission is granted. Among those conditions is the requirement by which a person shall, if requested to do so by the immigration officer, write out in English or any language of Europe, an application to the provincial secretary to the effect set out in a certain schedule.

When we come to compare the provision of the Japanese Treaty Act with those of the Natal Act, we find it is agreed that the subjects of either of the contracting parties shall have full liberty to enter, travel or reside in any of the dominions or possessions of the other contracting party, and shall enjoy full protection for person and property, etc.

It will be observed the language is "the subjects," not such subjects as may be permitted by any province, that is to say, all the subjects except of course such subjects as are excluded by the authority of the parliament which is granting the right; and we find that in the Canadian Immigration Act the Dominion parliament has specified certain classes of people who shall be debarred from entering into the country, and there is no limitation or mention made as to their nationality, or source of origin, but any one coming within any of these special classes is debarred, whether of Japanese or Chinese or any other nationality. And as the Canadian Immigration Act must be read together with the Japanese Treaty Act, the joint effect of those two acts is that

the subjects of the emperor of Japan, other than those which come within those specified classes, shall have the full right and liberty to enter, travel, or reside in any part of this Dominion.

Therefore as the power of the province to pass immigration laws is conditional upon such laws not being repugnant to those passed by the parliament of Canada, it follows that to the extent to which the Natal Act is inconsistent with the Canadian legislation to that extent it is inoperative, and therefore the applications are entitled to their discharge".

(21st February, 1908; Hunter, C. J.)

An appeal to the full Court was later taken by the Province of British Columbia from above decision of Chief Justice Hunter and was dismissed, the Court unanimously agreeing with the decision appealed from.

(24th February, 1908; Supreme Court, B. C.)

As the Japanese in question in the above came into Canada from the United States, the Dominion Immigration Officer subsequently deported them for entering the country in defiance of the Order-in-Council prohibiting immigrants from coming in, save direct from their land of birth or citizenship.

The section of the British North America Act under which the Provincial Act was declared *ultra vires* reads as follows:—

"95. In each Province, the Legislature may make laws in relation to Agriculture in the Province, and to Immigration into the Province; and it is hereby declared that the Parliament of Canada may, from time to time, make laws in relation to Agriculture in all or any of the Provinces, and to Immigration into all or any of the Provinces; and any law of the Legislature of a Province relative to Agriculture or to Immigration shall have effect in and for the Province, as long and as far only as it is not repugnant to any Act of the Parliament of Canada."

#### Employment Agent Sent to Prison.

Frank Hagelbeick, an employment agent at Vancouver, was convicted of obtaining money by false pretences from workmen looking for work, and sentenced to six months in jail with hard labour. It was shown that he had taken a dollar from each of two men as a fee for obtaining them employment, but when the men went to the job they found that

there was no opening for them, and complained to the police with the above result.

(Rex v. Hagelbeick; 20th January, 1908; Alexander, P. M.)

## ENGLISH CASES.

### Accident Arising in Course of Employment.

A large number of workmen employed at the defendants' colliery lived some six miles from the colliery. Defendants supplied a train composed of carriages belonging to them, each morning and evening to bring the workmen to and from their work without charge, and this train was run upon the line of a railway company by a locomotive provided by the railway company. The defendants erected a platform on the line, upon land belonging to the railway company, about a quarter of a mile from the colliery, and the workmen walked from the platform to the colliery by the public road. The platform was repaired and lighted by defendants. While waiting at the platform for the train on his way home from work, one of the workmen was accidentally pushed off the platform and killed by the train. In proceedings by his widow to have compensation under the Workmen's Compensation Act, 1906, the County Court Judge found that it was an implied term of the contract of service that the trains should be provided by the defendants, and that the workmen should be entitled to travel in them to and fro without charge, and he held that the relationship of master and servant existed at the time of the accident, and that the case came within the Act. The Court of Appeal held that in those circumstances the accident arose "out of and in the course of the employment" within the meaning of s. 1, subs. 1, of the Act, and the defendants were liable to pay compensation.

(Cremins v. Guest, Keen & Nettleford, 13th December, 1907; Court of Appeal.)

### Forfeiture of Wages.

The Court of Appeal has affirmed the decision of the Divisional Court in plain-

tiff's favour in the case noted at page 1455 of the June, 1907, number of the *Labour Gazette*.

(Parkin v. South Hetton Coal Co.; 16th December, 1907.)

### Computation of Average Weekly Earnings

The "average weekly earnings" of a workman are by schedule 1, s. 2 (a), of the Workmen's Compensation Act, 1906, to be computed in such manner as is best calculated to give the rate per week at which the workman was being remunerated." The rate of remuneration is not to be fixed by the wages the workman was earning at the date of the accident. Where such a computation is "impracticable" an estimate must be made as nearly as possible of the rate at which the workman was being remunerated, and "regard may be had to the average weekly amount which, during the 12 months previous to the accident, was being earned by a person in the same grade employed at the same work by the same employer, or if there is no person so employed, by a person in the same grade, employed in the same class of employment and in the same district." The word "grade" refers to the particular rank occupied by the workman, as, for instance, whether he is a mason, or a bricklayer, or a bricklayer's labourer, and not to his greater or less excellence in that rank. This provision affords a guide as to the average weekly earnings, but there is no obligation to accept those average wages as the basis of compensation. The personal qualities of the workman then come in, especially where the work is piecework. The wages earned at the date of the accident cannot be the sole test. The object aimed at is to estimate the normal rate of remuneration of the injured workman. Days on which no work is done and no wages are earned must be disregarded, except in the one case provided for by s. 1. (a). In calculating any of the periods mentioned in s. 1., absence from illness or any other unavoidable cause is to be disregarded, and the employment is to be reckoned as continuous, unless the workman has been discharged on the ground

of such absence, &c., and subsequently re-engaged.

(Perry v. Wright, and other cases; 13th December, 1907; Court of Appeal).

### Seamen's Wages.

Plaintiffs agreed to serve as seamen on board defendants' ship on a voyage from Cardiff to Kiau Chiu, and any ports within certain limits and home again. At this time war had broken out between Russia and Japan. Plaintiffs subsequently discovered that the ship was engaged in carrying contraband of war for Russia. When in the Far East on a voyage to Saigon, a port within the above limits, she was destroyed by an explosion. Plaintiffs were rescued and sent home to Cardiff as distressed seamen, and at Cardiff they signed a conditional release without prejudice to their claim for damages and wages. Plaintiffs claimed wages down to the time of "final settlement" and damages for the loss of their kit and for the hardships suffered. Defendants contended that plaintiffs were only entitled to wages down to the time of the destruction of the ship, and were not entitled to damages. The trial Judge, Sutton, J., held that there had not been a "loss" of the ship, within s. 158 of the Merchant Shipping Act, 1894, and that the plaintiffs were entitled under s. 134 (c) to wages down to the time of "final settlement"—viz. the judgment in the action; and that they were entitled to damages for the loss of their kit and for the hardships suffered. Upon appeal by defendants upon the question of wages, the Court of Appeal held that there had been a "loss" of the ship within the meaning of s. 158 when she was destroyed, and that plaintiffs were only entitled to wages down to that date.

(Collins et al v. Simpson Steamship Co.; 12th December 1907).

### Duty of Master Towards Servant in Case of Accident.

The servant of defendants, who were cab proprietors, went out one night in December with his masters' cab. Later at night the horse and cab came home

without the driver. There was no indication of any accident having happened. The horse had on former occasions, when left unattended returned home by itself. One of the defendants, who saw the horse and cab return, went to a public house in the neighbourhood to look for the driver, but found it closed, and he accordingly returned home. Next morning the driver was found in an unconscious condition, suffering from injuries which indicated that he had fallen from his seat on the cab, and he died in a week, his death being accelerated by the exposure. In an action by his widow to recover damages for his death, the County Court Judge held that there was a duty upon the defendant who was aware that the horse had returned without a driver, to institute a proper search or to make inquiries, and that he had neglected that duty. He accordingly awarded the plaintiff damages, to the extent of £100. Upon an appeal by defendants the Court held that, in the circumstances, there was no duty on the defendants to make a search for the driver and they were entitled to judgment. The appeal was accordingly allowed and the action dismissed.

(Bond v. Wilson & Sons; 11th January, 1908; Divisional Court).

### UNITED STATES DECISIONS.

In a case in which some railway employees sought to recover damages under the "Employers Liability Law", making railroads responsible for injuries sustained by employees owing to the negligence of their fellow servants, the Supreme Court of the United States recently held such law unconstitutional.

(6th January, 1908).

### Erdman Arbitration Act Unconstitutional.

William Adair was a master mechanic of the Louisville & Nashville Railroad, and his discharge of William Coppage, a locomotive engineer, because he belonged to a labour union, was made the basis of action brought under the Erdman Act, approved July 1st, 1898. Upon an appeal by Adair to the Supreme Court of the United States from a de-

cision against him the latter Court rendered a judgment declaring that any railroad or other common carrier engaged in handling inter-state commerce may discharge an employee and assign no other reason beyond the fact that he belongs to a labour organization.

(*Adair v. United States*; 27th January, 1908).

### Boycott as a Combination in Restraint of Trade.

An action was instituted by Loewe & Company in the United States Circuit Court to recover \$240,000, being three times the amount of damages \$80,000, alleged to have been sustained by them by reason of a boycott against their factory. The case involved the applicability of the 7th section of the Sherman anti-trust law to conspiracies by labour unions to boycott articles entering into inter-state trade. Under the terms of that provision the complaining party may collect three times the amount of his loss if the charge is sustained. Not only the members of the Hatters' Union, but the American Federation of Labour, of which the Union is a subordinate organization, were made parties to the suit. In the complaint it was alleged that the labour organization had undertaken to compel the manufacturers to unionize their factory, as a large majority of other hat factories in the United States had been forced to do, and it was asserted that when they failed in the effort, the union hatters withdrew, and induced other employees to do so. This act was followed by the declaration of a boycott against Loewe's hats wherever they were found, and as the firm controlled an extensive trade throughout the country the boycott extended to many states, which, in the language of the complaint constituted a combination to limit and restrain inter-state commerce. The

union fought the case on the ground that the law was inapplicable to such organizations, but the Supreme Court of the United States failed to accept this view, and in effect held that the unions could not be permitted to interfere by boycott with the free exchange of commerce between the states.

(*Lawlor v. Loewe*; 3rd February, 1908; Supreme Court, U. S.)

### Printers' Union Officials Fined and Imprisoned.

President Patrick H. McCormick, of the New York Local branch of the Typographical Union, and George W. Jackson and Vincent J. Costello, Union organizers have been fined \$250 each, and sentenced to twenty day's imprisonment for disobeying an injunction obtained by the Typothetae of New York in 1906. Thomas Bennett and William Sanderson were each fined \$100, on the same charge. The trouble grew out of the strike of 1906 of Typographical Union number 6, for a closed shop and an eight-hour day. Soon after the strike, the officers of the Typothetae of the city of New York, the employers association against which the strike was declared, complained that the strikers were practising intimidation against their employees. On these representations an injunction was granted by the Court restraining the officers and members of the Union from continuing the practices charged. In April 1906, a representative of the employers' association asked in Court that the members of the Union be punished for contempt, because the acts of violence and oppression had continued. An order was made referring the matter to a referee to take evidence upon the charges, and it was upon his report and recommendation that the punishment was inflicted.

(11th February, 1908; *Bischoff, J.*)

# THE LABOUR GAZETTE

APRIL, 1908.

## INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF MARCH, 1908.

### I.—GENERAL SUMMARY.

SPRING work had not become general up to the end of the month, though there was a considerable increase in employment in railway construction camps. In the agricultural industry the outlook was for an earlier season than last year, and already the demand for labour in western Canada was in excess of the supply. Maple sugar makers have had an exceptionally early and otherwise favourable season. In the fishing and lumbering industries, preparations were actively under way for the opening of the spring season, and the outfitting of boats, lobster and salmon traps, etc., gave employment to a large number. The hauling of logs to the streams has been completed, and the men were leaving for the drives in the closing week of the month, at wages somewhat lower than last year. In British Columbia, there has been a slight revival in the lumbering industry, though conditions among the mountain mills were still very dull. In the mining industry, the Nova Scotia collieries have been exceptionally busy, the output since the beginning of the year being largely in excess of the corresponding period of 1907; in Alberta and British Columbia, however, the collieries have been dull, though a steady revival in metal mining was reported. Manufacturing establishments continued quiet, but there was an increase in railway traffic, and the work of preparation for the opening of navigation, which was expected at an earlier date than in 1907,

gave employment to a large number of men. The unskilled labour market was more active than in February, and abundance of employment is promised during the coming season for experienced men. The financial position was regarded as sound, though money was still difficult to obtain on long-time engagements.

### Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during March:—

*Metal and woodworking.*—Further reductions went into effect in a number of industrial establishments. At Brantford, Ont., some 580 moulders, machinists, blacksmiths, grinders, polishers, woodworkers and labourers had their wages reduced 10 per cent. Steel workers at Trenton, N. S., were reduced in wages, and 1,000 employees of Rhodes, Curry & Co., at Amherst, N. S., had their wages reduced 10 per cent. Iron moulders (20) at Guelph, Ont., were reduced 8 per cent.

*Food and tobacco preparation.*—Brewery workers at Toronto, Ont., obtained an increase in their schedule\*.

*Miscellaneous.*—Elevator men employed by the Dominion government at Ottawa, Ont., received an increase of \$5.00 per month.

\* See report of Toronto, Ont., correspondent.

*Unskilled labour.*—Some 250 labourers on railway construction were reduced from \$1.60 to \$1.50 per day, at Moncton, N. B.

### Cost of Living.

Wheat prices held firm. Butter remained on an exceptionally high level, but eggs were downward in price. The price of hay showed a further decline. Hog prices were very low compared with the corresponding period of 1907. An increase in the price of ice for the summer months went into effect in many places. The usual spring decrease in the price of milk was made at certain points. Sugar advanced in the opening weeks of March.

The Canadian Pacific and Grand Trunk Railway Companies recently issued special freight tariffs advancing cartage charges on certain classes of freight from  $1\frac{1}{2}$  to 2 cents per 100 pounds after March 15, the reason given being that an increase has been rendered necessary by the enhanced cost of living due to increased wages, keep of horses and other expenses.

### Interruptions to Industry.

The number of trade disputes in existence during March was 2 less than in the previous month, but there was an increase of approximately 5,220 in the number of working days lost. Compared with March, 1907, there was a decrease of 6 in the number of disputes, and of about 1,156 in the number of working days lost.

Among industrial establishments, etc., destroyed by fire or through other causes during March, as reported in the press of the Dominion, the following may be mentioned:—

*Nova Scotia.*—Club house at Halifax, loss, \$1,000; coal washing plant at Morien Junction, loss, \$100,000; business block at Parrsboro, loss, \$21,000; hotel at Sydney, loss, \$5,000.

*Prince Edward Island.*—Stores at O'Leary, loss, \$1,200.

*New Brunswick.*—House and granary at Beaverbrook, loss, \$2,000; sawmill at Fredericton Junction; hotel at McAdam Junction; car shop at Moncton; two tenements at St. John, loss, \$2,000.

*Quebec.*—Convent at Cap St. Ignace, loss \$20,000; carriage shop at Lennoxville, loss, \$4,000; Shoddy mill at Moe's River loss, \$5,000; general store at Montreal loss, \$2,000; tenement at Notre Dome de Grâces, loss, \$6,000; physician's office and house at Plessisville, loss, \$2,800; tobacco warehouse at Quebec, loss \$5,000 and

hotel, loss, \$4,000; grocery store at St. Henri; bakery and residence at St. Michel, loss, \$3,000; stable and seven horses at St. Sauveur, loss, \$6,000; grocery store at Windsor Mills.

*Ontario.*—Foundry, loss, \$4,000 and general store, loss \$6,000 at Brockville; club house at Chatham; collapse of bedstead factory at Cornwall, loss, \$15,000; agricultural implements and outbuildings at Dutton, loss, \$2,000; sale stable and 13 horses at Listowel; departmental store at Midland; dry-goods store at Owen Sound, loss, \$65,000; jewellery establishment at Ottawa, loss, \$30,000; piano factory at Paris, loss, \$4,000; laundry at Port Hope; at Toronto, architect's office, loss \$2,000; business block, loss, \$15,000; livery stable, loss, \$4,000 store, loss, \$1,000; dry-goods store, loss, \$7,000 church, loss, \$25,000; cattle shed and stock at Tweed, loss, \$5,000; railway station at Weston.

*Manitoba.*—Grocery store at Brandon, loss, \$2,400; school house at Elkhorn; stores at Delorlane, loss, \$27,000; offices and engine room of elevator at Rosenfeld.

*British Columbia.*—Hotel at Harrison Hot Springs; Indian portion (15 houses) of village of Sechelt.

### Conditions in the Industries and Trades.

Conditions of employment during March in the several industries and trades throughout Canada, as indicated by the reports of correspondents to the *Labour Gazette* and by information received at the Department from other sources, may be briefly summarized as follows:—

#### Agriculture.

Farmers were actively preparing for the opening of spring, which gave promise, at the end of the month, of being considerably earlier than the corresponding season of 1907. Some ploughing and seeding were done in southern Alberta and British Columbia. Orchardists were busy pruning. The break-up of the roads interfered with marketing, and produce remained firm in price. The maple sugar season opened early in the month. Exceptionally favourable results were reported, syrup bringing from \$1.25 to \$1.35 per gallon.

The outlook for the season 1907 is thus far very favourable. Cattle have wintered well, and there has been an increased production recently in the dairying branch. The favourable weather of the autumn of 1907 enabled an exceptionally large amount of ground to be broken, and the prospects are that a larger area will be put to seed during 1908 than in any previous year. The light fall of snow in western Canada will enable the farmers to go on the land at an early

date. Fruit trees and bushes were reported in good condition, and the outlook is for large plantings of vegetables. Several consignments of wheat and white oats, for seeding purposes, were shipped into the Northwest provinces during the month, some importations of the latter having been received from Europe. The demand for farm labourers was already in excess of the supply throughout western Canada, the immigration agent at Winnipeg, Man., being unable to meet all requests that were received. In Ontario, demand and supply were more equally balanced.

Among meetings of agriculturists held during March, the following may be mentioned: The Dairymen's Association of Prince Edward Island met in annual convention at Charlottetown on February 25. According to the secretary's report, there were 48 cheese factories and 1 branch factory in operation during the past season. Business showed a slight increase over last year, especially among the larger factories. The annual Seed Fair was held at Summerside, P. E. I. A meeting of the Ontario Apple Exporters' Association was held at Cobourg, Ont. The Saskatchewan Stock Breeders' Association held its annual meeting at Regina. The convention of the Central Alberta Stock Growers' Association was held at Lacombe, Alta., on March 10. The Farmers' Central Institute of British Columbia held a meeting at Victoria, B.C.

According to a statement issued by the Dairying Branch of the Department of Agriculture, Canada, there are at present 53 cow-testing associations in operation throughout Canada \*.

### Fishing.

In the Maritime Provinces the chief work of the month was in connection with preparations for spring fishing. Many vessels were being fitted out, and riggers, painters, and carpenters were busy. Work was also very active on lobster traps and boats. A number of fishing schooners sailed from Lunenburg, N. S., for the banks. On the great

lakes some fair catches were taken. The run of spring salmon on the Fraser river, B. C., had begun, but catches were small. Work was begun preparing the salmon traps off Vancouver Island, B. C., for the coming season; three firms will operate traps this year. Rough weather interfered with the catch of whales off Vancouver Island during March. The station on the west of the Island resumed operations. Herring fishing closed at Nanaimo, B. C., after a satisfactory season.

### Lumbering.

Operations in the camps throughout Ontario and the eastern provinces had, for the most part, ceased by the closing days of the month, and preparations for the drives were under way. In New Brunswick a lack of snow interfered considerably with the hauling of logs to the streams, but elsewhere good progress was made. An exceptionally large quantity of pit timber, for use in the collieries, has been taken out this winter in Nova Scotia. Wages of rivermen will be on a lower level than last year, but scales will probably be well maintained in the mills, where, notwithstanding the falling off in the cut, the large quantity of logs left over from last year will render the season an active one. It is estimated that the total amount of logs got out on the Miramichi River, N.B., will be 110,000,000 feet, compared with 180,000,000 feet last year. Some 2,000 men will be employed at the Booth mills at Ottawa, Ont., during the coming season, a slight increase compared with last year. The sulphite mill, under construction, will commence operations early in the summer and will employ 100 men. Prices paid for pulpwood this year have been exceptionally high.

In British Columbia, conditions were still quiet, though there was an improvement in some of the coast mills and camps, compared with 1907. It is estimated that about 400 men were engaged in the Boundary district in getting out railway ties, over 400,000 having been made. A quiet season is expected by shingle manufacturers in British Columbia; prices are somewhat lower than last year.

\* A reference to the first association of this kind organized in Canada was published in the February, 1906, issue of the *Labour Gazette*, page 818.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull very dull.

The ninth annual meeting of the Canadian Forestry Association was held at Montreal, Que., March 12-13. Resolutions were adopted urging the Dominion and Provincial governments to prevent the depletion of forests by fires and lumbermen. It was announced by the Honourable the Minister of Agriculture that the eastern slope of the Rocky mountains from the International boundary northward, would be set aside as a forest reserve by the Dominion government and held for forest growth.

The Ontario Lumbermen's Association held its annual meeting at Toronto, Ont., on February 27. In the address of the president it was stated that the cost of production was higher than ever before; that the stock of unsold lumber is less than for several years, and that the quantity of lumber to be produced this year will be much less than last year, though the production of railway ties will be more than double.

The annual report of the Canadian Superintendent of Forestry showed that the number of timber berths granted during the past year was 49, covering 410 square miles. The amount received on account of fees was \$326,360, an average of \$511 per square mile.

Application was made to the government of Manitoba for the incorporation of the Union Lumber Company, Limited, with capital stock of \$10,000,000; the company to take over a large number of saw-milling and distributing companies in the Northwest provinces and in British Columbia.

A resolution was discussed in the Senate on March 24, urging the appointment of a commission to consist of representatives from the legislatures of the several provinces with other persons having the management of crown lands, for the purpose of reporting on the best means to adopt for the preservation of forests.

### Mining.

The Nova Scotia collieries had a very busy month compared with March, 1907, and the output for the present year, up to March 31, largely exceeded that of the corresponding period of 1907. Skilled miners were in demand at some points.

The output of the Dominion Coal Company for February was the largest in the history of the company for that month, the total being 283,858 tons, as against 226,190 in February, 1907; 225,716 tons in 1906, and 118,778 in 1905. The shipments for February totalled 191,871 tons. The report of the Dominion Coal Company for the year ended December 31, 1907, stated that the output was 3,541,253 tons, as compared with 3,552,746 tons in 1906, being a decrease of 11,493 tons. The income of the company was \$2,094,539, compared with \$1,137,370 in 1906. Notice of a resolution favouring the appointment of a commission to enquire into the coal mining industry of the province was presented to the Nova Scotia legislature during March. The annual meeting of the mining society of Nova Scotia was held at Halifax, N. S., March 25-26. In Quebec, copper and mica mining plants were in idleness owing to low prices, but the asbestos mines were being worked to their full capacity. The mines at Cobalt, Ont., continued to produce satisfactorily; official returns as to the value of the output in 1907, place the total at \$5,927,858. The first shipment from the mine on the Gillies limit, operated by the government of Ontario, was made during March. Conditions remained quiet in the Alberta collieries; certain mines which have been working half time closed down.

About a year ago, the Canadian Pacific Railway Company began the work of opening a coal mine at Hosmer, B. C. Considerable progress has since been made in development work, the installation of plant, erection of buildings, etc. It is expected that the property will be in a position to begin shipments on January 1, 1909. The plant is designed to handle 3,000 tons per day. Two hundred and forty coke ovens are now being built, and the number will be increased as the demand for coke justifies. At Bankhead, Alta., the Bankhead Mines, Limited, are turning out 1,200 tons of mine run coal per day, and is producing 500 tons of briquettes daily, the briquettes being sufficiently hard to stand shipment and handling.

In British Columbia, short time was

worked in the Vancouver Island collieries, but the Crow's Nest Pass collieries were fairly active.

The annual meeting of the Crow's Nest Pass Coal Company was held at Toronto, Ont., on March 10. Total profits of \$383,086 were declared, which, with credit brought forward and premiums on stock, made aggregate receipts of \$1,060,998. The coal mined during 1907 amounted to 981,939 tons. The report stated that had it not been for strikes during the month of April and the raising of wages by the smelters, which attracted labour from the mines, the output would have exceeded 1,000,000 tons.

Total shipments from the Boundary and Kootenay mines were larger in March than in any time since the beginning of the present calendar year. Mining and smelting operations of the Granby Company were very active, the payroll at the mine being \$50,000 per month, and, at the smelter at Grand Forks, B. C., \$30,000 per month.

The tenth annual meeting of the Canadian Mining Institute was held at Ottawa, Ont., March 18-20.

### Manufacturing.

There was a slight improvement in some localities compared with February, though conditions were for the most part unchanged up to the end of the month. Stock-taking was in progress in several localities. The iron and steel making plants at Sydney, N. S., and Sault Ste. Marie, Ont., were busy, but at certain other points iron manufacturing works were quiet.

Statistics of the production of pig iron in Canada during 1907, show a total output of 581,146 tons, compared with 541,957 tons in 1906, an increase of 39,189 tons, or over 7 per cent. Of the total 572,025 tons were made with coke, 8,971 tons with charcoal and 150 tons with electricity. The production of basic pig iron was 341,257 tons, against 246,228 tons in 1906, and of bessemer pig iron, 154,910 tons, against 165,609 tons in 1906. No ferro-manganese or spiegeleisen have been made since 1899. On December 31, 1907, Canada had 16 completed furnaces, of which 14 were in blast and 2

were idle. Of the total, 13 used coke for fuel and 3 used charcoal. Three coke furnaces were partially worked on December 31.

The Dominion Woollen Manufacturing Company of Montreal, Que., capitalized at \$210,000 and employing 200 hands, went into liquidation.

### Railway Construction.

There was a considerable increase in the amount of employment in railway construction camps during March. This activity was especially noticeable in connection with the National Transcontinental line. Contracts for six additional sections were awarded by the Commissioners of the National Transcontinental Railway, comprising in all 366 additional miles\*. The total mileage of the road under construction by the commission is now 1,223 miles. Contracts for 581 miles have still to be awarded. It is estimated that fully 20,000 men will be employed in connection with the work during the coming summer. The Grand Trunk Pacific Railway Company was also pushing forward the work of construction in western Canada. The contract for the first 100 miles east of Prince Rupert was awarded to Messrs. Foley, Walsh and Stewart. It is expected that the section will be under construction during May. The Kitamaat section will also be proceeded with with all possible speed. Tenders have been invited for a new union station at Winnipeg. Track-laying, which was suspended early in February, between Portage la Prairie, Man., and Saskatoon, Sask., was resumed. Ballasting and surfacing, it was expected, would be begun shortly in this section, and the staff of employees considerably augmented. The work, it is expected, will be completed within a few weeks time, as will also the section between Portage la Prairie, Man., and Winnipeg, Man. The large bridge over the Saskatchewan River at Saskatoon, Sask., was completed. Of the 793 miles of the Grand Trunk Railway between Winnipeg, Man., and Edmonton, Alta.,

\* A description of these sections was published in the March, 1908, *Labour Gazette* at page 1033.

all excepting 60 miles are now graded, and 330 miles of track are laid. Work on the line in New Brunswick was active.

It was stated that 51 new western town sites would be placed on the market by the Canadian Pacific Railway Company during the coming season.

Final estimates of steel railway track laid in 1907 place the total at 1,454.38 miles, of which the Canadian Pacific Railway Company constructed 479.5 miles, the Grand Trunk Pacific 390 miles, and the Great Northern Railway, 267.34 miles.

**General Transport.**

Railway traffic was somewhat heavier than in February, though earnings were lower than at the corresponding period of 1907. Train crews were well employed, but shop employees were quiet, staffs having been reduced at several points.

The following circular was recently issued by the secretary of the Board of Railway Commissioners for Canada:—

**ELECTRIC HEADLIGHTS ON LOCOMOTIVE ENGINES.**

Owing to the numerous reports the Board has received from its inspectors relating to the poor condition of the lights on a large number of locomotive engines in use on the different railway systems in Canada, the Board has had under consideration the advisability of requiring the railway companies, subject to its jurisdiction, to use an electric system of headlights, or some other good system that will give satisfactory light for the protection of life and property.

The Board directs me to say that it will be glad to have you file with it, in writing, at as early a date as possible, such observation as you may wish to make regarding the proposal of the Board to issue an Order, as suggested herein.

The following circular with reference to discipline on the Canadian Pacific Railway line was issued, to have effect from February 1:—

“Commencing this date, discipline will be administered as under: It is the intention to insist on a more rigid compliance with the company’s rules and regulations, which are made for the protection of the lives of the public and employees, as well as for the protection of the company’s property. All employees will start with a clean record beginning this date. Any exceptional service rendered will be credited to the employee’s record. A weekly discipline list will be issued on each division. This list will show cause, extent of discipline, or action and extent of reward. Employees will, as heretofore, be subject to summary dismissal for insubordination, drunkenness on or off duty, using intoxicating liquor when on duty, frequenting saloons or places of low repute, incompetency, dishonesty, failing to carry out train orders and rules respecting train movement. Where previously, discipline was meted out by suspension, demerit

marks will be placed in the record of an employee. For every repetition of an offence by the employee the number of demerit marks will be doubled. When the demerit marks against any employee number 60, his services will be dispensed with. For every 12 consecutive months’ good service, free from demerit marks, an employee will have 20 demerit marks deducted from those that stand against his record. Employees will be advised when demerit marks are recorded against them, the same as they have hitherto been advised respecting disciplinary measures.”

Instructions were issued by the Grand Trunk Railway Company to conductors and brakemen in its employ to exercise increased care and vigilance in the inspection of trains.

The preparation of vessels in anticipation of the opening of navigation was actively under way. The amount of ice in the great lakes, in the Gulf of St. Lawrence and off the coast of Nova Scotia was stated to be less than at the corresponding period of 1907. It was expected at the close of the month that navigation would open very shortly. The dates on which navigation first opened during the past 20 years are as follows:—

1888.....	April	29
1889.....	“	14
1890.....	“	14
1891.....	“	17
1892.....	“	13
1893.....	“	24
1894.....	“	12
1895.....	“	20
1896.....	“	22
1897.....	“	17
1898.....	Mar.	31
1899.....	April.	24
1900.....	“	21
1901.....	“	21
1902.....	“	3
1903.....	“	2
1904.....	“	25
1905.....	“	19
1906.....	“	20
1907.....	“	26

The amount of grain at the head of the lakes was considerably less than at the same period of 1907.

A new elevator has been erected by the Ogilvie Flour Milling Company at Fort William, Ont., to replace the one which collapsed in May, 1906. The building has a total storage of 500,000 bushels, divided into 60 bins.

The annual meeting of the Dominion Marine Association was held in Ottawa, Ont. The tonnage entered in the association is now 115,292. The grain section of the association owns vessels hav-

ing a capacity of about 6,000,000 bushels, or about ten times the capacity of 1897.

The annual meeting of the Shipping Federation of Canada was recently held at Montreal, at which the owners of 478,385 tons of shipping were represented, as compared with owners of 475,195 tons in 1906. In the speech of the president, the season of navigation for 1907 was stated to have been late in opening, the first vessel arriving on May 2, the last sea-going vessel leaving the port on November 29. There was a decrease in the number and tonnage of vessels arriving. Reference was also made to the increase in wages and port charges.

### The Trades.

*Building.*—There was an increase in general employment, though outside work has not yet been begun over a wide area. The outlook at the close of the month was that building would be less active than in 1907. In the cities of Montreal, Toronto and Winnipeg, for example, the number and value of permits issued up to March 31, fell considerably below that of the corresponding period of last year.

*Metal.*—Employees in industrial establishments were somewhat more active than in February. Boilermakers, ship-builders, etc., were busy preparing boats for the season of navigation. Electric workers and linemen were active.

*Woodworking.*—The month was somewhat quiet, though in some localities an improvement compared with February, was reported.

*Printing.*—Conditions were fairly satisfactory, though dullness prevailed at some points.

*Clothing.*—Journeymen tailors became more active with the advance of the season, but garment workers were somewhat quiet.

*Leather.*—Tanners, curriers, etc., were quiet.

*Food and tobacco preparation.*—Bakers were more active than in February, owing to the falling-off in home bread baking usual at this season. Butchers were well employed. Trade with confectioners was somewhat quiet from

seasonal causes. Millers had a good month. Malsters have been hampered by the scarcity and poor quality of barley. The gathering of the ice supply was completed under exceptionally favourable conditions.

*Miscellaneous.*—The month was somewhat quiet.

*Unskilled labour.*—Though some unemployment still existed in the large industrial centres of Ontario and Quebec, the month showed a marked improvement compared with February. In Western Canada there was a keen demand for men to work on farms and in the railway construction camps, the supply of the former class being already less than the demand. Wages were slightly lower than a year ago.

### Canadian Trade and Revenue.

*Foreign trade.*—During February, 1908, the total value of imports entered for consumption was \$21,004,733, compared with \$25,408,066 in February, 1907. The total value of imports for the eleven months ending February 29, 1908, was \$328,321,453, compared with \$303,522,669 for the corresponding period of 1907. Total domestic exports during February, 1908, amounted to \$14,636,818, compared with \$12,620,857 in February, 1907. The total domestic exports for the eleven months ending February 29, 1908, amounted to \$229,017,481, compared with \$224,874,494 in the corresponding period of 1907. In February, 1908, there were increases in exports of the mine, the fisheries, agriculture and manufactures, and decreases in products of the forest, and animals and their produce.

*Imperial trade.*—According to reports received from commercial agents of the Department of Trade and Commerce, Canada, complaints regarding the packing of Canadian fruit continued though the product is still superior to competitors in the English market. A scarcity of butter and consequent high price were reported in this market. Good openings for Canadian motor vehicles were reported in Trinidad and Tobago, and for steel and malleable iron parts of agricultural machinery in Australia.

*Domestic trade.*—Some improvement in the tone of wholesale trade occurred in March, but retail business continued quiet, owing largely to the bad condition of the country roads. Collections were slow. Millinery openings in the leading wholesale centres were well attended. Conditions were more favourable in the bond market than for some time past. The financial stringency has been felt less in the eastern provinces of the Dominion than elsewhere. Trade in Nova Scotia and New Brunswick has been well maintained with collections fair.

The February bank statement showed a decrease in deposits and current loans, but an increase in circulation and call-loans in Canada. Clearing house returns showed a considerable decrease compared with the corresponding period of 1907.

The annual report of the Bank of British North America showed a slight decrease in net profits and a substantial increase to reserve fund.

In presenting the annual financial statement to the House of Commons the Honourable, the Minister of Finance stated that the general feeling of business men throughout Canada was one of hopeful confidence united with caution. The Minister said: "The financial systems and institutions of all countries have been severely tried. It should be a gratification that none have stood the test better than those of Canada."

It was announced that the revenue of the province of Nova Scotia during the past year was \$1,437,036, and expenditure \$1,539,168. The amount collected in royalty from mines was \$633,933, showing a falling off compared with the previous year.

#### Notes.

An *Inspector of Factories* was appointed by the government of Nova Scotia.

The *Hydro-Electric Power Commission* of Ontario has issued a report with reference to the cost of producer gas and other prime movers under present conditions in the province.

It has been estimated that the net

amount of *insurance* in force with the Canadian life companies at the close of last year was \$453,359,462, a gain during the year of over thirty-four millions.

The fourth session of the 38th General Assembly of *Prince Edward Island* was opened on February 25. Reference was made in the speech from the throne to the improved industrial conditions of the province and the proposed establishment of an experimental farm.

An act "respecting co-operation" based on the evidence taken before a select committee of the House of Commons in 1907, was passed by the House of Commons during March and was under discussion by the Senate.

Assent was given on March 17, by His Honour the Deputy to His Excellency the Governor General, to 24 acts passed during the current session of the *Dominion Parliament*. Of these, 11 had reference to different railway companies. An act respecting the National Battle-fields of Canada was included.

The report of the Royal Commission appointed by the Dominion government to investigate conditions in the Civil Service was presented to parliament on March 23. The report had not been printed up to the end of the month, but from extracts published in the press it was understood that an increase of 15% in salaries was recommended in the case of deserving civil servants receiving less than \$1,500 per year, and of 12½% in the case of those receiving over that amount. A superannuation arrangement was also recommended.

A deputation representing the Ontario executive of the *Trades and Labour Congress* of Canada had an interview with the government of Ontario on March 4. The deputation asked for legislation with regard to child labour, an eight hour day for miners, restrictions on the employment of detective agencies, the use of centre aisles in summer street cars, the enforcement of the fair wages clauses in government contracts, the amendment of the factories act, the abolition of fees on immigrants, and the ameliorating of the conditions of telephone operators. The executive committee of the Congress for Quebec also interviewed

the provincial government during March, and requested consideration of resolutions relating to the inspection of scaffolding, the eight hour day, the increasing of the number of factory inspectors, the enforcement of fair wages clauses, the carrying of arms and the employment of private detectives, and other subjects.

The report of the commission appointed to investigate into the *Quebec bridge* disaster was presented to the House of Commons on March 9. The report stated that the collapse of the bridge was due to defective design, attributable to errors in judgment on the part of the designing and consulting engineers. The loss of life on August 29, it was stated, might have been prevented by the exercise of better judgment on the part of those in responsible charge of the work. It was added that a bridge of the adopted plan that will unquestionably be safe can be built (\*).

\* A special article dealing with the collapse of the bridge was published in the *Labour Gazette* for September, 1907, at page 317.

The fourth session of the 11th Parliament of the *Province of Quebec* was opened on March 3. It was stated in the Speech from the Throne that the province has suffered but little from the economic and financial crisis of the past year. The government was stated to be actively engaged in organizing the two technical industrial schools, and the school for higher commercial studies, the foundation of which was authorized last session. Progress in agriculture was stated to be becoming more marked, the result being felt in an increased demand for colonization lands. The commission appointed to consider the question of accidents to workmen has not yet completed its enquiry. Legislation in this connection and for the purpose of securing the payment of proper wages to workmen employed on public works, or work subsidized by the State, was foreshadowed. Other proposed legislation has reference to the administration of public lands, mines, fisheries and co-operative agricultural associations.

## II. REPORTS OF LOCAL CORRESPONDENTS.

**D**URING the month of March Mr. Hewlett Green was appointed correspondent to the *Labour Gazette* for Niagara Falls, Ont., and district, in place of Mr. Ernest Green, who resigned owing to having accepted a position at Ottawa, Ont.

### SYDNEY, N. S., AND DISTRICT.

*Mr. John Moffatt, correspondent, reported as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were active throughout March. The leading industries had a brisk month. Compared with March, 1907, which was very stormy, the outputs of both coal and steel were trebled. The railways were busy, while foundries and factories had a fair month. The building trades were quiet. Wholesale and retail trade was good, due to the

large amount of money in circulation from the wages paid out by the larger companies. Compared with the first three months of last year, business has been very active. The coal trade was unusually brisk, the Dominion Coal Co., alone being 200,000 tons ahead of the first three months of the previous year. Other companies have also been able to add to their out-puts, and if the navigation season opens early, as present appearances indicate, and the demand for coal remains steady, the coal outputs of the province of Nova Scotia will at the end of the year, show a heavy increase.

The Inverness Colliery had an active month, with increased outputs.

The Sydney Steel works had a very good month, the demand for rails and other products being brisk. March, 1907, owing to heavy snow storms was the worst month of the year for the Steel Co.

Owing to a decline in the demand for the finished products of the Nova Scotia Steel Works, a large amount of raw material has accumulated at the Trenton Department. Notices have also been posted for a reduction in wages at these works.

The Board of Conciliation on the dispute between the Dominion Coal Co., and its employees, members of the Provincial Workmen's Association, began its labours in Glace Bay on March 2nd, ending on March 13th. The award of the Board was accepted by the Company and the P. W. A. The work of the Board has no doubt established the principal of conciliation here as the factor which will settle future industrial disputes\*.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture and Fishing.*—Quietness prevailed.

*Lumbering.*—Owing to the low prices of lumber, a small cut was made during the winter.

CONDITION OF PARTICULAR TRADES.

The building and woodworking trades were quiet. Iron workers and the other skilled branches were active. Unskilled labour had a good month.

WESTVILLE, N. S., AND DISTRICT.

*Mr. Thos. Hale, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment at the collieries was in the main, satisfactory. There was a shortage of cars, which impeded operations to some extent, but as all the large collieries showed increases over the output of the corresponding month of 1907, the shortage did not materially interfere with business. The "Stellarton Mining Record" gives the following statement of increases in the different collieries for

February, 1908, over the output of the same collieries in February, 1907:—

CAPE BRETON.	
Dominion Coal Company.....	23,598 tons.
Inverness Coal Company.....	3,832 "
Nova Scotia Steel & Coal Company.....	15,985 "
MAINLAND.	
Cumberland Rail & Coal Co.....	10,022 "
Acadia Coal Company.....	4,914 "
Intercolonial Coal Co.....	1,969 "
Total increase Feby., 1908..	
60,320 tons.	

The total assessment of the town of Westville for the year 1908, is as follows: Real estate, \$766,270; personal, \$153,015; income, \$11,550, making a total of \$930,-835.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were quiet, only work incidental to winter and preparations for spring being attended to.

*Lumbering.*—The lumber business was somewhat busy,

*Manufacturing.*—Fairly active conditions prevailed.

*Mining.*—The bore-hole being put down by the Acadia Coal Company to prove the measures was discontinued after going down a distance of 910 feet; it is expected that the boring will be resumed as soon as a drill of greater capacity can be secured. Another hole is being bored nearer to the Allen shafts, and is progressing favourably.

*Other industries.*—The Westellar Terra Cotta and Brick Works at Sylvester has not yet resumed operations for the season. All other industries were more or less inactive, but are expected to commence operations soon.

CONDITION OF PARTICULAR TRADES.

*Building.*—Employment was generally quiet. Plumbers were fairly active.

*Metal, engineering and shipbuilding.*—Machinists, engineers, electrical workers and linemen found employment fairly satisfactory.

*Printing and clothing.*—Employment was only fair in these trades.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters were fairly active.

(\* For statement of findings of the Board, see special article elsewhere in present issue.

*Miscellaneous.*—Barbers were fairly well employed, delivery employees busy, and hotel, restaurant and theatre employees brisk.

*Transport.*—All employed in the different branches of transportation, including switchmen, telegraphers, trackmen and freight-handlers, were fully employed. Street railway men were active.

*Unskilled.*—Inactivity was the rule.

DISTRICT NOTES.

*New Glasgow.*—The engineers are about through with the surveying of the East river, from its outlet at Pictou Harbour up to New Glasgow. They found that there will be no difficulty in getting twenty-four feet of water up to the tram bridge. They found in some places seventeen and a half feet of mud, which will have to be removed by the dredge. The assessment of New Glasgow is as follows:—

Real estate.....	\$ 1,499,270
Personal.....	430,685
Income.....	66,400

Total..... \$ 1,765,650

HALIFAX, N. S., AND DISTRICT.

*Mr A. J. Smith, correspondent,* reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during the past month were hardly up to the standard of the corresponding month of 1907, but considerable progress was made on building and repairing contracts. Men on the waterfront experienced a duller month than March, 1907, but an improvement is expected soon. The ice crop was above the average for some years. There was an almost entire absence of snow and the ice was of the right thickness to expediate the handling. The major portion was handled in about ten days. Among the buildings recently completed and occupied is the new branch of the Canadian Bank of Commerce, 80 feet by 40 feet. Another building nearing completion is the new

telephone exchange. Work on the new cathedral has been begun, and will be pushed forward as rapidly as weather will permit. It will cost upwards of \$100,000. Alterations on the court house are going on steadily, while the extensive alterations to the Union Bank are almost completed.

A meeting of the working men of the city was held on the 13th of March with the object of forming a labour club, similar to those already organized in some of the cities of the larger provinces. The object of the club is political action. The council passed a resolution endorsing the Workmen's Compensation Bill now before the Provincial Government. The bonusing of immigrants was condemned. The action of the Provincial Government in appointing a factory inspector was appreciated and a resolution passed endorsing its action.

The legislative Committee of the Provincial Workmen's Association arrived in the city on March 23rd, to endeavour to have the following concessions granted by the Local Legislature:

- (a) An eight-hour day.
- (b) Weekly pay.
- (c) That the Government appoint a commission to enquire into the present high cost of living.
- (d) That there be a Miners' Board for the granting of certificates.
- (e) That fifty dollars be paid families of all men killed in the collieries
- (f) That drawing pillars by machinery be prohibited.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The weather has been too severe so far to begin operations to any extent, but prices in the local market were fair, and business in these lines as well as fruits, was steadily improving.

*Fishing.*—Local fishermen were preparing for the approach of warmer weather. During the early part of the month local dealers reported business dull, but as the month advanced and the weather improved business became brisker, nevertheless the supply was equal to the demand. The price paid for fresh fish is 3½c per pound in purchases of one ton or more.

*Lumbering.*—This industry was very dull.

*Mining.*—The report of the Commissioner of Works and Mines brought down early in March contains some interesting statistics relating to this important

industry of the province, among the most important being a statement of mineral production for the years 1906 and 1907 as follows:—

## MINERAL PRODUCTION, NOVA SCOTIA.

	Year ended Sept. 30, 1906.	Year ended Sept. 30, 1907.
Coal raised.....(gross tons)	5,866,605	5,730,660
Pig iron....."		293,436
Coke made.....(net tons)	508,082	493,102
Iron ore.....(gross tons)	*648,042	*562,746
Limestone.....(net tons)	400,584	458,601
Gypsum.....(gross tons)	247,840	332,345
Gold.....(ounces)	14,079	15,006
Bricks.....		25,000,000
Building stone.....(net tons)		63,861
Cement.....(barrels)		58,762
Antimony ore.....(net tons)	782½	1,403
Manganese ore.....(gross tons)	1½	†495
Copper ore.....(net tons)	190	2,471
Drain pipe.....(feet)		300,000
Grindstones.....(net tons)		350
Copper.....(pounds)		12,320
Moulding sand.....(net tons)	1,460	190
Berytes.....(net tons)	3,500	

\* Including imported ore. N. S. ore, 48,337 tons.

† All imported.

Some eight years ago the Mines Department purchased seven drills, which have been much in demand. Last year's requisitions were in excess of the previous year. The mineral sought was coal, iron, gold, gypsum and limestone, the number of feet bored was 32,901, and the cost to the Department \$60,682.52.

Statement of the number and persons employed in the mines of the province, during the year ending September 30th, 1907:—

<i>Underground:</i>	
Skilled labour.....	4,973
Labourers.....	3,797
Boys.....	737
Day's labour.....	2,510,268½
<i>Surface:</i>	
Skilled labour.....	989
Labourers.....	1,407
Boys.....	184
Day's labour.....	831,815
<i>Construction:</i>	
Skilled labour.....	28
Labourers.....	16
Boys.....	2
Day's labour.....	6,331
<i>Totals:</i>	
Persons.....	12,107
Day's labour.....	3,254,442

*Manufacturing and mining* were normal.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were dull, only about twenty-five per cent. of the men being employed, but prospects were reported as good. Carpenters and joiners reported an improvement over last month, with prospects bright for the coming season. Lathers and plasterers were very dull. Painters, decorators and paperhangers reported a slight improvement over last month, with prospects good. Plumbers had a fairly good month, but expect increased activity. Stone-cutters were fairly well employed. Building labourers experienced a month slightly above the average.

*Metal, engineering and shipbuilding.*—Boiler-makers were fairly well employed, with prospects good. Horseshoers were well employed.

*Printing and allied.*—Printers, pressmen and bookbinders had a busy month; there were prospects, however, of a slight falling off in April.

*Clothing.*—Ready-made lines were dull and custom trade was hardly up to the average.

*Unskilled labour.*—This class was very quiet, more so than during the corresponding month of last year, but with the approach of spring an improvement is expected.

#### DISTRICT NOTES.

*Annapolis.*—A despatch of March 19th says "exploration and development work during the past year has strengthened the opinion that there are enormous deposits of highly valuable ore in the district." Manager Drummond of the Londonderry works, with three engineers has just completed a week's investigation with the view to much more extensive operations and the shipment of the ore abroad. In the near future a more thorough examination will be made.

*Lunenburg.*—The warehouses, wharves and shipping of the W. C. Smith & Co., were decorated on March 17th, in honour of the launching of the "Clintonia" the latest addition to their fishing fleet. The "Clintonia" measures 125 feet over all, 103 feet water line, 25 feet 8 inch beam, and 11 feet 6 inches hold, and cost about \$11,000. A sister ship will be ready in June. The W. C. Smith & Co's fishing fleet now numbers about twenty vessels. The first fishing schooners sailed for the banks on March 23rd. Other schooners had cleared at the same date but had not sailed.

*Bridgetown.*—The Sterling Mining Company of New York are meeting with success in the development of their copper leads near Balfron, Waugh's River, Bridgetown. Two or three car-loads of ore are mined daily, and a car-load of concentrates shipped weekly to either New York or Swansea, Wales.

#### AMHERST, N. S., AND DISTRICT.

*Mr. A. D. Ross, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during March continued about the same

as in February. Two or three industries have been working full time and employing their full complement of hands. A number of others have reduced their working staffs, while in one or two others the hours of labour have been temporarily reduced. The rolling mills in connection with Rhodes, Curry & Co. were shut down for about ten days for necessary repairs. It is expected that they will open by April 1st. There was no particular demand for unskilled labour, the local supply being more than sufficient to meet the demand. Coal miners were in constant demand, and high wages were paid to experienced workmen, *i. e.*, coal cutters, etc.

A New York syndicate has purchased the Scotia coal mine, which has been operated on a small scale for the past thirteen years. The new company has also acquired adjoining undeveloped areas and intends to extend the operations of the mine. This will still further increase the demand for experienced coal cutters.

Banks reported collections fair, but wholesale dealers stated that orders were not as heavy as in the corresponding month of last year.

Rhodes, Curry & Co., about the middle of the month, reduced the wages of about 1,000 men ten per cent.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were hauling wood to the market and getting out small quantities of lumber.

*Fishing.*—Lobstermen were preparing traps and boats.

*Lumbering.*—The cut will not be over one-third of last year.

*Manufacturing.*—Boot and shoe workers were busily employed. The car works were fairly busy, having orders on hand that will keep plants operating until September. The woollen mills have had a fairly busy month. The iron working industries were only fairly active.

*Mining.*—Coal mining was very brisk, with miners in demand. One hundred skilled miners could easily find employment in the vicinity within the next few months. The stone and plaster quar-

ries closed down during the winter, but preparations for spring work will be resumed at the earliest possible date.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons and stone cutters were unemployed. Many carpenters and joiners were also out of work. The indications are that the local supply in these trades will be sufficient for the summer. Painters and paperhangers were becoming more active as the month drew to a close.

*Metal.*—Iron-moulders, iron-workers and helpers had fairly steady employment, but there was no demand for more than local workers. The machinists, except in one or two workshops, where employment can now only be found for five days a week, were kept fairly busy. Orders, however, were not up to last year.

*Woodworking.*—Car-builders were kept fairly busy. Wages, however, were decreased 10 per cent. Pattern-makers reported work slack.

*Printing.*—Printers were fairly well employed. A few men were working on reduced hours.

*Clothing.*—Tailors and garment workers reported work brisk and a steady improving with the advance of spring.

*Food and tobacco preparation.*—Bakers and confectioners were fairly active. Ice cutters were very busy.

*Miscellaneous.*—Stenographers have been well employed. Furriers reported a good season.

*Unskilled labour.*—The local supply was not all employed.

#### CHARLOTTETOWN, P. E. I., AND DISTRICT.

*Mr. F. J. Nash, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during March showed an improvement over February and was about equal to the same month last year. The sup-

ply was in excess of the demand, although there was no serious shortage of employment. Milder weather prevailed than in March, 1907, enabling more outdoor work to be done, but the bad roads made business dull for a time. The shipment of the large quantity of seed oats to the Northwest continued during the greater portion of the month, thus making business brisk along the railway line and adding materially to the wages ordinarily paid to the freight-handlers in connection with the winter steamboats. The inward freight by the steamers began to exceed the outer at the latter part of the month, as the merchants began to receive their spring goods.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Operations were carried on as usual, work being handicapped by the bad roads. A feature of the month was the holding of the Provincial Seed Fair at Summerside. This was the most successful yet held, there being a large number of exhibits, indicating that the good seed movement has made gratifying progress in this province, and that the farmers are beginning to rely, in a large measure, on home grown seed.

*Fishing.*—Great activity prevailed along the coast at the various factories, preparing for the opening of the lobster season on the 19th of April. A large number of traps have been constructed, new boats built, etc. This work gives employment to a large number of men even before the fishing actually begins.

*Lumbering.*—Owing to the small areas of wood land in this province, in which agriculture is the main industry, lumbering has not been carried on to any extent.

*Manufacturing.*—The few factories have been carried on under normal conditions.

*Railroad construction and employment.*—There was practically a complete suspension of railroad construction during the month. In the last week, work was resumed at the new car shops, which were nearing completion.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, lathers and plasterers had a dull month.

Carpenters, painters, decorators, paper-hangers, plumbers, gas and steamfitters and stonecutters were active. Builders' labourers were dull.

*Metal.*—Iron moulders, workers and helpers, machinists and engineers, electrical workers, linemen, sheet metal workers, blacksmiths, bicycle workers were active.

*Woodworking and furnishing trades.*—Woodworkers, carriage and wagon-makers, car builders were active.

*Printing.*—Printers and bookbinders were busy.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and tobacco workers were active.

*Leather.*—Tanners and saddlers were active.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and theatre employees were active.

*Transport.*—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen and trackmen were active. Freight-handlers were busy. Teamsters and expressmen were active.

*Unskilled labour.*—There was a fair demand for labour.

## MONCTON, N. B., AND DISTRICT.

*Mr. J. C. Graves, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during March were about the same as in February, and hardly up to the corresponding month of last year. The absence of snow and the consequent bad roads interfered with local traffic and effected trade to a considerable extent. The existence of a mild type of smallpox in the city had also a detrimental effect upon business. On the 13th instant the local Board of Health closed all schools, churches, and places of amusement, and on the 20th inst., an Order-in-Council was issued making vac-

ination compulsory. The situation since has greatly improved. The supply of labour is somewhat in excess of the demand at present, but the unemployed are but a small percentage, and no cases of destitution have been brought to notice. Building has commenced, some contracts having been let, and the outlook for the coming season in this line is good. Building material, however, is higher than last year. Frame scantling is quoted from \$13.50 to \$15.00; spruce and hemlock boards, \$16.00 per M.; spruce sheathing, \$22.50; shingles, clean, \$3.10; No. 2, \$2.10, and clear white, \$1.90; laths, \$2.50 per M.; lime has also advanced 10c. per cask, being now \$1.30. The city council is asking legislation for power to exempt the Abrams Sons' machine shops and the Paul Lea Co., Ltd., from all taxation upon their respective properties on any amount over and above \$5,000 for the former, and \$6,500 for the latter company for a period of fifteen years. The Board of School Trustees is also asking for legislative authority to issue debentures to the amount of \$37,500 for school purposes. Rent remains high, real estate active and firm, and houses scarce. Retail trade has been somewhat dull and wholesale trade slow. An early opening of traffic, both with Prince Edward Island and down the Petitcodiac River, is looked for. The ice is reported to be out of Point du Chene harbour. Owing to the melting of the snow and the wet weather, about 270 foreign labourers employed in the excavation for sewer and water pipes at the new I. C. R. shops were temporarily laid off about the middle of the month. The mildness of the winter and the absence of storms rendered it possible to continue this branch of the construction all through the winter, with but slight interruptions. Twenty-five additional carpenters were recently taken on, and about 130 men are now employed. With the advent of spring, the contractors expect to employ about 700 men. Appearances are that labour will be more plentiful and cheaper than last season. On the 23rd of March, the labourers were reduced from \$1.60 to \$1.50 per day. About 250 men were affected. No change in hours of labour

have been noted and no differences between employers and employees.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Very quiet conditions prevailed among the farmers, the absence of snow and bad roads being largely contributory. Sugar makers were preparing for work. Farm produce was high, and dairy products especially so. Butter was retailing from 28c. to 35c. Beef was scarce, but hay was plentiful at \$10.00 to \$12.00. Maple candy was 20c. per lb.

*Fishing.*—This industry was in its quiet season.

*Lumbering.*—Crews are now out of the woods. Poor hauling weather interfered with the output. Little river driving is done in this vicinity. Portable mills were very busy.

*Manufacturing.*—All local manufactures are in operation, some being especially active and but few working with reduced staffs.

*Railroad construction and employment.*—Work at double tracking the I. C. R. from Moncton to Painsec Jet, is expected to commence on April 1st. One hundred foreign labourers have been engaged and camps are being equipped. They are being paid \$1.50 per day. The new steel bridge over the Miramichi at Doaktown was completed on the 25th. A large crew of men were employed upon it all winter.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were quiet. The demand for carpenters was increasing towards the close of the month. Painters and decorators also report similar conditions. Plumbers and stonecutters were quiet.

*Metal.*—Iron moulders, workers and helpers were fairly active, and machinists and engineers were busy. Blacksmiths and boiler-makers were active, and horse-shoers quiet.

*Woodworking.*—Woodworkers were busy, upholsterers quiet and car builders active. Barrel factory employees were active.

*Printing.*—Printers had an active month, being in good demand with plenty

of work and opportunities for overtime. Pressmen were busy, and bookbinders steadily employed.

*Clothing.*—Normal conditions prevailed, journeymen tailors and garment makers being fair. Milliners and millinery apprentices were active.

*Food and tobacco preparation.*—Bakers, butchers and meat cutters were active and reported the month up to the average.

*Leather.*—Quiet conditions prevailed.

*Miscellaneous.*—Barbers, clerks and stenographers were fairly active, with delivery employees busy. Theatre employees were quiet, also restaurant workers. Laundry workers were active.

*Transport.*—Railway traffic, both passenger and freight, has been good, many specials being required, and as a consequence railway crews have been active. Teamsters, truckmen and expressmen were active.

*Unskilled labour.*—The demand has been moderate and the supply in excess, but as spring advances these conditions will be reversed.

#### DISTRICT NOTES.

*Hillsboro.*—The gypsum quarries of the Albert Manufacturing Company closed down on the 14th inst. owing to dullness in the United States market. About 200 men were thrown out of employment. The marble and granite works are again in operation, after two months rest.

#### ST. JOHN, N. B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during March remained quiet, although some of the mills started sawing. The building trades remain quiet, but as the spring advanced, prospects seemed brighter. The Bank of New Brunswick intends erecting a building in St. John West. The new building will be of brick and stone. A brick hall, 34x100 feet, two stories, with basement under the front portion, will

also be erected. Cargoes for 81 steamships had been filed up to March 28 at the Custom House. These steamships carried away Canadian goods valued at \$11,512,058 and foreign goods valued at \$5,571,480, making a total of \$17,083,538. The wheat shipments were in the vicinity of 5,250,000 bushels. Bank clearings for the four weeks ending March 26 were \$4,304,175, and for the corresponding period last year, \$4,513,485, being \$209,310 less in 1908 than in 1907, and \$1,119,410 less than for the five weeks ending February 27, of the current year. A project is on foot to have a steamship service between Boston, Havana and St. John. Messrs. G. J. Hamilton & Sons, biscuit and confectionery manufacturers, with headquarters in Pictou, Nova Scotia, and a number of branches in the provinces, closed the doors of their St. John establishment on Saturday, March 7th.

The C. P. R. Co. is now preparing for summer work on the main line and branches. Two large bridges will be built in this province, one at Upper Woodstock and the other at Grand Falls. The Grand Falls bridge across the St. John River will have nine concrete piers, as well as concrete abutments. On the main line some twenty miles of 85-pound steel rails will be laid. It is also thought that additional tracks will be put down at the Bay Shore yard, where grading has already been done, thus enlarging the capacity of that storehouse for the winter trade.

The lumber shippers and shipping merchants, at a meeting on March 6, entered into an agreement to pay a certain wage to ship labourers during the coming summer. The shipping men say that this course is for the benefit of the port, and will do away with strikes. The millmen working for Messrs. Cushing at Union Point, and for Stetson, Cutler & Co., Pleasant Point, received notice on March 9 that they would only receive 90 per cent. of their former wages. These two mills are the only ones at present sawing. The Union printers in the Telegraph and Times offices went on strike on March 22 and 23. There were four men working on the Telegraph who became in arrears

to St. John Typographical Union, No. 85, and were suspended therefor. A committee then went to the manager and endeavoured to arrange a settlement, but the manager deferred until after the provincial elections. On March 17th, the president of the Union received notice that his services would not be required after Friday, March 20. A special meeting of the union was held on the 22nd, and it was decided to call the men out. The men did not go to work on Sunday night. The Times hands went out on Monday, March 23. The pressmen and assistants quit work on March 27, and on that afternoon the hands employed in the job room were notified that that portion of the establishment would be closed down until the trouble was settled.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There has been a revival in the price of hay, oats and potatoes. Hay is bringing \$8 to \$10 per ton, while oats are fetching 45 cents. Good potatoes are selling for \$1.25 per barrel. Butter is scarce, and tub butter is selling for 32 to 35 cents per pound, the dairy products bringing 40 cents. Fresh eggs can be had for 22 to 25 cents per dozen.

*Lumbering.*—It is estimated that the lumber cut on the Restigouche this season will be about 60,000,000 feet. One operator alone got out 1,500,000 feet more than he expected. The scarcity of snow prevented the lumbermen from hauling as easily as usual. They were yarding for three weeks at a period when they are usually hauling. Cutting and sawing was finished March 14, at J. A. Gregory's camp and portable mill in the rear of Blagden. The winter's cut was a very good one, being above the average. Over 500,000 feet will shortly be shipped from Blagden.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, stonecutters, builders' labourers and masons were dull. Carpenters and joiners, painters and decorators, plumbers, gas and steamfitters, were active.

*Metal.*—Iron moulders, iron workers and helpers, machinists and steam en-

gineers were active. Electrical workers and linemen, blacksmiths, boilermakers and sheet metal workers were busy.

*Woodworking.*—Woodworkers and shingle weavers were active.

*Printing and allied trades.*—Printers and pressmen were busy, except in the Telegraph and Times offices. Bookbinders were active.

*Clothing.*—Journeymen tailors were active.

*Food and Tobacco preparation.*—Bakers and confectioners were busy. Cigar-makers were active.

*Miscellaneous.*—Broom and brush-makers were busy.

*Transport.*—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen and freight-handlers reported trade active. Steamboat men and firemen were busy making preparations for the opening of spring navigation. Ship labourers were active, with street railway employees busy, and teamsters and expressmen active.

*Unskilled labour.*—Was dull.

#### DISTRICT NOTES.

*Chatham.*—The manager of the Miramichi Pulp and Paper Company has announced that the mill will be closed down for two or three weeks until the price of pulp has recovered.

*Marysville.*—The Canadian Colored Cotton Company's mill was closed down for a few days on account of the scarcity of wood. Coal burners were installed while the mill was shut down.

*Rexton.*—The smelt fishermen of this vicinity have organized. They allege that they have been treated unfairly by the shippers, and they propose to handle their own fish on the co-operative plan. There are 500 or 600 men engaged in the smelt fishery, and if the whole or a majority of these will join the Union, a large cold storage plant will be erected here.

*Sackville.*—Work has been resumed on the new woodworking factory on the road to the Landing, and the frame has been raised on the portion of the foundation which was finished last autumn.

#### QUEBEC, QUE., AND DISTRICT.

*Messrs. P. J. Jobin and Edward Little, correspondents,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The month was somewhat quiet, the only special activity being in connection with the preparations of vessels for the opening of navigation. Weather conditions were unfavourable for outside employment. Some unrest was occasioned in connection with the fixing of the schedule of ship labourers and longshoremen for the coming season. The provincial bureau of conciliation and arbitration was endeavouring to effect an understanding between the interested parties. A large gang of labourers was employed at rock removal. The opening of the provincial legislature gave increased employment for hotel and restaurant employees, cabmen, etc. The Montmorency cotton mill was working short time, but had kept all hands employed.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The making of maple sugar was begun at an exceptionally early date.

*Lumbering.*—The logging camps had not yet closed, the roads being still good for hauling. Work in the woods will be nearly completed by April 1.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Most of the branches were quiet.

*Metal, engineering and shipbuilding.*—Iron workers, machinists, engineers, boilermakers, etc., were busy. Electric workers and linemen were active.

*Printing.*—The month was very active.

*Clothing.*—Boot and shoe workers were busy.

*Food and tobacco preparation.*—A fair month was reported.

*Leather.*—Trade was somewhat quiet.

*Miscellaneous.*—The month was active.

*Transport.*—Employment was fair.

*Unskilled labour.*—Dullness prevailed.

## THREE RIVERS, QUE., AND DISTRICT.

*Mr. Joseph J. Ryan, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was quiet during March, showing little change from the preceding month. Cold weather prevailed.

There are still about 250 men employed on the new cotton factory and a few other buildings. There has not been any stone brought from the south shore over the ice bridges for the corporation, as during previous years. The C. P. Railway Co. has hired from the Harbour Commissioners 1,000 feet of the new Bureau's wharf for the coming navigation season.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers had a satisfactory month, produce selling well, at good prices. Most of the farmers have commenced making maple syrup and sugar.

*Lumbering.*—Lumbermen were busy preparing for the drive.

*Manufacturing.*—All industrial establishments have been fairly busy.

*Mining.*—Three or four outfits have been busy drilling wells for oil and gas.

*Railroad construction.*—Very little work on the railroads was done this month, except the shovelling of snow. Passenger and freight trains were kept busy.

## CONDITION OF PARTICULAR TRADES.

The skilled trades were fairly well employed and there were only a few idle labourers.

## SHERBROOKE, QUE., AND DISTRICT.

*Mr. H. Logie, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in some respects were more favourable during March than

in February. With the opening of April the building trades will begin more active operations. Work on the new drill shed has been commenced, and some fifteen stonecutters are now at work. Work which was suspended on other buildings has been resumed. Conditions at the Jenckes machine shops and the Canadian Rand Drill factory are about the same. Prospects in the latter works pointed to better times, but a number of orders were held over, with the result that more men were discharged and a portion put on at three-quarter time. There is no lack of orders in these places to keep full staffs going full time. Owing to the condition of the money market, however, and customers asking that their work be held over for a period, dullness prevailed. There has been a good demand for lumber and a large number of men will be employed on the drives. The quantity of logs cut in this section compares favourably with other years. The pulp mills of the Brompton Pulp and Paper Co. are running night and day, the daily output being about 100 tons. The same company which controls the East Angus pulp and paper mills has made a large cut on the limits of the East Angus mills, the total being about 76,000 cords of pulpwood and 14,000,000 feet of logs.

There was a fairly good demand for unskilled labour. A notice has been posted in the Paton mill stating that when the mill closes on the 11th of April, it will remain closed until the 27th. The cause is reported to be the quiet times and the need of repairs.

The proposal started some time ago to form a co-operative society has now materialized under the name of "The Co-operative Society of the Workingmen of Sherbrooke." It is the first organization of the kind in the eastern townships, and will be regulated by the Syndicate laws of Quebec, 1906. It is proposed to open a store shortly.

On the 9th of April the ratepayers of Sherbrooke voted to purchase the gas and electric plants belonging to the Sherbrooke Power, Light and Heat Co. There was practically no opposition. The price is \$250,000. The city was given authority by the same by-law to borrow \$170,-

000 upon an issue of debentures payable in 25 years, at the rate of five per cent. The remaining \$80,000 is represented in bonds of the company, responsibility for which the city will assume. The city has called for tenders for the loan. The plant has to be taken over by the 2nd of July.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy making maple syrup.

*Lumbering.*—There has been a considerable quantity of lumber got out this season. The weather up to the end of the month was favourable to hauling.

*Manufacturing.*—The woollen mills were quiet. An order of the court has put the Moore Carpet Company into liquidation. So far, no steps have been taken to start up the concern. The bobbin factory, jewellery factory and other small industries were running full time.

*Mining.*—Mining was quiet at the copper mines, Capelton, owing to the low price of copper. The asbestos mines were running to full capacity.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were quiet, but prospects are better for April.

*Metal.*—Moulders, iron workers, machinists, boilermakers were dull. Electrical workers and blacksmiths were active.

*Woodworking.*—Woodworkers, upholsterers, varnishers and polishers were active. Carriage makers were busy. Pattern makers were dull.

*Printing.*—Printers, pressmen and bookbinders were busy. A new daily paper to be called the Daily News will start on May 1.

*Clothing.*—All sections were quiet.

*Food and tobacco preparation.*—Bakers, butchers and cigar makers were quiet. Icemen were active.

*Miscellaneous.*—Barbers, clerks, stenographers, hotel and laundry workers were quiet.

*Transport.*—Transportation employees have been fairly active.

*Unskilled labour* has been active.

#### DISTRICT NOTES.

*Brompton.*—The Tobin Mfg. Co. have finished hauling in lumber amounting to about 2,000,000 feet. They are now sawing and piling it for use in their sash and door factory when required. They have also hauled in a large lot of cedar telephone poles, cordwood and hemlock ties.

#### ST. HYACINTHE, QUE., AND DISTRICT.

*Mr. B. Phaneuf, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET,

The condition of the labour market did not change much during March. The building trades were dull, and in all industries the supply of labour was in excess of the demand, a large number of men being idle. The Ames Holden boot and shoe factory, which closed its doors in February, had not yet reopened; it was stated that the company would not recommence operations until May 15, from 250 to 275 hands being idle. The Coté company which diminished activity on March 20 in order to take stock, recommenced work on March 22. Door and sash factories were fairly well occupied with a full staff. The Duclos Payen Co., which closed down for about twelve days in order to repair its hydraulic power recommenced operations towards the close of the month. There was a slight improvement in the iron industry, the workshops being fairly well employed. The agricultural instrument factory was busy in anticipation of the spring trade. The organ factory was active as well as the woollen factory, but the corset factory had a dull month. On February 24, the stocking knitters (females) in the Penman woollen factory asked an increase of three cents per dozen for a certain kind of work. Their request was refused and twenty of them quit work, but after consultation decided to return under the old conditions. The company, however at first refused to re-

instate them through they eventually recommenced working on March 9, under the old scale. The clothing factory had a good month, there being sufficient orders to keep it going steadily. Important improvements to the cathedral have been begun. The front and wings of the building will be remodelled and a new chime of bells placed. These repairs, it is expected, will be finished in two years and will give work to many hands. The municipal corporation employed a certain number of men, and if weather permits, work on the streets will soon begin. The outlook is for a busy spring. Rents were very high. Retail trade was very dull and local merchants complained of the scarcity of money due to the large number of unemployed. Wholesale trade was also quiet on account of the financial stringency. Banks reported a fairly active month, with somewhat easy collections.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were satisfactory during March. Produce sold well. Eggs were a little lower, selling for 25 cents per dozen; potatoes fell from 80 to 60 cents per bag, but other produce was firm. Lectures on agriculture were held during the month at St. Barnabè on March 2, and at St. Pie the next day.

*Manufacturing.*—Quiet conditions prevailed, owing to the monetary stringency.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Plumbers, gas and steam-fitters were busy; the other branches were dull.

*Metal, engineering and shipbuilding.*—Satisfactory conditions were reported.

*Woodworking and furnishing.*—The various classes were well employed.

*Printing.*—The beginning of the month was dull, but conditions improved toward the close.

*Clothing.*—Conditions were generally fair, but boot and shoe workers were dull.

*Food and tobacco preparation.*—Cigar-makers and tobacco workers were idle.

The other branches had steady employment.

*Leather.*—Fairly favourable conditions obtained.

*Miscellaneous.*—Barbers, clerks, hotel and restaurant employees and laundry workers were busy.

*Transport.*—Railway employees, cabmen, carters and delivery employees were active.

*Unskilled labour.*—The month was very quiet.

#### DISTRICT NOTES.

*St. Johns.*—The Singer Manufacturing Company was working steadily, the old hands being given employment by degrees and the improvement being general. A new sash and door manufacturing company has been formed.

*Sorel.*—Repairs on the steamer *Prefontaine*, were begun in the St. Joseph shipyards. The hull of this vessel will be considerably strengthened, and her passenger accommodation improved. She will run between Montreal and Quebec for the Canadian St. Lawrence Navigation Company, whose headquarters will hereafter be in Quebec. The government shipyards were in full operation.

#### MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Pelletier, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

March was not as active as was expected, a depression in the building trades prevailing in the beginning of the month. Towards the end of the month activity was resumed, several large buildings in different parts of the city having been commenced on March 23, among these being the Credit Foncier and the new post office. The Canadian Pacific Railway Company is projecting large buildings in the western parts of the city and extensive yards in the east end. The Parc Dominion Amusement Company

is rebuilding its establishments destroyed by fire last fall. The company will expend the sum of \$150,000. Work on the new cotton factory was progressing very rapidly; the factory will be in operation in the beginning of May. The assessment roll of Maisonneuve shows that the taxable property amounts to \$8,533,056.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Plumbers and builders labourers were active. Painters and decorators were active towards the end of the month; the other branches were quiet.

*Metal and woodworking.*—Trades were dull.

*Printing.*—Quietness prevailed.

*Clothing.*—Owing to several strikes among journeymen tailors, trade was very dull.

*Food and tobacco preparation.*—Dullness was reported.

*Leather.*—These trades were quiet.

*Miscellaneous.*—Delivery carters were busy, the other branches were active.

*Transport.*—These classes had a dull month.

*Unskilled labour* was not in demand.

#### DISTRICT NOTES.

*St. Louis de Mile End.*—The building trades have been well employed. Several manufacturers have reduced the number of their workmen owing to stock-taking, etc.

*Hochelaga.*—Over 500 employees of the McDonald tobacco factory were idle on March 23. The company has reduced the number of employees to 500, while taking stock. The management stated that the suspension would be of short duration and that work would be resumed on April 3.

*Lachine.*—The Imperial Locomotive Works Limited will erect large buildings this spring, the Johnson farm of 100 acres having been bought for this purpose. The new enterprise will be erected on the plans used for the works of the Blyer, Peacock and Company. The buildings alone will cost \$2,250,000 and the concern will employ 2,000 men.

#### MONTREAL, QUE., AND DISTRICT.

*Mr. G. Audet, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Dullness increased during March in the tobacco industry, particularly in the cigar making branch, but activity was being slowly resumed in the boot and shoe industry and in the metal and building trades. Unemployed labourers number thousands and individual cases of want were numerous.

During February there was a notable decrease in the number of building permits issued as compared with the same month last year. Forty-four building permits valued at \$72,590 and 19 permits for alterations valued at \$41,790 were issued.

During the calendar year 1907 there were 1,449 fire alarms. There are at present 538 fire alarm boxes, of which 317 are keyless, and 221 have keys.

The financial statement of the Montreal Street Railway company for February showed an increase of \$136,993 in the gross receipts of the company for the five months ended February 29, 1908, as compared with the corresponding period of 1907.

During February the revenue of the Montreal post office showed an increase of \$118,627, compared with the corresponding month of 1907, and of \$343,527.26 compared with the month of February, 1898.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Plumbers, steam and gas fitters were busy. The other branches were quiet in the opening weeks of the month but were becoming more active towards the end.

*Metal, engineering and shipbuilding.*—Quiet conditions were reported.

*Woodworking and furnishing.*—Carriage and wagon makers were active; the other branches were quiet.

*Printing.*—These trades were active.

*Clothing.*—Journeymen tailors and garment workers were well employed dur-

ing the first part of the month but were quieter at the end, whereas boot and shoe workers were dull in the opening but more active at the close.

*Food and tobacco preparation.*—With the exception of tobacco workers, who were quiet, these classes were active.

*Leather.*—Dullness prevailed.

*Miscellaneous.*—Hotel, restaurant and laundry employees were active. The other branches were fairly well employed.

*Transport.*—Street railway employees were active, but there was a surplus in the supply. Steamboat men, long-shoremen, teamsters and expressmen were dull. Cab and hack drivers were busy.

*Unskilled labour.*—Dull conditions were reported, there being a large number idle.

#### HULL, QUE., AND DISTRICT.

*Mr. Rodolphe Laferrière, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

During March fairly active conditions prevailed in the labour market. Now that the winter, the dullest season for the workmen who compose the seven-eighths of Hull's population is over, an improvement will take place. The demand for and supply of labour were about equal, with a small percentage of idle men. The latter have generally means to wait for the busy season, being for the most part members of families the rest of whom are working and support the household. There has been no need for soup kitchens, despite the alleged hard times elsewhere. The public and private charities never, at any time during the past severe winter, had more cases to provide for than formerly, viz., about 35 families. No case of suffering has been reported. Prospects for the future are reassuring. Several employers in the log-making line, stated that there may be a raise in the rates of wages this year. The hiring of men has already started. This is much earlier than usual. The men leave on April 1st for the Madawaska, at rates of \$38 and \$42 per

month. As they are working on large streams, where the drive can be made late in the year and where the season is consequently longer, wages are slightly affected.

Banks reported very satisfactory results. Commercial paper was well met and there did not seem to be any great scarcity of money. Merchants' renewals were normal and the rate of discount remained unchanged. La Banque Provinciale and the Bank of Ottawa have doubled their staffs. Easter trade promises to be better than last year. A dealer in millinery stated that the average price of hats was 25 per cent. higher than last year, and the number sold at this early season was already far in excess of the previous year. The cement company has its staff engaged on repairs for a month or six weeks; no reduction in wages has been announced. The Industrial Development Company capitalized at \$500,000, which intends starting operations in Hull this spring, has definitely organized its board of directors at a meeting held in Montreal. The company intends carrying on the manufacture of wood alcohol, tar, spirits and other by-products of sawdust and wood refuse. The E. B. Eddy Company, which has been running some of its paper-making machinery on short time during the winter, intends starting at full capacity on April 1st. The full operation of the mills will mean about 100 hands being added to the present staff.

#### OTTAWA, ONT., AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The hiring of men for the lumber drive gave work to a large number during the latter part of March. In no branch of employment are wages in greater contrast with last year than on river work. The demand can be supplied by offering between \$30 and \$35 per month, about \$10 less than a year ago. Lack of employment

generally in the country and the reduction of shanty crews in the winter by approximately 25 per cent. has swelled the number of applicants for work. Although wages are lower in all branches of the lumber industry, manufacturers assert that last year's wages will likely be maintained in the mills during the coming summer. Civic work became active with the spring thaw, and 150 men were set to work cutting channels in the streets at \$1.75 per day. This wage went into effect for all civic labourers last summer, when labour was scarce, and was not lowered during the dull period. Sewer construction was begun March 30, employing 20 extra men in the recently annexed territory, the intention being to increase the staff to 100 in a few days. Prospects are that spring will find all labour employed at last year's wages. J. R. Booth will require about 2,000 men in his lumber, pulp and paper industries. An additional 100 will be needed when his sulphite mill starts, the first week of June. Much building has been arranged for, especially of houses. In the central parts of the city rents have advanced from 20 to 30 per cent. over last year. There is a corresponding increase in the price of houses, and a general appreciation in real estate.

The number of dependent people decreased during March, and nearly all those receiving public charity were such as are helped every winter.

A deputation of members of the National Trades and Labour Council waited on the Ottawa Electric Railway Company to ask for an extension of time for the use of the workmen's ticket on street cars. In the morning, the tickets are good from 6 o'clock to 7:30, and the labour men wanted an extension till 8 o'clock. The company answered that this change would necessitate the carrying of a large portion of the general public at the reduced fare, and that it would open the way for asking even further extensions in the future. The limited ticket is sold at eight for 25 cents, while the regular tickets are 25 for \$1.00.

In determining the allowance due a superannuated teacher, the Ottawa Public School Board, on March 5, decided that

10 months constituted a teaching year, and that the monthly wage should be estimated without including the two months allowed for holidays.

A committee of the directorate of the Protestant Home for the Aged, has been appointed to report on a plan for providing accommodation for aged couples to live together.

An increase of half a cent a pound was made in the retail price of sugar on March 12.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have been favoured with better dairying conditions. Milk has become more plentiful and butter is a little cheaper. In the Ottawa valley, pork and beef have been marketed in large quantities and prices are low. Some sorts of poultry have gone as high as 25 cents a pound. The Salvation Army officers are interviewing farmers with a view to supplying the demand for labour.

*Lumbering.*—A large quantity of deal has been sold by Ottawa lumbermen to British buyers at prices varying little from last year. Although the cut in the camps was less than last year, the manufacturers expect that there will be no falling-off in the output of the mills. The civic contract for lumber showed prices to be the same as last year.

*Mining.*—The Canadian Mining Institute, which met in Ottawa the first week in March, passed a resolution asking the Dominion Government to continue the lead bounty five years longer, and increase it from \$80 to \$90 per ton.

#### CONDITION OF PARTICULAR TRADES.

The several trades were quiet.

#### DISTRICT NOTES.

*Pembroke.*—The town council, on March 6, accepted Mr. Andrew Carnegie's offer of \$12,000 for a public library. The town will furnish a site and contribute one-tenth of the annual maintenance.

## KINGSTON, ONT., AND DISTRICT.

Mr. Wm. Kelly, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Merchants reported a brisk trade during the past few weeks, and are looking forward to a busy spring. Furniture men reported business the best in years, and far ahead of that of this time last year, especially with out-of-town people. In the building trades, contractors and workmen were busy drawing up agreements and laying plans for a large season's business. Several buildings were commenced during the month. The marine companies began fitting out for the approaching season. Many of the large lake freighters are now ready for the opening of navigation, and many of the unemployed who have made application to these companies will be taken on. Corporation workmen had a busy month opening drains, etc. Local ice dealers have finished harvesting their ice supply; there will be abundance of good ice. A number of new arrivals and others were employed breaking stone at the quarries. There are at present about 200 toise of broken stone at the quarries. It is not likely that work on the building of concrete walks or roads will be commenced before the middle of May. According to the report of the city auditor, the waterworks revenue last year was \$38,986.60; expenditure (including payment on debentures and interest account for the year), \$30,370.48; transfer to rest account, \$2,000. The revenue for the light department for last year was \$75,741.64; expenditure, including payments on debentures and interest, \$74,330.26; balance over expenditure, \$1,411.36. These concerns are being operated under municipal control. In 1887, the gas output was 7,000,000 cubic feet; to-day it is 26,000,000 feet. It is estimated that the general revenue of the city this year will amount to \$7,000 more than that of last year, on account of the increased assessment. The rate of taxation for the past ten years has been twenty mills on the dollar. According to a census recently taken, the

population of Kingston is about 20,000. During the month, the chief of the hotel department of the Canadian Pacific Railway Company visited Queen's University in search of students desirous of obtaining, during the vacation, employment in the summer resorts in the Rocky Mountains, either as bell boys, waiters or teamsters; fifty or sixty are being employed in this way. Students are engaged from Toronto University, Wolfville, N. S., Yale and Harvard, U. S., and other places. The Government Immigration Agent here made a number of deportations of undesirable immigrants during the month. On the 25th of the month, the coal and ore handlers of Kingston formed themselves into a labour organization. There was no change in wages or hours of labour, and no strikes or lock-outs during the month.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were actively employed preparing for the spring, and making maple sugar.

*Fishing.*—Lack of activity prevailed.

*Lumbering.*—This industry was somewhat dull, the roads being almost impassable.

*Manufacturing.*—Active conditions prevailed in most lines. During the latter part of the month, the local branch of the Dominion Cotton Mills Company has been running only three-quarter time on account of an over-supply of stock.

*Mining.*—More or less active conditions prevailed.

*Railroad construction and employment.*—Employment in these industries was more active than last month.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Comparative quietness prevailed, although many minor undertakings were under way.

*Metal, engineering and shipbuilding.*—These trades continued active.

*Woodworking and furnishing.*—Very active conditions prevailed.

*Printing.*—Printers were busy.

*Clothing.*—Conditions were more or less active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and cigar makers reported business improved as compared with last month.

*Leather.*—Tanners had active employment.

*Miscellaneous.*—Barbers, broom makers, clerks, delivery employees, hotel and restaurant, laundry and theatre employees were active.

*Transport.*—All branches showed a marked improvement during the month.

*Unskilled.*—Busy conditions of employment prevailed.

#### DISTRICT NOTES.

*Stoney Point.*—The Ontario Powder Company, whose plant was recently destroyed by an explosion, will rebuild at this point, and so buttress and barricade the plant as to prevent a recurrence of an explosion. This company is meeting all claims for damages caused by the recent explosion.

*Brockville.*—On Monday, March 23, a meeting was held at Portland to take steps towards forming a rural telephone system for that section of the country. The head office will probably be at Crosby and the lines will radiate to all points in that section.

#### BELLEVILLE, ONT., AND DISTRICT.

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during March was very dull owing to the lack of outside work. Very few in the building trades were working, but labour generally was well employed. A large number of men were employed by the city authorities keeping the streets clean of snow. The Belleville and Toronto Rolling Mills Company has not yet resumed work, and a large number of workmen, formerly in the employ of the company, are idle. It is expected that the mills will open about the middle of April. Both the Lehigh and Belleville cement companies

are employing a number of men, the majority of whom live in the city. Business with manufacturing concerns was fairly active, and tradesmen were busy.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers realized high prices for produce. Large quantities were marketed, the roads having improved.

*Fishing.*—Local fishermen reported good catches of white fish, pike, rock fish, perch and catfish.

*Lumbering.*—Inactivity was the rule.

*Manufacturing.*—Conditions were quiet, but prospects were encouraging.

*Mining.*—This industry was active, especially near Bancroft, where the marble quarries are situated. Shipments are being made regularly from these quarries.

*Railroad construction and employment.*—With the exception of men employed to keep the tracks clear of snow, few extra men were employed.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—There was not much activity, owing to the inclement weather. A number of bricklayers and masons were employed at the Lehigh Cement Company's plant, where about 300 men were employed.

*Metal.*—Iron moulders and helpers, engineers and machinists found employment somewhat active. The new brass works gave employment to a number of skilled workmen. Blacksmiths and horseshoers were busy, and all manufacturing establishments employed full staffs of workmen, although in some establishments short time was being worked.

*Woodworking and furnishing.*—These trades had a busy month supplying furnishings and equipment for the hotel "Quinte." Spring orders were coming in satisfactorily. Coopers were busy getting out cheese boxes and apple barrels; big wages are being paid for this class of work. At Deseronto, car builders were busy.

*Printing.*—Both machine and job printers were active, not a man being out of

employment; bookbinders also had a busy month.

*Clothing.*—Journeymen tailors reported an active month, with no tailors out of work. Boot and shoe workers were also active.

*Food and tobacco preparation.*—All were active. A large number of teams and men were employed harvesting the ice crop, which was of excellent quality, averaging about 18 inches in thickness.

*Leather.*—Harness workers were busy.

*Miscellaneous.*—Bakers, clerks, delivery employees, hotel, restaurant, theatre and laundry employees were busy. A large Chinese restaurant, as well as a 5 cent theatre, was opened during the month.

*Transport.*—Railway work was fairly active, most of the regular men being well employed. A few of the permanent yardmen were laid off temporarily, owing to depression in business. Cabmen, carters and teamsters had a busy month.

*Unskilled.*—This class was inactive.

## PETERBOROUGH, ONT., AND DISTRICT.

*Mr. W. J. Johnston, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market, so far as outside work was concerned, was very dull, but the majority of the manufacturing establishments kept their employees fairly well employed; nevertheless, the outlook in many instances will not compare favourably with that of a year ago. The textile industries were busy, with full staffs. The Quaker Oats Manufacturing Company, which has been handicapped all winter by shortage of grain caused by snow blockades, are now very busy and receiving about 20 car loads of grain daily. The several canoe shops were busy, and the woodworking and iron shops are more active than at the beginning of the month. As to the extent of building operations during the coming season, it

is difficult to form an opinion, but it is certain that there will not be as many dwelling houses erected as last season. House building in the country seems to be taking on a forward movement, a great many farmers erecting new dwellings, good crops and excellent prices having encouraged them to do so.

The Randolph McDonald Construction Company has secured contracts for the building of the Balsam and Cameron Lakes section of the canal. It has all its plant ready for commencing operations on the ground, and three years in which to complete the contract.

The Mutual Benefit Association of the Canadian General Electric Company, recently issued a statement showing that during the past six months its receipts amounted to \$1,241 and expenditure to \$1,167, with a reserve fund amounting to \$1,134. This Association has been of great benefit to employees meeting with accidents or sickness\*

The tax rate for 1908 has been struck at 17 mills on the dollar, a half mill less than that of last year. The city council has appointed a civic employee to collect market tolls; the custom in the past was to give the collection to the highest bidder by auction.

Banks were active, doing a good local business. Wholesale and retail trade was becoming more active with the advent of spring. Wages were unchanged, and the labour market free from unrest.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farm work consisted chiefly of preparations for spring, but many were employed making maple syrup. Considerable hay, wood and other farm produce was marketed.

*Fishing.*—Inactivity was the rule.

*Lumbering.*—There was a lack of activity.

*Manufacturing.*—The various establishments were active.

*Mining.*—Dullness prevailed.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Partial inactivity prevailed.

(\* See *Labour Gazette* for October, 1902, page 265, for special article dealing with organization of this Association.

*Metal, engineering and shipbuilding.*—Iron moulders found employment very dull, and the same conditions prevailed with iron workers and helpers. Machinists and engineers, in some shops, were actively employed, with electrical workers fairly active towards the end of the month. Linemen, shipworkers and jewellers were active. Dullness prevailed in other branches.

*Woodworking and furnishing.*—Woodworkers, upholsterers, car builders and coopers were dull, with varnishers, polishers and pattern makers active, the latter at the Canadian General Electric Company's works.

*Clothing.*—Journeymen tailors, garment workers, hat makers, boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers, meat cutters and cigar makers were active. Ice handlers were somewhat dull after having been busy harvesting the season's crop.

*Miscellaneous.*—Activity was the rule.

*Transport.*—Railway workers in all branches were active, also street railway employees. Dullness prevailed with teamsters, cabmen, carters and expressmen; but draymen were active.

*Unskilled.*—This class found employment scarce.

#### DISTRICT NOTES.

Labour in nearly all parts of the district has been very dull, owing chiefly to snow blockades and bad roads. Many teams and men have ceased work in the lumber camps. Towards the latter part of the month, warmer weather set in, and work was more active, markets being better attended and prices of produce lowered. The making of maple syrup was begun; the crop promises to be a good one.

#### TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions were slightly improved compared with February, the

opening of the spring season inducing more activity in some lines. The revival, however, has been slower than was anticipated, and trade generally continued quiet with many out of work. The building season has been late in opening and the contracts so far made are as a rule small, the value of permits issued showing a great decline as compared with previous seasons. A considerable proportion of the unemployed have obtained work outside the city, but there are yet a very large number without work.

On the 16th over 1,000 unemployed men marched to the City Hall and asked for work, suggesting several public works which might be undertaken. The Mayor in reply promised that work on sidewalk construction would be begun as soon as the season permitted. He stated that the city had spent \$41,000 in relief work, besides \$13,000 given to charitable organizations.

On the 19th, a parade of the unemployed was held to the Parliament Buildings, where representatives of the men had an interview with the Premier, who stated that the government had no public works on hand at present on which unemployed men could be given work. It would be difficult he said, to make any money grant to alleviate distress in Toronto, as there were numbers in a similar condition in other places, who had an equal right to call on the government for help.

The City Engineers's department expects to start work on pavement and sidewalk construction and general repairs about the middle of April, when a large number of labourers will be needed. Forty inspectors will be employed by contractors, who will have charge of gangs numbering nearly 800 men. The City Engineer will also employ about 300 on improvement and repair work. Sewer construction, for which tenders have been called, will give work to a number more.

The House of Industry was voted an advance of \$10,000 by the city on the 24th. A further grant of \$7,000 will be asked for later on. It was stated that there were 2,350 families on the relief

books, representing 9,050 persons, against 750 families last year.

Building permits for 160 buildings, representing an approximate value of \$258,640, were issued during the month of February, as compared with permits for 248 buildings of the value of \$781,135 in February, 1907.

The first anniversary meeting of the British Welcome League was held on the 27th. Up to the end of 1907, 6,000 immigrants had been assisted, of whom 4,000 were placed in situations. Ten thousand free beds and 20,000 free meals were provided. The receipts, including a grant of \$1,000 from the Ontario Government, were \$5,353, the balance on hand being about \$1,256.

The Board of Education has adopted a resolution that women teachers be not hereafter engaged on the public school staff of over 30 years of age. The rule is not to apply to re-engagements, and in other cases of exceptional merit may be set aside by a two-thirds vote.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers are getting in readiness for the busy season. The anticipated shortage in feed was not so seriously felt in this vicinity as in some other parts of the province and stock has generally wintered well. Good prices for cattle and horses, and for most kinds of produce prevailed, but the roads towards the latter end of the month were in very bad condition for marketing.

*Manufacturing.*—Manufacturing industry generally continued quiet, orders showing a noticeable falling off as compared with last year. Shipbuilding was fairly active on repairs and re-fitting work. The Polson Iron Works completed a car ferry for the Canadian Pacific Car and Passenger Transfer Co., to run between Prescott, Ont., and Ogdensburg, N. Y., and are building a 15-inch suction dredge for the city of Toronto. The John Inglis Co., has obtained the contract for a 15,000,000 gallon pumping engine to cost \$147,530 and a 6,000,000 gallon engine to cost

\$52,700 for the Toronto water-works system, a condition being that the Heine boilers, made by the Polson Iron works, Toronto, are to be used in place of the Babcock and Wilcox boilers, made in Glasgow, which were recommended by the City Engineer. The automobile industry is active, having received a considerable impetus from the automobile show held during the latter part of the month, when a large number of sales were made. On account of dullness in the agricultural implement trade, the force of the Massey-Harris Co., was reduced, and a cut of 10 per cent. in the wages of certain piece-workers made.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were dull, with a considerable proportion in all departments unemployed.

*Metal, engineering and shipbuilding.*—These trades were generally quiet, especially machinists and moulders, many of whom were idle. Boilermakers, shipbuilders and structural steel workers were fairly well employed. Sheet metal workers were dull, brass workers had a fair month; jewellers and silversmiths were quiet.

*Woodworkers.*—In most lines quietness prevailed. Piano workers found conditions improving.

*Printing.*—Printers and bookbinders were fairly well employed.

*Clothing.*—Garment workers were slack. Custom tailors were actively employed towards the end of the month. Boot and shoe makers and hat and cap workers had a fair month.

*Food and tobacco preparation.*—Bakers, confectionery workers, butchers and brewery workers had generally steady work. The Brewery Workers union and the Master Brewers Association have come to an agreement respecting wages under which, during the current year, the men will receive the same wages as last year. In one year they will receive an all round advance of wages of 25c per week and a like increase in two years. From March to November the working hours are to be 52½ per week, and 50 hours per week for the winter months. The present

scale of wages is as follows. Bottlers and helpers on wagons, \$10.50 per week; ale drivers, \$12; brewers and drivers, \$13; assistant foremen, \$14. Cigarmakers were dull. The Cigarmakers Union have levied an assessment of 25c per week on all employed men for the benefit of those out of work.

*Leather.*—Leather workers noted an improvement in conditions with fewer men out of employment.

*Miscellaneous.*—Hotel and restaurant employees, barbers and laundry workers had a fair month. Clerks and salesmen were quiet with many looking for places.

*Transport.*—Railroad and street railway employees were generally well employed. Prospects for sailors, long-shoremen and others in connection with navigation were good.

*Unskilled labour.*—There was a large number in excess of local demands.

#### DISTRICT NOTES.

*West Toronto.*—The council has voted \$20,000 for a site and for the maintenance of a Carnegie free library.

#### NIAGARA FALLS, ONT., AND DISTRICT.

*Mr. Hewlett Green, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was not much change in the condition of the labour market during March, as compared with February.

Business was not active, but the fine weather of the last few days caused an improvement.

The machine shops and factories have been busy. The Sanitary Can Company's buildings were about completed, the machinery was being installed and they expect to begin manufacturing in a short time. Merchants report business dull in all lines.

A large amusement park will be established in the city by private interests, and will contain a number of places of public entertainment to be open during

the summer months. Construction of fences and buildings and grading of grounds will commence in April.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—With the exception of pruning fruit trees, and grape vines, farm work was quiet.

*Manufacturing.*—All mills and factories were fairly well employed.

*Railroad construction.*—No railway construction was going on. General railway employment was steady.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were quiet, owing to the cold weather and the completion of some buildings on which many men have been employed. Carpenters, lathers, plasterers and painters were all quiet. Builders labourers and stone-cutters were very quiet.

*Metal.*—Foundry and machine shop employees were all working. Electrical workers and linemen were busy.

*Printing.*—Printers were quiet.

*Clothing.*—Tailors were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and cigar makers were busy, with ice-men quiet.

*Miscellaneous.*—Hotel and restaurant employees were quiet.

*Transport.*—Railway traffic has been very good. All regular employees were working steadily. Street railway men were all working with teamsters busy, and hackmen quiet.

*Unskilled labour* was largely idle.

#### DISTRICT NOTES.

*Welland.*—A new planing mill will be erected. An old flour mill has been turned into an agricultural implement factory and will employ fifteen hands.

*Port Robinson.*—A strong flowing well of mineral water was struck here.

*Chippewa.*—Land has been purchased for a large electro-smelting plant for the reduction of Cobalt and other ores. Twenty acres have been secured and a plant to employ 500 men is projected. The site has water frontage on the Niagara River. Niagara Falls power will be used.

## ST. CATHARINES, ONT., AND DISTRICT.

*Mr. James A. Wiley, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during March showed little change from February, being quiet. About the same number of unemployed as in the preceding month were reported. The building trades became a little more active toward the close of the month, but operations were confined to jobbing and repair work, etc. No work on new buildings is as yet in sight, but it is expected with the advent of warmer weather employment will improve. The Central Relief committee still continued to give employment. Wholesale and retail trade was fair. Civic improvements passed by the City Council included sewers for several streets. The United Gas Company has increased the price of natural gas to the consumers of this city and district from forty cents to fifty-five cents per thousand; shortage in the supply was given as the reason.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Fruit men were busy pruning fruit trees and vines and getting ready for spraying. Trees, vines and bushes have wintered well, and if favourable spring weather continues the fruit harvest will be heavy.

*Manufacturing.*—Canning factories were signing contract with growers for tomatoes at  $27\frac{1}{2}$  cents per bushel, an advance over last year's price of  $2\frac{1}{2}$ ¢ per bushel. Employment in factories and mills was much the same as last month.

## CONDITION OF PARTICULAR TRADES.

*Building.*—The allied trades were quiet, a backward spring having some effect on conditions of employment.

*Metal, engineering and shipbuilding.*—All branches were quiet.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and

polishers were quiet. Carriage and wagon makers and coopers were active.

*Printing and allied.*—The allied trades were active.

*Clothing.*—Journeymen tailors and boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters were active. Cigar makers and tobacco workers were quiet.

*Leather.*—Tanners and curriers and leather workers were active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees and laundry workers were active.

*Transport.*—All branches were active.

*Unskilled labour* was quiet.

## DISTRICT NOTES.

*Port Dalhousie, Merritton and Thorold.*—The conditions of employment were much the same as in February. Most of the mills and factories were running full time but a few did not. The Thorold Basket factory was busy.

## HAMILTON, ONT., AND DISTRICT.

*Mr. S. Landers, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Compared with last month the demand for labour has not improved. There were a large number of men out of employment in the city, a large body of whom waited upon the Mayor and asked that they be given work. The Mayor promised to have road or other work undertaken as soon as the weather permitted. The dispute between the stove-plate moulders and the foundrymen remained unchanged. There has been no change in wages and no strikes or lockouts, but a large number of men are out of work in the moulding trade. There was a slight disturbance among the plasterers; the employers desired to pay wages once in two weeks, but the men wished the present system of paying once a week, to prevail. After

a conference matters were left as previously.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers of Ancaster held several meetings with a view to building and equipping a canning factory in that village. A company will be formed capitalized at \$50,000. The farmers have agreed to cultivate tomatoes to supply the proposed factory.

*Manufacturing.*—Industries have not been very busy owing to the stringency in the money market and the large stock of manufactured goods on hand. The iron and steel industries usually employing thousands of hands are being operated only part time, and with reduced staffs.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Employment in the various branches still continued very slack, carpenters, painters and plumbers being the best employed. Plasterers found employment fair but stone-cutters were slack and builders' labourers very slack.

*Metal, engineering and shipbuilding.*—Iron moulders (stove plate) engineers, machinists, blacksmiths, boilermakers and jewellery workers found employment fair, also moulders employed on machinery mouldings. Electrical workers and horseshoers had active employment, but stove mounters were slack.

*Woodworking and furnishing.*—Woodworkers generally, had active employment. Upholsterers and wagon makers were fairly active and pattern makers were somewhat slack.

*Printing.*—The printing trades were fair to active. Machine hands and compositors were active, also pressmen and bookbinders.

*Clothing.*—Journeymen tailors were somewhat slack, but garment workers boot and shoe workers found employment fair.

*Food and tobacco preparation.*—Bakers had active employment but butchers, cigar and tobacco workers were only fair.

*Leather.*—Workers on horse goods were active.

*Miscellaneous.*—Barbers were fairly well employed, broom makers were busy, hotel and laundry workers active, and delivery employees had fair employment.

*Transport.*—Steam railway employees found work fair to active. Street railway employees had fair employment, also teamsters, expressmen and cabmen.

*Unskilled.*—This class of labour was very slack.

#### DISTRICT NOTES.

*Dundas.*—Trade and labour conditions in this town were unchanged from the preceding month. Most of the industries were running, but not full time. A large number of labourers were employed in the stone quarries, located outside the town.

#### BRANTFORD, ONT., AND DISTRICT.

*Mr. J. C. Watt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued unchanged since February. There were fully 500 men without employment, and 150 more who were finding work only occasionally. None of the factories were busy, and several were still running short hours with reduced forces. Toward the close of the month, a few found employment in the building trades. The city relief officer has dispensed daily about 100 loaves of bread and oatmeal, and the Y. W. C. A. has provided free soup each day at noon to about 75 applicants.

Civic relief on sewerage construction works was continued. One of the local firms, manufacturers of agricultural machinery, has reduced the wages of a number of the employees, averaging 10%; about 580 men are affected. The firm allege that the men can still make the old scale of wages by extra effort. This in many cases is denied by the men. Merchants had a fair month. A charter has been granted to the Brantford Co-operative Association, Limited, with a capital of \$40,000, to carry on the business of

a general store. The working men of the city are behind the enterprise. The tax rate for this year will be  $21\frac{1}{2}$  mills, an increase of  $\frac{1}{2}$  mill over last year.

#### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—The factories are gradually becoming busier, and prospects are brightening.

*Railroad construction.*—The Brantford and Hamilton Electric Railway Co. is carrying on construction work as weather permits. It expects to open the road on June 1st next.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, plasterers and lathers found trade dull. Carpenters and joiners were active. Painters and decorators, towards the end of the month, were active. Plumbers, gas and steam fitters were active.

*Metal.*—Iron moulders, core makers and machinists were active, and some were busy. Electrical workers and linemen were quiet. Metal polishers, buffers, stove-mounters and blacksmiths were active. Boilermakers were busy. Sheet metal workers and horseshoers were active.

*Woodworking.*—Carriage and wagon-makers were quiet. Pattern makers and coopers were active.

*Printing.*—Printers, pressmen and allied tradesmen were busy.

*Clothing.*—Tailors were active.

*Food and tobacco preparation.*—Bakers and confectioners were busy. Cigar makers and tobacco workers were active.

*Leather.*—Leather workers and saddlers were active.

*Miscellaneous.*—Barbers, clerks and delivery employees were employed as usual. Hotel and restaurant employees and laundry workers were busy.

*Transport.*—Railroad trackmen were not very busy. Freight-handlers were active. Street railway employees were actively engaged, as usual. Carters, teamsters, draymen, hackmen and cab drivers were active.

*Unskilled labour.*—About 500 unskilled labourers were unemployed.

#### DISTRICT NOTES.

*Paris.*—There were not many unemployed toward the close of the month. The fabric mills were busy.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during March showed an improvement over February, but there were a considerable number of men out of work, and a large number working short time. The Canada Furniture Co., after a shut-down of three months, started up again, and increased activity has been noticed in certain other shops. Very little outdoor work has been started in the building trades, but the prospects are for a fair season's work. Material has arrived for permanent roadways, and work will commence as soon as the frost is out of the ground. The agreement between the city and contractors is that residents of the city for six months will be given the first chance on the work. Tenders have been asked for a second-storey to a large portion of the new armories, and it is expected work will be gone on with shortly. Contracts for a \$13,000 school in the St. Patrick's ward were let during the month. Retail trade has been dull, bad roads being one of the causes. The number of unemployed has shown a tendency to decrease with the end of the month, and while a large number are still out of work, in many cases jobs have been promised with the return of the fine weather.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades had a quiet month. Some work in preparation for the season was under way, but the season will start about April 1st. There has been some repair work under way, and work at the city hall and armories. Bricklayers and masons had a

very quiet month, and carpenters and plumbers a quiet month. Painters and paperhangers had an active month, and towards the close were busy.

*Metal.*—Iron moulders, machinists and machinists' helpers had a quiet month, with short time in some shops. Two shops worked full time, however, and a general improvement was noticeable over February.

*Woodworking.*—Woodworkers had a quiet month, as did piano and organ workers. Upholsterers have not yet settled their strike. Carriage workers were active.

*Printing and allied.*—Printers had an active month.

*Clothing.*—Journeymen tailors and garment workers had an active month, especially towards the close.

*Food and tobacco preparation.*—Bakers, confectioners and cigarmakers were active.

*Textile.*—Tapestry, ingrain and Brussels weavers had an active month.

*Unskilled labour* was in little demand. A large number of Italian labourers arrived in the city during the month.

#### BERLIN, ONT., AND DISTRICT.

*Mr. R. F. Gofton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour, skilled and unskilled, was poorly employed during March, there being several hundred men out of employment. The Grand Trunk section-men reported that they were only working three days a week, and some of the local industries were running only four and five days a week. Some factories started full time towards the close of the month. A few small structures were under construction. The Kaufman Rubber Company is preparing to build its new rubber footwear factory. The construction of this factory will provide employment for a large number of workmen during a part of the coming summer. From present indications, all the labour that will be required can be secured here.

With regard to the unemployed, the relief committee reported conditions improving. The employees of the Shantz Button Manufacturing Company had their wages reduced during the previous month 10%; the employees of Wunder Furniture Company and the Penman and Cowan Furniture Company also had their wages reduced 10%.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy teaming hay to market, and making preparations for seeding.

*Lumbering.*—This industry was somewhat quieter than at this time last year.

*Manufacturing.*—With a few exceptions, manufacturing establishments experienced a quiet month.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners and other branches were idle. Lathers and plasterers were active, also painters and decorators. Gas and steamfitters and builders' labourers were inactive.

*Metal and engineering.*—Iron moulders, iron workers and helpers, coremakers, machinists and engineers, steam engineers electrical workers and linemen had a quiet month. Bicycle workers and horseshoers were busy, and boilermakers and iron shipbuilders very quiet.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers were somewhat more actively employed than in the preceding month. Carriage and wagon makers, car builders, pattern makers and coopers were quiet.

*Printing.*—Printers, pressmen and bookbinders reported a busy month.

*Clothing.*—Journeymen tailors and garment workers were somewhat more active than during the previous month. Boot and shoe workers were not so active as in the preceding month.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters were active, and cigar and tobacco workers busy.

*Leather.*—Tanners and curriers were active, and saddlers, trunk and bag makers well employed.

*Miscellaneous.*—Barbers and broom makers reported a very busy month.

*Transport.*—Street railway employees, cabmen, carters and draymen were busy.

*Unskilled.*—This class found employment very scarce.

#### WOODSTOCK, ONT., AND DISTRICT.

*Mr. W. N. McEltheran, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during March was more buoyant than in February. Two public meetings were held, at which questions affecting labouring men were discussed. Early in April, a general meeting will be held, composed of delegates from all of the local unions. This meeting will organize a Trades and Labour Council. In many trades, the hours, which were reduced to eight per day on account of the dullness of the season, have been lengthened, some to nine and some to ten. The furniture workers, who were working 48 hours per week, being 6 days of 8 hours each, were started on 5 days of 10 hours each, being an increase of 2 hours a week.

The Woodstock Board of Education are calling for plans for an eight-roomed school building, not to exceed \$20,000 in cost.

It is reported that work may be commenced this spring, on a new hall for the corporation of New St. Paul's church, to cost between \$5,000 and \$10,000.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers sending milk to the creamery were realizing as high as 32c. per lb. for the butter, some factories selling the entire output for the month at this price. The price of hogs started to advance slightly towards the end of the month, \$5.35 per cwt. being reported.

*Lumbering.*—Log-hauling was general in districts where there were any logs. The lumbering industry, once so general in this district, is fast becoming insignifi-

cant as the forests become depleted. Many farmers now burn coal, because the wood supply has given out.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Quietness prevailed. Bricklayers and masons were practically all idle. Some carpenters found odd jobs, enough to keep them busy. The planing mill reported a fairly busy month. Paperhangers and decorators reported increased activity, particularly towards the end of the month. Lathers and plasterers were very quiet.

*Woodworking.*—The woodworking trades reported an improvement over the preceding month. Wagon makers were mostly working full time again, but not more than two-thirds of the usual staffs were employed. A marked difference is shown in the goods being made this year, as compared with last. Last year, at this season, the run was on goods for the western markets, while this year practically nothing at all is being made for the west. Furniture workers find a similar condition. Furniture workers, polishers and sanders reported slightly increased activity. Piano and organ makers reported no change in general conditions over the previous month. The Thomas Organ and Piano Co. and the Karn Organ and Piano Co. have been asked by the Dominion government to prepare exhibits for the exhibition in England during the coming summer. Veneerers reported a falling off of orders.

*Printing.*—Printers and pressmen were fairly busy, there being but few idle printers in the district.

*Clothing.*—Journeymen tailors reported a satisfactory month, particularly towards the close. Bakers and confectioners were quiet, as were butchers and meat-cutters. Ice-cutters and drivers had a busy month putting up the summer's supply. Cigar makers were quiet.

*Leather.*—Tanners and curriers were very busy.

*Miscellaneous.*—Barbers reported a falling off, compared with February and the corresponding month a year ago.

## STRATFORD, ONT., AND DISTRICT.

*Mr. Jos. T. Carlin, correspondent, reported as follows:—*

## GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was quiet during March, showing little change from the preceding month. There was very little work in the building trades, more men being idle than for sometime. Most of the local industries have reduced their staffs of workers. The Grand Trunk shops are still on short time, but will increase staff when the new shop extension is finished. The Stratford Manufacturing Co's building is finished, for the making of step-ladders, hay-carriers, etc. They expect to commence work in a short time. The Stratford Clothing factory which was on short time with a reduced staff, has resumed full operations. The demand on the relief committee of the City Council has been the greatest in its history this winter. The wholesale and retail merchants reported business good. The customs returns for February were \$14,304.36. This gives an increase over February last year of \$2,184.01. No changes in rates of wages and no unrest in the labour market were reported.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were dull, excepting those engaged in the making of maple sugar. Market prices were the same as last month, except that eggs dropped from 28cts to 18cts, a doz., and butter from 28cts. to 25c. per lb.

*Manufacturing.*—The factories with a few exceptions had a dull month.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, lathers and plasterers were very dull. Carpenters and builders labourers were dull. Painters and paper-hangers were busy. Plumbers were fairly active.

*Metal.*—Moulders, machinists and all engaged in machine shops were quiet

*Woodworking and furnishing.*—Woodworkers noticed an improvement in some of the factories but most of them were dull.

*Printing.*—Printers and pressmen were fairly well employed.

*Clothing.*—Journeymen tailors were active. Garment workers were rather quiet.

*Food and tobacco.*—Bakers, butchers and cigar makers were busy.

*Leather.*—Harness workers reported trade active.

*Miscellaneous.*—Barbers, clerks and delivery employees reported conditions normal. Hotel and restaurant employees were quiet.

*Transport.*—Railroad employees were active, especially train crews. Cab-drivers, draymen and teamsters were fairly active.

*Unskilled.*—A large number were unemployed.

## DISTRICT NOTES.

*Clinton.*—The knitting factory is turning out 350 dozen pair of hose per day, against 75 doz. a year ago; it employs 65 hands.

A by-law to amend a former agreement with the Doherty Organ Co., and enable it to enlarge its business and form a joint stock company with increased capital was carried.

## LONDON, ONT., AND DISTRICT.

*Mr. A. Woonton, correspondent, reported as follows:—*

## GENERAL CONDITION OF THE LABOUR MARKET.

The month of March was a poor one for the workers of this city, the prevailing conditions throughout the winter not having improved much. A large number of men continued to be idle or working short hours. The wholesale grocery firm of Lind, Kerrigan & Co., made an assignment, and will be wound up. The building trades were becoming active, and a new Hygienic Institute has been commenced to cost about \$50,000. Work

was progressing on the Smallman-Ingram Departmental store building. This firm has formed itself into a joint stock company, and is taking into partnership forty of its oldest employees. The additions to the G. T. R. car shops are about completed. About 400 cords of wood were cut during the winter in the local wood yards, by hand, through the Charities' Aid Society.

The city saved \$8,000 last year through day labour, and will employ the system more extensively this year.

The janitors of the city schools have had their salaries increased to \$65 per annum per room for less than four-room schools, and \$60 for schools with four or more rooms.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers were busy preparing for spring ploughing, the weather becoming favourable earlier than usual this year. Eggs have dropped in price to 16 and 17 cents per dozen, but butter is up to 35 cents a pound. The question of farm help is not expected to be so serious the coming summer.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were commencing to work, although a number were idle yet. Carpenters were nearly all working. Plasterers were doing a little. Painters were becoming busy but plumbers were slack. Stonecutters were nearly all idle yet. Builders labourers reported work slack, with some of their number employed.

*Metal, engineering and shipbuilding.*—Iron moulders were working short time, iron workers started to work in the early part of the month, with a reduced staff. Machinists were working three-quarter time. Metal polishers were slack, as were brass workers and stove mounters.

*Woodworking and furnishing.*—Woodworkers were slack, but carriage and wagon workers reported business improving. Car builders have worked short time nearly all month. Coopers reported business fair.

*Printing and allied.*—Printers and pressmen were fairly busy, but trade

was not as brisk as a year ago. Bookbinders were slack.

*Clothing.*—Journemen tailors were beginning to be busy, the spring trade commencing. Garment workers were slack. Boot and shoe workers were busy. Cap makers reported trade fair.

*Food and tobacco preparation.*—Bakers and confectioners reported short time prevailing in two large biscuit and candy factories. Cigar makers were slack with a number not working.

*Leather.*—Tanners and curriers continued exceptionally busy. Saddlers were slack.

*Miscellaneous.*—Broom makers reported trade fair. Theatre employees were dull, the local vaudeville house, having closed down two months earlier than usual, throwing about 10 out of work. Laundry workers were busy.

*Transport.*—Railroad train crews reported a good month. Teamsters were slack, with prospects not as bright as usual.

*Unskilled labour.*—This has been a very dull month, no civic work having been commenced yet. A large number were idle.

#### DISTRICT NOTES.

*St. Mary's.*—The town granted the North Midland Electric Railway Co., tax exemption for 21 years for the railway which is to run from London to St. Marys and Grand Bend, on Lake Huron.

#### ST. THOMAS, ONT., AND DISTRICT.

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during March showed a decided improvement over the preceding month, and present indications are that the early summer months will find all classes of labour well employed. The weather has been exceptionally fine, and the ground has been broken and work

commenced on a number of building contracts. The building season, however, cannot be said to have commenced. The local brick-layers, carpenters and other mechanics of the building trades have been doing odd jobs during the month. The fine weather has facilitated the handling of freight on the railways, and as a result traffic has been heavy and the men employed in the traffic department have been obliged to work overtime. Heard's factory which was closed down some two months ago has resumed operations, the staff now working half time; it is expected that full time will be resumed at an early date. In the Pere Marquette Shops the work has been very heavy and the employees have been working overtime. No further increase has been made to the staff employed in the Michigan Central Shops, although it is said that the force will be added to in the near future. In the Thomas Bros'. Handle factory, the two first weeks in March were not active, but during the latter weeks, spring orders were being filled and as a result all hands were well employed. During the month, five moulders and two labourers were laid off in the Canadian Iron Factory Co. The slight depression in business is said to be due to the falling off in the Michigan Central Shops. Indications for the summer's work in the building trades is said to be favourable. Although there are no large contracts, contractors state that the requests for estimates indicate that the coming season will be the best in years. A new church is among the large contracts. An ammonia plant is to be constructed in connection with the Light, Heat and Power Department costing in the neighborhood of \$2,000. The Street Railway reduced the number of tickets from eight for twenty-five cents to seven for twenty-five cents, and reorganized the working staff, the purpose being to reduce expenses and increase the revenue. At the request of the Trades and Labour Council, arrangements have been made whereby the assessment roll is to be published in the daily papers; tenders are now being sought for publication of the same. Representatives of the Port

Dover and Leamington Natural Gas Companies, visited the city recently, their object being to have natural gas supplied to this city for manufacturing and lighting purposes. The municipality has made application for 1,500 h. p. Niagara Power. Kindergarten classes are to be established in each of the five city schools. The recent census shows the population of St. Thomas to be 14,164, a gain of 750 or 5.6 per cent.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The markets have been well attended. The care of stock received the chief attention of the farmers. New maple syrup sold at \$1.35 a gallon.

*Manufacturing.*—Local industries report the month of March as decidedly better than the preceding month. Spring orders are coming in rapidly.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters and painters were employed during the latter part of March at odd jobs.

*Metal.*—Iron moulders reported the month a quiet one. Machinists, steam fitters and blacksmiths have been well employed.

*Woodworking and furnishing.*—Woodworkers had an average month.

*Printers and allied.*—Printers had a fair month.

*Clothing.*—Journeymen tailors were well employed, and prospects for the spring trade were good.

*Transport.*—Railway employees in the locomotive and traffic departments reported the month an active one. The men were obliged to work overtime.

*Unskilled labour.*—A considerable number of unskilled labourers were out of work, but very little distress was reported, and it is expected that the coming month will find all well employed.

#### DISTRICT NOTES.

*Aylmer.*—Recently the Aylmer Iron Works assigned to the Sovereign Bank. Arrangements for starting have now

been made by the Bank and the plant will commence operation at once. It is expected that from fifty to one hundred men will be employed. The new Condensed Milk Plant has been very busy, and has a plentiful supply of orders. The indications for the summer months in the building trades compare favourably with those of previous years.

*Port Stanley.*—A joint stock company is to be organized for the purpose of providing amusements for patrons of the electric and steam railways.

CHATHAM, ONT., AND DISTRICT.

*Mr. Alex. Gregory, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market showed very little improvement over the preceding month. There has been no civic work commenced so far this season, consequently a large number are still unemployed, except for a few days at a time. The paving contractors are making preparations to resume operations on contracts awarded in 1907, which will provide employment for large numbers. The Electric Railway Company has received temporary permission for its line to cross the lines of the Grand Trunk Railway Company, and work on the construction of the subway will commence in a few days, this will also provide work. A large number are leaving daily for the farming districts, and in a very short time the congested condition of the labour market will be greatly relieved. A number of the manufacturing establishments are still running short time, with prospects for the future not so good as at this time last year. The building permits issued so far this year were mainly for alterations and repairs. Merchants reported trade only fair. Merchant tailors reported trade dull.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers in some parts of the district have commenced seeding.

Many farmers have found that the severe winter has damaged the clover crop, and in consequence clover has been increased to \$14 per ton. The produce market remains firm with prices as follows:—

Hay (Timothy).....	\$15.00 per ton.
Live hogs.....	5.25 per cwt.
Chickens.....	70 to \$1.00 per pair.
Geese.....	1.00 each.
Potatoes.....	1.25 per bag.
Butter.....	.30 to 32 per lb.
Eggs.....	.15 per doz.

CONDITION OF PARTICULAR TRADES.

*Building.*—Inactivity was the rule. Plumbers were busy, but builders' labourers were not in demand.

*Metal, engineering and shipbuilding.*—In these trades there was practically nothing doing. Electrical workers reported employment fair.

*Woodworking and furnishing.*—Industrial establishments were on short time.

*Printing.*—Printers and pressmen were busy, with bookbinders very slack.

*Clothing.*—Journeymen tailors were only fairly well employed.

*Food and tobacco preparation.*—Bakers and confectioners found conditions about the average.

*Miscellaneous.*—Barbers trade was reported better than in the preceding month.

*Transport.*—There were a few men employed on the street railway, but steamboatmen were still unemployed.

*Unskilled.*—There was no demand.

WINDSOR, ONT., AND DISTRICT.

*Mr. D. Mitchell, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was a marked improvement in the condition of the labour market during the past month, especially in the building trade. Several building contracts have been let and some are under way; consequently, building material supply firms were fairly busy. The Dominion Bank has asked for tenders for the construction of a new bank building, to cost about

\$55,000. The wholesale and retail merchants reported trade fairly good for the season. The Board of Education increased the salaries of the teaching staff. There was a strike at the tunnel; the company were paying  $17\frac{1}{2}$  cents per hour for working down in the compressed air chamber, and the workmen wanted \$3.00 per day of eight hours. They claimed that that is the general rate of wages paid for working in compressed air, but the company refused to pay it, and the men stopped work. In a few days the company secured sufficient men at  $17\frac{1}{2}$  cents per hour, as there are a large number of foreigners looking for work.

#### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Several industrial establishments were running their plants on reduced time, but expect to be operating full time shortly.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Owing to the mild weather, building has commenced under favourable auspices, and most carpenters were employed, with a number of bricklayers, but other branches were quiet.

*Metal and engineering.*—The iron trades improved during the month, and nearly all of the factories were running full time. Sheet metal workers reported trade quiet.

*Woodworking and furnishing.*—Conditions are improving.

*Printing.*—The printers reported a fairly good month.

*Clothing.*—Journeymen were all employed, with trade fairly good. The garment workers in the employ of the Peabody firm, manufacturers of the railroad "King" overalls, were very busy, and have formed a union with 25 members affiliated with the United Garment Workers of America.

*Leather.*—Quiet conditions prevailed.

*Miscellaneous.*—Barbers reported trade fairly good. Furriers were working short time, but hotel and laundry workers had plenty of work.

*Transport.*—Teamsters and expressmen were not very busy.

*Unskilled.*—This class could find plenty of work at the tunnel.

#### SAULT STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The supply of labour during March exceeded the demand in nearly all lines. Marine men reported prospects not very good. This is accounted for by the supply of ore remaining on the lower lake docks, owing to the close-down of a number of blast furnaces in the United States last autumn. The lack of ore cargoes will throw a number of the large boats into other business, which will have the effect of driving out the small ones. The amount of grain at the head of the lakes is much less than in former years. Wages for marine men will likely be lower than last year. The rates have not been adjusted yet. A two-cent-per-bushel rate will probably prevail on grain. The ferry between the two Saults started running on March 27th, as compared with April 1st last year. Banks reported a scarcity of money. Dry goods men reported a backward spring trade owing to continued cold weather. Boot and shoe men did a fair business. Most other branches complained of quietness.

#### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—Operations in the woods were about completed for the season. Some hauling yet remains to be done preparatory to the drive. Camps were nearly all broken up. Wages were lower than last year, but hay, oats, and other produce were higher. The Lake Superior Company reported a much larger cut than last year.

*Manufacturing.*—The manufactories were all working full time with full staffs, excepting one foundry, which was working only three days per week. It was expecting to start on full time shortly.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were slack.

*Metal, engineering and shipbuilding.*—Iron moulders were quiet. The other branches had fair employment.

*Woodworking and furnishing.*—The month was a fair one.

In the *printing, clothing, food and tobacco preparation, miscellaneous and transport trades*, conditions were normal.

## WINNIPEG, MAN., AND DISTRICT.

*Mr. J. Appleton, correspondent*, reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

During March, complaints as to difficulty in securing employment have been fewer than in the preceding month. The supply of labour is equal to the demand, but as soon as the weather changes and outdoor work becomes general, it is feared that it will not be equal. To a great extent, the demand for labourers for railroad construction will be the cause of this, but there are signs of activity along other lines. Already the demand for farm help is greater than the supply.

During the last two months, a change has taken place in the supply of female help for various classes of work. One lady advertised for a domestic servant, and had no less than 115 applications for the position. An agency making a specialty of supplying help said that it had on its books a long list of girls seeking employment. This is a condition that has not been obtained for some years. As in the case of men, young women refuse to leave the city. Domestic help is in demand at provincial points, but it is extremely difficult to find women willing to accept positions that necessitate them leaving Winnipeg.

No less than 141 men have made claims against a firm of contractors for alleged payment of a rate of wages less than the amount provided for in fair wage schedules, which form a part of all contracts let by the city of Winnipeg. The Board of Control of the city of Winnipeg is investigating the claims. The contractors in question are engaged in the construction of the Redwood bridge, and part of

the cost of erecting it is being borne by the Provincial government, whose officers are taking steps to see that the terms of the fair wage clause are being observed.

On March 9th, dissatisfaction arising out of the reduction of salaries and the cutting of wages caused fourteen girls employed by the Winnipeg Paper Box factory to leave work. The manager of the factory said they were discharged. The girls say they went on strike because they were required to work an extra half-hour each day, and that their salaries were reduced from 50 cents to \$1.50 per week. A few days later an amicable arrangement was arrived at, and the girls returned to work.

E. W. Henshaw, secretary of the labour bureau of the "Men's Own," a charitable organization in the city of Winnipeg, in his annual report refers to the exceptional conditions which governed the city during 1907. The late and short summer and the building trades strike threw out of work a large force of men, and materially reduced the number of building permits issued. Despite these conditions, calls for 700 more men were filled than in the previous year, making a total of 5,500.

It is stated that a site worth \$20,000 has been donated for a new building, through the generosity of two friends of the Men's Own; also that of \$30,000 needed, over \$12,045 has already been subscribed for a new building, which it is hoped will be erected before the close of this year. This building is to be equipped in the latest and most approved manner, with a padded room, free baths, laundry, fumigating rooms, reading room, gospel hall, employment room, dispensary, etc. All these departments are to be free for the use of men of all classes, irrespective of creed or color.

Patients treated in the St. Boniface hospital during the year 1907 numbered 4,936, of which 3,242 were males and 1,694 females. The cost per day per patient was \$1.00. The report of the Winnipeg General Hospital for 1907 shows the number of patients treated as 5,133.

Public improvements for the city of Winnipeg for 1907, as follows, are planned:—

Sewers.....	\$ 245,420.84
Plank sidewalks.....	12,973.83
Granolithic sidewalks.....	66,800.20
Block pavements.....	70,314.09
Macadam pavements.....	56,311.59
Asphalt pavements.....	1,261,028.18
Streets and lanes.....	48,891.44
Boulevards.....	14,322.00
Sanitary improvements.....	10,000.00
Waterworks (wells included).....	488,826.01
High pressure system extensions.....	29,544.35
Total.....	\$2,304,432.51

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers are making application for help to the Immigration Department at Winnipeg, and from the volume of these, it is evident that preparations for seeding are on a more extensive scale than usual. Complaints have been made recently as to the quality of the milk supplied. Tests of many samples have been made, and these in some cases have been found to be below the standard. Prosecutions have been made and fines imposed. Both milk vendors and restaurant keepers alike, are required to supply milk of a standard quality. Against both these classes prosecutions are now pending.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building season promises to be a very active one. Some of the buildings which will most probably be erected during the coming summer are as follows:—

Four-storey examining warehouse at the corner of Rorie and McDermot streets.  
 Customs warehouse extension.  
 Grand Trunk Pacific Red River bridge.  
 Two apartment blocks to cost \$190,000.  
 Store block to cost \$190,000.  
 All Saints' Church, \$125,000.  
 Manitoba linseed oil factory, \$75,000.  
 Union depot for Grand Trunk Pacific and Canadian Northern Railways.  
 Isolation hospital and morgue, \$90,000.

Before midsummer, plans for many other large structures will be announced. Already many dwellings have been commenced. To the above list may be added one or two schools. A by-law will be submitted to the ratepayers in a few weeks asking for authorization for the expenditure of \$600,000 for new schools. It is not expected, however, that the whole of this will be expended during the present year.

It is understood that the building trades contractors have come to an arrangement with the building trades unions with regard to wages during the present year. The rates will remain at the same rate as last year. The only union that has not agreed to the rate is the plasterers.

*Metal.*—There has been a slight improvement in business. The shops of the Manitoba Iron works have resumed the ten-hour day in all departments. During the past two months they have been working short time. About 150 men are on the pay list.

*Woodworking.*—There was no appreciable change in the slackness prevailing.

*Printing and allied.*—Conditions were about normal. The volume of business was not as great as usual for the season. Binders reported business extremely dull.

*Clothing.*—Tailors were not yet busy on spring orders and reported prospects only fair. Collections were fairly good in March.

*Food and tobacco.*—Amongst bakers and confectioners conditions were normal.

*Leather.*—These trades have added to their staffs during the last few weeks, and orders are coming to hand which will soon enable the factories to give employment to full staffs.

#### BRANDON, MAN., AND DISTRICT.

*Mr. S. P. Stringer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Prospects for building operations are very favourable. Much building is contemplated, and local architects are already figuring on structures. It is believed that the season about to open, will be as active as the previous year. New buildings are likely to be for the most part of stone and brick. The plans for the new Canadian Northern depot are being prepared, and permits have been issued from the city engineer's office for the erection of several buildings. A

number of skilled mechanics were idle. Wholesale and retail trade was fairly active.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The winter fair opened March 10, 1908, and continued for four days. It proved a success from every point of view, and the Winter Fair Association has decided to make it an annual occurrence. Visitors in large numbers attended each day, and a large number of exhibits were entered from different parts of the country. The section allotted to the horses was the leading feature of the fair. In each of the different classes large entries were made. Most of the well-known breeders had entries in the cattle department and in the sheep and swine sections. Many valuable addresses were delivered on various subjects interesting to the farmer. A very interesting part of the fair was the competition on stock-judging, and weed seed identification. At the closing of the Fair, a sale of horses took place, when many pure breed horses changed hands at fair prices.

*Lumbering.*—The lumber camps close at the end of March. The season has been most favourable, owing to the fine weather, good roads and little snow. The output of both logs and lumber will fully double that of last year.

*Manufacturing.*—The Wheat City flour mills have been taken over by the Merchants' Bank, which is investigating the affairs of the late firm. This company owns an elevator at Souris, in which several farmers had deposited wheat. The Merchants' Bank allowed them to withdraw it. The mill is likely to start under new management.

*Railroad construction and employment.*—Track laying on the Grand Trunk Pacific Railway, between Portage la Prairie and Saskatoon is being resumed, and the remaining 65 miles will likely be completed soon. An order has been given to the Grand Trunk Pacific agency to supply gangs of 140 men each, to work both ways, on 340 miles of track. It is stated that by April 1st this force is to be increased to about 600 men, and later to

1,000, all of whom will be engaged in ballasting and surfacing west from Portage la Prairie.

*Other industries.*—The Brandon Fire Engine Company, Limited, has been incorporated with a capital of sixty thousand dollars. It will manufacture all kinds of fire-fighting appliances. The new nine-stall roundhouse of the Canadian Northern Railway, with its new turntable, is now in use. The Brandon city council opened tenders March 19, for the construction of the new bridge at First Street. The council decided to accept the city engineer's tender, which was the lowest, and gave him instructions to proceed with the work at once. The estimate of the city engineer for a reinforced concrete structure was \$48,250.00.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—There was practically no work in the building trade, but prospects were very encouraging.

*Metal and engineering.*—Machinists, engineers, blacksmiths, boilermakers, jewellers and sheet metal workers were all quiet.

*Woodworking and furnishing.*—Quiet conditions prevailed.

*Printing.*—Printers were fairly active.

*Clothing.*—Journeymen tailors were also actively employed.

*Food and tobacco preparation.*—Bakers, confectioners, etc., had fair employment.

*Miscellaneous.*—Barbers, clerks and restaurant employees found trade fair.

*Transport.*—Freight traffic was quiet and passenger traffic fairly active. Cabmen, draymen, teamsters and expressmen were quiet.

*Unskilled.*—There was no scarcity of this class.

#### DISTRICT NOTES.

*Neepawa.*—Many settlers are coming into the west through North Portal, Sask. Immigration has fairly started, and trains loaded with land-seekers and their effects are arriving daily.

*Langenburg.*—The creamery has been running all winter. During six weeks the sum of \$2,000 was paid to patrons. This is the first winter that a creamery has been in service.

## REGINA, SASK., AND DISTRICT.

*Mr. Hugh Peat, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during March was dull. Practically no work has yet been begun in the building trade, and except among a few carpenters employed on interior work, conditions were the same as in the preceding month.

The organization committee of the Trades and Labour Council at the last meeting of that body reported the completion of their work in connection with the Teamsters' Union.

Negotiations are still in progress between the Trades and Labour Council and the Builders' Exchange for a working schedule to embrace every branch of the building trade for the season of 1908. The painters' and plumbers' schedules have already been endorsed: the stonecutters' stands the same as last year; but a disagreement exists with regard to the carpenters' and bricklayers' schedules. The carpenters are asking for an advance of ten cents per hour over last year's schedule, while the bricklayers are asking for an advance of five cents. No definite decision has yet been arrived at, but the Builders' Exchange has submitted a modified scale for the consideration of the two unions.

There were about the same number of cases of destitution in the hands of the Relief Society as during the preceding month. The number range between 40 and 50, all of whom were being taken care of by the Society.

From numerous enquiries that have been received by the secretaries of the local unions it is apparent that many men are contemplating coming to Regina at an early date on account of the proposed building of the New Provincial Parliament Buildings, which are to be commenced during the coming season. In this connection the Bricklayers' Union issued a note to their brethren in the east to prevent the city being flooded with men in search of

employment. In all probability excavating and other labourers' work will occupy the spring and the early part of the summer. The Amalgamated Society of Carpenters and the bricklayers have each 70 members on the union books, nearly all of whom are unemployed at the present time.

A meeting for the formation of a Threshers' Association has been called for the first week in April.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Winter conditions still prevail, but the farmers were looking forward to an early opening of operations.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, stonecutters, masons, carpenters and joiners, lathers, plasterers, and painters were very dull. Plumbers, gas and steam fitters, and builders labourers were dull.

*Metal.*—Electrical workers were quiet.

*Printing.*—Printers were fairly active; there being a slight improvement in trade as compared with last month.

*Food and tobacco preparation.*—Cigar-makers were dull.

*Miscellaneous.*—Barbers were fairly active. Laundry workers were active.

## MOOSEJAW, SASK., AND DISTRICT.

*Mr. J. R. D. Bastien, correspondent* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market somewhat improved during March after the depression which existed during the severe weather. There is every indication of greater activity in the building trades, in the railway service conditions have very much improved. Immigrants from the United States have commenced to enter Canada on a larger scale than ever before at this time of the year. There are at present coming in from the south through Portal section an average of over thirty car-loads of

settlers every day. Freight traffic has greatly increased. With the appropriation for road improvements and building contemplated by the Canadian Pacific Railway Company there will be considerable employment provided for workmen in this city and district. It is the intention of the above mentioned railway company to increase its yard accommodation at a cost approximating \$300,000. The trades generally show indications of improvement. Men are already in demand. In agricultural pursuits there is a good demand for men, with the supply about equal. In many instances farmers requiring men to manage their farm, with housekeepers, cannot procure them.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Though there has been considerable improvement in the demand for labour, bricklayers and masons were still inactive. Plumbers and steam-fitters and builders' labourers had fair employment.

*Metal and engineering.* — Machinists and engineers, and steam engineers were fairly active. Electrical workers and linemen were active, also horseshoers, jewellers, etc., with blacksmiths fairly busy.

*Woodworking and furnishing.* — Car-builders were fairly busy.

*Printing.*—The printers and allied craftsmen found conditions considerably improved compared with the preceding month.

*Clothing.*—Journeymen tailors had fair employment, and boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters were active, and ice-handlers very active.

*Miscellaneous.* — Barbers were busy, clerks, stenographers, hotel and restaurant and theatre employees active.

*Transport.*—Towards the latter part of the month there was a great improvement in transportation and the different departmental staffs were increased.

*Unskilled.* — Employment was fairly abundant.

#### CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brocklebank, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market improved somewhat during the month, and at the end there were about one hundred workmen employed on new buildings being constructed by the exhibition board to accommodate the Dominion exhibition, to be held here on the first 10 days of July, 1908. Work also was commenced on a number of buildings throughout the city, giving employment to carpenters, who have benefitted to a greater extent than the other branches, though there are still a number out of work. The unskilled classes were comparatively inactive. Business with railway companies showed an improvement on last month. On the whole, the labour market was about the same as in the corresponding month of 1907, that is, the supply exceeded the demand. On March 2 the Cushing Brothers opened their new factory. The factory is one of the largest of its kind in the Dominion. On the same date the new steel bridge to the east of the city was opened for traffic; this will be a great benefit to settlers. Work was also commenced on the superstructure for the new titles office, to cost about \$125,000. About fifty workmen are being employed on the structure, which is being built by day labour. About forty men are employed on the erection of the Normal school. Business with the transportation companies increased during the month. Another daily train has been put into service, and another will be put on the north branch in April. Bank clearings remained about the same as last month, but shewed a decrease compared with the corresponding month of 1907. Wholesale trade improved slightly, but retail trade remained about the same as last month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have commenced preparing the ground for the spring crop, and report great need of rain.

*Mining.*—Mining has not improved during the month. A joint meeting of operators and workers was held in the city a short while ago. This committee is the result of the agreement arrived at last year between the operators and miners, and is formed for the purpose of settling all disputes which may arise between the men and the operators. Those present were F. H. Sherman, J. A. MacDonald and Wm. Graham, representing the miners, and Louis Stockett, Bankhead; W. F. McNeill, Canmore, and J. D. Hurd, of the Crow's Nest Past Coal Company, representing the coal operators. Mr. Stockett acted in the capacity of chairman, and Mr. MacDonald as secretary. The proceedings of the committee were not made public.

*Manufacturing.*—Calgary has some 40 factories, 97 wholesale houses, and 13 banks. The following comprise some of the most important industries: One biscuit factory, 1 box factory, 2 candy factories, 2 foundries, 2 breweries, 2 cigar factories, 2 meat packing plants; 1 breakfast food plant; 1 cement factory, 3 harness and saddlery factories, 2 pressed brick plants, 3 cut brick plants, 3 flour mills, 1 coffee and spice plant, 2 tent and mattress plants, 3 dyeing and cleaning works; 2 cold storage plants, 2 electric light plants, 2 electric power plants, 1 gas plant, 2 lumber mills and 3 planing mills.

## EDMONTON, ALTA., AND DISTRICT

*Mr. J. A. Kenny, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was employed to a slightly greater extent than last month, though there are still a large number of workmen unemployed. Compared with March of last year there were more unskilled labourers employed, but as the number in the city seeking work is much greater than in March 1907, the proportion remaining unemployed is considerable. Very little in the way of house building has yet been commenced. The

demand for mechanics can be met by the local supply. Increased numbers of settlers are continually arriving; some remain in the city expecting to secure suitable employment until the roads become sufficiently good to travel on, when they will leave for different sections of the country in search of suitable land. A large number are arriving to engage in railway construction work, and will readily secure employment as soon as conditions are favourable for grading. The city is employing between 150 and 200 men on street and sewer construction work. The wages paid are below the scale; but it is expected that this will be rectified as soon as the frost is out of the ground and active operations begin. The number of men employed is likely to be increased, as Edmonton has planned to expend nearly \$1,000,000 in improvements during the coming year. These improvements will consist mainly in extensions to sewer and water systems; street paving; a car line; and the installation of a stronger automatic telephone system. Work on the substructure of the bridge at Battle River is being proceeded with; it is to be ready for the steel by June 15.

Among the estimates passed by the Alberta Legislature, was one for the expenditure this year, of the sum of \$1,110,500 in public works throughout the province. Wholesale and retail trade was fair.

### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—Lumbering operations were successful and it is expected that a record cut will be taken out.

*Manufacturing.*—Two new brick manufacturing plants will be established this spring, making six brick-yards here, with an output of about twenty million brick for the season.

### CONDITION OF PARTICULAR TRADES.

*Building.*—There were a few more bricklayers at work than during last month. Carpenters, lathers, plasterers, plumbers and gas-fitters, steam-fitters, and sheet metal workers were in the main inactive.

*Metal and engineering.*—Electrical workers and linemen were better employed, and blacksmiths and horse shoers were fairly busy.

*Printing.*—Printers, pressmen and bookbinders found trade fair.

*Food and tobacco preparation.*—Bakers, confectioners and cigar makers had only fair employment.

*Miscellaneous.*—Barbers, clerks, hotel and restaurant employees were fairly employed, with a number of each craft out of employment.

*Unskilled.*—This class is employed to a considerable extent, but on account of the large number of new arrivals the supply far exceeded the demand.

### NELSON, B. C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during March was quiet throughout the Kootenay district, there still being a surplus of labour approximating 1,500 men, and practically no change from the preceding month. The smelter at Trail, B. C., has about 500 men on its pay-roll, maintaining in that town normal prosperity. A new copper furnace, said to be the largest in Canada, is being installed at the smelter; this will materially increase the output.

Mining at Rossland was normal, about 1,000 men being reported on the different payrolls. A high-grade ore-body has been found in the 1,650 foot level of the Le Roi mine.

Several properties in the south belt are being investigated by prospectors, and some good ore has already been shipped.

The report of the Consolidated Mining and Smelting Company, of Trail, recently issued, shows a total production for 1907, of six millions. The War Eagle and Centre Star show higher values with depth; the War Eagle has recently shipped 120 tons, going \$40 per ton in gold. During the final six months of 1907, this company's properties, comprising the

Centre Star group at Rossland, St. Eugene group at Moyie, and the Snowshoe mine at Phoenix, shipped 248,664 tons. The company also owns the Trail smelter, at which the average amount of ore and by-product smelted was 1,116 tons per day. The amount of lead-silver bullion produced daily was 42 tons, averaging \$165 per ton, and the amount of copper matte 15 tons daily, averaging \$453 per ton. The amount of pig-lead produced by this company's refinery was 38 4-10 tons daily, averaging about \$79 per ton.

The collections for Nelson customs district for February, 1908, were \$15,740.58 against \$12,601.95 for February, 1907, an increase of nearly 25%. The collections of the Inland Revenue office for February were as follows: Spirits, \$3,917.16; malt, \$210.00; raw leaf tobacco, \$86.92; cigars, export, \$123.78, and cigars, ex-warehouse, \$77.20, making a total of \$4,417.03.

### NEW WESTMINSTER, B. C., AND DISTRICT.

*Mr. D. J. Stewart, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have improved considerably since February, and the number of idle men was much less. Weather conditions were much better. A large number of new dwelling houses are under construction, furnishing employment for a limited number of carpenters, painters, plumbers, bricklayers and plasterers. A number of men are employed by the city on additions to the sewer system, repairing and opening up new streets, etc. A number have also found work among farmers, who prefer to pay a little more for the services of a white man than for a Hindu, Chinaman or Japanese. Two new sawmills will likely be built in a short time at Bon Accord, about one mile above this city on the Fraser river, the necessary land and water frontage having been secured. A steamer of 1,778 tons called at one of the local saw mills during the month and took aboard a

part cargo of box shooks, lumber and ties for Salina Cruz, Mexico. The custom returns for this port during the month of February last, show an increase of 50% over the same month last year. The receipts of the local land registry office for the month of February last were \$2,324.44, as against \$1,796.44 for the corresponding month of last year.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy preparing for the spring planting. A large number of idle men in the cities have secured employment among the farmers.

*Fishing.*—Though the season for spring salmon opened on the first of this month, comparatively few of the fishermen were on the river. Catches of springs were very small. Spring salmon is retailing in the local shops at 15 cents per pound.

*Lumbering.*—Lumbering was more active than last month. Some logging camps and saw mills which had closed down during the fall and winter months have again resumed operations, and a good season is anticipated.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and plumbers were quiet. Builders' labourers were dull.

*Metal.*—Iron moulders, iron workers, machinists, steam engineers and blacksmiths were quiet.

*Woodworking.*—Car builders (electric) were busy. Shingle weavers were dull.

*Printing.*—Printers and pressmen were active.

*Clothing.*—Journeymen tailors and boot and shoe workers were quiet.

*Food and tobacco preparation.*—Bakers and confectioners were busy, while butchers and meat cutters were active. Cigar makers were active.

*Leather.*—Tanners and curriers were busy.

*Miscellaneous.*—Barbers were active, with clerks and stenographers dull. Hotel employees were active and laundry workers quiet.

*Transport.*—Steamboatmen were active; street railway employees were busy, and teamsters and expressmen dull.

*Unskilled labour* was dull.

## VANCOUVER, B. C., AND DISTRICT.

*Mr. Geo. Bartley, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Merchants generally reported business a little more active towards the end of the month, though they find the spring trade somewhat slow in opening up, very few camps having commenced operations. Prospects are favourable in regard to summer outside trade, mainly in railway construction supplies. Prices in all lines, excepting hams and Oregon eggs, held firm. Easter creamery butter was scarce; a large amount of California butter came in, and heavy shipments of Australian butter are expected to arrive. The hardware trade increased in activity, and local dealers were sanguine of a good season.

Brokers reported mining stocks active.

The British barque "Inverneill" sailed with a cargo of 1,244,200 feet of lumber for Calais, France; the timber was cut at the Hastings mill.

The largest catch of halibut that has reached here for several months arrived on the 21 instant, by the fishing steamer "New England". The cargo of fish amounted to 145,000 pounds, caught in eleven days in the Hecate straits.

The rush to the North has commenced and all the ships leaving Vancouver for northern ports are crowded.

#### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—Loggers reported trade dull, there being no foreign demand for timber. Several camps are closed and will remain so for several months. There are almost enough logs in the streams to keep the mills going until fall. Several booms have been towed from the salt water to preserve them from toredo worm.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were very quiet, but there were not so many men out of employment as in the previous month. Prospects are not very bright.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers, engineers and machinists reported trade dull, with the outlook uncertain.

*Woodworking and furnishing.*—In-activity prevailed.

*Printing.*—Thirty-five printers were reported out of employment, and about one hundred at work.

*Clothing.*—The union tailors complained of the contract for making uniforms for the city police and firemen being let to a city firm that will have the uniforms made at Montreal. There were a number of tailors out of work since the holidays, and in view of the keen competition of Japanese and Chinese firms, the outlook is discouraging.

*Food and tobacco preparation.*—Bakers and confectioners reported trade dull. The master bakers increased the price of bread from 5 to  $7\frac{1}{2}$  cents for a  $1\frac{1}{2}$  lb. loaf. As there are no copper coins in circulation 10 cents is the charge for a single loaf, or 2 loaves for 15 cents. As a result of this increase in the price of bread, the working people in general, are baking their own bread, thus throwing out of work several journeymen bakers. The cigar makers reported trade very quiet and a number of cigar makers out of work.

*Leather.*—Fair conditions of employment prevailed.

*Transport.*—Railway employees were fairly active, though longshoremen reported two men offering for every job. Carters, hackmen and delivery employees were active.

*Unskilled.*—The civic labourers have had their wages reduced from 30 to 28 cents an hour, and also some from  $27\frac{1}{2}$  to  $25\frac{1}{2}$ c, an hour, for an 8 hour day. Builders' labourers reported three-fourths of their number out of employment.

## VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

During March, while the general average were employed, owing to the number

of newcomers there have been many unemployed. This applies to all the trades, but more particularly to the building lines and unskilled labour. It is expected that this condition will be naturally bettered during the next month when building will have started, and other works of improvement for the city are undertaken. The C. P. R. Co. is calling for tenders for clearing the land for their new freight terminals, and this, as well as the building of the new structures should take a number of men off the market. It is expected that it will be a busy season, as several large and expensive buildings are to be constructed.

During March the first contingent of colonists were brought to British Columbia under the auspices of the Salvation Army. There were 33 of this contingent brought to Victoria, four of the number being domestic servants, and the remainder being intended to be stationed on farms in the neighbourhood. Another party of 28 will reach this province about April 1st.

Bank clearings for the month of February show a satisfactory increase over the same month of last year. The total clearings were \$4,272,712, compared with \$3,750,822 in February, 1907, and \$2,888,017 for the corresponding month in 1906. Total clearings for the months of January and February this year were \$8,663,807, compared with \$7,660,331 for the same two months last year.

Business, both wholesale and retail, was very good.

There were no changes in wages or hours of labour reported during the month, and there was no unrest in the labour world.

Retail market prices have shown a slight decline lately, and flour, though it has advanced in price in the east, still remains at the price established for the last six months.

### CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—There is no commercial salmon fishing going on at present, but the Japanese fishing schooner *Sunburst* left this port for the Northern halibut banks recently. Big catches have been made recently by American fishing vessels.

*Lumbering.*—Mills are all running and report business in first class condition. It is expected that one or two logging camps on the Island that shut down for the winter months will start work again early in April.

*Manufacturing.*—All the manufacturing industries report business good; but there are always plenty of men to meet the demand for labour. The ship yards are all running full time.

*Mining.*—Recent advices from the Queen Charlotte Islands indicate considerable activity in that district.

*Sealing and whaling.*—Two schooners of the Victoria Sealing Company will be outfitted early in April to hunt sea otter in North Pacific waters. Sea otter skins are now very valuable and are sold at prices ranging from \$250 up.

The Pacific Whaling Company have moved their plant from Page's Lagoon near Nanaimo on the gulf of Georgia to the station at Sechart on the west coast. This station is used during the months of fine weather when the sea is not too rough and the whales go out to the open sea. Good catches were made here last year.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—While considerable residential building is going on, yet it is expected that within a very short period much more construction will be taken in hand, and will engage practically all the unemployed men in this line. Carpenters and painters are the principal branches of the buildings trades at present out of work.

*Metal, engineering and shipbuilding.*—All branches were well employed. Shipwrights and caulkers have had more work during the past few months than for some time, but as soon as the present ships on the way are finished a lull is expected.

*Woodworkers and furnishing.*—Woodworkers were well employed but upholsterers have found that business has slackened to some extent. Carriage and wagon work was normal, and idle men in this line have been reported.

*Printing and allied.*—Commercial printing has been good but there have

been more than enough men to do the work. The government printing office laid off four men at the close of the session. This is principally on account of a change of policy on the part of the government, in putting a stop to timber limits being taken up for the present and consequently the falling off of location notices in the *B. C. Gazette*. Bookbinding has been very active.

*Clothing.*—Journeymen tailors reported business in fair condition, and the garment workers were constantly employed at the two factories here.

*Food and tobacco preparation.*—The cigar making business is in a healthy state and all the regular workers were kept well employed. Bakers, confectioners, butchers &c., found trade normal.

*Miscellaneous.*—All branches were fairly well employed and the hotel business has been a little above the normal, consequently considerable help was employed.

*Unskilled.*—While the city has a big staff of men employed at present, there are many men looking for employment.

#### NANAIMO, B. C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district has slightly improved since last month, there being fewer men out of work. The Provincial Government has employed a large number on road and improvement work, and the city is doing its share. The wholesale and retail dealers are feeling the present stringency. There have been no changes in rates of wages or hours of labour.

#### CONDITION OF LOCAL INDUSTRIES

*Agriculture.*—The farmers are at work at spring plowing.

*Fishing.*—The herring fishing has closed for the season, with a large catch.

The whaling station on the Gulf of Georgia, near this city, has closed. The station off the west coast of the island has opened for the summer. The inside station is going into the catching and preparing of dogfish for oil and fish guano.

*Lumbering.*—There was very little activity among the sawmills and lumber camps.

*Mining.*—The coal mines in this city have been working four days a week during the month, and the other mines have been working short time. Some of the new mines having been temporarily shut down are resuming work on a smaller scale.

*Railroad construction.*—Clearing the right-of-way on the extension to the E. & N. Ry. is being pushed, and grading has started. This is having a relieving effect on the present stringency.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—There was little employment.

*Metal.*—Blacksmiths and carriage makers reported work quiet.

*Transport.*—Teamsters and expressmen were quiet.

*Unskilled labour.*—There was a large number of unskilled labourers in the district, but not so many as last month.

### INDUSTRIAL DISPUTES INVESTIGATION ACT.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF MARCH.

**D**URING the month of March the Department received five applications for the establishment of Boards of Conciliation and Investigation, viz:—

1.—On behalf of the employees of the King Edward mine, Cobalt, Ontario, the number of employees concerned being estimated at 60.

2.—On behalf of the Lake Seamen's Union, being employees of the Canadian Lake Carriers, through the Dominion Marine Association, the number of employees concerned being estimated at 450.

3.—On behalf of the employees of the Manitoba and Saskatchewan Coal Company, Limited, of Bienfait, Sask., the number of employees concerned being estimated at 50.

4.—On behalf of the employees of the Western Dominion Collieries, Limited, of Taylorton, Sask., the number of employees being estimated at 90.

5.—On behalf of Mechanics Lodge No. 23, Provincial Workmen's Association of Nova Scotia, being employees of the Cumberland Railway and Coal Company,

Limited, the number of employees concerned being estimated at 1,600.

Of applications received prior to the beginning of March, proceedings in connection with which remained unfinished at the close of preceding month, there were the following, namely, (1) on behalf of the employees of the Dominion Coal Company Limited of Dominion, C. B., the number of employees concerned being estimated at 7,000; (2) on behalf of the employees of the Hamilton Street Railway Company and allied Companies, the number of employees concerned being estimated at 120.

The report of the Board established in the case of the dispute between the Dominion Coal Company Limited, of Dominion, C. B., and its employees, was received during the month and is printed in the present article. In the case of the Board established for the adjustment of the differences between the Hamilton Street Railway Company and allied Companies the inquiry before the Board proceeded during the month, but a report had not been received by the department at the end of March.

## I. SETTLEMENT OF ALL DIFFERENCES BETWEEN THE DOMINION COAL COMPANY AND ITS EMPLOYEES—AGREEMENT EFFECTIVE UNTIL DECEMBER 31, 1909.

THE Department received on March 23, the report of the Board established for the adjustment of the differences between the Dominion Coal Company Limited of Dominion, C. B., and its employees. The report was in the form of an agreement concluded between the parties, effective from March 16, until December 31, 1909. The interests at stake in this dispute were very extensive, concerning directly 7,000 men with their wives and children, and affecting also the provincial revenues and many business interests throughout Nova Scotia and elsewhere. Much satisfaction has therefore been expressed in the press of the Province named and in the communities most closely identified with the districts concerned in the dispute at the conclusion of an agreement which appears to have been generally acceptable to both parties, and which promises economic stability for a considerable period.

The Board of Conciliation and Investigation consisted of Dr. A. S. Kendall, M. P. P., Sydney, N. S., appointed on the recommendation of the miners; Mr. J. Dix Fraser, New Glasgow, N. S., appointed on the recommendation of the Dominion Coal Company; and Professor Adam Shortt, Kingston, Ont., Chairman, appointed by the Minister in the absence of a joint recommendation from the parties concerned. The sittings of the Board were held in the Council Chamber of the Town Hall at Glace Bay, N. S. The Board first met on March 2, the Dominion Coal Company being represented by Mr. G. H. Duggan, general manager, assisted by Mr. Charles Fergie, Chief Superintendent of Mines; and the miners being represented by Mr. John Moffatt, Grand Secretary of the Provincial Workmen's Association, assisted by Messrs. Stephen B. McNeil and S. K. Nicholson, also officers of the P. W. A.

The chief matters in dispute were connected with the readjustment under

a new schedule formulated by the Company early in the present year of the rates of pay for various classes of mine work, involving a considerable reduction in the rates for pillar work, while certain other classes of work received increased rates. Other matters in dispute were the regulations adopted for wedging down coal when explosives could not be used, the rearrangement in the prices to be paid for explosives, the increased price for house coal bought by the miners, also the question as to the length of time to be covered by an agreement.

The Board devoted itself on March 2, to obtaining an outline of the various matters in dispute. The second day's session was employed in visiting two representative mines. The next five days were occupied in hearing evidence first on behalf of the employees, various workmen being called as representatives of different grades and classes of work to be done in different mines, particularly with reference to the taking out of pillars and the mining of coal with machines; next on behalf of the Company, evidence being given by the district superintendent and the managers of the different miners.

### Conduct of the Investigation.

The Chairman of the Board in a covering letter to the Department accompanying the text of the agreement concluded, after outlining the course of proceedings before the Board, as above set forth, proceeds as follows: "As usual the evidence was given in a free and informal manner, the witnesses being subject to question by the members of the Board and the representatives of both sides. As a result there was comparatively little difference as to matters of fact, and such as existed was chiefly cleared up in the course of the discussion. The cases for the two sides were handled by Mr. Duggan for the Company and by

Mr. Moffatt for the men with ability, moderation and good temper, conducing much to the clarifying of the issues and the preparation for an amicable settlement."

The taking of evidence was closed on March 9, after taking counsel with both parties separately and discussing provisional proposals a definite award was formulated and signed by the members of the Board. This was submitted to the representatives of the company and the miners and virtually accepted by them, however the committee representing the miners had not the authority to formally accept the award before it had been submitted to the body of men through their lodges, of which there were some sixteen. Accordingly the terms of the award and the reasons which had governed the Board in arriving at them were explained to the general representatives of the miners, and by them submitted under a species of referendum, to the different lodges. The result was that the lodges accepted the award by a large majority.

The action of the lodges was ratified by the Sub-Council and their committee authorized to sign the acceptance of the award of the Board. The award as accepted by both parties continues in force until December 31st, 1909. The net result of the adjustment of rates amounts to a substantial increase of over \$70,000 per annum on the general pay roll.

The award of the Board as forwarded to the Department included a blue print plan of the workings of the mine controlled by the Dominion Coal Company, which could not be included in the report printed in the present article.

#### The Minister's Congratulations.

The Minister received a telegram from the Chairman of the Board on March 13, announcing that a satisfactory settlement had been reached in this dispute. Professor Shortt's telegram was read in the House of Commons by the Honorable Mr. Lemieux shortly after its receipt, and the following letter of congratulation was subsequently addressed by the Minister to the Chairman of the Board:

OTTAWA, March 16, 1908.

My Dear Professor Shortt.

I am delighted to have again the opportunity of congratulating you on the successful result of your efforts to arrange the differences between the Dominion Coal Company and its employees. Of the many differences that have been referred under the provisions of the Industrial Disputes Investigation Act during the past year, so many of which have come before yourself for adjustment, none perhaps has altogether equalled in importance, that which has now been disposed of, where not less than 7,000 men were directly concerned, while thousands of coal miners in the province of Nova Scotia were keenly interested in the outcome. In some respects also, I am inclined to believe the present dispute presented new and difficult phases so that both employers and employed were sometimes doubtful of the possibility of an amicable arrangement being reached. The conclusion of an agreement through the good offices of yourself and colleagues on the Board, is therefore an especially fortunate termination of the affair, and one that happily averts any serious danger of interruption to the great industry affected.

As I have said, you have during the year, presided over many Boards of Conciliation and Investigation constituted under the Act for the adjustment of various industrial disputes. The result of your efforts has been uniformly successful, and of the utmost value to the industrial population of Canada. I welcome this opportunity therefore, of expressing my sense of the deep obligation under which you have laid my Department. I congratulate you upon having seized at the outset the vital principle of the measure, that namely, of conciliation, and upon effecting a series of agreements and establishing an array of precedents in the course of your investigations which must prove of the highest value in all future proceedings under the Act.

Let me assure you that my colleagues in the Government appreciate no less than myself the value of the services you

have rendered during the year, often, I am aware at great personal inconvenience and to the disturbance of your leisure and of your normal duties and engagements. I believe I may add that the public also fully recognizes its indebtedness to you in respect of this same matter.

Again complimenting you on your latest triumph in the work of conciliation, I remain,

Yours very truly,

(Sgd.) RODOLPHE LEMIEUX

Professor Adam Shortt,  
Queen's University,  
Kingston, Ont.

#### **Employees' Appreciation of Terms of Settlement.**

On March 13, the Sub-Council of the Grand Lodge of the Provincial Workmen's Association at its regular session, unanimously passed the following address, and presented copies to the members of the Board of Conciliation and Investigation who were present, for the purpose of addressing the members of the Council:

To Prof. Adam Shortt, Dr. A. S. Kendall and J. Dix Fraser, members of the Board of Conciliation.

Gentlemen.—The members of the sub-council of the P. W. A. desire to express their appreciation of your services in the matter of their dispute with the Dominion Coal Co. The work of the Board was conducted with great ability, the members of the board showing a large knowledge of the facts of the case.

A spirit of fairness was shown throughout the discussion of the dispute. Ample opportunity was given to present all necessary evidence, which gave great satisfaction to all our members and to others interested in the case.

The decision of the board has not been as favorable to us as desired, but we believe, it was given in all fairness, and the board has exercised its best judgment in giving the award.

We thank you for the good work accomplished, the benefit conferred upon our Island, our province and our county

by the result of that work from a state of anxiety and uncertainty to the future of our industrial life. We have by your assistance, been brought into a state of certainty that peace shall continue to aid in the progress of our mining villages.

Wishing you success in your future labours, we are yours in behalf of the Provincial Workmen's Association.

STEPHEN B. McNEIL,  
Grand Master P. W. A.

JOHN MOFFATT,  
Grand Secretary P. W. A.

JOHN DAVIS,  
DAN. McDOUGALL,  
DAN. CARMICHAEL,  
RONALD NICHOLSON,

#### **Resolution by Glace Bay Council.**

At an adjourned regular meeting of the Town Council of Glace Bay on the evening of March 13, the following resolution was unanimously passed:

Whereas the Dominion Coal Company and its employees have been for some months past negotiating for an adjustment of the wages paid by the said company to its employees, but were unable to arrive at a satisfactory settlement;

And whereas, the men applied to the government for the appointment of a Conciliation Board for the purpose of endeavoring to adjust the said difficulty;

And whereas, a Board of Conciliation was duly appointed to consider the question under dispute;

And whereas, all difficulties between the men and the company have been amicably settled.

Therefore resolved that the Town Council of the town of Glace Bay in regular session duly assembled on this date, records its appreciation of the service rendered by said Board of Conciliation, and particularly those of Prof. Shortt, as chairman, in arriving at so successful, amicable and satisfactory settlement of the difficulty, and we further regard with pleasure the tolerance displayed by both the men and the company in enabling the Board to so

expeditiously adjust this difficult question.

**Text of Agreement Concluded.**

The text of the agreement concluded before the Board is as follows:—In accordance with the award of the Board of Conciliation and Investigation on and after the 16th of March 1908, the following changes became effective in the schedule of rates announced on the 5th of December 1907, as schedule 1, which came into operation on the 6th January, 1908:

No. 1 MINE.	Old Rate	New rate.
Deeps.....	39.5	41.
Headways.....	36.3	38.
Levels.....	36.3	38.
<b>No. 2 MINE.</b>		
Deeps.....	40.5	41.7
Headways.....	38.5	39.7
Levels.....	37.5	38.7
<b>No. 3 MINE.</b>		
Deeps.....	43.7	44.5

Levels.....	43.5	44.5

**PILLARS.**

Collieries Nos. 1, 3, 4 West side and 5 an INCREASE of from 1½ cents to 4½ cents, making rates from 43 cents to 46 cents per ton, varying for each district as shown on the attached plan.  
 Colliery No. 4 East side, an increase of from 2½ cents to 5½ cents, making the rates for different districts from 45½ cents to 48½ cents per ton as shown on the accompanying plan.  
 Colliery No. 2 on the PHALEN SEAM an increase of 1½ cents, making rate 43 cents per ton.  
 Colliery No. 6 on the PHALEN SEAM an increase of 1 cent making rate 46 cents per ton.  
 Colliery No. 9 on the HARBOR SEAM an increase of 3 cents on coal 5 ft. to 5ft, 6 in. high making rate 49 cents per ton.  
 An increase of 2 cents on coal 5 ft. 7 in. to 6 ft. high, making rate 47 cents per ton.  
 An increase of 2 cents on coal 6 ft, 1 in. and over, making rate 46 cents per ton.

**RATE OF DAY WAGES.**

BOYS, DRIVERS, LANDING TENDERS, &c., are increased TWO PER CENT over the rates that became effective 6th January 1908, but this increase will not in any case be less than 3 cents per day. As an example, men and boys of above classes, who were receiving \$1.38 per day previous to 6th January 1908, and got an increase to \$1.42 on the 6th January, on and after 16th March receive \$1.45.

MINE MECHANICS AND SHIFTMEN now getting \$1.50 or over, are increased TWO PER CENT. This increase will not in any case be less than 5 cents per day. As an example, those now receiving \$1.70, on and after 16th March, are rated at \$1.75.

**CONDITIONS OF LABOUR PILLARS.**

Clause Nos. 1 and 2 of schedule No. 1 are cancelled, and the following clauses are substituted:—

Clause 1. In pillar work where cross cuts not exceeding twelve feet wide are required and ordered, the miner will be paid the usual allowance.

Clause 2. Where unsafe conditions prevail, owing to the presence of gas preventing the use of explosives, coal in pillars may be required to be wedged down. Miners who do not wish to wedge coal may without violation of any rule of discipline, remain idle or go at other work until conditions are safe for blasting. Where men are employed wedging coal for more than twelve days in one year they will be paid an increase over the regular rate. The extra rate to be paid for wedging coal will be established by agreement between the Company and the men.

NOTE—A new schedule embodying above and showing all rates in effect 16th March, 1908, to 31st December, 1909, will be issued as soon as possible.

(Sgd.) ADAM SHORTT,  
Chairman.

" J. DIX FRASER,

" ARTHUR S. KENDALL  
Board of Conciliation.

We accept the above award,  
Dominion Coal Company Limited.

(Sgd.) G. H. DUGGAN,  
2nd Vice-President

" S. B. McNEIL,  
G. M. P. W. A.

" JOHN MOFFATT,  
G. Sec. P. W. A.

" S. K. NICHOLSON,  
O. W. P. W. A.

## II. DIFFERENCES BETWEEN SAILORS OF THE GREAT LAKES AND DOMINION MARINE ASSOCIATION REFERRED UNDER THE ACT.

ON March 6, the Department received an application on behalf of the Lake Seamen's Union for the establishment of a Board of Conciliation and Investigation for the adjustment of differences between the Canadian Lake Carriers, through the Dominion Marine Association, and their employees; about 450 men were alleged to be directly concerned in the differences. The causes of difference were declared to be wages and hours. Wages were said to run from \$30 to \$40 per month, some boats paying a little better than \$40 in the fall. The working hours were alleged to be very long, the men in some cases being on deck from 12 to 18 hours without a watch below. The men demanded straight watch and watch, where the same could be granted without danger to the boats. In reply to the application, the Dominion Marine Association held that the Dominion Marine Association was not an employer within the meaning of the Act, and that its Executive Committee held on February 12, by resolution declared the question of an agreement with seamen was

one to be left with individual vessel owners. The Minister held that the Dominion Marine Association was to be regarded as an employer for the purposes of the Act, and proceeded with the establishment of a Board. Mr. John A. Flett, Hamilton, Ont., was, on the recommendation of the employees concerned, appointed a member of the Board. The Dominion Marine Association having failed to recommend a person for appointment to the Board, the Minister, on April 1, under section 8, sub-section 2, of the Act, appointed Mr. James Stewart, of Kingston, Ont., a member of the Board, and Messrs. Stewart and Flett having, on the same day, jointly recommended the appointment of Prof. Adam Shortt, of Kingston, Ont., as third member and chairman of the Board, Prof. Shortt was appointed by the Minister. It was understood the Board would meet for the purpose of investigating the dispute early in April.\*

\* Before the *Labour Gazette* went to press word had been received announcing that the dispute had been arranged.

## III. FURTHER DISPUTE IN SILVER MINING DISTRICT OF COBALT, ONT.—APPLICATION FROM EMPLOYEES OF KING EDWARD MINE.

ON March 6, the Department received an application from local Union No. 146 Western Federation of Miners, Cobalt, Ont., for the establishment of a Board of Conciliation and Investigation to which might be referred for adjustment differences between the King Edward Mine and its employees. The number of employees concerned was estimated at 60. The causes of difference were stated to be in the fact that the employees had been paid according to the wages scale adopted by the camp in July, 1907, a copy of which was attached to the application. On Saturday, February 29, all the men were, it is alleged, paid off in

full. Some of the men were, it is further alleged, given to understand that on Monday, March 2, they could return to work at a reduction of 25 cents per day. The application was signed by R. F. Radcliffe, Geo. Pacey, Al. Pion, R. S. Anderson, Robert Macdonald, Ivor Y. Smail, Michael Maloney, James Loudon, John Macpherson, Sam Kennedy and James Dogue. Mr. Charles Britton Duke, of Cobalt, was, on the recommendation of the employees, appointed a member of the Board. The constitution of the Board had not been completed at the end of March.

#### IV. DISPUTES AT TWO SASKATCHEWAN COAL MINES REFERRED UNDER THE ACT.

ON March 16, the Department received applications for the establishment of Boards of Conciliation and Investigation for the adjustment respectively of disputes between the Manitoba and Saskatchewan Coal Company Limited, of Bienfait, Sask., and the employees of the company, as represented by District No. 18 of the United Mine Workers of America; and the Western Dominion Collieries of Taylorton, Sask., and their employees, as represented by District No. 18 of the United Mine Workers of America. The number of employees concerned in the case of the Manitoba & Saskatchewan Coal Company was estimated at 50, and the number of those in the case of the Western Dominion Collieries at 90. The nature and cause of

disputes were in each case declared to be a failure to agree upon the hours and conditions of labour and rate of wages. The claims of the men involved full recognition of the United Mine Workers of America, an eight hour working day, and standard wages of District No. 18 as now prevailing in the lignite field of Southern Alberta. Mr. F. H. Sherman was, on the recommendation of the employees respectively concerned, appointed a member of the Board in each case, and Mr. James O. Hannah, of Calgary, Alta., was, on the recommendation of the employing company, appointed in the case of the dispute between the Western Dominion Collieries and their employees. The constitution of the Board had not been completed at the end of the month of March.

#### V. REFERENCE IN PARLIAMENT.

THE following questions were asked in the House of Commons on March 11, by Dr. Sproule, member for East Grey, concerning proceedings under the Industrial Disputes Investigation Act:—

1.—In what case has Professor Shortt acted as Chairman under the Industrial Disputes Investigation Act?

2.—What amount of money has he received for such services?

3.—What is his per diem allowance?

4.—Is he an employee of the Dominion Government?

The questions were answered as follows by the Honourable Rodolphe Lemieux, Minister of Labour:—

1. (a)—Grand Trunk Railway Company and machinists;

(b)—Grand Trunk Railway Company of Canada and locomotive engineers;

(c)—Canadian Pacific Railway Company of Canada and railway telegraphers;

(d)—Grand Trunk Railway Company of Canada and railway telegraphers;

(e)—Canadian Northern Railway Company and firemen, enginemen and hostlers;

(f)—Grand Trunk Railway Company of Canada and carmen;

(g)—McKinley Darragh Mining Company of Cobalt, Ont., and employees;

(h)—Dominion Coal Company of Dominion, C. B., and employees.

2.—Fees as chairman, \$640; expenses, \$248.45.

3.—Twenty dollars per day, as provided by section 51 of the Industrial Disputes Investigation Act.

4.—No.

While the above sums represent the amounts paid Professor Shortt for services and expenses in connection with various boards, there remain yet unpaid a number of accounts relating to recent boards. It should be mentioned also that Prof. Shortt accepted the chairmanship of several of these boards only on the urgent desire either of the parties concerned or of the Minister of Labour, the work imposed on him by successive investigations having proved a serious interference with his normal duties and engagements.

## MANITOBA LEGISLATION AFFECTING LABOUR, 1908.

THE first session of the twelfth Legislature of Manitoba was opened on January 2, and was prorogued on February 26. Some 68 Acts were assented to at prorogation. A review of the more important measures of the session, from the standpoint of industry and labour, is given in the following article.

### Mechanics' Lien Act.

A number of important amendments were made to the Mechanics' and Wage Earners' Lien Act (1). In connection with the discharge of liens, the definition of the actions which are not to prejudice the right to enforce a lien is made more definite. The taking of a note in this connection is not in any way to waive or satisfy a lien created by the Act (2). It is also provided that a certificate of *lis pendens* may be issued from the court in which the action is brought (3). In several sections having to do with procedure, judges of the county court are expressly authorized to act (4). With regard to the enforcement of mechanics' liens, it was formerly specified that liens created by the Act might be realized by actions in the Court of King's Bench, according to the ordinary procedure of the court. This section now applies only to actions wherein the amount claimed by the lien exceeds the sum of \$500. In other cases, action may be taken in the county court of the judicial division in which the property affected by the lien is situated (5). In connection with appeals, it is provided that an appeal from the judgment of a county court judge shall be the same as in ordinary cases in the county court (6). Counsel fees are henceforth not to be deemed disbursements under the Act (7). A section is added having reference to actions brought in the Court of King's Bench or in the County Court at Winnipeg (8).

### Seed Grain.

An Act was passed to enable rural municipalities, in which damage to crops occurred in 1907, to borrow a limited amount of money for the purchase of seed within the next six months. The rate of interest payable is limited to 8 per cent. per annum (9). Moneys lent to any municipality under the Act must not be used for any other purpose than for the purchase of seed grain to be supplied to farmers in the municipality (10). The amount to be loaned to an individual is limited to \$250. The municipality is to provide and distribute the seed grain (11). An advance may not be made to a tenant except with the consent of the owner of the land, in which case both tenant and owner must deliver a joint note in favour of the municipality for the amount (12).

### Bartenders' Licenses.

Provision was made in an amendment to the Liquor License Act for restricting employment as bartenders to licensees of the government. Hotel keepers are required to employ only licensed bartenders, excepting in case of temporary emergency, when any male person of the full age of 21 years may be employed for not more than five days in any one month. The minimum penalty for violation of this provision is \$10; the same penalty is prescribed for persons who act as bartenders without having first obtained a license. Licenses are valid for one year, and are issued on payment of a fee of \$5.00. Male persons under 21 years of age, females and persons not of good character, are not eligible for licenses. A licensed bartender selling liquor in contravention of the Act is liable to a maximum penalty of \$50, or to imprisonment for one month and cancellation of his license for two years (13).

<sup>(18)</sup> Stat. Man., 1908, chap. 63 and 64.

**BRITISH COLUMBIA LEGISLATION AFFECTING LABOUR, 1908.**

THE legislature of British Columbia which assembled on January 19th, 1908, was prorogued during March. Some eighty-nine bills were assented to. Among the number were several of first importance to labour and industry. A review of these is given in the following article:

**The Factories Act.**

Perhaps the most important act of the session, having a direct bearing on the condition of labour in the province, is an act "for the protection of persons employed in factories". The measure is of a comprehensive nature, and corresponds in a number of points with similar legislation at present in force in the provinces of Nova Scotia, New Brunswick, Quebec, Ontario and Manitoba. Among its more important provisions are the following:—

*Child and female labour.*—Male children under the age of 14 and female children under the age of 15 are not to be employed in any factory except those engaged in the business of canning fish and fruit packing. Girls under 18, and boys under 16 are not to be employed in factories wherein the work is dangerous or unwholesome. In fish and fruit packing establishments children may be employed only during the time of the several fish runs and during the respective fruit seasons, at which time the ordinary limitations upon hours of labour for these classes are not binding, though in other respects the act is to prevail.

The circumstances which are to be regarded as evidence of employment are set forth in detail. With more particular reference to female employment, it is forbidden to employ any young girl of 15 years of age and upwards or under 18 years of age, or any woman, so that the health of the young girl or woman is likely to be permanently injured. Hours of labour for these classes are limited to 8 per day and 48 per week, unless a different apportionment is made for the purpose of giving a shorter working day on Saturdays. An hour must be allowed at noon for meals. Certain exemptions are allowed to the provisions with regard to hours, but only under strict regulation by the lieutenant governor-in-council. Hours of labour in the case of young girls and women are not in any case to be more than nine in any one day, or more than fifty-four in any one week and the exemption must not be extended for a longer period than 36 days a year. In protection of the personal safety of women and girls, provisions forbidding the cleaning of machinery or mill gearing while in motion, etc., are inserted.

*Health and safety.*—The act contains extensive provisions safeguarding the health and person of employees. The subjects dealt with in this connection include overcrowding, ventilation, prevention of dust, water closets, protection of dangerous places, prevention of fire, fire escapes, notices in cases of accidents and explosions, etc.

*Inspection.*—The act provides for the appointment of inspectors, both male and female, whose powers and duties under regulations to be issued under the act are defined at length.

Other subjects dealt with in full are the giving of notices, the keeping of registers, general provisions, penalties, prosecutions and forms.

### Immigration—The Natal Act.

An act "for the purpose of further regulating immigration into British Columbia", frequently referred to as the "Natal Act," was assented to. The act forbids the immigration into British Columbia of any person who on being asked to do so by the officer appointed under the act, is unable to write out and sign, in the English language or in any language of Europe, any test submitted to him by the officer. Immigrants making their way into the province in contravention of the act may be fined \$500, the same to be collected by distress and sale of the goods and chattels of the offender. In default of such distress the offender may be imprisoned for a term not exceeding 12 months, unless he can find two approved sureties, each in the amount of \$250, that he will leave the province within one month. Other disabilities of unauthorized immigrants are as follows: he is not entitled to a license to carry on any trade or calling subject to the legislative authority of the province; to acquire or hold land, or to any of the rights and privileges of a free miner, or to a free miner's certificate, or to exercise the franchise. Any person or corporation assisting an immigrant to contravene the provisions of the act is liable to the same penalties as the immigrant.\*

### Regulation of Shops.

The Shops Regulations Act of 1900 was amended by the addition of a clause imposing a penalty of not more than

(\* This act has been declared *ultra vires* by the British Columbia courts with respect to Japanese and Hindus. See the *Labour Gazette* for March, '08, p. 1163; also statement in present issue under heading "Recent Legal Decisions Affecting Labour.")

\$40 or not less than \$10 and costs for failure to comply with the provisions of the act having reference to the providing of a sufficient number of clean and well ventilated water closets and urinals, with separate sets, having separate approaches for the use of male and female employees.

The provisions of the act with reference to employment in bake-shops were previously enforceable throughout the province by the superintendent of police. The duties of the superintendent are now limited to portions of the province which are not situated in any municipality.

### Master and Servant.

The amendment of the Master and Servant Act passed in 1902, having reference to deductions from the wages of employees for medical attendance, was originally made applicable only to cities and towns of more than 3,000 inhabitants. This limitation is now removed.

### Eight-Hour Day in Smelters.

An act was passed in 1907 prohibiting employment in and about any smelter for a longer period than eight hours in any one day. It is now provided that on days when shifts change the men may be employed for whatever longer period may be necessary to make the change.

### Protection of Railway Labour—Employment of Aliens Discouraged, and Payment of Fair Wages Encouraged.

An act for the specific purpose of encouraging the employment of white labour in the construction and operation of railways within the province, and of securing the payment of fair wages to the same, was passed in the form of an amendment to the Railway Assessment Act of 1907. Under its terms the lieutenant governor-in-council is empowered to grant to any railway company an exemption from taxation for a period not exceeding ten years from the date of the completion of the railway after January 1 1908, provided, first, that no

aliens be employed on the railway during construction (unless it is demonstrated to the satisfaction of the lieutenant governor-in-council that without the employment of such aliens the work cannot be proceeded with) and, second, that the workmen, labourers or servants employed in the construction or operation of the railway are paid such wages as may be currently payable to white workmen engaged in similar occupations in the same district.

**Size of Placer Claims.**

An act was passed repealing previous enactments with regard to the size of placer claims and re-defining the same as follows;—

In "creek diggings" a claim shall be two hundred and fifty feet long, measured in the direction of the general course of the stream and shall extend in width one thousand feet, measured from the general course of the stream five hundred feet on either side of the centre thereof.

In "bar diggings" a claim shall be:—

(a) A piece of land not exceeding two hundred and fifty feet square on any bar which is covered at high water; or

(b) A strip of land two hundred and fifty feet long at high water mark, and in width extending from high-water mark to extreme low water-mark.

In "dry diggings" a claim shall be two hundred and fifty feet square.

**Taxation of Canneries.**

It is henceforth rendered unlawful to carry on a salmon cannery or the business of fish packing in British Columbia without an annual license issued by the commissioner of fisheries. The license fees prescribed are as follows:—

For the operation of one line of a cannery.....	\$100
For the operation of two lines of a cannery.....	200
For the operation of three lines of a cannery.....	300
For the operation of four lines of a cannery.....	400
For the operation of a fish packing establishment, for each establishment.....	100

The penalty for operating a cannery or fish packing establishment without having obtained a license is fixed at not less than \$400 nor more than \$800 for each day during which the establishment is operated, each day or portion of a day to constitute a separate offense.

**Miscellaneous.**

An act to establish and incorporate a university for the province of British Columbia was passed.

An act was passed permitting of the increase of the capital stock of farmers' institutes with the consent of the lieutenant governor-in-council.

Acts establishing a Department of Lands, a Department of Public Works, and with respect to the public service of the province were passed. The last mentioned measure makes provision for the retirement and superannuation of persons employed in the public service.

The land act was amended and consolidated. Among subjects dealt with in full detail in this act are, the survey, pre-emption and sale of crown lands; free crown lands; timber land; timber licenses; logging licenses; hand loggers' licenses; the cutting of timber; free miners' rights; reserves; royalties on coal, etc., etc.

An act of importance in connection with the immediate development of the northern interior of the province is that ratifying an argeement between the provincial government and the Grand Trunk Pacific Railway Company, and the crown grant made to the company in 1905. The agreement is set forth in full in a schedule to the act.

By an amendment to the Coal Tax Act, the tax on coal is fixed at ten cents per ton on all shipments, except to coke ovens in the province, after July 1, 1908. The tax on coke after July 1, 1908, is to be fifteen cents per ton. The latter tax, however, is not to be paid on coke produced from coal on which a tax has been already paid.

Among measures which were introduced during the session, but which did not become law were the following:—An act to regulate employment in dangerous industries; an act to regulate the procuring or employment of workmen; an act to regulate the hours of labour in marine and shipbuilding works; and an act to amend the hours of labour of telegraphers and signalmen. The report of a special commission appointed to inquire into the irrigation of land in British Columbia was presented to the Legislature during February.

**- CO-OPERATIVE ARRANGEMENT OF STANLEY MILLS & COMPANY, LTD.,  
AT HAMILTON, ONT.**

SOME five years ago the business of Stanley Mills & Company, Limited, operators of a departmental store at Hamilton, Ont., was reorganized and an arrangement adopted whereby the employees of the firm were allowed to acquire a financial interest therein. The business had been carried on for some fifteen years previously, but on the occasion mentioned was considerably enlarged, a limited liability company being formed with a capital stock of \$100,000. Under the new arrangement, \$25,000 worth of this stock, consisting of 1,000 shares of \$25 par value each, was set aside as preferred stock, guaranteed to bear interest at 8 per cent. per annum, and placed wholly at the disposal of the employees.

**Savings Department Established.**

The number of shares taken by employees was at first small and in order to increase their opportunities for purchasing an employees' savings department was started where sums of 10 cents per week and upwards were received and interest allowed on deposits at the rate of 6 per cent. per annum. Under the plan adopted, as soon as the sum saved in this way amounts to \$25 it must remain at that figure, drawing interest at 6 per cent. or it can be exchanged for one share of preferred stock of the company bearing 8 per cent. interest. When a deposit is thus exchanged the employee may open a new account in the savings department. Deposits in that department may be withdrawn, with interest, at any time. It should be added that the company agrees at any time to take back the preferred stock at par of any employee desiring to dispose of his holdings. The feature of the arrangement to which much of its success is attributed is its simplicity and freedom from restrictions.

**Some Results.**

The arrangement has been in operation for about five years and some 496 shares

out of the 1,000 of preferred stock available, have been taken up by the employees. On June 30th, 1903, the number of shares held by employees was 296. Fully one third of the employees are now shareholders in the firm, and the number has never fallen below one quarter. The preferred stockholders have uniformly received the eight per cent. interest guaranteed on their holdings. During the past two years a bonus of two per cent. has been added. The stock in question can be held only by an employee. Many in the service of the company have increased their holdings from one or two shares to ten, fifteen or twenty. Since the system was started only one shareholder has attempted a dishonest act and only one employee, who was a shareholder (with the exception of females who have married) has left the firm to take another position. The business of the firm since the plan was adopted has nearly doubled in volume. The taking of shares is purely voluntary, care being exercised that no partiality is shown to employees who are shareholders. The person who engages or advances employees has no knowledge who are and who are not stockholders, and increases are based solely on efficiency.

**Annual Meeting, 1908.**

At the annual meeting held recently it was reported that the savings bank department has at present 89 depositors, having \$2,600 to their credit. The capital stock of the company, owing to the increase in turn-over above referred to, was increased from \$100,000 to \$500,000. In speaking of the co-operative arrangement the president of the company said:—"We have found this co-operative scheme to be very satisfactory. It has brought our employees closer to us and has increased their interest in the business, so that not only they but we have benefitted by it".

IMMIGRATION AND COLONIZATION.

Recent Immigration Returns.

IMMIGRATION through ocean ports during February, declared for Canada, was as follows:—

IMMIGRATION RETURNS DURING FEBRUARY, 1908.

	Male.	Female.	Children under 12.	Total.
Immigrants.....	2,163	909	626	3,698

Regina.....	94	195	.....	101
Red Deer.....	95	60	26	.....
Winnipeg.....	56	37	19	.....
Yorkton.....	113	59	54	.....
Total.....	1,420	1,033	529	142

It will be seen that there has been a net increase in the number of homestead entries made in February, 1908, of 387.

A statement of the homestead entries during the first two months of the calendar year 1908, compared with the corresponding months of the calendar year 1907, is as follows:—

STATEMENT OF HOMESTEAD ENTRIES DURING JANUARY AND FEBRUARY, 1908 and 1907, RESPECTIVELY.

Month.	1908	1907	In-crease
January.....	1,453	1,111	342
February.....	1,420	1,033	387
Total.....	2,873	2,144	729

It will be observed that there has been a net increase of 729 in the number of homestead entries made during January and February, 1908, compared with the same months of 1907.

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, Saskatchewan, Alberta and British Columbia, during the month of February, 1908, were as follows:

NATIONALITIES OF HOMESTEADERS IN FEBRUARY, 1908.

Nationalities.	No. of Entries.
Canadians from Ontario.....	135
“ “ Quebec.....	22
“ “ Nova Scotia.....	10

" " 28, 1907.....	1,809.90	20,742.32
Decrease, 1908.....	639.93	\$ 5,714.78

**Notes.**

An order-in-council was passed on March 27th, extending the time during which the regulations adopted in January last, having reference to funds to be in the possession of an immigrant when landing in Canada shall apply. The force of the extension will be seen from the text of the order-in-council, which is as follows\*:

The Administrator-in-Council is pleased to order and it is hereby ordered that the Order-in-Council of the 8th of January, 1908, which provides that in accordance with section 20 of the Immigration Act, Chapter 93, Revised Statutes of Canada, 1906, the Immigration Agent at any port shall require every immigrant, male or female, eighteen years of age or over, arriving before February fifteenth, 1908, to have in his or her possession money to the minimum amount of fifty dollars, or if arriving after February fifteenth and before April first, a minimum amount of twenty-five dollars, in addition to a ticket to his or her destination in Canada, unless satisfactory evidence is furnished that the immigrant is going to some definite employment or to relatives or friends already settled in Canada, who will take care of such immigrant, do continue in force until the thirty-first day of December, 1908, in so far as the provision for a minimum amount of twenty-five dollars is concerned.

A further order-in-council was passed on March 27th, 1908, having reference to the prohibition of immigrants unless coming from the country of birth or citizenship.\*\*

(\* ) A reference to the original order-in-council on the subject was published in the January, 1908, issue of the *Labour Gazette*, at page 741.

(\*\* ) A previous order-in-council on this subject passed in January, 1908, was declared ultra vires by the courts. See the *Labour Gazette* for February, 1908, page 1001. See also under heading "Recent legal decisions affecting labour" elsewhere in the present issue.

**ORIENTAL IMMIGRATION—MISSION OF DEPUTY MINISTER OF LABOUR TO ENGLAND—ENQUIRY INTO CHINESE LOSSES AT VANCOUVER, B.C.**

**D**URING the month of March Mr. W. L. Mackenzie King, C.M.G., Deputy Minister of Labour, was despatched by the government of Canada to Great Britain for the purpose of conferring with various departments of the British government on the subject of the immigration of East Indians to Canada. The terms of the report of the Committee of the Privy Council, under which Mr. King's mission was undertaken, as approved by His Excellency the Governor-General on March 2, 1908, was as follows:—

On a Memorandum, dated 2nd March, 1908, from the Right Honourable Sir Wilfrid Laurier, representing that notwithstanding the regulations for the restriction of immigration from the Orient certain classes of immigrants, in particular British East Indians, are being induced to come to Canada under circumstances which may necessitate a refusal of their admission to our shores;

That experience has shown that immigrants of this class, having been accustomed to the conditions of a tropical climate, are wholly unsuited to this country, and that their inability to readily adapt themselves to surroundings so entirely different inevitably brings upon them much suffering and privation, also, that were such immigration allowed to reach any considerable dimension, it would result in a serious disturbance to industrial and economic conditions in portions of the Dominion, and especially in the Province of British Columbia;

That an effective restriction of immigration from India is desirable therefore, not less in the interest of the East Indians themselves, than in the interest of the Canadian people;

That moreover, the whole subject of oriental immigration is one of first concern to Canada, and affecting as it does, the relations of the Dominion with foreign powers, and the relations of our people with fellow British subjects in India, involves considerations of the highest importance, not only to Canada, but to the British Empire as a whole;

That it is desirable that on this important question there should be as complete an interchange of views between the authorities of Great Britain and Canada as may be possible, and that in reference to it there should be a complete understanding between the Governments of the two countries.

Mr. W. L. Mackenzie King, C. M. G., Deputy Minister of Labour, has recently made full enquiry under Royal Commission into the causes by which Oriental labourers have been induced to come to Canada, and as he is familiar with the subject in its many bearings Sir Wilfrid Laurier is of the opinion that by sending him to England to confer with the authorities of the Colonial and India Offices, and such other Departments of the British Government as may be desirable, a more complete and satisfactory understanding of the situation may be reached than would be possible by the necessary limitations of official correspondence.

Sir Wilfrid Laurier, therefore, recommends that Mr. King be commissioned to confer with the British authorities on the subject of immigration from the Orient and the immigration from India in particular and that

for that purpose he proceed to England immediately; also that upon his return to Canada Mr. King report to the Governor General-in-Council the result of his conference with the British authorities.

The committee submit the same for approval.

Mr. King left Ottawa for England on March 5th, and it was understood at the end of March that satisfactory progress in the negotiations had been achieved.

**Chinese Losses at Vancouver.**

On March 7th, Mr. W. L. Mackenzie King, C.M.G., Deputy Minister of Labour, was appointed a Commissioner under The Enquiries Act, chapter 104, R. S. C., 1906, to enquire into the losses sustained by the Chinese population in the city of Vancouver, in the province of British Columbia, on the occasion of the riots in that city in the month of September, 1907.

**BRITISH WELCOME LEAGUE—FIRST ANNUAL REPORT.**

**T**HE first annual report of the British Welcome League\*, of Toronto, Ont., for the year ended February 29th, 1908, was presented on March 24th, 1908. The League was established in March, 1907, and began work about May 1st, its object being to welcome new comers from the British Isles, irrespective of nationality or religion, and to render them, if need be, temporary accommodation and other help and advice. The following is a synopsis of the work done up to December 31st, 1907.

Number of immigrants dealt with.....	6,000
Placed in situations.....	4,000
Beds given (free).....	10,000
Meals provided (free).....	20,000
Men and women signed the temperance pledge at Sunday evening Gospel Temperance Services... 1,450	

Other work done by the League included the holding of semi-weekly social gatherings, men's Bible classes and other religious services on Sundays. During the severe weather in January and February, relief was given to about 5,000 needy people. The treasurer's statement showed total receipts of \$5,359, of which \$2,873.36 was derived from subscriptions, and \$1,000 by grant from the Ontario government. Payments totalled \$4,097.71.

(\* ) For statement with regard to the organization of the League, see *Labour Gazette* for May, 1907, page 1274. See also the *Labour Gazette* for December, 1907, page 629.

### THE WOMENS' WELCOME HOSTEL, TORONTO, ONT.

IN May, 1903, at a meeting of the National Council of Women, held in Toronto, it was decided to form an immigration committee to work in conjunction with the British Women's Emigration Association, for the purpose of securing lodgings and obtaining situations for women and girls coming to this country, especially in the case of domestic servants of which the need for some time past has been pressing throughout Canada. It was decided to secure a suitable house in which to receive women immigrants on arrival, a grant of \$1,000 having been obtained from the legislature of Ontario for its maintenance.

#### Objects of the Hostel.

The hostel was formally incorporated on January 12th, 1906, on which occasion a constitution and by-laws were adopted. The objects of the hostel were defined in the constitution as follows:—

The objects of the Women's Welcome Hostel is the establishment of a Receiving Home or Hostel in the city of Toronto under a Board of Trustees, in which to receive working women of ascertained worthiness, who come to Canada under the auspices of such respectable Emigration Societies as will ascertain and approve of the health, character, capabilities and fitness of the women and girls so sent to Canada, and assist them according to the following plan, that is to say: to provide lodging and board of a more or less temporary character at a minimum cost, to afford them opportunities of obtaining suitable employment, and to enable employers to secure domestic or other help on the payment of a fixed fee, said fee to be devoted to the working expenses, or to further other branches of the work.

The fundamental principles of the Society are to bring worthy working women into contact with worthy employers, and thus, while working out their mutual benefit, to extend to the Motherland and other countries the advantages of Canada, and especially the Province of Ontario, as an excellent field of emigration, and thus thoroughly reach broad patriotic and nationalizing consequences.

The Hostel is to be conducted on purely philanthropic principles, and not for the purpose of profit or gain.

Other provisions of the constitution relate to officers annual meetings, members, special meetings, rules of order, etc.

#### Working Methods.

The house contains eight bedrooms, and is furnished to accommodate 26

permanently or 36 temporarily. A reduction of five per cent. on purchases is allowed by provision merchants. The food provided is plain, but well cooked and nourishing. Free board and lodging is given for *bona fide* immigrants for 24 hours, or if arriving on Saturday night, for 36 hours. No charge is made to the maids, nor are employers asked for a subscription unless they are supplied with a maid. Those who remain longer than the period above stated pay at the rate of 50 cents a day, or from \$2.75 to \$3.00 a week. An endeavour has been made to distribute the maids as widely as possible throughout the province. During the winter months, when arrivals have temporarily ceased, boarders are accommodated at from \$5.00 to \$6.00 a week. The establishment is under strict medical supervision.

#### Number of Immigrants Received.

The hostel was first opened on September 1st, 1905, and some 90 adults and 12 children were received up to the close of the year. All were placed in positions. In 1906, 550 immigrants, of which 410 were domestics, were received. The secretary of the hostel was furnished during 1906 with free transportation to Great Britain by the Ontario and Dominion governments, in the interest of the emigration to Ontario of women for domestic service. During 1907, 642 immigrants were received and distributed, of which 402 were domestics, 97 children and 32 industrial workers.

A grant of \$1,000 was made by the Dominion government to the hostel during 1907, and was expended on repairs to the house, additions to the furniture, etc.

The medical officer of the hostel made 58 inspections during 1907.

The total expenditures of the hostel during the year were \$3,363.14.

**BONUS TO EMPLOYEES AT MERRITON, ONT.**

At the annual meeting of the Lincoln Paper Mills Company, Limited, of Merriton, Ont., held during February, a bonus or gratuity was voted to the employees of the company amounting to six per cent. of their wages.

The gratuity was awarded as a tan-

gible expression of appreciation on the part of the company of the faithful services of its employees, the directors reporting that the greatest amity and good feeling prevails in every department of the company's mills.

The practice was first introduced by the company at the beginning of the present decade, and has been continued each year since.

**FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING MARCH, 1908.**

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals, which have received the signatures of both parties together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

**Department of Public Works.**

EXTENSION to wharf at Chicoutimi, Que.; name of contractor, Thaddée Desbiens, Chicoutimi, Que.; date of contract, January 27, 1908,\* \$52,500.00.

**FAIR WAGES SCHEDULE.**

Trade or Class of Labour.	Rate of Wages Not less than:
Foreman carpenter.....	\$2.25 per day of 10 hours.
Carpenters.....	1.75 " 10 "
Engineman for pile driver..	2.00 " 10 "

Post Office Department.

The following orders for supplies were given, subject to the regulations for the suppression of the sweating system, the securing payment of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of Order.
Making metal dating stamps and type, and making other hand stamps and brass crown seals.....	\$ 624.99
Making and repairing rubber dating stamps and type; also other stamps..	29.48
Supplying stamping material and wooden boxes, and repairing stamping pads.....	498.76
Making post office scales.....	15.00
Supplying mail bags.....	3,915.67
Repairing mail bags.....	1,271.47
Making and repairing mail locks, and supplying mail bag fittings.....	2,539.60
Supplying railway mail clerks tin travelling boxes and repairing portable letter boxes, railway mail clerks' tin travelling boxes and parcel receptacles.....	125.2
Making and repairing miscellaneous articles of postal stores.....	24.20
Making up and supplying articles of official uniform.....	676.50

**INDUSTRIAL ACCIDENTS DURING THE MONTH OF MARCH, 1908.**

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories inspectors of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement or returns of accidents reported to them.

**I**NDUSTRIAL accidents occurring to 265 individual workpeople in Canada during the month of March, 1908, were reported to the Department of Labour. Of these, 87 were fatal and 178 resulted in serious injuries. In addition, 4 fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before March 1, 1908. The number of fatal accidents reported in March, 1908, was 1 less than the previous month and 9 more than in March, 1907.

Of 151 returns received during the month giving the ages of the victims of industrial accidents, 17 referred to persons under twenty-one years of age, 37 to persons between twenty-one and forty-five; 3 to persons over forty-five; 94 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING MARCH, 1908, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed	Injured	Total

<b>Total.....</b>	<b>87</b>	<b>178</b>	<b>265</b>

**Nature of Fatalities and Accidents.**

The chief disasters of the month were, the killing of four railway construction hands and the seriously injuring of three others in a dynamite explosion near Kalamar, Ont.; the death of three workmen in a dynamite explosion near Hawk, Ont.; the killing of three sectionmen in a collision at Kaladar, Ont.; explosions at Hedley, B. C., at Atlin, B. C., and north of Dryden, Ont., causing in each case the death of two workmen; the drowning of two fishermen off the coast of Nova Scotia, and the death by exhaustion and exposure of two others off the Magdalen Islands, Que.

**Explosion Near Kalamar, Ont.**

On the evening of March 7th, an explosion of dynamite occurred at Gordon Bros.' camp on the Grand Trunk Pacific line north of Kalamar, Ont., killing a foreman and three workmen, and seriously injuring three others.

**Explosion Near Hawk, Ont.**

On March 19th, three workmen were engaged in thawing out dynamite at Thompson and Egan's railway construction camp near Hawk, Ont., when an explosion occurred and the three were instantly killed.

**Railway Accident Near Kaladar, Ont.**

On March 18th, three sectionmen were riding on a hand-car, when they were run down by a light engine and all three killed.

**Mining Disaster at Hedley, B. C.**

At Hedley, B. C., on March 18th, two experienced miners at the Nickel Plate mine drilled into a hole containing several sticks of dynamite, and were instantly killed by the explosion which followed.

**Mining Disaster at Spruce Creek, Atlin District, B. C.**

On the evening of March 25th, two miners, while engaged in drifting opera-

tions on a bench claim at Spruce Creek, Atlin district, B. C., were instantly killed by a heavy cave-in of rock and earth.

#### Explosion Near Dryden, Ont.

In a dynamite explosion which occurred on March 25th, at Macdougall's railway construction camp No. 2, north of Dryden, Ont., two workmen were instantly killed and another dangerously wounded.

#### Drowning Accident off Yarmouth, N. S.

On Sunday, March 22nd, a dory containing two fishermen was swamped, and both drowned.

#### Death from Exposure at the Magdalen Islands, Que.

Two fishermen (father and son) while seal hunting on the ice off the Magdalen Islands, drifted out to sea on a floe. They were rescued by a searching party on the morning of March 27th, but died from the results of their exposure soon after being taken ashore.

#### Record by Industries and Trades.

*Agriculture.*—In this industry, 16 lives were lost by accidents and 20 workmen received serious injuries during March, 1908, compared with 11 killed and 15 injured in the preceding month, and 21 killed and 20 injured in March, 1907. Three of the fatalities were due to falling material, three to live stock, 2 to runaways, 2 to being run over, 2 to machinery, and 1 each to being struck by cars, to an explosion, to a fall and to being frozen to death. Of the serious accidents, 4 were due to machinery, 3 each to being run over by vehicles, to live stock and to falls, 2 each to explosions and runaways, and 1 each to flying material, to tools and to exposure.

*Fishing and hunting.*—There were 4 fatalities in this group, 2 being caused by drowning and 2 by exposure. In February there were 2 fatalities and 1 accident, and in March, 1907, none.

*Lumbering.*—Seven workers were killed

and 4 injured during March, compared with 6 killed and 17 injured in the previous month and 10 killed and 11 injured in March, 1907. Four of the deaths were due to falling material and 1 each to tools, to machinery and to being run over. Two of the injuries were due to machinery and 1 each to flying material and to falling material.

*Mining.*—During March, 4 mine workers were killed in accidents and 34 were injured. In February the record was 17 killed and 19 injured, and in March, 1907, 6 killed and 10 injured. Seven of the fatalities were caused by explosions of dynamite, 4 by falling material and 2 each by falls and being run over by vehicles. Eight workmen were injured by explosions, 3 by being struck by cars, and 1 each by being crushed between cars, by falling material, by a fall and by molten metal.

*Building trades.*—There were 2 deaths by accident and 6 minor accidents during March. In the preceding month there was 1 minor accident, and in March, 1907, 1 was killed and 7 injured. One of the fatalities was due to a fall from a building and 1 to being struck by a train. Four of the other accidents were due to falls and 1 each to a fall from a building and to an explosion of gasoline.

*Metal trades.*—The record in these trades during March, 1908, was 4 killed and 34 injured, as against 4 killed and 37 injured in February last, and 9 killed and 41 injured in March a year ago. Two of the deaths were caused by falls and 1 each by electric shock and by falling material. Twelve of the minor injuries were caused by machinery, 9 by falls, 6 by falling material, 2 each by electric shock and by molten metal, and 1 each by tools, by being run over and by flying material.

*Woodworking trades.*—One workman was killed and 19 injured, compared with 1 killed and 6 injured in February, and 8 injured in March, 1907. A carriage worker at Ottawa injured his hand severely and died from an operation thereon. Fourteen of the other accidents were due to machinery, 2 to falling material and 1 each to an elevator, to an explosion and to flying material.

DEPARTMENT OF LABOUR, CANADA  
STATISTICAL TABLE SERIES F., No. 53.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MARCH, 1908.

Trade or Industry.	Locality.	Date.	No. killed	Cause of Fatality.
<i>Agriculture.—</i>				
Farmer.....	Yorkton, Sask.....	Mch. 9	1	Frozen to death.
" .....	Smith's Falls, Ont.....	" 11	1	In a runaway.
" .....	Whonnock, B. C.....	" 4	1	Struck by a train.
" .....	Burgess Tp. Ont.....	" 11	1	Run over by a load of oats.
" .....	Sarnia Tp., Ont.....	" 12	1	Boiler exploded.
" .....	Ronmay Tp., Ont.....	" 13	1	Fell out of a tree.
" .....	Gloucester Tp., Ont.....	" 16	1	Cave in of gravel pit.
" .....	Magog, Que.....	" 16	1	Kicked by a horse.
" .....	Gimli, Man.....	" 16	1	Pile of cordwood fell on him
" .....	St. Arsène, Que.....	" 18	1	Fell on circular saw.
" .....	Markham, Ont.....	" 22	1	Tree fell on him.
" .....	Grenadier Island, Ont.....	" 24	1	Engine fly wheel burst.
" .....	Dartfow, Ont.....	" 25	1	Gored by a bull.
" .....	Percy Tp., Que.....	" 24	1	Gored by a bull.
" .....	Peterborough, Ont.....	" 21	1	Run over by train.
Farmer's wife.....	Westbourne, Man.....	" 22	1	In a runaway
<i>Fishing and hunting.—</i>				
Fishermen.....	Off Yarmouth, N. S.....	" 22	2	Drowned, dory swamped.
" .....	Magdalen Islands, Que.....	" 25	2	Died from exhaustion on ice floes.
<i>Lumbering.—</i>				
Logger.....	Amherst, N. S.....	" 2	1	Tripped and fell on knife.
" .....	Tilsonburg, Ont.....	" 11	1	Tree fell on him.
" .....	Toba Inlet, B. C.....	" 5	1	Tree fell on him.
" .....	Near Roberval, Que.....	" 14	1	Logs rolled on him.
" .....	Montreal River.....	" 25	1	Tree fell on him.
Pulpmill worker.....	St. Catherines, Ont.....	" 8	1	Run over by vehicle.
Sawmill worker.....	St. Honoré, Qué.....	" 18	1	Fell on circular saw

## FATAL ACCIDENTS HAPPENING IN PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN MARCH.

Miner.....	Rossland, B. C.....	Feb. 19	1	Jammed by train against chute.
".....	Crean Hall, Ont.....	" 27	1	While riding to surface on skip.

*Printing trades.*—In March, a pressman had his hand injured in a press; there was one minor accident in the previous month and 1 in March of last year.

*Clothing trades.*—Three workers were more or less injured by machinery, as against 4 injuries in February and 5 in March, 1907.

*Textile trades.*—Five workers were in-

jured by machinery, and 1 by an elevator, compared with 2 minor accidents in February, and none a year ago.

*Food and tobacco preparation.*—In this group there were 1 killed and 5 injured. Last month the record was the same, and in March of last year 2 workmen were killed and 3 injured. A sugar refinery hand at Halifax, N. S., fell into a vat of

boiling water and died from the effects. Two of the accidents were due to falling material and 1 each to a fall, to an elevator and to machinery.

*Leather trades.*—Two workers were injured by machinery during March. There were no accidents in the previous month nor in the corresponding month of 1907.

*Railway service.*—Twenty-six employees were killed and 23 injured during March. In February 24 were killed and 28 injured, and in March, 1907, 20 killed and 30 injured. Of the deaths, 14 were caused by explosions of dynamite, etc., 4 by being run over, 3 by being caught between cars, 3 by being struck by trains and 2 by falling material. Of the injuries, 5 were caused by derailments, 4 each by explosions of dynamite and by collisions, 3 by falls, 2 by being caught between cars, by being struck by cars and by falling material, and 1 by machinery.

*Navigation.*—There were three deaths due to drowning and 6 workmen injured in this group, 4 of these injuries being due to falls and 2 to falling material. In February, 2 were killed and 1 injured, and in March, 1907, 1 was killed and 6 injured.

*General transport.*—A teamster at Edmonton, Alta., fell from his load and was killed. Besides this, 3 workmen were in-

jured by falling material, 3 by falls and 1 by machinery. In the previous month, there were 4 killed and 11 injured, and in March, 1907, 2 killed and 19 injured.

*Civic employees.*—There was 1 death by accident and 2 injured. In February, the record was 7 injured, and in March, 1907, 9 injured. A waterworks superintendent at Ste. Scholastique, Que., fell 65 feet from a windmill and was killed, and two firemen were injured by falls.

*Miscellaneous.*—In this group there were 1 killed and 13 injured. In the preceding month, there were 11 killed and 14 injured, and in March, 1907, 3 killed and 9 injured. A North-West Mounted Police constable was found dead from exposure near Maple Creek, Sask. Of the minor accidents, 3 each were due to machinery and to falling material, 2 each to being run over and to falls, and 1 each to an explosion of gas, to an elevator and to a derrick.

*Unskilled labour.*—Five workers were killed and 12 were injured during March, 1908, compared with 6 killed and 8 injured in the previous month, and 4 killed and 8 injured during March, 1907. Of other accidents, 7 were caused by falling material, 2 by falls and 1 each by being run over, by an explosion and by machinery.

### TRADE DISPUTES DURING THE MONTH OF MARCH.

**T**HERE were few industrial disputes in Canada during the month of March, and only one affected a large number of people. In no case were serious consequences felt by any industry beyond those immediately concerned.

#### Analysis of Trade Disputes During the Month.

*Number and magnitude.*—The total number of trade disputes reported to have been in existence in Canada during March, was 8, a decrease of 2 compared with the previous month, and a decrease of 6 compared with March, 1907. About 11 establishments and 1,532 employees were affected by these disputes, 6 firms and about 1,281 employees having been affected by the strikes which began during the month.

*Loss of time in working days.*—The loss of time to employees through trade disputes during March was approximately 9,950 working days, compared with a loss of 4,730 days in February, and of 11,106 in March, 1907.

*Trades affected by new disputes.*—The following table shows the trades affected by the new disputes of the month, and the number of workpeople involved in each group of trades:—

Trades.	No. of Disputes	No. of Workers.
Printing.....	1	40
Textile trades.....	1	1,200
Miscellaneous trades	1	16
Unskilled labour.....	1	25
Total.....	4	1,281

*Localities affected by new disputes.*—The new disputes of the month occurred in the following provinces of Canada:—

Province.	No. of Disputes.
New Brunswick.....	1
Quebec.....	1
Ontario.....	1
Manitoba.....	1
Total.....	4

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages.....	1
Against increase in hours and decrease in wages.....	1
Against employment of a particular person.....	1
Against discharge of an employee.....	1
Total.....	4

*Methods of settlement.*—Of the 8 disputes in existence during March, settlements were reached in 5 cases, leaving 3 still unsettled at the close of the month. Two disputes were settled by negotiations between the parties concerned, and the others were terminated without any negotiations, some strikers returning to work and the places of others being filled.

*Results of disputes.*—The employers were successful in 4 of the disputes which were terminated, and in 1 a compromise was reached.

**Disputes which Commenced Prior to the Beginning of the Month.**

The trade disputes in existence during March, which began in previous months, comprised strikes of garment workers at Montreal, Que., miners at Goldbrook, N.S., stocking knitters at St. Hyacinthe, Que., and upholsterers at Guelph, Ont. A brief account of these disputes is given below.

**Dispute of Garment Workers at Montreal.**

During the month of February, a dispute occurred between some garment

workers and a contractor working for the wholesale firm of Friedman Bros. The dispute arose because the contractor wished to increase the hours of labour from 54 to 60 per week. The employees also wanted the firm to be responsible for their wages, instead of the contractors. On February 23, the firm closed this shop temporarily, claiming that they were able to dispense with it. No settlement of the matters in dispute was reported, but during March some of the employees returned to work. According to a report received from the employers about 80 workpeople were involved in this dispute, but according to a report received from the Garment Workers' Union, about 140 male and 60 female employees were affected.

**Strike of Gold Miners at Goldbrook, N.S.**

On December 18, 1907, the Great Bras d'Or Gold Mining Company, operating at Goldbrook, N. S., posted up the following notice at its mines:—

On January 1st, 1908, the following scale of wages will go into effect at our mines at Goldbrook, N.S.:

Miners.....	\$1.75
Muckers.....	1.50
Labourers.....	1.25
Engineers, 12 hours.....	2.00
Amalgamators, 12 hours.....	2.25

Board can be had at the Company's cook-house at \$3.00 per week—

The Company had been paying the miners \$2.00 per day, but decided to reduce the wages upon being informed that this rate was 25 cents per day more than the other gold mining companies of Nova Scotia were paying. On January 1, the miners told the manager that they would not work for \$1.75 per day, and it was agreed to continue to pay \$2.00 a day to the men who had worked as miners up to that date, but miners who were employed as such after January 1 would be paid the new scale of wages. On February 20, when the men received their monthly wages, one miner objected to being paid at the rate of only \$1.75 per day. The company claimed that not having worked as a miner before January 1, having been employed previously as a mucker or helper, he was not

\* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned, mention moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

entitled to any more. On February 21, the employees made a written demand that the following schedule of wages go into effect at once.

Miners.....	\$2.00	per day
Helpers.....	1.75	"
Muckers.....	1.50	"

On being told by the manager that this request could not be granted, the men to the number of 22, left the camp, and were paid off the next day. Work was resumed at the mines on March 2, some of the old employees having returned at the \$1.75 rate, while the places of others were filled.

#### **Strike of Stocking Knitters at St. Hyacinthe, Que.**

A strike of stocking knitters which took place at St. Hyacinthe, Que., on February 24, on account of the refusal of the Penman Manufacturing Company to grant a demand for an increase in wages made by 6 female employees was terminated on March 6. All the strikers were taken back by the company as well as one employee who had been discharged for refusing to do the work of one of the strikers. The company also withdrew a demand made upon two employees that they should withdraw from the Textile Workers' Union. The demand for an increase in wages made by the 6 stocking knitters, which precipitated the strike, was not granted by the company.

#### **Strike of Upholsterers at Guelph, Ont.**

No settlement was reported with regard to a strike of 16 upholsterers which took place at Guelph, Ont., on January 10, on account of the refusal of the employees to accept a reduction in wages.

#### **New Disputes.**

The new disputes of the month affected cotton mill hands at Hochelaga, Que., printers at St. John, N. B., paper box makers at Winnipeg, Man., and tunnel workers at Windsor, Ont.

#### **Strike of Cotton Mill Hands at Hochelaga, Que.**

On March 3, a strike of employees of the Dominion Textile Company took place at Hochelaga, Que., in which 2

establishments and about 1,200 employees were involved. The dispute arose on account of members of the Textile Workers' Union refusing to work under an assistant foreman in the weaving room, whose immediate dismissal they demanded. Work was resumed on March 8, the company having agreed to investigate the charges against this employee, provided that they were put in writing.

#### **Strike of Printers at St. John, N.B.**

On March 22, the union printers employed in the office of The Telegraph went on strike, and on the following day they were joined by the printers of the Times newspaper, which is under the same management. The pressmen and assistants ceased work on March 27, and on that day the hands employed in the job room were notified that that portion of the establishment would be closed down until the trouble was settled. The strike arose from the discharge of the president of the Union, whom the management of the Telegraph Publishing Company alleged had been active in agitating for the dismissal of four employees who were in arrears for Union dues. The company had declined the request of the Union to compel these delinquents to pay their arrears. No settlement of the dispute took place during the month, but the newspapers were issued regularly, although the amount of news was somewhat reduced. There were 40 men involved in this dispute including 23 printers, 4 apprentices and 13 pressmen and assistants.

#### **Strike of Paper Box Makers at Winnipeg, Man.**

On March 9, a strike of 14 female employees of the Winnipeg Paper Box Company took place at Winnipeg, the strikers alleging that they went out because they were required to work an extra half hour each day and their wages had been reduced, the reduction amounting to from 50 cents to \$1.50 per week. A few days later they arrived at an amicable arrangement with the management of the company, and returned to work.

### Strike of Tunnel Workers at Windsor, Ont.

During March, about 25 men employed in constructing a tunnel at Windsor, Ont., stopped work on account of the refusal of the contractors to grant an increase in wages to those working under compressed air. The men demanded \$3.00 per day for an eight-hour day, instead of 17½ cents per hour for a ten-hour day. It was reported by the superintendent of the company that all the dissatisfied men left their employ on March 10, the number affected being 25, and that

there was practically no strike, as there were plenty of men ready to work for the price offered by the company. Another report stated that the dispute began on March 6, and that by March 12 the places of all the strikers were filled, about 200 being directly and 300 indirectly affected by the dispute.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of March, and which have been reported to the Department.

## REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during March, 1908.

United States, and about 63,861 tons of building stone\*.

### NOVA SCOTIA REPORTS.

#### Mining Conditions in Nova Scotia.

#### Agriculture—Sheep Raising.

Annual Report of the Secretary of Agriculture for the Province of Nova Scotia. Halifax: King's printer, 1908.

Report of the Department of Mines, Nova Scotia, for the year ended 30th September, 1907. Halifax: King's Printer, 1908. Pages, 180.

The report of the Secretary of Agriculture for Nova Scotia was brought down in the House of Assembly on March 19. It gives an outline of the work done at the Agricultural College, as well as of the advance of farming interests throughout the province. With regard to the facilities for sheep raising in Nova Scotia, Principal Cummings of the Agricultural College says:—

THE report of the Nova Scotia Department of Mines for 1907 shows that the amount of coal sold was 5,046,690 tons, compared with 5,194,590 in 1906. The decrease is largely accounted for by a strike at the Springhill colliery, which lasted for three months, and which reduced the output of the Cumberland Coal and Railway Company by about 125,000 tons. The total gold production in the province exclusive of the gold in antimony ore shipped from West Gore, amounted to 13,687 ounces, valued at \$260,053.00, extracted from 64,657 tons of ore, representing an average return of \$4.02 from each ton of ore mined and milled. Mining operations were carried on in 17 districts at 24 different mines, employing 483 men, exclusive of officials. Including the gold taken from all ores, the production amounted to 15,006 ounces, compared with 14,079 in 1906. The amount of iron ore mined during the year was 48,337 tons. There were 332,345 tons of gypsum quarried, practically all of which was shipped to the

"There are few countries where sheep raising cannot be profitably carried on, but Nova Scotia possesses exceptional advantages. Briefly outlined these are:

(a) The country abounds in hilly, well watered pastures;

(b) The climate is cool and moist, resulting generally in healthy sheep, free from contagious diseases.

(c) The wool produced is considerably superior to that produced in the inland parts of America, and consequently manufacturers are satisfied to pay the highest prices,

(d) The possibilities of raising mutton are excellent; during the greater part of the year the local demand exceeds the supply;

(e) Lands are generally inexpensive, particularly so when compared to France, and

(f) Farmers engaged in this industry report large profits.

There are 160 agricultural societies in the Province, which have qualified for the grant of 1907.

\*See also report of Halifax, N.S., correspondent in present issue.

### Subsidized Railways of Nova Scotia.

Report of the Subsidized Railways and other Public Works in the Province of Nova Scotia for the year ended September 30, 1907. Halifax: King's Printer, 1908. Pages 156.

There are 11 railway companies which come under the Railway Act of Nova Scotia, having a mileage of 631 miles. In addition to these, the Intercolonial Railway operated by the Dominion Government, has a length of 467 miles in the province, and the Dominion Atlantic Railway, which comes under the jurisdiction of the Railway Commission, has a length of 221 miles in Nova Scotia. The returns from the 11 railway companies above mentioned, show that the net profits amounted to about \$15,000, or about \$290 per mile per year. All but two of the railways had very fair profits. The returns of railway accidents show that not a single passenger was killed or injured in Nova Scotia during the year, while among the employees there were 8 killed and 12 injured. Comparing these figures with the returns of railways in the rest of Canada, the total casualties of killed and injured would be nearly twice as great per million carried as on other Canadian roads, but the record is somewhat better when the number of miles of railway is taken as the basis of comparison. It is stated that accidents are often due to the use of intoxicating liquor, and it is suggested that the unions of railway employees would probably do more towards preventing accidents on railways, by making expulsion a penalty for the use of liquor by any member, than by any other regulation.

### QUEBEC REPORT.

#### Industrial Conditions in Quebec.

General report of the Minister of Public Works and Labour of the Province of Quebec, for the year ending 30th June, 1907. Quebec: King's Printer, 1907. Pages 141.

The report of the Minister of Public Works and Labour for the year ending 30th June, 1907, contains two chapters of particular industrial interest, one relating to the work of the Registrar of the Councils of Conciliation and Arbitration for the settlement of trade

disputes, and the other relating to the inspection of industrial establishments.

In his report on trade disputes, the Registrar gives an account of nine cases in which he offered his services for friendly intervention under the Quebec Act. It is stated that with the exception of a strike at Buckingham, all the disputes in which he intervened were settled in a manner satisfactory to all parties.

The Chief Inspector of Industrial Establishments gives a brief summary of the factory legislation passed at the previous session of the Quebec legislature by which the age for the admission of children to factories was raised to fourteen years, and parents were compelled to give their children the elements of education. Attention is called to the serious increase in the number of accidents, the total number reported to have occurred in factories in Montreal, Quebec and the Eastern Townships having been 860, the total number in previous years never having exceeded 500. This increase is attributed to the installation of large factories at St. Henri and Lachine, and the phenomenal development of industry in the western section of Montreal. Many accidents were due to the inexperience of the workmen, and they were especially numerous among large gatherings of unskilled workers.

### ONTARIO REPORTS.

#### Industrial Conditions in Ontario.

█ Eighth report of the Bureau of Labour of the Province of Ontario for the year ending December 31, 1907. Toronto: King's Printer, 1908. Pages, 261.

The report of the Ontario Bureau of Labour for 1907, deals with a large variety of subjects, showing an increase in the work accomplished compared with previous years. A new feature was the establishment of free employment bureaus at Hamilton, on January 12, at Ottawa, on January 18, and at London, on May, 1. Up to the end of the year there were 997 applications for work, 919 being from men. There were 363 applications for male help, and 92 for female help, and there were 287 situations for males filled and 23 for females.

The returns from Municipal Clerks relating to the industrial conditions in their respective localities increased in number and usefulness, 559 having been sent in compared with 227 in the previous year. These returns give in each case the number and cost of new buildings erected, expenditures on permanent improvements and sanitation, and opportunities offered for new industries.

Returns were received from 427 manufacturers, compared with 205 in the previous year. Omitting 43 returns which were incomplete, there were left, 384 establishments employing 35,316 persons, from which full returns were received. In these industries the aggregate number of days in operation during 1906 was 113,434, the manufactured product amounted to the value of \$83,198,546, and the total wages to \$15,869,337. The average wage rate per year, was \$499.43, and per day \$1.52, compared with \$406.69 and \$1.48, in 1905.

Reference is made to the action of the Bureau of Labour in endeavouring to bring about settlements of disputes of telephone operatives, plumbers and machinists at Toronto, and in arranging a fair wage clause for insertion in a contract between the corporation of Toronto and the Polson Iron Works Company. A suggestion is made in the report for the formation of an organization similar to the Civic Federation in the United States, having for its object the promotion of industrial peace and the improvement of the relations between employers and employees.

Many others matters are dealt with in this report, among which may be mentioned tables from the last report of the American Federation of Labour showing by trades the number of charters issued and surrendered, the membership, and the strikes won lost or compromised, Canadian and British labour legislation and legal decisions affecting labour in Ontario.

### Prison Labour.

Report of the Special Committee on Prison Labour, Toronto: King's Printer, 1908. Pages 44.

The special committee appointed by the Ontario Government to investigate

the question of prison labour, has presented its report, in which the whole subject is treated as it affects the Central Prison of Ontario. It is pointed out that the industries of the Central Prison have been operated at a loss to the Province, while at all times they have afforded more or less serious competition to outside enterprises. The industries of the prison are three in number, the woodenware manufacturing, conducted under the contract system, the manufacture of supplies for public institutions, and the cordage mill, operated under the piece price system. It is pointed out that prisoners must be employed at productive work, as enforced idleness causes physical, mental and moral deterioration. An account is given of the system adopted in the penal and reformatory institutions in the United States, which were visited by the committee.

In the conclusion of the report, recommendations are made that the Central Prison be replaced by a Provincial Reformatory, and that the inmates be employed only in the cultivation of the land, the caring of live stock, etc., and the making supplies for public institutions. It is also recommended that the striped suits be abolished, and that a system of technical education be introduced, as well as instruction in elementary subjects, and calisthenic exercises.

### UNITED STATES REPORTS.

#### Free Employment Offices in Massachusetts.

First annual report on the State Free Employment Offices for the fiscal year ending November 30, 1907. Boston: State Printers, 1908. Pages, 55.

The first annual report on the State Free Employment Offices of Massachusetts, contains an account of the formation of this branch of the Bureau of Statistics of Labour, which was established on October 24, 1906. The first office was opened at Boston in December of that year, another was opened at Springfield on September 4, 1908, and a third a month later at Fall River. It is claimed that these employment offices have already fully justified their existence. The re-

turns from the Boston office show that during the year there were 44,910 registrations for employment, 33,696 persons applied for by employers, 44,876 positions offered, and 14,480 positions filled. The last number, representing positions filled was based on reports sent in by the employers or by those who had been placed, and is regarded as being less than the actual number.

## EUROPEAN REPORT.

### Bureaus of Labour Statistics of the Principal Countries.

Die Fortschritte der amtlichen Arbeitsstatistik in den wichtigsten Staaten. Zweiter Teil. Berlin: Germany: Carl Heymanns Verlag 1890. Pages, 284.

The second volume of the report issued by the Imperial Statistical Bureau of Germany, on the Bureaus of Labour Statistics in the principal countries of the world gives an account of these Bureaus in Italy, Spain, the Netherlands, Sweden, Norway, Denmark, Switzerland, Hungary, Russia including Finland, Canada, New Zealand, and Australia. In an appendix the particulars are brought up to date with reference to the labour bureaus and departments dealt within the first volume in the countries of the United States of America, Great Britain and Ireland, France, Belgium, Austria and Germany.

### OTHERS REPORTS RECEIVED.

*Canada.*—Report of the Department of Trade and Commerce for the fiscal year (nine months) ended March 31, 1907. Part II Trade of Foreign Countries and Treaties and Conventions.

Report of the Militia Council for the Dominion of Canada for the three months ending March 31, 1907.

Supplement to the Fortieth Annual report of the Department of Marine and

Fisheries for the fiscal year, 1907. Steamboat Inspection report.

Supplement to the report of Department of Trade and Commerce for the fiscal year ended March 31, 1907, with statistics showing steamship traffic to December 31, 1907, and estimates for fiscal year, 1908-09.

*Nova Scotia.*—Annual report of the Superintendent of Education of the Public Schools of Nova Scotia for the year ended 31st July, 1907.

*Ontario.*—Thirty-third annual report of the Ontario Agricultural College and Experimental Farm, 1907.

Twenty-ninth annual report of the Ontario Agricultural and Experimental Union, 1907.

Estimates of the Province of Ontario for the year ending 31st December, 1908.

Public accounts of the Province of Ontario for the year ended 31st December, 1907.

*Saskatchewan.*—Reports of the Department of Public Works for the four months ended December 31, 1905, and the fourteen months ended February 28 1907.

*Italy.*—Salari ed Orari nei Lavori Edelizi, Stradali, Idraulici ed Bonifica (Anno 1906.)

## RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

### SUPREME COURT CASE.

IN connection with the case noted at page 863 of the January number of the *Labour Gazette*, the Privy Council has granted to the Grand Trunk Railway Company special leave to appeal from the judgment of the Supreme Court of Canada affirming the decision of the Board of Railway Commissioners that the Company is bound by the terms of its charter to run at least one passenger train per day, each way between Montreal and Toronto, charging a third-class fare at one penny a mile.

(Grand Trunk Railway Co. v. Robertson; 12th March, 1908; Privy Council.

### NOVA SCOTIA CASE.

#### Verdict of Jury in Fatal Accident.

An inquest was held to determine the cause of the deaths of Malcolm Stewart and John Dorsay, underground managers, who were killed at No. 1 colliery of the Nova Scotia Steel & Coal Company on the 13th of February. The accident occurred about seven o'clock in the morning, when the men got into the cage to go down into the mine. No sooner had they entered the cage, than through some defect in the appliances, a hook which connected a strong wire rope to the cage broke, and the cage fell some 700 feet to the bottom of the shaft, killing both men instantly. The Coroner's jury returned the following verdict:—

"That Malcolm Stewart and John Dorsay came to their deaths on the morning of the 13th of February, between the hours of 7 and 8.

First.—That the accident was caused by Engineer John Egan being mistaken in the signals, due to the similarity of the sounds of the rappers in the engine room, which caused him to mistake the bottom rapper for the top one.

Second.—That the Walker hook failed to act, it breaking because of a defective hawse pipe.

Third.—Owing to the chains failing to perform the work required of them.

The accident occurred in the main shaft of No. 1 colliery of the Nova Scotia Steel & Coal Company, at Sydney Mines. The jury recommends: First, that the practice of rapping back of the cage in motion be discontinued, this accident proving the practice to be dangerous. Second, that the gong be substituted for one of the rappers in the engine room."

(Inquest re Stewart and Dorsay; 22nd February, 1908.)

### QUEBEC CASES.

#### Death Due to Accident.

The husband of plaintiff arrived at Algoma Mills, Ontario, on the evening of the 30th September, 1903, and engaged with defendants to unload coal on the wharves. He worked at night. Towards one o'clock in the morning, he had need to go to a small building situated at the end of the wharf. As it was very dark, he asked for a torch from the watchman, which was refused. He, nevertheless, started to go to the place which he wished to reach, but fell into the water and was drowned. Plaintiff brought suit, claiming \$5,000 damages for herself and her three children. The trial judge, however, found that the evidence failed to establish any fault on the part of defendants, and that the death of plaintiff's husband was an accident. In consequence, the action was dismissed.

(Grammarina v. C. P. R.; 21st February, 1908; Curran, J.)

#### Accident due to Imprudence.

Plaintiff sued defendants to recover \$2,120 damages for injuries sustained by him while in the employment of defendants, owing, as he alleged, to the negligence of the latter. The trial judge has given judgment dismissing the action, holding that the accident was due entirely to the imprudence and negligence of the plaintiff.

(Bernier v. McLean, Kennedy & Co.; 9th March, 1908; Mathieu, J.)

#### School Teacher's Action Dismissed.

Plaintiff, a school teacher, brought suit in the Superior Court at Montreal to recover the sum of \$175 as damages for

wrongful dismissal by defendants. Of the sum sought to be recovered, \$100 was for balance of salary, and the balance for fuel and cost of lodging. She alleged that she had been hired for a year from the 26th June, 1906, and on the 11th February, 1907, had been wrongfully dismissed by defendants. By way of defence, it was set up that plaintiff had been insubordinate and had refused to submit to the orders of her employers. The trial judge found that the defence was well founded and held that defendants were justified in dismissing the plaintiff. The action was in consequence dismissed.

(Guay v. School Commissioners of St. Pierre aux Liens; 11th March, 1908; Loranger, J.)

### Damages for Injuries.

Plaintiff, an Italian labourer in the employ of the defendants, sued the latter in the Superior Court at Montreal to recover damages for injuries sustained in the course of his employment, which he estimated at the sum of \$1,500. Plaintiff was working for defendants in their shops at Point St. Charles in December, 1906, and while on his way to get a drink of water was blinded by escaping steam and tumbled into an excavation over the valve from which the steam was escaping, injuring his ear and scalding his legs. In support of his claim, plaintiff alleged that defendants had been negligent in so placing an excavation and allowing steam to escape where the men had to pass on their way to quench their thirst. The jury, after a trial lasting several days, arrived at the conclusion that the accident was due to the combined fault of the defendants and plaintiff, the latter in passing through the steam, knowing there was danger, and the former in placing an excavation where the men had to pass. They estimated the damage sustained by plaintiff—deduction being made for contributory negligence—at \$850, for which sum judgment was entered for plaintiff.

(Verazza v. G. T. R.; 12th March, 1908; Saint-Pierre, J.)

### Damage Action Settled in Course of Trial.

On the 5th January, 1907, plaintiff's husband was working in the employ of

defendants at Chambly. He was engaged in trying to extricate a plank caught in a sluice box, when one of the planks of the platform on which he was standing canted, with the result that he fell into the river and was drowned. Plaintiff brought action to recover \$6,000 as damages for herself and two minor children, claiming that the accident was caused by the fault of defendants in not providing a safe platform for the men to work on. Defendants claimed that the accident was due entirely to deceased's own carelessness. After the hearing of the case for two days before a jury, a settlement was arrived at by which it is understood plaintiff will receive an indemnity of \$2,000.

(Berard v. Montreal L., H. & P. Co.; 16th March, 1908; St. Pierre, J.)

### Cabman Awarded Damages for Removal From Stand.

For some years past Jacques Cartier Square in the City of Montreal has been used both as a public market place and a cab stand. On heavy market days the custom has been to have the cabs removed to the square between the City Hall and the Court House on the North side of Notre-Dame Street, during the busy hours of the morning. From time to time the cabmen complained of this, alleging that the continual removing caused them not only considerable inconvenience, but actual loss. Finally plaintiff, one of the cabmen, entered an action in the Superior Court against the city, claiming \$199 damages. His declaration set forth that he was a duly licensed cabman, having paid the special tax required by the city to carry on his business on the Jacques Cartier Square stand. That on Tuesdays and Fridays, the action of the city's officers in disturbing him from his stand had deprived him of the advantage of telephone calls, and caused him loss and damage to the extent of the amount claimed. The conclusions of the declaration were that the city had no right to act as it did and it should be ordered to pay the damages sustained. The city pleaded that it was justified

in disturbing the cabmen from their stand for the general advantage of the public. In rendering judgment after the trial the presiding Judge held that the action was well taken and while the city has the right to remove cabmen from their stand for the better enabling repairs to be made to the streets and sewers, or for any other public work, it cannot habitually deprive them of the privilege for which they pay, especially for the special advantage of another class of people, the farmers. The Court maintained the principle invoked by the plaintiff, but the amount of damage suffered being difficult to establish, judgment was rendered in favour of plaintiff for \$25.

(Masse v. City of Montreal; 17th March, 1908; Lafontaine, J.)

#### Damages for Crushed Fingers.

Plaintiff brought action against defendants claiming \$780 damages for personal injuries sustained by him while in the employ of defendants, owing as alleged to the negligence of the latter. Plaintiff alleged that defendants had exposed him to danger in making him perform work of which he knew nothing; his ordinary work was the shifting of car wheels, while defendants had on the 31st of May, 1906, set him to work in connection with an automatic hammer by which he had three of his fingers crushed. The Court held the defendants at fault and awarded plaintiff \$300 damages.

(Boisvert v. Canada Car Co.; 23rd March, 1908; Curran, J.)

#### Custom of Port not Law.

Thirty-two longshoremen and two foremen sought in the Circuit Court at Montreal to recover \$28 each from P. W. Ferns, a stevedore. According to the evidence two gangs of sixteen men each, together with a foreman for each gang, were put to work on the Dominion liner "Englishman," on two different hatches. It was desired to shift them to suit the working of the ship, but the men objected to the change claiming that the

rule of the Union provided that when a gang started on a hatch they should finish it, whether the full complement of sixteen was needed or not. The secretary stated that this was the custom of the Port. In giving judgment the presiding Judge held that the rule of the Union and the alleged custom could not constitute law. The men were engaged by the hour, and could be either dismissed or leave without notice, and it was the right of the employers to direct their work. The action was therefore dismissed.

(24th March, 1908; Lebeuf, J.)

#### ONTARIO CASES.

##### Damages for Loss of Thumb and Fingers.

Plaintiff, who was in the employ of defendants, in the course of his employment had three fingers and a thumb cut off from his right hand in a buzz planer, and brought suit to recover \$1,500 damages, charging negligence against defendants. A jury brought in a verdict in plaintiff's favour for \$800, finding that the planer was not a proper machine to do the work in which plaintiff was engaged, that the knives were not properly protected, and that defendants were guilty of negligence. Judgment was reserved on a motion to enter a non-suit on a legal point raised by defendants.

(Munro v. Roman Stone Co.; 6th February, 1908; Mabee, J.)

##### Illegal Contract Under Alien Labour Act.

Plaintiff sued defendants for \$54, claimed to be due for three weeks' wages. Plaintiff, in giving his evidence, claimed that he had been engaged in New York by defendants for a year at \$18 a week; that he was brought to Canada, and when he had worked for defendants for a short time, he was dismissed. Defendants, while not admitting the truth of plaintiff's story as to the hiring in New York, but denying it, raised the point that accepting plaintiff's story as true, the contract under which he was suing was void under the Alien Labour Act. After some

parleying, in the course of which defendants' counsel stated that they had offered plaintiff \$30, which he had refused to accept, hoping to get half the fine to be inflicted in a prosecution which he intended to bring against defendants in the Police Court for a breach of the Act, the case was eventually settled by plaintiff accepting the \$30 offered.

(*Glaistal v. Consolidated Cloak Co.*; 8th February, 1908 Morson, J.)

### Damages Awarded to Brakeman.

An action brought by Henry Cox, a brakeman in the employ of the defendants, to recover damages for injuries sustained by him in the course of his employment, owing, as alleged, to the negligence of defendants, came on for trial at the Toronto Assizes recently, when, at the suggestion of the presiding judge, a settlement was reached under which plaintiff received \$250 and costs. The accident in which the injury was sustained occurred through the breaking of a coupling, which caused plaintiff, who was standing on the running board of the tender, to be crushed.

(*Cox v. C. P. R.*; 20th February, 1908; Falconbridge, C. J.)

### Appeal in Damage Action by Railway Mail Clerk Allowed.

Action by plaintiff, a mail clerk, to recover damages for injuries sustained by him on the line of defendants' railway west of Fort William, on 6th January, 1907. The accident happened owing to the train leaving the tracks because of a broken rail. At the trial, the jury, in answer to questions submitted to them, found the defendants guilty of negligence, consisting in drawing a first-class train with a heavy freight engine at an excessive rate of speed on a curve, and that the breaking of the rail, which caused the train to leave the track, was itself caused by the force of the impact of the heavy engine travelling at an excessive rate of speed. The presiding judge, Clute, J., entered judgment for plaintiff on the verdict. An appeal by defendants from this verdict and judgment has been

allowed and the action dismissed, the majority of the Court holding that there was no evidence proper to be submitted to the jury in support of the plaintiff's claim based upon this allegation of negligence.

(*Ferguson v. C. P. R.*; 24th February, 1908; Divisional Court.)

### New Trial Ordered in Damage Suit.

Plaintiff, a labourer in defendants' employment, was injured in his left hand by a knife falling against it on the 20th May, 1907, by which he was incapacitated from work for a length of time, and brought action in the County Court at Hamilton, claiming \$200 damages. The action came on for trial on 14th December, 1907, when the judge entered judgment of nonsuit against the plaintiff, dismissing his action without costs. From that judgment plaintiff appealed, with the result that it has been allowed and a new trial ordered.

(*Porter v. International Harvester Co.*; 25th February, 1908; Divisional Court.)

### Railway Employees Acquitted.

In connection with the case noted at page 614 of the November number of the *Labour Gazette*, George H. Wilkinson, a C. P. R. train despatcher of Toronto, was put upon trial at the recent Whitby Assizes on a charge of criminal negligence. Wilkinson was charged with neglect of duty in not notifying the agent at Myrtle that two freight trains would meet there. Rule 205A of the Company provides that the despatcher shall notify the meeting point, where practicable, without delay to trains. Counsel for the accused contended that under the indictment it must be shown that he was directly responsible for the accident, and he showed that had the trainmen obeyed orders, the accident would have been averted. It was also shown that the accused had tried to notify Myrtle, but had failed to get a response to his call. The jury acquitted the prisoner.

(*Rex v. Wilkinson*; 2nd March, 1908; Mulock, C. J.)

At the same Assizes, Hugh Kyle, engineer on the C. P. R. freight train which caused the wreck, was tried upon a like charge. It was contended on his behalf that the despatcher should have notified Myrtle, and that the stop signal should have been set. It was also sought to show that when the engineer had slowed down, he saw a train on the siding, signalled it, and got a reply: that he also got a "high ball," or go-ahead signal, from the conductor at the rear of the train. The jury acquitted the prisoner.

(Rex v. Kyle; 3rd March, 1908; Mulock, C. J.)

### Consent Judgment in Damage Action.

William Walter Tate was a conductor on a Yonge street car of the Toronto Railway Company, and in February, 1907, was killed at the corner of College and Yonge streets by a southbound Avenue Road car. His widow brought suit on behalf of herself and two infant children to recover \$10,000 damages. On the case coming on for trial, judgment was entered by consent for \$1,500.

(Tate v. Toronto Railway Co.; 3rd March, 1908.)

At the same Assizes, an action brought by the widow of a sectionman killed at Paris by the explosion of a torpedo on the line of defendants' railway, was compromised at \$400.

(Warning v. G. T. R.; 19th March, 1908; Falconbridge, C. J.)

### Nightwatchmen's Suspension Illegal.

Early in September, 1907, two of the four members of the Police Committee of the Thorold Town Council suspended Nightwatchman Reuter, who, however, refused to acknowledge his suspension, and continued on duty till the first of this year, when the new council dismissed him. Reuter sued the town for four and a half months' salary, \$90, and was given judgment for that sum and costs.

(Reuter v. Town of Thorold; 6th March, 1908; Wells, Co. J.)

### Damage Action Dismissed.

Plaintiff sued defendant to recover \$2,000 damages for injuries sustained by

him owing, as alleged, to the negligence of defendant. Plaintiff alleged that while employed on the erection of a house on Boswell Avenue, in the city of Toronto, owned by defendant, he stepped on a joist in the attic which had been cut through the centre, with the result that he fell quite a distance. He claimed that the foreman in charge of the work was negligent. Defendant claimed that plaintiff himself did the cutting of the joist that gave way under him, and so was responsible for his own injury. The jury found a verdict for defendant, and the action was dismissed.

(Carson v. Smith; 12th March, 1908; Magee, J.)

### Wages run on while Workmen is waiting for Material.

An important decision has been given by the Police Magistrate at Ottawa in a wages case brought by a workman against a contractor. The magistrate ruled that the man should be paid for hours he had not been able to work owing to non-arrival of material, defective machinery or other reasons of a like nature. In other words, men must receive work or be paid for the time they are under contract, even by the day or hour.

(19th March, 1908; O'Keefe, P. M.)

### Damage Action Settled.

At the Brantford Assizes recently, an action brought by plaintiff to recover damages for injuries sustained by him in the employ of defendants, such injuries resulting from the falling of some iron upon him, which necessitated the amputation of his leg, was settled by the payment of \$1,200 to plaintiff.

(Harris v. Waterous Engine Works Co.; 19th March, 1908; Falconbridge, C. J.)

### Verdicts in Damage Action.

Henry and Sarah Burd were awarded \$800 damages against the defendants for the loss of a son, killed by a locomotive.

(Burd v. Empire Limestone Co.; 10th March, 1908; Welland Assizes, Britton, J.)

At the same Assizes, the parents of James H. Parker, a brakeman, killed at Niagara Falls, were awarded \$2,500 damages against defendants.

<sup>¶</sup> Parker v. Michigan Central Railway; 10th March, 1908; Britton, J.)

### Damages for Loss of Hand and Part of Arm.

At the recent Cobourg Assizes, an action was tried in which the plaintiff, a workman in the employ of the defendants, sought to recover damages for injuries sustained by him in the course of his employment, owing, as alleged, to the negligence of the defendants. Plaintiff was working at a machine in the defendants' factory, when his hand was caught in the machine, with the result that he lost the hand and part of his arm. He claimed that the defendants were guilty of negligence in not having the machine properly guarded. The jury brought in a verdict in favour of plaintiff with \$4,500 damages.

(Bagnall v. Durham Rubber Co., 21st March, 1908.)

### Coroner's Jury Finds Yardman Negligent.

An inquest was held to determine the cause of the death of Charles Armstrong, an engineer in the service of the C. P. R., who was killed at Guelph Junction on the morning of 11th March, while driving his engine hauling a special passenger train from Toronto to London. Owing to a misplaced switch in the yards at the Junction, his engine ran into another engine standing on a siding, with the result that he was instantly killed. The Coroner's jury returned a verdict blaming Richard Newton, yardman, for negligence. Newton gave evidence acknowledging that he had made a mistake and turned the wrong switch, thus causing the fatality. He was bound over to appear on a charge of criminal negligence.

(Inquest re Armstrong; 21st March, 1908.)

### Apology Accepted in Slander Action.

At the Toronto Assizes recently, an action brought by plaintiff, the business agent of the Bartenders' Union, against

defendant, the proprietor of an hotel at the corner of Queen street and Beaconsfield avenue, to recover \$3,000 damages for slander, came on for trial. On the case being called on for trial, counsel for defendant stated that his client had never said anything reflecting on plaintiff's honesty, and if anything were said, it would be cheerfully withdrawn, whereupon counsel for plaintiff rose and said that his client was willing to accept that apology, and he asked the Court to dismiss the action, which was readily done.

(O'Leary v. Clancy; 13th March, 1908; Magee, J.)

### Motorman Guilty of Criminal Negligence.

At the General Sessions of the peace held at Toronto recently, Gilbert Nelson, a motorman in the employ of the Toronto Railway Company, was found guilty on a charge of criminal negligence. The charge arose out of an accident which occurred on King Street West at midnight on 10th October, 1907. Nelson was in charge of a street car which collided at the corner of King and Bay Streets with a carriage driven by a man named John Goodhall, who received fatal injuries. The Coroner's jury censured the motorman in their verdict, hence the prosecution. The jury at the Sessions while finding Nelson guilty made a strong recommendation for mercy, and he was allowed to go on his own bail to appear for sentence at the close of the Sessions.

(Rex. v. Nelson; 23rd March, 1908; Winchester, Co. J.)

### Damage Action Settled.

An action brought by the widow of George Renton, a travelling engineer on the Grand Trunk Railway, who was killed in a collision in the London yards in February, 1907, came on for trial at the recent London Assizes but was settled by the defendants agreeing to pay the plaintiff the sum of \$5,000.

(Renton v. G. T. R.; 23rd March, 1907; Riddell, J.)

### Appeal in Damage Suit Dismissed.

In the case noted at page 617 of the November of the *Labour Gazette*, an ap-

peal taken by the defendants from the verdict and judgment at the trial has been dismissed. The action was brought at common law and under the Workmen's Compensation Act. The jury found that there was a defect in the condition of the machine, viz: that the springs were too weak to act quick enough and the rings were worn; that the defect arose from the negligence of defendants or some person entrusted by them with the duty of seeing that the condition and arrangement were proper; that the existence of the defect was known before the accident; that it remained unremedied owing to the negligence of defendants; that plaintiff was guilty of no negligence which caused or contributed to the accident nor did he voluntarily incur the risk. Defendants contended that there was no evidence to go to the jury of any defect in the machine, or any negligence on their part, and that evidence of the working of the machine subsequent to the accident was improperly admitted.

(Green v. Kilgour Brothers; 24th March, 1908; Court of Appeal.)

## MANITOBA CASES.

### Cases of Violation of Lord's Day Act Dismissed.

In the Police Court at Winnipeg recently, an information for a violation of the Lord's Day Act by moving cars in the yards on Sunday, February 2nd, came on for trial, the alleged offenders being the Canadian Pacific Railway Company. The evidence went to show that the work complained of was the removing of cars containing perishable goods to their destination. In dismissing the case, the Police Magistrate stated that he considered the work which was being done to be necessary work. Goods which might have perished, had they been left in the cars over Sunday, were removed for the public's benefit, and he did not consider this a breach of the Act.

(Rex v. C. P. R.; 2nd March, 1908; Daly, P. M.)

### Prosecution of Winnipeg Grain Exchange for Restraint of Trade.

Proceedings were instituted some time ago against J. C. Gage (who kept the books of the North West Grain Dealers' Association, and represented the elevator interests during the time that their pooling arrangements were in force), J. McHugh, and John Love, President of the Grain Exchange, charging them with conspiracy to restrain trade and combining to lessen competition in the grain business. At the trial the charges were dismissed, and an appeal was taken by the Crown to the Court of Appeal. After a lengthy hearing, the appeal was dismissed, upon the ground that business regulations, while restraining trade to an extent, could not be considered as a conspiracy under the law. The case involved a consideration of the rules and regulations of the Grain Exchange, designed, not to restrain trade, but to systematize the business of handling and dealing in grain.

(Rex v. Gage, et al.; 29th February, 1908; Court of Appeal.)

## ALBERTA CASE.

### Conviction under the Lord's Day Act.

A fine of \$200 and costs was imposed on the Canadian Pacific Railway Company for working Operator Mullen on Sunday, 15th December, 1907, without allowing him 24 hours rest during the next six days of the week, contrary to the provisions of section 6 of the Lord's Day Act, which reads as follows:—

"6. Except in cases of emergency, it shall not be lawful for any person to require any employee engaged in any work of receiving, transmitting or delivering telegraph or telephone messages, or in the work of any industrial process, or in connection with transportation, to do on the Lord's Day the usual work of his ordinary calling, unless such employee is allowed, during the next six days of such week, twenty-four consecutive hours without labour.

2. This section shall not apply to any employee engaged in the work of any industrial process in which the regular day's labour of such employee is not of more than eight hours duration."

(Rex v. C. P. R.; Macleod, 12th March, 1908; Stearns & George, J. J. P.)

## BRITISH COLUMBIA CASES.

**[Damages for Malicious Prosecution.]**

Plaintiff sued for malicious prosecution by reason of an information laid by a member of the defendant firm, charging plaintiff with the theft of \$38 from defendants while employed by them as a driver. In the Police Court, the charge was dismissed. After the trial plaintiff was awarded the sum of \$534 damages, of which \$34 was special damage and the balance as exemplary damages. In giving judgment, the trial judge remarked that because "plaintiff's arrest had been conspicuously published, and defendants had refused to apologize or make retraction of their allegations, the sum of \$500 may be some solatium to the plaintiff and have the effect of impressing on the defendants and the public that the law may not be so mercilessly set in motion."

(Judd v. Hanbury & Co.; 7th March, 1908; Morrison,

**The Natal Act and Hindus.\***

On March 10th, eighteen Hindus were found guilty of an offence against the Act by the Police Magistrate at Vancouver, in attempting to enter the Province without being able to pass the educational test prescribed by the Act, and were each sentenced to pay a fine of \$500, or in default of payment to 12 months' imprisonment. Habeas Corpus proceedings were taken on behalf of the prisoners, and after argument of the matter, the presiding judge held that the Provincial Act was repugnant to the Dominion Immigration Act, and in that sense ultra vires of the Provincial Legislature, and the conviction illegal. The prisoners were therefore ordered to be discharged.

(Rex v. Eighteen Hindus; 13th March, 1908; Morrison, J.)

The text of the judgment of Mr. Justice Morrison is as follows: "The prisoners, on whose behalf the application

is made for a writ of Habeas Corpus, arrived in the port of Vancouver some days ago and were examined by Dr. Monro, the Dominion Immigration Agent, who was satisfied that they had complied with the requirements of the Dominion Immigration Act and granted them permission to land pursuant to section 17 thereof, which is as follows: 'The master of any vessel shall not permit any passenger to leave the vessel until written permission from the immigration agent to allow his passengers to land has been given the master.'

2. The immigration agent at the port of entry, after satisfying himself that the requirements of this Act and of any order-in-council, proclamation or regulation made thereunder have been carried out, shall grant permission to the master of the vessel to allow the passengers to 'leave the vessel.'

Immediately upon their landing, the provincial authorities caused their detention, and they were subjected to the test set out in the British Columbia Immigration Act, 1908, which test they failed to stand, and they were accordingly charged with an infraction of this Act, convicted and sentenced to the limit provided. The ground relied upon in this application for their release is that the British Columbia Immigration Act, 1908, is ultra vires of the Legislature. I agree with this contention. Section 95 of the B. N. A. Act, enacts: 'In each Province the Legislature may make laws in relation to Agriculture in the Province, and to Immigration into the Province; and it is hereby declared that the Parliament of Canada may from time to time make laws in relation to Agriculture in all or any of the Provinces, and to Immigration into all or any of the Provinces; and any law of the Legislature of a Province relative to Agriculture or to Immigration shall have effect in and for the Province as long and as far only as it is not repugnant to any Act of the Parliament of Canada.'

The Parliament of Canada, pursuant to the power contained in that section, passed chapter 93 of the Revised Statutes of Canada, 1906, and the amending Act

(\*) For statement re application of the Act to Japanese, see *Labour Gazette* for March, 1908, p. 1163. For review of provisions of the Act see article elsewhere in present issue dealing with British Columbia legislation affecting labour, 1908.

of 1907, known as the Immigration Act, applicable to the whole of Canada. By sections 26 to 29 inclusive, certain classes of immigrants are excluded in terms. The federal legislation thus occupies "the field," as to those. Then by section 30, which enacts: 'The Governor-in-Council may, by proclamation or order, whenever he considers it necessary or expedient, prohibit the landing in Canada of any specified class of immigrants, of which due notice shall be given to the transportation companies.

2. The Governor-in-Council may make such regulations as are necessary to prohibit the entry into Canada of any greater number of persons from any foreign country than the laws of such country permit to emigrate to Canada.'

The remainder of "the field" is thus, as it were, pre-empted, showing, in my opinion, that the Parliament of Canada intended to deal exclusively with the question of immigration into Canada. But whereas the sections above referred to, point out the classes of immigrants who may not enter Canada, section 17 supra and sections 35 and 53, to my mind, clearly give a right in terms to land to immigrants such as the prisoners. If that be so, then the Dominion Act is met at once by the Provincial Act, by section 7 of which 'Any person who, or corporation which, shall in any way assist any immigrant to contravene the provisions of this Act shall be deemed to have contravened this Act and shall be liable to the penalties imposed by section 5 of this Act upon any such immigrant.'

The Privy Council last year laid down two propositions in the case of the Grand Trunk Railway Company vs. Attorney-General of Canada (1907) A. C., at page 68, viz., 'First, that there can be a domain in which Provincial and Dominion legislation overlap, in which case neither legislation will be ultra vires, if the field is clear; and secondly, that if the field is not clear, and in such domain the two legislations meet, then the Dominion Legislation must prevail.' These propositions were adopted by Lord Collins in delivering the judgment in the case of Toronto vs. C. P. R. (1908) A. C., p. 54.

This last case goes very far indeed, for the power to legislate there was inferential only, whereas in the present instance, section 95 supra gives the Dominion the power in terms, and in terms enacts that in a domain where the two legislations meet and the field is not clear, the Dominion legislation must prevail. I do not think that those two Acts can stand together. They meet emphatically and therefore the Dominion Act must prevail."

#### **Dominion Order-in-Council Invalid.**

Under the Dominion Order-in-Council of 8th January, 1908, 150 Hindus were held for deportation by the Dominion Immigration officials at Vancouver, because they had not come directly by continuous passage from the land of their birth. Habeas Corpus proceedings were taken in the Courts on their behalf looking to their discharge, which have resulted in their being freed from custody. The presiding Judge proceeded upon the ground that the Order-in-Council was invalid by reason of the fact that it delegated to the Minister of the Interior powers which the Immigration Act confers on the Governor-in-Council only. His Lordship stated that he had conferred with his brother Judges upon the question and they all agreed with him in his view of the matter. In giving judgment the learned Judge said in part:—"The Governor-in-Council cannot delegate his powers in immigration matters to any Minister or official even though that official, as in this case, is the Minister of the Interior. The discretion as to what immigrants shall be admitted or refused admission must be exercised by the Governor-General-in-Council solely, as I read the Act."

(Vancouver, 24th March, 1908; Clement, J.)

#### **ENGLISH CASES.**

##### **Right of Husband to Savings of Wife Out of Allowance for Maintenance.**

A husband, an engine-driver, who was living with his wife in England, went to

South Africa in search of employment, and having obtained work there, remained away for over three years. During that time he remitted to his wife each fortnight a sum of money, part of which she spent upon the maintenance of herself and children and part she saved and deposited in the Post Office Savings Bank in her own name. No condition was attached by the husband when he made the remittances. The husband on his return from South Africa lived with his wife, but subsequently they separated. The husband claimed the amount of the savings in the Post Office Savings Bank, and the Court held, reversing the judgment of the County Court Judge, that the money belonged to him.

(*Birkett v. Birkett*; 30th January, 1908; Divisional Court.)

### Restraint of Trade.

The defendant was employed by the plaintiff company as their manager and secretary, under an agreement which provided that he should hold office subject to termination at 12 months' notice in writing given by either party, and that he should not, whilst in the engagement or within two years after his engagement, with the company terminated, commence the same or a similar business or accept a situation as manager or assistant to any person or company in a similar business to the plaintiff company within a radius of 50 miles from the registered office of the company, unless he received written permission to do so. The defendant was dismissed without notice, and brought an action for wrongful dismissal, in which he recovered judgment. Within two years after his dismissal, he commenced to carry on a business similar to that of the plaintiffs' within the prescribed distance of 50 miles. The plaintiffs then brought an action against the defendant upon the stipulation in the agreement not to carry on a similar business. The Court held that, as the plaintiffs, by wrongfully dismissing the defendant, had repudiated the contract of employ-

ment, and that repudiation had been accepted by the defendant, the contract was completely determined, and the plaintiffs could not sue upon the stipulation in the contract.

(*General Billposting Co., Ltd., v. Atkinson*; 1st February, 1908; Court of Appeal.)

### Introduction of Diseased Aliens in Canada.

In connection with the case noted at page 874 of the January number of the *Labour Gazette*, Samuel Davies, cook, and Albert Korff, steward, have been sentenced to six months' imprisonment in connection with an attempt to introduce diseased aliens into Canada, last August, by the Canadian Pacific Railway Steamship line.

(*Rex v. Davies et al.*; Liverpool, 7th March, 1908.)

### Method of Estimating Remuneration.

The captain of a coasting steamer was paid £216 a year, and he was provided by the owners with his food while on board, and allowances for washing. Except for a few days holiday in each year, he lived on board for the whole year. He was killed by an accident arising out of, and in the course of his employment. In proceedings by his widow for the assessment of compensation under the Workmen's Compensation Act, 1906, the County Court Judge, in ascertaining whether the deceased's remuneration exceeded £250 a year, said that the test was, what did the deceased save by his allowance of food, and upon that footing he came to the conclusion that the allowance of food did not bring his remuneration up to a sum exceeding £250, and that therefore he was a "workman" within the definition in s. 13 of the Act, and that his widow was entitled to compensation under the Act. Upon appeal by defendants, the Court held that the proper test was, what was the actual value to the deceased of the reasonable board and allowances provided for him by the owners; that the

County Court Judge had taken the wrong test, and that the case must be remitted to him.

The section of the Act referred to reads as follows:—

“ ‘Workman’ does not include any person employed otherwise than by way of manual labour whose remuneration exceeds two hundred and fifty pounds a year, or a person whose employment is of a casual nature, and who is employed otherwise than for the purposes of the employer’s trade or business, or a member of a police force, or an outworker, or a member of the employer’s family dwelling in his house, but, save as aforesaid, means any person who has entered into or works under a contract of service or apprenticeship with an employer, whether by way of manual labour, clerical work, or otherwise, and whether the contract is expressed or implied, is oral or in writing.”

(Dothie v. MacAndrew & Co.; 12 February, 1908; Court of Appeal.)

### Inclusion of Tips in Earnings.

In calculating a workman’s earnings for the purpose of compensation under the Workmen’s Compensation Act, 1906, where the employment is of such a nature that the habitual giving and receiving of tips is open and notorious, and sanctioned by the employer, so that he cannot complain of their retention by the servant, the money thus received in tips ought to be brought into account in estimating the average weekly earnings. Tips which either are illicit, or involve or encourage a neglect or breach of duty on the part of the recipient to his employer, or are casual and sporadic and trivial in amount, are not to be brought into the account.

(Penn v. Spiers & Pond, Limited; 17th February, 1908; Court of Appeal.)

## UNITED STATES DECISIONS.

### Status of Women Workers.

That laundries and other concerns employing women in mechanical labour in Oregon may not require such employees to work more than ten hours a day, in compliance with the law enacted

by the Legislature of that State in 1903, has been decided by the Supreme Court of the United States in the case of Curt Muller, a laundryman doing business in Portland, vs. The State of Oregon.

Muller attacked the law as unconstitutional, claiming that it puts a limitation on the power of contract. The Oregon Supreme Court upheld the statute on the ground that it is a police regulation, and its decision was affirmed by the Federal Supreme Court. The opinion of the Court was delivered by Mr. Justice Brewer. Holding first that women’s rights can be no more infringed than those of men, Judge Brewer went still further, and held that on many accounts woman is entitled to greater protection than her brothers. On that point he said in part:

“ Differentiated by these matters from the other sex, she is properly placed in a class by herself, and legislation designed for her protection may be sustained, even when like legislation is not necessary for men, and could not be sustained. It is impossible to close one’s eyes to the fact that she still looks to her brother and depends upon him. Even though all restrictions on political, personal and contractual rights were taken away, and she stood, so far as statutes are concerned, upon an absolutely equal plane with him, it would still be true that she is so constituted that she will rest upon and look to him for protection; that her physical structure and a proper discharge of her maternal functions, having in view not merely her own health, but the well-being of the race, justify legislation to protect her from the greed, as well as the passion of man. The limitations which this statute places upon her contractual powers, upon her right to agree with her employer as to the time she shall labour, are not imposed solely for her benefit, but also largely for the benefit of all.”

(Muller v. Oregon; 26th February, 1908; Supreme Court, U. S.)

### Rights of Passengers on Street Cars.

Plaintiff, who with three other passengers refused to “take the car ahead,” and remaining in the original car was sidetracked, and with his companions remained in the car for an hour or two brought suit in the Bronx Municipal Court against the Street Railway Company for a breach of contract in failing to carry him to his destination, and was awarded the sum of \$94.22. The Street Railway Company appealed, and the judgment was unanimously reversed in

the Appellate Term of the Supreme Court of New York. In delivering the judgment of the Court, Justice MacLean said: "This particular car not having been chartered by or to the plaintiff, the defendant, under its statutory powers,

could transport the plaintiff upon any other of its suitable vehicles destined to the place where he would go. No proof of any damage to the plaintiff is offered."

(Morton v. Union Railway Co.; 14th March, 1908.)

## INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF APRIL, 1908.

### I.—GENERAL SUMMARY.

THE general market for labour showed a marked increase in activity during April, compared with the preceding month. A very favourable feature was the early date at which agriculturists were able to get on the land in western Canada, seeding in the Northwest provinces having become general after April 12, and having been completed in many sections by the close of the month. This is from three weeks to one month earlier than last year. An increase estimated at 20% in the acreage sown was reported. This and the satisfactory condition of the seed-bed render the agricultural outlook in the west exceptionally favourable. In Ontario and the eastern provinces, weather conditions were less advanced, but field crops gave every indication, at the close of the month, of a heavier yield than in 1907, while prices were on uniformly high levels; wheat and clover have wintered well, and orchards promise good yields. A second important feature of the month was the engagement of large bodies of men in railway construction camps, civic improvement work and building. Nearly all of the railway camps which had closed down for the winter season reopened in April, and work was begun on several large additional contracts, especially in connection with the National Transcontinental Railway. Building promises to be less active than in 1907, except in the western provinces. In the lumbering industry several thousands of men were employed

for the drives in eastern Canada, and the sawmills in several sections had already begun cutting; in British Columbia there was some increase in activity in this industry, though conditions on the whole remained quiet. In mining, the feature of the month was the unprecedentedly heavy output of the Nova Scotia collieries, which already exceeds the production of the corresponding months of 1907 by over 200,000 tons. Metalliferous mining in Ontario and British Columbia was also showing a steady increase. The coal mines of western Canada were quiet. Manufacturing was more active than in March, but orders on hand and in prospect were lighter than last year. Fishing on the Atlantic coast was somewhat quiet; in British Columbia a small salmon catch is anticipated. The opening of navigation in the closing days of the month, some days earlier than in 1907, stimulated general trade and gave employment to several thousand longshoremen, ship labourers, etc. Railway freight traffic and earnings have shown a considerable falling off during the past few weeks, and retrenchments in consequence, are in contemplation by the large companies. A decrease in the number of immigrant arrivals from Europe, and an exceptionally heavy influx of settlers and their effects from the western states have been important features of the present spring season. With regard to the general industrial and trade outlook for the summer, it was thought at the close of the month

that while the money stringency was still adversely felt and a spirit of caution characterized transactions generally, the favourable crop situation and the large railway developments in progress will ensure a steady improvement in conditions as the season advances.

#### Changes in Wages and Hours of Labour.

On the reopening of the season of activity, wages of farm labourers, railway construction hands and unskilled labourers advanced from the rates prevailing during the winter, and were for the most part on the same level as at the corresponding season of 1907, though somewhat lower in some localities as a result of the comparatively greater amount of labour offering. In connection with the arrangement of working agreements in the building and other out-door trades for the present season, the schedules which prevailed last year were, in the great majority of cases, continued. Among the changes in wages and hours, information concerning which was received at the Department during April, mention may be made of the following:—

*Lumbering.*—Sawyers in certain of the New Brunswick mills had their wages decreased 10 per cent. compared with last year. From \$1.75 to \$2.00 is the present scale paid to river drivers in that province.

*Mining.*—At a meeting of the joint committee of the Western Coal Operators' Association and representatives of the miners, lampmen at Michel, B. C., were granted a wage of \$2.62½ per day.

*Building.*—Painters and decorators (95) at St. John, N. B., received an increase in wages from \$2.25 to \$2.50 per day of 9 hours. The same classes to the number of 30 at St. Catharines, Ont., had their wages increased from 25 to 30 cents per hour.

*Woodworking.*—Certain woodworking employees at Berlin, Ont., were reduced 10 per cent. in wages.

*Printing.*—Journeyman printers at St. John, N. B., had their wages increased 25 cents per day after a strike.

*Textile.*—Notices were posted in a number of cotton mills informing employees that a reduction of 10 per cent. in wages will go into effect on May 1.

*Civic employees.*—Civic firemen, policemen and various other civic employees of the municipality of Vancouver, B. C., obtained an advance in scale. At Fredericton, N. B., civic engineers received an advance of \$50 per year in salary.

*General transport.*—An agreement between the longshoremen and shipping companies of Montreal was effected, by which the rates of 1907 are continued, with an arrangement in regard to the working of the bonus system. †

#### Cost of Living.

Wheat and grain prices were firm in April, but flour was somewhat cheaper. Milk was reduced one cent per quart in several of the cities as a result of the coming into force of summer schedules. Butter remained high. Eggs became easier in price towards the end of the month. Sugar remained high, and there was an advance in the price of confectionery by manufacturers in Ontario. Ice at certain points, will be higher than last year; at Ottawa, Ont., the price charged for the summer season will be \$10, compared with \$8 in 1907, while in Montreal, Que., the schedule remains unchanged. Meats remained very firm, with an upward tendency in hog products. There was an increase in the price of certain kinds of tea. The price of natural gas was advanced at St. Catharines and Thorold, Ont. Metals were advancing in price. Rentals continued to advance in several of the cities.

#### Interruptions to Industry.

The number of trade disputes in existence during April was 3 more than in the previous month, but the loss of time to employees through this cause was less by about 4,550 working days. Compared with April, 1907, there were 25 fewer disputes, and a decrease of 83,750 in the number of working days lost. Negotiations for the renewal or amendment of agreements that would expire on May 1, were conducted during the month, and very few trade disputes were anticipated through failure of these negotiations.

† See also special article elsewhere in present issue.

Among industrial establishments, etc., destroyed by fire or through other causes during April, as reported in the press of the Dominion, the following may be mentioned:—

*Nova Scotia.*—Printing office and theatre at Glace Bay, loss, \$12,000; two hotels at Halifax, loss, \$5,000; observatory of Acadia College at Wolfville; three stores at Yarmouth.

The Canadian Pacific Railway company's steamship "Mount Temple", which has been lying on the ledges at Ironbound Island, N.S., for nearly five months was floated and safely towed into Halifax harbour on April 18.

*New Brunswick.*—Sawmill at Bathurst, loss, \$75,000; sawmill, gristmill, butter factory and store at Buc-touche, loss \$50,000; sawmill at Richmond, loss, \$2,500; three tenements, factory and four stores at St. John, loss, \$28,000; business block at Woodstock, loss, \$10,000.

*Quebec.*—Stable and stock at Brown's Flats, loss, \$2,000; hotel and general store at Boucherville, loss, \$12,000; general store at Cap Rouge, loss, \$5,000; hotel and railway station at Chateauguay Basin loss, \$40,000; warehouse at Cookshire, loss, \$3,000; sugar house at Glen Sutton; furniture factory at Hull, loss, \$7,000; sugar house at Knowlton; bakery at Montreal; sawmill at Mechins; tailor shop at Maisonneuve, loss, \$8,000; sugar house at North Pinnacle; bakery at Rivière à Pierre, loss, \$1,600; farm house and granary at Sherbrooke, loss, \$13,000; woollen mill (partial) at Sherbrooke; grocery at St. Johns; shingle mill at Stanstead, loss, \$2,000; convent at Quebec, loss \$30,000; glass factory, packing department at Montreal, loss, \$12,000. Spring freshets caused considerable damage along the rivers in Quebec, booms containing great numbers of saw logs on the Rivière du Lievre and on the Batiscan river having been carried away by the high water and the logs scattered into the Ottawa and St. Lawrence. Considerable damage was done to other property, at Lachute, Que., and in the vicinity of Montreal. On April 26 a slide of land took place on the shore of the Lievre River and destroyed a large portion of the village of Notre Dame de la Salette in the County of Labelle, causing the death of 33 persons. The damage to real estate was valued at \$50,000.

*Ontario.*—Box and barrel factory at Burlington, loss, \$3,500, 20 hands out of employment; assay office at Cobalt, loss, \$3,000; cereal works at Ingersoll, loss, \$25,000; hotel at Leamington, loss, \$5,000; skating rink at Lindsay; glass works, furniture works and wire works at London, loss, \$300,000, 40 hands out of employment; general store at Marmora, loss, \$17,000; agricultural implement works at Napanee; store house at Mattawa; elevator and grain at Paris; business block at Rodney loss, \$10,000; stable and 15 horses at Seaforth; planing mill at Smiths' Falls; lumber at Port Arthur; three tenements at Riverdale, loss, \$1,500; cutlery factory at St. Catharines, loss, \$150,000; cloak factory at Toronto, loss, \$35,000; bakery at Toronto, loss, \$5,000; Grand Trunk elevator at Toronto, loss, \$100,000; Academy of Art at Toronto, loss, \$6,000; trading house and restaurant at Wabigoon.

On April 9 a gale caused considerable damage to property along the shores of Lake Ontario.

*Manitoba.*—Church at Winnipeg, loss, \$70,000; elevator and 7,000 bushels of wheat at Eden.

*Saskatchewan.*—Granary at Bethune, loss, \$5,000.

Prairie fires in the third week of the month swept certain portions of Saskatchewan, and caused loss of life and property; the fires were extinguished by rain at the close of the month.

*Alberta.*—Confectionery store at High River, loss, \$15,000; store at Lethbridge, loss, \$10,000.

*British Columbia.*—Power and light substation at Nelson; door factory at Vancouver, loss, \$70,000; business block at Victoria, loss, \$122,000.

*Yukon Territory.*—Hotel at Discovery, loss, \$10,000.

## Conditions in the Industries and Trades.

Conditions of employment during April in the several industries and trades throughout Canada, as indicated by the reports of correspondents to the *Labour Gazette* and by information received at the Department from other sources, may be briefly summarized as follows:—

### Agriculture.

The most important feature of the month was the favourable weather prevailing, and the rapid progress made in the Northwest provinces. Seeding became general in the second week of the month and had been completed in many sections at the close. This is from three weeks to one month earlier than last year. The land was in excellent condition, the seed-bed containing sufficient moisture to carry the crop into June without additional rainfall. The area planted was estimated to be nearly 20 per cent. more extensive than in 1907, owing to the fact that favourable weather during the past autumn enabled a much larger amount of ploughing to be completed, and that the mild winter and early spring have greatly facilitated general farming operations. It was thought that the high price of seed oats may have a tendency to lessen the area devoted to that crop and to increase the area devoted to wheat. The distribution of seed grain by the government was progressing favourably, wheat being in the farmers' hands on April 15, and oats and barley at the close of the month. The fall-wheat crop in Alberta wintered well. Weather conditions throughout the month were favourable to growth. At the close of the month, it was stated that 15 per cent. of the wheat sown was showing above the ground. A heavy influx of settlers from the United States will considerably increase the aggregate agricultural returns. It may be stated in summing up that the outlook in western Canada at the close of April was exceptionally promising.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull very dull.

City and District of Correspondent.	Agricultural operations.	Fishing.	Lumbering (including saw-milling).	Mining.	Manufacturing.	Railway Construction.	Building Trades.

In Ontario and the eastern provinces unfavourable weather in the first week of the month delayed operations, and the season on the whole was somewhat backward. A good deal of seeding and ploughing, however, was completed, and the pruning and spraying of orchards was in full progress. The maple sugar season came to an end under exceptionally favourable conditions. Fall-wheat and clover wintered well, and pastures are in good condition.

Prices of farm produce remained firm, hog products showing a marked upward tendency. Eggs declined in price somewhat earlier this year than last. Butter has fallen off in price, but was higher than at the corresponding period of last year. The exceptionally high price of clover seed will have the tendency to curtail the area seeded this year. Orchards throughout Canada were reported in excellent condition.

Farm help was in active demand throughout the Northwest provinces; it was stated that 1,000 additional men could have been taken on in Manitoba during the progress of seeding. Wages were on about the same level as in 1907. In Ontario and in the Eastern Townships of Quebec there was likewise a demand for men.

According to a statement issued by the Ontario Agricultural College, the number of barns struck by lightning in 1907 was 61, of which 14 were burned. The total loss was \$105,311. There were 5 houses burned and 14 damaged at a loss of \$3,268. In addition, 222 cattle, 137 sheep, 71 horses, 21 pigs and 151 trees were struck.

A delegation representing the Grain Growers' Association of Manitoba and Saskatchewan and the Alberta Farmers' Association had an interview with the Dominion Government during April to request the enactment of certain legislation approved at a conference of representatives of these associations held at Saskatoon, Sask., in February.

#### Fishing.

The lobster season opened in the Maritime provinces, but only small catches were reported up to the close of the month.

The presence of ice off the coasts hampered herring and mackerel fishing, but favourable reports were received from the deep-sea fishing grounds. Gaspereaux were very plentiful in the Kennebecasis. Seventy-five millions of white fish were planted in Lakes Ontario, Erie and Huron by officials of the Dominion Fisheries Department during April. In British Columbia the catch of spring salmon showed an increase compared with March, and some good fares were reported by halibut fishermen. Whale fishing off Vancouver Island continued active. The number of canneries to be operated on the Fraser River during the coming season will probably be less than in many years past, owing to the small pack expected. An association of northern British Columbia salmon canners, to regulate the price of fish and the number of boats to be operated, has been formed; it was stated that the price would be ten cents per fish throughout the season from Smith's Inlet to the Naas. The organization of a large fish and cold storage company, with headquarters at Prince Rupert, was in progress; the company proposes to employ 2,000 men.

It was announced by the Right Honourable Sir Wilfrid Laurier, Prime Minister of Canada, on April 13, that a treaty had been signed between the United States and Great Britain, by which all waters contiguous to the United States and Canada will be placed under a commission which will make regulations for the fisheries. The appointments on the British side will belong exclusively to the Government of Canada.

A shipment of live lobsters was made from Halifax, N. S., to the Pacific coast under the direction of the Department of Fisheries, Canada, for the purpose of introducing these crustaceans into the Pacific ocean.

#### Lumbering.

In Ontario and the Eastern provinces the men for the drives were engaged and large numbers had left by the end of the month. A few mills had begun sawing, for the most part on last year's logs. The ice was still holding on the northern lakes, but the prospects for an abundance of

water for the drives were considered good. In southern Quebec exceptionally heavy quantities of pulp wood have been received. In British Columbia there was some increase in activity at the mills, but conditions on the whole remained quiet. The provincial government raised the embargo on the exporting of logs, owing to the surplus now in the water and the fact that damage was being caused by the teredo.

At a meeting of Canadian paper makers held at Montreal, Que., the prohibition of the exportation of pulp wood was advocated.

### Mining.

The Nova Scotia collieries have had a very busy winter and spring season, the output being largely in excess of that of the corresponding period of 1907. In March, 1908, for example, the output of the Dominion Coal Company's mines was 346,529 tons; the highest output previously recorded in this month was 310,220 tons in March, 1906. The shipping season began two weeks earlier than last year, and the outlook is for the most active year in the history of the industry (†). The Dominion Coal Company's shipping fleet for 1908, numbers 16 vessels, of which 10 are chartered. Activity in the development of the iron mine industry in the Miramichi district, N. B., was pronounced during April. In Quebec and Ontario, conditions were more active than in March owing to seasonal causes, though mica and copper mining remained quiet. Shipments from the Cobalt camp continued heavy. In Alberta and British Columbia, the coal mines were quiet. The metalliferous camps of the Boundary and Rossland districts, however, were active. The output from the Granby mines, for example, was considerably heavier than during the same period last year. Shipments of silver from the Trail, B. C., smelter have been over 1,000,000 ounces during the past six months. The Rossland mines have been shipping between 5,500 and 6,000 tons of ore per week. The supply of coke, cars, labour,

etc., was plentiful. Enlargements of the Granby plant will be undertaken in the near future. Some additions will be made to the smelter plant of the Dominion Copper Company before work is resumed. Men were being engaged in Vancouver, B. C., for hydraulic mining operations in the Yukon.

The sixteenth annual meeting of the Mining Society of Nova Scotia was held at Halifax, N. S., March 25-28.

A special committee was recently appointed by the Commissioner of Public Works and Mines of Nova Scotia to investigate the explosion in the Port Hood-Richmond Coal and Railway Company's colliery, which occurred on February 7th. A thorough investigation of the mine was made. The findings of the committee were in part as follows:—

The nature of the explosion is undoubtedly one of gas. It occurred in the back head and balance, from which it scattered in all directions, the most of its force having been exerted along the upper level for a distance of 400 feet, and in No. 4 slant extending out the lower level a distance of 400 feet.\*\*\* As to how the explosion occurred, whether set off by a naked light, fired by powder from a can or shot, no one will ever be able to tell, as all in that section of the mine were killed.

### Manufacturing.

Though quietness continued in several branches and localities, there was a tendency towards an increase in activity in the larger industrial centres. Orders, however, were light compared with those of the spring season of 1907. Shipbuilding plants were as a rule busy, but cotton mills decreased in activity during April. The rail mill of the Lake Superior Corporation at Sault Ste. Marie, Ont., ceased operations for an indefinite period on April 18, owing to lack of orders from railway companies. In Nova Scotia, the Dominion Iron and Steel Company's plant was busy, but that of the Nova Scotia Iron and Steel Company was quiet. Other smelters were somewhat quiet.

At a special meeting of the Ogilvie Flour Mills Company, held at Montreal, Que., for the purpose of readjusting capitalization, it was stated that since the formation of the company in 1902, aggregate profits had amounted to \$2,856,514, which, after payment of interest on bonds and dividends on stock, left a bal-

(†) For detailed statements see reports of Sydney, Westville and Amherst. N. S., correspondents in present issue.

ance of \$1,503,764. The common stock of the company was increased.

Cement factories have recently been very busy. A meeting was held at Toronto, Ont., for the purpose of effecting an organization of manufacturers and dealers.

### Railway Construction.\*

There was a considerable increase during April in the amount of railway construction in progress. Many camps which had been closed down for the winter resumed operations, and work was very active in connection with the beginning of new contracts. The most pronounced activity was in connection with the National Transcontinental line, and especially in connection with the new contracts recently awarded in British Columbia and in New Brunswick. In the latter province, work was commencing at the close of the month on the contracts which the Willard Kitchen Company of Fredericton, N. B., had been awarded for the 32 miles of the road between the Tobique river and Grand Falls. The section is estimated to cost about \$3,000,000, and to employ about 1,000 men on construction. The contract calls for the completion of the work by September, 1910. In British Columbia, some 6,000 men will be given employment on the 160 miles of line eastward from Prince Rupert. Several heavy orders were given for supplies and outfits in this connection during April; it is estimated that when the contract is fully in progress, about \$500,000 will be distributed monthly for wages and supplies. The section from Edmonton, 120 miles west, will employ about 2,000 men. Tenders will be asked for the building of 129 additional miles of the mountain section shortly. On the prairie sections of the road, work was actively resumed during April and rapid progress made. It is expected that a through train service from Winnipeg, Man., to Saskatoon, Sask., a dis-

tance of 478 miles, will be inaugurated on July 1.

The sum of \$125,000 will be spent on improving the roadbed of the E. & N. Railway on Vancouver Island.

Bonds to the extent of \$15,000,000 were successfully disposed of by the Grand Trunk Pacific Railway Company in Great Britain.

A scarcity of ties has delayed work on the Canadian Pacific line between Winnipeg and Fort William.

### General Transport.

Railway traffic was lighter than at the corresponding period of 1907. Earnings of railway companies during March and April have shown a considerable falling-off in both passenger and freight departments, especially the latter. In the closing ten days of March, the combined decline of Canadian Pacific and Grand Trunk Railway earnings amounted to \$500,000. As a result of these conditions and of the opening of navigation, the amount of work available for railway hands was less than in April, 1907, and some train crews were laid off. Railway shop employees were also quiet; at the Canadian Pacific Railway Company's Angus shops at Montreal, some 800 hands were laid off in the opening week of April. In view of prevailing conditions, negotiations were conducted between the Canadian Pacific and Canadian Northern Railway Companies and certain of their shop employees, with regard to a proposed cancellation by the companies of existing wage agreements, the matter being referred for adjustment to a board under the Industrial Disputes Investigation Act, 1907 (†). Word was received later at the Department of Labour that an arrangement had been effected in the case of the Canadian Northern Company and its employees.

The half-yearly meeting of the Grand Trunk Railway Company of Canada was held at London, England, on April 9. It was reported that as a result of the financial crisis in the United States and

(\* ) For a statement with regard to contracts awarded and progress made in connection with the National Transcontinental Railway, with an estimate of the amount of work remaining see special article in the present issue under the heading, "The National Transcontinental Railway Progress made on construction".

(†) A detailed account of the action of the companies in this matter and of the negotiations leading up to the appointment of the board is given in a separate article elsewhere in the present issue.

the crop shortage, a diminution in traffic had occurred, to offset which a policy of retrenchment in working expenses had been adopted. Gross receipts for the half year were £3,763,000, an increase of £178,000. For the whole of the year 1907, the gross receipts were £7,144,000, and the increase over the preceding year £538,000. The working expenses for the half year showed an increase of £149,400. The proportion of expenses to gross receipts was 72.03, compared with 71.45 per cent. in the previous year. Some 22 new stations were built last year. The increase in wages is referred to as the chief cause of the advance in working expenses. With reference to the Grand Trunk Pacific, it was stated that about 1,000 miles of the company's part of the work, or a good deal more than one half, would be completed at the end of the present year.

Street railway employees during April were busy, and earnings of companies continued heavy. (†).

The opening of navigation some days earlier than in 1907 was a feature of the month, affecting industry and labour very favourably. The first steamship from Europe arrived in Quebec on April 26 and left for Montreal on the 29th. In 1907, the first boat to leave Quebec for Montreal was on May 2nd. Coal shipments from the Maritime provinces were greatly facilitated, and the opening of traffic on the canals and on the great lakes was felt at once by many branches of trade. Long-shoremen, in the closing days of the month, had entered upon their active season. At Montreal and at Quebec, negotiations between this class and the employing shippers were in progress during the month. (‡)

>Returns for the port of St. John, N.B., during the past winter season were heavier than in the preceding year, but show a material falling off in trade with the United States. The increase was chiefly in grain shipments.

A resolution was passed by the House of Commons providing for a subsidy of

\$100,000 per year for a period of ten years, to establish and maintain direct steamship communication with France.

### The Trades.

*Building.*—Activity was resumed at many points, but at others weather conditions, during the first half of the month especially, were not favourable for outside operations. The outlook for the coming season is less promising than a year ago, a considerable falling-off in the number of building permits issued being reported in several of the larger centres, including Montreal, Toronto, Hamilton, London and Winnipeg. In the North-west provinces and in British Columbia, however, the year promises to be very active.

*Metal and woodworking.*—Employees in metal and woodworking establishments had, on the whole, a better month than in March, though the effect of the money stringency was still felt, and orders were lighter than at this time last year.

*Printing.*—The allied trades had a fair month. The closing of several provincial legislatures affected trade in certain localities; on the whole, the volume of business was well maintained.

*Clothing.*—Journeymen tailors had a busy month, business showing a marked improvement compared with March. Garment workers, hat and cap makers and boot and shoe workers were somewhat quiet.

*Textile.*—A falling-off in activity was reported in the cotton mills.

*Leather.*—The market for hides and leather was unsettled. Tanners and curriers, however, were fairly active. Trunk and bag makers, etc., had a good month.

*Food and tobacco preparation.*—Bakers and butchers were fairly well employed, but confectioners were quiet. Cigar-makers have been very dull for some weeks past. The larger flour mills were fairly busy, but some of the smaller mills were quiet, especially in western Canada.

*Miscellaneous.*—Barbers, hotel and restaurant employees and laundry workers etc., were active.

*Unskilled labour.*—The amount of employment available increased largely during April. The demand for experienced

(†) See report of Montreal correspondent.

(‡) See reports of Montreal and Quebec correspondents in the present issue; see also under heading "Changes in wages and hours" above.

men on farms, in railway construction camps and on the lumber drives was very active, being in some localities greater than the supply. The beginning of building and civic improvement work also gave employment to a large number. In some cities, however, there were a number of the less skilled grades without employment.

### Canadian Trade and Revenue.

*Foreign trade.*—During March, 1908, the total value of imports entered for consumption was \$30,052,232, compared with \$36,842,076 in March, 1907. The total value of imports for the twelve months ending March 31, 1908, was \$358,373,685, compared with \$340,364,745 for the corresponding period of 1907. Total domestic exports during March, 1908, amounted to \$17,943,487, compared with \$14,760,273 in March, 1907. The total domestic exports for the twelve months ending March 31, 1908, amounted to \$246,960,968, compared with \$239,634,767 in the corresponding period of 1907. In March, 1908, there were increases in exports of the mine, the fisheries, the forest, agriculture and manufactures, and a decrease under animals and their produce.

*Imperial trade.*—Openings were reported in the British market for Canadian butter, the best quality of apples, Canadian made pianos, and oil-cakes. It was suggested that Canadian boot and shoe manufacturers should make lighter products for trade with the West Indies. In Barbadoes, it is stated, Canadian commercial travellers might obtain good results. There was an increased demand for British Columbia timber in New Zealand. Openings were reported in Australia for Canadian pulp, glazed kid, carbide, boots and shoes, chair seats, picture mouldings and veneers. In South Africa it was suggested that the Canadian Manufacturers' Association should establish a commercial information bureau in Cape Town, and that price lists be at once furnished for the following lines of goods:

Agricultural implements, windmills, well-boring machinery, hardware and cutlery, carriages, barbed fencing wire, plain fencing wire, boots and shoes, wire nails, horse shoe nails, fencing standards, wire netting, machinery

(mining), furniture of all kinds, haberdashery, stoves, tools, hats and caps, hosiery (cotton, silk and woollen), hoes and picks, musical instruments, leather (enamelled and morocco), paper (bags, wall and printing), leather (patent) machinery (electrical), machinery (manufacturing).

*Domestic trade.*—Trade, wholesale, and retail, showed little change from March. Purchases were increasing at the close of the month owing to improved weather conditions. The Easter trade was satisfactory. Collections were fair. Canadian securities were on somewhat higher levels than in March, and there was an increase in trading on the various stock and mining exchanges. Shipments of building hardware and railway construction material were heavy. There has been some improvement in the money market in western Canada, the principal and interest on loans having been well met during the winter season, though somewhat slower in coming in than last year. Bank clearings have shown an increase, though banks were still refusing to issue large loans until the grain for May delivery has been liquidated. Real estate was more active than in some months past.

The Canadian bank statement for March, 1908, showed total assets of \$975,723,871 and total liabilities of \$735,905,530. Notes in circulation amounted to \$71,233,718, and deposits payable on demand to \$148,665,791.

The twenty-sixth annual meeting of the Western Bank of Canada was held at Oshawa, Ont., during April. The capital of the bank is \$550,000, rest fund \$350,000 and circulation \$398,010. Net earnings for the year ending February 29th last were \$88,784, about \$5,000 more than for the previous year.

*Canadian revenue.*—Canadian revenue during March, 1908, amounted to \$7,107,683.56, compared with \$7,827,943.88 in March, 1908. For the twelve months ending March 31, 1908, the total revenue was \$94,708,982.92 compared with \$86,805,494.69 during the corresponding period of 1906-07. The total expenditure on capital account during March, 1908, was \$2,357,063.92, compared with \$1,033,815.01 in March, 1907. The total expenditure on capital account for the year ending March 31, 1908, was \$28,125,-

552.54, compared with \$13,967,220.49 in the corresponding period of 1906-07. The leading items of expenditure during March, 1908, were Public Works and Canals, \$2,043,534.09 and Bounties \$215,138.44.

#### Notes.

Florists reported plants for Easter somewhat backward.

The annual meeting of the Western Ontario *Good Roads Association* was held at Toronto, Ont., March 24-25.

The second annual meeting of the *Domestic Science Association* of Nova Scotia was held at Halifax, N. S.

The city of Sherbrooke, Que., will take over the plant of the Sherbrooke Power, Light and Heat Company from May 1 (\*).

A special meeting of the general executive of the Canadian Federation of Textile Workers was held at Montreal on April 5, for the purpose of electing a president and secretary.

The first shipment of silver coin was made from the *Canadian Royal Mint* on April 1, a total of \$24,000 being sent to various parts of the country. The coins were of all denominations.

Owing to the high price of fruit in 1907 large stocks of glass *preserving jars* were left over. Trade in this line has since been quiet, but it is expected that the requirements of the present season will absorb the surplus.

As a result of the failure of certain brewery companies of the Province of Quebec to form an amalgamation with a capital of \$10,000,000, the association which was formed in 1907 for the regulation of prices has been dissolved.

At a special meeting of the public school board of Hamilton, Ont., the following resolution re *technical education* was passed:

"That this board heartily endorses the proposal of the technical board for the establishment of a technical manual training school and that it is willing to bear its share of the cost of maintenance if the Ontario government will give a grant to equip and erect a suitable building."

During April, the business of Smallman & Ingram, retailers of dry-goods at London, Ont., was re-organized. About \$50,000 of stock at par was offered to

some 40 of the employees, who had been the longest in the company's service.

A deputation of *jewellers* from Montreal, Hamilton and Toronto waited upon the Dominion government to urge the government to bring into operation the Gold and Silver Stamping Act by October next.

According to returns from nine companies operating sixteen furnaces, the total Canadian production of *pig iron* in 1907 from both Canadian and imported ores was 651,962 short tons valued at \$9,125,226, an increase of nearly nine per cent. in quantity over the amount made in 1906.

The *Legislature of Prince Edward Island* prorogued on April 15. Thirty-six acts were assented to, including an act to prohibit the use of motor vehicles on the public highways, an act to amend the Oyster Fisheries Act, and an act to consolidate and amend the Public Health Act.

The *Canadian Society of Forest Engineers* was organized at Toronto with a membership of thirteen. The object of the Society is "the advancement of its members in the theory and practice of forestry by the discussion of technical and professional topics, the promotion of a better mutual acquaintance among Canadian foresters, and the cultivation of an esprit de corps among the members of the profession."

The total receipts of the city of Toronto during the past year amounted to \$13,121,499.49, of which \$4,090,076.29 were from taxation. The street railway yielded \$500,601.24; waterworks, \$536,615.31; rentals of city property, \$245,308.54; licenses, \$162,017.66; Industrial Exhibition Association, \$20,515.92; with other items of revenue making a total of \$1,550,668.41. Special deposits, including funds, totalled \$1,987,522.86, and the proceeds of debentures issued \$2,777,072.89.

During April a deputation representing the Retail Merchants' Association of Canada appeared before a committee of the Senate to protest against the enactment of the proposed Co-operative Societies, Act. Representations as to the constitutionality of the proposed measure

\* See report of Sherbrooke, Que., correspondent.

were also made on behalf of the provinces of Quebec, Ontario and Saskatchewan.

The *Legislature* of the Province of Saskatchewan was opened on April 1. In the speech from the throne, the present industrial situation in the province was stated to be satisfactory, with prospects bright for continued growth and development. The distribution of seed grain, the proposed inauguration of a public telephone system, the establishment of a provincial university, and the erection of legislative and departmental buildings were also referred to.

During the month word was received in the Department to the effect that measures based on the *Industrial Disputes Investigation Act, 1907*, of Canada, would in all probability be introduced into the legislatures of New South Wales and the Transvaal respectively, at an early date. The informant in the case of New South Wales was Mr. J. S. Larke, commercial agent at Sydney, N. S. W., and in the case of the Transvaal, the Honourable S. Warrington Smythe, Minister of Mines.

At a meeting of the Executive Committee of the *Canadian Public Ownership League*, held at Toronto, the following resolutions were passed:—

1. "That this league has learned with great satisfaction of the action of Manitoba and the new provinces of the West in establishing publicly owned telephone systems, and we consider the time has arrived when the Province of Ontario should take active steps in the same direction.

2. "It is the opinion of this league that no further aid should be given either by Federal or Provincial Governments for the construction of new lines of railway, either in the nature of cash bonus, lands or guaranteeing of bonds, and that where colonization roads are necessary they should be built, owned and controlled by the people."

The *Foremen's Association* of the government printing bureau at Ottawa, numbering ten persons, and governing a working staff of over 450, has petitioned the Honourable the Privy Council of Canada to be placed in the Civil Service with first-class standing. The reasons advanced in support of the proposed change are: That they have to share the responsibility of the executive management of the bureau; that they could better enforce discipline if given a higher standing; that their work is of a highly technical and specialized character; that,

notwithstanding the increased cost of living, their wages have not been advanced in the past four years and only at the rate of \$15 per year during the past 18 years; that salaries in much smaller offices in Canada are higher, while the corresponding class in the government printing bureau at Washington, D. C., receive \$2,000. In a proposed amendment to the Public Printing and Stationery Act, the foremen suggests a clause providing that no one be appointed chief of a division unless he has had at least five years' experience in an executive capacity in a similar division of a printing office.

With reference to *government telephone systems* in western Canada, it was announced during April, that \$500,000 would be expended by the government of Manitoba on extensions to the provincial system, consisting of new long distance lines, additional circuits on existing long distance lines, the connection of rural subscribers to existing farm lines, and the building of exchanges. In the province of Saskatchewan, the report of Mr. Francis Dagger, who was engaged as an expert by the legislature in 1907, was presented to the legislature. The report stated that there are at present in Saskatchewan approximately 3,250 telephones, or an average of one to every 92 inhabitants. The long distance service was stated to be inadequate to the needs of the province, and a policy of government ownership and control was recommended. The establishment of local exchanges, it was recommended, should be left with municipal councils, the ideal condition being that municipalities should own and operate local services. With regard to rural or farm telephones, the lines of which it was stated could be built at a cost not exceeding \$100 per mile, the establishment of experimental lines under government assistance was recommended as a first step. It was announced during April that the system of the Bell Telephone Company in Alberta had been taken over as a going concern from April 1; the price paid was \$675,000.

A deputation of representatives from various towns and cities situated on the banks of the Grand River, Ontario,

waited upon the provincial government in April, and asked that a commission be appointed to outline a permanent and comprehensive scheme for the prevention of floods, and for the reforestation of lands at the head of the Grand River. In view of the fact that southwestern Ontario is destined to be a very important manu-

facturing centre and a densely populated section, the development of its natural resources is regarded as of the first importance. In replying to the deputation, the Premier of Ontario stated that immediate and careful attention would be given to the matter.

## II. REPORTS OF LOCAL CORRESPONDENTS.

### SYDNEY, N.S., AND DISTRICT.

*Mr. John Moffatt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continued active during April. All the larger industries were in continuous operation, while the factories which had been on short time, resumed their normal condition and were making preparations for a busy summer. Transportation by rail continued heavy, the bulk of the freight carried being steel ingots and steel rails. The shipping season opened two weeks earlier than usual. The small coasters were the greatest gainers by the favourable conditions. Sydney harbour was unusual'y free from ice, and the ferry boats began to run early in the month

The iron and steel industries were active, and so far have been unaffected by the depression which has touched the steel trade in the other provinces, and the United States. Sydney Steel Works had a good month, and have sufficient rail contracts to keep them busy for many months to come. The Nova Scotia Steel Works which had been affected to a considerable degree by the depression early in March, now report trade much improved, and the outlook growing brighter with each month. Contracts, however, are scarcer and prices lower, than during April of last year. This company posted notices in March that if trade did not improve a general reduction in wages of 10 per cent. would be put into effect on May 1st. These notices were later taken down, an indication that conditions were more favourable.

The coal trade was very active through-

out the month, every company operating to its full capacity. The Dominion Coal Co. taking advantage of early navigation sent a number of coal steamers up the St. Lawrence. These, however, were detained in Louise Basin without being unable to unload, owing to ice conditions further up the river. The company had expected that they would be able to place as much coal in Montreal territory in April as they had done in May of last year, but the ice conditions above Quebec prevented them doing so. The Dominion Collieries continued to give very large outputs the whole month. One of the collieries has been under repairs for several weeks. No. 12, the new colliery on the Victoria areas, is being rapidly developed. Contracts for a large number of miners' cottages have been let. Work on the branch line of railway leading out to the main line is being pushed ahead with all possible speed. The Nova Scotia Company's collieries were also active; one new colliery is being rapidly developed, while No. 2 Sydney is being pumped out, to be re-opened when free from water. Port Hood Mines have been equipped for an output of 600 tons per day. Labour being more plentiful than for years past, this colliery has now a fair supply, and will, no doubt, increase its output largely during the present year. Inverness Colliery which last year made large gains in output, is being further developed with a view of still greater outputs. Mabou, which ships a splendid quality of coal, expects to be able to place 200,000 tons of coal on the market.

There will be a fair amount of work for the outside trades around the mining districts. Wholesale and retail trade were good.

The Glace Bay Electric Tram Co. installed a supplementary electric plant at Dominion No. 4. The power for this tramway was formerly supplied from Sydney, but is now fully generated in the Glace Bay District.

The mine workers, the iron and steel workers, the Nova Scotia Steel Co. and the citizens and town of Sydney mines will in the near future open a new hospital with a capacity of twenty beds. The hospital with its equipment cost \$15,000. Of this the employees contributed \$4,200, each man giving a day's wage as his contribution; the Nova Scotia Steel Co., \$1,000; the directors of the company, \$1,200; the citizens, \$3,000; and the town, \$500.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Owing to the prevailing cold weather, conditions were backward.

*Fishing.*—Heavy ice prevented fishing.

#### CONDITION OF PARTICULAR TRADES.

The Building Trades were quiet. Other skilled branches were active. Unskilled labour was well employed.

#### WESTVILLE, N.S., AND DISTRICT.

*Mr. Thos. Hale, correspondent* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

March was a fairly favourable month for labour, there being a considerable increase in the output of coal at the different collieries compared with that of the corresponding month last year. The increased output at the collieries on the mainland amounted to 25,000 tons, and on Cape Breton Island 50,000 tons. The total increase at all the collieries for the three first months of 1908 was about 200,000 tons. The shipping season is commencing and a few schooners have been already loaded. The regular steamers for the St. Lawrence trade are expected here early in

May. Work generally at all the mines was very brisk, and in all probability there will be a large increase in the total output for 1908. Workmen at some of the collieries have applied for an increase in wages to take effect on the first of May.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy with spring work; they have not yet commenced seeding.

*Lumbering.*—This industry was fairly active:

*Manufacturing.*—On the whole manufacturing was good. The Standard Drain Pipe Co., which in September, last had its plant damaged by fire, has again started operations; the firm employs about 100 workmen.

*Mining.*—This industry was very busy. Owing to a cave-in some years ago which crushed the strata between the McGregor seam and the over-lying seam, there were reasons to believe the possibility of fire in the vicinity of the old workings. To guard against this possible danger the management called in service a force of men and had the section walled off and intends to flood the above mentioned seams.

*Railway employment.*—Activity was the rule.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trade is just opening up for the season. It is expected that operations in this line will be very brisk in the near future.

*Metal and engineering.*—Electrical workers and blacksmiths were busy.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters were active.

*Transport.*—Railway train crews, including telegraphers, switchmen, trackmen and freight-handlers were busy, and street railway employees, treamsters and draymen active.

*Unskilled.*—Activity prevailed.

## HALIFAX, N.S., AND DISTRICT.

*Mr. A. J. Smith, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during April, particularly on outside work, was not as active as at the same time last year, but as the month advanced, and the temperature became higher, there was a decided improvement in many lines. Building operations were interfered with by the weather, but will be more active in the near future. Several big contracts will be commenced soon, the most important being that for the new Technical College, and extensive alterations on the Post Office building, the latter not to be completed until sometime in 1909. Other contracts have been proceeded with and several permits have been issued for minor building and repairing operations. Up to March 24th, the Silliker Car Works Co. had spent \$182,057.85, obtained by calls on the stockholders. During the last week of March and the first week in April \$65,000 was paid to the company by the corporation of Halifax. The works are now running and employing about 100 hands.

Many sea-going vessels arrived at this port during April; this caused activity on the waterfront. On April 19th and 20th, no less than thirty-six ocean-going steamers, one ship, one barque, several coastwise steamers, and some forty schooners were in port, the steamers tonnage alone aggregating 100,000.

There was one change in the rate of pay during the month—that of painters and glaziers, who previous to April 1st received \$2.00 per day for nine hours' work. Beginning April 1st the scale was increased to \$2.25 per day for a week of 54 hours.

The bricklayers and masons notified the bosses that beginning May 1st the week's work of the union was to be reduced to 48 hours per week—8 hours per day, the present rate to stand, the men being willing to lose the six hours pay. Several meetings were held by the Builders'

Association, which resulted in the following answer being sent to the bricklayers and masons:

"That at a meeting of the Builders' Association it was resolved that, under present conditions, they are not able to grant the demand for the eight-hour day."

## CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—There was no marked change from the previous month, except that the local fishermen, are already preparing for the spring mackerel which are expected early next month.

The firm of Thorndike and Hix, of Rockland, Maine, have opened a Canadian branch here of an extensive lobster business. The firm will deal only in live lobsters, and expect to ship the same to points in Western Canada and in the United States.

Shad fishing in Nova Scotia is to be revived and encouraged. Two meetings were held early in April in the Province Building by parties interested, and the best means of reviving this industry, which has fallen off greatly during the past thirty years, during which time this valuable fish has almost disappeared from our waters, was discussed. It was resolved to memorialize the Marine and Fisheries Department to appoint a commission to go thoroughly into the subject and if necessary to obtain the assistance of shad experts from the United States.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were about the same as in March, about 25 per cent. being employed. Carpenters and joiners had a fairly busy month. Lathers and plasterers were dull. Painters decorators and paper-hangers improved as the month advanced, and towards the close there were very few idle hands. Plumbers and gasfitters were busy. Stone cutters had a fair month.

*Metal.*—Boilermakers were fairly well employed. Other lines were normal.

*Printing.*—Printers, pressmen and bookbinders had a busy month, but there was a falling off towards the end, and indications for May are not so bright.

*Clothing.*—Custom workers were busy; work on readymade clothing was dull.

*Unskilled labour.*—Work improved as the month advanced, and labourers were fairly busy at the end. Workmen on the water front loading and unloading ocean steamers, etc., were well employed.

#### DISTRICT NOTES.

*Mahone Bay.*—Local lumbermen stopped operations early in April after a fairly successful season. About 2,000,000 feet were cut, the sawing and shipment of which will employ considerable labour. Some 25 schooners started early in the month for the fishing grounds. J. Ernst & Son launched on April 1st from their yard the 95-ton schooner "Goldie Belle"; the vessel is 104 feet long, 25 feet beam, 9 feet 6 in. deep, and is intended for the Grand Banks fishing. This firm will start another schooner in a few days, and expect to build a couple of steamers during 1908. T. A. Ham, and A. C. Zwicker are also building schooners, while J. McLean & Sons are constructing a large motor boat, to be finished by September. Early in the year a shipment of clay was sent to Ohio, U. S., for testing for bricks. The results were highly satisfactory, and the organizing of a stock company is assured.

#### AMHERST, N.S., AND DISTRICT.

*Mr. A. D. Ross, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market showed little improvement over March. The local supply of workmen was more than sufficient to meet all demands. The summer promises to be a quiet one. The Amherst Foundry Company has been busy in its enamelling department, March and April being the most active months in its history both from a wages and output standpoint.

The Victor Woodworking Company resumed operations, and gave employment to about twenty men. The Hewson Woollen Mills and the Robb Engineering Company both held their annual meetings during the month, but owing to

the financial stringency neither paid dividends. The half a dozen collieries in the vicinity of Amherst were all working to their full capacity. Development work is going steadily forward; the demand for coal is good. Wages are high and the coming months promise to be of unusual activity.

The Boot and Shoe Factory, the Trunk and Casket Factory, the Rhodes, Curry & Co., and one or two smaller industries expect to employ the normal number of hands, but there will not be any call for special labour this summer.

Wages have been somewhat reduced for unskilled labour but not on any definite schedule.

The Mechanics' Lodge, P.W.A., in Springhill, has asked the Labour Department to appoint a Board of Conciliation under the Lemieux Act. Times are good in Springhill, as is evidenced by the fact that on the 12th inst. over \$42,000 was distributed in wages in that town for the half month, and the town is rapidly recovering from the disastrous strike of thirteen weeks that occurred last fall.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Employment was practically at a standstill during the month, but farmers are now busily employed preparing for the spring months.

*Fishing.*—The lobster season in this county opened on the 20th inst. The catch so far has been small.

*Lumbering.*—The lumbering operations for the season are about over. Prices are fair but the cut will not be half of the previous year. Shipping from some points has already begun.

*Manufacturing.*—A number of industries report business exceedingly dull. The Robb Engineering Company is only working part time. Woodworking industries are dull. In the main it looks as if the summer would be dull for a number of manufacturing establishments, but local labour may be fairly steadily employed.

*Mining.*—Employment was very brisk at the different collieries. More miners can find employment here during the summer months. The Maritime Railway Coal & Power Co. has now sunk its new slope to a depth of 1,700 and a level will be

struck at a depth of an additional 100 feet. This will mean more employment for miners, as the number of men are necessarily limited in sinking operations.

The Scotia Mine has been purchased by a company of New York capitalists with a capital of \$500,000 to extend the operations of the mine. The property is situated about ten miles from Amherst. Extensive improvements on bankhead buildings and tramways have already been begun.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters and joiners reported work very quiet. There will probably be twenty to thirty houses, mainly tenements, built this summer, and one brick block. The local supply of labour will be sufficient. Painters and paper-hangers were very busy. Stonecutters had little employment. Builders' labourers reported many out of employment.

*Metal.*—Moulders were fairly busy. A number of machinists were only working five days a week. Boilermakers were working on reduced time.

*Woodworking.*—Car builders were fairly busy with the outlook fair for two or three months. No additional men are wanted. Wages were reduced 10 per cent. in March. Pattern makers reported work dull in some shops.

*Printing.*—Printers were fairly busy, with no additional help wanted.

*Clothing.*—Journeymen tailors were busy.

*Leather.*—Trunk and bag makers were fairly busy.

*Unskilled labour.*—The market was dull and promises to be so during the summer

with supply and demand well balanced. The second half of the month saw navigation opened—about a fortnight earlier than last year—thus making conditions better for seamen. The opening of the lobster factories on the 19th was another feature of the labour situation, as this is one of the most important industries in the province, giving employment to a large number of men and women. The supply of domestic help has been curtailed by the departure of girls to the factories. Merchants reported wholesale and retail trade average. The dry goods men reported good sales at their millinery openings and every business has felt the enlivening results of the advent of spring.

In the building line, a number of government contracts have been started, including breakwaters at Souris and Summerside and railway shops at Charlottetown. These works were started previously, but operations were suspended during the winter. The announcement was made this month that the Bank of Montreal would begin the erection of a new building in the central part of the city.

A division of the International Brotherhood of Railway Employees, was organized in this city.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Cold weather during the month prevented the ground from drying up sufficiently to enable ploughing to be started, but it is expected that early next month tillage operations will be under way throughout the province.

*Lumbering.*—The farmers have about finished getting out their fence rails and some shipping was done, although the bad state of the roads interfered considerably with this work.

*Fishing.*—On Easter Monday, the lobster fishing season opened in this province, but so far stormy weather has kept the catch down. There will be more boats, more traps and more fishermen at work this year than last, but the law prohibits the licensing of additional factories. Small catches of herring have been made, but ice around the shores prevented the fishermen from putting out their nets to any great extent.

#### CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during April showed improvement over the previous month,

*Manufacturing.*—The few factories were conducted under normal conditions.

*Railroad construction and employment.*—The work of re-building the new railway shops and other works was resumed the latter part of the month. Work was also started on the erection of a new water-works tank in the railway yard. The change of time-table about the middle of the month meant the putting on of additional trains and the giving of additional employment.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and paper-hangers, plumbers stonecutters and builders' labourers were active.

*Metal.*—Iron moulders, workers and helpers, machinists and engineers, steam engineers, electrical workers, linemen, were active. Bicycle workers were busy.

*Woodworking.*—Woodworkers, upholsters, carriage and waggon makers, car-bilders and coopers were active.

*Printing.*—Printers, pressmen, and bookbinders were busy.

*Clothing.*—Journeyman tailors, garment workers, and boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and tobacco workers were active.

*Leather.*—Tanners, curriers and saddlers were active.

*Miscellaneous.*—Barbers, clerks, railway employees, hotel and theatre employees and laundry workers, were active.

*Transport.*—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, trackmen and freight handlers, steamboat men and firemen, longshoremen, teamsters and express men were active.

*Unskilled.*—There was a fair demand for labour.

#### MONCTON, N.B., AND DISTRICT.

*Mr. J. C. Graves, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

No marked increase of activity in the labour market occurred during April,

conditions being much the same as in March and the same month last year. Unusually cold weather prevailed until the 23rd inst., delaying outside operations, while the unfavourable state of the roads rendered local trade quiet. The quarantine upon the city schools and churches caused by the appearance of a mild form of smallpox was raised during the second week of April. In the city, building operations have so far been confined to repairs and additions, but at Sunny Brae some half dozen houses are already under construction. Among the buildings to be erected here this season are the Bank of Montreal building, a large stone structure, excavation for the foundation of which has already commenced, and a large R. C. church at Lewisville. Contracts for a number of dwelling houses have been let and building operations will be extensive. Corporation work will also be extensive, the growth of the city west towards the I.C.R. shops and the consequent laying out and opening up of new streets necessitating a large amount of sewer, water and street work.

The Board of Trade at a recent meeting decided to memorialize the Dominion Government asking for a grant of \$50,000 for a Maritime Exhibition in 1909, also for the erection of an armoury and drill shed building. The matter of having a merchants' week was also decided on. River navigation opened on the 21st and on the 24th inst. the Str. Empress made the first trip from Summerside, P.E.I. to Pointe du Chêne. The Str. Wilfred C. is expected to start on her regular trips down the river on May 1st. Retail trade has been up to the average, and wholesale trade steady, with good promise of expansion. Much activity exists in real estate and a large number of transfers have taken place. The demand for houses has assumed large proportions, and the supply being still inadequate, rents show an upward tendency. The retail price of bread on the 12th advanced to 8 cents per two-pound loaf. The city by-law calling for the stamping of loaves with the weight and maker's initials is to be enforced. At the new I.C.R. shops the labourers have been laid off until the ground admits of handling. Construction work upon the locomotive shops

has been rapidly carried on, and advertisements for 200 carpenters issued by the contractors, who expect to have over 600 men of all classes at work by the middle of May.

The Saturday afternoon half-holiday for the I.C.R. shopmen commences May 2nd and continues until October.

No unrest has been noticed in labour circles and no changes in wages or hours of labour.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were as a rule quiet, no spring work having commenced. Maple sugar making was in progress in some sections. The season was favourable for this industry. Candy sold at 20 cents, cream sugar at 20 cents, common at 15 cents, and syrup at \$1.25 per gallon. Beef was scarce but hay was plentiful, retailing loose at \$9.00 to \$11.00. Oats were scarcer at 60 cents, potatoes at 40 cents per bushel, butter at 32 cents to 35 cents, and eggs at 18 cents to 20 cents.

*Fishing.*—Quietness prevailed.

*Lumbering.*—The mills were active manufacturing the winter's output. Little shipping has been done as yet.

*Manufacturing.*—All local factories were in active operations.

*Mining.*—Quietness prevailed.

*Railroad construction and employment.* One hundred Italian navvies started work on the 22nd double tracking the I.C.R. from Moncton to Painsic Junction. This contract was started last season, but owing to wet weather and the scarcity of labour, operations were suspended. Construction work upon the G.T.P. is also going rapidly forward.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters and joiners were quiet as also were masons and bricklayers. Painters and decorators were very brisk and in demand. Plumbers were busy, with builders' labourers quiet.

*Metal, engineering and shipbuilding.*—All lines were fairly well employed, with the outlook bright.

*Woodworking and furnishing.*—Woodworkers were active as also were the varnishers, polishers and car builders. Car-

riage makers were quiet, and barrel factory hands very active.

*Printing and allied.*—Very active conditions in all branches prevailed.

*Clothing.*—Journeymen tailors were active, the supply of first-class men being insufficient. Garment workers were also very active and in good demand. Milliners and apprentices were very busy.

*Food and tobacco preparation.*—Butchers and bakers reported conditions normal.

*Leather.*—Quiet conditions prevailed. Harness workers, however, were busy.

*Miscellaneous.*—Barbers, clerks and stenographers had steady work. Hotel, restaurant and theatre employees were busy and laundry workers were active.

*Transport.*—Large quantities of freight were moving. Passenger traffic was fairly active. The usual spring influx of emigrants called for a large number of special trains, and so made a good month for railway crews. Carters, teamsters and express men were busy.

*Unskilled labour.*—The backward weather caused but little demand for this class of labour. Matters are brightening at the close of the month and indications point to very active conditions throughout the season.

#### DISTRICT NOTES.

*Hillsboro.*—The plaster mill and wood-working factory have both resumed operations after having been closed for some time. A new post office and customs building, costing in the vicinity of \$10,000, will be constructed during the coming summer.

*Dalhousie.*—This town has sold \$62,000 worth of bonds and will ask authority to issue \$13,000 to complete its new water system. The Dalhousie Lumber Co. is erecting a large saw-mill and rossing mill, besides building an addition to its shingle mill. When completed this industry will give employment to about 200 men.

*Sackville.*—Surveys for the projected wharf to be built here during the coming season are being made. Work upon the new Royal Bank building has commenced and a gang of men are at work in the freestone quarries hewing the stone.

## ST. JOHN, N. B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

During April the labour market improved considerably and outside work was proceeded with vigorously. Although there are not many new buildings being erected, a large quantity of repairs are being made. Plans have been prepared and tenders called for the erection of a fire-proof warehouse at Union Point. This building will be two stories high and 90 x 30 feet. Plans have also been prepared for a new building for the Bank of New Brunswick at St. John West. The building will have a frontage of 35 feet and a depth of 62 feet, and will be built of stone, brick and concrete. The new I. C. R. flour shed at York Point has been finished. It is 202 feet long on the water front and 205 feet on the land front. The Price & Shaw carriage factory on Main street, which has been lying idle for some time, has been leased to the Boston Carriage Company with the option to purchase. Supplementary letters patent have been issued to T. McAvity & Sons, Limited, permitting the increase of capital stock from \$600,000 to \$1,000,000. Bank clearings for the four weeks ending April 23 were \$4,488,266, and for the corresponding period last year \$4,920,607, being \$432,341 less in 1908 than in 1907 and \$184,091 greater than for the four weeks ending March 26 of the current year. The transactions at the Government Savings Bank during the year ended March 31 were: Deposits, \$717,358.94; withdrawals, \$857,662.66. The balance due depositors at the St. John agency on March 31, was \$5,713,786.12. Up to April 25 there was filed at the Custom House cargoes for 101 steamers. These vessels took away Canadian goods valued at \$14,367,697, and foreign goods valued at \$6,823,446, making a total of \$21,191,143. These figures show an increase of \$1,837,904 over the value of the total shipments of last year. The wheat shipments were about 6,129,000 bushels. Our trade with the United States for the

quarter ending March 31 shows a great decline. Shipments for the quarter were \$337,200.24 less this year than in the same quarter last year. The total volume of the year's business is less by \$57,000 than the total business of the March quarter of 1907.

The balance sheet of the city on the 31st of December showed a balance of assets over liabilities of \$1,604,394.96.

The St. John Railway Company, at a depth of 250 feet, have tapped a good supply of pure water in their yard, but not enough for their purpose. Boring will continue until the flow is sufficient. Two new closed cars have been ordered by the company, to be delivered in August. Some of the mills have commenced sawing, and the rate of wages has been reduced 10 per cent. from that of last year. The shingle sawyers say they will not work for less than \$2.20 per day, the rate paid last summer. The master painters refused to grant the journeymen an increase of 25 cents per day, and the men went out on strike April 1. After being out one week, the increase was granted. The rate now is \$2.50 per day. The strike of printers on the Telegraph and Times has not yet been settled. Men have been brought from New York, Montreal, Toronto and Truro to take the strikers' places. A new Longshoremen's Society was recently organized in the north end, some of the promoters going out from the Longshoremen's Association, among whom was a man who acted foreman for the Donaldson line during the winter. The agent was notified of this man's expulsion from the Longshoremen's Association April 21, and that if he was continued as foreman, they would be compelled to withdraw all association men. The agent refused to interfere in the dispute, with the result that the new society men finished loading the S.S. Tritonia.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The price of clover seed is exceedingly high this year. Mammoth red clover is selling at 23 cents per pound, while last year it could be purchased for 12 cents. White clover costs 18 cents per pound wholesale, its former price

being 10 cents. Reports from Carleton County say that potatoes have advanced in price, \$1.40 per bushel being now asked. Hay remains at \$8. Oats are quoted at 45 to 48 cents. Dealers are paying 14 cents for eggs and 23 to 25 cents for butter.

*Lumbering.*—The annual meeting of the Lower Southwest Miramichi Log Driving Company was held at Fredericton on April 2. The driving was done last year at a \$3,000 profit. The Upper Southwest Miramichi Log Driving Company also elected directors. It is expected that 40,000,000 feet will come down the Southwest Miramichi this spring. The Stetson-Cutler Company, St. John, will bring down to the local booms on the St. John River about 23,000,000 feet; the Cushing Company's cut is 18,000,000 feet; Murray & Gregory have 14,000,000 feet; John E. Moore has 7,500,000 feet; The Hilyard Company has 7,000,000 feet; Charles Miller, 7,000,000 feet; Randolph & Baker, 4,000,000; John A. Morrison, 3,000,000 feet of cedar. Donald Fraser & Sons expect to have 300,000 feet of logs to be rafted. There will be about 83,000,000 feet of logs to be driven between Grand Falls and the boom limits. It is not expected there will be much driving before May 1. Wages of \$1.75 and \$2.00 are offered, with plenty of men available.

*Railway construction.*—It is stated that the section of the Grand Trunk Pacific Railway between Tobique River and Grand Falls, to be built under contract awarded to Willard Kitchen, of Fredericton, is the heaviest work on the road east of the Rocky Mountains. There are 31 miles to be built under this contract, and the job will cost between \$1,500,000 and \$2,000,000.

*Fishing.*—Gaspereaux are plentiful on the Kennebecasis. Large quantities have been brought to the city, and the price has dropped to 40 cents per hundred.

#### CONDITION OF PARTICULAR TRADES.

*Building.* — Painters and decorators were busy. Other branches were active.

*Metal.*—Iron moulders, iron workers and helpers, machinists, steam engineers, electrical workers and linemen, blacksmiths, boilermakers and sheet metal

workers were busy. Horseshoers were active.

*Woodworking.* — Woodworkers were busy. Shingle weavers were dull.

*Printing.*—Printers and pressmen were busy except those out on strike. Bookbinders were active.

*Clothing.* — Journeymen tailors were busy.

*Food and tobacco preparation.*—Bakers and confectioners were busy, with cigar-makers active.

*Miscellaneous.* — Broom and brush makers were busy.

*Transport.*—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen and freight handlers reported business active. Steamboat men and firemen have been busy since opening of navigation. Ship labourers were active, and street railway employees busy. Teamsters and expressmen were very busy.

*Unskilled labour.*—This class was active.

#### DISTRICT NOTES.

*Bathurst.*—The first concrete sawmill in New Brunswick will be erected here by the Bathurst Lumber Company to replace the one recently burned down. The mills at this place will not start sawing until the middle of May. The Nepisiguit Lumber Company has added several shingle machines to its plant, which may be run day and night this year.

*Campbellton.*—Messrs. Jones & Schofield, of St. John, wholesale grocers, have completed arrangements for the erection of a new warehouse.

*Fredericton.*—On April 6 the City Council heard a delegation from the Hartt Boot and Shoe Company, who asked for a cancellation of a mortgage held by the city against the company for \$10,000. At a special meeting held subsequently the council decided to cancel the mortgage if the company guaranteed to continue in business. The three engineers at the pumping station were granted an increase of salary of \$50 each. April 24, the Chief Commissioner of Public Works awarded several bridge contracts.

*Millerton.*—James Beveridge has secured a site for his pulp and paper mill.

in this place, and is letting contracts for the building, and securing the necessary machinery.

### QUEBEC, QUE., AND DISTRICT.

*Messrs. Edward Little and P. J. Jobin, correspondents, reported as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

The prevailing cold weather somewhat retarded outside work. Navigation was open to coasting steamers throughout the month, and several vessels arrived from gulf ports on April 3 and later. Three coal-laden ocean steamers arrived on the 21st, destined for Montreal, but were forced to lay up until the break-up of the ice in the St. Lawrence. A number of new buildings are being started, though work has not been active in this connection owing to weather conditions. There are virtually no unoccupied houses in the city, rents being slightly higher than last year. The coming tercentenary celebration is expected to make trade very active during May, June and July, and the housing of the large number of visitors expected, has materially increased rentals. A large temporary hotel is contemplated, and tenders have been called for the costumes which will be required for the various pageants. An average of 720 men applied nightly at the police station for lodgings during April, all being recent arrivals from Great Britain. Negotiations with regard to the wages scale for the coming season were conducted between the Canadian Pacific Railway Company and local ship labourers.

The finance committee of the city council have requested an appropriation of \$820,000 for 1908-09, compared with \$800,000 for 1907-08.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy making maple sugar. Weather conditions were somewhat unfavourable during April except in the last two weeks. The output will quite equal if not exceed that of 1907.

*Lumbering.*—The ice still holds on the

lakes and rivers, and little progress has been made with the drives, though a number of men have been sent out. The cut will be smaller than last year owing to the scarcity of men in the early part of the season and the heavy snowfall in February. There was some difficulty experienced in obtaining men for the drives.

*Railway construction.*—Camps which were closed for the winter have again opened, and employment will soon be very active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters, painters and builders' labourers were busy. Bricklayers were active. Lathers and plumbers were quiet.

*Metal, engineering and shipbuilding.*—The month was active, boilermakers and shipbuilders being busy. Electrical workers and linemen were active.

*Woodworking and furnishing.*—A busy month was reported.

*Printing.*—Printers, pressmen and bookbinders were active.

*Clothing.*—Tailors and garment workers were busy, but boot and shoe workers were quiet.

*Food and tobacco preparation.*—Butchers and bakers were busy, with cigarmakers quiet, and ice cutters dull.

*Leather.*—Quietness prevailed.

*Miscellaneous.*—The month was quiet.

*Transport.*—Railway employees were quiet, with the exception of trackmen, who were busy. Steamboat men were busy fitting out for the season of navigation. Ship labourers had not yet begun their season's work. Cab drivers, etc., were dull, but teamsters were active.

*Unskilled labour* was dull.

### THREE RIVERS, QUE., AND DISTRICT.

*Mr. Joseph J. Ryan, correspondent, reported as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were less active in April, 1908, than in the same month last

year, owing to the heavy snow fall in the district, and the rivers remaining frozen until the close of the month. Now that the St. Lawrence is clear from Montreal down, several vessels are expected. There was considerable activity on the wharves during the last two weeks of the month. At least fifty workmen were employed during April on dredges, tugs and other vessels wintering on the St. Lawrence. The corporation employed a larger number of men this year than in previous years for the removal of snow and ice from thoroughfares. The civic valuation this year amounts to \$7,000,000 and shows an increase of \$300,000 over last year. The revenue of the city will be about \$203,000. The Canadian Pacific Railway Company was erecting large sheds on the wharf leased to them by the harbour commissioners. Everything points to an increase in activity in this port during the season of navigation. Transportation companies reported a quiet month. Business was not active, owing to the bad conditions of the country roads in this district. Although there appears to be more idle men than last year, rates of wages are unchanged. There were no strikes or lockouts during April.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy making maple syrup and sugar, of which a quantity greatly exceeding that of last year has been made. Ploughing has not commenced yet but will be active in a few days as the snow is fast disappearing.

*Fishing.*—Dullness prevailed.

*Lumbering.*—Hundreds of men have been hired by the lumber firms and sent up the St. Maurice river for the driving of logs on that river and its tributaries. Saw-mill owners were busy on preparatory work.

*Manufacturing.*—Although claiming to have less orders than last year on hand, industrial establishments were, with one exception, all working to full capacity.

*Railroad construction.*—Fairly busy conditions were reported. The Canadian Pacific Railway Co. was reinforcing bridges and doing other repair work on the St. Maurice Valley Railway. Con-

struction on the Grand Trunk Pacific Railway line was in progress.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were fairly busy after April 15. Carpenters, lathers and painters were busy all month. Gasfitters and stonecutters had a quiet month.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers, machinists, engineers, etc., were fairly well employed, with blacksmiths, shipwrights and bicycle workers busy. Horseshoers and jewellers had a good month.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers, carriage and wagon makers were active.

*Printing.*—The allied trades were fairly busy.

*Clothing.*—Trade was active.

*Food and tobacco preparation.*—Activity prevailed.

*Leather.*—These trades reported plenty of work.

*Miscellaneous.*—The month was a fairly busy one.

*Transport.*—Railway employees were quieter than last year at this season. Cab drivers, teamsters, etc., were fairly active, especially towards the close of the month.

#### SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions generally, were considerably more active during April than in March. Building operations were begun and employment given to both skilled and unskilled help. The number of unemployed is now small, and there is every reason to believe that by another month there will be none. The Paton factory, which was closed from the 11th to the 27th of April, has resumed work on full time. So far, this has been the only concern that has completely closed down

during the winter. While the Jenckes and Rand Drill shops have not yet got back to their full staff there has not been so many men laid off during April as in March. There is plenty of work in sight, if the firms mentioned were at liberty to go ahead. Work has been commenced on the new works for the Fairbanks Company, the contract being in the hands of a Montreal contractor. Work has also been resumed on the new hospital in East Sherbrooke, and it is expected to have the building finished by October. This building will not cost less than \$150,000. Work is also being rushed at the new drill shed, and a large staff of stonecutters, builders and labourers are given employment. Work has been commenced on several private dwellings, so that building in Sherbrooke this season will be fully up to the record of last year. The city waterworks department will commence some large improvements at an estimated cost of \$150,000, and will give employment to a large number of men throughout the summer. Wholesale and retail trade was fairly good for this season of the year.

At a meeting of the city council on the 24th, it was decided to take over the Sherbrooke Power, Light and Heat Co.'s plant on the 1st of May. It was decided, owing to the present condition of the money market, not to accept the offers made for the city's debentures, but to make a loan with the Eastern Townships Bank for a period of four months at 6½ per cent. The total purchase price was \$250,000, but \$80,000 was in bonds of the company, which the city will assume. The city now owns and operates the water, electric light and gas systems, which has been secured after negotiations extending over ten years. The waterworks, since the city assumed control, has been a complete success. The rates have been reduced one-third, and the fire protection has been much improved.

The Eastern Townships immigration agent booked 232 persons during his visit to England last winter. There is still an active demand for farm help, and the government has appointed local agents at the different centres in the townships to place immigrants.

The city council has made a grant of \$2,000 to the Eastern Townships Exhibition.

There has been no unrest in the labour market.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have had a splendid sugar season and large shipments have been made. Spring work is now being rushed. There is an ever-increasing demand for farm help.

*Lumbering.*—Operations in the woods are now about over, and preparations are being made to get the drives down. The quantity of pulpwood marketed this year is much in excess of that of several years past. Last year especially, there was a scarcity of cars, which left piles of pulpwood on the sidings. With plenty of cars this year, the railways have caught up. March was an exceptionally heavy month on the Q. C. R. No less than 2,700 loaded cars of asbestos, pulpwood, etc., came through from the central Quebec district for points in the United States.

*Manufacturing.*—Factories are now running full time.

*Railroad construction.*—The rush on the C. P. R. through this section is over for the season and several crews have been laid off.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, plumbers, stonecutters, carpenters and joiners were active. Painters and paperhangers were busy.

*Metal.*—Moulders, iron workers and machinists were quiet. Electrical workers and linemen were active. Jewellery workers were busy.

*Woodworking.*—Woodworkers, upholsterers and carriage workers were active. Pattern makers were quiet.

*Printing.*—Printers, pressmen and bookbinders were busy.

*Clothing.*—Journeymen tailors were busy. Garment workers were quiet.

*Food and tobacco preparation.*—Bakers and confectioners were quiet, with ice cutters and cigar makers active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and laundry workers were active.

*Transport.*—Locomotive engineers and firemen were quiet, with cab drivers, teamsters and expressmen active.

*Unskilled labour* was quiet.

#### DISTRICT NOTES.

*Lake Megantic.*—The Lake Megantic Furniture Company has gone into liquidation. The works are now closed and all work is suspended.

*East Farnham.*—The farmers in this section are reaping a harvest this spring making sugar. The weather has been favourable for sap. Indications point to a backward spring.

*Magog.*—Merchants are complaining of the dullness of trade at present and scarcity of ready cash. The print works, which have been closed down for nearly four weeks, are expected to resume operations.

*Brompton.*—The O. M. R. are now preparing to build a line from Windsor Mills here. As soon as the frost is out of the ground, work will be commenced.

*Sutton.*—The scarcity of farm help is still on and a good many of the farmers are at present in need of good help. The mayor of the town says twenty-five labourers could get work here. The scale of prices for good men is about \$20, though an occasional picked or tried man may get a slightly higher rate. The scale of prices for men coming in here from the old country ranges from \$5 to \$15 for beginners, according to experience and skill in doing farm work.

*Rock Island.*—A large party of Scotchmen have arrived at Beebe Plain to work at the granite quarries.

*Capelton.*—The Albert Mine, so long in operation here, is about to close down. A considerable number of the miners have already ceased work, and it is understood that within a very short time operations in the mine will entirely cease. Mining operations at Eustis are also understood to be very quiet, a number of hands being off. This is largely due to the financial conditions and the unsatisfactory state of the copper market. The Albert Mine, however, is closing

chiefly on account of lack of ore. The Capelton mines originally consisted of a group of three mines, one known as the Lower Canada or Hartford, now the Eustis or Crown mine, another the Capel or Eldorado, and the third the Albert.

#### ST. HYACINTHE, QUE., AND DISTRICT.

*Mr. V. Phaneuf, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The April market for labour was rather dull, the effects of the financial stringency being still felt in certain branches of industry. The boot and shoe factory will not recommence operations until the 8th or 15th of May next. The Cote Company was fairly busy, with nearly a full staff. The organ factory was very busy. Sash and door factories were busy. The iron industry worked full time, and conditions were improving rapidly. The leather industry was fairly active, an improvement having taken place. The agricultural implement factory was busy. The demolition of the Catholic cathedral employed much unskilled labour, and in a short time will give employment to a number of building trade branches. Railway construction on the Ste. Rosalie junction gave work to many. The wages paid were \$1.50 per day, and from May first they will be \$1.75 per day. The St. Hyacinthe Seminary also proposes a considerable enlargement of its present buildings. The confectionery factory had a good month. Retail trade was somewhat dull owing to unsettled market conditions. The opening of spring has improved conditions among milliners. The wholesale trade was still suffering from unfavourable conditions, and commercial travellers were not as successful as last year. The city corporation will soon commence the large improvements to be completed this summer, and it was thought that unskilled labour would find plenty of employment. The supply, nevertheless, will be quite equal to the demand, there being a number of men

awaiting work. Banks reported a fair month, with fair collections. The distribution of prizes to pupils who attended the school of arts took place on April 8. The average attendance at the school was St. Hyacinthe, 119; Sherbrooke, 64; Quebec, 62; Levis, 52; Three Rivers, 50; Lachine, 36; St. Johns, Que., 30; Sorel, 25; Valleyfield, 23, and Fraserville 12. Work at the Penman Company's factory was somewhat quiet. There were some differences between the management and some of the employees during the month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Prosperous conditions prevailed in this industry, the price of produce being high, though a decrease took place in a few instances, while increases ruled in others. On March 20 an exhibition of horses from the surrounding district and the city itself took place at St. Hyacinthe. The quality of the exhibits was of the highest. There was abundant work for farm labourers, but the supply was equal to the demand.

*Manufacturing* generally was quiet, several factories having reduced their output.

*Railway construction.*—Activity has recommenced. The laying of steel on the double track of the Grand Trunk Railway between St. Lambert and Ste. Rosalie was commenced, and several hundred men will be employed until next autumn.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Plumbers were active, but the other branches were quiet.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, machinists, engineers and electrical workers were active. Other lines were busy.

*Woodworking and furnishing.*—Busy conditions prevailed.

*Printing.*—Great activity was reported.

*Clothing.*—Tailors and garment workers had a busy month, night work being necessary in some cases, but boot and shoe workers were dull.

*Food and tobacco preparation.*—All branches had a very good month.

*Leather.*—This group was well employed.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel, restaurant and laundry employees had an active month.

*Transport.*—Railway employees had a good month, as also had carters and teamsters.

*Unskilled labour.*—This class had a dull month, but the outlook is for an abundance of work.

#### DISTRICT NOTES.

*St. Johns.*—The Singer Manufacturing Company has shut down for a couple of weeks for repairs. It was stated that within one month this company had exported 40,000 sewing machines. It was stated that the pottery works are to be increased so as to double production.

*Sorel.*—As soon as the River Richelieu is clear of ice, a dredge and a steel vessel will be launched from the St. Joseph yards; these two vessels were built during the winter. The dredge will be employed in the harbour of Montreal. The steel steamer will be commissioned for the serving of lighthouses in the great lakes with supplies. The dredge Laval, the steamer Maisonneuve, stone-raising dredge No. 3, and some other vessels were extensively repaired. Excise duties collected in Sorel for the fiscal year 1907-08 were \$32,588.17, compared with \$35,407.24 in 1906-07, or a decrease during the fiscal period of \$2,819.07.

#### MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Pelletier, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The longshoremen as a body have accepted the conditions of the Shipping Federation, which are the same as last year. A bonus of two and a half cents per hour, in addition to the ordinary wages, payable at the end of the season of navigation to those among the longshoremen who work continuously through-

out the season, will be paid. In accordance with this arrangement, the longshoremen, in addition to their weekly salary, will receive a slip or *bon* for the number of hours worked for each company during the season and at the end of the season will get the amount of two and a half cents per hour for all hours worked. The wages for the season will, therefore, be for longshoremen  $27\frac{1}{2}$  cents per hour during the day and  $32\frac{1}{2}$  cents per hour at night. Coal shovellers will be paid  $32\frac{1}{2}$  cents an hour day and night.

The American Can Company proposes erecting a tin-can factory in the city at a cost of \$250,000.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were better employed than during March. Carpenters, painters, and plumbers were well employed, but bricklayers, masons, stonecutters and builders' labourers were quiet.

*Metal, engineering and shipbuilding.*—Quietness prevailed.

*Woodworking and furnishing.*—Conditions were quiet.

#### DISTRICT NOTES.

*Cote St. Paul.*—The works of the Mount Royal Spinning Company, nearing completion, will, when operations begin about the end of May, employ 1,700 hands. The various parts of a 1,500 horse power engine for the Company's new factory have been received from the makers. The total net weight of this engine is over 500,000 lbs., one piece alone weighing 35 tons.

*Municipality of Longue Pointe.*—The Vulcan Portland Cement Company is building large workshops which will enable the company to produce a thousand more barrels of cement than at present, viz., about 100 weekly. These works will give employment to numerous workmen.

#### MONTREAL, QUE., AND DISTRICT.

*Mr. Gustave Audet, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

On April 1st, 800 men employed in the Angus shops were thrown out of employ-

ment, having finished the work on which they were engaged.

At a meeting of longshoremen held at the beginning of the month, at which 350 workmen were present, it was resolved that the bonus system of  $2\frac{1}{2}$  cents per hour be abolished, and that wages be fixed at 30 cents per hour net for day and 35 cents per hour net for night work. Representatives of the different shipping companies held a meeting also, and decided to pay the same wages as last year, and to continue the  $2\frac{1}{2}$  cents per hour bonus system, on the ground that the system had already been successful and promised to be more so during the present season, now that it was better understood by the men, who in some cases received from \$20 to \$26 at the end of the season in addition to their regular wages.

The financial report of the Montreal Street Railway Company for the six months ended March 31, 1908, showed an increase in gross receipts of \$148,088, and an increase in net receipts of \$75,879, as compared with the corresponding period of 1907.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—There was a slight increase in activity, but conditions were generally quiet.

*Metal, engineering and shipbuilding.*—Electrical workers, linemen and horse-shoers were active. Machinists, steam-engineers, metal polishers, brass workers sheet metal workers and tool sharpeners had a good month. Iron moulders, iron workers, blacksmiths and helpers were quiet. Ship builders, shipwrights and caulkers were quiet in the beginning of the month, but became more active towards the end, while jewellers and watch-makers were more active in the beginning than at the end of the month.

*Woodworking and furnishing.*—Dullness prevailed.

*Printing.*—These crafts were active.

*Clothing.*—Hat makers were active; tailors and garment workers generally had a good month, and boot and shoe workers were slightly more active than in March.

*Food and tobacco preparation.*—With the exception of cigarmakers and to-

bacco workers, who had only a fair month, all lines were active.

*Leather.*—A good month was reported.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel, restaurant, theatre and laundry workers were active. Furriers had a good month.

*Transport.*—Steamboatmen, steamboat firemen, ship labourers and long-shoremen were busy preparing for the opening of navigation. Cab drivers, hackmen, carters and draymen were busy. Street railway employees were active; towards the end of the month, teamsters were very active.

*Unskilled labour* was dull.

### HULL, QUE., AND DISTRICT.

*Mr. Rodolphe Laferrière, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

As a rule April is a busy month, and this year was no exception, employees in industrial establishments working full time and unskilled labour being in demand for preparatory work prior to the opening of the sawmills and navigation and the usual spring cleaning up of the city. Available hands in future months will be fully absorbed by the demand. Factories generally were busy, except in the mica industry, in which stagnant conditions have prevailed for the past few months, owing to a difficulty between producers and buyers as to the sorting of the material, the former refusing to buy small mica along with the large. Mine operators were overstocked, and no settlement appears in sight. In the meanwhile, several hundred young girls have been thrown out of employment, while a couple of hundred men at the mines had to stop work. The girls were gradually absorbed by other factories. The demand for cement was very great and the International Company's plant was running to its full capacity, burning 125 tons of coal per day in order to turn out 2,200 barrels every 24 hours. Even this output was not sufficient to meet the demand. The shipping of lumber by water started on April 28. The Ottawa Forwarding Company's fleet of 60 barges and 16 tugs had partly left its winter quar-

ters in the last week of the month, the full staff of about 800 men being at work. At the shipyards there was an abundance of repair work and the usual staff of 40 carpenters, caulkers and blacksmiths were actively employed. Mr. J. R. Booth's sawmill will commence operations on May 1; 1,200 men, the majority from Hull, will find employment in this mill. Gilmour and Hughson's mill, employing about 300 hands, will commence sawing on May 4, while the Eddy Company's small sawmill, employing about 100 men, will begin sawing in the first week of May. The Seward Lubricating Company worked steadily. Shipments for April included 8 tons of tallow to Toronto and special lubricants valued at \$3,000 to Victoria, B.C., Hawkesbury, Que., points in Nova Scotia, and to the Hull trade. The company manufactures 18 varieties of lubricants, and its sales average \$3,000 per month. A newly incorporated company, the H. Dupuis Company, has erected a large stone crusher with a capacity of 500 tons per day in its quarries in Hull. The company will provide the city of Ottawa with about \$40,000 worth of crushed stone this season, and will also furnish the Canadian Pacific Railway Company with all the stone it will require in the Ottawa district. Some 100 men, including 50 teamsters were employed. Railway construction work was resumed on the Canadian Pacific line through Hull. The filling in of a large trestle, commenced last fall, gave employment to about 50 men on the dump, and about the same number in the pit. The usual spring wages, that is an increase from \$1.25 to \$1.50-\$2.00 per day, will go into effect on May 1st, automatically. There have been no increases or reductions in wages, and the outlook is favourable.

### OTTAWA, ONT., AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during April showed an improvement, especially among unskilled workmen.

Several hundreds of men were sent away

by lumbermen to drive logs; building became active, and the civic corporation took on a large number to clean streets and construct sewers. Lumbermen have found out that a careful process of grading is advantageous in engaging riverdrivers. A few years ago, with the exception of employees with extra responsibility nearly all were paid alike. Now the hiring agents are willing to pay \$48 or \$50 per month for expert men, while the ordinary class are hired between \$30 and \$35. The large lumber manufacturers keep a record from year to year of river men, and retain the most skillful at a special wage realizing that an industrious and well trained man may easily be worth two others, though the latter be not novices.

There was much unrest among building labourers. Last year these men formed a union, being a branch of the International Protective Union of America, which after one day's negotiations with the contractors of Ottawa closed an agreement to work at 25 cents an hour. At the same time the building labourers became recognized by other labour unions. On April 22nd, a strike of 30 building labourers and 25 bricklayers occurred on the new Y.M.C.A. building, Metcalfe street. Several non-union men had been employed as building labourers at 15 cents an hour and went on strike for the union rate. Nearly all joined the union, and all the organized labour on the works went on strike in sympathy.

Some dissatisfaction was expressed by employees of the mechanical departments of the local railways on account of men being laid off. The Canadian Pacific Railway Co. announced that there would be no reduction of the staff in Ottawa.

The number of building permits issued is large and indicates that a good deal of money is to be invested in dwellings that will rent at moderate rates. The largest building in progress is the new museum, which is giving work to 100 labourers, 86 stonecutters, 30 stonemasons and 6 bricklayers. All union bricklayers and masons in the city receive 47 or 48 cents an hour, and after May 1st will be paid 50 cents.

The price of milk which was reduced to seven cents on April 1st, will be lowered to six cents on May 1st.

The Chief of Police of Ottawa granted permission to the City Engineer to prosecute work on Sunday putting in a water main under the Rideau Canal in order to lay the pipe before the water was let in the canal on April 28.

Material has arrived for the steel work and furnace of the municipal asphalt plant.

The Children's Aid Society of Ottawa, has opened a detention home for young offenders, and reports that the institution is doing much good.

The Ottawa Allied Trades and Labour Association has appointed a committee to consider the advisability of placing labour candidates in the field for the next provincial election.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Produce is high priced, except eggs, which were lower toward the end of April. Meats are very high.

*Lumbering.*—Lumbermen are engaged with the drive, and expect a favourable season with high water. Shipping promises to be active, beginning early in May.

*Railroad construction.*—The Ottawa Electric Railway Company has begun the construction of a branch line to the Experimental Farm.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Active conditions ruled.

*Metal.*—Quietness prevailed, with shipwrights and caulkers busy.

*Woodworking.*—Activity prevailed.

*Printing.*—Trade was active.

*Clothing.*—Conditions were steady.

*Food and tobacco preparation.*—These trades were quiet.

*Leather.*—Dullness prevailed.

*Transport.*—Railway employees were dull, but street railway employees were active.

*Unskilled labour* was fairly well employed.

## KINGSTON, ONT., AND DISTRICT.

## CONDITION OF LOCAL INDUSTRIES.

*Mr. Wm. Kelly, correspondent, reported as follows:—*

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions are very satisfactory in this city at the present time. May 1st finds Kingston free from strikes, the members of the various labour organizations not having asked the employers for any further concessions or considerations. No marked features characterized the labour market during the month of April. In the earlier part of the month it was estimated that there were upwards of three hundred unemployed men on the streets. The quarry, which was opened to provide work for the unemployed during the winter, was closed. While in operation the quarry provided work for some sixty-five men altogether, forty men being employed at one time. The scheme proved a decided success. With the opening of navigation, the commencement of building operations, civic work, etc., relief was accorded and the number of the unemployed materially reduced. About the middle of the month the city's scraping machine began the annual spring cleaning. The work will occupy a month or so and will afford much employment. The Easter season was a busy one in Kingston; milliners, etc., reported an excellent business.

During the month the Hon. G. P. Graham, the Hon. Wm. Harty and Mr. Chapleau, engineer of the Public Works Department, waited upon the Hon. Mr. Pugsley, Minister of Public Works, and submitted plans, estimates and other reports, asking for improvements to the main channel of the St. Lawrence river, between Kingston and Brockville. The expenditure necessary to make the proposed improvement will amount to about \$100,000.

The tax rate has been fixed at twenty and one-half mills, an increase of half a mill; this increase was necessitated largely by the increased needs of the schools.

*Agriculture.*—Farmers were actively employed in all branches of work incidental to spring, although the weather is rather backward in this district.

*Fishing.*—This industry was very active.

*Lumbering.*—The lumbering industry was active, supplying material for building purposes.

*Manufacturing.*—Activity was the rule in all branches.

*Railroad construction and employment.* Conditions of employment were fairly active.

## CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were becoming active. Painters were especially in demand, notwithstanding that many were found among the new arrivals.

*Metal, engineering and shipbuilding.*—Activity prevailed in all branches.

*Woodworking and furnishing.*—Extremely active conditions prevailed in the woodworking and allied trades.

*Printing.*—Printers were busy.

*Clothing.*—These trades were very active.

*Food and tobacco preparation.*—Bakers, butchers and cigar makers were busy.

*Leather.*—Tanners and curriers were active.

*Miscellaneous.*—Barbers, broom makers, laundry workers, etc., continued active.

*Transport.*—Transportation is steadily improving.

*Unskilled.*—Unskilled labour was in greater demand than in the preceding month.

## BELLEVILLE, ONT., AND DISTRICT.

*Mr. A. C. MacDiarmid, correspondent, reported as follows:—*

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were not very active during April, especially in the early

part of the month, the unfavourable weather being the main reason, but the outlook for the coming summer is bright. A large amount of building will go on, and a number of new residences will be erected, some of which are at present under way. The Lehigh Portland Cement Company added about one hundred men this month, most of whom are labourers. The plant, which will be perhaps the largest cement mill in Canada, is expected to be completed this fall. Over 300 men are now employed there. The Toronto and Belleville Rolling Mills, which have been closed down since December, resumed operations this month, giving employment to about 200 men, most of whom are skilled workmen. Work on the new \$40,000 Separate school began this month, affording work to a large number of masons, carpenters and labourers. Work was also resumed on the new drill hall, a large force of bricklayers and labourers being employed.

The Painters and Decorators' Union of this city have agreed with their employers for a premium wage of 25 cents an hour, beginning the 15th of April. The painters look forward to a brisk season as they have many contracts already. The Belleville Hardware Company have a full staff of men and intend putting a traveller on the road. A large number of men were put at work cleaning the main streets. The tax rate has been struck at 27 mills on the dollar.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.* — Considerable spring ploughing and seeding has been done. Fall wheat came through well, as did timothy, but clover will be a failure.

*Fishing* was dull owing to the heavy ice.

*Lumbering* was very quiet.

*Mining* was active in the northern part of the country.

*Railroad construction and employment* was fairly active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Nearly all branches had a fairly active month, especially carpenters, bricklayers and masons.

*Metal, engineering and shipbuilding.*—Iron moulders and helpers, machinists and engineers, brass and steel workers, boilermakers, blacksmiths, bicycle workers and horseshoers were actively employed. Horseshoe makers were well employed, the latter part of the month in connection with the rolling mills. Local shipwrights were well employed.

*Woodworking and furnishing.*—Woodworkers had a good month, although one big factory ran short hours. Carriage and wagon makers had an active month, as well as carriage blacksmiths and carriage painters.

*Printing and allied.*—Book and job printers, machine operators and pressmen were actively employed, there being no idle printers in the city.

*Clothing.*—Journeymen tailors reported an exceptionally busy month with all working. Boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and cigar workers had an active month.

*Leather.*—Harness makers had a quiet month.

*Miscellaneous.*—Barbers were active, as were delivery employees. Theatre employees were also fairly active. Hotel, restaurant and laundry employees had a busy month.

*Transport.*—Railroad employees generally were actively employed. Steamboat men were engaged getting their vessels in shape, navigation having opened on the 20th inst. Cab drivers and carters as well as teamsters had a busy month.

*Unskilled labour* was in fair demand, although there was a large number of idle men.

#### PETERBOROUGH, ONT., AND DISTRICT.

*Mr. W. J. Johnston, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions improved during the month, work having been begun on the armouries, a church and the finishing of

the Normal School and Collegiate Institute. A number of building permits were issued, but on the whole conditions were not as active as at the same time last year. While many of the trades were becoming active there were a great number of men out of employment of all classes and trades. The painters and paperhangers were generally busily employed. With the commencement of civic improvement work employment will be provided for a number. Transportation is becoming more active. All local banking institutions were doing a steady business. Wholesale and retail trade was more active. Wages remained unchanged. At a meeting of the bricklayers and masons held on the 7th instant, it was decided to adopt the eight-hour day to come into effect May 1, the wage rate to remain the same. The labour market was free from unrest.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The busy season has commenced. The maple sugar season has just closed and has been a good one. The Central Milling Company recently declared a dividend of 8 per cent. The company is composed mainly of farmers, who get the benefit of cheaper feed. The marketing of produce has been very active. Prices have been:—Butter, 30 cents; eggs, 16 cents; maple syrup, \$1.50 per gallon; potatoes, 85 cents; chickens, \$1 per pair.

*Fishing.*—Inactivity prevailed.

*Lumbering.*—The several lumber companies are sending a great number of men back to the camps to drive the logs to the sawmills. The local sawmills are beginning operations.

*Manufacturing.*—Establishments were fairly active in some departments and in others were busy. The Bell Telephone Company's new building was completed and occupied.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters and joiners, lathers and plasterers, plumbers, stonecutters and builders' labourers were active, with painters and paperhangers busy, and gas and steamfitters somewhat dull.

*Metal, engineering and shipbuilding.*—Employees had active employment, except iron moulders and boiler-makers, who were dull.

*Woodworking and furnishing trades.*—Activity prevailed.

*Clothing.*—Journeymen tailors were active, and garment workers, hat makers, boot and shoe workers busy.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters were busy, and ice-handlers, cigar makers and tobacco workers active.

*Leather.*—Active conditions prevailed in all departments.

*Miscellaneous.*—Active conditions prevailed, with laundry workers busy. Furriers were dull.

*Transport.*—Transportation during the month became more brisk, and railroad employees in all branches were better employed. Steamboat men and other boat workers are becoming more active as the season opens up.

*Unskilled.*—This class was gradually obtaining employment; its opportunities will be materially increased by the commencement of civic improvement work.

#### DISTRICT NOTES.

*Rice Lake.*—The contract for construction work on Section No. 3 of the Rice Lake division of the Trent Canal covers a lock and dam, half a mile of rock excavation, enlargement of present dam, and dredging four miles of the Trent River, at a cost of \$325,000.

*Lindsay.*—The corporation is preparing to construct additional granolithic walks.

#### TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in labour conditions in April as compared with March, excepting those due to the advance of the season and the opening of navigation. The building trades continued quiet during the greater part of the month, but

showed increased activity towards the close, through many men in all lines still remained unemployed. Manufacturing conditions were practically unchanged. Civic work has absorbed some of the unemployed unskilled labour, and many have left the city, but a large number remain out of work.

The building permits issued for March represented a value of \$838,130, as compared with \$1,508,530 for March, 1907. The total value represented by building permits issued during the first quarter of 1908 was \$1,571,223, as compared with \$3,071,831 for the corresponding period of last year.

The contract for the construction of the new western entrance to Toronto harbour has been awarded to Robert Weddell, of Trenton, Ont., for \$495,000.

A final meeting of the general committee administering the fund for the relief of distress among the poor of the suburbs was held on the 22nd. Reports presented showed that since January 30th 1,118 families in the shack districts had been relieved, most of them receiving regular weekly food supplies. Of the total number some 60 heads of families remained without work or a reasonable prospect of it. Two branches of the work undertaken by the committee will be continued in operation, viz., the free employment bureau, which had sent 153 persons to the country, and the providing of land on the outskirts to enable the shackers to raise vegetables for food, eleven acres having been secured for that purpose. The statistics of the work showed that only 14 per cent. of those relieved were Canadian born.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy with spring plowing and seeding, the work being well advanced. The fall wheat wintered well and is generally in good condition. The weather was generally favorable, and towards the end of the month rains were frequent.

*Manufacturing.*—There is a tendency towards the resumption of activity in some lines while others continue quiet, with orders light as compared with previous seasons. The Canada Foundry Co.

laid off a number of men and reduced the office staff. The difficulty of obtaining money tends to curtail operations until accumulated stocks are disposed of. In the iron trade the shipbuilding, engine building and structural steel departments, were more active than other lines.

The Blackwell Varnish Works Co. has procured a site for the erection of a factory to cost \$40,000. The Bredin Bread Co. will erect a 3-storey factory at a cost of \$60,000.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades continued quiet, though improving with the advance of the season, many still being out of work in all lines. Plumbers steam and gasfitters found trade particularly dull. Builders' labourers, who received from 25 to 30 cents per hour, appointed a committee to confer with the employers and request an advance of 5 cents per hour. The Builders' Exchange refused to consider the proposal. About 50 per cent. of the members of the Builders' Labourers Union were unemployed.

*Metal, engineering and shipbuilding.*—Machinists, moulders and blacksmiths were quiet. Boilermakers, shipbuilders, structural steel workers and electrical workers were generally well employed. Brass workers were active. Jewellers and silversmiths were quiet.

*Woodworkers.*—Furniture workers, cabinet makers, coopers, carriage workers and upholsterers had a fair month. Piano workers were quiet.

*Printers.*—Printers had fair employment. Bookbinders and lithographers had steady work.

*Clothing.*—Custom tailors were active. Garment workers were slack during the first of the month, but found trade improved towards the close. Boot and shoe workers and hat and cap workers had fair employment.

*Food and tobacco preparation.*—These trades had continuous employment, with the exception of cigarmakers who were quiet.

*Leather.*—Leather workers had a fair month.

*Miscellaneous.*—Hotel and restaurant employees, barbers and laundry workers

had steady work. Clerks and salesmen were fairly active, but many were out of work.

*Transport.*—Railway and street railway employees, teamsters and expressmen were active. Sailors and longshoremen had fair employment towards the end of the month.

*Unskilled labour.*—There is still remaining a large surplus in excess of the local demand.

#### DISTRICT NOTES.

*Weston.*—The town council has asked the Hydro-electric Commission for 200 h. p. to supplement the power of the municipal plant, which is insufficient for the needs of manufacturers.

#### NIAGARA FALLS, ONT., AND DISTRICT.

*Mr. Hewlett Green, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Springlike weather brought some increase in industry and employment, but conditions and prospects were hardly as good as in the corresponding months of the previous three years. Some buildings were started, agricultural operations commenced, lake navigation opened and park improvements and other outdoor work was undertaken.

The American Cyanide Co. has secured a site here and proposes to erect a plant to cost \$250,000. The buildings would be 700 by 400 feet in size, and 500 men would be employed. Construction is not yet started. The Spirella Company purchased a site for a corset factory. While buildings are being erected the company will manufacture its goods in temporary quarters. Cheap electric power and excellent shipping and advertising opportunities caused these concerns to locate here. Several carloads of machinery for the Dominion Tool and Process Company arrived and await the erection of the factory buildings.

Transportation was active but local trade was very quiet.

Tenders were invited for the erection of the first of two new schools.

A small strike of labourers occurred at Port Colborne.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—On account of unfavourable weather spring work in farms and gardens commenced late. Little was done during the month beyond spraying and pruning in the orchards. Tomato growers are said to be well satisfied with the price of 27½ cents per bushel, fixed by the canners for this season. Last season 25 cents per bushel was paid. The canneries demand more vegetables of other sorts than heretofore, and the area devoted to growing such products will be largely increased.

*Manufacturing.*—Factory employment was steady.

*Railroad construction.*—Work was being rushed on the extension of the Niagara, St. Catharines and Toronto Electric Railway from Fonthill to Welland. Poles and wires were erected and the track ballasted. Cars will be running on the new line before June. The railway has not yet erected bridges to cross the Welland river or Welland canal into Welland town. The Grand Trunk was laying new rails on its line from Bridgeburg to Welland.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades showed some increase in activity over March, but were not busy. More masons and carpenters were working, but many men who came from other places could not find employment. Painters were more active. It is probable that the building trades will be much quieter this summer than last.

*Metal.*—Conditions were steady. Regular foundry and machine-shop men were all working, but there were few, if any, opportunities for employment.

*Printing.*—The allied trades were steady.

*Clothing.*—Tailors were fairly active.

*Transport.*—Railway employment was steady for all classes of men. The opening of navigation gave employment to many sailors, but the outlook for freight traffic on the lakes was considered poor. Teamsters were active.

*Unskilled labour.*—Unskilled labourers were pretty well employed, many on public park improvements and in grading the grounds for the amusement park.

#### DISTRICT NOTES.

*Port Colborne.*—A strike of labourers on April 1st interfered with work on the completion of the cement plant for about a week. About seventy-five men went out in protest against a reduction of wages and returned to work when the original scale was restored. The new Government grain elevator has been completed and will be in use this season. The opening of navigation gave employment to tug and canal men. The rest of the machinery for the Canadian Portland Cement Company's plant was being installed. The plant has a capacity of 1,200 barrels per day. Twelve hundred electric horsepower transmitted from Niagara Falls will be used. Natural gas and coal will be used in the kilns. The plant has railway connection and fronts on the Welland canal.

*Bridgeburg.*—Steps are being taken to have a carriage way and walks for pedestrians constructed on the International bridge, connecting this place with Buffalo, N. Y., across the Niagara River. At present the bridge is exclusively for railway traffic.

*Welland.*—The Supreme Heating Co. commenced the manufacture of steel stoves in its new factory, giving employment to a number of men. The projected cotton-bag factory will not be erected till next year. There is a great demand for dwelling houses and this condition is rapidly becoming more serious.

*Crystal Beach.*—Extensive improvements were being made at this summer resort. A hotel, electric light plant, and bath houses were in course of erection.

*Niagara-on-the-Lake.*—It is reported that the government has purchased a large tract of land to enlarge the military

camp-ground. No camp will be held this year and the town will feel the loss of a busy season.

*Ridgeville.*—A large canning factory is projected. The site has been purchased.

#### ST. CATHARINES, ONT., AND DISTRICT.

*Mr. Jas. A. Wiley, correspondent, reported as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during April showed more activity than during the preceding month, but so far no pronounced activity has been experienced. The building trade and some other branches of industry have not resumed full operations, but general conditions showed some improvement. The Smith saw works were busy, working overtime. The Post Office Department has granted and inaugurated a free delivery system in the city, seven letter carriers being employed. On the 15th of April fire destroyed the factory and plant of the Whitman Barns Manufacturing Company, of this city; the loss is estimated at about \$250,000, and the number of workpeople thrown out of employment being about 150. The fire also destroyed about 1,000 feet of Bell Telephone cable, but it was soon repaired. The Hippodrome, destroyed by fire recently, has been rebuilt, and the Lyric theatre, was also completed. On the first of April the journeymen painters and decorators of this city (30) asked for an increase in wages from 25 cents to 30 cents per hour. Three firms, employing a third of the men, granted the increase, but the other 3 refused until the 11th of April, when they also granted the increase. The men employed by the relief committee of the city refused to work for \$1 per day on the first of April; the committee laid the men off.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy with spring ploughing, and fruit growers with pruning and spraying.

*Other industries.*—The canning factories will soon be in operation and a busy season is expected.

#### CONDITION OF PARTICULAR TRADES

*Building.*—Trade while more active than last month was far from busy.

*Metal, engineering and shipbuilding.*—All branches were active.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers, polishers, carriage and wagon makers were active.

*Printing and allied.*—The allied trades were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters, cigarmakers and tobacco workers were active.

*Leather.*—Active conditions prevailed with tanners, curriers and leather workers.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees, and laundry workers found employment active.

*Transport.*—All lines of transportation service were active. Navigation opened on the Welland canal on the 14th of April.

*Unskilled.*—This class of labour was active, and employment better than during the preceding month.

#### DISTRICT NOTES.

*Port Dalhousie.*—Labour was better employed than in the previous month. Ship carpenters were busily employed repairing vessels for the coming season. The Riordan Paper Mills Company increased its staff.

*Thorold.*—Both mill and factory employment was active. The new smelter will be ready for operation by the first of May. Two carloads of ore have been received and the electric spur line from Allanburg completed. The Pulp Mill Machinery Company employs 25 hands, which will be increased to 50.

city council gave employment to about two hundred men in relays at the various civic improvement works, such as street cleaning, the building of sidewalks and street construction work. The stove-plate moulders and stove mounters, who were slack all winter, have begun to return to work at the old rate of wages. There is little likelihood of any industrial disturbance in the building trade on the first of May. Building operations have fairly begun, with prospects of a good season. The result of the investigation by the commission, under the Industrial Disputes Investigation Act, 1907, of the dispute between the Street Railway Company and its employees has been made known, two commissioners decided in favour of the company, and one in favour of the employees.

#### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Generally speaking, manufacturing during the month was very slack, especially the iron and clothing trades. Two new companies, which will have their headquarters at Hamilton have been granted Ontario charters. One is the William Peace Company, Limited, and the other John Poag & Company, Limited. The William Peace Company is capitalized at \$40,000, and the John Poag Company is capitalized at \$20,000. The latter is chartered to manufacture, buy and sell, both wholesale and retail lumber, timber and other building material, and to do a general building and contracting business. The organization of the Inland Navigation Company was also completed, it takes in a score of companies which operate boats on the lake, and has a capital of \$2,000,000. The headquarters of the new company will be in Hamilton, and an office with a large staff will be selected.

#### HAMILTON, ONT., AND DISTRICT.

*Mr. S. Landers, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour at the beginning of the month was very slack in nearly all trades. The

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Work in the various branches of the building trade was progressing fairly well at the close of the month. Carpenters, bricklayers and masons, and plumbers were active. Painters and gas and steam-fitters had fair employment.

*Metal and engineering.*—Iron moulders, stove mounters, machinists, metal polishers and jewellers found employment only fair. Electrical workers, blacksmiths and sheet metal workers were active, with horseshoers slack.

*Woodworking and furnishing.*—Woodworkers, carriage and wagon workers were active; coopers had only fair employment, and pattern makers were somewhat inactive.

*Printing.*—Most of the allied trades were well employed, especially printers.

*Clothing.*—Ready-made clothing workers were very slack, while made-to-order clothing workers were very busy. Boot and shoe workers were dull.

*Food and tobacco preparation.*—Bakers, butchers, cigar and tobacco workers had fair employment.

*Leather.*—Conditions were fair.

*Miscellaneous.*—Barbers, broom makers, hotel and restaurant employees were active, also steam railway employees. Ship labourers and longshoremen, street railway employees, and teamsters had fair employment.

*Unskilled.*—This class found fair employment.

#### DISTRICT NOTES.

*Dundas.*—The condition of trade is only fair. The Ontario Felt Company has decided to build a new factory. The Machine Works Company was fairly busy.

#### BRANTFORD, ONT., AND DISTRICT.

*Mr. J. C. Watt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market showed a slight improvement over last month, due to the commencement of outside work, the city employing a number on spring street cleaning. Very few are now asking for help from the city relief officer. Building operations have commenced, and toward the close of the month a number of builders found employment. Several of the factories are still running on short time with reduced forces.

The Gould Shapley & Muir Co. and the screw factory commenced the Saturday half-holiday on the fourth, to continue during the summer months; this is a month earlier than usual. The Western Counties Power Company have connected their plant with the Cataract Power Company's system at Decew Falls; the Street Railway Co. and the Grand Valley Radial Co. are also using the power here and between Brantford and Paris. The company have 50,000 h. p. which they are prepared to supply at \$19.50 per h. p. per annum, in quantities of 100 h. p. or over. Small power users are charged a slightly advanced rate.

The price of milk has fallen from 7 cents to 6 cents per quart. The moulders of the William Buck Stove Co. stopped work on the first of the month. The men alleged that the iron is not made hot enough to run properly, and as all bad castings are discounted under a piece work system, their earnings are greatly reduced. The firm declared that the contention of the men was not correct and that they have done all they can to make conditions satisfactory. About 115 men are on strike. A number of non-union men have been secured. Toward the close of the month, disturbances between the strikers and the strike breakers called for police interference.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The season has been backward. There was no seeding done before the 21st. Wheat and rye wintered well, though in some localities small patches were killed by the ice.

*Manufacturing.*—Factories were not very brisk. Some were working short time, with little immediate prospects of being busier.

*Railroad construction.*—Work on the radial road to Hamilton is being pushed to completion, by a force of men working 13 hours a day. The G.T.R. Co. is completing steel bridges over two subways. The T., H. & B. Co. has also built a new steel bridge outside the city.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, lathers and plasterers found some employment

toward the close of the month. Carpenters and joiners, and plumbers were active. Painters, decorators and paperhangers were busy toward the end of the month.

*Metal.*—Employment for moulders was not so good as during March. Machinists, electrical workers, linemen, metal polishers, buffers, platers, stove mounters and blacksmiths were active. Boilermakers were busy. Sheet metal workers and horseshoers were active.

*Woodworking.*—Carriage and wagon makers, coopers and pattern makers were active.

*Printing.*—Printers, pressmen and allied tradesmen were fairly busy.

*Clothing.*—Tailors and tailoresses were active, and in some cases busy.

*Food and tobacco preparation.*—Bakers and confectioners, particularly the former, were busy; butchers, cigar makers and tobacco workers were active.

*Leather.*—Leather workers and saddlers were active.

*Miscellaneous.*—Barbers, clerks and delivery employees were steadily employed. Hotel and laundry workers were busy, particularly the latter.

*Transport.*—Railroad trackmen were busy, as also were freight handlers. Street railway employees were steadily employed. Teamsters and draymen were busy. Carters and cab men were active.

*Unskilled labour.*—There were a number of unskilled labourers unemployed, but not so many as in March.

#### DISTRICT NOTES.

*Blue Lake.*—The cement works which were closed during the winter, started again about the first of the month.

*Paris.*—The fabric mills, and the screen and sash factory were busy. The plough factory was active. There are few idle men here at present. The contract for a new school to cost \$45,000 has been awarded to a Woodstock firm.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reports as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in April, while showing an improvement over March,

was not as active as last year. Factory employment was better than in March, but there was still considerable short time worked, and very few additional men were taken on. Working staffs in some shops were below the normal number. Outdoor work opened up with few contracts in the building trades, and a falling off in building is probable. Work on permanent roadways is well under way but there are more men looking for jobs than there is work for. Altogether there were not so many idle men at the end of the month as at the beginning, but there was still a considerable number out of work especially labourers and unskilled work people. Retail trade was below the average for the season of the year. Farmers in some portions have nearly finished seeding, with the ground in good shape and prospects for a good crop. The Ontario Agricultural College closed its regular sessions during the month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades had a quiet month. Work on some new building was started, but all mechanics were not fully employed. Masons had an active month, bricklayers a quiet month, carpenters an active month, and painters a busy month on repair work.

*Metal.*—Iron moulders, machinists and machinists' helpers had a quiet month with an improvement in some shops, but some short time was still worked, and there was no demand for help. Tube mill workers had a quiet month. A night staff, mostly Italians, was laid off, and only day work done.

*Woodworkers* had a quiet month with a noticeable improvement in some lines, but no demand for help. Organ and piano workers worked short time, but an early resumption of full time is looked for. Upholsterers have been on strike since January, and shops are running with new help. Carriage workers had a quiet month.

*Printing.*—Printers were active, with an improvement towards the close of the month.

*Clothing.*—These trades had a busy month in all lines.

*Food and tobacco preparation.*—Cigar-makers had a quiet month.

*Textile.*—Brussels, tapestry and in-grain carpet weavers had an active month.

*Unskilled labour.*—Unskilled labour was better employed than in March, but the supply is still larger than the demand. There was a considerable influx of Italians.

### BERLIN, ONT., AND DISTRICT.

*Mr. R. F. Gofton, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour, both skilled and unskilled, was poorly employed during April. The season's civic work has not yet been commenced, and in consequence a large number of men are still unemployed, except for a few days at a time. A number of carpenters have left for the Northwest provinces, as the building trade is not expected to be as active as in former years, though conditions somewhat improved towards the close of the month. About thirty workmen were employed on the construction of the Kaufman Rubber Company's building. It is expected that this number will shortly be increased to one hundred. The employees of the Berlin Interior Hardwood Company had their wages reduced 10% during the month, and are only working 44 hours per week, about eighty employees were affected. The city council has struck the tax rate at 20 mills on the dollar; this is a mill less than last year.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy seeding. Wheat is looking well.

*Lumbering and manufacturing.*—Quiet conditions prevailed.

*Railroad construction and employment.*—Conditions were more active than in the preceding month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners were only partially employed. Plasterers and lathers found

similar conditions, but painters and decorators, etc., were active towards the end of the month. Plumbers and gas-fitters, stonecutters and builders' labourers were inactive.

*Metal and engineering.*—Iron moulders, iron workers and helpers, coremakers and engineers had a quiet month, while steam engineers, electrical workers and linemen were active.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers and wood carvers found employment somewhat quiet. Carriage and wagon makers were active, but pattern makers and coopers were very quiet.

*Printing.*—Printers, pressmen and bookbinders were busy.

*Clothing.*—Journeymen tailors, garment workers and glove makers were active. Boot and shoe workers found employment somewhat quieter than during the preceding month.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters, cigar makers and tobacco workers were busy.

*Leather.*—Tanners and curriers were active, with saddlers, trunk and bag makers well employed.

*Miscellaneous.*—Barbers and broom makers reported a busy month.

*Transport.*—Street railway employees, cabmen, carters and draymen were busy, with teamsters and expressmen active.

*Unskilled.*—Employment was somewhat scarce.

### WOODSTOCK, ONT., AND DISTRICT.

*Mr. W. N. McEltheran, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was little demand for labour during the month. The supply was greater than the demand, and workers in some lines had little or nothing to do.

On April 8th, at a meeting composed of five representatives from every local union in the city, there was formed a Trades and Labour Council. The unions represented were as follows: Carpenters,

bricklayers, piano and organ workers, moulders, cigar makers, barbers, hod carriers.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The month was a busy one for farmers. In the early part maple sugar making was general. This year was an extra good sap year, the run being larger and the quality of syrup and sugar the best in years. With the fine weather towards the middle of the month, the farmers got on the land, seeding being begun. The price of all kinds of produce remained firm. The price of hogs showed an improvement over the preceding month. Rain at the close of the month followed by cooler weather retarded operations somewhat.

*Manufacturing.*—No pronounced improvement occurred over the preceding month, though employment was steadier.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Masons and carpenters were very quiet, no building operations having commenced. Some carpenters found work in making alterations and repairs. Local stonecutters reported a steady month. Plumbers and steamfitters were all employed.

*Metal, engineering and shipbuilding.*—Boilermakers and machinists were not very busy. Stove moulders and mounters were all working towards the end of the month, but reported orders somewhat light.

*Woodworking and furnishing.*—Wagon makers were not busy, several men still being idle. Furniture workers were rather quiet, though signs of improvement were apparent. Piano and organ makers were very quiet. Church organ makers were all steadily employed. Farm and garden tool makers reported a busy month, having difficulty keeping up with orders. Planing mills were busy.

*Printing.*—In most shops printers were steadily employed, though some compositors were not.

*Clothing.*—Knitting factory employees were very busy, it being found necessary to work on Good Friday. Journeymen tailors reported a busy month.

*Food and tobacco preparation.*—Bakers and confectioners were not very busy, and butchers reported a falling off in trade. Cigar makers had a quiet month, one factory being almost entirely closed down, while at another but four or five found employment.

*Leather.*—Tanners and curriers were fairly busy.

*Miscellaneous.*—Barbers reported a falling off in trade. Laundry workers had a busier month than usual.

*Transport.*—Freight handlers found no noticeable improvement over the preceding month. Street railway employees were not very busy. Teamsters and expressmen were busier than during the previous month.

*Unskilled labour.*—The market was over-crowded, work being unobtainable by many.

#### STRATFORD, ONT., AND DISTRICT.

*Mr. Joseph T. Carlin, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was a decided improvement in the condition of the labour market this month compared with the preceding one, especially in the building trades. A new industry will commence shortly, viz., the manufacturing of corrugated iron sewer tile. It will employ 15 men to start, which number will be added to as the business increases.

The R. M. Ballantyne Co.'s' factory will soon be ready to commence operations for manufacture of woollen knitted goods. It will employ not less than 50 hands within one year, and not less than 100 within two years, for a period of ten months each year. A large number of men are engaged cleaning streets, etc. The estimate for works by the city was fixed at \$12,649 for the year 1908. Work is progressing at the Normal School, and the prospects are that it will be ready for September. The pension system of the G. T. R. Co. has made it necessary to superannuate 12 men in the shops here. Twenty English labourers em-

ployed on construction work at the G. T. R. shops refused to work for \$1.40 a day. Wholesale and retail merchants reported trade good. The excise returns for the month of March, 1908, were \$4,938.50; in the corresponding month of 1907 they were \$4,802.50. No changes in rates of wages or hours of labour were reported.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers are busily engaged seeding. The fall wheat has wintered well.

*Manufacturing.*—Manufacturers reported the month of April better than the preceding month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, lathers and plasterers were fairly well employed. Painters and paper-hangers were busy. Plumbers were active. Builders' labourers were quiet.

*Metal.*—Iron moulders, iron workers and helpers, etc., were well employed.

*Woodworking.*—Industrial establishments reported trade good. Coopers were busy.

*Printing.*—Printers were busy.

*Clothing.*—Journeymen tailors reported a satisfactory month, particularly towards the close.

*Food and tobacco.*—Bakers, confectioners and cigar makers were active.

*Leather.*—Harness makers were busy.

*Miscellaneous.*—Barbers, clerks, hotel and laundry workers were employed as usual.

*Transport.*—Railway employees in the traffic and locomotive departments were active.

*Unskilled.*—A large number were unemployed.

#### LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has improved somewhat with the open-

ing up of outdoor work, but conditions are not nearly so active as last year. A large number have been laid off by the different factories and foundries. The Tuckett cigar factory, a branch from Hamilton, which employed about 70 cigarmakers and over 100 hands has closed and will concentrate in Hamilton. In the early part of the month, the Hobbs Glass Works and Canada Furniture Co.'s plants were completely destroyed by fire, with a loss of about \$300,000, and the temporary putting out of employment of about 40 hands. Work has commenced on several sewers, and the street railway company is moving its tracks on Dundas street preparatory to a new pavement being laid. The Lamb Wire Fence Co. was exceptionally busy, working night and day. At the showcase works a reduction of 10% in wages was put in force, and several employees quit in consequence. The Empire Brass Co. is moving into its new premises; a number of employees were laid off in consequence.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and carpenters are all at work again. On the Smallman & Ingram department stores work was stopped by the police until the contractors have put temporary floors over the steel work to protect the workers below from falling bricks, etc. Lathers, plasterers and painters were busy. Plumbers reported trade only fair.

*Metal.*—Moulders reported business improving. Metal polishers and brass workers continued slack. Bolt makers were working on an average 5 days a week.

*Woodworking and furnishing.*—Woodworkers on door frames, etc., were busy. Carriage and wagon workers were slack. Car builders were still laid off a couple of days a week. Coopers were fairly busy.

*Printing and allied.*—Printers on job work reported trade dull. Pressmen were the same. Bookbinders were dull, but folding box makers reported trade fair.

*Clothing.*—Journeymen tailors were rushed with work, and good men were in demand. Garment workers reported trade fair. Shoe workers were busy.

*Food and tobacco preparation.*—Cigar makers were dull, losing considerable time. A number were out of work.

*Leather.*—Tanners and curriers continued busy.

*Miscellaneous.*—Broom-makers were dull. Furriers were very slack, working 4 days a week.

*Transport.*—Railroad train crews were slack, a number being put back during the month. Teamsters were busy.

*Unskilled labour.*—This class is gradually finding employment, although a large number were still out of work. The average wage is lower this spring than for some time, a number working for 15 cents an hour.

#### DISTRICT NOTES.

*Port Stanley.*—A company to manufacture disc plows is building a plant, and will commence operations at once.

#### ST. THOMAS, ONT., AND DISTRICT.

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during April showed a decided improvement over the preceding month. Building permits were issued for this season's work to the extent of \$32,180 up to March 1st. This represents about two-thirds of the real value of the buildings. Contractors reported prospects good and all hands well employed.

The Brotherhood of Locomotive Engineers have formed a joint stock company capitalized at \$40,000, and will erect a structure costing in the neighbourhood of \$20,000. Stock is to be sold in shares of \$50 each, and shares will be disposed of to members of that organization only. The building lot has been purchased and the stock is being disposed of rapidly.

A recommendation made to the Council by the council committee relative to the erection of an ammonia plant was voted down by the city council.

During April of last year the working

staff of the Pere Marquette shops was reduced to the extent of eighty skilled and unskilled labourers. This year shows a decided improvement, a full staff being employed, to which gradual increases are being made. The Wabash repair work, which is being done in the Pere Marquette shops, has necessitated a considerable increase in the force, and it is the intention of the company to further increase the number of employees so as to have the work on coaches, which was previously done in the shops in Michigan, done in this city. The Pere Marquette has more than fulfilled its obligation to the city in the matter of the number of hands which that road is compelled to employ according to its agreement with the city. In the Michigan Central shops, however, the conditions have not been at all favourable. In addition to frequent reductions in the number of working hours of the men employed in the car and mechanical departments, the shops on a number of occasions have been closed down by order from the head offices. For some time, the men have been working seven hours per day and four days per week. On April 16th orders were received that the shops were to close for Easter and to remain closed until Tuesday, April 21st. On April 23rd orders were received to close the car shops for the balance of the month and to shut down the locomotive shops on the 23rd, 27th, 29th and 30th. Holidays at this time of the year are not appreciated by the men who have not been working full time for some months. At present about one hundred men are employed in the car department and four hundred in the locomotive department. The round-house staff has been more fortunate and has been compelled to work much overtime in order to keep up the power to the required standard. Just how long the present condition will continue cannot be ascertained at the offices of the company in this city.

During the month eleven crews were put back on the Michigan Central railroad and a considerable number of spare men thrown out of employment. It is customary to make reductions at this time of year, the cause of decrease in traffic

being due to the opening of navigation. However, business on the road has improved the last few days, and the prospects are that at least six crews will be returned to service in the near future. Traffic on the Pere Marquette and Wabash and Grand Trunk railroads is reported brisk.

The Sutherland-Innes factory officials report that the coming season will be one of the best in years. Local trade has been slightly affected by the uncertainty of work in the Michigan Central shops.

While there were a number idle unskilled labourers in this city, no distress cases have been reported to the mayor during the month.

The tax rate for the present year has been fixed at twenty-one mills on the dollar. Considerable reductions were made in the estimate so as to enable this rate to be struck.

A recommendation that the assessment roll be published in the daily papers was not endorsed by the council. The Trades and Labour Council passed a vote of censure on the members of the council who opposed the publication of the roll. The city auditor's report shows surplus revenue in the waterworks department to be \$10,500; the net deficit in the street railway department, \$7,390.22; the net revenue of the light, heat and power department, \$15,292.95, and a surplus revenue of \$10,765.06.

Prices of meat were raised from two cents to three cents a pound. Butchers report that very little beef is being offered for sale on account of the feed scarcity.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers in this district who have maple sugar bushes report an excellent season. Ploughing and seeding were in progress. The fall wheat and clover is said to be in fairly good condition.

*Manufacturing.*—Local factories have been fairly well employed during April. In the Canada Iron and Foundry Company the men were not as active as during the corresponding month of last year. Thomas Brother, Limited, broom manufacturers, reported an average month. Norsworthy & Company re-

ported a quiet month. Other local industries have been well employed.

*Railway construction.*—Work trains have not yet been started on the railways entering the city.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, carpenters, lathers and plasterers, painters and plumbers were busy.

*Metal engineering and shipbuilding.*—Moulders, machinists and blacksmiths have had a quiet month.

*Woodworking and furnishings.*—Carriage and wagon makers and upholsterers reported the month more active than March.

*Printing and allied.*—Printers had a fair month.

*Clothing.*—Journeymen tailors were very busy.

*Transport.*—Traffic on the railroads was not so heavy as in the preceding month.

*Unskilled labour.*—While there were a considerable number of unskilled labourers out of work, contractors and other employers were of the opinion that in many cases men could readily find work if they were desirous of doing so. Farmers in this locality are in need of help, and there has been a marked impetus given to conditions in the labour market because of the opening of the building season.

#### DISTRICT NOTES.

*Port Stanley.*—A joint stock company to be known as the Standard Implement Company has been formed for the manufacture of disc gang ploughs. It will erect a factory at Port Stanley. The sum of \$5,000 has been subscribed and the prospects of securing the balance are favourable. Eleven acres of land have been purchased. The building which is to be erected will be fifty by one hundred feet. Capitalization will be placed at \$75,000 in shares of \$100 each.

#### CHATHAM, ONT., AND DISTRICT.

*Mr. Alex. Gregory, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has shown very little improvement over the month of

March, owing largely to the backwardness of spring. This has greatly retarded the paving contractors which would otherwise have given work to a large number who refuse to go to the country and work on the farm. Factory work in all branches has shown very little, if any improvement, and in many cases the staffs have been reduced and the output curtailed owing to lack of sales. There was nothing done except repairs in the building line, and very few plans are in the architect's offices.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Although the first part of the month showed signs of an early spring, farmers were disappointed as the month throughout has been backward and cold. Owing to the great amount of rain they were unable to work the land. Fall wheat has stood the winter well and prospects are for an abundant crop. Everything indicates that fruit of all kinds will be a good crop. A number of immigrant farm hands arrived during the month, and the Dominion Immigration agent had no trouble in securing positions for them.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and plasterers had a few days work, principally on remodelling. Carpenters reported trade very dull. Plumbers were only fair. There were no requests for 'builders' labourers.

*Metal.*—Machinists and engineers reported a fair month. Blacksmiths in some branches were busy.

*Woodworking.*—Woodworkers in the carriage factories report trade very slack.

*Printing.*—Printers reported trade fully as good as in the preceeding month. Bookbinders were fairly well employed.

*Clothing.*—Journeymen tailors reported trade very good for the whole month.

*Food and tobacco preparation.*—Bakers' and confectioners' trade has shown a slight improvement.

*Transport.*—Steamboat men were busy fitting out for the opening of navigation.

*Unskilled labour.*—There was scarcely any demand for men.

#### WINDSOR, ONT., AND DISTRICT.

*Mr. D. Mitchell, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour during April was fairly well employed. With the exception of a few bricklayers there were few idle men in the city. The building trade has been active and the prospects are promising for some time to come. All local manufacturing industries were running full time, with their usual staffs. A new industry has located here, called the American Pearl Button Company, for the manufacture of pearl buttons. The company has secured a plant and is busy installing machinery. It will be ready to run about the 1st of May and expects to employ about 100 hands. Wholesale and retail trade has been fairly good, but money is tight.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers were busy on spring work and report good prospects. The fall wheat has wintered well and the weather has been good. Prices for produce are very high.

*Manufacturing.*—Manufacturers had a fairly good month.

*Railroad construction.*—The tunnel company have a large gang employed, and are rushing the work.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Except a few bricklayers, all have been fairly well employed.

*Metal, engineering and shipbuilding.*—Iron moulders and sheet metal workers were slack. Iron workers, machinists and electrical workers were fairly active. Blacksmiths were busy.

*Woodworking and furnishing.*—Woodworkers, upholsterers, carriage and wagon makers were fully employed.

*Printing.*—Printers and pressmen were all fully employed.

*Clothing.*—Journeymen tailors were very busy, with garment workers in demand.

*Food and tobacco preparation.*—Bakers and butchers reported a fairly good month. Tobacco workers were all working.

*Leather.*—These trades were quiet.

*Miscellaneous.*—Barbers reported a fair month. Clerks, delivery employees and hotel and laundry workers were fully employed.

*Transport.*—All branches were active.

*Unskilled labourers* were well employed.

## SAULT STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

During April the supply of labour in all lines exceeded the demand. Navigation opened in the latter part of the month, the first boat from the lower lakes arriving April 25. This gave employment to a number of men. Banks reported money tight. Business during the month was dull in nearly all branches. The Algoma Steel Company's rail mills closed down on April 18th, throwing from 700 to 800 out of employment.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were quiet, the frost not being out of the ground at the end of the month.

*Lumbering.*—The drive was in full progress. A quantity of logs were brought in by rail as well as by the drive. The Algoma Commercial Company's saw-mill will start operations Monday, May 4. This mill will employ from 125 to 150 men. The season's cut is estimated to be 25,000,000. This lumber all goes to the American market. Sault Ste. Marie Pulp and Paper Company's mill is running day and night on orders ahead. The present output of these mills is 110 tons of pulp per day. Prospects are bright.

*Fishing.*—Fish tugs left on their first trip to Lake Superior in the last week in April.

*Manufacturing.*—The Canadian Log-

ging Tool Company reported many orders and bright prospects for the season. The veneer mill was running light. The Northern Foundry and Machine Company reported plenty of work, overtime being necessary.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Normal conditions prevailed.

*Metal, engineering and shipbuilding.*—Iron moulders were dull; other branches were normal.

The *printing, clothing, food and tobacco preparation, miscellaneous and transport* trades reported normal conditions.

## WINNIPEG, MAN., AND DISTRICT.

*Mr. John Appleton, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Favourable weather points to the opening up of summer work at an earlier date than last year. At the present time there is little or no demand for labour, except for farm work. In the city of Winnipeg the fine weather has enabled builders to start foundation excavation, and this has given employment to a large number of men. Generally speaking, manufacturing establishments have been experiencing dullness during the whole of the month. In a short time operations will be commenced upon the paving of Main street and Higgins avenue at a cost of \$125,812 and \$71,710, respectively.

The extensions to the Manitoba government telephone system to be built this year consist of new long distance lines, additional circuits on existing long distance lines, the connection of rural subscribers to existing farm lines, the completion of the Fort Rouge Exchange and conduit throughout the city of Winnipeg, and the building of rural exchanges, involving an outlay of \$500,000. It is estimated that at least, 3,000 rural subscribers will be provided with telephone service this year, and that by January 1st, 1909, there will be over 20,000 telephones in use in the province of Manitoba.

The total amount of money invested in mortgage loans by loan companies in Manitoba is estimated to be \$23,959,551 as against \$20,425,426 at the end of December, 1906.

Business both wholesale and retail has been dull.

On the 1st of April formal notice was served by the Canadian Pacific Railway upon the blacksmiths, boilermakers, boilermakers' helpers, moulders, and all the allied metal workers to the effect that the company would not recognize existing agreements after thirty days. As a result of this notice the several trades came to an arrangement to act jointly in negotiating with the company. At the same time as the Canadian Pacific Railway Company gave notice to its men the Canadian Northern Railway took the same action with their employees in the repair shops.\*

The agreement between the Street Railway Company and their employees expired during the second week of April. Negotiations between the men's union and the directors have taken place, but as yet no modification of existing arrangements have been made. The men want a reduction of hours from ten to nine with the rate of pay to yield as much for nine hours as for the ten hours under the old schedule.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—At the end of April a very large percentage of the acreage intended for wheat had been sown. The weather has been excellent. It is generally admitted that the acreage this year will be very much greater than last year, and the crop is being put in under much more favourable circumstances.

The manager of the Imperial Bank has prepared the following statistics regarding the crops of the past two years:

All Cereals:	1906	1907
No. of acres under crop ..	4,803,630	4,707,483
Total yield—bushels.....	129,918,256	99,010,285
Total value of crops .....	57,000,000	46,000,000

\* For statement with regard to further action taken in this connection see under heading "Industrial Disputes Investigation Act—Proceedings during April" in present issue.

*Wheat:*

No. of acres under crop ..	3,141,537	2,789,553
Total yield—bushels.....	61,250,413	39,688,266
Average yield of crop.....	20.16	14.22
Total value of crops.....	40,000,000	30,000,000

*Cattle:*

No. of cattle shipped, Man., Sask., Alta.....	130,426	100,200
Value of cattle shipped....	6,000,000	4,000,000

Total number of threshing outfits.....	2,700
Total number of men employed threshing.....	24,000
Average wages paid per day per man.....	2.50

*Lumbering.* — Notwithstanding that operations in the woods this winter in the northern parts of the province were greatly curtailed, sufficient logs were taken out to cut 40,000,000 feet of lumber. It is estimated that the output is 25,000,000 feet less than last winter. A very large quantity of railway ties were also taken out last winter. The cut of lumber by mills is as follows:—

Red Deer Lumber Co., Red Deer.....	8,000,000
Great West Lumber Co., Greenbush.....	5,000,000
T. A. Burrows, Duck Mountain.....	4,000,000
Shaw Bros. Prairie River.....	4,000,000
Saskatchewan Lumber Co., Crooked River...	3,000,000
Dart Lumber Co., Erwood.....	3,000,000
Cowan Construction Co., Mistatam.....	3,000,000
Mutchenbacher Bros., Mafeking.....	2,000,000
Ruby Lake Lumber Co., Etiomami.....	2,000,000
McCutcheon Lumber Co., Minitonas.....	1,000,000
J. Sinnott, Duck Mountain.....	500,000
J. Hanbury, Duck Mountain.....	500,000
Thos. Harper & Son, Duck Mountain.....	500,000
Portable Mills.....	1,000,000
Total.....	37,500,000

CONDITION OF PARTICULAR TRADES.

*Building.*—The volume of building does not promise to be as large as in the past two years. Many permits are being taken out, but they are not for large structures. Some reductions have taken place in the cost of building material. Lumber has been reduced in price very considerably; wall plaster is \$1.00 per ton cheaper, laths 25 cents per 1000, and cement is selling at \$2.41 per bbl. which is 60 cents per bbl. less than the imported brands. Lime, sand, brick, old high grade cement, shingles, hardware and union labour remain at the same rate as last year.

Work has commenced upon the construction of a tar paper factory. The

entire plant will cost \$28,000. The factory is 60x32 feet, and will be constructed of reinforced concrete. The warehouse in connection with this factory will be 120 feet long and 60 feet wide.

A summer pavilion will be erected in the suburban park this summer.

The business agent for the Carpenters' Union is of the opinion that the building will be light this year, and that the men at present in the city cannot all get employment until late in the season.

*Metal.*—One of the large foundries reports that it has employed at the present time about 160 men, which number is practically about the same as they had employed a year ago. In the course of another month the same foundry expects to increase its staff to 200 men. Other foundries, however, are not so busy and report reduced staffs at work, and these upon short hours.

*Woodworking.*—Most establishments have been working short time with small staffs. Retailers have not been purchasing during the past few months, and it is believed that stocks throughout the country are getting low. To augment these there will be a pronounced rush in the fall if the crop turns out well.

*Printing.*—The improvement in business during April has not been very marked. Demand for work is still very light and does not keep normal staffs and plants working at full time.

*Clothing.*—Business is dull. Garment factories are only employing about one-fourth of the staff they had at work at the corresponding period of last year. In the beginning of March a new schedule of wages was signed by the employers, and it is estimated that it will not affect the total earnings of the employees. There are a large number of applicants for work in this particular trade. Cost of the principle material used (denim) has increased.

*Food and tobacco preparation.*—During April the baking trade experienced a marked increase, and all the bakeries were fairly active.

*Leather.*—In the saddlery business a marked improvement has been manifest during April. The busy manufacturing season is from December to May, and the

shipping season from January to May. At the present time however, stocks are low, and it is probable that manufacturing activity will continue all summer, especially if crop prospects are good. On the whole there are not as many hands employed as at the same date of last year.

#### DISTRICT NOTES.

*St. Boniface.*—The report of the St. Boniface assessors, will show a school population of 1,216 and a total population of 5,700. This is an increase of 1,300 over 1905, whilst in 1901, the population was only 2,019.

The assessed valuation is \$9,372,496. In 1900 the whole of St. Boniface was assessed at only \$608,680.

#### BRANDON, MAN., AND DISTRICT.

*Mr. S. P. Stringer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The splendid weather of the last few weeks gave an impetus to all lines of business. Merchants reported trade very brisk, particularly in implements. Building operations were opening up, owing to the fine weather. In addition to several proposed large buildings, many private residences will be built during the coming season. Some of the contractors are not optimistic regarding the building outlook, but all contracts have not yet been awarded, and conditions may improve. Work was commenced on the construction of the new bridge by the Canadian Pacific Railway Company and the city. It will be of reinforced concrete. The city council has selected a plan for the new court house, to cost about \$100,000. The plans have been submitted to the government for approval. There is evidence of unrest among the workmen employed in the mechanical department of the Canadian Pacific Railway Company, owing to the company's abrogation of the agreement with the members of the Allied Metal Workers. The men employed here are

members of the Winnipeg Union and will be governed by its action.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Indications point to an early spring throughout the Canadian west, with prospects of seeding being completed during April, or about a month earlier than last year. An early spring means a big acreage under crop, the conditions last season resulting in an unusual amount of summer fallowing and fall ploughing. Seeding is general throughout Manitoba, and reports from the farmers in the Brandon district show seeding well under way, with the land never in better condition. Reports from the east and south show that the weather is being taken advantage of to the fullest extent, and farmers are hard at work in every direction.

The representative of the Brandon Gas and Power Company gave a demonstration of the operations of the company's "straw gas producing plant." The gas produced was laid on to a fifty candle power incandescent burner, which showed a steady and bright light. It was stated that one ton of straw would produce fifteen thousand cubic feet of gas, while the best coal would only produce ten thousand cubic feet to the ton.

*Railroad construction and employment.*—The Grand Trunk Pacific Railway Co. announced that work on the construction of the remaining forty mile link, between Portage la Prairie and Saskatoon, is being rushed to completion, and it is expected to have a train running between these two points by the first of July. Assurance has been given by the solicitor of the Grand Trunk Pacific Railway Company that the company's branch line to Brandon will be built soon. The steel gangs of the Canadian Pacific Railway Company are still busy west from Shebo. The steel is laid as far as Leslie. The contract for the new depot at Lanagan on the Canadian Pacific Railway has been let. The sale of lots in Lanagan has been rapid, both for business and residential purposes. A great number of immigrants and settlers are on their way westward; also a large number of settlers from the

United States by the way of North Portal.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—A few men were working, but it will be a few weeks before building will be in full operation.

*Metal and engineering.*—These trades were somewhat quiet.

*Woodworking.*—These trades were mostly inactive.

*Printing.*—The allied trades were fairly active.

*Clothing.*—Tailors, garment workers, boot and shoe workers were active.

*Food and tobacco preparation.*—Conditions were about normal.

*Leather.*—Conditions were somewhat dull.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees and laundry workers were active, but there was no demand for additional help. Furriers found trade quiet.

*Transport.*—Transportation was somewhat quiet, with the exception of passenger traffic, which was heavy. Carters, draymen and teamsters were active.

*Unskilled.*—Farm help was reported short at Saltcoats, but unskilled labour, as a rule, exceeded the demand.

#### DISTRICT NOTES.

*Duck Lake, Sask.*—While attempting to deepen a well on his farm, Hugo Jung struck a bed of coal.

*Borden, Sask.*—Negotiations are in progress between the citizens of the town and Mr. J. McLaren, of Headingly, Man., for the establishment of a flour mill at this place.

*Oak Bank, Man.*—The citizens are desirous of having a telephone system installed to keep in touch with market prices, etc.

*Saskatoon, Sask.*—The Grand Trunk Pacific and Canadian Northern Railway Companies are to occupy joint yards and stations, which will cost \$40,000. Plans will shortly be completed and put in the hands of the contractors for the erection of freight sheds and depot.

## REGINA, SASK., AND DISTRICT.

## CONDITION OF LOCAL INDUSTRIES.

*Mr. Hugh Peat, correspondent, reported as follows:—*

## GENERAL CONDITION OF THE LABOUR MARKET.

There has been a slight improvement in the condition of the labour market during the month. Building operations have been resumed, and the new post office and land titles office are being hurried to completion.

Many labourers have been provided with employment by the city council on street improvements and other work and a more hopeful and cheerful tone is evident in all branches of industry.

One new union has been formed during the month, namely, a Journeymen Tailors' Union, with a charter membership of 11 members.

A deputation composed of delegates from the Regina Trades and Labour Council waited upon the government on Wednesday, April 22nd, praying for the enactment of a Workmen's Compensation Act, and a Factory Act, and for the insertion of a fair wages clause in all government contracts. The Attorney-General pointed out that he had already given notice of motion for the introduction of a Workman's Compensation Act. The deputation was assured that their other representations would receive proper consideration.

The negotiations between the Builders' Exchange and the unions in the building trades have been broken off. It was earnestly hoped that a working schedule in the several branches of the building trades would have been arrived at, but the Exchange has decided that it cannot accede to the demands of the carpenters or bricklayers, nor submit the matter of dissention to a board of arbitration as suggested by the local unions. The carpenters are seeking an increase of 10 cents an hour over last year's schedule, the bricklayers are seeking a similar increase, and the members of the Exchange contend that the demand is altogether too high.

*Agriculture.*—Seeding operations are in full progress throughout the province, with the exception of a few low-lying districts, where the land is not yet dry. Several farmers have completed their wheat seeding already, and with this early start as compared with last year trade in seeders' supplies is brisk, and the outlook for a good crop is exceptionally bright.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were dull, though there was a slight improvement as compared with last month. Among carpenters and joiners conditions have improved slightly since last month. Painters and decorators, plumbers, gas and steamfitters were fairly busy, but builders' labourers were dull.

*Metal.*—Electrical workers and sheet metal workers were dull.

*Printing.*—The general condition of the trade was fair and showed an improvement since last month.

*Food and tobacco preparation.*—Bakers had a fairly busy month. Cigarmakers reported improving conditions, though trade was still dull.

*Miscellaneous.*—Barbers had a fair month, though active conditions do not yet prevail.

## MOOSEJAW, SASK., AND DISTRICT.

*Mr. J. R. D. Bastien, correspondent, reported as follows:—*

## GENERAL CONDITION OF THE LABOUR MARKET.

There was marked activity in the labour market during April compared with the preceding month. Particularly noticeable was the impetus given to transportation, both passenger and freight, by the heavy immigration business. The railway company has placed two steam shovels and four hauling trains in commission. The activity in the building trade was greater than at this time last

year. The excavations for the foundation of the new court house are about completed; it will cost about \$60,000. In all probability a new collegiate institute, to cost about \$100,000, will be erected in the near future. Activity lessened in the railway shops towards the end of the month. Uneasiness exists regarding the proposed changes in the wages and conditions of employment in the mechanical department of the Canadian Pacific Railway. The erecting shop is closed.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy. A larger acreage will be sown this season, and indications point to an abundant harvest. The sowing of wheat was about finished at the end of the month, which is much earlier than last year. Farm help was in demand at good wages.

*Manufacturing.*—Manufacturers of building material were fairly active.

*Railroad construction and employment.*—Activity was the rule.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners and builders' labourers were fairly busy, with plumbers, gas and steamfitters busy. Lathers and plasterers were not very active, but painters, decorators and paperhangers were very active.

*Metal, engineering and shipbuilding.*—Machinists and engineers were not very active, but steam engineers had fair employment. Electrical workers, linemen blacksmiths and horseshoers were active.

*Woodworking and furnishing.*—Woodworkers and car builders had fair employment.

*Printing.*—The allied trades found fair employment.

*Clothing.*—Conditions of employment were only fair.

*Food and tobacco preparation.*—Butchers and meat cutters were very active.

*Miscellaneous.*—Barbers, broom-makers, clerks and stenographers and delivery employees were active, and hotel, restaurant and theatre employees were very busy.

*Transport.*—Business in transportation lines, especially in the passenger service, was exceptionally good.

*Unskilled.*—Active conditions prevailed, with a good demand for men.

#### CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brocklebank, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during April has not improved as was expected. It was thought that with the opening of spring work would be found for all, but such has not been the case. There are many still out of employment, though a large number have obtained work. The farmers are not employing as many as at this time last year. During the months of February and March they were able to do considerable work on their farms, compared with other seasons; this enabled them to do their seeding with less help than last year. The city is employing a large force on sewer work and water mains; it is also having excavations done for the new subways. Work on the construction of the Dominion Exhibition buildings is being hurried, and two weeks will see most of the work in connection with these buildings completed. Transportation business has improved somewhat, both in regard to passenger and freight shipments. Bank clearings are slightly better than in the preceding month. Wholesale and retail trade improved over that of last month. Wages generally, are about the same as at this time last year, though there are more men out of employment than during the corresponding month last year, and the supply exceeds the demand. Uneasiness is felt in railway circles as to the effect of the notice of the Canadian Pacific Railway Company to some of its employees, having reference to a reduction in wages to take effect on May 1st.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers in the district have about finished seeding. This

is about one month ahead of last year. The winter wheat has come through in splendid condition. Mr. W. W. Corey, of Utah, has been awarded a large contract by the Canadian Pacific Irrigation Company. It calls for the removing of some 1,500,000 yards of earth in the district between Langdon and Crowfoot. Some two hundred teams and 450 men will be employed.

*Lumbering.*—This industry was not carried on to the same extent as during the winter of 1907, in consequence of the mills having a heavy stock from last year.

*Mining.*—The mining industry was less active than last year, a number of the coal miners being laid off.

*Railroad construction.*—Very little railroad construction work is going on in this district.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, lathers, plasterers, painters, decorators, paperhangers, plumbers, gas and steamfitters, stone cutters and builders' labourers found employment dull.

*Metal and engineering.*—Iron moulders, iron workers, machinists, engineers, steam engineers, electrical workers and linemen, blacksmiths, boilermakers, sheet metal workers and horseshoers were quiet.

*Woodworking and furnishing.*—Woodworkers, varnishers and polishers, carriage and wagon makers and car builders were quiet.

*Printing.*—Printers, pressmen, bookbinders and electrotypers were somewhat quiet.

*Clothing.*—Journeymen tailors, garment workers, hat makers, boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers, meat cutters and cigar makers were active.

*Leather.*—Leather workers and saddlers found employment quiet.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees and theatre employees had active employment. Laundry workers were busy

*Transport.*—Railway train crews, telegraphers, switchmen, trackmen and freight-handlers were somewhat quiet. Cabmen, carters, teamsters and expressmen were active.

*Unskilled.*—On the whole, the supply exceeded the demand.

#### EDMONTON, ALTA., AND DISTRICT.

*Mr. J. A. Kinney, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during April showed a slight improvement over March, but compared with April a year ago were less favourable. This was especially noticeable in the skilled trades, numbers of carpenters, bricklayers and other mechanics being unemployed. In the unskilled section the demand has been somewhat greater, and at least twice the number of labourers found employment than a year ago. This was due to the large number engaged in construction of street paving and the laying of a street car line. There were a considerable number of men employed by the Grand Trunk Pacific Co. grading yard limits in the north end of the city, also a number on railway construction both east and west. The supply, however, more than equalled the demand, as labourers are coming to the city in large numbers, and there are probably as many idle men here as at any time during the winter. Work on the Provincial Parliament Buildings is being proceeded with, a small number of men being engaged on the foundations. Work on the large packing plant to the north of the city will start about the first of May, and will give employment to a number of mechanics. Members of the Builders' Exchange reported little doing on residences as compared with April, 1907. Trade agreements between labour organizations and the Builders' Exchange expiring on May 1st, are being renewed under the same conditions as last year, the minimum rate of wages being: Carpenters, 42 cents per hour; bricklayers and masons, 60 cents; lathers,

4½ cents per yard; stonecutters, 70 cents; plasterers, 60 cents; painters, 45 cents; plumbers and steamfitters, 56¼ cents; sheet metal workers, 43 3-4 cents; electrical workers, 35 cents. In all cases where agreements exist, eight hours constitute the days' work. Unskilled labour is to be paid 25 cents per hour by the city, nine hours to the day. All contracts let by the city are to contain a clause to this effect. Work on the Strowger automatic telephone system is being proceeded with by the city. About 500 phones have already been installed.

The Provincial government have purchased the Bell Telephone system in Alberta for \$675,000, and will operate same in conjunction with lines already built by them. This system, which now connects most of the large towns, will be extended by the construction of numerous branch lines during the year, the intention of the government being to give telephone service to as large a number of farmers as possible.

A by-law granting permission to the Canadian-American Oil Company to supply natural gas to the city was approved of by the ratepayers on the 6th inst. The agreement binds the company to lay ten miles of pipe toward the city before any work is done inside. It also stipulates that the power granted the company shall cease to exist, if at the end of two years and a half the company has failed to supply gas to the city.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Seeding is rapidly progressing under very favourable conditions, being three weeks earlier than last season. The area under crop will be much greater than ever before.

*Lumbering.*—The largest cut of logs in the history of lumbering in the north will be brought down to Edmonton this spring, one firm alone having eight million feet to bring. A reduction of two dollars per thousand on last year's prices is advertised by the dealers.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters, bricklayers, masons, plasterers, lathers, plumbers, pain-

ters, steamfitters, sheet metal workers all found trade very dull, with few men working.

*Printing.*—Printers, pressmen, bookbinders reported trade only fair.

*Food and tobacco preparation.*—Trade was fair.

*Miscellaneous.*—Barbers, clerks, stenographers, hotel and restaurant employees found trade fair, but a number were out of employment.

*Transport.*—Transportation companies were busy. Immigration has started much earlier than last spring, owing partly to more favourable weather conditions.

*Unskilled labour.*—The supply exceeds the demand.

#### NELSON, B. C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay district during April was dull, there being still a considerable surplus of labour, though some improvement has taken place in comparison with last month. Roch's sawmill on the Slocan river has started operations with the usual complement of men, and the Yale Columbia Lumber Company also started its mill at Nelson on the 6th inst.

The Crow's Nest Pass Coal Company has lately been making considerable improvements to its plants, both at Coal Creek and Michel, having installed new compressors, haulage system and other machinery. The company is now contemplating the erection of a new large steel tippie at Michel, taking advantage of the temporary slack time to rush through many improvements, so as to be in a position to take care of the largely increased tonnage that will be required when business resumes its normal condition.

A cablegram from London, England, announces that Mr. M. S. Davys has secured a long term lease of the Silver King mines, thus ensuring the unwatering and

further extensive development of the property, which is said to have large quantities of shipping ore waiting extraction. In the Westmount mine, situated on Ten-Mile tributary to Slocan Lake, the Slocan district still retains the lead as the richest silver producing territory within Kootenay district, the smelter returns showing from a shipment of 23 tons of ore about 400 ounces of silver and \$1 in gold per ton. The expenses of mining and shipping will be largely reduced in future, and it is reported that a good-sized paying streak of this ore is in sight.

Residences are somewhat scarce in Nelson, and a number are under construction. The Methodist church has contracted for the erection of a new church, while the city is to build school buildings, debentures to the amount of \$60,000 having been recently sold for that purpose. The prospects for a fair share of building at Nelson this season are good.

#### NEW WESTMINSTER, B. C., AND DISTRICT.

*Mr. D. J. Stewart, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in this district continued to improve, and there are now only a small number of men idle. These, it is expected, will be absorbed in a short time, as many new avenues of employment are opening up as weather conditions improve. The B. C. Electric Railway Co. will shortly call for tenders for the construction of a part of the proposed electric road from this city to Chilliwack. The line is expected to be completed between these points by the 24th of May, 1910. This company has also undertaken to construct a dyke around what is known as the Sumas prairie, in the route to be covered by the road. About 30,000 acres of excellent agricultural land will thus be reclaimed. The company has also given a contract for a \$20,000 addition to its car shops in this city. The ratepayers of the city will be called on in

the near future to vote on a by-law authorizing the city to borrow \$175,000, to be used in opening up new streets, building new sidewalks and improving the sewers. The Dominion government dredge, which has been under construction here for some time, has been launched and will shortly leave for its destination on the Skeena river.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Agricultural operations are now in full progress, seeding being the order of the day. A considerably increased acreage will be under crop this year, as a great deal of clearing has been done in the past year. The following are current market quotations:—

Beef, hind quarters.....	\$ .08-	.9 per lb.
Beef, fore quarters .....	.06½	.07 per lb.
Mutton.....	.13-	.14 per lb.
Veal.....	.09-	.11 per lb.
Pork.....	.08½	per lb.
Eggs.....	.25	per doz.
Butter.....	.40	per lb.
Fowl.....	9.00-10.00	per doz.
Apples.....	1.25-	2.00 per box.
Potatoes.....	18.00-	20.00 per ton.

*Fishing.*—Fishing for spring salmon on the Fraser River was much better than last month, many good catches having been made. The greater part of the fish are shipped to New York, where good prices can be obtained. About 125 licenses have been issued to fish for spring salmon.

*Lumbering.*—The embargo against the exporting of logs to the United States which have been cut on provincial lands has been raised by the provincial government in response to the representation of loggers that there was about 125,000,000 feet of the poorer class of logs in the water, for which a market could not be procured on this side of the line. It was also pointed out that these logs were likely to be destroyed by the teredo if left in the water much longer. Advantage is being taken of this action of the government to send a number of booms across the line, where they can be readily disposed of.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, carpenters, painters and plumbers were active, with builders' labourers quiet.

*Metal.*—Iron moulders, machinists and engineers were quiet, with blacksmiths active.

*Woodworking.*—Car builders (electric) were busy, with shingle weavers dull.

*Printing.*—Printers, pressmen and bookbinders were active.

*Clothing.*—Journeymen tailors and boot and shoe workers were busy.

*Food and tobacco preparation.*—Bakers and confectioners were active, with cigar makers quiet.

*Miscellaneous.*—Barbers were active, with clerks and stenographers quiet.

*Transport.*—Street railway employees were active.

*Unskilled labour.*—Quietness prevailed.

## VANCOUVER, B. C., AND DISTRICT.

*Mr. George Bartley, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during April was much the same as in the preceding month, except that there was a slight improvement in some lines.

The Marine Shipmasters' Association has asked the Dominion Government to replace the beacons on the north shore of the first narrows of Burrard Inlet, and also that vessels towing heavy cargoes and ships be allowed to use tow lines of 50 fathoms in the said narrows, the limit at present being 30 fathoms and only applicable to log towers.

Judging by the clearing of building lots, an improvement in the building trade is looked for.

At a recent meeting of the Trade and Labour Council the following resolution passed:—

"Whereas this council deems it advisable that steps should be taken to protect the health and lives of those men who will be employed on the construction work of the Grand Trunk Pacific Railway now about to commence in this province..

"Therefore be it resolved that the Secretary write to the Minister of Labour, requesting him to move in the matter and have a proper system of inspection inaugurated along the entire line of construction; also that each camp have a place reserved for the sick and injured apart from the bunk-house or mess tent, pending their removal to the hospital; further, that the contractors or the Government provide a proper ambulance, conveyance or stretcher service along the line between the hospitals."

Trade between Vancouver and New Zealand has improved very much during the past few months, and the steamers leaving this part are taking as much freight as they can hold. The steamer "Indraville," the last vessel to sail, took 3,500,000 feet of lumber and 500 tons of general cargo.

Bank clearings for the week ending 24th of April amounted to \$2,842,975.

The Minister of Education, in replying to a communication received from the secretary of the Trade and Labour Council, stated that the Provincial Government had decided to provide free school books.

Civic employees are receiving union rates of wages on all public improvements etc. The resolution passed some years ago calls for the use of the union label.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The provincial fruit inspectors, while discussing with a representative of the press the damage to fruit trees, etc., said that the inspectors were doing their best to keep the orchards of the province clean, and it was the duty of the local fruit growers to assist them by seeing to it that their own stock was kept free from pests. The last of the second contingent of Salvation Army immigrants to British Columbia, originally numbering 280 altogether, arrived in Vancouver during the month and have already been placed. Of the 280 assigned to British Columbia, only about 70 reached Vancouver, and of these 50 were destined for positions on Vancouver Island, so that only from 15 to 20 domestic servants remained in the city.

*Mining.*—The Maple Leaf copper mine on Queen Charlotte Island has been bonded to the Bellingham Copper Company for the sum of \$150,000.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Quietness prevailed in all branches, particularly with bricklayers, only 50 out of 225 being employed. An improvement is looked for shortly.

*Metal, engineering and shipbuilding.*—Conditions were somewhat quiet.

*Woodworking and furnishing.*—Lack of activity was the rule.

*Printing.* — Printers and pressmen found employment fair.

*Clothing.*—Tailors reported conditions unsatisfactory, there being no signs of the usual spring activity.

*Food and tobacco preparation.*—No special activity was reported.

*Leather.*—Conditions were very quiet.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery and laundry workers reported a number of unemployed.

*Transport.*—The employees on the Canadian Pacific Railway were unsettled, owing to the negotiations pending re new schedules. Freight traffic was light, but passenger traffic was fairly good. Boats were busy.

*Unskilled.*—The number of unemployed is less than that of last month, owing to railway construction work being started to some extent in the north of the province. There are yet large numbers out of employment.

#### DISTRICT NOTES.

*Porcher Island.*—This island, situated 12 miles south of Prince Rupert, is attracting the attention of settlers and fishermen. Two syndicates have been formed and have commenced operations. They ship their fish wherever they can get a market, and have already made a beginning by selling the first catch at Prince Rupert.

*Prince Rupert.*—On Saturday, April the 11th, a start on the construction of the main line of the Grand Trunk Pacific east was made. About 50 men in the employ of Messrs. Foley, Welch & Stewart, contractors, were set to work clearing the right-of-way. Grading was begun later, and the labourers who are arriving by every boat are finding no difficulty in obtaining steady employment. It is expected that from a month to six weeks will elapse before the full plant of the contractors will have been distributed over the 100 miles section east to Kitsalas Canyon, and the 60 mile branch line from Kitimaat. Meantime a number of sub-contractors from the prairie provinces are busy inspecting the route with a view of bidding for sub-

contracts. The contractors expect to have work for 1,000 men before the end of May. As the clearing of the town-site is virtually completed, the labourers engaged here all winter are being hired by the railway contractors. The restriction prohibiting people from coming here has been removed; hundreds of shacks and tents dot the cleared town-site. Two natives of India landed at Prince Rupert from the Princess May. There is no work here suitable for Hindu labourers, and a resident who employs labour paid their fare back to Vancouver. The climate of Prince Rupert is much the same as that of England, there is a good deal of rain, very little snow, and a temperature from 10 to 70 degrees above zero. The soil is a vegetable mould covered with moss and intermixed with roots, and from one to ten feet to bed-rock. The vegetation is almost wholly evergreen, the timber being red and yellow cedar, spruce, hemlock and bull pine. The undergrowth is principally blueberry bushes. The harbour is one of the finest on the Pacific coast.

#### VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was somewhat improved compared with last month, and there were not as many unemployed as formerly. This is mainly due to the fact that a great deal of building has been in progress, and the season's work in this line may now be said to be well under way. Besides, a number have left the city now that the bad weather is over, to seek employment in the mining camps and along the proposed line of the Grand Trunk Pacific Railway. Every boat that leaves for Prince Rupert is crowded to its utmost capacity, and often leaves passengers behind. There is no demand for more workmen than can be found at present in the city. During the past month, the ratepayers of Victoria

voted on and passed by-laws approving the expenditure of a large amount of money for sewerage work, the building of a new school, the laying of a salt water system for fire protection, which work when started will give employment to a large number of workmen for several months.

A new cigar factory has been started by the Morena Cigar Co. This factory will employ about 30 hands, two-thirds of whom are journeymen, all making good wages. The average weekly payroll is about \$400.00.

Business, both wholesale and retail, is reported to be the best the city has ever experienced, though this is not what is considered the busy season of the year. Local bank clearings for the month of March totalled \$4,290,782, compared with

\$4,272,712 the previous month, and \$4,059,507 for the corresponding month in 1907. The figures for the three months total \$12,954,589, compared with \$11,719,838 for the first quarter in 1907, and \$11,278,666 for the like period in 1906. Clearings for the week ended March 31 totalled \$794,995.

The building permits taken out in March were almost double in value of those for February, and almost equalled those of both January and February. The record is as follows: January, \$54,725; February, \$63,315; March, \$110,800. The total for the first quarter of the year is \$238,840.

The following is the number of foreign immigrants landed at port of Victoria, B.C., from December 1st, 1907, to March 31st, 1908.

	Chinese.	Japanese.	Hindoos.	Poles.	Cylon.	Total
December.....	55	315	74	2	3	449
January.....	43	77	25	8	.....	153
February.....	35	139	.....	.....	.....	174
March.....	52	134	.....	.....	.....	186
Totals.....	185	665	99	10	3	962

#### CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—The only fishing going on was by a small fleet of sloops manned by Indians, Greeks and Japanese, who bring in halibut for the local market. Trap and net fishing for salmon for the canneries will not commence for a month yet.

*Lumbering.*—All the lumber mills were running to their fullest capacity, and as it is expected that the season now opening will be a heavy one for building, the outlook is bright.

*Manufacturing.*—All the machine shops and shipyards were busy, and kept their regular employees constantly engaged.

*Sealing and whaling.*—The few sealing schooners which went out in the spring are expected to report shortly, but it is considered unlikely that their catches will be large. Good reports were received from the whaling company's station on

the west coast, some good catches having been made.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—With building permits amounting to over \$110,000 for the month of March, and with the buildings at present being constructed, business will be very active. The contract has been awarded for the construction of the new agricultural buildings, which will give employment to a large number of carpenters, etc. Wm. Mable is about to build a large addition to his carriage works, and a new garage is to be erected by the Woods Bros. Inside of a few weeks practically all workmen in the building trades should be employed for some months.

*Metal, engineering and shipbuilding.*—Iron moulders have found business in a normal condition. Iron workers and helpers were busy, with plenty of men to

do the work. Machinists and engineers were well employed in the local machine shops. Electrical workers and linemen were not busy, but as new buildings progress, business will pick up. Stove-mounters had all the work they could do. Boilermakers and iron shipbuilders have been well employed during the month, but shipwrights and caulkers do not see much business ahead, the new river boats which they have been working on during the winter now nearing completion.

*Woodworking and furnishing.*—Woodworkers and upholsterers have been busy and the outlook is good for the spring. Varnishers and polishers were well employed.

*Printing.*—While the printing and book-binding trades were very active, there were a few hand compositors out of work owing to a lay-off in the government printing office. There has been a demand for linotype operators on the morning paper.

*Food and tobacco preparation.*—Bakers, butchers and meat cutters have found business good. Cigar makers report that the local make is still in good demand, and keeps the regular number of hands well employed.

*Leather.*—Harness makers have found business in a fair condition.

*Miscellaneous.*—Barbers and hotel and theatre employees were well employed.

*Transport.*—Owing to the cheap passenger rates between here and Puget Sound ports, trade has been brisk.

*Unskilled.*—While a great deal of unskilled work is being done at present, it is expected that much more will be undertaken in the near future. This will employ practically all those now out of work.

## NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district during the month though, not active, has shown an improvement over last month. There were still a number of

men out of work, but the most of them have found employment of some kind or drifted away to other places. Trade has been quiet but merchants are expecting an improvement before long. There have been no changes in hours of labour or rates of wages.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers are well ahead with spring work.

*Fishing.*—With the exception of the whale fishing on the west coast of the Island, there was nothing doing among the fishermen.

*Lumbering.*—Work was very quiet, there being hardly any of the lumber camps working, and those working are not full-handed. In the sawmills work was slack.

*Mining.*—The coal mines in this city were working 4 days a week, and the other mines in the district were working short time. The quarries are not doing much at present.

*Railroad construction.*—Work is going on at the extension of the E. & N. Ry. Clearing the right-of-way is nearly done, and contracts are being called for construction, which it is expected will soon be begun.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons reported work dull. Carpenters were active there being more new buildings in construction and contemplated than for several years. Painters were quiet, plumbers fairly active, and builders' labourers quiet.

*Metal.*—Blacksmiths and carriage makers reported work as fairly active, but not up to expectations for the time of year.

*Printing.*—Printers were quiet.

*Clothing.*—Tailors were quiet.

*Transport.*—Teamsters and expressmen were fairly active.

*Unskilled labour* was better employed than last month. The city has been doing a good deal of street work, and the provincial government has also employed a number of men on road and other work. Nevertheless, there are still a number of men out of work in the district.

## BUILDING OPERATIONS IN CANADA, DURING 1907.\*

THE Department of Labour presents herewith a detailed statistical return relating to building operations in the leading industrial centres throughout Canada during the calendar year, 1907. The return is similar in general scope to those previously issued by the Department with reference to building in 1906 and 1907.

For some time past the great extent of building has constituted one of the most noteworthy features of the season throughout Canada in connection with industrial and labour conditions, the marked expansion which has taken place in commerce and industry having been accompanied by a corresponding increase in the number of buildings erected or enlarged. The return is intended to afford an index to the nature and extent of this activity. It is also of value as throwing light not only on the amount of employment rendered available to workmen in the building trades and in the manufacturing of building material, but on the general character of industrial developments in Canada during the period covered.

The statistics were collected by the Department during the months of January, February and March, returns being sought of the number of permits issued in municipalities having a population of 5,000 and upwards, and of the declared valuation of the buildings erected therein, the statistics being further classified according as the work was in connection with new buildings or repairs. In municipalities in which no system of issuing permits is in use returns based on estimates prepared by local architects, building contractors, assessment commissioners or others in a position to furnish reliable information were secured.

The statistical information collected in this way, is presented in full in the accompanying tabular statement, details being added where such were obtained for the preceding year. A description in detail is given below with reference to the more important features that characterized the operations of the year in the several municipalities.

## The General Result.

It will be seen that detailed information was obtained by the Department with reference to building operations during 1907 in fifty-one localities in the Dominion, compared with forty-one in 1906, an estimate of the total value of the buildings being obtained in each case. The return is complete for all localities of a population of 8,000 and over, but replies were not received from certain of the smaller municipalities.

The total value of buildings erected in these localities was \$58,587,987.50. Of this the city of Toronto, Ont., contributed \$14,325,800, being, as in 1906, the locality in which building was most active during the year. The city of Montreal, Que., with \$8,406,136, stood second; Winnipeg, Man., stood third with \$6,455,350 and Vancouver, B. C., fourth with \$5,596,594. The remaining cities in which the value of building during 1907 exceeded \$500,000, were: Hamilton, Ont., \$3,030,240; Ottawa, Ont., \$2,364,950; Edmonton, Alta., \$2,275,218; Calgary, Alta., \$2,109,249; Victoria, B. C., \$1,500,000; Regina, Sask., \$1,177,840; Medicine Hat, Alta., \$1,000,000; London, Ont., \$875,000; Halifax, N. S., \$626,603; Berlin, Ont., \$770,000; Stratford, Ont., \$667,038; Brandon, Man., \$557,180; Quebec, Que., \$529,820; Sherbrooke, Que., \$520,100; New Westminster, B. C., \$520,000; Brantford, Ont., \$510,020; and Guelph, Ont., \$520,750.

Comparative returns relating to the value of buildings in 1907 and 1906 were obtained in the case of 40 cities. It will be seen from the table that these included all the larger centres. In these cities the total value of buildings erected in 1906 was \$58,615,174, and in 1907, \$56,305,792.50. The decrease of building in these cities in 1907 as compared with 1906 was, accordingly, \$2,309,381.50. The localities from which returns were received to the effect that the year was less active than in 1906, were Sydney and Halifax, N.

\* For a tabular statement showing rates of wages paid and hours of labour worked in the building trades throughout Canada during 1906 and 1907 see the *Labour Gazette* for December 1807, pp. 700-715.

S.; Charlottetown, P.E.I.; St. Hyacinthe and Montreal, Que.; Belleville, Welland, St. Catharines, Woodstock, London, St. Thomas and Sault Ste. Marie, Ont.; Winnipeg and Brandon, Man.; and Regina, Sask. The most notable decrease of the year took place at Winnipeg, Man., viz., \$6,305,100. In all the other cities increases were shown. The localities in which the increase in the amount of building during the year compared with the preceding year was more than \$500,000, were as follows:—

City.	Amt. of Increase.
Vancouver.....	\$1,362,684
Toronto.....	1,165,402
Hamilton.....	1,105,425
Victoria.....	800,700
Ottawa.....	635,975
Calgary.....	626,265

**Nature and Extent of Building by Localities.**

The following is a brief statement showing the general nature and extent of building operations during 1907 in the more important centres of population throughout Canada:—

*Sydney, N. S.*—Thirty-six permits for new buildings, to the value of \$80,750 were issued, and 11 permits for repairs to the value of \$6,425, making a total of \$87,175, compared with \$118,425 in 1906, and \$118,800 in 1905.

*Sydney Mines, N. S.*—Some 55 new buildings, valued at \$150,000, were erected in 1907. Among these were a presbytery and church valued at \$20,000; another church valued at \$11,000; and a town hall valued at \$14,000.

*Halifax, N. S.*—The total number of permits for new buildings issued was 119 and for repairs, 378. The value of new buildings erected was \$459,176 and of repairs, \$167,427, making a total of \$626,603. In 1906, which was the most active building year on record in Halifax, the total was \$688,315. Among important buildings, for which contracts were awarded in 1907, were the following:—Municipal engine house, \$17,616; school,

\$35,000; monastery, \$45,000; telephone building, \$50,000; bank, \$30,000; power house, \$30,000; arena, \$35,000; car shops and machine shops, planing mill, etc., of the Silliker Car Company, \$29,500; addition to court house, \$25,000.

*Amherst, N. S.*—Building was very active. Between April and November some 49 new dwellings were erected. In addition, new offices were built by the Bank of Nova Scotia, and by the Royal Bank. Three large commercial blocks, and large additions to the rolling mills, and to the Amherst Boot and Shoe Factory were built. The total value of these buildings was estimated to be in the vicinity of \$500,000, an aggregate somewhat in excess of that of 1906. In neighbouring towns the value of buildings was estimated at \$100,000.

*Springhill, N. S.*—Building operations were almost suspended during the summer of 1907 owing to labour troubles, though some important buildings, including a church, a public hall, a block of stores, and a number of dwellings had been projected. The total value of building was about \$30,000, of which \$13,000 was expended on a town hall, and \$10,000 on dwelling houses. The decline in lumbering has been felt by this municipality, but the outlook is regarded as favourable, if labour difficulties are avoided.

*Charlottetown, P.E.I.*—The buildings erected during the year were as follows:—

Buildings.	Value.
House.....	\$ 5,000
".....	3,500
".....	3,000
Boiler Shop.....	2,500
Store.....	2,000
P. W. College Wing.....	60,000
Telephone Bldg. and Extensions.....	1,900
Repairs to Post Office.....	1,200
House.....	2,000
Stable.....	700
Addition to residence.....	500
".....	300
House.....	1,500

In addition to the above a new railway station and work shop were erected. On the whole the season was quiet.

\* In cities in which a system of issuing building permits exists, the returns under this heading relate to the number of permits issued; elsewhere the reference is to the estimated number of buildings erected or altered.  
 † Estimated.

*Moncton, N.B.*—The following statement shows the extent of building in Moncton during 1907, as compared with the two preceding years:—

	No. Permits	Dw'ling Houses.	Other Bldgs.	Re-pairs.	Value.
<b>\$</b>					
<i>City:</i>					
1905...	55	15	15	25	125,200
1906...	56	31	9	16	118,600
1907...	94	60	10	24	157,800
<i>Suburbs:</i>					
1907 .....		15	5		28,000

It will be seen that the total value of buildings erected and repaired in 1907 was \$185,800. Of the permits issued, 70 were for new buildings and 24 for repairs, the latter being valued at \$12,800, and the former at \$145,000. The year was considerably more active than 1906.

*St. John, N. B.*—The number and value of buildings erected in 1907 was as follows:—

Number.	Nature of Building.	Value.
87.....	Wooden.....	\$ 181,025.00
13.....	Brick.....	253,750.00
3.....	Brick cased.....	3,800.00
1.....	Stone.....	21,000.00
104		\$ 459,575.00

Fifty-eight of the above wooden structures are dwellings and 6 are to be used as stores and dwellings combined. Three of the brick buildings are dwellings, the rest (10) being warehouses and stores. The 3 brick-cased buildings are dwellings. In the previous year the total value was \$306,550, and in 1905, \$220,300.

*Quebec, Que.*—The number of permits issued for new buildings was 98, and for repairs 77; the value of the former being estimated at \$511,550, and of the latter at \$18,270. In addition to the above, a considerable amount of building was unrecorded, as permits are not required except where interference to traffic on thoroughfares occurs. Building of recent years has been more active in the suburbs

of Limoilou, Stadacona, St. Malo and Notre Dame than in Quebec proper.

*Three Rivers, Que.*—The number of new buildings was 47, valued at \$458,600, and of buildings repaired 21, valued at \$17,100. The principal buildings under construction were a convent valued at \$75,000, a school valued at \$32,000, and a cotton factory on which \$250,000 has been already expended and which when completed, will cost in the neighbourhood of \$1,000,000. Fourteen of the new buildings erected were of brick, the rest being of wood. Compared with 1906, there was an increase estimated at 27 per cent. in the amount of building.

*Sherbrooke, Que.*—The approximate value of new buildings erected during 1907 was \$520,100. The valuation roll, completed in June, showed an increase of \$265,000 in the valuation of property compared with the preceding year. Since the roll was completed several large buildings were started, including new shops by the Rand Drill Company, a number of new factories, a Y.M.C.A., building, several new dwellings, and additions to the hospital and Grand Trunk Railway station. By wards the figures were as follows: In North Ward, which is the residential part of town, some \$48,500 was spent on dwellings, with the exception of \$15,000 which has been spent on a partially completed Y.M.C.A. building. There will be a further \$15,000 spent in 1908 on this building as well as about \$10,000 for dwelling houses already contracted for. In the Centre Ward the figures are placed at \$48,300.00. Of that amount, \$15,000 was spent on a business block, and a like amount each on a new cigar factory and a building for a patent medicine company. The rest was expended on new dwelling houses and repairs to others. In this ward a new business block to cost about \$30,000 will be erected, in 1908, and about \$5,000 will yet have to be spent on the factories and business block mentioned above. Among the large expenditures in South Ward was \$5,500 for a jewellery factory; \$15,000 for a pork packing establishment; \$50,000 for new shops of the Rand Drill Co., \$15,000 for remodelling and additions to G. T. R.

Station; \$10,000 for an oil warehouse, \$3,000 for car barns, and about 80,000 on dwellings and stores, making in all about \$193,000. In this ward, the E. & I. Fairbanks' Company will begin erecting shops in the spring, the estimated cost being about \$75,000, while the contract for the new drill shed has been awarded, and work will commence when the season opens, the price being in the neighbourhood of \$80,000. In the East Ward, several large contracts were entered into. About \$100,000 has been spent on the Catholic Church, and about \$75,000 on the new hospital. The Exhibition Association spent between \$30,000 and \$40,000 on new buildings, while a large number of dwelling houses were erected making in all an approximate expenditure of about \$249,000. There is yet to be spent on the hospital another \$75,000 at least, and it will take another \$40,000 to complete the church. Most of the houses in Sherbrooke are owned by the occupants, and considerable building takes place without an architect being consulted, as one set of plans may be followed for a number. The outlook, as will be seen from the above figures, is as encouraging as that of last year. The figures given of the work to be undertaken has been contracted for to a large extent.

*St. Hyacinthe, Que.*—Building was very quiet. No system of issuing permits exists, but an estimate based on the opinion of leading contractors placed the total number of new buildings at 12, valued at \$21,600, and the number of buildings repaired at 30, valued at \$28,000. In the total expended on repairs was included an item of \$10,000 for the Roman Catholic Cathedral.

*Montreal, Que.*—According to the official return of the building inspector, new buildings to the value of \$7,552,136 were erected and alterations to the value of \$854,000 were carried out, making a total of \$8,406,136. According to an estimate made by the Builders' Exchange this total represents only 60 per cent. of the actual value of the buildings completed. In the various suburbs the value of buildings erected, according to the Builders' Exchange, was as follows:

St. Louis, actual.....	1,478,660
Delorimier, actual.....	402,500
Maisonneuve, actual.....	1,504,645
Cote St. Paul, (estimated).....	500,000
Outermont, (estimated).....	200,000
Westmount, actual.....	893,600

According to the Builders' Exchange, therefore, the total value of buildings erected in Montreal and contiguous suburbs was \$16,748,135. The feature of the year was the large amount of money invested by banks in office buildings, one of which, costing \$600,000, was the largest contract of the year. In 1906, the total value of building in Montreal proper was \$8,600,300 and in 1905, \$5,590,698.

The following table, shows by months, the value of buildings undertaken during 1907:—

January.....	\$ 50,450
February.....	157,460
March.....	534,636
April.....	1,030,866
May.....	1,870,465
June.....	864,266
July.....	843,503
August.....	411,925
September.....	449,676
October.....	998,159
November.....	155,815
December.....	182,065

The foregoing figures represent over 1,400 building permits, or an average of about four and a half a day for the whole season, but during the building months of April and May the average was a little over sixteen permits a day.

The permits by months for new buildings were issued as under:—January, 20; February, 64; March, 90; April, 205; May, 231; June, 183; July, 138; August, 119; September, 148; October, 137; November, 79; December, 58.

*Hull, Que.*—Building operations were active. Though no official statistics are kept, it is estimated that new buildings and improvements to the value of \$200,000 were carried out during 1907. Important structures completed were, the Wood' Building costing \$75,000; the Bank of Montreal costing \$40,000; hotels costing \$13,000 and \$7,000, and dwellings costing \$12,000. The cement company began in December the expenditure of \$250,000 on the enlargement of its plant. At Aylmer, Buckingham and Gatineau Point conditions were quiet. About \$100,000 was spent on a residence at Meach's Lake.

*Ottawa, Ont.*—Some 307 permits for new buildings, valued at \$1,888,900, and 48 permits for repairs, valued at \$476,050, were issued, making a total of 355 permits for building aggregating \$2,364,950 in value, compared with 362 permits for \$1,728,975 in the preceding year. Among the permits which account for the increase was one for an addition to the House of Commons to cost \$237,443; one for an addition to the Collegiate Institute to cost \$222,900, and one for the erection of a Y.M.C.A., building to cost \$217,000.

The chief contracts expected during 1908 are those for a new Grand Trunk Railway station and hotel, to cost respectively \$1,000,000 and \$1,500,000. A scarcity of dwellings prevails, and it is expected that a considerable number will be erected this year. Some important amendments in the building by-laws are under consideration.

*Kingston, Ont.*—A list of the most important buildings under construction at Kingston, Ont., during 1907, is as follows:—

	Value.
A Biological Department at Queen's University.....	\$ 50,000.00
Residence.....	8,000.00
Residence.....	9,000.00
3 residences.....	9,000.00
Additions and repairs to store.....	9,000.00
Residence.....	4,000.00
Power house, Canadian Locomotive Works..	15,000.00
Improvements, Artillery Park, Barracks...	20,000.00
Incidents, sundries, repairs, etc.....	25,000.00
<b>Total.....</b>	<b>\$149,000.00</b>

*Belleville, Ont.*—According to contractors' estimates, between 25 and 30 new residences were erected at a cost of about \$60,000. A sum of \$60,000 was spent on the Hotel Quinte, \$25,000 on the new drill hall, \$50,000 on a House of Refuge, \$25,000 on a public library and \$25,000 on a cement plant. Repairs and enlargements were estimated to cost \$20,000. The total was \$265,000 compared with \$600,000 in the preceding year.

*Peterborough, Ont.*—Two hundred and sixty-nine permits for new buildings, valued at \$752,860, and 35 permits for repairs, valued at \$29,161, were issued. The system of issuing permits was adopted on April 1. Among the new buildings erected were the following:—

Collegiate institute.....	\$ 60,000.00
Drill hall.....	125,190.00
Normal school.....	54,000.00
R. C. Church.....	56,000.00
North Ward school.....	25,000.00
Music conservatory.....	3,000.00
	<hr/>
	\$ 323,190.00

Buildings erected in the surrounding district were approximately \$50,000 in value. The value of buildings and repairs carried on in 1906 was approximately \$615,000.00.

Toronto, Ont.—The approximate value of buildings erected during 1907 was \$14,325,800, compared with \$13,160,398 in 1906. This is the highest for any one locality in Canada. The number of new buildings erected in 1907 was 5,051 compared with 4,710 in 1906. The following table shows the number of permits issued for the several classes of buildings during 1907:

NO OF PERMITS AND CLASSIFICATION THEREOF, 1907.

Permits.	Buildings.	Value.
1,932	Brick dwellings .....	\$5,900,570.00

5,051	Total	\$14,325,800.00

Niagara Falls, Ont.—An estimate of the extent of building operations during 1907 is as follows:—

	New.	Improvements.	Total.
Factory Buildings.....	100,000	20,000	120,000
Business Buildings.....			
(stores, etc.).....	92,000	10,000	102,000
Dwellings, etc.....	212,000	26,000	238,000
Totals.....	\$404,000	56,000	460,000

The above figures are not official. They are based on reliable information and careful estimates. The total is approximately \$100,000 in excess of that of the previous year.

Welland, Ont.—The following is an estimate of the buildings erected:—

	New.	Improvements.	Total.
Factory Buildings.....	135,000	.....	135,000
Business Buildings .....			
(stores, etc.).....	40,000	.....	40,000
Dwellings, etc.....	207,000	10,000	217,000
Churches.....	11,000	.....	11,000
Totals.....	\$393,000	10,000	403,000

The above figures are not official. They are based on a carefully compiled list of building contracts. In 1906 the total value of new buildings was estimated at \$450,000.

St. Catharines, Ont.—Some 53 permits for new buildings, valued at 188,420, and 21 for repairs, valued at \$32,700, were issued, making an aggregate of \$221,120, compared with \$225,735 in 1906. Included in this total were bank buildings valued at \$75,000 and \$35,000, and \$25,-

000 for a factory extension. Among buildings erected in the surrounding district were 20 residences valued at \$43,000; a power station at Thorold, valued at \$15,000; a smelter at the same place, valued at \$20,000 and factory extensions, valued at \$8,000, which with \$22,000, expended on miscellaneous buildings make a total of \$108,000.

*Hamilton, Ont.*—The Building Inspector's report for the year ended October 31st, 1907, showed that 956 buildings, valued at \$3,030,240, were under construction, compared with \$2,134,815 in the preceding year. A classification of these buildings is as follows:—

Brick dwellings.....	525	\$1,095,000
Frame dwellings.....	264	267,125
Alterations to dwellings.....	42	20,000
Stores and office buildings.....	50	482,950
Factories and additions to same.....	34	793,450
Churches, schools, etc.....	5	225,400
Home for incurables.....	1	29,150
Theatres, halls, etc.....	4	77,305
Hotels.....	3	13,000
Cement buildings.....	4	4,400
Stables and other buildings.....	24	21,560
		956. \$3,030,240

There were 100 more brick houses erected last year than in 1906, and 154 more frame houses. During the year, sewer construction was on a larger scale than ever before, 993 buildings having been connected with the city sewers.

Among the larger buildings under construction during the year were the terminal station; a church (\$150,000); a club (\$20,000); a school (\$52,000) and a bank (\$20,000).

*Brantford, Ont.*—The number of permits issued for new buildings was 350, and for repairs 41. The value of the former was \$415,630 and of the latter, \$94,390, aggregating \$510,020, compared with \$409,675 in the preceding year. This was the most active building year in the history of the city (\*). Of the above total, \$135,040 were expended on 7 factory extensions, about \$5,000 less than were expended last year; \$29,000 were spent on a bank building and \$8,000 on church extensions. In addition, about 225 houses were built, ranging in value from \$800 to \$7,000 each. There were 53 more permits issued in 1907 than in 1906.

*Paris, Ont.*—About \$215,000 were spent for additions and repairs to buildings in 1907, of which \$200,000 were for factory extensions.

*Guelph, Ont.*—It was estimated that the total value of buildings erected during the year was \$502,750, a small increase over the preceding year, which was regarded as exceptionally active. The total was made up as follows:—

Residences.....	\$184,150
Public buildings, churches, etc.....	165,400
Factories.....	137,400
Stores.....	15,800

The houses erected were of a superior class.

*Berlin, Ont.*—Some 275 new dwelling houses were erected, at a total cost of \$550,000. In addition, several business blocks were built at an aggregate cost of \$50,000; a new market building was erected costing \$20,000, and extensions and additions to factories carried out at a cost of \$150,000, making a total of \$770,000.

*Waterloo, Ont.*—The sum of \$213,000 was expended on new buildings, including residences, additions to factories, etc.

*Woodstock.*—The total value of buildings and repair work during the year was estimated at \$121,000, compared with \$161,000 in 1906.

*Stratford, Ont.*—One hundred and fourteen permits were issued for new buildings, valued at \$641,485, and 127 for alterations and repairs, valued at \$25,553, a total of \$667,038. Among the new buildings erected were the following:—

Residences.....	123
Factories and shops.....	5
Stores.....	3
Stables.....	9
Church.....	1
Additions to factories.....	4
School.....	1

*London, Ont.*—Estimates made by leading contractors place the total number of buildings erected at about 250, valued at \$875,000, compared with \$1,200,000 in the preceding year.

*St. Thomas.*—New buildings (59) to the value of \$99,050, and repairs (26) to the value of \$10,360, were completed, making a total of \$109,410. In 1906 the total was \$200,000. It was estimated by the assessor that the amount quoted for repairs was considerably short of that

\* See the *Labour Gazette* for March, 1907, page 1063.

actually expended in this connection during the year.

CLASSES OF NEW BUILDINGS ERECTED IN WINNIPEG IN 1907.

	No.	Value.
Wood frame buildings, without or with, only limited sanitary improvements.....	627	737,450
Wood frame with stone basement—all modern.....	532	1,762,150
Brick dwellings—all modern.....	82	555,900
Brick veneer—all modern.....	17	140,200
Stores—one storey.....	44	65,900
Apartment and office blocks.....	23	696,150
Churches, School and Institutional Buildings.....	20	238,550
Warehouses and Factories.....	64	1,132,200
Garages and Public Buildings.....	20	129,100
Stables, Sheds and Workshops.....	443	178,450
Additions, Repairs and Alterations	965	812,000

*Chatham, Ont.*—New buildings were erected to the value of \$124,038.50 and repairs carried out to the value of \$9,997 in 1907. This estimate is based on the assessed value of the properties and may be regarded as a minimum valuation. Among the contracts awarded were, one for a brass factory valued at \$16,000, one for a maternity hospital valued at \$10,950, one for a hotel valued at \$12,000, one for a business block valued at \$10,942 and one for a business block valued at \$7,000.

*Sarnia, Ont.*—According to an estimate made by contractors, 33 new buildings were erected, valued at \$116,000, and 16 extensions and repairs carried out, valued at \$18,350. One of the new buildings was a chain factory costing \$39,000.

*Windsor.*—Permits for 76 new buildings, valued at \$166,350, and for 13 repairs, valued at \$4,890, were issued in 1907, making a total of \$171,240, compared with \$168,245 in 1906. Among the more important constructions were an apartment house valued at \$18,000 and a wood mantel factory valued at \$32,000.

*Sault Ste. Marie.*—Very little general building was done during the year. Among new buildings were:—

	Value.
Church.....	\$ 33,000
Fire hall.....	15,000
Convent school.....	14,000
Addition to church.....	6,000
Addition to hospital, building.....	30,000
heating, furnishing, etc..	15,000
Total.....	\$113,000
Repairs.....	800
Total.....	\$113,800

*Winnipeg, Man.*—During 1907, buildings to the value of \$6,455,350 were erected. The total in 1906 was \$12,760,450. The number of permits was 2,277, compared with 3,508 in 1906. A classification of the new buildings erected is as follows:—

*Brandon, Man.*—Some 230 permits for new buildings, valued at \$556,230, and 2 permits for repairs, valued at \$950, were issued. These prices are bare contract prices and do not include the value of sub-contracts awarded for heating, plumbing, painting, etc.

The following sums were expended on construction work by the municipality during 1907:—

Nature of work.	Value.
New pavements.....	\$ 8,804.00
New sewers.....	32,780.82
Water works extensions, mains.....	14,497.82
new services.....	4,848.95
new meters.....	5,312.50
New bridge.....	20,000.00

*Regina, Sask.*—Four hundred and seven permits for new buildings, valued at \$1,145,240, and 73 permits for repairs, valued at \$32,600, were issued, making a total of 418 permits issued and a total valuation of \$1,177,840. This was an increase of 60 in the number of permits, though the total valuation of buildings begun in 1906 exceeded that of 1907.

*Yorkton, Sask.*—The following buildings were erected in 1907:—

No. of Bldgs. erected.	Nature of Buildings erected.	Value.
52	New dwellings.....	45,450.00
1	Elevator.....	7,000.00
1	Bank.....	9,000.00
1	Business block.....	10,000.00
2	Brickyards.....	20,000.00
1	Public school.....	3,500.00
	Repairs and additions.....	5,050.00
	Total.....	\$100,000.00

In addition, a hotel valued at \$60,000, a land titles' office valued at \$35,000, and a post office valued at \$20,000 were under construction. A system of waterworks and sewerage is being installed at a cost of \$45,000, and additions are being made to the telephone system costing \$10,000. Contracts already estimated for the present year aggregate \$50,000 in value.

*Edmonton.*—Seven hundred and eighty-eight permits for new buildings, valued at \$2,017,407, and 122 permits for repairs, valued at \$257,811 were issued, making a total of 910 permits issued and a total valuation of \$2,275,218, compared with a total of 930 permits and a total valuation of \$1,869,069 in 1906.

*Medicine Hat, Alta.*—It was estimated that the value of building operations would approximate \$1,000,000. Among important buildings under construction were:—

	Value.
Bank building.....	\$35,000.00
Club building.....	20,000.00
Post office.....	40,000.00
High school.....	30,000.00
Hotel.....	20,000.00
Brick factory.....	150,000.00
Armouries.....	16,000.00
Western canneries establishment.....	58,000.00

The sum of \$16,175 was expended on waterworks, \$10,140 on sewers and \$15,790 on gas mains during 1907.

*Lethbridge, Alta.*—The number of building permits issued was 103, for buildings aggregating \$353,900 in value. Among the more important buildings under construction were the following:—

	Value.
1 Woollen mill.....	\$40,000.00
1 Flour mill.....	60,000.00
1 Flour mill.....	20,000.00
1 Brick plant.....	15,000.00
1 Kindergarten School.....	5,000.00
2 Brick business blocks.....	21,000.00
Additions to brewing plant.....	30,000.00
1 Hospital.....	4,500.00
Additions to hotel.....	10,000.00
3 Brick residences.....	12,300.00
58 Frame residences.....	101,100.00
C.P.R. water tank, addition to round house and various buildings.....	26,500.00

The most important work under way was the construction of the C.P.R., bridge over the Belly River, commenced in October, 1907, which is 5,327 feet long and 310 feet above the river. About one-half of the concrete piers have been constructed and the steel work on the superstructure will commence in the spring.

*Macleod, Alta.*—Building during 1907 was valued at \$80,000 as follows:—

New Buildings.		Alterations and Extensions.		Total.	
Number	Value.	Number	Value	Number	Value
37	\$69,165.00	16	\$10,835.00	53	\$80,000.00

The sum of \$4,000.00 was spent on an addition to a hotel, \$34,000.00 for a brick and stone business block, and the balance on private dwellings.

*Calgary, Alta.*—Five hundred and five permits for new buildings, valued at \$2,095,164, and 12 for repairs, valued at \$14,085, were issued in 1907. Among the important buildings in course of construction were the following:—

C.P.R. Depot.....	\$225,000.00
Court House.....	22,500.00
City Hall.....	150,000.00
Register Office.....	120,000.00
Y.M.C.A.....	90,000.00
Normal school.....	70,000.00
High school.....	30,000.00
Total.....	\$910,000.00

*Red Deer, Alta.*—The number of new buildings erected was 43, costing \$90,160, and of buildings repaired 25, costing \$6,785. Among the new buildings was a church costing \$30,000, of which only \$11,000 has been expended to date.

*Edmonton, Alta.*—The value of building permits issued during 1906 was \$1,869,069, compared with \$2,268,210 in 1907. Owing to the money stringency a considerable portion of the latter amount was not spent.

*Fernie, B.C.*—The following buildings were erected:—

Building.	Class.	Value.
Post office.....	Brick ...	\$ 60,000.00
Court House.....	Frame ..	25,000.00
Rink.....	" ..	23,000.00
Western Canneries establishm't	" ..	18,000.00
C.P.R., station.....	" ..	20,000.00
Laundry.....	" ..	10,000.00
Temperance hotel.....	" ..	12,000.00
Elk planing mill.....	" ..	10,000.00
Wood McNab Mill.....	" ..	10,000.00
Jail.....	" ..	1,500.00
Fire hall.....	" ..	1,500.00
Residences.....	" ..	30,000.00
Fernie hotel, addition.....	" ..	8,000.00
Livery.....	" ..	2,000.00
Home hospital, addition.....	" ..	1,000.00
		<b>\$232,000.00</b>

*Nelson, B.C.*—There have been issued throughout the year, within the fire limits, one permit for a brick building, costing \$1,800 and eighteen permits for alterations, costing \$3,250. Outside the fire limits, 11 permits have been issued comprising new buildings and repairs, costing \$91,129, making a total of \$95,179.

*Rossland, B.C.*—Building has been quiet for the past two or three years. The value of construction in 1907 was estimated at \$20,000.

*New Westminster, B.C.*—Some 300 new dwellings valued at \$450,000 and repairs valued at \$20,000 were carried out in 1907. In addition, new factory buildings to the value of \$30,000 and repairs to factories valued at \$20,000 were completed, making a grand total of \$520,000. In 1906 the total value of buildings was only \$200,000.

*Vancouver, B.C.*—In 1906 there were

issued 1,006 building permits, valued at \$4,233,910, compared with 1,770 permits, valued at \$5,596,594, in 1907, or an increase for the latter year of 764 in the number of permits and \$1,362,684 in the value represented.

*Victoria, B.C.*—Building during 1907 was more active than in many years past. The aggregate value of buildings erected was estimated at nearly \$1,500,000. The following is the record in previous years since 1890:—

1890.....	\$1,101,200
1891.....	1,279,620
1892.....	1,045,500
1893.....	503,900
1894.....	312,725
1895.....	419,600
1896.....	396,600
1897.....	334,800
1898.....	216,800
1899.....	255,500
1900.....	363,850
1901.....	370,300
1902.....	326,000
1903.....	337,940
1904.....	607,150
1905.....	554,250
1906.....	699,300

It will be seen that the heaviest previous year was 1891, when the aggregate total was \$1,279,620.

*Nanaimo, B.C.*—The building of dwellings was more active in 1907 than in 1906, both in Nanaimo and the surrounding district. No system of issuing building permits obtains. An approximate estimate of the value of new buildings erected in the city is \$10,000, with about the same amount on repairs. The value of buildings erected in the district is estimated at \$20,000.

#### THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF APRIL, 1908.

**D**URING the month of April the Department received two applications for the establishment of a Board of Conciliation and Investigation, viz.:

1. On behalf of various trades in the mechanical departments of the Canadian Pacific Railway, the application reaching the Department from representatives of the employees at Winnipeg, and the dispute affecting, it was alleged, 1,770 persons directly and 1,600 persons indirectly.

2. On behalf of various trades in the mechanical departments of the Canadian Northern Railway, the dispute directly affecting, it was alleged, 850 employees.

Of applications received prior to the beginning of the month, proceedings in connection with which remained unfinished at the close of the preceding month, there were the following, viz., (1) On behalf of the employees of the King Edward mine, Cobalt, Ont.; (2) On behalf

of the Lake Seamen's Union, being employees of members of the Dominion Marine Association; (3) On behalf of the employees of the Manitoba and Saskatchewan Coal Company, Limited, of Bienfait, Sask.; (4) On behalf of the employees of the Western Dominion Collieries, Limited, of Taylorton, Sask.; (5) On behalf of Mechanics' Lodge No. 23, Provincial Workmen's Association, being employees of the Cumberland Railway and Coal Co., Limited; (6) On behalf of the employees of John Marsh, John Howells and Steven Bros., coal operators, at Woodpecker, Alta., dealt with as a whole; (7) On behalf of the employees of the Hamilton Street Railway and allied companies of Hamilton, Ont.

During the month reports were received in the case of the dispute at Woodpecker, Alta.; in the case of the dispute between the Lake Seamen's Union and the Dominion Marine Association; and

in the case of the Hamilton Street Railway and allied companies and their employees.

The proceedings during the month in connection with various other disputes referred under the Act are set forth in the present article.

No action was necessary on the application from the employees of the Canadian Northern Railway. A telegram from the representatives of the employees reached the Department a few hours after the receipt of the application itself, requesting that action by the Minister in the matter be deferred, a settlement being in sight, and a telegram received later in the same day, April 30, advised that an agreement between the company and its employees had been signed. Under the circumstances, it became unnecessary to take further procedure under the Act. The particulars of the terms of settlement had not been received in the Department at the close of the month.

#### I.—THE COAL MINING DISPUTE AT WOODPECKER, ALTA.,—BOARD'S RECOMMENDATIONS AS TO SCALE OF WAGES—MINE AT PRESENT NOT OPERATING.

THE Department received on April 6 the report of the Board established in the case of the dispute at Woodpecker, Alta., between Messrs. John Marsh, John Howells, and Steven Bros., coal mine operators, taken together, and their employees. The application was received in the Department on February 15, and was said to concern 72 employees. The application was made by the employers, who stated that a lockout would occur if the differences were not referred to a Board. The dispute related to wages and conditions of labour. The Board comprised Mr. W. E. Bullock, Calgary, Alta., Mr. F. H. Sherman, Taber, Alta., and the Hon. Mr. Justice Stuart, Calgary, Alta.

The Board sat at Taber on March 17 and 18, and heard a number of witnesses. The report presented was signed by the chairman and Mr. Bullock, Mr. Sherman objecting to the conclusions reached. The report was accompanied by a covering letter from the chairman of the Board

expressing the opinion that the Industrial Disputes Investigation Act, 1907, can have no effect in this case in preventing a strike or a lockout, inasmuch as the mines were not and are not in operation. They have been closed down practically for want of orders for some time; only one carload had been shipped since December." The feature of the report was the recommendation of a schedule of wages which ran somewhat higher than that formerly paid by the operators, though not reaching in some cases the schedule asked by the men.

#### The Report of the Board.

The text of the report is as follows:—

In the Matter of the Industrial Disputes Investigation Act and of a dispute between John Marsh, John Howells and Steven Bros., employers, and the United Mine Workers of America, employees.

We, the undersigned members of the Board of Conciliation and Investigation appointed under order dated the 25th day of February, 1908, hereby report as follows:—

The Board met pursuant to appointment of the chairman at Taber on Wednesday, March 18, 1908, at ten o'clock a. m., and after being duly sworn, proceeded to hear evidence on behalf of the employers and the employees. A copy of the principal facts given in evidence taken by the chairman is attached hereto. The Board sat all day Wednesday 18th, and all day Thursday, the 19th, and also until 9.30 in the evening on the latter day.

We beg to recommend the payment of the rates set forth in the following schedule.

Coal per ton in seams run of mine (2,240 lbs.)	1 05
Coal per ton forked (2,000 lbs.)	1 20
Coal per ton in all narrow work	1 00
Turning rooms	5 00
Brushing in rooms per yard	40
Brushing in entries per yard, main entry 6 ft. high, 7 ft. wide in coal and 5 ft. wide in rock	1 25
Brushing in butt entries 5 ft. 6 inches high	1 00
Yardage—crosscuts 8 feet wide	1 00
Yardage—butt and face entries	1 00
Day men's wages, miners	3 00
Day men's wages, labourers—underground	2 50
Ton to be 2,240 lbs. unless forked.	

## II.—THE HAMILTON STREET RAILWAY DISPUTE—TEXT OF BOARD'S REPORT—MR. O'DONOGHUE DISSENTS.

THE Department received the report of the Board established in this case on April 8th. In the application the employers were indicated as the Hamilton Street Railway Company, the Hamilton and Dundas Railway Company, and the Hamilton and Burlington Radial Railway Company. The number of persons directly affected was placed at 120, and that of those indirectly affected at 75. The application alleged discrimination against those of the employees who were members of Division No. 107 of the Amalgamated Association of Street and Electric Railway Employees of America, having special reference to the circumstances under which Mr. John Theaker, president of the Union, was dismissed from the service of the Hamilton Street Railway Company;

Dockage system to be adopted with a reference to Pit Committee for bone or rock and also for excessive amount of slack. Owners to have option of enforcing use of forks.

(Sgd.) CHAS. A. STUART,  
*Chairman.*

(Sgd.) W. E. BULLOCK.

Taber, March 19, 1908.

### Mr. Sherman Dissents.

The Department received the following letter, Mr. Sherman dissenting from the findings of the report:—

April 2, 1908.

To the Minister of Labour,  
Ottawa.

Dear Sir:

As a member of the Board of Conciliation and Investigation appointed to investigate a dispute at Woodpecker, Alta., I beg to report as follows:—

That in my opinion any reduction of wages is unwarranted and would not assist the owners at this time; consequently I refused to sign the report made by my colleagues on the Board.

Respectfully yours,

(Sgd.) F. H. SHERMAN

the application also alleged that there had been several breaches of the existing agreement between the companies and their employees, the said agreement being the result of the award of the Ontario Railway Board. In a statement in reply to the application the employing companies argued that the dispute was not one which fell within the scope of the Industrial Disputes Investigation Act, and that in any case the charges of discrimination, breach of agreement, unfair dismissal, etc., were untrue. The Minister decided that the subject of the dispute was one proper to refer to a Board under the circumstances, and the Board was duly constituted, consisting of Mr. Wm. Bell, K. C., Hamilton, recommended by the employers; Mr. J. G. O'Donoghue, Toronto, recommended by the employees,

and His Honour Judge Monek, County Judge of Wentworth.

The Board sat several days during March and heard evidence on the subject of investigation, Mr. Reeves, an International officer of the Union, taking part in the proceedings; as a result of the enquiry, a report was prepared and forwarded to the Department, signed by the chairman and Mr. Bell. Mr O'Donoghue submitted a minority report, which was also forwarded to the Department. Both reports are printed in the present article. The report of the Board sustains generally the contentions of the employing companies, and finds that the charge of discrimination grew out of difficulties among the men themselves, as between union men and non-union men, concerning which the companies had preserved a strict neutrality. The dismissal of Mr. John Theaker was justified. The report condemned the attitude of the international officer of the union, Mr. Reeves, towards the officers of the employing companies, and submitted that "better results would be obtained by employees in industrial disputes if the foreign element were eliminated from them." The report condemned the character of certain articles discussing this dispute contained in a monthly journal entitled "The Industrial Banner," of London, Ont., and recommended that "if the officers of the Union desire amity between the companies and themselves, they should discontinue the subscriptions to this paper until the publication of these articles cease."

Mr. O'Donoghue, in the minority report submitted, agreed with the other members of the Board insofar that he found in the evidence no justification for the charges of discrimination on the part of the employing companies against those of their employees who were members of the Union. Mr. O'Donoghue accepted as voicing the settled policy of the company, the declaration on this subject of Col. J. M. Gibson, the president of the company, "that there is no objection to employees belonging to a Union." He agreed also that the schedule arranged under the existing agreement had ap-

parently worked out in favour of the older employees, and that as a consequence there was considerable friction between the older and younger men, to which, no doubt, many of the complaints were due. As to the dismissal of John Theaker, however, Mr. O'Donoghue held that Theaker was unjustly discharged, that the grounds alleged by the company for the discharge were not sustained by the evidence, and that "no other conclusion is possible than that he (Theaker) was made the victim of Mr. (Supt.) Miller's dislike. a dislike engendered by reason of Theaker's participation in the strike when he was president of the Union. That being the case, he should be reinstated. With regard to the comments contained in the report of the Board concerning "The Industrial Banner" publication, and the International officer of the Union, Mr. O'Donoghue pointed out, as to the Industrial Banner, that the Union as a whole subscribed for the paper, and the members by reason of their membership were entitled to receive copies. He did not think the complaint well founded "because the union cannot be expected to know what articles will appear from time to time in any newspaper, and subscription for the Hamilton daily papers might just as well be objected to." As to the attitude of the international officer, Mr. O'Donoghue submitted that "Mr. Reeves conducted the case of the men with marked ability, and was of much assistance in ventilating the whole case before the Board."

Although the Board was not able to reach a unanimous conclusion on the matters investigated, there is every reason to believe that the information brought out during the enquiry showing the real reason for much of the existing friction, tended to improve greatly the situation as between the disputing parties and to prepare the way for a better understanding between the employing companies and the men. Consequently, there has been no interruption of work by reason of the dispute, and Mr. Theaker having found employment elsewhere, it may be hoped there will be no recurrence of difficulty in connection with the various differences brought before the Board.

### Report of the Board.

The text of the report presented by the Board is as follows:—

IN THE MATTER OF the Industrial Disputes Investigation Act, 1907, and of a dispute between

The Hamilton Street Railway Company,  
Hamilton and Dundas Railway Company,  
and the Hamilton and Burlington Radial Railway Company,  
Employers,  
and  
Motormen, conductors, shopmen, linemen  
machinists and blacksmiths, etc., employees  
of the said Companies, members of Division No. 107,  
Amalgamated Association of Street and Electric  
Railway Employees of America, of Hamilton, Ont.,  
Employees.

The Board of Conciliation appointed to consider the above matters begs to report as follows:—

During the first sitting, the representatives of the Press were excluded in the hope that by free exchange of ideas and friendly intercourse, the parties to the enquiry might effect a compromise. At the end of the first day it became apparent that no such compromise was probable, and the enquiry was made open to the press and public.

The charges or complaints made by the Union in their application for the appointment of this Board are:—

(1) The dismissal of Conductor John Theaker, President of the Union, without cause;

(2) Coercion tending to disrupt the Union; discrimination against members of the Union; favoritism to non-unionists.

(3) Ignoring complaints made by the Union committee in cases of alleged grievances and discourteous treatment of committees;

(4) Fostering and encouraging an organization rival to the Union, and

(5) General breaches of the existing agreement which was the result of the award of the Ontario Railway Board.

It was shown in evidence that since the making of the existing agreement between the parties, Theaker, who was employed by the Hamilton Street Railway Company as a conductor, had been a party to several minor breaches of the company's rules, any one of which, according to the rules of the company, might justify his dismissal; but the company did not dismiss Theaker for any of such breaches.

It was also shown by conclusive evidence that while acting as conductor of one of the company's cars, he had several times carried a passenger free of charge. In fact, after his dismissal, he admitted the truth of this charge to several of the officers of the employing company.

It was also shown that while acting as such conductor, he several times accepted as fare limited tickets, at times when these tickets were not current as fare.

For these latter breaches of duty he was dismissed, and it is the opinion of your Board that his dismissal was justified.

Although no evidence was given by the employees which might substantiate any of the charges, except that respecting Theaker's dismissal, the employing companies by very strong, clear and frank evidence negated them all.

The evidence shows that at the time of the Arbitration before the Ontario Railway Board, dissatisfaction arose between the older and the younger employees of the companies. The younger members charged and still maintain that the older employees, amongst whom Theaker was, obtained a settlement under which the present schedule of wages came into force, without consulting the younger employees, and that the said schedule is unfair to the latter class as against the former. This led to the withdrawal from the Union of a very large proportion of its members, and to constant and continued disputes, and aroused bitter feeling amongst the men themselves.

Instead of realizing the situation, the older employees blamed the companies for these troubles—and hence arose the charges of discrimination, of inducing members of the Union to withdraw, and kindred charges.

Your Board believe that after hearing

the evidence, the complainants are satisfied that this is the seat of the troubles complained of, that all these troubles were domestic, and that the companies maintained a strict neutrality between the warring factions of their employees, treating all fairly and alike; and this is the finding of your Board.

The case of the employees was conducted before your Board by a gentleman named Reeves, from the United States of America, who is an international officer of unions.

The attitude of this gentleman toward the officers of the employing companies was such that even had the latter been inclined to make a compromise, they could not well have done so with proper self respect and due regard to the discipline of their employees, and it is submitted that better results would be obtained by employees in industrial disputes, and there would be fewer of such disputes if the foreign element were eliminated from them.

Your Board beg further to report that eight almost consecutive numbers of a newspaper called "The Industrial Banner", issued monthly at London, Ont., were put in evidence, and each number contains one or more articles of a scurrilous nature, reflecting on the companies concerned in this enquiry and its officers, especially on D. M. Miller, the Superintendent of the Hamilton Street Railway Company.

The evidence shows that the statements made in these articles are unfair and untrue, and serve only as an irritant between the union and the companies. This paper is subscribed for by the union and distributed to its members gratis.

Your Board recommends that if the officers of the union desire amity between the companies and themselves, they should discontinue the subscription to this paper until the publication of these articles cease.

The Board is of the opinion that neither Manager Green nor Superintendent Miller, nor any other officer of the employing

Companies has shown any enmity towards the Union or those belonging to it.

All of which is respectfully submitted.

(Sgd.) J. F. MONCK,  
*Chairman.*

WM. BELL.

Dated at Hamilton, the 6th day of April, 1908.

#### The Minority Report.

The text of the minority report submitted by Mr. O'Donoghue is as follows:

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between

The Hamilton Street Railway Company, Hamilton and Dundas Railway Company, and the Hamilton and Burlington Radial Railway Company.

Employers

and

Motormen, conductors, shopmen, linemen machinists and blacksmiths, etc., employees of the said companies, members of Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America, of Hamilton, Ont.,

Employees.

I regret that I cannot agree with the other members of the Board in the conclusions to be arrived at in this investigation.

The main complaints advanced before the Board by the employees against the Company were:—

1. That employees were discharged by the company on account of their membership in the Association; that membership in the Association was discouraged and disapproved of by the company.
2. That Grievance Committees were refused hearings or were discourteously received.
3. That the influence of the men's committees and representatives was sought to be weakened among the men by reports circulated by the company's officials.
4. That the company did not honourably carry out the award of the Ontario Railway Commission and the agreement based thereon by refusing to restore 5 employees to their old positions on the Radial Railway.

5. That the company was responsible for a petition that was circulated among the employees requesting the restoration of the old schedule, and that men were threatened with dismissal if they refused to sign the petition—that if the company did not actively encourage the circulation of the petition, it at least tolerated it, and that this was a violation of the agreement that followed the Award of the Railway Commission.
6. That members of the Union were discriminated against on account of their membership in the Association.
7. That John Theaker, President of the Association, was discharged on account of his connection with the organization.

I do not find justification in any evidence given before the Board for Nos. 1, 2, 3, 4, 5, and 6.

With general reference to the allegations of discrimination, I accept Col. Gibson's declaration, that there is no objection to employees belonging to a union, as voicing the settled policy of the company.

The petition was evidently the work of certain of the employees, acting entirely on their own initiative.

The schedule arranged with the company apparently worked out in favour of the older employees. Since the arrangement, many young men have become employees of the road, and they, apparently, are not satisfied with the schedule. As a consequence, there is considerable friction between the two bodies of men, and many of the complaints have no doubt arisen from this difference.

In John Theaker's case, my opinion is that Mr. Miller was seeking for an opportunity to get rid of him, and that he was unjustly discharged. Mr. Miller swore that he had lost confidence in Theaker before the late strike, and he based that statement upon two grounds, namely, (1) That Theaker, as President of the Union, had allowed the use of liquor at or after meetings of the Union, and that as a result employees were rendered less fit for their duties; and (2) That Theaker had knowledge of the use of "diggers" by employees of the company and had not reported this to the company.

As to ground number 1 the Board unanimously declared that there was no foundation for the charge. On the second charge, my opinion is that Theaker acted as any honourable man would act who would hesitate to play the spy. He consulted his committee, and upon their

advice delayed for the time being, in making known to the company what was going on, but he swore that subsequently, when affairs were not complicated by the strike, he gave all the information he had to Mr. Green, an official of the company, Mr. Green admitted this.

With his two grounds for losing confidence in Theaker gone, there must have been some other reason actuating Miller. What that reason was appears from the testimony of one Tollson, who swore that Miller told him he "had it in" for Theaker for the latter's part in the strike, and would get rid of him. Tollson was never a member of the Union, and his testimony cannot therefore be suspected of being biased towards Theaker.

It appears from the evidence that Theaker was in the service of the company for 17 or 18 years, and that he was an exemplary employee, at least down to the time of the strike. After the strike things changed, it was alleged, and he became careless about his duties and, in one short year, Mr. Miller discovered that the company would be better off without him, and he was discharged. The grounds advanced for this summary treatment of an old and faithful employee were:—

1. That, contrary to the rules of the company, he "visited" the motormen. It appeared he was warned about this in August, 1907, and had not offended since.
2. That he reported late on one occasion.
3. That he failed on one occasion to wear his badge.
4. That glass was broken in his car; also a trolley pole and a semaphore.
5. That he accepted limited tickets after hours on two occasions.
6. That he carried a lady free on one occasion.
7. That he carried wives of employees free.

Mr. Miller admitted that numbers 1, 2, 3 and 4 amounted to nothing, and that the real charges were numbers 5, 6 and 7.

As to accepting limited tickets after hours, Waller swore that on two occasions he had seen Theaker accept limited tickets about seven minutes after the time allowed. On one of these occasions Theaker is alleged to have sold to a lady a strip of limited tickets, but Waller could not say whether or not Theaker had received two of them from the lady, which would have been in accordance with the rules or practice of the company. But he did swear that Theaker had refused to

accept a limited ticket from a man in the same seat. The second occasion was the acceptance of a limited ticket from one passenger, and he was positive Theaker had collected only one ticket from the passenger. Theaker swore that he had no recollection of either occasion and that he did not knowingly ever take a limited ticket after hours.

In view of Theaker's long and honourable service with the company, and the excellent reputation for truthfulness given him by the Mayor, Rev. Mr. Williamson, and a number of aldermen who appeared before the Board on Theaker's behalf, I accept Theaker's testimony as against Waller's. The passenger in each case, assuming that Theaker did collect a limited ticket on each occasion, may have boarded the car before the time limit had expired, and thus be entitled to tender a limited ticket when the actual collection of fares was made after the time limit.

Then as to charge No. 6—carrying a lady free. A young boy and his sister swore to seeing Theaker pass the lady without taking her fare and then ring up the fare. The lady herself swore that Theaker did not collect her fare. Theaker admits not collecting her fare, but swore that he paid it himself, as he knew she was in hard circumstances. This evidence is supported by the evidence of the lady's husband, who admitted that he was in receipt of assistance from the Union, through Theaker.

There does not appear to be much difference of opinion about charge number 7—carrying employees' wives free. Theaker explained that his admission to the company's officials was that before the strike, it was a common practice to carry the wives of employees free, and that he did so at times, but only when no other passengers were on board, but that since the strike, nothing of the kind had occurred. There was no evidence to the contrary.

So that, on the evidence, the grounds alleged for Theaker's discharge are not substantiated, and no other conclusion

was possible than that he was made the victim of Miller's dislike, a dislike engendered by reason of Theaker's participation in the strike, when he was President of the Union. That being the case, he should be reinstated. Even assuming the charges well founded, Theaker's long service with the company should have counted for something, and would, with any employer possessed of a fair sense of justice, have meant his retention. I do not blame President Gibson for what happened, as he cannot be expected to be in touch with all the small details of operation. In fact, he expressed a keen regret at the occurrence, and taking his information from the man who had determined to "get rid" of Theaker, it is not to be wondered at that he was misled.

Copies of "The Industrial Banner," a labour paper published in London, Ont., were placed before the Board by the company, and our attention directed to articles reflecting upon the company and upon Mr. Miller. It was contended that the union should have discontinued its subscription to the paper. It appeared that the union as a whole, subscribed for the paper, and the members by reason of their membership are entitled to receive copies. I do not think the complaints well founded, because the union cannot be expected to know what articles will appear from time to time in any newspaper, and subscription for the Hamilton daily papers might just as well be objected to.

An endeavour was made to discredit Mr. Reeves, an officer of the international Association, who appeared before the Board to present the case of the men. Col. Gibson blamed Mr. Reeves for a great deal of the trouble, but, on being examined, had to admit that he had no evidence whatever to justify the allegation. Mr. Reeves conducted the case of the men with marked ability, and was of much assistance in ventilating the whole case before the Board.

(Sgd.) JOHN G. O'DONOGHUE.

Dated at Toronto, April 1st, 1908.

### III.—DISPUTE BETWEEN LAKE SEAMEN AND THEIR EMPLOYERS AMICABLY ARRANGED BEFORE A BOARD.

THE Department received, on April 14, the report of the Board of Conciliation and Investigation established to adjust the differences between the Lake Seamen's Union and the Dominion Marine Association. The application in this matter was received on March 6, about 450 men being stated to be directly concerned in the differences. The causes of difference were declared to be wages and hours. Wages were said to run from \$30 to \$40 per month, some boats paying a little better than \$40 in the fall. The working hours were alleged to be very long, the men in some cases being on deck from 12 to 18 hours without a watch below. The men demanded straight watch and watch, where the same could be granted without danger to the boats. In reply to the application, the Dominion Marine Association held that the Association was not an employer within the meaning of the Act, and that its Executive Committee had, on February 12, by resolution declared that the question of an agreement with seamen was one to be left with individual vessel owners. The Minister held that the Dominion Marine Association was to be regarded as an employer for the purposes of the Act, and proceeded with the establishment of a Board. Mr. John A. Flett, Hamilton, Ont., was, on the recommendation of the employees concerned, appointed a member of the Board. The Dominion Marine Association having failed to recommend a person for appointment to the Board, the Minister, on April 1, under section 8, sub-section 2, of the Act, appointed Mr. James Stewart, of Kingston, Ont., to the Board, and Messrs. Stewart and Flett, having, on the same day, jointly recommended the appointment of Prof. Adam Shortt, of Kingston, Ont., as third member and chairman of the Board, Prof. Shortt was appointed accordingly.

As the report printed below will show, most of the matters referred for investigation were dealt with informally before the Board. It was not found possible to embody the outcome in a written

agreement, but the discussions that took place before the Board between representatives of employers and men respectively, were useful in clearing up many misconceptions, both as to the working of the Act and in disposing of a number of special grievances and causes of friction which had grown up between the two parties. Both parties expressed themselves as well satisfied with the outcome, which may be regarded as an especially fortunate result in view of the original determination of the Dominion Marine Association that it would take no part in the proceedings.

#### Letter from Men's Representative.

The following letter from Mr. Thomas H. Fleming, of Kingston, business agent of the Lake Seamen's Union, to the chairman of the Board, shows the view of the men with regard to the proceedings before the Board.

Kingston, Ont., April 9th, 1908

Professor Adam Shortt,  
Queen's University,  
Kingston, Ont.

Dear Sir:

We desire to extend to you, on behalf of myself and colleagues, our sincere thanks for the courteous manner in which we were treated by you while chairman of the Board of Conciliation and Investigation. Although somewhat disappointed by the Act, as some of its workings were not just what we had anticipated, we nevertheless understand the good work you have done in bringing the employer and employee together to talk the matter over, which will no doubt lead to good results in the future. We also desire to thank you for the able manner in which you conducted the investigation.

I remain,

Yours sincerely,

(Sgd.) THOS. H. FLEMING,  
Business Agent, Lake Seaman's Union.

**Text of Board's Report.**

The text of the report forwarded by the chairman of the Board is as follows:—

April 13, 1908.

Honourable Rodolphe Lemieux,  
Minister of Labour,  
Ottawa, Ont.

Dear Sir:

I have the honour to make the following report with reference to the settlement of the dispute between the Lake Seamen's Union and the Dominion Marine Association:

The Board of Conciliation appointed to deal with this case consisted of Mr. James Stewart, of Kingston, appointed by the Department of Labour to represent the Dominion Marine Association, Mr. John A. Flett, of Hamilton, nominated by the Lake Seaman's Union, and Prof. Adam Shortt, of Kingston, nominated by these members as third member and chairman of the Board.

It is unnecessary to refer in detail to the correspondence between the Department of Labour and the representatives of the Dominion Marine Association, and the Lake Seamen's Union, previous to the constitution of the Board. Suffice it to say, that the Dominion Marine Association, having taken the ground that it was not an employer of labour, and hence did not consider itself as coming within the terms of the act, declined to appoint a representative on the Board of Conciliation, or to take any part in the proceedings before the Board. On the appointment of the Board, therefore, under the conditions above stated, it was considered advisable, before entering upon the regular sittings, that the members of the Dominion Marine Association should be interviewed with the object of clearing up certain misapprehensions as to the workings of the Industrial Disputes Investigation Act, and with a view to securing their voluntary attendance before the Board to discuss the points at issue. The outcome of this course was entirely satisfactory, and all the leading shipping companies and vessel owners on the lakes were represented before the Board when it convened on April 7th.

The following were present representing the vessel owners: A. E. Wright, President Dominion Marine Association, and representing the St. Lawrence and Chicago Navigation Co., James Cuttle, Managing Director of the Montreal Transportation Company; H. A. Calvin, President of the Calvin Co.; H. H. Gildersleeve, Manager Northern Navigation Co.; Captain Foote, Canadian Lake and Ocean Navigation Co., and Canadian Lake Transportation Co.; Captain Featherstonhaugh, Midland Navigation Co.; J. T. Matthews, the Matthews Steamship Co., and Captain Horsey of the Bay of Quinte Navigation Co. The Seamen's Union was represented by Mr. Thos. H. Fleming, business Agent, Kingston, assisted by John Guild, Kingston, Harry Carey and Roderick Leonard, Goderich.

The chief points at issue were the claims on the part of the seamen for a higher scale of wages, and for certain improvements in the working conditions, more particularly with reference to the elimination, where possible, of the necessity for taking a high watch immediately after being on duty the greater part of the day, as when leaving port or the canals. In the course of the discussion before the Board a number of difficulties and misunderstandings were cleared up, but it was found impracticable to adopt any rigid rule or rules with reference to the hours and duties of seamen, owing to the varied conditions of the shipping business and the variety of the vessels employed. The vessel owners, however, unanimously agreed to the following conditions submitted by Mr. James Cuttle, of Montreal: "That the managers of the different companies give instructions to their captains that, wherever practicable, the seamen be given an opportunity to obtain rest before going on watch." This was considered by the representatives of the seamen as a reasonable treatment of the matter.

The question of wages was discussed at considerable length. Though wages had not been materially increased for the past four or five years, yet, in view of the uncertainty of the outlook for the present shipping season, it was considered inexpedient to press for an increase of

wages at the present time. Should, however, the western Provinces be favoured with a good harvest, thus promising good cargoes in the autumn, the members of the Board were convinced that the wages of the seamen, from September to the end of the season, of navigation, should be substantially increased.

Though no formal agreement was found necessary in this case, yet the general result of the proceedings before

the Board was to clarify the situation, to improve the relations between the vessel owners and the seamen, and to dispose of any prospective troubles on the Canadian side of the lakes for the season just opening.

I have the honour to be,

Yours sincerely,

(Sgd.) ADAM SHORTT,  
Chairman, Board of Conciliation.

#### IV.—THE DISPUTE AT SPRINGHILL—COMPANY'S ATTITUDE— CONSTITUTION OF A BOARD.

**D**URING the month, proceedings were advanced a stage in connection with the application received from Mechanics' Lodge, Provincial Workmen's Association, on behalf of the employees of the Cumberland Railway and Coal Company, for a Board of Conciliation and Investigation to adjust differences between the company and its employees. It will be remembered that Boards have been appointed in several previous cases to deal with disputes between the same parties.

The nature of the various differences in the present instance is thus set forth in the application: "First case is in respect to an advance on wages for repair work; second case in respect to an advance on wages for No. 3 mine foremen; third case is in respect to an advance on wages for Charles Roney, inspector, fourth case is in respect to an advance on wages for Wilson Demmings, car inspector."

The company, in a communication to the Department under date of April 4th, stated that it would take no part in the proceedings "for the reason that the application is made contrary to the terms under which the members of Mechanics' and Pioneer Lodges resumed work on 29th October last, after a strike of 13

weeks, over a demand for increase in wages, and this application is also a demand for more wages, which the company cannot afford to give under any circumstances, of which the applicants have been notified and are well aware."

The communication proceeded then to discuss the alleged grievances and to state reasons why the same could not be remedied or should not, in some cases, be, in its opinion, referred to a Board. The Minister proceeded to establish a Board and appointed thereto Mr. R. B. Murray of Springhill, N. S., on the recommendation of the employees; and in the absence of a recommendation from the employing company appointed on the Board, under section 8, sub-section 2 of the Industrial Disputes Investigation Act, 1907, the Honourable John N. Armstrong, of North Sydney, N. S., "and such member," in the words of the Act, "shall be deemed to be appointed on the recommendation of the said party." The members of the Board thus appointed having notified the Minister of their inability to agree on a recommendation for a third member, the Minister appointed the Hon. W. B. Wallace, county judge, of Halifax, N. S., It was understood that the Board would meet early in May for the purpose of the investigation.

### V.—BOARD ESTABLISHED TO ADJUST COAL MINING DISPUTES IN SASKATCHEWAN.

**D**URING the month the establishment of Boards requested in connection with disputes in the case of two coal mines in Saskatchewan, namely, (1) The Manitoba and Saskatchewan Coal Company, Limited, of Bienfait, Sask., and (2) the Western Dominion Collieries, of Taylorton, Sask., was completed. The Board constituted in the case of the Bienfait dispute consists of Mr. G. C. Crowe, Winnipeg, recommended by the company; Mr. F. H. Sherman, Taber, Alta., recommended by the men; and the Honourable A. Dawson, County Judge, Winnipeg, Man., Judge Dawson having been appointed by the Minister in<sup>2</sup>the

absence of a joint recommendation from the members of the Board previously appointed. The Board constituted in the case of the Taylorton dispute consists of Mr. James O. Hannah, Calgary, Alta., recommended by the company. Mr. F. H. Sherman, Taber, Alta., recommended by the men; and the Honourable R. H. Myers, County Judge, Winnipeg Judge Myers having been appointed by the Minister in the absence of a joint recommendation from the members of the Board previously appointed. It was understood that the enquiries should proceed before the respective Boards without undue delay.

### VI.—DIFFERENCES BETWEEN THE CANADIAN PACIFIC RAILWAY COMPANY AND ITS MECHANICAL DEPARTMENT REFERRED TO A BOARD.

**T**HE Department received, on April 28, an application for the establishment of a Board of Conciliation and Investigation for the adjustment of differences between the Canadian Pacific Railway Company and various trades in the mechanical department of the railway. The locality of the dispute was stated in the application to be along the eastern and western lines of the railway, but the application set forth the dispute only in the case of the employees on the western lines. The trades enumerated in the application as being concerned in the dispute were as follows: Boilermakers, Eastern and Western lines, members of the Brotherhood of Boilermakers and Iron Shipbuilders of America; machinists, Eastern and Western lines, members of the Inter. Association of Machinists; iron moulders, Eastern and Western lines, members of Iron Moulders' Union of North America; blacksmiths and helpers, Fort William to Vancouver, members of the Inter. Brotherhood of Blacksmiths and Helpers; boilermakers' helpers, Fort William to Broadview, members of Boilermakers' Helpers' Union No. 127; special-

ists and helpers of various trades mentioned, Western lines, members of Federal Unions Nos. 12, 14 and 15; special-ists and helpers of various trades mentioned, Pacific Division, members of Federal Union No. 23; machinists' helpers, members of Machinists' Helpers' Union No. 12610, all in the employ of the Canadian Pacific Railway Company.

The approximate estimate of the number of employees affected, or likely to be affected, was 1,770 directly and 1,600 indirectly.

The nature and cause of dispute was set forth in the application as follows:

"On April 1st instant, Canadian Pacific Railway Company served notice (\*) of its intention to cancel on May 1st prox. the agreements existing between it and the employees in its mechanical department on Western lines, the said employees being organized according to the different trades represented by them as hereinbefore stated. In effect, the said notice provides for (i) contemplated reduction by company of wages on and after May 1st. This is borne out by the fact that

\* The contents of the notice in question appear in the present issue of the *Labour Gazette* in the report furnished by the Winnipeg correspondent.

a number of employees affected by said notice have since received further notice of reduction in wages to take effect May 1st; (ii) cancellation of articles covering trade protection; (iii) cancellation of articles covering rights of committees of employees to meet company's officers on behalf of men; (iv) removal of restrictions on number of apprentices, and the cancellation of clauses covering advancement of apprentices. The employees object to cancellation of existing agreements and contend that such agreements should continue to remain in force.

"The employees say that the action of company in giving such notice constitutes an attempt on its part to deal with sections of particular trades at different times, and is intended to weaken, and has the effect of weakening unfairly, the position of the employees in their negotiations with the company. The employees further claim that it is the intention of the company to cancel existing agreements on Eastern lines as soon as differences on Western lines have been settled. The employees maintain that agreements on both Eastern and Western lines should be considered and settled at one and the same time.

"Notice has been given to company on behalf of employees, members of Inter. Association of Machinists and Brotherhood of Boilermakers and Iron Shipbuilders of America, of their desire to amend at the present time existing agreements on Eastern lines, because they believe it will be only a short time until the company asks for such amendment.

"The said employees, machinists and boilermakers, each have one organization covering employees on company's entire

system, all of whom have expressed their intention of ceasing work in the event of Eastern agreements not being considered with, and at the same time as Western agreements, or in the event of differences re agreements on Western lines not being satisfactorily adjusted."

The parties signatory to the application were the following, namely:—

W. McFarlane, President District No. 30, Boilermakers and Iron Shipbuilders of America; William Henry, Secretary-Treasurer District No. 30, Brotherhood of Boilermakers and Iron Shipbuilders; Bell Hardy, President, and James H. McVety, Secretary District No. 34, Inter. Association of Machinists; Osborne L. Wark, President, and William Mossop, Secretary, Iron Moulders' Union; William Marshall, Chairman, and Robert Anderson, Secretary, Blacksmiths and Helpers' Committee; Thos. Gray, Chairman, and James Moore, Secretary, Boilermakers' Helpers; Edward Taylor, Chairman, and John Chapman, Secretary, Federal Unions 12, 14 and 15, Bell Hardy and Jas H. McVety, representing Federal Union No. 23 and Machinists' Helpers' Union 12610.

The Minister decided to proceed at once with the establishment of a Board, and on the recommendation of the employees appointed Mr. James Somerville of Toronto, a member thereof. This appointment was made on April 28. The Department, at the end of April, had not received from the company a recommendation for appointment to the Board, but there was reason to believe the Board would be finally established and the investigation proceeded with early in the month of May.

#### TERMS BETWEEN SHIPPING COMPANIES AND LONGSHOREMEN AT MONTREAL, FOR SEASON OF 1908, ARRANGED BY AID OF MINISTER OF LABOUR.

**D**URING recent negotiations between the shipping companies and the longshoremen of Montreal with regard to the wages to be paid longshoremen during the present season of navigation, a settlement was effected, based on the terms arranged for last season by the aid

of the Board of Conciliation and Investigation, established under the Industrial Disputes Investigation Act (\*). The

\* The basis for the settlement of 1907, is fully set forth in the report of the Board of Conciliation and Investigation published in the issue of the *Labour Gazette* for July, 1907.

basis of the agreement effected before the Board for 1907 was the payment of 27½ cents per hour worked by day and 32½ cents per hour worked by night, with the addition of a bonus of 2½ cents per hour to be paid at the close of the season to all who had worked until the end of that period. The terms offered by the companies for the season of 1908, were practically identical with those of 1907. One change, however, was effected with a view to simplifying the work of the bonus system. Objection has been raised on the part of the men to the bonus system on the ground that under the arrangements adopted last year by the shipping companies, the men were unable to learn how much money was coming to them under the bonus. The assistance of the Minister of Labour, the Honourable Rodolphe Lemieux, was invoked to secure a change in this respect, and, at the suggestion of the Minister, the shipping companies agreed that weekly statements shall be handed the men during the present season, showing the number of hours worked during the week, with the name of the firm for which such work has been performed. The men, by retaining these checks in their possession, will be able to determine at any time the amount of bonus that is coming to them, provided they continue at work until the end of the season. Both shipping companies and longshoremen appear to have been satisfied with the settlement, the bonus system being thus modified.

It is claimed on behalf of the bonus system devised by the Board of Conciliation and Investigation last year, that it has already resulted in securing a much superior and steadier class of men for the wharf work and has militated against the floating element which was in former years the chief difficulty that confronted the companies. In addition, the system tends to prevent ships that arrive late in the season running the risk of being frozen in for the winter, through lack of labour to unload cargoes. A further advantage of the system is said to lie in the benefit to the men themselves in having a considerable cash bonus placed in their hands at the beginning of winter.

The following is a copy of the wages schedule for 1907 and the present year.

*On General Cargo Vessels.*

General cargo, 27½c per hour by day and 32½c by night.

Grain, light or heavy, 27c per hour by day and 32½c by night.

Coal shovellers, 32½c per hour by day and night.

Coal, all other labourers, 27½c per hour by day and 32½c by night.

Lumber, 27½c per hour by day and 32½c by night.

*Full Coal Cargoes—*

Shovellers, 37½c per hour by day and 42½c per hour by night.

Stagemen, 37½c per hour by day and night.

All other labourers, 27½c per hour by day and 32½c per hour by night.

*Full Lumber Cargoes—*

Side runners, 37½c per hour by day and night.

All other labourers, 27½c per hour by day and 32½c per hour by night.

Midnight suppers to be provided by the ship.

Sunday work double time to be paid.

Quarter hours to be paid.

Any waiting time after 7 p. m., to be paid half rate and only to count from time ordered out.

Rigging, unrigging and all changes to be paid at the rate of 27½c per hour by day and 32½c by night.

The Minister has received the following letter written on behalf of the Longshoremen of Montreal, namely:

Montreal, May 1, 1908.

"To the Hon. Rodolphe Lemieux,  
Postmaster General and  
Minister of Labour.

Honourable Sir:—

"In accordance with a resolution unanimously adopted at the last regular meeting of the Association of Longshoremen of the port of Montreal I have the pleasant duty of tendering you in the name of the longshoremen of the commercial metropolis of Canada, their most earnest and sincere thanks for the trouble you have taken, and the zeal you have manifested in connection with the understanding procured through your intervention between the Shipping Federation and the Longshoremen of Montreal for the approaching season of navigation.

"In thus averting a conflict between the employers and employees of this port you have rendered services most valuable not only to the longshoremen but to the whole business community and you are entitled to our warmest thanks.

"I have the honour to be, sir,

Your obedient servant,

ADOLPHE MARTIN,

*Corresponding Secretary."*

### THE NATIONAL TRANSCONTINENTAL RAILWAY—PROGRESS MADE ON CONSTRUCTION.

IN view of the importance which attaches from the standpoint of industry and labour to the building of the National Transcontinental Railway, both directly in the way of employment on construction and operation, and indirectly through the settlement and development which will follow its completion, a statement presented to the House of Commons by the Hon. the Minister of Railways and Canals on April 13th, with reference to the progress made in connection with the letting and finishing of contracts up to the present time, is of exceptional interest. The statement was issued in tabular form, and was in reply to the fol-

lowing questions asked by Hon. G. E. Foster, M.P., in the House of Commons:

1. What contracts and for what mileage, and the price at which each have been let, upon the eastern and western sections of the Grand Trunk Pacific Railway?
2. What is the date of each contract, and the period set or completion?
3. What is the estimated cost of the unlet portions?

The reply of the Minister was in two parts according as the information related to the portion of the line east of Winnipeg which is being constructed by the Commissioners of the Transcontinental Railway and to the western sections which are being built by the Grand Trunk Pacific Railway Company. The statements are published in full herewith.

Feb. 20, 1906.....	Foley Bros., Larsen & Co., Battleford.	W. line Sec. 24, Tp. 36, R. 6 W. 3rd Mer., to a point near Edmonton, Alta., 316 miles.	Nov. 1, 1906.
Jan. 4, 1908.....	Foley, Welch & Stewart, Kenora..	East line of Sec. 13, Tp. 53, R. 24 W. 4th Mer., to east bank of Wolf creek, 129 miles.	Nov. 30, 1908.
Mar. 19, 1908.....	Foley, Welch & Stewart, Kenora..	Prince Rupert to Copper River, 129 miles.	Aug. 31, 1909.

With reference to the portions of the line for which contracts have not yet been let, it was explained that the estimated total cost of the Eastern Division is, \$19,030,173; and of the Western Division \$21,872,200.

In further explanation of the progress made on the Western Division the following statement was made:—

A great many other contracts have been let by the Grand Trunk Pacific Railway Company, for which no information is available. With reference to the mountain section of the western division, the Grand Trunk Pacific Company has com-

pleted a preliminary survey to ascertain what grades can be secured; and are now engaged in revising and working out in detail, the final location, from which, the quantities not being available, no estimate can be supplied.

The department is advised that contracts have been awarded for the items mentioned hereunder, but no details are available at this date: Concrete piers, pedestals and abutments of steel bridges; steel superstructure of large bridges; station buildings; engine houses and machine shops; water services; steel rails and fastenings, frogs, diamond crossings, etc.; ties; fence posts; and telegraph posts.

#### INTERVIEW OF NATIONAL TRADES AND LABOUR CONGRESS OF CANADA WITH DOMINION GOVERNMENT.

ON April 2nd, representatives of the National Trades and Labour Congress of Canada were granted an interview by the Right Honourable Sir Wilfrid Laurier, Prime Minister, and the Honourable Rodolphe Lemieux, Minister of Labour, for the purpose of bringing to the attention of the Government of Canada certain resolutions passed at the fifth annual convention of the Congress held in September, 1907. The delegation included the President, Secretary and

Solicitor of the Congress, the President of the Canadian Federation of Shoe Workers, the General President of the Hotel and Restaurant Workers' Association, three members of the Ontario executive and one member of the Quebec executive.

Among the requests made by the delegates were the following:—

1. That a pension fund for aged or disabled workmen be established. In reply to this request the Ministers ex-

pressed the opinion that Canada did not yet require a system of old age or disability pensions.

2. That it is not only desirable but essential that Canada should have well equipped ship building yards, so that the country should not be dependent upon foreign or even British builders for the maintenance of a mercantile marine. Consideration was promised.

3. That to protect Canadian manufacturers, the Federal Government raise the tariff to 60 per cent. on all vehicles and parts of vehicles. In answer to this request, the prosperity of the country under the present tariff was referred to.

4. That a poll tax of \$1,000 per head be imposed on Asiatic immigrants. In this respect it was pointed out that the tax of \$500 was practically prohibitive and that the poll tax had been raised from \$50 to \$100, and from the latter to \$500.

5. That deep sea quays be built by

the Dominion government at Levis. Consideration was promised.

6. That a larger dry-dock be built at Quebec, the present one being inadequate. Consideration was promised.

7. That the contract with the Good-year Shoe Manufacturing Company be cancelled. Consideration was promised.

8. That the shoe contracts of the government be granted to manufacturers who use the National Label. Consideration was promised.

9. That a separate portfolio for labour be established. In reply to this request it was stated that in the event of a rearrangement of the Departments this question would be considered.

10. That preliminary proceedings in connection with violations of the Alien Labour Act be at the charge of the government, after proper request has been made by workmen. Consideration was promised.

#### THE BRANTFORD CO-OPERATIVE ASSOCIATION, LIMITED.

**D**URING the past winter season the organization was completed at Brantford, Ont., of a co-operative distributive association to which the title of "The Brantford Co-operative Association, Limited," was given. The association began operations by opening a co-operative store in Brantford on April 11th, 1908, with a stock consisting of groceries, meats and provisions, and having a staff consisting of a manager, two clerks and a delivery man.

The following statement of the origin, objects and working methods of the association was furnished to the Department by the courtesy of the President, Mr. George Keene, 80 Brock Street, Brantford, Ont.

##### Origin of the Association.

The association had its genesis in an agitation in the local press of Brantford during the autumn of 1907, concerning the high and increasing cost of living, it being alleged that prices had been advanced by local merchants in combina-

tion without regard to the ability of the consuming public to meet the increase. A large number of residents in the city of Brantford have come to Canada from Great Britain within the past few years, and are familiar with the operation of co-operative undertakings on an extensive scale in the British Isles. The agitation resulted in the convening of a largely attended public meeting of workmen and others, at which the formation of a co-operative association was considered and a committee appointed to devise a satisfactory working scheme. At a second public meeting a definite arrangement was submitted by this committee and adopted, the committee being re-appointed as a provisional board to organize the business and secure incorporation.

Coincidentally with the launching of the proposal a period of industrial and financial stringency set in which considerably hampered the work of organization. Ultimately the committee was forced to depend to a large extent upon the section of the population which had recently come

from Great Britain. Many of these, however, had been under heavy expense in reaching Canada and in furnishing homes after their arrival, in addition to being the first to feel the effects of the lessening demand for labour. Some difficulty as to the securing of incorporation was also encountered. The Ontario association law it was found, had recently been amended by an enactment necessitating organization under the new Companies Act with a minimum fee on registration of \$100 as well as solicitor's fees. The co-operative bill before the Dominion house, had not yet become law. A prospectus was accordingly filed under the Ontario act, the minimum capital subscribed to justify commencing business, as required by the act, being \$1,000. The total capital was placed at \$40,000, the minimum fee for incorporation covering that amount. As the capital of the association is increased by the admission of new members the expense of applying to the government for permission to increase the capital will thus be for some time avoided.

#### Organization Completed.

The stock was offered to subscribers in shares of \$5.00 each, of which \$2.50 was made payable on application and \$2.50 on allotment. Two months time was granted the provisional board in which to secure incorporation, power being given to extend this allowance by the unanimous vote of the directors. At the time of incorporation the sum of \$1,250 had been subscribed by 96 members. With this capital a grocery store, as above stated, was opened on the 11th of April. Other departments will be added to the store as the capital and membership increase, and it is hoped that the association, like many in Great Britain, will eventually handle practically every article of domestic consumption. All goods are sold at standard prices.

#### Allotment of Stock.

The minimum subscription for membership was one share of the capital stock. This, it is felt, will provide sufficient capital for the carrying on of a

grocery business. In order to build up a further capital fund, however, for the organization of other departments of trade, and at the same time escape an uncalled or unpaid liability on capital stock, it is provided by the by-laws that each member shall allow half his dividends to remain on permanent deposit at 5 per cent. interest until \$5.00 has accumulated, when he shall be regarded as an applicant for another share, the deposit being transferred in liquidation of such share and the operation being repeated until each member holds at least five shares, after which the whole of the dividends declared will be paid. Deposits are also taken at 5 per cent. interest on minimum quarterly balances, the conditions of withdrawal being graded according to the amount withdrawn.

The shares carry a maximum dividend of 5 per cent. per annum. This is below the present value of money, but it was felt that under normal conditions it is an adequate rate. In Great Britain the rate of interest paid on capital stock is not more, and is frequently less, than 5 per cent. Purchasing members are averse to allowing investors to get more than the actual market value as interest for their money. The feeling is that the excess represents profit as distinguished from interest on capital and in equity is something which should accrue to purchasers in dividends. Non-members receive half dividends.

No limit is at present placed on each member's subscription to the capital stock, but as a member has only one vote, irrespective of the amount subscribed, it is impossible for any one person to obtain control of the association. Members must exercise the vote in person.

#### Other Features.

A fundamental principle of the co-operative movement has always been the inculcation of the habit of thrift. For this reason goods are sold for cash only, paid at or before delivery.

It is provided in the application for a charter of incorporation that directors shall not be paid for their services. Native born sentiment according to the opinion of the President of the Brantford Associa-

tion seems to regard this as an objectionable feature, fear being expressed that it will be impossible to get adequate supervision without remuneration. British co-operators, however adopt the opposite viewpoint. If directors are remunerated they may run for office for personal profit, and may intrigue for support with that object in view, irrespective of their personal fitness or enthusiasm for the business and principles of the Association. British co-operators believe in paying men adequately who follow co-operation as their means of a livelihood, but the splendid successes achieved in Great Britain have been more in consequence of the well sustained enthusiasm of the tens of thousands of unpaid or but nominally paid committee-men, who spend many hours each week in executive and supervisory work, than the activity of the permanent paid staff. The Brantford co-operators anticipate the same result. At the first general meeting, for nine seats on the Board there were fifteen nominations; the only director displaced was the one attending the fewest meetings.

Every person employed in the receipt or expenditure of money gives a fidelity bond to cover any risk to the association by peculation.

The directors have made every available provision in order to command public confidence. Each person employed contracts in writing that he will not receive any gratuity or other emolument in cash or in kind from any person, company or firm supplying goods or rendering services to the association and that if, in breach of the agreement, the same is received and retained, the gratuity or emolument becomes *ipso facto* the property of the association in the ordinary course of business.

The directors meet every Friday night

when the manager has to submit an estimate of his requirements for the ensuing week. The orders for the goods as passed by the board, must be signed by the director presiding at the meeting, "Emergency" orders in the interim must be given only on the authority of the President, or, failing him, a director, who signs the same, and they have to be reported and justified at the next meeting of the board. "Accommodation" orders, that is, orders for articles not handled by the association and bought only for the convenience of members, may be given on the authority of the manager only; these are usually very small in amount and are paid for in cash. All other payments (except Saturday's farm produce purchases) are made by cheque drawn on the association's bankers *after* being duly authorized at the weekly board meeting. Cheques are signed by the President, or Vice-President, Secretary-treasurer, and one Director.

To give the directors an approximate idea of the financial state and trade progress each week, a form has been prepared which has to be submitted to the board by the Secretary-Treasurer weekly, made up to the time of closing on the day of meeting.

As to sales: A member, when joining, receives a form (in addition to a copy of the by-laws, etc.) on which slips are pasted as payments are made, a duplicate being pasted in the members' loose-leaf ledger folio and a triplicate remaining as a check.

A small four page publication has been started by the association for the purpose of explaining its aim and objects. The publication will be enlarged as financial circumstances justify, to include the reports of contemporary co-operative developments elsewhere.

#### THE ALIEN LABOUR ACT—IMPORTANT DECISION AT MONTREAL, QUE.

IN the month of September, 1907, a decision was rendered in the Court of Special Sessions at Montreal by His Honour Judge Choquet in the matter of a prosecution instituted by Gustave

Francq under the Alien Labour Act against the Dominion Car and Foundry Company (\*). The company was charg-

\* See the *Labour Gazette* for November, 1907, page 609.

ed with having brought labourers to Canada in contravention of the Act, and in defence pleaded that the establishment of a plant for building steel cars was a new industry not hitherto established in Canada, that skilled labour for such industry could not be obtained in Canada, and that therefore under the provisions of clause (b) of Section 9 of the Act, they were exempted from the provisions of the Act and obliged for the prosecution of such industry to bring skilled steel car builders from the United States.

The judge in rendering his decision maintained the position of the defence.

An appeal was thereupon taken under the provisions of the Code to a Judge of the Court of King's Bench, Crown side. This appeal has now been dismissed, and as the question involved is of importance to both employers of labour and employees, the full text of the opinion of the Court is given below.

In rendering his decision disallowing the appeal, His Honour Mr. Justice Cross spoke as follows:—

#### **Text of Decision.**

This was a rehearing under the provisions of the Criminal Code regulating appeals.

The accused had been tried before the Judge of Sessions upon an accusation of infringement of the Alien Labour Act, and was acquitted.

The offence charged is that Joseph Disney has contravened the Act known as the Alien Labour Act, cap. 97, R. S. C., (1906), in that he has within the last six months prepaid the transportation and has assisted, encouraged and solicited the importation or immigration of an alien or foreigner into Canada, under contract of agreement made previous to the importation or immigration of such alien or foreigner, to perform labour or service in Canada. It is also set forth in the complaint that the labour which the alien was to do was such as for that purpose can be obtained in Canada, and was in an industry at present established in Canada, the said alien having been brought into Canada for the purpose of taking employment with the Dominion Car & Foundry Co. (Ltd.)

That the alien who was brought into Canada is Ferdinand Jessec, and his employment is hammerman.

There appears to be no doubt of the fact that the accused went to Detroit at the instance of the Dominion Car & Foundry Co. (Ltd.) for the purpose of getting men to come and take service with that company as hammermen, that is, to do the work of rivetting together parts of steel cars with a hammer operated by pneumatic pressure, and that, as a result of his trip, one Jessec came and entered into the service of the company at its works near Lachine.

Objection is made on behalf of the defendant that he acted merely as the agent of the company, and that, as an infraction of the statute leads only to a money adjudication, which may be sued for in a civil court, he is not liable to such adjudication, inasmuch as he has only acted within the limits of his agency, and that consequently the company alone could be proceeded against.

I do not consider this objection to be well founded, because what is prohibited by this statute, under penalty of fine, has been made unlawful, and a defendant can have no mandate to do what the law prohibits, and, if he does it, the act is to be treated as having been done on his individual responsibility.

It is next objected, on behalf of the defendant, that Jessec did not come from the United States, but that, being a minor, whose home was with his father in Belgium, and, having been only temporarily in the United States in search of work, he, in reality, came from Belgium to Canada, and as inasmuch as the Alien Labour Act applies only to importation or immigration from such countries as have in force laws of a character similar to the Alien Labour Act, and it is not shown that any such law was in force in Belgium, where Jessec's home was, the penalty has not been incurred.

The provisions of the act, however, appear to be directed against the induced immigration of aliens who either reside in or are citizens of the foreign country which enforces alien labour acts against Canada, and I do not consider that the legal domicile of the alien, apart

from the place of his recent habitation, is a matter to be enquired into. This objection is consequently also set aside.

It is next contended on behalf of Disney that his case came within an exception which is made in the act, in the following terms:—

“Nothing in this Act shall be so construed as to prevent any person, partnership, company or corporation from engaging under contract or agreement, skilled workmen in foreign countries to perform labour in Canada in or upon any new industry not at present established in Canada; provided that skilled labour for that purpose cannot be otherwise obtained.”

It is contended, for the accused, that the engagement of Jessec to come into Canada and to work here was not an offence, because the two facts necessary to bring the Jessec case within the exception existed, namely, first, that he was engaged to work in a new industry in Canada, and, second, that skilled labour “for that purpose” could not be otherwise obtained.

The facts proved in evidence make it clear that, in so far as concerns the equipment and setting in operation of an establishment for the manufacture of steel cars, the enterprise of the Dominion Car and Foundry Company was a new one of a kind not already established in Canada. In other respects, however, this case has developed widely different pretensions concerning the legal purport and effect of this excepting clause of the Act.

The prosecutor contends that the purport of the excepting clause is to permit the engagement abroad of those skilled workmen only whose work is new and not practised in Canada, and that the defendant cannot exculpate himself without proving that “the skilled labour for that purpose” mentioned in the proviso means the skilled labour called into requisition by the new processes of the industry.

While admitting that, in making steel cars, the men who cut out the parts or who design them might be such as could be engaged abroad, he denies that the rivetters are skilled workmen occupied at a trade heretofore unknown in Canada. In his written argument, put on record, the prosecutor’s pretension is stated thus:

“Now, our position with regard to this point is that the wording of section (b) ‘skilled workmen in or upon any new industry not at present established in Canada,’ simply means skilled workmen whose occupation is such as has heretofore not existed in Canada.”

The prosecutor accordingly submitted evidence, in considerable volume, to demonstrate that there is nothing new about the rivetting of bolts with a pneumatic hammer, and that, though it may be true that the making of steel cars is a new thing in Canada, rivetting had been done with the pneumatic hammer for some years previously in bridge construction, boiler making and other steel construction work, and he concludes that the defendant, having brought Jessec into Canada to work merely as a hammerman rivetter, has violated the Act.

This view is disputed by counsel for the defendant, who argue that a new industry means an establishment or business which produces a new commodity or service, and that, in setting up such an industry, any sort of skilled labourers may be engaged abroad, whether their avocation relates to the new process or not.

Though the statute contains no interpretative clauses, I consider that its language is such as to enable me to arrive at a correct conclusion as to its meaning in relation to the present controversy, but it will be well first to state summarily the facts proved in the case.

The Dominion Car and Foundry Company had equipped a shop for the purpose of manufacturing steel box cars. Manufacturing operations had commenced. In the spring of 1907, when outdoor work became general, an urgent demand for rivetters arose. They were in demand for work on the Quebec bridge, on a railway bridge near Ste. Annes, on work in Ontario, as well as in many places in and near Montreal where “steel construction work was proceeding.” The Dominion Car and Foundry Company did not have the requisite number of labourers, and fell into arrears of deliveries of cars under its contract with one of the railway companies. The rate of wages rose as the scarcity of labourers increased, and as a consequence, men became unsettled and

went from one undertaking to another. A foreman in the car company shop left its service, and as his successor was not to the men's liking, some of the men left also. The car company was unwilling to have the increase in wages go beyond a certain amount, and others of its men went away to get higher pay elsewhere. The company advertised for rivetters and had canvassers in search for men, and it sent this defendant to Detroit for the purpose. The present prosecution resulted.

It is contended for the prosecutor that rivetters operating with the pneumatic hammer, are not skilled workmen at all. The weight of evidence, however, is against this conclusion. One witness from Detroit named Clymo (Clement?) it is true, has testified that illiterate European day labourers, applying for work at the shops of the American Car Foundry works, have been set forthwith at this kind of work, but this testimony is not only very improbable in itself, but is not supported by that of the other witnesses on either side. The mere fact that these operators are classed by themselves and are not regarded as day labourers, is against the pretension. I consider that Jessec was engaged to do the work of a skilled workman.

The case, therefore, resolves itself into determining whether the contention of the prosecutor that the statute permits the hiring abroad, to work on a new industry, only of those skilled workmen who do some new kind of skilled work, and not of all kinds of skilled workmen, is well founded or not.

As a matter of well recognized principle, an enactment purporting to restrict common freedom of action and of contract, is to be so construed as not to make the restriction extend beyond what the language of the enactment clearly justifies. The Act prohibits the assisting the immigration from those foreign countries to which it applies of alien labourers, under contract to perform work or service of any kind in Canada, but it also declares that no person is prevented from engaging skilled workmen in foreign countries to labour in or upon any new industry not at present

established in Canada, "provided that skilled labour for that purpose cannot be otherwise obtained."

It is easy to see what the intent of this excepting clause is.

The framers of this clause clearly must have had in mind the fact that the setting in operation of a new industry would disturb local labour conditions and create a demand for workmen which could perhaps not be supplied. Skilled workmen are presumably at work and do not congregate in a locality in advance and await the setting up of the works.

While it may be true, as the prosecutor contends, that the object of the Act, as a whole, is to secure a fair wage to the workman and prevent the market from being flooded with "cheap" labour, it is also clear that the object of this excepting clause is to favour the new industry and to guard it against having to stand in idleness because of lack of skilled workmen to supply the new demand.

This being so, the effect of the clause is to permit the engagement abroad, not merely of those skilled workmen whose work is confined to the new processes but of any kind of skilled workmen who may be needed, provided they cannot be engaged in Canada. It sanctions the engagement abroad of skilled workmen to be employed as the Act itself states, "in or upon" any new industry, and though it is insisted by the prosecutor the words "for that purpose" mean the purpose of work in the new processes, I consider that these words are too indefinite to have such a meaning attached to them, but must be held to relate to the preceding phrase, "in or upon any new industry." To adopt the construction argued for by the prosecution would therefore be to read into the statute something which is not there, and, not only this, but it would also involve the assumption that every new industry necessarily calls for the exercise of a skilled avocation of a new kind, whereas, as I think is generally conceded, the excellence of many new industries consists largely in the simplicity of the methods of operation by which their objects are accomplished.

It follows that it was for the prose-

cutor who takes the affirmative of the issue on this point, in his complaint—to prove not merely that there were hammermen—rivetters in Canada who could work with the pneumatic hammer, but also that such rivetters could be obtained for the purpose of the car building works otherwise than by inducing aliens to come to Canada, and obtained in such numbers as would enable the company to effectively operate the works. He has not made this proof. In the evidence, the names of only three rivetters are given, who were not occupied at an unspecified date in May or June, though there are general assertions by some of the witnesses to this effect that as many as twenty men might at one time have been engaged. The company, however, was not made aware either of the names of the three men in question or of the whereabouts of the twenty.

It seems to have striven by canvassing and by advertisements to procure workmen here. It succeeded to the extent of securing all the rivetters except seven employed in its new works at a time of great scarcity of skilled labourers, and I do not find that the proof shows that it could have done more.

Appeal dismissed.

(Francq v. Dominion Car & Foundry Co.; 7th April, 1908; Cross, J. A.)

### FACTORY INSPECTION IN NOVA SCOTIA.

**D**URING the month of February, 1908, Mr. Philip Ring was appointed an inspector of industrial establishments under the Factories Act of Nova Scotia.

The first duties assigned to the inspector were to examine the factories in the city of Halifax and report on the number of employees and classes, length of working days, sanitary condition of the buildings and immediate surroundings, fire protection appliances, provisions for escape in case of fire, and all other matters under the act. On the completion of this, he was instructed to visit, and is at the present time, visiting other factories throughout the province with a view to

furnish a report on the matters above mentioned.

It was considered advisable by the government that the inspector should visit buildings in which moving picture shows are held, and to report with regard to the methods employed in extinguishing fires, and the means of escape in such buildings.

In addition to the requirements of the act the inspector will report concerning the horse power of the motive plants installed in each factory, and by what power driven.

### CO-OPERATIVE DISTRIBUTION AT DOMINION, N.S.—HALF YEARLY STATEMENT OF THE WORKMEN'S STORE COMPANY, LTD.

**T**HE Workmen's Store Company, Limited, (co-operative) of Dominion, N.S., which was organized with thirty-six members in 1902, and commenced business in March, 1903, held its semi-annual meeting on March 30, when a dividend of 10 per cent. was declared on sales amounting to \$29,710, an increase of \$4,115 over the corresponding 6 months of the previous year. The net profits were \$3,312, out of which \$2,617 were apportioned as dividend. The expense account amounted to \$2,694. The present membership is 195. Since the store was established total sales were \$207,149, out of which \$17,361 have been paid in dividends, \$2,175 into reserve and \$1,867 on interest account.

### THE PENNY BANK OF TORONTO, ONT.—SECOND ANNUAL REPORT.

**A** copy of the second annual report and financial statement of the directors of the Penny Bank of Toronto\*, covering the twelve months ending June 30, 1907, was received at the Department of Labour during April. The report showed

\* An article dealing with the organization of the bank and with the legislation on which it was founded was published in the *Labour Gazette* for October, 1905, at page 416.

that deposits have grown within twelve months from \$81,001 to \$99,022, an increase of 22½ per cent. In schools alone, since the bank was established, 425,664 deposits have been made and 17,881 new accounts opened. The average amount of deposits has been twenty cents, and of withdrawals \$2.00.

Owing to the success of the bank in the public schools in Toronto, the system has been extended to other cities and towns in the province and branches have been opened in the public schools of Port Hope, Galt and Orangeville. The school boards of Guelph, St. Catharines and Wood-

stock, Ont., have also been addressed on the subject. The bank at present has branches in 48 public schools in Toronto, an increase of 6 during the year. The total number of branches in operation is 56.

No losses have occurred since the inauguration of the bank and the guarantee fund remains intact. The managers of various chartered banks have aided materially in the opening of new branches.

The directors hope to extend the operation, of the bank further amongst the wage-earning classes.

**IMMIGRATION AND COLONIZATION.**

THE most interesting return of the month with reference to immigration is that reviewing the extent of the influx during the fiscal year which ended on March 31, 1908. As will be seen in detail below, the number of arrivals during the year, compared with that of the preceding year showed an increase of 18 per cent. The total for 1907-08 was 262,469 and for 1906-07, 222,702.

It will be seen also that the volume of emigration from Great Britain to Canada has shown a falling off, and that there has been an increase in the number of arrivals from the United States since the beginning of the present calendar year.

**Recent Immigration Returns.**

Immigration through ocean ports during March, 1908, declared for Canada, was as follows:

**IMMIGRATION RETURNS DURING MARCH, 1908.**

	Male.	Female.	Children under 12.	Total.
Immigrants.....	5,964	1,851	1,436	9,251

British Emigration Returns.

During the month ended February 29th, 1908, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING FEBRUARY, 1908-07.

Nationality	1908	1907
English.....	3,059	5,454
Welsh.....	121	(*)
Scotch.....	581	1,487
Irish.....	169	313
British Colonial.....	84	(*)
Total of British origin.....	4,014	7,254
Foreign.....	605	1,276
Total.....	4,619	8,530

During the two months ending February, 1908, the number of passengers leaving the United Kingdom as above mentioned was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING JANUARY-FEBRUARY, 1908-07.

Nationality.	1908	1907
English.....	4,101	7,553
Welsh.....	152	(*)
Scotch.....	791	2,227
Irish.....	230	457
British Colonies.....	190	(*)
Total of British origin.....	5,464	10,237
Foreign.....	1,111	2,575
Total.....	6,575	12,812

\* Not separately distinguished in 1907.

Homestead Entries During March, 1908.

The following statement shows the number of homestead entries made in March, 1908, as compared with March, 1907:—

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF MARCH 1908, AS COMPARED WITH MARCH, 1907.

Agency.	1908	1907	Increase	Decrease
Battleford.....	137	174	.....	37
Brandon.....	3	8	.....	5
Calgary.....	144	97	47	.....
Dauphin.....	66	31	35	.....
Edmonton.....	291	269	22	.....
Estevan.....	23	51	.....	28
Humboldt.....	111	140	.....	29
Kamloops.....	29	12	17	.....
Lethbridge.....	219	174	45	.....
Moosejaw.....	393	57	336	.....
New Westminster.....	1	6	.....	5
Prince Albert.....	89	73	16	.....
Regina.....	74	200	.....	126
Red Deer.....	102	83	19	.....
Winnipeg.....	47	81	.....	34
Yorkton.....	140	133	7	.....
Total.....	1,869	1,589	544	264

It will be seen that there has been a net increase in the number of homestead entries made in March, 1908, of 280.

A statement of the homestead entries during the first three months of the calendar year 1908, compared with the corresponding months of the calendar year 1907, is as follows:—

STATEMENT OF HOMESTEAD ENTRIES  
JANUARY-MARCH, 1908 and 1907, RES-  
PECTIVELY.

Month.	1908	1907	In-crease
January.....	1,453	1,111	342
February.....	1,420	1,033	387
March.....	1,869	1,589	280
Total.....	4,742	3,733	1,009

It will be observed that there has been a net increase of 1,009 in the number of homestead entries made during January, February and March, 1908, compared with the same months of 1907.

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, Saskatchewan, Alberta and British Columbia, during the month of March, 1908, were as follows:

NATIONALITIES OF HOMESTEADERS IN MARCH, 1908.

Nationalities.	No. of Entries.
Canadians from Ontario.....	209
“ “ Quebec.....	28
“ “ Nova Scotia.....	5
“ “ New Brunswick.....	10
“ “ Prince Edward Island.....	5
“ “ Manitoba.....	31
“ “ Saskatchewan.....	83

Decrease, 1908. . . . .	2,519.65	\$26,591.98

**Notes.**

In the most recent publications issued by the Immigration Branch of the Department of the Interior, Canada, special prominence is given to the following announcement:

"Important! Farmers, farm labourers, railway construction men, are the only people the Canadian Immigration department advises to emigrate to Canada. All others should get definite assurance of employment before leaving home, and have money enough to support them for a time in case of disappointment.

During the past few weeks the Canadian immigration officer in London re-

fused to give his sanction, which is required by the steamship companies, for the immigration of a number of persons. The recommendations of workers amongst the poor that those they propose to emigrate are fit and proper persons will not be accepted. If, as in the case of the Salvation Army emigrants, it can be shown that each has work to go to, there will be no interference as long as the emigrant is physically and morally fit, but otherwise something further than an assurance that he is worthy of assistance must be forthcoming.

The increased interest which is being shown this spring, by people in Eastern Canada and the United States in homesteading opportunities in the west has resulted in the C.P.R. passenger department deciding to start the homesteaders' excursions earlier this year than usual. The first of these excursions from Quebec and Eastern Ontario started in April, and the excursions will continue at regular intervals until September. In former years these excursions have not started until June.

**ORIENTAL IMMIGRATION—MISSION OF THE DEPUTY MINISTER OF LABOUR TO ENGLAND.**

**D**URING the month of March, 1908, Mr. W. L. Mackenzie King, C. M. G., Deputy Minister of Labour, was commissioned by the government of Canada to proceed to Great Britain, to confer with the British Authorities on the subject of immigration from the Orient and the immigration from India in particular (\*). In pursuance of this mission, Mr. King left Ottawa on March 5, and sailed for England from St. John, N. B., on the steamship "Empress of Ireland," on Friday, March 6, arriving at London on Saturday, March 14. On the following Monday, Mr. King called on the Right Honourable Lord Strathcona and Mount Royal, the High Commissioner for Canada, and learned

that His Lordship had already arranged for an immediate introduction at the Colonial Office. On the following day Mr. King was received by the Right Honourable the Earl of Elgin and Kincardine, Secretary of State for the Colonies, who arranged for interviews during the course of the same week with the Right Honourable John Morley, Secretary for India, and the Right Honourable Sir Edward Grey, Secretary for Foreign Affairs. These interviews were followed by further interviews with Lord Elgin, Mr. Morley and Sir Edward Grey during the three following weeks, as well as by interviews with different officers of the Colonial, India and Foreign Offices. The most sympathetic interest was taken throughout by the British ministers and officials in the subject of Mr. King's mission, and the representations made on behalf of the people of Canada were received and

\* The terms of the report of the Committee of the Privy Council under which the mission of the Deputy Minister was undertaken were printed in full in the *Labour Gazette* for April, 1908, at page 1236.

fully discussed in all their bearings. Notwithstanding that parliament was in session and that in some respects the pressure of their duties was exceptional, the time accorded by the ministers was so considerable that it was possible within the duration of four weeks to effect such an interchange of views and to conduct such negotiations as to afford reason for believing that a satisfactory understanding of the situation had been reached, insofar, at least, as an appreciation of Canada's position in regard to immigration from India is concerned, and insofar as may serve to prevent such immigration from India as may not be desirable

in the interests of the natives of that country and of the people of Canada. Having concluded the necessary conferences and negotiations, Mr. King returned from England to Canada by the same vessel, sailing from Liverpool on Friday, April 17, and arriving at Halifax on Thursday, April 23, St. John on the following day, and Ottawa on the 25th. It was expected at the close of the month that Mr. King's official report to the Privy Council with regard to his mission would be presented to parliament early in May. The full text of the report will be published in the June issue of the *Labour Gazette*.

### TRADE DISPUTES DURING THE MONTH OF APRIL, 1908.

THERE were very few trade disputes in Canada during April, compared with the corresponding month in previous years, and none of them were of great magnitude. General industrial conditions were not seriously affected in any part of the country by strikes or lockouts, and very few disputes threatened to occur during the spring.

#### Analysis of Trade Disputes During the Month.

*Number and magnitude.*—The total number of trade disputes reported to have been in existence in Canada during April was 11, compared with 8 in March, and 36 in April, 1907. There were 33 firms and about 695 employees affected by trade disputes during the month, 29 firms and about 438 employees having been involved in the new disputes of the month.

*Loss of time in working days.*—The loss of time to employees through trade disputes during April was approximately 5,400 working days, compared with 9,950 in the previous month and 89,150 in April, 1907.

*Trades affected by new disputes.*—The following table shows the trades affected by new disputes during the month, and the number of workers affected in each group of trades:—

Trades.	No. of Disputes.	No. of Workers.
Mining.....	1	36
Building trades .	4	230
Metal trades.....	1	100
General transport	2	72
Total.....	8	438

#### *Localities affected by new disputes*—

The new disputes of the month occurred in the following provinces of the Dominion:—

Province.	No. of Disputes.
New Brunswick.....	1
Ontario.....	6
British Columbia.....	1
Total.....	8

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages.....	4
For shorter hours.....	1
For higher wages and shorter hours....	1
Against decrease in wages.....	1
Against conditions of employment.....	1
Total.....	8

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE SERIES C., No. 88.

TABLE OF TRADE DISPUTES DURING THE MONTH OF APRIL,

<b>DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.</b>										
<i>Woodworking and furnishing trades—</i> Upholsterers.....	Guelph, Ont.....	Objection to reduction in wages.	1	.....	16	.....	1	.....	Jan. 10	No settlement reported, but places of strikers were filled.
	<i>Printing—</i> Printers.....	St. John, N.B.....	Against discharge of an employee.....	2	.....	40	.....	.....	Mar. 22	No settlement reported, but places of strikers were filled.
<i>Clothing trades—</i> Garment workers..		Montreal, Que.....	Objection to an increase in hours of labour, and for a guarantee of wages.....	1	.....	140	60	.....	Feb. 23	No settlement reported at end of month, but employers claimed not to be affected.
<b>DISPUTES WHICH BEGAN DURING THE MONTH.</b>										
<i>Mining—</i> Iron miners.....	Wilbur, Ont.....	Refusal of men to work later than 4 p.m. on Saturdays.....	1	.....	36	.....	.....	Apr. 11	.....	Mining resumed on April 14. Places of strikers were filled during the month.
<i>Building trades—</i> Builders' labourers.	Port Colborne, Ont	Objection to reduction in wages. Company claimed that men demanded an increase in wages.....	1	.....	85	.....	.....	April 1	Apr. 1	Work resumed at rate of \$1.25 per day, which prevailed before the strike.

Builders' labourers, Ottawa, Ont.....	For increase in wages from 15 to 25 cents an hour.....	1	.....	30	.....	25	.....	Apr. 22	.....	No settlement reported at end of month.
Painters.....	St. Catharines, Ont	3	.....	20	.....	.....	.....	Apr. 1	Apr. 11	Increase in wages conceded.
Painters.....	St. John, N.B.....	11	.....	70	.....	.....	.....	Apr. 1	Apr. 7	Increase in wages conceded.
<i>Metal trades—</i>										
Iron moulders ....	Brantford, Ont.....	1	.....	100	.....	.....	.....	Apr. 1	.....	No settlement reported, but places of some strikers were filled.
<i>General Transport—</i>										
Teamsters.....	Fernie, B.C.....	4	6	22	.....	.....	.....	Apr. 3	Apr. 4	Employer conceded demands of men.
Longshoremen.....	Windsor, Ont .....	1	.....	50	.....	.....	.....	Apr. 21	Apr. 22	Places of strikers were filled.

\* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned; mention moreover, is not made of disputes involving less than six employees, or less duration than 24 hours.

*Methods of settlement.*—Of the 11 trade disputes in existence during the month, 8 were definitely terminated, and in one other conditions ceased to be affected, leaving 2 still in existence at the close of the month. There were 3 disputes settled by negotiations between the parties concerned. In four cases the places of strikers were filled, in one, work was resumed without negotiations, and in another case the employers closed the part of the factory affected by the dispute, claiming that they were able to dispense with it.

*Results of disputes.*—Of the disputes that were terminated, 5 resulted in favour of the employers and 3 in favour of the employees. The reports of the result of one dispute were conflicting.

#### **Disputes which Commenced Prior to the Beginning of the Month.**

The trade disputes in existence in Canada at the beginning of April comprised strikes of garment workers at Montreal, Que., printers at St. John, N.B., and upholsterers at Guelph, Ont. A brief account of these disputes is given below:

##### **Strike of Garment Workers at Montreal, Que.**

On February 23rd, a strike of about 200 garment workers took place at Montreal, on account of a contractor wanting them to work 60 hours a week, instead of 54 hours. The employees also wished the firm to be responsible for their wages, not the contractor. While no definite settlement was reached in this dispute, the firm employing the contractor dismissed him and closed this shop, being able to dispense with it.

##### **Strike of Printers at St. John, N.B.**

No settlement was reported in the case of a strike of 40 printers at St. John, N.B., which began on March 22, the cause of the dispute having been the discharge of an employee of the Daily Telegraph. The Evening Times was also affected by this dispute. The publishing of these two newspapers was not interrupted by the

strike, although the management were for some time hampered by it. In the course of the month, the places of the strikers were filled and normal conditions were resumed.

##### **Strike of Upholsterers at Guelph, Ont.**

No definite settlement was reported with regard to a strike of 16 upholsterers which took place at Guelph, Ont., on January 10, on account of their refusal to accept a reduction in wages. It was reported, however, that the places of the strikers were filled and the employers were no longer affected by the dispute.

#### **New Disputes.**

The new disputes of the month comprised strikes of iron moulders at Brantford, Ont., painters at St. John, N.B., and St. Catharines, Ont., building labourers at Port Colborne, Ont., building labourers and bricklayers at Ottawa, Ont., iron miners at Wilbur, Ont., teamsters at Fernie, B.C., and longshoremen at Windsor, Ont.

##### **Strike of Iron Moulders at Brantford, Ont.**

On April 1 about 100 iron moulders of the William Buck Stove Company declared a strike at Brantford, Ont. It was alleged by the strikers that the iron was not melted sufficiently and consequently did not run properly into the moulds, causing bad castings, which meant a loss to them, as all bad castings were discounted. On the other hand, it was claimed by the employers that this was not the cause of the bad castings, and that they could not be traced directly or indirectly to any negligence of the firm. No settlement of the dispute took place during the month, but an attempt was made by the company to fill the places of the strikers. Several of the striking moulders were arrested when the strike was in progress, charged with watching and besetting the works, and forcibly preventing other men from taking their places.

##### **Strike of Painters at St. John, N.B.**

On April 1 about 70 painters employed by 11 firms declared a strike at St.

John, N.B., on account of the refusal of the employers to grant a demand for an increase in wages from \$2.25 to \$2.50 per day. On April 7 the increase in wages was conceded and work was resumed.

#### **Strike of Painters at St. Catharines, Ont.**

On April 1 the journeymen painters of St. Catharines, Ont., demanded an increase in wages from 25 to 30 cents per hour. The demand was immediately conceded by 3 firms employing 10 men, but 3 other firms, employing 20 men, at first refused, and a strike was accordingly declared. On April 11 work was resumed, all the employers having by that time conceded the demands of their men.

#### **Strike of Builders' Labourers at Port Colborne, Ont.**

On April 1 about 85 builders' labourers employed by the Canadian Portland Cement Company declared a strike at Port Colborne, Ont. According to the company the cause of the dispute was their refusal to grant a demand for an increase in wages, but according to other reports the strikers objected to a reduction in wages to 10 cent an hour. Work was resumed on April 6th at the rate of \$1.25 per day, which was the rate prevailing before the strike.

#### **Strike of Builders' Labourers and Bricklayers at Ottawa, Ont.**

On April 22 about 30 non-union builders' labourers employed in the construction of the Young Men's Christian Association building at Ottawa, Ont., stopped work on account of the refusal of their employers to grant a demand for an increase in wages from 15 to 25 cents an hour. The bricklayers to the number of 25 went out in sympathy with the labourers and all work on the building was stopped, and was not resumed at the close of the month. It was reported that most of the striking labourers joined the building labourers' union, soon after the beginning of the dispute.

#### **Strike of Iron Miners at Wilbur, Ont.**

On April 11 about 36 iron miners declared a strike at Wilbur, Ont., the cause of the dispute being their refusal to work later than 4 p.m. on Saturdays. It was reported by the company that no mining was done between April 11th and 13th, but that men began to work on the 14th. The men claimed that the strike was declared because they wanted an increase in wages, and objected to being required to work on Sunday, although they offered to put in extra time at night. In the course of the month normal conditions were resumed at the mine, the company having filled most of the places of the strikers.

#### **Strike of Teamsters at Fernie, B.C.**

On April 3 a strike of teamsters took place at Fernie, B.C., on account of the refusal of the employers to grant a demand for an increase in wages and shorter hours. According to a report received from the Teamsters' Union there were 4 firms affected directly and 6 indirectly by the dispute, and about 22 employees directly affected. A report from one of the employers placed the number of firms affected at 5, and the number of employees at 10. The dispute only lasted one day, the demands of the men being conceded on April 4.

#### **Strike of Longshoremen at Windsor, Ont.**

On April 21, about 50 longshoremen at Windsor, Ont. stopped work on account of the refusal of their employers to grant a demand for an increase in wages from 20 cents to 30 cents per hour. On the following day the places of the strikers were filled and industrial conditions ceased to be affected by the dispute.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of April, and which have been reported to the department.

## VANCOUVER EMPLOYERS' ASSOCIATION—FOURTH ANNUAL MEETING.

THE fourth annual meeting of the Employers' Association of Vancouver, B.C., was held during April. The two chief subjects under discussion were the employers' liability act and the union label. With regard to the former, it was stated that in view of the numerous successful damage suits which had recently been brought against employers by employees injured in the course of their employment, it had become perilous to embark in business where numerous men or women were employed. It was alleged that the sympathy of juries was with the employees, and the association held, therefore, that juries should be obliged, in giving their verdict, to answer questions put to them by the presiding judge in order that a definite basis might be afforded for an appeal. It was also thought that when damages are awarded against an employer the payment should be spread over a period of time and not

be payable in a lump sum. With regard to the union label, the chief complaint was in connection with the action of the unions in endeavouring to induce the Vancouver City Council to require that the union label must appear on all goods purchased by the city under contract. The association held that employers conducting an open shop, should be eligible to sell goods to the city.

The association, which was established in 1903, has now 75 firms in good standing on the membership roll, all employing 5 hands or over. In a communication recently received at the Department, the association stated that while many establishments in Vancouver have become open shops since the Employers' Association was organized, no reduction in wages has been made.\*

\* A statement with regard to the organization of the association was published in the *Labour Gazette* for July, 1903, at page 8.

## BRITISH COLUMBIA: A STUDY ON COLONIZATION IN CANADA.\*

AN important work on British Columbia by Professor Albert Metin, Chief of the Office of the Minister of Labour of France, has recently been published. The volume contains most valuable information concerning this province from many points of view, the subjects being treated under the following headings: Part I, Topographical features; Part II, Climate, lakes and rivers, and forests; Part III, Colonization and inhabitants; Part IV, Fishing, lumbering and agricultural industries; Part V, Mines; Part VI, Economic districts.

In the chapter dealing with the formation of the colony, an outline of the history of British Columbia is given from the period of its first discovery by the Spaniards, in the sixteenth or seventeenth century, to the present day. This is followed by an account of the different nationalities in the province with their occupations. A chapter is devoted to a description of the Indians, based largely on the report of the Department

of Indian Affairs, 1904-5. The problem of Asiatic immigration is discussed at some length, and as an indication of the serious nature of this question statistics are quoted showing that omitting the Indians, the yellow races in British Columbia amounted to one-twelfth of the population in 1871, one-eleventh in 1881, one-tenth in 1891, and one-eighth in 1901.

An interesting account of the salmon fishing industry is given, with statistics from the years 1876 to 1905. In the value of fish products and also in the amount of capital invested, British Columbia, it is stated, ranks second among the provinces of the Dominion, following Nova Scotia, while the number of people engaged in this industry in 1904, was 15,236 in British Columbia, compared with 66,013 in Nova Scotia and 18,342 in New Brunswick. Attention is called to the threatened destruction of the salmon

\* La Colombie-Britannique, Etude sur la colonisation au Canada, par Albert Metin. Paris: Libraire Armand Colin. Pages, 431.

fisheries owing to the methods of the United States fishermen, who intercept the salmon before they enter the mouth of the Fraser River, using the most destructive engines and working continuously, uncontrolled by any regulations of the preservation of the fish.

While the agricultural industries of British Columbia are said to be ancillary to mining, great progress is being made in butter making and fruit growing. The author traces the effect of high wages and the scarcity of labour upon the forms of agriculture carried on in British Columbia, the prevalence of small holdings being attributed to this circumstance.

Since the mining industry is by far the most important one in British Columbia, it is discussed more fully than any other branch, about thirty-three pages being given to it. A description of the various methods employed in the prospecting and working of mines and the extraction of gold and silver is followed by an account of the coal mining and coke industries.

This section concludes with some remarks on the general conditions of labour, with special reference to salaries, labour organizations, and trade disputes. It is stated that the whole impulse toward the formation of trade unions comes from the States, but that in Canada a strike is car-

ried on more along English lines than American.

The final portion of the volume begins with a description of the means of communication in British Columbia, after which the different portions of the province are described from an industrial point of view, classified under the following divisions: The islands, the coast, the region of the Canadian Pacific, the mineral regions of the Kootenay and the frontiers, the gold fields of the Cariboo, the undeveloped area, and the North. In the concluding chapter, the social and political characteristics of the people of British Columbia are briefly summed up, and in the opinion of the writer there are none which are not to be found in all new English speaking countries.

The great industrial prosperity of this province, and the immense possibilities of future development are well brought out, it being shown that the total production of the different industries for each of the years 1905 and 1906 amounted to about 245 million francs for a population of about 200,000 inhabitants. The volume is very fully illustrated with maps and pictures, and contains an extensive bibliography of government publications and miscellaneous works on British Columbia. It forms a most valuable contribution to the economic literature of the Dominion.

### FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING APRIL, 1908.

The following is a list of contracts awarded by the Department of Public Works and the Department of Railways and Canals, which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

#### Department of Public Works.

**E**XAMINING warehouse at Winnipeg Man., names of contractors, J. McDiarmid Co., Ltd., of Winnipeg, Man.; date of contract, January 10, 1908; amount of contract, \$276,000.

#### FAIR WAGES SCHEDULE.

Class of Labour.	Rates of Wages, Not less than:	
Bricklayers.....	\$ .55 per hour,	8 hours per day.
Masons.....	.55 " "	9 " "
Carpenters.....	.35 " "	9 " "
Joiners.....	.35 " "	9 " "
Stairbuilders.....	.35 " "	9 " "
Stonecutters.....	.60 " "	8 " "
Plasterers.....	.50 " "	9 " "
Lathers.....	.40 " "	9 " "
Plumbers.....	.40 " "	9 " "
Steam and gasfitters..	.40 " "	9 " "
Painters and glaziers	.30 " "	9 " "
Electricians.....	.35 " "	9 " "
Tinsmiths.....	.39 " "	9 " "
Metal roofers.....	.39 " "	9 " "
Blacksmiths.....	.32½ " "	9 " "
Builders' labourers ..	.25 " "	10 " "
Ordinary labourers ..	.20 " "	10 " "
Driver, 1 horse & cart	.35 " "	10 " "
Driver, 2 horses and wagon.....	.50 " "	10 " "

Public building at Renfrew, Ont.; name of contractors Jos. Bourque & Co., of Hull, Que.; date of contract, April 6, 1908; amount of contract, \$24,500.

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages, Not less than:
Stonecutters.....	\$4.00 per day of 10 hours.
Bricklayers.....	3.50 " 10 "
Masons.....	3.50 " 10 "
Carpenters.....	2.00 " 10 "
Joiners.....	2.25 " 10 "
Stairbuilders.....	2.25 " 10 "
Plasterers.....	3.00 " 10 "
Lathers.....	1.50 per 1,000.
Painters and glaziers.....	2.25 per day of 10 hours.
Plumbers.....	2.50 " 9 "
Steam and gasfitters.....	2.50 " 9 "
Metal roofers.....	2.25 " 10 "
Tinsmiths.....	2.25 " 10 "
Electricians.....	2.00 " 10 "
Builders' labourers.....	1.75 " 10 "
Ordinary labourers.....	1.50 " 10 "
Driver, 1 horse and cart....	2.50 " 10 "
Driver, 2 horses and wagon	4.00 " 10 "

Road protection work at Glace Bay, N.S.; name of contractor, Wm. Curry, Glace Bay, N.S.; date of contract, April 23, 1908; amount of contract, \$8,985.

FAIR WAGES SCHEDULE.

Trade of Class of Labour.	Rate of Wages, Not less than:
Foreman carpenters.....	\$2.50 per day of 9 hours.
Carpenters.....	2.25 " 9 "
Engineman for pile driver..	2.25 " 9 "
Blacksmiths.....	2.25 " 10 "
Blacksmiths' helpers.....	1.50 " 10 "
Labourers.....	1.50 " 10 "
Driver, with horse and cart.	2.50 " 10 "
Driver, with 2 horses and wagon.....	3.75 " 10 "

Department of Railways and Canals.

Raising portion of St. Gabriel Shed No. 1, Lachine Canal. Date of contract, April 1st, 1908. Amount of contract, schedule rates. Contractors, Quinlan & Robertson, Montreal, Que.

FAIR WAGES SCHEDULE.

Class of Labour.	Rate of Wages, Not less than:
Builders' labourers....	\$0.20 per hour, 9 hours per day.
Ordinary labourers....	0.17½ " 9 "
Blacksmiths.....	2.25 per day, 10 "
" helpers....	1.75 " 10 "
Carpenters.....	0.28 per hour, 9 "
Driver, 1 horse & cart	2.50 per day, 10 "
Driver, 2 horses and wagon.....	4.00 " 10 "
Timekeeper.....	1.50 " 10 "

Underpinning and reconstructing wall of Side Basin No. 1 and north wall of Basin No. 2, also paving wharf behind walls. Date of contract, April 20, 1908. Amount of contract, schedule rates. Contractors, Quinlan & Robertson, Montreal.

FAIR WAGES SCHEDULE.

Class of Labour.	Rate of Wages, Not less than
Builders' labourers ..	\$0.20 per hour, 9 hours per day.
Ordinary labourers...	1.50 per day, 9 "
Pavers.....	1.75 " 9 "
Steam drillers.....	0.22½ per hour, 9 "
Hand drillers .....	1.75 per day, 9 "
Stonecutters.....	\$0.40 per hour, 8 hours per day
Masons.....	0.40 " 9 "
Blacksmiths.....	2.25 per day, 9 "
" helpers....	1.50 " 9 "
Carpenters.....	0.28 per hour, 9 "

Driver, 1 horse and cart....	2.25
Driver, 2 horses and wagon	3.50

Post Office Department.

The following orders for supplies were given, subject to the regulations for the suppression of the sweating system, the securing payment of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of Order.
Making metal dating stamps and type, and making other hand stamps and brass crown seals.....	\$ 1,631.81
Making and repairing rubber dating stamps and type, also other stamps....	44.17
Supplying stamping material and wooden boxes, and repairing stamping pads....	890.59
Making and repairing post office scales....	487.00
Supplying mail bags.....	1,463.90
Repairing mail bags.....	1,216.20
Making and repairing mail locks, and supplying mail bag fittings.....	32.10
Supplying Street Letter Boxes and repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes and parcel receptacles.....	315.96
Making and repairing miscellaneous articles of Postal Stores.....	3.80
Making up and supplying articles of Official Uniform.....	303.75

## INDUSTRIAL ACCIDENTS, CANADA, DURING THE MONTH OF APRIL, 1908.

Under this heading account is taken of such accidents only, as were sustained by workmen in the course of their employment and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories inspectors of the province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 289 individual workpeople in Canada during the month of April, 1908, were reported to the Department of Labour. Of these 105 were fatal and 184 resulted in serious injuries. In addition, 5 fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before April, 1908. The number of fatal accidents reported in April, 1908, was 24 more than in the previous month and 1 less than in April, 1907.

Of 156 returns received during the month giving the ages of the victims of industrial accidents, 22 referred to persons under twenty-one years of age, 39 to persons between twenty-one and forty-five, 9 to persons over 45; 86 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING APRIL, 1908, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed	Injured.	Total.
Agriculture.....	21	11	32
Fishing and hunting.....	5	..	5
Lumbering.....	10	5	15
Mining.....	7	11	18
Building trades.....	5	12	17
Metal trades.....	2	27	29
Woodworking trades.....	1	11	12
Clothing trades.....	..	2	2
Food and tobacco preparation	4	5	9
Leather trades.....	1	1	2
Railway service.....	32	45	77
Navigation.....	2	9	11
General transport.....	2	11	13
Civic employees.....	5	5	10
Miscellaneous.....	1	18	19
Unskilled labour.....	7	11	18
Total.....	105	184	289

## Nature of Fatalities and Accidents.

The chief disasters of the month were the killing of nine workmen and the serious injury to three others in a dynamite explosion at St. Cajétan d'Armagh, Que.; the death by drowning in the Battle River, Alberta, of four construction hands; the killing of four railway labourers, and the wounding of ten others by a snow and land slide near Downey Station, B.C.; the drowning of five fishermen off Lunenburg, N.S., the asphyxiation of two workmen in a well at Winnipeg, Man.; the death by an explosion of dynamite of 2 railway construction hands at Port Daniel, Que.; the drowning of a settler, his wife and child near Athabaska Landing, Alta.; the killing of three miners by an explosion in the "Old Mine" at Canmore, Alta.; the drowning of two settlers in Knee Hill Creek, Alta.; and the death of a settler, his wife and two children in a prairie fire in the Tramping Lake District, Sask.

## Dynamite Explosion at St. Cajetan D'Armagh, Que.

A premature explosion of dynamite occurred on April 20th in the construction camp of Messrs. Murdock Brothers on the line of the Transcontinental Railway at St. Cajétan d'Armagh, in the county of Bellechasse, Que., killing nine workmen and seriously injuring three others.

## Drowning Accident in Battle River, Alta.

On April 17, four members of a Grand Trunk Pacific railway construction gang while crossing the Battle river on a scow on their way to work, were drowned by the swamping of the vessel.

## Fatal Land and Snow Slide at Albert Canyon, B. C.

On April 14, an avalanche of rock and snow occurred in Albert Canyon, B.C., near Downey station, on the Canadian Pacific Railway, and overwhelmed two cars loaded with Japanese workmen, killing four and injuring 10.

**Drowning of Fishermen at Lunenburg, N.S.**

In the second week of April, five fishermen of the Lunenburg, N.S., fishing fleet lost their lives by drowning through the swamping of their dory.

**Asphyxiation in a Well at Winnipeg, Man.**

On April 9th, the engineer of the waterworks department of the city of Winnipeg Man., and his assistant, were suffocated by gas in well No. 4 of the city water system. The assistant was in charge at night and evidently went down an air shaft without testing it for gas, according to instructions, and lost his life by asphyxiation; his companion, the engineer, died in an attempt to rescue him.

**Explosion at Port Daniel, Que.**

On April 14th, at Port Daniel East, County of Bonaventure, Que., two construction hands while at work in a rock cutting on the line of the Quebec Eastern and Western railway were instantly killed and two others dangerously injured by a premature explosion of dynamite.

**Tripple Drowning Near Athabaska Landing, Alta.**

On April 18th, while a settler and with his wife and child were travelling by dog train on the ice of the Athabaska river the ice broke precipitating them into the stream. They were swept under the ice by the current and drowned.

**Explosion in a Mine at Canmore, Alta.**

Through a premature explosion which occurred on the morning of April 15th in what is known as the "old mine" at Canmore, Alberta, three miners were instantly killed and four seriously injured.

**Drowning at Knee Hill Creek, Alta.**

While two settlers were crossing Knee Hill Creek, Alta., with a team and a wagon on April 6th, the ice gave way pre-

cipitating them into the water. The current carried them under the ice and they were drowned.

**Death of a Family in Prairie Fire in Tramping Lake District, Sask.**

On April 23rd, a homesteader, his wife and two children, residing in the Tramping Lake District, Saskatchewan, were surrounded by a prairie fire and were burned to death.

**Record by Industries and Trades.**

*Agriculture.*—There were 21 fatal, and 11 non-fatal accidents during April, 1908, compared with 16 killed and 20 injured in the preceding month, and 17 killed and 23 injured in April, 1907. Six farmers were drowned, 5 were burnt to death in prairie fires, 3 were injured by live stock, 2 by being run over, 2 by runaways, 1 by falling in an elevator, 1 by exposure and 1 by being burnt to death by the victim's clothes catching fire from a stove. Of the serious accidents 3 each were caused by tools, by runaways, 2 each by live stock and by falls, and 1 by machinery.

*Fishing and hunting.*—Five fishermen were drowned off Lunenburg, N.S. In March, 1908, the record was 4 deaths. In April, 1907, there were no accidents.

*Lumbering.*—There were 10 workmen killed and 5 injured in April, compared with 7 killed and 4 injured in March, 1908, and 8 killed and 15 injured in April of last year. Of the fatal accidents, 4 were due to drowning, 3 to machinery, 1 to a falling log, and 2 to falling trees. Of the minor accidents, 2 each were due to machinery and to falling portions of trees, and 1 to tools.

*Mining.*—Seven fatalities and 11 serious accidents occurred in April, 1908, against 15 killed and 15 injured in the previous month and 15 killed and 26 injured in April, 1907. Three each of the deaths were caused by falling material and by explosions in mines and 2 by falls. Six workmen were seriously injured by explosions, 2 by being crushed by mine cars, 1 by falling material and 1 by being run over by a car.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE, SERIES F., No. 54.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF APRIL, 1908.

Trade or Industry	Locality.	Date.	No.	Cause of Fatality.
<i>Agriculture.—</i>				
Farmer.....	Kamouraska, Que.....	Apr. 6	1	Run over by load of logs.
".....	Petersbury, Ont.....	" 1	1	Run over by train.
".....	Asbestos, Que.....	" 9	1	Kicked by a horse.
".....	Carbon, Alta.....	" 8	2	Drowned, team broke through ice on creek.
".....	Acton, Ont.....	" 11	1	Fell down elevator shaft.
".....	Fort Assiniboine, Alta.....	" 13	1	Exposure—lost on trail.
" & family).....	Athabaska River, Alta.....	" 19	3	Drowned, dog train broke through ice.
".....	Tramping Lake, Sask..	" 23	4	Burned to death in prairie fire.
".....	McLennan's Brook, N.S.....	" 22	1	Kicked by a horse.
".....	Prince Co., P.E.I.....	" 25	1	In a runaway.
".....	Dubus, Sask.....	" 22	1	Burned to death in prairie fire.
".....	Oak River, Man.....	" 22	1	In a runaway.
Farmer's wife.....	Hillburn, Sask.....	" 28	1	Clothing caught fire from stove, injuries proved fatal.
Farmers' son.....	St. Gedeon, Sask.....	" 21	1	Drowned, fell into well.
Farm hand.....	Edjeley, Ont.....	" 27	1	Kicked by horse.
<i>Fishing and Hunting.—</i>				
Fishermen.....	Off Lunenburg, N. S.....	" 15	5	Drowned, vessel wrecked at sea.
<i>Lumbering.—</i>				
Sawmill hand.....	Lisgar, Que.....	" 6	1	Fell on circular saw.
".....	Fernie, B. C.....	" 13	1	While trying to slip heavy belt on pulley with 1 inch iron pipe, latter was projected through his body.
".....	Lahave, N. S.....	" 22	1	Drowned, boat capsized.
".....	Dunchurch, Ont.....	" 26	3	Drowned, boat upset while fixing boom.
Logger.....	Sault Ste Marie, Ont.....	" 1	1	Logs rolled on him.
".....	Greenwood, B. C.....	" 2	1	Tree fell on him.
".....	N. D. du Rosaire, Que.....	" 7	1	"
Pulp mill worker.....	Shawinigan Falls, Que.....	" 9	1	Caught in shafting.
<i>Mining.—</i>				
Miner.....	Thetford Mines, Que.....	" 2	1	Rock weighing 200 lbs. fell on him.
".....	Canmore, Alta.....	" 15	3	By explosion in mine.
".....	Springhill, N. S.....	" 22	1	"Horseback" fell on him.
Electrical engineer.....	Algoma, Ont.....	" 14	1	Fell 160 ft. down shaft.
Blast furnace hand.....	Sydney, N. S.....	" 13	1	Fell from top of furnace 100 ft.
<i>Building trades.—</i>				
Carpenter.....	Hamilton, Ont.....	" 11	1	Fell from scaffold, 35 ft.
".....	Ancienne Lorette, Que.....	" 17	1	"
".....	Langton, Ont.....	" 16	1	A pole fell on him.
Builder's labourer.....	Montreal, Que.....	" 2	1	Fell down elevator shaft.
".....	".....	" 24	1	Part of stone cornice fell on him.
<i>Metal trades.—</i>				
Foundrymen.....	Toronto, Ont.....	" 24	1	Caught between traveling crane and piece of iron.
Electrical worker.....	Brantford, Ont.....	" 26	1	Fell from roof of power house.
<i>Woodworking trades.—</i>				
Woodworker.....	Lanigan Man.....	" 17	1	Caught in belting.
<i>Food and tobacco preparation.—</i>				
Baker.....	Toronto, Ont.....	" 6	1	From burns received at a fire.
Pork packer.....	Winnipeg, Man.....	" 15	1	Impaled on two hooks.
Butter maker.....	Valleyfield, Que.....	" 8	1	Thrown from vehicle into ditch and was drowned.
Cook.....	Montreal, Que.....	" 10	1	Fell in elevator shaft.
<i>Leather trades.—</i>				
Farmer.....	Acton, Ont.....	" 14	1	Fell 60 ft. in elevator shaft.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE, SERIES F., No. 54.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF APRIL, 1908.

Trade or Industry	Locality.	Date.	No.	Cause of Fatality.
<i>Railway service.—</i>				
Engineer.....	Kenora, Ont.....	Apr. 10	1	In derailment of train.
".....	Roblin, Man.....	" 22	1	Engine rolled over on him.
Brakeman.....	Derby Jct. N. B.....	" 1	1	Head on collision.
".....	Regina, Sask.....	" 14	1	Run over by engine.
".....	Fort William, Ont.....	" 22	1	"
Fireman.....	St. Thomas, Ont.....	" 5	1	Fell from bridge.
".....	Agassiz, B. C.....	" 11	1	Struck by passing object.
Watchman.....	Michel, B. C.....	" 17	1	Struck by train.
Construction hand.....	Vermillion Bay, Ont.....	" 9	1	Struck by boulder from blast.
".....	Armaugh, Que.....	" 18	9	By explosion of dynamite.
".....	Hardisty, Alta.....	" 17	4	Drowned, scow upset in Battle River.
".....	Albert Canyon, B. C.....	" 17	4	Killed in a snowslide.
".....	Port Daniel, Que.....	" 16	2	Explosion of dynamite.
Yardman.....	Regina, Sask.....	" 21	1	Run over by cars.
".....	Fernie, B. C.....	" 25	1	Struck by engine.
Section foreman.....	Brampton, Ont.....	" 23	1	Rail crushed foot, died of pyæmia.
Sectionman.....	Cobourg, Ont.....	" 2	1	Struck by train.
<i>Navigation.—</i>				
Stevedore.....	Halifax, N. S.....	" 25	1	Struck by falling bags of sugar.
Sailor.....	Off. Victoria, B. C.....	" 25	1	Drowned, swept overboard.
<i>General transport.—</i>				
Liveryman.....	St. Thomas, Ont.....	" 24	1	Kicked by horse.
Teamster.....	New Glasgow, N. S.....	" 23	1	Thrown from vehicle, neck broken.
<i>Civic employees.—</i>				
Policeman.....	Montreal, Que.....	" 6	1	Shot dead, trying to arrest prisoner.
".....	Frank, Alta.....	" 12	1	Shot while on duty.
Waterworks engineer.....	Winnipeg, Man.....	" 9	1	Asphyxiated in well.
" asst.....	".....	" 9	1	"
Civic foreman.....	Victoria, B. C.....	" 24	1	By electric shock while repairing wires.
<i>Miscellaneous.—</i>				
Florist.....	Ottawa, Ont.....	" 24	1	Fell striking concrete floor with head.
<i>Unskilled labour</i>				
Labourer.....	Toronto, Ont.....	" 1	1	Run over by train.
".....	Brampton, Ont.....	" 9	1	Fell 25 ft.
".....	Toronto, Ont.....	" 24	1	Chimney fell on him.
".....	Sherbrooke, Ont.....	" 1	1	Fell from train.
".....	Magog, Que.....	" 26	1	Run over by train.
".....	Toronto, Ont.....	" 28	1	Cave in of drain.
".....	Thetford Miners, Que.....	" 30	1	Fell 150 ft into asbestos pit.

FATAL ACCIDENTS HAPPENING IN PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN APRIL.

Farmer.....	Moosejaw, Sask.....	March 30	1	Run over by train at crossing.
".....	Delmer, Ont.....	" 31	1	Derrick fell on him.
Matte loader.....	Copper Cliff, Ont.....	" 23	1	Run over by mine train.
Machine runner.....	Cobalt, Ont.....	" 25	1	By explosion of dynamite.
Woodworker.....	Warton, Ont.....	" 30	1	Struck by board projected from saw.

*Building trades.*—There were 5 deaths by accident in this group, and 12 workmen injured in April, 1908, compared with 2 killed and 6 injured in March last, and 12 injured in April, 1907. Two each of the deaths were due to falls from scaffolds and to falling material, and 1 to a fall in an

elevator shaft. Five of the injuries were due to falling material, 3 to falls from scaffolds, and 4 to falls in other ways.

*Metal trades.*—There were 2 workers killed and 27 injured during April, as against 4 killed and 34 injured in the month before, and 1 killed and 41 in-

jured in April, 1907. Being struck by a crane killed 1 workman, and a fall from the roof of a house the other. Eleven of the injuries were caused by machinery, 6 by falling material, 3 by flying material, 2 each by electric shock, by falls and by molten metal, and 1 by an explosion of gasoline.

*Woodworking trades.*—One workman was killed by being caught in belting in April, and 11 others were injured. The record for March last, was 1 killed and 19 injured, and for April, 1907, 8 injured. Nine of the 11 injuries were due to machinery and 2 to falling material.

*Clothing.*—Two minor accidents caused by machinery occurred in April; there were 3 accidents in the preceding month and 1 accident in April, 1907.

*Food and tobacco preparation.*—The record in these trades for April was 4 fatalities and 5 non-fatal accidents, compared with 1 killed and 5 injured in March, 1908, and 1 killed and 7 injured in April, 1907. Burns received at a fire, being impaled on a meat hook, a fall from a vehicle and a fall in an elevator caused 1 death each, while 2 workmen were injured by falls in elevators and 1 each by tools, by a fall, and by escaping steam.

*Leather trades.*—A tanner at Acton, Ont., fell down an elevator shaft and was killed, and a trunk maker in Berlin, Ont., cut off part of his finger with a saw. There were 2 injuries in March and no accidents in April, 1907.

*Railway service.*—There were 32 employees killed and 45 injured during April, 1908, compared with 26 killed and 23 injured in March, 1908, and 24 killed and 17 injured in April, 1907. Of the 32 deaths, 12 were due to explosions of dynamite, 4 each to being run over, to drowning and to being killed in snow or rock slides, 2 each to derailments and to being struck by a train, and 1 each to a collision, to a fall, to being struck by a passing object and to falling material. Of the other accidents, 11 each were due to explosions of dynamite and to being injured in avalanches; 8 to collisions, 4 to falls, 2 each being caught between cars, to falling material, to explosions, to machinery, and to being run over, and 1 to a derailment.

*Navigation.*—Two fatal and 9 non-fatal accidents occurred in April in this group, compared with 3 killed and 6 injured in the month before and 5 killed and 4 injured in April, 1907. One of the fatalities was caused by falling material and the other by drowning. Five of the minor accidents were caused by falling material, 3 by falls and 1 by being struck by a vehicle.

*Transport.*—There were 2 killed and 11 injured in April; in March there was 1 killed and 7 injured and in April, 1907, 4 killed and 16 injured. One of the deaths was due to the kick of a horse and 1 to being thrown from a vehicle. Live stock and runaways caused 4 serious accidents each, a fall, 2; and being run over 1.

*Civic employees.*—Five deaths and 5 serious accidents occurred among these workers in April, compared with 1 killed, and 2 injured in March last, and 3 serious accidents in April, 1907. A policeman in Montreal, Que., and another at Frank, Alberta, were shot dead while on duty, 2 water works employees in Winnipeg, Man. were asphyxiated by gas in a well and a civic foreman at Victoria, B.C., was electrocuted. Gunshot wounds were responsible for 2 minor accidents, falling material for 2 others, and being struck by a car for 1.

*Miscellaneous.*—In this class a florist in Ottawa, Ont., was killed by a fall in April, and 18 other workmen were injured. In the preceding month the record was 1 killed and 13 injured, and in April of last year 5 killed and 19 injured. Six of the injuries were caused by machinery, 3 each by falls and by elevators, 2 by an explosion of a boiler and 1 each by falling material, by being caught in a burning building, by being run over and by hot glass.

*Unskilled labour.*—There were 7 killed and 11 injured compared with 5 killed and 12 injured in March, and 2 killed and 11 injured in April, 1907. Falls killed 3, railway accidents 2, falling materials 1 and gas in a well 1. Four of the injuries were due to falling material, 3 each to cave-ins and to machinery, and 1 to being run over.

## CHANGES IN RATES OF WAGES AND HOURS OF LABOUR IN CANADA— FIRST QUARTER, 1908.

IN the accompanying statistical table detailed information is presented relating to changes in rates of wages and hours of labour reported to the Department of Labour as having gone into effect during the first quarter of the present calendar year, including the months of January, February and March, 1908.

### The General Result.

Though a number of important increases went into effect during the quarter, the general level of wages in the less skilled branches was somewhat lower than at the corresponding period of 1907. Railway construction contractors were obtaining a plentiful supply of men at from \$1.50 to \$1.75 per day; in the lumber camps of British Columbia rates were somewhat lower owing to inactivity in the industry, and at Cobalt, Ont., a number of miners had their schedules decreased. Unskilled labour generally commanded a lower rate than in the preceding winter, owing to the number out of work as a result of the financial stringency, though farm labourers with the approach of spring commanded high wages, owing to the prevailing scarcity of hands. In the manufacturing industry the downward tendency noted during the autumn of 1907 was continued, and rates in several large establishments were reduced from 5 to 10 per cent. On the other hand, the upward tendency among railway employees, which was so marked a feature of 1907, was continued, telegraphers on the Grand Trunk and Canadian Northern railway systems receiving a material advance. Civic employees also at several points obtained a higher scale. In other branches the rates established in 1907 were well maintained.

### Changes by Industries and Trades.

The following is a statement of the changes in wages and hours of labour reported to the Department as having gone into effect during the first quarter of 1908,

according to the several industries and groups of trades affected:

*Agriculture.*—Wages of farm labourers were somewhat lower during the winter months than at the corresponding period of 1906-07, as a result of the comparatively large amount of unemployment. With the approach of spring, however, the tendency was upward, and in the Northwest provinces and in sections of Ontario and Quebec a scarcity of help was experienced for the work of ploughing and seeding. Wages on the whole were on about the same level as at the corresponding period of 1907.

*Fishing.*—About 150 deep-sea fishermen employed by the New England Fish Company at Vancouver, B.C., received a new schedule dating from January 1. The company had previously been paying one cent per pound for all fish weighing 12 pounds and over, and half a cent per pound for all fish under 12 pounds in weight. Under the new schedule the men will be paid one cent per pound for fish of any weight. As only about 8 or 10 per cent. of the fish taken run under 12 pounds in weight the change in earnings is not material.

*Lumbering.*—employees in lumber camps in British Columbia were receiving somewhat lower wages during the opening months of the present year than in 1907. The prevailing schedule, as fixed by the British Columbia Loggers' Association was as follows:—(1)

*Monthly men with board included.*—Per month—Chef (large camp), \$65; white cooks, \$60; flunkey, \$30; man and wife as cook and flunkey, \$80; Chinese cook, first, \$35; Chinese cook, second, \$35; string teamster, \$70; teamster (two horses), \$40; signal boy \$20.

*Daily men, board \$5.25 per week.*—Per day—Blacksmiths, \$3; blacksmith's helper, \$2; boom man, first, \$3; boom man, second, \$2.50; greaser, \$2.25; faller,

(1) For rates prevailing during 1906 and 1907 see issues of *Labour Gazette* for December, 1906, page 586 and for April, 1907, page 1051.

caming and Hudson Bay mine, the reduction was opposed by the employees and the matter referred for adjustment under the Industrial Disputes Investigation Act.(4)

*Manufacturing, metal and woodworking trades.*—The downward tendency which was noted during the closing months of 1907 was continued during the first quarter of 1908. Wages in a number of manufacturing establishments in different branches of the industry were reduced from 5 to 10 per cent. during January and February. Among specific instances of

(4) For detailed statement as to nature of reduction see *Labour Gazette* for April, 1908, page 1014.

reductions, information concerning which was received at the Department, mention may be made of the following: At Amherst, N.S., 1,000 employees of Rhodes, Curry & Company had their wages reduced by 10 per cent. At Brantford, Ont., iron moulders, machinists, woodworkers, blacksmiths, grinders, labourers, etc., to the number of 580 employed by the Massey-Harris Manufacturing Company were similarly reduced. At Guelph, Ont., piano plate moulders (20) had their wages reduced 8 per cent. At Berlin, Ont., the employees in a number of establishments had their wages reduced from 10 to 15 per cent. In Chatham, Ont., a

cut of 10 per cent. was made in the wages of 300 factory employees.

*Railway construction.*—Wages of railway construction hands were somewhat lower during the opening months of the year than at the corresponding period of 1907, though skilled workmen remained on about the same level. Drillers, muckers and labourers were being paid from 15 to 17½ cents per hour during January in certain camps east of Winnipeg, Man., whereas the rate last year was from 17½ to 20 cents per hour. In New Brunswick also the rate was reduced from 16 to 15 cents per hour in certain districts.

*Railway employees.*—Telegraphers in the employ of the Grand Trunk and of the Canadian Northern Railway Companies received a substantial increase in wages. The increase in the case of the Grand Trunk employees was granted a reference under the Industrial Disputes Investigation Act.<sup>(5)</sup> It was estimated that the increase would involve an additional expenditure of \$27,000 per annum. The increase granted to the employees of the Canadian Northern Railway Company amounted to 14 per cent. and was dated from November 1, 1907.

*General transport.*—Teamsters employed hauling snow by the Ottawa Electric Railway Company obtained an advance of from 20 to 25 cents per load after a strike. The men made a minimum of 12 trips per day, so that the advance was to 60 cents per day. Elevator men in the employ of the Dominion government had their wages increased \$5.00 per month.

*Printing.*—From January 20, 1908, a new agreement went into effect between Typographical Union No. 302 of Quebec, Que., and the master printers of that city. The agreement involved an increase of approximately 15 per cent. in the wages of hand and machine composition.<sup>(6)</sup>

*Clothing.*—At Kingston, Ont., some 25 male and 65 female tailors obtained an increase of 15 per cent. in piece work prices from February 1. The increase was estimated to amount on the average to \$1.00 per week. A reduction in hours of one per day was also granted.

*Food and tobacco preparation.*—An agreement between the Brewery Workers' Union and the Master Brewers' Association of Toronto, Ont., was concluded during March under which an advance of 25 cents per week will take effect in 1909, wages remaining unchanged during the present year.<sup>(7)</sup>

*Civic employees.*—At St. John, N.B., 14 employees of the water and sewerage department had their wages increased from January 1 as follows:

No. of Employees.	Old Scale per Week.	New Scale per Week.
2	\$13.20	\$15.00
2	10.50	12.00
5	10.00	12.00
2	11.00	12.00
1	10.00	11.00
2	9.00	10.00

The assessment clerk at St. John, N.B., had his salary increased from \$1,000 to \$1,100 per annum and another clerk from \$600 to \$720.

At Niagara Falls, Ont., the following increases were granted to employees of the municipality:

Classes.	No.	Old Scale Per Annum	New Scale Per Annum
Tax collector.....	1 male	\$600.00	\$650.00
Collector of electric light rates.....	1 "	600.00	780.00
Electric light trimmer	1 "	660.00	720.00
Cemetery Supt.....	1 "	600.00	720.00
Driver, fire dept....	1 "	600.00	660.00
Clerk of water commission.....	1 female	300.00	520.00
Mayor.....	1 male	400.00	500.00
Waterworks' engin'rs	2 "	400.00	500.00

The members of the police force at Brantford, Ont., were granted an increase averaging 15 cents per day from March 1.<sup>(8)</sup>

Civic firemen at London, Ont., had their wages increased as follows:

Classes.	No.	Old Scale Per Annum	New Scale Per Annum
Chief.....	1	\$1,400.00	\$1,500.00
Assistant chief.....	1	950.00	1,000.00
Foremen.....	3	750.00	866.00
Truck foreman.....	1	750.00	866.00
Assistant foremen...	5	675.00	791.00
1st engineer.....	1	745.00	795.00
2nd engineer.....	1	675.00	791.00
Firemen.....	17	650.00	766.00

(7) For further statement re terms of this agreement see *Labour Gazette* for April, 1908, pages 1199-1211.

(8) A copy of the new scale was published in the *Labour Gazette* for March, 1908, at page 1060.

(5) See *Labour Gazette* for February, 1908, page 951 for statement of award, wages scale, etc.

(6) The full text of this agreement was published in the *Labour Gazette* for February, 1908, at page 998.

## REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during April, 1908.

### DOMINION REPORT.

#### Agricultural Statistics.

Census and Statistics. Bulletin V. Agricultural Census of Ontario, Quebec and the Maritime Provinces, 1907. Ottawa, King's Printer, 1908. Pages, 52.

**D**URING the summer months of 1907 a census of farm land, field crops and live stock of Ontario, Quebec and the Maritime Provinces was taken by the Dominion Census and Statistics Office, with the assistance of the Ontario Bureau of Industries for the Province of Ontario. In the five provinces covered by the census, it was found that the quantity of farm land cleared amounted to 26,897,437 acres, representing 54.30 per cent. of the acres occupied. There were 17,489,806 acres planted in crops, and 480,124 acres laid out in orchards and gardens. The largest crop was that of oats, of which there were 142,545,562 bushels, grown on 4,948,634 acres. The next in quantity was barley, of which there were 25,206,774 bushels, grown on 901,006 acres. There were 15,644,179 bushels of fall wheat and 5,570,827 of spring wheat. The returns for live stock showed that in the five provinces there were 1,240,171 horses, 2,353,456 milch cows, 2,833,762 other cattle, 3,006,234 swine, and 20,565-580 poultry.

The bulletin also contains statistics taken during the census of 1901, but as these were collected at the end of the winter they do not afford a good basis for comparison.

#### Civil Service of Canada.

Civil Service Commission, 1908. Report of the Commissioners. Ottawa: King's Printer, 1908. Pages, 275.

The report of the Commissioners appointed to inquire into the operation of the Civil Service Act and kindred legislation contains a number of important recommendations for the improvement of the public service. With regard to salaries the Commissioners consider that

Deputy Ministers should receive not less than \$5,000 a year, that the annual increases should be adjusted as much as possible to the varying ability and efficiency of each officer, and that it should be possible to give an annual increase of \$100. It is recommended that the departments be allowed to appoint junior clerks at \$700 per annum, instead of being limited to \$500, that the temporary clerks, who are now employed continuously be grouped into a "writer class", and that as vacancies occur in the higher divisions, a duly qualified member of this class should have an opportunity to advance to a higher grade. It is suggested that it is advisable to grant increases in salary to deserving officials both in the inside and outside service, and that for eastern Canada such increases might be at the rate of 15 per cent. For officials whose salaries are under \$1,500, and 12½ per cent. for salaries above that rate, and that for the western provinces, these scales should be 25 and 20 per cent. to the same proportion of incomes.

A draft act was submitted by the Commissioners to take the place of the Retirement Act, providing for the superannuation of Civil Servants, and the payment of pensions to their widows and children under certain restrictions.

### ONTARIO REPORTS.

#### Railways of Ontario.

Second Annual Report of the Ontario Railway and Municipal Board to December 31st, 1907. Toronto, King's Printer, 1908. Pages, 342.

In the Second Annual Report of the Ontario Railway and Municipal Board, for 1907, attention is called to the confusion with regard to the jurisdiction of the Board, by reason of the fact that several electric railways incorporated by acts of the Ontario legislature have been declared by Dominion legislation to be for the general advantage of Canada. It is suggested that a conference should be held between the Dominion and Ontario governments, with a view of arriving at some understanding which will put all the

electric railways under the jurisdiction of the Ontario Board. Specifications are given in the report fixing the standard requirements of municipal telephone systems. Returns of accidents were furnished by all the railways under the jurisdiction of the Board. The tabulated statement based on these returns shows that 32 persons were killed and 320 injured by accidents on these railways during 1907.

### Technical Education.

Annual Report of the Inspector of Technical Education, 1907, being Appendix Q to Report of Minister of Education, 1907. Toronto, King's Printer, 1908. Pages, 251.

In the Report of the Inspector of Technical Education of Ontario an account is given of the work carried on in the manual training centres, household science centres and art schools in the province. Manual training is taught in 41 schools, where about 10,000 boys receive weekly instruction. Household science is taught in 26 public schools as well as in a number of private schools and colleges, more than 6,000 girls receiving weekly instruction in this subject. The only art schools in the province are those in Hamilton and Toronto.

During the year an attempt was made to obtain from prominent labour organizations and manufacturers their opinions on technical education. The replies of six employers are published, all strongly advocating the establishment of a system of technical education. No opinions on the subject were received from the trade unions, those who replied saying that the subject was under consideration. In order to set forth the views of employees as fully as possible, the opinions of a number of prominent trade unionists are given, which were furnished in 1906 to the National Society for the Promotion of Industrial Education of the United States. These opinions are with one exception in favour of technical education conducted by the State, but privately conducted trade schools are opposed, on the ground that as a rule the advocates are men who employ cheap or non-union labour.

## UNITED STATES REPORT.

### Industrial Condition of Maine.

Twenty-first Annual Report of the Bureau of Industrial and Labour Statistics for the State of Maine, 1907. Augusta, Maine. Pages, 520.

The first portion of the Report of the Massachusetts Bureau of Industrial and Labour Statistics for 1907, contains a reprint of an article by the Hon. Carroll D. Wright on "The Value and Influence of Labour Statistics." This is followed by a list of factories, mills and shops built in Massachusetts during 1907, and a statistical account of labour organizations in this State. Among other important subjects dealt with in the report are the following:—"Women and Children in Sardine Factories," "Women Wage Workers in Portland," "School Teachers," and "Opportunities for New Industries."

### OTHER REPORTS RECEIVED.

*Ontario.*—Feeble minded in Ontario. Second Report and Census by Dr. Helen MacMurchy, Toronto; King's Printer, 1908. Pages, 31.

Annual Report of the Inspector of Division Courts for the Province of Ontario for the year 1907. Toronto: Kings' Printer, 1908. Page, 63.

*Germany.*—Protokolle uber die Verhandlungen des Beirats fur Arbeiterstatistik. Verhandlungen Mr. 20.

## RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

### QUEBEC CASES.

#### Large Damages for Loss of Foot.

Plaintiff, a motorman in the employ of the defendants, brought action in the Superior Court at Hull to recover damages for personal injuries sustained by him in the course of his employment, owing to alleged negligence of defendants. Plaintiff was in charge of a car when, on the night of December 10th, 1906, it crashed into a sweeper near Deschenes, with the result that he lost a foot. He claimed \$15,000. For the defence it was claimed that plaintiff was running his car at too great a rate of speed while nearing Deschenes, that he should have been alert as to the presence of other cars ahead, and that, as he knew the sweepers were in operation, he should have been on the watch for them. On plaintiff's behalf it was contended that there were block-lights near the station for the purpose of guiding the railway officials in their duties. These lights were the basis of judgment as to whether to go ahead or wait. In this case the evidence went to show that these lights were not in operation. The presiding judge at the trial found that damages to the extent of \$12,000 had been sustained, but as the plaintiff admitted that his car was exceeding the speed limit, and therefore there was contributory negligence, he halved the amount and awarded \$6,000.

(Clement v. Hull Electric Railway Co.; 3rd April, 1908; Curran, J.)

#### Damages for Wrongful Dismissal.

Plaintiff brought action in the Superior Court at Montreal, claiming \$500 damages for wrongful dismissal. She was matron of the St. Andrew's Home and was discharged without notice. The contract under which she had been engaged demanded a notice of three months from either party desiring to end it. Defendants alleged that plaintiff had broken the contract in taking her husband into

the Home, and for other causes. A jury awarded plaintiff \$165 as damages on the basis of \$25 a month salary and an allowance of \$30 per month for the board of herself and child for the three months notice to which she was entitled.

(Moore v. St. Andrew's Society; 2nd April, 1908; Hutchinson, J.)

#### Jury finds no Injury.

Action to recover \$1,999 damages for personal injuries alleged to have been sustained by plaintiff in the course of his employment by defendants, owing to their negligence. Plaintiff, a labourer employed in the foundry of defendants, alleged that he had been ordered by the foreman to lift a heavy iron plate, and in trying to do so he had injured himself internally. After hearing the evidence, the jury deliberated for about five minutes, and returned a verdict unanimously answering "No" to the first question put to them, which asked whether plaintiff, while at his work in the employ of the company, on July 10th, 1907, had suffered injury as a result of a violent effort. The jury did not consider it necessary to answer any further questions. The Court agreed with them and dismissed the action.

(Komaniuk v. Dominion Car Foundry Co.; 26th March, 1908; Archibald, J.)

#### Damage Action Dismissed.

An action to recover \$976 damages for personal injuries sustained by plaintiff in the course of his employment with defendants has been dismissed in the Superior Court at Montreal, the Court finding that the accident, which occurred while plaintiff was attending to a boiler for defendants, was due to plaintiff's own fault and negligence, and that his employers could not be held responsible for it.

(Lanouette v. Librarie Beauchemin, Limited; 26th March, 1908; Charbonneau, J.)

#### Breach of Contract of Apprenticeship.

In the Recorder's Court at Montreal recently, a case of a master against his apprentice for quitting his employment

was heard. The defendant was apprenticed to the complainant by a written agreement, but claiming that he had been ill-treated by one of his master's foremen he left his work and refused to go back when his master sent for him. In rendering judgment, the Recorder said that the young man had not the right to break his contract for the reason given, and he was ordered to go back to work. If he complies with the order sentence will be suspended; but if not, the matter will be dealt with on its merits.

(Grothe v. Lemieux; 27th March, 1908; Dupuis, Recorder.)

### Grand Jury Ignores Bill for Manslaughter.

In connection with the case noted at page 1150 of the March number of the *Labour Gazette*, under the heading of "Inquest re Symonds, William" F. Bottomley, the G. T. R. conductor who was found responsible for the accident, was arrested on a warrant charging him with manslaughter, and, after a preliminary hearing in the Police Court, at which the same evidence as was given at the inquest was heard, was committed for trial at the spring sittings of the King's Bench Criminal Side. On the case coming on for consideration by the Grand Jury, they found "no bill," and the accused was discharged.

(Rex v. Bottomley; 3rd March, 1908; Lavergne, J.)

### Damages for Death of Husband.

An action was brought in the Superior Court at Sherbrooke by the widow of Samuel Lemay, a car repairer in the employ of defendants, who was killed in the company's yards last November by being crushed to death through the train crew failing to observe the signal from the car which he was repairing. The plaintiff claimed \$6,000 damages for herself and two minor children. The action was tried before a jury, which found that the members of the crew of the train which caused the death of Lemay were guilty of negligence, and that the accident could easily have been avoided if the two brakemen had been more prudent. They awarded the sum of \$4,000 as damages, of which \$3,000 was to the widow and \$1,000 to be distributed between the two children.

(Lemay v. C.P.R.; 3rd April, 1908; Demers, J.)

### Action for Damages Dismissed

An accident arising under peculiar circumstances gave rise to an action in the Superior Court at Montreal, which was recently disposed of. Plaintiff, on the 18th of July last, visited the Point St. Charles shops of the defendants for the purpose of obtaining employment. The foreman who hired the labourers was at that time stationed on top of a pile of coal alongside the tracks. Plaintiff climbed up, and while returning after being engaged, the vibration caused by a passing train caused the coal to slide, and the plaintiff was carried down with it in such a way that his foot was caught by the wheels of the train and so crushed that it had to be amputated. He claimed that the accident was due to the negligence of defendants, alleging that the path he was following when the collapse occurred was the regular path, and that the defendants should have taken the necessary precautions to protect pedestrians who used it. He sought to recover \$3,314 as damages for his injuries. The jury which tried the case, however, found that there had been no negligence on the part of defendants, and the action was dismissed.

(Pelegriano v. G.T.R.; 10th April, 1908; St. Pierre, J.)

### Death Due to Fall of Rock.

Plaintiff, the widow of Charles Newman, brought suit in the Superior Court at Sherbrooke to recover damages for herself and six minor children for the death of her husband, occasioned, as she alleged, by the negligence of defendants. Deceased was working in one of the mines belonging to defendants on the 28th February, 1907, and while so engaged, was struck by loose ground and rock which fell on him, causing such injuries as resulted in death. Plaintiff contended that deceased was not accustomed to do the work which he was set to do, and that his death was caused by the fault and negligence of the defendants. Deceased was 34 years of age, and the sole support of his wife and children. Defendants denied the allegations of plaintiff, and further alleged that deceased had been employed by them for a period of 11 years, and was well accustomed to do the work

he was ordered to do; that it was the duty of deceased to examine for loose material before starting work and report same to the foreman; that on this occasion deceased knew there was loose material at the place where he was killed; that he went to work voluntarily, knowing the risk involved, and that the accident was caused by his own negligence. By her action plaintiff claimed \$10,000 as damages. After a reservation of judgment after the trial, the presiding judge awarded the sum of \$1,500 damages.

(Newman v. Nichols Chemical Co.; 14th April, 1908; Hutchinson, J.)

#### Damages Limited to Amount Limited by Workmen's Compensation Act.

Action by the father and mother of John H. Parker, who in his lifetime was a brakeman in the employ of defendants, and who was killed on the 16th August, 1907, while at work in the performance of his duty in the yards of defendants at Montrose, near Niagara Falls, to recover damages for his death. The action was brought both at common law and under the Workmen's Compensation Act, and the jury found the defendants guilty of negligence which occasioned the death, and they assessed the damages at \$2,500, apportioning the amount \$1,500 to the mother and \$1,000 to the father. The action was tried at the Welland Assizes, and judgment was reserved as to the question whether recovery could be had at common law or solely under the Workmen's Compensation Act. In giving judgment, the presiding judge said: "I am of opinion that the right of recovery is limited to the right under the Act. There was not any satisfactory evidence of the amount of the estimated earnings of the deceased, or of any person in the same grade employed during those years in the like employment, within this province, so the damages must be limited to \$1,500. If the deceased really earned a larger sum, it should have been established. The bald statement by the father that the deceased made \$90 a month if he worked full time, or words to that effect, is not sufficient." Judgment was ordered to be entered for plaintiffs for

\$1,500 with costs, apportioned \$900 to the mother and \$600 to the father.

(Parker v. Michigan Central Railway Co.; 30th March, 1908; Britton, J.)

#### New Trial Ordered in Damage Action.

In the case noted at page 111 of the July, 1907, number of the *Labour Gazette*, an appeal was taken by defendants from the verdict and judgment at the trial, contending that the evidence did not show the cause of death, and that there was no irresistible inference from the facts proved that it was due to the negligence found by the jury. The manner of deceased's death was thus described in the statement of claim: "The deceased was on duty on a locomotive preparing to make his regular run, and was standing near the injector on the right side of the locomotive in the station yard at Edmonton, Alta., when without any warning, the union connecting the right-hand steam-pipe to the right hand injector-broke, filling the cab of the locomotive with live steam and causing the deceased to jump back. In doing so, the throttle, which was defective, was thrown open, and, as the locomotive was set for back motion, it started backwards at great speed. The deceased then tried to shut off the main valve of the injector, but was prevented from doing so by the escaping steam. There being no driver-brake on the locomotive, the deceased, in order to stop the locomotive, climbed to the rear end of the tender, and in attempting to open the angle-cock to set the air-brake, he fell and was killed." A new trial of the action was ordered.

(Woolsey v. Canadian Northern Railway; 21st April, 1908; Court of Appeal.)

#### BRITISH COLUMBIA CASE.

##### Damages for Injuries Owing to Defective Appliances.

Plaintiff, a carpenter, brought action to recover damages both at common law and under the Employers' Liability Act from defendant, a contractor, for personal injuries sustained in the course of employment while working on the erection of a building at Vancouver.

Plaintiff alleged that on the 18th September, 1907, he was working on a beam in the building, when a loaded derrick swung and the boom struck the braces of the beam with such force that the impact knocked him backwards and he fell to the ground, receiving such injuries as to permanently incapacitate him from following any remunerative employment, or his work as a carpenter. He claimed damages on the ground that the tackle holding the beam was insufficient and that defendant failed to provide signals between the engineer and the workmen, so that they would know of the movements of the derrick. He also alleged that the defendant failed to provide proper scaffolding around the place where he worked, and did not employ an experienced man to work the winch. The defence, after a general denial of these allegations, set up that the accident was due to contributory negligence on the part of the plaintiff in failing to notify his employer of any danger to himself in his surroundings, and further, that plaintiff never informed defendant of the nature of his injuries, or notified him that he was going to commence action against him. The jury awarded plaintiff \$3,500 damages under the common law.

(Baker v. Young; 16th March, 1908; Clement, J.)

## ENGLISH CASES.

### Expense of Seamen being sent to port of Shipment.

By Section 186 of the Merchant Shipping Act, 1894, where the service of any seaman belonging to any British ship terminates at any port out of Her Majesty's dominions (2) the master shall, besides paying the wages to which the seaman is entitled, either "(a) provide him with adequate employment on board some other British ship bound to the port in Her Majesty's dominions at which he was

originally shipped, or to a port in the United Kingdom agreed to by the seaman or (b) furnish the means of sending him back to some such port."

Seamen agreed to serve on a British ship on a voyage from Newport, Wales, to Malta, and to end at a final port of discharge in the United Kingdom or Continent of Europe between the Elbe and Brest inclusive; and it was agreed that when the seamen were discharged on the continent as above the master should furnish the means of sending them back to the nearest port in the United Kingdom served by regular steamers, and the seamen agreed to such nearest port as the port in the United Kingdom to which they might be so sent back. The voyage ended at Hamburg, and the crew were discharged, and the master paid the expense of sending them to Hull, which was the nearest port served by regular steamers. The seamen claimed that they were entitled to the expense of conveyance to Newport, the port of shipment. At the trial, the presiding Judge, Bray, J. held that "the port agreed to by the seaman" meant a particular defined home port, and not one of several ports which the master might select by terminating the voyage at a particular port on the Continent; that the agreement, therefore, contained a stipulation which was inconsistent with the provisions of S. 186, and the stipulation was void under S.156 of the Act; and that the seamen were entitled to the expense of being sent back to Newport. On an appeal by defendants, the Court of Appeal held that the agreement that the seamen should be sent back from the port of discharge to the nearest port in the United Kingdom served by regular steamers was not inconsistent with the provisions of S. 186 of the Act, and that the seamen in consequence were not entitled to the expense of conveyance to the port of shipment, and allowed the appeal.

(Attorney-General v. Fargrove Steam Navigation Co.; 12th March, 1908; Court of Appeal.)

# THE LABOUR GAZETTE

JUNE, 1908.

## INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF MAY, 1908.

### I.—GENERAL SUMMARY.

AT the present season in Canada the immediate future of industrial and trade conditions usually depends largely upon the crop prospects of the year. This was true to a special degree during the past month. The reaction which resulted from the money stringency last autumn has been checked, but as yet no pronounced forward movement has taken place. Manufacturers and large distributing agencies have refrained from producing or stocking beyond immediate needs, and as the same policy has been followed by retailers many plants have been working with reduced staffs or on short time. The fact, therefore, that in no previous year was the agricultural outlook more favourable on June 1, has exercised a far reaching and most beneficial influence on the general tone of industry. In Western Canada the crop acreage is over twenty per cent. greater than that of last year; the season began about three weeks earlier; and growth has since been very rapid. In Ontario and the Eastern provinces conditions are equally favourable, though the season is comparatively less advanced. An exceptionally heavy hay crop is already assured. The favourable conditions apply to all branches of the industry including stock raising, dairying, fruit, etc. A second important feature of the past few weeks has been the easing of money in the financial centres, which has enabled funds to be readily obtained for the large railway construction under-

takings and civic improvement works that have been projected for the present year. From the standpoint of the amount of employment available, however, the month of May was less favourable than the corresponding month of 1907. Experienced farm hands were in demand at high wages, but the market for railway construction hands was already filled, and unskilled labour was in excess of the demand at many points. In the lumbering industry, the sawmills had nearly all reopened in Ontario and the Eastern provinces, and though the drives were somewhat delayed the exceptionally high water in the streams promises a successful year. The production of lumber, however, will probably be below that of 1907. In British Columbia a slight improvement was reported, though the prevailing condition was one of quietness. In mining, the Nova Scotia collieries, the asbestos mines in Quebec, and the Cobalt camp in Ontario had a very busy month, and there was a marked revival of activity in the metalliferous mines of British Columbia. The mica and copper mines of Quebec, however, and the western collieries were dull. Fishing promised well in the Maritime provinces, but the salmon yield of British Columbia will be very small. Freight traffic, both by land and water, was light compared with the corresponding period of 1907, with the result that the earnings of railway companies showed a decline; passenger traffic was heavier. The

*The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.*

amount of building will be considerably less than in 1907. There were fewer industrial disputes on the occasion of the renewal of schedules in the building trades on May 1, than in many previous years.

### Regulation of Immigration.

Immigration from Great Britain and the continent of Europe to Canada has considerably declined during the first five months of 1908 compared with the corresponding period of 1907.

In order to ensure against the overstocking of the labour market in Canada this year, and that the classes of immigrants coming to Canada during the next few months shall only be of the kind that are now needed, the immigration department recently sent out the following circular to all steamship companies and booking agents interested in the sending of immigrants to the Dominion:

"Notice is hereby given that the only classes of immigrants wanted in Canada at the present time are experienced farm laborers, farmers financially able to take homesteads or purchase lands and female domestic servants. The demand for railway labour is filled this season. The regulation now in operation in Canada requiring every immigrant to be eighteen years of age or over, to have in his possession at least \$25 cash at the time of landing, besides the ticket to his destination, will be enforced strictly and impartially in the case of all immigrants outside of the classes above mentioned."

### Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during May:—

*Lumbering.*—Wages in the lumber mills of Eastern Canada were for the most part unchanged from last year, but were downward in tendency in a few localities. River drivers were receiving about the same rates, though slightly less on certain streams. In British Columbia,

unskilled labour employed in and about the mountain mills was receiving fifty cents per day less than last year. Loggers and sawmill hands also throughout British Columbia had their wages decreased. Several thousand men were affected by these conditions.

*Building.*—Bricklayers at Ottawa, Ont., (150) received an increase from 47 to 50 cents per hour in wages. Bricklayers at Berlin, Ont., were reduced from 40 to 35 cents per hour. Lathers at Peterborough, Ont., received a reduced scale.

*Metal, engineering and shipbuilding.*—Steel workers at Berlin, Ont., had their piece work wages reduced 10 per cent. Stove plate moulders (200) at Hamilton, Ont., were decreased in wages from \$2.90 to \$2.75 per day on May 15. At St. Thomas, Ont., 25 Michigan Central Railway car shop employees were reduced 5 cents per day.

*Printing.*—Eleven printers at Niagara Falls, Ont., obtained an eight-hour-day and a minimum scale of \$12 per week.

*Clothing.*—Shoe workers (55) at Berlin, Ont., were reduced 10 per cent. in wages.

*Textile.*—A reduction of 10 per cent. in the wages of cotton mill employees went into effect at Hamilton, Kingston, Montreal, Montmorency and other points in Ontario and Quebec. Several thousand operatives were affected\*.

*Civic employees.*—Civic firemen at Berlin, Ont., received an increase in wages‡. At Halifax, N.S., the salaries of the police force, consisting of 6 sergeants and 37 privates, were materially increased. Police officers at London, Ont., to the number of 46, also obtained higher wages.

*Railway employees.*—I. C. R. train despatchers, agents, and operators (634) had their wages increased by \$2 to \$15 per month, by the Department of Railways and Canals, Canada.

*General transport.*—Teamsters (75) at Halifax, N.S., were increased from 22½ to 28 cents per hour. Ship labourers (400) at St. John, N. B., accepted a re-

(\* ) A special statement dealing with the dispute which arose in connection with this reduction is published elsewhere in the present issue.

(†) See report of Berlin, Ont., correspondent.

duction from 40 to 35 cents per hour in the schedule covering the coming summer season.

*Unskilled labour.*—Builders' labourers at Halifax, N.S., had their wages increased from 16 and 17 to 18 cents per hour. As a general rule, unskilled labourers were receiving a lower rate than at the corresponding period of 1907, owing to the prevailing decrease in demand as compared with supply.

### Cost of Living.

Wheat was firm and oats showed a further advance. Owing to the small amount of wheat in sight, flour was upward in tendency, millers announcing an advance of ten cents per barrel on the higher grades. Potatoes were exceptionally high in price owing to the scarcity of the old crop and the prospects of a late arrival of the new crop. The price of beef advanced, but butter and eggs declined. There was a further decrease in the price of hay. Sugar declined in the closing week of the month. Coal was selling at fifty cents per ton lower than last month for cash orders at several points. Metals continued uncertain, with tin upward and lead and copper somewhat weak.

### Interruptions to Industries.

The number of trade disputes in existence during May was more than in the previous month, but there was an increase of approximately 122,025 working days lost by employees through this cause. Compared with May, 1908, there was a decrease of 26 in the number of disputes, but an increase of about 39,000 in the number of working days lost.

Among industrial establishments, etc., destroyed by fire or through other causes during May, as reported in the press of the Dominion, the following may be mentioned:—

*Nova Scotia.*—Sawmill at Clarksville, loss, \$2,000; tenement house and pipe shop at Sydney.

The Plant line S. S. A. W. Perry was wrecked on May 19 by running ashore in a thick fog in the Straits of Canso, N. S.

*New Brunswick.*—Station, freight and coal sheds and hotel at Bathurst, loss, \$25,000; woodworking estab-

lishment, stores and residences at Campbelltown, loss \$60,000; machine works at Moncton, loss \$25,000, 25 hands thrown out of employment; hotel at St. John, loss \$10,000.

*Quebec.*—Outbuildings with 62 head of cattle and 14 horses at Harrietteville; at Montreal, business block, loss \$5,000; brewery, freight car, lumber yard, loss, \$16,000; furniture store, loss, \$5,000; stationary store, barber shop and lodging house, loss, \$1,200; 15 tons of sulphur on S. S. Montrose; church at Morin Flats, loss, \$3,000; 4 stores at North Hatley, loss, \$7,000; office at St. Hyacinthe, bobbin factory at Sherbrooke; tenement house at Turcot village, loss, \$5,000.

Barns at Johnville, Coaticook and Shipton.

The ice-breaker Montcalm was sunk on May 7 in collision with the S. S. Milwaukee. Serious damage was caused to S. S. Troid on May 13 in a collision with S. S. Ottawa in the Gulf of St. Lawrence. During the early part of May, the high water did extensive damage along the shores of the Ottawa and St. Lawrence rivers and on Lake St. John.

*Ontario.*—Business block at Bridgeburg, loss, \$12,000; cheese factory at Brockville, loss, \$3,000; coal shed and barge at Brockville, loss, \$30,000; large boarding house at Haileybury, loss, \$2,500; barber shop at Hamilton; blacksmith shop at Everton; grist mill at Linwood, loss, \$8,000; cheese factory at Martintown, loss, \$3,000; printing office, 6 stores and dwellings at Merlin, loss \$40,000; stove works at Morrisburg, loss, \$25,000; gas house at Napance, loss, \$5,000; Canadian Pacific Railway storehouse and contents at North Bay; stable and 16 horses at Owen Sound, loss, \$2,500; brewery at Perth; laundry at Peterborough; slaughter house at Peterborough, loss, \$1,000; flour mill and cereal factory at Peterborough, loss, \$80,000; electric light plant at Port Hope, loss, \$50,000; hotel at Point Vivian, loss, \$15,000; granary at Rockland, loss, \$3,000; two power plants, pulp and paper mill at Sault Ste. Marie, loss, \$300,000; storehouse, blacksmith shop and lumber supplies at Stoney Creek, loss, \$3,000; livery and 2 horses at Simcoe; portable sawmill at Smith, loss, \$2,000; block and 2 residences at Toronto, loss, \$175,000; jewellery store at Toronto, loss, \$2,500; foundry at Toronto, loss, \$1,500; furniture store at Toronto, loss, \$5,000; hotel at Tilsonburg, loss, \$20,000; buildings and railway property were destroyed by the bursting of a dam on Current River at Port Arthur, Ont.

Barns at Galt and Shakespeare.

Extensive forest fires around the new mining camp Silver Centre, South Lorraine, caused loss of prospectors' camps and supplies.

*Manitoba.*—Business block Portage la Prairie, loss, \$75,000; stables and granary at Rapid City; business block at Russell, loss, \$100,000.

*Saskatchewan.*—Sawmill at Manor, loss, \$1,600; stable and contents at Maple Creek; elevator at Stockholm.

Barns at Saskatoon.

Prairie fires in Manitoba and Saskatchewan, during the first two weeks of the month, caused damage, and bush fires near Prince Albert, Sask., and west of Edmonton, Alta., in the same period, caused heavy damages to settlers' buildings and stock.

*Alberta.*—Lodging house at Strathcona.

*British Columbia.*—Drugstore and hotel at Fernie, loss, \$25,000; oil bleaching factory on Kyuquot Sound; railway bridge near Michel; steam laundry at Revelstoke; brewery at Sandon, loss, \$15,000; sash and door factory at Vancouver, loss, \$30,000.

### Conditions in the Industries and Trades.

Conditions of employment during May in the several industries and trades throughout Canada, as indicated by the reports of correspondents to the *Labour*

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue, several trades and industries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question, the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

*Gazette* and by information received at the Department from other sources, may be briefly summarized as follows:—

### Agriculture.

The outstanding feature of the month was the exceptionally favourable reports received with regard to the agricultural outlook throughout Canada. This was especially the case with respect to the Northwest provinces and to Ontario. In the former seeding was completed early in the month, and though there was an interval of cold weather, some warm rains followed and growth was exceptionally rapid. In nearly every section of the country it was reported that the seed got in well and sprouted well. On June 1st the season was at least from two to three weeks in advance of that of 1907, and wheat was already from three to seven inches in height. A feature of the month's reports was the uniform character of conditions shown throughout the country west of the great lakes. With continued favourable weather the largest harvest in the history of the West is confidently expected. In Ontario seeding was delayed by rains in the opening weeks of the month and the season was backward. Roots will be late. In the closing days of the month growth was very rapid. Hay will be a very heavy yield. Clover was a foot high in many sections at the close of the month. In Quebec and the Maritime provinces similar conditions prevailed, the season being somewhat late, but conditions otherwise being most favourable and crops without exception promising well. The dairying industry throughout Canada reported a heavy production owing to the excellent condition of the pastures, though the number of cattle brought through the winter was comparatively small owing to the feed shortage. The make of cheese and butter showed a marked increase, with prices favourable. The fall delivery of bacon hogs is expected to be light. Fruit promises good yields in Nova Scotia, Quebec, Ontario and British Columbia. In the last province the general agricultural outlook is very

favourable. Prices of farm produce were well maintained throughout the month. The movement of live stock showed an increase in Western Canada and the demand improved for well-fed beasts, both for local consumption and export. The past winter season has been favourable for cattle breeders in Alberta.

A meeting of the Premiers of Manitoba, Saskatchewan and Alberta was held at Winnipeg, Man., to discuss the question of government ownership of elevators in Western Canada.

For seed grain distribution in the Northwest provinces there were purchased through the Warehouse Commissioner at Winnipeg, Man., 1,022,853 bushels of oats, 48,924 bushels of barley and 576,536 bushels of wheat.

Arrangements have been entered into by the Department of Agriculture, Canada, whereby crop and live stock statistics will be gathered by the Census and Statistics Branch covering the whole of the Dominion.

In the report of the Deputy Provincial Treasurer of Saskatchewan with reference to the administration of the Hail Insurance Act an increase of \$2,000 in expenditure is shown during 1906 as compared with 1905.

### Fishing.

The month was active in the Maritime provinces. Good catches of gaspereaux and herring were made, and mackerel struck in in large quantities on the Nova Scotia coast. Some vessels of the bank fleets returned with heavy fares. The most important feature of the month was the opening of the lobster season under favourable conditions, the coastal waters being exceptionally free from drift ice. The outlook for this branch is reported very promising, prices being well maintained, though some shipments to the United States met an overstocked market.

Estimates received from the Magdalen Islands place the number of seals taken during the past winter season at 30,000 of which 10,000 were exported to Newfoundland.

In British Columbia, the outlook is for a quiet year. The catch of spring

salmon was small, and a small run of sockeyes is expected. On the Fraser river it was stated that only seven canneries of a total of forty-one will be worked this year. Prices for canned salmon are expected to be higher than in some years past.

Officials were appointed to supervise the enforcement of the Fisheries Act passed at the recent session of the British Columbia legislature. The new officers will be assisted by the provincial constables. A deputation representing the canners of British Columbia waited on the Commissioner of Fisheries for the purpose of soliciting certain alterations in the administration of the act.

The text of the treaty recently passed by the Imperial and United States governments respecting the international fisheries between Canada and the United States was presented to Parliament by the Right Honourable the Prime Minister on May 19. This treaty provides for uniform and effective means for the protection, preservation and propagation of food fishes in the waters contiguous to the international boundary. It is provided that uniform regulations shall be made by an international fisheries commission of two persons, one being appointed by each of the two governments. They are instructed to draft uniform laws as to close seasons, methods of fishing, size of nets, etc. The commissioners are to be appointed within three months from the date of ratification of the treaty.

### Lumbering.

In Ontario and the Eastern provinces the mills had nearly all commenced operations at the close of the month. Wages were for the most part unchanged from 1907, though there was a downward tendency in some localities. The exceptionally high water in the streams and the late disappearance of the ice in some of the northern lakes delayed the drives, but conditions promised later to be very favourable, and it is expected that the entire cut will be brought safely to the booms. The marketing of lumber was on a less extensive scale than in the

corresponding period of 1907, with prices both of logs and finished product easier.

After an unprecedentedly heavy cut of ties in Northern Ontario the men have returned to the western cities and have found employment for the most part in the mills or elsewhere. Sawmills in the Northwest provinces were busy.

There has been some improvement in the industry in British Columbia; about one half of the mills in the mountain section were running, though the logging camps were nearly all idle. The immediate future depends largely on crop results in the Northwest provinces. Production will be considerably under that of last year. On the coast some mills were active, but the prevailing condition was one of quietness.

### Mining.

The Nova Scotia collieries reported a continued heavy output, but shipping was less active than had been anticipated owing to the presence of ice in the St. Lawrence. In Quebec, the asbestos mines were working to their utmost capacity, but copper and mica mining was quiet. In Eastern Ontario, conditions were very active, and at Cobalt, Ont., there was an increase of employment. Total shipments from Cobalt camp up to the opening week of May amounted to 5,782 tons. Trade continued dull in the coal mines of Alberta and British Columbia owing in part to the decrease in railway traffic and the lessened consumption of the past winter. A considerable number of coal miners were in idleness. In metalliferous mining a steady improvement was noted in British Columbia, the most important feature of the month being the resumption of work by the British Columbia Copper Company in the Boundary district, which gave employment to about 500 men at the mines and 200 at the smelters, consisting of miners, machine men, muckers, carpenters, smeltermen and labourers. The wages paid ranged from \$2.50 to \$4.00 per day. The outlook at the Rossland mines was that production would exceed that of 1907 but would be less than in

1906. The outlook is regarded as favourable for hydraulic dredging in the Yukon and the season's gold output promises to be large. A commission was appointed by the government of Nova Scotia to inquire into the feasibility of enacting an eight-hour-day law for the colliery workers of the province.

Government bounties during April were paid on 43,118 barrels of petroleum produced in southwestern Ontario.

The annual report of the International Coal and Coke Company, Limited, at Coleman, B. C., showed net profits of \$251,049. The coal produced was 372,480 tons, of which 61,998 were sent to the ovens and produced 39,151 tons of coke. The total amount of the payroll was \$437,723 and the average number of men employed 4,465. The days worked numbered 236. During the year \$45,943 were expended on additions to plant.

Discoveries of placer gold on the Findlay river, B. C., were reported.

The western branch of the Canadian Mining Institute held a meeting at Rossland, B. C., in May, for the reading of papers etc.

### Manufacturing.

Conditions showed little change compared with April. Manufacturers were for the most part limiting their output to orders in hand which were of less volume than at the corresponding period of 1907. At Amherst, N. S., Montreal, Que., Toronto, London, Ont., and other manufacturing centres there were a number of employees out of work, or on short time, though in some localities conditions were more active than in April. There was a falling off in steel production. At Sault Ste. Marie, Ont., following a recent shut-down of the rail mill, the blast furnaces were blown out leaving the steel industry in idleness and affecting some 1,500 men. At Sydney, N. S., also, conditions were less active. Cotton mills reported less active conditions and reduced wages.

An attempt to negotiate a settlement between the Dominion Iron and Steel Company and the Dominion Coal Company resulted in failure.

The mills of the Canada Tin Plate and Sheet Steel Company at Morrisburg, Ont., resumed operations in May.

The Canadian Coloured Cotton Mills Company held its sixteenth annual meeting during May. It was stated that new plant had been installed to the value of \$121,000, and repairs made to the amount of \$106,000. Total sales amounted to \$2,967,338 a decrease of \$204,567 over last year. The company now operates 2,600 looms and employs 2,100 hands.

### Railway Construction.

Though the extent of railway construction operations increased during May, especially in New Brunswick, the market for labour was fully supplied and there was a surplus of men at Winnipeg, Man., and other points. Ballast work on the National Transcontinental line west of the great lakes will furnish additional employment in July. Some heavy orders for supplies for the section from Prince Rupert eastward were placed. There were a number of labourers without work at Prince Rupert, construction not yet having been begun. With the completion of the Michel extension of the great Northern Railway a number of men were laid off.

There are now about 340 miles of telegraph lines strung west from Winnipeg along the Grand Trunk Pacific Railway and work is progressing at the rate of five miles per day.

A number of towns are springing up along the line of the Grand Trunk Pacific Railway from Winnipeg westward, including five divisional points. Eighty town sites are on the market, and 2,000 applications for lots are reported to have been received.

### General Transport.

There was a decline in freight traffic, as shown by railway and canal returns, during May, compared with the corresponding period of 1907. Passenger returns, however, were heavier, notwithstanding the decline in immigrant traffic. An unusually busy tourist season is anticipated. Railway earnings declined

heavily and some considerable reductions in staffs in railway shops were made, though mechanics on passenger cars and engines were well employed.

At the annual meeting of the Quebec Central Railway Company gross earnings for the year 1907 were reported to amount to \$1,012,741 compared with \$904,866 in the previous year. Working expenses in 1907 were \$698,420 and in the previous year \$582,916. The increase in working expenses was due to the advance in wages and in the cost of material. The first quarter of 1908 showed an increase over the corresponding quarter of 1907.

The annual report of the Central Railway of New Brunswick for 1907 showed an increase of earnings and expenditures.

Street railway earnings continued to show advances at several points over the corresponding period of 1907.

Following the opening of navigation, conditions were very busy at several ports. The first ocean-going vessel of the season reached Montreal on April 30th. Shipments of grain from the head of the lakes were unprecedentedly heavy during the opening weeks of May, but receipts from western elevators were light towards the close of the month. Navigation on the upper Yukon began about the middle of the month. The winter season at St. John, N. B., was heavier than that of 1906-07.\*

### The Trades.

*Building.*—Conditions varied considerably according to locality, but were generally dull compared with the corresponding period of 1907. In nearly all of the larger centres of Ontario and the Eastern provinces the outlook is for a less active season. In the Western provinces and in British Columbia operations have been fairly active and the value of building permits issued during April compared favourably in the latter province with 1907.

*Metal and woodworking.*—Employment on the whole was fair to quiet. Iron workers, moulders, etc., were quiet, except in a few localities. Sash and door

factories and other establishments for the manufacture of building material anticipate a less active season than that of 1907. Woodworkers had fair employment, and coopers were active.

*Printing.*—Conditions in the allied trades were active.

*Clothing.*—Journeymen tailors were well employed, but garment workers and boot and shoe workers were generally quiet, though an improvement among the last named was reported in some localities.

*Textile.*—Employees in cotton and woollen mills had a dull month.

*Leather.*—Tanners and curriers were quiet; other leather workers were somewhat better employed.

*Food and tobacco preparation.*—Butchers and ice-men were active. The volume of trade among bakers has increased. Confectionery establishments were active. Chocolate preparations were still high and the raise in sugar has caused some loss in profits. Flour mills have been somewhat quiet with export trade light, though small millers reported a fair local trade. Cigar and tobacco factories continued quiet, many being engaged in stock-taking.

*Miscellaneous.*—Miscellaneous skilled employees, including barbers, retail clerks, waiters, domestic servants, etc., had a good month.

*Unskilled labour.*—Though civic improvement work gave employment to large numbers of men, and though the increasing scale of railway construction absorbed many, the demand for labour was considerably less active than at the corresponding period of 1907, and at many points there was a surplus of the less skilled class.

### Canadian Trade and Revenue.

*Foreign trade.*—During April, 1908, the total value of imports entered for consumption was \$20,201,409, compared with \$28,335,287 in April, 1907. The total value of domestic exports during April, 1908, amounted to \$10,294,828 compared with \$9,751,849 in April, 1907. In April, 1908, there were increases in exports of animals and their produce,

\* See report of St. John, N.B., correspondent.]

agriculture and manufactures, and decreases in exports of the mine, the fisheries, and the forest. The Canadian Trade Commissioner to Mexico reported a growing Canadian trade with that country. A good opening for Canadian goods in Switzerland was reported. Good openings in Japan for special lines of mechanics' tools and of other goods manufactured in Canada was reported; the necessity of better representation in that country of Canadian manufactures was urged. Good openings for Canadian timber were also reported in Japan.

*Imperial trade.*—Openings were reported in the British market for Canadian piano keyboards, garnets for abrasive purposes, wood turnery and joinery, and an improved market was reported for Canadian bacon and cheese. There was a demand in Australasia for Canadian sawmill machinery and motor cars. An opportunity for Canadian supply firms was reported in the construction of a railway from the seaboard of British Guiana to the frontier of Brazil.

*Domestic trade.*—Notwithstanding the advance of the season, general wholesale trade showed no marked increase in volume, and jobbers complained of May as a dull month. Retailers as a rule, were buying with a view to immediate requirements preferring to withhold large orders until definite information with regard to the crops is obtained. The fact that farmers were very busy seeding affected country trade. With the excellent crop prospects, however, an improvement is expected at an early date, a revival being already noted, especially in Western Canada, in the closing days of the month. The financial situation showed little change, though money was reported somewhat easier by the loan companies, deposits having increased slightly. Collections were fair.

The April bank statement showed a shrinkage in circulation compared with March and was somewhat smaller than April, 1907, though larger than April, 1906. Deposits showed an increase, but discounts declined.

At the thirty-third annual meeting of the Imperial Bank of Canada held on May 27, a special fund of \$100,000 was set

aside for writing down the bank's investments. Profit and loss account was increased by \$49,598. Twelve new branches were opened during the year.

The forty-eighth annual report of la Banque Nationale showed a reduction in current loans but an increase in deposits. An addition of \$150,000 was made to the reserve fund. A pension fund for employees will be established.

The financial statement of the Montreal City and District Savings Bank showed profits of \$165,667, from which \$65,667 was carried forward to the next year.

La Banque St. Jean of St. Johns, Que., with a paid-up capital of \$316,386, went into voluntary liquidation. The Monarch Bank of Toronto, Ont., has also been wound up, through inability to obtain the necessary capital.

#### Notes.

The *Ontario Wholesale Grocers' Guild* held a session at Hamilton, Ont.

An *employment office* of the Ontario Bureau of Labour was opened at Berlin, Ont.

The second annual convention of the *Union of New Brunswick Municipalities* was held at Fredericton, N. B.

The eighth annual convention of the *Union of Canadian Municipalities* will be held at the City Hall, Montreal, Que., July, 15-17, 1908.

The sixth annual convention of the *Ontario Labour Educational Association* was held at Kingston, Ont.

The annual reports of the *assessment commissioners* of several Canadian Municipalities presented during May showed an increase in valuations and population compared with the preceding year.

The policy of the government of Saskatchewan with reference to the public ownership and operation of *telephones* was outlined in the legislature of that province.

The Hamilton Board of Education adopted a report of a special committee approving the issuing of debentures amounting to \$75,000 for the erection of a *technical school*. It is designed that a certain number of trades shall be taught to pupils of fourteen years and over during

the day, and that night classes shall be held for the instruction of all who desire to take advantage of them.

The first contract to be awarded between the Hydro-electric Commission of Ontario and a municipality, namely, the city of Toronto, for the supply of *Niagara power*, was signed during May(\*). Contracts with other municipalities were signed later.

Delegates of the Provincial Workmen's Association of Nova Scotia held a three days' session at Halifax, opening on May 22, to discuss the advisability of becoming amalgamated with the United Mine Workers of America and other

\*See report of Toronto correspondent.

#### REPORTS OF LOCAL CORRESPONDENTS.

**D**URING the month of May, 1908, Mr. J. R. Falconer was appointed correspondent to the *Labour Gazette* for Newcastle, N. B., and district.

#### SYDNEY, N. S., AND DISTRICT.

*Mr. John Moffatt, correspondent, reported as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were active during May. All the larger industries were favourably affected by the opening of navigation, while other factories and foundries, with the building trades, were stimulated into new energy by the fine weather. Labour was more abundant than for many years, yet the demand and supply were very equally balanced. The coal industry, owing to deranged conditions of shipping, was not up to the usual during the first week of May, but since then has been very active. Every colliery in Cape Breton Island is producing to its utmost capacity, and there is every reason to believe that the increased outputs of the first four months will be added to before the year ends. The two largest coal companies, the Dominion and the

subjects. Some eight lodges had already decided to become affiliated with the American order. A referendum vote on the question will be taken.

A joint committee representing the several organizations of mechanics employed by the Canadian Pacific Railway Company, held a meeting at Montreal, Que., during May, at which a new organization, to be known as the *Federation of Railway Employees*, was formed. The Federation will embrace machinists and mechanics of all classes. At a meeting of the joint protective board of the Brotherhood of Railway Carmen employed on the Canadian Pacific Railway system, held at Winnipeg, Man., it was decided to join the new federation.

Nova Scotia Steel and Coal Company, are rapidly opening up new areas and getting ready for still larger outputs. The Inverness Coal Company is driving a tunnel to connect with another seam, while Mabou aims at a very large output compared with the past. The one uncertain feature at present is how far these developments can be pushed without placing an over supply of coal on the market. At present the demand for coal is brisk.

The steel trade was active, though the prospects were not as good as in May 1907, there being more accumulated material unsold. The Dominion Iron and Steel Works had a good month. Shipments of ore began early in May, and will continue throughout the shipping season. Both the Dominion Iron and Steel and the Nova Scotia Steel and Coal Company are prospecting ore areas at Belle Isle, and after driving drifts 2,000 feet, have discovered that they possess deposits of iron ore in quantities exceeding expectations.

The Sydney Cement works had another busy month. Woodworkers were in full progress, while the building trades had entered on a fairly active season. Transportation by water and by rail was heavy. Wholesale and retail trade was brisk. The labour market was well supplied with both skilled and unskilled labour.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The weather, while not warm, was dry and very favourable to the preparation of the soil. The season is fully two weeks ahead of 1907.

*Fishing.*—Fishing began about the middle of the month. Fair catches of herring and lobster were obtained. In some parts mackerel were found to be very plentiful.

## CONDITION OF PARTICULAR TRADES.

All the skilled trades were active.

## WESTVILLE, N.S., AND DISTRICT.

*Mr. Tom Hale, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The coal industries in this town and district are making splendid progress. All the collieries show good increases for the month in this district, except the Intercolonial which is some 3,000 tons behind the corresponding month of 1907. The total increase for the mainland collieries for the 4 months ending April, 1908, is about 50,000 tons. Other industries were fairly well employed. Building was very promising for the season, work commencing on several new buildings as soon as the weather permitted. The Trenton Steel Works were fairly well employed in many of the departments, but work in the forge was a little dull. Wholesale and retail trade was very fair. There were no changes in rates of wages or hours of labour.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy seeding.

*Fishing.*—Good catches were reported.

*Lumbering.*—Conditions were active, especially in the pit timber trade.

*Manufacturing.*—The firm of W. P. McNeil & Co. has secured a large order for bridges from the Dominion Atlantic Railway Co.

*Mining.*—The Acadia Company's coal steamer, *Unique*, carrying coal for the St. Lawrence trade is making good time between ports, and has been loaded with despatch. The Intercolonial Company's coal steamer, *Havso*, is also making good time. The company is ready for the sinking of another 600-foot lift at the Drummond Colliery; when completed this will make the total length of slope about 7,900 feet from bottom to bank.

*Other industries.*—The Telephone Co. is busy putting in branches to the country districts.

## CONDITION OF PARTICULAR TRADES.

The various skilled trades were well employed, with labour in fair demand.

## HALIFAX, N. S., AND DISTRICT.

*Mr. A. J. Smith, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market for May was hardly up to that of the corresponding month of 1907. This was true of some lines to a greater extent than of others. The building trades were not brisk owing to the lateness of certain large contracts. The usual progress was made on contracts under way. The principal edifice begun is the new Technical College being erected by the Provincial Government at a cost of \$110,000. Work at the Silliker Car Works is increasing, and 150 men are now employed; this number will be increased to upwards of 300 within a short time. Labourers along the water front, while not as well employed as in May, 1907, expect a brisk month in June, when large importations of sugar are expected. The fortnightly pay of the city works department on May 29 was \$8,129.02, the largest since July, 1907. Unskilled labour had a fair month.

The technical school classes, which opened last fall, closed for the summer season on May 1st. Examinations were held in all classes before closing, and cer-

tificates will be awarded accordingly. Those gaining certificates will be eligible for the more advanced classes when school is resumed in October.

The labourers on the city works have had their pay increased from 16 cents to 17 cents and 18 cents per hour, according to ability. There are about 400 men affected by the change. The teamsters also have had their pay increased from 22½ cents per hour to 28 cents, and about 75 are employed. Both labourers and teamsters work nine hours per day.

The bricklayers' and masons' difficulty is still unsettled. Most of the firms are willing to concede the terms asked; but business in this line is quiet, and consequently no definite developments have taken place. The fact that the new roundhouse is to be finished in brick, and that the contractor is willing to grant the 8-hour day asked for by the men, will cause an increase in this line for the coming month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Indications point to a better crop than for some years.

*Fishing* has shown much activity during the last week. Mackerel have struck in in great numbers, hundreds of barrels being taken. Local fishermen and American seiners have made some big captures. The fish is retailing at 15 cents each, but this price will be lower judging from the big catches. It is said that whales are forcing the fish inshore. Fishing at Clarke's Harbour, Lockeport and Yarmouth was also reported active.

*Lumbering* has been fair for the season, and *mining* normal.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons have had a dull month; there were about 20 per cent. employed as against 25 last month. Plasterers were dull, but carpenters and plumbers had a fair month. Painters, decorators and paper-hangers were well employed. Stone-cutters reported a decided improvement over last month.

*Metal.*—Boilermakers had a dull month.

*Printing.*—Printers, pressmen and book binders had a fair month.

*Clothing.*—Tailors were busy and garment makers had a fair month. Boot and shoe workers were fairly well employed.

*Unskilled labour.*—Had a fair month.

#### DISTRICT NOTES.

*Bridgewater.*—Lumber milling is very active hereabouts. The Davison Lumber Company already have 27 miles of railway running from the woods to their mills, and are building five miles more in the direction of Windsor. The company have gangs working day and night in the mills, and a large force cutting logs in the woods. Besides this activity the Halifax and South-Western Railway hauls two log trains daily from Springfield to the mills at Bridgewater.

*Lunenburg.*—Fishing returns were heavy up to May 27. Four large catches had arrived from the middle fishing banks. The Hiawatha, 1,100 qtls.; Murial M., 1,400 qtls.; Lilia B. Histle, 1,600 qtls., and the Coronation, with 1,200 qtls., had returned. Several other vessels are daily expected. Smith D. Rhuland launched a fishing schooner May 27, registering 90 tons. She will sail for the banks early in June.

#### AMHERST, N. S., AND DISTRICT.

*Mr. A. D. Ross, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The month of May has been exceptionally dull for all classes of labour. This month last year was one of the busiest in the history of this town and district. During the past month, however, a number of industries, such as the Robb Engineering Company, the Rhodes-Curry Company, the Car Works, etc., have materially reduced their staffs. Building operations also were not nearly equal to those of last year, and as a result there is a large force of men temporarily out of employment. The Robb Engineering

Company, which usually has a staff of about 400 men, is operating with about 200, and these only have employment for four days a week. The company, however, has not reduced the scale of wages. In the Rhodes-Curry Co., a reduction of 10 per cent. was made some months ago, effecting about 1,200 men. It is only fair to state that manufacturers all view the depression as temporary. There is no manufactured stock on hand, so that an improvement in trade conditions will be at once followed by a demand for more labour.

The Springhill Colliery which employs a force of 1,600 hands has only been operating an on average about five days a week. In the other collieries work is brisk and miners are in demand.

There was also a limited demand for carpenters, which was easily supplied from the local market. The Maritime Railway, Coal and Power Co., the Eastern Coal Company and one or two other companies are actively pushing development work and constantly increasing their forces of men.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busily engaged on spring work. The season so far is very favourable. The price of farm products is high.

*Fishing.*—The season so far has been good. The lobster catch surpasses that of last season, and prices are high. Large catches of herring, gaspereaux, and shad are also expected. The fishermen all report the season the best in years.

*Lumbering.*—The lumber cut was only about thirty-three per cent. that of last year, hence shipments are small.

*Manufacturing.*—On the whole manufacturing is quiet. A number of industries are running full time; others are working four and five days a week.

*Mining.*—Conditions were reported brisk at all the collieries except Springhill. Much development work in the way of sinking new slopes and striking new levels is being done, and the demand for miners and helpers will be constantly increasing.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons reported work very dull. Carpenters

and joiners were slack. Painters and decorators reported that a few men could find employment at fair wages, but would only be needed temporarily. There has been a fair demand for stonecutters in quarries, but for building operations there is no demand.

*Metal.*—Work was reported dull in all departments, though iron moulders were busy in a few shops.

*Woodworking.*—Carriage and wagon makers were fairly brisk. On box cars work was fairly busy, but on passenger cars work was dull.

*Printing.*—Printers have had a fairly busy month.

*Clothing.*—Tailors reported a busy month. Boot and shoe makers were steadily employed, but there was no demand for more than regular staffs.

*Leather.*—Trunk and bag-makers reported a good month.

*Unskilled labour.*—The decline in building operations and the decrease in lumber shipments has cut down the demand for this class. Many men were working at temporary jobs.

#### CHARLOTTETOWN, P. E. I., AND DISTRICT.

*Mr. F. J. Nash, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during May was satisfactory, with supply and demand well balanced. There have been few new sources of employment since last year, but in all lines there was work for all. In Charlottetown, the building of the Bank of Montreal was started about the middle of the month. Considerable work was also done on the new railway works and on the railway wharf. At Souris, work on the new railway wharf was started the latter part of the month. The weather during the first part of the month was unfavourable for agriculture, but during the last week ideal weather for putting in the crops prevailed, and the first of June saw seeding

almost completed. Wholesale and retail merchants reported trade good and business on the whole buoyant.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—During the latter part of the month, conditions were favourable for the principal industry in this province, and although the ground did not dry up so quickly as last year, the warm weather will have a most beneficial effect in starting the crops. Owing to the large number of men going to the lobster factories, farm help was rather scarce, but there was no serious shortage. The exodus of young men from the province to the west was not so great as last year. A fair quantity of produce was shipped at good prices, but the farmers were too busy preparing their land for seed to haul to market.

*Fishing.*—The month saw fishing in full operation all round the Island. The first part of the month, lobster bait was scarce, but during the second week a sufficient supply was procured and large catches have been made in all localities. Judging from present returns, the total catch will exceed that of last year. The price will be from \$2.00 to \$3.00 per case more. Herring and cod were also plentiful, and large quantities of quahaugs were marketed.

*Railway construction and employment.*—Work at the new car shops and on the railway wharves at Charlottetown and Souris, and the adoption of summer time-tables were the chief features of the month. An increase ranging from eight to ten per cent. to railroad telegraphers was granted.

#### CONDITION OF PARTICULAR TRADES.

*Building* was active, with carpenters and joiners, lathers and plasterers, painters and paperhangers busy. The metal, woodworking, clothing, food and tobacco and leather trades were active. Printers and freight-handlers were busy. Other transport employees and miscellaneous skilled workers were active. There was a good demand for unskilled help.

#### MONCTON, N. B., AND DISTRICT.

*Mr. J. C. Graves, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The quiet conditions prevailing in April continued up to about the middle of May. The weather then turning fine called forth activity in all outdoor operations. Building operations are now very active, many dwellings being in the course of erection, and the demand for carpenters, stonemasons and builders' labourers has assumed large proportions. The contractors for the new I. C. R. shops have increased their force, and now have over 600 men upon their pay roll; 200 ordinary carpenters at 17½c. per hour were recently taken on. The corporation is also making extensive additions to its sewer and water systems to meet the requirements occasioned by the growth of the west end, and require a large number of labourers. Work in the foundry and cotton factory remained steady, while the biscuit factory, the barrel factory, the Wire Fence Co., and both woodworking factories have had a very active month. The warrants for the city assessment for 1908 amount to the sum of \$93,160. The rate of taxation is \$2.02 as against \$2.40 last year, and the poll tax rate \$5.26. Legislation is being sought by the city and also by private companies for a charter to build a street railway. The naming of the streets was recently completed and the numbering of the houses is now being proceeded with. The Shepody Navigation Co.'s steamer *Wilfrid C.* is again on the Petitediac route, having made her first trip May 6th. Trade, both retail and wholesale, showed an improvement over April. The local lumber market still quotes high prices, but the export market is easy. No material changes in hours of labour or rates of wages have been noticed, and relations between employers and employees remain cordial.

*Agriculture.*—Farmers are actively engaged in seeding operations, the season commencing about the 20th inst. Farmers' help is scarce, and there are openings for

a large number of emigrants understanding farm work. Milk factories are in operation, but are mostly confined to butter-making. Butter is quoted at 25c. to 28c.; potatoes, 60c. per bush; oats, 65c.; hay (loose) \$9 to \$11 per ton. Beef is scarce.

*Fishing.*—Fishing operations have been very active, and at Richibucto, Shediac, Port Elgin, etc., very large catches of herring have been made. Smoke-curing factories are kept actively at work.

*Lumbering.*—Manufacturing the winter's cut and transporting to various shipping points for export is in progress. Schooners are loading at Richibucto, Dorchester, Hillsboro and other points. Lumber prices are low, and much less will go forward this year than last.

*Manufacturing.*—All local factories were in steady operation.

*Mining.*—Prospecting for gold quartz in Restigouche, and for iron and manganese in Gloucester is being carried on.

*Railroad construction.*—Construction operations have been resumed upon the International Railway. Work upon the G. T. P. Moncton-Chipman section, is progressing favorably.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers were quiet, masons active, carpenters and builders' labourers very active and in demand, painters, decorators and paper-hangers rushed, and stone-cutters busy.

*Metal.*—Work in the various lines was up to the average, and in some cases particularly active.

*Woodworking and furnishing.*—Woodworking factories were very active owing to the amount of building going on. Carriage workers were dull. Coopers were active. Varnishers, polishers and car builders were busy.

*Printing.*—Printers and pressmen were actively employed and in demand; bookbinders were quiet.

*Clothing.*—Activity prevailed, complaint being made as to difficulty in securing skilled help.

*Food and tobacco preparation.*—Normal conditions were reported.

The leather trades were quiet.

*Miscellaneous.*—Barbers, delivery employees and hotel, theatre and laundry workers were active. Clerks had steady work.

*Transport.*—Trackmen were active, but other railway employees were quieter than last month. Carters and teamsters were busy.

*Unskilled labour.*—The demand for this class increased very much since the advent of settled weather, but the supply was adequate, and it is not anticipated that employers will be handicapped this season as they were last by shortage of men.

#### DISTRICT NOTES.

*Sackville.*—The Enterprise Foundry Co. is erecting a large power house, and proposes installing a plant capable of doubling the output. A new wood-working factory is being erected. The Paper Box Factory is being actively operated. Private building is brisk.

#### ST. JOHN, N. B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during May did not improve as much as was anticipated, although the building trades were well employed. Business along the water front was dull and ship labourers were quiet. Excavations for the foundation of the new Seamen's Institute have been started, and the building is to be completed by August 15. Several changes are being made in the I. C. R. freight department. Nos. 1 and 2 sheds will be used exclusively for the handling of outward freight. James Fleming's Sons are filling a large number of orders for gasoline boats.

During the winter months, 111 steamers carried away goods valued at \$23,028,696; \$15,466,328 being for Canadian goods and \$7,562,368 being for foreign goods. The total shipments last year were valued at \$19,353,239, showing an increase in

this year's shipments of \$3,675,457. The shipments of wheat amounted to 6,052,089 bushels, valued at \$6,341,189. The flour shipments consisted of 614,143 sacks of American product and 245,749 sacks of Canadian product. The barley shipments were 492,348 bushels; peas, 20,024 bushels; oatmeal, 89,990 bushels, and 38,249 cases; and other grains, 44,165 bushels and 4,515 cases. There was a falling off in deal shipments, the amount sent forward this year being 51,926,762, against 61,000,000 last year. The earning capacity of the labourers engaged on these boats was very much less as compared with former years, owing to the large grain shipments. According to C. P. R. statistics, there were landed at St. John during the season of 1906-7, 28,634 passengers, and during 1907-8, 24,158 passengers. At Halifax, 34,399 passengers were landed during 1906-7, and 16,600 during 1907-8.

Bank clearings for the four weeks ending May 23 were \$4,674,113, and for the corresponding period last year, \$5,100,924, being \$426,811 less in 1908 than in 1907, and \$185,847 greater than for the four weeks ending April 23 of the current year.

The shingle weavers and bunchers will not accept any reduction in wages paid them last year. The mill owners refuse to pay the rate of last year, but offered the rate paid in 1906, which is 10 per cent. lower than that paid in 1907. In consequence, there is not a shingle mill in operation in St. John, and the total number of men idle is between 75 and 80. Ten young women employed in the St. John branch of the E. P. Charlton & Co.'s store went on strike May 20, on account of a new girl being appointed floor walker in preference to promoting one of the number already employed. The strikers' places were filled next day. The Telegraph and Times' strike is still being fought by the printers. The latter have issued a weekly paper—The Labour News. The papers are being issued as usual, but the job department is affected.

The Municipalities Union opened at Fredericton May 19. The convention adopted a motion approving the action

of the president in affiliating with the Canadian Union of Municipalities. It was decided to meet next year in Moncton.

The provincial legislature prorogued May 30, after passing a Workmen's Compensation Act. Letters patent have been granted to the Read Stone Company, Sackville, capital \$150,000; the McMillan Company of Durham, Restigouche County, to carry on a lumber and trading business, capital \$60,000; Boddington & Peters, Limited, Moncton, printers, capital \$20,000; J. M. Roche, & Co., Limited, St. John, photograph supply dealers, capital \$10,000; the St. John River Steamship Company, Limited, capital \$48,000; the Westfield Land Company, Limited, capital \$3,000.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers who were compelled last fall to leave some of their hay uncut are now finding the old hay a nuisance. The wet weather prevented them from either cutting or burning it, and one or the other of these must be done in order to get a crop next autumn. Reports from Hartland, Carleton county, state that farmers are finding it difficult to get enough seed for their crops. Grass seed is \$3.75, and seed oats 65 cents per bushel. The potato acreage will be about 75 per cent. of that of last year.

*Fishing.*—According to government reports, the receipts from fishing licenses during the year totalled \$15,517.

*Lumbering.*—A three square mile timber limit at the head of Salmon River, Queen's County, was sold at public auction May 20, and bid in by Sayre & Holly, of St. John, at \$200 per mile. Log driving on the St. John, Tobique and Miramichi is progressing favourably, and all the drives will arrive safely. Prices of bank logs this year are somewhat lower than last year. Merchantable spruce logs opened last year at \$12.25 and went as high as \$13. This year they sold at \$11.25. Hemlock opened at \$7 last year and went as high as \$8, and this year the best price obtainable is \$7.50.

*Mining.*—The Canadian Antimony Company, Limited, incorporated last

year with a capital of \$250,000, is planning within the next few months to start an extensive development of the antimony mines at Lake George. It is the intention of the company to install a ten drill air compressor and a concentrator to concentrate low grade ore. The company does not intend operating a smelter. The machinery will likely cost \$3,000, and when everything is under way it is expected that 100 men will be employed.

#### CONDITION OF PARTICULAR TRADES.

The several building trades were active, with painters busy. The metal trades also were active, with machinists and linemen busy. Woodworkers were active, but shingle weavers were very dull. Printers, pressmen, bookbinders, tailors, bakers, confectioners, cigar-makers, tanners, broom-makers, etc., were all active. Transport employees, with the exception of ship labourers, who were dull, were busy. Unskilled labour was dull.

#### DISTRICT NOTES.

*Chatham.*—The outstanding bond issue of the town is \$234,500, and the bond issue for school purposes is \$47,750. On the morning of May 11, fifty-six barkers and three boom men at the rossing mill, Morrison's Cove, went on strike, but later in the day half of the barkers went back to work. The trouble arose over wages, the men receiving \$1.65 per day last year and only getting \$1.50 this year. They wanted \$1.65, and as this was not forthcoming, they left in a body. Later in the day 28 of the men went back at \$1.50. The Miramichi Lumber Company state that the strikers' places have been filled, and that the mill is running to full capacity.

*Chipman.*—A branch of the Bank of New Brunswick is to be opened here in about a month.

*Newcastle.*—The Anderson furniture factory is now running with a staff of about 40. The liquidator has applied for an order to continue the business of the company and operate the factory for a further period of six months.

#### NEWCASTLE, N.B., AND DISTRICT.

*Mr. J. R. Falconer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour was somewhat in excess of the supply, the sawmills having commenced their season on the opening of navigation. Wages in a few lumber concerns have been reduced by from ten to 15 cents per day; but on the whole rates were well maintained. Agriculture was backward owing to cold wet weather. Lobsters were very plentiful, but other fish were scarce. A new round-house is being built. The building trades were not as active as in former years owing to the high cost of building material and the stringency in the money market.

#### QUEBEC, QUE., AND DISTRICT.

*Messrs. P. J. Jobin and Edward Little, correspondents,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The month of May was a quiet one for labour, the supply being in excess of the demand, though outside labour, especially carpenters, was better employed than in April. Carters were busy, in the early part of the month, moving household furniture at from \$2 to \$2.50 per load. Houses were very scarce and a number of families were unable to find accommodation. The employees of the Montmorcency Cotton mills had their wages reduced 10 per cent. on May 1. Owing to the holding of the Tercentenary celebration no streets are to be opened for water and gas mains, and unskilled labour is less active in consequence. Wages for this class are 15 cents per hour, compared with from 17½ to 20 cents per hour last year. The iron shipbuilding trades were very busy on repair work.

At the meeting of the city council held on May 13, a letter was read from the secretary of the Builders' Exchange, in-

forming the council that the principal contractors of the city of Quebec have formed an association to establish and maintain a certain standard of efficiency among their ranks. Work has been resumed on the rock beneath the King's bastion by the Militia Department.

The Empress vessels of the Canadian Pacific Railway Company will remain in Quebec. The ship labourers and long-shoremen will maintain their rates.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The season is backward. Spring ploughing and sowing was in full progress.

*Lumbering.*—The drive is well advanced the water in the streams being very high. A number of the sawmills commenced cutting and all will be in operation the first week in June.

#### CONDITION OF PARTICULAR TRADES.

In the building trades carpenters and painters were busy, but the other branches were quiet or dull. Electric workers and linemen were active and the iron trades were busy. The printing trades were busy as were journeymen tailors and hotel and restaurant employees. Boot and shoe workers and cigarmakers were quiet. Ship labourers, longshoremen and unskilled labourers were dull.

#### SHERBROOKE, QUE., AND DISTRICT.

*Mr. H. Logie, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour during May was much more active than in any month since the opening of the year. Building operations and all outside work were in full progress. Work was being rushed on the new drill shed, the new hospital and other buildings. The annual meeting of the E. & I. Fairbanks Company was held on May 6th; it was reported that the establishment will be in running order by the 1st

of October. The Improved Paper Machinery Company of Nashua, N. H., have come to an agreement with the city council to establish a branch of their works here, provided the bonus offered by the council is ratified by the ratepayers. The company has put up a deposit of \$5,000 as a guarantee of good faith. The conditions are that the city will give exemption from taxes for 10 years; \$2,000 towards the purchase of a site and electric power at \$17.50 per h.p. up to 40 h.p., and over 40 to 100 h.p. at \$15 per h.p., and water at 5 cents per 1,000 gallons. The company will erect a shop 50x100 feet, and guarantees to have the same equipped for operation within one year. The number of hands to be employed will be between 40 and 50 for the first year. The investment of the company will represent some \$20,000. The ratepayers will also vote on a by-law to give exemption of taxes to a cold storage plant for a term of ten years. The City Water Department will carry on the extensions to the system. Tenders were called, but they were not satisfactory. Work has already commenced, and employment given to a large number of unskilled labourers. The estimated cost of the work will be fully \$150,000. On the first of June the C.P.R. will place an additional passenger train between Sherbrooke and Lake Megantic to meet the growth of travel that has arisen between these points.

The exodus of French-Canadians from the Eastern States to Canada this year is very large. The trains from across the border are filled with families returning with the intention of staying. An official of the Quebec Central Railway stated that the numbers going over their road, exceeded those of any other year. Extra coaches had to be put on, and they returned empty. A few years ago the reverse was the condition of affairs.

The Canada Paper Company will spend \$150,000 on alterations.

The machine shops are not so quiet as during the past few months. There have not been so many men laid off, and orders are coming in more freely. There has been no unrest among employees except at Magog Mills, where the employees

went out as a protest against a reduction of 10 per cent.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers had finished their spring work by the end of the month. The grass is about three weeks ahead of last year, and should the same favourable weather continue the hay crop will be very large. The maple sugar season was the best in many years, both as regards quantity and quality.

*Lumbering.*—Operations are finished in the woods, and many drives have been secured so that the sawmills are now in full operation.

*Manufacturing.*—The woollen mills are running full time, but with a somewhat reduced staff. The help, however, is not suffering as at this season of the year many of the men who work in the mills in the winter leave to work outside in the summer, and the demand for labourers is fully absorbing those applying. The Carpet Co. is still idle. Other industries were running full time.

*Mining.*—In the asbestos district works are being rushed to full capacity, and the asbestos mills, in some cases, have been running night and day. Work at the copper mines at Capelton is quiet.

*Railway construction.*—The railway companies are not doing any construction work, and are only carrying on repairs which are absolutely necessary.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, lathers, plasterers, painters and builders' labourers were busy.

*Metal and engineering.*—Iron moulders, machinists and boilermakers were quiet. Electrical workers, linemen, blacksmiths and jewellery workers were busy.

*Woodworking.*—Woodworkers, upholsterers, carriage and wagon makers were active. Pattern makers were dull.

*Clothing.*—Journeymen tailors were active. Garment workers and glove workers were quiet.

*Food and tobacco preparation.*—Bakers and confectioners were active, as also were cigarmakers, icemen and butchers.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees were active. Laundry workers and hotelkeepers were busy.

*Transport.*—Freight railroad conductors, engineers and firemen were dull. Other branches of railway work were quiet. Cab drivers, teamsters and expressmen were active.

*Unskilled labour* was busy.

#### DISTRICT NOTES.

*Farnham.*—One hundred and twenty-five men were laid off in the C.P.R. shops. Engineers on the road who have been running engines for a number of years, have been set back firing. There is very little freight moving. The prospects for the summer are poor for the working man.

*Windsor Mills.*—The new iron foundry is about finished, and will soon be ready to start.

*East Angus.*—The sawmill has started up again. A new clap-board machine has been put in and a second one is expected to arrive soon.

#### THREE RIVERS, QUE., AND DISTRICT.

*Mr. Joseph J. Ryan, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

During May the labour market was fairly active having considerably improved compared with April. Supply and demand were well balanced. The building trades were busy all month; several buildings are in course of construction and a good number are projected. A few are to be built of cement blocks, something new in this district. Shipments, clearings, etc., have been fairly active. Owing to lack of warm weather, farmers are just completing sowing. This had an effect on business activity. No unrest in the labour market occurred during the month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers had an extra good crop of maple sugar and have been

very busy ploughing and sowing.

*Fishing.*—Fishermen made good catches and obtained high prices.

*Lumbering.*—Log driving was in full operation with wages the same as last year. Mill owners pay a lower rate of wages for men employed in their yards.

*Manufacturing.*—Manufacturers of staple goods were busy and there was quietness only in the fancy goods line.

*Railroad construction.*—Several gangs are employed by the G.T.P., the C.N.R., and the C.P.R.

#### CONDITION OF PARTICULAR TRADES.

The building, metal, leather and wood-working trades were active. The printing and food and tobacco branches were busy. Tailors, garment workers, etc. were active, but boot and shoe makers were quiet, especially on fancy lines. Miscellaneous employees were active. Railway employees were less active than usual, but steamboatmen have been busy. Unskilled labour was well employed.

#### ST. HYACINTHE., QUE., AND DISTRICT.

*Mr. V. Phaneuf, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

There was no material change in the condition of the labour market in May as compared with April. Building operations were very quiet, although there was a slight improvement towards the end of the month. Some new buildings were commenced, and this, with work on the new cathedral, prevented idleness. In the iron industry conditions were fair, there being sufficient work to keep the workmen employed. Sash and door factories were busy. Improved conditions were reported in the leather trade. The boot and shoe industry did not change much; the Ames Holden factory reopened on May 11, and was working five days per week. A large number of men are employed on civic work. The organ factory was very active, overtime being

worked. The clothing industry was busy. Retail trade in all branches was stationary, and this was also the case with the wholesale trade. It was reported that conditions were improving. The banks had a good month, collections being fairly easy. The Department of Militia at the instance of the officers of the 84th battalion, has established a provisional school of instruction at St. Hyacinthe for commissioned and non-commissioned officers. The strike which started in the Penman woollen factory on May 11 was not settled at the end of the month. The factory was being run by operatives not members of the Canadian Federation of Textile Workers and the company was engaging all the workmen it could get. It was reported that about 300 hands were still at work. This was the only labour disturbance of the month. There was no change in rates of wages or hours of labour.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were fair; produce sold at high prices. Work was plentiful but frequent rains in May retarded operations somewhat.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Painters and plumbers were fairly well employed; the other branches were dull.

*Metal, engineering and shipbuilding.*—Iron workers and helpers had a good month; machinists, engineers, electrical workers, blacksmiths, boilermakers and horse shoers were well employed.

*Woodworking.*—Woodworkers, upholsters, varnishers, etc., were active.

*Printing.*—Activity prevailed.

*Clothing.*—Journymen tailors and garment workers were well employed.

*Food and tobacco preparation.*—Butchers and bakers were very busy. Ice handlers were active.

*Leather trades.*—Active conditions were reported.

*Miscellaneous.*—Barbers, clerks and stenographers were active. Hotel and laundry workers were very busy.

*Transport.*—Railway employees were very busy, passenger and freight traffic be-

ing very heavy. Carters and draymen were active.

*Unskilled labour.*—This class was fairly well employed and prospects were bright.

#### DISTRICT NOTES.

*St. Johns.*—The shops of the Singer Manufacturing Company which closed down until May 4, throwing over 400 workmen out of employment, re-opened during the month. Last year this concern employed over 1,000 men, but owing to the financial crisis it reduced its staff to 400. Out of ten factories owned by this company in different portions of the world only one, in Russia, is running at present. The shops here when in full operation will employ 3,000 men. The city council was negotiating with the Toronto Type Company looking to the establishment of workshops in St. Johns. This company would employ about 150 men and would pay about \$75,000 in wages annually. The company stipulating certain conditions with the city council, amongst others exemption from taxation. A new company was formed entitled the "Chambly Canal Towing Company" for the purpose of towing boats on the canal between St. Johns and Chambly by means of automobiles. Dwellings were scarce and rents high. The Montreal Loan and Mortgage Company is transforming the Macdonald factory which belongs to it into 20 brick tenements.

#### MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Pelletier correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during May was fair, compared with April. In the factories, great numbers of employees were not working. The building trades were inactive, many buildings being delayed owing to the strike of the bricklayers. Painters and decorators were busy with the usual

spring trade, but carpenters, plumbers, and plasterers were not busy. Unskilled labour will be well employed owing to civic improvements, to cost over \$1,000,000, authorized by the Montreal city council. From all railroads centering in Montreal came reports of a heavy holiday business. While the figures were not yet prepared, it was stated by railway officials at the different stations that the holiday passenger business this year was apparently a good deal ahead of last year. This was probably due to the fact that the weather this year was perfect.

#### CONDITION OF PARTICULAR TRADES.

The metal trades were not active, but activity was reported in the woodworking, printing and clothing branches. Cigar-makers and tobacco workers were dull. Owing to the great number of vessels in port, longshoremen and teamsters were busy. There was no demand for unskilled labour.

#### MONTREAL, QUE., AND DISTRICT.

*Mr. C. Audet, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was a slight increase in activity in May as compared with preceding months, although the improvement was not very marked. Trade improved somewhat, but there was a lull in building operations. The employers have locked out the bricklayers, refusing to pay last year's wages, which were fifty cents an hour, and offering wages of from 35 to 50 cents, according to the ability of the workmen. The locomotive works closed its doors, throwing 1,500 men out of employment. The Canadian Pacific Railway, the Grand Trunk Railway and the Dominion Bridge Company also let about one half of their staffs go, thus causing the unemployment of several thousand men. The strike of the textile workers affected 1,700 employees, the object of the strike being the maintenance of the

present rate of wages and hours of labour. Although wages have been decreased, rents have remained as they were. The price of food stuffs was stationary.

#### CONDITION OF PARTICULAR TRADES.

In the *building trades*, stonemasons and builders' labourers were busy during the first two weeks, but owing to the lockout of the bricklayers work slackened towards the end of the month; in the other branches employment was fair without being active. The *metal trades* were to a large degree adversely affected by the closing down of the locomotive works and the Dominion Bridge works, and many of these workers were idle. Electrical workers, linemen, metal polishers, brass workers and tool sharpeners were busy. Boilermakers and iron ship-builders were fairly active, as were also horseshoers and jewellers, but sheet metal workers were quiet. Coopers, gilders and shingle weavers were active; the other *woodworking* trades were dull. The *printing, clothing, food and tobacco preparation, leather, miscellaneous* and *transport* trades were active. *Unskilled labour* was more active than in April, though there were a great many idle.

#### HULL, QUE., AND DISTRICT.

*Mr. R. Laferrière, correspondent*, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was not as busy as was anticipated, the high water in the Ottawa hampering the water powers depending on it. In the building trades, however, active conditions prevailed. The water was gradually subsiding towards the end of the month, and active conditions were soon expected in the factories. In a statement issued by the E. B. Eddy Company during May, to its 25 or 30 agencies, it was set forth that there was an available stock of \$300,000 in the company's warehouses to draw from, so that no curtailment would take place owing to the few days

of embarrassment caused by the high water. Orders from all parts of Canada are coming in at the Walters Brothers' axe factory. This firm is extending the range of its operations and is building large additions to its factory. The capacity of the factory was more than doubled since 1900. The production of knives will be again doubled within a couple of months. The company is just now setting up six grinders and other machines, and has already started making moulding knives, paper machine knives up to 8 feet long, etc. The last order received was for 800 knives from British Columbia. The staff of the factory at present is 30 expert hands. The new French treaty is proving of benefit to the Matthews Pork Packing Company, which, in addition to its already large orders from the British trade, is now busily engaged filling large and increasing orders from France, especially from Marseilles. This company last year slaughtered 120,000 hogs, 8,000 cattle and 20,000 sheep and calves. The wages paid were \$75,000 and the total output was \$1,750,000. One hundred and sixty men are now employed in Hull. The congregation of the Grey Nuns will spend \$58,000 on a new building, the construction of which will be started forthwith. The building when complete will cost \$75,000. The Quebec government has authorized a grant of \$9,000 per annum to the new institution, provided \$1,200 of the amount is paid in salary to the principal, the balance up to \$6,000 is set aside for teachers' salaries, and the balance applied on interest and sinking fund. The awarding of the contract for the proposed new church in Sacred Heart parish, Ottawa, to Mr. J. Bourque for \$103,000 ensures steady employment to about 50 Hull people in the latters' shops and quarries in this city. A private residence on Main street to cost \$10,000, one on Inkerman street to cost \$6,500, and a number of other new residences are being built, and improvements of old buildings are general throughout the city. There were no disturbances in the labour market through strikes or lock-outs. Orders were being filled for horses and teamsters in and around Hull for the

National Transcontinental Railway. Exceptionally good prices were paid; \$50 per month with board and feed for horses, and \$35 per month and board for teamsters provided they hire for the season; otherwise \$30 per month. These were scarce. There is however, no scarcity of shantymen, who are still in demand, new orders coming in every day. It would now appear that Hull is the recognized centre for recruiting shantymen. Wages range from \$40 to \$45 per month, about the same as last year. The old hands, however, are getting higher pay.

#### OTTAWA, ONT.. AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The lumber mills of the Ottawa district began operations in the latter part of April or beginning of May, paying the same wages as last year. Some of the mills had to close temporarily on account of high water, but this trouble had about subsided at the end of the month. Shipping lumber was not so active as in May, 1907, and fewer men were employed. The building trade called for much skilled and common labour. The new Geological Museum and the Y. M. C. A. building are going ahead rapidly. On May 11, the new Sacred Heart church, to cost \$103,000, was begun. This work will be completed in two years. The largest buildings projected for the summer are the G. T. R. hotel and station, about which negotiations are still going on between the railway company and the city council. On May 15, the Grand Trunk Company made an entirely new proposal to the city, providing for a hotel to cost \$1,500,000 and a station to cost \$525,000, exclusive of annexes. A large number of moderate-priced dwellings and tenement houses are in contemplation, apparently as a result of the rapid rise in rental this spring.

Wholesale and retail trade was quiet, most lines not having yet recovered from the financial depression.

By virtue of a contract with the employers made a year ago, the wages of bricklayers and stonemasons were increased on May 1 from 47 to 50 cents an hour. About 300 will benefit by the change. The strike of building labourers on the Y. M. C. A., which began on April 22, affecting directly 30 men and indirectly 25 bricklayers, who quit work in sympathy with the labourers' union, is still in progress. Building operations are continued, and the contractor reports that sufficient men have been procured to fill the demand.

Unrest among the motormen and conductors of the Ottawa Electric Railway Company was reported early in the month when the employees, most of whom belong to the Amalgamated Street Railway Men's Union of America, asked for an increase to 22 cents per hour on week days and 24 cents per hour on Sundays for first year men, and 23 cents and 25 cents for all others. At present, the first year men receive 17½ cents, second year men 18½ cents, third year men and over, 19½ cents for week days, and each class two cents extra per hour for Sunday work. The company pays half the cost of the uniforms for men under five years in their employment and the full cost for those over five years. The men requested that free uniforms be given to all. The company refused to negotiate with the employees as a union, but met all representatives who came from the men as a body of employees. No settlement being reached at these conferences, the men applied for a Board under the Industrial Disputes Investigation Act. The Board chosen consists of Messrs. D. J. O'Donoghue, G. F. Henderson, K.C., representing the men and the company respectively, with Professor Adam Shortt as chairman.

The Bakers' and Confectioners' National Union made a demand for an increase of two dollars per week on the following current rates: Foreman, \$15; second hands, \$13; table hands, \$11. More than half the masters signed the contract granting the increase, but four firms refused. In these latter, the union on May 23 declared a strike, but the men refused to go out.

Commercial Union No. 1, comprising 150 clerks, has appealed to the chief of police to better enforce the by-law which requires shops to close at 6 o'clock. The clerks proposed to send a committee to the merchants for the purpose of getting by voluntary concession 6 o'clock closing on Saturday instead of 9, and a Saturday half-holiday during the midsummer months.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy with sowing, but were delayed by wet weather. The rains at first promised to hinder the crop, but no fear is entertained now. The marketing of new vegetables has begun and prices are high and firm. The crop of new potatoes promises to be late and old potatoes recently advanced from \$1.15 to \$1.25 per bag.

*Lumbering.*—The lumbering industry was threatened by high water, which hindered shipping and impaired water power as well as carrying away a large quantity of logs out of mill ponds where they were held for manufacture. Mr. J. R. Booth fixed his wholesale prices at practically the same figure as last year, resulting in a steadying effect on the market.

*Railroad construction.*—The Ottawa Electric Railway Company is building a branch line to the Central Experimental Farm.

#### CONDITION OF PARTICULAR TRADES.

The building and transport trades were active. Electrical workers and linemen, shipwrights and caulkers and printers were busy. The woodworking, clothing and leather trades were dull. Unskilled labour was nearly all employed.

#### KINGSTON, ONT., AND DISTRICT.

Mr. Wm. Kelly, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

While the early part of the month was somewhat quiet on account of the many

men out of employment, the month on the whole was satisfactory. The opening of navigation and the commencement of building operations relieved the situation and the month proved to be a busy one, far surpassing last month and the corresponding month of last year. During the early part of the month grave complaint was made by numerous immigrants who were unable to secure employment of any kind and who claimed to have been brought here on the promise that there was work available of every description. While some have secured work others have left to secure employment elsewhere. Civic improvement work commenced about the middle of the month; the street paving is being done by contract under the local improvement act. The city engineer is preparing plans for the repairing of the city buildings. The Kingston and Pembroke Railway Company is placing a work train on its line to rush along the new telegraph service between Kingston and Renfrew. The Richelieu and Ontario Navigation Company is negotiating for the leasing of additional steamers to be used during the tercentenary celebration. Over 40 workmen are employed at the Davis dry-dock and shipyard. Other companies are equally busy. Considerable damage and inconvenience is being caused by the exceptionally high water in the district; it is impossible for some of the smaller boats to call at bay ports. A building company to be known as "The Kingston Artificial Stone and Construction Company" has been formed. At the annual meeting of the Board of Trade, favourable reports were presented and a balance of \$1,120.78 reported on hand. The sixth annual convention of the Labour Educational Association of Ontario was held here, with delegates present from all parts of the province, on May 25.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very active, the season being backward as the result of heavy rains. Much seeding was done by hand.

*Fishing.*—This industry was more active than for a year, but lumbering was quiet, and manufacturing in all lines active.

*Mining.*—Active conditions prevailed, many men leaving to work at the Wilbar mine, though some returned.

#### CONDITION OF PARTICULAR TRADES.

Active conditions prevailed in the skilled trades. In the case of the building, woodworking, metal and engineering, clothing and transportation branches conditions of employment were very active. The printing and leather trades were busy. Unskilled labour was in great demand with few out of work at the end of the month.

#### BELLEVILLE, ONT., AND DISTRICT.

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during May did not compare favourably with those of the corresponding month last year, although they improved greatly toward the latter part of the month. Owing mainly to the large number of new comers, the supply of labour far exceeded the demand, particularly in the case of unskilled labour. Operations were commenced on a number of new residences, and the prospects are that building will be more extensive than last year. It is generally conceded that wages will not be quite as high as last year. Work on the construction of the new drill hall is being hurried to completion, a large number of bricklayers, stonemasons, carpenters and labourers being employed. The corner stone of the new separate school was laid during the month, and a number of skilled and unskilled workmen given employment; the building will be of stone from the quarries at Crookston, and will cost about \$52,000. Good progress was made on the isolation hospital; the building is of pressed brick and will cost \$12,000. The rolling mills, which were closed down for several months, have re-opened and gave employment to some 200 men, turning out large quantities of iron, mostly used in the making of horseshoes. These

mills were compelled to close down for a while owing to high water blocking the works. Both the large cement works were running night and day, and employing many workmen from this city. The Lehigh Cement Company is erecting a large number of substantial buildings and boarding houses for the accommodation of its employees. The merchants and mercantile institutions reported a very satisfactory month, and were optimistic as regards the future. There was no unrest in the labour market.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Owing to wet weather, seeding was somewhat backward. The fall wheat looks good, but clover will be a partial failure. Hay was selling at \$18 to \$20 a ton.

*Fishing.*—Owing to the high level of the water, this industry was more or less inactive.

*Lumbering.*—Inactivity was the rule.

*Manufacturing.*—Active conditions prevailed. Not a single firm closed down during May.

*Mining.*—In the northern part of the county very active conditions prevailed.

*Railroad construction and employment.* Conditions generally were normal, there being little done in the way of construction or of work requiring extra labour.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Nearly every branch of the building trade was fairly active, although some were not fully employed. Stonecutters were well employed.

*Metal, engineering and shipbuilding.*—Iron moulders and workers, machinists, engineers, blacksmiths, boiler-makers, brass workers, metal polishers and horseshoers were active, with very few out of employment. Brass workers at the new brass and steel plant, also at the Belleville Hardware Manufacturing Company's works and several shipwrights were busily employed.

*Woodworking and furnishing.*—These trades were fairly active, all the factories having started to run full time during the month. The carriage and wagon workers were active, and coopers were filling

large orders for apple barrels and cheese boxes.

*Printing.*—Printers, both news and job men, pressmen and bookbinders, were all fully employed.

*Clothing.*—Journeymen tailors had a very active month filling spring orders, but boot and shoe workers were only fairly active.

*Food and tobacco preparation.*—Bakers and confectioners were busy, butchers and ice-handlers were active, and cigar-makers were all employed full time.

*Leather.*—Harness makers reported a active month.

*Miscellaneous.*—Barbers, clerks, delivery employees and laundry workers were active, hotel and restaurant employees only fairly active, and theatre employees inactive.

*Transport.*—Railway men reported freight and passenger traffic about as active as during the corresponding month of 1907. The opening of river and lake navigation always tends to decrease railway transportation, especially in the coal carrying trade. Steamboatmen, sailors and longshoremen were active, and cabmen, carters, teamsters and expressmen were busy.

*Unskilled.*—Work was not plentiful.

## PETERBOROUGH, ONT., AND DISTRICT.

*Mr. W. J. Johnston, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were very dull for the season. While there was some outside work being done, on large public buildings unfinished last year and a few residences, there were a number who were unable to secure work of any kind. The municipality commenced civic improvement work and gave employment to a number of men. The condition of affairs in a number of factories, especially in the iron trades, is not encouraging. Moulders and pattern makers with a few exceptions were idle, something that has not happened here for years. Seventy-two

building permits have been issued this year to date, amounting to the value of \$55,140. The number of building permits taken out to the 31st of May last year were 137, of value \$533,460. The painters are the busiest of the tradesmen just now. Some masons and carpenters were actively employed for a short time. Activity in outside work will depend very much upon the extent of building undertaken, which is not very promising at present. A few stonecutters are employed at the armouries and the new Catholic church. Tourist traffic is becoming busy and considerable freight is being hauled by boats. The large lift-lock here is now open and already a number of vessels have passed through. The several canoe companies were active, shipping a number of boats to outside points. Hicks and Company have received a contract to supply 5,000 barrels of cement and all the sewer pipe the city may require. Brick-yards were active and brick will be ready in two or three weeks. The price of milk has been reduced from 7 to 6 cents a quart for the summer months. During the summer season 18,000 rat skins were purchased from trappers by Messrs. Lech & Sons; their value was estimated at \$7,200. Wholesale and retail trade was very good. Wages were on the decline in some works. Lathers' wages decreased 20%; labourers 10%. The labour market on the whole was generally dull, but with no signs of industrial trouble. The bricklayers and masons adopted the 8-hour system on May 1, at the same rate of wages per hour as last year, viz., 40 cents per hour. This was in accordance with the law of the International Union. The difference it makes is that all men working journey-work will receive 40 cents per day less. This is the first 8-hour day adopted by any trade in Peterborough.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Seeding was very active throughout the district, but was hampered by excessive rains. Low lands were so covered by water that it was impossible to work them.

*Fishing and mining.*—Dullness was the rule.

*Railroad construction and employment.* Activity prevails, getting the roadbed in good order for the summer traffic. Painters were employed by the Canadian Pacific Railway Company painting stations and building throughout the district.

*Other industries.*—The Peterborough merchants have decided to adopt the half-day holiday per week during the summer months.

#### CONDITION OF PARTICULAR TRADES.

Inactivity was the rule in the *building trades*, with the exception of painters who were busy and stonemasons who were active. Active conditions prevailed in the *metal, engineering, woodworking and furnishing trades*, excepting moulders and boilermakers in the former, and woodworkers, pattern makers and coopers in the latter, who found employment dull. In the *printing, clothing, food and tobacco preparation trades*, activity generally prevailed, with boot and shoe workers, and ice-handlers busy. While the *printing trades* were fairly active, the tendency was towards slackness. The *leather trades* were slightly more active in several branches, and the *miscellaneous trades and transportation* were fairly active, with the exception of furriers and theatre employees, who found conditions somewhat dull. Dullness was general with *unskilled labour*.

#### DISTRICT NOTES.

Cheese factories have begun operations and are very busy. The Peterborough Cheese Board recently sold 979 boxes of cheese at 10 13-16 cents per lb. Farm help is needed throughout the district. Hay has been reduced in price from \$18-\$20 to \$12-\$14 per ton, and eggs were selling at 19 cents per dozen; butter 28 cents per lb.; potatoes 85 cents per bag. The several lumber companies were busy getting logs and timber floated to their mills.

*Lakefield.*—The cement works were active, and a train load of clay is being hauled to the works from the clay-beds each day. The large planing factory, which was destroyed recently by fire, has been rebuilt and is ready for operation.

*Havelock.*—The municipal council is spending \$1,000 on improvements to sidewalks.

*Port Hope.*—The light and power station was destroyed by fire. The loss is estimated at \$15,000. The work of rebuilding is being rushed.

*Cobourg.*—The Crossen Car Company has secured a contract to supply 10 tourist and 3 palace cars. This will keep the company busy for sometime.

*Lindsay.*—The Bell Telephone Company is installing a new system.

#### TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions continued to improve somewhat with the advance of the season though manufacturing in some lines was still quiet and the building trade showed a great falling off as compared with the last few years. There were consequently a large number of men still unemployed, though the giving out of civic contracts and the demand for labour for farm work and railroad construction has absorbed many. The relations between employers and employed were generally harmonious.

On May 7th the contract of the city with the Hydro-Electric Power Commission, by which the latter agrees to furnish Toronto with 10,000 horse power of electric energy for 30 years, beginning December, 1909, was formally signed. The maximum price is to be \$18.10 per horse power, which includes the city's share of the cost of the transmission line \$828,080, and \$38,970 or \$3.89 per horse power for cost of operation and maintenance, etc. These figures are not final, as the commission hopes to be able to supply power at a lower rate. This, however, will depend upon the amount of power taken by the municipalities embraced in the system.

The Board of Control has decided to construct the power distribution plant by city labour and to establish an electrical construction board of three experts with

an engineer of construction under the board. Alexander Dow, electrical expert of Detroit, has been asked to be one of the members of the consulting board and to formulate a scheme in detail for the carrying out of the city's part of the enterprise.

Building permits were issued in April for 683 buildings of an approximate value of \$1,169,635, as compared with permits for 607 buildings valued at \$2,044,870 in April, 1907.

The city council on the 26th decided to submit to the ratepayers on June 27th two by-laws, one for raising \$2,400,000 for a trunk sewer and sewage disposal plant, and the other for raising \$750,000 for a water filtration plant.

The receipts of the Toronto Railway Co., for April amounted to \$274,859 of which the city received \$41,228, as compared with receipts of \$268,015 and percentage of \$36,529 in April 1907.

The District Labour Council on the 21st adopted a report by the Municipal Committee to the effect that the establishment of a suburban railway service would be in the interests of the city, as it would have a tendency to reduce rents and bring the workshops nearer the homes. If homes outside the city could be made accessible through improved railway service it would greatly benefit the working classes.

The Ontario Railway and Municipal boards have approved of three fenders as suitable for use on the motor cars of the Toronto Railway Co., and have issued an order that the company forthwith commence to manufacture and equip their system with a fender approved by the Board, the whole system to be so equipped within six months.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busily occupied with seeding during the month, conditions being generally favorable with abundant rains. The hay crop promises to be very heavy and the warm weather of the latter part of the month greatly advanced vegetation, which had been somewhat backward. Farm labour, as is usual at this season, was in steady demand.

*Manufacturing.*—The situation remained about the same as in April, manufacturers generally limiting their output to orders in hand, which were not nearly so heavy as in former seasons. The iron trade continued slack as a rule, but some activity was manifested in the shipbuilding, engine and boiler making lines. Seasonable conditions caused some improvement in other departments and prospects for a decided revival as soon as a good harvest is assured were regarded as favorable.

The Massey-Harris Co., Limited, has begun the erection of a large 4-storey warehouse, for the storage of agricultural implements.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Some increase in activity was manifested but a considerable number of builders' labourers, bricklayers, masons and carpenters were still unable to find work, and a larger proportion of lathers, plasterers, plumbers and gas-fitters were idle, much of the present season's work not having reached the stage for indoor operations. The plumbers' strike was declared off on the 8th, an agreement having been effected between the recently organized Master Plumbers and Fitters' Association and the Plumbers' Union. The men are to receive 37½ cents per hour for the first year, and 40 cents per hour for the second year.

*Metal, engineering and shipbuilding.*—Blacksmiths' machinists, moulders and electrical workers were quiet. Shipbuilders, boiler-makers, sheet metal workers and structural steel workers had fair employment. Brass workers were active and jewellers and silversmiths quiet.

*Woodworkers.*—Cabinet makers, furniture workers and woodworking machinists' were better employed than in April. Coopers and carriage and wagon makers were fairly well employed.

*Printing.*—Printers, book-binders and pressmen had a fair month.

*Clothing.*—Custom tailors were well employed. Garment workers reported improved conditions. Boot and shoe makers were quiet.

*Food and tobacco preparation.*—These trades were generally well employed. Cigarmakers found trade quiet.

*Leather.*—Harness makers and saddlers were fairly active.

*Miscellaneous.*—Hotel and restaurant employees, barbers and laundry workers were active. Clerks and salesmen had a fair month.

*Transport.*—Railway and street-railway employees, teamsters and expressmen had plenty of work. Sailors and longshoremen were busy.

*Unskilled labour.*—A large number of general labourers were out of work.

## NIAGARA FALLS, ONT., AND DISTRICT.

*Mr. Hewlett Green, correspondent* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

During May, general employment showed some improvement over April, but this is not as busy a spring as those of several preceding years. In several trades there were idle men and in no trade were more men needed than were available. City and government works employed many labourers, but it is expected that many will be laid off before midsummer. Rail transportation fell off slightly. With the exception of grain, little freight was moving by water. Business, wholesale and retail, was steady but not brisk. Printers in the city had their hours reduced from nine to eight per day, and the wages of several were increased. The Hydro-Electric Power Commission of Ontario invited tenders for building transmission lines from Niagara Falls to Toronto and St. Thomas. The Niagara Falls city council decided to sell power to small consumers at \$10 for daylight services and \$15 for 24-hour services. A considerable number of foreign labourers were denied admission to Canada at this port because they had not the amount of money which the new law required immigrants to possess. Assessment returns of all the towns, townships and villages in the district show increased

valuations and all but one or two show increased population.

The Frontier Amusement Park was opened. A considerable number of persons will be employed there during the summer.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Owing to wet land, spring work on farms was late, but near the end of May weather conditions were excellent. The prospects for the fruit crop were never better and there was every promise of good returns from agriculture generally. Farm labourers are said to be more numerous and to be engaging for the season's work at lower wages than last year.

*Mining.*—The Provincial Natural Gas Company has leased lands and is drilling wells close to the city.

*Railroad construction and employment.*—Railway construction was quiet and general railway employment rather dull.

*Manufacturing.*—The Ramapo Iron Works were running over-time. The Standard Bearings factory resumed operations after a temporary shut-down. The Niagara Falls Machine and Foundry Co., and the two silverware factories were busy. Other manufacturing concerns were quiet. The Sanitary Can Company tested its new plant and turned out sample cans. The Spirella Corset Co., which has purchased a site for a factory here, was incorporated with \$50,000 capital.

### CONDITION OF PARTICULAR TRADES.

While the building trades were fairly active, conditions were not as favourable as is usual at this season, and the outlook was not very good. Bricklayers and masons were quiet, some carpenters idle, plumbers fairly active and painters very busy. Many builders' labourers were idle. Employees of iron-working concerns were generally active and conditions in those trades appeared to be good. Linemen and electrical workers were busy but several large jobs of this sort were nearing completion, notably the installation of illuminating apparatus at the new

Frontier Amusement Park in the city and new lighting systems at *Niagara-on-the-Lake* and *Crystal Beach*. The Printing trades were steady. Preparations were being made for a very busy season in the new as well as the older established fruit canneries. The first fruits will be canned in June, and many hands will be employed. The large summer hotels and restaurants and souvenir stores were reopening for the season and many persons were engaged for their staffs. Laundry workers were active. Freight traffic showed a slight falling-off on some lines and heavy summer passenger travel had not commenced, so trainmen and engineers were rather quiet. Summer steamboat lines inaugurated full services and electric railway companies were engaging extra men for the season. Teamsters were busy. Unskilled labour was not in demand.

#### DISTRICT NOTES.

*Crystal Beach*.—The new company owning the summer resort here is spending half a million dollars on improvements, including waterworks and sewer systems, electric light plant, walks, pier, hotel, restaurants, rink, theatre and bath-house. New steamers will run to Buffalo. Nearly three hundred men have been engaged in the works which are now nearly completed.

*Fort Erie*.—A new planing mill was being erected. Many labourers were employed on the improvements to the race track.

*Niagara-on-the-Lake*.—The fruit cannery was being extensively improved. The town is to have a new electric light system with power from Niagara Falls. The transmission line was being built from St. Davids. Cross-lake steamers commenced service during the month and the busy season opened. The militia camp will be held as usual.

*Dunnville*.—A by-law authorizing the purchase by the town of \$30,000 stock of the projected Dunnville, Wellandport and Beamsville railway, was carried.

*Welland*.—The shipyards were busy. Two steel hulls were launched during the month and another was being built. The Robertson Machinery Co. sold out to the

Capital Lock-Nut & Washer Co. which will enlarge and continue the business. Cars began running over the Niagara, St. Catharines & Toronto railway extension to Welland on May 4th. Assessment returns show 16% increase in valuation and 20% in population over last year.

*Chippewa*.—A by-law to raise \$2,000 to help purchase a site for the plant of the British Canadian Smelting & Refining Co. was carried. Work was commenced on buildings and furnaces and a section of the plant will be running by midsummer. Cobalt ores will be treated by electric process. Surveys for the proposed deepening of the Welland river for navigation were commenced.

*Port Colborne*.—There was an unusual rush of wheat through the Welland canal, but otherwise lake transportation was light. Canal improvements employed some men. The cement plant commenced running.

#### ST. CATHARINES, ONT., AND DISTRICT.

*Mr. Jas. A. Wiley*, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during May was active, with several of the industries working short time, and others busy. No large bodies of men were idle. The Dominion Electric Company was recently established by local capitalists. Business, both wholesale and retail, was reported active. There were no labour disputes.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture*.—Fruit prospects were excellent, trees and bushes having wintered well. Nursery men had a busy month.

*Manufacturing*.—Canning factories were preparing for a busy season.

*Railway construction*.—The new line of the Niagara, St. Catharines and Toronto Railway, from Font Hill to Welland, commenced service on the 4th of May with ten trips daily from Welland

to St. Catharines. This line will open up a new field and will be of considerable benefit to business men.

#### CONDITION OF PARTICULAR TRADES.

The *building trades* were active, and while not yet in full operation there was more work than during the preceding month. All branches of the *metal trades*, were active, and the same applies to woodworkers, upholsterers, varnishers, polishers and carriage and wagon makers. Other trades were active. Unskilled labour was fairly well employed, with supply and demand well balanced.

#### DISTRICT NOTES.

*Thorold*.—Mills and factories generally were active. The Montrose paper mills which were closed for repairs have resumed operations with a full staff.

*Merriton*.—Employment generally was active.

*Port Dalhousie*.—The labour market was in the main the same as last month.

*Beamsville*.—The new Independent Telephone Company has installed nearly 300 phones and will open a head office soon.

#### HAMILTON, ONT., AND DISTRICT.

*Mr. S. Landers*, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of labour was much better during May than in the previous month, but there were still a large number of both skilled and unskilled men and women out of employment. A horse collar company from Omaha, Neb. has decided to locate here and has secured premises. Twenty-five men will be employed at the outset. There have been changes in wages in two trades; stove plate moulders have had their wages reduced from \$2.90 per day to \$2.75, with no change among the piece workers; cotton mill employees submitted to a reduction of 10 per cent. in their wages.

There were no strikes or lockouts in the building trades at the first of May. Commercial activity and bank clearings are increasing.

#### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing*.—In some of the local establishments, men have been put on who were laid off during the winter months. The clothing trade is very slack and a number of men are still out of work. At the Harvester works many of the laid off men are back at work as a result of large North Western orders.

*Railway construction*.—The Brantford and Hamilton Electric Road is about completed

#### CONDITION OF PARTICULAR TRADES.

*Building*.—Masons, bricklayers, carpenters, etc., were active. Carpenters agreed with contractors to continue the 37½ cents minimum per hour.

*Metal*.—Moulders and stove mounters were slack, with machinists, engineers, electrical workers, metal polishers, blacksmiths, boilermakers and shipbuilders, structural iron workers active.

*Woodworking*.—Pattern workers were slack, but other branches had a fair month.

*Printing*.—Printers were busy, pressmen active, bookbinders fair and photo engravers active.

*Clothing*.—Custom tailors were active but garment workers and hatters were slack. Boot and shoe workers were fair.

*Food*.—Fair conditions prevailed.

*Leather*.—Leather workers on horse goods, trunk and bag workers were active.

*Transport*.—Steam railway employees, including freight and baggage handlers, were busy. Steamboat employees and street railway employees were active. Ship labourers were fair.

*Unskilled labour* was fairly well employed.

#### DISTRICT NOTES.

*Dundas*.—General operations have bettered since last report. The machine

shop, clothing factory, axe factory, glove factory, etc., have begun to put on more employees. Construction work under the auspices of the town is giving employment to a number of unskilled workmen.

#### BRANTFORD, ONT., AND DISTRICT.

*Mr. J. C. Watt, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market shows a marked improvement over last month. The Radiator works, which were closed all winter, started on the 4th, and were employing about 60 hands at the close of the month. Sidewalk and surface drainage construction work engaged a number of men. The building trades are becoming more brisk and already a considerable amount of building is under way. J. H. Hall & Sons, machinists, are erecting new and larger premises. In the factories, conditions have slightly improved though several are still running short time with reduced forces. Merchants had a fair month. The moulders' strike still continues. The moulders were ordered by the local magistrate to discontinue picket duty. This they refused to comply with, and sixty men were committed for trial at the June sessions. Council for the moulders claims that peaceable picket duty is within the right of the union.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy. The season is backward but prospects for a large hay crop are favourable.

*Manufacturing.*—With manufacturers conditions were about the same. None of the factories were particularly busy, and several were running five days per week with reduced forces.

*Railroad construction.*—Work has been brisk on the radial line from Hamilton. The road was declared open on the 23rd, though much work yet remains to be completed.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners were active and in some cases busy. For lathers and plasterers trade was quiet. Painters and paper hangers were busy. Plumbers, gas and steamfitters were active.

*Metal.*—For moulders and coremakers conditions were from active to quiet. Machinists and electrical workers, linemen, polishers, buffers and platers and stove mounters were active. Blacksmiths in some shops were active, in others quiet. Boilermakers and sheet metal workers were busy until the close of the month, when they became quiet. Horse-shoers were active.

*Woodworking and furnishing.*—Carriage and wagon makers were not very busy some working short hours. Pattern makers and coopers were active.

*Printing.*—The allied trades were busy.

*Clothing.*—Journeymen tailors and tailoresses were very busy.

*Food and tobacco preparation.*—Bakers and confectioners were busy. Butchers, cigarmakers and tobacco workers were active.

*Leather.*—Leather workers and saddlers were active.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and restaurant employees were actively engaged. Laundry workers were busy.

*Transport.*—Railroad trackmen and freight handlers were busy. Street railway employees were steadily employed as usual. Teamsters and draymen were busy, cab drivers were active.

*Unskilled labour.*—There were a few unemployed at the close of the month, outside work commencing late.

##### DISTRICT NOTES.

*Blue Lake.*—The cement works were busy.

*Paris.*—The Fabric Mills were busy. The other factories were fairly busy. There are very few unemployed in the town. This year assessment rolls show a population of 4,000 an increase of 120, and an increase in the value of real property of \$76,173, the total assessment being \$1,488,658.

## GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reported as follows:—

## THE GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in May showed some improvement over April, but employment was still below the standard of last year. Factory employment was steadier in a number of lines, but short time and reduced staffs were in effect in some shops and while old hands have been taken on in some cases there were still a considerable number of men without steady employment. Work on permanent roadways and on the new armouries was active. The building trades showed a falling off compared with last year, new contracts not coming out as freely. A lighter season is looked for. Retail trade was below the average. The city council has set the tax rate at 14 mills on the dollar. The Retail Merchants' Association has decided that as a body they will not grant the usual half-holiday per week during July and August to their clerks

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have finished seeding, with the exception of roots. Prospects are for a heavy crop, especially hay.

*Railroad employment.*—Receipts of the Guelph Junction Railway and Guelph Radial Railway show a falling off. Both are owned by the city.

*Manufacturing.*—Some improvement was noticeable during the month, but conditions generally are below the average for some years past.

## CONDITION OF PARTICULAR TRADES.

*Building.*—These trades had an active month. Plumbers had a busy month on repair work.

*Metal.*—Iron moulders and machinists had a quiet month, with some improvement in some shops. The tube mill started to work two shifts night and day.

*Woodworking.*—Woodworkers, carriage workers, piano and organ workers and upholsterers had a quiet month.

The *printing and clothing* trades had an active month.

*Food and tobacco preparation.*—Cigar-makers had a busy month. Bakers and confectioners had an active month.

*Textile.*—Carpet weavers had an active month.

*Unskilled labour.*—The demand in this line showed improvement, but there was a considerable number seeking employment including both English and foreign immigrants.

## BERLIN, ONT., AND DISTRICT.

*Mr. R. F. Gofton, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The labour market improved somewhat during the month, through there were still about one hundred skilled and unskilled workmen out of employment, and scarcely any civic improvement work was underway until near the end of the month. Twelve building permits were issued for the erection of residences and other structures. The Kaufman Rubber Company is making good progress on construction. The salary of the chief of the fire brigade was increased \$50 per year, and the regular firemen's pay \$25 per annum. The Western Steel Company, which operated its plant on the nine-hour day system up to the middle of the month, notified its employees that on and after the 11th, ten hours a day would be the rule. The piece workers had their wages reduced about 10%, with Saturday afternoon off. The bricklayers and masons went on strike on May 1st, for an increase on the old rate of 40c. an hour, but after being out ten days accepted a 35 cent scale of nine hours, being a reduction of 45c. per day.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers finished seeding and planting and reported crops very

favourable. *Fishing and lumbering* were very quiet.

*Manufacturing* was also quiet except in a few establishments.

#### CONDITION OF PARTICULAR TRADES.

The *building trades* were rather quiet, except painters and decorators, who were well employed. In the *metal trades*, with the exception of steam engineers, electrical workers and linemen, bicycle workers, tool sharpeners and horseshoers, who were fairly well, employed quiet conditions prevailed. In the *wood-working and furnishing trades*, quietness was the rule, but upholsterers found employment active. The *printing, clothing and food and tobacco preparation trades* were more or less active, excepting garment workers, glove makers and boot and shoe workers who were rather quiet. In the *leather trades*, conditions were better than in the previous month, while in the *miscellaneous trades* active conditions prevailed. *Unskilled labour* was poorly employed.

#### WOODSTOCK, ONT., AND DISTRICT.

*Mr. M. W. N. McEltheran, correspondent*, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Skilled labour was fairly well employed during May, though the unskilled labour market was overcrowded. On the whole conditions showed an improvement over the previous month. Corporation work of a general nature was the most active. The trades generally, were busier than during April. Transportation increased slightly, and towards the end of the month retail trade picked up considerably. Tenders were asked for for the erection of a parish hall to be known as the Grey Memorial Hall. The estimated cost will be from \$12,000 to \$15,000.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture*.—Farmers had a very good month. Seeding operations were well

completed by the middle of the month, but root and corn planting was somewhat delayed owing to the wet weather. Prices for farm produce remained high, butter ranging on the local market from 30c. to 32c. per lb., while the creameries realized from 27c. to 29c. Cheese sold for 10c. to 12c. on the local cheese boards. Hay took a drop, and towards the end of the month sold for \$10.00 per ton. The crops give evidence of being exceptionally good; in some places the barley was heading out. The county of Oxford received during the month something over \$26,000 from the Ontario Government as their proportion for moneys spent on good roads.

It is expected that by the first of July, the first trains will be run over the St. Mary's and Embro extension of the C. P. R. Work was being rapidly pushed forward to connect with the main line near Woodstock.

#### CONDITION OF PARTICULAR TRADES.

*Building*.—Bricklayers, masons, carpenters, lathers and plasterers had a quiet month, not much building being projected, apart from some dwellings. Painters and decorators were very active.

*Metal*.—Moulders were nearly all steadily employed, though there was no special activity. Machinists and engineers were quiet. Electrical workers were very busy, it being difficult to keep up with the work. Towards the end of the month the Bell Telephone Company had a squad of linemen working in the district. Stove mounters were fairly well employed. Horseshoers reported a falling off in employment.

*Woodworking*.—Woodworkers were growing busier, though full staffs were not yet on. Furniture workers were busy on the cheaper lines of case goods, etc. Later, the demand for these goods fell off, and in its place came a demand for a better grade of chairs and sideboards, with stocks not very complete. Woodcarvers were quiet. Church organ makers reported a very busy month, with orders ahead. Workers in reed organ factories were quiet, and the same may be said of piano makers. Wire fence makers

were very busy, orders being unusually good. Carriage and wagon makers were quiet, a number of men being still out of employment. In one factory work might be termed normal. Coopers were quiet.

*Printing.*—Printers and pressmen were steadily employed.

*Clothing.*—Journeymen tailors were busy.

*Food and tobacco preparation.*—Bakers and confectioners were hardly normal. Butchers and meat cutters were quiet, owing to difficulty in getting suitable carcasses. Cigarmakers reported no improvement over the previous month.

*Leather.*—Tanners and curriers were busy.

*Miscellaneous.*—Barbers reported an improvement over the previous month. Laundry workers continued very active.

*Transport.*—Freight handlers were busier than during the previous month, as were also express drivers and cartage men.

The *unskilled labour* market was overcrowded.

#### DISTRICT NOTES.

*Ingersoll.*—Trades generally, were very active in Ingersoll during the month. Moulders were very busy, working overtime. Woodworkers and all tradesmen engaged at the Noxon works were working full blast. The Reid Foundry and Machine Company took over the business of the Ingersoll Foundry Company and operations were commenced.

#### STRATFORD, ONT., AND DISTRICT.

*Mr. Jos. T. Carlin, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has improved as compared with last month. In the building trades the season's work is well advanced. Contracts were let for a new Lutheran church this month. Thirty-eight building permits were issued during April; the amount of permits issued the corresponding month of last year was \$53,700, showing a decrease for April 1908, of \$35,388. The reason given for

the decline this year is that the city is will supplied with houses. A new clothing factory has commenced operations on special ordered clothing; from 15 to 20 hands are employed, and the staff will be increased later. Wholesale and retail merchants reported trade very good. There have been no changes in hours of labour or rates of wages.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The crops are looking well and the outlook has not been better for years. The price of butter is 25c. to 27c. per lb.; eggs, 16 to 17 cents per doz.; potatoes, 90c. to \$1.00 per bag.

*Manufacturing.*—Although claiming to have less orders than last year on hand, all the factories were fairly well employed.

##### CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were busy. Painters and plumbers were active, and stonecutters and builders' labourers were well employed. Owing to the alterations in the building of the Grand Trunk Railway shops, a number of machinists and fitters were laid off. Blacksmiths and horse-shoers had a good month. The *woodworking, printing, clothing, food and tobacco preparation, leather, miscellaneous* and *transport* trades were active. *Unskilled labour* found employment scarce.

#### DISTRICT NOTES.

*Listowel.*—The council will submit by-laws to the ratepayers on June 22, for \$18,000 to erect an electric light plant, and for \$6,000 for waterworks purposes.

*St. Mary's.*—A contract has been received for five hundred carloads of St. Mary's crushed stone. This will give employment to more men in the crushing mill and quarries.

#### LONDON, ONT., AND DISTRICT.

*Mr. A. Wootton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The month of May was disappointing to workers in foundries and factories, as

it was hoped that business would brighten. It has not done so to any appreciable extent. There is hardly a factory or foundry in the city that is not running with a considerably reduced staff. As was expected in the building trades, the greatest activity has prevailed, the following buildings having been commenced: Hygienic Institute, \$50,000; McMahon & Granger's wholesale clothing warehouse, \$22,000 Smallman & Ingram's departmental store; Geo. White & Son's engine and boiler works, \$15,000; Fair Ground buildings to be painted; public school, \$22,000; and the London Concrete Machinery Co's addition. Work has also commenced on the paving of Dundas St. for five blocks, and on the north end trunk sewer. The customs returns for April showed a marked decrease from the same month last year.

The police department has granted increases to the force as follows:—

Chief of police, from \$170.40 to \$187.44 per month.

Sergt.-major, from \$99.08 to \$108.99.

Detective sergeant, from \$89.84 to \$98.82.

Three sergeants, from \$84.53 to \$92.98.

Two detectives, from \$84.53 to \$92.98.

Two acting sergeants, from \$2.50 to \$2.75 per day.

Nineteen first-class constables, from \$2.23 to \$2.45 per day.

Six second-class constables, from \$1.90 per day to \$2.09 per day.

Eleven third-class constables, \$1.75 to \$1.92 per day.

From these sums there is deducted some six per cent. for the police benefit fund.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers were all working, with trade prospects fairly good. Carpenters and lathers were busy. Painters reported not so much repair work as usual. Plumbers were a little busier. Builders' labourers were almost all working.

*Metal.*—Moulders reported trade only fair, reduced hours still being worked. Iron workers were not very busy. Linemen were busy, with stove mounters slack, and meta and brass workers working short hours.

*Woodworking and furnishing.*—Carriage and wagon workers were not very busy. Carbuilders were working more steadily than they were.

*Printing.*—Printers were nearly all engaged, but some of the job offices were slack. Lithographers were busy.

*Clothing.*—Journeyman tailors were very busy. Garment workers reported trade fair. Boot and shoe workers were busy.

*Food and tobacco preparation.*—The local biscuit and candy factories continued on short time. Cigarmakers were dull.

*Leather.*—Tanners were busy.

*Miscellaneous.*—Furriers were working only four days a week. Broom makers reported trade good.

*Transport.*—Train crews had a bad month, a number of enigneers and firemen having been set back. Draymen were very slack, but teamsters were busy.

*Unskilled labour.*—Civic contracts have furnished work for a large number, but there were hundreds of idle men about.

#### ST. THOMAS, ONT., AND DISTRICT.

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in the condition of the labour market during May compared with the preceding month, except that activity was greater in the building trades. During the month, all mechanics engaged in this line were well employed. During April, building permits issued totalled \$27,000. On May 12th, the working hours of the Pere Marquette shops were reduced from ten to eight, and a few men were dispensed with. However, it was found necessary to return to full time on May 19th, and since that date the men employed in these shops have been working full ten hours. Twenty-five men employed in the Michigan Central round-house had their wages reduced five cents per day. The men affected were chiefly cleaners and sweepers. Conditions in the Michigan Central shops remained unchanged. An order received towards the latter part of May was responsible for the car shops closing down until the end of the month. During this time the only men employed in this department were men engaged in doing work which was absolutely neces-

sary. While the locomotive shops were also closed down, a good part of the time, a number of men found employment part of each day. Men working in the round-house were kept busy on repair work. Just how long this condition will remain in effect cannot be ascertained, but it is expected that before long, the shops will resume regular time. An effort was made to have free postal delivery inaugurated, but as the streets had not been properly numbered, it was necessary to postpone arrangements for the present. Friendly relations prevailed between employers and employees.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The favourable weather conditions for the past few weeks have done much to assist the farmers in getting their seeding done, and there promises to be good crops in this locality. Wheat shows above medium, the slow growth last fall being responsible for lightness in the crop. The hay crop promises to be very heavy in this locality. Fruit is showing up well.

*Manufacturing.*—Local factories have been kept well employed, with the exception of the Canadian Iron and Foundry Company, which is still working short time.

The *building trades* were actively employed during May, but iron moulders, iron workers, machinists and blacksmiths had a quiet month. Furniture employees were well employed, and printers had a busy month. Tailors were well employed. Bakers and confectioners reported the month much more active than the preceding one. While there were a number of railway employees laid off, those who were kept in the service reported the month an active one. Employees on the spare list had an average month. Street railway employees were well employed. *Unskilled labour* was well employed, and men really desirous of procuring work had no difficulty in doing so.

#### CHATHAM, ONT., AND DISTRICT.

*Mr. Alex. Gregory, correspondent* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was a slight improvement in the labour market during the past month, although there are still a number who are only able to secure a few days' work at a time. The building trade so far has been very dull. Only seven building permits have been issued since the 1st of January, the highest being for \$1,800. Repairing and remodelling is all that can be looked for, for a time at least, and in consequence the planing mills are not running to their full capacity. Foundry and machine shops have fared much better, and are running full time with the same number of men as in 1907. The carriage trade is only fair, as in one instance the factory is only employing about one third of the usual number, while the Chatham wagon works, which build wagons and carts only, are running steadily and report a large number of orders on hand. The Chaplin wheel works, which usually employ about one hundred men, are running three or four days a week, with about forty-five hands.

The box factory is now fully equipped, and is running overtime two days a week, and full time the other four. Orders are on hand for 200,000 boxes, and about fifty men and boys are employed. The Wolverine brass works employ about forty men and boys at wages from \$1.00 to \$3.50. The latter figures are for skilled nickel platers.

On the whole, trade is far behind that of the corresponding month of 1907, and the predictions are that only an abundant harvest with present prices will bring a change in the district.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The month has been exceedingly favourable to the farmers, who have sown a large amount of sugar beets and corn, and are at the present time

preparing for beans. Notwithstanding the financial stringency, the farmers hold out for higher prices. The prospects were never better at this time of the year for an abundant harvest in this district. The indications are that the fruit crop also will be the largest for some years.

*Railroad construction and employment.*—The electric cars are now running to Lake Erie and are a great convenience to the farmers and the travelling public.

#### CONDITION OF PARTICULAR TRADES.

Painters were fairly well employed, and plumbers and paper hangers were busy. Other building trades were quiet. Machinists and moulders reported trade improving. Printers and tailors reported conditions good. Bookbinders were quiet. With bakers and confectioners trade was fair. There was no demand for unskilled labour.

#### WINDSOR, ONT., AND DISTRICT.

*Mr. D. Mitchell, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly well employed in all branches during May. The paving of several streets and the laying of cement sidewalks gave employment to numbers of men and teams. The building trade was not as busy as a year ago, owing to the money stringency, and there is a house famine, some families being forced to live in Detroit. Houses suitable for mechanics renting at 10 to \$15 per month are urgently needed. One large real estate dealer stated that he could rent 100 houses if he had them. Wholesale and retail trade was fairly good. There were no strikes.

#### CONDITION OF LOCAL INDUSTRIES.

Owing to the rain, farmers were late with seeding, but the prospects are favourable for a large crop of hay and fruits, and the fall wheat is looking well. Manufacturers were fairly busy.

#### CONDITION OF PARTICULAR TRADES.

All connected with the *building trades*, with the exception of bricklayers, were well employed. Conditions were fairly good in the *metal and engineering trades*, with horseshoers and blacksmiths busy. All branches of the *woodworking and furnishing trades* were fairly well employed. Printers and pressmen, journeymen tailors and garment workers were fully employed, also cigarmakers, but leather workers were somewhat quiet. The *miscellaneous trades* had a fair month, but *transportation* was not heavy and several train crews were laid off. Steamboatmen, street railwaymen, draymen and teamsters were fairly busy. *Unskilled labour* was fairly well employed.

#### SAULT STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The supply of labour during May was greatly in excess of the demand. This was largely owing to the shut-down of the steel plant and blast furnaces. The Lake Superior Company's power house and the Tagona Water and Light Company's plant were totally destroyed by fire. This necessitated the closing down of the Sault Ste. Marie Pulp and Paper Company's pulp mill, as it depended on the destroyed plants for its power. The shut-down of the pulp mill will be temporary, as it is expected to be running again before June 15. The paper mill of this company was totally destroyed by fire. The fire caused a loss of about \$350,000 and two of the company's employees lost their lives. Steamboat men report passenger traffic ahead of last year to date. Package freight was normal, but there was very little movement of other freight. The O'Boyle Brothers Construction Company is building a five mile spur for the Superior Copper Company from its mine to the Algoma Central Railway. This work will be pushed ahead as rapidly as

possible and is expected to be completed before October 1. About 250 men are employed at wages of from \$1.50 to \$2.50 per day. Business was quiet in nearly all lines. Factories were running light. Traffic through the ship canals here was light, few of the large freighters running. This was largely accounted for by the stock of ore at lower lake ports. The skilled trades generally were quiet.

#### PORT ARTHUR, FORT WILLIAM, ONT, AND DISTRICT.

*Mr. R. B. Harston, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The opening of navigation found the labour situation at the head of the Great Lakes in a healthy if not particularly active condition. Extensive building operations, both at Port Arthur and Fort William, combined with the resumption of work at the sawmills and considerable railway work in the vicinity, has given employment not only to resident workingmen, but has engaged many of those who spent the winter in the woods of New Ontario. There is, however, little demand for unskilled outside labour nor will there be until the Grand Trunk Pacific and Canadian Northern railways decide definitely on their programme of construction for the coming summer.

##### PARTICULAR INDUSTRIES AND TRADES.

*Agriculture.*—With the growth of Port Arthur and Fort William, agriculture is receiving more attention than formerly, but the demand for labour in this department is as yet limited.

*Building.*—Carpenters, bricklayers and masons have found no difficulty up to the present in obtaining employment on the various new buildings in course of erection in both towns. In this respect Fort William is the leader this season. In addition to the work of erecting elevator "D" for the C.P.R., at a cost of \$650,000, building permits have been issued for more than \$300,000 worth of business

houses and dwellings. In Port Arthur while few contracts of importance have as yet been let, it is understood that local architects are figuring on the erection of several brick and stone buildings in the business portion of the city, while building operations in the residential section show normal activity. All tradesmen are obtaining work at rates of pay on a par with last year and there appears to be little fear that any strikes will interfere with the season's operations.

*Fishing.*—A fleet of some 25 tugs and as many sailing craft will put to sea by the middle of the month and there is every reason to expect a banner year in the fishing industry. There are some 200 men employed in this business, exclusive of the force maintained at the depots and a conservative estimate of the catch places it at \$175,000.

*Railway construction.*—At present the Grand Trunk Pacific has ceased grading on the branch having its terminals at Fort William and is confining its operations to the completion of the bridge at West Fort William and to laying some steel on the grade completed last season. The Canadian Northern has already hired a great number of men for section work on the main line to Winnipeg, and the regular work on the spring repairs and betterment of way are being rushed all along this section. The Canadian Pacific is rushing the work on the double tracking of the line to Winnipeg and hundreds of men will find employment during the summer on this construction. It is expected that the work will be completed by the middle of October, in ample time to aid in the eastern movement of the crop.

Local improvements begun last season by both city corporations are being continued with considerable activity. The work is confined principally to the improvement of the streets and the extension of the sewerage and waterworks systems, and is giving employment to journeymen as well as unskilled labourers.

*Lumbering.*—The last winter has been a record breaker in the lumbering industry. The weather proved splendid for work in the bush and the output of ties alone will total over 3,500,000. In this district there were some 35 camps employing in

the neighbourhood of 3,300 men, and while all these, with the exception of some 500 employed on the drives, have been paid off in Fort William or Port Arthur all have been able to find employment either here or in the West, and there are few if any competent men on the streets. Many have found employment in the Port Arthur mills operated by the Pigeon River and Virgars Shears lumber companies which have opened for the season, and this number will be increased in the near future when the mills put their double shifts to work.

*Mining.*—The Atikokan Iron Company is preparing to resume work with its blast furnace in Port Arthur and at present some thirty men are employed at the plant, completing the work preliminary to blowing in. It is expected that the furnace will be in full operation by the end of the month. The plant of the Canadian Iron and Foundry Co., Ltd., employing over 200 men, is located at West Fort William and has for the past fortnight been running full time. The company has contracts in sight that will test the capacity of production for the entire season, and it is probable that the number of employees will be increased in a short time.

*Prospecting.*—Greater activity prevails in this direction than ever before. Finds during the winter were most promising and not only will a larger area be covered this year than last, but much more extensive development will be done. This applies more particularly to iron, silver and gold. In connection with the latter two owners of some properties are showing their faith in the value of their mines by erecting mills and other necessary plant for the reduction of ore produced by them and the output of others in their locality.

#### WINNIPEG, MAN., AND DISTRICT.

*Mr. John Appleton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

There is a large surplus of unskilled labour in Winnipeg endeavouring to get

employment. The situation is more serious than it has been for some years. Apparently it is caused by immigration into Winnipeg of large numbers who expected to get employment upon railroad construction work, but the demand for labour for this class has not been nearly so great as was expected. Reports are current, which cannot be officially verified, to the effect that the Grand Trunk Pacific will employ some thousands of men in the course of a few weeks. In the meantime there are large numbers in Winnipeg suffering acutely through not being able to get employment. The demand for men, as compared with the corresponding period of last year, is not satisfactory from the workmen's standpoint. No trade can be said to be active, and there are more hands asking for work than can be employed. Transportation appears to be steadily increasing and it is reported from several jobbing houses that the demand for goods is improving although storekeepers are not buying anything but what is actually necessary. According to bank clearings the volume of business is just about the same as last year. To give employment to as many of the unemployed as possible it was proposed to pay them less than the municipal minimum wage. The reason given for this course was that the men taken on in that way could not do the work as satisfactorily as those with experience, and the engineer in charge protested that he could not do the work within the estimate unless he were permitted to select the men to do it. The work in hand is that of street paving and the city engineer has to tender upon this in competition with contractors. Another objection to paying less than the minimum wage came from the Trades and Labour Council of Winnipeg. Considerable relief was afforded by the Street Commissioner's department which gave occasional days of work to those with families.

The report of the Assessment Commissioner for the city of Winnipeg was submitted to the city council in May and showed the growth of the real value of property, and of assessable personal property to be as follows:—

	Real property.	Personal property.	Total assessable property.
1900.....	\$ 21,316,000	\$ 3,761,460	\$ 25,077,460
1901.....	22,355,600	4,050,170	26,405,770
1902.....	23,938,860	4,676,950	28,616,810
1903.....	30,873,910	5,399,490	36,273,400
1904.....	41,106,870	7,108,080	48,214,950
1905.....	53,786,070	8,941,560	62,727,630
1906.....	69,624,550	10,887,175	80,511,725
1907.....	93,855,500	12,333,333	106,188,833
1908.....	103,051,500	13,349,160	116,400,660

The assessor's estimate of population for eight years back is as follows:—

Year.	Population
1900.....	42,534
1901.....	44,778
1902.....	48,411
1903.....	56,603
1904.....	67,265
1905.....	79,795
1906.....	101,057
1907.....	111,717
1908.....	118,252

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Crop reports from all parts of the Canadian West are of the most hopeful kind. In every district there has been an abundance of moisture and the temperature has been most favourable to healthy growth. It is the consensus of opinion among experts that the conditions are more favourable than they have been for many years. As compared with the season of 1907 all crops are fully three weeks ahead.

*Fishing.*—The fishing fleet at Selkirk has started for the fishing grounds of Lake Winnipeg and a more than ordinarily active season is expected.

*Lumbering.*—Very little employment was offering.

*Railroad construction.*—Although a very large amount of railroad construction is being carried on there are more men endeavouring to get employment than there is a demand for.

#### CONDITION OF PARTICULAR TRADES.

Every branch of the *building trade* is quiet. The foundations of the new home for the Winnipeg branch of the Bank of Nova Scotia are being put down and this building will be erected during the sum-

mer. It is reported that the contract for the erection of the new union depot for the accommodation of the Canadian Northern, the Grand Trunk and the Grand Trunk Pacific has been let. The contract price is just under \$900,000. So far, however, no work has been done. A large apartment block is being erected upon Broadway and there are several new residences being built. The volume of building on the whole is much less than it was last year and it is feared that it will be small for the whole year. This unexpected diminution of the volume of building has left many mechanics, in all lines of the building trade without employment. Many are leaving the city, but those with families find it difficult to do this. The brick yards at St. Boniface are also very quiet and some have large stock on hand. Very little making will be done this season as the stocks on hand will suffice to meet the demand.

In the *metal trades* conditions are slightly better than in most other trades, but the prospects depend largely upon the crop outcome.

All the *woodworking trades* are quite in sympathy with dullness in the building trades.

*Printing.*—Bookbinders are very slack and the same may be said of letter press printers. The lithographers say that business shows signs of improvement. Some of the daily newspapers have cut down their staffs slightly.

*Clothing.*—Slackness prevails in the clothing trades; the fine spring weather did not induce the activity that was expected.

*Food and tobacco preparation.*—Confectioners and bakers are finding trade slack. In the cigarmaking industry conditions are normal.

*Leather.*—Saddlers are busy and trade prospects are regarded as being very satisfactory.

*Miscellaneous.*—There is a large number of men seeking employment in indoor work and they find it very difficult to get.

*Transport.*—In transportation circles it is said that the number of men employed is very much below the usual standard. In the shops quite a number are being laid off.

## BRANDON, MAN., AND DISTRICT.

*Mr. S. P. Stringer, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Building operations were not in full progress, but the season is early yet, and all those in the building trade still unemployed will likely find employment in a few weeks. Plans are in the hands of the architect for a new convent, 46x76, three stories high, to be constructed of brick with cut stone facings. There was no special activity in any of the trades, excepting with painters and paperhangers who were active. Transportation companies were not busy, and wholesale and retail trade was only fair.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The seeding of wheat is completed, and the splendid weather has made the farmers very optimistic as to the future. The farmers are now busy planting the coarser grains and a record amount of this kind of work will be done. Considerable attention will be given this year, to the raising of vegetables. The A. E. McKenzie Company, which was awarded the contract of delivering seventy-five thousand bushels of oats to be used for seed in the western provinces, fulfilled its contract. The stock was brought to Brandon, cleaned, inspected, sacked and distributed to different points along the Canadian Pacific Railway, principally in Saskatchewan.

*Manufacturing.*—The H. H. H. Manufacturing Company is installing new machinery.

*Railroad construction and employment.* Canadian Northern Railway contractors are now busy on the Rossburn extension and are at present grading the line through the village. The Grand Trunk Pacific Railway Company is sending out additional men for construction work, and the work is being hurried.

*Other industries.*—The annual meeting of the Brandon Winter Fair and Live Stock Association was held during the month. The reports of the different

officers showed the association to be in a flourishing condition. The report of the winter fair of 1908 was received and adopted. In every department a large increase was shown over the previous year.

## CONDITION OF PARTICULAR TRADES.

Painters, decorators and paperhangers found employment brisk, but plumbers, stonecutters and builders labourers were somewhat quiet. Dullness was the rule in the metal trades, and in the *wood-working and furnishing trades*. Printers, journeymen tailors, garment workers, bakers, confectioners, butchers, meat cutters, and ice-handlers were active. Cigarmakers found conditions normal. Quiet conditions prevailed with tanners and curriers, and with furriers. Barbers, clerks, stenographers, delivery and laundry workers were active. Passenger traffic remained heavy, otherwise transportation branches were somewhat quiet. Carters and draymen were active. The city employed a number of unskilled labourers, and others have found employment with the farmers, but there still remained a surplus unemployed.

## DISTRICT NOTES.

*Bird's Hill, Man.*—Spring commenced a month earlier than last year and there is a much larger acreage under cultivation. Land prices are increasing rapidly.

*Prince Albert, Sask.*—The ratepayers endorsed an expenditure of \$90,000 on the erection of a high school.

*Saskatoon, Sask.*—The ratepayers of Saskatoon have endorsed some heavy expenditure for civic improvements, viz., \$55,000 for a municipal hospital; \$25,000 for a fire hall and its equipment; \$20,000 for traffic attachment to the new C.P.Ry., bridge, and \$130,000 for an extension to the waterworks and sewerage system.

*Virden, Man.*—Farm help is very scarce.

*Fillmore, Sask.*—By a recent concession, where 40,000 pound cars are not available a farmer having from 700 to 800 bushels of wheat to ship can have a 65,000 pound car, with the privilege of paying freight only on the actual weight of grain loaded into the car.

## REGINA, SASK., AND DISTRICT.

*Mr. Hugh Peat, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the month, in so far as skilled labour was concerned, was practically the same as during the preceding month. A few building permits have been taken out for dwelling houses, etc., but with the exception of the new Land Titles' Office and the Post Office there are no other large buildings under construction, with the result that the building trade is very quiet and numbers of men are unemployed.

Tenders for the Provincial Legislative and Executive buildings are being called for, and will be received up to 4.30 p.m., Monday, June 22nd. Each tender must be accompanied by an accepted cheque for \$100,000 payable to the Commissioner of Public Works at Regina, which deposit will be forfeited if the tenderer fails to execute the contract when requested.

The organization committee of the Trades Council reported the completion of work in connection with the Tailors' Union. Prospects are good for healthy progress as the best of feeling prevails between employers and employees. The working tailors have drawn up a contract with regard to the payment of wages fortnightly, which was accepted by the employers.

All the unions in the city are affiliated with the Trades and Labour Council with the exception of the Plasterers' Union and the Bricklayers and Masons' Union. This latter organization seceded last month.

Many labourers have found employment on street and park improvement work, but building labourers are inactive.

Owing to the number of men who are unemployed in the carpenter's unions, it was decided to petition the contractors with a view to reducing the hours of work from 10 to 9 per day in the hope that it will provide work for a larger number of men.

A deputation from the Regina Trades and Labour Council waited upon the

Provincial Government praying for the introduction of a Workman's Compensation Act and for the appointment of a Factory Inspector. The deputation was cordially received and their representations promised consideration.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Reports from the surrounding districts are very encouraging. It is confidently anticipated, from the favourable conditions so far, that the yield this year will be an exceptionally good one.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, stonecutters, masons, carpenters and joiners, and lathers were dull. Painters and decorators, plumbers, gas and steam fitters were fairly active. Builders' labourers were very dull.

*Metal.*—Electrical workers and sheet metal workers were dull.

*Printing.*—Printers were fairly active, linotype operators being in demand and the general condition of the trade is brighter than at any time this year.

*Food and tobacco preparation.*—Cigar-makers were fairly active and reported improving conditions.

*Miscellaneous.*—Barbers were somewhat quiet, and laundry workers were active.

## MOOSEJAW, SASK., AND DISTRICT.

*Mr. J. R. D. Bastien, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The condition of labour during May was slightly better than in April, as there was more activity in the building trades, though there is little or no improvement work in connection with streets or walks going on at the present time. It is intended in the near future to improve the City's Electric Power Plant. There are a large number of private residences, etc., under construction. Transportation, as

far as freight is concerned, has not improved, but passenger traffic is still heavy, and the Soo-Spokane train, and No. 1 & 2 west to Calgary are again in service. Several work trains were also put in commission. Six steam shovels are in operation out of Medicine Hat and Moosejaw, each giving employment to about 125 men in the various works connected with their operation. With regard to the employment of skilled workmen, there has been no greater amount of work than labour available. There is sufficient help to be had for almost all kinds of work. In the railway shops the men are still working short time, the erecting shops being closed for one week each month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Should the present favourable weather continue the greatest harvest ever known here will result. The grain is practically all sown and mostly showing above ground, being fully six weeks in advance of last year. With the increased acreage, transportation is likely to be taxed to its greatest capacity.

*Lumbering* was fairly active.

*Manufacturing and mining* were somewhat dull, but very active conditions prevailed with *railroad construction* and employment, particularly in the northern parts of the district. A great amount of road improvement work was underway.

#### CONDITION OF PARTICULAR TRADES.

The *building* trades were fairly busy, with the *clothing* trades somewhat active, and *food and tobacco preparation* trades very active. *Leather* workers were also fairly busy, while activity was the rule with the *miscellaneous* trades, with *barbers* and *laundry* workers busy. All branches of *transportation* were fairly busy. The demand for *unskilled labour* was scarcely equal to the supply.

### CALGARY, ALTA., AND DISTRICT.

Mr. R. A. Brocklebank, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market improved somewhat during May and a number of men

secured employment on new work, but there were still a number of men out of employment, and on the whole more unemployed than at the corresponding date last year. The prospects for the future are not very bright. No new industries have started and no new civic work commenced. Transportation, and bank clearings improved, but in each case the showing was not as good as for the corresponding month of last year. Wholesale and retail trade showed an improvement over last month. There were no changes in rates of wages or hours of labour. A strike of the workmen employed on the construction of the new city hall took place on the 19th instant in which forty men were affected. The trouble arose over the payment of the men's wages, they wanted to be paid on the works instead of having to go to the office for their pay after quitting work.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Seeding was practically over by the 10th of the month and everything looks promising for a good crop. Vegetation was much earlier this year. The pure Breed Stock Breeders' Association held its annual show and sale May 19-21, at which some 260 head of pure bred bulls were offered for sale; one bull was sold for \$400, the highest price obtained. Prices did not average as high as last year. Beef being lower on the range than it has been for several years and money being tight.

*Lumbering*, was not as brisk as last year, and the same may be said of *manufacturing*.

There was very little *railroad construction* work being done in southern Alberta. The only work of this nature under way was between MacLeod and Lethbridge, where some 200 teams and a number of men were employed.

#### CONDITION OF PARTICULAR TRADES.

Quiet conditions prevailed in the *building trades*, except with *painters* and *paper-hangers* who were active. The same applies to the *metal and engineering trades*, with the exception of *electrical workers* and *linemen*, *blacksmiths*, *sheet*

metal workers and jewellers, who were active. In the *woodworking trades*, woodworkers, carriage and wagon makers, and car builders found employment active. The *printing trades* were quiet, while the *clothing trades* were busy. *Leather* workers and saddlers were active; also those engaged in *miscellaneous trades*. Barbers, clerks, stenographers were busy. Activity was the rule in all branches of *transportation*, and among *unskilled labourers*.

#### NELSON, B. C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent*, reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during May was quiet throughout the Kootenay district, there still being a surplus of men, though considerable improvement has taken place in comparison with the past two months, owing chiefly, to the starting up of the British Columbia Copper Company's mines in the Boundary district. The Customs returns for the month of April were reported to amount to \$34,952.50 as against \$23,066.23 for the same month in 1907, showing a substantial increase for April 1908.

##### CONDITION OF LOCAL INDUSTRIES.

*Lumbering*.—The lumbering industry is improving slowly, about half the mills now running, though the camps are dull. Apparently the revival of this industry awaits the harvesting of a successful crop in the adjoining prairie provinces. About 2,000 men are employed at present. The common labourer is paid on an average 50c per day less than at this time last year.

*Mining*.—On May 19, the coal miners at the Michel collieries went on strike, the reported cause being the refusal of the company to employ one of the union men at that place. Though it had been reported that an amicable arrangement to continue work had been effected, when the miners reported for duty on the 23

instant, twelve of their number, it is said were refused work. The union then decided to continue the strike, leaving the mines at Michel idle and throwing approximately 1,200 men out of employment. A force of about one dozen, it is reported, have been started to work on the Silver King mine, near Nelson, with the prospect of a larger force being employed. It is reported that the Queen mine at Salmo has been sold to Wisconsin capitalists for \$175,000. At present the property is being opened up by a force of 38 men, and a mill of ten stamps is in constant operation, while there is an additional set of ten stamps at Salmo awaiting the opening of the road, which when in operation will double the capacity. Several other properties in this district are to be opened up this summer.

#### NEW WESTMINSTER, B. C., AND DISTRICT.

*Mr. D. J. Stewart, correspondent*, reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was fairly active with few white men out of employment, but conditions were not as good as at this time last year, although many industries are gradually recovering from the effects of the money stringency. The lumbering industry, which had large stocks left over from last season, is slowly improving, with prospects favourable for a good season's trade. A pottery, where brick, tiles and sewer pipes will be manufactured, is about to be located at Burnaby, near New Westminster, a good body of suitable clay having been secured. A Trades and Labour Council has been formed in this city.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture*.—Seeding in the Fraser Valley was about finished and it is estimated that a 20% larger acreage is under crop than last year. The spring so far has been cold and backward, but is very favourable to the fruit crop. A colony

of settlers from the island of Mauritius have purchased a large tract of land near Mission City, and purpose going into the fruit raising industry.

*Fishing.*—On the Fraser River the fishing industry is very quiet, few spring salmon being taken, for which the fishermen were obtaining good prices.

#### CONDITION OF PARTICULAR TRADES.

Generally activity was the rule in *building, metal and engineering, printing and clothing* trades, and with steam-boatmen and street railway employees; but quiet conditions prevailed in the *woodworking, food and tobacco preparation* and *unskilled labour*.

#### VANCOUVER, B. C., AND DISTRICT.

*Mr. Geo. Bartley, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

On the whole, the condition of the labour market was not satisfactory. A large number of workmen in nearly all branches of industry were unemployed and prospects for the future are not encouraging. With several exceptions the trades were more or less inactive; in some not more than half were working. Real estate dealers reported business normal and that no real estate was being sold on speculation. Rents continued high. The city council passed a by-law fixing the rate of taxation on rateable property at 22.22 mills. For the first time in many weeks bank clearings for the year ending May 7 showed an advance over those of the corresponding period of 1907. There has been a marked improvement in the financial situation throughout British Columbia. A new bank has been established.

Some nine months ago \$300,000 was voted by the ratepayers for the construction of new sewers; up to the present only six gangs of diggers have been put to work, the pipes having not yet arrived. Bonds already voted by the ratepayers,

amounting to \$1,975,000, will be offered for sale within the next two months. By-laws will be submitted authorizing the raising of \$750,000, urgently needed for improvements. The following are the expenditures involved in the sale of civic bonds:—Sewers, \$300,000; streets \$230,000; bridges, \$1,170,000; hospital, \$130,000; schools, sum, \$175,000.

#### CONDITION OF PARTICULAR TRADES.

The *building trades* were only partially employed; the number employed and unemployed was about equal, and the members of these trades were not sanguine of immediate improvement. In the *metal, engineering and shipbuilding trades* about two-thirds of the moulders were unemployed; the shops were all working with reduced staffs. Blacksmiths reported trade fairly good, but boilermakers were somewhat quiet. Quiet conditions prevailed in the sheet metal trade, while jewellers reported trade good on repairs, but practically no manufacturing under way. Comparative inactivity prevailed in the *woodworking, printing and clothing trades*, with a number of printers out of work. In the *food and tobacco preparation trades*, the bakers, confectioners, etc., a large number were out of employment. Cigarmakers reported trade picking up, but a majority of the cigarmakers were still unemployed. Quiet conditions prevailed in the *miscellaneous trades and transportation*. Passenger traffic, however, was very heavy. A very large number of unskilled workers were unemployed.

#### VICTORIA, B. C., AND DISTRICT.

*Mr. Ditchburn, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

During the past month labour has been well employed, practically all the industries being run to full capacity. All surplus labour was not employed, and the city yet contained a number of unem-

ployed men. In the building trades this condition was particularly noticeable although work approximating the value of \$500,000 is being carried on. It was expected that by this time much of the surplus unskilled labour would have been consumed in new city local improvement works for which by-laws were passed over a month ago, but owing to the question having arisen as to the legality of the vote on the by-laws this work has not yet been started. It is expected that it will be settled in the very near future. During April the building permits taken out at the city amounted to \$128,600. This is the largest monthly total for the year up to date. The majority of the permits were for dwellings, with \$19,000 for repairs to the Mahon Block, and \$13,000 for the new Chinese Girl's Rescue Home.

A new industry has recently been started by the B. C. Foundry Co., of Esquimalt, for the manufacture of Manganese bronze to be moulded into blades for propellers. Local bank clearings for April were \$4,634,089 as compared with \$4,290,782 for the month of March. For the first four months of the present year the aggregate clearings were \$17,588,687 compared with \$16,274,249 for the same four months of last year. Both wholesale and retail trade were in a healthy condition.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers throughout the district are in good shape owing to the favourable weather. It is expected that crops of fruit, vegetables and grain will be above the average.

*Fishing.*—It is said that there will be very little done in the fishing industry this season, and at present but very few of the traps are being put in operation for the early run of salmon.

*Lumbering.*—All the mills here are still running to full capacity and the factories in connection with them are also busily employed.

*Brick-making.*—All the brick-making plants in the city, of which there are three, have all been doing a good business. The Sidney, Brick and Tile Company, at

Sidney is now installing machinery and will have a capacity of 48,000 per day. The Silica Brick Co's works at Atkins is also turning out a great amount of their new brick. This makes five brick plants in and around the city.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches of the building trades have been well employed during the month, though there are still some in the carpentering, painting and plumbing lines who have not had steady employment. This is owing to recent arrivals.

*Metal, engineering and shipbuilding.*—Iron moulders and iron workers were fairly busy. Machinists found trade in a normal condition. Lineman have been well employed of late putting in new cables in the business part of the city. Stove mounters and moulders were well employed. Boilermakers, and iron ship builders have been employed mostly on repair work. Shipwrights and caulkers have found trade not so brisk as during the past few months.

*Woodworking and furnishing.*—Woodworkers were moderately busy as also were patternmakers.

*Printing.*—Printers and pressmen in the newspaper business have been well employed and commercial job printing has been fairly brisk. At the same time there were plenty of men on hand and a few instances have been noted of men out of regular employment.

*Clothing.*—Journeymen tailors have been well employed, Garment workers were busy.

*Leather.*—Harness manufacturers reported business very active and the outlook is bright.

*Miscellaneous.* With the great number of visitors coming to the city the hotel and restaurant employees have had a busy time.

*Transport.*—The rate war existing between the C. P. R., and Inland Steam Navigation Co., between Victoria and Puget Sound Ports, has made business good for hack and auto drivers.

*Unskilled.*—While there is a good deal of unskilled labour employed at present, a large number are still out of work.

## NANAIMO, B. C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market remained unchanged from last month. There were still a large number of men unemployed especially among loggers and millmen. Business men reported trade quiet and uncertain, There were no changes in rates of wages or hours of labour.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have nearly completed seeding.

*Fishing.*—There was no activity outside of the local trade. The whaling station on the west coast is having fair success in spite of heavy weather.

*Lumbering.*—At the sawmills, work was very quiet. The logging camps were mostly idle.

*Mining.*—The coal mines in the district were still working short time, and a number of men were out of work. It is hoped the northern trade will soon open up.

*Railroad construction and employment.*—Work on the railway extension is being hurried as fast as possible, but plenty of men are available. Land clearing is still going on, the labour employed is mostly Oriental.

## CONDITION OF PARTICULAR TRADES.

Quiet conditions prevailed in the *building trades*, excepting with carpenters, joiners, and plumbers who reported employment active. In the *metal trades* machinists and engineers were quiet, but blacksmiths were fairly well employed. Carriage makers were also fairly well employed, but not so well as is usual at this time of the year. The other trades were somewhat quiet. In the case of unskilled labour dullness was the rule, though some labourers were provided with civic improvement work.

## ORIENTAL IMMIGRATION—REPORT OF THE DEPUTY MINISTER OF LABOUR ON HIS MISSION TO ENGLAND RE IMMIGRATION TO CANADA FROM THE ORIENT AND FROM INDIA IN PARTICULAR

THE report of Mr. W. L. Mackenzie King, C. M. G., Deputy Minister of Labour, on his mission to England during the months of March and April, 1908, to confer with the British authorities on the subject of immigration to Canada from the Orient and immigration from India in particular, was presented to parliament under date of May 4th, 1908.

The opening paragraph of the report sets forth the circumstances and objects of the Deputy Minister's mission, as detailed in a report of the committee of the privy council approved by His Excellency the Governor-General on March 2nd, 1908 (\*). This was followed by a brief outline of Mr. King's movements in conducting negotiations with the British authorities (\*\*). The full text

of the remainder of the report is as follows:—

## NATURE OF INTERVIEWS.

It is, perhaps, sufficient to direct attention to the words of the report of council above quoted, to the effect that foreign relations and considerations of high imperial importance are involved in the question of Oriental immigration, to make it apparent that a minimum of publicity is desirable in the matter of representations bearing upon this subject. It has seemed in the public interest, therefore, that the several representations and the views of the authorities of Great Britain and Canada, respectively, should be set forth, together with an account of the negotiations, in a confidential memorandum to accompany this report, and that reference should here be made to such phases only as seem deserving of explicit

(\*) The text of this report was published in the *Labour Gazette* for April, 1908, at page 1236.

(\*\*) For a statement in this connection see the *Labour Gazette* for May, 1908, at page 1360.

mention, and the results of the negotiations outlined just in so far as may be necessary to afford a satisfactory understanding of the outcome of the mission. The adoption of this course will explain the brevity of this report.

The question of the migration of the peoples of the Orient, and the problems to which it gives rise, whether it be in connection with immigration or emigration as between different parts of the British Empire, or between portions of the British Empire and foreign countries, is by no means a new one to the British authorities. Australasia, South Africa and India have each forced a consideration of the subject upon the attention of British statesmen for years past. Of the outlying dominions, Canada's experience has been the most recent, though in kind, the issues and possibilities involved are much the same. As between Great Britain and Canada, the effect of this is not without its advantage to the Dominion. It has afforded in England a ready appreciation of Canada's position, and an understanding of the sort of considerations of which it is necessary to take account. That Canada should desire to restrict immigration from the Orient is regarded as natural, that Canada should remain a white man's country is believed to be not only desirable for economic and social reasons, but highly necessary on political and national grounds. With this general view is also held the particular one that in matters which so vitally affect her own welfare, Canada is the best judge of the course to be adopted, and that as a self-governing dominion she cannot be expected to refrain from enacting such measures in the way of restriction as in the discretion of her people are deemed most expedient. As a corollary to this right of self-government is the understanding that British international alliances, and British connection, place no restrictions on the right of the Dominion to legislate as may be most desirable in matters affecting immigration. Whilst Canadian autonomy is thus fully conceded and respected, Canada's position as part of the British empire is regarded as affording a sufficient guarantee that the exercise of her plenary powers in this parti-

cular will not be without a due regard to the obligations which citizenship within the empire entails. The attitude of the Canadian government, as evidenced by the present mission, was regarded as affording a most welcome and opportune expression of Canada's recognition of her responsibilities. Nothing could have been more cordial than the appreciation everywhere expressed, that in a matter so vitally affecting the interest of British subjects in remote parts of the empire, Canada should have been the first to seek a conference with the parts affected, that the several policies might be brought into harmony and the wiser counsels of conciliation made to prevail.

The variegated character of the British empire is in no particular, perhaps, more fully exemplified than in the circumstance that within its confines are to be found all the features which the problem of Oriental immigration presents. This fact differentiates to a degree, as compared with countries of a single nationality, some of the factors which are of vital moment in a consideration of the best methods by which to cope with the difficulties that arise, in that whilst new obligations are encountered, opportunities of mutual arrangement and concession are afforded which are often impossible as between countries of distinct sovereignties. A recognition of the good of the whole brings with it an attitude of forbearance and restraint in the several parts, and, what is all important, a comprehensive understanding is rendered possible.

It was clearly recognized in regard to emigration from India to Canada that the native of India is not a person suited to this country, that, accustomed as many of them are to the conditions of a tropical climate, and possessing manners and customs so unlike those of our own people, their inability to readily adapt themselves to surroundings entirely different could not do other than entail an amount of privation and suffering which render a discontinuance of such immigration most desirable in the interest of the Indians themselves. It was recognized, too, that the competition of this class of labour, though not likely to prove effec-

tive, if left to itself, might none the less, were the numbers to become considerable (as conceivably could happen were self-interest on the part of individuals to be allowed to override considerations of humanity and national well-being and the importation of this class of labour under contract permitted) occasion considerable unrest among workmen whose standard of comfort is of a higher order, and who, as citizens with family and civic obligations, have expenditures to meet and a status to maintain which the coolie immigrant is in a position wholly to ignore.

#### CAUSES OF IMMIGRATION FROM INDIA.

My inquiry under Royal Commission into the methods by which Oriental labourers have been induced to come to Canada, which was conducted in the city of Vancouver during the months of November and December of last year, though not extensively pursued so far as the immigration from India is concerned, was quite sufficient to show that this immigration was not spontaneous, but owed its existence, among other influences, to—

(1) The distribution throughout certain of the rural districts of India, of glowing accounts of the opportunities of fortune-making in the province of British Columbia, visions of fields of fortune so brightly hued that many an India peasant farmer, to raise the money for the journey, had mortgaged to the lender of the village his homestead and all that it contained at a rate of interest varying from fifteen to twenty per cent.

(2) The activity of certain steamship agents who were desirous of selling transportation in the interest of the companies with which they were connected and of themselves profiting by the commissions reaped.

(3) The activity of certain individuals in the province of British Columbia, among the number one or two Brahmins, who were desirous of exploiting their fellow-subjects; and certain industrial concerns which, with the object of obtaining a class of unskilled labour at a price below the current rate, assisted in in-

ducing a number of the natives to leave under actual or virtual agreements to work for hire.

A few of the natives may have emigrated to Canada of their own accord, or because of the desire of relatives, but had the aforementioned influences not been exerted, it is doubtful if their numbers would have been appreciable.

#### METHODS ADOPTED TO RESTRICT IMMIGRATION.

How these several influences have been counteracted and an effective restriction obtained by administrative measures in such a manner as to render legislative action unnecessary, will be apparent from an account of what has been accomplished, as the result, in part, of the present negotiations, and in part, of legislative enactments and regulations already in force, the application of which to this class of immigration has not been hitherto wholly apparent.

(1) The misleading effects of the distribution by interested parties of literature of the class above described has been offset by warnings which the government of India has issued, whereby the natives have become informed of the risks involved in emigration to Canada, and of the actual conditions in so far as it is desirable that such should be known to persons about to sever their connection with one country for the purpose of taking up residence in another.

(2) The steamship companies which have been in any way responsible for the recruiting of emigrants, have been given to understand that the governments of Great Britain and Canada, and the authorities in India, do not view with favour any action on their part calculated to foster further emigration from India to Canada.

(3) The power of the steamship companies to ignore the wishes of the governments has been rendered largely inoperative by the application to emigration from India of the regulation of the Dominion government, prohibiting the landing in Canada of immigrants who come to this country otherwise than by a continuous journey from the country of

which they are natives or citizens, and upon through tickets purchased in that country.

(4) The Indian Emigration Act (XXI. of 1883) was framed with the view of affording protection to the natives of India, who, at the instance of private individuals or corporations, might be induced to leave India to work under indenture or agreements for hire in other parts of the empire, or in foreign lands. It was found that once away from India, advantage was not infrequently taken of the necessities of this class of labour, and that individuals were subjected to great hardships and privation. To remedy this, the Act provides that emigration in the sense of the departure by sea out of British India of a native of India *under an agreement to labour for hire* in some country beyond the limits of India, other than the Island of Ceylon or the Straits Settlements, is not lawful except to countries specified in the schedule of the Act, 'and to such other countries as the Governor in Council from time to time by notification declares to be countries to which emigration is lawful.' Every such notification 'must contain a declaration that the Governor General in Council has been duly certified that the government of the country to which the notification refers, has made such laws and other provisions as the Governor General in Council thinks sufficient for the protection of emigrants to that country during their residence therein.'

It is, therefore, to be said that emigration (in the sense defined) to Canada from India, is not lawful under the Indian Emigration Act, and cannot be made lawful except through the action of the Canadian government in making the necessary laws, to the satisfaction of the government of India, for the protection of Indian emigrants.

It will therefore, be seen, that of itself the Indian Emigration Act solves the problem, so far as it relates to the importation of contract labour from India to Canada, and this is the one class to be feared, since without some agreement to labour it is hardly to be expected that the number of immigrants will be large.

To render this law wholly effective so far as Canada is concerned, it would be sufficient to prohibit the landing in Canada of immigrants who come in violation of the laws of their own country.

(5) With the danger of the importation of native labour under contract or agreement removed, there remains for consideration only such classes as might desire to emigrate from India of their own initiative, or as having left India and gone elsewhere, to China, for example, might be induced by agreement or otherwise, to emigrate to this country. To the immigration of the latter class the regulation of the Canadian government requiring a continuous passage from the country of which they are natives or citizens and upon through tickets, should prove an effective bar, whilst as to the former the same regulation, the warnings issued by the government of India, and the greater care which it may reasonably be expected the steamship companies will exercise in the future, should prove a real deterrent. It will be apparent, moreover, that having regard for the policy of the India government in the protection of the natives as set forth in the Indian Emigration Act, the government of Canada is fully justified in requiring, as has been its policy, of persons coming to Canada, without a knowledge of conditions, and with manners and customs wholly different from our own, especially where such persons are ignorant of our language and are without any agreement guaranteeing work, that they should, for their own protection, be in possession of a sum of money sufficient to ensure their not being reduced to a condition of mendicancy or becoming a public charge. The regulation at present in force, requiring all immigrants to have in their possession a sum of at least \$25 constitutes a requirement which for the protection of the Indians themselves is an obvious necessity. Should this amount prove inadequate, it could be increased.

There is thus, in the last analysis, a dovetailing, so to speak, of Great Britain's well-known policy in the protection of the native races of India, and Canada's policy in the matter of immigration.

## A HARMONY OF POLICIES.

Whilst effective as a means of restricting a class of immigration unsuited to Canada, it will be apparent that the arrangement as herein set forth is one which finds its justification on grounds of humanity as strong as are the economic reasons by which it is also supported. The liberty of British subjects in India is safeguarded rather than curtailed, the traditional policy of Britain in respect to the native races of India has been kept in mind, and the necessity of enacting legislation either in India or in Canada which might appear to reflect on fellow British subjects in another part of the empire has been wholly avoided. Nothing could be more unfortunate or misleading than that the impression should go forth that Canada, in seeking to regulate a matter

of domestic concern, is not deeply sensible of the obligations which citizenship within the empire entails. It is a recognition of this obligation which has caused her to adopt a course which, by removing the possibilities of injustice and friction, is best calculated to strengthen the bonds of association with the several parts, and to promote the greater harmony of the whole. In this, as was to be expected, Canada has had not only the sympathy and understanding, but the hearty co-operation of the authorities in Great Britain and India as well.

Respectfully submitted,

(Sgd.) W. L. MACKENZIE KING,  
*Deputy Minister of Labour.*

Ottawa, May 2, 1908.

**ENQUIRY OPENED BEFORE THE DEPUTY MINISTER OF LABOUR INTO CLAIMS OF CHINESE RESIDENTS OF VANCOUVER, B. C., ON ACCOUNT OF DAMAGES SUSTAINED IN THE RIOTS OF SEPTEMBER 1907.**

BY an Order-in-Council dated March 7, 1908, Mr. W. L. Mackenzie King, C. M. G., Deputy Minister of Labour, was appointed a commissioner under the Enquiries Act, Cap. 104, R. S. C., to conduct an enquiry into the losses and damages sustained by the Chinese population in Vancouver on the occasion of the riots in that city in September 1907. Mr. Mackenzie King was at the time of the passage of the Order-in-Council in England, where he was occupied in connection with the commission relating to the regulations of Oriental immigration to Canada. Mr King returned to Canada late in the month of April and proceeded to Vancouver about the middle of May. The enquiry was opened by the Commissioner on May 26 at Pender Hall, Vancouver. The bill, as presented to the Commission, comprised a list of claims on account of damages sustained by 122 shops totalling \$5,846, while claims were preferred on account of 96 shops which were alleged to have suffered through enforced stoppage of business to the amount of \$19,928. Mr. Arthur McEvoy,

who appeared on behalf of the Chinese Board of Trade of Vancouver and the Chinese residents generally, of that city, stated that he had four or five other claims to submit. The Commissioner stated that he would be ready to receive any further claims that might be presented within the next three days, but that no consideration would be given to claims presented after that date. The claims presented during the following three days amounted to \$1,700, bringing the total claims brought before the Commissioner to about \$28,000.

The Commissioner pointed out that it was not by reason of compulsion by the British Parliament that the Canadian Government was investigating these losses. The Canadian Government, he said, acted in the matter with full freedom and its decision would be reached quite independently of Great Britain. Mr. Mackenzie King also referred to the fact that the Chinese Government had recently paid out the sum of \$50,000 to British subjects in Shanghai whose property had been damaged or

destroyed in that city and in addition had lately paid to Dr. Herne, an Australian, the sum of \$10,000 for damages sustained by him at Tungan near Amoy. The same feeling, said the Commissioner, which had actuated the Chinese Government in making these amends had prompted the Dominion Government to pay the losses suffered by the Chinese residents in Vancouver.

The Chinese Government was not directly represented at the investigation, but the following Chinese officials were in attendance from day to day at the proceedings, namely, Mr. Tung Cheng

Ling, an attache of the Chinese Embassy, at London, Mr. Ow Yang King, Chinese Vice-Consul at San Francisco, and Mr. Moy Park Hing, Chinese Consul at Portland, Oregon.

The enquiry into the losses before the Commissioner covered a wide range and elicited information bearing on the extensive purchases by Chinese residents of firearms, the conduct of tailoring sweat shops, the profit in the local opium trade and other matters. The investigation was in active progress at the close of the month.

#### THE INDUSTRIAL DISPUTES INVESTIGATION ACT. PROCEEDINGS UNDER THE ACT DURING THE MONTH OF MAY, 1908.

**D**URING the month of April the Department received seven applications for the establishment of Boards of Conciliation and Investigation, viz.:

1. On behalf of the employees of the Ottawa Electric Railway Company; the dispute affecting, it was alleged, 256 employees.

2. On behalf of the members of Drummond, Roberts, Pretoria and Port Cabot lodges of the Provincial Workmen's Association, being employees of the Nova Scotia Steel and Coal Company, Limited, North Sydney, N.S.; the dispute directly affecting, it was alleged, 1,750 employees.

3. On behalf of the members of Strathcona and Buller Lodges of the Provincial Workmen's Association, being employees of the Acadia Coal Company, Stellarton, N.S.; the dispute directly affecting, it was alleged, 800 men.

4. On behalf of the members of Lady-smith Lodge of the Provincial Workmen's Association, being employees of the Intercolonial Coal and Coke Company, Westville, N.S.; the dispute affecting, it was alleged, 800 employees.

5. On behalf of members of District No. 18 of the United Mine Workers of America, being employees of the Standard Coal Company of Edmonton, Alta.; the dispute directly affecting, it was alleged, 20 employees.

6. On behalf of the members of Seaside Lodge Provincial Workmen's Association,

being employees of the Port Hood Richmond Railway Coal Company, Port Hood, C.B.; the dispute directly affecting, it was alleged, 300 employees.

7. On behalf of the members of the Order of Railroad Telegraphers being employees of the Canadian Pacific Railway Company; the dispute directly affecting, it was alleged, 1,605 employees.

The department also received on behalf of the members of Freight Clerks' Union Branches 1 and 2 Halifax and St. John stations on the Intercolonial Railway of Canada, an application for the establishment of a committee of Conciliation, Mediation and Investigation, under the Conciliation and Investigation Act.

Of applications received prior to the beginning of May, proceedings in connection with which remained unfinished at the end of April, there were the following, viz.: (1) On behalf of the employees of the King Edward mine at Cobalt, Ont.; (2) on behalf of the employees of the Manitoba and Saskatchewan Coal Company, Limited of Bienfait, Sask.; (3) on behalf of the employees of the Western Dominion Collieries, Limited, of Taylor-ton, Sask.; (4) on behalf of Mechanics' Lodge No. 23 Provincial Workmen's Association, being employees of the Cumberland Railway and Coal Co., Limited.

During the month reports were received in the following disputes, namely, the Western Dominion Collieries, Limited, of

Taylorlton, Sask., and its employees, and the Cumberland Railway and Coal Company, Limited, and its employees. No

further proceedings were taken during the month on the application in connection with the King Edward mine.

### I.—SETTLEMENT OF DISPUTE AT WESTERN DOMINION COLLIERIES, LIMITED, AT TAYLORTON, SASK.

THE Board established in this case reported under date of May 5, to the effect that an agreement had been made between the contending parties. The Board was composed of His Honour R. H. Myers, County Judge, Winnipeg; James O. Hannah, Calgary, Alta., recommended by the Western Dominion Collieries, Limited; and Mr. F. H. Sherman, Taber, Alta., recommended by the men. The application was received at the Department March 16, and a statement in reply was received on March 24. The questions at issue were stated to be as follows:—Free recognition of the United Mine Workers of America; eight hours' work per day; and standard wages of district No. 18, "as now prevailing in lignite fields of Southern Alberta." The approximate number of persons likely to be affected by the dispute was estimated at 90. The company in its reply insisted that the wage scale was practically the same as that which had been in use for five years, and was that in use in the Souris Coal fields, and submitted that uniformity of wages should govern in respect to the same class of work in the said area. The claim for increase was said to be based on the wage schedule as existing at Lethbridge, Alta., and Taber, Alta., where the coal was bituminous, whereas the coal mined by the present company at Taylorlton was lignite, and sold at an amount half the price of the products of the bituminous mines, this low price being one that would not allow of any increase in the cost of production.

The Board met at Winnipeg, on April 16 and organized, meeting then successively on April 17, 18 and 20. On the evening of Monday, April 20, a joint conference was held between the members of the Board in the present case, and Judge Dawson and Mr. G. R. Crowe, members of a Board established to deal with differences between the Manitoba and Saskat-

chewan Coal Company and its employees at Bienfait, Sask, in the close vicinity of the scene of the present dispute, Mr. Sherman being a member of both these Boards. The two Boards proceeded together to Bienfait on April 29, and held joint sessions there with the object of reaching an agreement in each case. The discussion showed, however, that it was impossible to reach a joint agreement, and the Boards then proceeded separately. The final meeting of the Board in the present case was held on April 30. The evening session on this occasion extended until 3 a.m. on May 1, when an amicable agreement was reached on all points, and signed by both parties. The agreement included full recognition of the United Mine Workers of America, and the cessation of the check-off system. On all other points an arrangement was reached by mutual compromise. The text of the report and agreement follows.

#### REPORT OF THE BOARD.

In the matter of the Industrial Disputes Investigation Act 1907, and of a dispute between

The Western Dominion Collieries, Lmtd.,

and

The Employees of the said company.

The Board of Conciliation and Investigation appointed herein under the provisions of the above named Act and composed as follows:—Frank H. Sherman, of Taber, Alta., recommended by the employees; James O. Hannah of Calgary, Alta., recommended by the company; and His Honor Judge Robert H. Myers of Winnipeg, Man., appointed by the Minister of Labour as Chariman of the Board, beg to report as follows:—

By mutual agreement we met first in

the city of Winnipeg on Thursday the 16th day of April, 1908, at 10 o'clock in the morning, all the members of the Board were present. The members subscribed and took the oaths of office before His Honor Judge Walker and His Honor Judge Myers, Justices of the Peace.

The Board met each forenoon and afternoon of the 16th, 17th, 18th and 20th days of April endeavouring to bring about a settlement of the differences between the company and its employees, which differences were ascertained to be briefly as follows:—

1. Recognition of the Union.
2. Hours of labour.
3. Rate of wages.
4. Employment of a check weighman.
5. Price of powder.
6. Re-instatement of discharged men.

The coal mine affected was at Taylor-ton, Saskatchewan, and during our conferences we became aware of the establishment of another Board with another chairman to endeavour to settle a similar dispute in the same coal fields between the Manitoba and Saskatchewan Coal Company, Limited, and its employees. This fact retarded our negotiations, although considerable progress was made. Mr. John R. Galvin and Mr. Sherman represented the miners, and Mr. R. R. Taylor, General Manager, and C. C. Symons, Mine Manager, represented the company at these conferences.

On Monday night, 20th April, 1908, the Board held a joint conference with His Honor Judge Dawson and Mr. G. R. Crowe of the other Board, and we decided to go to the coal fields on Wednesday 29th April and endeavour jointly to effect a conciliation.

The two Boards proceeded to Bienfait, Saskatchewan, on the 29th April and held a joint meeting that evening.

On Thursday the 30th April, the Boards held a joint meeting at the mine, when it was plainly apparent that the Manitoba and Saskatchewan Coal Company had resolved to fight the Union and declined to confer with the Officials of the U.M.W. of A., who represented all the men at the mine. The Boards, therefore, proceeded separately. Our Board met the Officers

of the company and of the Union, and we made many efforts to induce the parties to come to a fair and amicable settlement. We adjourned until 8 o'clock p.m. when we again met at Taylorton and continued in session until 3 o'clock a.m. of the 1st May, when an amicable agreement was reached. The Chairman drew up the draft agreement, and it was duly signed in our presence, and a copy thereof is transmitted herewith. The Board met again in Winnipeg on Monday 4th May, 1908, when the type written copies of said Agreement were produced and examined and signed.

The Board are unanimously of the opinion that the agreement effected is fair and reasonable under the conditions prevailing in these coal fields.

The Board having concluded its labours agreed upon the above report.

All of which is respectfully submitted.

R. HILL MYERS,  
*Chairman.*

F. H. SHERMAN,  
JAMES O. HANNAH.

Dated at Winnipeg,  
this 4th May, 1908.

#### AGREEMENT.

IT IS HEREBY AGREED between the Western Dominion Collieries, Limited, of the first part, and the employees of the said company as represented by the United Mine Workers of America, District No. 18, of the second part, as follows:—

1. This agreement covers the mines and outside plant operated by the said company, and all persons accepting employment at these mines agree to be governed by the following rules and regulations:—

(a) In case any dispute or grievance arise under this agreement or any local agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the company or any person or persons employed, or by the men as a whole, then the parties shall endeavour to settle the matter as hereinafter provided. But before any grievances shall be submitted to the Pit Committee, the person or persons affected

shall endeavour, by personal application to the Pit Boss, to settle the matter, and in the event of them agreeing, their decision shall be final.

(b) In case of any local dispute arising in any mine, and failure to agree between the Pit Boss and any employee, the Pit Committee and Mine Superintendent shall endeavour to settle the matter, and if they agree, their decision shall be final.

(c) In the event of the failure of the Pit Committee and the Mine Superintendent to settle any dispute so referred to them, as well as in the event of any other dispute arising, the matters in dispute shall be referred to the General Superintendent or General Manager of the company and the Officers of District No. 18 U.M.W. of A., for settlement, and if they agree their decision shall be final. Should they fail to agree, it shall be referred to a joint committee, said committee to be made up of three operators appointed by the company, and three miners appointed by District No. 18 of the U.M.W. of A., for settlement. If they agree their decision shall be binding upon both parties. A majority of the full committee must vote in favour of any action before it can be declared carried. In the event of a failure to agree, the committee shall endeavour to select an independent chairman, and failing to agree upon an independent chairman, the Minister of Labour shall be asked to appoint such chairman; the decision of the committee thus constituted shall be binding upon both parties. The joint committee, when necessary, shall meet on the second Monday of each month.

(d) In the meantime, and in all cases, while disputes are being investigated and settled, the miners, mine labourers and all other parties involved must continue to work pending investigation and until final decision has been reached, but where miner, miners, mine labourer or mine labourers has or have been discharged by the company, he or they shall not remain in the employ of the company while his or their case is being investigated and settled. If a claim be made within five days where a man or men has or have been unjustly discharged, the case shall be dealt with according to this article, and if

it is proven that he or they have been unjustly dealt with, he or they shall be reinstated. If claim is made for compensation for time lost in cases where reinstatement has followed, it shall be left to the joint committee to decide what amount, if any, is to be paid.

(e) Any breach of this agreement by any of the parties hereto is not to void the said agreement, but same is to continue in full force and effect. It is not intended however, by this sub-section to abridge the right of the men to suspend work after final settlement as herein provided, if any operator or operators refuse to be bound by any decision given against them under this article.

PROVIDED, nevertheless, that the right to hire and discharge employees, the management of the mine, and direction of the working forces, are vested exclusively in the company and the U.M.W. of A., shall not abridge this right.

2. No miner working at contract work on coal shall be allowed to hire labourers.

3. The company agrees to give the U.M.W. of A., a full recognition and agrees to the check off system, that is to say, upon the individual request in writing of any of the company's employees, the company shall deduct such monies from their wages as is designated for dues, assessment fines and fees, and pay same over to the payee of such orders.

4. The hours of labour for all outside men shall be 10 hours per day and for all inside or underground men shall be 8 hours per day at their working place or at place of mine, as the case may be.

PROVIDED, however, that in cases of emergency when the company receive rush orders for coal the men agree to work overtime to enable the company to fill such orders at the same rate of wages per hour for extra time as provided in the wage schedule hereunder.

5. The company will grant the right of the miners to employ check-weighers and will grant the said check-weighers every facility to enable them to render a correct account of all coal weighed and will allow the cars to be tared from time to time and the machine to be properly tested from time to time and will deduct from the wages of all contract miners such amounts

as individual orders may be presented for from time to time and will pay over the same to the Secretary of the Local Union for wages of check-weighers. PROVIDED that the check-weighers shall be taken from among the company's employees.

6. SCHEDULE OF WAGES:

Hoisting engineer . . . . .	\$ .31 $\frac{1}{4}$	per hour
Firemen . . . . .	65.00	per mos.
Box-car loader . . . . .	.25	per hour
Dumper . . . . .	.22 $\frac{1}{2}$	"
Trimmer . . . . .	.21	"
Tipple men . . . . .	.20	"
Carpenters . . . . .	.30	"
Blacksmith . . . . .	.32 $\frac{1}{2}$	"
Blacksmith (second) . . . . .	.22 $\frac{1}{2}$	"
Cager . . . . .	.25	"
Pumpers . . . . .	.25	"
Drivers . . . . .	.28 $\frac{1}{8}$	"
Tracklayers' . . . . .	.28 $\frac{1}{8}$	"
Tracklayers' helpers . . . . .	.26	"
Timber men . . . . .	.28 $\frac{1}{8}$	"
Timber men's helpers . . . . .	.26	"
Door boys . . . . .	.12	"
Teamsters . . . . .	.21 $\frac{1}{2}$	"

Contract miners rates to remain as at present.

7. The price of powder, fuel and rents shall remain as at present.

8. This agreement shall commence from this 1st day of May 1908, and terminate on the 1st day of May A.D. 1909.

SIGNED AND AGREED to this 1st May, 1908.

**II—FINDINGS OF THE BOARD IN THE DISPUTE BETWEEN THE CUMBERLAND RAILWAY AND COAL COMPANY, SPRINGHILL, N. S., AND ITS EMPLOYEES.—MINORITY REPORT BY MR. R. B. MURRAY.**

THE report of the Board in this case was received in the Department on May 26, and was accompanied by a minority report from Mr. R. B. Murray, the member of the Board appointed on the recommendation of the employees. The Board was composed of the Honourable W. B. Wallace, County Judge, Halifax; the Honourable John N. Armstrong, Legislative Councillor, Nova Scotia, and Mr. R. B. Murray, Springhill, N.S. The chairman was appointed by the Minister in the absence of a joint recommendation from the other members of the Board. Mr. Murray was appointed on the recommendation of the men, and Mr. Armstrong was appointed by the Minister in the absence of a recommendation from the company

under section 8, sub-section 2, of the Industrial Disputes Investigation Act.\*

The application in this case was received on March 25 from the representatives of Mechanics' Lodge No. 23, Provincial Workmen's Association of Nova Scotia, and set forth the following demands:—

(1) An advance on wages for repair work.

(2) An advance on wages for No. 3 mine fanmen.

(\* Section 8 sub-section 2 of the Industrial Disputes Investigation Act provides that "if either of the parties fails or neglects to duly make any recommendation within the said period, or such extension thereof as the Minister, on cause shown, grants, the Minister shall, as soon thereafter as possible, appoint a fit person to be a member of the Board; and such member shall be deemed to be appointed on the recommendation of the said party."

(3) An advance on wages for Charles Roney, carpenter.

(4) An advance on wages for Wilson Demmings, car inspector.

An approximate estimate of the number of employees likely to be affected by the dispute was 1,600.

The Cumberland Railway and Coal Company, in a communication to the Department, stated that the company would take no part in the proceedings in connection with the application, for the reason that the application was made contrary to the terms under which the members of Mechanics' and Pioneer Lodges resumed work on October 29 last, after a strike of thirteen weeks. The company also set forth replies to the various grievances, taking exception in each case to the claims made. In the matter of repair work, figures were given to sustain the contention of the company that it was paying higher rates than those paid for a similar class of labour at other mines. Special reasons were urged also against increases of wages being granted in response to the other demands. The company refused to recommend a person for appointment to the Board. The Board having been duly established by the Minister, as above stated, began its sessions at Springhill on May 13, and heard evidence from representatives of the men, and on behalf of the company, several officials of the latter were subpoenaed for the purpose. A few days later the Board met again at Halifax for further deliberation, and for the purpose of preparing a report. The findings of the Board were signed by the chairman and Mr. MacDonald, and were adverse to the claims of the men on each point. The Board added a rider to its findings as follows, viz.:

"The Board deems it proper to add to its findings this statement,—that the declaration in the 'ultimatum' issued by the general manager of the company last October, when the men returned to work, 'that there cannot be any increase in wages in the district covered by the award now or later,' would not in any way have interfered with a finding in favour of any of the applicants herein,

if the evidence submitted to the Board justified such a finding."

Mr. Murray, in a minority report, supported the claims of the men in several cases. In the matter of repair work, he held the ten men doing underground repair work to be entitled to the advance demanded, but as to the one man doing overground repair work, the claim advanced was not sustained, though an increase on this man's present wages was recommended. In the case of the fanmen, Mr. Murray's findings agreed with those of the Board. In the cases of Roney and Demmings, Mr. Murray recommended the increases demanded. The text of the report and minority report follows:—

#### Text of Report of Board.

In the matter of the Industrial Disputes Investigation Act, 1907,

and of

The Cumberland Railway and Coal Company, Limited,

Employer,

and

Certain employees of the said Cumberland Railway and Coal Company, Limited,

Employees.

The Board composed of Mr. R. B. Murray, Hon. J. N. Armstrong and Judge Wallace, Chairman, met on the 13th day of May, 1908, at ten o'clock at a public hall in Springhill, the locality of the dispute between the above parties, and having taken the oath of office, proceeded with the reference.

The employees were represented by three of their number designated by Mechanics' Lodge No. 23 P. W. A., of which all the employees interested are members. Their case was conducted by them in a fair and upright way. The company was not represented, having declined to take part in the reference, on the ground that the terms of an "ultimatum" issued by the company during a strike

last year were accepted by the present employees when they resumed work, and therefore acted as a bar to this inquiry. The Board sat in the morning and afternoon of the 13th, and during that time all the witnesses offered on behalf of the employees were examined and their examination concluded. At the close of the afternoon sittings, the chairman, after consultation with the other members of the Board, announced that the Board had decided, inasmuch as any decision to be finally given by the Board in this matter, would be entitled to greater weight if evidence were submitted by each party to the dispute, to subpoena the General Manager and the Manager of the company. Accordingly the Board adjourned until ten o'clock, May 14th, and in the meantime the subpoena were issued by the chairman and duly served. At the opening of the sittings on May 14th, Mr. J. R. Cowans, General Manager of the company, and Mr. Hargreaves, Manager of the company, were in attendance. Two other officials of the company, Mr. David Stewart and Mr. Muirhead, were also present, and it appearing that Mr. Stewart, assistant to the General Manager of the company, and Mr. Muirhead, Mechanical Superintendent, were more familiar with the points at issue than the gentlemen who had been subpoenaed, it was unanimously resolved by the Board to call Mr. Muirhead and Mr. Stewart as witnesses, and they were accordingly examined. The chairman informed the Lodge Committee that those witnesses could be cross-examined by them or any of them, and various questions in cross-examination were asked of each witness by the members of said committee.

The Board then adjourned, to meet at Halifax to consider the case and make a report.

The Board met at Halifax on May 18th, and sat from 10 o'clock until 4 with an hour's intermission at noon. The Board—a majority thereof—sat again from 5 o'clock until 6 o'clock, and again from 7 o'clock until 11 o'clock, deliberating and preparing a report. Considerable time was spent on subsequent days by individual members of the Board prepar-

ing the majority and minority report respectively.

The following are the findings of the Board:—

There are four classes of cases, "A," "B," "C" and "D," in dispute between Mechanics' Lodge No. 23 P. W. A., and the Cumberland Railway and Coal Company, Limited.

Claim "A" is in respect to an advance of wages for repair work. There are two classes of men in the mechanical branch, working on repairs, viz., those who labour underground and those whose work is performed on the surface, the present rate of wages for the former class being 15 cents per hour, plus 22 per cent, and the rate for the latter class being \$1.20 plus 22 per cent per day. The wage now asked for on behalf of this class of underground and surface work is a flat rate of \$1.85 per day of 8 hours for underground men and 10 hours for surface men.

Undoubtedly, the work in question is disagreeable and trying.

It is urged by the applicants, as a justification for the increase desired, that this class of work commands a higher rate of pay in some other collieries, and as proof of this contention, the schedule of rates applicable to the Dominion Coal Company's employees was put in evidence. In reply, the Mechanical Superintendent of the Cumberland Railway and Coal Company testified that this class of men were paid at a higher rate at Springhill for the same number of hours than the employees of the Dominion Coal Company. The tabulated statement marked "W" in the written answer of the company was also verified by the Assistant to the General Manager.

The applicants for an increased rate of pay seemingly regard this question of the rate of pay prevailing in other similar employment within the Province of Nova Scotia under similar conditions, as affording a fair test to enable the Board to determine what would constitute a fair wage. Applying that test, which is generally a fair one, to the issue before the Board, and examining the whole of the evidence upon that question, the Board

finds that the applicants in this class are paid at least as high a rate for the number of hours as men of a similar class employed by the Dominion Coal Company.

The Board finds that the applicants in this class have not established their claim to the desired increase.

Claim "B" is on behalf of the fanmen at No. 3 Mine. An objection was raised by the company in regard to this claim, and also in respect to the two following claims, that as the persons affected were less than ten in number, the act did not apply. The chairman ruled against this objection.

The present rate of wage for the fanmen per day of 12 hours is \$1.20 plus 22 per cent. They ask for a flat rate of \$2.00 per day of 12 hours. The Board finds that the work which they have to perform is work generally given to old and infirm employees. One of the claimants has been sick for two years and could not perform any other work, and therefore applied for this work. The other claimant had a crippled leg and he requested a similar job. It was asserted on behalf of these men that workmen doing similar work for the Dominion Coal Company get a better rate of pay, but the Board finds that the employees doing this work at the works of the Dominion Coal Company have also the responsibility for the air compressors, and that their work is substantially different.

The Board therefore unanimously rejects this claim.

Claim "C" related to Charles Roney. It appears that he is in the same class and is paid at the same rate as ten others. They are not skilled workmen, but might be described as handy men. While there may be only a slight difference between this claimant and some of the men in the class just above him, the Board finds that the applicant in this case has not established his claim for the increased wage.

Claim "D" relates to the case of Wilson Demmings, car inspector. His wage is \$1.30 plus 22 per cent per day. Applicants ask on his behalf a flat rate of \$2.00 per day, claiming that this is the rate which such class of work commands elsewhere. This employee has now the benefit of an assistant at his work, and the

duties of Mr. Demmings have not increased since the increase of pay given him. It was amply shown by evidence to the satisfaction of the Board that Mr. Demmings is a painstaking, industrious and capable employee, but the Board cannot find that he has established his claim to the increased rate asked for by him.

The Board deems it proper to add to its findings this statement,—that the declaration in the "ultimatum" issued by the General Manager of the company last October, when the men returned to work,—"that there cannot be any increase in wages in the district covered by the award now or later," would not in any way have interfered with a finding in favour of any of the applicants herein, if the evidence submitted to the Board justified such a finding.

Enclosed herewith are the evidence and exhibits used in the reference.

Respectfully submitted,

(Sgd.) W. B. WALLACE,  
(Sgd.) J. N. ARMSTRONG.

May 21st, 1908.

The Honourable Rodolphe Lemieux,  
Minister of Labour,  
Ottawa, Ont.

#### Text of Minority Report.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between

The Cumberland Railway and Coal Company, Limited,

(Employer)

and

Mechanics' Lodge No. 23, P. W. A.  
(Employees)

Honourable Rodolphe Lemieux,  
Minister of Labour,  
Ottawa.

Sir:

I have the honour to submit the following report with respect to the above reference.

It is with much regret that I cannot place on record the concurrence of my colleagues on the Board in the findings and recommendations I have arrived at in regard to the cases submitted under such reference.

The Board, composed of His Honour Judge Wallace, Chairman; Honourable J. N. Armstrong and R. B. Murray, met at Springhill on Wednesday, the 13th May, 1908, at 10 a. m., after subscribing to the prescribed oaths of office and some introductory remarks by the chairman the taking of evidence was proceeded with.

The Secretary of the Lodge filed a certificate appointing Messrs. Fox, McInnes and Price as its representatives as provided by the Act. They seemed to have a carefully prepared brief of the evidence of each witness, and at the close of the first day's enquiry were complimented by the chairman on the creditable way in which they presented their case. The company was not represented at the first hearing, but later on in the enquiry subpoenas were issued by the chairman calling on the General Manager and Manager of the company to appear and give evidence. They were present the following morning and requested that Messrs. Stewart and Muirhead, assistant to the General Manager and Mechanical Superintendent respectively, take the stand in the company's behalf. This they did, Mr. Stewart confining himself mainly to reiterating the company's statement in reply to the Lodge's claims, and Mr. Muirhead to a contention that the existing wages paid to the men on whose behalf the Act was primarily invoked, were as high as labour of a similar class commanded elsewhere. Messrs. Stewart and Muirhead were subjected to a mild cross-examination by the representatives of the Lodge, and were asked some pertinent questions by the members of the Board. This completed the taking of evidence, and the Board adjourned to meet again in Halifax on the following Monday. Conferences by the members were held in the morning and afternoon of that day in the chairman's office in the Court House. It shortly developed that the majority of

the Board held totally opposite views with regard to the cases in dispute to that of the other member, although when the Board finally dispersed, the chairman freely admitted his mind was still open on one case, i. e., the "repairs rate case." It was decided however that the reports of the Board's findings should be forwarded to the Department, one, representing the views and recommendations of the majority, the other embodying the conclusions and recommendations of the minority member.

In the application for this reference, there were four cases set out as being in dispute between the Lodge and the company, these cases were designated in the application as follows:—

First case is in respect to an advance on wages for repair work.

Second case is in respect to an advance on wages for No. 3 fanmen.

Third case is in respect to an advance on wages for Charles Roney, carpenter.

Fourth case is in respect to an advance on wages for Wilson Demmings, car inspector.

Although the foregoing cases were not taken up by the Board in the order named it is the intention of the writer to discuss and report on them in successive following; therefore, the "repairs rate" shall be the first under consideration.

#### FIRST CASE.

The evidence disclosed that in this employ there are at least two classes of repair work in connection with the mechanical branch, repairs to steam pipes and machinery underground and repairs to pipes and machinery overground, including cleaning of boilers. In the underground section there seems to be about ten men affected, and in the overground one man only, Andrew McCarren, claimed redress at the hands of the Board. For the underground men, the witnesses, George McLeod and John Campbell, gave evidence which seemed conclusive, that their work was performed frequently in high temperatures, sometimes at 116 degrees, their hours were erratic, being subject to a call at any time during the night, when their day's work is over, and in addition to this, to use their own

language, "we are frequently employed on Sundays." The present rate of pay for these men is 15 cents per hour plus 22%, their contention being that this rate is altogether inadequate for the class of labour they are called upon to perform. In view of their receiving no excess pay for their Sunday work or extra calls, as it appears is customary in other places in similar industries and on works where Sunday labour is necessary, and in view likewise of their having to work mostly under conditions and at a temperature which they claim is hazardous and must of necessity be prejudicial to health, the claim the Lodge is making in their behalf of 39c. per day of eight hours extra surely cannot be considered an unreasonable one. The company, through Mr. Muirhead, contends that these men are sufficiently paid already. This is natural, and usually the plea put forward in such cases by employers, but it does not lessen the fact of the soundness of the men's claim notwithstanding. To emphasize the reasonableness of the Lodge's contention, they put in evidence a telegram from the Grand Manager of the company wherein an express promise was made that under certain conditions this matter of repair rates would be adjusted to the satisfaction of the men interested. The company now repudiate that telegram, or as Mr. Stewart puts it for them, "The whole thing is now off."

So convinced am I that the Lodge has made their claims and contentions good with regard to this underground repair work, I have no hesitation whatever in recommending that men at this class of work should be paid a flat rate of \$1.85 per day of eight hours, my conviction is, taking all the circumstances into consideration, any jury in the land should award them at least this amount.

With respect to the other class of repair work, with which Andrew McCarron alone is interested, this man swears he is at present and has been for the past sixteen months, employed in the class of labour known as overground repair work and tending engines and boilers at the machine shop and No. 1 mine, his duties also consist in cleaning boilers at No. 2, 3 and Aberdeen mines. His present

rate of wage is \$1.46 per day, and in the Lodge's application a request was made on his behalf for \$1.85 per day. His evidence shows that when he is occasionally taken from his usual work of repairs and boiler cleaning and put to tending engines and boilers, he has been paid the rate of wage which such latter work calls for, and which is in excess of the pay he receives when at the former class of labour. Beyond a doubt, the cleaning of boilers is hot and very dirty work, and \$1.46 appears a very small day's pay for the performance of it. McCarron has frequently to be in charge of two or three men and receives only 6c. per day more than they do. Is it not fair to assume that the man who directs should get more than 36c. per week over the men who are directed?

The company, through Mr. Muirhead, seem to have little to say with respect to this case. It was admitted the work of cleaning boilers was dirty, but nothing was said by this witness that would indicate that the claim made on behalf of McCarron was an unfair one. This may have been an oversight on Mr. Muirhead's part, but should not now be pleaded to the prejudice of McCarron. It may be safely inferred however, that McCarron cannot be classed as a skilled labourer in the same sense as the underground repair men, nor could he, if called upon to do so, be able to perform the same grade of work as McLeod and Campbell and the others who have Winfield McInnes as their leading man. On that account, and for the further reason of the trend of the evidence, I cannot uphold the Lodge's claim of \$1.85 per day for this man, but strike a medium and recommend that his pay should be increased from \$1.46 to \$1.65 per day of ten hours.

#### SECOND CASE.

Concerns two men, Arthur Cooke and John D. Cameron. These men are employed as fanmen at No. 3 mine, they work on twelve hour shifts opposite to each other. From the evidence, it seems their work consists in the main in constant attendance on their engines, and the principal feature of it is its monotony. The job under the law requires the holders

to be possessed of certificates of competency. Cooke and Cameron's pay is at present \$1.46½ for twelve hours, the Lodge has asked on their behalf \$2.00 for the same time. The company take very strong exception to this case, and claim that it was work suitable only for broken down or worn out men, and was given to Cooke and Came on "simply because they made application, and if they are able to perform other duties, there is a good job open to them." Mr. Muirhead further stated that a boy ten years old could do equally as well the work that is necessary.

Taking this matter into long consideration and viewing it as I have from every aspect and with a full knowledge of the responsibility it involves upon me, I am led to the conclusion that in a spirit of fairness I cannot do otherwise but recommend that the prices for this class of labour remain as at present, but this recommendation is not to be treated as a precedent for future demands by the Lodge or individuals employed at it, for an increased pay in respect to it.

#### THIRD CASE.

This relates to a demand for an increase of pay for Charles Roney, a carpenter, from \$1.40 plus 22% to \$1.60 plus 22%. The evidence goes to show that Roney has been engaged for fifteen years or more at the carpenter trade; he works side by side with two others who receive \$1.60 plus 22% and does exactly the same class of work as they perform; he swears he is equally competent as they, working at finishing houses, making trolleys, wood wagons, mine cars, etc. He swears also the work is all alike, that of one being no better or worse than the others. The witness, Anthony Johnson, corroborates Roney's testimony in nearly every particular, and swears Roney is a competent and efficient carpenter, and conscientiously says that his present rate is inadequate for his services and not in accordance with other carpenters in the employ who receive \$1.60 plus 22% per day, and further from his knowledge of Roney's ability and that he does exactly the same class of work as the two others referred to, he should receive the same

wage as they. The company make reply to this by stating that Roney is not a tradesman, and name him as a "handy man," and in the same class as ten others. Mr. Muirhead swears that Roney is on a par with the ten men referred to and that they are not skilled workmen. Inasmuch as Roney is not in Mr. Muirhead's department, not much credence should be given to the latter's evidence; it was evidently made in good faith, but must, of necessity, be largely hearsay and not from a personal knowledge of the facts. That Roney is a tradesman in the broad sense of the word can hardly be doubted, and to classify him with the box repairers on the bank heads is unfair. The telegram from the General Manager hereinbefore referred to contains this clause, "Charles Roney's claim will be considered when work is resumed as well, and if he is entitled to the wage he requests, the same will go into effect from the 16th instant (i. e., August, 1907)." The question then arises has the Lodge proved that Roney is entitled to the wage he requests, or should the mere *ipse dixit* of the company be taken that he is little better than a wood butcher? It strikes me the only fair and tenable ground for me to stand on with respect to this third case is to recommend that Charles Roney receive a daily wage of \$1.60 plus 22%, and I so recommend accordingly.

#### FOURTH CASE.

As stated in the application, "is in respect to an advance on wages for Wilson Demmings, car inspector." Here is a man who has been in the employ for fourteen years, sober, painstaking, careful and industrious, with the lives of the travelling public and valuable rolling stock committed to his care, a letting up of vigilance on his part would result in loss of life and property, and yet his pay only amounts to the meagre sum of \$1.58½ per day. He swears that during all the time he has been car inspector, there has never been a case where an accident has occurred through any neglect on his part; he also swears he has tried on various occasions to get consideration by way of increased pay, and they (the company) gave him the impression they

would consider it favourably. Demmings' evidence is reinforced in a most convincing way by that of George Watt, I. C. R. car inspector at Springhill Junction, who, among other things, says that Demmings' duties are practically the same as the duties of a car inspector on the I. C. R. For such work as he (Demmings) has to perform, they would receive \$2.00 per day on the I. C. R. for 10 hours. The witness also testified that considering the duties Demmings is called upon to perform, the sum asked (\$2.00) is quite reasonable.

The company, as in Roney's case, set up the plea that Demmings is being sufficiently paid already, and Mr. Muirhead, who, although he testified to having nothing to do with Demmings, not being in his department, sought to break down the weight of Mr. Watt's evidence by making a comparison of the work of the latter with that of Demmings, which is not the case in point at all. Watt is the head car inspector at the Junction, and receives 24c. per hour and extra pay for overtime and night work. The proper comparison should be with the men under Mr. Watt, who receive 20c. per hour, and for night work time and a half, and whose work is identical with that performed by Demmings.

The evidence tendered by the Lodge in support of this claim is to me so convincing, I have no hesitation whatever in arriving at the decision that they have made out a case. I accordingly recommend that Wilson Demmings shall have his present rate of wage of \$1.58½ per day increased to that of \$2.00 per day of ten hours.

The company, in their reply to the application, contend as regards cases 2, 3 and 4, there being less than ten men affected, the Act does not apply and the Board would have no jurisdiction to hear and determine them. They have made the same objections before previous Boards. If there is anything in the contention it should be known, and if there is nothing in it, it should also be known. I have always taken a contrary view, and in support of my opinion quote a

decision from the Honourable the Minister of Labour, governing the matter:—

“My understanding of section 21 of Industrial Disputes Investigation Act is, that if the number of employees directly or indirectly affected by a dispute is ten or more, the dispute may be referred to a Board, though the parties to whom it may directly relate are fewer in number than ten. If the failure to effect a settlement in regard to a matter affecting only six men is likely to result in ten or more being immediately or subsequently affected, the reference of such a dispute would in my opinion come very properly within the provisions of the Act.”

(Signed) RODOLPHE LEMIEUX,  
*Minister of Labour.*

In submitting a minority report of a previous Board, I took occasion to insert therein the following words, “It is the earnest hope of the undersigned that the finding of the Board in the cases which have been investigated will be cheerfully acquiesced in and agreed to by the parties interested.”

Seeing that since those words were written there have been two Conciliation Boards convened in Springhill, in both cases the award being given against the company, and each finding totally ignored by them, it would appear to me to be unfair to repeat the quoted words in this instance; yet it is my belief it can be safely anticipated the employees will do nothing in the premises to lessen their dignity or jeopardize the confidence which the public has in them.

It can be said with a certainty for the company, judging by past experience, the present award being in their favour will be received and accepted with jubilation, and my exception to case No. 2 in this reference will no doubt be quoted in the future *ad nauseum*.

I have the honor to be, Sir,

Your obedient servant,

(Sgd.) R. B. MURRAY.

Dated at Springhill, N. S., 21st May, 1908.

### III.—DIFFERENCE BETWEEN THE OTTAWA STREET RAILWAY AND ITS EMPLOYEES REFERRED TO A BOARD.

ON May 8, the Department received an application from the members of Division No. 279 of the Amalgamated Association of Street and Electric Railway Employees of America, being employees of the Ottawa Street Railway Company, for the establishment of a Board of Conciliation and Investigation to adjust differences between the company and its employees. The demands included an increase in wages and changes as to wages and hours. The number of hours suggested per day was ten, or as near that figure as the schedule will permit. The employees also ask that the company would give, free of cost, to conductors and motormen who had been in its service for a period of one year and over, two uniforms per year, for winter and summer respectively, and would pay one half of the cost of uniforms for first year

men. The men further requested that the company would not discriminate against any employee by reason of his being a member of Division No. 279 of the Order named. The Minister proceeded with the establishment of the Board, which was constituted as follows: viz., Mr. G. F. Henderson, K. C., Ottawa, appointed on the recommendation of the company; Mr. John G. O'Donoghue, Toronto, appointed on the recommendation of the employees; and Professor Adam Shortt, Kingston, appointed on the joint recommendation of the other members of the Board. At the close of the month it was understood that the investigation into the dispute would commence before the Board at Ottawa on June 2. (\*)

(\*) An agreement between the Ottawa Street Railway Company and its employees was concluded on June 6.

### IV.—DISPUTE BETWEEN COAL MINE OWNERS AND THEIR EMPLOYEES AT EDMONTON, ALTA.

AN application from District No. 18 of the United Mine Workers of America, being employees of the Standard Coal Company of Edmonton, Alta., was received in the Department on May 19, for the establishment of a Board of Conciliation and Investigation to adjust differences between the company and its employees. The mine to which the application relates is a small property in the suburbs of Edmonton, and the differences set forth in the application relate to wages and general conditions of work. Twenty people were stated to be affected by the dispute. The company in its statement in reply urged that the mine officials and the employees had several times during the past two months tried to frame a new schedule of wages, but had not been able to reach an agreement

for the reason that under the prevailing rates at coal mines in the district, the company was unable to compete in the market and maintain its present contracts at a living profit. The company claimed also that there had been no complaints as to the conditions surrounding the workmen in the mine, and that a number of men had notified the company of their withdrawal from the Union, being dissatisfied with union methods. The Minister proceeded with the establishment of the Board, Mr. Frank B. Smith, of Edmonton, being appointed on the recommendation of the company, and Mr. Frank H. Sherman of Taber, Alta., on the recommendation of the men. The establishment of the Board had not been completed at the end of the month.

**V.—FOUR APPLICATIONS IN CONNECTION WITH NOVA SCOTIA COAL MINING DISPUTES—TWO OF THE DISPUTES SETTLED BEFORE THE CONSTITUTION OF BOARDS.**

**D**URING the month, four applications were received in connection with coal mining disputes in Nova Scotia, with regard to two of which, however, settlements were reached before the constitution of the Boards demanded had been effected. The applicants in these cases were respectively as follows:—

1. Strathcona Lodge No. 23 and Buller No 21, Provincial Workmen's Association, being employees of the Acadian Coal Company, Limited, of Stellarton, N. S.

2. Ladysmith Lodge No. 30, Provincial Workmen's Association, being employees of the Intercolonial Coal Mining Company, Limited, Westville, N. S.

3. Drummond, Roberts, Pretoria and Port Cabot Lodges, Provincial Workmen's Association, being employees of the Nova Scotia Steel and Coal Company at North Sydney, N. S.

4. Seaside Lodge, Provincial Workmen's Association, being employees of the Port Hood Richmond Railway Coal Company, Limited, of Port Hood, N.S.

The differences were of a similar character in each case, and arose out of a demand made by the employees on the respective employing companies for a fifteen per cent increase of wages to come into effect on May 1. The companies had in each case refused the demand on the ground that business conditions did not permit of such an increase. In the case of the mines at Port Hood, the application set forth that the men "ceased work on May 1, but returned after four days, having entered into an agreement with the manager to place the matter before a Conciliation Board."

The number of men concerned in the various applications were 3,650, distributed as follows, namely: Acadia Coal Company, 800; Intercolonial Coal Mining Company, Limited, 800; Nova Scotia Steel and Coal Company, Limited, 1,750; Port Hood Richmond Railway Coal Company, Limited, 300.

After the partial establishment of the Board in the cases of the Acadia Coal Company and the Intercolonial Coal Mining Company respectively, the parties concerned reached an agreement concerning the differences referred under the Act, and further proceedings in the matter of the establishment of a Board were mutually declared to be unnecessary.

In the case of the Nova Scotia Steel and Coal Company, owing to the absence of the manager in Europe, an extension of time during which a recommendation to the Board might be received, was on application of the company, granted by the Minister. Mr. J. W. Madden, of Sydney, was appointed a member of the Board on the recommendation of the employees, and at the end of the month the Minister was awaiting a recommendation from the company.

In the case of the Port Hood Richmond Railway Coal Company, the Minister, on the recommendation of the employees, appointed Mr. James McDonald, M. P. P., West Bay, N. S., a member of the Board, and at the end of the month was awaiting a recommendation from the company. (\*)

(\*) On June 4, Mr. George S. Campbell, merchant, Halifax, was on the recommendation of the company appointed to the Board, and later, on the joint recommendation of Messrs. Campbell and McDonald, His Honour Judge McGillivray of New Glasgow, was appointed Chairman of the Board.

**VI.—OTHER APPLICATIONS.**

**O**N May 29, the Department received an application from representatives of the Order of Railroad Telegraphers for the establishment of a Board of

Conciliation and Investigation for the adjustment of differences between the Canadian Pacific Railway Company and railroad telegraphers in its employment,

the number of those interested indirectly in the differences being placed at 1,605. The cause of difference was stated to be the alleged wrongful dismissal on February 17, 1908, of Mr. A. E. Morrisette from the agency at Megantic, Que. The company in its reply stated that Mr. Morrisette had been dismissed, as stated, and that the company was not willing to reinstate him. The Minister proceeded to establish the Board, appointing on the recommendation of the company Mr. Charles S. Campbell, K. C., Montreal, and on the recommendation of the employees Mr. John G. O'Donoghue of Toronto. These appointments took place on June 2, and the Minister then, according to the Act, awaited a joint recommendation from Messrs. Campbell and O'Donoghue for a third member of the Board.

The establishment of a Board to adjust differences between the Canadian Pacific Railway Company and its mechanical departments was completed early in the month of May, the Board being constituted as follows.—Mr. C. T. Fullerton, recommended by the company; Mr. James Somerville, recommended by the employees; Mr. P. A. MacDonald, Master in Chambers, Chairman, appointed by the Minister in the absence of a joint recommendation from the members named. The Board began its enquiry on Monday, May 18, but the question arose immediately as to whether the investigation should include the Eastern lines as well as the Western lines. The

chairman, after having allowed an argument by counsel at length before the Board, decided that it was impossible to adjust the dispute of the Western lines without at the same time inquiring into conditions with relation to the Eastern lines. Mr. Fullerton thereupon resigned from the Board. The Minister awaited the report of the chairman on the question raised, and then called upon the company to recommend a person to succeed Mr. Fullerton, unless that gentleman would resume his duties. After some negotiations Mr. Geo. T. Galt, Winnipeg, Man., was appointed to succeed Mr. Fullerton, the appointment being made without any recommendation from the company. The Board was again completed on June 1, and resumed the enquiry the following day.

On May 14, the Department received from the representatives of the Station Freight Clerks' Union, Branches Nos. 1 and 2, of Halifax and St. John, of the Intercolonial Railway of Canada, an application under the terms of the Conciliation and Labour Act for the establishment of a Committee of Conciliation-Mediation and Investigation between the members of the Union and the Intercolonial Railway of Canada. The differences as set forth involved an application for an increase in salary, amounting to 25%, and a reclassification of the clerks. The Department was, at the close of the month, in correspondence with the parties concerned in these differences.

#### DECISION OF A BRITISH COLUMBIA MAGISTRATE REGARDING THE INDUSTRIAL DISPUTES INVESTIGATION ACT—QUESTION OF JURISDICTION TO IMPOSE PENALTIES.

A DECISION of importance in connection with the Industrial Disputes Investigation Act was given at Michel, B. C., during the month, as the outcome of some industrial disturbances in the collieries of the Crows' Nest Pass Coal Company. Information was laid on behalf of the company against James Douglas, Charles Gardner and William Whitehouse, charging them with violation of the Industrial Disputes Investigation Act by inciting and encouraging to strike. The

cases were tried before Mr. J. H. McMullen, stipendiary magistrate in and for the county of Kootenay, B. C., on May 21, and on May 23, a decision was rendered by Mr. McMullen to the effect that his court had no jurisdiction in the case. The text of the decision is as follows:—

##### Text of Decision.

James Darbyshire	Informant.
James Douglas <i>et al</i>	Accused—

Before coming to any consideration upon the evidence adduced in support of the information it is necessary to decide the validity of the point raised by the defence against my jurisdiction to hear and determine the case.

The principal objection raised by Mr. MacDonald is that this is not the tribunal contemplated by the Act, for the purpose of hearing and determining an information laid under Section 60 of the said Act, which reads as follows:

60. "Any person who incites, encourages, or aids in any manner an employee to declare or continue a lockout, or any employee to go or continue on strike contrary to the provisions of this Act, shall be guilty of an offence and liable to a fine of not less than fifty dollars nor more than a thousand dollars."

As it is necessary to refer to Section 61. I give the text of it, which is as follows:

61. "The procedure for enforcing penalties imposed or authorized to be imposed by this Act shall be that prescribed by Part XV of the Criminal Code, relating to Summary Convictions."

It is stated in Paley on convictions that the examination and punishment of offences in a summary manner by Justices of the Peace . . . are founded entirely upon a special authority conferred and regulated by Statute, and I can find no legislation in Canada which raises this general principle of law; on the contrary, the following comments on the same question are found in Seagers' Magistrates' Manual:

"Jurisdiction is the authority which an official has by law to hear and determine and do justice between the parties in a cause or matter brought before him. It is never presumed, but must appear affirmatively in some authorizing Statute, otherwise his proceedings are absolutely void. No power or right to hear and determine a cause can be given otherwise than by some jurisdiction conferred by and emanating from sovereign authority"

It is further argued that such an information is not triable under Part XV of the Criminal Code relating to Summary Convictions and that the said Part XV does not apply to the Industrial Disputes

Investigation Act except in so far as the same is especially made to do so by the provisions of Section 61, which particularly states that all the proceedings subsequent to conviction shall be governed by the provisions of Part XV of the Code. I am of the opinion that Parliament purposely excluded the operation of all the Sections of Part XV save those mentioned in Sec. 61 so that the penal clauses should be administered either by the Minister of Labour, to whom is given by virtue of Sec. 3, the general administration of the Act, or by a Board of Investigation and Conciliation created by the Act. In any event if Parliament intended that all the provisions of Part XV of the Criminal Code should apply to the Act in question it is natural to suppose that they would have so stated, instead of directing that only a portion of said provisions should apply.

My opinion is strengthened by the fact that I have read a number of the acts of a quasi criminal nature passed during the same session as that in which the Act in question was passed, as well as Acts of a similar character contained in the revised Statutes of Canada such as the Electricity Inspection Act, the Meat and Canned Foods Act, Canada Temperance Act and the Lord's Day Act, and in all cases I find that the penal clauses contain the words "on Summary Conviction" which words are lacking in Sec. 60 of this Act.

For these reasons I am of the opinion that it was not intended that offences against the said act should be tried under Part XV of the Criminal Code and I decide accordingly. Unless I have jurisdiction under said Part XV of the Criminal Code I am of the opinion that the Act contains no other provisions whereby the information can be heard and determined by me and I decide accordingly.

The Counsel for the defence has raised a number of other objections to the proceedings before me, and if an appeal should be taken from my findings on the main question of law involved and these findings be reversed by the Appellate Court, I think that I should also dispose of the other matters so that all the important questions of law may be decided at one time by such Appellate Court.

I, therefore, find that all the remaining objections raised by the Counsel for the defence are not well taken, with the exception of that demurs which to the information on the ground that it includes more than one offence. I find that this objection is well founded as the informa-

tions charge that the accused "did incite or encourage, etc.," "each of which in my opinion constitutes a separate offence.

J. H. McMULLIN,  
*Stipendiary Magistrate in and for the  
County of Kootenay.*

### ALBERTA LEGISLATION AFFECTING LABOUR 1908.

THE third session of the first legislative assembly of the Province of Alberta, which began on January 16, closed on March 5, 1908 (1). The following is a review of the various acts of importance, from the standpoint of industry and labour, that were passed during the session:—

#### Hours of Labour Underground in Coal Mines.

An act was passed in the form of an amendment to the Coal Mines Regulation Act for the purpose of limiting hours of labour below ground. A workman is not to be below ground in a mine for the purpose of his work and of going to and from his work, for more than eight hours during any consecutive twenty-four hours. In the case of a workmen working in a shift, if the period between the times at which the first workman in the shift leaves and returns to the surface and the period between the times at which the last workman in the shift leaves and returns to the surface do not exceed the time above specified, no contravention is to be considered to take place. Similarly, in the case of a workman being below ground for the purpose of rendering assistance in the event of an accident or emergency, no contravention may be urged. The owner or manager of a mine is required to fix the time at which the lowering of the men is to commence and to be completed. The time consumed in lowering and raising each shift of workmen is not to exceed the time reasonably required for that purpose. A repairing shift of workmen may commence work on Satur-

day after eight hours have elapsed since the termination of their previous shift, provided the purpose is to avoid work on Sunday. The term workman, as above, includes every person employed in a mine below ground who is not an officer of the mine, owner, furnaceman, fanman, cager or onsetter, horse-keeper or pumpman. Provision is made for the keeping of a register of the times of descent and ascent both by the owner and the workmen, false entry in a register being punishable by a fine not exceeding \$50. Power is given to the lieutenant-governor-in-council to suspend the act in the event of an emergency or of any grave economic disturbance due to the demand for coal exceeding the supply at any time. For contravening the act or permitting any person to contravene the act, the owner, agent and manager of a mine are both guilty of an offence under the act, unless it is proved that all reasonable means were taken to prevent the contravention. If a workman is below ground for a longer period than that fixed by the act, he is deemed to be below ground in contravention of the act, unless the contrary is proved. A workman, however, is not to be deemed guilty of an offence if he proves, in the case of any failure to return to the surface within the time limit, that without default on his part he was prevented from returning to the surface owing to means not being available. The penalty fixed for each offence, in the case of an owner, agent or manager of a mine, is a fine not exceeding \$50, and in other cases a fine not exceeding \$5.00. The act is to come into operation on March 31, 1909, when it is to be construed as one with the Coal Mines Act of 1906 (2)

(1) An advance copy of the statutes of Alberta, 1908, was received at the Department of Labour during May, by courtesy of the Government Printer, Edmonton, Alta.

(2) Alberta statutes, 1908, chap. 17, secs. 1 to 6.

### Child Labour in Coal Mines.

The section of the Coal Mines' Act of 1906 regulating the employment of boys in coal mines is amended. The age limit in the case of underground employment is raised from 12 to 16 years, while the former provision with regard to an educational test in the case of boys employed above ground remains (3).

### Protection of Employees in Coal Mines.

The Coal Mines Act of 1906 was further amended in a number of important particulars by way of providing more stringent protection for employees. Shafts or outlets must not be nearer to one another than 100 feet, the previous distance specified being 15 yards. The number of the certificate of a manager of a coal mine must in future be furnished to the Minister of Public Works. The provision for granting certificates of competency to candidates for a mine manager's certificate are made more stringent. In cases where miners have employed a check weigher, the manager may, at their request, deduct a *pro-rata* amount from their wages to provide for his payment. Owners of mines must in future make a return of production and of the average number of persons ordinarily employed in a mine. The reporting of accidents is made more imperative. The rules with regard to the inspection of the ventilation of mines, of the use of safety lamps, of explosives, of timbering, of providing dressing-rooms, and of appointing inspectors by workmen are more stringent, a new rule being added requiring managers to provide the books mentioned in the rules. (4).

### Workmen's Compensation.

A very important act of the session was one with respect to compensation to workmen for injuries suffered in the course of their employment. In general terms the act requires that where personal injury, by accident, arising out of and in

the course of employment, is caused to a workman, the employer is liable to pay compensation, provided the injury disables the workman for a period of two weeks or over from earning full wages at his work, and provided the injury is not due to the serious and wilful misconduct of the workman. Where the injury is caused by the personal negligence or wilful act of the employer or his agent, the workman may either claim compensation under the act or take proceedings independently of the act. The act sets forth the time in which proceedings must be taken and deals with cases of contracting-out, sub-contracting, insolvency of employer, etc. The scale and conditions of compensation are set forth in detail in a schedule appended to the act. (5).

### Mechanic's Liens.

The section of the act requiring receipted pay-rolls to be posted by contractors on the works is amended by the addition of a proviso in the case of failure to comply with the section. The enforcement of claims for \$200 may henceforth be realized by suit in the ordinary way. The owner's liability for wages unpaid by a contractor was previously limited to the sum owing and payable by him to the contractor. This clause is considerably extended. The liability of the owner, at present, is limited to the sum owing to the contractor "at the time of the receipt by the owner or person having superintendence of the work on behalf of the owner, of notice in writing of such lien and of the amount thereof; or which may become owing by the owner to the contractor at any time subsequent thereto while such lien is in effect." Mechanics' liens now expire after 90 days from the filing of the claim unless proceedings to realize have been instituted in the meantime. The time limit was previously 30 days (6).

### Steam Boiler Legislation.

Boilers insured and inspected by any duly incorporated boiler insurance com-

(3) Alberta statutes, 1908, chap. 20, sec. 16. See also *Labour Gazette* for December, 1906, page 638, and for March, 1908, page 1114.

(4) Chap. 20, sec. 16.

(5) Chap. 12. An article dealing with legislation in the various provinces of the Dominion with regard to workmen's compensation is in preparation in the Department, and will be published in due course. The Alberta act will be dealt with in detail in this article.

(6) Chap. 20, sec. 12.

pany doing business in Canada were previously exempt from the operation of the Steamboilers Act of 1906. This provision is now repealed. Several additional safeguards are also provided. Traction and portable boilers must in future be provided with a steam gauge having double tube connections. Fireholes in portable, traction and locomotive firebox boilers must not be less than 10 x 15 in., to allow for the proper examination of the firebox. The fire line of furnaces must in future be at least two inches below the minimum prescribed water line in all horizontal and locomotive firebox types, and two-thirds to three-quarters the height of tubes in upright tubular boilers. The provisions as to lock pop safety valves, man holes in boilers, water supply, water feed, etc., are made more stringent. Boiler inspectors in future are to see that fly-wheels, pulleys and belting in engine and boiler rooms are properly protected, and that keys in pulleys do not project beyond the end of shafting. They are also to see that set screws on collars are countersunk, where considered necessary. The fee for obtaining a certificate of qualification to be an engineer is raised in certain cases. With respect to certificated engineers, it is provided that if an owner is satisfied that his boiler and engine have been damaged through the carelessness or negligence of the engineer in charge, he must report the facts to the inspector who must thereupon investigate the matter and suspend the engineer if he finds the latter to have been negligent (?).

#### Government Telephone and Telegraph Systems.

An act was passed authorizing the government of Alberta to purchase, construct and operate telephone and telegraph systems in the province, the same to be considered as public works within the meaning of the Public Works Act. The issuing of debentures for money borrowed in this connection is provided for. Contracts heretofore entered into by the government in this connection are declared valid by the act (8).

(7) Chap. 20, sec. 14.

(8) Chap. 14.

#### Commissions of Inquiry.

An act was passed empowering the lieutenant-governor-in-council to appoint a commission of inquiry whenever he deems it expedient to cause inquiry to be made into and concerning any matter within the jurisdiction of the legislative assembly, and connected with the good government of the province, or the conducting of the public business thereof. The commissioners thus appointed may have the power of summoning witnesses and of requiring them to give evidence on oath and to produce such documents as the commissioners may deem requisite, the commissioners to have the same power to enforce the attendance of witnesses and to compel them to give evidence as is vested in any court of record in civil cases (9).

#### Seed Grain.

An act was passed authorizing a loan from the government of Canada of the sum of \$440,000 for seed grain purposes. The legislation is based on a report made by the Honourable the Minister of Agriculture for the province, in February, 1908, setting forth that a serious situation existed in the province regarding the supplying of good seed owing to the crop failure in 1907. Oats and barley, in particular, were stated to be scarce. Owing to the money stringency, the province was unable to depend on the Canadian banks furnishing the requisite funds, and there was no time for an immediate foreign loan. The distribution of the seed grain and the taking of security is provided for, the amount of the purchase price to be a charge on all property of the applicant and to be a tax upon the land for which the grain is furnished. The method of assessment, collection of taxation, etc., is set forth in full detail (10).

(9) Chap. 2.

(10) Alta. stat. 1908, chap. 21. For a statement re the action of the Government of Canada in this connection see March, 1908, issue of *Labour Gazette*, at page 1120.

**Miscellaneous.**

The Noxious Weeds Act was made considerably more stringent <sup>(11)</sup>.

The Corporations Taxation Act was amended with reference to the taxation of insurance companies <sup>(12)</sup>.

An act was passed for the purpose of establishing the Alberta Industrial School for Boys <sup>(13)</sup>.

The garnishment of the salaries of civil

servants was the subject of a special act. The word employee as used in the act does not include any person engaged in manual labour <sup>(14)</sup>.

In different acts passed granting incorporation to railway companies, provisions were inserted requiring companies to permit the loading of grain into cars from farmers' vehicles or flat warehouses, subject to reasonable regulations <sup>(15)</sup>.

<sup>(11)</sup> Alta. stat. 1908, chap 20, sec. 24.

<sup>(12)</sup> Alta. stat. 1908, chap. 20, sec. 27.

<sup>(13)</sup> Alta. stat. 1908, chap. 13.

<sup>(14)</sup> Alta. stat. 1908, chap. 8.

<sup>(15)</sup> Alta. stat. 1908, chap. 39, sec. 11 and chap. 28, sec. 11.

**IMMIGRATION AND COLONIZATION.**

The total immigration to Canada for April, 1908, compared with April, 1907, was as follows:—

**Recent Immigration Returns.**

TOTAL IMMIGRATION TO CANADA FOR APRIL, 1908, COMPARED WITH APRIL, 1907, WAS AS FOLLOWS:—

	April, 1907.				April, 1908.				Decrease.				% of decrease.
	Males.	Fe-males.	Children.	Totals.	Males.	Fe-males.	Children.	Totals.	Males.	Fe-males.	Children.	Totals.	
Via ocean ports...	24,972	5,052	4,414	34,438	13,637	3,809	3,223	20,669	11,335	1,243	1,101	13,769	40
From the U.S...	5,131	2,103	2,379	9,613	5,678	1,531	1,877	9,086				527	5
Totals...	30,103	7,155	6,793	44,051	19,315	5,340	5,100	29,755	10,788	1,815	1,693	14,296	32

**British Immigration Returns.**

During the month ended March 31, 1908, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING MARCH, 1908-07.

Nationality.	1908	1907
English.....	7,605	12,279
Welsh.....	223	(*)
Scotch.....	1,753	5,137
Irish.....	478	798
British Colonial.....	252	(*)
Total of British origin.....	10,311	18,214
Foreign.....	1,375	2,481
Total.....	11,686	20,695

During the three months ending March 31, 1908, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN, JANUARY-MARCH 1908-07.

Nationality.	1908	1907
English.....	11,706	19,832
Welsh.....	375	(*)
Scotch.....	2,544	7,364
Irish.....	708	1,255
British Colonial.....	442	(*)
Total of British origin.....	15,775	28,451
Foreign.....	2,486	5,056
Total.....	18,261	33,507

(\*) Not separately distinguished in 1907.

**Homestead Entries During April, 1908.**

The following statement shows the number of homestead entries made in April, 1908, as compared with April, 1907:

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF APRIL, 1908, AS COMPARED WITH THE MONTH OF APRIL, 1907.

Agency.	1908	1907	Increase	Decrease
Battleford.....	422	402	20	.....
Brandon.....	4	8	.....	4
Calgary.....	249	141	108	.....
Dauphin.....	52	66	.....	14
Edmonton.....	527	348	179	.....
Estevan.....	30	16	14	.....
Humboldt.....	195	254	.....	59
Kamloops.....	43	10	33	.....
Lethbridge.....	263	272	.....	9
Moose Jaw.....	563	425	138	.....
New Westminster.....	6	.....	6	.....
Prince Albert.....	121	138	.....	17
Regina.....	102	142	.....	40
Red Deer.....	180	176	4	.....
Winnipeg.....	56	75	.....	19
Yorkton.....	174	121	53	.....
Total.....	2,987	2,594	555	162

It will be seen that there has been a net increase in the number of homestead entries made in April, 1908, of 393.

A statement of the homestead entries during the first four months of the calendar year 1908, compared with the corresponding months of the calendar year 1907, is as follows:—

STATEMENT OF HOMESTEAD ENTRIES JANUARY-APRIL, 1908 AND 1907, RESPECTIVELY.

Month.	1908	1907	Increase
January.....	1,453	1,111	342
February.....	1,420	1,033	387
March.....	1,869	1,589	280
April.....	2,987	2,594	393
Total.....	7,729	6,327	1,402

It will be observed that there has been a net increase of 1,402 in the number of homestead entries made during the first four months of the calendar year 1908, compared with the corresponding period of 1907.

**Nationalities of Homesteaders.**

The nationalities of homesteaders, as reported by the several agencies of the

Department of the Interior in Manitoba, Saskatchewan, Alberta and British Columbia, during the month of April, 1908, were as follows:—

NATIONALITIES OF HOMESTEADERS IN APRIL, 1908.

Nationalities.	No. of Entries.
Canadians from Ontario.....	312
“ Quebec.....	57
“ Nova Scotia.....	18
“ New Brunswick.....	8
“ Prince Edward Island.....	10
“ Manitoba.....	69
“ Saskatchewan.....	93
“ Alberta.....	53
“ British Columbia.....	4
Persons who had previous entry.....	286
Newfoundlanders.....	.....
Canadians returned from the United States..	63
Americans.....	848
English.....	559
Scotch.....	114
Irish.....	50
French.....	41
Belgians.....	17
Swiss.....	3
Italians.....	1

For a line of railway from Wellington to or towards Union Bay by way of Alberni—55 miles. Date of Subsidy

Agreement, May 27th, 1908. Amount of Subsidy, \$3,200 per mile, not exceeding \$6,400 per mile. Railway Company, the Esquimalt and Nanaimo Railway Company.

#### FAIR WAGES SCHEDULE.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Railways and Canals, and proof thereof satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the company.

#### INDUSTRIAL ACCIDENTS DURING THE MONTH OF MAY 1908.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in loss of life or limb, or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the bureaux of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

**I**NDUSTRIAL accidents occurring to 324 individual work-people in Canada during the month of May, 1908, were reported to the Department of Labour. Of these 122 were fatal and 202 resulted in serious injuries. In addition, 5 fatal accidents were reported as having taken place prior to the beginning of the

#### Post Office Department.

The following orders for supplies were given subject to the regulations for the suppression of the sweating system, the securing payment of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Order.	Amount of Order.
Making metal dating stamps and type, and making other hand stamps and brass crown seals.....	\$ 565.66
Making and repairing rubber dating stamps and type, also other stamps.....	42.88
Supplying stamping material and wooden boxes, and repairing stamping pads.....	1,507.19
Repairing post office scales.....	1.50
Supplying mail bags.....	692.05
Repairing mail bags.....	1,831.30
Making and repairing mail locks and supplying mail bag fittings.....	258.10
Supplying street letter boxes and railway mail clerks' tin travelling boxes, and repairing portable letter boxes, railway mail clerks' tin travelling boxes and parcel receptacles.....	3,324.50
Making and repairing miscellaneous articles of postal stores.....	15.15
Making up and supplying articles of official uniform.....	4,894.65

month, information not having been received by the Department before May, 1908. The number of fatal accidents reported in May, 1908, was 35 more than in the previous month, and 37 more than in May, 1907.

Of 148 returns received during the month giving the ages of the victims of industrial accidents, 19 referred to persons under twenty-one years of age, 37 to persons between twenty-one and forty-five, 9 to persons over 45; 82 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

**Nature of Fatalities and Accidents.**

The chief disasters of the month were the drowning of four workmen at Campbellton, N.B., the scalding to death of five workmen on the steamer "Brockville" at Toronto, Ont., through the bursting of a six inch circulating tube; the drowning of three members of a freight train crew in a wash-out at Port Arthur, Ont.; the drowning of two fishermen at Picton, Ont. and Canso, N.S., of two electric power employees at Shawinigan, Que., of two prospectors at Bay Lake, Ont.; and the burning to death of two power employees at Sault Ste. Marie, Ont.

**Drowning of Four Men at Campbellton, N. B.**

On May 13 while five men in the employ of the Shives Lumber Company, Campbellton, N.B., were engaged in repairing the chain in the mill-slip in a boat about 120 yards from shore, the anchor slipped and knocked a plank out of the side of the boat which immediately filled and sank. Four of the workmen were drowned, the fifth reaching shore by swimming.

**Fatal Scalding Accident on SS. "Brockville" at Toronto, Ont.**

On Saturday May 9, a six-inch circulation tube in the machinery of the Richelieu and Ontario steamer "Brockville,"

while being repaired at the ship yards in Toronto, Ont., burst, killing four workmen and seriously injuring three others. The verdict of the jury was that "Adolphe Sauvageau (one of the victims) came to his death from scalding on the steamer "Brockville" through the negligence of some person or persons unknown, by interfering ignorantly with the valve on the boiler."

**Disastrous Freshet on Current River, Port Arthur, Ont.**

On May 28, the water at the Paquette dam on Current River, Port Arthur, Ont., found its way, under the foundation and eroded it to such an extent as to cause it to give way liberating a mass of water about 20 feet deep and extending back for five miles. The flood carried away three-quarters of a mile of the Canadian Pacific Railway line including the bridge over the river. Shortly after the flood occurred a freight train consisting of an engine and nine cars plunged from the broken bridge into the river taking with them the engineer, fireman and brakeman who were drowned.

**Drowning of Two Fishermen at Picton, Ont.**

On May 5, three fishermen were fishing out of a punt at Black River bridge in the county of Picton, Ont., when the vessel capsized precipitating two of its occupants into the water. One of the fishermen swam to shore but the other two were drowned.

**Drowning Fatality at Shawinigan Falls, Que.**

On May 18, two employees of the Shawinigan Water and Power Co., were on a tour of inspection above the Shawinigan Falls when the boat was capsized by a log and they were swept by the swift current over the falls, one hundred and thirty feet high.

**Fatality at Sault Ste Marie, Ont.**

On May 18, a serious fire occurred at Sault Ste. Marie, Ont., destroying the Lake Superior Company's Power Plant, the Sault Pulp and Paper Mill storehouse, and causing the death of two of the power house employees.

DEPARTMENT OF LABOUR, CANADA  
STATISTICAL TABLE, SERIES F., No. 55.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MAY, 1908.

Trade or Industry.	Locality.	Date.	No. killed	Cause of Fatality.
<i>Agriculture.—</i>				
Farmer.....	Davidson, Sask.....	May 5	1	Suffocated by gas in well.
".....	New Westminster, B. C.....	" 7	1	In a runaway.
".....	Gorrie, Ont.....	" 15	1	"
".....	Lytton, B. C.....	" 4	1	Drowned, scow upset while crossing river with load of hay.
".....	Tweedside, Ont.....	" 14	1	Skull fractured by plank blown from barn
".....	Pointe aux Trembles, Que.....	" 5	1	Drowned.
".....	Johnston's River, P. E. I.....	" 16	1	Fell from load of hay, broke his neck.
".....	Kenora, Ont.....	" 14	1	Burned to death while saving family from burning house.
".....	Coquitham, B. C.....	" 11	1	Kicked by horse.
".....	Jacquet River, P. E. I.....	" 21	1	Run over by train.
Farmer's wife.....	North Sydenham, Ont.....	" 7	1	In a runaway.
<i>Fishing and Hunting.—</i>				
Fisherman.....	Picton, Ont.....	" 5	2	Drowned, boat capsized.
".....	Canso, N. S.....	" 27	2	" " "
Trapper.....	Michel, B. C.....	" 4	1	Drowned.
<i>Lumbering.—</i>				
Logger.....	Port Arthur, Ont.....	" 4	1	Drowned, slipped from logs.
".....	Sherbrooke, Que.....	" 14	1	Run over by train.
".....	La Tuque, Que.....	" 12	1	Drowned, slipped from logs.
".....	Villeroy, Que.....	" 1	1	Killed in log jam.
".....	St. Pacôme, Que.....	" 12	1	Ice gave way, drowned.
".....	St. George Beauce, Que.....	" 13	1	Drowned, fell into river.
".....	Fox River, Que.....	" 20	1	"
".....	South Lorraine, Ont.....	" 26	1	Tree fell on him.
".....	Moose Lake, Ont.....	" 25	1	Run over by train.
".....	Ste. Agathe, Que.....	" 29	1	Drowned, fell off logs.
".....	Near Lindsay, Ont.....	" 6	1	Drowned, fell off logs.
".....	Shawinigan, B. C.....	" 21	1	Crushed between logs.
".....	Fenelon Falls, Ont.....	" 4	1	Drowned, between logs.
Saw mill hands.....	Campbelton, N. B.....	" 13	4	Drowned, boat swamped in mill-pond.
".....	Ottawa, Ont.....	" 13	1	Drowned in flume.
".....	".....	" 15	1	Caught in machinery.
".....	Fenelon Falls, Ont.....	" 4	1	Drowned, fell into slide.
".....	Keewatin, Ont.....	" 21	1	Run over by train.
".....	Chatham, N. B.....	" 13	1	Caught in belt.
".....	Chemainus, B. C.....	" 23	1	Caught in machinery.
River driver.....	Lakefield, Ont.....	" 26	1	Drowned, fell off dam.
".....	Nogies Creek, Ont.....	" 15	1	Drowned, fell off log.
".....	Upper St. John River, N. B.....	" 28	1	Drowned, fell off a log.
".....	Near Campbelton, N. B.....	" 28	1	" " "
Fire ranger.....	Bestocassing, Ont.....	" 25	1	Drowned, canoe upset.
<i>Mining.—</i>				
Miner.....	Sydney, N. S.....	" 4	1	Run over by coal car.
".....	".....	" 7	1	By fall of coal.
".....	Cobalt, Ont.....	" 5	2	While blasting in mine.
".....	Coal Creek, B. C.....	" 6	1	Run over by mine train.
".....	Springhill, N. S.....	" 9	1	By fall of coal.
".....	Thetford mines, Que.....	" 2	1	Fell 150 ft. into pit.
".....	Field, B. C.....	" 16	1	While blasting.
".....	Haileybury, Ont.....	" 7	1	Fell 100 feet down shaft.
".....	Rossland, B. C.....	" 21	1	By explosion of powder.
Prospector.....	Red Pine Rapids, Ont.....	" 7	1	Drowned, canoe swamped.
".....	Larder Lake, Ont.....	" 14	1	Drowned, broke through ice.
".....	Bay Lake, Ont.....	" 22	2	Drowned, canoe upset.
Mine machinist.....	Fernie, B. C.....	" 5	1	Run over by locomotive.
<i>Building trades.—</i>				
Carpenter.....	St. John, Que.....	" 14	1	Caught in machinery.
<i>Metal, engineering and shipbuilding trades.—</i>				
Electrical Worker.....	Toronto, Ont.....	" 5	1	Caught in belting.
".....	Shawinigan Falls, Que.....	" 18	2	Drowned, swept over falls 150 ft. high.
".....	Sault Ste. Marie, Ont.....	" 18	2	Lost life in fire of power house.
".....	Ottawa, Ont.....	" 22	1	Fell from telegraph pole.
Rolling mill worker.....	St. John, N. B.....	" 14	1	Caught in belting.
<i>Woodworking trades.—</i>				
Woodworker.....	Toronto, Ont.....	" 29	1	Caught in machinery.

Merchant.....	Campbellford, N. B.....	" 30	1	In a runaway.

### Drowning Accident Near Canso, N. S.

On May 27, two fishermen while tending lobster traps off Canso, N.S., were drowned by the capsizing of their boat.

### Drowning Accident in Bay Lake, Ont.

On May 26, two prospectors were drowned in Bay Lake, near Cobalt, Ont., their canoe having capsized in a sudden squall.

### Record by Industries and Trades.

*Agriculture.*—In this industry, 11 fatal and 28 non-fatal accidents occurred during May, 1908, compared with 21 fatal and 11 non-fatal in the preceding month and 10 fatal and 23 non-fatal in May, 1907. Three farmers were killed in runaways, 2 by drowning and 1 each by being suffocated by gas, being struck by flying material, by a fall, by being burnt to death, by livestock and by being run over. Of the serious accidents 9 were caused by livestock, 6 by machinery, 5 by runaways, 4 by falls, and 1 each by explosions, by being burnt, and by falling material.

*Fishing and hunting.*—Five fishermen were drowned in May, 1908. In April the record was also 5 drownings and in May of last year, 1 killed and 3 injured.

*Lumbering.*—There were 28 workers killed and 9 injured compared with 10 killed and 5 injured in April, and 13 killed and 11 injured in May, 1907. Nineteen of the fatalities were due to drowning, 3 respectively to being run over and to machinery, 2 to being caught in a log jam and 1 to a tree falling on the victim. Seven of the other accidents were due to machinery and 2 to falling material.

*Mining.*—There were 15 fatal and 8 non-fatal accidents in May as against 7 killed and 11 injured in the previous month and 11 killed and 11 injured in May, 1907. Four respectively of the fatalities were caused by explosions and by drowning, 3 by being run over by vehicles and 2 each by falling material and by falls. Falls of coal seriously injured 3 workmen, machinery 1, an explosion 1, being struck by cars 1, running against a steam pipe 1, and escaping steam 1.

*Building trades.*—In this group there were 1 killed and 16 injured. In April the record was 5 killed and 12 injured, and in May, 1907, 6 killed and 16 injured. A carpenter at St. Johns, Que., was caught in machinery and killed. Eight of the other accidents were due to falling of scaffolds, 2 respectively to explosions, and to elevators, and 1 each to a fall from a house, to tools, to a fall and to falling material.

*Metal, engineering and shipbuilding trades.*—Seven workmen were killed and 31 injured, compared with 2 killed and 27 injured in April last, and 9 killed and 33 injured in May, 1907. Two of the deaths were caused respectively by machinery, by drowning and by being burnt to death, and 1 by a fall. Thirteen of the minor accidents were caused by machinery, 5 by falls, 4 by falling material, 3 by molten metal and 2 each by elevators, electric shock and explosions.

*Woodworking trades.*—During May, a woodworker in Toronto, Ont., was caught in machinery and killed and 20 other workmen were injured. In the previous month there were 1 killed and 11 injured and in May, 1907, there were 12 minor

accidents. Of the injuries 14 were due to machinery, 3 to flying material, 2 to falls and 1 to falling material.

*Clothing trades.*—There was only 1 minor accident caused by machinery in these trades in May as against 2 minor accidents in April last and 2 in May of last year.

*Textile trades.*—Five workmen were seriously injured in this class. There were no accidents in the month before, and 2 minor accidents in May, 1907.

*Food and tobacco preparation.*—Three of these workmen were killed by accident and 8 injured during May, compared with 4 killed and 5 injured in the preceding month and 12 injured in May, 1907. Falling down an elevator shaft caused 1 death, being run over by a loaded wagon another and the explosion of a soda water cylinder the third. Two each of the injuries were due to tools, elevators and runaways, and 1 each to being kicked by a horse and to machinery.

*Leather trades.*—A hide cleaner during May was killed at Winnipeg, Man., by being run over by a train near the tannery and another workman was injured by being struck by a train. There were 1 killed and 1 injured in the previous month and no accidents in May of last year.

*Railway service.*—In May last there were 22 railway employees killed and 31 injured, compared with 32 killed and 45 injured the month before and 20 killed and 30 injured in May, 1907. Of the accidental deaths, being run over by trains or portions thereof caused 9, explosions of dynamite, and being swept away by a flood 3 each, being caught between cars and falling material 2 each, and a collision, a fall and heat prostration 1 each. Seven of the accidents respectively, were due to collisions and to falls, 5 to derailments, 2 each to being struck by trains, to machinery, to blasting to being scalded by steam and to falling material and 1 each to being caught between cars and to being run over.

*Navigation.*—In this group death through accident came to 9 workmen

while 8 others were injured, as against 2 killed and 9 injured in April, 1908, and a 7 killed and 11 injured in May, 1907. Four were killed by the explosion of a portion of a boiler, 3 by falls and 1 each by drowning and by a collision. Falling material injured 4, the explosion of a steam pipe 2, and a fall and being seriously burned 1 each.

*General transport.*—The record during May was 6 killed and 6 injured. In April it was 2 killed and 11 injured and in May, 1907, 2 killed and 10 injured. Two of the fatalities were due to falls and 1 each to being run over, to drowning, to live stock and to being struck by lightning. Of the accidents, 3 were due to falls and 1 each to a runaway, to live stock and to a collision.

*Civic employees.*—There were 1 civic employee killed and 4 injured during May, as against 5 killed and 5 injured in the month before and 4 injured in May of last year. A fireman at Florenceville, N.B., fell from a ladder and was killed and 2 employees were injured by being run over by vehicles and 1 by a fall.

*Miscellaneous.*—Eight were killed and 20 injured, compared with 1 killed and 18 injured in April last and 7 killed and 8 injured in May, 1907. Three of the deaths were due to falls, 2 to falling material and 1 each to being smothered in cement, to an explosion of gasoline, and to being burned in a hotel fire. Three of the minor accidents were due to falling material, 4 each to runaways, to falls and to being struck by a car laden with brick, 2 to a derailment and 1 each to an explosion of gasoline, to a runaway and to an elevator.

*Unskilled labour.*—Five of these workers were killed by accident and 8 injured, compared with 7 killed and 11 injured in the preceding month and 2 killed and 16 injured in May, 1907. One each of the fatalities was caused by being struck by a street car, by being run over, by drowning, by machinery and by an explosion. Falling material was the cause of the 8 other accidents.

## RECENT INDUSTRIAL AGREEMENTS

**Agreement between the Master Plumbers and Fitters' Association of Toronto and the Journeymen Plumbers, Gas and Steamfitters Known as Local Union No. 46.**

CLAUSE 1. That the hours of labour shall be from 8 a. m. to 5 p. m., with one hour for dinner. Saturday 8 a. m. to 12 a. m.

CLAUSE 2. All overtime to be paid at the following rates: Saturday afternoon time and one-half, from 5 p. m. to 8 a. m. and all Statute Holidays time and one-half, Sunday double time, except when working in the country where no Local Union of the U. A. exists they may work 10 hours at single time on regular working days, except where the working day is less than 10 hours.

CLAUSE 3. Time to and from out of town work to 9 p. m. to be paid at single time. If travelling at night, a sleeper to be provided by the employer.

CLAUSE 4. Wages to be paid weekly or fortnightly before 5.15 p. m. on Friday or 12.15 noon Saturday, with a recommendation that Friday be pay day.

CLAUSE 5. All expenses for board and fares on out of town work to be paid by the employer.

CLAUSE 6. In case of any grievance arising between the Master Plumbers' and Fitters' Association and Local Union No. 46, said grievances shall be referred to a committee of five from each Association, said committee to meet within three days' notice thereof, committee to have full power to settle same. In the event of a grievance arising between a Master Plumber or Fitter (who is not a member of the Master Plumbers' and Fitters' Association) and Local Union No. 46, said grievance shall be adjusted by the Master Plumber in question and the Business Agent of Local Union No. 46, or some

member of same who shall be appointed by said Local Union.

CLAUSE 7. No apprentice at either trades be allowed a kit of tools until he has served 3 years at the trade, and not until he has passed an examination. Five years shall be deemed the term of apprenticeship, at the end of which time all apprentices shall pass their final examination. All examinations shall be before an Examining Board mutually agreed upon by both parties to this agreement. Apprentices shall be limited in number to one apprentice to three journeymen, but each shop shall be entitled to one apprentice. All apprentices to be paid not less than \$7.00 per week in their fourth year and not less than \$10.00 per week in their fifth year.

CLAUSE 8. The minimum rate of wages shall be 37½c. per hour from May 9th, 1908, to May 9th, 1909, and 40c. per hour from May 9th, 1909, to May 9th, 1910, and there shall be no maximum.

CLAUSE 9. This agreement shall take effect on May 9th, 1908, and shall remain in force till May 9th, 1910, and should either party to this agreement wish to change, add or amend the above they shall give at least three months' notice in writing prior to termination of this agreement, and providing no notice is given by either party three months prior to May 9th, 1910, this agreement to continue in force from year to year until such notice is given as herein provided. When such notice has been served by either party, it shall be the duty of the Joint Committee to convene within one month from date of such notice.

**Hotel and Restaurant Waiters' Wages at Victoria, B.C.**

THE following rules and rates of wages were recently agreed upon by various restaurant and hotel keepers and the local Hotel and Restaurant Employees' Union of Victoria, B. C.:—

1. Waiters working in restaurants shall receive not less than ten dollars and fifty cents per week, ten hours to constitute a day's work and six days to the week.

2. Waiters working in hotels and clubs shall receive not less than thirty-five dollars per month (six days constituting a week's work).

3. Night waiters shall receive not less than twelve dollars per week, eleven hours to constitute a night's work, and six nights a week's work.

4. Waitresses working in restaurants shall receive not less than eight dollars per week, ten hours to constitute a day's work, and six days a week's work.

5. Waitresses working in hotels shall receive not less than thirty dollars a month, six days to constitute a week's work.

6. Overtime, 35 cents an hour, or fraction thereof.

7. Banquets working not later than 12 p.m., three dollars, after 12 p.m., five dollars. Afternoon work preparing for banquets, fifty cents per hour.

8. Extra shifts of 10 hours, one dollar per day extra to regular wages.

9. Outside work, viz., fairs, parks, etc., two dollars for five hours or less, three dollars and fifty cents for 10 hours, within city.

10. Outside the city, picnics, etc., three dollars and fifty cents and transportation.

12. Any waiter or waitress working the seventh day shall be fined one dollar and fifty cents, in event of there being available union help in the city.

### OPPORTUNITIES OF EMPLOYMENT.

In order that skilled workmen and labourers may be made aware of opportunities of employment and the demand for labour in different parts of the Dominion, the *Labour Gazette* publishes herewith a statement of such opportunities of employment as have been furnished to the Department of Labour by employers, contractors and others. While exercising care and discrimination in the statement which it publishes, it is to be understood that the parties who have supplied the information are alone responsible for the accuracy of it, and that beyond publishing the same for the mutual benefit of employers and employees, the Department assumes no responsibility in connection with the publication. The Department will be pleased to receive for publication from persons desirous of obtaining skilled or unskilled labour in connection with any industries or trades of the country, a statement of the nature and extent of their demand. Similarly, the Department will be pleased to receive and publish on behalf of persons out of employment statements from labour unions or bodies of skilled or unskilled workmen of the nature and extent of the supply of labour available.

Parties desirous of profiting by the information contained in the article are requested to communicate direct with the persons concerned for further particulars, exact terms, etc., the purpose of the Department in publishing the information being solely that of making better known the demand and supply of labour.

*Mining.* — Fifty miners and three loaders are wanted by the Port Hood Coal Company at the mines at Port Hood, Inverness County, Cape Breton, N. S.

### CO-OPERATIVE PRODUCTION AND DISTRIBUTION IN IRELAND IN 1906.

**R**ETURNS from co-operative societies for production and distribution in Ireland according to statistics published in the *British Labour Gazette*, show that 472

societies were at work during the year 1906. Their total membership at the end of 1906 was 71,081 (consisting of 70,887 individual members and 194 societies), their total share and loan capital amounted to £349,144 (£180,018 shares and £169,126 loans), and their reserve and insurance funds to £97,623.

Their sales during the year amounted to £2,271,694, and the profit, including interest on share capital, amounted to £46,616.

Compared with 1905 an increase is shown of 45 societies, of 5,225 members, of £14,922 in share and loan capital, of £29,970 in the reserve and insurance funds, of £393,108 in total sales, and of £10,779 in the amount of profit. The total number of persons directly employed by the societies was 2,394, of whom 1,905 were employed in production.

### EMPLOYERS' LIABILITY ON RAILWAYS IN THE UNITED STATES

**D**URING the month of April, the Senate and House of Representatives of the United States assented to an Act "relating to the liability of common carriers by railroads to their employees in certain cases" (\*). The act provides for awarding damages to men employed by inter-state carriers in inter-state commerce in all cases where death or injury results in whole or in part from the negligence of the officers, agents or mechanisms of the carrier. Where an employee has been guilty of contributory negligence, the amount of damages to which he would otherwise have been entitled is to be reduced in proportion to the extent of such contributory negligence as determined by the jury in each individual case. Carriers are allowed to offset against such damages as may be awarded any amount which they have contributed to insurance or indemnity funds through systems of their own. An action for the recovery of damages must be instituted within two years of the date of the cause of the suit. The act was

(\* ) A copy of this legislation was received at the Department of Labour during May by courtesy of the Honourable the Secretary of the Department of Commerce and Labour of the United States.

signed by the President upon receiving an opinion from the Attorney General that the measure was constitutional.

The act is an outcome of a recent decision of the Supreme Court of the United States holding the Employers' Liability Law of 1906 to be unconstitutional. The new act, at the instance of the labour interests, has been made broad in its application, in order to ascertain in any test in the courts the maximum amount of protection of this kind that will be permitted.

**TRADE DISPUTES DURING THE MONTH OF MAY, 1908.**

WHILE the number of trade disputes in existence in Canada during May was much less than in the corresponding month of the previous year, and only exceeded the month of April by two, there was a great increase in the amount of time lost, owing largely to a strike of cotton mill hands, which extended to many industrial centres in the province of Quebec, throwing about 6,000 employees out of work. Building operations were to some extent impeded in Montreal on account of a strike of bricklayers, but there was little unrest elsewhere in Canada in the building trades.

**Analysis of Trade Disputes During the month.**

*Number and Magnitude.*—The total number of trade disputes reported to have been in existence in Canada during May was 13, compared with 11 in April, and 49 in May, 1907. There were 48 firms and about 8,743 employees affected by trade disputes during the month, about 46 firms and 9,408 employees having been involved in new disputes.

*Loss of time in working days.*—The loss of time to employees through trade disputes during May was approximately 127,425 working days, compared with 5,400 in April, and 9,408 in May, 1907.

*Trades affected by new disputes.*—The following table shows the trades affected by new disputes during the month, and the number of workers affected in each group of trades.

It will be remembered that at an interview of representatives of the Trades and Labour Congress of Canada with the Dominion government in January last, the enactment by the Dominion parliament was requested of a Workmen's Compensation Act having special reference to employment on railways under the jurisdiction of the Dominion (†).

(†) See the *Labour Gazette* for February, 1908, p. 994.

Trades.	No. of Disputes.	No. of Workers.
Mining.....	3	2,140
Building trades.....	4	748
Metal trades.....	1	20
Textile trades.....	2	6,350
General transport.....	1	250
<b>Total.....</b>	<b>11</b>	<b>9,408</b>

*Localities affected by new disputes.*—The new disputes of the month occurred in the following provinces of the Dominion:—

Province.	No. of Disputes.
Nova Scotia.....	1
Quebec.....	4
Ontario.....	3
Alberta.....	1
British Columbia.....	2
<b>Total.....</b>	<b>11</b>

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages.....	2
Against reduction in wages.....	3
Against reduction in wages and bonus system.....	1
Against discharge of employees.....	3
Against employment of non-unionists..	1
Against conditions of employment.....	1
<b>Total.....</b>	<b>11</b>

*Methods of settlement.*—Of the 13 trade disputes in existence during the month, 6 were definitely settled, and in 3 others it was reported that the firms involved had ceased to be affected leaving 4 disputes still in existence at the close of the month. One dispute was settled by conciliation under the Industrial Disputes Investigation Act, 1907, two were settled by negotiations between the parties concerned, in two cases work was resumed without negotiations, and in four, the places of the strikers were filled.

*Results of disputes.*—Of the disputes which were terminated 7 resulted in favour of the employers, and 1 in favour of the employees, while in 1 the result was indefinite, the matter in dispute being referred to a Board of Investigation and Conciliation.

#### **Disputes which Commenced Prior to the Beginning of the Month.**

The only trade disputes in existence during May, which began prior to the 1st of that month were a strike of iron moulders at Brantford, Ont., and a strike of builders' labourers and bricklayers at Ottawa, Ont. A brief account of these disputes is given below.

#### **Strike of Iron Moulders at Brantford, Ont.**

A strike of iron moulders at Brantford, Ont., which began on April 1, continued throughout May, without any steps towards a settlement being taken. The dispute arose from a complaint of the men, that the iron supplied to them was not sufficiently melted, causing bad castings. About 100 men were affected by this dispute. During the month 60 men were committed for trial at the June sessions for refusing to comply with an order of the police magistrate to discontinue picket duty. The counsel for the moulders claimed that peaceable picketing was lawful.

#### **Strike of Builders' Labourers and Bricklayers at Ottawa, Ont.**

No definite settlement was reached in a strike of 30 builders' labourers, at Ottawa, Ont., who went out on April 22, on ac-

count of the refusal of the employers to grant a demand for an increase in wages from 15 to 25 cents an hour. About 25 bricklayers also stopped work in sympathy with the labourers. During May, however, building operations were resumed, the contractors having procured other men to take the places of the strikers.

#### **New Disputes.**

The new disputes of the month comprised strikes of cotton millhands at Valleyfield, Hochelaga, St. Henry, Magog and Montreal, Que., woollen mill hands at St. Hyacinthe, Que., coal miners at Port Hood, N.S., and Michel. B.C., freight handlers at Owen Sound, Ont., bricklayers at Montreal, Que., and Berlin, Ont., bricklayers, masons and stonecutters at Calgary, Alta., iron moulders at Longueuil, Que., and tunnel workers at Windsor, Ont.

#### **Strike of Cotton Millhands in the Province of Quebec.**

On May 4, the Dominion Textile Company and the Montreal Cotton Company reduced the wages of the operatives by 10 per cent, claiming this step was necessary in order to meet changed conditions in the cotton industry. The mule spinners immediately declared a strike, to the number of 184 at Valleyfield and 83 at the Hochelaga mills and the Merchants' Cotton Mill at St. Henri, Que. These were followed by other operatives, 1,200 going out at St. Henri on May 6, 350 at Hochelaga and several hundred at Magog on May 12. On May 15, it was reported that the spoolers went out at Valleyfield, followed the next day by 150 hands from the finishing department. The Montreal Cotton Company thereupon closed the mill, throwing about 3,000 operatives out of work. It was estimated that about 6,000 employees were idle owing to the dispute at the close of the month, but it was claimed by the Dominion Textile Company on May 20, that their employees were all at work in the mills at Montmorency Falls, Moncton, Halifax, Windsor, Kingston, and St. Henri, and that 75 per cent were at work at Hochelaga. The

Magog Cotton Mill re-opened on May 21. The Merchants' Cotton Mill at St. Henri and St. Ann's Mill at Montreal were closed, but the company stated that there was no work to be done at the former mill.

On May 19 a delegation of textile workers, waited upon the Honourable Minister of Labour, and the Honourable W. P. Brodeur, and requested that a Commission be appointed to investigate the causes of the disputes. The Minister of Labour promised that this request would receive serious consideration.

#### **Strike of Cotton Millhands at St. Hyacinthe, Que.**

On April 4, the Penman Manufacturing Company of St. Hyacinthe, Que., discharged a number of employees among whom were all the principal officers of the local branch of the Federation of Textile Workers and many members of this union. The employees alleged that the object of the company was to destroy the union in its factory. After several unsuccessful efforts were made by the employees to come to an understanding with the company, a strike was declared at a meeting on May 9, to take effect in two days, on account of the refusal of the company to take back the men who had been discharged. About 350 employees were involved in this dispute. No settlement took place during the month, but the shop continued in operation with workpeople who were not members of the union, and a number of non-unionists were engaged to take the places of the strikers. It was reported that about 300 hands were at work at the close of the month.

#### **Strike of Coal Miners at Port Hood, N. S.**

At the session of the Grand Council of the Provincial Workmen's Association held at Halifax in September, 1907, a resolution was passed that all men employed by the Port Hood and Richmond Coal Company in and about their mine at Port Hood, N.S., should receive an increase in wages of 15 per cent on May 1, 1908. Upon the refusal of the company to grant this demand, the employees to

the number of about 300, stopped work on May 1. On May 5, the strikers returned to work, the matter in dispute being referred to a Board of Investigation and Conciliation, under the Industrial Disputes Investigation Act, 1907.\*

#### **Strike of Coal Miners at Michel, B. C.**

On May 18, the coal miners employed by the Crow's Nest Pass Coal Company at Michel, B.C. The cause of the dispute was the refusal of the company to hire a certain member of the Miners' Union, whom the Superintendent declared not to be a competent coal miner. The strikers alleged, on the other hand, that this man had been discriminated against by the company's officials. It was reported by the company that the officers of District 18, United Mine Workers of America, with whom the agreement under which the mines are operating was made, declared that the strike was unwarranted, and that they would insist upon the men returning to work without delay. After a number of conferences had been held between the district and local officers of the union, work was resumed on the morning of Saturday, May 23.

On the re-opening of the mine, the company discharged twelve men for having absented themselves without leave, claiming the right to do so under the agreement. On the following day the miners informed the superintendent of the company that they would not go to work until the twelve discharged men were re-instated. The company not acceding to this demand, the miners again declared a strike, remaining out until the evening of May 28, when they resumed work under the terms of the agreement. The discharged men were not re-instated. According to the company about 800 men were directly affected by the dispute, and 120, employed in the coke ovens, were indirectly affected. The number of men involved was stated by the secretary of the Miners' Union to be about 850.

While the dispute was in progress, information was laid by the company

\* A further account of this dispute is given in the Special Article on the Industrial Disputes Investigation Act, 1907, on another page.

against three men, who were charged with a violation of the Industrial Disputes Investigation Act, 1907, by inciting and encouraging to strike. When the case was brought into court, the police magistrate decided that he had no jurisdiction in the matter.\* No appeal was taken by the company against this decision.

**Strike of Freight Handlers at Owen Sound, Ont.**

On May 7, a strike of freight handlers employed by the Canadian Pacific Railway Company took place at Owen Sound, Ont., on account of dissatisfaction with the scale of wages arranged for the present season of navigation, which was a reduction of 2 cents per hour compared with the rate of last year. It was reported by the company that practically all the men who went on strike had signed the following engagement agreement:

"I..... of..... do hereby agree to work for the Canadian Pacific Railway Company as porter, at Owen Sound, for the season of navigation of 1908, and to perform such other additional services as the company may require during above-mentioned season, at the rate of 12 cents per hour in the day (from 7 a.m. until 7 p.m.) and at the rate of 13 cents per hour in the night (from 7 p.m. until 7 a.m.) and on Sundays; also trimming grain in vessels and cars at the rate of 19 cents per hour, and handling coal at 19 cents per hour (the company having the right to end the engagement at any time without notice); and also—

1. To conform to the Rules and Regulations of said company, and to such further Rules and Regulations as may come into force from time to time as the same are made known to me;

2. To be responsible for all loss and damage sustained by the company arising from carelessness or negligence on my part in discharge of my duty; and

3. By complying with all the terms of this engagement I am to receive at its termination a further sum, as a bonus, of 2 cents per hour from the opening of navigation until close of navigation (with the exception of the time employed in trimming grain or handling coal), provided always, that if at any time I wish to quit the company's service I am to give fifteen days' previous notice of my intention so to do, or forfeit such bonus."

In the course of the next two or three days, the company brought parties of men from Toronto to take the places of the strikers, accompanied by detectives. On May 11, when an attempt was made to unload a steamer at one of the grain elevators, the strikers proceeding towards the elevator came into collision with the detectives, and in a riot that

followed six men were reported to have been injured. Quiet was restored by the reading of the Riot Act by the Mayor, who was on board the steamer, and by the stopping of the elevator machinery. A conference was then arranged between the two parties, and at noon an agreement was reached and the men returned to work. The terms of the agreement were embodied in the following letter, which was signed by representatives of the freight handlers:

"The Committee of  
C.P.R. Freight Handlers,  
Owen Sound.

Dear Sirs:

As verbally intimated' about noon to-day, the company has agreed to renew the offer made through the Mayor on Saturday the 9th instant to the Committee representing the Freight Handlers, to re-instate the men on the basis of—

- 15 cents per hour for day work—7 a. m. to 7 p.m.;
- 16 cents per hour for night and Sunday work—7 p.m. to 7 a.m.;
- 20 cents per hour for grain and coal at any hour.

These rates to continue in effect throughout the present season unless either party gives thirty days' notice of its intention to cancel this arrangement, and all men to resume work at 2 P. M. to-day.

The company further agrees to transport back to Toronto to-day free of charge all men who were brought by the company since May 7 to Owen Sound to work for the company.

If there is any more work than can be handled by the C.P.R. Owen Sound Freight Handlers, preference will be given to the men from Toronto now here and who do not wish to return.

Yours truly,

(Sgd.) JAMES OBORNE,  
General Superintendent, C.P.R.

**Strike of Bricklayers at Montreal.**

On May 1, a strike was declared by the Bricklayers' Union at Montreal, Que., on account of their failure to reach an agreement with the Master Bricklayers' Association with regard to the rate of wages during the present season. Several joint conference meetings were held from February to May 6, but without result. The men desired a renewal of the agreement of 1907, calling for a uniform rate of 50 cents per hour, while the employers proposed a sliding scale of wages from 35 cents to 50 cents per hour according to ability, or a flat minimum rate of 40 cents. The general decline of trade, requiring retrenchment was given as a reason why the rate of 50 cents could not be continued. It was claimed by the

\* A copy of the decision is given in a special article on another page of this number.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE SERIES C., No. 89.

TABLE OF TRADE DISPUTES DURING THE MONTH OF MAY.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.			Date of commencement.	Date of termination.	Result.
			Directly.	Indirectly.	Directly.	Indirectly.	Indirectly.			
			Di-rectly.	Indi-rectly.	Fe-males.	Males.	Fe-males.	Males.		
<b>DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.</b>										
<i>Building Trades—</i> Builders' labourers and bricklayers	Ottawa, Ont.	For increase in wages of labourers from 15 to 25 cents an hour.	1		55		25		Apr. 22	No settlement reported, but places of strikers were filled.
<i>Metal Trades—</i> Iron moulders	Brantford, Ont.	Strikers alleged that iron is not melted sufficiently, causing bad castings and consequent loss to themselves.	1		100				Apr. 1	No settlement reported at end of month, but places of some strikers were filled.
<b>DISPUTES WHICH BEGAN DURING THE MONTH.</b>										
<i>Mining—</i> Coal miners	Port Hood, N.S.	For increase of 15 per cent. in wages.	1		300				May 1	Work resumed, and application made for a Board of Investigation and Conciliation, under Industrial Disputes Investigation Act, 1907.
Coal miners	Michel, B.C.	Against discharge of an employee.	1		800		120		May 18	Work resumed, discharged employee not re-instated.

Coal miners.....	Michel, B.C.....	Against discharge of employees	1	800	120	May	29	Work resumed, discharged employees not re-instated.
<i>Building Trades—</i> Bricklayers.....	Montreal, Que.....	Against reduction in wages....	30	500		May	1	No settlement reported, but employers claimed to have filled the places of the strikers. Some firms had conceded demands of men.
Bricklayers.....	Berlin, Ont.....	Against reduction in wages from 40 to 35 cents per hour.....	7	75		May	1	Work resumed, employers' offer of 35 cents per hour accepted.
Bricklayers, masons and stonecutters...	Calgary, Alia.....	Refusal of employers to have pay cheques brought to works	1	38	15	May	19	No settlement reported at end of month.
Tunnel workers....	Windsor, Ont .....	For increase in wages.....	1	120		May	20	Places of strikers were filled.
<i>Metal Trades—</i> Iron moulders .....	Longueuil, Que.....	Against declaration of company for an 'open shop'.....	1	20		May	1	No settlement reported, but company claimed to be running foundry with non-unionists.
<i>Textile Trades—</i> Cotton mill hands...	Valleyfield, Hochelaga, St. Henry, Magog and Montreal, Que.....	Against reduction of 10 per cent. in wages.....	2	6,000		May	4	No settlement reported at end of month.
Woolen millhands	St. Hyacinthe, Que	Against discharge of unionist employees.....	1	350		May	11	No settlement reported but work continued in factory with non-unionists, places of some strikers were filled.
<i>General Transport—</i> Freight handlers....	Owen Sound, Ont..	Against reduction of 2 cents per hour in wages compared with last season, and against bonus system.....	1	250		May	7	Increase in wages conceded, and bonus withdrawn.

\* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon, the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employees, or of less duration than 24 hours.

Builders' Exchange that no job had been subjected to more than a few days' temporary detention since May 1, and that by May 29, each of the 30 firms involved in the dispute had all the bricklayers needed, with a waiting-list of applicants, the principle of the 'open shop' having been adopted. About 500 bricklayers were reported to have been idle during the month. About 250 members of the bricklayers' Union were working for employers outside of the Master Builders' Association.

On May 16, the Builders' Exchange sent circulars to all the architects of Montreal, notifying them of the matters in dispute and requesting their support, either by keeping back new work until the trouble was settled, or by giving preference, other things being equal, to members of the Builders' Exchange.

#### Strike of Bricklayers at Berlin, Ont.

On May 1, a strike was declared by the bricklayers and masons at Berlin, Ont., on account of the refusal of the employers to grant a demand for the continuance of the old scale of wages of 40 cents per hour. Work was resumed on May 11, the employers' offer of 35 cents per hour for a nine hour day being accepted. About 7 firms and 75 men were involved in this dispute.

#### Strike of Bricklayers, Masons and Stonecutters at Calgary, Alta.

On May 19, a strike of bricklayers, stonemasons and stonecutters employed by the Alberta Building Company at Calgary, Alta., declared a strike, on ac-

count of the refusal of the company to have the pay cheques brought to the works where the men were employed. No settlement of the dispute took place during the month. It was reported that about 38 men were directly affected by this dispute, and 15 were indirectly affected.

#### Strike of Iron Moulders at Longueuil, Que.

On May 1, about 20 members of the Iron Moulders' Union employed by the Standard Foundry and Manufacturing Company at Longueuil, Que., went on strike, on account of the company declaring for an 'open shop'. There were 12 men indirectly affected by the dispute. No settlement was reported during the month, but the company stated that the foundry was being run with non-union hands with a fair degree of success.

#### Strike of Tunnel Workers at Windsor, Ont.

On May 18, about 120 men employed in the construction of the Michigan Central Railway tunnel at Windsor, Ont., stopped work on account of the refusal of the contractors to grant a demand for an increase in wages from \$1.75 to \$2.50 per day. Two days later the places of the strikers were filled, and the employers reported that the conditions remained the same as before the strike.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of May, and which have been reported to the department.

### REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of department and bureaus were received at the Department of Labour during May, 1908.

#### NOVA SCOTIA REPORT.

##### Immigration and Colonization.

Report of the Secretary of Industries and Immigration. Session 1908. Halifax, King's Printer, 1908. Page 24.

**T**he First Report of the Secretary of Industries and Immigration of Nova Scotia, who was appointed on October 16, 1907, deals largely with the organi-

zation of this branch of the public service. The work is classified under three headings, advertising, statistics, and methods for securing a suitable class of immigrants and distributing them.

The advantages of Nova Scotia for the settler and investor were set forth in special articles and advertisements in a number of the principal newspapers and magazines, which give special attention to Ca-

nadian affairs. Official departmental reports and other literature were sent to correspondents seeking information. Lectures were delivered in the New England States, with the object of attracting tourists and capitalists, and arrangements were made for three farmer delegates from Nova Scotia to deliver lectures in the British Isles, under the Assistant Superintendent of Immigration. A bureau for farm labour was organized for the purpose of providing situations on farms for immigrants. A number of letters from settlers are given, showing the success they have attained on the farms.

The annual report of the Agent General for Nova Scotia, and a report of Salvation Army immigration work in Nova Scotia are appended to this report.

## ONTARIO REPORTS.

### Game and Fisheries of Ontario.

First Annual Report of the Game and Fisheries of the Province of Ontario, 1907. Toronto: King's Printer, 1908. Page 102.

In the session of 1907, the Ontario legislature created the Game and Fisheries branch of the public service, abolishing the Board of Game Commissioners. The first annual report of the Superintendent contains a summary of the operations of this branch since its establishment, with a number of suggestions for the better protection of fish. The reports of the game and fisheries inspectors and overseers show the conditions prevailing throughout the province, and a statistical summary of the fishing industry is given for 1907, with some comparisons for previous years. In 1907, there were 149 tugs or vessels employing 725 men, and 1,448 boats employing 2,455 men engaged. The total value of the fish taken amounted to \$1,935,024.90, an increase of about \$200,000 compared with the previous year.

### Protection of Neglected and Dependent Children.

Fifteenth Report of Neglected and Dependent children of Ontario. J. J. Kelso, Superintendent. Toronto, 1908. Page 110.

The Report of the Superintendent of Neglected and Dependent Children of Ontario for 1907 shows a steady growth in the movement for child protection in this province. The number of Children's Aid Societies has increased from 59 in 1906 to 67 in 1907, while many smaller societies and committees are doing occasional work. Although over 5,000 children have been placed in foster homes, it has been found impossible to supply one-half of the people who have made application for them. The advantages of placing children in private homes where they may enjoy family life, in preference to institutions, are pointed out, and the suggestion is made that the orphanages which are keeping 4,430 children, might with advantage let some of their wards be placed in foster homes. The report contains an account of Children's Courts and of the probation system, by means of which an effort is made to influence delinquent children in their homes with a view to effecting their reformation, in place of sending them to gaols or reformatories.

### OTHER REPORTS RECEIVED.

*Canada.*—List of Shareholders in the Chartered Banks of the Dominion of Canada as on December 31, 1907.

*Ontario.*—Report of the Women's Institutes of the Province of Ontario. 1908. Part II. List of Meetings and Speakers.

Report of the Inspector of Legal Offices. Ontario, 1907.

*United States*—Report of the Commissioner of Corporations on Cotton Exchanges. Part I.

*Spain.*—Instituto de Reformes Sociales. Seccion Primera. Proyecto de Reforma de la Ley de Accidentes del Trabajo.

## RECENT LEGAL DECISIONS AFFECTING LABOUR.

## SUPREME COURT CASES. .

**Appeals Dismissed in Many Cases.**

**I**n the appeal by the Crown from the judgment of the Exchequer Court noted at page 108 of the *Labour Gazette* for July, 1907, the appeal was dismissed with costs. As this case involves a very important question as to the liability of the Crown for injuries sustained by its employees owing to the negligence of fellow servants of the injured party and other important questions, it is understood that an appeal is to be taken by the Crown to the Privy Council.

(King v. Armstrong; 5th May, 1908; Supreme Court of Canada.)

In a similar case of the King v. Desrosiers noted in the same number of the *Labour Gazette*, an appeal was also taken by the Crown, but the argument of it will stand over till the appeal in the Armstrong case is decided by the Privy Council.

(King v. Desrosiers; 5th May, 1908; Supreme Court of Canada.)

In the case noted at page 112 of the July, 1907, number of the *Labour Gazette*, an appeal was taken to the Supreme Court of Canada by the plaintiff from the judgment of the Court of Appeal for Ontario dismissing the action, but the appeal was dismissed, the Court agreeing with the judgment of the Court below.

(Wilson v. Davies; 5th May, 1908; Supreme Court of Canada.)

In the case noted in a former number of the *Labour Gazette*, an appeal was taken by defendants to set aside the verdict and judgments confirming same, but the Court dismissed the appeal.

(Wabash Railway Co. v. McKay; 5th May, 1908; Supreme Court of Canada.)

## ONTARIO CASES.

**Appeals in Damage Actions Dismissed.**

In the case noted at page 1259 of the April number of the *Labour Gazette*, al-

though as there stated a jury awarded plaintiffs \$800 damages, on motion for judgment the trial Judge dismissed the action on the ground of the non-liability of defendants. From that judgment the plaintiffs appealed but their appeal has been dismissed.

(Burd v. Empire Limestone Co.; 19th May, 1908; Divisional Court.)

In the case noted at page 1161 of the March number of the *Labour Gazette*, an appeal by plaintiff from the judgment at the trial was dismissed.

(VanDusen v. Robertson et al.; 19th May, 1908; Divisional Court.)

**Injury to Stranger Working in Machine Shop.**

Plaintiff was a skilled mechanic, and the East Templeton Lumber Company wanted him to re-cog a wheel on their premises. He refused to do the work there, so they arranged that he should go to the defendants' shop in Ottawa, and do the work there, and the defendants were to trim up the cogs after plaintiff had completed his work. When plaintiff went to the Fleck machine shop, he selected the place for putting the wheel, which was over a trap-door in the machine room. The defendants would have preferred his doing the work in some other part of the shop, but for some reasons of his own, he insisted on having that place assigned to him, and the wheel was slung up by chains convenient for him to re-cog it. About 4 or 5 feet from where he stood at work was a lathe, run by a pattern-maker in the employ of defendants, and who had had many years' experience in that work. This man was at work at the lathe trimming up a pattern, when a piece of it flew off the lathe and caused very serious injury to plaintiff, but whether by actual impact with plaintiff, or by causing plaintiff to strike himself with the hammer he was using, it was difficult to determine. Plaintiff was employed and paid by the East Templeton Lumber Co. The trial judge held that the defendants would have been liable to

plaintiff in damages if he had been injured by reason of the premises not being reasonably secure, or through the negligence of a workman in doing something likely to prove dangerous. In the present case, however, there was no negligence, for the pattern had been selected with care; it had been put upon the lathe to be tested, and while it was revolving no indication of a flaw was manifested. The lathe was and had been in good condition. In consequence the action failed and must be dismissed with costs.

(McDonell v. Alexander Fleck, Ltd.; 7th May, 1908; MacMahon, J.)

#### **Defective System of Doing Work.**

Action against defendant, a contractor, for damages for injuries sustained by plaintiff, a workman in his employment. Plaintiff had been employed for six days driving horses attached to cars, hauling down laden cars, and bringing up empty cars from and to an excavation for a subway on Bank Street in the city of Ottawa, when owing to a collision between the loaded cars which he was taking to the dump and some empty cars which were coming in the opposite direction at great speed to take the switch to get out of the way of the cars which plaintiff was taking to the dump, the plaintiff sustained injuries resulting in the loss of his leg. In giving his decision, the presiding Judge said in part: "There was no provision made for applying the brakes on the last of the cars being driven by plaintiff, and, for all practical purposes, the cars might as well have been without a brake. And defendants' foreman should not have permitted flying shunts to be made, as there was danger, from the speed at which the empties were running, of meeting the loaded cars where the tracks converged, which he well knew, from the complaint made by the plaintiff, was a dangerous point on the railway. Because of the defendant's negligent system of managing the works, he is responsible to plaintiff for the injury sustained, and I assess the damages at \$3,000."

(Dagg v. McLaughlin; 23rd April, 1908; MacMahon, J.)

#### **Damages for Broken Arm.**

At the St. Thomas Spring Assizes recently, an action was brought by a former

machinist in the employ of defendants to recover damages for injuries sustained while in their employment and in the course of same. Plaintiff with other workmen was engaged in adjusting the king bolt to a locomotive tender, when the jacks which were used to hold the tender up gave way and plaintiff's arm was broken in three places. The jury found defendants guilty of negligence in not taking proper precautions to protect plaintiff from injury, and awarded him damages to the extent of \$2,200. Judgment was subsequently entered in his favour under the Workmen's Compensation Act for the sum of \$2,065.80.

(Bainard v. Michigan Central Railway; 8th May, 1908; Magee, J.)

#### **Damages for the Loss of an Eye.**

At the same Assizes an action brought by plaintiff, a machinist, to recover damages for the loss of an eye through being struck by the flying portion of a tool or punch from a slot machine while in the employ of defendants, was settled by the payment to plaintiff of the sum of \$1,875 and costs.

(Pilkington v. Michigan Central Railway; 22nd April, 1908; Magee, J.)

#### **No Liability at Common Law or Under Workmen's Compensation Act.**

Plaintiff was a book-keeper and employed as such by defendants and worked in their factory at Dunnville. The defendants had a fireproof vault on their premises, for the safe-keeping of books and papers, etc. The vault had in it, for lighting purposes, a pipe through which flowed natural gas, this gas to be turned on or shut off by means of the ordinary valve. Generally the jet of gas was lighted at the opening of the vault in the morning of every working day, left burning during the day, and turned off before closing the vault in the afternoon or evening. It was one of the duties of the plaintiff to turn off the gas and close the vault in the evening, and to open the vault and light the gas in the morning. On 22nd July, 1907, a Monday morning, the plaintiff, upon opening the vault and entering the same, as part of her duty, was about to light the gas jet, when an explosion occurred, in which she was very badly burned; her neck, face, and arms were in-

jured. Plaintiff brought action claiming damages against defendants both at common law and under the Workmen's Compensation for Injuries Act. The case was left to the jury to assess damages in case there was any liability on the part of defendants under either branch of the action, and they assessed them at the sum of \$300. After reserving judgment, the trial Judge held that plaintiff did not come within the definition of a "workman" within the meaning of the Compensation Act, and so could not recover on that branch of the case. Upon the other branch he found upon the evidence that there was no negligence imputable to defendants in respect to the installation of the gas pipe, and that the cause of the accident was matter of pure conjecture, and therefore defendants could not be held liable. The action was therefore dismissed, but without costs.

(Miller v. Monarch Manufacturing Co.; 28th April, 1908; Britton, J.)

#### **Picketing at Brantford.**

Bruce Swart and Dominique Sestie, two striking moulders formerly employed at the Buck Stove Works, were fined \$10 each in the Police Court at Brantford recently on a charge of assaulting George P. Buck and endeavouring to prevent Mr. Buck from conveying a strike-breaker into the shop.

(Rex v. Swart et al.; 22nd April, 1908; Livingston, P.M.)

Before the same tribunal six Union moulders who were charged with besetting the Buck works were discharged on promising to help the police in future in maintaining order.

(April 23rd, 1908.)

At the same place, Roxy Farrell, strike-breaker, who was quartered at the Buck works, was fined \$50 and costs for pointing a revolver at George Battye, a striking moulder.

(April 30th, 1908.)

#### **Improperly Marked Apples.**

For packing apples in barrels improperly marked, A. A. Clarke, of Brighton, was fined 25 cents a barrel on a consignment of thirteen barrels which he sold to Mr. H. Peters of Toronto.

(Rex v. Clarke; 30th April, 1908; Toronto Police Court.)

#### **Damages for a Broken Back.**

Plaintiff, a young tinsmith, brought action at the Toronto Assizes recently to recover damages from the defendants, his former employers, to recover damages for personal injuries sustained by him in the course of his employment. The action was brought at common law and under the Workmen's Compensation Act, and the amount of damages sought was \$5,000. The negligence charged against defendants consisted in the defendants' foreman instructing plaintiff to enter a large galvanized pipe fourteen feet above the floor, which was only held by one rivet. When plaintiff entered the pipe it fell and plaintiff's back was broken. In giving judgment in plaintiff's favour, the presiding Judge said that he regretted that the negligence being that of a fellow servant, he could not give judgment under the claim at common law, otherwise he would have allowed the sum of \$5,000. As it was, however, plaintiff could only recover under the Workmen's Compensation Act, and under it he would be limited to a recovery for \$1,500 for which sum he ordered judgment to be entered. His Lordship took occasion to say that he had never heard of a case in which a man's life had been so recklessly risked as was plaintiff's by his foreman in the case in hand.

(Johnson v. Dillon Co.; 30th April, 1908; Mulock, C.J.)

#### **Conductor Committed for Trial on Charge of Violation of Rules of Company.**

John Lawton, a conductor on the Wabash Railway, was recently arrested on a charge of violating the rules of the company. The charge is based on the fact that on January 2nd last he ran part of his train from Corinth to Tilsonburg without orders and that he neglected to protect the portion of his train left in the siding at Tilsonburg, thereby endangering the lives of persons lawfully on the property of the company. It will be recalled that as a result a collision occurred with a G.T.R. freight train, in which the engineer and a brakeman of the latter were killed. After a preliminary hearing before the Magistrate, Lawton was committed for trial. References to the former

proceedings in connection with the matter will be found in the February number of the *Labour Gazette* at page 1025 under the name 'Inquest re Walker' and in this number at page 1483 under the name Walker v. Wabash.

(Rex v. Lawton; 4th May, 1908; St. Thomas.)

### Sunday Selling by Means of Slot Machines.

In the Police Court at Toronto recently a charge was laid against a company owning a number of automatic match box vendors for a violation of the Lord's Day Act in allowing the machines to do business on Sundays. In defence it was set up that notices were affixed to the machines to the effect that they were not open for business on Sundays. The Magistrate, however, held that this notice did not exempt any cent-in-the-slot machine from charges of breaking the Lord's Day Act. In the result the charge was withdrawn, but the manager of the company was informed that he must arrange to take in his machines over Sunday or be penalized for contravening the Act.

(6th May, 1908; Kingsford, P.M.)

### Verdict of Coroner's Jury in Plantagenet Collision.

An inquest was recently held at Plantagenet to enquire into the circumstances surrounding the death of Fireman Blackburn on the Montreal-Ottawa division of the C.P.R. last fall. The concluding of the inquest was delayed so long in order to have the evidence of engineer Reynolds, who was severely injured in the accident and has only recently got out of hospital. The jury brought in the following verdict: "We find that the late John Knox Blackburn came to his death in a collision on the C.P.R. at Plantagenet station on the night of September 11, 1907, and that this collision was caused by the negligence of the said company in not having a night operator at that station, and the ballast train crew coaling on the main line when there was sufficient room for them to coal on the main siding. We find also that this has been the usual practice and we recommend that in the future this be prevented."

(Inquest re Blackburn; 18th May, 1908; Derby Coroner.)

### Charge of Manslaughter Against Engineer Dropped.

In connection with the case noted at page 736 of the December number of the *Labour Gazette*, the charge of manslaughter against Engineer George Hodge there referred to as having been put over till the next Assizes has been dropped by the Crown.

(Brampton Assizes; 31st March, 1908.)

### Damage Action Settled.

An action brought to recover damages for the death of her husband while in the employ of the defendants has been settled by the payment to the widow of \$2,500.

(Atkinson v. C.P.R.; 3rd April, 1908.)

### Motorman let go on Suspended Sentence.

Gilbert Nelson, a motorman in the employ of the Toronto Railway Company, who was convicted of criminal negligence, as noted at page 1260 of the April number of the *Labour Gazette*, was allowed to go on suspended sentence. The Crown Attorney asked for leniency because of Nelson's frankness in the witness box. In acceding to the request the presiding Judge impressed it on the accused that the Court intended to protect the lives of citizens from negligent motormen, and would impose penalties in future cases.

(Rex v. Nelson; 4th April, 1908; Winchester, Co. J.)

### Action Settled Out of Court.

An action was brought by Andrew Blackburn to recover from the defendants the sum of \$5,000 as damages on account of the death of his son John Blackburn, a locomotive fireman, who was killed at Plantagenet in an accident during the month of September last. The case was set down for trial at the Ottawa Spring assizes, but was settled out of Court by the payment by defendants of the sum of \$1,000 and costs.

(Blackburn v. C.P.R.; 6th April, 1908.)

### Railway Men Acquitted on Charge of Manslaughter.

In connection with the case noted at page 1021 of the February number, and at page 1158 of the March number of the *Labour Gazette*, C.P.R. Engineer Matthew Morin, and Motorman Flageland and Conductor Soubliere of the Ottawa Street

Railway came up for trial at the Ottawa Spring Assizes on a charge of manslaughter in having through negligence, caused the death of August Wank. Morin's case was withdrawn from the jury, there being no evidence against him of violation of the rules of the company. The evidence against the other two men was very strong, and their cases were submitted to the jury after a strong charge by the presiding Judge. However, the jury gave a verdict of "Not guilty," which called forth the following remarks from the Judge: "I suppose not until some dreadful calamity comes to pass in this country will you hold railway employees responsible for negligence. It is almost a reflection on the judicial system of this country that a verdict of the one just returned, as regards one of the men at least, should be given."

(Rex v. Morin et al; 9th April, 1908; MacMahon, J.)

#### Violations of Lord's Day Act.

Defendant has a restaurant license, and was charged before the Police Magistrate at Toronto with selling "candies, popcorn, peanuts and soft drinks" on Sunday, June 9th, 1907, at the Island. A case was stated by the Magistrate for the opinion of the High Court, the question submitted being whether defendant could lawfully sell the articles mentioned. Judgment was recently given holding that the question having relation to a criminal matter under the exclusive jurisdiction of the Dominion Parliament, a case may be stated under section 761 of the Criminal Code. It was also held that the mere fact that defendant holds a license as a restaurant keeper does not enable him to sell on the Lord's Day candies, etc., notwithstanding the statute. The question in each case depends upon whether as a matter of fact the case comes within the statute or not. If the articles are sold not in connection with the giving of meals served on the premises, but so as to be taken away by the purchaser, there is an offence against the statute. The question was therefore answered in favour of the prosecution.

(Rex v. Weatheral; 10th April, 1908; Clute, J.)

Defendant was convicted at Windsor on a charge of selling cigars on Sunday.

He contended that they were a food, but the Magistrate did not agree to this view and imposed a fine of \$5.75.

(Rex v. Peters; 21st April, 1908; Bartlet, P. M.)

Three shopkeepers were prosecuted at Toronto for selling chewing gum on Sunday, the sales being made by means of automatic cent-in-the-slot machines, which were left out over Sunday in the doorway of their stores. A conviction was made in each case, but as the point is a new one no fine was imposed.

(Rex v. Beverly et al.; 22nd April, 1908; Kingsford, P.M.)

A prosecution was brought at Meaford against the Grand Trunk Railway Company, charging them with running a grain train on Sunday, 15th December, 1907. The Railway Company claimed that it was necessary to run trains on that date to keep their tracks clear, as a snow-storm was raging. The case was tried before two Justices of the Peace who failed to agree as to a conviction.

(Rex v. G.T.R.; 26th March, 1908; Hersely & Johnston, J.J.P.)

#### Damage Action Settled.

An action brought by plaintiff, who was the engineer on the "plug" train which was demolished by the explosion of dynamite in a freight car at Essex on 10th August last, to recover damages for injuries sustained, has been settled by the payment to plaintiff of the sum of \$4,500 and costs and the giving to plaintiff of a permanent position in the employ of defendants.

Cottrel v. Mienigan Central Railway Co.; 14th April, 1908.

#### Brakeman Found Guilty of Negligence.

In connection with the case noted at page 1260 of the April number of the *Labour Gazette*, under the heading "Inquest re Armstrong," Richard Newton, who was found responsible for the accident by the Coroner's jury and afterwards committed for trial on a charge of criminal negligence, came up for trial at the Spring Assizes at Milton and was found guilty by the jury. He was sentenced to nine months' imprisonment. In sentencing the prisoner the presiding Judge said:

"In your case I am dealing on the assumption that you have hitherto borne

an unblemished character. If I were to consider you alone I would be disposed to accede to your counsel's suggestion to allow you to go upon suspended sentence. But I have to consider not only you, but the great body of railway employees in this country and the public. It is absolutely essential in the interests of the public that it should be known throughout the length and breadth of the land that the rules of a railway company formulated for the safety of persons travelling upon the railway, cannot be disregarded with impunity. Parliament has seen fit to penalize their disregard and to treat that as a crime, although no criminal intent be shown. I would be wanting in my duty, I would fail in my duty, as I regard it, if I were to countenance any view that such neglect as yours was, can be allowed to go unpunished."

(Rex v. Newton; 15th April, 1908; Anglin, J.)

#### **Operator Sent to Jail for Being Drunk On Duty.**

A telegraph operator named Russell, from the United States, entered the employ of the C.P.R. Some two weeks before he was found one Sunday night to be intoxicated while on duty at Mackeys, east of North Bay. He was arrested and brought before the Magistrate at North Bay and convicted, and sentenced to three months in jail.

(Rex v. Russell; 15th April, 1908; Martin, P. M.)

#### **Verdict in Damage Action.**

Charles Waddell, who while in the employ of defendants was totally disabled through being scalded by the explosion of a boiler in the pumphouse at Rondeau was awarded \$3,000 damages and costs by a jury at the recent St. Thomas Assizes.

(Waddell v. Pere Marquette R. R.; 16th April, 1908.)

#### **Damage Action Settled During Trial.**

An action brought by plaintiff to recover damages for personal injuries sustained while in the employ of defendants came on for trial at the recent Woodstock Assizes. Plaintiff claimed \$5,000 for the loss of a thumb and finger while operating a machine in defendants' fac-

tory. In the course of the trial a settlement was arrived at by which defendants agreed to pay plaintiff \$750.

(Cornfoot v. Ingersoll Fruit Package Co.; 15th April, 1908; Mulock, C. J.)

#### **Verdict in Damage Action.**

In connection with the case noted at page 1025 of the February number of the *Labour Gazette*, under the heading "Inquest re Walker," an action to recover \$20,000 damages was brought against the Railway Company by the widow of the deceased engineer, John J. Walker, and it came on for trial at the recent St. Thomas Assizes. The defence endeavoured to show that plaintiff was not the widow of the deceased man, but a jury brought in a verdict in favour of plaintiff for the sum of \$5,000, of which \$4,000 goes to the widow, \$600 to the deceased's mother, and \$400 to his father.

(Walker v. Wabash Railway Co.; 18th April, 1908; Magee, J.)

#### **Appeal in Damage Suit Dismissed.**

In the case noted at page 1159 of the March number of the *Labour Gazette*, an appeal by plaintiff from the judgment of non-suit entered at the trial was dismissed.

(Plant v. Jones; 21st April, 1908; Divisional Court.)

#### **Appeal from Verdict on New Trial Dismissed.**

In the case noted at page 1059 of the March, 1906, and page 1286 of the May, 1906, numbers of the *Labour Gazette*, on the new trial of the action ordered by the Court, the jury found that the fall of deceased from the scaffold was caused by the negligence of the defendants, in not having a guard on the inside and by unevenness of the platform, and made other findings in favour of plaintiff, assessing the damages at \$3,000. The trial Judge, Falconbridge, C.J., held that the findings did not warrant a judgment as upon a common law cause of action, and gave judgment for \$1,600 under the Workmen's Compensation Act. Defendants appealed, and their appeal has recently been dismissed.

(Linden v. Trussed Concrete Steel Co.; 21st April, 1908; Court of Appeal.)

### New Trial Ordered in Damage Action.

Plaintiff sued to recover damages for personal injuries sustained by him in the course of his employment by defendants, owing, as alleged, to the negligence of the latter. Plaintiff was a linesman in the service of defendants, and in the prosecution of his work came into contact with a live wire of the Ontario Power Company, which was in close proximity to the wires of defendants strung upon a pole upon which plaintiff was working, and sustained the injuries complained of. At the trial, the only negligence found by the jury was that defendants should have insisted on plaintiff wearing gloves. The trial judge, Teetzel, J., held that there was no evidence to sustain this finding, and that the jury must, by not finding other negligence, be taken to have negated it, and he therefore dismissed the action. Upon appeal by plaintiff, it was contended on his behalf that there was evidence to support the jury's finding and evidence of other negligence not submitted by the trial judge. An order was made directing a new trial.

(Russell v. Bell Telephone Co.; 26th March, 1908; Divisional Court.)

### Yardman Committed for Trial.

In connection with the case noted above, under the name of Inquest re Armstrong, R. H. Newton, C. P. R. switchman, had a preliminary hearing in the Police Court at Milton on a charge of criminal negligence, and was committed for trial at the Spring Assizes on April 14th.

(Rex v. Newton; 27th March, 1908; Dice, J. P.)

### Employers' Liability Insurance Case.

An echo of the case noted at page 1142 of the April (1907) number of the *Labour Gazette*, was heard in an action brought by the defendants in that case against an Accident Insurance Company to recover the sum of \$2,062 paid by plaintiffs in respect of the judgment recovered against them by Jones, who was injured in their service, the Accident Insurance Company having insured plaintiffs against loss from such liability to employees. The defence was that Jones was under 14 years of age at the time he was injured,

and therefore, under a condition in the policy, the defendants were not liable. The Court held that plaintiffs had no knowledge of the age of Jones up to the time he was injured, and there was no breach of the condition by them, and ordered judgment to be entered for the plaintiffs for the amount claimed and interest.

(Morton Co. v. Ontario Accident Insurance Co.; 27th March, 1908; MacMahon, J.)

### Action for Damages Dismissed.

At the recent London Assizes, an action was brought to recover damages for injuries sustained by plaintiff while in the service of defendants, owing to the negligence of defendants or of their other servants, as alleged. The action was brought both at common law and under the Workmen's Compensation Act. Plaintiff, a Sicilian, with a number of his countrymen, was in the employ of defendants, a railway company, as a labourer on the line of railway. The defendants had also a number of English-speaking employees at the same work. They furnished all the labourers with box cars to sleep in at a distance from the place where the construction work was going on, and also supplied hand-cars which the labourers might use in coming from and going to their work. The Italians, sleeping and working, coming and going, kept to themselves, and the "Englishmen" did the same. Upon the occasion of the happening of the accident in question, there were several hand-cars laden with men on their way home from work. The foreman had given instructions that the hand-cars should keep a sufficient distance apart to prevent any chance of an accident, and no complaint was made against him. The first hand-car stopped to allow the men to pick up something, and a signal being given, it was sent along the line, so that the succeeding cars were stopped, touching each other, and after but a slight jar. On the 7th car, and in charge of it, was a section boss called "Archie," and upon the signal being repeated to him, he ordered the men on that car to "pump quiet," with the result that that car rammed the car in front, and, the shock running along the cars, the second car, upon which the plaintiff and some

of his compatriots were riding, was thrown off the track, and the plaintiff lost a leg, and received other injuries. Archie had no control over and had nothing to do with the plaintiff, who was under a boss of his own. When sober, Archie seemed to have had no grudge against the foreigners. On the occasion in question he had been drinking, and no doubt lost control over himself. The jury found that he had acted negligently in forcing his car against that in front; that in doing so he was acting for his own purposes, without regard to the course of his employment; and they assessed the damages, if the plaintiff were held entitled to recover, at the sum of \$1,200. At the trial, the presiding judge ruled that there was no cause of action at common law, the only negligence being that of a fellow servant, and reserved the question as to whether a cause of action had or had not been made out under the Workmen's Compensation Act. In giving judgment, the learned judge held that in view of the findings of the jury, supported amply as they were by the evidence, the plaintiff must fail under the provisions of the Act. He discussed at some length whether a hand-car could be brought within the meaning of the words "locomotive, engine, machine or train." After carefully considering the question, he came to the conclusion that, as the legislation stood at the time of the passing or revision of the Act, the answer must be in the negative, and dismissed the action.

(Vaccaro v. Kingston & Pembroke Railway Co.; 28th March, 1908; Riddell, J.)

#### Damage Actions Settled.

An action brought to recover damages by plaintiff, a brakeman in the employ of the defendants, who lost an arm in the course of his employment at Cobourg, in cutting out some cars from a train, has been settled by the payment of the sum of \$250, the settlement being approved by the Court on behalf of the plaintiff, who is under age. Out of the sum awarded, \$100 will be applied to the purchase of an artificial arm and the balance will be applied to paying for a course in telegraphy.

(Skelly v. G.T.R.; 30th March, 1908; Boyd, C.)

An action brought to recover damages by the widow of a man who was killed while in the employ of defendants, has been settled by the payment of the sum of \$2,500, to be apportioned as follows: \$850 to pay off debt on house, \$125 to plaintiff for costs, including taking out letters of administration; \$10 to official guardian for his costs, \$400 to widow, and balance of \$1,125 to three infants equally; infants' shares to be paid into Court, and \$1 per week to be paid out of each infants' share to mother for maintenance.

(Perkins v. Oshawa Steam & Gas Fitting Co.; 30th March, 1908; Boyd, C.)

#### QUEBEC CASES.

##### Appeal by Labour Agent Dismissed.

In the case noted at page 599 of the November, 1905, number of the *Labour Gazette*, an appeal was taken by defendant from the judgment at the trial, but same has recently been dismissed.

(Fandino & d'Alessandro v. Cordasco; 25th April, 1908; Court of Review.)

##### Actor's Appeal Allowed.

In the case noted at page 609 of the November number of the *Labour Gazette*, an appeal was taken by plaintiff from the judgment at the trial dismissing the action, and same has recently been allowed. In giving judgment in the Court of Review, Archibald J., speaking for the Court, said: "The plaintiff never represented that he was able to play 'Baron Scarpia' in 'La Tosca'. He was engaged generally to play in drama, vaudeville, tragedy and comedy. No particular role was mentioned in the contract. It is further a part of the contract that plaintiff was to have 15 days within which to prepare his role. But, in the present case plaintiff had only been allowed a very much shorter period within which to learn his part. In any event, the plaintiff never refused to play the part of 'Baron Scarpia'. He simply asked for eight days in which to study it. The fact that he received a salary only paid to an actor playing the leading role has nothing to do with the present case. The contract is there, and it must be interpreted according to the ordinary rules of interpretation. The contract simply says that

the plaintiff must play the roles assigned to him. Nothing more. Judgment reversed and defendant condemned to pay plaintiff \$370 and costs in both courts."

(Lasalle v. Cie. des Theatres; 25th April, 1908; Court of Review.)

### Appeal in Damage Action Allowed on Appeal.

In the case noted at page 923 of the February, 1907, number of the *Labour Gazette*, defendants appealed from the judgment at the trial in plaintiff's favour and same has just been allowed by a majority of the Court of Review. In delivering the opinion of the majority of the Court, Lynch, J. said: "The principal allegation of negligence is that plaintiff was obliged to work near a dangerous machine, against which he had not been warned. He also alleges that the machine was in bad condition, and that it was not properly protected. The plaintiff had no corroboration whatever of his testimony. He, himself, admits that it was not his duty to work on the machine. But plaintiff, while admitting that he was warned about two or three weeks previous to the accident, swears that he was permitted to use the machine and did use it. Vaillant, the man in charge of the machine, denies this, says that plaintiff was repeatedly warned to keep away, not to meddle, and Arcand, a man working on the next machine, swears that he told plaintiff to keep away. The general foreman was absent at the time of the accident. And, again, Lefrancois, the general foreman, swears he warned plaintiff about a week before the accident to keep away from the machine. Just immediately before the accident, Vaillant warned plaintiff away, but plaintiff simply laughed at him. The machine was found by the jury to be in proper condition, the best and latest in design, and that it was protected as much as possible. Under these circumstances it seems impossible to the majority of this Court that the plaintiff should succeed. Article 508 C.P., par 3, is clearly applicable, and the majority of this Court has no hesitation in setting aside the verdict as contrary to the weight of evidence, and being such as twelve reasonable men could not properly find. The only question then is,

whether we should order a new trial or dismiss the action. There being no possibility of further evidence, other than that of the plaintiff, in support of the allegations of negligence, we have adopted the second alternative, and the majority of this Court is of opinion, therefore, to set aside the verdict of the jury, reverse the judgment of the Superior Court, and dismiss plaintiff's action with costs in both Courts."

(Baker v. Canadian Rubber Co.; 9th May, 1908; Court of Review.)

### ALBERTA CASES.

#### Miner Recovers Damages for Injuries Sustained.

In the Supreme Court at Lethbridge recently, Joseph Tinsley, a miner recovered a verdict for \$3,153.80 against the defendants for personal injuries sustained by him while in the employment of the latter, owing to an accident which occurred in the mine in August of last year.

(Tinsley v. Canada West Coal & Coke Co.; 21st May, 1908; Scott, J.)

### ENGLISH CASES.

#### Damages Awarded as the Result of a Strike.

An action was recently heard in the King's Bench Division which is of considerable interest to labour. It was an action brought by Hammond & Co. and Messrs. Boot & Son, Limited, carrying on business as printers in the Old Bailey and Fleet Lanex, to recover from the defendants damages for breach of contract in striking without notice, for injury done to machinery and type, and for interference with the efforts of the plaintiffs to get men to replace the strikers. The defendants denied the breach of contract, and pleaded that the plaintiffs dismissed them, or, alternatively, that they left with leave and license of the plaintiffs, and they counterclaimed for wages which they alleged were due to them. The jury awarded the plaintiffs £600 damages, and also found in favour of plaintiffs on the counter-claim, and judgment was entered accordingly.

(Hammond et al. v. Goode et al.; April, 1908; Grantham, J.)
