INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF  
JUNE, 1907.

I.—GENERAL SUMMARY.

A pronounced increase in industrial activity took place throughout Canada during June as compared with May. This was largely the result of the exceptionally favourable weather conditions, which, following upon the cold weather of the earlier months of the season, caused a very marked improvement in the outlook for industry and labour. The change was chiefly felt by agriculturists, growth having been so rapid as to offset in part the delay caused by the backward spring. At the close of the month, it was expected that the western grain crop, with continued good weather, would exceed that of 1906. Conditions were more favourable for Atlantic fishermen than in some time past. The lumbering industry was very active in Ontario and the eastern provinces; in British Columbia an overproduction of logs was reported. Mining continued very active throughout Canada. Some delay in coal shipments in Nova Scotia was occasioned by drift ice earlier in the season, but in all other sections very favourable conditions prevailed, with labour in demand. The effects of the set back caused by the strike of coal miners in Alberta and the Crow's Nest Pass district were being rapidly overtaken. There was an improved tone in the manufacturing industry as a result of the more favourable agricultural outlook in western Canada. Railway construction operations were being pushed forward as rapidly as possible with the men and

material available. Gangs were largely augmented during June and there was a widespread demand for men, especially in the north-west provinces. Transportation companies of all kinds were busier than in any previous year at this season, the traffic on many lines equaling that which prevails in the autumn season. Building operations were extensive, especially in the large cities and in western Canada. Unrest in the labour market retarded outside operations at a few points; on the whole, however, in view of the strong upward tendency of wages, conditions in this respect were favourable. Immigration continued to show a heavy increase in volume, the arrivals according to the latest returns exceeding those of 1906 by twenty-five per cent. On the whole the season promises to be very prosperous and to afford a greater amount of general employment than any previous year in the history of the Dominion.

**Changes in Wages and Hours.**

Wages continued upward in general tendency, with the increased demand for labour. The following is a statement, by industries and groups of trades, of the more important changes reported to the Department of Labour during June, 1907.

*Lumbering.*—The wages of employees in the logging camps of British Columbia were downward.

*Mining.*—At Lethbridge, Alta., a two years' agreement affecting coal miners

in the employ of the Alberta Coal Mining and Irrigation Company, involving an increase in wages, was signed in June(\*). At Rossland, B.C., machine men received an increase from \$3.50 to \$4.00 per day, muckers from \$3.00 to \$3.25 per day and blacksmiths' helpers from \$3.25 to \$3.50 per day. In the Boundary district, B.C., some important increases went into effect for miners and smeltersmen.

*Building.*—A number of carpenters at Brantford, Ont., had their wages advanced  $7\frac{1}{2}$  cents per hour to 30 cents per hour. At St. Catharines, Ont., carpenters received an advance from  $27\frac{1}{2}$  to 33 cents per hour. Painters and decorators (180) at Hamilton, Ont., obtained an advance of \$1.00 per week. Painters at Maisonneuve, Que., had their wages increased by 10 per cent. Granite cutters at Maisonneuve, Que., obtained an advance from \$2.50 to \$3.00 per day and the adoption of the eight hour day. Marble cutters at Toronto, Ont., obtained an increase.

*Metal, engineering and shipbuilding.*—Iron moulders (18) at Guelph, Ont., received an increase of 5 per cent. A number of machinists and boilermakers at Toronto, Ont., also received increases.

*Printing.*—Printers at Montreal, Que., and Toronto, Ont., signed five year agreements involving a substantial increase in wages. At Stratford, Ont., printers (25) under the terms of an agreement made in September, 1905, will obtain an eight hour day from July 1, 1907. Since June 1, 1906, they have worked  $8\frac{1}{2}$  hours per day.

*General transport.*—Draymen (100) in the employ of the Dominion Transport Company, Montreal, were increased from \$1.60 to \$1.75 per day, the rate to be 20 cents per hour after 6 p.m. At Peterborough, Ont., the rate for teamsters with two horses was advanced from \$3.25 to \$3.65 per day.

*Railway employees.*—Freight-handlers in the employ of the Prince Edward Island Railway Company received an increase of 10 cents per day, to date from

April 1. Trainmen in the employ of the Quebec Central Railway Company had their wages increased. Trainmen (electric) in the employment of the International Railway Company, at Niagara Falls, Ont., were advanced 1-2c. per hour on June 1. Engineers and firemen employed on the Canadian division of the Michigan Central Railway Company were granted an increase amounting in the case of the former to \$7.50-\$15 per month, with a proportional increase to the latter. Railway clerks at points on the Intercolonial Railway System received an advance in wages.

*Navigation.*—Longshoremen at Halifax, N.S., to the number of 500, received an increase in wages of five cents per hour, for both day and night work, after a strike which was settled through the good offices of the Department of Labour, Canada.

*Civic employees.*—Labourers at Moncton, N.B., were increased from \$1.35 to \$1.50 per day. Corporation labourers at St. Hyacinthe, Que., received an advance to 15-17 $\frac{1}{2}$  cents per hour.

*Early closing arrangements,* for the summer months, affecting retail clerks, barbers, factory employees, etc.; went into effect in a number of localities.

#### Cost of Living.

There was an advance in meats amounting to about three cents per pound at a number of points in Ontario and the eastern provinces.† The prevailing scarcity of cattle and the high price of fodder were assigned as the cause of the advance. Farm products continued high, hay being exceptionally dear. A stiffening in the prices of rolled oats, breakfast foods, bread, etc., resulted from the high prices of grain. Potatoes were very high throughout Canada. The price of building material of various kinds was considerably higher than last year, and the amount of building projected was curtailed in a number of localities. Hides and skins were somewhat lower. The price of wood pulp was advanced at Halifax, N.S., and other points, and

\* The text of this agreement is published under the heading "Recent Industrial Agreements", in the present issue.

† See reports of St. John, N. B., Stratford and London, Ont., correspondents.

paper and wholesale stationery lines were upward in tendency. Some scarcity of wire rods was reported, with prices stiffening.

### Interruptions to Industry.

The number of trade disputes in existence during June was 41, compared with 49 in May and 30 in the corresponding month of 1906. The loss in working days was approximately 54,710, compared with 88,325 in May and 38,215 in June, 1906.

Among industrial establishments, etc., destroyed by fire or through other causes during June, 1907, the following, as reported in the press of the Dominion, may be mentioned:—

*Nova Scotia.*—Suspender factory at Amherst, loss \$7,000; business block at Glace Bay, loss, \$7,000; business block at Sydney, loss \$7,000.

*New Brunswick.*—Pulp mill at Chatham, loss, \$21,000; saw mill at Dalhousie, loss, \$65,000; factory, dry-kiln and lumber at Hampton, loss, \$40,000; White Candy Co.'s factory at St. John, loss, \$2,500; saw mills and lumber at Woodstock and Bathurst

*Quebec.*—Sash and door factory at Bromptonville, loss, \$60,000; saw mill at Bishop's crossing; railway bridge at Black river; dry-kiln at Lachine, loss, \$2,000; post office, bank and stores at Laprairie, loss, \$25,000; contractor's camp and supplies at LaTuque, loss, \$10,000; store and stables at Montreal, loss, \$2,000; saw mill, lumber and stables at Nominique, loss, \$7,500; flour mill and saw mill at Papineauville, loss, \$5,000; ten stores at Ste. Agathe des Monts, loss, \$20,000; saw mill at St. Barthelemi, loss, \$12,000; business portion of St. Raymond, loss, \$50,000; business portion of Ste. Julienne, loss, \$30,000; portion of village of St. Philippe, loss, \$50,000; saw mill at St. Cyprien, loss, \$2,000; flour mill at Upton, loss \$20,000. Alexander Bros. saw mill in the Upper Gatineau.

Forest fires caused damage in northern Quebec during the early part of the month, but were extinguished by rain falls later.

*Ontario.*—Grist and saw-mill at Adelaide, loss, \$10,000; four stores at Almonte, loss, \$8,500; laundry and knitting factory at Armprior; livery stables and contents at Belleville, loss, \$3,000; Queen's hotel at Belleville; fire station at Belleville, loss, \$4,000; gas works at Belleville, loss, \$7,000; shipbuilding plant at Bridgeburg, loss, \$30,000; railway station at Coatsworth, loss \$2,000; saw mill at Durham, loss, \$5,000; town hall at Ennismore; flour mills at Esquessing, loss, \$10,000; business portion of Elmvale, loss, \$25,000; flour mills at Georgetown, loss, \$18,000; workshop at Hamilton, loss, \$2,000; general store at Inwood, loss, \$25,000; saw mill at Lindsay; flax mill and business block at Listowel, loss, \$3,000; church and stores at little Current; saw mill at Norwich, loss, \$2,000; bakery at Niagara-on-the-Lake, loss, \$1,000; furniture mill at Ottawa east, loss, \$8,000; business portion of Springfield, loss, \$40,000; part of factory at St. Catharines; slaughter house at Talbotville, loss, \$1,000; asbestos works at Thorold, loss, \$2,500; G. T. R., depot at Thamesville, loss, \$5,000; stores at Toronto, loss, \$4,000; machine works at Toronto, loss, \$7,000; saw mill at Wooler; storehouse at Welland, loss, \$2,500.

Barns at Mono Road, Otonabee Pickering, Selwyn, Smith, Strathroy and Warsaw

Forest fires caused damage in northern Ontario, it being estimated that over \$1,000,000 worth of standing timber was destroyed, besides six railway bridges, prospectors camps and supplies, etc.

*Alberta.*—Warehouse and livery stables at Calgary, loss, \$10,000. A fire in Walters' mine at Stratheona threw 50 men out of employment. A sudden rise of the Saskatchewan river swept away some thousands of logs and several rafts of timber.

*British Columbia.*—Saw mill at Cloverdale, loss, \$80,000; barn and machinery at Coquitlam; saw mill at Sapperton; logging camp, outfit and standing timber at Thurlow Island; saw mill and lumber at Vancouver, loss, \$25,000; hotel and stores at Wardner, loss, \$10,000. Fire in Comox mine caused \$8,000 damage.

### Conditions in the Industries and Trades.

Conditions of employment during June in the several industries and trades throughout Canada, as indicated by reports of correspondents of *The Labour Gazette* and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

#### Agriculture.

The most important feature of the month was the excellent weather conditions which prevailed throughout Canada. Temperatures were uniformly warm and the rainfall abundant, with the result that the growth made by the grain and other crops was exceptionally rapid. The favourable effect of this was immediately shown in the improved tone of general industry and trade, which depends largely at this season of the year upon the outlook in the agricultural industry. The improvement compared with May was very marked, owing to the backward nature of the spring season. It was estimated, for example, that in western Canada the crops at the completion of seeding were from two to three weeks late; in the closing week of June they were regarded as not more than ten days late, the reports of governmental, railway and other officers throughout Canada being uniformly very favourable and to the general effect that with the continuance of good weather a heavier yield than that of 1906 might be anticipated. More detailed information as to the outlook in the different provinces is as follows:—

Reports received from Western Canada during the closing days of seeding and up to the end of June were very

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and industries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

favourable. In Manitoba the sowing of wheat was continued up to the close of May, being two weeks later than last year. The acreage under that cereal is estimated at only slightly less than that of last year. The hard wheat acreage throughout the west will be greater than was at first reported, while the acreage under oats and barley shows a heavy increase, the estimate of the Northwest Grain Dealers' Association showing an advance of from 12 to 16 per cent compared with 1906. The fact that the area prepared for seeding during the autumn of 1906 was considerably greater than in any previous year offset to a degree the backward nature of the spring. The seed bed, moreover, was in excellent condition.

In the Province of Saskatchewan it was estimated that the acreage under wheat, oats and barley will considerably exceed that of 1906. Though seeding was late, the moisture from the frosts was well preserved and coupled with frequent showers, so that growth has been very rapid. A preliminary estimate of the total area under crop in this province was 2,879,417 acres, compared with a preliminary estimate of 1,999,500 acres in 1906. In Alberta, also, crops were reported as looking well, conditions of moisture and temperature being very favourable.

According to official crop reports, the outlook in Ontario was regarded as fair, though planting was about a month late. Fall wheat and clover suffered from the severe winter, and the yield of straw generally will be less than last year. Hay is light; the farmers began the gathering of the crop in the closing week of the month. The seeding of the root crop was completed in June. The potato crop of 1906 in Ontario was lighter than in any previous year since statistical information with regard to the production of farm crops has been collected. Within a few years past, the area devoted to potatoes has decreased by 50,000 acres, and the annual product by 6,000,000 bushels. The prospects are that the crop of 1907 will be lighter than last year's, and that the high prices which have ruled for some time past will be maintained.

In Quebec and the Maritime Provinces conditions were reported much the same as in Ontario. The backward spring was followed by a season of rapid growth, and the outlook at the close of the month was favourable. Hay will be a better crop in Quebec than in Ontario.

In British Columbia the hay crop was reported fair, growing conditions being favourable throughout the month.

The production of butter and cheese up to the third week in June, was less in quantity than in the corresponding period of 1906, but the quality of the product was reported better than that of last year.

The outlook for fruit was, on the whole, favourable, though the crop will be later than last year. Apples will be a good crop, though some decrease in the size is expected. Grapes promise exceptionally well. Early plums will be a failure, but the late varieties, and cherries and pears, promise well. Peaches will be a good crop. Berries are light and are at least two weeks late; the law with regard to the size of boxes is being rigidly enforced. From British Columbia reports for both small and large fruits have been favourable.

The late completion of seeding affected eastward shipments of grain in the opening weeks of the month; later, the movement increased in volume and will be very heavy throughout the balance of the season. According to a return made to the Department of Trade and Commerce, Canada, by the Warehouse Inspector, Winnipeg, Man., the total 1906 crop of Manitoba, Alberta and Saskatchewan amounted to 101,530,295 bushels. Of this amount, 56,984,990 bushels had passed eastward through Winnipeg for export and for use of Canadian mills in the eastern provinces. It was estimated that during the second week of the month there were 11,267,000 bushels in country elevators in western Canada, and 2,745,000 bushels not yet inspected. Some 1,110,660 bushels had been shipped to the United States west of Winnipeg. The amount held for western country mills was estimated at 9,000,000 bushels and the amount retained for seed at about the same. This left in the hands of

farmers available for market 11,147,575 bushels.

The annual meeting of the Ontario Co-operative Fruit Growers' Association was held at Toronto, June 12-13, some 20 associations being represented. The name of the Association was changed to "The Co-operative Fruit Growers of Ontario." A committee was appointed to wait upon the Hon. the Minister of Agriculture for the Province to request the appointment of one or more instructors to aid in bringing about uniform packing and grading, and of an officer to proceed with the organization of co-operative associations.

Farm labour continued in active demand throughout Ontario and in many sections of the eastern provinces. Though large numbers of immigrants were distributed during May and June, the migration from these provinces into western Canada was on a heavy scale, and the situation in this respect was about the same as in 1906.

#### Fishing.

Atlantic and Gulf of St. Lawrence fishermen had a very favourable month, the catch largely exceeding that of May or the corresponding month of 1906. Prices were high. Lobster fishermen, who were seriously hampered by ice and rough weather up to the beginning of the month, and who sustained serious losses in gear, made some exceptionally heavy catches in June, more fish being taken in some localities than the factories could handle. Herring continued very plentiful, and though mackerel did not strike in until after the middle of the month, some heavy catches were made off the south coast of Nova Scotia (1). Harbour fishermen in New Brunswick reported fair catches of salmon, though gaspereaux were light. In British Columbia some good catches of spring salmon were made in the Fraser river and by the traps off Vancouver Island. Favourable market conditions prevailed. Preparations were completed for the opening of the sock-eye season in the closing week of the month, though the

price to be paid to fishermen had not been decided by the Fraser river canneries. Packing in the Fraser river plants is expected to begin in the second week of July. Prices of tinned salmon were somewhat unsettled owing to unfavourable market conditions in Great Britain. The number of licenses issued was considerably larger than last year. Whale fishing has recently been very successful off Vancouver Island, and a considerable expansion in the industry is promised at an early date. (2) The sealing fleet left for Behring's Sea during the month.

#### Lumbering.

In the Maritime Provinces, Quebec and Ontario, the month was one of pronounced activity in the lumber mills. The spring drives were completed under favourable conditions, and prices were firm to upward. Some losses of timber from forest fires were reported in the neighbourhood of Lake Temagami and the Montreal River, Ont. In British Columbia a feature of the month was the closing down of some 69 logging camps by the British Columbia Loggers' Association, as a result of over production and declining prices. The shut-down went into effect in the closing week of June. It was estimated that about 2,000 men receiving wages aggregating from \$175,000 to \$200,000 per month, would be temporarily thrown out of employment, while the average total output of the camps was about 33,250,000 feet per month. The over production was chiefly in timber of the lower grades. The mills, both on the coast and in the interior, were running to full capacity. It was stated that the revenue derived by the Province from timber licenses, leases, royalties and export duties during the fiscal year ended June 30, would amount to about \$800,000, being the largest in the history of British Columbia.

#### Mining.

Production and shipments in the Nova Scotia collieries were on a heavy scale, and labour was in demand in some localities. The delay occasioned by drift

(1) See report of Halifax, N. S., correspondent.

(2) See Victoria and Nanaimo, B. C., reports.

ice in the opening of navigation has caused a heavy falling off in shipments to the St. Lawrence, as compared with 1906, though the fleets of the several companies were reported in a higher state of efficiency than in any previous year, and the total tonnage shipped on certain dates during the month exceeded previous records. The amalgamation of the Maritime Coal, Railway and Power Company with the Canada Coal and Railroad company was announced. In Quebec a scarcity of help was reported in the asbestos mines of the Eastern Townships. Development work and production in the mica mines north of the Ottawa River were extensive. Shipments from Cobalt, Ont., were heavier during June than in any previous month of the year. Up to June 8, the total shipments amounted to 9,923,620 pounds of ore. In 1906 the total was 5,129 tons, valued at \$3,900,000. A visit of inspection by members of the Ontario Government was paid to this camp during June. Favourable reports were received from the oil region of Ontario, productions in the Tilbury field averaging 1,300 barrels per day. In the eastern portion of the province and in the region north of Lake Superior development work was in active progress. The outlook for iron production in the neighbourhood of Port Arthur was very favourable. In Alberta the coal mining companies were very busy, and some new properties were being opened up. The Alberta Coal Commission held a number of sessions during June for the taking of evidence.\* In British Columbia shipments from the metalliferous mines of the interior, for the first time since the fuel shortage of the past winter, regained their normal extent. It was stated that 500 additional men could be given employment in the various mines and smelters of the Boundary district in the opening week of the month. Later, a considerable number of labourers were obtained. It is the intention to increase the output considerably. Ten furnaces were in blast throughout the month in the three district smelters, six of the eight furnaces at Granby being

in operation. The British Columbia Copper Company had two furnaces in blast and the Dominion Copper Company three. The coal mines of British Columbia were being operated to the utmost of their capacity, orders being in excess of the production. Labour was in great demand both at the Crow's Nest Pass and Vancouver Island collieries. About 1,700 men were at work in the former collieries and about 5,000 tons per day were being mined.

### Manufacturing.

Conditions were much the same as in May, though a more buoyant tone was evident as a result of the improvement in the crop outlook. Establishments were for the most part running to full capacity, with orders well ahead. Flour mills, establishments for the production of building material, cotton mills, and the iron and steel industry, were particularly active.

The annual report of the Directors of the Dominion Iron and Steel Company for the year ended May 31, 1907, showed earnings of \$2,247,536.45. The dispute with the Dominion Coal Company was stated to have seriously affected operations, aggregate earnings from November to February having shown a falling off of \$250,000, as compared with the average of the preceding months of 1906. On the whole, the year was regarded as satisfactory, the company's finances having improved owing to the greatly increased volume of business. The sum of \$306,355.57 was expended on capital account during the year, including a new Bessemer plant, the extension and equipments of coke ovens, the extension of the ore yard and plant at Wabana, etc. A larger sum than usual was expended on renewals and improvements paid for as part of the operating cost. Options have been secured on several coal properties. Negotiations looking to the adjustment of the differences between the coal and steel companies were in progress during June.

The Nova Scotia Steel and Coal Company is engaged in the erection of a large new forge 75 x 240 feet, to be fitted throughout with the best machinery for

\* For a reference to the appointment of this Commission see the *Labour Gazette* for June, 1907, page 1,330.

the rapid and economical handling of heavy axles, etc. Loading and unloading will be effected by electric cranes, and magnets, instead of by hand, as at present.

### Railway Construction.

Railway construction operations were being conducted with the greatest activity throughout Canada, with labour in demand over a wide area, especially in the Northwest Provinces. Many thousands of men were at work in connection with the building of the Transcontinental line and on the extensive branch lines projected by the various companies. Though the season is a month behind, owing to the backward spring, every effort is being made to overtake the work, staffs having been largely augmented during June.

It is expected that the Temiscaming and Northern Ontario railway will be completed this season to the two hundred mile post, about 52 miles from the junction with the National Transcontinental railway. It is also expected that the new shops at North Bay, Ont., will be completed this year and will employ about 100 men.

### General Transport.

Employees in every branch of the transportation service had a very busy month. Railway freight and passenger traffic was very heavy, and the earnings of companies showed an increase as compared with previous years. It was estimated that the gross earnings of the Canadian Pacific Railway Company for the fiscal year ended June 30, 1907, would exceed \$71,000,000, out of which the surplus available for dividends would be upwards of \$18,250,000, an increase of 10 per cent compared with 1906.\* The Intercolonial Railway, it is expected, will show a surplus of about \$400,000 for the year ending June 30, 1907. There was still a scarcity of rolling stock, especially for west-bound freights, the demand for freight cars being as great as is usually experienced in the autumn season.

\* See also report of London, Ont., correspondent.

Immigrant traffic was heavy, and the tourist trade promises to be exceptionally active. The number of vessels passing through Canadian canals was very large, and on the Great Lakes the volume of business was greater than in any previous year at this time. The interruption to navigation, due to the ice fields off the Cape Breton coast, caused a shortage of coal shipments during May, with the result that prices advanced about thirty cents per ton in Montreal. Seamen were scarce on the Pacific coast, owing to desertion through the high wages offering in the logging camps and other coast works. Navigation on the Yukon river opened early in the month.

Street railway earnings in the large cities continued to show heavy increases. In Montreal, for example, the gross earnings of the Street Railway Company for May aggregated \$295,951, compared with \$264,252 in 1906, an increase of 12 per cent. For the eight months, October 1 to June 1, the net earnings totalled \$759,068, compared with \$691,831 in the previous year.

The proposed new code of railway rules, in the preparation of which representatives of the different Canadian roads have been engaged for some time, has been submitted to the management of the various companies and will later be sent for approval to the Board of Railway Commissioners.

The taking of evidence with regard to the operations of the Bell Telephone Company in Canada was completed by the Board of Railway Commissioners.

### The Trades.

*Building.*—The month was a very active one for all classes. In western Canada the improved weather conditions assisted building, and with the settlement of some labour disputes, begun during May, the outlook was for a very busy season. Delayed shipments of lumber were complained of in some sections. At Winnipeg, Man., permits to the end of June fell below the record of 1906, but at Fort William, Ont., Edmonton, Alta., and Vancouver, B. C., the year is expected to be very heavy. Statistics secured from 37 towns throughout

western Canada, exclusive of Winnipeg, showed the amount of building under way on June 1 to be \$22,500,000. The tightness of money has checked speculative building and building on loans.

*Metal, engineering and shipbuilding.*—Iron moulders, machinists, metal workers, etc., were busy. Electrical workers and linemen were very busy.

*Woodworking and furnishing.*—The several branches had a fair month.

*Printing.*—Printers and pressmen were in active demand at a number of points, and the month was one of the most active reported in some time past.

*Clothing.*—Tailors were well employed, and garment makers were busy. Boot and shoe workers had a busy month.

*Food and tobacco preparation.*—Confectioners had an exceptionally busy month. Bakers, butchers, etc., were busy. Cigar makers and tobacco workers reported favourable conditions.

*Leather.*—Tanners, curriers and leather workers had a good month.

*Miscellaneous.*—The opening of the tourist season, which promises to be a heavy one, gave increased employment to hotel and restaurant employees, barbers, etc.

*Unskilled labour.*—There was a considerable increase in activity compared with May, and men were in demand for railway construction, civic improvement work, etc. Wages were firm on a high level.

#### Canadian Trade and Revenue.

*Foreign trade.*—During May, 1907, the total value of imports entered for consumption was \$34,807,040, compared with \$27,076,170 in March, 1906. For the two months ended May 31, 1907, total imports amounted to \$63,142,327 compared with \$50,219,343 in the corresponding period of the preceding year. The total domestic exports during May, 1907, were \$16,905,057 compared with \$18,476,815 in May, 1906. For the two months ended May 31, 1907, the total domestic exports were, \$26,656,906 compared with \$31,839,477 in the corresponding period of last year. Declines in exports during May took place under the headings of "The Fisheries", "The Forest,"

"Animals and their produce," Agriculture and Manufactures, while an increase appeared under the heading of "The Mine."

*Imperial trade.*—According to reports received from commercial agents of the Department of Trade and Commerce, Canada, good openings for fruit, pig iron, tobacco, dried and evaporated apples and other fruits were reported in Great Britain. The trade in high grade Canadian flour with Newfoundland has shown rapid expansion. In Australasia, various manufactured articles, including calcium carbide, were reported in demand. In Jamaica the prevalence of drought has created a favourable market for provision crops, cattle, condensed milk, etc.

*Domestic trade.*—The warm weather and the improvement in the agricultural outlook caused a considerable expansion in trade both wholesale and retail, during June as compared with May. Retailers of dry-goods were chiefly affected. Wholesalers reported good orders for fall lines. The sorting trade, which was dull during May, showed a marked improvement. Dealers in hardware and metals did an excellent business, with values very firm. Heavy metals, building material and railway supplies were very active. Groceries were moving well. Among dry-goods, cottons were very firm, but woollens were weak. The hide market was also weak. Collections were well met, there having been a marked recovery from the closing days of May. Transfers of Canadian securities were light with prices low. The advance in the price of grain improved farmers' loans, though money continued tight as a result of the industrial expansion and the retention of the 1906 wheat crop in western Canada.

The reports of a number of Canadian banks were published during June and showed favourable financial conditions. The annual report of the Merchants' Bank of Canada showed earnings of 16 per cent, out of which an increased dividend was paid, \$100,000 written off bank premises and \$400,000 added to rest. Circulation, deposits and current loans showed a large increase. The eighty-ninth annual statement of the Quebec Bank showed net

profits for the year of \$300,011.15 on a capital stock of \$2,500,000; \$100,000 was placed to rest account. Two new branches were opened during the year. The thirty-second annual report of the Standard Bank of Canada showed earnings of 18 per cent. The sum of \$356,142 was transferred to rest account, being the amount received as premium on new stock issued. The Union Bank of Canada reported an advance in circulation, deposits and earnings, \$100,000 being transferred out of the last to rest account. The thirty-fifth annual report of the directors of *La Caisse d'Economie Notre Dame de Quebec* showed a surplus of \$54,692.12, out of which, combined with a profit and loss account of \$55,709.91, the sum of \$100,000 was carried to the reserve fund. At the fifth annual meeting of the Sovereign Bank of Canada a complete reorganization of the bank was announced. The sum of \$700,655 was written off for bad debts, \$150,607 for depreciation in securities, the sum of \$541,494 set aside as a contingent fund and \$800,000 as a further contingent fund. This necessitated the appropriation of the rest fund, leaving the bank with a paid-up capital of \$3,000,000. Twenty-seven new branches were opened during the past year.

*Canadian revenue*.—Canadian revenue during June, 1907, amounted to \$8,112,390.89. For three months ending June 30, 1907, the total revenue was \$23,233,298.58. The expenditure on capital account for June amounted to \$4,079,861.49.

The Canadian bank statement for May, 1907, showed total assets of \$951,069,950, compared with \$951,053,557 in the previous month. The total liabilities for May, 1907, were \$777,285,285; in the preceding month the total was \$773,904,327. The notes in circulation amounted to \$75,503,009 in May, 1907 and to \$77,622,403 in April. Deposits payable on demand totalled \$172,065,976 in May and \$167,217,947 in April.

#### Notes.

The annual convention of the *Retail Merchants Association of Ontario* was held at Hamilton, Ont.

The annual convention of the *Brotherhood of Locomotive Engineers* was held at Quebec, Que.

A conference of grain growers and dealers was held at Winnipeg, Man., at call of the Provincial Government.

The fourth district convention of the *Canadian Federation of Textile Workers* was held at St. Henri, Que.

A merger of the *New Brunswick Telephone Company* with the Central Telephone Company was completed during June.

The *Beef Commission*, appointed during May by the governments of Alberta and Manitoba, held a number of sessions during June for the taking of evidence.

The annual convention of the *Associated Boards of Trade of the Northwest provinces* was held at Prince Albert, Sask., during June. Government ownership of the telephone service was approved.

At Brantford, Ont., a special Committee was appointed by the City Council, to be known as the "*Copartnership House Building Committee*", to collect full information as to methods by which suitable houses may be built for the accommodation of workmen.

In Montreal, Que., a petition signed by the leading manufacturers of the city was presented to the City Council asking that in view of the *congestion of freight* prevailing, the Street Railway Company be authorized to handle freight throughout the City.

At the annual meeting of the Montreal Branch of the *Canadian Manufacturers' Association*, the law with regard to garnishment was discussed. Technical education and the establishment of an employment agency in Montreal were also discussed.

The fourth annual report of the *Montreal Street Railway Benefit Association* showed a surplus of \$7,412 after an unusually heavy expenditure for sick benefits. Since the organization of the society in 1903, it has paid out \$53,911 in benefits, including \$27,732 for sickness and injury, \$4,483 for medicines, \$15,834 for deaths and burials, \$5,615 for medical attendance. During the year the amount paid for sick and injured members and

medicine amounted to \$11,541 as compared with \$10,532 in the previous year this being divided amongst 728 members disabled through sickness or accident. The amount paid for death and burial insurance also increased from \$4,050 last year to \$6,016.

On June 27, a special *commission* was appointed by the Government of Quebec under an act(\*) passed during the recent session of the legislature, for the purpose of conducting an enquiry into the question of industrial accidents, and the means best adapted to afford protection to the victims of such accidents and to

\* For a reference to the provisions of this act see Labour Gazette for June, 1907, page 1384.

the public in general. The commission consisted of Mr. O. Globensky, K.C., of Montreal, Mr. C. B. Gordon, vice-president of the Dominion Textile Company, and Mr. George Marois, president of the Trades and Labour Council of Quebec, with Mr. L. Garneau, advocate, as secretary.

A number of new *co-operative apple packing associations* were reported in process of organization in Ontario, Nova Scotia and British Columbia. A list of the associations which were in successful operation during the season of 1906 and which will continue during the present season is as follows, the name of the secretary or manager being added:—

#### ONTARIO CO-OPERATIVE ASSOCIATIONS.

Name of Association.	Name of Secretary or Manager.
East Lampton Fruit Growers' Association.....	W. J. Seymour.
Belleville Apple Growers' Co-operative Association.....	F. S. Walbridge, Belleville.
Brant Packing Association.....	F. M. Lewis, Burford.
Bruce Fruit Growers' Association.....	A. E. Sherrington, Walkerton
Burgessville Packing Company.....	S. R. Wallace, Burgessville.
Burlington Fruit Growers' Association.....	Clarence Emigh, Burlington.
Canadian Apple Exporters, Limited.....	W. H. Dempsy, Trenton.
Chatham Fruit Growers' Association.....	W. D. A. Ross, Chatham.
Dunwick Co-operative Association.....	R. Campbell, Cowal.
Forest Fruit Growers' and Forwarding Association.....	D. Johnson, Forest.
Georgetown Co-operative Association.....	F. J. Barber, Georgetown.
Grimsby Fruit Growers', Limited.....	J. D. Biggar, Grimsby.
Ilderton Fruit Growers' Association.....	E. T. Caverhill, Ivan.
Newcastle Fruit Growers' and Forwarding Association.....	W. H. Gibson, Newcastle.
Meaford Fruit Growers' Association.....	Dr. J. D. Hamill, Meaford.
Norfolk Fruit Growers' Association.....	Jas. E. Johnson, Simcoe.
Oakville Fruit Growers', Limited.....	W. R. Davis, Oakville.
Orillia Fruit Growers' Association.....	R. A. Lehmann, Orillia.
Oshawa Fruit Growers', Limited.....	Elmer Lick, Oshawa.
Owen Sound Co-operative Association.....	W. P. Telford, Owen Sound.
Parkhill Farmers' Growers' Association.....	Wm. Leary, Parkhill.
Georgian Bay Fruit Growers' Association.....	J. G. Mitchell, Thornbury.
Sparta Fruit Growers' Association.....	J. A. Webster, Sparta.
St. Catharines Cold Storage and Forwarding Company, Limited.....	R. Thompson, St. Catharines.
Ingersoll Co-operative Fruit Growers' Association.....	J. C. Harris, Ingersoll.

#### BRITISH COLUMBIA CO-OPERATIVE ASSOCIATIONS.

Okanagan Produce Association, Limited.....	Thos. G. Wanless, Vernon, B. C.
Chilliwack Farmers' Exchange, Limited.....	Chas. W. Webb, Chilliwack, B. C.
Kalso District Horticultural and Fruit Growers' Association.....	D. Wm. Cockle, Kaslo, B. C.
Mission Fruit Union.....	P. E. Lazenby, Mission, B. C.
Hammond Fruit Growers' Union, Limited.....	N. G. Knotts, Hammond, B. C.
The Kelowna Farmers' Exchange, Limited.....	C. Quinn, Kelowna, B. C.
Armstrong Farmers' Exchange, Limited.....	O. D. Ranks, Armstrong, B. C.
Kootenay Fruit Growers' Association, Limited.....	D. C. McMorris, Nelson, B. C.
Peachland Fruit Growers' Association, Limited.....	R. J. Hogg, Peachland, B. C.

## II. REPORTS OF LOCAL CORRESPONDENTS.

During the month of June, Mr. M. H. N. McElheran was appointed correspondent to the Labour Gazette for Woodstock, Ont., and district, Mr. R. J. Parkinson having resigned owing to his removal from Woodstock. Mr. Hugh Peat was appointed correspondent for Regina, Sask., and district.

## SYDNEY N. S., AND DISTRICT.

*Mr. John Moffatt, correspondent, reported as follows:—*

## GENERAL CONDITION OF THE LABOUR MARKET.

June was a very active month for railways, foundries, factories, tramways and water transportation. Drift ice menaced the shores of the Island until within a few days of June, and shipping accumulated. The coal companies later put on every available hand, starting steam shovels in the coal heaps. All the collieries of the island and mainland, with but two or three small exceptions, were active. Notwithstanding the delay, it is expected that the output of 1907 will exceed that of 1906. The Dominion Coal Company is gradually discontinuing the use of vessels unsuited for quick handling of the coal, and replacing them by faster and more modern vessels. Three vessels of the improved type are to go on this summer. This will greatly assist in getting the water-borne coal to its destination in time. The Nova Scotia Steel and Coal Company having banked 90,000 tons on the surface, stopped its collieries for two days in the latter part of May. The company does not aim at a larger output than last year, although a new colliery is being opened. The steel industries were very busy throughout the month. The Sydney works produced 26,000 tons in May, and expects to run the average up to 30,000 tons per month. If this is accomplished, the output will have increased 50% since April. There is a brisk demand for the steel and iron made in this district. The ore-producing force

has been increased, and the shipping of the material and that of limestone and dolomite is in active progress. The N. S. S. & C. C., is busy, and has all the orders it can fill. The Londonderry Iron Works were normally active. All foundries were busy, as were wood-working factories, Lynch's biscuit factory increased the number of hands employed.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Although the month was cold until the 15th, yet much planting was done, and crop expectations are good. The weather continued dry but warm.

*Fishing.*—May was very disastrous to the fishermen, many of them losing all their gear and traps by drift ice. Fish were reported plentiful in June, especially mackerel and haddock. Cod, herring and lobsters were fair.

*Mining.*—The North Atlantic Coal Company is preparing to operate the Newcastle coal mine, and to prospect the Long Beach Coal areas. The Dominion Steel Company was still prospecting for coal.

## CONDITION OF PARTICULAR TRADES.

All branches of the building, metal, engineering and shipbuilding, wood-working and furnishing, printing, clothing and food and tobacco preparation, leather and miscellaneous trades and all transport workers were active. Unskilled labour was in much demand.

## DISTRICT NOTES.

The Sydney Cement Company has heavy orders on hand, and will enlarge its plant. Rail transportation was active and shipping very active. Glace Bay harbour was very busy. Vessels bearing produce, lumber, etc., are reloaded with coal direct from the mine. Much interest is taken in the experiment begun early in the month of making North Sydney a port of call for trans-Atlantic steamers for the transfer of passengers and mails. At Sydney Mines and Glace Bay many buildings were being erected.

## WESTVILLE, N. S., AND DISTRICT.

Mr. T. Hale, correspondant, reported as follows:—

GENERAL CONDITION OF THE LABOUR  
MARKET.

Labour was active in all departments. In some branches help was in demand. Shipments by water to the Quebec and Montreal markets were inaugurated, two steamers serving the Acadian Coal Company and one the Intercolonial Coal Mining Company. The Allan shaft went on one shift during June, the night shift being stopped on account of shortage of help. The output of the Drummond colliery in May was 26,155 tons of coal and 1,129 tons of coke. The pay sheet was about \$41,000. The town Council is calling for tenders in connection with the extension of the water service. The clearing of a site for a new post office has begun. The brick works were steadily employed. The Sylvester works gives employment to about 20 hands. Wholesale and retail trade was active.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The backward spring delayed seeding. Hay was very scarce, local papers quoting prices as high as \$25 per ton.

*Lumbering.*—Conditions were fair.

*Mining.*—The collieries were all busy.

*Manufacturing.*—Conditions were favourable.

CONDITION OF PARTICULAR TRADES.

The *building trades* were very active, leading contractors reporting a scarcity of men.

DISTRICT NOTES.

The *Edgerton Electric Car Company* resumed during May its Sunday service, which had been stopped owing to representations made by the Lord's Day Alliance.

## HALIFAX, N. S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR  
MARKET.

Seldom so early in the season have conditions been so active as during the past month. Work has proceeded on contracts already awarded, and there are evidences of increased activity in the near future. Among the principal buildings completed were the new Custom House and "Chronicle" building. Contracts have been signed for the building of a new Commercial College; a new telephone building, to cost \$50,000; an extension of the "Good Shepherd" Monastery to cost \$45,000; an extension of the Union Bank premises, and a new building for athletic sports. Work on the new roundhouse is progressing, and workmen are rushing to completion the new building for the Silliker Car Company. The general meeting of this Company was held at the Board of Trade rooms on June 7. The report showed that good progress had been made, and that the first factory should be in operation in about three months. In addition to the erection of the large structures already mentioned, permits for the erection of several new buildings and the alteration of others have been issued during the month. The number of building permits issued during May were 79, the largest number issued for some time past.

The trouble between the longshoremen and the steamship companies, which began on May 26, when the former ceased work because their request for an increase of 5 cents per hour to 25 cents day work, and 30 cents an hour night work was not conceded, was settled on the 3rd of June, the shipping companies agreeing to pay the increase asked. The men were out about eight days, during which time they had several interviews with the companies' representatives and concessions which the men would not accept. As the representatives who offered the Industrial Disputes Investigation Act were about to be appointed, the men

returned to work. Mr. DuBreuil, representing the Labour Department, Ottawa, did much towards bringing about an early and satisfactory settlement. The long-shoremen, who were not organised previous to the strike, have since organised a protective association. The Association has a membership of about 300. The forty-first annual report of the Halifax Board of Trade was recently issued and showed the Board to be in a thriving condition, with a membership of 476. The report dealt with the following important questions:—Increased railroad facilities, industrial conditions, Dominion Exhibition, and matters pertaining to the port. Among the statistics published in the report is one showing the quantity of freight, in tons, handled at the port of Halifax during the fiscal years ending June, 1902-3-4-5 and 6, as follows:—

	Domestic.		Foreign.	
	in tons	out tons	Imported tons	Exports tons
1902-3	—188,871	63,563	35,940	102,691
1903-4	—74,667	64,027	47,767	131,176
1904-5	—101,139	114,309	38,331	100,819
1905-6	—291,677	98,448	403,255	125,108

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Owing to the backward weather, crops at first did not give much promise, but with improved conditions a normal crop is expected.

*Fishing.*—The fishing season opened with poor prospects. On the 7th of June, however, mackerel began to strike in at Dover, and small catches were taken. One week later good catches were made in Yarmouth, Shelburne, Lunenburg, and Halifax counties. Day after day big hauls were being made. City buyers have not been idle, one firm being reported as having purchased some 50,000 fish, a large portion of which were salted and shipped to Boston.

*Manufacturing.*—Normal conditions prevailed.

*Mining.*—This industry experienced normal conditions.

CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were well employed, with even brighter prospects for the future.

*Metal engineering and shipbuilding.*—Boilermakers, machinists, horseshoers and moulders had a fair month.

*Woodworking and furnishing.*—Coopers had a fairly good month.

*Printing.*—Printers, pressmen and bookbinders busy, and prospects are not indicative of an immediate change.

*Clothing.*—Tailors and garment workers reported an improvement in trade.

*Miscellaneous.*—Barbers, hotel, theatre, restaurant employees, and laundry workers had a busy month.

*Transport.*—Freight-handlers were rather quiet.

*Unskilled labour.*—This class was well employed.

DISTRICT NOTES.

*Annapolis.*—The iron mines situated at Torbrook, Annapolis County, were active; besides regular work at the shaft, men and teams were at work grading for the extension of the railway. The sinking of a new shaft on the Martin farm was commenced.

*Annapolis Valley.*—It is understood that contracts have been let for the construction of ten apple evaporating, cider, vinegar canning, fruit and vegetable canning factories, at a cost of about \$70,000. The factories will employ about 1,400 hands, and should be ready for operation by the 30th of September. Canning, Kentville, Kingston and Middleton are to have evaporating factories; the material to be used in their construction will be mainly wood and cement.

*Lunenburg.*—A number of Lunenburg fishing schooners have returned from the Banks, all reporting good fares. Some 16,000 quintals have already arrived, and good prices prevail. The following spring catches have been reported:—

W. C. Smith & Company.....	5,225 Quintals
Adams & Knickle.....	3,350 "
Atlantic Fish Companies.....	2,600 "
Zwiaker & Company.....	2,800 "

The "Ambition," Captain Himmelman, of the Atlantic Fish Company, heads the list with 1,100 quintals. Other vessels are being fitted out for the summer season, while some already have sailed and are not expected to return until early in September.

*Liverpool.*—The new railway bridge on the Halifax and Southwestern railway (south shore route) is nearing completion. It has six spans and a draw, 400 feet long, and will cost about \$100,000. The contractor is rushing the railway branch to the paper mills. The people of Liverpool are looking forward to the completion of the line as daily trains between Halifax the eastern terminus, and Yarmouth, the western terminus, would greatly expand the business of the town. Liverpool still maintains the wooden ship industry. At present there are two vessels under construction, one of 250 tons and the other, a schooner of 50 tons. The machinery has arrived for the paper mill at Milton, and it is expected to be in full operation early in July. It is understood orders are booked for a two years' contract. The annual output of pulp has been 500 carloads, while the contemplated output of paper is 140 carloads yearly.

#### AMHERST, N. S., AND DISTRICT.

*Mr. A. D. Ross, correspondent* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

From an industrial standpoint, the progress of Amherst this season is without parallel. There is a great demand for unskilled labor for street work, sewer extension and for work in connection with various industries. Two or three hundred men could easily find employment at or near Amherst. Farmers are complaining that help cannot be secured at prices twenty to fifty per cent in advance of a few years ago.

The Amherst Foundry Company which had its Enamelling Plant destroyed by fire two months ago has again resumed operations and is employing a large number of men. The Rhodes-Curry Rolling mills have also started full operations this month, but are handicapped for want of skilled labor.

All the other industries in town reported orders in abundance, and the output for the current year promises to be far in

advance of that of any other in the history of the town. The Hewson Woolen Company can give employment to a number of men and girls in their knitting Department. The tendency of wages continues steadily upwards.

In this part of Nova Scotia there has been a marked industrial development during the last few years. The towns have forged ahead of the country sections, and as a result the county sections are not producing enough to furnish the home market. This has increased the cost of living. The great problems that have to be solved in this section is the reduction in the cost of living and the supply of houses to-rent at a reasonable figure. There is not a vacant house here and the rents asked are abnormally high.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The season continued backward. The hay crop promises to be very light. The price of farm produce is abnormally high, the demand exceeding the supply.

*Fishing.*—The lobster season opened late, but during the last few weeks the catch has been phenomenal. Packers are well satisfied with the season's operations thus far.

*Lumbering.*—Large shipments of lumber were made from Pugwash, Northport and other seaports to the European market. Prices were high.

*Manufacturing.*—Industries were exceedingly busy. Many of the local concerns were compelled to work during the night. There was a great demand for all classes of skilled and unskilled labor.

*Mining.*—Coal mining was exceedingly busy. Miners and over ground workers can find employment. The Maritime Railway, Coal and Power Company is advertising for one hundred and fifty men.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Work was abundant at good wages. Carpenters, masons and bricklayers were in great demand.

*Metal.*—Work was brisk in all lines, machinists and engineers were being advertised for.

*Woodworking.*—Car workers never had a better month, other trades were very active.

*Printing.*—Printers were in demand.

*Clothing.*—Tailors were in demand; good men commanded high wages.

## CHARLOTTETOWN, P.E.I. AND DISTRICT

*Mr. F. J. Nash, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

All branches of labour showed marked activity during June, the demand for labour exceeding the supply. A feature of the month was the visit of Dr. Ells, of the geological survey, Canada, under the auspices of the Exploration and Development Company, to Earncliffe, in the Southern part of the Island, to investigate the possibility of discovering coal in this province. The activity in the building trade may be judged from the following item which appeared in the local press of June 22:—

"Building operations are fairly brisk in Charlottetown at present. The lower part of the Prince of Wales College is about completed, and work is being pushed on the Convocation Hall. The walls of the new railway works are steadily rising, and in a short time work will be started at the construction of the new railway pier. At present dredging is being carried on. A large addition is being built to Nicholson's tobacco factory, on Hensley street. The new residence for Dr. McLaughlin has been completed. Seven other residences are being built. A new front is being placed in the McKenna building. The contract will be soon let for a 38x32 brick building for the Telephone Company. Tenders are being called for, for the erection of a new Provincial jail and poor-house, and railway freight sheds at both Charlottetown and Summerside."

The freight-handlers employed on the Prince Edward Island Railway received an increase of 10 cents per day commencing April 1st.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The end of the month saw all the crops in the ground. The season is about two weeks later than last year, but warm weather at the close of the month somewhat improved the situation. The high price that farmers have had to

pay for hay and seed potatoes has operated in a measure against the industry, but good crops, of which there is a fair prospect, will improve matters in the autumn.

*Fishing.*—Lobster fishing on the whole was exceptionally good, and in some factories more fish were taken than could be handled properly. Herring were also unusually plentiful. The expert employed by the Dominion Government to demonstrate the Scottish curing process at Souris, finished his work there about the middle of the month, having put up 200 barrels. The smoker at Georgetown was filled to its utmost capacity, and could have received more if they could have been handled.

### CONDITION OF PARTICULAR TRADES.

*Building.*—The several branches were active.

*Metal, woodworking, printing, clothing, food and tobacco preparation, leather, miscellaneous and transport.*—These trades were all active.

*Unskilled.*—There was a good demand for labour.

### DISTRICT NOTES.

*Summerside.*—Thirty new building are being erected to replace those destroyed by fire in October, 1906.

## MONCTON, N. B., AND DISTRICT.

*Mr. J. C. Graves, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Great activity characterized all branches of the labour market throughout June, showing marked improvement over May and the corresponding month of last year. The building trades were exceptionally active while the wood-working factories were obliged to increase their staffs and run over time.

Over 50 permits for buildings approximating in value \$85,000, have been issued, already equalling the number of

permits taken out last year. Excavations for a new brick fire station are being made and the Bank of Montreal is preparing to erect a large free-stone building.

The Abrams Machine Co. has a new shop about completed and is putting in an extensive machinery plant.

A large number of dwelling houses are also being erected in the suburbs. Large civic improvements, in the way of sewer and water extensions, are being made, while in the West End a mile of new streets is being laid out. Work upon the new I.C.R. shops is being rapidly pushed. About 500 men of all classes are now employed. Tenders are being asked for the construction of a power house, a gas producer house and a dry kiln. These three buildings will complete the plant of the new I.C.R. shops.

Tenders for the construction of an eight mile section from Chipman eastward completing that portion of the G.T.P., between Moncton and Chipman have been received.

Factories and machine shops are all running full time and with plenty of work ahead. The milk dealers have formed a combination and have decided to hold the price of milk at six cents per quart throughout the season. The City Board of Works has decided to increase the wages of labourers from \$1.35 to \$1.50 per day. About sixty per cent of the I.C.R., clerks received increases of salary varying from \$2.00 to \$10.00 per month. Several officials also received increases. Business conditions were good. The Customs duty collected at this port of entry for May amounted to \$5,732.00 as compared with \$4,991.00 for the corresponding month of last year. Bank collections were good, retail trade was steady and wholesale trade firm and expanding.

No changes in the hours of labour and no friction between employers and employees were reported.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers had a very active month, with weather conditions favourable, seeding of all kinds about

over. Farm help was very scarce and many farmers were handicapped on that account. Farm produce of all kinds sells for high figures, and supplies were limited. Hay was very scarce at \$16 and \$18 per ton. Potatoes were also scarce and in some cases are retailing at \$1.00 and \$1.10 per bushel.

*Fishing.*—At Richibucto Shediac and Cape Tormentine, fishermen have been very active and large catches of lobsters have been taken. Heavy shipments of clams have been sent to American markets. A large number of men are being employed in these industries.

*Lumbering.*—Lumber men were actively employed sawing and shipping.

*Manufacturing.*—All local factories have been running on full time and with full staffs.

*Railroad construction.*—A large amount of repair work was done on the I.C.R. A double track is being laid from Moncton to Painsec Jct.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades have had an exceptionally brisk month, all classes of workmen being in good demand. Bricklayers and masons were busy and carpenters and joiners very active. Painters, decorators and paper hangers were rushed and unequal to demand. Stone cutters were very busy and builders' labourers active.

*Metal.*—Iron moulders, workers and helpers were very busy. Machinists, engineers, electrical workers and linemen were in much demand. Stove mounters, blacksmiths, boilermakers, tool sharpeners and horseshoers had steady employment.

*Woodworking and furnishing.*—Great activity characterized all lines.

*Printing.*—Printers and pressmen were very active, and bookbinders fairly so.

*Clothing.*—Journeymen tailors were in demand, garment workers were busy with supply unequal to demand.

*Food and tobacco preparation.*—Bakers, butchers and meat cutters were active. Ice drivers busy.

*Leather.*—Tanners and curriers were busy. Leather workers were steadily employed.

*Miscellaneous.*—Barbers were active, clerks and stenographers busy. Delivery employees hotel, restaurant and laundry helpers were active.

*Transport.*—Railway men reported steady employment. Carters, teamsters and expressmen were all active.

#### CHATHAM, N.B., AND DISTRICT.

*Mr. Theo. DesBrisay, correspondent,* reported as follows—:

##### GENERAL CONDITION OF THE LABOUR MARKET.

Although the spring was somewhat late compared with other years, and outdoor employment thereby retarded, yet June found all branches of industry actively engaged, and in some instances exceptionally busy conditions prevailed. On the whole, the supply of labour, both skilled and unskilled, was equal to the demand. Seasonal conditions, early in the month, somewhat interfered with the general activity of inside and outside employment, but this disappeared toward the end of the month. On the whole, June may be said to have been a very good month for the industrial classes in Chatham and district. Wholesale and retail trade was reported satisfactory, with excellent prospects for the coming season.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farming has been delayed, June 12 being the first warm day.

*Fishing.*—This industry has been backward, with fish scarce. Herring were plentiful on the coast, but salmon and gaspereaux so far are light. The catch of lobsters has been fair.

*Lumbering.*—The drives on the different streams have reached the booms, excepting in one or two instances, which depend chiefly on summer driving.

*Railroad employment.*—Railway employees were well employed.

##### CONDITION OF PARTICULAR TRADES.

Those employed in the skilled trades were either busy or active.

#### ST. JOHN, N. B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during June continued active, all branches being well employed. Farm hands were scarce, and good men could find plenty of work. The contract for the erection of the new \$60,000 Y. M. C. A., building has been signed, and work is being proceeded with. Work on the Royal Bank of Canada is being rapidly pushed forward. A new dredge has arrived from Boston and will be put to work about July 1st on the site of the new 600 foot berth at St. John West, which it is hoped to have completed in time to get the cribs sunk and built up before winter. A plant for repair work on locomotives and cars has been installed at the new I. C. R., roundhouse; formerly, work of this nature was done at Moncton. The annual report of the St. John Railway Company for the year ending April 30, 1907, showed profits of \$51,342.87, of which \$48,000 was distributed to the stockholders in dividends and \$3,342.87 placed to the credit of profit and loss. Bank clearings for the five weeks ended June 27th were \$6,560,122, and for the corresponding period last year \$5,509,003, being \$1,051,119 greater in 1907 than in 1906 and \$1,361,196 in excess of the four weeks ending May 23rd of the current year. The prices of meat have advanced greatly during the past year.

The wholesale price of beef is twenty-five per cent higher, while the retail price of lamb, veal, pork and mutton has advanced 25%. The price of pork is higher than at any time during the past fifteen years. Scarcity of cattle is one reason put forth for the advance in prices. Hay is scarce and dear, \$23.00 per ton being the price now asked by retailers.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The prospects for a good grass crop are not promising. The apple trees are going out of bloom about three weeks later than usual.

*Fishing.*—Harbour fishermen had a fair run of salmon and expect an increase during July. Salmon retails at from 15c to 25c per pound, according to cuts.

*Lumbering.*—Rafting work has been rushed by the St. John River Log Driving Company. At Mitchell booms during the two weeks ending June 25, there were rafted 3,674 joints and 43,218 pieces. The average number of men employed was 149. During the same period, 3,957 joints and 54,409 pieces were rafted at the Douglas booms, the average number of men employed being 165.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, plumbers and gas fitters, and builders' labourers were active. Carpenters, joiners, painters and decorators were busy. Stonecutters were fairly active.

*Metal, engineering and shipbuilding.*—Iron moulders and blacksmiths were active, while machinists and engineers, steam engineers, boilermakers and sheet metal workers were busy, and electrical workers and linemen very busy.

*Woodworking and furnishing.*—Woodworkers and shingle weavers were busy.

*Printing.*—Printers and pressmen were busy, working extra time. Bookbinders were busy.

*Clothing.*—Journeymen tailors were busy.

*Food and tobacco preparation.*—Bakers and confectioners were busy, and cigar-makers were active.

*Miscellaneous.*—Broom makers were very busy, with brush makers busy.

*Transport.*—Railway employees were busy. Street railway employees were very busy. Teamsters and expressmen were active.

*Unskilled labour* was active.

#### DISTRICT NOTES.

*Cole's Island.*—The steamer "Crystal Stream" was burned to the water's edge on June 21, and four of the crew lost their lives. Her length was 132 feet, beam 25 feet, depth 9 feet, gross tonnage 482, registered tonnage 304, insurance \$12,000.

*Fredericton.*—During the past year the

Hartt Boot and Shoe Company did a business of about \$250,000, an increase of almost \$50,000 over the previous twelve months. Profits will be used to increase the facilities of the factory. The annual report of the Fredericton Gas Light Company showed that during the past year the Company spent upwards of \$10,000 on improvements.

*Hampton.*—The buildings of the Canada Woodenware Company, Limited, were destroyed by fire on June 7, together with their extensive manufacturing plant, finished stock and lumber in the dry-house, and a quantity of piled plank in the yards. The loss was about \$30,000.

*St. Mary's.*—The ratepayers have voted \$10,000 towards installing a water system for fire protection and domestic purposes.

#### QUEBEC, QUE., AND DISTRICT.

*Messrs. P. J. Jobin and Edward Little, correspondents,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The month was favourable, labour being more actively employed than in May. The number of immigrants landed was exceptionally heavy; on June 15, 7,000 were landed within 30 hours. The visit of H. M. S., cruiser squadron, the holding of the convention of the Brotherhood of Locomotive Engineers, and the large influx of other visitors made conditions very active. Railway construction in the district was very busy. The large sawmills have now all commenced cutting, the wages paid being about ten per cent higher than last year. Wages in general were upward in tendency. Unskilled labourers last year worked 11 hours for \$1.25 and now receive \$1.35 to \$1.40 for the same time. The employees (civic) of the Water Works Department, to the number of 60, who succeeded in obtaining an increase of pay and decrease of hours, as reported, went back on the 17th of the month to the ten-hour day system. The arrangement had been for a nine-hour day at 15 cents per hour, or \$1.35 per day. The change is to ten

hours and the rate per hour is the same but the per day wage is \$1.50

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Though seeding was very late, the outlook, with the improved weather conditions, is favourable, and the crop will probably be in excess of the average.

*Lumbering.*—The drives were completed under favourable conditions. Some logs that were hung up last year were floated, as well as the whole of the past winter's cut. A busy season is expected for the sawmills.

*Railway construction.*—Over 2,300 men are at present employed at La Tuque on the Lake St. John branch and the Trans-continental line. This number will be increased to 3,000 shortly. A branch road for the Quebec Railway Light and Power Company has been started to run from Beauport to Seven Falls. The St. Ann Power Company is constructing large pulp mills at Seven Falls, and the new branch line will bring the product of the mills to Quebec for shipment.

#### CONDITION OF PARTICULAR TRADES.

The *building trades* were busy and the *metal, engineering and shipbuilding* trades active. The *printing and clothing* trades were busy, with the exception of boot and shoe workers, who were dull. All of the other skilled trades had a very good month. *Transport and miscellaneous* employees were busy.

*Unskilled labour* was busy.

#### SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was very well employed during June, all branches of industry running to full capacity. There was a great demand for unskilled labour, and contractors could engage a few more men. The

new jewellery factory, a branch of a concern from Attleboro, Mass., will be running next month, the new factory being completed and the machinery now being placed in position. Contracts have been let for several buildings at the exhibition grounds. The machine shops are running to full capacity; a number of mechanics from Great Britain were given employment. The Canadian Rand Drill Company added 150 men to the pay roll, and as soon as the new extensions are completed, as many more will be added. Wholesale and retail trade was very good. The conductors, brakemen and baggage-men on the Quebec Central railway have been granted an increase in wages. The terms have not yet been given out. The ratepayers of the city voted on the by-law to authorize the City Council to raise \$200,000 to erect an electric light plant at Westbury. The by-law was carried by a majority of 64. It is the intention of the Council to erect a plant to supply the street lighting, and also to give power to industries which may locate here at \$15 per horsepower. The Eastern Townships Immigration agent placed 128 British immigrants in situations throughout the townships during May. The demand was not nearly filled, as the majority are ticketed through to the west.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy. Although the season was late, warm weather and rain have brought on the crops very rapidly, and should the favourable weather continue, the harvest will not be very late. All crops are looking well; the indications point to a heavy hay crop.

*Lumbering.*—The sawmills were in full operation, and large quantities of logs were being floated down the St. Francis river to the mills below Sherbrooke.

*Manufacturing.*—The manufacturing industry was very busy. The Paton Woollen mills have orders ahead for some time. Help is very scarce. The carpet factory was also working to the limit of its capacity.

*Mining.*—The mining companies complained of the scarcity of help. This was felt not only at the asbestos mines in the

central Quebec district, but at the smaller copper mines in the vicinity. The Golconda gold mine, which is situated about six miles from Sherbrooke, and which was purchased by a New York syndicate for \$125,000, has started operations. Some thirty men are now employed at placer mining, and when the machinery is in position, this number will be increased.

*Railroad construction and employment.*

—The Grand Trunk Railway Company had two work trains and a large gang of men filling in and extending the yard at Sherbrooke. The Company is also extending and improving the depot building. The Quebec Central Railway Company has awarded a contract to raise about three miles of the track between Beauce Junction and St. Joseph, so as to avoid the high water in the spring. About 200 men are employed.

CONDITION OF PARTICULAR TRADES.

*Building.* — Bricklayers, carpenters, joiners, stonecutters and builders' labourers were very busy. There are several large buildings under way which will keep these trades busy all summer. Lathers, plasterers, plumbers and painters were also very busy.

*Metal and engineering.*—Moulders, machinists and all machine shops workers were very busy. In some cases, night work was necessary.

*Woodworking and furnishing.* — All branches were busy, work being carried on to the full capacity of establishments.

*Printing.*—The allied trades were busy.

*Clothing.*—Journeymen tailors were very busy; there was a scarcity of good hands. Garment workers and glove makers were busy.

*Food and tobacco preparation.*—Bakers, confectioners, icemen and cigar makers were busy.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel, restaurant and laundry workers were busy.

*Transport.*—All branches were busy.

*Unskilled labour* was in great demand.

DISTRICT NOTES.

The Orford Mountain Railway Co. has received another grant from the Government, and will, it is stated, extend its line.

ST. HYACINTHE, QUE., AND DISTRICT.

*Mr. V. Phaneuf, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market were busy during June. Favourable weather caused great activity in outside employment. The building trades were more active than in the preceding month, but the season will not be very active. Sash and door factories were very active, sufficient orders being booked to keep the full staff busy. Boot and shoe factories were very active, with bright prospects. The iron industry was a little quieter than in May. The month was a good one for the tanneries, but production was somewhat curtailed owing to the lack of employees, who are very scarce at present. Work on the Grand Trunk line advanced rapidly, from 300 to 500 men being engaged. The workmen on the double tracking of the line between St. Lambert and Ste. Rosalie were being paid \$1.75 per day of 10 hours. The Eastern Townships Manufacturing Company was very busy. The strike of the Penman Manufacturing Company's employees, which commenced on June 10 was terminated on June 17, an amicable arrangement having been effected through the offices of Mr. Felix Marois, of the Quebec Board of Conciliation. The demands of the men were for an increase of 20 per cent. in wages, the recognition of the Union and the re-employing of five workmen who had been dismissed on May 30 and June 1. The manager promised to make an investigation to see if the smaller salaries could be increased from 10 to 15 per cent. The company refused to recognize the Union, but agreed to re-employ the workmen who had been dismissed.

From 1901 to 1906 industry has progressed in St. Hyacinthe, if the great fire of 1903 is taken into consideration. The production of the factories in 1901 was \$2,040,660 and in 1906, \$2,063,255, but retailers expect greater activity in July

Banks reported a very active month, with easy collections. There have been no changes in wages, with the exception of corporation labourers, whose salaries were increased to 15 cents per hour for those working above ground and 17½ cents per hour for those working in the bottom of trenches. With the exception of the Penman strike, relations have been amicable between employers and employees.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Agriculturists were busy, but the season is late. Garden produce sold at good prices. Farm labourers were in demand.

*Manufacturing.*—All factories were well employed. Boot and shoe workers made overtime. Agricultural implement factories were busier than in the corresponding month of last year, and their output has greatly increased.

CONDITION OF PARTICULAR TRADES.

*Building.*—The different branches were fairly well employed, there being more opportunities of employment in June than in the preceding month. Painters and paperhangers had an active month; plumbers were fairly busy, but lathers and plasterers were quiet.

*Metal, engineering and shipbuilding.*—Iron moulders and foundrymen generally worked full time. Electrical workers had an active month. Boilermakers and blacksmiths had plenty of work. Horse-shoers reported a good month.

*Woodworking and furnishing.*—Woodworkers had a very active month, overtime being necessary in some cases.

*Printing.*—Printers, pressmen and bookbinders had an abundance of work at good wages. No one was idle in this class.

*Clothing.*—Tailors were exceptionally busy. Boot and shoe workers were very busy.

*Food and tobacco preparation.*—Activity was reported.

*Leather.*—Tanners, curriers and other leather workers had a very active month.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and laundry employees had an active month.

*Transport.*—Activity prevailed among these workmen.

*Unskilled labour.*—This class was very active, the demand being greater than the supply.

DISTRICT NOTES.

*Sorel.*—At the Marine shipyard a floating workshop is being erected for the purpose of repairing the dredges working at Cap de la Roche. This shop is being constructed on a barge 90 feet in length and 26 feet in width. All the necessary machinery for urgent repairs will be installed, so as to avoid the delays occasioned by the transporting of the vessels to Sorel. The Department of Marine is taking every means to hasten the dredging of the St. Lawrence, and the dredges work day and night. The construction of a spur line to the St. Joseph shipyards has been rendered necessary by the large quantities of freight handled in these yards. The branch will be about two miles long, and will be commenced at once. The Department of Public Works has decided to construct a dock 75 feet wide by 550 in length. This will be very useful to farmers from St. Ann and the Islands who come to market in canoes. A breakwater will be built from the lower end of the dock to the wharf. Work on the steamer "Hosanna," for lighthouse service on the St. Lawrence, has been completed. The vessel measures 115 feet long by 20 in width. A new shipyard has been opened at St. Joseph.

MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Pelletier, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month was exceptionally busy, especially in the building trades. The arrival of a large number of immigrants affected the labour market, especially in the building trades and among unskilled workmen. Manufacturing was very

busy; a large number of factory hands have recently come into the city. At St. Louis de Mile End, De Lorimer, Outremont and other surrounding municipalities a considerable increase in population has been reported as a result of the prevailing industrial activity.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were busy. Several of the branches have been increased in wages. The granite cutters have been on strike for several weeks for an eight-hour day and wages of \$3.00 per day, being an advance of 50 cents per day in wages and a reduction of one hour per day in hours. Carpenters and plumbers were busy, and builders' labourers were in demand. Painters and paper hangers were somewhat less active than in May.

*Printing and clothing.*—Employees in these trades were busy.

*Transport.*—Wharfmen were working night and day, and railway employees had a very busy month. With the opening of the tourist season, cab drivers, hackmen, etc., became very busy. The Montreal Street Railway Company was forced to increase its staff owing to the heavy increase in passenger traffic.

*The metal, woodworking, food and tobacco preparation, leather and miscellaneous trades* were active.

*Unskilled labour.*—The demand has been very active.

#### MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was very active during June, especially in the building trades. During May the value of building permits issued was \$1,964,020 an increase of \$933,757 as compared with May, 1906. The value of permits granted during the first five months of the present year was \$4,007,245, or nearly double the value of permits issued for the whole

year 1901. In the corresponding period of 1906 only four more permits were issued, but the value of the buildings to be erected, which was only \$2,574,173 in 1906, showed an increase of \$1,429,072 for the present year. The following table shows building activity in Montreal since 1899:—

Year.	Number Permits.	Value.
1899 .....	357	\$2,370,080
1900 .....	331	3,089,403
1901 .....	443	2,568,372
1902 .....	826	3,089,734
1903 .....	1,010	4,094,596
1904 .....	1,335	3,651,164
1905 .....	1,694	5,590,698

The amount received by the city from the Montreal, Light, Heat and Power Company for the first six months of 1907 was \$16,036, compared with \$15,684 last year.

The returns from the Montreal post office for May show a great increase both in receipts and in the volume of business done and mail handled as compared with the same month of last year.

W. R. Cuthbert and Company announced their intention to erect an extensive addition to their Duke street brass foundry. The new plant will cost in the vicinity of \$100,000, and will employ several hundred men. The work done will be of the same kind as in the company's existing plant, brass castings of all kinds, phosphor bronze, babbitt and steamfitters' supplies.

Shipments of Nova Scotia coal to Montreal have run behind to the extent of 100,000 tons. This shortage was caused by the late period at which the ice fields around Sydney and elsewhere on the Atlantic coast disappeared.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were very active.

*Metal, engineering and shipbuilding.*—Steam engineers, electrical workers and linemen were very active; the other branches were active.

*Woodworking and furnishing.*—Woodworkers, carriage and wagon makers,

car builders and pattern makers were very active. Coopers and gilders were busy.

In the *printing, clothing and food preparation trades* activity prevailed.

*Leather.*—Tanners, curriers, leather workers, and saddlers, were busy; trunk and bagmakers were active.

*Miscellaneous.*—Hotel, theatre and laundry workers were very active; barbers were active; clerks were busy and furriers were fairly well employed.

*Unskilled labour.*—This class was very active.

### HULL, QUE., AND DISTRICT.

*Mr. Rodolphe Laferrrière, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

June was a very busy month for all classes, overtime being worked in nearly all shops and factories, with orders in excess of the capacity of the mills and the supply of labour available. There have been no changes in wages since June 1. Trade has been active and shipments heavy.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Notwithstanding the backward spring, reports from agriculturists have been very favourable, and a better crop than in eight years past is anticipated.

*Mining.*—Conditions were very active throughout the district. Mica production and manufacture is increasing, a number of new mines being worked, especially on the Upper Gatineau. Prospecting has been active, and the presence of mica throughout the district has caused a marked increase in land values. It is estimated that 700 hands find steady employment in mica mining in this district.

*Lumbering.*—Mills throughout the district were in full activity.

### OTTAWA, ONT., AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was great activity in labour circles during June, especially in the building trades. Many of the contractors were hampered by strikes in May, and there was a keen demand for skilled men when the wages claims were settled. A considerable number of bricklayers and stonemasons who had left the city during the strike have returned, and the demand in these two branches is fairly well supplied. Owing to the extensive stone cutting operations going on in Ottawa, there have been at times more stonecutters in the city than could find employment. The national museum is giving employment to 70 stonecutters, this being the largest building in progress in the city.

The increased cost of building material and labour has discouraged a large number of people who had contemplated the erection of dwelling houses from carrying their plans into execution. Lumber advanced about \$3 per thousand over last year's high figures, which, with the rise in wages, made building 10 or 15% higher than before. If it were not for the advance in rentals, there would have been a very serious set-back to building. To offset the tendency of men to refrain from investing in dwellings, there was an exceptional demand for banks, schools, extensions to stores, etc. There are also some large public buildings in course of erection which must go ahead irrespective of cost. These conditions, together with the cessation of a large portion of the work during strikes in May have prevented the labour market from becoming dull. There is no indication of a decline in lumber prices, but as brick and stone are not much dearer, and concrete is coming into use, it is not expected that the cost of material will prove a permanent hindrance to building.

The only labour trouble occurring during the month was on June 1, when about

400 builders' labourers demanded recognition of the Union and an increase in the minimum wage scale from 22 to 25 cents an hour. Some 200 men, comprising stonemasons, bricklayers and plasterers, were affected indirectly. The strike lasted only five hours, when a committee of the employers agreed to confer with the Building Labourers' Union. A settlement was reached granting recognition of the Union and a minimum scale of 25 cents.

A strike of the tailors employed in two Sparks street shops for an increased scale amounting to about 14 per cent. has been in progress since the spring. The strikers' places have been filled. In the five shops where increase was granted friendly relations continue between the Union and the employers.

The City Council has decided to call for tenders for an asphalt plant, the engineer having recommended that the municipality should build its own streets.

The city electric commission has taken the first step to acquire the street lighting plant of the Ottawa Electric Company, reporting to council in favour of its purchase for \$24,000. Should the Company refuse this, arbitration will be resorted to.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The delivery of vegetables and fruits from the farms is very light compared with this time last year owing to the backward season. Strawberries, which usually ripen in the Ottawa Valley about the last week of June, are about two weeks behind. Meadows, owing to lack of rain, promise a very light yield. The grain has been checked by drought also, but it is not beyond recovery. Labour is employed chiefly at hoeing and thinning roots. Wages are from 10 to 15 per cent. higher than last year.

*Lumbering.*—The activity in lumbering continued. Prices on local and outside markets show an upward tendency despite the previous high quotations. Nearly all the mills are running night as well as day. The high water has been very favourable to driving operations, and most of the logs are out of the tributary

streams. The brisk business in shipping lumber has led to an increase in the number of employees at wharves and railway depots. The pulp and paper industry is thriving owing to the great demand for the product and the satisfactory water power.

*Printing.*—There was a very active demand for printers, pressmen and kindred tradesmen. Apprentices were plentiful.

*Clothing.*—Garment workers were busy on fall trade.

*Food and tobacco preparation.*—Trade was quiet with cigar makers and tobacco workers.

*Leather.*—Leather workers, trunk and bag makers were fairly active.

*Miscellaneous.*—Barbers are very scarce, with wages increasing. Male stenographers are difficult to get. Female stenographers are plentiful. Delivery employees were busy.

*Transport.*—All employees were busy.

*Unskilled labour.*—Farm labourers were in great demand.

#### KINGSTON, ONT. AND DISTRICT.

Mr. Wm. Kelly, correspondent, reports as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of labour was satisfactory during June, the opportunities for employment in many instances being in excess of the supply of men. Sailors, farm help and unskilled labour were much in demand, notwithstanding a large influx of immigrants. The cotton and hosiery mills were employing large numbers of the new arrivals. Except in a few cases, where material was not available, all branches of the building trades were very active. On Friday, June 28, the annual military camp broke up after twelve days work. The camp caused increased receipts among merchants and business men. Over six million bushels of grain have already passed the local elevator this season. Five million bushels were handled at Kingston, and one million five hundred at Prescott, where the

overflow was attended to. The Kingston and Pembroke Railway Company finished ballasting eight miles of its line south of Sharbot Lake, and the whole of the line between Kingston and Sharbot Lake will be finished this year. Two hundred men, mostly Italians, are at present employed at the Grand Trunk Railway Junction lifting the tracks. Upon the request of the Mayor of Kingston, the Hon. the Minister of Justice gave four hundred toise of stone from the Dominion Penitentiary to be used in repairing the City streets. There were no strikes or lockouts during the month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy, with a demand for competent help. Many of the new arrivals refused to work on farms. Complaint was made by the local magistrate and others that undesirable immigrants were being brought here.

*Fishing.*—Fishermen were busy.

*Lumbering.*—Conditions were quiet.

*Manufacturing.*—Industrial establishments of all kinds were active.

*Mining.*—Active conditions prevailed. A party of seventeen Austrian immigrants employed in the local Feldspar mines, although unable to speak English, are proving excellent workmen.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were busy.

*Metal.*—Active conditions prevailed in all branches.

*Woodworking and furnishing.*—Woodworkers of all kinds were active.

*Printing.*—Printers continued busy.

*Clothing.*—These trades were fairly busy.

*Food and tobacco preparation.*—Bakers, butchers, cigarmakers, etc., were active.

*Leather.*—Workers were actively employed. The Harness works, recently opened, reported business brisk.

*Miscellaneous.*—Barbers, broom makers, clerks, furriers, etc., reported a busy month.

*Transport.*—All branches were active.

*Unskilled labour.*—This class was actively employed.

#### BELLEVILLE, ONT., AND DISTRICT.

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

June has been the most active month for labour in many years. There was a demand for additional workmen in nearly every trade, and in some cases contractors were compelled to move their workmen from one job to another. The two daily newspapers were advertising for men, and in some cases advertisements were appearing in outside publications. Opportunities for employment were offering, for both skilled and unskilled workmen, in nearly all trades at ruling wages. Every industrial establishment was working to its fullest capacity, and the amount of product sent out was very heavy. Many firms admitted their inability to keep up with orders. The new Lehigh Cement Company has a large number of workmen employed erecting dwelling houses, foundations, docks, etc. The Belleville Cement Company was employing all the men that it could secure in erecting additional buildings found necessary owing to its increased business. The district has been exceptionally free from labour difficulties, not one strike of any importance having been reported. The erection of the new drill hall was giving employment to large numbers of workmen mostly stone masons and labourers. The hotel "Quinte," the new public library, three new banks, the four storey addition to the Belleville Hardware Company's premises, besides other large undertakings, were providing employment to all who applied. The Belleville Hardware Company sustained a serious loss by fire on June 19, but the work of the firm was carried on without interruption. At the present time there is not a store vacant, nor is there sufficient housing accommodation for the influx of new residents. Merchants reported business good for the time of the year, and are sanguine as to future prospects. The stone quarries at Crookston were employing extra men getting out stone for the new drill hall.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Owing to the backwardness of the spring, grain and hay are not looking well and in many instances crops are suffering for rain. Prospects are poor for a good hay crop, but the root crops are looking well.

*Fishing.*—This industry was quiet.

*Lumbering.*—The lumbering industry was dull compared with the corresponding period of other years.

*Manufacturing.*—Industrial establishments were very active in nearly all branches.

*Mining.*—Active conditions existed in the northern part of the county.

*Railroad construction and employment.*—Some 400 men were employed on the Central Ontario Junction Railway, and the rails have been laid from Bancroft to Maynooth, nearly 16 miles. Railway employment generally was active.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Every branch was active, and in some the supply of labour was unequal to the demand. Excellent wages were paid.

*Metal, engineering and shipbuilding.*—Iron moulders were very active. One large firm was advertising in outside places for additional workmen. Machinists had a busy month, also electrical workers and linemen. Metal polishers, buffers, platers, brass workers, etc., at the Belleville Hardware Company's plant were busy. Active conditions prevailed with blacksmiths and boilermakers. Bicycle workers and horseshoers reported an active month.

*Woodworking and furnishing.*—The different branches were busy. Car builders at Deseronto were very actively employed. Many coopers were being employed at good wages in the manufacture of cheese boxes.

*Printing.*—Printers, pressmen and bookbinders were active.

*Clothing.*—Journeymen tailors were busy.

*Food and tobacco preparation.*—Bakers confectioners, butchers and ice-handlers were active. The price of ice has been increased 50 per cent.

*Leather.*—Harness makers and saddlers were busy.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees, and laundry workers were active.

*Transport.*—Railway employees reported a busy month, employment being in excess of June last year. Steamboatmen had an active month, also sailors, longshoremen, hackmen, carters, teamsters, and expressmen.

*Unskilled.*—This class was in demand at good wages.

## PETERBOROUGH ONT., AND DISTRICT.

*Mr. W. J. Johnson, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

For employment of all kinds no month this year has exceeded June. Every person who wanted work could get it. The tourist season was commencing, and from present indications will exceed that of any previous year. The dredging of the river is being carried on, and the City is taking the dredgings to fill in along the water edge. Stone, concrete, excavation and brick work is being pushed on the new armouries, Collegiate Institute and North Ward schools. The Bell Telephone Company has awarded contracts for the erection of a new exchange building to be completed this year. The City is laying many miles of sidewalks and sewers. The building trades and all shops were very busy. Transportation both by rail and water was never better; hundreds of cords of wood were being brought into the city from the country districts in scows by the Trent Canal. Wholesale and retail trade was very active. The Ackerman strike remained unchanged. Teamsters wages were raised from \$3.25 to \$3.65 per day; cement mixers, from \$1.60 to \$1.75. Plasterers are asking for an increase from \$3.00 to \$3.25. The Peterborough Canoe Manufacturing Company was very busy building skiffs,

canoes and steam launches, shipping consignments to New Ontario, Western Canada and the United States. The George Mathews Company is making extensive alterations, and is building an addition to its plant. The Ontario Coal Company is building a new siding into its plant.

The new furniture factory recently erected has already a number of orders on hand. The Colonial Weaving Company, which has been in business here for some years, requires larger quarters as its business is growing very rapidly. This Company is asking the City for a free site and fixed assessment, and intends to build a factory 60 x 200 feet, costing \$12,000, also to employ 60 instead of 40 hands, as heretofore. Repairs in three stores costing about \$6,000 are under way. Permits have been issued for the building of over 150 houses, besides others for premises costing between \$200,000 and \$300,000. Peterborough has a per capita manufacturing output of \$7.33 the best showing of any industrial centre in Canada.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Summer fallowing and the planting of root crops were in progress. A considerable quantity of oats were marketed at 52 to 55 cents a bushel; eggs, brought 17 to 18 per dozen, and butter 26 to 28 cents per lb. Florists were very busy.

*Fishing, lnmbering and manufacturing.* These industries were very active.

*Mining.*—The mining industry was somewhat dull.

*Railroad construction and employment.*—Railway work was confined to keeping the railroads in repair.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All were very busy, excepting gas and steam-fitters who were active.

*Metal, engineering and shipbuilding.*—Busy conditions prevailed with electrical workers very busy, and iron moulders, boiler-makers, ship workers, bicycle workers, tool sharpeners, horseshoers and jewellers active.

*Woodworking and furnishing.*—All were actively employed.

*Printing.*—All branches were very busy.

*Clothing.*—Journeymen tailors were active, and garment workers, hat makers, boot and shoe makers were busy.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters, and ice handlers were very busy, with cigar makers active.

*Leather.*—Workers on leather goods were very busy.

*Miscellaneous.*—Clerks, stenographers, and laundry workers were very busy; broom makers and barbers were active, and furriers dull.

*Transport.*—Railroad workers in all branches were very busy as were all others coming under this heading.

*Unskilled labour.*—This class experienced busy conditions.

#### DISTRICT NOTES.

Cheese and butter making is now in full progress throughout the district. Two thousand nine hundred and eighty-nine boxes of cheese were turned out from the Peterborough factory at 11 5-8 cents per lb, and 1,254 from the Victoria factory at 11 ½ cents per lb. Produce was very high, hay selling at \$15 per ton loose, and \$18 baled. Potatoes brought \$1.35 per bag, and other produce was equally high. Root crops were receiving attention. Grain crops never looked better, every-thing pointing to a bountiful harvest.

#### TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

While activity continued in the building trade, as well as in nearly all lines of manufacturing, the labour market has been unsettled during June owing to strikes, and the influx of immigration. The strike of the plumbers is beginning to be seriously felt as building contracts approach completion. The stringency in the money market is also a detri-

mental factor so far as new enterprises and extensions are concerned.

Building permits were issued during the month of May to the approximate value of \$2,457,964, as compared with \$1,502,160 for May, 1906, the number of buildings being 829 as against 468 for May of last year.

The receipts of the Toronto Railway Co., during May were \$279,773, of which the City's percentage was \$41,965, as compared with total receipts of \$250,682 for May, 1906.

The Confederation Life Co., began the erection of a new 8-story steel building, to cost \$200,000. It will be absolutely fireproof. The Colonial Investment and Loan Co., will erect a 10-story office building of steel, brick and terra cotta, to cost \$150,000, exclusive of the land. The City Engineer has presented a detailed report of proposed improvements in the city water service, including a new 15,000,000 gallon pumping engine at the main pumping station, to cost \$250,000, and a 6,000,000 gallon pump at the high level pumping station to cost \$60,000. The total cost of the improvement will be \$310,000 and a by-law to raise the amount will be submitted to the rate-payers.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy, haying having commenced about the close of the month. The crop will be rather short owing to the late spring. Other crops, though backward, were looking well and improving rapidly under the influence of favourable weather.

*Manufacturing.*—This industry was generally active, except where interrupted by labour troubles, and many establishments found a difficulty in overtaking orders. Employers complained of a lack of specially skilled artisans in some lines. The machinists' strike affected adversely other branches, requiring machinery and repairs. Western trade has considerably improved, the difficulty in procuring transportation having been overcome. The Somerville Co., Ltd., has secured a site on St. Helens Ave. in the north-western part

of the City for a brass working plant, which will employ 200 men. The Lautz Marble Co., of Buffalo, will establish a plant in the East end to cost \$40,000. It will employ 50 skilled cutters besides other workmen. The Gundy-Chapperton Co., cut-glass manufacturers, have taken out a permit for a factory. The Massey-Harris Co., has purchased a large block of land, east of the present property to enable them to extend their operations. The Imperial Glass works will put up a 2-story brick warehouse on Mutual St. at a cost of \$14,000. J. & J. Taylor, safe manufacturers, have completed a large addition to their factory 245 ft. in length by 60 ft. in width, of concrete steel and brick, where they will manufacture heavy vaults and strong rooms, providing employment for an additional 100 men.

*Railroad construction and employment.* The electric service on the York Radial through to Jackson's Point, Lake Simcoe, was opened on the 1st June, and the line is now in regular operation.

The work of relaying the Grand Trunk Railway track between Toronto and Hamilton was nearly completed at the close of the month. Owing to the increase of traffic the staff of Grand Trunk employees at the Union Station has been largely augmented.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, carpenters, masons and builders' labourers were generally well employed, but the influx of immigrants has been in excess of the local demand and a number are out of work. Painters had a fair month. Lathers and plasterers found work a little slack owing to the plumbers strike, which at the close of the month was still on. Plasterers' labourers, who went on strike June 1st, for 35 cents per hour, compromised on the 18th for 30½ cents being half-a-cent advance.

*Metal, engineering and shipbuilding.*—Work has been plentiful in most lines, except where the strike of machinists, who went out to the number of 750 on the 8th inst., has affected other trades. Owing to this cause a number of boiler-

makers, blacksmiths, moulders and other metal workers have been temporarily idle. The larger establishments have refused to entertain the demands of the Machinists Union and insist on an open shop, but a number of the smaller shops have conceded the terms asked and the men have gone back to work on the 9-hour schedule, having about 400 machinists still out. The boiler makers who demanded a 9-hour day have compromised on a basis of an increase of 10 per cent. in wages, receiving \$3.00 per day in place of \$2.75. Jewelers and silversmiths were busy.

*Woodworking and furnishing.*—These trades have all been well employed.

*Printing.*—The printers and allied trades had a fair month. On June 1st the Typographical Union finally decided to accept the agreement entered into by the conference between the allied printing trades and the job offices.

*Clothing.*—Custom tailors, dress-makers, garment workers and milliners had a busy month. Boot and shoe workers, hat and cap workers had steady work.

*Food and tobacco preparation.*—Activity prevailed in these lines.

*Leather.*—Harness makers and saddlers had plenty of work.

*Miscellaneous.*—Barbers, hotel and restaurant employees, laundry workers, etc. were busy. The number of clerks, salesmen, and warehousemen was considerably in excess of the demand.

*Transport.*—Railway and street railway employees, sailors, longshoremen, teamsters and express men had an active month.

*Unskilled labour.*—The supply is considerably in excess of local requirements.

DISTRICT NOTES.

*Swansea.*—The new buildings of the Toronto Bolt and Forging Co., are nearly completed at a cost of about \$100,000. They are built of modern land-lime bricks throughout.

*Newmarket.*—The contract for section 2 of the projected canal from Newmarket to Holland Landing has been let to John Riley, and the work will shortly be begun.

*Toronto Junction.*—A. Bradshaw & Son have purchased a site on Hook Ave. where they will erect a clothing factory to employ 90 operatives.

NIAGARA FALLS, ONT., AND DISTRICT.

*Mr. Ernest Green, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

June was a busy month in this city and district, with abundance of work for men of every occupation, but with the supply of labour usually equal to the demand. Machinery was installed in the new shoe factory, and it will be running in July. The carriage mountings' factory and the nut and bolt works were going up; the plant of the Ramapo Iron Works was nearly completed; and the new Ethinite factory was running steadily after the 12th. Sewer construction gave employment to a number of men. Contracts were let for 80,000 square feet of granolithic sidewalks. The building trades were, perhaps, the most active. Financial and commercial interests were satisfied with prevailing conditions. The only important change in wages or hours was among trainmen of the International railway (electric). A new schedule went into effect on June 1st, giving the men an average increase of from one to two cents per hour. Fifty men were affected. At Welland a Wednesday afternoon closing movement was inaugurated on June 19th, to continue till September 1st.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The unusually late spring had a lasting effect on agriculture. Less planting was done, and crops planted last fall suffered. The next three months will be very busy ones in the fruit district, and there will be a great demand for both male and female help.

*Fishing.*—Fishing in the lakes was active during June.

*Manufacturing.*—Manufacturing con-

cerns of all classes were busy. The Niagara Neckwear Company advertised for ten girls, and the roller bearings' works wanted good lathe hands. Planing mills were rushed with work.

*Railroad construction and employment.*—Railway traffic was steady. Some construction work was going on along the Niagara, St. Catharines & Toronto extension to Welland and on the double-tracking of the Michigan Central line near Bridgeburg.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—With the exception of stonecutters, all were very busy.

*Metal.*—Foundries, machine shops and other metal-working establishments were well supplied with work. Steel lathe men were wanted. Steam engineers were quiet. Electrical workers were well employed.

*Printing.*—Business was good. Operators for type-setting machines were scarce.

*Clothing.*—Journeymen tailors were busy.

*Food and tobacco preparation.*—Bakers, butchers, icemen and cigar makers were active.

*Miscellaneous.*—The summer season opened, giving employment to large numbers of hotel and restaurant employees, and to many additional retail clerks. Office employees were active and workers busy.

*Transport.*—Passenger traffic on the railways was heavy and train and engine-men were active. Freight traffic was steady. Steamboat men were all working. Electric railway employees were very busy. Teamsters and carters were active and hackmen quiet.

*Unskilled labour.*—Was well employed.

#### DISTRICT NOTES.

*Humberstone.*—Industrial conditions here and at *Port Colborne* were favourable. The public school is to be enlarged. Traffic on the Welland canal was heavy.

*Bridgeburg.*—By-laws for school enlargement and street improvements were defeated at the polls. On June 1st, 500 men were employed at the shipyards,

and plans were completed for building the largest dry-dock on the great lakes. A steel vessel over 500 feet in length is being built. On June 12th, fire destroyed the machine and blacksmith shops, doing 30,000 dollars damage. The burned buildings are being re-erected and the industry will not be checked.

*Welland.*—The Robertson Machinery Company, which suffered by fire, will build a new engine-building plant, and a new company will take over other branches of the business. The Supreme Heating Company expects to be turning out stoves in August. The buildings of the Billings-Spencer works were going up rapidly. Good progress was made at the steel works. Excavation of the turning basin in the Welland canal was completed, and it and the new docks will be finished in September. Further improvements to the canal have been decided upon. Retail stores will close on Wednesdays at 1 p.m. from June 19th to September 1st. The Canada Forge Works is now employing forty men.

#### ST. CATHARINES, ONT., AND DISTRICT.

*Mr. James A. Wiley, correspondent,* reports as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during June showed a marked increase in activity as compared with the preceding month, particularly in the building trades. As a result of the settlement of the carpenters and joiners strike, which was effected on May 31st, the men received an increase in wages from 27½ cents per hour to 33 cents per hour as minimum rate. There was a general resumption of the busy building operations that have prevailed for the past three seasons. As yet there is a great dearth of houses to rent within the means of the mechanic. The City Council has decided on extensive permanent road pavements and sewer construction. Merchants and business men reported a good month's trade, with an increase in

volume over the corresponding month of last year. The usual Wednesday half-holiday for clerks during June, July and August will prevail this year.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Notwithstanding the late spring season there is every indication of a large fruit crop. The warm weather of the latter part of June has brought on the crops, so that they are not nearly so backward as at the beginning of the month. Cherries may not be a heavy crop in some localities, but in others they will do well. Grapes are looking well. Peaches have wintered in good condition; frosts did not affect the buds to any extent. This may be an off year for pears. Tomatoes will do well. Hay will be a heavy yield.

*Manufacturing.*—All branches were busy, and report trade conditions very encouraging. The usual Saturday half-holiday for factory employees from May to September is in force this year.

*Railway construction and employment.*—The St. C. N. and T. R. R. was still busy relaying tracks, road beds, between this city and Port Dalhousie, and on the construction of a new line from Font Hill to Welland.

*Other industries.*—The canneries are resuming operations.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were all busy, with good prospects.

*Metal, engineering and shipbuilding.*—All branches were active.

*Woodworking and furnishing.*—All were active.

*Printing.*—The allied trades were busy.

*Clothing.*—Journeymen tailors and boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters, ice cutters and drivers, cigar makers and tobacco workers were active.

*Leather.*—Tanners, curriers and leather workers were active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees, and laundry workers were active.

*Transport.*—All branches were active or busy. The lock tenders on the Welland Canal have had the busiest season in many years. May was a record month for the number of vessels locked through, and to the end of June there were more locked through than last year up to the end of August. Many of the vessels had to be lightened of a part of their cargoes at Port Colborne in order to pass through the Canal.

#### DISTRICT NOTES.

*Port Dalhousie, Merritton and Thorold.*—The favourable labour conditions of last month still prevail, labour being generally well employed, with business good.

*Grantham Township.*—The ratepayers have voted \$20,000 for roads this year.

*Port Colborne.*—Work on the new elevator being built by the Dominion Government is being pushed forward as rapidly as possible. It will have several new drives and will be the first constructed on the truss beam triangle principle. When built, the elevator will considerably facilitate the lightening of the heavy cargo vessels which pass through the Welland Canal.

#### HAMILTON, ONT., AND DISTRICT.

*Mr. S. Landers, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was very busy during June in almost every branch, skilled and unskilled. The painters' strike has been satisfactorily settled. The teamsters who went out on strike recently have returned to work on the promise of the employing company to investigate their demand for an increase in wages. There has been a general movement in favour of a half-day holiday on Wednesday afternoons during the hot weather, and grocers, butchers, dentists, jewellers, bicycle stores, photographers, shoe stores and many others will close, giving hundreds of retail clerks a half-holiday once a

week. Wholesale and retail trade has been very active. The iron, tobacco and clothing trades have made very heavy shipments. Thus far the year has been one of the busiest in the City's history so far as building operations are concerned. The International Harvester Company has decided to make a large addition to its Hamilton establishment in the form of a separate plant. It is the intention of the Company to manufacture gasoline and gas engines for its Canadian trade in the new establishment.

#### CONDITION OF LOCAL INDUSTRIES.

##### *Railroad construction and employment.*

—There was considerable railroad construction work going on in connection with the building of various electric railways. The Street Railway Company is laying new tracks and employing over 100 men. The Hamilton and Brantford Electric Railway Company has over 200 men working outside of the city, grading and filling in.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were exceptionally busy, every branch being taxed to its utmost capacity. The plumbers were at work again, having received an increase in wages, as are also the painters. Bricklayers and labourers were all busy.

*Metal, engineering and shipbuilding.*—Iron moulders, machine and stove plate, coremakers, steam engineers, metal polishers, platers and buffers and blacksmiths were actively employed. Stove mounters, tinsmiths, electric workers, etc., were busy. Horseshoers and jewelers were only fairly well employed.

*Woodworking and furnishing.*—Woodworkers and pattern makers were active, and carriage and wagon makers had fair employment.

*Printing.*—The allied trades were very busy.

*Clothing.*—Journeymen tailors and haters were rather slack, but garment workers were busily employed, with boot and shoe workers active.

*Food and tobacco preparation.*—Bakers were busy; cigar makers and tobacco workers active.

*Leather.*—This class had fair employment.

*Miscellaneous.*—All were busy.

*Transport.*—Employees of steam and electric railways were active, with steamboatmen, firemen, ship labourers, long-shoremen, etc., busy. Cabmen, carters, teamsters and expressmen were busy.

*Unskilled.*—This class was busy.

#### DISTRICT NOTES.

*Dundas.*—Labour in all branches was well employed. There was a scarcity of workingmen's houses.

#### BRANTFORD, ONT., AND DISTRICT.

*Mr. J. C. Watt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during June, which compared favourably with May and the corresponding month of last year. The iron trades were very busy, and several factories required more men. There was also a steady demand for female operatives. A number of foreign labourers arrived, and many secured work at once. Activity in the building trades was increasing as the season advanced, the number of building permits issued exceeding that of former years at a corresponding date. There was an unprecedented demand for houses, and rents have been advanced considerably. At the last session of the City Council a committee was appointed to be known as "The Co-partnership House Building Committee," to collect the fullest information as to methods by which suitable houses may be built for the housing of workmen. About 175 carpenters and 60 tailors will be allowed the Saturday half-holiday during June, July and August. About 30 bakers will also have a half-holiday on Wednesday afternoon, and about 40 printers and pressmen a Saturday half-day holiday during the same months. Merchants reported a good month.

The stove mounters are still out on

strike, though a number of their places have been filled, and nearly all that went out have secured employment elsewhere. Towards the close of the month about one-half of the carpenters who went on strike were working under the new rate, viz., a minimum of 30 cents an hour, an increase of  $7\frac{1}{2}$  cents an hour. Thirty-five had left the city, and about 10 were still affected by the strike in the City. The larger contractors have not yet signed the schedule, and are advertising for men, offering from 25 to 30 cents an hour.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy. There was in some sections a slight demand for additional men. Crop prospects were good, though the hay crop is expected to be light.

*Manufacturing.*—This industry in all its branches was active, with excellent prospects for the future. The Goold, Shapley and Muir Company is erecting a large addition to its present factory, which will nearly double its floor space. The Slingsby Manufacturing Company has started an \$8,000 addition to its plant.

*Railroad construction and employment.*—The extensive operations now in progress on the Grand Trunk railway in the way of raising tracks and double tracking will be completed in about two months.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, painters and decorators were very busy, with lathers, plasterers, plumbers, steam and gas-fitters busy.

*Metal.*—Iron moulders, core-makers, machinists, engineers, electrical workers, linemen, metal polishers, buffers and platers were very busy. Stove mounters were still on strike, but the men that took their places were busy. Machinists, carriage and general blacksmiths, boiler-makers, sheet metal workers and horse-shoers were very busy.

*Woodworking and furnishing.*—Woodworkers generally were fairly well employed, especially towards the close of

the month. Carriage and wagon makers millwrights and coopers were busy.

*Printing.*—Printers and pressmen were busy.

*Clothing.*—Journeymen tailors were very busy.

*Food and tobacco preparation.*—Bakers and butchers, particularly the former, were very busy. Cigarmakers and tobacco workers in some shops were busy.

*Leather.*—Saddlers and leather workers were busy.

*Miscellaneous.*—Barbers, clerks and delivery employees were busy. Hotel, restaurant and laundry employees were very busy.

*Transport.*—Railroad trackmen were busy and freight handlers very busy. Street railway employees were steadily employed. Teamsters and draymen were very busy. Cabmen had an average month.

*Unskilled.*—This class in the latter part of the month was somewhat in demand.

#### DISTRICT NOTES.

*Paris.*—Labour was well employed, the mills and factories running steadily. The station of the Grand Trunk railway Company was opened June 15.

*Blue Lake.*—There was a demand for a few competent labourers.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Walla*, correspondent reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

During June the labour market showed little change from the preceding month. Outdoor workers had a busy month, and factory workers had practically no lost time. There has been, however, no noticeable scarcity of labour. Work on the new factories and extensions has been rushed ahead. Work on the addition to the Axle and Spring Company's works was commenced. Retail clerks have been granted a half-holiday during July and August. A proposition to change

the Clerks' Association into a trade union was decided against by the Association officers. Retail trade was good. About 35,000 excursionists visited the Ontario Agricultural College. The strike of iron moulders, which commenced in May, was settled by an increase being granted to them. Owing to the increased cost of flour, the weight of a small loaf of bread, of the fancy varieties, will be lessened to  $1\frac{1}{4}$  pounds by some bakers and sold at the present price, viz., 5 cents a loaf.

#### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Manufacturers generally had a busy month, but the labour supply was fully equal to the demand.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades had a busy month, and additional contracts were let for the construction and alteration of many structures. There was a noticeable scarcity of brick, caused mainly through lack of means of transportation.

*Metal, engineering and shipbuilding.*—Iron moulders were busy. One shop, which has been affected by the striking of 18 of its moulders on May 23, settled the trouble on June 17 by granting the men 5 per cent. increase on almost all lines. Machinists and helpers had a busy month, as did tube mill workers.

*Woodworking and furnishing.*—Piano and organ workers had an active month. Upholsterers, carriage workers and wood workers were also active.

*Printing.*—Printers had a busy month.

*Clothing.*—Journeymen tailors and garment workers (female) were busy. There was a slight demand for help in the case of the latter trade.

*Food and tobacco preparation.*—Bakers, confectioners and cigar makers were busy.

*Miscellaneous.*—Barbers, clerks, delivery employes, street car men and hotel employes had a very busy month, owing largely to the number of excursionists visiting the Ontario Agricultural College.

*Unskilled.*—This class was in good demand, with the supply about equal.

#### WOODSTOCK, ONT., AND DISTRICT.

*Mr. R. F. Parkinson, correspondent* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Marked activity characterized practically every branch of industry during June. Regular employment was provided for all classes of skilled labor, the demand being fully equal to and in some cases in excess of the supply. During the past few weeks a considerable number of skilled mechanics from England have arrived, among them many musical instrument workers, and all have been readily engaged at local factories. Outside operations have been in progress since the beginning of the month, thereby providing ample employment for unskilled labor. Building was especially active and a lengthy and busy season is assured for all engaged in these trades.

The month of June on the whole was more active than the preceding month or the corresponding month of last year. During May manufacturers were awaiting with more or less anxiety definite information concerning the backward season in the Canadian West. Recent reports, however, have been such as to restore full confidence, with the result that Western trade, as far as local manufacturers are concerned, will be in excess of former years. Orders already received and in view guarantee pretty general activity for the summer season.

The transportation returns for the month furnish evidence of very material expansion in trade in the furniture, implement and music trades. Shipments were heavy in all these lines. Bank clearings indicated satisfactory conditions.

Wholesale and retail dealers reported a fairly busy month.

Arrangements have been completed whereby the grocers, hardware, meat-dealers, barbers, boot and shoe dealers will observe early closing during July

and August, closing their places of business at one o'clock every Wednesday.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There was a keen demand for farm labour. Seeding and planting operations were completed early in the month and the haying season will commence early in July. The hay crop may be somewhat below the average, owing to the backward weather in May. Recent rains have improved the prospects. Spring crops are progressing very favourably.

*Manufacturing.*—Factories were engaged full time and the outlook is for similar conditions the coming month, the prospects of another successful harvest serving to encourage manufacturers in the work of expansion.

*Railway Construction.*—Work is progressing on the new steam railway from Embro to St. Marys. The sale is announced of the Woodstock and Ingersoll Electric Railway to the Grand Valley Co. The Grand Trunk Railway Co., are negotiating with the city for the erection of a new passenger depot here.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Operations were commenced early in the month and as a result bricklayers and masons had all the work they could handle. Carpenters were well employed, and from now on painters, plumbers and lathers will be busier in completing work on buildings. Builders laborers were employed. The present will prove one of Woodstock's best years in the building trade.

*Metal.*—Conditions among iron workers and moulders were generally satisfactory. Extreme heat interfered somewhat with the moulding trade towards the end of the month. Machinists were busy, while electrical workers were more active as the month advanced. Bicycle workers and jewellers had a good month.

*Woodworking.*—The usual activity prevailed among piano and organ makers. Upholsterers and furniture makers had one of the busiest months of the year. Carriage and wagon makers were employed full time.

*Printing.*—All branches were busy, the demand being in excess of the supply for compositors and pressmen.

*Clothing.*—Tailors and garment workers were not as active as during the preceding month. Boot and shoe workers were also less active.

*Food and tobacco preparation.*—Bakers, confectioners and butchers felt the usual activity shown in the hot weather season. Ice cutters were also active and cigar makers had regular employment.

*Leather.*—Tanners were in demand. Trunk and bag makers were unusually busy.

*Miscellaneous.*—Clerks and delivery employees were well employed. Hotel and restaurant employees were busy.

*Transport.*—Heavy shipments provided plenty of employment for all branches of the transport trade. Railway employees were also busily engaged.

*Unskilled.*—Outside operations were brisk, and the demand for labourers was fully equal to the supply.

#### STRATFORD, ONT., AND DISTRICT.

*Mr. Jos. T. Carlin, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was greater activity in the labour market in June than during the previous month, especially in the building trades. A large number of buildings are fairly well advanced. The Stratford Improvement Company is erecting 20 new houses, averaging in price about \$775 each. Contractors and engineers were in the city preparing estimates for the concrete foundations of the Grand Trunk Railway's new locomotive shops; it is reported that not less than 2,500 barrels of cement will be used for this work. Wholesale and retail trade was active. No change in the rate of wages or hours of labour took place, but by an agreement made in September, 1905, the printers of Stratford have been working an eight and a half hour day since the first of January, 1906. By the terms of the same agreement, an eight

hour day will come into force on July 1, 1907.

*Unskilled labour.*—This class was well employed.

#### CONDITION OF LOCAL INDUSTRIES.

#### DISTRICT NOTES.

*Agriculture.*—Farmers have been busy. There is not much change to note in prices. Potatoes, which are becoming scarce, sell at \$1.25 to \$1.75 per bag; eggs at 17c per dozen; butter at 20c to 22c a lb.; green stuff, 5c a bunch; tomato and cabbage plants, from 15c to 20c per doz.

*Manufacturing.*—Establishments have had a very busy month, especially door and sash factories. Clothing factories had an active month.

*Railroad construction.*—The section men were busy keeping the road bed in order and building sidings.

*Clinton.*—At a meeting of the Board of Trade, it was decided that an effort should be made to have the Thrasher Co., by-law passed, whereby the town is asked to guarantee bonds to the amount of \$20,000. The by-law subsequently passed.

*St. Marys.*—Building operations were brisk, many new residences being in course of erection. Oil has been struck on the Nagle farm by the West Nissouri Oil and Gas Co. A small flow of gas was also struck. The flow is much greater than in the first well, which was abandoned by the drillers. The Company is having the well cased to ascertain the flow.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, lathers and plasterers were busy. Painters, paperhangers, plumbers and gas fitters were active, while stonecutters and labourers had a very good month.

*Metal.*—Iron moulders, workers and helpers had a busy month. Boiler-makers, blacksmiths and horseshoers were active. Jewellers were doing a good trade.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers were active. Carriage and wagon makers and coopers were busy.

*Printing.*—These trades were fairly well employed.

*Clothing.*—Journeymen tailors and garment workers were active.

*Food and tobacco preparation.*—Bakers and confectioners were busy. The price of meat has advanced; roast pork and pork chops, from 15c to 17c per lb.; beef steak (round) from 12½c to 15c per lb.; beef steak (sirloin) from 15c to 17c per lb.; roast beef, from 10c to 15c per lb., and boiling beef, from 7c. to 8c. per lb. Cigar makers had a very good month.

*Leather.*—Tanners and harness makers were active.

*Miscellaneous.*—Barbers, clerks, delivery employees and hotel and laundry workers were busy.

*Transport.*—All lines were active.

#### LONDON, ONT., AND DISTRICT.

*Mr. Alex. Woonton, correspondent,* reports as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was more active than in May, and there was a demand for unskilled labour and female help. It may be said that every factory in this city employing girls could find work for a considerable number more than they have. The number of sewers and cement sidewalks under construction are employing all available unskilled labour. The Cook-Fitzgerald Shoe Company has purchased the building now occupied by the Labatt Brass Co., and will fit it up for a shoe factory, employing many more hands than at present. The Labatt Company will build a new factory. The earnings of the London and Port Stanley Railway owned by the City and leased to the Pere Marquette Railway were \$143,736.06 last year, an increase of \$12,680.82 over the previous year. The City received 10 per cent. of the receipts above \$80,000. The first annual report of the Byron Telephone Co-operative Association, a company formed among the farmers in

the vicinity of London, shows thirty-five miles of line, 850 poles, about five tons of wire, and sixty phones installed. It was decided to make further extensions immediately. The grocers throughout the City, as in former years, are closing Wednesday afternoons during June, July and August. Nine checkers at the Grand Trunk Freight sheds quit work on Wednesday, June 19th. They state that they were promised a 10 per cent. increase in wages last May, and when they only received an increase of \$2.50 in this month's pay, they refused to work any longer. Their places were immediately filled by promotions from the truckers.

The majority of butcher shops in London have increased the price of meat three cents a pound all round. They are now charging 18 cents for the usual 15 cent cuts of steak; 14 cents for round steak, which formerly cost 12½ cents.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers in this district are greatly inconvenienced by scarcity of farm help. The prime cause of the trouble is the movement of young men, including farmers' sons, to the North-west. It is expected that the farmers' wives and daughters will have to help in the fields during the harvest.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Great activity prevailed in all branches. Bricklayers had plenty of men to meet all requirements, but carpenters were shorthanded. Lathers and plasterers were extra busy. Painters and plumbers were very busy, with enough hands. Stonecutters were rushed. Builders' labourers were in demand, and some experienced men could get work here. Brickmakers have turned out their first brick.

*Metal, engineering and shipbuilding.*—Iron moulders reported trade good. Machinists have more work on hand than they can handle properly. Electrical workers reported trade brisk. Metal polishers were very busy.

*Woodworking and furnishing.*—Carriage and wagon workers were very busy, with

hands scarce. Car builders had a great amount of work ahead. Coopers were busy.

*Printing and allied.*—Printers were busy and there were no idle men here. Pressmen were in demand. Bookbinders were rushed. Paper box makers were exceptionally busy, with orders away ahead.

*Clothing.*—Journeymen tailors reported the spring rush over. Garment workers were very busy, and boot and shoe workers were extra busy.

*Food and tobacco preparation.*—Wholesale confectionery and biscuit factories were busy for this time of year. Cigar makers reported all hands employed.

*Leather.*—Tannery workers reported an increasing trade, and more hands were being employed. Leather workers on saddlery were rushed with orders.

*Transport.*—A great amount of freight is moving and train crews reported a heavy month. Teamsters were extra busy, and were working early and late.

*Unskilled labour.*—This class was in demand, the large amount of civic work now under way requiring a large number of men.

#### ST. THOMAS, ONT., AND DISTRICT.

*J. A. Killingsworth, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were well employed during June and the outlook for the balance of the season was very favourable. The building trades were very active with good skilled labour in demand, though there have been no large contracts let this season. There was great demand for houses and rents were high. There have been many changes in property titles since the beginning of the year.

A by-law will be submitted to the rate-payers of this city on July 1st; asking their endorsement of a bonus of \$50,000 for the establishment of car works. In addition, the company which proposes establishing the works, asks for a fixed rate of taxation of \$2,000 and

exemption from general taxation for all sums of over and above \$2,000 for the term of ten years, with other minor considerations. It is the intention of the company to purchase sufficient land within the limits of the City for the erection of a plant at a cost of not less than \$50,000 and to install machinery at a cost of not less than \$70,000. The said works to employ a daily average of not less than 150 men for the term of 15 years from the commencement of operation and to have the works in actual operation by the 1st day of January, A. D. 1908, or within such extension of time as may be granted by the City Council. It is proposed to issue debentures to cover the amount of bonus.

Business men report the month a good average. The Gents' Furnishing stores will close at 7 o'clock p. m. during the month of July and August. At a recent meeting of a Committee of the Locomotive Engineers and Firemen employed by the Michigan Central Railway, and the Officials of that road at Detroit, it was announced that commencing July 1st a new schedule of wages would go into effect on the Canada Division. The result of the schedule will mean an increase of wages for the engineers from \$7.50 to \$15.00 per month. The increase to firemen is in like proportion.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy with the hay crop. At the commencement of the season, it was thought that the cold weather would have a disastrous effect upon crops. However, the continued fine weather of the past few weeks has revived the crops, and reports from the districts are not unfavourable. It is said that the supply of fruit will be good.

*Manufacturing.*—The favourable conditions prevailing among local industries continued unchanged. All hands were well employed. In some instances, particularly in the Canadian Iron Foundry, men were obliged to work overtime in order to supply the demand.

*Transport.*—Railway crews on freight trains had a fairly good month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons found conditions better than last month. There seemed to be plenty of work for all. Carpenters and joiners, labourers and plasterers were well employed. Painters were busy. Plumbers found it difficult to supply the demands made upon them.

*Metal.*—Iron molders, machinists, blacksmiths had a busy month.

*Woodworking.*—Upholstering has slackened off somewhat, although the upholsterers in the City were kept fairly well employed. Woodworkers had a fair month.

*Printing.*—Printers and pressmen had a busy month.

*Clothing.*—Tailors had a fair month.

*Fruit and tobacco preparation.*—Bakers, confectioners, cigar makers and tobacco workers were well employed.

*Unskilled labour.*—This class was well employed. There need be no idle men who are really desirous of finding work.

#### CHATHAM, ONT., AND DISTRICT.

*Mr. Alex. Gregory, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The month of June has been an exceedingly busy one for all branches of trade, especially building, and the season although late in starting will, no doubt, be fully up to that of 1906. The indications are that the number of building permits will exceed that of last year and will include some of the finest buildings that have been erected in many years. On the 5th of June the by-law to loan the Wolverine Brass Works of Grand Rapids \$20 000 was carried, and work on the building will be commenced as soon as the company selects the site. The Chatham Auto Company has so far had a very successful year and has turned out eight cars. The Kent Canning Company will commence operations on July 2nd on strawberries. From present indications the crop will be good, and it is ex-

pected that work will be given to a large number of women and girls for two or three weeks.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy with corn and sugar beets though unable to secure labourers in the sugar beet fields. The Mount Clemas Company is advertising for fifty men and boys to work in the fields. Wages are \$1.00 to \$2.00 per day. Many English immigrants are arriving, but they are principally for the large cities.

*Railroad construction and employment.*—The C. W. & L. E. Electric R. R. Co. has a large number of men and teams engaged grading the roadbed south of the G.T.R., and expects to have the line completed to the lake by the 1st of September.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and stonemasons, have been very busy. Carpenters and joiners have been very busy, and there is a good demand for good mechanics. Plumbers were busy owing largely to the order of the water commissioners that all users on the lawn use meters. Painters and paper hangers had an exceedingly good month.

*Metal, engineering and shipbuilding.*—Moulders and Electrical workers were only fairly well employed. Steam engineers had steady employment. There was a large number of blacksmiths employed in the different machine shops.

*Woodworking and furnishing.* Carriage and wagon makers were very busy, and reported prospects good.

*Printing and allied.*—Printers were reported very busy, with good men scarce. Pressmen had steady employment. Bookbinders reported a fair month.

*Clothing.*—Journeymen tailors and garment workers reported June one of the best months.

*Food and Tobacco preparation.*—Bakers had steady employment at good wages, and butchers were busy.

*Leather.*—Harness makers were fairly busy.

*Transport.*—Steamboatmen were all busy. Carters and draymen were steadily employed on corporation work.

*Unskilled.*—There was not enough unskilled labour to supply the demand, owing to Electric Railway construction, street paving and corporation work.

#### WINDSOR, ONT., AND DISTRICT.

*Mr. D. Mitchell, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

All branches of industry remained active during June, with every factory in the City running full time, and a few working overtime. All classes of labour found steady employment, and skilled workmen were in demand. The S. W. and A. Street Railway Company is building a power house to provide the power required by the operation of the Windsor and Tecumseh line. Wholesale and retail merchants reported trade very good. There was no unrest in the labour market.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were fairly well employed, with bright prospects for the future.

*Metal, engineering and shipbuilding.*—The iron industry was very active, with skilled workmen and labourers in demand.

*Woodworking.*—Planing mills were very busy, and upholsterers and carriage makers fully employed.

*Printing.*—Printers and pressmen were steadily employed throughout the month.

*Clothing.*—Journeymen tailors had a busy month, as had garment workers, some of the latter being in demand.

*Food and tobacco preparation.*—Bakers, butchers and ice handlers had a busy month. Cigar makers and tobacco workers were fully employed.

*Miscellaneous.*—Barbers reported a busy month. Clerks, stenographers and delivery employees were all fully employed and there was demand for help in hotels and laundries.

*Transport.*—Railway and steamboat employees were very busy, and teamsters and expressmen fully employed.

*Unskilled.*—This class was well employed.

#### DISTRICT NOTES.

*Walkerville.*—The Ontario Structural Steel Company will erect a plant in Walkerville and employ over 500 workmen. The Company has applied for a charter.

#### SAULT STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

General conditions were much the same as in May, factories working full time with orders well ahead. The supply of, and demand for, labour was well balanced. Commercial activity was normal, showing a slight improvement compared with May, though money continued very tight. There were no changes in rates of wages or hours of labour and no unrest in the labour market. A new company closely connected with the Lake Superior Corporation has been formed with a capital of \$4,000,000 to construct a blast furnace, making three in all. This will enable the Algoma Steel Company to smelt all the iron required for its steel plant; at present it is compelled to purchase pig iron at outside points. One of the blast furnaces that had been closed down for some weeks for relining was blown in again. It is expected that the Sault Ste. Marie Pulp and Paper Company's mill, which was gutted by fire a couple of months ago, will be ready for operation by July 15. A number of improvements have been made and it is expected the output will be materially increased. A technical school is to be established in connection with the high school here; the Ontario government has granted \$5,000 for this purpose. Considerable work is being done on pave-

ments, sewers, etc. According to statistics recently published by the Census Bureau of the Dominion Government relative to the value of manufactured products in the leading cities and towns of Canada, only one town in Canada exceeds Sault Ste. Marie in value of production per head.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Weather conditions were very favourable.

*Lumbering.*—Forest fires did considerable damage during the month.

*Mining.*—A number of prospects are being worked. Several new mining companies have been formed, but it is hard to determine the value of the different properties until a smelter is started in this vicinity. The Lake Superior Corporation has stated that it will have its smelter ready by October 1.

##### CONDITION OF PARTICULAR TRADES.

In the skilled trades, normal conditions prevailed.

#### WINNIPEG, MAN., AND DISTRICT.

*Mr. J. Appleton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Excellent weather conditions caused a keen demand for labour during June. Some hesitation on the part of employers was evident during May largely as a result of the cold weather, which threw the crop season late. Growth was fully two weeks behind the average, and the fear of a crop failure had a depressing effect. In the beginning of June, however, excellent growing weather prevailed. This established confidence in the future and a more pressing demand for labour of all kinds was felt.

Over 150 workmen are being employed on the construction of the St. Andrews Rapids Locks, situated a few miles North of Winnipeg. In the lock pit, 100 feet have been excavated to the proper depth

and a large gang of men are putting in the concrete. Another gang is engaged taking out the last ledge of rock at the north-end pit. Nearly a thousand cords of stone have been placed on the east side of the river as a dam. In the main stream several sections of the coffer dam have been put down, but the work on the main dam will not be completed until next season.

Contracts have been let for the construction of the new shops for the Canadian Northern Railway Company, and the large additions to those of the Canadian Pacific Railway Company are being proceeded with as fast as material can be procured. Progress is being made on the construction of a tramway from Winnipeg river at Lac du Bonnet to Point du Bois where it is proposed by the City to install a hydro-electric power plant. The City Council has taken steps to procure the necessary material.

All trades were busy; and have felt the effects of the more hopeful feeling regarding the crop. Commercial conditions have improved, as a result of the freer movement of 1906 wheat. Already more wheat has passed inspection at the present time than for the whole of the crop season of the previous year. The money stringency has had a steady effect upon trade; on the whole payments in the province have been fairly satisfactory. Retail trade has been exceptionally active, and the wholesalers all express themselves as well satisfied with the amount of business offering.

The labour market, especially in the building trades, remains unsettled. Bricklayers have demanded an advance of five cents per hour. At present their minimum rate is 55 cents. Employers do not object to pay the advance, providing the bricklayers will concede to the employers the privilege of selecting their foreman from either the ranks of union or non-union men. The bricklayers also desire a half-day holiday on Saturdays during the months of July and August or fifty hours per week during those two months, and fifty-four for the balance of the season.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Seeding being over and hay not ready to cut has given the farmers a chance to haul the wheat they had on hand. Receipts for the first three weeks of June were 4,533 carloads as compared with 1,341 for the same weeks of last year. Very nearly 83,000,000 bushels of wheat of the 1906 crop have been accounted for, and it is estimated that nearly 10,000,000 bushels still remain in the hands of the farmers. The rains of June 23 and 24 have been very beneficial.

*Railroad construction and employment.* Competent men are being employed as fast as they present themselves on railroad construction work. The weather has been favourable for this class of work.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Toward the middle of June a very marked activity set in on residences. There is a dearth of good dwellings and rents are high. Permits for those are being issued in large number every day. A fourteen storey business block is projected. It will be the largest building in the City, and the cost it is said will approximate \$1,000,000. When the permit is taken out it will bring up the total number of permits issued approximately to the total of last year, at the corresponding period.

*Metal, engineering and shipbuilding.*—The iron trades were busy and orders continue to come in. Generally the supply of labour was sufficient, but many managers say they can always find room for a good man. A new brass foundry which started business in April last has now forty hands employed, and its superintendent says the firm is fully four weeks behind on orders. All the large foundries were busy on railroad work. The Canadian Pacific Railway Company's shops are employing two thousand men in its repair shops, and has great need of accommodation for more skilled workers. Smaller jobbing firms were finding business very satisfactory.

*Woodworking and furnishing.*—Carriage builders are steadily increasing the volume of their output and find the market for home product increasing. In all lines of woodwork there has been a like activity. The trade is not purely local, but extends over the whole of Western Canada.

*Printing.*—Early in June, many of the printing houses experienced a slackness of trade. Later in the month, however, a very considerable improvement took place. A large number of machine operators have left Winnipeg to accept positions in towns in Alberta, Saskatchewan, and British Columbia. This movement has caused a shortage in Winnipeg. Photo engravers were busy.

*Food and tobacco preparation.*—Biscuit factories, now employing nearly four hundred hands, reported trade active, and special activity was noticeable in the baking trade. This was due to the large floating population in Winnipeg, at the present period of the year. Cigar factories, although experiencing no difficulty in meeting all demands, found that they had to increase their output.

*Leather.*—There was a demand for certain classed of skilled labour.

*Miscellaneous.*—Laundry workers were in demand more particularly those with experience.

*Transport.*—Deliverymen familiar with the City were in demand at good wages.

## BRANDON, MAN., AND DISTRICT.

*Mr. S. P. Stringer, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Favourable weather conditions during the latter half of May and the first two weeks of June made business conditions very satisfactory. The building trades were busy, although bricklayers were somewhat inconvenienced for lack of material. A large number of permits have been issued, and the outlook for a busy season is very promising. The value of permits issued during April

totalled \$117,250. The total value of the permits issued for the corresponding month of last year was \$121,750, a decrease for April, 1907, of \$4,500, mainly attributable to the backwardness of the spring. Tenders are being asked for for the erection of the Brandon armoury building, which will be about 75x130 feet. The work of construction will be commenced this year and finished as early as possible next year. Negotiations are under way for the building of a new court house and jail. Very little work has been done by the City on local improvement. It was decided to proceed with the construction of granolithic sidewalks and sewers, and to put cement pier for the new bridge to be erected over the river and the Canadian Pacific railway tracks. Work to the value of \$60,000 was passed by the committee of the City Council. A heavy business has been done by the railway companies handling farming implements and machinery. Several cars containing plows, engines, separators, etc., arrived in this city from Stillwater, Minn. Wholesale and retail trade was good. There were no changes in rates of wages and no unrest in the labour market.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The weather conditions for the past few weeks have been favourable, there being both moisture and heat sufficient to produce vigorous growth. Though seeding was delayed, the conditions since the wheat was sown have been such that the outlook is even more encouraging than at this date a year ago. From all districts come reports that the grain crop is growing very rapidly, and with continued favourable conditions, a bumper crop will be realized. The Manitoba Agricultural College has arranged for a special train for the purpose of giving demonstrations in butter making, milk testing, the operation of cream separating, etc., at different points throughout the Province. Lectures will be given on such subjects as will benefit the work of farmers and dairymen.

*Lumbering.*—Hanbury and Company, lumber dealers, of Brandon, have announced a cut in prices.

*Manufacturing.*—Flour mills and sash and door factories were doing a good business.

*Railroad construction and employment.*—The Canadian Northern Railway Company's track laying gang is making rapid progress on the Brandon and Regina line, and should reach the Manitoba boundary on July 15. It is likely that the Canadian Northern railway will have an all steel connection laid between Brandon and Regina before next winter. Construction work on the western section of the Grand Trunk Pacific railway was being pushed rapidly forward from Portage La Prairie and Saskatoon, large numbers of men being employed at both points. Ties for the line are being purchased in Ontario, British Columbia and the timber country around Prince Albert. To date, 1,500 carloads of cedar ties have reached Port Arthur and Fort William. All available men are being given employment. The Canadian Pacific Railway Company is also doing considerable work in railway construction and improvements.

*Other industries.*—The construction of a gas plant has been commenced.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All were busy, with the exception of some bricklayers, who were quiet for lack of material.

*Metal.*—Iron moulders, iron workers and helpers, machinists and engineers, blacksmiths, boilermakers and sheet metal workers were active, but jewellers were somewhat quiet.

*Woodworking and furnishing.*—Woodworkers, upholsterers and pattern makers were active.

*Printing.*—Trade with printers and pressmen was active.

*Clothing.*—Journymen tailors, garment workers, boot and shoe workers were busily employed.

*Food and tobacco preparation.*—Bakers, confectioners, butchers, meat cutters, cigar makers, tobacco workers and ice-handlers were active.

*Leather.*—Tanners, curriers and leather workers were somewhat quiet.

*Miscellaneous.*—Barbers, clerks and

stenographers, delivery and laundry employees were active.

*Transport.*—Employees in all branches were active.

*Unskilled labour.*—The supply was equal to the demand.

#### DISTRICT NOTES.

*Portage la Prairie.*—Building has been very active. The estimated amount to be expended in the building of stores, hotels and residences, is \$500,000. It is thought that there will be no difficulty in procuring the necessary labour or material. Common labourers are commanding 20c. an hour.

*Yorkton.*—Building material is very scarce and orders cannot be filled. A brick block is being built, and the Provincial Government is building a new land titles office.

*Prince Albert.*—About \$1,300,000 will be spent in building this year. A public school, a business block, stores, residences, church, hotel and penitentiary are among the projected buildings. There is an abundance of lumber from local mills which employ about 2,000 workmen. Brick will be short until the middle of June, when the local yard expects to have its first supply ready.

#### MOOSEJAW, SASK., AND DISTRICT.

*Mr. J. R. D. Bastien, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was very busy during June, on civic improvements and railway construction. There was greater activity in all of the industries than in the previous month. Woodworking factories were working to their full capacity, and the wages paid were high. In transportation there was greater activity than at any previous time. The Canadian Pacific Railway Company inaugurated a fast passenger service between St. Paul and the East, and to the Western United States, by way of the "Soo" line. This traffic has increased the volume of business out of

Moosejaw and given increased employment to men in the railway service. There was little or no unrest in the labour market.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Though the season was one of the latest on record, there is every indication of a good crop, growth being more forward than last year. Farm labourers' wages ranged from \$25 to \$40 per month with board, about the same as last year. Female farm help was very scarce and commanded a high rate of wages.

*Railroad construction.*—There was great activity in railway construction, and contractors had difficulty in securing men. Wages range from \$1.75 to \$2.25 per day.

---

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were exceptionally active, with wages high. There were many large buildings under course of construction, the principal ones being a large addition to the Canadian Pacific Railway Company's roundhouse, several large residences, civic buildings, etc.

*Metal, engineering, etc.*—Machinists and engineers, blacksmiths, boilermakers, electrical workers and linemen were busy. Horseshoers and jewellers were busy.

*Woodworking and furnishing.*—Woodworkers were active, upholsterers busy, varnishers and polishers well employed, and carriage and wagon makers, and car builders very busy.

*Printing.*—Printers were busy. The "Morning News" started the publication of two daily newspapers, giving additional employment in the trade.

*Clothing.*—Garment workers were busy, and boot and shoe workers very active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters found business good.

*Leather.*—Active conditions prevailed.

*Miscellaneous.*—Conditions were active and in some cases very busy. Hotel and restaurants were busy, owing to the heavy passenger traffic.

*Transport.*—There were exceptionally well employed. Salary increases since April 1 have affected this class. The increased traffic brought promotion to many in the service.

*Unskilled.*—This class was well employed, at wages ranging from \$2.25 to \$2.50 per day.

#### CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brocklebank, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

During June the labour market was not as active as was expected, although labour has been better employed than during May. There are a number of men in the building trades unemployed, owing partly to lack of material and partly on account of the large number of settlers arriving from Europe. Most of those classed as unskilled have found employment. At present the supply of labour is greater than the demand, but it is expected that next month there will be sufficient employment for all.

The transportation companies have had a busy month, both in regard to passenger and freight traffic. Bank clearings for the month of June show a very substantial increase over the corresponding month of last year. The wholesale trade for the month has been one of the heaviest in the history of the City. Retailers have also experienced a very satisfactory month's business. A new labour paper has been started.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Agricultural conditions are very promising throughout the country, with every indication of a large crop. There was plenty of rain during the spring and the warm weather of the present month has caused rapid growth of vegetables, grass and grain.

*Manufacturing.*—All establishments were running full time and had plenty of orders to keep them busy for the rest of the season.

*Mining.* — The North-western Improvement Company has this month opened up mine No. 3, which is situated two miles north of Roslyn. This mine has been abandoned for several years, coal being taken out of it from No. 2, working at a great disadvantage and expense. The arrival of the necessary machinery is being awaited. The Company expects to mine several thousand tons of coal before the supply is exhausted. Development by the same Company is being pushed rapidly at No. 7 mine, which the Company expects to open in a couple of months. These two mines will greatly increase the supply now furnished by the Northwestern Improvement Company. Messrs. Patrick and McKay are now operating their mine, located above the Northwestern Improvement Company's mine No. 3, but lacking trackage facilities, will operate only on a small scale for the present. The Roslyn Fuel Company is busily engaged with the development of its property, which is situated a short distance above the property of Patrick and McKay, and expects to have its mine in operation by the end of the year. A number of men employed digging a well in the southwestern portion of the City discovered coal at a depth of 40 or 50 feet. Two well-developed seams were discovered over 12 inches wide, while the other was 10 inches wide. A test was made of the coal and it burned well. It is a semi-bituminous coal. About a dozen sacks were taken out of the well. The great source of supply for domestic coal is the mines located in the Lethbridge district, which did not lose an hour during the recent trouble, and which are still raising thousands of tons daily. The new mines, such as the Diamond, Reliance, Taber and others were pushing development work energetically, and will add a huge tonnage to the daily output by next fall.

#### HOUSE FAMINE.

The house famine in Calgary has become very serious. Scores of citizens have been compelled to keep their families in the East because residences are not to be had here, although a large

number of houses are being built all over the City. The population of Calgary has increased very rapidly during the last few years.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and stone-masons were active, and carpenters, joiners, lathers and plasterers, painters and decorators, paperhangers, plumbers and gas fitters busy. Stonecutters found conditions of employment rather dull, but builders labourers were active.

*Metal, engineering and shipbuilding.*—Machinists and engineers, steam engineers, electrical workers and linemen were busy, also blacksmiths, boiler-makers, sheet metal workers, bicycle workers, horseshoers and jewellers.

*Woodworking and furnishing.*—Woodworkers, carriage and wagon makers and car builders were busy.

*Printing.*—Printers, pressmen, electrotypers and book-binders were busy.

*Clothing.*—Journeymen tailors, garment workers boot and shoe workers were busy.

*Leather.*—Saddlers and leather workers were busily engaged.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and theatre employees were active, and laundry workers busy.

*Transport.*—Railway train crews, telegraphers, switchmen, trackmen and freight-handlers were busy. Cabmen, hackmen, teamsters and draymen were also busy.

*Unskilled labour.*—Active conditions prevailed.

#### EDMONTON, ALTA. AND DISTRICT.

*Mr. J. A. Kinney, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

An increased number of mechanics and labourers found employment during June. More building was under way than in any previous month, but the demand for both skilled and unskilled labour was

about equal to the supply. The paving and improvement of the public streets is being rapidly carried on. On May 27, by-laws were approved by the ratepayers for the following: \$26,000 for a new power-house; \$120,000 for an extension of electric light and power system; \$22,000 to purchase a scavenging equipment; \$41,000 to cover cost of erecting and equipping two fire halls; \$27,000 for local improvements; \$10,000 for completion of new Isolation hospital, making a total expenditure of \$246,000.

On June 3 a by-law was also passed granting to the International Heating and Lighting Company, Limited, a franchise for supplying artificial gas to the City. The Company will expend \$300,000 and employ about 200 workmen in the installation of the plant. On the same date, a by-law was endorsed authorizing the expenditure of \$50,000 for a new hospital. The Provincial Government is calling for tenders for the excavation and foundation of the new Parliament buildings. Wholesale and retail trade was good, and the labour market quiet.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Although seeding was from two to four weeks later this spring than for many years, the splendid weather has forced all crops along at a rapid rate, and at the present time the prospects for a large yield are excellent. Reports from all sections of the Canadian Pacific and Canadian Northern railways show that warm weather was prevailing and prospects for a good harvest very bright.

*Lumbering.*—The greatest disaster ever experienced by the lumbermen of this City occurred on the 15th instant, when by a sudden rise and flood of the Saskatchewan river, about two-thirds of the entire winter cut of logs and several large rafts of lumber were swept away. The river rose some ten feet in a few hours and carried away logs that were piled on its banks. This with breaking away of the rafts caused the booms to break. The estimated loss of lumber is about six million feet. About 200 men will be thrown out of employment. The

loss will have the effect of increasing the cost of building.

*Railroad construction and employment.* The work of laying the street car line is progressing rapidly, and a large number of men are being employed. The Bithulithic and Contracting Company has the contract, and about \$10,000, so far, has been expended for labour. A hundred and fifty thousand dollar power-house will be erected in connection with the new street railway.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, on account of the shortage of brick, were not employed fully. Carpenters were busy, but a large number coming in here caused the supply to more than equal the demand. Lathers and plasterers were busy, also painters and paper-hangers. Plumbers and steamfitters reported the supply exceeding the demand; the same conditions apply to builders' labourers. Building permits for the month amounted to in value \$250,000.

*Metal, engineering and shipbuilding.*—Electrical workers and linemen were busy; this condition also applied to sheet metal workers, blacksmiths and horseshoers.

*Printing.*—Printers and pressmen were busy.

*Clothing.*—Busy conditions prevailed with journeymen tailors.

*Food and tobacco preparation.*—Bakers, confectioners and cigar makers were busy, the former reporting trade good.

*Miscellaneous.*—Busy conditions prevailed.

*Unskilled labour.*—This class was busily employed, but the supply was equal to the demand.

#### NELSON, B. C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during June was active, the de-

mand being greater than the supply throughout the Kootenay district, and a considerable number of the mines working short-handed. The increased wages paid in the Boundary district and in Butte, Mont., attracted considerable numbers of mine workers, and the operators of the Rossland mines volunteered an increase in wages, effective July 1, 1907, as follows: Machine men, from \$3.50 to 4.00 per day; muckers, from \$3.00 to \$3.25 per day, and blacksmiths' helpers, from \$3.25 to \$3.50 per day, while on May 1, 1907, muckers and blacksmiths' helpers, at the request of Miners' Union, were granted an increase of 25 cents per day. The "Krao" mine in Ainsworth camp has been unwatered, and development on the 200 foot level has disclosed eight feet of very rich ore, being a sulphic, laced and cemented together by coarse wire silver.

On Saturday, June 6, 1907, the retail stores of Nelson closed for the afternoon, this being the first weekly half-holiday granted to the clerks of the retail stores this season. The half-day holiday will be observed during June, July and August.

## NEW WESTMINSTER, B.C., AND DISTRICT.

*Mr. P. J. Stewart, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during June was active, with no change in the supply reported; although a much larger number of men are being employed in the city at present than at any time in its history. Many new industries have been added during the past year, and more are under way. A large number of labourers find active employment in building sewers etc. The new wooden pipe works company was busy. The City Council has given permission to two electric railways to enter the city. A large meeting of the citizens was held during the month, when resolutions were passed and forwarded to the Dominion Government requesting it to provide means for deepening the

channel of the Fraser river from this city to its mouth. The steamer "Woodford" cleared from this port on the 19th inst., with a cargo of 2,272,123 feet of lumber. The new Dominion Government snag boat, for use on the Skeena and Stikeen rivers, is having its machinery installed and will be ready for use in a short time. The freight and passenger rates between this city and Chilliwack will be increased in the near future. A fire which occurred during the month destroyed the offices and store of the Brunnette Sawmill Company, entailing a loss of about \$10,000. The Company has already commenced the rebuilding of its plant. The construction of an addition to the Central school in this city has been started; the want of sufficient school accommodation has greatly increased during the past year. The receipts of the local land registry for the month of May show an increase over the corresponding month of last year of 97.07 per cent.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—This industry was active. The hay crop this year is excellent, and cutting will soon be under way. A fairly good crop of strawberries is being harvested, and the demand is fully equal to the supply. The price realized is from \$2.25 to \$3.00 per crate of 24 boxes, or 2 boxes for 25c retail. Good farming land was in demand, and many sales were being made, especially to parties from Saskatchewan and Alberta.

*Fishing.*—The fishing industry was fairly active. Spring salmon were running in fairly good numbers, and a ready market was found for all the fishermen could produce. Many fishermen were preparing their gear for the sockeye fishing, which commences on the first of July. A larger number of licenses have been issued this year than at the corresponding date last year. The price for this season has not yet been decided upon. On Rivers Inlet the price this year will be 10 cents per fish; last year it was 8 cents.

*Lumbering.*—This industry was very active, the mills all working to their full capacity, and some working overtime in order to supply the demand. A num-

ber of logging camps have closed down owing to an over supply of logs; consequently the price of logs declined.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners and builders' labourers were active; lathers and plasterers, painters, decorators and plumbers were busy.

*Metal, engineering and shipbuilding.*—All were actively employed. Blacksmiths were busy.

*Woodworking and furnishing.*—Woodworkers and shingle weavers were active, and car builders (electric) busy.

*Printing.*—Printers and pressmen were active.

*Leather.*—Active conditions prevailed.

*Clothing.*—Journeymen tailors and garment workers found employment active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters were active.

*Miscellaneous.*—Barbers, clerks and stenographers and laundry employees were active.

*Transport.*—Street railway men, teamsters and expressmen were active, and steamboat men busy.

*Unskilled labour.*—Busy conditions prevailed.

that it intends to erect an oil refinery at a cost of \$225,000. Its capacity will be 1,000 barrels daily. The Company will commence operations within three months. A foundry and machine shop to manufacture logging engines and logging equipment will be opened shortly.

The local fruit growing agencies are paying attention to the market of the middle west, and have co-operated with the local Tourist Association in establishing fruit exhibits in Winnipeg, Brandon, Regina and Moosejaw at the approaching exhibitions. At the next convention of the fruit growers of the Province, the problem of conducting an organized propaganda will be considered.

British Columbia lumber exported will have a great market in New Zealand before long; already several mills have received large orders. Advices from there state that the Kauri timber, which has been competing to a certain extent with the timber from British Columbia, is now to some extent superseded by lumber from this Province.

Some seventy-five moulders went on strike on the 24th instant for a reduction of working hours from nine to eight, and an increase in wages from \$3.75 for nine hours to \$4.00 for eight. About twenty-five moulders at Victoria and New Westminster did likewise.

#### DISTRICT NOTES.

*Barkley Sound.*—The Dominion Government has gangs of workingmen employed building a new fish hatchery. It is also building one at Clayoquet Sound.

#### VANCOUVER, B. C., AND DISTRICT.

*Mr. George Bartley, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was exceptionally well employed during June. Bricklayers, however, reported a number of their craft out of work, through shortage of brick. The British American Oil Refiners' Company, Limited, has announced

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Conditions of employment in these trades were active. Builders' labourers were well employed.

*Metal, engineering and shipbuilding.*—Active conditions of employment prevailed.

*Woodworking and furnishing.*—Woodworkers, wagon makers and shingle weavers were well employed.

*Printing.*—The printing offices reported trade good, and men all employed.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers were busy.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters were busy. Butchers and meat cutters observe Wednesday as a half-holiday. Cigar makers reported trade fair.

*Leather.*—Tanners and curriers, as well as workers on horse goods, were active.

*Miscellaneous.*—Clerks, stenographers, delivery employees and laundry workers, likewise hotel and restaurant employees, were busy. The scale of wages of the Cooks', Waiters and Waitresses' Union, as adopted, and which prevails in Vancouver, is as follows:—

RESTAURANT WAITERS' SCALE.

Full shift of 10 hours per day.....	\$ 12 00	per week
Straight shift of 12 hours per day....	14 00	"
Eight hours per day.....	10 00	"
Six hours per day.....	8 00	"
Five hours per day.....	7.00	"
Three hours per day (holidays).....		
1 hour, 50 c.; 2 hours, 75c.; and more than 2 hours, 35 cents per hour.		
Three hours per day.....	5.00	"
Hotel Work—For men, with room,.....	\$35.00	per month
Hotel Work—Without room.....	40.00	"

COFFEE HOUSES.

Full shift of 10 hours per day.....	\$ 10.00	per week
Straight shift of 12-hours per day....	12.00	"
General Banquets, \$3.00 per night, Full Dress, \$5.00 per night.		

GIRLS' SCALE.

10 hours shall constitute a day's work, 7 days per week.....	\$ 9.50
8 hours for 7 days per week.....	7.50
6 " " " ".....	6.50
5 " " " ".....	6.00
Less than 4 hours at 25c. per hour, and any overtime on above rates to be 25c. per hour.....	
Hotels, per month, with room.....	\$25.00
" " " " without room....	30.00
Extra day's work, for sister.....	1.75

FIRST-CLASS RESTAURANT COOKS' SCALE.

1st Cook (Chef).....	\$ 25.00	per week
2nd " or (Short Order Cook).....	18.00	"
3rd " or (Broiler Cook).....	15.00	"

SECOND-CLASS RESTAURANT.

Chef, \$18.00 per week; Second \$15.00 per week.

OYSTER HOUSES.

\$18.00 per week for all Cooks.

HOTELS.

1st Class—Chef.....	\$100.00	per month and room
1st Class—2nd Cook.....	75.00	" " "
2nd Class—1st Cook.....	75.00	" " "
2nd Class—2nd Cook.....	50.00	" " "

EXTRA WORK.

Cooks, \$1.00 per hour for holidays; ordinary days, 50c. per hour.  
 Waiters, holidays, \$3.50 per day.  
 Waitress, holidays, \$2.75 per day.

*Transport.*—Freight-handlers, steamboatmen, steamboat firemen, carters, draymen, teamsters and expressmen were

fairly well employed. Street railway men and the employees of the Canadian Pacific railway were very active.

*Unskilled.*—Though there were a number of workmen out of employment, yet the volume of work done and the number employed exceeded that of last month.

VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During June the labour market has been well supplied, and no complaints have been heard of scarcity of labour. The termination of the strike of the boiler-makers and iron shipbuilders and boiler-makers' helpers at the works of the B. C. Marine Railway Company, the Victoria Machinery Depot and the Marine Works on the 3rd of the month, enabled these establishments to put large forces of men on the work that had been accumulated during the strike. Many boilermakers are now working at the yards, having come from Seattle, where a strike was on during the early part of the month. Twenty-five of the Hindoos who arrived in this city a few months ago are now working at the cement works on the Saanich Arm, and the manager of this institution states that they are giving satisfaction. The following figures show the number of immigrants recently arriving at the port of Victoria:—

FOR CANADA.

	Chinese.	Japanese.	
Mardh.....	36	359	35
April.....	192	396	44
May.....	387	971	84
	615	1726	183

FOR THE UNITED STATES.

March.....	9	385	
April.....	186	492	
May.....	316	695	
	505	1522	

Total for Canada.....	2,504
Total for United States.....	2,037

The custom returns for the port of Victoria will show for June the greatest amount collected in Chinese head tax since the Chinese exclusion law was put in force. The amount up to June 24th was \$28,500, which represents 57 Chinese entering the port for this city. During December, 1903, just prior to the enforcement of the Act, the amount collected was \$123,705. During 1904 and 1905 no Chinese entered this port paying the head tax. During 1905 there was one in April, one in May, four in June, one in July, one in September, four in October and four in December. For the present year there were no entries in January; in February there were three, in March none in April 26, and in May none.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Strawberry culture has been active during the month, and good reports were received from the district regarding the crop.

*Fishing.*—Large catches of spring salmon have been made at the traps located on the shores of this Island. This class of salmon is put up in salted and smoked form for the German market. As soon as the run of sockeye salmon starts, which is expected very shortly, the canneries will be in full operation and will employ a large number of hands. It is expected that there will be a good run this season.

*Sealing.*—The Victoria sealing fleet in Behring Sea this season will number fifteen, most of which left during the early part of the month. Indian hunters are generally engaged.

*Whaling.*—Conditions are so encouraging that arrangements are being made for the establishment of further whaling stations on the coast. In connection with this industry, a barrel and glue factory are about to be established. These factories will give employment to about 100 men.

*Lumbering.*—At a meeting held in Vancouver on June 3rd of the B. C. Loggers' Association, it was decided to close down sixty-nine logging camps on this coast indefinitely. The shut down will take place on June 29th. It is claimed that this action is the result of the small

demand, high wages, and increased cost of supplies. It will throw out of employment two thousand men receiving salaries aggregating \$175,000 to \$200,000 per month. The camps will start again whenever the market warrants it. The setback of the logging business on the coast will be offset to some extent by the Redcliffe Lumber Co., of Duluth, which has acquired extensive timber areas on the Island, and intend building a large mill on the Albernie Canal.

*Mining.*—The Dominion Government recently provided for the inspection of the iron ore deposits of Vancouver Island, so that the outside world may obtain an idea of the mineral wealth of this section of British Columbia. The Tye Copper Company's mines at Mount Sicker are making a good showing, as also is the Richard III mine of the same locality. Great activity was also reported from Quatrins, at the north end of the Island. From the Queen Charlotte Islands also came favourable news of mining activity, a very large copper find having recently been made.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Business continued extremely active, particularly in the construction of residences, which are in great demand at the present time. All tradesmen found steady employment at high wages. A large apartment house is about to be constructed. The Merchants' Bank and Brackman and Kerr buildings are now underway, and the completion of the new C. P. R. hotel is being rushed so that this building may be opened in August.

*Metal, engineering and shipbuilding.*—Moulders were well employed. Machinists and engineers were also kept busy. There were no idle steam engineers in the city, and electrical workers and linemen have their hands full to keep up with the building going on. Boilermakers, iron shipbuilders and helpers were all working. The B. C. Marine Railway Company have many large orders on hand now, which ought to keep a large force at work for some time. At present they have the contract for repairing the steamer "Northwestern," which will cost

about \$40,000; the new hydrographic steamer for the Dominion government and two new steel steamers for the New England Fish Company. The Victoria Machinery Depot is building a new steel tug. With labour conditions undisturbed in this line, these establishments should keep a large number of men employed constantly. Shipwrights and caulkers will find employment for some time at the yard of Wm. Turpel on two new hopper barges about to be constructed for the Dominion Government, at a cost of about \$35,000.

*Woodworking and furnishing.*—Work in the local furniture factories has been exceptionally brisk, necessitating the bringing of cabinet makers and upholsterers from Eastern Canada. Pattern makers and coopers have also found plenty of work. Shingle weavers were well employed, owing to the building activity.

*Printing and allied.*—The printing business in the city is better than for many years past, and operators and job printers have been in demand. The amount of business done at the Government printing office here has increased to such an extent that another press will be installed. The stereotypers have formed a new union here, Bookbinders have all been kept busy, as have photo engravers.

*Clothing.*—Journeymen tailors still found work plentiful, with prospects favourable.

*Food and tobacco.*—Bakers, butchers and meat cutters were actively employed. Cigar makers, to the number of fifty, found plenty of work, making good wages on piece scales.

*Miscellaneous.*—The price of haircutting has been raised to 35c., and barbers have been constantly employed. Clerks, stenographers and delivery employees were all busy. Hotel and restaurant help found trade extremely brisk, with a bright outlook. Theatre employees were very busy.

*Transport.*—All were very busy, and this condition is likely to continue for some time.

*Unskilled labour.*—The extension of the Gas Company's plans, for the laying of five miles of pipes in the city, as well

as the amount of street improvement going on, will keep unskilled labour engaged for many months to come.

## NANAIMO, B. C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent.*  
reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

There has been no change in the labour market from last month, the demand being greatly in excess of the supply in most of the industries, more especially in the coal and lumber trades, which are the principal ones in this part of the Island. Farmers are also looking for help for the harvest. There was unprecedented activity in the coal trade. Wholesale and retail merchants reported business very good. There have been no changes in hours for labour or rates of wages.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Haying has commenced among the farmers.

*Fishing.*—There was little activity among fishermen. Those interested in the whale fishing station on the west coast of the Island are preparing another station in the Gulf of Georgia, near Nanaimo, for continuing their operations during the winter in sheltered water, it being stormy during part of the winter on the west coast. They also propose building a barrel factory, as at present they have to procure their barrels in the east.

*Lumbering.*—The sawmills were working steadily. The local sawmill has not lost as much time as was expected. The new machinery is being installed rapidly. The present output is about 70,000 feet per day. The Company expects to largely increase this in the near future. The lumber camps were working steadily up to the third week of the month, and the local Company expects to continue work.

*Building.*—Bricklayers and masons reported not much work on hand. Car-

penters and joiners were more active than during the past month, though there are not many new buildings going up. Plumbers were active. There was not much demand for builders' labourers.

*Metal.*—Blacksmiths and carriage makers reported work active.

*Printing.*—Printers had a very good month.

*Transport.*—Teamsters and expressmen had all the work they could handle.

*Unskilled labour* has been in demand all month, especially in the coal trade and among farmers.

#### INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JUNE.

TWO applications for the appointment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, were received during the month of June, being respectively as follows:—

##### New Applications.

On behalf of the W. A. Marsh Company Ltd., boot and shoe manufacturers, Quebec, with reference to a dispute with certain of its employees.

On behalf of the Grand Trunk Railway Company, Canada, with reference to a dispute with the locomotive engineers employed upon its system. No proceedings had taken place in connection with either of these applications prior to the close of the month of June.

##### Boards Previously Appointed.

Eight applications for Boards had been received prior to the beginning of June, of which there remained not finally disposed of at the end of the month of May the following, viz, the application on behalf of the employees of Cumberland Railway & Coal Company, Limited, of Springhill, N.S., from Pioneer Lodge, No. 1, Provincial Workmen's Association; the application on behalf of the Longshoremen of Montreal, from Local Union 373 of the International Longshoremen Marine and Transport Workers' Associa-

tion; the application on behalf of the coal miners employees of the Alberta Railway & Irrigation Company of Lethbridge, Alta., from District Union No. 18, United Mine Workers of America; and the application on behalf of steamship agents and companies doing business at Halifax, N.S. In the case of the application from the Lethbridge miners, although the proceedings in connection therewith had not actually closed at the end of May, the conclusion followed so quickly on the close of the month that a full report of the settlement affected was printed in the June issue of the *Labour Gazette*; the text of the agreement reached is published in the present issue of the *Gazette*.(\*) The settlement reached in the case of the Halifax Longshoremen, though not effected until early in June was also briefly indicated in the *Labour Gazette* for June. A fuller report, however, appears in the present issue.

In the case of the application from the longshoremen of Montreal, the Board of Conciliation and Investigation appointed under the Act proceeded to an investigation and made its report to the Minister of Labour during the month.

A summary of such proceedings as occurred during the month of June in connection with the various applications is contained in the following articles:—

\* See "Recent Industrial Agreements."

#### I.—REFERENCE OF DISPUTE BETWEEN LONGSHOREMEN AND STEAMSHIP COMPANIES AT HALIFAX, N.S.

AS intimated above, the result of the settlement of the dispute between the longshoremen and steamship companies at Halifax, N.S., was briefly indicated in

the *Labour Gazette* of June. A fuller account of the settlement and of the efforts of the Department in procuring the same is contained in the report to the Deputy

Minister of Mr. Victor DuBreuil, the official of the Department who was instrumental in effecting the settlement. In consequence of press reports appearing on May 23, stating that the longshoremens of Halifax threatened to strike on account of a dispute with the steamship companies with regard to wages, Mr DuBreuil had been despatched by the Minister to Halifax with instructions to confer at once with the leaders of the men and to explain to them the scope and object of the legislation recently enacted and its bearing on the dispute in question. Mr. DuBreuil's report is as follows:—

REPORT TO THE DEPUTY MINISTER OF LABOUR ON THE DISPUTE BETWEEN THE LONGSHOREMEN AND STEAMSHIP COMPANIES AT HALIFAX.

OTTAWA, June 8, 1907.

W. L. MACKENZIE KING, Esq.,  
Deputy Minister of Labour.

Sir:

I have the honour to submit, herewith, a report of the proceedings connected with the settlement of the above mentioned dispute. In compliance with your instructions of May 23, I left Ottawa on Friday, May 24, at 8-30 a. m., arriving at Halifax on the evening of May 25. I communicated at once with Mr. James Martin, the representative of the longshoremens at Halifax and explained to him the desire of the Department of Labour that the difficulty alleged in the press to be in existence between the steamship companies and the longshoremens should be referred under the Industrial Disputes Investigation Act, 1907, to a Board of Conciliation and Investigation so that the risk of disturbance of the industry affected might be avoided so far as was possible. Mr. Martin informed me that a mass meeting of the longshoremens was called for 2:30 p. m. on Sunday, May 26, at which I would be given an opportunity to explain fully the nature of the Industrial Disputes Investigation Act, 1907, and would also be furnished with details relating to the grievances of the men and the precise nature of the demands they had made on the shipping companies. A mass meeting of the men was accordingly held on May 26, at which I spoke in explanation of the Industrial Disputes Investigation Act, 1907, showed the bearing of the Act on the dispute and urged that the men should apply to the Minister of Labour for a Board of Conciliation and Investigation to which the dispute might be referred. Several prominent labour leaders of the city also urged the men to take this course. The men asserted that they had known nothing until that moment as to the existence of any act under which the dispute could be referred, that matters had now gone too far to change the intended course of action, and after a long debate, the men resolved to cease work at midnight and appointed a committee to watch the interests of the men during the suspension of work, James Martin being elected President, and Michael Coolen, Secretary.

The nature of the grievances was stated to be as follows: On May 15 and May 17 respectively, written applications had been sent to the several shipping agents of Halifax, setting forth a demand on the part of the longshoremens for an increase of wages from the existing rate of 20 cents per hour for day work, and 25 cents per hour for night work, to 25 cents per hour for day work

and 30 cents per hour for night work, together with double time for Sundays and for Labour Day and Christmas day, time to start from 6 o'clock on the preceding evening; an answer was requested by May 27, and it was intimated that in the event of no answer being received or of the demand not being complied with the men would consider the question of ceasing work. The scale of wages under which the men had been working was based on an agreement made in 1902, and signed by both parties to the present dispute. No answer to the applications had been received up to May 26.

On Monday, May 27, at a meeting of the steamship owners and agents, I was requested and consented to act as mediator during the dispute, and the following resolution having been passed, I was invited to submit the offer contained therein to the meeting of the men that evening.

HALIFAX, N. S., May 27, 1907.

At a meeting of the steamship owners and agents, at the office of Pickford and Black, held the 27th day of May, 1907, at which the following were present:—

Mr. James Morrow representing Allan Line.  
J. E. deWolfe representing C. P. R. C.  
W. H. Piers representing Furness Withy & Co.  
Capt. Harrison representing Furness Withy & Co.  
J. L. Chipman representing Plant Line.  
G. S. Campbell representing Red Cross Line.  
A. E. Jones representing Dominion Line.  
W. A. Black representing Pickford & Black.  
Geo. W. C. Hensley representing S. S. Co., Ltd.†

The following resolution was unanimously passed:—

RESOLVED: That the Longshoremens be granted an increase in wages of two and a half cents (2½c.) per hour, day or night, subject to all the conditions of the agreement made with them and signed the 11th day of April, 1902.

At 8 p. m. of May 27, the longshoremens re-assembled to consider the offer contained in the above resolution. The offer was refused and a resolution passed to submit a counter offer to the ship owners. This resolution which I was requested to present to the ship owners was as follows:—

HALIFAX, N. S., May 27, 1907.

At a meeting of longshoremens held on above date, it was decided that the following proposition be submitted to the steamship agents.

That 25 cents per hour be paid for day work; that 30 cents per hour be paid for night work; also that double time be paid for Sundays, Labour Day and Christmas Day.

In the original demand of the men they had asked that the double time in the case of Sundays, Christmas Day and Labour Day start from 6 p.m. the previous day; in the new demand no reference was made to the time from which the double pay should start.

On Monday, May 28, I attended a meeting of the steamship representatives, and informed those present of the refusal of the men to accept the offer of an increase of 2½ cents per hour. I further urged that the employing companies should agree on their part to refer the dispute to the Industrial Disputes Investigation Act, 1907, and should make application to the Minister of Labour for the establishment of a Board of Conciliation and Investigation. The steamship representatives agreed to this course, and at once wired the Department of Labour announcing their intention. Mr. James Hall was recommended by the companies as a member of the Board. I at once notified the President of the Longshoremens of the action of the steamship representatives, and urged that he should take similar action on behalf of the men. I attended a meeting of the men in the evening,

and explained the course taken by the shipping representatives, urging that the men should do the same.

On May 29, I succeeded in arranging a conference between the two parties for the purpose of discussing the propositions that had been respectively submitted. An amicable discussion took place, and the statement was made on behalf of both parties that had they known the nature of the Industrial Disputes Investigation Act, 1907, before the dispute began, the strike would have been averted; at the existing stage of the dispute, however, the men contended that to return to work might prejudice the chance of their demands being granted in full.

On May 30, at a meeting of the steamship representatives, Mr. A. G. Jones, agent for the Canada and Jamaica S. S. Co. was permitted to sign a year's agreement with the men, by which the demand for an increase of five cents per hour was conceded by the company named.

On May 31, after an interview with the steamship representatives, I was requested to offer the men 25 cents per hour for both day and night work; the men, however, refused this further offer. I continued, nevertheless, to exercise the good offices of the Department in connection with the dispute. During this time, two other steamship companies accepted the terms of the men. In the meantime, the men having failed to recommend the name of any person to act on the Board of Conciliation and Investigation for which application had been made and which the Minister had determined to establish, Mr. Philip Ring, Secretary of the Trades and Labour Council, was appointed by the Minister in accordance with the terms of the Act. Mr. James Hall, who had been appointed on the recommendation of the steamship representatives, and Mr. Ring proceeded to confer together with a view to agreeing on a name to recommend to the Minister for third member and chairman of the Board.

On June 4, I was requested by the shipping agents to attend a meeting of that body, and after considerable discussion at the meeting was informed that the companies which had hitherto refused to concede the demands of the men had now decided to grant their demands with a view to ending the dispute. The presence of several steamers tied up in the harbour was indicated as a reason for this determination. The Committee of longshoremen was invited to meet the representatives of the steamship companies with a view to signing an agreement based on the new terms, and the following agreement was duly signed on their behalf respectively:—

Agreement made this day between . . . . .  
on behalf of . . . . . Line of Steamers,  
and James Martin, President, and Michael Coolen,  
Secretary, of the Longshoremen's Association  
of Halifax.

Hereafter the rate of wages to be paid for work on steamers will be 25 cents per hour\* for day work, and 30 cents per hour for night work. Double time to be paid for work performed on Sundays, Christmas Day and Labour Day.

\*This agreement to be binding on both parties for one year from date.

The men accordingly returned to work on June 5. Seven steamship companies and about 500 men were effected by the strike.

I have the honour to be, Sir,

Your obedient servant,

(Signed) VICTOR DUBREUIL.

### Telegrams Relating to Settlement.

The following telegram relating to the settlement was received by the Minister of Labour from Messrs. Hall and Ring,

the gentlemen who had been appointed to the Board of Conciliation and Investigation, viz:—

HALIFAX, N. S., June 4, '07

TO HON. RODOLPHE LEMIEUX,  
Ottawa, Ont., Can.

Much pleasure advising strike has been settled through intervention of Mr. DuBreuil, therefore, do not consider appointment chairman and third person necessary. Forwarding report.

(Signed) JAMES HALL,  
PHILIP RING.

Subsequently letters were received also from the Secretary of the Halifax Longshoremen's Association and from the Mayor of Halifax, expressing appreciation of the efforts of the Department in procuring a settlement of the dispute. These letters were respectively as follows:

HALIFAX, N. S., June 10, '07.

HON. RODOLPHE LEMIEUX,  
Minister of Labour,  
Ottawa, Ont., Can.

Sir:

I have been instructed by the Halifax Longshoremen's Association to convey to you their thanks for the effective assistance rendered by your Department in the settlement of the late dispute with the shipping agents of this Port.

Your representative, Mr. DuBreuil, in acting as mediator brought both parties together in conference which resulted in the settlement of the dispute.

I have the honour to be,

Yours very respectfully,

(Signed) M. COOLEN,  
*Secretary.*

MAYOR'S OFFICE,  
HALIFAX, N. S., June 28, 1907.

HON. RODOLPHE LEMIEUX,  
Minister of Labour,  
Ottawa, Ont., Can.

Dear Sir:

I have to apologize for not sooner acknowledging the receipt of your telegram of the 26th ult. in regard to the strike of the Longshoremen at Halifax, owing to the telegram having been mislaid. I trust that it is not yet too late to thank you for your interest in the matter, and to congratulate you on the satisfaction which the Industrial Disputes Investigation Act of last session is giving.

The strike of the Longshoremen at this Port having been settled some time ago, I have nothing further to add to this letter.

Yours faithfully,

(Signed) R. T. MACILREITH,  
*Mayor.*

### Report from Board of Conciliation and Investigation.

The report of Messrs Hall and Ring who had been appointed members of the Board of Conciliation and Investigation was received at the Department on June 8. The report set forth that having been appointed to the Board by the Minister they had conferred together to mutually agree on a gentleman to act as third person and chairman of the Board and further stated:—

"While engaged as above, we were pleased to receive the information that an agreement had been reached

between the contending parties and we must congratulate your Department in having such a representative as Mr. DuBreuil who has been most indefatigable in his work and without his assistance, we feel that the whole question would have involved upon us a duty which would have been a heavy expense to your Department, and a very serious loss to the interest at stake.

Mr. DuBreuil showed us your telegram instructing us to endeavour to complete the Board, and proceed with the investigation but after conferring together again, we decided that such a course was not necessary, unless you desired to have the terms of the Act complied with. We, therefore, wired you that as the dispute had been settled through the intervention of Mr. DuBreuil that we did not consider the appointment of a third person for chairman necessary, and are pleased that you concur in our views."

The men resumed work immediately on the signing of the agreement.

### II.—FINDINGS OF THE BOARD APPOINTED IN CONNECTION WITH THE DISPUTE BETWEEN THE LONGSHOREMEN AND SHIPOWNERS OF MONTREAL.

THE receipt of an application at the Department on May 25 for a Board of Conciliation and Investigation to which might be referred the dispute between the longshoremen and shipowners of the Port of Montreal was reported in the *Labour Gazette* for June, when also the nature of the dispute as indicated in the application was stated. The application was signed by Messrs. John Ryan and William Mansfield, President and Secretary respectively of the International Longshoremen and Marine Transport Workers of America Local 373, and stated that the said Union represented 1200 men out of the total of 1600 longshoremen employed at the Port of Montreal. The dispute related to wages; the men asking for an increase of 5 cents per hour day and night on the then existing schedule of 25 cents per hour by day and 30 cents per hour by night. The Minister of Labour having decided to establish a Board the respective parties to the dispute recommended Mr Joseph Ainey, nominated on behalf of the men and Mr. G. W. Stephens on behalf of the steamship companies, for appointment to the Board, and these gentlemen were duly appointed to the Board by the Minister. Messrs. Ainey & Stephens agreed together on the recommendation of His Grace Archbishop Bruchesi as third member and chairman of the Board, and on June 10, His Grace was duly appointed Chairman of the Board.

The Board proceeded immediately to the investigation of the dispute, holding sessions morning and afternoon for several days. The sessions of June 11, 12 & 13, were wholly given up to the hearing of evidence from parties interested. The witnesses examined were John Ryan, President of the International Longshoremen and Marine Transport Workers Local 373; Gorge Poliquin, Secretary-Treasurer of the International Longshoremen and Marine Transport Workers Local 373; James Sandilands, a longshoreman; and Thomas Robb, manager and secretary of the Shipping Federation of Canada.

#### Shippers offer to be bound by Award.

While the sessions of the Board were in progress the following letter was received at the Department on behalf of the Shipping Companies concerned in the dispute:—

(COPY.)

JUNE, 11th, 1907.

"THE REGISTRAR,  
BOARDS OF CONCILIATION AND INVESTIGATION.

Boards of Conciliation and Investigation,  
Department of Labour,  
Ottawa, Ont.

Sir:

In connection with Board of Conciliation re 'Longshoremen's dispute, I am directed by the Allan Line, Canadian Pacific Steamship Lines, Donaldson Line, Thomson Line, Lord Line, Dominion Line, Leyland Line, Hamburg-American Line, South African Line,

Mexican Line, Black Diamond Line, Head Line, Holme Line, Quebec Steamship Co., F. A. Routh & Co., and the Nova Scotia Steel & Coal Co., to enclose you under the signatures of the representatives of the above Lines agreement in accordance with section 62 of the Industrial Disputes' Investigation Act, 1907.

I have the honour to be, Sir,

Your obedient servant,

(Signed) THOMAS J. ROBB,  
*Secretary.*

(COPY OF ENCLOSURE.)

"TO THE REGISTRAR,  
Board of Conciliation and Investigation  
Ottawa, Canada.

Sir:

The undersigned agree to be bound by the recommendation of the Board during the present season of St. Lawrence navigation (1907)—such season to be reckoned to last until the last ocean vessel shall have left the Port of Montreal,—as if the same were an award of Arbitrators as provided by Section 62 of the Industrial Disputes' Investigation Act, 1907, provided that the applicants file forthwith with the Registrar an agreement in writing to be also bound in like manner.

- Allan Line.....(Sgd.) H. & A. Allan
- Can. Pacific Steamship Lines " D. McNicholl, V.-Pr.
- Donaldson Line.....The Robert Reford Co. Ltd.
- Thomson Line.....William Gear, Vice-Pres.
- Lord Line....." " "
- Dominion Line....." " "
- Leyland Line....." James Thom, Man.
- Hamburg-American Line... " " "
- South African Line....." Elder Dempster, Co.
- Mexican Line....." A. E. Cook
- Black Diamond Line....." T. G. Watt, Agent.
- Head Line....." McLean, Kennedy & Co.
- Holme Line....." Wm. R. Eakin
- Quebec Steamship Co....." J. G. Brock & Co. Agents.
- F. A. Routh & Co.....Nova Scotia Steel & Coal Co., Ltd.
- Nova Scotia Steel & Coal Co.(Sd.) F. A. Routh & Co. Agents.

In reply to this communication letters were addressed on behalf of the Department to each of the parties to the dispute admitting the desirability of each party agreeing to be bound by the word of the Board and urging that it would be greatly in the interest of the parties and to those of the Port of Montreal generally that any agreement reached should cover if possible a period of years so that a dispute similar to that which was being investigated should not recur from year to year.

**Recommendations of the Board.**

The report of the Board of Conciliation and Investigation was received at the

Department on June 17, and was as follows:—

MONTREAL, June 14, 1907

TO THE HON. RODOLPHE LEMIEUX,  
Minister of Labour,  
Ottawa, Ont.

Sir:

We have the honour to inform you that having been appointed to act under the provisions of The Industrial Disputes' Investigation Act, 1907, in the matter of a dispute arising between the International Longshoremen and Marine Transport Workers' Union of America Local No. 373, and the Shipping Federation and Canadian Pacific Steamship Companies relative to an increase of 2½ cents per hour, day and night, making the day wage per hour 30 cents, and the night wage per hour 35 cents, we beg to unanimously report as follows:—

1. Our first endeavour was to persuade the parties to this dispute to be bound by whatever decision this Board might come to after a careful and impartial examination of the facts.

The Longshoremen declined absolutely to be bound. The Shipping Agents agreed to be bound up to the end of the present season only.

We had, therefore, to confine ourselves to the mission of Conciliation and Investigation, in consequence of which representative witnesses were called from both sides and evidence submitted. The session of the Board began Tuesday, the 11th instant, and were continued each day, morning and afternoon, three days being completely occupied in hearing evidence from parties interested. Attached, herewith, we send sworn copies of evidence taken.

After having separately listened to evidence from each party, a joint conference was held with a view of reaching a mutual understanding.

In the letter addressed to the President of the Board, His Grace the Archbishop of Montreal by the Deputy Minister of Labour, dated June 7th, 1907, the Minister states that he hopes that the Board will endeavour not only to effect a settlement of existing differences, but will be able to so adjust matters between the parties that any settlement reached will, by their mutual consent, be held to govern conditions between the several steamship companies and their employees in the port of Montreal for some years to come.

To effect a lasting settlement, covering a term of years was the dominant idea inspiring the Board's efforts from the beginning, and at the joint meeting of the parties already alluded to all possible means were employed to bring about a settlement for a space of 5 years, thus ensuring stability to our national trade and peace and security to the country's import and export business through the Port of Montreal.

The Longshoremen were willing to sign an agreement for five years provided their demands were granted in full. The Shipping Agents were not willing to sign an agreement for longer than two years, present rates to stand.

2. The following scale was proposed by the Board which was deemed a fair and equitable basis of compromise.

	Day.	Night.
1907, Balance of season . . .	28c. per hour	33c. per hour
1908, " " "	29c. " "	34c. " "
1909, " " "	30c. " "	35c. " "
1910, " " "	30c. " "	35c. " "
1911, " " "	30c. " "	35c. " "

This suggestion of the Board was not accepted by either parties to the dispute.

Such being the situation there was nothing left for the Board to do but to proceed to consider the case, and make their recommendations on the merits of the facts submitted.

3. (a) The Board finds the cause of the present trouble largely due to the lack of tact and consideration shown by the parties in their dealings one with another.

(b) That evidence submitted to prove that wages paid in the Port of Montreal were "unfair, unreasonable and not sufficient to provide the necessities of life," was contradicted and did not seem absolutely conclusive.

(c) That the nature of the work was intermittent, strenuous and fairly hazardous, justifying a reasonable excess of wage over that paid to unskilled labour in other trades, was proven.

(d) That Longshoremen kept in good faith entered into by them in 1903, for four years.

(e) That other branches of unskilled labour were not so highly paid.

(f) That Longshoremen suffer loss of wages through the irregularity of the work they are engaged in, and through the importation by the Shipping Agents of men from abroad.

(g) That Shipping Agents suffer loss and inconvenience from the men quitting work in the fall to engage in other pursuits for the winter thus endangering the shipping during the last weeks of navigation, and compelling the Shipping Agents to import men from abroad.

(h) That men after the season closes have to find work elsewhere in Gas Works, C. P. R., G. T. R., and lumber camps, etc.

(i) That the cost of living has increased enough in the last four years to warrant a re-adjustment of wage scale.

(k) That the Shipping Companies accorded to the Longshoremen during the month of May of 1907, an increase of 2½ cents an hour, day and night, which is equal to an increase of 10 per cent. over wages paid during the previous four years.

After earnest consideration of all the facts, the Board in the spirit of justice and with a view of securing peace and harmony respectfully recommend:—

That the increase of 10 per cent., or 2½ cents per hour, day and night, already granted by the Shipping Companies to the Longshoremen remain the rate for the present season.

But in view of the special importance attached by the Shipping Agents to a constant and continuous supply of labour till the final closing of navigation and to safeguard the public interests and as a further inducement to the Longshoremen to fulfill these conditions, the Board recommends that a bonus of 2½ cents per hour over and above the wages paid under the present rate, be paid by the Shipping Agents to the Longshoremen.

Said bonus to be paid to all Longshoremen employed by the Shipping Companies from the day of each man's engagement, but in no case shall the bonus be effective previous to July 1st, 1907. The meaning of this recommendation to be that for all those men who engage to work for the Shipping Companies after July 1st, and continue to do so till the close of navigation shall be entitled to this extra wage.

We further recommend for the season of 1908, that 30 cents per hour be paid during the day and 35 cents during the night; that an agreement to this effect between the parties be entered into which shall be binding until end of season 1908, any change affecting the future, to take place between the first day of December, 1908, and the first day of March 1909, by fifteen days written notice to be given by either party to the other.

The Board cannot refrain from reminding both parties to this dispute that the supremacy of our national trade depends solely upon the confidence inspired in its stability. The avoidance of disturbance to the national flow of commerce in the Port of Montreal means continued prosperity to the business industries.

The Board, therefore, hopes that its recommendations may be taken as the result of a thorough study of the situation revealed by the facts submitted, that the parties

to this dispute may be led to accept these recommendations in the same spirit as they are given, and that their acceptance by both will bring about a continuity of good feeling, fair dealing and long continued prosperity to all concerned.

Respectfully submitted,

(Signed) PAUL BRUCHESI,  
*Archbishop of Montreal, Chairman.*

(Signed) GEORGE W. STEPHENS,

(Signed) JOSEPH AINEY.

A copy of the report received by the Minister was immediately forwarded to each of the parties to the dispute, together with a letter to each of the said parties, expressing the hope of the Minister that the recommendations contained in the report would be accepted by the parties concerned, and requesting that the Minister might be informed on this point as soon as possible.

On June 25 the Department received a letter from Mr. William Mansfield, secretary local 373 International Longshoremen and Transport Workers of America, on behalf of the members of the Union refusing to accept the award, and on June 27 a communication was received from the representatives of the shipping companies referring to their previous letter offering to be bound by the recommendations of the Board provided the other party did the same, and indicating that their attitude was consequently dependent on that of the men.

#### Notice Posted by Shipping Companies.

Subsequently the following notice, printed in English and French, was posted by the shipping companies:—

#### Notice to Longshoremen of the Port of Montreal.

Commencing 1st July, 1907, in order to give present effect to the decision of the Board of Conciliation and Investigation on the question of the Longshoremen's wages at the Port of Montreal, the undermentioned steamship lines in addition to the present rates paid to Longshoremen, will give such Longshoremen as may register their names and addresses at the wharf office of the lines by which they are employed, and are prepared to work for the undersigned when so requested to do from 1st July until their last steamer of the season of 1907 leaves the Port, a bonus of two and one half cents (2½) for each hour worked by them, after 1st July to close of navigation 1907. Said bonus to be paid on application by the lines by which they were employed between the sailing of the last steamer and prior to 5th December, 1907.

Early in the month of July the Department was informed by Mr. Thomas Robb, secretary of the Shipping Federation, that between 500 and 600 men had so far registered their names under the

conditions stated in the notice above printed, while the remainder of the men were expected to do so. The agreement signed by the men was as follows:—

We, the undersigned, hereby agree to work for the above Steamship Lines as Longshoremen in the Port of Montreal whenever notified by them so to do, from 1st July season 1907, until the last steamer sails from the Port of Montreal, season 1907, at rates set forth on the back hereof, conditional on our receiving at the end of the season, after, the sailing of the last steamer from Montreal, an additional sum of two and one half cents (2½c.) per hour for each hour worked by us for the above Lines and we further agree to notify them of any change in our house addresses. Said payments to be made by the Steamship Line for which they have worked on application after the sailing of the last steamer but prior to the 5th December, 1907.

The rates agreed to as set forth on the back of the above document showed an increase of 2½ cents per hour over the rates in force at the beginning of the season and apart from the hours secured under the conditions named.

### III.—ACT INVOKED BY MINERS AT SPRINGHILL, N.S.

THE Board of Conciliation and Investigation appointed on behalf of the Cumberland Railway & Coal Company Limited on an application from Pioneer lodge No. 1, Provincial Workmen's Association and which commenced during the month of May, an investigation of the disputes which had been referred to it as reported in the *Labour Gazette* for June did not proceed further with the investigation during June, but in the course of a letter to the Depart-

ment the Honourable Justice Graham, Chairman of the Board, stated that the Board would reassemble on July 3. Considerable correspondence with reference to the interpretation to be placed upon certain clauses of the Industrial Disputes Investigation Act 1907, took place between Mr. William Watkins, Secretary of Pioneer Lodge No. 1, P.W.A. as representing the men concerned in the dispute of the Department.

### PROSECUTIONS UNDER THE ACT AT MARBLE BAY, TEXADA ISLAND, B.C.

THE June issue of the *Labour Gazette* contained a statement concerning the prosecutions under the Industrial Disputes Investigation Act, 1907 at Marble Bay, Texada Island, B.C., and indicating that a settlement had been effected when the disputing parties had been brought together in court, the statement in question being forwarded to the Department by Mr. J. Edward Bird, counsel for the defendant in the case, and having been prepared jointly by Mr. Bird and Mr. C. B. McNeil, K.C., counsel for the employing company and

prosecutor. The case, which was the first charge of an infringement of the Act to be heard was tried before Mr. H. C. Alexander, police magistrate, an official statement from whom has now been received in the Department is as follows:—

VANCOUVER, B. C., 19th June, '07

The Registrar  
Board of Conciliation and Investigation,  
Vancouver, Ont.

Sir

*Rez vs. DeGreek*

I herewith beg to report on the above case in which there was a charge laid against the above defendant, under Section 56 of *The Industrial Disputes Investigation Act* 1907, for going on strike prior to an investigation being held into a dispute between the Tacoma Steel Company

and its employees of which number the above defendant was one. The property of the Tacoma Steel Company is situated at Marble Bay, Texada Island. Similar charges were laid against three other employees, Jess, Rutherford and Halliday, but were not proceeded with, the DeGreek case practically being a test one. The case after being adjourned twice, came on for hearing at Van Anda, Texada Island, on the 30th ult. After all the evidence being put in for the prosecution and the defence partially gone into, it appeared to me that the whole trouble had arisen from a misunderstanding. Certain demands had been made by the employees and the Company was given till 1st April to consider them. On 25th March, the men working in the stopes and those getting out ore were laid off. The employees thought this was a partial lockout and struck on that date. The Company's explanation was that they were unable to ship ore to the Tacoma Smelter, which is the smelter they ship their product to, because of a strike there, and as their ore bins were full they were forced to suspend operations. There was a difference of opinion as to this being fully explained or at all to the employees

on 25th March, the date the strike took place. Upon this explanation being given in court by the witnesses for the prosecution, I stopped proceedings and asked both parties if they were willing to discuss a settlement as it was apparent a misunderstanding had arisen and the real matters between them, viz., wages, etc., had never been discussed at all. After a short discussion they agreed to do so. Court was adjourned and a committee from the employees met the Managing Director and Local Manager of the Company. I am pleased to say that after certain small points were finally adjusted, the main questions having been settled upon, the strike was declared off and the property has resumed work. All the prosecutions were withdrawn.

I am making this report, personally, as there is no clerk in the County Magistrate's Court at present.

I have the honour to be, Sir,

Your obedient servant,

(Signed) HY. O. ALEXANDER, P. M.

### ADDRESS OF SIR WILLIAM MULOCK, K.C.M.G., AT FERNIE, B.C., ON THE INDUSTRIAL SITUATION.

IN connection with the dispute in the western coal fields, during the last weeks of April and the first week of May last, between the several companies comprising the Western Coal Operators' Association and the miners in the employ of these companies, a report of the settlement of which appeared in the Labour Gazette for June, an address on industrial questions of special interest was delivered by Sir William Mulock at Fernie, B.C., on May 6, on the day on which the agreement between the disputing parties was signed. Sir William Mulock was the chairman of the Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act, 1907, under which the mine operators and their employees had been referred. Sir William Mulock's address, though having a special bearing upon the dispute that had been recently brought to a satisfactory settlement is of deep interest to all concerned in labour questions or in the welfare of the Industrial classes; this interest is further increased by the fact that Sir William was for a number of years the Minister of Labour and was the Minister of the Government who introduced the Act establishing the Department of Labour. Pressure on space prevented the address being printed in the June issue of the Labour Gazette in connection with the report of the settlement of the dispute to which in

part it referred, but in view of the circumstances indicated above it has been deemed desirable to publish the text of the address in the present issue of the Gazette. The meeting at which the address was delivered was actually the final meeting of the Board of Conciliation and Investigation that had been appointed by the Minister of Labour in connection with the dispute. It was, however, of a public character and Sir William Mulock presided, being supported by Messrs. L. P. Eckstein, J. L. Parker and F. B. Smith, members of the Board.

The terms of Sir William Mulock's address were as follows:—

"Speaking to my colleagues of the board, I presume our labours end with this meeting. We have not organized formally under the act, it not appearing necessary to do so. If we had to proceed with the enquiry, we should have been obliged to take the oath of office and proceed in the usual way. We thought it better that we should meet formally. We learnt that the parties themselves, aided by Mr. Mackenzie King, were negotiating a settlement, and we, on our part, decided to defer formal action in the hope that the happy result which to-day has been achieved might be reached by the parties themselves. You have, I think, acted most wisely in coming together and adjusting your differ-

ences in this way. It is true that the boards took no part in this matter—it was not necessary for them to do so, because the fact that the boards were within the reach of both parties seems to have suggested to them the uselessness of their asking the assistance of the boards to do what they themselves could do if they were so disposed. Sometimes parties to trades disputes allow feeling to depose their reason for the moment, and foolish things and unwise words are done and uttered, whereas these trade disputes ought to be regarded as incidental to business affairs, just as a discussion takes place between the buyer and seller of any article of commerce, the buyer wishing to purchase at the best price, the seller wishing to sell at the highest price. The working man has his labour to sell, the employer has it to buy, and it is natural that each one should desire to make the best bargain in the disposition of this article or commerce. But in the past there has been an unnecessary disregard of common-sense principles in the adjustment of these disputes and employees and employers have treated each other often as if they were hostile forces, and have wasted valuable time and money, resulting in mutual exhaustion, until at last the contestants have come to the forum of conscience and reason to attain the end that ought to have been attained at the beginning without the intervention of these war-like acts. There is now on the statute book a statute which renders a strike or lockout or cessation of work pending a dispute wholly unnecessary, and when hereafter such a condition is brought about, so long as this act is upon the statute book, it is a wanton misuse of liberty—there is no longer a necessity for an employer to lock out his men in any of the classes of industry to which this act applies. There is no necessity for any set of men to do this engaged in the business to which this act applies, either going upon strike or ceasing work, at least until the board has been created and made the enquiry which parliament has authorized it to do. I believe if this act had been clearly and fully understood before the cessation of operations in these

mines, the cessation would never have taken place. The work of conciliation and arrangement that has been so successfully brought to an end could as well have been carried on whilst the mines were in full operation. The consequences to the public in the cessation of mining coal in a country like this are most serious and far reaching. The public interest demands that hereafter no such course as unhappily took place should occur again in the event of any misunderstanding between the employees and employers. Any party now can, through the machinery of this act bring about negotiations, and it is not the power of either party to refuse to negotiate unless they wish to abandon their functions to those of the board, but either through the board or mutual negotiations between the parties, all such disputes as have been in question now can hereafter be disposed of without the slightest loss to the employers or the employees, and without any injury to the public interest. No doubt, any board engaged in settlement of disputes such as the one in question, even if work were continued in the meantime, would take that fact into consideration in its judgment, and would make the terms of settlement retroactive to cover the time that might elapse during a settlement and whilst the work was going on. Therefore, with that possibility in view, nothing would be gained by either party in dragging out negotiations. They would gain nothing by the time spent in conferences and arrangements. I mentioned that in case it might be thought that either party would be gaining by delaying a final settlement. Any wise board would take that circumstance into consideration and make its terms retroactive if it was thought equitable that such should be the case. I have had the honour of receiving many confidences from both sides in connection with this dispute and as to the manner in which the mining industry in this district has been carried on. I have no personal knowledge of the subject, and perhaps, the observation I am about to make may be a crude one, but nevertheless, with all respect to the management of these mines,

it would be possible, at least I hope so, for them to adopt some improvements in their working system that may be of service to themselves and to their employees. The interests of the employees and employers are mutual. They are engaged in a limited partnership, and it is impossible for one to be injured without the other being injured also. Now, it has been told to me on many occasions that operations in these mines have been interrupted because there were no cars to carry off the coal. One miner told me that in one month in one mine the men lost 12 days' work out of a possible 26 days because of there being no cars to ship the coal, and the company having no facilities for storing coal as it was mined, depending upon the cars to load the coal at once.

It occurs to me that is a rather hand-to-mouth method of carrying on such an important industry, and that the practice adopted, I am told, at other great mining centres might very well be adopted here, namely, having storage to some limited extent to bridge over interruptions such as are inevitably arising from the lack of transportation or other obstruction to business. It is natural that men engaged in mining should desire a reasonable holiday during the pleasant season of the year; their calling is laborious and hazardous, and it would be to the interest of the men and also the employers that the employees should, from time to time, have a reasonable relaxation from labour in the open air, where their health would be restored and their system toned up, and they would be in better spirits and bodily condition to carry on their work, but forced holidays in a fragmentary way—a day here and a day there—during the working season does not enable a working man to take a solid holiday of a few weeks, but simply shuts him out from work for the day. I can imagine that the only resort would be to hang about waiting for work to resume, perhaps going to the tavern, perhaps idling somewhere getting into a discontented frame of mind, whilst with continuous work throughout the year as a man wishes to work, and then taking his broken time as one solid holiday, he can profitably enjoy

recreation without, as in the other case, wasting his substance, which is so often the case when persons have to wait about in a small town like this with three or four thousand people without any amusements and any interests and nothing to occupy time. It occurs to me that the companies might in another way also be of great service to the men. Rents here are doubtless high, and few of the employees own their own properties. If the companies could see their way to co-operating with the employees towards bringing about a method that would enable the employees to acquire homes of their own, then those men having a stake in the country would feel interested in the welfare of the town, and in the preservation of their property and the accumulation of property. They would feel that they were not a mere floating population, but that they had an interest in the stability of everything in the vicinity. Moreover, if a small quantity of land, say a quarter of an acre for example, could be attached to each home, then during the summer season there would be an opportunity for the miner when he left his diurnal occupation to indulge in the healthful, useful and profitable business of attending to a garden where he, his wife, and children could meet in common interest; then there would be some home life for them instead of, as is very often the case in a mining district, the miner going from the mine, taking his evening meal, then resorting to the hotel or the town away from his family. I do not think the operators could do anything that would be of greater service to their fellow-men, and at the same time be an advantage to themselves than to endeavour to bring about a condition of affairs that would enable the employees ultimately to become owners of their homes. It would cost them less than having to pay high rents, they would not be at the mercy of the landlords, liable to be moved out of their rented houses on short notice; they would feel they were anchored in the country, and however humble the home might be, there is no place like home. I have been very much gratified at the intelligent spirit that has been brought to bear by the miners' em-

ployees in connection with this question. There has been a great advance made in the settlement of disputes, great stimulus given to a sensible settlement of disputes by the conduct of parties to this one. They met in a sensible way with a determination evidently to make concessions. It is impossible that all the demands on one side could ever be granted—every question of importance in life that requires the concurrence of many minds is the outcome of compromise. Every public question of any importance on which people will unite has to be the result of interchange of thought, of the adjusting of opposing and conflicting views, so in trade disputes there must be mutual concession if there is to be anything accomplished. The parties to this dispute have set an object lesson to all the people of Canada, that when reason and regard for right are uppermost in men's minds there are no insuperable difficulties to the settlement of differences. I have no mature views to offer you; these are merely thoughts that are uppermost in my mind. You have the satisfaction of knowing that you have not only well guarded your own interests, but you have set an example which will

bear fruit in the solution of this difficult problem which, I think, in Canada is approaching a satisfactory solution. In some countries, in New Zealand, for instance, there is a law whereby arbitration and its enforcement are compulsory; that has been followed to some extent in New Zealand, but speaking for myself, I never favoured anything in the way of compulsion or coercion. We must appeal to the higher feelings of men; we must appeal to their sense of right and justice, not force. Reason and right should be the influence that bring about the settlement of all industrial disputes, and whilst you, Mr. Sherman and Mr. Stockett allude to me having taken this long trip to be of some service in this trouble, I can assure you that the satisfaction I have received in witnessing your efforts to solve this problem is to me one of the greatest pleasures I have experienced since I took any interest in public affairs, and on behalf of the board I think I can say that these sentiments are those of my colleagues, and for them and myself I thank you all for the course you have taken in bringing about such a happy termination to this important question.

#### LABOUR ORGANIZATION IN CANADA, 1907—NUMBER OF ORGANIZATIONS BY TRADES AND PROVINCES.

THE Department presented, as an appendix to the June, 1907, issue of the Labour Gazette, the final instalment of a directory of labour organizations in Canada, publication of which was begun in the February issue of the Gazette.

This directory contains a complete list of labour organizations existing throughout Canada, as based on information in the possession of the Department at the time of publication during the first five months of the present calendar year. The locality, name and number of each organization is given, together with the name and address of the secretary.

The chief sources from which the information set forth in the directory was derived were: the correspondents of the

Department resident in the several cities of the Dominion, the public press of Canada, and the official trade journals issued by several of the international organizations, verification of details after the existence of the several organizations had become known to the Department having been obtained by correspondence direct with the officers of the organizations or others in a position to supply authentic information.

#### Analysis of Returns.

In connection with the publication of the directory, it was thought by the Department that an analysis of the information which it contains would be of value as throwing additional light upon tendencies of labour organization in Canada at the present time.

Such features as the relative extent of organization in the several trades, the distribution of organizations among different provinces and more important cities of the Dominion and the extent to which trade unions are affiliated with national and international central bodies are of great interest and significance, but are not shown in aggregate statistical form in the directory as published. In the following article a statistical review is presented with the object of furnishing information in readily accessible form on these and other points of interest, including statements as to the number of congresses and national associations in Canada, with their respective affiliations; the number of trades and labour councils and federations of trade unions, according to provinces; the total number of trade unions chartered by national and international organizations and a complete list of the various central international organizations having branches in Canada, the number of the latter being shown according to provinces and groups of trades affected.

**Aggregate Returns.**

The directory contains a total number of 1,681 labour organizations of all kinds, of which 8 are congresses and national associations issuing charters, 49 are trades and labour councils, 31 are federations of trade unions and 1,593 are trades unions or other local associations of employees.

**Congresses and National Associations.**

There are at present eight congresses or national associations of trade unions in Canada. These are the Trades and Labour Congress of Canada, which has some 450 branches consisting of international trade unions and trades councils; the National Trades and Labour Congress of Canada, having some 28 chartered branches, exclusive of affiliations; the Provincial Workmen's Association, of Nova Scotia having 47 lodges; the Grand Council of the National Association of Marine Engineers, having 10 branches; the Canadian Association of Masters and Mates, with 8 branches; and the Hotel and Restaurant Employees'

National Association and Bartenders' National League of Canada, with 8 branches. Charters are also issued by the Federation of Textile Workers of Canada and La Fédération Canadienne de Cordonniers, the former having 14 branches and the latter 3. The Fishermen's Union of Nova Scotia has an affiliation of some 18 local organizations or stations distributed throughout the province. The Threshers' Protective Association of Ontario has 11 branches.

**Trades and Labour Councils.**

The extent to which trades and labour councils, consisting in each case of representatives from organizations of different classes in the same locality, have been formed in the several provinces of the Dominion is shown in the following table:--

TABLE SHOWING NUMBER OF TRADES AND LABOUR COUNCILS IN CANADA BY PROVINCES. 1907.

Province.	Number.
Nova Scotia.....	3
New Brunswick.....	2
Prince Edward Island.....	1
Quebec.....	5
Ontario.....	24
Manitoba.....	3
Alberta.....	4
Saskatchewan.....	2
British Columbia.....	5
<b>Total.....</b>	<b>49</b>

It will be seen that of a total of 49 trades and labour councils, 24 are in the Province of Ontario, 5 each in Quebec and British Columbia and 3 each in Nova Scotia and Manitoba.

Thirty-seven of the trades and labour councils are affiliated with the Trades and Labour Congress of Canada, and 3 with the National Trades and Labour Congress the remainder being independent organizations.

**Federation of Trade Unions.**

There are at present in Canada some 31 federations of trades unions of similar classes, of which 15 are made up of employees in the building trades, 4 are printing and allied trades councils, 3 are

federations of machinists, 2 are federations of garment workers, with 1 federation each of shoe workers, barbers, woodworkers, teamsters, moulders, miners, and metal polishers. There are 18 of these federations in Ontario, 5 in Quebec, 2 each in Manitoba, Alberta and British Columbia and 1 each in Nova Scotia, New Brunswick and Saskatchewan. (\*)

### Trade Unions.

According to the information contained in the directory, there are at present 1,593 trades unions or local organizations of employees in Canada. These are distributed by provinces as follows:—

NUMBER OF TRADES UNIONS IN CANADA BY PROVINCES.

Name of Province.	Number of Organizations.
Nova Scotia.....	123
New Brunswick.....	70
Prince Edward Island.....	6
Quebec.....	256
Ontario.....	752
Manitoba.....	89
Saskatchewan.....	31
Alberta.....	84
British Columbia.....	175
Yukon Territory.....	7
<b>Total.....</b>	<b>1,593</b>

Of 123 organizations in existence in Nova Scotia, 24 are in Halifax and 13 in Sydney. In Prince Edward Island, 5 out of a total of 6 unions are in Charlottetown. St. John, N.B., has 29 organizations, and Moncton 11, out of a total of 70 in New Brunswick. In Quebec, out of a total of 256 organizations, 114 are in Montreal and 50 in the City of Quebec. Ontario has a total of 756, of

which 133 are in Toronto, 63 in Hamilton, 42 in Ottawa and 41 in London. At Winnipeg, Man., 63 labour organizations, out of a total of 89 in the whole province are situated. In Saskatchewan, out of a total of 31 organizations, 11 are at Moose Jaw. In Alberta, out of a total of 84, Calgary has 34 and Edmonton 18. In British Columbia there are 175 labour organizations, of which 54 are in Vancouver and 32 in Victoria. The Yukon Territory has organizations of which 6 are in Dawson City. It will be seen that Toronto with 133 organizations, Montreal with 114, Hamilton and Winnipeg with 63 each, Vancouver with 54 and Quebec with 50 are the cities in which the largest number of labour organizations are in existence.

Of the 1,593 local trades unions included in the directory, 1,346 are affiliated with central organizations of an international character, the remainder being made up of lodges of the Provincial Workmens' Association, branches of the National Trades and Labour Congress of Canada, the National Association of Marine Engineers, The Canadian Association of Masters and Mates, the Hotel and Restaurant Employees National Association, the Federation of Textile Workers of Canada, La Fédération des Cordonniers, the Fishermens' Union of Nova Scotia and the Threshers' Protective Association of Ontario. (\*) In addition there are some 90 independent organizations existing throughout the Dominion. In the following table a list is given of the various international organizations entered in the Directory as having branches in Canada, arranged according to industries and groups of trades, and showing the number of unions chartered by each central organization in the several provinces of the Dominion:—

\* The federation credited to Saskatchewan is one of machinists throughout the C. P. R. system, having its headquarters at Moose Jaw, Sask.

\* For statement of number of branches affiliated with each of these bodies, see under heading "Congresses and National Associations" above.

It will be seen that the largest number of international labour organizations existing in any one group of trades in Canada is in the railway service, in which here are 370. In the building trades, the number is 266; in the metal, engineering and shipbuilding trades 203; in the clothing trades, 74 and in the the printing and allied trades, 70. The 12 international organizations having the largest number of chartered branches in Canada are the following:—

## NOVA SCOTIA LEGISLATION AFFECTING LABOUR, 1907.

THE first session of the Thirty-fourth General Assembly of the Province of Nova Scotia convened on February 14, and was prorogued on April 25, 1907. Some 66 public statutes were assented to, among them being a number of special interest from the standpoint of labour and industry. A review of these is given in the following article.

## Protection of Coal Miners.

A number of amendments to The Coal Mines' Regulation Act were passed, affording additional protection to employees in and about coal mines.

The section providing for the appointment of check weighers previously required that every such weighman should be a certificated miner of three years' service and should be, at the time of his appointment, employed as a miner in the colliery at which he is to serve. This provision is amended by the deletion of the words "as a miner" in the closing phrase.

The rule requiring the tops of shafts which are for the time being out of use or are used only as air shafts to be kept securely fenced, is amended by the addition of a provision requiring that the manner of fencing shall be as directed by

the commissioner. Two new rules to be observed in every coal mine are added, the first providing that in a mine usually entered by means of machinery, a certificated person of the proper age must be appointed for the purpose of working the machinery employed in raising or lowering persons engaged therein, and must attend for such purpose during the whole time that any person is below ground in the mine. The second rule provides that in every mine in which men are raised or lowered in a shaft there must be attached to the cage used for that purpose such safety appliances as may be agreed upon between the owner or manager of the mine and the inspector of mines. (1)

### Safety Lamps.

An important addition is made to the law respecting the use of lamps or lights in mines. Under its terms, the governor-in-council may appoint in any mining district of the province a commission of three members, one a working miner, one the owner of a mine or his agent, and one a person of experience in coal mining, but not employed in or connected with any mine in operation. The commission is to have power to examine mines and to recommend that no lamp or light other than a locked safety lamp be allowed therein. On a report to this effect to the Commissioner of Mines, an order may be issued giving effect to the recommendation, the commissioner having the power, in the case of the refusal of the owner or manager of a mine to comply with the order, to close the mine and impose a penalty of not less than \$1,000 for every day that work is carried on below ground in violation of the order. (2)

### Employment of Stationary Engineers.

The sections of the Coal Mines' Regulation Act having reference to the certification and employment of stationary engineers are considerably enlarged. With respect to the appointment of boards of

examiners to grant certificates of competency to engineers, the commissioner is given power to declare any locality in which coal mining is carried on to be a mining district, and may establish a local board of examiners for that district, the board to consist of three members, one to be appointed by the governor-in-council, one to be appointed by the managers of the mines in the district, and the third to be chosen by the engineers holding certificates in the district, at a meeting to be called by the commissioner. Local boards of this kind must meet not less than twice each year; their powers embrace the examination of candidates and the granting of second and third class certificates.

The sections defining the eligibility of candidates for first, second and third class certificates, are considerably altered. A candidate for a third class certificate must hold a license as fireman, or have served for not less than six months as fireman, or twelve months as an engineer, assistant engineer, pumpman, oiler or locomotive engineer, or eighteen months at mechanical work in a machine shop. For a second class certificate, the candidate must be 21 years of age, the holder of a third-class certificate and must have been employed not less than one year as a third-class engineer. For a first-class certificate the candidate must be at least 24 years of age, the holder of a second-class certificate, with an experience of one year at mechanical work on mining machinery, or of one year's experience in charge of a hoisting or haulage engine, or two years in charge of a colliery engine other than the engine just specified; or he must be the holder of a second class certificate with an experience of twelve months in charge of a steam plant or of three years at mechanical work in a machine shop.

With regard to the employment of engineers, the provisions of the law have been considerably altered. Engineers in charge of a plant of not less than 100 and not more than 300 horse power must be holders of at least a third-class certificate. Holders of second-class certificates may take charge of plants of over 300, but not more than 800 horse power, while

(1) Chap. 35.

(2) Chap. 35.

holders of first class certificates may take charge of plants of over 800 horse power. Previously, the limits prescribed were, from 25 to 200 horse power in the case of holders of third-class certificates; from 200 to 500 horse power for holders of second class certificates, while all engines of upward of 500 horse power were required to be in charge of holders of first-class certificates. Further, an engineer in charge of an engine of not more than 300 horse power, used for lowering or lowering persons in and out of a mine, or of moving men therein, must hold at least a third class certificate, and if the engine is over 300 horse power the engineer must be the holder of a second-class certificate. Engines of not less than 75 horse power, used for the purpose of ventilating a mine and upon the movement or operation of which the safety of any person or persons depends, must be in charge of an engineer holding at least a third-class certificate. In every steam plant of 500 horse power or over there must be on duty in the fire-room at all times while all or any part of the plant is under steam, a licensed fireman or an engineer who holds at least a third-class certificate. (3)

#### Technical Education.

A very important act of the session was one providing means for the establishment of a technical educational system for the province. The plan outlined calls for the establishment of an institution at Halifax to be entitled the Nova Scotia Technical College, to afford facilities for scientific research and instruction and professional training in civil, mining, mechanical, chemical, metallurgical and electrical engineering, or other departments which may be added from time to time. The sum of \$100,000 is voted for securing a site, building and equipment. Provision is also made for the establishment of local technical schools, at such places as may be deemed advisable, for the purpose of furnishing industrial education of such character and extent as will most effectively meet the requirements of the population and the industries of the locality. The principal of the institution at Halifax is to be known as the

Director of Technical Education. He is to be appointed by the governor in council for the specific purpose of exercising supervision over the conduct and management of all institutions established under the act, of reporting upon and advising the council in all matters relating to engineering, mining and technical education, and to promote the establishment and efficiency of local technical schools. He is required to report annually to the legislature concerning the state of technical education in the province and the condition of efficiency of the schools under his supervision. The director is also to decide as to the points at which technical schools will be established. Provision is made for the appointment of professors and of a teaching staff at Halifax, and for the appointment of instructors for the local schools. The Halifax college is given the power to grant degrees, prescribe qualifications, etc. The expenses of the Halifax institution will be defrayed out of the provincial treasury, and those of the local schools out of the local aid provided; supplemented by allowances from the provincial treasury. (4)

#### Schools for Miners.

The schools of instruction for miners previously sanctioned are continued by the act, their establishment and maintenance henceforth to be under the direction of the Council of Public Instruction. The purposes of the schools are to instruct persons to qualify for obtaining certificates of competency as underground managers, overmen, or stationary engineers under the provisions of "The Coal Mines' Regulation Act". These schools will henceforward be under the supervision and control of the Director of Technical Education, and the instructors will be appointed on his recommendation. No instruction or examination fees are to be charged, except in the case of persons who desire instruction but are not contemplating examination for a certificate. The expenditures necessary for the establishment and maintenance of the schools are to be defrayed

(3) Chap. 36.

(4) Chap 1.

out of the provincial treasury on certificate of the Director of Technical Education. (6)

#### Deductions from Wages for Medical Attendance.

Under the Companies Doctors' Act, a monthly deduction from the wages of employees in mining or manufacturing establishments may be made for medical attendance, the employees being permitted to select the practitioner to whom the deduction is to be paid over. The act originally provided that if 125 employees, or in establishments where less than that number are employed, the majority of the employees unite in specifying a doctor, the latter must be recognized as the regular medical attendant of the company. This provision was amended in 1906 to the effect that if 40 per cent. of the employees in any case specify the doctor the latter must be accepted by the company. The percentage is reduced by act of the past session to 25 per cent. (6)

#### Industrial Statistics and Immigration.

The appointment of an officer, to be attached to the Provincial Secretary's Department, and to be known as the "Secretary of Industries and Immigration," was provided for in a special act. The duties of the new officer will be to collect and arrange facts and statistics relating to the agricultural and other industrial interests and resources of the province and to disseminate the same with a view to promoting the progress of the province and to encourage immigration from other countries. Under the same act the Provincial Secretary is authorized to make arrangements with the government of Canada for the collection and publication of industrial statistics relating to Nova Scotia, and to co-operate with the immigration service of the government of Canada or with any other agency for the encouragement of immigration from other countries into the province. The Secretary of Industries and Immigration will be required to report annually to the legislature concerning the work of his office. (7)

#### Old Age Pensions and Miners' Relief Societies.

The appointment was authorized of a commission of three members to examine into and report upon the feasibility of adopting some scheme providing old age pensions for workmen, and particularly for workmen who have by themselves, or in conjunction with their employers, established benefit or relief societies. The commission will also examine into and report on the organization and administration of existing miners' relief societies. (8)

#### Sunday Street Cars.

The Municipal Act and the Town's Incorporation Act of the Revised Statutes of Nova Scotia, 1900, contain sections permitting municipal councils to pass by-laws to prevent the profanation of the Sabbath. Two acts were passed during the recent session extending these clauses by giving councils the right to pass by-laws regulating the running of streetcars on Sunday. (9)

#### The Price of Electric Light and Energy.

An act was passed requiring persons, firms, municipalities, etc., furnishing electric light or energy for sale, to file a schedule of the prices charged in the office of the provincial secretary before July 1, 1907. These charges may be reduced or modified by the governor-in-council and no increase may be made without the approval of the governor-in-council. Applications for an increase or decrease in the charges must be advertised in one or more newspapers printed and published in the locality where the light or energy in question is supplied, for a period of not less than 30 days. A minimum penalty of \$50 is prescribed for any person collecting higher charges than may be warranted by the schedule. (10)

#### Notes.

The law providing for the *protection of forests* against fires is amended so as to

(6) Chap. 1.

(6) Chap. 45.

(7) Chap. 9.

(8) Chap. 16.

(9) Chaps. 47 and 56.

(10) Chap. 40.

permit prosecutions for contraventions to be begun within twelve calendar months after the contravention. The time limit was previously six months. <sup>(11)</sup>

An addition is made to the *Liquor License Act* defining the responsibilities of transportation and express companies in the matter of forwarding liquor to municipalities in which the Canada Temperance Act is in force. <sup>(12)</sup>

An act was passed amending the provisions of the law with regard to *coal mining leases* covering submarine tracts, and other coal leases. <sup>(13)</sup> The right of a coal mining lessee to enter upon private property was rendered more specific. <sup>(14)</sup>

The salaries of members of the Executive Council of the province are increased to \$5,000, the Prime Minister to be paid a further sum of \$1,000. These salaries were formerly \$3,200 for ministers with an additional \$800 for the Prime Minister. <sup>(15)</sup>

A special act was passed permitting any municipality in the province to become a member of the *Union of Nova Scotia Municipalities*, and to pay the annual subscription fee thereto and the expenses of any delegate to meetings of the Union or of the executive. <sup>(16)</sup>

Acts were passed incorporating the Inverness Co-operative Society, Limited; incorporating the Children's Aid Society of Halifax County; providing a super-annuation fund for the officials and employees of the Fire Department of the City of Halifax; and respecting the compulsory education of children in the city of Sydney.

<sup>(11)</sup> Chap. 64.

<sup>(12)</sup> Chap. 7, sec. 4.

<sup>(13)</sup> Chaps. 32, 33 and 34.

<sup>(14)</sup> Chap. 34.

<sup>(15)</sup> Chap. 8.

<sup>(16)</sup> Chap. 52.

In 1905, Nova Scotia municipalities were authorized to borrow money for the purpose of supplying *seed grain* to their respective polling districts, and to make the amounts due for such grain a lien upon the real property of the purchaser and his endorser. <sup>(17)</sup> A section is added to the act defining the method in which such liens may be discharged by the registrar of deeds. <sup>(18)</sup>

In an act "for the encouragement of agriculture", it was previously provided that *agricultural societies* might be organized in any county or in adjoining counties where not less than 25 persons became members by signing a declaration in a specified form and paying a fee, the total fees to be not less than \$40. This provision is amended so that 15 instead of 25 persons may now constitute a society of this kind. <sup>(19)</sup>

An act was passed relating to the registration and identification of *motor vehicles* and their use of public highways. The speed limit is fixed at one mile in eight minutes in cities, towns or villages where the territory contiguous to the highway is closely built up, or a rate of one mile in five minutes elsewhere in cities, towns and villages. Outside of cities, the limit is placed at one mile in four minutes. Extended provisions are included in the act for the further safeguarding of the public. A *chauffeur*, (a term which includes any person operating a motor vehicle as mechanic, employee or for hire) is required to pay a registration fee of \$2.00, and must wear a registration badge pinned on his clothing in a conspicuous place at all times while operating a vehicle on a public highway. <sup>(20)</sup>

<sup>(17)</sup> Stat. 1905, chap. 5.

<sup>(18)</sup> Stat. 1907, chap. 15.

<sup>(19)</sup> Chap. 17.

<sup>(20)</sup> Stat. 1907, chap. 14.

## THE "LORD'S DAY ACT," 1906—ADMINISTRATION IN THE SEVERAL PROVINCES.

IN the act "respecting the Lord's Day," passed at the session of the Dominion Parliament held in 1906, special reference is made to the status of the act and the method in which it is required to be administered in the several provinces. The sections inserted in the act in this connection are as follows:—

14. Nothing herein shall be construed to repeal or in any way affect any provisions of any act or law relating in any way to the observance of the Lord's Day in force in any province of Canada when this act comes into force; and where any person violates any of the provisions of this act, and such offence is also a violation of any other act or law, the offender may be proceeded against either under the provisions of this act, or under the provisions of any other act or law applicable to the offence charged.

15. No action or prosecution for a violation of this act shall be commenced without the leave of the attorney-general for the province in which the offence is alleged to have been committed, nor after the expiration of sixty days from the time of the commission of the alleged offence.

In addition to the above, incidental reference is made in other sections of the act to the status of provincial legislation on the subject. In a further section it is enacted that the law should go into force on the first day of March, 1907.

## Action of Attorneys-General.

In connection with the coming into force of the law on the date named, action of a special nature was taken by the Attorneys-General of certain of the provinces by way of pointing out to those charged with the immediate administration of the criminal law the provisions of the new statute, and of defining what the attitude of the Provincial Department would be in the event of prosecutions being undertaken. A brief statement of the action taken in this connection in the several provinces is given in the following article:—

*Nova Scotia.*—A circular letter bearing date February 25, 1907, was issued from the office of the Attorney-General of Nova Scotia to the mayors and clerks of all cities and towns, to the wardens and clerks of municipalities, and to the chiefs of police throughout the province. A copy of this letter is as follows:—

HALIFAX, February 25, 1907.

Sir:—

I beg to call your attention to the Dominion Lord's Day Act, and to inform you that this Act comes into force on March 1st, next.

This Act does not, in my opinion, supercede our local Act relating to Sunday observance, but must be read and used as additional legislation on the subject.

You will observe that by the express terms of the Dominion Act, "no action or prosecution for a violation of this Act shall be commenced without the leave of the Attorney-General for the province in which the offence is alleged to have been committed, nor after the expiration of sixty days from the time of the commission of the alleged offence."

As the intention of Parliament, in passing this Act, was to secure a proper observance of the Lord's Day, and, as under the provisions of the Act quoted above, the consent of my Department is necessary before prosecutions under it are commenced, I deem it proper to call your attention specially to its provisions, and to inform you that if my attention is called to any violation of the Statute and the particulars therein furnished, prompt consideration will be given thereto and consent to prosecutions given wherever, in my opinion, it is necessary to carry out the intention of Parliament.

I would also point out that under our local Act, no consent of this Department is necessary in order that prosecutions may be commenced for its enforcement.

I have the honour to be,

Yours etc., etc.,

(Signed) ARTHUR DRYSDALE,  
Attorney-General.

In a communication received at the Department of Labour from the Hon. the Attorney-General of Nova Scotia, with reference to the above, the following statement is made:—

"Sunday has been very well observed in this province and no complaints respecting Sunday labour have been made, except against the running of tramways or street cars and in regard to work done by the Dominion Steel Company and one gold mine.

The effect of the Dominion legislation has been good. Before Confederation there was an Act passed by the Legislature of this Province concerning 'Offence against religion.' Section 2 of that Act imposed a fine for the desecration of the Lord's Day. This Section will be found in the Revised Statutes of Nova Scotia, fifth series, appendix A, page 24.

"The Supreme Court of this Province has decided that our Provincial Legislature has no power to amend this clause and that it is still in force. This decision was given in *The Queen vs. Halifax Electric Tramway Company*, Vol. 30, *Nova Scotia Reports*, page 469. Under this Act, no consent of this Department is necessary to a prosecution. The consent of this Department will be given to prosecutions in all cases in which it is necessary to carry out the provisions and intentions of the Dominion Act."

*Prince Edward Island.*—The Department was informed by the Hon. the Attorney-General of Prince Edward Island that in cases of violation of the

act brought to the notice of the government, the offenders would be prosecuted in the usual way, and that no obstacle would be placed in the way of the enforcement of the law as it has been enacted.

*New Brunswick.*—A circular was issued by the Hon. the Attorney-General of New Brunswick to the chiefs of police of the various cities and towns throughout the province enclosing copies of the Lord's Day Act, and informing them that on the particulars of any alleged violation of the act being brought to the attention of the Attorney-General, he would give leave to take proceedings. It was also suggested that the chiefs of police should make it generally known that the provisions of the statute would be enforced. The full text of the communication was as follows:—

ST. JOHN, N. B., February 11, 1907.

To  
The Chief of Police of—  
Sir:—

I beg to enclose you herewith a copy of the Dominion Lord's Day Act, and also list of the Provincial Lord's Day Acts, including the New Brunswick Statute passed before Confederation, and which is still in force in this Province.

You will observe that by Section 15, of the Dominion Lord's Day Act, it is provided that "no action or prosecution for a violation of this Act shall be commenced without the leave of the Attorney-General for the Province in which the offence is alleged to have been committed, nor after the expiration of sixty days from the time of the commission of the alleged offence."

As this Act will come into force on the First of March next, I have thought it well to send you a copy, and also to inform you that if you will call my attention to any violation of the Statute which comes under your notice, and furnish me with the particulars of such violation, I shall give the same immediate attention. I feel that I can rely with confidence upon you, and upon other officials in your community who have to do with the administration of the law, to take the necessary steps to prevent an infringement of its provisions. The intention of Parliament in passing the Act was to secure, as far as may be reasonably possible, a proper observance of the Lord's Day, and it is the duty of all good citizens to themselves obey the law and to assist in preventing a violation thereof by others. Making it clearly understood that you and the officers under you will feel it to be your duty to insist upon a compliance with the Statute will go far toward ensuring a respect for its provisions, and so relieve you of the necessity of instituting prosecutions. Whenever, however, such prosecutions should become necessary, you will, I am sure, not fail in your duty in this regard.

I have the honour to be, Sir,

Your obedient servant,

(Signed) WILLIAM PUGSLEY,  
Attorney-General.

*Quebec.*—The Lord's Day Act was not made the subject of any special announcement making known the intention of the Department of the Attorney General of Quebec with regard to its application. As each case comes up, the Department will examine it on its merits and decide according to the different circumstances which it presents. At the last session of the Legislature of Quebec an act was passed which considerably modifies some of the enactments of the Federal statute. Sunday labour is in general prohibited, except in cases of urgency or necessity. The law with regard to Sunday trade existing in the Province of Quebec prior to the passing of the Federal Act will also continue to apply, no changes having been introduced.

*Ontario.*—It was stated by the Hon. the Attorney-General of Ontario that when application is made for authority to take proceedings, he will consider each case as it comes up.\*

*Manitoba.*—No action of an official nature was taken or announcement made in Manitoba in the matter of the enforcement of the act.

*Saskatchewan.*—It was announced by the Hon. the Attorney-General of Saskatchewan that he would give his consent to prosecutions for infractions of the act.

*Alberta.*—A communication similar in form to that sent out by the Hon. the Attorney-General of New Brunswick, except that the opening paragraph was omitted, was forwarded, on the instruction of the Hon. the Attorney General of Alberta, to all police officers and to the several Northwest Mounted Police stations throughout the province.

*British Columbia.*—It was announced by the Hon. the Attorney-General of British Columbia that the government would not give its consent to prosecutions under the Lord's Day Act.

(\* ) For, a statement re test cases under the Act in Ontario see "Recent legal decisions affecting labour," in the present issue.

PROGRESS OF THE NORTHWEST PROVINCES, 1870-1906.

THE Province of Manitoba and the Northwest Territories were admitted into, and became a part of, the Dominion of Canada on July 15, 1870. A special census of Manitoba, taken in that year, showed it to have a population of 12,228, exclusive of Indians. In 1881, the first regular census of these portions of Canada was taken, and Manitoba and the Territories combined were shown to have a population of 105,681, inclusive of 22,783 Indians. The area under wheat in the same year was 56,971 acres, and the production 1,153,328 bushels, together with 302,049 bushels of barley and 1,330,220 bushels of oats.

Ten years later the population of Manitoba and the Territories had risen to 219,305, and the area in wheat to 1,010,430 acres. There were also 64,972 acres in barley and 317,848 acres in oats, the total production being: Wheat, 17,884,629 bushels; barley, 1,667,893 bushels, and oats, 9,998,556 bushels.

In 1901 the population was 419,512, and the area in wheat, 2,495,466 acres, in barley, 162,557 acres, and in oats, 833,390 acres. Owing to a period of unusual drought, the grain crops recorded in that year were a comparative failure. The aggregate yield, however, of the three kinds of grain was 43,000,000 bushels.

On September 1, 1905, Saskatchewan and Alberta were given the status of provinces, their area comprising that formerly included in the Territories, and on June 24 of the following year a census was taken of the new provinces and Manitoba. The results of this census were announced during June. The returns throw a very interesting light on industrial developments in this part of the Dominion during the first six years of the present century and on the rate of progress as compared with the earlier periods above mentioned.

The population in 1905 was shown to be 808,863, being an increase in five years of 389,351, compared with an increase of only 200,207 in the ten year, 1891-1901, and 113,624 in the ten years, 1881-1891.

The census of June 24, 1906, took the area and production of field crops of 1905, and the area only for the crop of 1906. The production for the latter year, however, has since been computed from the reports of 2,000 farmers, who gave actual average yields for their own farms and estimated averages for the townships in which they reside. The returns for each year by provinces are shown in the following table:—

TABLE SHOWING CROP AREAS AND YIELDS, NORTH WEST PROVINCES, 1905-1906.

Provinces.	1905		1906	
	Acres.	Bushels.	Acres.	Bushels.
<i>Manitoba—</i>				
Wheat.....	2,422,345	47,526,586	2,722,386	54,637,120
Barley.....	253,942	7,544,150	343,412	12,254,030
Oats.....	779,279	31,458,692	931,373	44,742,301
<i>Saskatchewan—</i>				
Wheat.....	1,381,921	31,799,198	2,117,486	50,329,423
Barley.....	40,732	1,196,419	77,576	2,828,447
Oats.....	606,346	25,623,849	901,646	41,885,285
<i>Alberta—</i>				
Wheat.....	147,921	3,035,843	223,930	5,871,397
Barley.....	80,900	2,231,878	108,175	3,878,683
Oats.....	311,804	11,728,314	489,627	24,032,423
<i>Totals for the Three Provinces—</i>				
Wheat.....	3,952,187	82,461,627	5,063,802	110,837,949
Barley.....	375,574	10,972,447	529,163	18,961,160
Oats.....	1,697,429	68,810,855	2,322,646	110,659,159

The whole area in wheat, barley and oats increased from 3,491,413 acres in 1900 to 6,025,190 acres in 1905, and to 7,915,611 acres in 1906; and the yield of the three crops increased from 43,252,664 bushels in 1900 (which was a bad harvest year) to 152,244,929 bushels

in 1905, and to 240,458,068 bushels in 1906. The number of farms increased from 31,815 in 1891 to 54,625 in 1901, and to 120,439 in 1906. In the decade 1881 to 1891 the yield increased from 2,780,100 to 29,500,000, and in the following decade to 43,000,000.

**INTERNATIONAL LABOUR LEGISLATION—DISPATCHES ON THE SUBJECT FROM THE COLONIAL OFFICE REFERRED TO THE MINISTER OF LABOUR.**

**D**URING the month of May, there were two references from the Privy Council to the Department of Labour of dispatches from the Secretary of State for the Colonies to His Excellency the Governor-General. One (P. C. 1480M) consisted of a memorandum on the International Conference on Labour Regulation, held at Berne, Switzerland, in September last, with the text of an International convention on the Prohibition of Night Work for Women in Industrial Employment and an enquiry whether the government of Canada was prepared to adhere to the same; the memorandum set forth the facts also relating to a second convention concerning the prohibition of the use of yellow phosphorus in match manufacture, which was signed by the representatives of certain powers, but not by those of Great Britain. The second dispatch (P. C. 1481M) contained the terms of an address for a return to the Imperial House of Commons with regard to compulsory Native Labour and a covering letter requesting the communication of the same to the Ministers of His Excellency, and a request that His Excellency should invite them to arrange for the information as regarded Canada.

**International Conference on Labour Regulation.**

The memorandum on the International Conference on Labour Regulation set forth that His Majesty's government was represented at the International conference on certain industrial questions held at Berne, in September, 1906, at which were signed the conventions in question. Both conventions had been discussed at a preceding conference at

Berne, in 1905, attended by representatives of Great Britain, France, Germany, Belgium, Holland, Luxemburg, Norway, Sweden, Denmark, Austria, Hungary, Italy, Spain and Portugal, a total with Switzerland herself of fifteen countries. The gathering was convened by the Swiss government. At this preliminary conference, drafts were drawn up to serve as the bases of two conventions on the subjects indicated. One, dealing with night work for women, proposed an obligatory rest period of 11 hours, including always the period from 10 p. m. to 5 a. m.; it permitted exceptions in specified cases, applied to almost all industries of importance and to all establishments in those industries (except family workshops) in which more than ten persons were employed. This draft was accepted by all the powers represented except Great Britain, whose delegates had not been authorized to enter into any binding agreement, but who pointed out that the laws in force in Great Britain already substantially secured the desired result. With regard to the draft relating to the white phosphorus convention, prohibition of the use of the article named was proposed after January 1, 1911; the agreement, however, was only to become operative if accepted by all the states represented at the conference and by Japan. This proposal was signed by twelve of the States represented, Great Britain, Norway and Sweden dissenting.

At the conference of 1906, the same states were represented with the exception of Norway. The British delegates to this conference were instructed to propose two amendments to the convention relating to Night Work for

Women as drafted. The first proposed to insert in the convention an article binding the governments concerned to secure by adequate administrative control the strict enforcement in their respective territories of the provisions of the convention; this was accepted by the conference and embodied in the convention. The second amendment proposed the establishment of an international commission to which might be referred all matters arising out of the convention, and which might, under certain limitations, arrange for further international conference on industrial questions. On this proposition the opinion of the conference was divided. At the outset, six of the fourteen states represented declared in its favour; but after prolonged discussion the number of states supporting a somewhat modified proposal along the same lines was raised to ten. The remaining four states, Germany, Austria, Hungary and Belgium, were not ready to assent and it was thought inadvisable to proceed to the establishment of a commission of the character proposed without their concurrence. The views of the majority were, therefore, embodied in the form of a resolution, and the resolution will become a convention when the dissenting powers shall have notified the Swiss Government of their adhesion to its terms.

The convention on Night Work for Women, in its final form, was signed on September 26, by the delegates of all the States represented at the conference. The alterations necessitated by the convention in English law were stated to be the abolition of two exemptions of old standing and which are believed to be obsolete in effect; a bill for their abolition will, however, be presented to parliament in due course.

#### Use of White Phosphorus in Match Factories.

With regard to the further subject of the conference on September last, the question of the prohibition of the use of white phosphorus in the manufacture of matches, the memorandum points out that the reason for the prohibition was the desire to suppress the disease of necrosis,

or "phossy jaw", of which it is the cause. In 1900, the Home Secretary of the United Kingdom, after full investigation, imposed on match factories where white phosphorus was used, a code of strict regulations, which, it is stated, has had the effect of practically suppressing the disease in England. It is pointed out that if the use of the material is prohibited in England it would be necessary in justice to British manufacturers, who now employ it to prohibit importation of matches containing it, that other countries using white phosphorus in match manufacture join in the agreement of prohibition. Since the evil resulting from the use of white phosphorus could be effectively suppressed by regulation, no justification existed for the prohibition. The British Government, however, was unwilling that its attitude should hinder other governments from adopting a measure which seemed to them desirable, and the British delegates were, therefore, authorized to accept the convention prohibiting the use of white phosphorus in the manufacture of matches on condition that the prohibition should be unanimously enforced by all the states represented and by Japan. This condition, however, was not attained. The governments of Sweden, Spain and Portugal declined to consent to prohibition. Japan had intimated that she was not prepared to act in the matter. Austria, Hungary and Belgium adopted the same attitude as Great Britain. The remaining seven states: France, Germany, Holland, Denmark, Luxemburg and Italy entered into a convention of prohibition as among themselves.

The memorandum closes with the following statement:—

Limited as the outcome of the Conference has been in this respect, the signature of the Convention on Night Work by the representatives of so many industrial countries must be regarded as a remarkable achievement of the movement of which it is the result. To the Association Internationale pour la Protection Ouvrière—an unofficial body centered at Bâle with branches in several countries—the initiative in that movement has been largely due; its development to the Government of Switzerland. The complete unanimity in all the essential matters relating to this Convention shown by the delegates of the Powers, gives good ground for the expectation that it may be the precursor of other Agreements for the common advantage of the industrial classes in the participating States.

The conventions on Night Work for Women and the use of white phosphorous in match manufacture are printed in French and English and attached to the memorandum, as also is the resolution proposing an international commission. The first which proceeds along the lines above indicated, contains also an article declaring that the convention "shall only apply to a colony, possession or protectorate when a notice to this effect shall have been given on its behalf by the Government of the mother country, to the Swiss Federal Council." In accordance with the article in question the convention had been referred by the Secretary of State for the Colonies to His Excellency the Governor-General for the purpose of learning the views of the Government of Canada. The convention relating to the use of white phosphorus prohibited the use of the material in the manufacture of matches after January 1, 1911, but Great Britain, not being a signatory, there was no request for the views of the Dominion Government.

#### The Proposed International Commission.

The resolution relating to the proposed international commission is a document of particular interest, although at the moment nothing has resulted from the proposition. As has been stated, however, it awaits only the signature of the four states of Germany, Austria, Hungary and Belgium to become a convention covering the chief nations of Europe and such of their colonies and dependencies as may wish to be included within its operation. The terms of the resolution, in so far as proposed action in relation to other matters than those arising out of the convention relating to Night Work for women are as follows:—

The Commission could further be called upon..... without prejudice to the initiative of each contracting State, to serve as an instrument for a preliminary exchange of views, in cases where the High Contracting Parties are in agreement, as to the utility of convening new conferences on the subject of the condition of the working classes.

The Commission would meet at the demand of one of the contracting States, but not more than once a year, except in the case of an agreement between the contracting States for a supplementary meeting owing to exceptional circumstances. It would meet in each of the capitals of the European contracting States successively and in alphabetical order. ....

The Delegates mentioned above request the Swiss Government (who agree) to be good enough, until the closing of the record of deposit of ratifications of the Convention to continue the negotiations for the adhesion to the present Resolution of the States whose delegates have not signed it.

This Resolution will be converted into a Convention by the contracting States, through the agency of the Swiss Government, as soon as it shall have received the concurrence of all the States signatories to the Convention.

The resolution was signed by the representatives of Denmark, Spain, France, Great Britain, Italy, Luxembourg, the Netherlands, Portugal, Sweden and Switzerland.

#### BRITISH ASSOCIATION FOR LABOUR LEGISLATION.

THE Department of Labour has received a copy of the report for the two years 1905-7 of the British Association for Labour Legislation, being the British section of the International Association for Labour Legislation, also a copy of the report of the delegates to the fourth biennial meeting of the International Association for Labour Legislation held at Geneva, September, 1906. The report is of special interest in view of the disposition from the colonial office on the subject of Labour Legislation referred to above.

The British section of the International Association for Labour Legislation was organized on February 24, 1905, and the report received covers the two years following that date. The Association itself has its headquarters at Basle, Switzerland, and the objects are set forth as being as follows:—

1. To serve as a bond of union to all who believe in the necessity for labour legislation.
2. To organize an International Labour Office.
3. To facilitate the study of labour legislation in all countries, and to provide information on the subject.
4. To promote international agreements on questions relating to conditions of labour.
5. To organize International Congresses on Labour Legislation.

The president of the International Association is Herr Heinrich Scherrer, councillor of state, Switzerland. and the

general secretary, Prof. Stephan Bauer, F. R. E. S. The president of the British section is Prof. Thomas Oliver, M. D., F. R. C. P., and the Honorary secretary Miss S. Sanger.

The International Association has published for some years in German and French a bulletin which contains the text of recent labour laws in all countries, notes on all actions taken in the various legislatures, resolutions of congresses, etc., and an International Bibliography of Labour Legislation. Arrangements have now been made by the British Association with the International Association whereby the Bulletin will be printed also in English.

Each section contributes £40 annually, to the funds of the central organization. Canadian members may be enrolled in the British section until a separate section or branch can be organized in the Dominion, and the Bulletin will be supplied by the British section to any member who subscribes a minimum of 10s. 6d. per annum, or, if a branch of 25 members is formed, then the Bulletin will be supplied on terms considerably better than this.

The report of the British section concludes with the following remarks, which

bear in part on the subject discussed in the dispatches referred to by the Privy Council to the Minister of Labour:—

"We cannot conclude the first report of the British Section without referring to the great success the International Association achieved in the conclusion of the Berne Conventions last September. These treaties were brought about through the initiative of the Association after six years' steady work, in which, however, unfortunately, there was then no British Section to take part. The attitude of the British Government towards the Conventions has received much attention from the British Section. Although the British Delegates at Berne were empowered to sign the Convention relating to the night work of women, and thus a valuable precedent has been formed, yet the action of the Government in refusing to adhere to the Convention prohibiting the use of yellow phosphorus in the manufacture of matches came as a great disappointment, and no pains have been spared nor any opportunity lost of urging them to reconsider their decision. In this connection several questions have been asked in the House of Commons on behalf of the Association in special reference to the fatal case of phosphorus necrosis reported early this year, and the matter has been raised in the House of Lords by the Earl of Lytton.

"Although we cannot say that the attitude of this country towards international labour conventions has hitherto been altogether satisfactory, yet we confidently hope that, with the active co-operation of our members, the British Section will succeed before long in educating public opinion, and through it the Government, to take a broader view. By this means, that attitude of mind which is ready to seek for remedies for existing ills by national legislation, but ignores their international aspect, will be superseded. As a result the delegates from the British Section will not attend the Conference in 1908 painfully conscious of the fact that their country, which led the way in labour legislation for so long, appears from the international point of view as one of the more backward nations."

#### THE MANUFACTURING INDUSTRY IN CANADA—CAPITAL EMPLOYED AND VALUE OF PRODUCTS, 1900-1905.

**A**BSTRACTS of statistics showing the development of the manufacturing industry in Canada from 1900 to 1905 were issued by the Census and Statistic Branch of the Department of Agriculture, Canada, during June, 1907.\*

It is shown that in 1900 the total capital employed in manufacturing establishments in Canada was \$446,916,487, which had increased by 1905 to \$843,931,178, an increase of \$397,014,691, or

about 89 per cent. The total value of manufactured products in Canada was \$481,053,375 in 1900, whereas in 1905 it was \$715,035,965, an increase of \$233,982,590, or about 49 per cent.

The returns give a complete classification of the industry according to branches, with the amount of capital employed and the value of the products of each branch in 1900 and 1905 respectively. The following is a statement of the several branches in which the value of the product amounted in 1905 to \$2,000,000 or over, showing both the amount of capital employed and the value of the product in the years named:—

(\* ) A review of a previous statement by the census on the subject of manufacturing in Canada, showing the value of manufactured products by provinces, and localities, was published in the Labour Gazette for June, 1907, page 1419.

TABLE SHOWING AMOUNT OF CAPITAL EMPLOYED AND VALUE OF PRODUCTS, 1900-1905, IN BRANCHES OF THE MANUFACTURING INDUSTRY, CANADA, HAVING PRODUCTS OVER \$2,000,000 IN VALUE IN 1905.

	Value of Products.		Capital Employed.	
	1900	1905	1900	1905

Wood pulp, chemical and mechanical.....	4,246,781	4,579,103	11,558,560	11,164,768
Woolen goods.....	7,359,541	5,764,600	10,486,198	6,938,683

In estimating the above totals of production, factories or works producing more than one class of product are classified with the kind showing the largest production, where the values of each kind were not obtained separately. In some cases, therefore, the statistics of production do not afford a basis of comparison as between the two years. In the case of wood pulp, for example, the value of the product in one large establishment was added to the values of paper; and in the case of boilers and engines, the value of the product was in several instances included in foundry and machine shop products, thus accounting for the decline that is shown in the returns. The only other decline in production shown above is in woollen goods, though the manufacture of bicycles has decreased, and the cotton bag industry does not figure in the 1906 return. The smelting industry quadrupled in output during the five years, and the manufacture of electrical apparatus and power almost trebled. The cut stone industry showed the greatest rate of growth, the value of the product having increased 1,625 per cent. The manufacture of aerated and mineral waters increased 170 per cent; of axes and tools, 170 per cent; of Portland cement, 175 per cent; of bridges 125 per cent; of drugs, 100 per cent; of plumbing and plumbing supplies, 250 per cent; of wire, 140 per cent;

of printing and bookbinding, 150 per cent; of jewellery and repairs, 135 per cent; of gloves and mitts, about 150 per cent; of roofing and roofing materials, 150 per cent, and of rubber and elastic goods 100 per cent

One of the most striking features of the return is the great growth shown in the ready-to-wear clothing industry at the expense of the custom trade. Despite the large increase of population in the past five years, the made-to-order clothing industry has declined, while the output of ready-made garments has greatly increased.

As above stated, the capita employed in manufacturing increased about 89 per cent during the five year period, while the value of the products increased by only 49 per cent. The apparent disparity in these ratios of increase is explained as resulting from the inability of recently established works to produce to their fullest capacity. In cars and car shops, for example, the ratio of product to capital in 1900 was 151%, and in 1905 only 101%. In Portland cement works the ratios were respectively 86% and 15%, in smelting 67.5% and 32.5%, and in electrical light works, 17% and 9% respectively. The significance of these returns is that the five years have been a period of rapid expansion in industrial investments the full results of which have not yet been realized.

#### RECENT INDUSTRIAL AGREEMENTS.

##### Agreement between the Alberta Railway and Irrigation Company and Coal Miners in its Employ.

THE following agreement between the Alberta Railway and Irrigation Company and coal miners in its employ at the Lethbridge Mines is that referred to in the June issue of the Labour Gazette, as having been reached as the outcome of the reference of the dispute between the two parties to a Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act, 1907. It will be remembered that during the establishment of the Board a telegram was received at the Department

from Mr. F. H. Sherman, president of the District Union No. 18 of the United Mine Workers of America and who had been appointed a member of the Board as follows:—"Satisfactory agreement signed to-day with Alberta Railway & Irrigation Company. No need of Board now, thanks to Industrial Disputes Investigation Act. Congratulations." The following is the agreement in question:

LETHBRIDGE, June 5th, 1907

It is hereby AGREED between the ALBERTA RAILWAY AND IRRIGATION COMPANY, hereinafter called the Company, and the employees of the Coal Department of the Alberta Railway and Irrigation Company, as represented by the UNITED MINE WORKERS OF AMERICA, District No. 18, hereinafter

called the MEN; that the following scale of prices and the following rules shall take effect June 1st, 1907, and shall terminate March 31st, 1909, it being understood and agreed that the parties hereto will meet in conference sixty days prior to the expiration of this agreement, to discuss a renewal thereof.

## The Agreement in Question is as Follows.

### HOURS OF WORK.

SECTION 1. All miners and mine labourers shall work eight hours per day, it being definitely understood that this means eight hours work at their working place, exclusive of half-hour for noon time, with the exception of miners working by contract, who are to work eight hours at their working place.

The Company has the right to put inside men on at such hours as they may require, and if any man is required to work overtime, it is agreed that he will do so, the Company paying him overtime for the same *pro rata* on schedule rate.

### FINE DUES AND ASSESSMENT.

SEC. 2. The Company will give the United Mine Workers of America full recognition, and concede the check-off system; that is to say, upon the request, in writing, by any one of the Company's employees. The Company will deduct such monies from their wages each month as is designated for fines, assessments and initiation fees and will give a list of the same, and pay over the amount deducted to the Local Secretary of the United Mine Workers of America; but the Company does not assume any responsibility or undertake to make any such payment where not indebted to the employees.

### SETTLEMENT OF LOCAL AND GENERAL DISPUTES.

SEC. 3. In case of any dispute or grievance arising under this agreement or any Local Agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the Company, or any person or persons employed, or by the men as a whole, then the parties shall endeavour to settle the matter, as hereinafter provided. But before any grievance or dispute shall be submitted to the Pit Committee, the person or persons affected shall endeavour by personal application to the Pit Boss to settle the matter, and in the event of them agreeing, their decision shall be final.

(b) In case of any local or other dispute arising in the mine and failure to agree between the Pit Boss and any employee, the Pit Committee and Mine Superintendent shall endeavour to settle the matter, and if they agree their decision shall be final.

(c) In the event of the failure of the Pit Committee and the Mine Superintendent to settle any dispute so referred to them, as well as any other dispute arising, the matter in dispute shall be referred to the General Superintendent or General Manager of the Company, and the officers of District No. 18, U. M. W. of A. for settlement, and if they agree their decision shall be final.

(d) In the event of the General Manager and District Officers of District No. 18 failing to agree, the matter in dispute shall be referred to a Board of Arbitration for settlement. The Board to consist of two representatives appointed by the Men and two appointed by the Company, who are not parties to the dispute. If the arbitrators appointed agree their decision shall be final. In case of their failure to agree, they shall endeavour to elect an independent chairman and a majority vote of the Board so constituted shall be final. Should the arbitrators fail to agree on a Chairman the Chief Justice of the Supreme Court of Alberta shall be asked to act or appoint someone to act on his behalf, and the award of the majority of the Arbitration Board thus constituted shall be final and binding on both parties. The cost of

the arbitration to be borne as the Board of Arbitrators may direct.

(e) In the meantime, and in all cases, the mines, miners and mine labourers and all other persons involved must continue at work pending an adjustment in the manner above set forth.

### IMPROVEMENTS AND EXTENSIVE REPAIRS.

SEC. 4. It is agreed that all men working on improvements and extensive repairs are not included in the jurisdiction of the United Mine Workers of America.

### PENALTY FOR STOPPAGE OF WORK.

SEC. 5. If any employee or employees shall cause a stoppage of work in violation of this agreement, he or they shall be subject to discharge by the Company without recourse.

### CONTRACT MINER DURING DAY'S WORK.

SEC. 6. Any contract miner taken from the face to perform day's work shall be paid 37½ cents per hour while employed at the same.

### SPECIAL RULES, ETC.

SEC. 7. The right to hire or discharge, the management of the mine and the direction of the working forces are vested exclusively in the Company, and the United Mine Workers of America shall not abridge this right. It is understood and agreed that this agreement shall not conflict in any way with the Special Rules of the Company now in force, provided that the special rules shall not interfere with the rate of wages or the work to be performed under this agreement. The rule providing that eight men can claim a cage at any time is annulled.

### CHECK-WEIGHER.

SEC. 8. The Company will grant the right of the miners to employ check-weighers, and will grant the said check-weighers every facility to enable them to render a correct account of all coal weighed, and will allow the cars to be tared from time to time, and the machine to be properly tested from time to time, and will deduct from the wages of all contract miners such amounts as individual orders may be presented for from time to time, and will pay over the same to the Secretary of the Local Union for wages of check-weighers.

SEC. 9. The Company will endeavour to see that an equal turn of cars be offered each miner, and that he be given a fair chance to obtain the same.

### UNDERGROUND DAY WAGES.

Bratticemen.....	\$ .37½	per hour

Agreement between Contractors and Builders' Labourers, Ottawa, Ont.

On June 1, 1907, the following agreement was concluded between the Builders' Labourers International Protective Union of America, No. 4, of the City of Ottawa and the contractors and employers of the same city.

1st. That the members of the Builders Labourers' Union No. 4 agree from the 1st day of June, 1907, to work 9 hours per day.

2nd. That the remuneration of such labour shall be paid for at the rate of 25 cents per hour without exception whatsoever.

3rd. That both the parties to this Agreement voluntarily consent and bind themselves, either on behalf of the Builders Labourers' Union No. 4, and the contractors or employers, as the case may be, not to change, alter or depart in any way from the above stipulations, agreements or understanding, without due notice of three months.

4th. That no member of this Union shall be allowed to work after five o'clock p. m., except in case of an emergency, unless paid time and a half, double time for Sundays.

5th. The contractor or employer shall also agree to allow the delegate of this Union to enter his works for the space of five minutes to interview the Union's shop steward on such works, and they also agree to accept all orders from all the Union shop stewards.

6th. This said Agreement shall go into effect on June 1st, 1907, and shall be valid until June 1st, 1909.

7th. Contractors or employers shall, in the employment of men, give preference to the members of the Building Labourers' Union."

OPPORTUNITIES OF EMPLOYMENT.

In order that skilled workmen and labourers may be made aware of opportunities of employment and the demand for labour in different parts of the Dominion, the *Labour Gazette* publishes herewith a statement of such opportunities of employment as have been furnished to the Department of Labour by employers, contractors and others. While exercising care and discrimination in the statements which it publishes, it is to be understood that the parties who have supplied the information are alone responsible for the accuracy of it, and that beyond publishing the same for the mutual benefit of employers and employees, the Department assumes no responsibility in connection with the publication. The Department will be pleased to receive for publication from persons desirous of obtaining skilled or unskilled labour in connection with any industries or trades of the country, a statement of the nature and extent of their demand. Similarly, the Department will be pleased to receive and publish on behalf of persons out of employment, statements from labour unions or bodies of skilled or unskilled workmen of the nature and extent of the supply of labour available.

Parties desirous of profiting by the information contained in this article are requested to communicate direct with the persons concerned for further particulars, exact terms, etc., the purpose of the Department in publishing the information being solely that of making better known the demand and supply of labour

*Mining.*—W. H. Aldridge, Managing Director of the Consolidated Mining and Smelting Company of Canada, Limited, writing from Trail, B. C., on June 4, stated that additional metal miners, coal miners, smeltermen and first-class common labourers were required in the Alberta coal field and in the Kootenay mining and smelter districts, and that a shortage of all classes of labour was anticipated.

## IMMIGRATION AND COLONIZATION.

The official statement given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

THE most recent official returns show a heavy increase in the volume of immigration by ocean ports, compared with the corresponding period of 1906, and in the area of Dominion lands patented. The number of arrivals from the United States, and of homestead entries made, show declines. On the whole the number of immigrants arriving is 25% in excess of that of 1906. A feature of the season has been the uniformly good quality of the immigrants from Great Britain and other countries.

## Recent Immigration Returns.

Immigration through ocean ports during April, 1907, declared for Canada, was as follows:—

## IMMIGRATION BY OCEAN PORTS DURING APRIL, 1907.

	Male	Female.	Children under 12.	Total
Immigrants.....	24,972	5,052	4,414	34,438
Returned Canadians.....	1,323	143	72	1,538
Tourists.....	411	59	34	504
Totals ....	26,706	5,254	4,520	36,480

Winnipeg.....	73	86	.....	13
Yorkton.....	343	376	.....	33
Total.....	3,253	4,583	864	2,194

It will be seen that there has been a net decrease in the number of homestead entries made in May, 1907, compared with May, 1906, of 1,330.

A statement of the homestead entries made during the first five months of the present year compared with the corresponding period of the last calendar year, is as follows.

STATEMENT OF HOMESTEAD ENTRIES DURING JANUARY, FEBRUARY, MARCH, APRIL AND MAY, 1907-06.

Month.	1907	1906	In-crease	De-crease

Mennonites.....	4
Doukhobors.....	33
Chinese.....	
Japanese.....	
Persians.....	
Australians.....	
New Zealanders.....	
Total.....	3,253

Representing 7,809 souls.

Of a total of 962 entries made in May by persons coming from the United States, there were 235 from North Dakota, 204 from Minnesota, 68 from Iowa, 52 each from South Dakota and Washington, 48 from Michigan 43 from Wisconsin and 33 from Illinois.

Lands Patented During May, 1907.

An abstract of letters patent covering Dominion lands situated in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territories, issued from the Department of the Interior during the month of May, 1907, is as follows:—

LANDS PATENTED DURING MAY, 1907.

Nature of Grant.	May, 1907.	
	No. of Patents.	No. of Acres.
British Columbia Homesteads ...	11	1,648.20

From Jan., to May 31, 1907..	9,876.28	\$109,250.88
From Jan., to May 31, 1906..	34,236.66	301,640.79
Decrease, 1907.....	24,360.38	\$192,389.91

Notes.

A number of *Chinese* immigrants entered Canada during June.(\*).

At Regina, Yorkton and Prince Albert, Sask., keen competition was reported for the lands included in certain *Doukhobor reserves*, the rights to which had been cancelled for non-fulfilment of settlement duties.

Representations were made during June to the superintendent of colonization for Ontario by the *Ontario Cannery Association* with the object of securing help during the busy season from among the immigrants arriving in the province. Families in which some of the children are of working age were reported most acceptable.

\* For detailed statement see report of Victoria, B. C., correspondent in present issue.

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING JUNE, 1907.

The following is a list of contracts awarded by the Department of Railways and Canals, and the Department of Public Works, Canada, which have received the signatuers of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the work. A statement of orders for supplies given by the Post Office Department is added.

Department of Railways and Canals.

**D**REDGING at Port Dalhousie Entrance of Welland Canal. Date of contract, June 12, 1907. Amount of contract, 33c per cu. yd. Contractor, W. E. Phin.

Driver, 1 horse & cart	2.50 per day 10 " "
Driver 2 horses and wagon.....	4.00 " 10 " "

#### Post Office Department.

The following orders for supplies were given subject to the regulations for the suppression of the sweating system, the securing payment of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of order.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 562.69
Making and repairing rubber dating stamps and type; also other stamps.....	61.75
Supplying stamping material and wooden boxes and repairing stamping pads.....	1,121.33
Making and repairing post office scales.....	228.50
Supplying mail bags.....	690.55
Repairing mail bags.....	1,627.81
Making and repairing mail locks and supplying mail bag fittings.....	2,391.85
Supplying street letter boxes and repairing portable letter boxes, Rwy. M <sup>1</sup> Clerks Tin Travelling Boxes and Parcel Receptacles.....	638.25
Making and repairing miscellaneous articles of postal stores.....	15.75
Making up and supplying articles of official uniform.....	469.40

#### INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE, 1907

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

**I**NDUSTRIAL accidents occurring to 437 individual workpeople in Canada during the month of June, 1907, were reported

to the Department of Labour. Of these, 156 were fatal and 275 resulted in serious injuries. In addition, 6 fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before June, 1907. The number of fatal accidents reported in June, 1907, was 65 in excess of the previous month and 48 more than in June, 1906. Of 242 returns received during the month giving the ages of the victims of industrial accidents, 32 referred to

persons under 21 years of age, 97 to persons between twenty-one and forty-five, 18 to persons over forty-five; 95 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING JUNE, 1907, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed	Injured	Total
Agriculture .....	15	23	38
Fishing and hunting.....	5	...	5
Lumbering.....	32	18	50
Mining.....	24	23	47
Building trades.....	2	32	34
Metal trades.....	16	70	86

Printing trades.....	...	1	1
Clothing trades.....	...	2	2
Textile trades.....	...	2	2
Food & tobacco preparation .....	...	4	4
Railway service.....	28	26	54
Navigation.....	16	9	25
General transport.....	7	20	27
Civic employees.....	1	4	5
Miscellaneous.....	4	13	17
Unskilled labour.....	6	12	18
Total.....	156	275	431

**Nature of Fatalities and Accidents.**

The chief disasters of the month were the drowning of seven rivermen employed by a lumbering company at Hamilton Cove, Que.; the burning to death of four members of the crew of the steamer "Crystal Stream" near Cole's Island, N. B.; the burning to death of six miners at Strathcona, Alta.; the death of two railway employees in a wreck at Shawinigan Junction, Que.; the drowning of two prospectors at Temiscaming Falls, Ont., and the killing of two miners by an explosion at Coal Creek, B. C.

**Drowning of Seven Rivermen at Hamilton Cove, Que.**

On June 14, a number of canoes filled with rivermen in the employ of a lumbering concern started to cross above the Falls at Hamilton Cove, County of Saguenay, Que., when one of the canoes containing seven men was caught in the

current and swept over the Falls. The men were all drowned.

**Burning of Steamer "Crystal Stream", near Cole's Island.**

On the morning of June 21, 1907, the steamer "Crystal Stream," laden with hay, while lying at the west wharf of Cole's Island, sixty miles from St. John, N. B., was discovered to be on fire. The fire had evidently caught in the hay from a spark from the smoke-stack, and spread so rapidly that before the members of the crew could be awakened, the whole steamer was in flames. Most of the men were sleeping in the lower deck below the freight and were hemmed in by the fire. Their companions on the upper deck were aroused, but although they used every effort to rescue the others, four were burned to death. Other members of the crew were more or less injured, the engineer, the stewardess, the mate and the purser being badly burned.

**Fire in Mine, at Strathcona, Alta.**

On Sunday night, June 9, 1907, fire broke out in the engine room of Walker's coal mine at Strathcona, Alta. The fire spread rapidly to the elevator over the main shaft. There were five men timbering in the mine at the time, and the night foreman went down to warn them. His retreat was cut off by the flames and he was forced to climb up by the air shaft. In doing so he was burned so that he died a few hours later. The other five men were suffocated.

**Railway Wreck at Shawinigan Junction.**

On the evening of June 5, 1907, the engine of a freight train bound east from Montreal, Que., ran into the rear of a train which was shunting at Shawinigan Junction, causing the death of the fireman and brakeman. Two other employees were slightly injured.

**Drowning Fatality at Temiscaming Falls, Ont.**

On the morning of June 4 two members of a prospecting expedition were drawn over Temiscaming Falls, near New Liskeard, Ont., and were drowned.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE, SERIES F., No. 44

TABLE OF FATAL INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE, 1907.

Trade or Industry.	Locality.	Date.	No. killed.	Cause of Fatality.	
<i>Agriculture—</i>					
Farmer (Rancher).....	North Battleford, Ont.....	June	13	1	Struck by lightning.
"	Near Brockville, Ont.....	"	13	1	Kicked by a cow.
"	Leduc, Alta.....	"	20	1	Struck by lightning.
"	Brantford, Ont.....	"	21	1	Cut hand while chopping, blood poisoning ensued.
"	Burnt River, Ont.....	"	28	1	Explosion of dynamite.
"	Belleville, Ont.....	"	24	1	Died of lockjaw nail pierced foot.
"	Westhorne, Ont.....	"	28	1	Struck by train at crossing.
"	Pincher Creek, Alta.....	"	24	1	Drowned, in Pincher Creek.
"	South Durham, Que.....	"	23	1	Struck by lightning.
"	Shelburne, Ont.....	"	26	1	Beam fell on head at barn raising
"	Millbrook, Que.....	"	12	1	Heavy timber fell on him
Farm hand.....	Meaford, Ont.....	"	12	1	Rafter fell on him at a barn raising
"	Gore, Que.....	"	10	1	Struck by an engine.
Farmer's son.....	Rodney, Ont.....	"	1	1	Kicked in stomach by steer.
Farmer's wife.....	Markham, Ont.....	"	21	1	Thrown from and run over by vehicle.
<i>Fishing &amp; Hunting—</i>					
Fisherman.....	Fifteen Point, P. E. I.....	"	15	1	Drowned, boat upset.
"	St. George's, P. E. I.....	"	15	1	Drowned, boat upset.
"	Stonehaven, N. B.....	"	26	1	Drowned, boat upset.
"	Bathurst, N. B.....	"	26	1	Drowned, boat upset.
"	St. Peters P. E. I.....	"	26	1	Drowned, thrown out of boat.
<i>Lumbering—</i>					
Logger.....	Near New Westminster, B. C.....	"	4	1	Struck by falling tree.
"	Burnaby, B. C.....	"	7	1	Struck by falling tree.
"	Lachine Rapids, Que.....	"	3	1	Drowned, portion of raft broke up.
"	Sand Lake, Que.....	"	7	1	Drowned while log rolling.
"	Mars River, Que.....	"	10	1	Drowned while log rolling.
"	Rawdon, Que.....	"	10	1	Drowned while log rolling.
"	Malbaie, Que.....	"	11	1	Drowned while log rolling.
"	Island Lake, B. C.....	"	11	1	Drowned while log rolling.
"	Port Arthur, Ont.....	"	14	2	Drowned, boat upset in rapids.
"	Hamilton Cove, Que.....	"	14	7	Drowned, boat swept over falls.
"	Shuswap River, B. C.....	"	15	1	Drowned, while log rolling.
"	Salmon River, B. C.....	"	17	1	Struck by falling tree.
"	St. Agnes de Charlevoix, Que.....	"	3	1	Drowned on drive.
"	St. Alphonse, Que.....	"	3	1	Drowned on drive.
"	Coulonge River, Ont.....	"	29	2	Drowned on drive.
Saw mill hand.....	Melfort, Sask.....	"	1	1	By collision between lumber cars
"	Digby, N. S.....	"	3	1	Struck by board flying from saw.
"	(owner) Boscobel, Que.....	"	3	1	Crushed by saw logs.
"	(hand) Amqui, Que.....	"	8	1	Fell 40 feet.
"	(foreman) Danwegan, Alta.....	"	13	1	Cut in two by circular saw.
"	(hand) Ottawa, Ont.....	"	20	1	Struck by board from saw.
"	(hand) Hull, Que.....	"	21	1	Fell 25 feet from lumber pile.
Pulpmill worker.....	Grand Mère, Que.....	"	20	1	Head caught between paper rollers.
"	Hawkesbury, Ont.....	"	19	1	Factory chimney in gale fell on him.
<i>Mining—</i>					
Miner.....	Cobalt, Ont.....	June	3	1	By explosion of dynamite.
"	Strathcona, Alta.....	"	9	6	By fire in mine.
"	Rock Bay, B. C.....	"	7	1	By falling boulder.
"	Lake Abitibi, Ont.....	"	13	3	Drowned.
"	Sydney Mines, N. S.....	"	17	1	Run over by mine train
"	Coal Creek, B. C.....	"	21	2	By explosion in mine.
"	Marble Mountain, N. S.....	"	20	1	By explosion of dynamite.
"	Nelson, B. C.....	"	22	1	Lowered by mistake into shaft full of boiling water.

STATISTICAL TABLE, SERIES F., No. 44.

TABLE OF FATAL INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE, 1907.

Trade or Industry.	Locality.	Date.	No. killed.	Cause of Fatality.
Miner	Fort William, Ont.	" 23	1	Suffocated by fumes from blasting.
"	Coal Creek, B. C.	" 18	1	Caught between coal cars & door post.
Prospectors	New Liskeard, Ont.	" 5	2	Drowned in falls.
"	Montreal River, Ont.	" 11	2	Drowned, canoe upset.
Oil well foreman	Petrolia, Ont.	" 27	1	Became entangled in pump machinery.
Cage tender	Rossland, B. C.	" 27	1	Fell down shaft.
<i>Building Trades—</i>				
Mason	Ste. Flavie, Que.	" 6	1	Oven fell in on him.
Builder's labourer	Montreal, Que.	" 19	1	Fell from 6th story of building.
<i>Metal Trades—</i>				
Iron worker	St. John, N. B.	" 10	1	Vault door fell on him.
"	Montreal, Que.	" 11	1	Heavy piece of iron fell on him.
"	St. John, N. B.	" 12	1	Fell down elevator shaft.
"	Toronto, Ont.	" 12	1	Eight ton concrete girder fell on him.
Foreman in steel plant	Hamilton, Ont.	" 6	1	Fell 60 feet from ore conveyor.
Rolling mill hand	Amherst, N. S.	" 13	1	Caught in shafting.
Electrical worker	Port Hope, Ont.	" 24	1	Fell from pole.
Electrical engineer	Kenora, Ont.	" 13	1	Electrocuted.
Electrical worker	Sydney, N. S.	" 10	1	Electrocuted.
"	Aurora, Ont.	" 18	1	Drowned, boat upset.
"	Toronto Junction, Ont.	" 22	1	Electrocuted.
Roofer	Montreal, Que.	" 11	1	Fell from roof.
Structural iron worker	Toronto, Ont.	" 12	1	Concrete block weighing 8 tons fell on him.
"	Walkerville, Ont.	" 21	1	Struck by falling girder.
Shipbuilder	Bridgeburg, Ont.	" 10	1	Drowned, fell out of boat.
"	Niagara Falls, Ont.	" 25	1	Run over by train.
<i>Railway Employees—</i>				
Member of survey party	Mille Isle Rapids, Que.	" 1	1	Drowned.
Night yardman	Cranbrook, B. C.	" 6	1	Run over by train.
Car shop hand	St. Thomas, Ont.	" 14	1	Struck by engine.
Car cleaner	Toronto, Ont.	" 13	1	Found dead in yard.
Car repairer	Vancouver, B. C.	" 24	1	Run over by train.
Engineer	Shawinigan Junction, Que.	" 6	1	In head on collision.
"	Near Sand Point, Ont.	" 14	1	Derailment of train.
"	Lachute, Que.	" 21	1	In head on collision.
Fireman	Shawinigan Junction, Que.	" 6	1	In head on collision.
"	Beatty's Station, Ont.	" 1	1	In head on collision.
"	Brockville, Ont.	" 27	1	Run over by train.
Sectionman	Gurney, Ont.	" 28	1	Run over by train.
Sectionman	Port Credit, Ont.	" 12	1	Struck by an engine.
"	Sault Ste. Marie, Ont.	" 15	1	Run over by train.
"	London, Ont.	" 27	1	Sunstroke while at work.
Brakeman	Eastman's Springs, Ont.	" 23	1	In head on collision.
"	London, Ont.	" 11	1	Run over by train.
"	Magog, Que.	" 11	1	Run over by train.
"	Bordeaux, Que.	" 3	1	Caught between cars.
"	Farnham, Que.	" 17	1	Caught between cars.
"	Liverpool, N. S.	" 14	1	Struck by engine.
"	St. Thomas, Ont.	" 18	1	Struck by engine.
"	Dinorwis, Ont.	" 21	1	Fell from engine.
"	Port Hope, Ont.	" 24	1	While coupling cars.
"	Joliette, Que.	" 8	1	Run over by cars.
"	Near Moncton, N. B.	" 29	1	Fell from moving train.
Construction hand	St. Gregorie, Que.	" 17	1	Struck by heavy piece of timber.
Yardman	London, Ont.	" 22	1	Run over by train.

STATISTICAL TABLE, SERIES F., No. 44.

TABLE OF FATAL INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE, 1907.

Trade or Industry.	Locality.	Date.	No. killed.	Cause of Fatality.
<i>Navigation—</i>				
Longshoreman.....	Montreal.....	"	8	1 Killed by a fellow-workman falling on him 40 ft.
"	Fort William, Ont.....	"	10	1 Drowned, fell off dock.
"	Montreal, Que.....	"	5	1 Fell into hold of vessel.
Captain.....	Near Jackfish, Ont.....	"	28	1 Drowned, fell overboard.
Engineer.....	Near Jackfish, Ont.....	"	—	1 Drowned, fell overboard.
2nd officer of steamer....	Near Rivière du Loup, Que....	"	27	1 Struck on head by towing rope.
Second mate.....	Parry Sound.....	"	29	1 Fell into hold, 26 feet.
Deck hand.....	Vancouver, B. C.....	"	10	1 Drowned.
"	Campbellton, N. B.....	"	11	1 Drowned, fell from dredge.
"	Cornwall, Ont.....	"	20	1 Drowned, fell from steamer.
"	Kingston, Ont.....	"	23	1 Drowned, fell from barge.
"	Revelstoke, B. C.....	"	25	1 Struck by crane.
Crew Str. Crystal Stream	Coles' Is., River St. Joseph, N. B	"	24	4 Burnt to death in fire on vessel.
<i>General Transport—</i>				
Teamster.....	Chicoutimi, Que.....	"	10	1 Cave in of sand and stone.
"	Quebec, Que.....	"	3	1 Thrown out of wagon.
Street railway employee..	Toronto, Ont.....	"	25	1 Fell from top of car, fracturing skull.
Carter.....	Montreal, Que.....	"	18	1 Kicked by horse in abdomen.
"	Hamilton, Ont.....	"	1	1 Kicked by horse.
Liveryman.....	Forest, Ont.....	"	14	1 Skull fractured by kick from horse.
Express messenger.....	Calgary, Alta.....	"	30	1 In train wreck
<i>Civic Employees—</i>				
Town constable.....	Edrans, Man.....	"	3	1 Fell from roof of building.
<i>Miscellaneous—</i>				
Engineer in cement works	Owen Sound, Ont.....	"	13	1 Scalded to death by explosion of steam connection.
Clerk.....	Montreal, Que.....	"	20	1 Crushed to death by elevator.
Grocer's clerk.....	Quebec, Que.....	"	3	1 Thrown from wagon, skull fractured.
Cement worker.....	Raven Lake, Ont.....	"	22	1 Contract with live wire.
<i>Unskilled Labour—</i>				
Labourer.....	Montreal, Que.....	"	14	1 Fell 47 feet in freight shed.
"	Toronto, Ont.....	"	17	1 Cave in of sand and stone.
"	Port Credit, Ont.....	"	13	1 Run over by train.
"	Paris, Ont.....	"	1	1 Struck by a street car.
"	Windsor, Ont.....	"	24	1 Run over by train.
"	Vancouver, B. C.....	"	25	1 Cave in of earth.

FATAL ACCIDENTS HAPPENING IN PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN JUNE, 1907.

Saw mill hand.....	Melfort, Sask.....	May	30	1	In a collision between caboose & engine
Fisherman.....	Sydney, N. S.....	"	31	1	Drowned, boat upset.
Miner.....	Deadwood Camp, B. C.....	"	15	1	Caught between car & side of tunnel.
Surveyors.....	River Bell, Ont.....	"	28	1	Drowned, canoe upset.

**Drowning Fatality on Mountain Lake, Ont.**

On June 18 two prospectors were drowned by the upsetting of their canoes in Mountain Lake, Temagami district, Ont.

**Explosion in Mine at Coal Creek, B.C.**

On Friday, June 21, four workmen who were tunnelling in No. 6 mine at Coal Creek, B. C., lighted two shots in the tunnel and retreated to the outside, where they sat down on a pile of timber about twenty feet from the mouth. The explosion tore away the fan and casing from the mouth of the mine, hurling the timber with which it was built outwards. The flying timber struck and killed one of the men at once, and a second died of his injuries a few hours afterwards. The other two men received scalp wounds.

**Record by Trades and Industries.**

*Agriculture.*—There were 15 fatal and 25 non-fatal accidents during June, 1907, compared with ten killed and 23 injured during the preceding month and 25 killed and 40 injured during June, 1906. Three farmers were killed by lightning, 3 by falling material, 2 by live stock, 2 by tools, 2 by being struck by trains, 1 by an explosion and 1 in a runaway. Of the serious accidents, 4 each were caused by falls, by falling material, by live stock and by runaways, 3 by explosions, 3 by tools, and 1 by being stung by a swarm of bees resulting in blood poisoning.

*Fishing and hunting.*—Five fishermen met death by drowning during June. In May the record was 1 killed and 3 injured, and in June a year ago, 3 killed and 1 injured.

*Lumbering.*—In this industry 32 workers met death by accident and 18 were injured, being 19 deaths and 7 minor accidents more than in the month of May last, and 17 deaths and 4 accidents more than in June, 1906. Twenty of the fatalities were due to drowning, 4 to falling material, 2 each to being struck by wood projected from saws, to falls and to machinery respectively; 1 to being crushed by 2 logs and 1 to being crushed in a collision between lumber cars.

Twelve of the other accidents were due to machinery, 5 to falling material and 1 to being struck by lightning.

*Mining.*—In the mining industry the record for June was 24 killed and 23 injured, compared with 11 killed and 11 injured in the previous month and 14 killed and 12 injured in June, 1906. Seven of the deaths were caused by drowning, 7 by burns, scalds, etc., 5 by explosions and 1 each by falling material, by being run over by a mine train, by machinery, by a fall and by being caught between cars. Nine workmen were seriously injured by explosions, 6 by machinery, 5 by falling material, 1 by live stock, 1 by a fall and 1 by being caught between cars.

*Building.*—There were 2 deaths by accident and 32 workmen injured in this group during June, compared with 6 killed and 16 injured in May last, and 4 killed and 26 injured in June, 1906. A mason at Ste. Flavie, Que., was building an oven when the structure fell in on him, killing him instantly. A builders' labourer at Montreal, Que., was killed by falling from the sixth storey of a house. Sixteen workmen were injured by falling from scaffolds, 9 by falling from roofs of houses, 4 by machinery and 3 by falling material.

*Metal, engineering and shipbuilding.*—In these trades 16 workmen were killed and 70 injured during June, compared with 9 killed and 33 injured in the preceding month and 10 killed and 38 injured in June a year ago. Five of the deaths were due to falling material, 4 to falls, 3 to electric shock, 2 to drowning, 1 to machinery, and 1 to being run over by a train. Thirty of the accidents were due to machinery, 16 to falling material, 9 to falls, 4 to elevators, 4 to molten metal, 3 to flying iron splinters, 2 to electric shock and 2 to explosions.

*Woodworking.*—There were 16 minor accidents in this group, compared with 12 last month, and 1 killed and 16 injured in June, 1906. Fourteen of the 16 accidents were caused by machinery, the other two being caused by flying splinters.

*Printing.*—In June there was only 1 accident, a pressman at Belleville, Ont.,

having his fingers badly crushed in a press.

*Clothing.*—There were 2 minor accidents due to falls in this group, as against 2 in the previous month and none in June of last year.

*Textile.*—Two accidents caused by machinery happened among these workers in June, 1907, compared with 2 in May and 1 in June, 1906.

*Food and tobacco preparation.*—In these trades there were 4 minor accidents in June, compared with 3 killed and 4 injured in May and 4 injured in June, 1906. Two of the accidents were due to run-aways, 1 to the explosion of a bottle of aerated water and 1 to being struck by falling grain boxes.

*Railway service.*—The record for the month was 28 killed and 26 injured, as against 20 killed and 30 injured in the preceding month and 13 killed and 20 injured in June of last year. Ten workers were killed by being run over by trains, 5 by collisions, 4 by being struck by cars, 3 by being caught between cars, 2 by falls, 1 by drowning, 1 by derailment, 1 by a sunstroke and 1 by being struck by a heavy piece of timber. Seven victims of lesser accidents were injured by being caught between cars, 6 by falling material, 4 by collisions, 3 by falls, 2 by derailments, 2 by being run over, 1 by being struck by an engine and 1 by an explosion.

*Navigation.*—In June 16 workmen of this class were killed and 9 injured. In the previous month 7 were killed and 11 injured, and in June, 1906, 11 killed and 7 injured. Seven deaths were due to drowning, 4 members of the crew of the steamer "Crystal Stream" were burned to death; 3 deaths were due to falling material and 2 to falls. Five of the other accidents were due to falling material and 4 to burns or scalds.

*General transport.*—Seven workers in this class were killed during June and 20 were injured, compared with 2 killed and 10 injured in May last, and 3 killed and 8 injured in June, 1906. Three of the deaths were caused by live stock, 2 by falls, 1 by falling material and 1 by a derailment. Five of the minor accidents were caused by collisions, 4 by being run over, 3 by being struck by engines, 3 by live stock, 2 by falling material, 2 by falls, and 1 by being caught between cars.

*Civic employees.*—Among these workers there was 1 killed and 4 injured, compared with 4 minor accidents in the previous month and 1 killed and 9 injured in June, 1906. A town constable at Edram, Man., was killed by falling from the roof of a building. Two civic employees were injured by falls, 1 by falling material and 1 by being struck on the head by a hammer.

*Miscellaneous.*—There were 4 killed and 13 injured in this group, as against 7 killed and 8 injured in May and 6 killed and 24 injured in June of last year. One victim's death was due to being scalded by steam, 1 to being crushed in an elevator, 1 to being thrown to the stone pavement from his vehicle, and 1 to electric shock. Of the other accidents, 6 were due to machinery, 2 to falls, 2 to explosions, 2 to elevators and 1 to falling material.

*Unskilled labour.*—Six labourers were killed in June and 12 were injured. In May 2 were killed and 16 injured, and in June 1906, 1 was killed and 14 were injured. Of the 6 deaths, 2 were caused by the victims being run over by trains, 2 by cave-ins, 1 by a fall, and 1 by being struck by a street car. Seven of the injuries were caused by falling material, 3 by falls, 1 by tools and 1 by being struck by a train.

#### TRADE DISPUTES DURING THE MONTH OF JUNE.

WHILE there was a reduction in the number of trade disputes in existence during June compared with the previous month, there was more industrial unrest than in the corresponding

period of last year. The chief point of disturbance was at Toronto, where there were serious interruptions in the building and metal trades, through the continuance of a strike of plumbers and the

commencement of a strike of machinists. Six of the new disputes of the month affected over 200 men, but as none of them lasted longer than a week, general industrial conditions did not suffer greatly from them.

**Analysis of Trade Disputes During the Month.**

*Number and magnitude.*—The total number of trade disputes reported to have been in existence in Canada during June was 41, a decrease of 8 compared with the previous month, but an increase of 11 compared with June, 1906. About 262 establishments and 5,728 employees were affected by these disputes, those beginning during the month involving about 78 establishments and 3,724 employees.

*Loss of time in working days.*—The loss of time to employees through trade disputes during June was approximately 54,710 working days compared with a loss of 88,325 days in May, and 38,215 days in June, 1906.

*Trades affected by new disputes.*—The following table shows the trades affected by new disputes during the month, and the number of workpeople affected in each group of trades.

Trades.	No. of Disputes.	No. of Workers.
Fishing.....	1	125
Lumbering.....	1	65
Mining.....	1	399
Building trades.....	3	163
Metal trades.....	3	852
Clothing trades.....	1	15
Textile trades.....	2	877
General transport.....	6	1,265
Unskilled labour.....	1	7
<b>Total.....</b>	<b>18</b>	<b>3,669</b>

*Localities affected by new disputes.*—The new disputes of the month occurred in the following provinces of Canada:—

Province.	No. of Disputes.
Nova Scotia.....	3
Quebec.....	4
Ontario.....	9
British Columbia.....	3
<b>Total.....</b>	<b>19</b>

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	Number of Disputes.
For higher wages.....	12
Against reduction in wages.....	1
Against employment of particular persons.....	1
For shorter hours.....	1
For higher wages and shorter hours....	2
Against discharge of an employee.....	1
For higher wages and against discharge of employees.....	1
<b>Total.....</b>	<b>19</b>

*Methods of settlement.*—Of the 41 disputes in existence during the month 23 were terminated, either by definite settlements being reached or by industrial conditions ceasing to be affected. Thirteen disputes were terminated by negotiations between the parties concerned, two were settled by conciliation one through the friendly mediation of the Department of Labour and one through the Bureau of Conciliation of Quebec, and eight disputes were terminated without negotiations.

*Results of disputes.*—In seven disputes that were terminated the employers were successful, ten ended in favour of the employees, compromises were effected in three cases, and in two the strikers were partially successful.

**Disputes Commenced Prior to the Beginning of the Month.**

The trade disputes which were in existence at the beginning of June numbered 22, and comprised the following: Strikes of plumbers at Toronto, Ont., longshoremen at Halifax, N.S., quarry workers at Graniteville and Terrebonne, Que., carpenters at St. John, N.B., Brantford, Ont., Sorel, Que., and Quebec, carpenters and metal workers at Toronto, painters at Hamilton, Ont., marble workers at Toronto, Ont., stonecutters at Hamilton and Thorold, Ont, granite-workers at Montreal, Que., plasterers at Winnipeg, Man., boilermakers, shipwrights and ship labourers at Victoria,

B.C., iron moulders at Guelph, Ont., harness and collar makers at Peterborough Ont., and scowmen at St. John, N.B., A brief account of these disputes is given below.

#### Strike of Plumbers at Toronto, Ont.

No change in the situation was reported in the strike of plumbers of the firm of Messrs. Mashinter & Company at Toronto which took place on April 13 on account of the employment of non-unionists, and in the general strike of plumbers at Toronto, involving about 500 men and 104 firms, which took place on May 15, owing to the refusal of the employers to grant a demand for an increase in wages and the employment of union labour only.

#### Strike of Longshoremen at Halifax, N.S.

A strike of longshoremen which began at Halifax on May 26 was terminated on June 4, when the shipping companies involved granted the demand of the men for an increase in wages from 20 to 25 cents per hour for day work, and from 25 to 30 cents per hour, night work. About 500 men were affected by this dispute. (\*)

#### Strike of Quarrymen at Graniteville, Que.

No change was reported with regard to a strike of quarrymen at Graniteville, Que., which began on April 8, on account of the refusal of 4 firms to recognize the International Quarrymen's Union. About 16 men were affected by this dispute. In the course of the month normal conditions were gradually resumed.

#### Strike of Quarrymen at Terrebonne, Que.

On May 30, a strike of 53 quarrymen employed by 3 firms took place at Terrebonne, Que. According to a report received from a representative of the strikers, the cause of the dispute was the refusal of the employers to grant a demand for a reduction in working hours

\* An account of the action of the Department of Labour with reference to this dispute is given in the June Number of the *Labour Gazette* on page, 1417, and in the article on Proceedings under the Industrial Disputes Investigation Act, 1907, on another page of the present number.

from ten to nine per day, with wages of \$1.50 for the nine hour day. The strike was terminated on June 14, the employers having conceded the demand of their men.

#### Strike of Carpenters at Brantford, Ont.

A strike of carpenters which took place at Brantford, Ont., on May 1, involving 5 firms and about 120 employees, on account of the refusal of the employers to grant a demand for an increase in wages, continued throughout June. It was reported, however, that in the course of the month about 62 men secured work at the rate of wages demanded, several of the smaller contractors having signed the new scale, and some foremen among the strikers having taken contracts and engaged men at the new rate. A number of the strikers sought work elsewhere, and at the end of the month there were only about 10 men still out of work.

#### Strike of Carpenters at Quebec, Que.

A strike of 60 carpenters employed by 6 firms which occurred at Quebec on May 17, was not officially declared off, but industrial conditions ceased to be affected by it. It was reported that all the carpenters were at work at wages varying from 18 to 25 cents an hour, and that in some shops they were working 9 hours a day, but in the majority, 10 hours a day.

#### Strike of Carpenters, Iron and Sheet Metal Workers at Toronto.

On May 23, about 30 men employed on the horticultural building at Exhibition Park, Toronto, stopped work on account of the employment of non-union plumbers and carpenters. About 20 of the strikers were carpenters, and the others were iron and sheet metal workers. On June 4 the dispute was settled, the contractor agreeing to advise his men to join their respective unions. As a result practically all the non-unionists became union men. The contractor also promised that so far as he was concerned there would be no cause for any further trouble on this job.

### Other Disputes

A strike of *carpenters* employed by the Richelieu & Ontario Navigation Company at Sorel, Que., which began on March 27, was not formally declared off, but the Company reported that they were no longer affected as they had secured all the carpenters they required.

A strike of *painters* which took place at Hamilton, Ont., on May 1, on account of the refusal of the contractors to grant a demand for an increase in wages from 30 to 40 cents an hour, was terminated on June 24, when a wage scale at the minimum rate of 30 and 32 cents an hour was agreed on. About 22 firms and 148 employees were affected by this dispute.

No settlement was reached in a strike of *plasterers* at Winnipeg, Man., which began on May 1, on account of the refusal of the employers to grant a demand for an increase in wages to 40 cents an hour. While about 30 firms and 110 employees were originally affected by this dispute, the numbers were reduced to about 20 firms and 70 employees by June 1, the increase in wages having been granted by 10 firms.

A strike of *stonecutters*, which occurred at Hamilton and Thorold, Ont., on May 25, on account of the discharge of an employee by a foreman, was terminated on June 1, the foreman being dismissed. About 16 men were affected by this dispute.

No change in the situation was reported in the case of a strike of 20 *marble workers*, at Toronto Ont., who went out on May 29, because they refused to work with men who were not members of their union. The latter employees, who belonged to a rival labour organization continued at work.

No settlement was reached in the case of a strike of 20 *marble workers* of the J. G. Gibson Company at Toronto, which took place on April 25 on account of the employment of non-unionists. It was reported that the strikers had obtained work elsewhere and that the firm had secured some immigrants to fill their places but were still shorthanded.

No change was reported in a strike of 27 *harness and collar makers* at Peterborough, Ont., which began on April 22,

on account of the refusal of the employers to grant a demand for an increase in wages and for recognition of the union.

A strike of *boilermakers* which began on November 19, 1906, at Victoria, B.C., was officially declared off on June 1. The British Columbia Marine Railway Company, which was involved in this dispute, reported, however, on June 20, that very few of the strikers had gone back to work. The cause of the dispute was the refusal of three firms to grant a demand for a working day of eight hours with the current nine hour scale of wages. About 34 men were originally directly affected by the dispute, and 40 indirectly. The strikes of *shipwrights* and *shiplabourers* arising out of this dispute, which began on November 27 and 28, still continued unsettled.

A strike of *iron moulders* at Guelph, Ont. which began on May 23, and originally affected 2 firms and 32 employees, was terminated on June 17. One firm employing 12 men had granted the demands of the strikers for an increase of 5 per cent in their wages, on May 27, and the other firm, which temporarily had filled the places of most of the strikers in May, granted the demand of their former employees on June 17, and work was resumed by them.

A dispute of *copper miners* of the Marble Bay mine on Texada Island, B.C., which began on March 25, was terminated on May 30, and work was immediately resumed. The settlement was brought about largely by the friendly offices of Mr. H. C. Alexander, police magistrate, before whom a case was brought under the Industrial Disputes Investigation Act, 1907\*.

### New Disputes.

An account of the principal new disputes of the month is given below.

#### Strike of Machinists at Toronto, Ont.

On June 8, about 750 machinists employed in about 50 establishments declared a strike at Toronto, on account of the refusal of the employers to grant a de-

\* An account of the settlement of this dispute is given in a special article on page 1412 of the June number of the *Labour Gazette*.

mand for a reduction in working hours from 10 to 9 a day, without a corresponding reduction in wages. In the course of the month a number of the smaller establishments granted the demand and at the end of June about 400 strikers remained out. Many boilermakers, blacksmiths, moulders and other metal workers were indirectly affected by the dispute.

#### **Strike of Textile Workers at St. Hyacinthe, Que.**

On June 10, a strike of textile workers employed by Penman's Limited, took place at St. Hyacinthe, Que. There is some diversity in the reports received by the Department in regard to particulars of this dispute. According to the employers the cause of the dispute was a demand for a general increase in wages, also interference by the textile workers' union in the discharge of men. They stated that 483 persons were directly affected by the dispute, of whom 224 were males and 259, females, while 41 persons were indirectly affected. The employers stated that the strikers returned to work on June 17, having accepted the rate of wages offered by the Company before they went on strike with the understanding that the Company manage its own affairs with regard to the discharge or retention of employees. On the other hand it was claimed by the Textile Workers' Union, that the causes of the dispute were a demand for an increase in wages and for the reinstatement of officers of the union who, it was alleged, had been discharged simply because they were officers of a labour organization. According to the Union the number of strikers was placed at 525, comprising 235 males and 340 females, in addition to 50 persons indirectly affected. It was stated that a settlement was reached on June 17, through the friendly mediation of M. Felix Marois, Secretary of the Bureau of Conciliation and Arbitration of the Province of Quebec. The men claimed that according to the terms of the settlement the discharged employees were reinstated and a gradual increase in wages was promised. Another report received

stated that the Company promised an increase of 10 and 15 per cent. in the wages of those who were in the lowest, and middle classes in regard to their pay, that the Company would not object to the employees joining a union, so long as they did not seek to make the Company recognize it, and that the discharged men would be taken back.

#### **Strike of Cotton Spinners at Valleyfield, Que.**

On June 17, a strike of cotton spinners, employed by the Montreal Cotton Company took place at Valleyfield, Que. According to the Company, on Saturday, June 15, nine spinners complained of the working of their machines and were told by the manager that the matter would be at once investigated, but on the following Monday they absented themselves and induced all the other spinners to do the same. The management carried out their promise to investigate the complaint and work was resumed on June 21. According to the Textile Workers' Union, the cause of the dispute was the refusal of the Company to grant a demand for an increase in wages. On June 24 it was claimed that a settlement was reached by the Company agreeing to pay their men \$2 a day, which was the amount demanded.

#### **Strike of Freight-Handlers at Port Arthur and Fort William, Ont.**

On June 8, a strike of 250 freight-handlers employed by the Canadian Northern Railway Company took place at Port Arthur Ont., on account of the refusal of the Company to grant a demand for wages amounting to 25 cents per hour for day work, 30 cents per hour for night work and double time for Sunday. The men had been receiving 19 cents per hour for day work, and 21½ cents per hour for night work, with a bonus of 1 cent per hour for every hour worked to be paid in a lump sum at the end of the season to every man who stays till the end. On June 15, the strike was declared off and work was resumed at the old rate, the company having about that time secured about 200 men to carry on the work. On June 8, at the time when the strike

occurred at Port Arthur, about 500 freight-handlers stopped work at Fort William for a similar cause, and returned on June 15, at the old rate. It was reported that they had gone back to work and again stopped several times before the strike was definitely declared at an end.

#### Strike of Freight-Handlers at Halifax, N S.

On June 12, the freight handlers and checkers employed on the Intercolonial Railway stopped work on account of not having received a reply to their request for an increase in wages, which they had made a few days before. On the next day they resumed work, the increase in wages having been granted. About 40 men were affected by the dispute. The following is the new schedule which was presented by the men and agreed to.

First class checkers.....	\$60 per month.
Second class checkers...	55 per month.
Third class checkers ...	50 per month.
Barrowmen and porters	1.75 per day.

On June 29, the inside freight-handlers at Halifax, employed on the Intercolonial Railway declared a strike, the Department of Railways and Canals refusing to accede to their demand for an increase in wages and the establishment of three classes among them, first-class checkers, the foremen checkers to receive \$60 per month; second-class checkers, the receiver of outward freight and inward checkers to receive \$55 per month, and third-class checkers, delivery checkers of inward freight to receive \$50 per month; barrowmen to rank as porters and to receive \$1.75 per day. Schedule to take effect from April 1, 1907, and seniority to count in all cases. Their wages had recently been increased a new scale having gone into effect on April 1. The situation was unchanged at the close of the month.

#### Strike of Teamsters at Montreal, Que.

On June 20, the teamsters employed by the Dominion Transport Company stopped work, on account of the refusal of the Company to grant a demand for an increase in wages. No particulars of this dispute were received by the Department of Labour from either the Company or the employees, but according to reports in the Press, about 325 men were affected. It was

reported that the men had demanded an increase in wages from \$1.60 to \$1.75 per day, and 20 cents per extra for overtime after 6 p.m. On June 21, a committee of the strikers waited on the management of the company and agreed to return to work if the company would grant their demand for higher wages. The increase of 15 cents a day was granted and the men returned to work. The company alleged that they had not been formally notified of the demands of their employees before the strike was declared.

#### Dispute of Coal Miners at Joggin Mines, N.S.

On June 27, about 300 coal miners stopped work at Joggin Mines, N.S. The cause of the dispute was the discharge of a miner by the underground manager, who alleged that this employee had been interfering with the working of the mine, and had threatened violence against him. These charges were denied by the miner who had been discharged, and he claimed to have witnesses to prove his case. The committee of the local lodge of the Provincial Workmen's Association then took up the matter with the General Manager with a view to effecting a settlement. Steps were taken to refer the dispute to a Board under the Industrial Disputes Investigation Act, 1907. Negotiations to this end were pending at the close of the month.\*

#### Strike of Plasterers' Labourers at Toronto, Ont.

On June 1, about 120 plasterers' labourers employed by 10 firms declared a strike at Toronto, Ont., on account of the refusal of the employers to grant a demand for an increase in wages from 30 to 35 cents an hour, for an eight hour day. On June 18, a settlement was effected by which the rate of wages was increased from 30 to 30½ cents an hour. Payment of time and a half for work on Saturday afternoons and for all overtime was also granted.

\* A settlement was effected on July 1 and mining operations were resumed on July 2. The company agreed to reinstate the discharged employee; the men, because of having themselves ceased work before referring the dispute to a Board, waived the claim they had made for compensation because of wrongful dismissal.

DEPARTMENT OF LABOUR, CANADA  
STATISTICAL TABLE, SERIES C., No. 78.

TABLE OF TRADE DISPUTES DURING THE MONTH OF JUNE.\*

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.				Date of termination.	Result.

Freight handlers...	Port Williams, O.	Demand for increase in wages.....	1	600	" 8	Work resumed at old rate.
"	Halifax, N. S.....	Demand for increase in wages from 15 to 20 cents an hour, and 25 cents night work.....	1	40	" 12	Men's demands granted.
"	Halifax, N. S.....	Demand for increase in wages.....	1	55	" 29	No settlement reported at end of month.
Teamsters.....	Montreal, Que....	Demand for increase in wages.....	1	325	" 20	Men's demands granted.
<i>Unskilled Labour—</i> Civic labourers....	Kingston, Ont....	Demand for increase in wages.....	1	7	June 17	Increase in wages, granted from 18 1/2 to 19 1/2 cents per hour.

\* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned; mention, moreover, is not made of disputes involving less than six employees, or less duration than 24 hours,

**Strike of Carpenters at Hamilton, Ont.**

On June 10, carpenters employed by the Canadian White Company declared a strike at Hamilton, Ont., The cause of dispute was the employment of labourers in putting up and taking down false work for concrete beams and floors, or according to the company, in removing centres from reinforced concrete floors, the strikers claiming that this was carpenters' work. The company alleged, that so far as they knew no similar demand had ever been made before by carpenters to do this work. No settlement of this dispute was effected during the month, the firm continuing to employ the labourers, while the strikers remained idle. According to the carpenters' union 30 men were involved in this dispute, but according to the company there were 35 strikers.

**Strike of Plasterers at Peterborough, Ont.**

On June, 17, a strike of 13 plasterers employed by 4 firms took place at Peterborough, Ont. According to a report received from one of the strikers, the plasterers had notified the employers on January 1, that they desired an increase in wages from \$3. to \$3.25 per day to take effect on May 1. The increase in wages not being granted, the plasterers waited six weeks longer and then stopped work. The employers made an offer of \$3.15 per day to the strikers, and some of them returned to work. The employers claimed they were unable to offer any more because the builders were only willing to give them one cent per yard more, instead of two cents, for which they had asked. No trade union was involved in the dispute.

**Strike of Fishermen on Fraser River, B.C.**

On June 22, the Fishermen's Union at New Westminster, B.C., declared a strike on account of the action of the canners in reducing the price of spring salmon from 5 to 4 cents per pound. About 75 men who had been fishing on the Fraser River were directly affected by this dispute and about 50 persons were indirectly affected. Several canneries and some retail dealers were involved in it.

**Other Disputes.**

On June 13, a strike of 65 sawmill hands was declared at Etchemin, Que., on account of the refusal of the employer to grant a demand for an increase in the minimum wages with a proportionate increase in the minimum wages which they had demanded, and a slight increase in the case of some of the others.

On June 6, about 50 *teamsters* employed by the Hendrie Cartage Company at Hamilton, Ont., declared a strike on account of the refusal of the Company to grant a demand for an increase in wages from \$42 to \$45 per month. On June 11 most the strikers returned to work on the promise of the Company to investigate their claims for an increase in wages, but some of them sought other employment.

On June 25, a strike of *iron moulders* employed by the Schaaque Machine Works took place at New Westminster, B.C. The cause of the dispute was the refusal of the employers to grant a demand for an increase in wages from \$3.75 to \$4.00 per day and a reduction in working hours from 9 to 8 per day. About 12 men were directly affected by the dispute and 15 indirectly. No settlement was reported during the month.

On June 3, about 15 *cloak workers* employed by the Novi Modi Cloak Company of Toronto declared a strike, on account of the refusal of the employers to grant a demand for an increase in piece work prices amounting to from 10 to 20 cents per garment. After the strikers had been out nearly a fortnight, a settlement was reached and work was resumed. The dispute did not affect the whole establishment.

On June 1, about 400 *builders' labourers* declared a strike at Ottawa, Ont., on account of the refusal of the contractors to grant a demand for an increase in wages from 22 to 25 cents an hour, and to recognize a committee of the union. The dispute only lasted five hours, when the employers agreed to confer with the building labourers' union, and granted the demand for a minimum scale of 25 cents an hour.

On June 17, a strike of 7 *civic labourers* employed by the Board of Works of

Kingston, Ont., on concrete work for sidewalks, took place, the dispute arising from a demand for an increase in wages. On June 24 work was resumed, an increase in wages having been granted from 18 1-3 to 19 2-9 cents per hour.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of June and which have been reported to the Department.

## REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during June 1907:

### ONTARIO REPORTS.

#### Industrial Conditions in Ontario.

Seventh Report of the Bureau of Labour of Ontario for 1906. Toronto, King's Printer, 1907. Pages, 198.

THE Report of the Ontario Bureau of Labour makes mention of the establishment by the province of two free employment bureaus, one at Hamilton, and the other at Ottawa. The office at Hamilton was established on January 12, and on the 31st of that month there were registered 119 applicants for work, including journeymen of nearly all the principal trades, although the majority of applicants were labourers or unskilled hands. During the same period the employers registered 40 vacancies. From February 1 to 12, 38 unemployed registered, 13 vacancies were recorded, and 2 positions were filled. The employment bureau at Ottawa, which was established on January 18, reported 44 registered applicants for work and 35 positions for which help was required, from that date to February 14. As in previous years the Report contains replies from the Clerks of the principal municipalities of the province mentioning the new industries which have been established, and the industrial opportunities of the respective cities and towns. Some important industrial statistics are given, which were compiled from returns received from 133 manufacturing establishments. In these establishments there were employed 8,505 persons. The aggregate number of days in operation amounted to 43,718, an average of 284 days for each person. The gross value of the product was \$18,473,139, and the

wage bill amounted to \$3,458,914, equivalent to an annual average wage of \$406.69, or a daily wage rate of \$1.48, an increase of 22 cents per day over 1905. The Report also contains a number of extracts from various government publications of industrial subjects of general interest.

### BRITISH COLUMBIA REPORT.

Report of the Fisheries' Commissioner for British Columbia for the year 1906. Victoria, B. C., King's Printer, 1907. Pages 40.

The Fisheries' Commissioner of British Columbia in his Report for 1906 calls attention to the danger of the total destruction of the salmon fishing industry, if further restrictions are not imposed upon the capture of the sockeye salmon. In 1906, the catch in the Fraser river amounted only to 183,007, compared with 293,477 in 1902. The records show a steady decline in other recent years, comparing them in four year periods.

### UNITED STATES REPORTS.

#### Industrial Conditions in Wisconsin.

Twelfth Biennial Report of the Bureau of Labour and Industrial Statistics. State of Wisconsin, 1905-1906. Madison, State Printer, 1906. Pages, 1379.

The twelfth biennial report of the Bureau of Labour and Industrial Statistics of Wisconsin is divided into seven parts. Part I, contains an account of the co-operative movement in the United States. In Part II, the statistical aspect of strikes is discussed on the basis of official reports of the United States and various foreign countries. Part III deals with the liquor traffic in the United States and in Wisconsin. The other parts of the report deal with the housing problem in Wisconsin, the resources, industries and opportunities in that

State, manufacturing returns for 1904 and 1905, factory and bakery inspection and free employment offices.

#### OTHER REPORTS RECEIVED.

*Great Britain.*—Index and Digest of Evidence to the Report and Special Report from the Select Committee on Housing of the Working Classes Acts' Amendment Bill.

Report of the Departmental Committee on Bobbinite. Report and Appendices.

Report on an Explosion of Nitroglycerine at Factory No. 3, Ayr.

Report by the Local Government

Board for Scotland as to the Proceedings of Distress Committees in Scotland from the Date of their Appointment to the 15th May, 1906.

*New South Wales.*—The Industrial Arbitration Reports and Records. Vol. V., Part 5., 1906.

*Austria.*—Bericht über die Tätigkeit des K. K. Arbeitsstatistischen Amtes im Handelsministerium während des Jahres, 1906.

*France.*—Album Graphique de la Statistique Générale de la France.

*Germany.*—Protokolle über die Verhandlungen des Beirats für Arbeiterstatistik, Mai, 1907.

#### RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

#### EXCHEQUER COURT CASES.

##### Negligence of Fellow Employees.

JUDGMENTS of great importance to employees in the service of the Government Railways were recently given in two cases in the Exchequer Court of Canada, on petitions of right filed by the widows of two employees of the Government Railways, who were killed while in the performance of their duty on the Intercolonial Railway.

Two petitions were filed, one by Dame Marguerite Armstrong, widow of H. C. Goddard, an engineer, who was killed at De Lotbinière Station in the Province of Quebec, owing to the fault of a fellow employee; and the other by Dame Desrosiers, widow of a brakeman, who was killed at Sayabec Station under like circumstances.

As the question is an important one and establishes the jurisprudence as to the application of the law of the Province of Quebec to like cases, the full text of the judgment of the Exchequer Court in the Armstrong case is published, as follows:—

Remarks of Mr. Justice Burbidge when rendering judgment.

The petition is filed by the suppliant to obtain relief for herself and her two minor daughters for the death of her husband alleged to have been occasioned by the

negligence of the servants of the Crown. The action is based upon clause (c) of the 16th section of The Exchequer Court Act (50-51 Vict., 16); see also R. S. C., 1906, c. 140, s. 20 (c), by which it is provided that The Exchequer Court shall have exclusive original jurisdiction to hear and determine every claim against the Crown arising out of any death or injury to the person or to property on any public work resulting from the negligence of any officer or servant of the Crown, while acting within the scope of his duties and his employment. Prior to the 23rd June, 1887, when the act of the Parliament of Canada (50-51 Victoria, chapter 16) came into force the subject had in Canada no remedy by petition of right for any wrong done to him by a servant of the Crown. (The Queen vs. McFarlane, 7 S. C. R., 216; and The Queen vs. McCleod, 8 S. C. R., 24). The Act 33rd Victoria, chapter 23 (R. S. C., c. 40, s. 6) had made provision in such cases for a proceeding before the Official Arbitrators but no petition of right would lie in any such case. In 1887 the jurisdiction that the Official Arbitrators had theretofore exercised was, by the act first mentioned, transferred to this Court; and that jurisdiction was in that respect defined in the terms of the clause of the Act cited (50-51 Vict., c. 16, s. 16 (c)). This provision has been considered and discussed in a number of cases in this Court, and on appeal in the Supreme Court of Canada, with the result (so far as the judgments of these courts may determine the matter) that it has been settled that the provision referred to not only gave jurisdiction to the court, but imposed a liability upon the Crown to answer in such cases for the wrongful acts of its officers and servants. (The City of Quebec vs. The Queen, 2 Ex. C. R., 269; 24 S. C. R., 429, Filion vs. The Queen, 4 Ex. C. R., 144; The Queen vs. Filion, 24 S. C. R., 482; Ryder vs. The King, 9 Ex. C. R., 330; 36 S. C. R., 462; Paul vs. The King, 36 S. C. R., 126.) I think too that it may be taken to be settled by the general concurrence of judicial opinion in the cases referred to that it was the intention of Parliament that the liability of the Crown should be determined by the general law of each province in force at the time when such liability was imposed. If that is the true construction of the statute it will happen that the Crown will be liable to answer for its servants' wrongs in one province, when under like circumstances there might be no liability in some other province of the Dominion. That aspect of the matter is illustrated by Filion's case (4 Ex. C. R., 144; 24 S. C. R., 482), where the cause of action arose in the province of Quebec, and Ryder's

case (9 Ex. C. R., 330; 36 S. C. R., 462), where it arose in the province of Manitoba. In the latter case the petition failed because the negligence proved was that of a fellow servant of the deceased; while in the former case it was sustained, although the negligence complained of was also that of a fellow servant of the deceased; it being held that such a defence was not open to a defendant under the laws of the province of Quebec. And in the present case, the question arises as to whether or not the Crown's liability is to be determined as a subject's would be by reference to the provisions of article 1,056 of the Civil Code, which provides that in all cases where the person injured by the commission of an offence or a quasi offence dies in consequence, without having obtained indemnity or satisfaction, his consort and his ascendant and descendant relative have the right, but only within a year after his death, to recover from the person who committed the offence, or his representatives, all damages occasioned by such death. That provision formed part of the general law of the Province of Quebec not only in 1887, when the Act 50-51 Victoria, chapter 16, was passed, but also in 1870 when the Official Arbitrators' Amendment Act, 33 Victoria, chapter 23, was enacted. If that provision is applicable to cases where the death results from the negligence of the Crown's servants acting within the scope of their duties or employment on a public work in the Province of Quebec, the Crown's liability will, in that province, be different from what it is in the other provinces of Canada. Dealing with a similar question, Sir Henry Strong, C. J., in *The City of Quebec vs. The Queen*, (24 S. C. R., 429) is reported as follows: "It can make no difference that all the provinces save one derive their common law from that of England; the circumstance that the private law of one province, Quebec, is derived from a different source, makes it impossible to say that there is any system of law apart from statute generally prevalent throughout the Dominion. No inconvenience can result from this, since every case which could arise would be provided for by the law of some one or other of the provinces." I think the question as to whether article 1056 of the Civil Code of Lower Canada is applicable to cases where the death is occasioned by the negligence of a servant of the Crown acting within the scope of his employment upon a public work in the province of Quebec, should be answered in the affirmative. And although such a construction of the statute makes against a uniform law throughout Canada respecting the Crown's liability in such cases, the Crown will not, after all, stand in any different position in that respect to any railway company or other corporation which carries on its business in several provinces of the Dominion. The accident which occasioned the death, on the day following, of the suppliant's husband, occurred on the 26th September, 1903, in the province of Quebec, at De Lotbiniere Station, on the Intercolonial Railway, a public work of Canada. The deceased was a locomotive engineer, and at the time of the accident was on duty on his engine, which was derailed at the station mentioned. The accident happened because one Albert Charland, a fireman employed on another train on the railway, failed properly to set and lock a switch that, under the particular circumstances of this case, it was his duty to open and close. It is admitted that he failed to lock the switch; and the weight of evidence leads, I think, to the conclusion that he also failed to set it properly. The case is, I think, within the provisions of clause (c) of the 16th section of the Exchequer Court Act (50-51 Vict., chap. 16, sec. 16 c.) that has been cited. That leads to the consideration of a defence on the part of the Crown, which is stated in the following terms: "8. The deceased, Holsey Cleveland Goddard, became during his life time and was at the time of his death, a member of the Intercolonial Railway Employees' Relief and Insurance Association, class C. 9. Under the constitution, rules and regulations of the said association, of which the deceased had been furnished with a copy and the certificate of membership issued to him, and in which he had nominated his wife,

Marguerite Henrietta Jane Armstrong, the above named suppliant, as the person to receive all the insurance moneys accruing upon the said certificate, the suppliant became entitled on the death of the said Goddard to receive from the association the sum of \$250 insurance money. 10. The said sum of \$250 was duly tendered by the said association to the said Marguerite Henrietta Jane Armstrong, who refused to accept the same. 11. By the constitution, rules and regulations of the said association it was provided that in consideration of the annual contribution from the Railway Department to the association, the Railway Department should be relieved of all claims for compensation for injury to or death of any member. The Railway Department made the said contribution. 12. It was further provided that all permanent male employees of the Intercolonial Railway should be contributors to the said association during their employment. It was one of the terms on which the said Goddard sought and accepted employment on the Intercolonial Railway that he would become a member of the said association and be bound by its constitution, rules and regulations. 13. The said Goddard, in his life time, by his contract of employment with the respondent, released and discharged the respondent from and agreed that the respondent should not be liable for any claim or demand of the kind sued for, including the suppliant's claim herein." Except that in the present case the suppliant has not as yet accepted the insurance money to which she is entitled, the defence does not, in this aspect of the case, differ materially from that which came under consideration in *Grenier vs. the Queen* (6 Ex. C. R., 276). In that case it was in this court held that the defence failed. In the Supreme Court of Canada, on appeal from this court, the defence was sustained. (*The Queen vs. Grenier*, 30 S. C. R., 42). It is now contended that the result of the decision in *Miller vs. The Grand Trunk Railway Company of Canada* (1906, App. Cases, 187) is to overrule *The Queen vs. Grenier*. It seems to me that the contention is well founded and that the defence upon which the Crown relies in this cannot, in view of their lordships' decision in *Miller's* case, be sustained. In the latter case, following *Robinson vs. The Canadian Pacific Railway Company* (1892, App. Cases, 481), it was held, contrary to what had been held in the Supreme Court in *The Queen vs. Grenier's* case, that the right of action conferred by article 1056 of the Civil Code of Quebec on the widow and the relatives of a deceased employee, whose death has been caused by negligence, for which the employer is responsible, is an independent and personal right of action; and not, as in the English Act known as Lord Campbell's Act, conferred on the representatives of the deceased only; and, that a provision in a by-law of a society to which the deceased belonged, and to the funds of which the defendant company subscribed, that in consideration of such subscription no member of the society or his representatives should have any claim against the company for compensation on account of injury or death from accident, did not constitute a good defence of the widow's action. The insurance money to which she became entitled under the rules of the society did not proceed from the company, had no relation to its offence and was equally payable in case of natural death; and the deceased could not, by reason thereof, be said to have obtained indemnity or satisfaction within the meaning of article 1056 of the Civil Code. That case is not, I think, distinguishable either from the *Grenier* case or from this one. There will be a declaration that the suppliant is entitled to the following relief, that is to say:—To recover from the Crown for damages sustained by the death of her husband: (1) For her own use the sum of five thousand dollars; and (2) in her quality or capacity of tutrix for her minor children the sum of two thousand five hundred dollars, the latter sum to be apportioned as follows, namely: One thousand dollars to Hilda Foster Goddard, and one thousand five hundred dollars to Lyall Wurtelle Goddard. The suppliant will also be allowed the costs of her petition.

In the Desrosiers case, acting upon like principles, the Court gave judgment in favour of the suppliant, for \$3,000 for herself and \$1,000 for her child.

[Armstrong v. The King; Desrosiers v. The King; 24th June, 1907; Burbidge, J.]

## ONTARIO CASES.

### Conspiracy in Restraint of Trade.

As a result of the prosecution during 1905 and 1906 of the Master Plumbers' and Steamfitters' Association and the Central Supply Association of Toronto,\* a decision has recently been given by Chief Justice Sir William Mulock upon the trial of certain members of the Central Supply Association which is of great interest to the public.

Defendant Peter McMichael and others were indicted for a conspiracy under section 520 of the Criminal Code, the indictment containing counts bringing the charge within sub-sections (a), (b), (c) and (d) of the section.

A. A. McMichael, one of the defendants, has died since the trial, and defendant Bush was not proceeded against. The case against Peter McMichael alone is dealt with.

The evidence showed that, continuously since 1st May, 1902, Peter McMichael has been the Manager of the Dominion Radiator Company, an incorporated company carrying on business in Toronto as dealers in radiators and boilers. For some time previous to 1903, there existed an association of plumbers and steamfitters called the "Master Plumbers' and Steamfitters' Association," and also another association of dealers in goods required by plumbers and steamfitters, known as the "Central Supply Association". Negotiations having been conducted between these two associations by representatives of each with a view to an understanding being arrived at in regard to matters of interest to the members of each, in May, 1903, an agreement was reached and reduced to writing as follows:

"Memorandum of agreement between the Master Plumbers and Steamfitters' Association and the representatives of the undersigned supply houses. Whereas

negotiations have been under way for some months between the parties, hereto, with a view to improving the conditions of the trade generally, and to protect the Master Plumbers' and Steamfitters' Association, by giving the Association a preference over non-members of all plumbing and steamfitting goods purchased from the undersigned firms. It is hereby agreed between the parties hereto as follows: That the members of the Master Plumbers' and Steamfitters' Association will endeavour to buy all goods for their work from, and will give the preference on all purchases where prices are equal to the jobbing and supply houses signing this agreement. That the undersigned supply houses will not sell to the general public plumbing goods, steam, hot water or gas fittings, but when prices are asked from them, they may quote parties wanting an idea of cost not less than 25 per cent. over the association prices. That the undersigned supply houses will not sell plumbing goods or steamfitting, hot water or gas fittings (except steam pipe and fittings), to the trade generally, except at an advance of 20 per cent. upon the prices quoted to members of the Master Plumbers' and Steamfitters' Association, and that they will give the said members in good standing, unless otherwise notified, by the Association, a preference of 20 per cent. on all purchases made by said members better than the figures at which they will sell a like quantity and quality of similar goods to persons in the trade who are not members of the Master Plumbers' and Steamfitters' Association."

This was signed on behalf of ten companies, one, the Dominion Radiator Company, Limited, signed by P. McMichael, Manager. The terms of the agreement were arrived at as a result of meetings between a committee of the Plumbers' and Steamfitters' Association, Mr. McMichael and others. This agreement continued in force until the autumn of 1904, when the parties entered into another and more rigid agreement.

It was held by the Court that the agreement above set forth contravened the provisions of section 520 of the Criminal Code, as did that also of 1904. The goods, the subjects of each agreement, were articles or commodities which were properly the subject of trade and commerce. The agreement of 1904, was also one to unduly limit the facilities for supplying or dealing in them, restrain or injure trade or commerce in relation thereto, to unreasonably enhance their price and to unduly prevent or lessen competition in their purchase, sale and supply. Defendant Peter McMichael, as manager of the Dominion Radiator Company, conducted the negotiations with representatives of the Plumbers' Association, which culminated in the agreement of May, 1903. On behalf of that company he personally signed the agreement. Thereafter, as manager of the company, he endeavoured to have his

\* Special articles dealing with this question were published in the January, February and March, 1906, issues of the *Labour Gazette*, at pp. 773, 905, 1022.

company live up to the terms of the agreement. As representative of the company, he took part in negotiations which led to the making of the agreement of October, 1904, and the issuing of the lists or directions with a view to his company carrying out the terms of this latter agreement, and endeavouring to cause his company to live up to the terms of this latter agreement. His conduct was not merely that of acquiescence, but of personally promoting the agreements in question, and of causing his company to carry out their terms. Having thus actively aided in the bringing about of these illegal conspiracies or agreements, he was held to be, under the Code, liable as a principal. He was accordingly found guilty of the offence charged against him under section 520 of the Criminal Code, and a fine of \$250 was imposed upon him, together with the costs incurred in and about his prosecution and conviction, and with, in default of payment within one month, imprisonment for three months

(Rex v. McMichael, 26th June, 1907, Mulock, C. J.)

#### False Representations to Intending Immigrants.

At Brantford, Ont., the secretary-treasurer of the William Buck Stove Company was charged with inserting in a Scottish newspaper an advertisement for stove mounters and moulders, in which it was stated that there was no strike or labour unrest at the Buck establishment. The charge was preferred by a stove moulder previously employed by the company, but at the time on strike. The members of the firm and two stenographers testified that they had no knowledge of the advertisement and that no communication had been had with the secretary of the Manufacturers' Association or the Secretary of the Employers' Association with reference to the matter. The case was dismissed.

(Mathers vs. Parker, Woodyatt, P. M., Brantford, Ont.)

#### Conviction under the Alien Labour Act.

A conviction under the alien Labour law occurred on June 26, at Blind River, Ont., before Mr. T. E. Williams of Thes-

salon, Ont., Police Magistrate, in the case of the Spanish mills company. Proceedings had been instituted by Mr. B. M. Wylie of Echo Bay, Ont., and an investigation showed that a breach of the law had been committed on April, 21, 1906, when the Company had pre-paid transportation to an alien under contract to work at Spanish, Mills, Ont. Owing to the length of time since the breach of the law had occurred, and its being the first charge of an infringement of the act in the district, Mr. Williams imposed the minimum penalty of \$50 with costs. Mr. Wylie, the informant, having made application for a proportion of the penalty imposed in accordance with section 11 of the Act, the Minister of Labour has recommended to the receiver general that the maximum proportion of 50 per cent payable under such circumstances be paid to Mr. Wylie.

(Rex vs. Spanish Mills Co., June 26, 1907; T. E. Williams, P. M. Thessalon.)

#### Appeal in Damages Action Dismissed.

In the case noted at page 818 of the Labour Gazette for January, 1907, on an appeal taken by the defendants the Court of Appeal has confirmed the verdict and judgment at the trial in favour of plaintiffs for \$10,000 damages for the killing of John A. McKay, a C.P.R. engine driver who was killed in a collision between his train and a train of defendants at a crossing near St. Thomas.

(McKay v. Wabash Railway Co., 28th June, 1907, Court of Appeal.)

#### Claim for Fifteen Years Wages.

In the case noted at page 215 of the Labour Gazette for August, 1906, an appeal taken by defendant, the Court of Appeal has reduced the amount awarded at the trial to the sum of \$765 and otherwise dismissed the appeal.

(Chalk v. Wigle, 5th June, 1907, Court of Appeal.)

#### Question of what Law Applicable to Suit for Damages.

Plaintiff brought action against defendants for damages for the death of her husband, an engineer who was killed while in the employ of the defendants, in the Northwest Territories.

The jury found negligence on the part of defendants and awarded plaintiff \$8,000 damages.

Defendants objected that the law of the Province of Alberta should have been proved and that there was no evidence of negligence to go to the jury.

After reserving judgment the trial Judge held that the Northwest Territories Act, R.S.C., 1886, chap. 50, secs. 11 and 12, and R.S.O., 1897, chap. 73, sec. 21, disposed of the first objection and that there was evidence which could not be withdrawn from the jury connecting the negligence charged and found by the jury with the commencement of the series of events that resulted in the death of plaintiff's husband in the manner found by the jury and entered judgment in accordance with the verdict.

(Woolsey v. Canadian Northern R. W. Co., 5th June, 1907, Falconbridge, C. J.)

#### Judgement in Damage Action Confirmed.

The Divisional Court has confirmed a verdict and judgment at the trial in favour of plaintiff for \$800 damages for personal injuries. Plaintiff was engaged as a sawyer in the defendants' broom manufactory at St. Thomas. On 12th January, 1907, plaintiff, in order to replace a belt upon a pulley, stood upon a ladder, supplied for that purpose, which broke beneath him, precipitating him to the ground, and resulting in very serious injuries. The defendants denied negligence on their part and pleaded contributory negligence on the part of the plaintiff.

(Swanton v. Thomas Bros., Ltd., 19th June, 1907, Divisional Court.)

#### Appeal in Damage Suit Allowed.

An Action was recently brought by the widow of John Wilson to recover damages for his death. The deceased was in the employment of defendant as a fireman in a brick factory at Todmorden, near Toronto. On the night of 6th July, 1906, the deceased was, as plaintiff alleged, engaged in his ordinary duties, and owing to defendant's negligence in employing an insufficient force of men, the deceased was compelled to leave his engines to go into the buildings in which the drying and cooling rooms are situated, in order

to transfer the cars from the drying room in to the cooling room. The tracks on which the cars ran were on a grade, and the cars were held back by blocks of wood laid across the tracks. These blocks the deceased had to remove in order that the cars might run into the cooling room. The wheels of the cars were jammed against the blocks and considerable force was necessary to remove the blocks. While he was thus engaged his head was caught between the car and the upright post between the tracks. His skull was crushed and he was instantly killed. The jury gave a general verdict for plaintiff and also answered certain questions and assessed the damages at \$1,500. On an appeal by defendant it was contended that there was no reasonable evidence to support the findings of the jury and the Court of Appeal adopted this contention and allowed the appeal and dismissed the action.

(Wilson v. Davies, 28th June, 1907, Court of Appeal.)

#### Appeal in Damage Suit Dismissed.

Plaintiff was a deckhand in the employment of defendants upon their steamer "Macassa," plying between Toronto and Hamilton. On the morning of September 17th, 1906, the steamer stopped at the Burlington Canal pier, and plaintiff was handling the rear line at the timberhead, when his foot caught by the rope and cut off. Plaintiff charged that the defendants were guilty of negligence in that they did not protect plaintiff from interference from the crowd by fencing the timberhead off from the rest of the deck. At the trial the jury found that the defendants were guilty of negligence that caused the accident; that the negligence was "the mate not instructing Frawley to coil the rope properly, and allowing the passengers to displace the coil of rope, causing the coils to be scattered;" that the injury was caused by the negligence of the mate, and that plaintiff could not by the exercise of ordinary care have avoided the accident. They assessed the damages at \$1,300. On an appeal by defendants they contended that there was no evidence to support the findings and there should be a non-suit or at least

the findings should be set aside and a new trial directed. The Court of Appeal, however, dismissed the appeal and confirmed the judgment at the trial.

(Frawley v. Hamilton Steamboat Co., 28th June, 1907, Court of Appeal.)

#### Judgment of Interest to Express Drivers.

The responsibility of the drivers of an express company to make delivery of goods entrusted to their care was affirmed by a decision given by Judge Gunn in the Division Court at Ottawa recently. In April last Joseph Butler, who was a driver for the Canadian Express Company was given three cases of eggs to deliver to an Ottawa firm. He stated that he went around early in the morning, before the consignees' store was open, and in order to have the firm get the goods as soon as possible, left them in the doorway. He called around in the afternoon to get the receipt for the delivery of the goods signed and was informed that the eggs had not been received. The Express Company had to pay the consignor \$17, the value of the eggs and deducted the amount from Butler's wages. The latter brought suit against the Company to recover this amount, but the Judge held that as the Company had to make good the amount to the consignor it was entitled to keep it out of Butler's wages.

(Butler v. Canadian Express Co., 26th June, 1907, Division Court.)

### QUEBEC CASES.

#### Prescription in Damage Suits.

Judgment was recently given in the Superior Court at Montreal in an action brought by the plaintiff, an employee of defendants, to recover damages for injuries received by him while working at a carding machine on February 15th, 1905.

The Court held that the action having been taken more than a year after the accident, the plaintiff had no right to judgment as the suit for damages, for bodily injuries, was prescribed by twelve months. The Court decided against the claim of the plaintiff that the prescription began only at the time the plaintiff had his fingers amputated. An employee of the defendants had advised the doctors

not to cut off the fingers. This advice however, must be regarded as charitable advice and not as binding on the defendants to the extent of interrupting prescription.

(Versailles v. Merchants Cotton Company; 24th June, 1907; Charbonneau, J.)

#### Joint and Several Liability for Damages.

Paul Perepelitza, a labourer employed in the construction of the Montreal harbour sheds, fractured his left arm by falling from the second story of one of the buildings.

The accident occurred through the giving way of a loose plank which was placed across the steel beams, and upon which he was walking. Holding the Clinton Fireproofing Company, which had charge of the work, responsible for this accident, as well as Vladimir Petriff, who had control of the labourers, Perepelitza entered an action against both, jointly and severally, for \$3,000 damages. Judgment was rendered by the Superior Court of Montreal recently maintaining the defendants' joint responsibility and condemning them to pay plaintiff \$1,500 damages.

(Perepelitza v. Clinton Fireproofing Co., et al.; 18th June, 1907, Bruneau, J.)

#### Duty of Employer to furnish Medical Attendance for Injured Employee.

On the 21st January, 1906, plaintiff, who was then a man of 51 years of age, enjoying robust health, was working for the company defendant under its foreman, loading contractor's plant upon flat cars. There were six or seven men working together. A large square block of wood, weighing seven to eight hundred pounds, and formed of two square beams, had to be placed upon a flat car, and to perform this operation a derrick was used. The block was put on the car by means of the derrick, but it was found that it would have to be rolled over to make room for other material. This block had one spike stuck into it which projected. The chain connecting with the derrick had a hook at the end of it, and this was attached to the spike, to roll the block over into the proper position. Plaintiff warned the foreman

that the chain would slip. The foreman paid no heed to the warning and instructed plaintiff and another workman to place their hands on the block, without indicating any particular place where they should take hold. These instructions were given so that there would be no swinging of the block, and so that it would not fall endwise. A rolling hitch was made and the block was raised about two feet, when the hook at the end of the chain slid off the spike. The block rolled off, fell to the ground, and in doing so, the little finger of plaintiff's right hand got caught by the spike projecting from the block. This finger was inside the mitten plaintiff was wearing on his right hand. Plaintiff immediately went to the storeroom of the defendant, which was nearby, and in charge of one of the defendant's witnesses. There was no hot water in the storeroom, and the man in charge advised the plaintiff to wash his wound at the tap, which plaintiff did not do, being advised by someone else that it would be best to bind it up in the flowing blood. He followed the latter advice, and after receiving some wadding, which he used to cover his finger, rested there about ten minutes and then went home. Neither the plaintiff nor the foreman considered that the wound was serious; the defendant did not secure a surgeon and the plaintiff did not consult one on the day of the accident, which happened on a Sunday. The following Friday, plaintiff returned to his work, and performed some manual labour with his left hand. On Friday night he felt intense pain in his right arm. He then consulted a woman, who told him his hand was poisoned, and who prescribed hot potato skins as a remedy. Feeling no better, he called in a doctor. This was thirteen days after the accident, and he remained under his care until the 28th June, 1906. Plaintiff did not work for thirteen months; he was accustomed to earn \$1.50 a day. The doctor's account amounted to \$267.25.

The Court, in rendering judgment, said: "The company defendant did not help plaintiff by obtaining surgical

assistance when he met with the accident, and the plaintiff did all that could be expected from a man in his sphere of life to obtain such remedies as he could secure. The little finger of his right hand was bruised and poisoned owing to the said accident, and it is so stiffened that he cannot articulate it. The plaintiff's right hand is partially, but seriously and permanently disabled to a considerable degree owing to the accident. I consider the damages resulting from the accident are attributable to the imprudence of the defendant's employees. Considering the doctor's bill, the permanent disability, the extra expense incurred by his illness, his loss of wages, and his loss of earning power in the future, I fix the damages suffered by plaintiff at \$1,600, for which sum I give judgment against the defendant with interest and costs."

(Delorme v. Locomotive & Machine Co.; 13th June, 1907; Guerin, J.)

#### Damages Due to Collapse of Building.

A jury in the Superior Court at Montreal recently awarded damages to the extent of \$1,999 for injuries sustained by plaintiff, a workman engaged in the construction of a building which collapsed while plaintiff was engaged at his work.

(Dallaire v. Dominion Park Co.; 2nd May, 1907; Guerin, J.)

#### ENGLISH CASE.

##### Common Employment—Negligence of Fellow-Servant

A servant, in entering his master's employment, takes upon himself the risk of negligence on the part of his fellow servants whatever position they hold, and there is no exception to this rule in the case of dangerous employments, or in the case of the employment of infants, where there is a duty to warn the servant of the danger, and where the master has delegated that duty to another person in his employment, and that other person has been guilty of negligence in not giving proper warning.

(Cribb v. Kynoch; 15th May, 1907; Divisional Court.)

THE

# LABOUR GAZETTE

AUGUST, 1907.

---

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF  
JULY, 1907.

I.—GENERAL SUMMARY.

THERE was little change in industrial and labour conditions throughout Canada during July as compared with June. The crop outlook was about the same, the consensus of opinion being at the close of the month that the western wheat yield would be somewhat less than that of 1906, but that the yield of coarse grains would be heavier. Prices are on a higher level than in 1906, and it is anticipated that the monetary return for the present year's crop will be equal to that for the crop of 1906. There was an increase during July in the demand for men for railway construction work, and in anticipation of the western harvest season. Men were also in demand in the mining industry in Nova Scotia, Quebec and British Columbia. The stringency in the money market, however, caused a curtailment of building in some localities, and manufacturing and trade expansion was affected by the same cause. The lumbering industry had a very busy month. Good catches were reported from the Atlantic fisheries, but in British Columbia the run of sockeyes was small. Transportation companies of all classes reported the volume of traffic in excess of that of any previous year at the same season, as a result of the heavy immigration and tourist trade, and of the exceptionally large quantity of grain and general freight that was being moved.

#### Changes in Wages and Hours of Labour.

The following is a statement, by in-

dustries and groups of trades, of the more important changes in wages and hours of labour reported to the Department during July:—

*Building.*—Bricklayers (600) at Winnipeg, Man., obtained an agreement involving an advance of 5 cents per hour on January 1, 1908, the agreement to remain in force until May, 1909. A half-holiday on Saturday was also granted. Plumbers and steamfitters' helpers at Calgary, Alta., had their wages increased, the former from 45 to 51½, and the latter from 25 to 30 cents per hour.

*Metal, engineering and shipbuilding.*—Electrical workers at Halifax, N. S., obtained an increase of \$1.50 per week in wages.

*Printing.*—At Toronto, Ont., an agreement affecting compositors, pressmen, mailers, electrotypers, stereotypers, bindery women, press feeders, and other members of the allied printing trades went into effect<sup>(1)</sup>. At London, Ont. also, printers received an advance<sup>(2)</sup>. The allied printing trades at Brantford Ont., had their hours decreased from 8½ to 8 per day, on July 1, in fulfillment of an agreement entered into in 1906.

*Textile.*—Dye house labourers at Sherbrooke, Que., had their wages increased five cents per day dating from July 12. At Montmorency Mills, Que., an increase of

---

(1) A copy of this agreement is published in the present issue, under the heading "Recent Industrial Agreements."

(2) See report of London correspondent.

12½ per cent. in wages was granted to cotton mill employees.

*Miscellaneous.*—Barbers and civic employees at Windsor, Ont., received an increase in wages. (³).

*Railway service.*—Conductors, brakemen and baggagemen in the employ of the Quebec Central Railway obtained an increase dating from July 1. Enginemen and firemen in the employ of the Canadian Pacific Railway Company on western lines obtained an increase.

*Street railway employees.*—An advance in wages amounting to 2 cents per hour was granted to employees of the Toronto Railway Company.

### Cost of Living.

Prices in general remained on a high level during July. Flour and bread were upward in some localities. Anthracite coal advanced in price at London, St. Thomas and other points in Western Ontario. Some advances in the price of the product of the Alberta and Crow's Nest Pass coal mines were reported. The high price of brick and other building material had a tendency to discourage building, notwithstanding the active demand for housing accommodation in nearly all of the large industrial centres. Planing mills were affected by the same conditions. Textiles were upward in tendency. Hides, pig iron and copper showed declines during July.

### Interruptions to Industry.

The number of trade disputes in existence during July was twelve less than in June, but there was an increase of approximately 22,415 in the number of working days lost. Compared with July, 1906, there was an increase of ten in the number of disputes, and an increase of 49,415 in the number of working days lost.

Among industrial establishments, etc., destroyed by fire or through other causes during July, 1907, the following, as reported in the press of the Dominion, may be mentioned:—

*Nova Scotia.*—Wood and pulp mills at Murray; the McDonald Block at Louisbourg; sinking of Str. Senelac in collision at Halifax, loss \$100,000.

*New Brunswick.*—Business portion of Hartland, loss, \$250,000; dye house and storehouse at Milltown; lath and shingle mill at St. Margaret's; dye and store house at St. Stephens, loss, \$10,000.

*Quebec.*—Business portion of Arthabaskaville, loss, \$35,000; bakery at Black Lake; lumber piles at Hull, loss, \$2,500; paint factory at Montreal, loss, \$12,000; mattress factory at Montreal, loss, \$6,000; general store and post office at Portneuf; academy rolling rink at Quebec, loss \$10,000; bakery at Rivière du Loup, loss, \$1,500; store and dwellings at St. Henri, loss, \$4,000; church at St. Hyacinthe. Collision between steamer Prescott and 2 other vessels at Montreal, loss, \$200,000.

*Ontario.*—Saw mill at Barnston, loss, \$3,000; peat mill at Fort Francis; boiler house at Guelph; boat house and boats at Hamilton, loss, \$2,000; lumber yard at Lakefield, loss, \$38,000; stores at Maynooth, loss, \$20,000; lumber establishment, sash and door factory; fire station, hotel at New Edinburgh, Ottawa, loss, \$350,000; nitro-glycerine works at Petrolea; wall paper factory at St. Catharines, loss, \$12,000; drug store at St. Thomas, loss, \$2,000; paint factory at Toronto, loss, \$25,000; stables and sheds at Toronto, loss, \$2,000; dye works and store at Toronto, loss, \$4,000; coöperage at Wallaceburg; stores at Winchester, loss, \$40,000; collapse of stores at London, loss, \$100,000.

Barns at Aylmer, Grimsby and Welland.  
Destruction of gasoline yacht by explosion at Toronto, loss, \$18,000. Loss of steamer Tuscarora by collision near Port Hope.

Large forest fires were reported in the vicinity of Sault Ste. Marie.

*Manitoba.*—Oil Warehouse and sheds at Brandon.  
• *Alberta.*—Two theaters and stores at Edmonton, loss, \$25,000.

*Saskatchewan.*—Barn near Wilcox.  
*British Columbia.*—Shingle mill at Hastings, loss, \$10,000; canning factory and shingle mill at Vancouver, loss, \$10,000; storehouse and tin store at Vermillion, loss, \$2,000; five blocks of buildings at Victoria, loss, \$250,000; coal mine at Union, Vancouver Island.

### Conditions in the industry and Trades.

Conditions of employment during July in the several industries and trades throughout Canada, as indicated by the reports of correspondents to the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

#### Agriculture.

Interest centered during July in the progress made by the grain and fruit crops. On the whole, weather conditions in western Canada were favourable, with abundance of warmth and moisture, and the outlook showed little change as compared with June. Drouth was reported in a few sections of southern Manitoba, but the area affected was small and conditions were relieved in the latter half of

(³) See report of Windsor correspondent.

the month. Estimates compiled by grain and railway companies, banks and other authorities, were to the effect that the wheat yield would probably be less than in 1906, but that the yield of barley and oats would be greater.

In Saskatchewan the estimated acreage under grain in 1907, as compared with 1906, is as follows:—

Grain.	1907.	1906.
Wheat.....	1,965,774	1,730,586
Oats.....	764,170	639,873
Barley.....	60,995	53,565
Flax.....	86,483	76,005
Speltz.....	871	768

The increase in wheat is 13.07 per cent; in oats, 19.42 per cent; in barley, 13.87 per cent; in flax, 13.78 per cent, and in speltz, 13.41 per cent.

It was expected that the harvest in Western Canada would be from 10 to 15 days later than last year, beginning about August 25 and becoming general about September 1.

In Alberta conditions were uniformly favourable, with the exception of certain sections in the southern portion of the province.

In Ontario and the eastern provinces, weather conditions were favourable and good growth was reported, though the straw will be short. Haying was in general progress in the closing week of the month; and though the yield was much heavier than had been anticipated, the average was not exceeded except in a few localities. Reports from Quebec and New Brunswick were more favourable than elsewhere. In Nova Scotia, especially on low lying lands, hay was short. Oats will probably be below the average in the eastern provinces. There was a fair yield of small fruits, but vegetables suffered from frost in south-western Ontario. Other fruits made fair progress upon June conditions. Root crops promised exceptionally well throughout Canada.

Farm help continued scarce in Ontario,

the Eastern Townships, Que., and the Maritime Provinces. The scarcity has led to an increased use of machinery by farmers.

Cheese exports were of fair volume during July, but butter was light. An inquiry was recently conducted by the Deputy Minister of Agriculture for Ontario, the Provincial Director of Dairy Instruction and the Chief Instructor for Eastern Ontario, through the 32 instructors employed by the Department, into the question of Sunday work in connection with the manufacture of cheese. It was shown that in western Ontario, out of 218 factories, only 68, and in eastern Ontario less than one quarter of the 1,000 factories, take in milk on Saturday nights and manufacture it into cheese. In the majority of cases where milk is thus taken in, it is found impossible to complete the work before twelve o'clock, though in most cases it is completed by 2 a.m. To obviate this, it would be necessary that the milk be retained either in the home of the patrons or at the factory, both of which, in many cases, are without storage facilities or ice. It was found, therefore, that to prohibit Sunday work in cheese factories would cause a large waste of milk. It was recommended, therefore, that for the present year permission be granted to continue Saturday night work in cheese factories until not later than 5 a.m., on Sunday morning, notification to be given to dairymen throughout the province that it will be necessary next year to comply fully with the requirements of the Lord's Day Act, and that arrangements for the storage or other utilization of the milk must be made during the interval.

Under the High School Act of Ontario, the trustees of a high school, or any number of boards of trustees, may engage the services of persons holding the degree of Bachelor of Science of Agriculture, or a certificate of qualification from the Ontario Agricultural College, to give instruction in agriculture to the pupils, provided that such course of instruction shall not supercede the instruction of the teacher in charge of the school, as required by the regulations

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue on several trades and industries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

of the Education Department. As no schools in the province have, up to the present year, taken action in this matter, the legislature made a special vote at the past session to assist in covering expenses of such instruction in certain high schools to be selected. The high schools selected were Collingwood, Galt, Essex, Lindsay, Perth and Morrisburg, and a circular embracing the course of study is being prepared. It is anticipated that the course may be more largely taken up at a later date, and that other schools may make provision for this special instruction in agriculture.

An Ontario branch association of the American Poultry Association was organized during July.

#### Fishing.

Fair catches were reported from the Maritime Provinces. The lobster season closed under favourable conditions, notwithstanding the late opening of the season. It is expected that the financial result will exceed that of last year, the average price paid at the factories in Prince Edward Island being \$1.75 per cwt., though in some localities payment is made by count. It was estimated that 188 lobster canning factories were in operation on the island this year, employing 5,000 men and 3,000 girls, the number of boats being 2,000. For the first time in the history of the province, live lobster stock was shipped to Boston. In Cape Breton the fishing season was extended to August 10 in order to compensate for the delay and damage to gear caused by drift ice during the spring. Fish were reported plentiful in certain points in Lake Erie, but in other localities catches were light. At a meeting of the National Fisheries' Society held at Erie, Pa., the adjustment of differences between fishermen of the United States and Canada operating on the great lakes, was discussed. Few sockeyes had been taken on the Fraser river, B. C., up to July 20. The traps off Vancouver Island also reported light catches, though a fair number of springs was taken. At Rivers' Inlet, the Skeena River and other northern fishing grounds, fish were reported somewhat scarce. A shortage

of labour was also reported. Some heavy catches of whales off Vancouver Island were made in the opening week of the month, and operations looking to the extension of the industry were in active progress. Sessions of the British Columbia Fishery Commission were held at Victoria during July.

#### Lumbering.

Sawmills were very busy in Ontario, Quebec and the Maritime Provinces. Prices continued firm, but the general demand was less active, and shipments were on a less extensive scale than in June. It was estimated that upwards of 4,000,000 spruce logs have been floated down the St. Maurice river this season, of which 2,500,000 were for Canadian pulp and paper mills. Wages in connection with the employing of men for the coming season in the woods were the same as last year, ranging from \$28 to \$35 per month with board. In British Columbia the mills were working to full capacity. In view of the continued scarcity of good logs, prices slightly advanced, and a number of logging camps which had closed down during June re-opened, while others were working on half shifts preparing skid roads and machinery. It is expected that the camps will again be manned by full gangs on August 1. It was estimated that the entire cut of lumber in British Columbia during the year ended June 30 would be in the neighbourhood of 678,687,324 feet. Wages remained on a high level both in the camps and in the mills.\*

The fourth annual meeting of the Lumbermen's Association of Nova Scotia was recently held at Yarmouth, N. S. Papers were read dealing with the preservation of Canadian forests and water supply, forest protection and perpetuation, forest growth, etc.

The work of supplying trees to farmers and settlers on prairie lands by the Forestry Branch of the Department of Agriculture, Canada, has been actively in progress since the opening of the pres-

\* For statement re prevailing scales see April, 1907, issue of *Labour Gazette*, page 1051.

ent season. Large plantings of trees on the Dominion forest reserves in Western Canada have also been made.

### Mining.

The producing and shipping facilities of the Nova Scotia collieries were worked to their utmost capacity during July in the effort to overtake the falling off in shipments caused by drift ice in the early months of the year. A considerable gain has been made on the shortage reported in June. In Quebec pronounced activity in the mica and asbestos mines continued, operations exceeding in extent those of any previous year, with men in demand at several points. Favourable reports were received from North Hastings, Ont., with regard to the production of iron ores. At Cobalt, Ont., a general strike of miners was declared on July 8, causing a diminution in the output† In the oil producing regions of Ontario, further developments were reported. The first run of iron shipped from the Antikokan mines was made during July at Port Arthur, Ont. The company was reported to have large orders on hand for pig iron. The coal mines in Alberta and British Columbia were working to full capacity, additional labour being taken on as available. In the metalliferous mines of British Columbia, also, the month was exceedingly busy and the output heavy. From the low grade mines of the Boundary district, shipments during the present year will show a gain on those of 1906, which amounted to 1,161,537 tons. In 1900, the first shipping year, the total was 100,000 tons. It was stated also that a number of additional men could find employment in the mines and smelters of the Boundary district, notwithstanding that a considerable influx of labour took place during the first half of the month. Ten of the fourteen furnaces of the district were in blast, and it was stated that the number would be added to as soon as the necessary labour was available.

### Manufacturing.

Conditions showed little change as compared with June. Establishments in almost every branch of the industry were busy. The stringency of the money market had the effect of checking in some localities the rapid expansion in equipment that has been in progress for some time past. With the prospect, however, of favourable market conditions in western Canada during the present season, the output remained steady and on a heavy scale.

In connection with the manufacture of beet sugar in Canada, it was reported by the manager of the Ontario Sugar Beet Company, Limited, at Berlin, Ont., that the factory was in operation 120 days during the past season, during which period 52,567 tons of beets were consumed and approximately 10,250,000 pounds of granulated sugar manufactured. The weather conditions affecting the harvesting of the beets and their delivery at the factory in 1906 were favourable, and the price paid for raw material slightly less than in the previous year. The Wallaceburg Sugar Company, Limited, reported that its factory was in operation 96 days and nights, and sliced 54,000 tons of beets. Weather conditions were unfavourable, many of the beets received being unfit for factory purposes. The price paid for beets was \$4.39 per ton in 1906, compared with \$4.73 in 1905. Steam drying apparatus is being installed in the factory for converting the beet pulp into cattle food. At Raymond, Alta., the factory of the Knight Sugar Beet Company, Limited, was operated for about 60 days, during which time 18,295 tons of beets were sliced and 4,673,300 pounds of sugar manufactured. The labour problem was reported serious, over 200 acres of beets having been left in the ground last year owing to shortage of help. Five dollars per ton was paid for beets delivered at the factory since the industry began. The Government of Ontario decided at the last session of the legislature not to continue the payment of bounty on the manufacture of beet sugar, the payments made on the basis of production of 1906 being the fifth and last.

† A special article dealing with the causes of this dispute, and with the action of the Department of Labour in connection therewith is published elsewhere in the present issue.

### Railway Construction.

The month was exceedingly busy, with railway construction labour in active demand, especially in western Canada, where large numbers of additional men were taken on. Good headway in the grading of the prairie section of the National Transcontinental railway was reported, and it is expected that the work will be finished to Edmonton, Alta., this year. Track laying has been hampered by a scarcity of railway ties. Favourable reports were received with regard to grades in the mountain section of the road. About 4,000 men were constantly employed on the section between Winnipeg and Lake Superior Junction. With the approach of the harvest season, a general scarcity of labour is anticipated, in view of the extensive nature of the operations in progress.

Contracts were awarded for additional locomotives and rolling stock for the Intercolonial railway, including a large number of freight engines and box cars. The Grand Trunk Railway Company made some important additions to rolling stock during July, it being estimated that about \$7,000,000 worth of rolling stock has been received by the company in the past year. The Canadian Pacific railway will also add a number of heavy locomotives to the Mountain division. It was stated that a new steamship would be added to the Pacific service of the Canadian Pacific Railway Company. Two new vessels for the lake service will be brought from Great Britain to Canada during the coming autumn.

On July 6, a new lift lock, situated at Kirkfield, Ont. on the Trent Valley Canal, was formally opened for traffic by the Hon. Rodolphe Lemieux, Postmaster General and Minister of Labour. The opening of the lock will render the portion of the canal extending from Barrie on Lake Simcoe to Healey's Falls, a distance of 160 miles, available for traffic. The total length of the waterway from Georgian Bay to Lake Ontario is estimated at 220 miles.

### General Transport.

Railway employees of all classes had an exceptionally busy month. Tourist

and immigration traffic was very heavy, and the movement of freight greater than in any previous year at this time. Some shortage of cars was reported in Alberta and British Columbia, the saw-milling and mining industries being inconvenienced thereby. Shipping by water was also very active, as shown by the tonnage returns of vessels using the Canadian canals and ports. The total traffic through the Sault Ste. Marie canals, for example, during June amounted to 17,788,319 tons, nearly 3,000,000 tons greater than during the same period in 1906. The shipping trade between Pacific coast points and the Orient continued to increase in volume, orders for flour, in particular, having been greater than western millers were able to supply. On the great lakes the movement of grain and miscellaneous freights was very heavy, the demand for vessels of all classes of tonnage being greater than the supply. Traffic between Lake Erie and the Georgian Bay was stated to exceed in volume that of any previous year.

A series of tests of motor passenger cars were made on the Intercolonial Railway between Shediac and Moncton, with satisfactory results.

A readjustment of railway freight rates throughout eastern Canada went into effect by order of the Board of Railway Commissioners. The Grand Trunk Railway Company was also ordered by the Commission to provide third-class passenger accommodation every day over its line between Montreal and Toronto, at the rate of a penny a mile. The results of an investigation into the equipment of the Canadian Northern Railway, conducted by order of the Railway Commission, were announced during July. The investigation was held in view of the interruption to traffic which took place on this system during the winter of 1906-07. The equipment of the Company on April 15, 1907, was found to be 6,077 cars available for the handling of freight traffic and 167 locomotives; this was declared to be inadequate to handle the traffic offering at the different points of the railway. It was stated that orders for 2,070 additional cars and for 127 new locomotives for delivery this

season were placed. This, it was thought, would furnish ample accommodation for this year's probable business. Orders for 110 locomotives, for delivery in 1908, have also been placed by the company. Additional snow fighting equipment, round houses, repair shops, and a better operated system were recommended.

Sessions were held by the Canadian Grain Commission at Bristol, England.

### The Trades.

*Building.*—These trades continued very active. The high price of material and the stringency in the money market had the effect of lessening the number of new contracts, but the outlook in most localities is for busy conditions until the end of the season. In western Canada, in particular, the amount of building in progress is very heavy, though in Winnipeg returns up to the third week of the month showed a falling off as compared with 1906. At Regina, Sask., building permits amounting to \$850,000 had been issued up to the middle of July. In Saskatoon, Sask., the amount of building contracted for is estimated to be in excess of \$450,000.\*

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers, machinists, boiler-makers, etc., had a busy month. Steam engineers were also busy, and electrical workers and linemen very busy. The shipbuilding trades were very active.

*Woodworking and furnishing.*—Sash and door factories were busy, except in localities where the high price of material and the shortage of money has caused a falling off in building. Other woodworking establishments had a good month. Coopers were busy.

*Printing.*—The allied trades had a very busy month, with additional men in demand in several localities.

*Clothing.*—The month was somewhat quiet among journeymen tailors and boot and shoe workers, from seasonal causes. Garment workers, however, were very busy.

*Food and tobacco preparation.*—Bakers have been busy since the beginning of the

warm weather. Millers have been busy, with flour prices very firm, notwithstanding a decline in wheat. Ice deliverers were in their season of greatest activity. Confectioners were becoming very busy.

*Leather.*—Tanners, curriers, trunk and bag makers, etc., had a fair month.

*Miscellaneous.*—Retail clerks, delivery employees, etc., had an active month; early closing arrangements were in effect in a number of centres. Barbers, hotel and restaurant employees, cab drivers, etc., were very busy, as a result of the heavy tourist traffic. Laundrymen were very busy.

*Unskilled labour.*—The demand for this class was greater than the supply in many localities, in view of the extensive railway construction and civic improvement work in progress. Wages were for the most part on the high level established during the active season of 1906.

### Canadian Trade and Revenue.

*Foreign trade.*—During June, 1907, the total value of imports entered for consumption was \$34,103,585, compared with \$32,920,981 in June, 1906. Total domestic exports during June, 1907, amounted to \$19,309,851, compared with \$27,249,984 in June, 1906. The only increase in exports during the month was under the heading of agriculture, while decreases were shown under the headings of The Mine, The Fisheries, The Forest, Animals and Their Produce and Manufactures.

The Commercial Agent of the Dominion in Japan reported that trade between Canada and that country last year amounted to \$2,477,686, an increase of about \$500,000 compared with the preceding year. During the first four months of the present year, Canadian exports of flour to Japan have amounted to \$45,946 in value.

*Imperial trade.*—According to reports received from Commercial agents at the Department of Trade and Commerce, Canada, box boards and office furniture are in demand at Manchester, England and evaporated apples at Bristol, England. An opening for fresh meats and coal exists in Newfoundland. There has been a de-

\* See reports of local correspondents, in particular Montreal, Toronto, Vancouver and Victoria.

crease during the past year in exports from Canada into Trinidad and Tobago, but good openings prevail for Canadian boots and shoes, carriages, soap and salt fish, in these islands. From South Africa a large and important market for agricultural products, animal produce and manufactured goods is reported. There has been a heavy increase during the past year in exports to Australasia; Favourable trade conditions prevail both in New Zealand and Australia.

*Domestic trade.* — Notwithstanding some degree of dullness due to the mid-summer season, the turnover of dry goods was fair during July, with orders for fall goods well maintained. Sorting orders were heavier than had been expected throughout Canada. Textile prices were very firm. Hardware and building materials were in very active demand. Leather was quiet, and there was an accumulation of hides. Money continued tight and collections somewhat slow, leading to a contraction of credit, especially in western Canada, though clearing returns at Winnipeg, Man., and elsewhere, continued to show heavy increases compared with 1906.

The second annual report of the Home Bank of Canada showed profits at the rate of 10 per cent on paid-up capital. An addition of \$60,000 was made to rest account during the past year, and the sum of \$10,000 reserved for expenses in connection with the opening of new branches. Deposits and total assets showed increases. Four branches were opened during the year.

*Canadian Revenue.* — Canadian revenue during July, 1907, amounted to \$9,058,590.03. For the four months ending July 31, total revenue was \$32,291,888.61. The expenditure on capital account for July amounted to \$2,055,850.16.

The Canadian Bank statement for June, 1907, showed total assets of \$958,342,257, compared with \$951,069,950 in the previous month. The total liabilities for June, 1907, were \$781,075,593; in the previous month the liabilities amounted to \$777,285,285. The notes in circulation amounted to \$75,510,402 in June, 1907, and to \$75,503,009, in May. Deposits payable on demand totalled \$170,042,326 in June, and \$172,065,976 in May.

### Notes.

The official call of the fifth *Annual Convention* of the National Trades and Labour Congress of Canada to take place in Glace Bay, N. S., commencing Tuesday, September 10, was issued on July 8. The Twenty-third annual session of the Trades and Labour Congress of Canada will be held at Winnipeg, Man., beginning September 16.

A special committee of the Legislature of Ontario was appointed to investigate the subject of *prison labour*, and to make recommendations with a view to its utilization in such a way as not to interfere with free labour.

A meeting of Canadian *meat packers* was held at Ottawa on July 17 for the purpose of discussing regulations drafted under the Meat and Canned Food Inspection Act passed at the last session of Parliament.

By Order in Council dated July 3, Mr. Felix Marois, Clerk of the Council of Conciliation and Arbitration, of the City of Quebec, was appointed an *inspector of industrial establishments* and public buildings for the Province of Quebec.

The annual report of the *Hudson's Bay Company* showed a revenue of £197,689 from trading and £258,879 from sales of land. Ten years ago these profits were respectively £55,780 and £5,137. The average price received for farm lands in 1901 was \$4.90 per acre, compared with \$9.78 per acre during the past year.

It has been decided to organize a *Co-operative association* for the distribution of staple commodities under the auspices of the Independent Workingmen's Club of Sherbrooke, Que. The association will be incorporated under the provincial act relating to co-operative societies, passed in 1906. The club has a membership of about 350. The shares of the association are placed at \$5.00 each, the maximum number obtainable by any one member to be 50 shares. A committee has been appointed to complete the work of organization.

The first *Convention on Irrigation* in Western Canada was held at Calgary, Alta., July 17. In the official call for

the convention the following were among those invited as delegates: Dominion cabinet ministers and members of the Dominion Parliament; all ministers and deputy ministers and members of the legislatures of Saskatchewan, Alberta and British Columbia; representatives of newspapers, railways and colonization companies, agricultural associations, municipal organizations, boards of trade, etc. A number of papers were read, and a resolution passed recommending the immediate appointment of a commission to enquire into the present status of the water laws in Saskatchewan, Alberta and British Columbia, with the view of bringing about uniformity in the same.

Statistics relating to recent industrial expansion in a number of localities were published during July. At Hamilton, Ont., new factories and additions to the value of \$700,000 have been projected within the past six months. According to estimates made by the compilers of the city directory recently completed, for Montreal, Que., the population of that city is shown to be 434,000 for the city and suburbs, an increase of 29,000 compared with 1906. According to statistics issued by the *Winnipeg Development and Industrial Bureau*, organized in 1906, there are at present 144 factories located in Winnipeg, employing in the neighbourhood of 12,000 hands. Twenty one new concerns have been established in the city during 1906 and 1907. The total number of employees in the city is estimated at upwards of 20,000.

Among *Conventions* of employers or employees held in Canada during July were the following: The annual convention of the *Glass Bottle Blowers' Association* of the United States and Canada, held at Toronto, Ont. the fourth annual convention of the *Master Painters and Decorators' Association* of Canada, held at London, Ont., about 150 delegates being present; the twelfth annual convention of the *Quebec branch of the Retail Merchants' Association* of Canada, held at St. Jean, Que., on July 18; the eighth annual convention of the *Ontario Division* of the Retail Merchants' Association of Canada, held at Hamilton, Ont., on July 10. A resolution was passed at the last mentioned, expressing opposition to the bill introduced in the Dominion Parliament during the Session of 1906-07, providing for the establishment of co-operative undertakings. At the annual meeting of the Toronto branch of the *Canadian Manufacturers' Association* it was stated that there are, at present, 1,200 industrial establishments in the city employing 70,000 persons. Employment is available, according to statistics collected by the Association, two months ago, for 10,000 additional female workers in Toronto, and 15,000 additional at other points in the province. Reference was also made at the meeting to the expansion of trade and the local scarcity of artizan's houses. At the annual meeting of the *Montreal* branch of the association, technical education among other subjects was discussed at length.

## II. REPORTS OF LOCAL CORRESPONDENTS.

### SYDNEY, N. S., AND DISTRICT.

*Mr. John Moffatt, correspondent*, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were active throughout the month in all the leading industries, including workshops, factories, foundries, railways, etc. During the latter

part of June, coal shipments showed a decrease of over 100,000 tons. To overtake this shortage, the coal companies have been rushing work in their collieries. Considerable gains were made during the month. Pictou and Inverness counties are over 40,000 tons ahead. The small collieries of Cumberland, which for some months in the spring were working broken time, due to a shortage of cars, are now running steadily. Though prospecting was being carried on by the Dominion

Steel Company, no developments of note have been begun. The steel industry continued active. The Sydney works received an order for 45,000 tons of steel rails, which with previous orders assures its activity for two years. The Nova Scotia Steel Company was active, with large orders ahead. The Londonderry Iron Company had a fair month. Railway transportation was heavy and shipping brisk. The building trades had a good month, and have a fair amount of work ahead for the balance of the season. Wholesale trade was active, and a satisfactory retail trade was done. Since the Glace piers were put in repair, the harbour has taken on its old time appearance of activity. Coasting vessels in large numbers call for coal cargoes, which are more rapidly loaded than at the larger coal piers. The carpenters of this district were recently in many individual cases given increases..

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—All crops but hay will be up to the average. The cold weather caused a meagre hay crop, especially on low-lying lands, throughout the Province, though on high lands an average yield was obtained.

*Fishing.*—The fishermen had fair success during July, but will not be able to make up the losses sustained by ice early in the season.

*Mining.*—The Government of Nova Scotia has recently been gathering information with the intention of establishing technical schools. The agents have gone over the whole province meeting interested parties. It is understood that besides establishing technical schools, the mining schools are to be graded, and uniform text books provided by the Board of Public Education. Tutors will be provided to teach those at first unable to enter the regular mining classes.

The coal and iron workers of Sydney Mines are negotiating with the Nova Scotia Steel Company with the view of building a hospital. The Provincial Workmen's Association is taking an active part in the project. Committees

have been appointed, and the Board of Directors has been authorized to draw up suitable laws for the regulation of the institution. Port Hood has increased its daily output since winter by 200 tons, and is yielding an average of 400 tons per day. The Wabana ore pier of the Dominion and Iron Steel Company was destroyed by fire, causing a slight delay to shipments. The Company has erected a temporary pier while the permanent one is being rebuilt.

#### CONDITION OF PARTICULAR TRADES.

All the skilled trades were active throughout the month, with few exceptions.

#### WESTVILLE, N. S., AND DISTRICT.

*Mr. T. Hale, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have been active in all branches. The output of the several collieries exceeded that of the previous month by about 5,000 tons. The steamers carrying coal to Quebec and Montreal ports were making good time, and although there was considerable delay caused by the ice in the early part of the season, it is expected that nearly as much coal will be delivered as was delivered in the season of 1906. The town is improving the main street by putting in some 1,500 feet of concrete curbing. The property holders along that section are laying down concrete sidewalks. The municipal authorities are also extending the water system. Messrs. Sutherland, Maxwell and Muir are erecting a number of cottages. The building of the Sutherland Rifle Sight Company is nearing completion, and some of the machinery from New York has arrived. Wholesale and retail trade was fair. There were no changes in rates of wages or hours of labour, and no unrest in the labour market.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Rain at the beginning of the month caused a great improvement

in the condition of the grain and root crops. The hay crop will be light in many places.

*Fishing.*—The value of the lobster pack in Pictou county this year amounted to \$65,000.

*Lumbering.*—This industry was steady; many teams were employed hauling deals for shipment.

*Manufacturing.*—Nearly all branches were fully employed.

*Mining.*—Conditions were steady, with a shortage in the output of about 2,000 tons, compared with the corresponding month of last year. The Acadia Mining Company increased its output some 4,000 tons, but the Intercolonial had a decrease of some 6,000 tons.

*Other industries.*—The Sylvester brick works and others in the district were working steadily.

## HALIFAX, N. S., AND DISTRICT.

*Mr. A. J. Smith, Correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the past month has been very active. With fine weather prevailing, the various building and repairing contracts have been pushed forward with vigour. Though in July, 1906, many lines were busy making preparations for the Dominion Exhibition, the corresponding month of the present year easily exceeded that of a year ago, with even brighter prospects for the ensuing month. Work on the Silliker Car Works and on the new Athletic Arena, where some 65 hands are being employed, has been well advanced. As soon as a site is secured, the erection of the new technical school will be begun. It will cost about \$100,000. The works department of the city paid out on Friday, July 26, \$8,297.86 for street repairing, sewers, etc., the largest fortnight's pay of the year.

There have been two strikes, one of which, that of the electrical workers, terminated satisfactorily to the men. The other, that of the freight handlers of the Intercolonial Railway, is to be

settled under the provision of the Industrial Disputes Investigation Act. The freight-handlers asked for an increase of pay from 15 cents per hour to 17½ cents, and being refused, they quit work on June 28. Interviews were held between representatives of the men and Messrs. Roche and Carney, Members of the House of Commons for Halifax, and Mr. R. E. Finn, M. L. A., who urged the strikers to avail themselves of the Act, and on the 5th of July the men held a meeting, at which they decided to refer the difficulty under the provisions of the Act. Merchants were much inconvenienced by the accumulation of freight, and the strikers wished to do all that was possible to advance the best interests of the port. They accordingly unanimously passed the following resolution:—

"Resolved.—That the Freight-Handlers' Union of the Intercolonial Railway of Canada at Halifax, Nova Scotia, agree to submit the case which is the cause of the dispute with the Intercolonial Railway of Canada, as set forth in schedule submitted by them to Mr. J. M. Jarvis, Superintendent, on the 18th day of June, last, to a Board of Conciliation and Investigation, which said Board shall be convened within 15 days from the receipt of this resolution by the management of the Intercolonial Railway of Canada, to be appointed under the provisions of the Conciliation and Investigation Act, provided that the questions of the rates to be paid by the said Intercolonial Railway of Canada, and the date from which the same are payable is left to the said Board of Conciliation and Investigation to finally determine."

The strikers also decided to return to work on the 6th instant at the old rates pending the decision of the Board of Conciliation and Investigation.\*

The electrical workers who had been receiving \$12 per week of 54 hours went on strike on July 1, for an increase to \$13.50 per week. After they had remained out less than a week, during which time there were several interviews between the men and their employers, the increase was conceded. The men, who are to hold certificates, resumed work on the understanding that in addition to the increased rates they are to receive time and one-third for all extra time up to midnight and double time thereafter. Boys holding certificates are to receive 14 cents an hour. The new scale to take effect on July 8.

\* A special article is published elsewhere in the present issue of the *Gazette* dealing with the reference of this dispute under the Industrial Disputes' Investigation Act.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Fairly good crops are promised.

*Fishing.*—The catch was light compared with last month, but above that of July, 1906.

*Lumbering.*—This industry was quiet.

*Manufacturing.*—Conditions were normal.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, and joiners had a busy month. Plasterers and lathers were fairly well employed. Painters and decorators, as well as paperhangers, had a busier month than they had experienced for years. Plumbers and gasfitters were busy. Stonecutters and builders' labourers were very active.

*Metal, engineering and shipbuilding.*—Boilermakers, iron workers and horse-shoers were fairly well employed. Others found employment normal.

*Printing.*—Printers, pressmen and book binders had a fairly active month.

*Clothing.*—Journeymen tailors and garment workers were fairly busy, with slight falling off in trade as compared with June. Boot and shoe workers were fairly busy.

*Unskilled.*—This class continued active.

## DISTRICT NOTES.

*Lunenburg.*—All the fishing vessels on the banks did well during the month. The "Aquadilla" had 300 quintals; the "Muriel" 1,300; the "Eva Jane," and the "Alexandra," each 250, and the "Lillontague" 1,050. The balance of the fleet averaged from 150 to 500 quintals. The schooner "Atlas" sailed July 12 with 1,600 quintals of dry fish for Halifax, shipped by W. C. Smith & Company. James How and John McDonald brought 1,000 pounds of haddock on July 11, as the result of two days' fishing. The Halifax and Southwestern Railway Company is building a large addition to its wharf to facilitate winter shipping. The construction of a new foundry, a new office for the Bank of

Montreal and an Oddfellows' Hall were being hurried. The foundry is to be ready in October, and the bank building by January, 1908.

## AMHERST, N. S., AND DISTRICT.

*Mr. A. D. Ross, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been steadily employed throughout the month, all the factories running full time and many of them working at night. The stringency of the money market has seriously affected two or three of the local industries, but it is not thought that labour will suffer in consequence. The half-day holiday on Saturday afternoons was inaugurated here this month. The Bank of Nova Scotia has started to tear down its old quarters, and is preparing to erect a more commodious structure. The stone work on the Royal Bank was completed. One of the largest brick buildings in the Province to be occupied by stores and offices is now under construction by Messrs. Rhodes, Filmore and Morris; this gives employment to a large number of bricklayers and stonecutters. T. LeBlanc & Company have begun the erection of the new Intercolonial Railway station, a stone structure, 184x36 ft.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The season has been very cold, and the crops are not well advanced. A decided shortage in the hay crop was reported from all over the country, but other crops were reported to be up to the average. The marshes which have been steadily yielding hay crops for over a century have of late years shown a decrease.

*Fishing.*—The lobster catch on the north shore of Nova Scotia has been the best in the past sixteen years, despite the unfavourable conditions in the early part of the month. Prices were good.

*Lumbering.*—The winter's cut is being

shipped largely to European markets. The price of lumber is high, and shipments from Pugwash and adjacent ports will be well up to former years.

*Manufacturing.*—While orders have been abundant and work brisk, the stringency of the money market has seriously affected some local industries, the banks compelling them to reduce over-drafts at a time when money was needed for expansion and development.

*Railroad construction and employment.*—The Maritime Railway Coal and Power Company has completed its electrical plant at the mouth of the pit, to furnish electric power to surrounding towns. This is the first plant of its kind, and its opening will be celebrated by a banquet.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Work has been very active, and will continue so during the balance of the season. Bricklayers, masons, carpenters and joiners, and all others engaged in the building trades had a busy month. Good wages were being paid; varying from \$1.75 to \$3.00 per day.

*Metal, engineering and shipbuilding.*—Moulders and iron workers had a busy month. Saturday afternoon is conceded as a half day holiday to all these workmen throughout the summer months.

*Woodworking.*—Woodworkers in general had abundance of work. Car builders were very busy.

*Printing.*—A few additional competent printers could have found employment. Saturday afternoon holiday prevailed during July and August.

*Clothing.*—Conditions were fair.

*Miscellaneous.*—A few barbers could secure employment in Amherst and other towns in the district.

*Railroad construction and employment.*—Two or three hundred men could find employment on railway construction work at the Joggins Mines, about 20 miles from Amherst.

*Unskilled.*—This class was in demand.

## CHARLOTTETOWN, P. E. I., AND DISTRICT.

*Mr. F. J. Nash, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during July was much the same as in June, with the demand in excess of the supply in a number of lines, but about equal in the majority of cases. The lobster season on the north side of the Island and on part of the south side, closed on the 10th of the month, temporarily removing a source of employment for fishermen and girls. The month saw the completion of the new railway station at Charlottetown, with the staff installed and trains running into it. The power-house at Summerside in connection with the waterworks system and the boring of a second well were started. Dredging was begun on the new railway wharves at Charlottetown and Souris. The contractor for the latter structure was advertising for men for the construction of the crib work. The tourist season opened the first week in the month. Wholesale and retail trade was normal. The prospect of good crops has given an optimistic tone to general business.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The crops though backward gained rapidly during the month, and grain and roots promise to be 10 per cent. better than last year, with hay a little below the average. The demand for farm labourers was about equal to the supply. Hay-making had not yet started.

*Fishing.*—The lobster season over the greater part of the Island closed with the pack about 10 per cent. greater, and the price about 10 per cent. higher than last year. A number of the fishermen will later take up other branches of fishing. A number will engage as farm help, or work in the harvest fields in the west next month.

*Manufacturing.*—The cheese and butter factories were all in full operation with

the output normal, and the price the highest since the industry was established in the Province.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, painters, paperhangers and decorators, plumbers, stone cutters and builders' labourers were active; carpenters and joiners, lathers and plasterers were busy.

*Metal, engineering and shipbuilding.*—Iron moulders, workers and helpers, machinists and engineers, steam engineers linemen, blacksmiths, bicycle workers, etc., were active.

*Woodworking and furnishing.*—Woodworkers, upholsterers, carriage and wagon workers, car builders and coopers were active.

*Printing.*—Printers, pressmen and bookbinders were active.

*Clothing.*—Journeymen tailors, boot and shoe workers were actively employed.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters had an active month.

*Leather.*—Tanners, curriers and saddlers were busy.

*Miscellaneous.*—Barbers, clerks, hotel employees, etc., were active.

*Transport.*—Railway train crews, switchmen, trackmen, freight-handlers, steamboatmen, firemen, longshoremen, teamster and expressmen were active.

*Unskilled labour.*—There was a steady demand.

advertising for 100 more men. The Textile Co., was also advertising for girls to learn weaving, offering good wages. Farm help was very scarce. The contractors' for the double tracking of the I. C. R., from Moncton to Painsic had difficulty in getting a requisite number of labourers. Building operations proceeded briskly both in the city and suburbs. More permits for building have already been issued than for the whole of last year. About 500 men are employed on the new I. C. R., shops. The passenger car repair shop is roofed and ready for glazing. The planing mill and the passenger car repair shop have the roofs and walls nearly completed, and the store is well advanced. The foundations of the locomotive shops are now being put down. Large water extensions are being made by the city and contracts for new sewers aggregating \$20,000 have been let. A plebiscite on the question of granting \$10,000 to the Moncton Exhibition Association will be taken on 25th inst. The rate of taxation for this year is \$2.40 per hundred. All local factories and shops have been in active operation. Wholesale and retail trades, were good. Barbers raised their schedule of prices July 1st. Real estate continued active, and Bank collections good. The civic collections for the week ending July 20th, when the 5 per cent. rebate ended, show an increase of 20 per cent over that of the same period of last year. There were no changes in hours of labour or rates of wages, and no unrest in the labour market.

#### MONCTON, N. B., AND DISTRICT.

*Mr. J. C. Graves correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The activity which characterized all branches of labour during June continued throughout July, and the labour market now presents a greater degree of prosperity than for many years.

Carpenters and unskilled labourers were particularly in demand. The contractors of the new I. C. R., shops were

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Attention to dairy work, cultivation of the root crops and road repairing have given the farmers ample work. Haying had not yet commenced. The discouraging prospects of June have been removed by exceptionally fine growing weather, and the crop outlook is very bright. Meats of all kinds are scarce and high. Lambs bring \$4.00 per head.

*Fishing.*—Fishing has been active. Mackerel and lobster catches were good, in some cases very large, and salmon fair.

The packing and canning factories have been very busy, and the output will be large.

*Lumbering.*—Heavy lumber shipments have been made from the various ports.

*Manufacturing.*—All local factories were running on full time, and with large staffs of operators.

*Railroad construction.*—A large amount of repair work is being done to the I.C.R., road bed. Double tracking between Moncton and Painsec Junction is being rapidly pushed. The first motor car for suburban traffic was put on on the 22nd between Moncton and Pt. du Chene, the test proving a success. Two others are being constructed.

*Building.*—Conditions were very active in nearly all branches and with plenty of work ahead. Carpenters and joiners were very active as were also masons, lathers and plasterers. Painters and decorators very busy, and in demand. Plumbers were very active. Stone cutters and builders' labourers were busy and in demand. Bricklayers, gas and steamfitters were quiet.

*Metal engineering and shipbuilding.*—These trades were in a very active state, with future prospects bright. The shipbuilding lines were quiet.

*Woodworking and furnishing.*—Woodworkers were exceptionally active. Upholsterers, varnishers, polishers and wood carvers were busy. Carriage makers, car builders and pattern makers were active. Gilders and shingle weavers were quiet.

*Printing.*—Work was plentiful with openings for a number of employees.

*Clothing.*—Journeymen tailors were very busy, as were also garment workers. Complaint was made of a scarcity of help and of the difficulty of getting young women for the various tailoring and millinery shops.

*Food and tobacco preparation.*—Bakers, butchers, meat cutters and ice drivers were active.

*Leather.*—Tanners and curriers were busy with leather workers active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel, restaurant and laundry workers were active.

*Transport.*—Passenger traffic was heavy, and railroad crews had a good month. Freight handlers, carters, draymen, teamsters and expressmen were active.

*Unskilled.*—The amount of work in progress created a great demand for this class. There has already been a large influx from abroad, but the supply was still unequal to the demand.

#### DISTRICT NOTES

*Campbellton.*—Building operations were brisk. A new wing to cost \$30,000 is being built to the Hotel Dieu Hospital. 250 English labourers arrived July 1st to work on the International Ry.

*Hillsboro.*—Building is very active. The Harwood Flooring Co., is erecting a large factory. Men are reported scarce. Heavy shipments of lumber and gypsum are being made.

*Sackville.*—About 40 men were at work upon the waterworks extension. About 5 miles of pipe will be put in. Building operations have also been brisk. Large shipments of Deals, grindstones and gypsum are also being made.

#### CHATHAM, N. B., AND DISTRICT.

*Mr. Theo. DesBrisay, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The supply of general labour was equal to the demand, but the demand for ship labourers was not equal to that of previous years, mainly owing to a decrease in shipments of lumber. The American Lumber Company shipped its second cargo of pulp wood to the United States. A new mill for cutting deals is being built on the north side of the river, and is expected to commence sawing in August, next. As the hay-making season will shortly be on, and a large crop is expected, there will be a scarcity of competent help.

The barbers of the town held a meeting and decided to change their rates from

15 to 25 cents for a hair cut, and from 10 to 15 cents for a shave. Notice of the change was given in the local papers.

#### CONDITION OF LOCAL INDUSTRY.

*Agriculture.*—The hay crop will be very heavy, but there has been too much rain for the root crop.

*Fishing.*—Off shore fishing was very good, lobsters being plentiful, but the rain has kept the brooks and rivers so high that river fishing has been poor.

*Manufacturing.*—The mills were all running full time.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—With a few exceptions, busy conditions prevailed.

*Metal, engineering and shipbuilding.*—Activity was general.

*Woodworking and furnishing.*—All found trade brisk.

*Printing.*—Printers were busy.

*Clothing.*—These trades were very busy.

*Food and tobacco.*—All were busily employed.

*Leather.*—Employment was steady.

*Miscellaneous.*—All were very busy.

*Transport.*—All lines were busy.

*Unskilled labour.*—Was busily employed.

#### ST. JOHN, N. B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has steadily increased in activity and all branches of industry were well employed during July. Several new buildings are in course of construction, among which may be mentioned a new brick barracks for the Salvation Army, a new Young Men's Christian Association building, a cold storage warehouse and several new dwellings. The Military stores building is to be lengthened 40 feet, and an extra storey added. The St. John Street Railway Company has a gang of about

eighty workmen double tracking a part of its line. Work is progressing rapidly on the wharf improvements at St. John West, nearly 200 men being employed. Tourist travel is increasing, and all boats and trains are crowded. The value of shipments through the port of St. John to the United States for the quarter ending June 30th amounted to \$559,632.52 for general merchandise, and \$206,591.72 for American lumber, making a total of \$766,224.24. This is an increase of \$133,084.60 over the corresponding quarter last year. Bank clearings for the three weeks ending July 18th were \$4,199,398, and for the corresponding period last year \$3,730,578, being \$468,820 greater in 1907 than in 1906, and \$2,360,724 less than for the four weeks ending June 27th of the current year. At a meeting of the directors of the Cornwall and York Cotton Mills Company, July 8th, the usual half-yearly dividend of 3 per cent. was declared. Mr. John McMulkin, factory Inspector, returned recently from an official visit to Westmoreland County. During his absence he visited Port Elgin, Sackville and Moncton. In the three places mentioned sixteen industrial establishments were inspected and nearly all had observed the provisions of the Factory Act. The annual meeting of the Maritime Wholesale Grocers' Guild was held on July 10th at the rooms of the Board of Trade. During the month of May, Ontario flours went up 40 cents and Manitoba flours from 50 to 75 cents per barrel, and it is now feared that \$6 per barrel will be asked for flour before fall sets in. The hardware stores started the Saturday half-day holiday on the first Saturday in June, and will continue the arrangement during June, July and August. The leading dry goods merchants and clothiers closed their stores on the first Saturday in July, and will continue to do so during July and August.

On July 11th a strike took place at Fairville among the teamsters (4), and street labourers (12). The teamsters, who provide their own teams, were receiving \$2.00 per day, and the labourers \$1.25. The teamsters demanded \$2.50 per day, and the labourers \$1.50. On

July 5th the strikers returned to work having been promised, in the case of the teamsters an increase of 30 cents per day, while a proportionate increase was given the labourers. On July 17th, the Canadian Pacific Railway Company's messenger boys went on strike because an outsider had been given employment in the office in preference to one of their number; after being out two hours the boys returned to work.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers reported crops coming along fast. The hay crop on the highlands is exceptionally good. The first of this season's potatoes reached the city on July 19th from up the river, and were sold for \$1.75 per bushel.

*Fishing.*—The Lorneville fishermen made some heavy catches of salmon on July 15th, one boat securing 83, but the harbour fishermen have not done as well as in past years.

*Lumbering.*—The annual sale of "no mark" and "mixed mark" logs passing through the booms of the St. John River Log Driving Company took place on July 3, at Fredericton. The prices realized were not quite as large as those of last year, with the exception of pine, which brought \$9.70 this year, whereas, last year it brought only \$7.00. The other sales were; hemlock, \$5.60; cedar, \$6.70; spruce, \$13.25. The boomage sheet up to July 1, 1907, shows that 16,324 joints had been rafted, containing 498,857 pieces, or 42,624,240 superficial feet. Of this quality 1,120 joints, containing 4,737,868 feet came through Springhill. There were also handled at the booms 11,807 pieces of pulp wood.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All were busy, with the exception of gas and steamfitters who were active.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, and blacksmiths were active; machinists and engineers, steam engineers, boiler-makers and sheet metal workers were

busy, and electrical workers and linemen very busy.

*Woodworkers and furnishing.*—Woodworkers and shingle weavers were busy.

*Printing.*—Printers and pressmen were very busy, and bookbinders busy.

*Clothing.*—Journeymen tailors were active.

*Food and tobacco preparation.*—Bakers and confectioners were busy, and cigar makers active.

*Miscellaneous.*—Brush [and broom-makers were busy.

*Transport.*—Railway train crews, telegraphers, switchmen, trackmen and freight-handlers reported work extra heavy, owing to the large number of people travelling. Steamboatmen and firemen were busy, and street railway employees very busy. Ship labourers, cabmen and hackmen, teamsters and expressmen were active.

*Unskilled.*—This class was very busy owing to the large amount of work being done by the Street Railway Company and the Municipality.

#### DISTRICT NOTES.

*Hartland.*—Almost the whole of the business part of this town was destroyed by fire on July 15. The total loss is estimated to amount to \$50,000, and the insurance to about \$20,000.

*Fredericton.*—The contract for the construction of a new canoe factory, for the Chestnut Canoe Company, Limited, has been awarded. The contract price is in the vicinity of \$13,000, which includes a power and lumber shed. The main building will be brick, three stories high and with basement, and will be of heavy construction throughout. The horses imported from Great Britain and France by the Government of New Brunswick arrived from Quebec by a special train on July 10. There are forty animals, including French coach horses, Clydesdale and Percherons, and two Clydesdale stallions. The rest are mares, principally two and three years old. The rate of assessment for 1908 is figured at \$1.41; estate value \$2,720,604, gain \$2,334; personal estate, \$1,459,459, and income, \$319,031. The cutters employed by the

Hartt Boot and Shoe Company went out on strike July 4, they have been working 60 hours a week, and want a 9-hour day. Nearly all the strikers returned to work on July 12, on increased pay offered by the company, if they would continue to work 10 hours per day.

*Maryville.*—The Gibson Cotton mill has been purchased by the Dominion Colored Cotton Company, of Montreal.

*Nashwaak.*—The Hanson mill was sold at Fredericton by auction as the result of proceedings in equity.

*Milouan.*—Fire broke out in the St. Croix Cotton mill on July 12, and considerable damage was done; it was confined to the dye house and a store-house for cotton.

#### QUEBEC, QUE., AND DISTRICT.

*Messrs. E. Little and P. J. Jobin, correspondents,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour in general was actively employed during July. The Quebec and Frontenac Gas Companies and the Bell Telephone Company were installing gas pipes and conduits for wires on an extensive scale, and there was a scarcity of unskilled labour for the work, with the result that wages advanced to \$1.75-\$2.00 per day. There were no strikes or lock-outs during the month. The employees of the Montmorency Cotton mills made a demand for an increase of 15 per cent in wages, but after negotiations with the managers accepted an increase of about 12½ per cent. Tourist traffic was very heavy, hotels being filled to their capacity and ocean and river crafts carrying heavy passenger lists. The Richelieu and Ontario Navigation Company's steamer "Quebec", after being rebuilt and enlarged, was again placed on the Quebec-Montreal route during July. The new twin screw steamer "Corsican" of the Allan line arrived at Quebec on July 11. Railway employees were very busy. The work on the breakwater extension, which was de-

layed during the spring owing to the unusually high tides, is now progressing steadily. Another of the foundation piers, some 180 feet in length, has been covered with concrete blocks, while the lower blocks for the remainder of the work are ready to be placed in position. Early closing arrangements appear to be more prevalent this year than last judging by the announcements made.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Hay making was in full progress and the crop will be above the average. Grain crops are looking well, and roots promise exceptionally well with favourable weather.

*Lumbering.*—A heavy output from the mills was reported.

*Railway construction.*—Employment was very busy, The south shore road will be extended to the end of the Quebec bridge.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—The several branches were busy.

*Metal, engineering and shipbuilding.*—Moulders, iron workers, machinists, electrical workers, linemen, boiler makers and iron shipbuilders were busy.

*Printing.*—Conditions were busy.

*Clothing.*—Boot and shoe workers were quiet.

*Food and tobacco preparation.*—Bakers, butchers, ice cutters and cigarmakers were busy.

*Leather.*—The month was quiet.

*Miscellaneous.*—Hotel and restaurant employees, laundry workers, etc., had a very busy month.

*Transport.*—Railway and steamboat men, ship labourers, longshoremen, cab drivers, etc., had a very busy month as a result of the heavy tourist and other traffic.

*Unskilled labour.*—This class was very busy.

## SHERBROOKE, QUE., AND DISTRICT

*Mr. H. Logie, correspondent,* reports as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The demand for skilled and unskilled labour during July exceeded the supply, some of the machine shops having a standing advertisement for help. The demand for unskilled labour was very great, and no one needed to be idle. The building trades were very busy, a large number of workmen being employed on the new hospital, Webster's Cigar Factory, the new buildings on the exhibition grounds, Ames' Pork Packing and cold storage Warehouse, besides many private dwellings. The branch factory of an Attleboro, Mass., Jewellery Company which has been erected here will begin to turn out goods about the first of August. Work is being pushed ahead on the extensions to the Canadian Rand Co.'s plant. The wholesale and retail trades have been very busy. An increase in wages was granted to a number of the employees in the Paton Mill, and also to the conductors, brakemen and baggagemen on the Quebec Central Railway.

The City Council has made an offer to the Sherbrooke Power, Light and Heat Company of \$170,000 for the property of the Company and to assume its liabilities the whole amount not to exceed \$250,000. This offer is about equal to 85 cents on the capital stock. The company was given until the 27th of the month to give a reply. If the company will not sell then the City Council will proceed at once to develop the power at Westbury, the ratepayers having authorized an expenditure of \$200,000 for this purpose. The plans already prepared for the development of this power call for 1,250 horse power, but the dam will be so constituted that this power can be considerably augmented.

The ratepayers of the city carried a by-law granting a bonus to the Fairbanks Company of St. Johnsbury, Vt. which intend locating a branch here for

the Canadian trade. The by-law gives the company a free site, exemption from taxation for ten years, and electric horse power for ten hours daily at the rate of \$15 per horse power.

The ratepayers also passed a by-law granting a Montreal Company exemption from taxes for five years, and the right to lay pipes for the establishment of a Steam Heating System. The steam heat to be sold to proprietors of buildings along the route.

The population of the city of Sherbrooke shows an increase for 1907 of 763 over the population of 1906, the total being 14,713. Ten years ago the population was 10,470. The valuation of property also shows an increase of \$259,355, the total being \$5,606,830. The valutors report that they did not find a vacant tenement, and say, there is a good deal of crowding through the scarcity of tenements. A good many tenements are being built, but more are needed.

During the month of June, the immigration agent for the Eastern Townships placed 111 workmen and farm helpers. So far this season, he has sent 239 to the Townships. The question of farm help is a serious one in the Townships.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The hay crop was fully up to the average of former years. Help has been scarce, and in some localities as high as \$2.50 per day was paid for men to work in the hay field. The grain and root crops are fully up to the average.

*Lumbering.*—The saw mills were running full time. The water in the rivers has just been right for the drives, some of which are still coming down the St. Francis.

*Manufacturing.*—All branches were working full time, with plenty of work ahead. The Carpet Company is running full time, and would help if they could be procured.

*Mining.*—The asbestos mines were working to full capacity and the scarcity of men is felt in some of the pits.

*Railroad construction.*—The G.T.R. Co.,

has had a large gang of men laying new tracks and extending the yards here. The Orford Mountain Railway was opened to Mansonville. The road now extends from Windsor Mills to Mansonville, a distance of 55 miles. It is still being extended, and will ultimately run to North Troy, Vt.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were very busy, and there was a demand for men.

*Metal and engineering.*—The machine shops were running overtime, and in some instances night shifts were employed. Linemen and blacksmiths were busy.

*Woodworking.*—Varnishers, carriage-workers and pattern makers were busy.

#### CONDITION OF PARTICULAR TRADES.

*Printing and allied.*—These trades were very busy.

*Clothing.*—Journeymen tailors were very busy, and the supply of good men was not equal to the demand. Garment workers and glove makers were busy.

*Food and tobacco preparations.*—Bakers, butchers, ice drivers and cigar makers were busy.

*Miscellaneous.*—Clerks, stenographers, delivery employees, hotel and laundry employees were busy.

*Transport.*—All branches were busy. Street railway employees were very busy, as were cab drivers, hackmen, teamsters and expressmen.

*Unskilled labour.*—Was very busy, and enough could not be secured to meet the demand.

#### DISTRICT NOTES.

*East Angus.*—Since the purchase of the mills by the syndicate, repairs have been rushed and on the 24th of June, the machinery was put in motion. The population of the town has increased considerably since and bids fair to grow larger as more employees are brought to town to work in the mills.

*Richmond.*—The merchants have decided to close their places of business four evenings a week during the summer months.

*Rock Island.*—A number of the farmers in this vicinity have commenced haying and there is a general scarcity of help. Men are demanding from \$2 to \$2.50 a day to work in hay field.

*Coaticook.*—Most of the farmers have commenced haying, \$2.00 a day being offered, and in some cases more for capable and experienced help.

#### ST. HYACINTHE, QUE., AND DISTRICT.

*Mr. V. Phaneuf, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Activity in the labour market continued during July. Although the building trades were not very active, they were busier than in the preceding month. Sash and door factories were busy. It was stated that one of the factories had been awarded a contract for large buildings for the Intercolonial Railway at Ste. Rosalie. Boot and shoe factories were active. The Ames Holden Company is building a wing, 70 by 50 feet, to enlarge its sole cutting department. The iron and leather industries were very active. Work on the double tracking of the Grand Trunk Railway Company between St. Lambert and Ste. Rosalie, was being advanced rapidly. A large number of men were employed, and materials were on the spot for the construction of a new bridge necessitated by the double tracking. The organ factory had a good month and the agricultural implement works were very busy. The Ames Holden Company made its annual return for 1906 to the city Council during July. During that year 225 workpeople were employed and 482,481 pairs of boots and shoes manufactured. The wages paid during 1906, amounted to \$71,502.33. During the year ending May 11, 250 workpeople were employed, 649,669 pairs of boots and shoes manufactured and wages amounting to \$92,379.96 paid. The Penman Manufacturing Company was very active. The spinners asked for an in-

crease of five cents per 100 pounds of wool handled. After conferences their request was granted. About 18 workmen were affected. In the civic estimates for the current year receipts for the year were placed at \$51,400 and expenditures at \$46,933.05, leaving an estimated surplus of \$4,466.95. The following sums were placed at the disposal of the different permanent committees: Streets, \$5,655.00; fire, \$5,030.45; finance, \$28,867.10; hygiene, \$50.00; markets, \$1,000.00; parks, \$175.00; police, \$2,575.75. Business was generally active, but greater activity was anticipated for August. Banks reported easy collections. Relations between employers and employees were cordial, hours of labour being unchanged. With the exception of the increase above mentioned there was no change in rates of wages.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy, many having commenced haying. Much difficulty was reported in procuring farm labour. Farm products sold well at good prices. Fruit was abundant, and sold well.

*Manufacturing.*—All establishments were active, there being a demand for men with active prospects ahead.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters and joiners were active. Painters and paper hangers were very busy, with plumbers and building labourers in fair demand. Bricklayers and masons were in their dull season.

*Metal, and engineering.*—Moulders, iron workers, machinists, engineers and linemen were very active. Electrical workers, blacksmiths and horseshoers had a good month.

*Woodworking and furnishing.*—Activity prevailed in all branches.

*Printing and allied.*—There was great activity in these crafts overtime being necessary in some cases.

*Clothing.*—Journeymen tailors and garment workers were active and in

demand. Boot and shoe workers had steady work.

*Food and tobacco preparation.*—Activity was reported.

*Leather.*—Tanners, curriers and leather workers had a very active month.

*Miscellaneous.*—Laundry workers were very active and in demand. The other branches reported active conditions.

*Transport.*—Railway employees were in their busy season. Cab drivers, hackmen, etc., were very busy.

*Unskilled labour.*—The demand for this class was greater than in June, several important jobs being delayed owing to lack of workmen.

#### DISTRICT NOTES.

*St. Johns, Que.*—The Central Vermont Railway intends commencing in a few weeks the building of a new bridge between St. Johns and Ilerville.

*Sorel.*—A large parcel of land has been purchased at St. Joseph de Sorel for the installation thereon of machines for the loading of sand on lighters. A large quantity of sand has been already shipped to Montreal and elsewhere, and an excavation of 300 feet by 100 and 22 feet in depth has been made. It has been decided to continue the construction of wharves in front of the shipyards at St. Joseph. The new wharves will be 200 feet in length by 25 feet in depth and will be contiguous to those built two years ago. The dredging fleet increases every year, and more space is required for it. When the new addition is made, the wharves at St. Joseph will measure 750 feet in length. Preparations were being made in the shipyards for the construction of a large steel dredge. The vessel will measure 108 feet in length, 42 feet in width and 11 feet in depth, and will be able to work at a depth of 55 feet. About 1,400,000 lbs. of steel will be required in its construction. A portion of the steel to be used in connection with this dredge has already arrived. Two steam vessels will also be built during the summer, one for the lighthouse service in the St. Lawrence below Quebec, and the other for service on Lake Ontario. The first will measure 206½ feet in length, 34 in width and 19

feet in depth, and the second 115 feet long, 25 wide and 12 deep. These new vessels will give renewed activity to the shipyards where there are now 500 men working on different vessels. Dredge No. 15 which was launched from the yards last fall will be completed during the summer.

Construction work on the South Shore Railway between Pierreville and Nicolet is being actively pushed forward. Hundreds of men are engaged thereon, and it is hoped that trains will be running between Sorel and Nicolet by next September. A new joint stock company with a capital of \$20,000 has been lately formed under the name of the "Sorel Novelties Co., Ltd." The object of the company is the manufacture of malleable iron by a new process, the smelting of copper, the making of steel and metallic alloys, and the plating of nickle and silver.

#### MAISONNEUVE, QUE., AND DISTRICT.

*Mr. Emile Pelletier, correspondent,* reported as follows:—

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers of Maisonneuve County reported crop prospects excellent. Hay will be heavy, and fruits a splendid crop.

*Fishing.*—Fishermen reported moderate catches.

*Railroad construction and employment.*—The Canadian Pacific Railway Company's construction shops were very busy. The Angus shops have received extensive additions which will give accommodation for more than 1,000 additional men. The locomotive works at Longue Pointe were very busy, more so than during the corresponding month of last year. The Standard Shirt Company, Limited, DeLorimier Avenue, Montreal, is having additions made to its premises which will include four new departments, and a lunch room for its working people. These additions will be equipped with the latest hygienic improvements.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Active conditions prevailed.

*Metal, engineering and shipbuilding.*—All trades were more or less busy.

*Woodworking and furnishing.*—Woodworkers, carvers, upholsterers, and pattern makers were busy. Carriage and wagon makers reported conditions favourable.

*Printing.*—These trades were busy, with lithographers and photo-engravers active.

*Clothing.*—Joruneymen tailors were busy, and boot and shoe workers actively employed.

*Food and tobacco preparation.*—Conditions were active.

*Leather.*—Employment was active.

*Miscellaneous.*—Delivery employees, hotel and restaurant helpers, etc., were very active.

*Transport.*—Ocean transportation was very active and general activity prevailed on the wharves. The demand for labour was very active.

*Unskilled.*—Busy condition prevailed.

#### MONTREAL, QUE., AND DISTRICT.

*Mr. G. Audet, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Building operations continued very active, the only circumstance causing any slackening being the strike of the structural iron workers, which commenced on July 8 for an increase in wages. The men demanded a minimum wage of 40 cents per hour. Three hundred employees of the Dominion Bridge Company, the Phoenix Locomotive Company, and of the Loomis Company, quit work. About 75 Italians employed as shovellers quit work on July 15, for an increase from 25 cents to 30 cents per hour for day work and from 30 cents to 35 cents per hour for night work. Their places were filled. The gross receipts of the city post office for June were \$67,412.47, an increase of \$13,274.47 over the same

month of 1906. On July 10, before Judge Choquette, the action taken against the Dominion Car and Foundry Company for bringing in workmen from the United States under contract was heard. The company pleaded justification on the ground that workmen competent to do certain difficult work in connection with the construction of steel cars, a new industry here, were not to be found in Canada. Judgment was reserved. The report of the secretary of the Builders Exchange for the first six months of the year was issued. It was stated that the record for building in Montreal was established in June, 1906., when the value of permits aggregated \$2,343,597. This total has not been attained in any month since, notwithstanding the large buildings that are being built this year, such as the Bank of Commerce, the Eastern Townships Bank, the Ville Marie Convent, etc. According to official statistics, the building permits for the first six months of 1907 amounted to \$4,508,143, compared with \$4,558,388 in the same period of last year. If the cost of repairs is added to the above, the totals are: \$4,982,621 in 1907; \$4,990,375 in 1906, and \$2,883,839 in 1905.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were very active.

*Metal, engineering and shipbuilding.*—These trades were active. There was a strike among iron workers and helpers.

*Woodworking.*—Active conditions prevailed.

*The printing, clothing and food and tobacco preparation* trades had an active month.

*Leather.*—Tanners, curriers, leather workers and trunk and bag makers were busy.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel, restaurant and laundry employees were active. Theatre employees were in their quiet season.

*Transport.*—Steamboatmen, ship labourers and longshoremen were very active, street railway employees, cab drivers, etc., were active.

*Unskilled labour.*—This class was active.

#### HULL, QUE., AND DISTRICT.

*Mr. Rodolphe Laferrière, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

July was a busy month for all branches of labour and industry. There was a slight tendency to slacken in certain industries, particularly in the Eddy factories, but this is customary during midsummer, when repairing, cleaning and overhauling is done. In mining, lumbering and farming satisfactory conditions were reported from the different sections. Activity in building has not been as marked for many years as at present. The Woods' factory is being erected at a cost of \$100,000; the Bank of Montreal is putting up a \$40,000 building; the school board is spending \$18,000 on an extension to the Notre Dame Academy; three hotels are being erected to cost respectively \$12,000, \$10,000 and \$7,000, and several private residences are being built. It is estimate that the buildings at present under construction in Hull will cost in the aggregate \$200,000. Relations between employers and employees were satisfactory. The International Portland Cement Company of Hull will spend \$250,000 for new machinery. The contracts call for delivery this fall. Space has already been provided for this machinery, so that little building will be required. With the new machinery, the output of the mills will be 3,500 barrels of cement per 24 hours. The Woods' factory, it is expected, will be ready for operation by next winter. Shantymen's supplies, tents and awnings will be manufactured. About 150 hands will be employed. The Matthews' Meat Packing Company now turns out sixteen varieties of meats, canned, smoked or fresh. About 150 hands are employed. The company will establish a bathing house for their employees. The last assessment roll, just completed, gives the fixed population of Hull as 14,600, or 100 more than last year, despite the large number of families who have left for Cobalt, New Ontario and Blind River, about 200 families

having left the city in the past year to engage in business in the new settlements. The assessable property increased about \$100,000, and amounts in value to about \$6,000,000, of which about one half is taxable.

#### CONDITION OF LOCAL INDUSTRIES.

*Lumbering.*—All the lumber centres along the Ottawa river and its tributaries were <sup>very</sup> active. Shipments, however, did not equal production, as the yards were filling up. Prices were high.

*Mining.*—Development was very active in the Gatineau, Lièvre and Pontiac districts. Prospecting was being carried on extensively. Several mica mines have changed hands during the month, sales being made exclusively for cash.

#### OTTAWA, ONT., AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was steady during July. Owing to the lateness of the season the hay crop was harvested without the usual rush for help, the work being done by smaller gangs employed during a comparatively longer period. Lumber shippers were also quieter during part of the month, as there was a smaller export trade than earlier in the season. There was no idleness in any class of labour. Corporation work was active, and lumbermen's agents were looking for men to send to the woods. A few of the structural iron workers employed on the national museum quit work owing to the strike of their Union in Montreal. The contractor reported that operations were not affected, as the men unwilling to work were at once replaced. The price of bread has advanced from 10 to 11 cents per loaf, retail. There has been a corresponding increase of about 15 per cent in several brands of cakes. The advance was made owing to an increase in the price of flour. The recent encouraging reports about the local wheat crop

and the promise of a fair yield in the West leads those who handle these commodities to believe that no further increase will take place. About a year ago bread sold for a short time at 12 cents a loaf.

The wholesale price of beef ranges from one to two dollars per hundred weight higher than at this time last year, but there has been only a slight advance in retail prices. The situation is similar with regard to pork, green bacon and mutton. Smoked bacon and lamb are about 15 per cent higher than last year. Cattle dealers reported that they have to pay more for beef by the carcass owing to the poor pastures early in the summer and the scarcity of stall fed animals last winter.

The chief manufacturing firms of Ottawa and the number of their employees is as follows; the wage bill for the year being also given:—

J. R. Booth, lumber, pulp and paper, 1,700 men, wages \$840,000.  
 W. C. Edwards & Co. lumber, sash doors, etc., 600 men, wages \$200,000.  
 Shepard & Morse Co., lumber, 400 men, wages \$250,000.  
 James Davidson, sash doors, etc., 150 men, wages \$60,000.  
 Ottawa Car Company, cars, carriages, etc., 280 men, wages \$130,000.  
 W. J. Campbell & Sons, marine signal supplies; 100 men, wages \$50,000.  
 Vulcan Iron Works, 60 men; wages \$28,000.  
 Thomas Lawson & Sons; machine shop and foundry; 75 men; \$30,000.  
 Victoria Foundry; 55 men; wages \$28,000.  
 Powers & Co. boiler manufacturing; 60 men, wages \$31,000.  
 Eclipse Manufacturing Co., electro plating light meta ware, etc., 80 men; wages \$40,000.  
 James Oliver & Sons, furniture, etc; 80 men; wages \$30,000.  
 General Electric Co.; preparation of mica; 225 girls; wages \$67,000.  
 Laurentide Lida Co., 450 girls; wages \$125,000.  
 Woods, Limited; lumbermen's supplies, tents, etc.; 300 girls; wages \$60,000.  
 Two Macs, gent's clothing; 75 men and girls, wages \$25,000.  
 Geo. May & Son, S. & E. Horbridge, Hugh Carson, Ltd., R. Craig, M. J. Wilson & Sons, harness and leather goods; 300 men, wages \$135,000.  
 Rideau Mfg. Co., Sparks Bros., Pageau Mfg. Co., silk waists; 125 girls; wages \$31,000.  
 Universal Mfg. Co., ladies garments, 100 men and girls; wages \$36,000.  
 American pants & Overalls Co.; 35 girls, wages \$14,000.  
 Geo. M. Mason; fine lumber, etc., 40 men, wage \$19,000.

The city of Ottawa annexed 300 acres comprising part of Bayswater, in Nepean township, for the purpose of providing sites for industries. The land will be

under fixed assessment for 20 years, unless sold.

An agreement was entered into between the City Council and the Ottawa and Hull Power Company providing for a supply of power for the civic electric plant. The agreement was made through the intervention of the Hydro-Electric Commission, as a contentious point had arisen as to fluctuations.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Crops in the district were greatly improved by the rainfall in July, and recovered sufficiently from the drought of the early summer to indicate a good yield. High prices ruled for meats, fruits and vegetables. Fruits and vegetables were from two to three weeks late on the market.

*Lumbering.*—Scarcely any of the present season's lumber cut has been shipped out of the city. Prices are very firm, though the demand is not so keen as earlier in the summer. The water became so low in some of the tributary streams of the Ottawa that pulp manufacturers were threatened with a scarcity of supply. Wages for the shanties are from \$28 to \$35 per month, the same as last year.

*Manufacturing.*—Manufacturing has been very active. Prices for some lines of paper are nearly 100 per cent higher than two years ago. J. R. Booth is doing a large export trade to the United States and Europe. His new sulphite mill will be completed in another month. Work is progressing rapidly on the extension to W. J. Campbell & Sons' machine shops. The present staff of 100 men will be increased to about 400 in the manufacture of marine signals.

*Railroad construction.*—Railroad construction has been active. The Ottawa branch of the Canadian Northern will be completed into the city by autumn.

*Mining.*—The mica industry was active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners, lathers and plasterers were busy. There were enough stone-cutters to fill the demand.

*Metal.*—The iron moulders and similar tradesmen were very active. Stove mounters were busy, with an active demand for horseshoers.

*Woodworking.*—Car builders and carriage makers were very busy.

*Leather.*—Leather workers were not in much demand.

*Clothing.*—Garment workers and tailors were all occupied.

*Miscellaneous.*—Paper makers were busy.

#### KINGSTON, ONT., AND DISTRICT.

Mr. Wm. Kelly, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was no marked change in the condition of the labour market during July compared with June. All branches continued fully employed, with no necessary idleness reported. In addition to the continued activity in the building and manufacturing branches, tourist travel has been good, and as a result, hotels, transportation companies, etc., have been busy. It is expected that the extension to the light plant, costing \$80,000, will be completed in a few weeks. During July the largest shipment of binder twine recorded in Ontario left here for the west. The consignment consisted of seventeen carloads, the output of the penitentiary plant. The twine was shipped to the Farmers' Association of Alberta. The price paid for 550 foot mixed twine was 10 cents per lb.; 600 foot, mixed, 11 cents per lb.; 600 foot, pure, 11½ cents per lb. The tax collections to July 1 amounted to \$98,760. At the same time last year, the collections were \$97,076, and in 1905, \$85,800. There were two minor assignments reported. The local banks and merchants reported business active. There were no strikes or lockouts, and no changes in wages or hours of labour.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy

and still complained of lack of help. Immigrants do not remain in employment, the shorter hours and larger wages paid in industrial centres attracting them elsewhere.

*Fishing and Lumbering.*—These industries were somewhat dull.

*Manufacturing.*—Active conditions prevailed with few exceptions.

*Mining.*—Conditions were active.

*Railroad construction and employment.*—All branches were active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches continued active.

*Metal, engineering and shipbuilding.*—Shipwrights and engineers were busy.

*Woodworking and furnishing.*—Active conditions prevailed in all branches.

*Printing.*—Printers continued busy.

*Clothing.*—These trades experienced busy conditions.

*Food and tobacco preparation.*—Bakers, butchers, ice-handlers, etc., were active.

*Miscellaneous.*—Barbers, broom-makers, clerks, furriers, hotel, and restaurant employees were active.

*Transport.*—All branches were active.

*Unskilled.*—This class was actively employed.

#### BELLEVILLE, ONT., AND DISTRICT.

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The month of July was exceedingly active for almost every branch of labour, from the unskilled workman to the expert craftsman. It was conceded to be the most active July in many years. Wages were never so high before, but, despite this fact, workmen in many branches were scarce, and in some cases impossible to secure, although there has been many new arrivals. The many buildings going up were the direct cause of the scarcity. The city and district has never been in a more prosperous condition than at the present time. No man who desires work

at good wages need be out of employment. The new cement plant at Ox Point, a few miles east of the city, is employing about 330 workmen in the erection of a large building, about 150 of whom live in the city. These men will be employed all season. When the buildings are completed, the company expects to employ over 400 hands the year round. The Belleville Cement Company employs nearly as many men, day and night, a great many being residents of the city. All the manufacturing industries were especially active, many factories and shops finding it necessary to increase staffs as well as working overtime. Iron moulders, boilermakers and machinists were particularly busy. The rolling mills were working day and night to full capacity. This company employs a large number of skilled men and the semi-monthly pay roll is very large. Work on the new drill hall is progressing rapidly, a large number of stonemasons and labourers being employed. The construction of the hotel "Quinte" kept many bricklayers, carpenters and other mechanics employed. The opening of the canning factories throughout the district gave employment to many, the pea crop being exceptionally good. The city is laying down many granolithic sidewalks, giving employment to a large staff of men. A large four-storey addition to the Belleville Hardware Company's store was finished. The rebuilding of the Corby plant, recently destroyed by fire, kept many men busy; the buildings will be much larger than those destroyed.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Hay and clover will be a good crop, and grains and roots promise well. Cherries will be a heavy crop.

*Fishing.*—Conditions were somewhat quiet.

*Lumbering.*—The drive of logs this year was smaller than in many seasons past.

*Manufacturing.*—This industry was very active.

*Mining.*—In the northern part of the country, mining was active, many men being employed.

*Railroad construction and employment.*—The various works were more or less active.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Every branch had a very busy month, activity being far in excess of that at the same time last year. An exceptionally large amount of building is going on both here and in the surrounding district.

*Metal, engineering and shipbuilding.*—Iron moulders, helpers and rolling mill employees were all working full time. Machinists and electrical workers had an active month. Metal polishers, buffers and brass workers employed in the Belleville Hardware Company's service were busy. Blacksmiths and boiler-makers, as well as bicycle workers and horseshoers, had an active month.

*Woodworking and furnishing.*—All branches had an active month, with the exception of gilders and shingle weavers, who had a rather quiet month.

*Printing.*—Printers, pressmen and bookbinders, both in the city and district, had a busy month, with no hands idle. Both newspaper and job hands were busy.

*Clothing.*—Journeymen tailors reported an active month.

*Food and tobacco preparation.*—These trades were active, especially ice-handlers, owing to the extremely warm weather.

*Leather.*—Harness makers were busy.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees, and laundry workers reported a busy month.

*Transport.*—Railway and steamboatmen were active the latter being especially busy. Most of the cheese manufactured in this district is shipped by water. Cabmen, carters, teamsters and expressmen also had an active month.

*Unskilled.*—This class was in demand at good wages.

#### PETERBOROUGH, ONT., AND DISTRICT.

*Mr. W. J. Johnston, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Employment during July has been active, although there were indications that the labour market was becoming over-supplied with men in some lines. The large transformer building of the Canadian General Electric Company has been completed, and the men recently employed in its construction are now looking for employment. Many houses were being constructed in all parts of the city. Considerable alterations are being made to certain stores. The Bell Telephone Company has let a contract for the building of a new exchange to be completed by December 1, at a cost of \$12,500. The Brenton Carpet Company is erecting houses on its land for its employees; if the project proves a success, the company will continue the construction of houses next season. Messrs. Oke and Oke have begun operations in their new furniture factory, and have large orders ahead. A new industry "The Excellent Fruit-cleaning Manufacturing Company" will manufacture hand and power machines for cleaning all kinds of fruit. Transportation facilities, both by rail and water, were taxed to their utmost capacity. Wholesale and retail trade was never better. Wages remain as previously reported. The harness makers, who went on strike at B. F. Ackerman and Sons, are still out.

The cost of building has almost doubled during the past ten years. The number of houses constructed however, is ten times greater. The condition of the labouring man and mechanic is much changed. Wages were, in 1897, for carpenters, \$1.50 to \$1.75 per day; now they are \$2.50 to 3.00 per day; bricklayers and masons received 25 to 30 cents an hour; they now receive 45 cents. Building material has greatly increased. Lumber that was sold for \$8 and \$9 per

thousand feet in 1897 to-day costs from \$17 to \$24. Brick laid in the wall which cost from \$11 to \$12; now costs \$20; for a solid wall the price, formerly \$7 to \$8, is now \$16 to \$18. Stone work was formerly \$1.50 per perch; it now costs \$3. Houses that rented for \$4 and \$5 now rent for \$9 and \$10 per month.

The bakers have raised the price of a 4 lb. loaf of bread to 15 cents, and of a 3 lb. loaf to 10 cents. The price was formerly 9 and 12 cents respectively. The opening of the Kirkfield lift-lock has added another link to the great Trent canal waterway. A new wharf is being built at the intersection of the street railway and the river.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were attending to the hay.

*Lumbering.*—Active conditions prevailed.

*Manufacturing.*—Activity prevailed.

*Other industries.*—The Canadian General Electric Company has increased its stock from \$3,000,000 to \$8,000,000. The Wm. Hamilton Company has been given incorporation papers with a capital of \$300,000. The Bell Telephone Company is about to put its wires underground on the principal street of the city. The Central Foundry Company, of Port Hope, has so much work on hand that it will require 100 workmen by August 15.

*Railroad construction and employment.*—A large bridge is being built on the Grand Trunk Railway, about 5 miles west of Peterborough.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches were busy, with some very busy.

*Metal, engineering and shipbuilding.*—Iron moulders and tool sharpeners were active. All other branches were busy, except bicycle workers, who were somewhat dull.

*Woodworking and furnishing.*—Active conditions prevailed, with carriage and wagon workers very busy.

*Printing.*—The allied trades were well employed.

*Clothing.*—Journeymen tailors, garment workers and hat makers were not very actively employed on account of holidays. Other branches were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters, cigar makers and tobacco workers had active employment.

*Leather.*—All branches were well employed.

*Miscellaneous.*—The miscellaneous trades were actively employed. Delivery employees were busy. Furriers were somewhat dull.

*Railroad construction and employment.*—Traffic on all lines was never better. Tourist traffic to the various summer resorts was very heavy. Steamboat workers were taxed to their utmost. Street railway men were very busy, also cabmen, hackmen, carters, draymen, teamsters and expressmen.

*Unskilled.*—Busy conditions prevailed.

#### DISTRICT NOTES.

*Lindsay.*—The tax rate for the coming year is 29½ mills, 1½ mills over that of last year. The total assessment is \$2,386,700.

#### TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Activity continued in nearly every department of industry during July. The anticipations of the early spring as to a heavy building season have been fully realized, and manufacturers are very busy. Immigration has resulted in an over-supply in some of the less skilled departments of labour, more especially those connected with the building trades; but specially skilled artisans have no difficulty in obtaining work.

The number of building permits issued during June was 440, representing a value of \$1,445,225, as compared with 406, of a value of \$1,350,142, in June, 1906.

The Board of Control will shortly consider a proposition from the Mackenzie and Mann Co., for the construction of a large iron smelting establishment at Ashbridges' Marsh, in the eastern section, which will involve a grant of some 400 to 500 acres of the marsh. It is promised that 1,500 men will be employed at the outset, the number to be largely increased as other industries, such as rolling mills and car shops, are undertaken. The iron ore will be brought down from the Moose Mountain mines, 30 miles north of Sudbury, to which the Canadian Northern has been extended.

Love Bros. have begun the erection of 26 pairs of dwelling houses in the east end, to cost \$68,000.

The Board of Control recently advertised for tenders for the steel work of the Lansdowne avenue subway. Three tenders were received from Britain, but none from Canadian manufacturers, the reason assigned being that the latter objected to a clause in the contract specifying that the Union or prevailing rate of wages should be paid to the men employed. The contract, amounting to \$53,443, was awarded to the Cleveland Bridge and Engineering Co., of Darlington, England.

Ten miles of concrete sidewalk were constructed by the city engineers' department last month.

The bakers are considering an increase in the price of bread, the reason assigned being the upward tendency in the price of flour. Meat was increased in price about one cent per pound.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy haying during the month, the crop turning out fairly well, though the stalks were short in some localities. Grain crops are looking well. A considerably smaller area of sugar beets was planted this year, owing to the trouble over the delivery of the crop last year.

*Manufacturing.*—Conditions were prosperous, and skilled mechanics practically all at work, except those affected by strikes. The iron trade is very active. Several new plants are being con-

structed. The Standard Chemical Co., will at once begin the construction of a \$50,000 factory on Dundas street. Thos. Parker will erect a planing mill. The General Brass Co., is putting up a factory, to cost \$30,000, and will employ 100 men in the same locality. The Aluminum Crown and Stopper Co., will build a five-storey brick warehouse, 50x135 feet, to cost \$50,000. The Hunter-Rose Publishing Co., will erect a four-storey structure at a cost of \$40,000. The White-Allen Co., fringe manufacturers, will build a three-storey brick extension, 72x25 feet, to their present factory.

*Railway construction and employment.*—Extensive additions are being made by the Grand Trunk Railway Co. to the buildings adjoining the roundhouse at Mimico. A new cold storage shed, with a capacity of 800 tons, is being erected. Work has been begun on the construction of a line of the Toronto railway along Roncesvalles ave., from Queen to Dundas streets.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Activity prevailed in all branches except where delays or difficulties have arisen in connection with the plumbers' strike. About 260 of the striking plumbers have left town, most of them for the United States. About the same number are still out.

*Metal, engineering and shipbuilding.*—These trades were generally busy. The machinists' strike is still on, and in a few cases affects other trades unfavourably by causing delay. On the 18th, the electrical workers went on strike in sympathy with the plumbers.

*Woodworking and furnishing.*—Cabinet makers, furniture workers, wood working machinists, box makers and carriage workers had plenty of work.

*Printing.*—Printers were fairly well employed. A new agreement for five years, dating from July 1st, has been made between the Toronto Typographical Union and the Publishers' Association affecting the men employed on daily newspapers. Day men will receive \$19 per week and night men \$21, in place of \$16 and \$18 respectively; but the quan-

tity of type to be set before a bonus is paid for over composition has been considerably increased, so that the bonus system is practically eliminated except to fast operators. The hours remain the same as before, 8 hours for day work and 7½ for night work.

*Clothing.*—Employment was generally steady in these trades. Custom tailors were a little slack.

*Food and tobacco preparation.*—Bakers, butchers, brewery workers and cigar makers had a good month.

*Leather.*—Harness and saddlery workers were well employed.

*Miscellaneous.*—Hotel and restaurant help, barbers and laundry workers were busy.

*Transport.*—All classes engaged in transportation were actively employed. The Canadian Pacific and Canadian Northern Railway Companies were looking for men as despatchers and train operators. The Toronto Railway Co., has entered into a new agreement with its employees, dating for three years from June 16th, securing them an advance in wages all round of two cents per hour.

*Unskilled labour* was generally well employed, with the exception of recent arrivals.

#### DISTRICT NOTES.

*Swansea.*—The Toronto Bolt and Forging Co., is erecting a new workshop 70 x 100 feet, to cost \$30,000.

### NIAGARA FALLS, ONT., AND DISTRICT.

*Mr. Ernest Green, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

July was a busy month in nearly every line of industry. Some Slackness was noticable in a few trades at times, but on the whole, conditions were very satisfactory. The buildings of the new carriage factory are up; the new shoe factory was nearly ready; the machinery of the new Ramapo Iron Works was started, and a large fruit-canning plant was projected.

Work on sewers and permanent sidewalks employed large forces of labourers. The state of trade, both wholesale and retail, was good. Financial conditions were favourable, though the general increase of interest by the banks was felt. A few retail stores signed an early closing agreement; most stores close at six o'clock the year round. A new schedule of wages on one of the electric systems increased the pay of a few men.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The fruit season opened with fair crops of strawberries and cherries. Raspberries, pears, plums and apples promise good yields. Grapes will be light in this district. Hay is a very good crop. The grain crops are not very promising.

*Fishing.*—Fairly active conditions prevailed, although few men were employed.

*Manufacturing.*—The factories were all well supplied with work. The canning factories were running to their full capacity night and day during the berry season. The Dominion Suspender Company was advertising for female operatives.

*Railroad construction and employment.*—Sand pits and quarries which supply crushed stone were extensively worked. Railroad construction was not employing many men, but general railway employment was excellent.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were busy. Carpenters felt a temporary slackness. Plasterers and plumbers were active, and painters busy. Stone cutters have little to do this season. Builders' labourers were all employed.

*Metal, engineering and shipbuilding.*—Foundry men of all classes were active. Electrical workers and machinists, and linemen were busy.

*Printing.*—Printers were active.

*Clothing.*—Tailors were busy.

*Food and tobacco preparation.*—Employees in the bread, meat and ice business have been busy.

*Miscellaneous.*—Office employees, retail clerks and delivery employees were

active. Hotel and restaurant employees were busy. There was some demand for laundry hands.

*Transport.*—Transportation in all lines was heavy, and all classes of railway and steamboatmen were busy, traffic on electric lines being unusually heavy. This rush will end about Sept. 1st. Draymen, teamsters, and expressmen were busy, with cabmen and carters fairly active.

#### DISTRICT NOTES.

*Welland.*—Two large manufacturing concerns propose to locate here. One is a cotton bag factory, to employ 1,500 hands; the other a pipe company, to employ 300 hands. Local manufacturing concerns were all busy, and conditions of trade and industry satisfactory. A contract for dredging on the Welland canal to the amount of \$75,000 was let. The furnaces of the Ontario Iron and Steel Company's new plant were heated. The Supreme heating company expects to have its plant running by August 15th. The opening of these new manufacturing concerns will greatly increase the number of men employed.

*Fenwick.*—A fruit evaporator is to be established.

#### ST. CATHARINES, ONT., AND DISTRICT.

*Mr. Jas. A. Wiley, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions during July showed little change from last month, the labour market being active, with supply and demand well balanced. The building trade experienced some slackness, but it is regarded as temporary, as additional housing accommodation for mechanics is urgently needed. The Board of Health has accepted the plans for a well-equipped isolation hospital. A branch of the Bank of Nova Scotia will be opened as soon as suitable quarters are prepared. The new buildings for the Bank of Toronto and for the Soverign

Bank are both nearing completion. Trade, wholesale and retail, was reported good, comparing favourably with that of the corresponding month of last year. The usual Wednesday half-day holiday during July and August has been granted by the merchants to retail clerks. In all, about 350 employees will be benefitted.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Favourable weather prevailed throughout the month for fruit growers. Farmers were engaged in harvesting. A hail storm of short duration, which occurred in the early part of the month, did considerable damage to early crops.

*Manufacturing.*—Employment was active.

*Railroad construction and employment.*—Work on the relaying of the Niagara, St. Catharines and Toronto railway east and north of the city, and also on the new line from Font Hill to Welland, is progressing as fast as possible, and is giving employment to large bodies of men.

*Other industries.*—The canneries were busy, working overtime with full staffs.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were active, though not as active as during the previous month.

*Metal.*—All branches were active, with conditions favourable.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers were active.

*Printing.*—The allied trades were active, with plenty of work on hand.

*Clothing.*—Journeyman tailors and boot and shoe workers were active.

*Food and tobacco preparation.*—All found steady employment.

*Leather trades.*—Tanners, curriers and leather workers were active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees and laundry workers were active.

*Transport.*—All lines were busy, with a large amount of work on hand.

*Unskilled labour* was active.

## DISTRICT NOTES.

*Thorold.*—Favourable conditions in the labour market continue. Work on the \$80,000 water system for the town was begun, and is progressing favourably, giving employment to large gangs of men, principally unskilled labour. The usual Wednesday half-holiday during July and August for clerks is in force this year; approximately, 30 employees are affected by it.

*Merriton.*—All the mills and factories were running full time, and labour generally was well employed. The usual Wednesday half-holiday during July and August was granted again; this year about 20 employees are enjoying the holiday.

*Port Dalhousie.*—Favourable conditions continued.

*Beamsville.*—The cannery is running full time, with full staffs of employees, principally on small fruits, berries and cherries.

## HAMILTON, ONT., AND DISTRICT.

*Mr. S. Landers, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market at the end of the month was satisfactory. Workmen in almost every branch of labour, both skilled and unskilled, were well employed. An agreeable feature of the month was the decrease in the number of industrial accidents, there being only about one-fifth of the usual number reported. The iron, tobacco and clothing trades were very busy, and retail trade was very active. The carpenters' strike at the terminal station was still unsettled at the end of the month. The price of brick has again been raised, and is now selling at \$9 a thousand, an advance of 50 cents. The brick-makers say that brick is so scarce they can get almost any price they ask. One stated that he had been offered as high as \$10 per thousand. The tendency to close the city stores at least on one afternoon

of the week is growing steadily, the example set by a number of representative firms in various lines of business being generally followed. The various shops associated with the following trades now close on Wednesday afternoons, and will continue the practice through July and August: Barbers, grocers, butchers, jewelers and music store employees nearly a thousand men being affected. During the first three days of the month the retail merchants held their annual convention here and discussed the food laws, early closing, and the labelling of canned goods as to quality and age, besides favouring Government control of public utilities. It was decided to hold the next annual convention at Galt, Ont., on June 16, 17 and 18, 1908.

## CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were exceptionally busy during July. More new houses have been erected this season than ever before in the history of the city. Bricklayers, masons, carpenters, lathers, plasterers, painters, plumbers and builders' labourers were very busy.

*Metal, engineering and shipbuilding.*—Moulders, sheet metal workers, machinists, steam engineers and electrical workers were busy, also blacksmiths. Metal polishers and stove-mounters were active. Horseshoers had fair employment.

*Woodworking and furnishing.*—Carrriage and wagon makers were busy, with other wood working trades active.

*Printing.*—Printers, electrotypers, stereotypers, bookbinders and pressmen were very busy.

*Clothing.*—Journeymen tailors were somewhat slack, but garment workers were busy. Boot and shoe workers had active employment.

*Food and tobacco preparation.*—Busy conditions prevailed.

*Leather.*—Conditions were active.

*Miscellaneous.*—All were busy, with clerks active.

*Transport.*—Railway train crews were active, and street railway employees busy. Steamboatmen, longshoremen, cabmen and teamsters were also busy.

*Unskilled.*—Busy conditions prevailed.

## DISTRICT NOTES.

*Dundas.*—Trade and labour was very busy. Machine shops, the seating factory, glove factory, mill and clothing establishments were working to fullest capacity. Railroad construction is giving employment to a large number of men, and has brought a large amount of trade here.

## BRANTFORD, ONT., AND DISTRICT.

*Mr. J. C. Watt, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

With the exception of a few men on strike, labour was fully employed during July, which was a better month than June and compared favourably with the corresponding month of last year. Labor skilled and unskilled, was in demand at the close of the month; a number of female operatives were especially wanted. The building trades were exceptionally busy, the value of permits exceeding that of the corresponding period of last year. An unusual number of private houses are being built. A number of the factories are advertising for men; four are building large additions, and the Ham and Nott Manufacturing Co., has announced that it will build as soon as possible a \$30,000 addition to its factory, which will about double its capacity. Merchants had a busy month. The Wednesday half-holiday for the clerks started on the 10th and will continue during July and August. Those engaged in the printing and allied trades have been granted a reduction in hours from 8½ to 8 per day, starting July 1st; about 60 persons are affected. Extensive sewer construction work has commenced, and there is a demand for steady labourers. Real estate values are steadily rising, and rents have gone up fully 10 per cent. during the year.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Agriculturists were very busy, and farm labourers were in demand.

The hay crop is better than was expected, though not so good as last year.

*Manufacturing.*—Industrial establishments were busy, several advertising for men, skilled and unskilled. The Cockshutt Plough Co., has shut down for a short time for stock-taking and repairs.

*Railroad construction.*—The Brantford and Hamilton Electric Railway Co., is grading in the eastern limits of the city. The road is expected to be ready by October. The work of grading and double-tracking on the G. T. R., to Lynden is about completed.

## CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were interfered with by the carpenters' strike and a shortage of brick during the first part of the month. Lathers and plasterers were active. Painters and decorators were busy. Plumbers, gas and steam-fitters were very busy.

*Metal.*—Iron moulders, machinists, coremakers, electrical workers, linemen, metal polishers, blacksmiths, boiler-makers and sheet metal workers were very busy. Stove mounters are on strike; those working were busy. Horseshoers were active.

*Woodworking.*—Woodworkers, carriage and wagon makers, pattern makers and coopers were busy.

*Printing.*—Printers and pressmen were busy on both newspaper and job work.

*Clothing.*—Journeyman tailors were busy.

*Food and tobacco preparation.*—Bakers and confectioners were very busy. Butchers were busy. With cigarmakers and tobacco workers, trade was fair in some shops and active in others.

*Leather.*—Leather workers and saddlers were busy.

*Miscellaneous.*—Barbers, clerks and delivery employees were busy. Laundry workers were very busy.

*Transport.*—Trackmen, freighthandlers and street railway employees were busy, as were teamsters and draymen.

*Unskilled labour* was in demand.

## DISTRICT NOTES.

*Blue Lake.*—The Portland Cement Co. is advertising for labourers.

*Paris.*—Building was brisk, with labour fully employed. The mills and factories were busy.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was active during July. In some lines of manufacturing, a slight falling off was noticeable, but not more than is usual at this season of the year. Outdoor labour was fully employed. A number of new factories were installing machinery, and will soon need a considerable number of workpeople, a demand which can hardly be met locally. Retail trade was quiet. There were no changes in wages and no unrest during the month.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have started haying. This crop, as well as the amount of straw, generally will be lighter than usual.

*Manufacturing.*—Manufacturers had a good month, but a slackness was noticeable in some lines.

##### CONDITION OF PARTICULAR TRADES.

*Building trades.*—These trades had an active month in all lines. The scarcity of brick has been met. Bricklayers, masons, carpenters, painters, stonecutters, plumbers and builders' labourers had an active month.

*Metal, engineering and shipbuilding.*—Iron moulders, machinists and helpers, and tube mill workers were steadily employed.

*Woodworking.*—These trades in some lines showed a slight falling off. Piano and organ workers were off one week for stock-taking, but were active during the balance of the month. Woodworkers, carriage workers and upholsterers had an active month.

*Printing.*—Printers had an active month.

*Clothing.*—Journeymen tailors were quiet. Female garment workers were busy.

*Food and Tobacco preparation.*—Bakers, confectioners and cigar makers had a busy month.

*Textiles.*—Carpet workers had an active month.

*Unskilled labour.*—The demand for this class was met largely by new arrivals.

##### DISTRICT NOTES.

*Rockwood.*—An addition 83x60 feet to the woollen mills is under way.

#### WOODSTOCK, ONT., AND DISTRICT.

*Mr. M. H. N. McEltheran, correspondent* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

During July labour was not as active as during the corresponding month last year. While the factories on the whole were busy, there seemed to be no desire to take on additional hands. It was decided to go ahead with the erection of the Young Men's Christian Association building, and men and teams have been employed making the excavations. Farm labourers found no difficulty in getting work at \$1.00 to \$1.50 per day with board. There is still the complaint that many farm hands make application for work, but know comparatively little about farming. A man with a knowledge of farming need not go far into the country to get a good place at good wages. Cheesemakers were steadily employed, the price averaging about 11 1-8c. per pound in this section. The good price obtained for cheese encourages the farmer to send his milk to the cheese factory, and this in turn enhances the value of butter on account of the limited supply; as a result, private creameries are thriving and new ones established. The City Council adopted a resolution amalgamating the Collegiate Institute and Public School Boards. Some two years ago there was established at the Collegiate Institute a manual training department, which has

been steadily growing. The equipment comprises about 35 work benches, completely tooled; 3 wood turning lathes; 1 iron lathe and a forge. The machinery is operated by a gas engine. The cost to Woodstock last year, including teachers' salaries and other expenses, was \$497.00. Woodstock College has also a well-equipped manual training department.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were well employed, and indications are that the crops will all be good excepting oats, which in some places are patchy, with the straw short. The hay crop turned out better than was expected. Hay sold at \$14 per ton; oats, 50 cents a bushel; cheese at 11½c. per lb., and butter at 28c. per lb.

*Manufacturing.*—All establishments were fairly employed. The pipe organ industry was very brisk.

*Railroad construction and employment.*—The Grand Trunk Railway Company was ballasting the main line east of Woodstock, using chiefly farm teams.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were steadily employed, but no additional hands were taken on owing to lack of new contracts. Carpenters were all employed, some on work situated outside the city. Painters, paperhangers and builders' labourers were all busy.

*Metal, engineering and shipbuilding.*—Iron moulders had steady employment, but stove mounters and polishers were quiet. Machinists were busy, and some competent men could have found employment. Linemen were rushed, particularly towards the end of the month. Boilermakers were well employed.

*Woodworking and furnishing.*—All woodworking factories were fairly busy. The local plant of the Canada Furniture Manufacturing Company has not yet started with a full staff since closing down for stock-taking. A number of the men were employed on the new addition which the company is adding to its premises.

*Food and tobacco preparation.*—Bakers and confectioners did a good business, but cigar makers were not very busy.

*Leather.*—All leather workers had a good month.

*Miscellaneous.*—July was a satisfactory month so far as labour was concerned, there being no men idle.

#### DISTRICT NOTES.

*Ingersoll.*—At the first of the year, the Ingersoll Town Council put itself on record as favouring municipal ownership. The first definite step in that direction was taken a short time ago, being the purchase by the town of the waterworks, electric light works and the gas works. The report of the committee which had the matter in charge was that the waterworks could be bought for \$95,000, and the electric light plant for about \$55,000. The companies claimed that these figures represented the actual cost of their plants. The gas company asked \$65,000 for its plant.

#### STRATFORD, ONT., AND DISTRICT.

*Mr. Jos. T. Carlin, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been steadily employed during July, with no idle men. Factories were running full time, and all outside workers have bright prospects for the summer. Great activity prevailed in the building trades, as a number of residences are in course of erection, and many alterations and improvements being made to business places. An addition to the gas works to cost \$2,796 is nearly finished. Work has begun on the building of a new church. The contracts are let for the G. T. R., shops extension. The entire work is in charge of the Arnold Engineering Company, of Chicago, which has let the contracts to Canadian firms. A large gang of men is at work on the John st., sewer. Merchants and banks reported an active month's business. No changes in the rate of wages or hours of labour were reported. Dry goods merchants have granted their clerks a Wednesday half-holiday.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busily engaged haying and reported good prospects for the harvest, though oats are not up to the average in some districts. Gooseberries sold at 6 cents per qt.; red and white currants at 6 to 7 cents per quart; black currants at 13 cents per quart; new potatoes at 35 to 50 cents per peck; cabbage at 5 to 10 cents per head; eggs at 17 cents per dozen; butter at 20 to 21 cents per pound; chickens at 30 to 65 cents each.

*Manufacturing.*—Conditions were very satisfactory. No factories reported lack of work.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were busy, as were carpenters, painters, paper hangers, stonecutters and builders' labourers. Plumbers and plasterers were active.

*Metal and engineering.*—Iron moulders and helpers, electrical workers and linemen were active. Blacksmiths, boiler-makers and horseshoers were busy.

*Woodworking.*—These trades had an active month. The sash and door factories were busy.

*Printing.*—Trade was active.

*Clothing.*—Journeymen tailors and garment workers were busy.

*Food and tobacco preparation.*—Bakers and confectioners were active. Butchers had a busy month. Cigar makers reported plenty of work.

*Leather.*—Harness makers reported trade very good.

*Miscellaneous.*—Barbers, clerks and delivery employees were active. Hotel and laundry help was busy, and in some cases there was a demand for workers.

*Transport.*—All branches had a very active month.

*Unskilled.*—This class was well employed.

## DISTRICT NOTES.

*Goderich.*—The C. P. R., track-laying train crossed the bridge over Dunlop's Hill and is now at work on the north bank of the river Maitland, opposite the town,

so that the rails on the Guelph and Goderich branch reach now practically to Goderich.

*Hanover.*—The town is building a town hall and public library at a cost of \$23,000

## LONDON, ONT., AND DISTRICT.

*Mr. Alex. Woonton, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have been active during July, but the influx of immigration fully supplied the demand, especially in the building trades. A general demand for female help was felt both in the factories and for domestic work. A firm from the United States has bought two acres of ground and has let contracts for the erection of buildings in which to manufacture ploughs. The McClary Co. has had another large building turned over by the contractors, and will now employ in all about 1,300 workpeople. Shuttleworth and Company's new three-storey cap factory is also completed.

A most deplorable accident occurred on the afternoon of Tuesday, July 16, when the four-storey building occupied by W. J. Reid and Company as a wholesale and retail crockery store, with a part of the ground floor sub-let to Hamilton, Long & Company, retail clothing merchants, suddenly collapsed. In its fall a building occupied by a photograph gallery and store was also carried down. Eight people were killed and 12 were injured. About 25 escaped through the front doors. The damage done amounted to \$400,000.

An agreement was signed during the month between the *Advertiser* and *Free Press* newspapers and the Typographical Union by which all hands receive one dollar increase from July 1, 1907, and a further increase July 1, 1908, to continue until June 30, 1910. An agreement was also signed between the *Advertiser* job department and the Typographical Union to increase the scale of job printers from \$10 to \$12 per week, and reduce the hours from 54 to 51 per week.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons had plenty of work, but there was no demand for additional help, plenty having arrived from Europe. Carpenters were in demand. Lathers and plasterers were very busy, and painters and plumbers were rushed. Stone-cutters had considerable out-of-town work on hand and were exceptionally busy. Builders' labourers were busy, with the supply about equal to the demand.

*Metal, engineering and shipbuilding.*—Iron moulders reported trade good, with plenty of orders ahead. Iron workers continued to work night and day shifts. Machinists were busy, and boilermakers were very busy. Metal polishers and stove mounters reported trade good.

*Woodworking and furnishing.*—Carriage and wagon workers were exceptionally busy. Car builders had all the repair work they could handle. Coopers were extra busy.

*Printing.*—Printers were busy, and a number of arrivals from the old country have obtained ready employment. Press men and press feeders were somewhat in demand, several firms being short-handed.

*Clothing.*—Journeymen tailors reported trade somewhat dull, a usual condition at this season. Garment workers were busy, and boot and shoe workers reported trade good.

*Food and tobacco preparation.*—Biscuit and candy factories were working overtime, from 6 to 8 o'clock three nights a week. Cigar makers were busy, with no hands idle.

*Miscellaneous.*—Broom makers were very busy, and laundry workers were rushed.

*Transport.*—Train crews reported a large amount of freight moving and not sufficient engines to handle it, making long hours on duty necessary. Street railway employees were making a lot of overtime, owing to heavy passenger traffic to the summer park.

*Unskilled.*—A large amount of work is in progress.

## ST. THOMAS, ONT., AND DISTRICT.

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during July was much the same as during June. The building trades and various industries were well employed. Unskilled labour was scarce in some localities, and men desirous of finding work had no difficulty in procuring positions.

There were no changes in rates of wages or hours of labour. House-seekers found it as difficult as ever to procure houses.

A by-law submitted to the rate-payers asking their sanction of a bonus of \$50,000 to the St. Thomas Car Co., Ltd., was passed. Additional stock is now being subscribed. It is the purpose of the company to give residents of this city first option on stock. The plant to be erected will be sufficiently commodious to enable the firm to manufacture not less than five standard freight box cars per day. The company is to employ not less than one hundred and fifty men for fifteen years. The estimated pay-roll upon the minimum of employees is eight thousand to ten thousand dollars every month, and this in all likelihood will be increased.

Considerable activity prevailed along the route of the South Western Traction Co., in this city, and south to Port Stanley. As a result, the prospects are that before very long cars will be operating between St. Thomas and Port Stanley.

Employees of the various railway shops have been busy. Instead of the usual summer reduction in working forces, efforts have been put forth to procure help, both skilled and unskilled.

The recently constructed canning factory commenced operations some weeks ago, and at present have 17 men employed on construction work. Ninety-two women are employed in the factory at the present time, and it is expected that during the rush season this force will be increased to at least one hundred and fifty.

There has been a plentiful supply of produce offered at the factory. so far.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have been busy harvesting hay and wheat. The hay crop has been light for the most part. The wheat has shown up well, considering the backwardness of the season. Strawberries were fairly plentiful and the quality all that could be desired. Raspberries and cherries are not plentiful. Farmers have experienced some difficulty in procuring help.

*Lumbering.*—Planing mills were running steadily, the demand for material being good.

*Manufacturing.*—The various establishments reported an active month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All hands were well employed. The weather conditions greatly favoured out-door work. There are no large building contracts reported, work, for the most part, being on the construction of residences and repair work.

*Metal, engineering and shipbuilding.*—The moulding and machine shops were working to full capacity.

*Woodworking and furnishing.*—Woodworkers, upholsterers and cabinet makers had an average month.

*Printing and allied.*—Printers and press men found trade good.

*Clothing trades.*—Journeymen tailors and garment workers had an average month.

*Food and tobacco preparation.*—These trades were fairly well employed.

*Miscellaneous.*—Barbers, clerks, delivery employees, laundry workers and others similarly employed reported an active month.

*Transports.*—The transportation service had a busy month. On the railroads there have been many special trains, and freight business was brisk.

*Unskilled labour* has been well employed during July. The Michigan Central shops could give employment to twenty men at the present time.

#### CHATHAM, ONT., AND DISTRICT.

*Mr. Alex. Gregory, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There has been a great demand for skilled and unskilled labour. The immigrants sent here have not given satisfaction to the majority of the farmers, and work has been abundant. The city has closed a contract with the Colonial Engineering Company of Montreal for the installation of a new electric light plant. There have been no strikes or lockouts this month, and no changes in wages or hours.

The present scale of wages for good workmen in the different trades in this city and district is as follows:—

Class of Labour.	Rate of Wages, Not less than:	
Bricklayers and masons....	\$3.60 per day	9 hours.
Bricklayers and masons labourers.....	2.00	" 9 "
Plasterers.....	3.00	" 9 "
Carpenters and joiners....	2.00-2.50	10 "
Moulders and machinists...	2.50	" 10 "
Painters and paperhangers.	2.00	" 10 "
Tinsmiths.....	2.00	" 10 "
Corporation labourers.....	1.75	" 9 "
Stationary engineers.....	1.75	" 10 "

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—A heavy frost on the morning of July 3rd did damage to corn, beans and tomatoes. Many of the farmers were compelled to plough up their beans and corn and re-plant. The result has been to cause much extra work at the haying and harvesting time. With the scarcity of farm labour prevailing, this has been a serious drawback to many. The apple crop in Kent county will be a light one, and will not more than supply the home demand. Strawberries were only about half a crop, and there were scarcely any raspberries.

*Railway construction.*—The C. W. and L. E. Electric Railway Co., was very busy placing wires and ties, so that as soon

as the rails arrive, the lines will be completed in a couple of weeks.

*Manufacturing.*—On July 16th ground was broken for the Wolverine Brass Works, and a large number of men were started to work. The building is to be completed by November 15th.

*Mining.*—Oil men expect a number of new wells to be shot as soon as machinery can be secured.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters and joiners were very busy. Plasterers were only fairly well employed, buildings not being far enough advanced. Painters were busy, but only a few paperhangers had steady employment at this season. Stonecutters were slack, cement blocks taking the place of stone in nearly all the large buildings. Builders' labourers were all employed.

*Metal, engineering and shipbuilding.*—Iron moulders, coremakers, machinists, blacksmiths and boilermakers were busy. Electrical workers and linemen were very busy for the season of the year. Jewelers reported trade only fair.

*Woodworking and furnishing.*—The planing mills and carriage factories were running to full capacity.

*Printing.*—Printers were very busy and unable to turn out work fast enough owing to lack of printers. Pressmen and bookbinders had steady employment.

*Clothing.*—Journeymen tailors reported conditions slack.

*Food and tobacco preparation.*—Bakers, confectioners and butchers reported a good month.

*Miscellaneous.*—Barbers, delivery employees, hotel and restaurant employees have been very busy.

*Transport.*—Owing to the large number of excursions, railroad employees have had a very busy month. Teamsters had a good month.

*Unskilled labour.*—This class has been in good demand owing to the large amount of street improvements carried on.

#### WINDSOR, ONT., AND DISTRICT.

*Mr. D. Mitchell, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was steadily employed during July, with no men capable of working out of employment. The building trades were active, though the volume of trade was not as large as in the corresponding month of last year, owing mainly to the increased cost of building material. Other industries were working to their full capacity. Many factories and shops have inaugurated the Saturday half-holiday during July and August. Retail merchants reported business good, notwithstanding that a large number of families are out of the city. The City Council has increased the salaries of a number of its employees as follows:—

Assessment Commissioner from \$600 to \$800 per yr.	
Clerk (female).....	540 to 600 per yr.
Janitor.....	660 to 720 per yr.
Plumbing Inspector.....	600 to 700 per yr.
Sanitary Inspector.....	600 to 700 per yr.
Ten labourers were increased in wages from \$1.50 to \$1.75 per nine-hour day.	

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy gathering hay, which owing to the rain and warm weather has turned out better than was expected; other crops have improved and will be better than was hoped for. Prices for farm produce remain good. Butter was 20c. a pound; eggs 22 cents a dozen; spring chickens, 60 cents a pair; live chickens, 50 cents a pair; and new potatoes, \$1.50 a bushel. There was a scarcity of farm labourers. Good steady men are getting from \$25 to \$30 per month with board.

*Manufacturing.*—All industrial establishments were very busy, some working overtime.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—There was a lull in building owing to the increase in cost of building material. Houses are very scarce,

and building must soon commence. All connected with the trade were fully employed.

*Metal, engineering and shipbuilding.*—All branches were active. Iron workers, machinists, electrical workers, blacksmiths, sheet metal workers, etc., were very busy,

*Woodworking.*—With the exception of employees in the planing mills, these trades had a busy month.

*Printing.*—The printing and allied trades reported active conditions, with both job and newspaper printers very busy.

*Clothing.*—Journeymen tailors were very busy, with competent garment workers in demand.

*Food and tobacco preparation.*—Bakers, butchers, ice handlers, cigar makers and tobacco workers were fully employed.

*Leather.*—Workers on leather goods were actively employed.

*Miscellaneous.*—On July 15 the Journeymen Barbers' Union adopted a change in prices as follows:—

	Old Prices.	New Prices.
Hair cut .....	25c.	25c.
" whiskers trimmed.....	35c.	35c.
" children.....	15c.	25c.
Neck shave.....	5c.	5c.
Holiday shave.....	10c.	15c.
Massage.....	15c.	25c.
Hair singe.....	15c.	25c.

*Unskilled labour.*—The demand for this class slightly exceeded the supply.

#### WINNIPEG, MAN., AND DISTRICT.

*Mr. John Appleton, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

For men to work outside of the city, there was a great demand, but there were plenty of men available for work within the limits of the city. Work in the city has not been so extensive as in previous years owing to labour troubles

and other causes. Among the latter may be included the prevailing money stringency. The corporation has had to close down several important public works on account of the difficulty of getting money. On sewers, which in their construction generally give employment to several hundred labourers, there is not at present more than a dozen employed. In other city work there has been a similar restriction of employment. Of those usually employed by the city, many have accepted railroad construction work, but there is a strong disposition on the part of the labourer who has a family resident in the city to exhaust every means of getting employment here before leaving his family.

A large number of men are employed on the construction of the new locks at St. Andrew's rapids, on the Red river. Very satisfactory progress has been made. A new post office in the northern part of the city of Winnipeg is also in course of erection.

Bank clearings indicate a steady expansion of trade, but there is a feeling of anxiety regarding the outcome of the crops. In view of reports from certain localities, many of the merchants are curtailing their businesses. Action in this direction has also been in many cases obligatory because of the action of the banks in reducing lines of credit extended to traders and business men generally. Railroad traffic returns do not show any diminution in the amount of merchandise carried, and at far western points business is reported to be extremely active.

Conditions generally in labour circles have been unsettled owing to the strike in the building trades. This, however, was settled on July 22.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Reports indicate that the crop is uneven. This is especially applicable to wheat. In the southern portions of Manitoba there has been lack of rain, but in the northwestern sections, and in Alberta and Saskatchewan, the general reports indicate very favourable conditions, with the exception of lateness, which is very general.

*Railroad construction.*—More men are wanted, and some of the principal contractors are seriously affected through the inability to get a sufficient supply of labour. This lack of labour is becoming more acute as the crop season approaches. In addition to the construction work in progress, there is a large number of men employed on improvements.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Work on building has been practically suspended during the strike of the bricklayers. Other trades felt the effects of the strike. As soon, however, as there was a prospect of a settlement, the amount of building increased. The contractors were all protected by a strike clause in their contracts. Many claim, however, that they have been subjected to a loss through the action of men in limiting the output of work. To remedy this, they desire to have foremen answerable, not to the Union, but to themselves. This is one of the points that has not been settled in the agreement just signed, but will be dealt with by the executive of the International of the Bricklayers' and Masons' Union. Painters, plumbers, gas and steam-fitters were only fairly busy. There appear to be quite enough men on hand to do all the work in sight.

*Metal and engineering.*—The foundries all reported business good and prospects for the future bright. They are at present handling a great deal of railroad work.

A new rolling mill has been started and almost a hundred men are now employed.

*Woodworking and furnishing.*—Sash and door factories were working to full capacity, although the volume of business offering was not so large as was anticipated. Carriage builders reported a good demand for a better class of work than hitherto called for. Many of the wagons previously imported from eastern Canada are now being made in Winnipeg.

*Printing.*—There was some dullness reported. The holiday season is on, and slackness usually follows the fair week, which closed on July 20. Some enquiry is being made for skilled hands

in the box-making and book-binding branches.

*Clothing.*—Business was very active, especially in the factories where the coarser grades of clothing are made, such as overalls. Factories that devote special attention to blouse making and women's wear are steadily increasing their output.

*Food and tobacco preparation.*—Conditions were normal.

*Leather.*—A new leather factory has been started in Elmwood, and it is expected that it will give employment to many hands. In addition to leather manufacturing, the same concern will tan sheep skins for the purpose of making mats. The firm is already doing a good business.

#### BRANDON, MAN., AND DISTRICT.

*Mr. S. P. Stringer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Building, up to the end of the month, showed a large increase over the corresponding period of last year. During the first six months of 1906, building permits valued at \$245,177 were issued, while for the same period of 1907 the value was \$315,795, showing an increase over last year of about \$70,419. Permits were being issued steadily for the erection of residences, etc. Work on the construction of the \$30,000 depot for the Great Northern Railway Company has been commenced. The new Winter Fair building is expected to be finished before the winter sets in; it will cost about \$40,000. Business was brisk in all lines. Transportation companies reported a very active trade in agricultural machinery. The Canadian Pacific Railway Company has leased a large block for up town offices. There were no changes in the rates of wages, but the clerks of the city, numbering about 250, have received a Thursday half-holiday during July and August. There was no unrest in the labour market.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The wheat crop is two weeks later than last year. Some districts have had plenty of rain, but others need it very much. Wheat along the Canadian Northern Railway throughout the West has been making rapid growth. The Canadian Pacific Railway Company's agents reported abundance of rain in the West, with excellent growing weather. One agent reported the growth as being fourteen inches. Specimens selected at random were remarkable for the strength of stem and root. The export trade in Manitoba wheat has been heavy, and promises to continue so. Receipts of the crop of 1906 continue to come forward rapidly, and the inspectors' office is as busy now as it was last October.

Reports show that great interest is being taken in the dairy demonstration train, all classes co-operating with the agricultural societies and farmers' organizations to make the meetings at different points a success.

*Lumbering.*—Seven million feet of logs arrived from the Riding mountains on the first of July, for the Hanbury Manufacturing Company. Sash and door factories are doing a good business.

*Manufacturing.*—Flour, mills, etc., were active.

*Railroad construction and employment.*

—Work on the Grand Trunk Pacific line between Saskatoon and Edmonton is being rushed. The force of 1,700 men and 900 teams will be increased to 1,900 men and 1,000 teams within two weeks. Steel and ties were being shipped, and one hundred and fifty miles of grade will be ready for the steel by August. One mile per day is the rate of construction at Portage la Prairie. The Canadian Pacific Railway Company is doing a large amount of construction work and other improvements on its various lines.

*Other industries.*—It is the intention of the Provincial Government to proceed almost immediately with the construction of a telephone system in the city of Brandon. It is probable that the first long distance line for the Government's system will be built from Brandon to Verden, and from there to Hamiote and Birtle, connecting the various muni-

cipal systems which will be in operation along the route.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Workmen were busily employed, although work was somewhat impeded by lack of material. Plumbers and steamfitters were active. An advertisement appeared in local papers for three first-class tinsmiths at \$4.00 per day, and also for several good men for brickyards at Brookdale, Man.

*Metal, engineering and shipbuilding.*—Iron moulders, machinists, steam engineers, sheet metal workers and boiler-makers were active, and sheet metal workers busy.

*Woodworking and furnishing.*—Woodworkers, upholsterers and pattern makers were active.

*Printing.*—Printers and pressmen were actively employed.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters, ice-handlers, cigar makers and tobacco workers were active.

*Transport.*—Traffic on the Canadian Pacific Railway still continues heavy, and the men employed in the different departments were busily employed.

*Unskilled.*—The market for this class was well supplied.

## DISTRICT NOTES.

*Rosthern.*—A one hundred barrel flour mill will be shortly built at a cost of about \$20,000. The company will be composed of local business men, who felt that another mill was necessary. The machinery will be purchased in Ontario, and the mill will be finished in time for the fall trade.

*Yorkton.*—The crop prospects are up to last year's standard. The town is making many improvements, and has taken over the telephone system. It is also installing a sewerage and water plant to cost about \$60,000. The number of building permits issued exceed those to this date last year. Three new brick yards have been started.

*Saskatoon.*—A discovery of coal has recently been made at Eagle Lake, and crude tests have already been made, showing a fifty foot seam of lignite coal of good quality. If the mine proves to be a good one, the Provincial Government may develop the mine for the use of settlers.

## REGINA, SASK., AND DISTRICT.

*Mr. Hugh Peat, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during July was quiet, and did not compare favourably with the corresponding month of last year. There was a slight improvement in the building trades as compared with last month. The value of building permits issued during the month amounted to \$175,000, as compared with \$290,510 in April and \$286,455 in May. A new wholesale grocery firm is about to open. There was some unrest in the building trades owing to the steady influx of carpenters in response to advertisements in eastern newspapers. Many carpenters were unemployed.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The weather during the past month has been favourable for plant growth, and the crops made good progress. There may be a slight percentage of the crop that will have to be cut for feeding in the sheaf. Though the crops were sown some weeks later than usual, at the present time they are not more than ten days behind last year. A lack of moisture was reported from some districts, but no considerable portion of the Province has suffered from that cause. The stubble crops will ripen earlier than those grown on summer fallow, but the yield per acre will be slightly less than the fallow crop.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were fairly active, though many brick-

layers were unemployed, owing to scarcity of building material, the completion of many large buildings, and the tardiness in commencing further building operations, owing to the depression in the money market. Carpenters found employment light, the supply of workmen being in excess of the demand. Lathers and plasterers were active, and painters and decorators were fairly busy. Plumbers, gas and steamfitters were very busy, and there were some openings for competent workmen. Builders' labourers were somewhat quiet, the supply exceeding the demand.

*Printing.*—Job and newspaper printers were very busy, with competent machine operators in demand, and bookbinders also very busy.

*Food and tobacco preparation.*—Bakers and confectioners were actively employed, but cigar makers were somewhat quiet.

*Miscellaneous.*—Clerks, stenographers, etc., had a busy month. Hotel and restaurant employees were very busy.

## MOOSEJAW, SASK., AND DISTRICT.

*Mr. J. R. D. Bastien, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET

There was greater activity during July than in the previous month, and labour was in greater demand, especially among agriculturists, the building trades and railway employees. There were no disputes between employers and employees, and wages were high. The cost of living remained about the same as a year ago. The tax rate for 1907 was increased 8 mills on the dollar, though the rate last year was on a lower assessment. The total assessment last year was \$3,951,770. This year it is about \$6,000,000. The Canadian Pacific Railway Company has the foundation built for an addition to the roundhouse of 16 additional stalls. This building is estimated to cost \$50,000. The company is also extending the yards and approaches. The building permits issued by the city are in excess of those

granted during July, 1906, and the building trades were exceptionally busy. The city passed a by-law authorizing the borrowing of \$125,000 for civic improvement ments.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There is every promise of an abundant harvest. Weather conditions have been exceptionally favourable, and though the season is late, the harvest will not be more than a week later than last year. The immigration into this district was greater than ever before.

*Railroad construction and employment.*—Employment was very active. There has been a great increase in passenger traffic. A few years ago there were only six passenger trains in and out of Moosejaw daily, whereas to-day, not including extra trains, there are 20 passenger trains daily, giving employment to a large number. During July the locomotive firemen and enginemmen received an advance in wages.

*Other industries.*—The Saskatchewan Telephone Company is extending its lines, as its patronage during the year has more than doubled. The Company will have connection with Caron. 16 miles west of Moosejaw, in a short time. Large forces, both in the city and in the rural extensions, are being employed.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All were employed to fullest extent, and the supply was not greater than the demand.

*Metal, engineering and shipbuilding.*—Machinists, engineers and horseshoers were active, and electrical workers very active. Steam engineers, blacksmiths, jewellers, etc., were very busy.

*Woodworking and furnishing.*—Active conditions prevailed.

*Printing.*—Active conditions prevailed.

*Clothing.*—These trades were busy.

*Food and tobacco preparation.*—These trades were exceptionally busy.

*Miscellaneous.*—Barbers were very active, as were clerks and stenographers. delivery employees, hotel and restaurant

employees were busy, with laundry workers exceptionally so.

*Transport.*—Employees in all branches were exceptionally active. There was a good demand for experienced men in many branches.

*Unskilled.*—Very active conditions prevailed. Wages were very good, and the supply was scarcely up to the demand.

#### CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brocklebank, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

During July there has been a number of idle men in the district. The cause of the over-supply was two-fold; first, the heavy immigration to the western provinces, and secondly, the shortage of material from the eastern factories, which has delayed building to a large extent. With the approaching haying and harvesting season, it is believed that labour conditions will be more active than at the present time. During the present month work has commenced on a large addition to the standard Soap Company's factory. Another brick and terra cotta company has been formed in Calgary, and its plant is nearly ready for operation. The transportation companies had a very busy month, the passenger and freight traffic having been exceptionally heavy. Shippers find difficulty in obtaining cars. Bank clearings continued to show a marked increase. The clearings for Calgary for the week ending July 18th were \$1,357,500, or an increase of 31.6 per cent. over the corresponding week of last year. Wholesale and retail trade has been very satisfactory.

During July the plumbers, gas and steamfitters went on strike for an increase in wages. Some forty men went out on July 2nd and were out till July 11th, when they returned to work pending a settlement of their dispute by arbitration, the Board being composed of three men from the Builders' Exchange and three from the Building Trades Council. The Board met and granted the men an in-

crease from 45c per hour to 51½c per hour. The men were asking 55c per hour. The Board also granted the steamfitters' helpers an increase from 25c to 30c per hour. The working conditions remain much the same as prior to July 1st. It will be remembered that during the strike of the carpenters in September, 1906, it was agreed by the Builders' Exchange and the Building Trades Council that differences relating to the building trades should be settled by a permanent board of three members from each body. When the plumbers' trouble arose, there were only three out of nine master plumbers members of the Builders' Exchange, and the plumbers thought they were not justified in leaving their trouble in the hands of the Board until such time as all the master plumbers would agree to be bound by the decision of the Board. On the 10th of the month, all the master plumbers signed an agreement to this effect. The men then returned to work.

The Police Department of the city has taken the census during the latter part of June and the first week of July, and finds that the city has a population of 21,040, made up as follows: Old Calgary, 18,193; Rouleauville, 1,372; Riverside, 816; Bankview, 294; Hillhurst, 294; Sunnyside, 71. The census taken by the Dominion Government in 1906 was as follows: Calgary, 11,967; Bankview, 126; Hillhurst, 166; Riverside, with Ena Claire, 826; Rouleauville, 780; Breweryville, 351, making a total of 14,216. It will be noticed that the increase is 48%.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—There are prospects for a heavy crop throughout the province. Although the spring was somewhat late, the summer has been so favourable that the crops are far advanced,

The first irrigation convention ever held in the Dominion was held at Calgary, commencing July 17th, with representatives present from the provinces of Saskatchewan, Alberta and British Columbia. The Government of Saskatchewan was represented by Lieut. Gov. A. E. Forget; that of British Columbia by Hon. F. J. Fulton, and that of Alberta by the

Hon. W. H. Cushing, Minister of Public Works. Questions of vital importance to the several provinces were discussed, and it was decided to hold the next convention at Vernon, B. C.

*Mining.*—The management of the International Coal and Coke Company at Coleman, Alta., announced that a contract had been signed by the C. P. R. Co. by which the latter will take the entire output of the mines over and above the Company's requirement for its coke ovens. The International Company will now run a double shift, and the output will be about 2,500 tons every 24 hours. Hard coal has been advanced 25c and 50c a ton to the consumer, according to the quality of the coal. This advance was caused by the coal company at Bankhead advancing coal 25c and 50c f. o. b. at Bankhead. The Crows' Nest Coal Co. advanced its product 50c per ton before the strike last spring. No advance has taken place on coal mined at Galt, Blairmore, or Taber.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners, painters, decorators and paperhangers were dull, as were also builders' labourers. Lathers and plasterers, plumbers, gas and steamfitters and stonecutters were active.

*Metal and engineering.*—Iron moulders, iron workers and helpers, machinists, engineers, steam engineers, electrical workers and linemen, blacksmiths, boiler-makers, sheet metal workers, horseshoers and jewellers were active.

*Woodworking and furnishing.*—Woodworkers were busy. Upholsterers, carriage and wagon makers and car builders were active.

*Printing and allied.*—Printers, pressmen, bookbinders, steel and copper plate printers were busy,

*Clothing.*—Journeyman tailors, garment workers and boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters, and cigar makers were active.

*Leather.*—Leather workers and saddlers were active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel, restaurant and theatre employees, and laundry workers were active.

*Transport.*—All lines were busy.

*Unskilled labour.*—This class was active

## EDMONTON, ALTA., AND DISTRICT.

*Mr. J. A. Kinney, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was not as well employed as during June, the stringency in the money market somewhat limiting building operations. The supply of mechanics at present more than equals the demand, and as plans for civic improvement have been curtailed to some extent, unskilled labour will not be employed as largely as was expected. The value of building permits issued during June amounted to \$425,267; in June, 1906, it was \$244,010, and for the six months ending June 30, 1907, \$1,784,935. Some unrest was caused in the labour market owing to a strike of plasterers. The difficulty has been settled.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The prospects for a heavy grain crop are of the brightest, notwithstanding the lateness of the spring. The abundance of rain and sunshine has constituted perfect growing weather, and with continued favourable weather, a large yield is assured.

*Lumbering.*—The sawmills were again running, the balance of the season's cut of logs not carried away during the recent flood having been brought down the river to the mills.

*Mining.*—Coal mining was carried on to about the same extent as last month.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, carpenters, lathers and plasterers, plumbers and painters were not employed as fully as in June, a number being idle. Builders'

labourers were handicapped by the supply exceeding the demand.

*Metal, engineering and shipbuilding.*—Electrical workers and linemen were not very busy, the supply more than equalling the demand. Blacksmiths were fairly busy, also horseshoers, but sheet metal workers were somewhat quiet.

*Printing.*—Printers experienced busy conditions.

*Clothing.*—Busy conditions prevailed with journeymen tailors.

*Food and tobacco preparation.*—Bakers, confectioners and cigar makers reported trade active.

*Miscellaneous.*—Barbers, hotel and restaurant employees all reported favourable trade conditions.

*Unskilled.*—A large number of this class of labour found ready employment in railway construction work, but on the whole the supply of unskilled labour more than equalled the demand.

## NELSON, B. C., AND DISTRICTS.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during July was active throughout the Kootenay district, the only drawback being a shortage in the car supply during the latter part of the month. The chief shortage is at present felt in the Crow's Nest Pass district. The foundations for the court house at Nelson are about completed. The Canadian Bank of Commerce building is making satisfactory progress. The marble for the job is furnished by the Kootenay Marble Works Company of Nelson, B.C., from its quarries situated on Kootenay Lake. Both quartz and coal mining are enjoying prosperity, the mines producing slightly above the average. The strawberry crop in the Kootenay Lake and Slocan districts has been excellent, and was marketed at advantageous prices. Raspberries are coming in and promise an abundant yield. Considerable fruit land has changed hands here this season at fair prices.

## NEW WESTMINSTER, B. C., AND DISTRICT.

Mr. D. J. Stewart, correspondent, reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during July was exceptionally busy, the demand being about equal to the supply. The starting of several new industries advantageously affected labour. The wooden pipe works is giving employment to a large number of workmen, and the glass works is also employing a number of skilled mechanics at good wages. In connection with the latter industry a valuable deposit of sand has been discovered near the works. The building trades are having a very busy season, an unusual amount of building being in progress. It is estimated that at the present time some 75 new houses are under construction. The river boats plying between this city and Chilliwack are having a very busy season, freight and passenger traffic being unusually heavy. The local fruit cannery was very busy; up to the present, about 20 tons of cherries have been canned. This is a considerable increase over the quantity canned last year. The demand for the product of the local factory is good, and the plant will have to be increased to handle next year's product. about 75 hands are employed. The employees of the British Columbia Electric Railway company, in this city, Vancouver and Victoria, had their wages increased on July 1, by about 20 per cent. The new agreement is for three years, or until July 1, 1910. The strike of moulders which took place recently has been settled. the men returning to work at the old rate of wages until the first of August, when they will receive an increase of 25 cents per day of nine hours. Although wages have advanced in most lines of industry, prices of staple commodities have advanced from 25 to 50 per cent in the past two or three years; flour has risen from \$1.45 to \$1.60 per sack, and potatoes are quoted at \$2.00 per sack. Other lines of goods have

also advanced. In the matter of house rent, an increase has been made in the past two years of nearly 50 per cent.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busily engaged harvesting the hay crop. This crop is rather below the average in consequence of the dry spring. The root crop, however, is better than usual, a heavy yield being predicted. Prices of produce were quoted as follows:—

Beef, hind quarter .....	\$ .08½ to \$ .09½	per lb.
“ fore “ .....	.06 to .07½	“
Mutton .....	.12 to .13	“
Lamb .....	.14 to .15	“
Pork .....	.11	“
Veal .....	.10½ to .11	“
Butter .....	.30 to .35	“
Eggs .....	.35	per doz.
Potatoes .....	2.00 to 2.25	per sack.

*Lumbering.*—This industry was still active. A number of the logging camps closed down, but have again opened up. It is estimated that the total cut of logs in British Columbia for the fiscal year ending June 30 will be 678,687,324 feet, the largest cut in the history of the industry in this Province. A revenue of \$800,000 has been received by the Provincial Government from timber licenses, royalties and export taxation during the fiscal year ending June 30, 1907.

*Fishing.*—The industry on the Fraser river was fairly active. Very small catches of sockeye salmon were reported, but spring salmon were still being caught in fairly good numbers. A large amount of canned salmon has been sold on the London market this season below the market value, but the market is again recovering and prices are advancing steadily; one pound tails being now quoted at \$6.60 per case, or an advance of 60 cents; one pound flats at \$7.00 per case, an advance of 40 cents. The canners claim that the increase is warranted by the increase in cost of production.

## CONDITION OF LOCAL INDUSTRIES.

*Building metal and woodworking.*—Busy conditions prevailed in all branches.

*Printing and clothing.*—Activity was general in these trades.

Conditions in the remaining skilled trades were more or less busy.

VANCOUVER, B. C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in general was well employed, though the building trades were somewhat hampered by lack of material, especially brick. Owing to the arrival of about 1,600 Japanese labourers, the Trades and Labour Council appointed a committee to look into the Japanese immigration question. The majority of the new arrivals went to Steveston, where they will work for the canneries. Business in all lines remained steady. There were several changes in prices, and more fruits than heretofore made their appearance on the market towards the end of the month. Fresh Alberta eggs retailed at 40 cents a dozen. The Vancouver Milling and Grain Company, Limited, started operations during the first week of the month. This is the first flour mill operated on the mainland on the Pacific coast of Canada. A coal famine prevailed on the coast, and shipping was somewhat checked thereby. Thus far, trans-pacific shipping out of Vancouver has not suffered.

The value of building permits issued to the 26th instant amounted to \$722,695. The building inspector stated that with the Canadian Pacific Railway Company's sample room and the Gibb apartment house, plans of which had been issued, the two structures to cost about \$150,000, July would beat the record. The following is the total number of building permits issued this year, with comparison with 1906 by months:—

	1906	1907
January.....	78	79
February.....	93	35
March.....	90	176
April.....	89	139
May.....	85	184
June.....	62	179
July (to July 26).....	77	124
Total.....	574	1,016

The total for the whole of 1906 was 1,051.

On account of the increased demand for rice by the Japanese and Chinese, another mill will be operated in the east end of the city. A boom composed of 365 cords of bolts were brought into the harbour by the tug "Clara Young."

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—A good harvest is assured on the coast. In the Squamish Valley, on Lulu Island, and on the islands in the gulf, hay in most instances is yielding four tons to the acre.

*Fishing.*—Late reports from the north, as well as from the lower Fraser river, state that only 20 to 80 fish to the boat are being caught.

*Lumbering.*—The McNair-Fraser Company, Limited, will enter the milling and lumbering business here. The company will probably spend about \$250,000 in preparatory work.

CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were employed about the same as last month. Carpenters, lathers and plasterers, painters and decorators and plumbers reported trade active, with a few lay-offs on account of lack of material.

*Metal, engineering and shipbuilding.*—Moulders were well employed. The Moulders' Union has entered into an agreement with the Metal Trades Association regarding a new schedule. This agreement ended the recent strike. It provides for a wage of \$3.75 per nine-hour day, till August 1, the rate after that date to be \$4.00 per nine-hour day, with a Saturday half-day holiday. The old schedule was \$3.50 for nine hours and no Saturday half-holiday. There had not been a strike in this trade since 1890. Machinists, steam engineers and electrical workers were well employed, with bright prospects.

*Woodworking and furnishing.*—Carriage and wagon makers were very busy, but upholsterers were somewhat quiet. Varnishers were busy, but coopers were quiet.

*Printing.*—Printers and pressmen were active. Bookbinders reported trade fair.

*Clothing.*—Journeymen tailors and boot and shoe workers were fairly active.

*Food and tobacco preparation.*—Bakers, meat cutters and cigar makers were active.

*Leather.*—Harness makers found employment active.

*Miscellaneous.*—Barbers reported a few out of employment. Clerks, delivery and laundry employees were fairly busy.

*Transport.*—All classes of railroad men were busy. Men employed in the Canadian Pacific Railway Company's shops were endeavouring to secure a nine-hour day. Cabmen, teamsters and draymen were active.

*Unskilled.*—This class was well employed, though large numbers are arriving and departing daily.

## VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The month of July was a busy one with all classes of labour. In the building trades many extra men might have found steady employment, as a result of the unusual amount of building in progress. There are at present 108 residences in course of construction, and many more are contemplated. A scarcity of farm labour on the lower part of the main land was reported; and the farming industry will be considerably hampered thereby. A shortage of labour in the Skeena district affected the canneries there. It is expected that the situation may be relieved by the large number of Japanese now coming to the province. It is thought that a number of Japanese will be employed on railway construction work also. During the week ending July 5, Victoria bank clearings showed an increase of 48% as compared with the same week of last year.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Owing to the scarcity of rain, crops will not be up to the aver-

age, the crop of hay being much below. Small fruits have yielded well.

*Fishing.*—Large catches of spring salmon were made at the traps located on the shores of the island. One lift at the traps of Messrs. Finlay, Durham and Brodie produced 40 tons, which is spoken of as the record catch. During last season Messrs. Linderburg & Company shipped 400 tons, and it is expected that this year's output will be fully up to that of last year. Fair catches are also being made of sockeye salmon.

*Lumbering.*—Mills and logging camps were doing a good business, and as the prices of all kinds of lumber is double the price it was ten years ago, the industry is in a prosperous condition.

*Manufacturing.*—Manufacturing establishments had a busy month. The Victoria Machinery Depot was rushed with orders for machinery of all kinds. The marine iron works keep a full staff of workmen steadily employed. The Robinson Iron Company reported that it was behind with orders. The rates of wages in the machine shops average \$3.50 per day to about 125 machine hands. The Albion iron works have been so busy lately that it has been found necessary to extend the foundry by the addition of a new moulding room, 60x120 feet. With the carriage manufacturing business work was reported very brisk.

*Other industries.*—The pulp works at Swansea Bay are making good progress, and when completed will give employment to a large number of hands. At present about 40 mechanics are busily employed on the plant. Experienced millwrights, used to handling heavy machinery, are required, at wages from \$3.50 to \$5.00 per day. Representatives of British capital have been in Victoria investigating the condition with regard to establishing a blast furnace for the manufacturing of iron from the manganese iron ores known to exist on the island.

### CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades were all working to their fullest capacity. The value of the building permits issued

last month amounted to \$65,000, not including the suburbs. It will be necessary to rebuild the portion of the city recently destroyed by fire, in which about 100 residences were destroyed. Anyone experienced in building can find employment here for some time to come.

*Metal, engineering and shipbuilding.*—Iron moulders and workers were all working full time, as were machinists, engineers, steam engineers, electrical workers and linemen, Blacksmiths, iron ship builders, shipbuilders and caulkers were busy at the different yards on new vessels and repairs.

*Printing.*—The printing trade was more active than it has been for years. New linotypes are to be placed in two of the job printing offices.

*Clothing.*—Journeymen tailors still find constant employment at good wages on the piece work system.

*Food and tobacco preparation.*—Bakers, confectioners, meat cutters and butchers were well employed. Cigar makers to the number of about 50 were kept busy at wages ranging about \$20 per week. The amount of wages paid by the local factories to cigar makers, strippers and clerical force amounted to about \$1,000 per week.

*Miscellaneous.*—Barbers found work plentiful, notwithstanding that the price of hair-cutting has been increased to 35 cents. Clerks and stenographers were busy, also hotel and restaurant employees. In the dry-goods trade, business was exceptionally brisk.

*Transport.*—Steamboatmen and steamboat firemen, ship labourers and long-shoremen were well employed during July. The British Columbia Electric Railway company in Victoria, Vancouver and New Westminster, and their employees have come to an amicable settlement of the latter's demand for an increase in pay. The men had been working under a three-year contract, which expired on Sunday last, and the negotiations have been in progress for nearly two months. The new agreement is for three years, and provides for a substantial increase. It went into effect on the 1st instant. With reference to the motormen and conductors, the new schedule fol-

lows out the lines of the old, varying the rate of pay according to the length of term of service. It is as follows: First six months, 20 cents per hour; second six months, 25½ cents; second year, 26½ cents; third year, 27½ cents; fourth and fifth years, 28½ cents; sixth and seventh years, 29½ cents; eighth, ninth and tenth years, 30½ cents; over ten years, 31½ cents. In the New Westminster shops all recognized graduates at the trades will be paid as follows: First year, 37 cents; second year, 38½ cents; after second year, 40 cents. The pay of the employees about the barns, etc., has been advanced on a sliding scale equal to the advance given to the others.

#### NANAIMO, B. C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district remained unchanged since last month, there being still a demand for men in most industries. There was a complaint from all parts of the district that men cannot be procured in sufficient numbers for the work on hand, especially in the mines and woods. There was exceptional activity in the lumber and coal trades. The merchants reported a very good month, with excellent prospects. There have been no changes in rates of wages or hours of labour.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have been very busy getting in their hay.

*Fishing.*—There has been very little activity among local fishermen. The whale fishing company operating on the west coast of the island has started work on a new station near Nanaimo, for use during the stormy winter months. The station on the west coast is catching all the whales that it can handle with its present plant.

*Lumbering.*—The sawmills in this district were working to their fullest capa-

city, with prospects for a continuance of the present heavy demand for lumber. The lumber camps were working full time, although some of the companies on the coast closed down for a part of the month. There was a demand for men to work in the logging camps, and the wages paid are the highest in a number of years.

*Mining.*—The coal mines were working to their full capacity and were increasing their output as fast as men could be procured. The fire at the mine at Union has been got under control, and work is being resumed as fast as possible.

*Railroad construction and employment.*—Work has been commenced on the filling in on the road near the town, and a force of men was employed building a large stone culvert.

#### COST OF LIVING, 1897-1907—INVESTIGATION AT OTTAWA, ONT., BY CIVIL SERVICE ASSOCIATION.

**D**URING the month of June, an investigation was conducted at Ottawa, Ont., by a special committee of the Civil Service Association, Canada, into recent local tendencies in cost of living. The investigation was made for presentation in connection with certain other material, to the Royal Commission appointed by the Government in May, 1907 for the purpose of inquiring into matters appertaining to the present condition of the Civil Service of Canada (\*). The results of the investigation were set forth in a memorandum, which, subsequent to its presentation to the Commission, was given to the press. Though the inquiry was limited in the main to the City of Ottawa and surrounding district, the results, in view of the comprehensive nature of the methods adopted, are of more than local interest. A review of the more important findings of the committee is given in the following article.

##### Scope of Investigation.

The design of the association, in view of the unsatisfactoriness of general state-

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons reported employment better than for some years. Carpenters and joiners reported busy conditions prevailing. Painters and plumbers found active employment, and builders' labourers were well employed.

*Metal, engineering and shipbuilding.*—Steam engineers reported work very active, and a shortage of certificated engineers in the district. Blacksmiths and carriage makers were active.

*Printing.*—Business with printers was fair for the time of the year.

*Miscellaneous.*—Teamsters and expressmen were active.

*Unskilled.*—There was plenty of work, with a marked shortage of men in some localities.

ments in such a matter, was to make a detailed examination into existing conditions, in order to obtain definite and comprehensive data, by subjecting which to careful arrangement and analysis an authoritative result might be arrived at. In carrying out this design, an extended body of statistics was collected, illustrative of the relative cost of living in the City of Ottawa, Ont., or during the opening week of June 1907 and the same period of 1897, or exactly ten years ago. The statistics were presented under two main headings, the first relating at some length to retail prices of staple commodities, and the second relating to rentals, wages and interest, or prices as specially applied to the use of land, labour and capital. The authorities from whom the information was obtained consisted, for the most part of representative local store-keepers, real estate agents, large employers of labour, etc., every effort being made to secure absolute accuracy of quotation. Though the statement was sufficiently comprehensive to show the approximate movement of prices without elaborate analysis a system of "weighing" (i. e. of taking into account the relative importance of the several commodities as entering

\*A reference to the appointment of this commission was published in the June issue of the Labour Gazette at page 1,334

TABLE SHOWING COMPARATIVE WAGES AND HOURS OF LABOUR, OTTAWA, CAN., 1897 AND 1907.

Class.	Wages		Hours (per week).		Remarks.
	1897.	1907.	1897.	1907.	
<i>Agriculture:</i>					
Farm hands.....	\$180-\$190 per year	\$240-\$300 per year	....	....	Increase, 45%.
<i>Mining (mica):</i>					
Foreman.....	\$1.60 per day	\$2.50 per day	....	....	Increase, 56%.
Drillers.....	\$1.35-\$1.50 per day	\$2.00 per day	....	....	Increase, 40%.
Handymen.....	\$1.10-\$1.15 per day	\$1.50 per day	....	....	Increase, 33%.
Splitters in factories (girls).....	\$ .25-\$ .35 per day	\$.50-\$1.00 per day	....	....	Increase, 100%.
<i>Lumbering and Sawmilling:</i>					
Bushmen.....	\$13-\$20 per month	\$30-\$40 per month	..	..	Increase, 100%.
River drivers.....	\$35 per month	\$45 per month	..	..	Increase, 28%.
Sawyers.....	\$1.75-\$2.50 per day	\$2.75-\$3.50 per day	60	60	Increase, 47%.
Piers.....	\$1.30 per day	\$1.65 per day	60	60	Increase, 26%.
Simple Sawyers.....	\$.55 per 1000	\$.65 per 1000	..	..	Increase, 18%.
Tramsters.....	\$1.25-\$1.50 per day	\$1.50-\$1.75 per day	60	60	Increase, 20%.
Sawmill labourers.....	\$1.25 per day	\$1.60 per day	60	60	Increase, 28%.
<i>The Building Trades:</i>					
Stonecutters.....	\$.33½ per hour	\$.44 per hour	54	44	For 9-10 hours less work per week, the net earnings of the average workman have increased 40%. Contractors' wages' bills have increased 50-65%.
Masons.....	\$.25-\$ .27½ per hour	\$.47 per hour	59	50	
Bricklayers.....	\$.25 per hour	\$.40 per hour	59	50	
Plasterers.....	\$.20-\$ .25 per hour	\$.40 per hour	59	50	
Carpenters.....	\$1.50-\$1.75 per day	\$2.25 per day	59	50	
Lailers.....	\$1.25 per 1000	\$1.50 per 1000	..	..	
Painters & Glaziers.....	\$1.75 per day	\$2.25 per day	59	50	
Plumbers & Steamfitters.....	\$.20-\$ .25 per hour	\$.30-\$ .37 per hour	59	50	
Roofers.....	\$1.75 per day	\$2.25 per day	59	50	
Sheet Metal Workers.....	\$.20 per hour	\$.28 per hour	59	50	
Builders' Labourers.....	\$.12½ per hour	\$.25 per hour	59	50	
<i>The Metal Trades:</i>					
Machinists.....	\$1.35-\$2.00 per day	\$2.50-\$2.75 per day	60	60	Increase, 58%.
Boilermakers.....	\$2.00-\$2.25 per day	\$2.75 per day	60	60	Increase, 26%.
Electrical workers (dynamo men).....	\$40-\$50 per month	\$45-\$60 per month	60	60	Increase, 55%.
Linemen.....	\$1.00-\$1.60 per day	\$1.60-\$1.90 per day	60	60	Increase, 34%.

Unskilled Labour.....	\$1.00-\$1.10 per day	\$1.50-\$1.75 per day	..	..	Increase, 54%.

into cost of living), was applied to the statistics, in order that the final return might be as exact as available methods would allow. The method adopted in this connection was by estimating the cost at the two periods of a series of family budgets drawn up to represent the different scales of living prevailing in the service.

#### Retail Prices, 1897-1907

In connection with the investigation into retail prices, a list was compiled of the commodities entering most prominently into cost of living, including meats, fish, poultry, provisions, groceries, fruits, dry-goods, clothing, furs, leather goods, furniture, house furnishings, hardware, woodenware, crockery, fuel, lighting, stationery, drugs, jewellery and other classes of goods. The list though not minute was regarded as thoroughly representative of average consumption. Comparative retail quotations at the two dates named were obtained for each of these commodities and the result set forth in an extended tabular statement. The table contains in all comparative quotations for 364 commodities, the actual number of quotations given being 663. On the whole, a marked increase is shown to have gone into effect, no less than 578 of the quotations showing an increase, while 75 denote that no change has taken place, and only 10 that a reduction has been made. The most marked increases shown are under the headings of meats, fish, dairy products, groceries and provisions. Dry-goods and clothing, including footwear, house furnishings, furniture, kitchen utensils, crockery and glassware, show less pronounced advances. Furs show a very marked advance; hardware, metals, paints, etc., were strongly upward during the decade. Leather goods, books and stationery, druggists' supplies and tobaccos show advances. The most important decline is in gas and electric lighting, the former being 25 per cent and the latter 52 per cent lower at Ottawa, in 1907 than in 1897. Canadian coal-oil, however, has advanced 25 per cent, coal 11 per cent and wood about 30 per cent in the decade.

#### Rentals.

An increase ranging from 25 to 36 per cent is shown in rentals the information on which these conclusions are based having been obtained from real estate agents, and from members of the Civil Service who have been householders throughout the decade. In certain quarters of the city the advance has been as high as 50 per cent, though in the chief workingman's quarter the rate of advance was only 12 per cent. As explaining the increase in rentals, a review of real estate and building prices during the past ten years is given the former being shown to have advanced about 20 per cent and the latter 45 per cent, while taxation, as a result of the general increase in assessments, advanced 29 per cent. The rate for board and lodging shows a corresponding advance.

#### Wages.

Labour, considered as a commodity being one of the most important that enters in the cost of living, extensive statistics were collected with regard to tendencies in wages and hours at Ottawa, Ont., during the past ten years. These were embodied in the accompanying table from which it will be seen that the advances range from 20 to 100 per cent, those in the most important classes ranging from 25 to 50 per cent. Domestic servants were stated to receive 50 per cent more in 1907 than in 1897, the rapidly increasing wage paid to female workers in mica picking, garment making, match and other factories having depleted the market of almost all available labour.

The memorandum deals also with the fees charged for professional services, by physicians, dentists, hospitals, nurses, etc., and with the cost of education in the decade. In each of these departments a considerable advance is indicated

#### Interest.

The tendency of interest during the quarter of the nineteenth century was steadily downward. Since the beginning of the present century, however, not only has this movement been arrested

ted but a decided impetus has been given in the opposite direction, with the result that the general rate is higher to-day than at any time since 1894. Private loans for small amounts on first-class mortgage securities, such as would be negotiated by those building or purchasing homes at Ottawa, is about one half per cent higher than in 1900. An advance in fire and life insurance rates during the decade is also shown.

#### Comparative Budgets.

Though the general tendency of cost

of living is shown by the statistics quoted to have been upward to a marked degree, the test of three representative budgets was applied in order to obtain not only some definite measure of the advance as a whole but degree to which the conditions have been felt by persons of differing incomes. The following weekly budget of necessaries is quoted in the memorandum as showing the extent to which the advance has been felt by a family of five on an income of about \$750 per annum, spending in the neighbourhood of \$10 per week for food, light, fuel and rent:

#### AVERAGE WEEKLY EXPENDITURES ON STAPLE FOODS, FUEL, LIGHTING AND RENTALS BY A FAMILY OF FIVE ; INCOME \$750 PER YEAR ; 1897—1907.

\*At average prices the year round.

†The commodities and quantities included in this budget are a modification of those employed in similar calculations by the United States Department of Labour as applied to the working classes.

The advance in cost of living during the past decade, according to this calculation, has been approximately 34 per cent. In the case of families whose living expenses approximate \$2,000 per year or upward, the advance is similarly shown in the memorandum to have been 28 per cent, and in the case of families living on \$1,200 per year, 30 per cent.

#### Other Evidence.

As corroborating these findings, reference is made to other investigations of a similar nature conducted at different points in Canada within the past two years, and to statistics published by the Department of Labour, Canada, relating to increases in wages as based upon the advancing cost of living within the last five years. A special inquiry with regard to salaries paid by the 22 chartered banks of Canada showed that the percentages of increases in bank clerks salaries during the past ten years ranged from 10 to 100 per cent (not including bonuses and special allowances) based upon estimated increases in cost of living ranging from 10 to 20 per cent in small towns and from 20 to 45 per cent in large cities. A description of price tendencies in the United States, as revealed by the index numbers of Dun and Company and of the Department of Labour,

Washington, is added. The increase in wholesale prices during the past ten years according to Dun and Company, has amounted to 34 per cent, while the Department of Labour's returns up to 1905 show an increase of 29%. The advance in retail prices in the United States between 1897 and 1905 is shown by the United States Department of Labour to have been 27 per cent.

In conclusion, the following statement is made in the memorandum with regard to the immediate outlook.

Extraordinary as the present conditions are, there is no sign on the industrial or economic horizon that portends a change. The great prosperity in which the whole country is rejoicing shows not the slightest indication of abatement. As a matter of fact, what signs there are point uniformly to continued industrial and trade expansion, the only embarrassment that threatens being a lack of facilities—those of transportation, in particular—to reap the splendid harvest to the full. Prices, therefore, may be expected not only to remain high, but to show still further advances. In several important items in the table, wholesale prices are mentioned as having shown an advance to which retail prices have not as yet responded. This is full of significance, founded as the wholesale advances are on sound economic conditions. "With regard to price movements," says the Toronto Globe of June 21, 1907, "it is probable that all of the influences which have tended to keep prices to retailers down will vanish with this summer's trade. . . . There will be no way to escape higher prices throughout the whole textile trade." Of significance, too, in this connection, are the liberal advances in the wages of labour which have been so characteristic a feature of the present spring season, and which include in a large number of recent agreements specific provisions for still further increases in 1908. The printers of Toronto and Montreal during May obtained a sliding scale of advances covering a period of five years.

#### INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF JULY.

ONE application for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, was received at the Department during the month of July, viz:

On behalf of the employees of the Cumberland Railway & Coal Company of Springhill, N.S., from Pioneer Lodge No. 1, P.W.A. (This is a second application from Pioneer Lodge No. 1, and entirely distinct from that which has been previously referred to.)

During the month the Department also received two applications for the establishment of committees of con-

ciliation, mediation and investigation under the provisions relating to railway disputes in the Act respecting conciliation and labour (Chap. 96 R.S.C. 1906), and in accordance with section 5 of the Industrial Disputes Investigation Act, 1907.

#### Boards previously appointed.

Ten applications for the establishment of Boards of Conciliation and Investigation had been received prior to the beginning of July, of which there remained not finally disposed of at the end of June the following viz: the application on behalf of the employees of Cumberland Railway

and Coal Company, Limited, of Springhill, N.S., from Pioneer Lodge, P.W.A.; the application on behalf of the Grand Trunk Railway Company of Canada, with reference to a dispute with the locomotive engineers employed upon its system; and the application on behalf of the W. A. Marsh Company, Ltd., Boot and Shoe Manufacturers, Quebec, with respect to a dispute with certain of its employees. With regard to the first named of these, the application on behalf of the employees of the Cumberland Railway and Coal Company, Limited, the findings of the Board were received during the month and will be found below. In the case of the application on behalf of the Grand Trunk Railway Company in connection with the dispute between the Company and its locomotive engineers

a Board was duly established during the month and proceeded with the investigation of the dispute. In the case of the application on behalf of the W. A. Marsh Company, Ltd., with reference to a dispute with certain of its employees, no proceedings have resulted; the application was made under section 63 of the Industrial Disputes Investigation Act, 1907, and the industry affected not being a public utility or mining property, the consent of both parties was necessary to the establishment of a Board; this condition not being complied with, no Board was established.

A summary of such proceedings as occurred during the month of July in connection with the various applications is contained in the present article:

#### I.—FINDINGS OF BOARD ESTABLISHED IN CONNECTION WITH DISPUTES AT SPRINGHILL, N.S.

THE Board of Conciliation and Investigation established in connection with the dispute between the Cumberland Railway and Coal Company and its employees on an application from Pioneer Lodge No. 1, Provincial Workmen's Association, and which commenced during the month of May an investigation of the disputes which had been referred to it, as reported in the *Labour Gazette* for June, concluded its labours during the month of July and duly reported under date of July 5 to the Minister of Labour. The Board, it will be remembered, was composed of the Honourable Mr. Justice Graham, of the Supreme Court of Nova Scotia, Chairman, Mr. P. S. Archibald, Moncton, N.B., nominated by the employers concerned in the dispute, and Mr. R. B. Murray, Springhill, N.S., nominated by the employees concerned. The subjects of dispute were of a technical character, and related to the terms of payment respectively for "level crossing work" and "local stone in pillar work". In the case of the "level crossing work" the findings of the Board were in favour of the contentions of the men, and in the case of the "local stone in pillar work" the

findings were opposed to the contentions of the men. Mr. R. B. Murray, the member of the Board nominated by the men submitted a minority report, favouring the contentions of the men on both points.

Copies of the report of the Board and of the minority report were duly forwarded by the Department to the parties to the dispute, and a letter was received on behalf of the employees concerned under date of July 18, stating that they declined to accept the finding of the Board in the case of "stone in pillars". Subsequently the Department was informed that at a meeting of Pioneer Lodge No. 1, P.W.A. the men had passed a resolution declaring themselves free to strike after August 1st, as a result of their non-acceptance of the findings of the Board, with respect to "stone in pillars". Meanwhile an application had been received by the Department from Pioneer Lodge No. 1, for the establishment of a second Board of Conciliation and Investigation with a view to the settlement of further disputes between the Cumberland Railway and Coal Company and its employees. The second Board was duly established by the Minister and

proceeded to an investigation of the disputes concerned on Wednesday July 31 at Springhill, N.S.,

The findings of the first Board together with the minority report of Mr R. B. Murray and the covering letter of the Chairman of the Board are as follows:

### Chairman's Covering Letter.

HALIFAX, July 5, 1907.

Sir,—  
I now have the honor to forward the report of the majority of the Board of Conciliation and Investigation, appointed in the matter of the Cumberland Railway and Coal Company and its employees. Mr. Murray, the member of the Board nominated by the employees, is forwarding a minority report.

I very much regret that there should have been a difference of opinion on the Board.

I have the honour to be

Your obedient servant,

(Sgd.) WALLACE GRAHAM.

The Honourable Rodolphe Lemieux,  
Minister of Labour,  
Ottawa.

### Findings of the Board.

In the Matter of the Industrial Disputes Investigation Act,

And of

The Cumberland Railway and Coal Company, Limited,  
*Employer*

And

Certain employees of the said Cumberland Railway and Coal Company, Limited,

*Employees.*

Report of Board of Conciliation and Investigation in the above matter.

The Board composed of R. B. Murray, and Peter S. Archibald, Esquires, and Mr. Justice Graham, Chairman, pursuant to notice given by the Chairman to the parties interested, met on the 23rd day of May, 1907, at ten o'clock, at a Public Hall in Springhill, the locality of the dispute between the above parties, and having taken the proper oath of office, proceeded with the Reference.

The Chairman spent an hour endeavouring to ascertain if the dispute could not be arranged without an investigation, discussing the matter with the representatives of the employees; also with the solicitor of the Company.

The Representatives of the Employees had not been entrusted by the Pioneer Lodge No. 1, of which the employees are members, with power to arrange the dispute, and were only prepared to proceed with an investigation by witnesses.

After opening proceedings, formal announcement was made that if the parties could settle their dispute without formal investigation, that course would be open at any time, and Section 22 of the Act was explained. The attention of the parties was called to Section 62 of the Act, enabling them to arbitrate the dispute before the Board, but the offer was not accepted.

The Employees were represented by three employees who conducted the case very well, and evidently with a careful brief of the evidence of each witness. The Company was also represented by three laymen, members of the staff.

The Chairman regrets that in a case of disputed fact there was little cross-examination, practically none on the part of the Company, and therefore, possibly, all the facts are not before the Board. The employees had no solicitor, and they objected under the Act to the Company's solicitor taking part.

The Board sat until after 6 o'clock p. m., saving a short intermission at noon, and of an hour in the afternoon to suit convenience of witnesses. It also sat from ten o'clock of the 24th until after four in the afternoon, with the usual intermission at noon. Twelve witnesses were examined for the Employees and five for the Company. The Board then adjourned to meet at Truro, to consider the case and make a report.

The Board met at Truro on the 29th May, and sat from 10 o'clock a.m. to 2 o'clock p.m., with an hour's intermission at noon, and finding it necessary to take further evidence, met at Springhill on the 3rd July, taking evidence on that day from ten o'clock to five o'clock p.m., with an intermission at noon; and on the 4th July from 9 o'clock a.m., deliberating and preparing a report.

The two matters in dispute are disclosed in the application or complaint of the Employees, and the statement in reply on the part of the Company, forwarded by the Department of Labour and returned herewith, and in the evidence, but it is proposed to deal with them more specifically.

1. In respect to the claim for additional compensation for the work of six men in chute 14 in the 2,600 feet level crossing through an abandoned and fallen-in counter level, it has been proved that the work was difficult and dangerous, involving loss of time in avoiding falling stones; also, that it was of larger area than usual and required more propping up.

It was exceptional, and the amount allowed by Mr. McSaveny, the underground manager, was not sufficient. The Board recommends that it be increased by an additional allowance of seventy-two  $\frac{00}{100}$  dollars. Possibly this total will exceed what the work would have cost if there had been a special contract. The men, perhaps, acted as if they were to be remunerated by the time it took, and the management were acting on the theory that it was to be remunerated for by measurement and an additional allowance, and they probably supervised accordingly. This is not to be treated as a precedent for the mode of making up compensation for such work.

It was really a matter for a special contract, the case being exceptional, as the men prove. As to the dispute, it is probable that Hargreaves and McSaveny were right (they certainly were legally right) in taking off the job they were at Hall and Heron (unless a mistake was made in identity) on the complaint of Morris, made both to Hargreaves and McSaveny; also, that the former two were responsible for the slow progress of the work, and probably the Committee erred in requiring them to be reinstated. Of course, the committee may have taken more time to investigate the complaint than Hargreaves or McSaveny reasonably could be expected to take. McSaveny swears that "it took two men four hours to carry up five pieces of timber a distance of 90 feet," and he more than once complained to the men of the work.

Then, probably, Hargreaves, in re-instating the men at the instance of the committee, but warning them that they would have to "make up," (that is no special rate) erred in judgment. But he may have thought it wiser to yield to that extent. And the men and the Committee, when warned that they would be going on with the work without any "make up," probably erred in expecting that they had the right to go on with the work, even of crossing the counter level, as if there had been a special contract, or that they were to be paid by the day. But the committee now comes forward (at least, Mr. Hodge does) and says that they understood Mr. Hargreaves' warning only to extend to the work on the counter level. So they understood it. But the fact is, both sides ought to have sought to have made a special contract instead of each proceeding at his will.

In the end Mr. McSaveny allowed them the rate for stonehead, \$1.00 per foot, and added fifty per cent. for the exceptional character of the work, but probably he did not add enough for this exceptional work.

Objection was raised that less than ten employees were interested in this claim for compensation for the six men. But the dispute seems to be larger than, the question of the compensation. Whether it comes under the Act or not, no doubt the Company will accept the recommendation of the Board.

To sum up, the six men ought to be paid the sum herebefore indicated, and it is so recommended.

#### LOCAL STONE.

On the 19th day of August, 1890, an agreement was made by one H. Swift, representing the Cumberland Railway and Coal Company, Limited, and by one A. D. Ferguson, representing the Employees, members of the Pioneer Lodge, by which it was agreed among other things as follows:—

"It is agreed that in close places the price for all stone will be at the rate of five cents per inch." This item of the agreement does not present any controversy. But this one does: "It is agreed in the matter of pillar stone, that when and as long as stone exceeds four inches in one, two and two, or three and one plies, it will be paid for at the rate of four cents per inch. This to be put on the box price." It is clear that there are difficulties about making up the compensation if not in measuring the stone. Mr. Mathews has illustrated the difficulties by diagrams which he explained and showed how disputes would arise in this mode of computing the allowance for stone.

It appears that after this system of making up the compensation for stone had been tried for some time, it was abandoned owing to the difficulties mentioned, but the principle of the agreement itself was not abandoned. Instead of making up by measurement by inches the compensation to be allowed for stone, and adding that to the price per box for mining the coal, there was adopted what may be called a flat rate, namely, an allowance of two cents per box for handling the stone. Eight inches of stone was taken as the average width of the stratum and in pillar work, that quantity at the rate of four cents would amount to two cents a box. The calculation is given in the evidence of Mathews, and is not disputed. Two cents was added to the usual price per box. Mathews has sworn to that arrangement being made with a committee, and it is not denied. That system has continued for years, and in pillar work the stone was not measured.

It has its disadvantages also. If the stone was exactly uniform, or if mining could be carried on so that every employee had to handle a proportionate amount of the stone, no doubt all would be satisfied. There is another difficulty; the rate per box for mining the coal (irrespective of this question of stone) sometimes varies. The employees, owing to the thickness of the seam, may make better wages, and then the management may cut down the rate. If it is the other way, or if the coal becomes harder to mine, the employees may demand a higher rate. In consequence of this variance there is likely to be confusion on the part of the employees as to whether the two cents per box for stone is really included in the prevailing rate per box.

So far as can be discovered in the past, the two cents has been added to or included in the price.

When the employees won this agreement, only after a great strike, it can hardly be imagined that they have handled the stone without compensation. They are very properly too watchful of their rights for that to happen. That there was stone met with appears from the evidence, particularly that of Mathews, and from the Schedules from the Company's books.

The Schedules 1 to 7, inclusive, from the books of the Company annexed to the evidence of Wm. D. Mathew show that in close or narrow work (which amounts to

from 20 per cent. to 25 per cent. of the whole seam) stone has been extracted at different periods by the men between 1891 and the present time. Also, that it has been extracted in different parts of the mine, as shown in the Schedules, namely:—

800 and 1,300 ft. levels East and West No. 3 slope, 1891-1900 ft. level, East and West, No. 1 Slope, different months in 1892 and 1893.

1,300 ft. and 1,900 ft. levels East and West, No. 3 slope, months in 1892 and 1893.

800 and 1,300 ft. lifts, East and West, No. 3 slope, 1893 Nos. 1 and 2 balance west 1,900 ft. level. No. 3 slope, 2,600 ft. level, No. 3 slope, different months in 1904, 800 and 1,300 ft. lifts No. 3 slope, throughout 1894. 2,600 ft. level top seam, east No. 3 slope, throughout 1904.

3,200 ft. level East, under seam, throughout 1904. 2,400 ft. level west main seam No. 2 slope, certain months in 1901, also in December, 1900.

The stone in close work is measured and paid for by the inch. Thus a record of it is kept.

Mathews in his evidence says:—

"From plans and books the position of the men can be located, so that from the measurements made of local stone in narrow work, it can be ascertained what the thickness of the stone was in the pillar work.

Later, he says:

"Q. Wherever in these Schedules there is an allowance for stone in close work, the same area of stone would be shown in the pillars adjoining, of corresponding thickness?"

A. Yes.

Q. So that given a place on the plan where there was a certain measurement allowed of stone in close work, you can tell what stone should be allowed for in any pillar work adjoining?

A. Yes, sir. Sometimes, of course, the measurements vary.

Q. So that you have given in your schedules here—I find 4 inches to 6 inches of stone—finding those in your schedules, you get those from the measurements that were made of the stone in close work?

A. Yes.

Q. We can depend on those as being derived from stone in close work?

A. Yes."

Schedules A, B, C and D, and subsequent schedules in Exhibit 32, tend to show that large quantities of stone were extracted in pillar work, giving the thickness of the stone and the rate of wages earned by different men who did the work.

It is further proved in the evidence that during this period no stone in pillars was measured and paid for in that way.

The inference is very strong, almost irresistible, that the men were being remunerated for the extracting of stone in pillar work by the flat rate of two cents per box, after that arrangement was made. Either that is so, or they were not being remunerated at all, which seems out of the question.

The two cents was always present, but the rate per box for mining the coal may have varied.

The demand proved by Mr. Moffatt to have been made by a Committee in April, 1904, and minuted as follows:

"Stone in pillars be paid for AS FORMERLY four cents per inch, may mean that the employees at that time thought they were not receiving due allowance according to the agreement, or that they were seeking to return to the measurement of stone in pillars by inches and ascertaining the compensation in that way, rather than by taking the average of eight inches and allowing two cents a box. But, whatever it meant, the evidence does not show that the rate of two cents included was ever departed from. And it appears to have been acquiesced in afterwards. This is to be inferred also from the book of rates compiled by Mr. Moffatt. See page 5 relating to the Company. While he gives a special rate for stone in close work, he gives none by measurement for stone in pillar work, showing that his rate of 29 to 43 cents per box includes the allowance of

two cents per box for stone. No one knew better than Mr. Moffatt about the agreement of 19th August, 1890, as to the allowance for stone in pillars. But in compiling his work, he appears to have taken it for granted that this item had become merged in the rate for mining which he gave.

The statement of Mr. Hargreaves, which is relied on to account for there being no entries in the Company's books of payment of stone by measurement, namely, that the men had contracts, really supports the view that the RATE for mining the coal included an allowance for stone. When the rate was fixed, as it was by arrangement, with the men, the two cents per box was taken for granted.

He says:

"Q. Did you ignore altogether this agreement? (i.e., the agreement of August 19th, 1890.)

A. There was no agreement mentioned in the 1300 chutes—the chutes were taken by contract, and each set of men that took the contract appointed their own men.

Q. Was the whole of it in contract?

A. A good deal."

The Company, in its reply to the claim, in respect to local stone, set up a second answer additional to that just dealt with, viz., that there was a special agreement which would prevent the demand for a further increase for stone. It is as follows:

"2. The Company says that the present application for the payment of stone in pillar work is in breach of a specific agreement made between the management and the men. An agreement was made some two years ago that thirty-eight cents per box was to be paid for pillar work above the 2600 feet level all the way out from about No. 35 chute to the bottom. This agreement ought to be maintained until all pillars are drawn on this level.

A similar agreement was made for pillar work on the 3200 feet level from No. 9 chute to the bottom, of thirty-six cents per box. When these rates were fixed, allowance on the price per box was made for stone in pillar."

Unfortunately, in respect to this answer there is a conflict in the testimony.

First, in respect to the 2600 ft. level.

The rate per box for pillar work had been 36 cents.

For chute No. 35 there was a demand of an increase of four cents per box. This led the management to stop the work in that chute. Thereupon a committee met with the management, and a special agreement about which the dispute exists was attempted to be made. Thirty-eight cents was agreed upon, not only for chute 35, the management contends, but from chute 35 out to the slope or bottom, and certainly that was discussed. The employees contend that the agreement was concluded only in respect to chute 35, and that all out to the slope or bottom was to be left open.

In respect to the 3200 ft. level, there is a similar conflict in respect to an oral agreement made between a committee of the employees and the management, viz., whether a rate of thirty-six cents per box applied only to No. 9 chute, and the rest left open as the employees contend, or whether it applied also from No. 9 chute out to the bottom, as the Company contends.

It seems unnecessary to make any decision as to the conflict which exists in the evidence in this matter.

The Company appears to have relied on this matter as supplemental merely to the main answer, and that main answer has been found to be supported by the evidence.

To sum up: The agreement of the 19th August, 1890, providing for compensation in stone in pillars, as modified by the subsequent oral arrangement long acquiesced in, to the effect that the computation of the compensation for stone was to be made by taking an average width of 8 inches, when there was stone exceeding four inches, and allowing a flat rate of two cents a box, has not been violated by the Company, nor has the said modification but the same are being carried out.

The claim and contention of the Employees in respect to the local stone should be rejected.

Inclosed herewith are the evidence, exhibits and plans used in the reference.

Respectfully submitted,

(Sgd.) WALLACE GRAHAM,  
Chairman.

(Sgd.) PETER S. ARCHIBALD.

Springhill,  
4th July, 1907.

To, the Honourable Rodolphe Lemieux,  
Minister of Labour.

Ottawa.

Springhill, July 18th, 1907.

### The Minority Report.

The minority report presented to the Minister of Labour by Mr. R. B. Murray, was as follows:—

HON. RODOLPHE LEMIEUX,

Minister of Labour,

Ottawa.

Sir:—

In the matter of the application of Pioneer Lodge Number 1, P. W. A. for a reference of two disputes, pending between the said Lodge and The Cumberland Railway and Coal Company, to a Board of Conciliation and Investigation under the "Industrial Disputes Investigation Act 1907." The undersigned on the recommendation of the employees, having been appointed a member of such Board, respectfully submits the following report:—

#### I.—THE COUNTER LEVEL CASE.

In the opinion of the undersigned, there was sufficient evidence brought before the Board, to show that no contract had been made for this particular piece of work, and the six men interested, on their oaths said, that they were under the impression, having never been given to understand otherwise by any of the officials of the Company, that their rate of pay for work in crossing the counter level would be the same as in the coal below, i.e., \$2.00 plus 22 per cent. per day. They were paid at contract price, which the evidence shows, to have netted them \$1.01 and 1-3 plus 22 per cent. Bearing in mind the peculiar, unusual and hazardous nature of this work, as disclosed by the evidence of the men interested, together with that of the witnesses Seaman Terris, D. C. Matheson and William Hodge, and in a measure by Underground Manager McSaveney, likewise having in view, the fact of there having been no previous contract, the undersigned is of the opinion that this "dead work" should be paid at the prevailing rate of wage in Springhill for coal cutters, when on shift or dead work, viz.: \$2.00 plus 22 per cent.

The recommendation is therefore made, that the six men interested, be allowed and have paid to them in the proportion of the shifts, they respectively worked, the sum of \$72.60. This amount, added to what they have already received, would bring their pay for their work at the counter level, up to \$2.00 plus 22 per cent. per day, that being the figure the Lodge originally asked on their behalf.

The Company, having made the claim, with respect to the foregoing case, that the Board had no jurisdiction under the Act, to hear it, the undersigned is of the opinion, by Section 21, of the Act, that if the failure, on the part of employer and employees, to effect a settlement in regard to a matter affecting directly only six men, is likely to result in ten or more being either immediately or subsequently affected, the reference of such a dispute would in the opinion of the undersigned, come very properly within the provisions of the Act.

## II.—THE LOCAL STONE CASE.

This matter is of far reaching importance, and it is with regret the undersigned cannot place on record the fact that the members of the Board could come to a unanimous decision in regard to it. The evidence given in the case was varied, voluminous and contradictory. One basic fact stands out prominently, that is, the Fielding agreement, so-called, made between the Company and Pioneer Lodge in August, 1890. In that it was among other things "agreed in the matter of pillar stone, that when, and as long as stone exceeds four inches in one, two and two, or three and one plies, it will be paid for at the rate of 4c. per inch."

It appears that shortly afterwards the Company claimed there was a difficulty in measuring the stone, and then Manager, Mr. Swift, allowed the men working in as what was known as the East slope, an equivalent of 2c. on each box of coal.

It further appears, that after the so-called East slope was practically abandoned, and the hoisting of coal ceased there the question of payment of stone in pillars has not arisen, until the present. The claim being made on the part of the employees that pillar stone except, perhaps, in a few isolated cases had not been taken out in the existing working levels.

Evidence shows, and it is admitted by both parties to the dispute, that in the pillars on the West side of the 2,600 and 3,200 levels in No. 3 slope some distance in, it has been the practice of the Company to take out only the top lift of the coal, leaving the band of stone which existed in about the middle of the seam there, to remain as a pavement, the lower lift or seam there to remain as a pavement, the lower lift or seam of the coal in the inner pillars of these levels was left in.

Working out towards the bottom of the slope the lower seam above referred to got harder and of a better quality. For this and other reasons the Company ordered the full height of the seam, including the band of stone to be taken out. This stone occurs in all the pillars on the West side of No. 3 slope, in the 2,600, 3,200 and 3,800 lifts, increasing in thickness as it gets to the bottom of the main slope, on the East side of the slope, the stone is of such a height it necessitates the working of the coal in two separate seams.

In brief, the dispute between the parties arose by the employer ordering the full height of the seam, including the band of stone to be taken out in all the pillars in the 2,600 and 3,200 lifts, from certain districts and for certain prices, out to the bottom. These districts and prices were in the 2,600 lift, from 35 chute out for 38c. per box, and in the 3,200 lift from No. 9 chute out for 36c. per box, the employer claiming that these prices of 38c. and 36c. respectively from the districts named had been agreed upon by themselves and their employees, and included the taking out of the stone in pillars.

To this contention the employees make a flat contradiction and maintain that the prices of 38c. and 36c. per box on the 2,600 and 3,200 feet lifts were only for certain districts, that is to say, 38c. for the pillars off 35 chute in the 2,600 foot lift, and 36c. for the pillars off 9 chute in the 3,200, and the prices for all the pillars on those lifts, from the chutes named, out to the bottom were to be left an open question. As pillar or local stone had never previously been taken on these levels, the matter was not mentioned, and in the agreement referred to by the Company, where these prices were set, local stone was not considered.

In order to arrive at a fair understanding of this case, two questions have to be asked:

1. Is the Company still liable under the Fielding agreement to pay for local stone in pillar work?
2. Is the Company paying for such local stone?

The first question can very quickly be gotten rid of by the unanimous decision of the Board and the admission of the Company that the Fielding agreement, so-called, is still, in full force and effect. This being so, the inference is natural, that pillar stone shall be paid for on the basis mentioned in such agreement.

With regard to the second question, the evidence seems to indicate two facts:—

(a) That for a time and when the stone existed in the pillars in the East slope, under Mr. Swift's management, it was paid for in two ways and at different prices. John Fletcher, one of the Company's witnesses, testifies that he was paid for stone in his pillar by an equivalent of 2c. on each box of coal, he was asked on cross examination about the thickness of the stone in his pillar, and replied, "8 inches." Fletcher said, he afterwards worked in the North slope, but found no stone there, and was only paid for it in the East slope where it existed.

On the other hand the witnesses, D. C. Matheson and Edgar Harrison, on behalf of the Lodge, clearly state, that when they were paid for stone in pillars, the same was first measured, and they then received the equivalent of such measurement, by an allowance of  $2\frac{1}{2}$  2-3c. on the box.

(b) During the evidence given on the 23rd of May, by W. D. Matthews, Asst. Manager, in one place he says, "at no time in my recollection, have the men as a body asked for an increase on the price per box, on the ground that local stone was more troublesome than when the price was fixed. Stone was never taken into consideration." Again he says: "Since 1890, when the agreement was made by Mr. Swift and the Lodge, the 1,300 foot level, the 1,900 and the 2,600 foot levels, as well as the 3,200 and the 3,800 foot levels, have been worked, and no allowance for local stone was made in any one of these levels by specific prices on the box or by measurement in pillar work." And further he says, "and in all the discussions since that time (1890) as to price, the question of handling stone in pillar work, has never been mentioned or paid for."

Mr. Hargreaves, the Manager of the Company, in his evidence, states among other things, "In arranging the price for pillar work, stone was never considered."

The Company placed before the Board a large amount of evidence in the nature of schedules, books and statements, and endeavored to establish by such, that payment had always been made on this pillar stone, even in large districts and for long terms, where the same did not exist.

With such a marked variance in the evidence given by the contending parties, and after an earnest consideration of all the facts, the undersigned feels himself justified in doubting the plea put forward by the Company, that the 2c. advance made in 1890 by Mr. Swift in lieu of measurement of stone in pillar work, has been in force and paid all these years, particularly in these large sections of the different mines where no stone existed. It is impossible to conceive that a businesslike, and going corporation like the Company under the management of a man of Mr. Cowans' marked ability, would continue to pay out money year after year in the form of an allowance for stone where it has not existed nor when any payment for such stone was ever asked for of late years by any of the employees.

In view of the foregoing, the undersigned in the spirit of justice is of the opinion the Company is not paying for local stone in pillar work in No. 3 mine, and that the spirit of the Fielding agreement is not being carried out.

The undersigned cannot refrain from reminding both parties to this dispute that the prosperity of the community depends almost wholly on the relations that exist between them, if they will endeavor to agree and work together in harmony, their own interests and the interests of thousands of others dependent on them will be benefited, but a continuance of the labor struggles which have agitated against Springhill so frequently in the past will tend to destroy stability in the town.

It is the earnest hope of the undersigned that the finding of the Board in the cases which have been investigated will be cheerfully acquiesced in and agreed to by the parties interested.

(Signed) R. B. MURRAY.

## II. DISPUTES BETWEEN GRAND TRUNK RAILWAY COMPANY AND LOCOMOTIVE ENGINEERS REFERRED UNDER THE ACT.

ON June 27 the Department received from Mr. W. D. Robb, Superintendent of Motive Power, Grand Trunk Railway system, an application on behalf of the railway company named for the establishment of a Board of Conciliation and Investigation to which might be referred a dispute between the Company and the locomotive engineers employed upon its system. In the statement accompanying the application, the number of persons affected by the dispute was placed approximately at 1300, "aside altogether from the interest of the public." The alleged dispute related to the rules governing the employment, duties and compensation of the locomotive engineers, and with the application were submitted two schedules, the one, marked "A" representing the conditions in effect with regard to the questions at issue from April 1, 1905 and which were determined upon and approved of by a Board of Arbitrators appointed under an agreement between the parties to the present dispute dated February 24, 1905, the other, marked "B," setting forth the changes and modifications in the said schedule (other than those in respect of which an understanding had been reached) still requested by the locomotive engineers and to which the Company could not see its way to assent. The application proceeded to state that the matters in dispute had been the subject of repeated, in fact almost daily, conferences since April 1, between Mr. W. D. Robb, the applicant on behalf of the Company, and the Committee appointed by the locomotive engineers, as a result of which an understanding had been arrived at regarding some of the points originally in dispute, but notwithstanding these conferences as well as others between Mr. Charles M. Hayes, second Vice-President and general manager of the Company, and Mr. E. H. Fitzhugh, 3rd Vice-President, on the one hand, and the Committee of the Locomotive Engineers on the other, at which the questions still open were discussed,

it had not been possible to reach a final and complete understanding and the matters in dispute still remained unadjusted.

The Minister of Labour having after due consideration decided to establish a Board to which the dispute in question might be referred, notified the second party to the dispute to that effect and the Department received on July 10 a statement on behalf of the locomotive engineers in reply to that made by the employing company. With the statement in reply was forwarded a third schedule, marked "C," which it was stated set forth in full the claims and grievances of the locomotive engineers. It was further set forth that the matters stated in the communication to the Department from the Grand Trunk Railway Company to have been settled had been settled only on the understanding on the part of the locomotive engineers that all the items in schedule "B" at the time presented to the Company by the men were accepted as therein set forth. The statement in reply was signed by Messrs. D. Cameron, Chairman; John Battley, Vice-Chairman; and J. S. Johnson, Secretary and Treasurer of the Association comprising the Locomotive Engineers of the Grand Trunk Railway System.

The Grand Trunk Railway Company nominated Mr. Wallace Nesbitt, K.C., Toronto and the Locomotive Engineers nominated Mr. John Cardell, of Calgary, Alta., as members of the Board respectively and these gentlemen having been appointed by the Minister and being unable within the period named in the Act to agree in recommending the name of one who would act as third member and chairman, the Minister of Labour appointed Prof. Adam Shortt, of Kingston, Ont., as such third member.

The Board commenced its investigations at Montreal on Tuesday, July 23, adjourning a day or two later to meet early in the month of August

### III. DISPUTE BETWEEN THE INTERCOLONIAL RAILWAY AND FREIGHT HANDLERS AT HALIFAX, REFERRED UNDER THE CONCILIATION AND LABOUR ACT.

AN application for the reference of a dispute between the Intercolonial Railway and freight handlers in its employ at Halifax, N.S., under the provisions relating to railway disputes in the Act respecting Conciliation and Labour (Chap. 96, R.S.C. 1906) was received at the Department on July 10. The applicant was Mr. D. Pottinger, on behalf of the Intercolonial Railway of Canada, and the other party to the dispute was indicated as the Freight Handlers' Union of Halifax. The number of employees stated to be directly interested was 55 besides 150 indirectly; as well as all shippers and receivers of freight at Halifax and the public in general. The question at issue was stated to be the rate of wages and the classification of freight-handlers. In the case of a railway dispute the parties may select to have the dispute inquired into by a committee of Conciliation, Mediation and Investigation, and a Board of Arbitrators under the provisions respecting Railway disputes in the Act respecting Conciliation and Labour, 1906 (the Railway Disputes Act of 1903) or by a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act 1907. In the present instance the parties selected the Conciliation and Labour Act 1906.

A committee of Conciliation, Mediation

and Investigation was appointed under the Act, consisting of Mr. Henry Holgate, Montreal, nominated by the Intercolonial Railway; Mr. R. E. Finn, M.P.P., nominated by the Freight-Handlers' Union, and Professor Walter Murray, of Halifax, chosen by the representatives of the parties, and appointed Chairman. The Committee met at Halifax on Saturday July 27 to consider the subject of the dispute and to endeavour to secure a settlement by means of conciliation. On Tuesday, July 30 the Chairman of the committee telegraphed the Minister of Labour to the effect that the committee was unable to effect an amicable settlement by conciliation and that the questions in dispute should be referred to a Board of arbitrators to be appointed under the Act as the members of the existing committee were acceptable as a Board of arbitrators. The parties to the dispute having respectively informed the Department of their willingness to accept the members of the Committee as such Board, the Minister duly established the Board on the same day, and the Board proceeded immediately by taking evidence under oath to enquire into the dispute that had been brought before it. The sessions of the Board had only commenced at the end of the month.

### IV. FURTHER REFERENCE UNDER THE ACT BY PIONEER LODGE NO. 1, P.W.A.

ON July 12, the Department received from Thomas Blenkhorn, Past Master Workman, and William Watkins, Secretary, Pioneer Lodge, No. 1, Provincial Workmen's Association, on behalf of the employees of the Cumberland Railway and Coal Company of Springhill, N.S., an application for the establishment of a Board of Conciliation and Investigation to which might be referred under the Act two existing disputes between the parties indicated. The application in question was distinct

from that made in April also by Pioneer Lodge under which a Board was established on May 3, and has made its findings as reported elsewhere in the present issue of the *Labour Gazette*. The present application stated that Pioneer Lodge No. 1, P.W.A., has a membership of over 900 men, all whom are employees of the Cumberland Railway and Coal Company. An approximate estimate of the number of persons likely to be affected by this dispute placed the figures at 1700. The disputes involved are stated

to be as follows,—First—in respect to the price per box to be paid for extracting pillars in No. 3 mine in the section known as the 3800 east side under seam; second, in respect to yardage price to be paid for ribbing in of boards in the section known as the 3200 east side top seam No. 3 mine. Pioneer Lodge No. 1, further asked that there might be referred to the Board for the establishment of which application was now being made any dispute which might arise between the contending parties from the date of application up to and including the date of the sittings of the said Board, “the object of the Lodge in this respect being,” stated the application, “to have a final and satisfactory adjustment of all matters in dispute between it and the said company which may be pending up to the date of the sittings of proposed Board.”

The Minister decided to establish a Board in response to the application in question and Messrs. R. B. Murray, of

Springhill, N.S., and P. S. Archibald, of Moncton, N.B., were appointed members of the same on the nomination of the employees and the employers respectively. Messrs Murray and Archibald were the gentlemen who, on the recommendation of the disputing parties, had been appointed by the Minister to the Board established on May 3 on the application of Pioneer Lodge No. 1, with reference to a previous dispute between the Cumberland Railway and Coal Company and its employees. These gentlemen having conferred together for several days with a view to agreeing on a third person to recommend to the Minister for third member, found it impossible to arrive at an agreement on the subject and notified the Minister accordingly. The Minister thereupon appointed His Honour Judge Patterson of New Glasgow, N.S., to the position of third member and the Board began its investigation into the dispute on Wednesday July 31, under the chairmanship of Judge Patterson.

#### DISPUTE AT THE COBALT SILVER MINES.

THE most important industrial dispute of the month was that which occurred at the Cobalt Silver Mines. The main facts regarding this dispute are as follows:

The Cobalt Miners Union was organized on March 24, 1906, and is Number 146 of the Western Federation of Miners, Mining Department of the Industrial Workers of the World. The mine owners are not a formally organized body at all, but meet occasionally to discuss their mutual interests, and have as yet no permanent organization, and no elected Chairman or president. It appears that until about the end of June last the various mines in the camp had been working under a variety of schedules, and not under a schedule common to the whole camp, or to a majority of mines in the camp. The Nipissing mine, by much the largest property in the camp, employing about 375 men, is said by its manager, Mr. Drummond, and by other mine managers of the district to have

been paying about the average wages of the district. A disagreement having occurred towards the end of June between the management of the Nipissing mine and its employees a strike on this property was declared by the union.

A general meeting of the mine managers was then called to consider the situation generally. At this gathering an effort was made to arrange a schedule common to the whole camp, on the ground that a large number of varying schedules had the effect of preventing labour from remaining attached to particular properties. A schedule was accordingly agreed on by about 30 of the mining properties, and on Saturday July 6, the new schedule was posted to take effect July 8. A number of properties in the district, however, refused to accept this schedule, and decided to work independently as before. The new schedule represented a considerable increase in the pay roll of the camp, and in the case of a number of mines meant an all round

increase in the wages paid for various classes of labour. In other cases the wage list remained practically unchanged. In the case of properties, however, which had been previously paying higher wages than the average there was necessarily a reduction to the common schedule. In some properties there were increases and decreases for different classes of labour. The working day under the schedule adopted by this large number of mine owners was ten hours, the same length of day that existed throughout the district before the adoption of this schedule.

A majority of the men employed immediately ceased work at all mines in which the new schedule was posted, and in some others, and followed up this action by preparing a new schedule themselves, which averaged considerably higher than that prepared by the mine owners and placed the hours for underground men at 8. The total number of men employed at the mines was about 3000 and probably three-fourths of the number ceased to work.

The schedules posted respectively by the mine owners and the mining Union were as follows:—

#### MINE OWNERS' SCHEDULE.

##### SURFACE.

Surface Boss.....	\$ 3.25	per day.
Carpenters.....	3.25	"
"    helpers.....	2.50	"
Mechanics.....	3.25	"
Pipe-Fitters.....	3.00	"
Head Blacksmith.....	3.75	"
Blacksmiths.....	3.25	"
"    helpers.....	2.50	"
Engineers.....	.30	per hour.
Firemen.....	.25	"
Head Ore-sorter (one only at each shaft or ore house).....	2.75	per day.
Ore-sorters or cobbers.....	2.50	"
Hand-miners.....	2.75	"
Teamsters.....	2.50	"
Hoist-men.....	2.75	"
Cage or Bucket-tenders.....	2.25	"
Other surface labor.....	2.25	"

##### UNDERGROUND.

Timbermen.....	\$ 3.25	per day.
Machine men.....	3.25	"
"    helpers.....	2.75	"
Cage or Bucket-tenders.....	2.50	"
Other underground labor.....	2.50	"

Board will be charged at the rate of \$4.20 per week, or 60c. for every day.

Working days shall consist of 10-hour shifts, except on Saturday, when the total time shall be 16 hours, 9-hour day shift, and 7-hour night shift.

25c. extra per day to be paid machine-men and machine-helpers sinking in a wet shaft.

The following was the wage scale adopted by Cobalt miners' Union No. 146, for all miners in the district from July 8:—

Carpenters.....	\$ 3.75	per day.
Carpenters helpers.....	2.75	"
Mechanics.....	3.75	"
Pipe fitters.....	3.25	"
Blacksmiths.....	3.75	"
"    helpers.....	3.00	"
Engineers, per hour.....	.35	
Firemen, per hour.....	.30	
Ore sorters.....	3.00	"
Hammermen.....	3.00	"
Teamsters.....	2.75	"
Hoistmen.....	3.00	"
Cage or Bucketers.....	3.00	"
Other Labor on Surface.....	2.75	"

##### UNDERGROUND.

Timbermen.....	3.50	"
Machine men.....	3.25	"
"    helpers.....	3.00	"
Cage or Bucketers.....	3.00	"
Other underground labor.....	3.00	"

Miners ask that not more than 65 cents per day be charged for board; miners in shafts 25 cents extra per day; in wet shafts mine owners to furnish oil clothes to men. Surface to work 10 hours, and all underground work to be 8 hours.

#### Inquiry by Department of Labour.

On July 9, Mr. F. A. Acland, the Secretary of the Department of Labour visited Cobalt with a view to inquiring into the nature and causes of the difficulty and also to explain to the parties concerned the bearing on the dispute of the Industrial Disputes Investigation Act, and to lend the good offices of this Department if the same were desired towards promoting a settlement.

On Mr. Acland's arrival in the camp he found that negotiations looking to a settlement had been already started by Mr. W. Verner, a citizen at Cobalt, in which he was invited by both parties to participate. The negotiations extended throughout Friday, July 12 and Saturday, July 13, and resulted in a modification of the schedule proclaimed by the Union, both as to hours and wages, while a resolution was passed by the Union a copy of which was placed before the representatives of the mine owners, declaring that its members did not desire a formal recognition of the Union by the employing companies. The negotiations, at which Mr. Acland was present and assisted throughout, were of a most

amicable and conciliatory character, and afforded strong grounds for hope that a settlement would be effected. The suggested compromise was not, however, acceptable to the general body of the representatives of the mining companies who passed a resolution deciding to adhere unreservedly to the schedule posted to take effect July 8.

#### Modified Wage Schedule of Men.

The wage schedule of the men in its modified form was as follows, and was definitely substituted for that first promulgated by the Union.—

Carpenters.....	\$3.50	per day.
Helpers.....	2.75	"
Mechanics.....	3.50	"
Pipe Fitters.....	3.00	"
Blacksmiths.....	3.50	"
"    helpers.....	2.75	"
Engineers.....	3.25	" 9-hours.
Engineers.....	.32½	per hour overtime.
Firemen.....	2.75	" 9-hour day.
Firemen.....	.27½	per hour overtime.
Ore sorters.....	2.75	per day.
Hammermen.....	3.00	"
Teamsters.....	2.75	"
Hoistmen.....	2.75	" 9-hour day
Hoistmen.....	.27½	per hour overtime.
Cage or bucketers.....	2.75	per day.
Other labor on surface.....	2.50	"

#### UNDERGROUND.

Timbermen.....	3.50	per day, 9-hours.
Machine men.....	3.50	"
"    helpers.....	3.00	"
Cage or bucketers.....	2.75	"
Other underground labor.....	2.75	"

Miners ask that not more than 60 cents per day be charged for board; miners in shafts 25 cents extra per day; in wet shafts mine owners to furnish oil clothes to men. Surface to work 9 hours, and all underground work to be 9 hours

Some Companies had however, refrained from signing the agreement to adhere to the schedule posted by the representatives of the mining companies, and early in the week following Mr. Acland received information that several of the companies which had signed the agreement were reconsidering their position. Under the circumstances he addressed a letter to the chairman of the committee representing the mining companies urging that a meeting should be called to consider the question of modifying the wage schedule proclaimed by them and offering, in the event of such modification being effected, to call a public meeting and to endeavour to secure the

acceptance thereof of the schedule thus modified. The representatives of the mine owners met on Wednesday, July 17, and considered this proposition, but decided after an all-day session that any alteration in the wage schedule "increasing the cost of production would be unfair and would be injurious to the best interest of the camp," and formally notified Mr. Acland to that effect in a letter bearing date of July 18.

During his stay in Cobalt, Mr. Acland was given opportunities of explaining to both parties to the dispute the nature of "The Industrial Disputes Investigation Act 1907," he addressed the representatives of the mining companies at the Coniagas mine by invitation on July 11, and the members of the Cobalt Miners' Union at the Cobalt Opera House by invitation on July 13. The Act on the whole was but little known and he found a sentiment widely prevailing that had it been better understood prior to the strike the dispute might have been settled to advantage by means of its machinery. Representatives of the mine owners admitted freely that they had erred, though unconsciously, in posting the new schedule to take effect immediately and without giving the thirty days' notice required under section 57 of the Act. Both sides, however, expected the strike to be of short duration and took the ground that in view of this probability and the fact that the dispute did not menace any public interest, it was not expedient at the time to apply for the establishment of a Board of Conciliation and Investigation to which the dispute might be referred. Mr. Acland discussed the situation on many occasions also with individuals and groups on either side of the dispute and did all that appeared to him to be possible under the circumstances in promoting better relations.

The strike was conducted with absolute orderliness, and the view that it would not prove of long continuance seemed to be borne out by the statements of the managers at the time Mr. Acland was in Cobalt as to the considerable number of men working in many of the properties and as to the number of men reported to be coming in daily, as well as by the

statement of the secretary of the Union on July 19 that 12 of the companies had made terms with the men on the basis of the compromise which he was able to assist in securing. In the case of many properties it seemed probable that while no formal settlement might be arranged the dispute would not affect materially

the output. It should be added that several hundred men employed at the mines left the district temporarily on the outbreak of the strike so that the number of employed in the camp is not so large as the original proportions of the strike would seem to indicate.

### BRITISH COLUMBIA LEGISLATION AFFECTING LABOUR, 1907.

**A**T the session of the legislature of British Columbia which assembled on March 7, 1907, and prorogued during April, a number of acts were passed which are of interest from the standpoint of industry and labour.\* A review of the more important of these is given in the following article.

#### Hours of Labour.

One of the most important acts of the session was the "Labour Regulation Act, 1907," which provides that no person may be employed in or about any smelter, sorting, handling or removing smelted ores, slag, or matte in any stage of preparation, for a longer period than eight hours in any twenty-four hours. The latter period, for the purposes of the act, means from midnight to midnight. Employers contravening this section are liable to a penalty not exceeding \$100 nor less than \$20 for each workman or person employed, while the employee is also liable to a penalty not exceeding \$100 nor less than \$20.

#### Early Closing.

By an amendment to the Shops' Regulation Act, the section permitting municipal councils to pass by-laws providing for the closing of shops not earlier than six o'clock in the evening, is extended in the case of the electoral districts of Fernie and Cranbrook so as to permit closing under by-law at five o'clock in the afternoon. Municipalities throughout the province are given the express right to enact by-laws providing for one or more half-holidays in any week

\* A copy of the Acts of the Session, in the form in which they received the Royal Assent was received at the Department of Labour, Canada, during July, by courtesy of the King's Printer, Victoria, B. C.

#### Protection of Children.

Provision is made whereby a community may be erected into a "curfew district" by the Lieutenant-Governor-in-Council, upon a petition signed by at least four-fifths of the inhabitants. After the creation of a district of this character, it is unlawful for a child under 14 years of age to be on the streets or roads of the district, without lawful reason, unless accompanied by a parent or guardian, at any time after nine o'clock in the evening of any day. The maximum penalty is \$5.00. Children employed in industrial establishments are exempted from the provisions of the Act.

#### Mechanics' Liens for Materials.

The Mechanics' Lien Act is amended by the addition of a section providing that no lien may be claimed for materials unless notice in writing of the intention to claim a lien has been given to the owner or his agent at least fifteen days before the completion of the work.

#### Protection of Timber.

The "Bush Fire Act" was amended in a number of sections. Stationary as well as locomotive engines must in future have in use the most efficient means of preventing the escape of fire, and the owner must see that the same is in perfect order at least once a day. The Lieutenant Governor-in-Council is authorized to appoint special officers and to frame regulations for the enforcement of the act. Persons operating a logging engine between May 1 and October 1 must clear a reasonable space around the engine, so as to prevent the spread of fire, and

must keep a reasonable quantity of water at all times near the engine for extinguishing an incipient fire.

#### Trade Licences.

Two acts were passed relating to trade licences within the province. Under the terms of one of these measures, non-resident commercial travellers are required to obtain licenses in order to sell or take orders for liquors or tobaccos to be imported into the province. The license fee is fixed at \$100 for a license of six months and \$200 for a license for one year. In the case of commercial travellers representing firms or companies which have a duly appointed agent in the province, through whom orders are received, no license is required. The act passed in 1905 with regard to the taxing of non-resident commercial travellers,\* as well as the legislation of 1900, respecting the issuing of licenses for the sale of liquors by commercial travellers, were repealed. Under a section of the "Extra-Municipal Trade License Act," also passed during the session, provision made for the licensing of billiard rooms, bowling alleys, drug stores, wholesale or retail establishments, livery stables, draymen, pedlars, etc., etc., in portions of the province which are not within the boundaries of the existing municipality.]

#### Taxation.

A number of acts were passed relating to the taxation of industrial and other undertakings. By an amendment of the Assessment Act, a tax of two cents is imposed on each case of salmon packed during the year ending December 31, with an additional tax of one per cent on the total price for which salmon, other than canned salmon, is sold during the year. Returns must be made by the owners of salmon canneries, showing the total number of cases of salmon packed, together with the number or quantity of salmon sold or marketed under any other process than canning, and the price for which the same was sold or marketed. The term "salmon" in-

cludes sockeye, red and white sprin humpbacks, dog salmon, cohoes, and steelheads. Provision is also made for the taxation of the other personal property of salmon canneries, such as machinery, stores, goods, etc. Under the same act, amendments were made in the provisions relating to the taxation of banks, insurance companies, mineral and placer claims, stock in trade, etc.

A special act, entitled the "Railway Assessment Act, 1907," was passed requiring railway companies to make annual returns with regard to exemptions, mileage, other real property, land sales, leases, etc. Lands occupied as right-of-way by railways are to be assessed at the sum of \$10,000 per mile, not including sidings or switches, which are to be assessed at the rate of \$3,000 per mile; all to be taxed as real property. Income, rolling stock and other real property are also to be taxed. The Act does not apply to electric street railways operated within municipalities, or to railways used exclusively for the carriage of logs, ores or coal, or of workmen employeef by the owners of such logs, ores or coal, to and from their place of work provided they are carried free of charge.

By an amendment of the "Municipal Clauses Act," an annual tax not exceeding \$2.00 may be imposed in city municipalities on all vehicles (except bicycles, invalid carriages, perambulators and children's vehicles) used in the city. The council may also exempt from the payment of the tax delivery vehicles or vehicles used by farmers.

#### Notes.

An Act was passed in amendment to the *Coal Mines Act*, relating to prospectors' licenses, appeals, leases, etc.

By an amendment of the *Timber Measurement Act*, 1906, the use of *Doyle's log scale* may be authorized in portions of the province east of the Cascades range.

An Act was passed providing for the endowment of the *University of British Columbia* by a reservation of provincial lands, instructions being added as to the manner in which the revenue therefrom must be applied.

A *Ditches and Water Courses*" Act was

\*For a review of this legislation, see the *Labour Gazette* for May, 1905, p. 1235.

passed applying to all lands requiring drainage, but not affecting other Acts now having the force of law in the Province. Among other lands, those for mining or manufacturing purposes are included in special conditions.

The various provisions of the *Fisheries Amendment Act*, passed in 1902, with regard to the taxation of the output of canneries, were repealed. The provisions passed in 1901 prohibiting the granting of leases or licenses permitting the use of drift nets, fish traps or stationary nets, were also repealed.

By an amendment of the *British Columbia Railway Act*, railway companies are required to supply convenient and proper crossings for persons across whose lands the railway is carried. Live stock when crossing must be in charge

of a competent person, and reasonable care must be taken to avoid accidents.

By an amendment of the "Provincial Elections Act" it was provided that in addition to Chinese, Japanese and Indians, Hindus should not be entitled to have their names placed on a voters' list or to vote at any election. The term Hindu is defined as meaning any native of India not born of Anglo-Saxon parents whether a British subject or not.

Among bills which were introduced during the session, but which were not passed, were an act for the protection of persons employed in factories, an act to establish a general eight-hour day, an act to amend the Master and Servant Act, and an act to amend the Workmen's Compensation Act.

#### NEW BRUNSWICK LEGISLATION AFFECTING LABOUR, 1907.

THE fifth session of the fourth legislature of the Province of New Brunswick, which assembled on February 10, 1907, was prorogued during April. Some 52 public and 68 local and private acts were assented to.\* A review of such of these measures as are of special interest to industry and labour is given in the following article:—

##### The Organization of Fishermen's Unions.

Legislation was passed providing for the organization and incorporation of fishermen's unions, or "stations," throughout the province, in connection with a central body. The act is similar in scope and design to that enacted in Nova Scotia in 1905, and had its origin in essentially similar conditions. A special article dealing with these conditions and with the Nova Scotia Act was published in the October, 1905, issue of the *Labour Gazette*, at page 410, and the reader is referred to that issue for a detailed description of the legislation in question. An additional object of the New Brunswick Act is the regulation of any branch of fishing and of the marketing of fish products, not inconsistent with law or

well established customs in the industry. The property of a fishermen's union in Nova Scotia is exempt from all taxation; in New Brunswick it is not exempt from taxation for school purposes. The organization meeting of the Fishermen's Union of New Brunswick is to be held at St. Andrews on the second Monday in January, 1908, provided that at least five stations shall have been incorporated under the act prior to that date. The delegates to this meeting, or to any subsequent annual meeting of the provincial union are entitled to receive their travelling expenses out of the funds of the stations they represent. Stations not represented at three annual consecutive meetings of the union are to cease to exist as corporations. In the organization of the local stations, provision is made for the holding of a public meeting of fishermen at which the boundaries of the station must be defined. A meeting of this character may be called by any three fishermen by notice published in a newspaper in the county in which the station is to be located, and by printed notice posted up in at least 20 conspicuous places in the locality. In further matters of detail some enlargement upon the terms of the Nova Scotia Act is made. (1)

\* Advance proofs of the several acts of the session, in the form in which they became law, were received by the Department of Labour during July, by courtesy of the King's Printer of New Brunswick.

### Workmen's Compensation.

An important amendment was made to the portion of the Workmen's Compensation for Injuries Act which applies to cases where the execution of any work has been carried into effect under a contract. The amendment has special reference to the matter of contributory liability on the part of a fellow-employee of the workman injured. In such cases it is now provided that the person for whom the work is done is liable to pay compensation, as if the workman had been directly employed by him. He is therefore, for the purposes of the act, deemed to be the employer of the workman. Instructions are added in the new act as to the alternative methods of procedure in claiming compensation. Instead of bringing action in the ordinary way, a claimant may proceed summarily by petition to a judge, and the latter may, after reasonable notice, proceed in a summary manner to hear the petition on its merits without regard to technicalities. The judge's decision in such cases is to be final and conclusive, providing the amount of compensation conceded is not greater than is provided for by the act. Orders made by the judge are to have the same force as a judgment of the Supreme Court. In no case may he award more than \$25 costs against the petitioner or more than \$100 costs against the respondent. (2)

### The Housing of Miners.

A special act was passed with the object of improving the housing accommodation of miners engaged in the work of mining coal in proximity to the line of the New Brunswick Coal and Railway Company. The act was suggested by the fact that a considerable area of land suitable for the erection of miners' houses is at present held by the Crown as part of the right of way formerly owned by the railway company in question. Permission is accordingly given in the act to the lieutenant-governor-in-council to make a grant to any mining company, upon conditions in the public

interest, of such portions of the above mentioned right of way as may not be required for the purposes of the railway, in order that the same may be used for the erection of houses for the use of miners employed in the locality mentioned. (3)

### The Encouragement of Agriculture.

The lieutenant-governor-in-council is authorized by special act to purchase for the province, upon the recommendation of the Commissioner of Agriculture, a number of *horses and sheep* for breeding purposes. the maximum expenditure in this connection to be \$25,000, the animals to be resold by the Commissioner of Agriculture under such term and conditions as to their being kept within the province as are determined by the governor-in-council. (4)

The bonds of the *New Brunswick Cold Storage Company*, incorporated for purposes of erecting warehouses at St. John and other central points in the province, may be guaranteed at the rate of four per cent. per annum instead of at three per cent. as originally provided. (5)

By an addition to the *Dairy Industry Act* of 1904, the owners or managers of creameries or cheese factories are authorized to make rules for the regulation of their business. Patrons may be required to subscribe to the rules, which are binding on those who thus subscribe. Butter or cheese factories receiving a bonus from the government, where the milk or cream of 50 or more cows is received, or to which ten or more patrons contribute milk, are required to register their names, addresses and brands of product with the Department of Agriculture, and must put their brands on all products manufactured, shipped or handled. Owners or operators of creameries or cheese factories are required to make an annual return under oath showing the total amount of cream and milk received and the total amount of butter or cheese manufactured. (6)

An expenditure of \$800 for necessary

(5) N. B. stat. 1907, chapter 34.

(6) Chapter 39.

(2) Chapter 26.

additions to the *dairy school building* at Sussex is authorized. (7)

### The Manufacture of Starch.

A special act was passed authorizing the Commissioner for Agriculture to grant assistance towards the erection of starch factories in the province, for the manufacture of starch from potatoes; the assistance to consist of a bonus of five dollars on each ton of the finished product ready for market. No more than \$2,000 may be expended for this purpose in any one year. The act is to continue in force for ten years only. (8)

### Government Ownership and Regulation of Telephone Systems.

An act was passed authorizing the lieutenant-governor-in-council to expropriate the property and franchises of telephone companies whenever it is deemed in the interest of the people of the province to do so. The method in which the expropriation is to be accomplished is defined. Compensation is to be fixed by agreement, and failing that, by arbitration. The approval of the legislature by resolution is required before proceedings to expropriate are taken.

Telephone companies are required by the act to file with the provincial secretary a statement of receipts, expenditures and tariffs of rates for each fiscal year. Rates are to be subject to the control of the Crown where the legitimate dividends exceed eight per cent. on paid up capital stock. Municipalities, moreover, are given the right to regulate the construction and maintenance of telephone systems within their jurisdiction. Municipalities or corporations having authority to operate and construct a long distance telephone service may

apply to the lieutenant-governor-in-council to regulate its connections with rival systems upon such terms as to compensation as may be regarded as just and expedient. The lieutenant-governor-in-council, moreover, may order a company to extend its line and to afford telephone connections to persons desiring such extension, whenever it appears that the extension will yield a reasonable profit. The penalty for refusal on the part of the company is fixed at \$500. Further provisions are added regulating the operations of companies in the matter of placing poles, preserving trees, removing debris, caring for standing timber, etc. (9)

### Notes.

An act was passed in amendment of the general *Mining Act*, relating to applications for crown lands in the vicinity of coal mines, the issuing of regulations with regard to coal mining by the Surveyor-General, and the imposition<sup>10</sup> of royalties upon coal mining in the counties of Queen's and Sunbury. (10)

The granting of aid to the *International Railway Company* of New Brunswick and to the *Canadian Northern Railway Company* by a guarantee of bonds is authorized by special act. The line to be constructed by the latter company is for the purpose of giving accommodation to the settlers of the St. John River Valley, a work which has long been regarded as a public necessity. The line, as part of a transcontinental system, will also be of benefit to the port of St. John. The railway is to be laid with steel rails of not less than 67 pounds to the yard; all bridges are to be of steel, with substructures of stone and concrete; and strict precautions must be taken by the company against the setting out or spreading of fires along the line. ### THE WORKMEN'S COMPENSATION ACT, GREAT BRITAIN, 1906.

ON July 1, 1907, the Workmen's Compensation Act, passed by the Parliament of the United Kingdom during the session of 1906, went into operation. The act is in many respects the most important legislation affecting labour passed for some time in Great Britain, it being estimated that not less than 6,000,000 additional persons are brought by it within the scope of the law giving compensation for injury by accident. The following brief review of the more important provisions will be of general interest.

#### Provisions of the Act.

The act repeals the existing acts of 1897 and 1900, and consolidates and amends the law.

The most outstanding new feature of the act is that it is made to apply to practically all workpeople, including seamen, clerks, shopmen, professional footballers and cricketers, organists and domestic servants. The only persons specifically excluded are persons employed otherwise than in manual labour whose remuneration exceeds £250 a year, outworkers, members of a police force, members of the employer's family living in the employer's house, and persons casually employed for some purpose not connected with the employer's trade or business.

The amount payable in case of death or injury is generally the same as fixed by the act of 1897; but the minimum period of incapacity entitling to a weekly payment is reduced from a fortnight to one week, and where the incapacity lasts two weeks or more, the weekly payments are to commence from the date of the injury, instead of, as heretofore, from a fortnight after that date. Where an injured workman is under 21 years of age and his earnings are less than 20 shillings per week, compensation may be awarded to him up to a rate of 100 per cent instead of 50 per cent, as previously, of his weekly earnings, provided that the weekly payment is not to exceed 10 shillings.

Another important feature of the new

act is its extension so as to include the contracting of certain diseases due to the nature of an employment amongst personal injuries arising out of the employment. The diseases referred to are anthrax, poisoning by lead, mercury, phosphorous or arsenic, and ankylostomiasis. The Home Secretary is moreover given power to extend the provisions of the act to other diseases.

To the list of "dependants" entitled to compensation in case of the death of a workman are added an illegitimate child or grandchild of the deceased, where such child was dependent on his earnings, and the parent or grandparent of the workman where the workman was illegitimate, and the parent or grandparent was so dependent.

#### Compensation for Industrial Diseases.

Subsequent to the passing of the act, the Home Secretary, in view of the powers vested in him with regard to the definition of industrial diseases above described, appointed a Departmental Committee to inquire into and report what diseases and injuries, other than injuries caused by accidents, are due to industrial occupations and are distinguishable as such. The report of this committee was recently issued and its recommendations adopted.

The committee was, in the first place, called upon to distinguish between "accidents" and "diseases." The distinction adopted was, broadly speaking, that accidents were "momentary occurrences," while diseases were "gradually contracted." This distinction led to the exclusion of hydrocyanic acid gas poisoning as an "industrial disease," as this form of poisoning is sudden in its onset, and does not appear to be due to gradual poisoning consequent on exposure over a long period.

As the act provides that compensation shall not be given for any incapacitation which lasts less than a week, one or two diseases, as for example, "brass-founders' ague," which are transitory in their effects, and other diseases, like boiler-

makers' deafness, which are chronic, but do not incapacitate the sufferer from continuing at his trade, were excluded.

Great difficulties were presented to the committee by a third restriction of the act to the effect that the disease must be "specific" to a particular trade or occupation. Thus bronchitis, though more prevalent among workmen exposed to the inhalation of dust or noxious fumes, was excluded, as the committee found that there are not sufficient means of differentiating bronchitis so contracted from bronchitis otherwise contracted. The same difficulty was reported in the case of pneumonia contracted by slate workers and by basic slag workers. With regard to "bottle-makers' cataract," the inquiry as to its prevalence is to be further continued. Persons who in the course of their employment contract some widely prevalent disease, as for example, labourers disinfecting a ship which has had small-pox on board, and

contracting that disease, are not regarded as coming under the act. Another class of diseases, such as "potters' rot," stonemasons' phthisis," etc., though regarded as industrial diseases, and specific to their several trades, were not scheduled as industrial diseases for the reason that they have a long preliminary period, in which the symptoms are undistinguishable from the symptoms of other diseases. There might, it was feared, if these diseases were included in the schedule, be a wholesale dismissal of workpeople who show doubtful symptoms, though the majority might never suffer seriously from the disease if allowed to continue in their employment.

The diseases or injuries scheduled by the committee as "industrial diseases," with the processes in respect of which such diseases or injuries are to be "deemed to be due to the nature of the employment," are shown in the following table:—

INDUSTRIAL DISEASES UNDER THE WORKMEN'S COMPENSATION ACT, GREAT BRITAIN, 1906.

Description of Disease or Injury.	Description of Process.
1 Poisoning by nitro and amidoderivatives of benzene (dinitro-benzol, anilin and others) or its sequelæ.	Any process involving the use of a nitro- or amidoderivative of benzene or its preparations or compounds.
2 Poisoning by carbon bi-sulphide or its sequelæ.	Any process involving the use of carbon bisulphide, or its preparations or compounds.
3 Poisoning by nitrous fumes or its sequelæ.	Any process in which nitrous fumes are evolved.
4 Poisoning by nickel carbonyl or its sequelæ.	Any process in which nickel carbonyl gas is evolved.
5 Arsenic poisoning or its sequelæ.	Handling of arsenic or its preparations or compounds.
6 Lead poisoning or its sequelæ.	Handling of lead or its preparations or compounds.
7 Poisoning by Gonioma Kamassi (African boxwood) or its sequelæ.	Any process in the manufacture of articles from Gonioma Kamassi (African boxwood).
8 Chromic ulceration or its sequelæ.	Any process involving the use of chromic acid or bichromate of ammonium, potassium, or sodium, or their preparations.
9 Eczematous ulceration of the skin, produced by dust or caustic or corrosive liquids, or ulceration of the mucous membrane of the nose or mouth produced by dust	Handling or use of pitch, tar, or tarry compounds.
10 Epitheliomatous cancer or ulceration of the skin or of the corneal surface of the eye due to pitch, tar, or tarry compounds.	Chimney-sweeping. Mining. Care of any equine animal suffering from glanders; handling the carcass of such animal.
11 Scrotal epithelioma (chimney sweeps' cancer).	Any process carried on in compressed air
12 Nystagmus.	Mining.
13 Glanders.	Mining.
14 Compressed air illness or its sequelæ.	Mining.
15 Subcutaneous cellulitis of the hand (beat hand).	Mining.
16 Subcutaneous cellulitis over the patella (miners' beat knee).	
17 Acute bursitis over the elbow (miners' beat elbow).	
18 Inflammation of the synovial lining of the wrist joint and tendon sheaths.	

The provisions of the act were subsequently extended to cover the diseases and processes mentioned.

**CHANGES IN RATES OF WAGES AND HOURS OF LABOUR, CANADA—  
SECOND QUARTER OF 1907.**

IN the accompanying statistical table detailed information is presented relating to changes in rates of wages and hours of labour reported to the Department of Labour as having gone into effect during the second quarter of the present calendar year, including the months of April, May and June, 1907.

The changes reported during the quarter, affecting in each case a number of workpeople, were 117 in number. Of these, 104 were of the nature of increases in wages, and 2 were of the nature of decreases in hours. In the remaining 11 cases, the changes involved both an increase in wages and a decrease in hours.

**The General Result.**

The upward tendency in wages, as shown by the table, has been more pronounced during the present spring season than during the corresponding period of any previous year of which a statistical record has been kept in Canada, with the single exception of 1903. The number of increases taking effect during the second quarter of 1903, was greater than during the similar period of the present year. The number of employees affected, however, by the changes concerning which detailed information was obtained, was greater in the second quarter of 1907, than in the corresponding period of 1903, owing to the fact that certain of the changes affected large bodies of workpeople. For example, the increases granted to maintenance of way employees on the C. P. R., G. T. R., and C. N. R., systems alone affected 14,000 men, while the number of trainmen on the C. P. R., system similarly affected was 2,800. In textile establishments approximately 9,000 employees, and in the building trades approximately 7,200 employees received increases. In the mining industry, increases granted to coal miners in Alberta and British Columbia affected approximately 4,000 men, while in the lumbering industry in Ontario and the Eastern Provinces, over 10,000 river drivers and

mill men obtained advances. Unskilled labourers, to the number of several thousands had their wages increased, an index to the nature and extent of the changes affecting this class being given in the portion of the accompanying table devoted to changes among corporation labourers. Other large bodies whose wages were increased during the quarter were, street railway employees at Toronto to the number of 1,400; bakers at Toronto to the number of 1,000; locomotive engineers on the western lines of the C. P. R., system, to the number of 600; coal carters and iron moulders at Montreal, to the number of 500 in each case; longshoremen at Halifax to the number of 500; and metaliferous miners in Rossland, and elsewhere in British Columbia to the number of 1,000. In the corresponding period of 1903, though a number of large bodies of workmen received increases, the movement partook rather of the nature of a general advance affecting small bodies of workmen in a large number of localities.

In the accompanying small table an analysis is presented showing the aggregate results, according to industries and groups of trades, of the several changes of the quarter, in so far as detailed information was obtained by the Department. It will be seen that the general result of the changes was wholly in the direction of an increase in aggregate wages and of a decrease in aggregate hours of labour.

**Changes by Industries and Trades.**

The following is a statement of the changes in wages and hours of labour reported to the Department as having gone into effect during the second quarter of 1907, according to the several industries and groups of trades affected:—

*Agriculture.*—Farm labour was in active demand throughout Ontario and the Eastern Townships. Wages offered for experienced help in these sections were 10% higher than at the corresponding period of 1906.

## CHANGES IN RATES OF WAGES AND HOURS OF

CLASS OF WORKPEOPLE AFFECTED.	LOCALITY.	Approximate Number of Workpeople affected.	Date from which change took effect.	PARTICULARS OF CHANGE.
<i>mining—</i>				
Coal Miners.....	Alta. and B. C....	4,000	Apr. 1*	.....
Miners.....	Rossland, B. C....	500	May 1	Wages of shovelers, carmen, ore sorters and labourers increased, from \$2.75 to \$3.00 per day.
Miners.....	Moyie, B. C.....	340	.....	Wages increased as follows: Machine and timbermen ..... Hammersmen ..... Shovelers ..... Surface firemen ..... Millmen ..... Engineers ..... Blacksmiths and machinists ..... Labourers .....
<i>the Building Trades—</i>				
Granite Cutters.....	Maisonneuve, Que	130	June 25	Wages increased \$2.50-\$2.70 to \$3.00 per day; hours reduced from 9 to 8 per day.....
Stonecutters.....	Ottawa, Ont., and Hull, Que.....	200	May 15	Wages increased from 43c. to 44c. per hour.....
Bricklayers .....	Montreal, Que....	800 900	May 1	Wages increased from 45c. to 50c. per hour.....
and masons..	Ottawa, Ont. and Hull, Que.....	400	May 27	Wages increased 2c. per hour (45c. to 47c.) for 1907 and 5c. per hour for 1908.....
masons and plasterers..	Kingston, Ont...	40	Apr. 1	Wages increased 8c. per hour; hours reduced from 9 to 8 per day.....
and masons .	Peterborough, Ont	90	June 1	Wages increased from 40c. to 45c. per hour.....
and masons .	St. Catherines, O.	47	May 1	Wages increased from 33c. to 45c. per hour.
and masons .	Hamilton, Ont ..	200	Apr. 1	Wages increased from 45c. to 47½c. per hour; hrs per day reduced from 9 to 8.....
and masons .	London, Ont.....	70	June 1	Wages increased from 40c. to 43c. per hour; date after May 1, 1903 to be 45c. per hour.....
.....	Windsor, Ont ...	30	May 1	Wages increased from 50c. to 52½c. per hour.....
and masons .	Port Arthur, Ont.	100	" 1	Wages increased from 55-56½ to 57½c. per hour...
lumbermen & steamfitters..	Ottawa, Ont.....	135	June 1	Wages advanced from 30-32c. per hour to 32-33c. per hour .....
Plumbers .....	Niagara Falls, Ont	12	May] 1	Wages increased from \$2.50 to \$2.75 per day.....
.....	Hamilton, Ont ..	45	" 28	Wages increased from 35 to 37½c. per hour.....
and steamfitters	London, Ont.....	30	" 6	Wages increased from 30c. to 35c. per hour; hours reduced from 49½ to 44 per week.....
and steamfitters	Edmonton, Alta .	30	" 1	Wages increased 50c. per day.....
Lathers.....	Peterborough, Ont	25	" 1	Wages increased from 25c. to 28c. per hour.....
.....	Toronto, Ont.....	125	" 14	Wages increased to \$3-\$3.50 per 8 hour day.....
Carpenters.....	Sherbrooke, Que.	130	" 1	Wages increased 25c. per day.....
Carpenters and joiners...	Kingston, Ont ...	80	Apr. 1	Hours reduced from 9 to 8 per day.....

\* For detailed information with regard to changes in wages among these classes see *Labour Gazette* for June 1907, pp. 1333-1405, pp. 1415-17; and for July, 1907, pp. 83-85.

 † Including 24 females.

*Fishing.*—The prices obtained by the Atlantic fishermen for the 1907 catch of sardines and lobsters were higher at several points than those prevailing in 1906.

*Lumbering.*—In connection with the spring drives and the opening of the sawmilling season, a general advance in wages went into effect in Ontario, Quebec, and New Brunswick during the months of April and May, as a result of the prevailing scarcity of men. The average extent of the increase was from five to ten per cent., and several thousands of employees were affected. More detailed information as to the nature of the increases in particular localities is as fol-

lows:—In the neighborhood of Moncton, N. B., about 200 men received an advance of 25 cents per day. In the St. John Valley, N. B., an increase of 10 per cent was granted to the employees in several mills. On the Miramichi River, N. B., wages on the drives were 10 per cent and upward above those paid last year, and the mills along the river increased wages from 10 to 15 per cent. At Newcastle, N. B., for example, mill men in the employ of W. A. Hickson & Company were advanced from \$1.56 to \$1.75 per day of 10 hours, while stream drivers employed by the Edward Sinclair Lumber Company were increased from

\$2.40 to \$2.72 per day. Pulp mill employees at Chatham, N. B., have been increased 15 to 25 per cent. during the past year. In the vicinity of Sherbrooke, Que., river drivers, who in previous years were paid from \$1.25 to \$1.75 per day were paid this year from \$1.30 to \$1.90 per day. Saw mill hands, who received about the same rate of wages, were similarly increased. Upwards of 3,000 men in all being affected. In the Ottawa Valley, river drivers were receiving from \$45 to \$50 per month with board, compared with a previous rate of from \$30 to \$45, the average rate in 1906 being \$43 per month and in 1907 \$48

per month. It was estimated that approximately 1,800 men were employed on the drives on the Ontario side of the Ottawa Valley, and that the additional amount paid in wages this year would aggregate in the neighbourhood of \$9,000 per month. Mill hands in this section, aggregating several thousands in number, were advanced 5 to 10 per cent in wages. For example, employees of the Gilmour and Hughson Company at Hull, Que., to the number of 300, were advanced on May 1, from \$7.50-\$9.00 to \$8.00-\$10.00 per week. The employees of the J. R. Booth Company, upwards of 2,500 in number, were advanced from \$7.50-\$9.00

to \$8.50-\$12.00 per week in April. The number of men employed in the sawmills of Ottawa and adjacent towns of the Ottawa Valley on the Ontario side of the river is estimated at about 6,000, and the changes above referred to will increase the total amount paid in wages by about \$6,000 per week. In 1906 the average mill hand received somewhat less than \$1.50 per day; during the present year he is receiving an average of \$1.75 per day.\* Mention may be made here also of the general increase which went into effect during April among employees of the E. B. Eddy Company, at Hull, Que., numbering 900 males and 300 females, and consisting of sawmill hands, pulp mill hands, paper makers, pail, tub and washboard makers, match makers, etc., the average rate being raised from \$1.35 to \$1.50 per day. In the Peterborough, Ont., district, about 270 river drivers were advanced from \$35 to \$37 per month; the wages of millmen remained the same as in 1906, namely, \$1.50 per day.

*Mining.*—Important changes in wages went into effect during the quarter in the coal mines of Alberta and British Columbia. Employees of the Crows' Nest Pass Coal Company at Fernie and Michel, B. C., and of other companies included in the Western Coal Operators' Association, obtained a new agreement during May involving an increase in wages. (1) In the neighbourhood of 3,450 employees were in all affected. Coal miners in the employ of the Alberta Railway and Irrigation Company at Lethbridge, Alta., also obtained a new agreement during May. (2) At Rossland, B. C., shovellers, carmen, ore sorters and labourers were advanced on May 1 from \$2.75 to \$3.00 per day. At Moyie, B. C., men in and about the mines of the St. Eugene Mining

Company, to the number of 340, had their wages raised, in the case of shovellers and carmen, the increase amounted to 25 cents per day, and in the case of underground machine men, timber men and hammer men, to 50 cents per day. Wages of unskilled labour were upward in tendency to a marked degree throughout the Boundary and Kootenay districts during May and June.

*Building trades.*—Detailed information was obtained by the Department concerning increases in wages affecting upwards of 7,200 employees in the building trades to the aggregate extent of over \$12,600 in weekly earnings. The aggregate weekly reduction in weekly hours amounted to 5,345. The number of changes amounted in all to 46, and all went into effect during the quarter. The changes occurring among carpenters constituted the most important item in these totals, over 2,350 men being affected, and the aggregate result being an increase of \$4,574 in weekly earnings and a reduction of 2,890 in weekly hours. An increase among carpenters at Vancouver, B. C., alone affected over 800 men. Other points at which carpenters received advances were Sherbrooke, Que., Kingston, Belleville, Peterborough, Niagara Falls, St. Catharines, Hamilton, Brantford, Ont.; Medicine Hat and Edmonton, Alta., and New Westminster, B. C. Bricklayers and masons received increases to the number of 1,850, the aggregate increase in weekly earnings being \$3,570, and the aggregate reduction in hours, 1,440. At Montreal, Que., 800-900 men of this class were increased 5 cents per hour, while at Ottawa, Kingston, Peterborough, St. Catharines, Hamilton, London, Windsor and Port Arthur, Ont., substantial increases were granted. Painters, received increases at Maisonneuve and Montreal, Que; Kingston, Belleville, Hamilton, Berlin and Port Arthur, Ont.; Calgary and Edmonton, Alta.; and Victoria and Vancouver, B. C., the total number of men affected being 1,350, and the aggregate increase in weekly earnings, \$2,157.50. Builders' labourers, etc., at Hull, Que.; Ottawa, Kingston, Toronto, Hamilton and Berlin, Ont., and at Cal-

\* See reports of Hull, Que., and Ottawa, Ont., correspondents in the May, 1907, issue of the *Labour Gazette* at pages 1202-03.

1 A special article dealing with the origin of the dispute which resulted in the increase, and giving the text of the new agreement in full, was published in the *Labour Gazette* for June, 1907, at pages 1,388-1,405.

2 A special reference to the settlement of the dispute in this connection was published in the June, 1907, issue of the *Labour Gazette* at page 1,415. The full text of the agreement arrived at was published in the July, 1907, issue of the *Gazette*, at pages 85-87.

gary, Alta., received increases, the total number of men affected being 1,162, and the aggregate increase in weekly earnings being \$1,831.75, while the total reduction in hours amounted to 450 weekly. Granite cutters at Maisonneuve, Que., stonecutters at Hull, Que., and Ottawa, Ont.; lathers at Peterborough and Toron-

to, Ont., and plumbers at Ottawa, Niagara Falls, Hamilton and London, Ont., also obtained advances. Full details with regard to the nature of these several changes, the number of men affected in each case, the method in which change was brought about, etc., will be found in the accompanying table.

TABLE SHOWING, BY INDUSTRIES AND GROUPS OF TRADES, THE RESULTS OF CHANGES IN WAGES AND HOURS OF LABOUR, CANADA, DURING THE SECOND QUARTER OF 1907.

Railway Employees.....	17,663	21,500.00			
Street Railway Employees.....	1,730	1,890.00			
General Transport.....	1,624	2,780.00			
Civic Employees.....	1,100				500

*Metal, engineering and shipbuilding.*— In this group the most important changes of the quarter were among iron moulders. At Montreal, Que., some 500 moulders and coremakers obtaining a substantial advance, while stove plate moulders obtained an increase of 25 cents per day on day work and 5 per cent on piece work at Weston, Hamilton, Brantford and Guelph, Ont. Horseshoers at Moncton, and St. John, N. B., advanced their rates as the result of the increase in the price of stock and in wages paid to helpers. Machinists in the employ of the Grand Trunk Railway Company received an advance after a reference of their demands to a board appointed under the Industrial Disputes Investigation

Act, 1907\* At Belleville, Ont., 17 machinists received an increase of 2 cents per hour under an agreement obtained after a strike with an allowance of time and a half for overtime and an arrangement as to the number of apprentices. At Toronto, Ont., sheet metal workers and boilermakers obtained an advance in wages amounting to 2½ cents per hour in the case of the former, and 10 per cent in the case of the latter.

*Woodworking and furnishing trades.*—

\* A statement of the demands of the men and of the negotiations which led to the appointment of a board of investigation was published in the May issue of the *Labour Gazette* at page 1,243. The report and award of the board and the full text of the new agreement were published in the June, 1907, issue of the *Gazette* at page 1,406.

Sash and door factory employees at St. Hyacinthe, Que., had their wages advanced 10 per cent. At Calgary, Alta., the same class received a reduction in hours from 10 to 9 per day. A number of picture frame workers and gilders at Toronto, Ont., were granted an increase of \$1.00 per week; the nine-hour day is to be inaugurated as an experiment among this class on January 1, 1908. At Merritton, the employees of a wheel-making establishment received an advance of 12½ cents per day.

*Clothing.*—At Berlin, Ont., journeymen tailors (25) received an increase of 12 per cent. in wages dating from May 6. At Calgary, Alta., journeymen tailors (50) had their wages increased from 28 to 35c per hour, from April 1. At Victoria, B. C., tailors (50) obtained an advance of \$2.00 per week.

*The Textile trades.*—In the neighbourhood of 9,000 employees in cotton mills had their wages advanced 10-15% during April and May. The companies granting the increases were as follows: The Dominion Textile Co., operating mills at Halifax, Windsor, N. S., Moncton, Quebec, Magog, Montreal and Kingston; the Montreal Cotton Co., operating Mills at Valleyfield, Que., and Hamilton, Ont.; the Cornwall and York Company, operating mills at St. John, N.B., and the Imperial Cotton Co., and the Hamilton Coloured Cotton Co., operating at Hamilton, Ont. The scale of these workers varies widely according to classes, and that quoted in the accompanying table is to be regarded as representing the average earnings of female employees, who number approximately 50% of the whole. Fifteen female workers in a knitting mill at Hamilton, Ont., had their wages increased \$1.00 per week.

*Leather.*—At Quebec, Que., tanners and curriers (160) received an advance from \$8.25 to \$10.00 per week after a strike. At St. Hyacinthe, Que., beam-house men, tanners and curriers (80) had their wages raised from \$7.70 to \$8.40 per week. Counter and insoling factory hands (45) were increased from \$5.50 to \$6.00 per week in wages.

*Food and tobacco preparation.*—Journeymen bakers to the number of 1,000

at Toronto, Ont., had their wages increased \$1.00 per week, dating from May 1.

*Railway employees.*—The various changes occurring during the quarter among employees of this class, affecting in all over 17,600 workmen, were as follows:—

Locomotive engineers and firemen to the number of 50, in the employ of the Quebec Central Railway system, had their wages increased 10 per cent. on May 1.

Locomotive engineers employed on the Central and Pacific divisions of the Canadian Pacific Railway system received an increase of 40 cents per 100 miles, or per day of 10 hours. Engineers on way-freights were allowed 25 cents extra per 100 miles, or per day of 10 hours. Engineers are now also allowed 5 miles for housing and taking out engines, with an allowance for preparing engines for the trip. A new detention allowance is also granted. (1)

Conductors, baggagemen, brakemen, and yardmen on the Canadian Pacific Railway system obtained a new schedule on April 1 involving an increase in wages. Conductors on main line passenger trains were advanced from \$140 to \$150 per month for a monthly mileage of 5,600 miles or less. On branch lines, passenger trains, the increase was from \$125 to \$135 per month of 5,000 miles. Baggagemen and brakemen were increased proportionately to \$88.70 and \$80.00 per month respectively. The rates for mixed through freight, way-freight and working trains were correspondingly advanced. Yardmen's wages were raised from a schedule of 28 cents per hour day work and 30 cents per hour night work, to 32 cents per hour day work and 34 cents per hour night work. (2)

Maintenance of way men to the number of 7,000 throughout the Canadian Pacific Railway system had their wages increased 15-25 cents per day. (3) On the main lines

1 The full text of the new agreement was published in the June, 1907, issue of the *Labour Gazette* at page 1,442.

2 The portion of the new agreement relating to rates of pay is published under the heading "Recent Industrial agreements" in the present issue.

3 The rates of pay granted under the new agreement were given in full in the *Labour Gazette* for June, 1907, at page 1,447.

of the company's system east of Port Arthur, Ont., the increase in the case of foremen was from \$2.25 to \$2.75 per day, and in the case of trackmen, from \$1.50 to \$1.60 per day. West of Port Arthur the increase averages about 20 cents per day. (\*)

On the Canadian Northern Railway the wages of maintenance-of-way employes were increased during May by an average of 20-25 cents per day.

On May 1, about 4,000 employees of the Grand Trunk Railway system of this class were increased as follows:—

	Old Rate.	New Rate.
Section foremen.....	\$50.00 per mo.	\$55.00 per mo.
Sectionmen.....	1.30 per day	1.40 per day
Extra gang labourers	1.40 "	1.50 "

Corresponding increases were given to foremen and men in the larger yards, the latter receiving slightly higher rates than the ordinary section foremen and sectionmen.

Increases to G. T. R. freight-handlers at several of the larger stations were granted, the number of men affected being 149, and the increases averaging 7 per cent.

Trainmen (electric) in the employ of the International Railway Company at Niagara Falls, Ont., had their wages increased by 1-2 cents per hour on June 1.

Switchmen employed by the Grand Trunk Railway at Niagara Falls, Ont., obtained an increase on May 18 of about \$1.00 per week'.

*Street railway employes.*—Wages of motormen, conductors, etc., were increased during the quarter at Ottawa, Toronto and St. Thomas, Ont. For detailed information as to nature of changes, see accompanying table. In addition to the changes set forth in the table, a rearrangement of shifts at Hull, Que., increased the earnings of a number of motormen and conductors.

*General transport.*—Longshoremen at Halifax, N. S., and St. John, N. B., had their wages increased after a strike in the case of the former settled by the good

offices of the Department of Labour.\* At St. John, N. B., also, a number of scowmen engaged in the transportation of lumber were increased to a scale of \$2.75 per day. Coal carters and draymen at Montreal, Que., and teamsters at Hull, Que., and St. Catharines, Ont., received advances in wages.

The wages of marine engineers, firemen, sailors, etc., on vessels plying on the Great Lakes showed an advance at the opening of navigation compared with the rates current in 1906. On a number of vessels the wages of oilers, wheelmen and firemen, which were \$35.00 per month in 1906, were increased to \$37.50 for the present season.† The scale varies with the different companies and according to the class of vessels. In British Columbia, also, wages of steamboatmen of all classes were upward in tendency.

*Civic employes.*—Increases to clerks, inspectors, collectors, repair men, etc., in the employ of the city of Toronto, Ont., were granted during May, involving an additional expenditure of \$17,000 per annum on salaries account. Civic firemen and policemen received increases at Quebec, Que., and Windsor, Ont., and policemen at St. John, N. B., also obtained an advance. Employees of the civic light, heat and power plants at Kingston and St. Thomas, Ont., had their wages increased. Corporation teamsters at Montreal, Que., and Peterborough, Ont., and labourers at Moncton, N. B., Quebec, St. Hyacinthe, Montreal, Que., Berlin, Ont., Medicine Hat and Calgary, Alta., were among other municipal employes receiving increases. The aggregate number of the latter class alone was approximately 700.

Individual increases to civic employes of various classes were granted in several localities, including among others, Levis, Que.; Peterborough, Berlin, Ingersoll, Stratford, Ont., and Vancouver, B. C.

*Miscellaneous trades.*—Wages of bill

\* See the *Labour Gazette* for July, page 84. The increase granted to longshoremen at Montreal, during June will be recorded in the quarterly article covering the Third Quarter of the calendar year, as having come fully into effect on July 1, 1907.

† See also *Labour Gazette* for June, 1907, page 1371.

4 See report of Winnipeg correspondent in May, 1907, issue of *Labour Gazette*.

posters were advanced \$1.00 per week at Toronto, Ont. Hotel and restaurant employees at Vancouver and Victoria, B. C., received new scales involving an increase of about 10% in wages and a reduction in hours of 10 per week.

*Unskilled labour.*—The wages of this class were for the most part on the high level established during the active season of 1906. In a large number of localities,

the rate at the beginning of out-door employment was 25c. higher than at the same date a year ago. As the season advanced, further increases were reported from localities in which a scarcity of labour prevailed, as for example, in the Crows' Nest Pass and Kootenay districts of British Columbia, and at certain points on the line of the National Transcontinental Railway.

### THE FUEL SUPPLY IN SASKATCHEWAN.

WITH a view to preventing a recurrence of the scarcity of coal which prevailed during the winter of 1906-1907 in the Province of Saskatchewan, due largely to insufficient facilities on the part of railway companies, an effort is being made by the government of the province to induce settlers to secure full stocks of coal before the coming winter season sets in. In this connection the following letter was sent out by the Hon. the Minister of Agriculture for Saskatchewan to the leading coal companies throughout Western Canada asking them to intimate the best concessions they are willing to make, in the way of allowing credit, etc., in order to induce the people to lay in their supplies at an early date.

REGINA, July 20th, 1907.

I have no doubt that, after the West's experience in fuel shortage last winter, you are fully alive to the importance of having as much coal stocked up by the dealers, and their customers during the summer months as the transportation companies can handle, and the miners can turn out.

In order to assist, if possible, towards this desired end, I have been in correspondence and in conference with some of the representatives of both railways and mine owners with the result that the C. P. R. has undertaken to supply ample rolling stock to move all coal offered during the summer; while the Galt people engage to give most generous terms as an inducement for their agents to stock up at once.

I shall be glad to learn if your company is prepared to offer any inducement to dealers or their customers to stock up, such as that outlined in Mr. Nanton's letter, a copy of which, I herewith enclose.

I shall be pleased to hear of anything you may be prepared to do in this regard so that due publicity may be given to all mine owners and coal dealers alike as to their readiness to co-operate with all other interested parties in the matter of laying in generous stocks of coal for the coming winter.

Awaiting your esteemed reply,

I am,

Yours faithfully,

Commissioner of Agriculture.

It is the intention of the Minister, as soon as replies to the above have been obtained from the companies, to give the matter as much publicity as possible through the press. In this way it is hoped that at least a portion of the transportation difficulties would be reduced during the winter months.

The following is a copy of the communication referred to in the circular letter of the Hon. the Minister of Agriculture as having been received from Mr. Nanton, the Managing Director of the Alberta Railway and Coal Company:—

WINNIPEG, June 29, 1907.

Hon. W. R. MOTHERWELL,  
Commissioner of Agriculture,  
Regina, Sask.

Sir:—

Referring to the conference we had in Winnipeg a short time ago regarding the fuel question in the Province of Saskatchewan, you will remember that I promised that every effort would be made by this Company to supply its share of the fuel required during the coming winter, and that arrangements would be made by the Company to store, during the summer months, as much coal throughout the Province as it was at all possible.

I have pleasure in advising you that we are now arranging to store a large tonnage at principal points in the Province where the Company has representatives.

To carry out these arrangements coal is being shipped, freight prepaid, to the Company's representatives and such representatives are not being called upon to make payment for either the coal or the freight until the winter or such previous time as the coal is disposed of.

Improved machinery is being installed which will enable the Company to ship Galt coal in even better condition than during previous years. Shipments from the Mine have been retarded of late on account of this fact, but we are now making every effort to increase the output, though, as you are aware, there are many difficulties in this connection on account of the scarcity of labour.

To make our efforts effective, it is necessary that the public should assist our dealers by purchasing and taking delivery of their coal early in the season.

I have the honour to be, Sir,

Your obedient servant,

(Signed) A. M. NANTON,  
Managing Director.

It has been reported to the provincial government that a deposit of coal has been discovered in the country south and west of Battleford, and west of Saskatoon. The government has arranged to have this land reserved, and has, at present, a mining expert examining the property, and will take whatever action seems to be necessary to render this coal available to the settlers in that district for the coming season.

In addition to the above the government is gathering all the information obtainable relative to the coal situation with a view to taking whatever steps seem to be necessary. Everything possible will be done to remove the possibility of the experience of the province during the last winter.

#### THE MANUFACTURING INDUSTRY IN CANADA—CLASSIFICATION OF ESTABLISHMENTS ACCORDING TO VALUE OF PRODUCT.

STATISTICS relating to the principal manufacturing establishments in Canada during the calendar year 1905, arranged in three groups according as the value of product amounted to upward of \$200,000 and under \$500,000; upward of \$500,000 and under \$1,000,000 and upward of \$1,000,000, were published by the Census and Statistics Branch of the

Department of Agriculture, Canada during July. In the first group there were found to be 475 establishments, the total products of which amounted to \$145,587,183 in value, and the average value of product per establishment to \$303,940. In the second group the number of establishments was 138, the total value of product \$91,552,655 and the average value of product per establishment, \$663,425. Of industries whose products were \$1,000,000 and over per establishment, the number was shown to be 81, with a total value of product amounting to \$177,273,934 and an average value of product per establishment of \$1,821,242.

Compared with the census returns of 1900, a large increase is shown in each group, amounting in the case of the second group to about 100 per cent and in the third group to considerably over that rate. In 1905, there were 62 works producing \$750,000 and over, as against 24 in 1900. In the third class there were 17 works producing \$2,500,000 and over in 1905 as against 6 in 1900. There were four works in 1905, producing \$5,000,000 and over, whereas not one factory had reached that amount in 1900. The greatest volume of production by a single factory in 1905 was over \$8,000,000; in 1900, the largest output was under \$4,500,000.

#### NUMBER OF EMPLOYEES AND AGGREGATE WAGES PAID IN THE MANUFACTURING INDUSTRY, CANADA, 1900-1905.

A RETURN was issued by the Census and Statistics Branch of the Department of Agriculture, Canada, during July, showing the number of wage earners and the amount paid in salaries and wages in the various branches of the manufacturing industry throughout Canada in the year 1905, as compared with 1900. The return throws an interesting light on the nature and extent of the development which has taken place in this industry during the first five years of the present century, and on the increase in the numbers and scale of remuneration of the industrial population during the same period.

There were 344,033 wage earners, according to the return, employed in manufacturing establishments in Canada in 1900, receiving an aggregate of \$113,249,350 in salaries and wages. In 1905 the number of wage earners was 391,487, and the amount paid out in salaries and wages \$164,394,490.

#### Increases in Wages and Number of Employees.

In the five years, therefore, the number of employees increased by 47,452, or 12 per cent, and the amount of wages by \$51,145,140, or 45 per cent. Average

wages per employee increased by \$90.74, or 27 per cent. The value of product per employee in the year 1900 was \$1,398; in 1905 it was \$1,832, being an increase of \$434, or 31 per cent. Compared with 1890, the average wage per employee was greater in 1905 by \$128.66, and the average value of product greater by \$477.

## Detailed Returns.

The following table includes the return, given for the several branches of the manufacturing industry in which the amount paid out in wages in 1905 exceeded \$1,000,000, with comparative statistics relating to the number of wage earners and aggregate wages paid in 1900.

TABLE SHOWING NUMBER OF WAGE EARNERS AND AGGREGATE WAGES, 1900-1905 IN BRANCHES OF THE MANUFACTURING INDUSTRY, CANADA, IN WHICH AGGREGATE WAGES IN 1905 EXCEEDED \$1,000,000.

Name of Kind of Industry.	Number of wage earners 1900.	Aggregate wages 1900.	Number of wage earners 1905.	Aggregate wages 1905.
Agricultural implements.....	6,834	\$3,057,930	7,478	\$3,778,804
Axes and tools.....	1,053	448,275	2,128	1,078,229

Woolen goods.....	6,795	2,066,320	4,642	1,508,143
All other industries.....	4,120	1,436,659	3,557	1,482,294

In the above table, returns relating to number of employees and wages are given only where there are three or more works of each kind of industry. Where there are less than three, the

figures are grouped under the head of "all other industries." The number of employees includes officers, clerks, workers, etc., who are paid salaries or wages for service.

RECENT INDUSTRIAL AGREEMENTS.

Agreement at Victoria, B. C., Between Hotel and Restaurant Employees and Proprietors.

**D**URING the month of May, 1907, the following agreement went into force at Victoria, B. C., between the local union of the Hotel and Restaurant Employees' International Alliance, and the local proprietors:

1. Waiters working in restaurants shall receive not less than \$10.50 per week, ten hours to constitute a day's work, and six days to the week.
2. Waiters working in hotels and clubs shall receive not less than \$35 per month, six days constituting a week's work.
3. Night waiters shall receive not less than \$12 per week, eleven hours to constitute a night's work, and six nights a week's work.
4. Waitresses working in restaurants shall receive not less than \$8 per week, ten hours to constitute a day's work, and six days a week's work.
5. Waitresses working in hotels shall receive not less than \$30 a month, six days to constitute a week's work.
6. Overtime, 50 cents an hour, or fraction thereof.
7. Banquets, working not later than 12 p. m., \$3.; after 12 p. m., \$5. After work preparing for banquets, 50 cents per hour.
8. Extra shifts of ten hours, \$1 per day extra to regular wages.
9. Outside work, *viz.*: fairs, parks, etc., \$2 for five hours or less; \$3.50 for ten hours within city.
10. Outside the city, picnics, etc., \$3.50 and transportation.
11. Any waiter or waitress working the seventh day shall be fined \$1.50 in event of there being available union help in the city.

Schedule of Rates for Trainmen on Central and Western Divisions of the C. P. R., System—Effective April 1, 1907.

RATES FOR MAIN LINE PASSENGER TRAINS. (Edmonton, Crow's Nest and Portal Sections Included as Main Line.)

For monthly mileage of five thousand six hundred miles or less. Conductors will be paid \$150 per month. Baggage-men will be paid \$88.70 per month. Brakemen will be paid \$80.70 per month. All mileage made in excess of five thousand six hundred miles per month will be paid pro rata.

FOR BRANCH LINE PASSENGER TRAINS.

For monthly mileage of five thousand miles or less, Conductors will be paid \$135.00 per month. Baggage-men will be paid \$80.00 per month; brakemen will be paid \$72.75 per month. All mileage made in excess of five thousand miles per month will be paid pro rata.

It is agreed that the Company will not make reduction in crews or increases in mileage for the purpose of offsetting the increase of wages given trainmen on runs as established November 1st, 1906.

Crews assigned to runs, a portion of which are passenger and the balance mixed or freight, or both, will be paid mileage rate for each class of train, but not less than the minimum passenger train rates.

RATES FOR MIXED, THROUGH FREIGHT, WAY-FREIGHT, WORK (Construction), HELPER (Pusher) SERVICE.

(East of Crows' Nest and Laggan.)

	Con-ductors.	Brake-men.
Mixed trains per mile.....	\$3.79½	\$2.58½
Through freight trains per mile..	3.79½	2.58½
Way-freight trains per mile.....	4.18	2.86
Work (Const'n), helper (Pusher) per mile.....	3.79½	2.58½

(West of Crows' Nest).

	Con-ductors.	Brake-men.
Mixed trains per mile.....	\$3.90½	\$2.69½
Through freight trains per mile..	3.90½	2.69½
Way-freight trains per mile....	4.29	2.97
Work (Const'n), helper (Pusher), trains per mile.....	3.90½	2.69½

No overtime for lay-over at schedule terminals, rate for regular mixed trains on Branch Lines includes handling Way-Freight and for Passenger and Mixed Trains includes making up and setting away their assigned trains at schedule terminals where no yardmen are employed, providing their monthly mileage, including terminal switching as above, does not exceed equivalent to twenty-eight hundred miles per month.

Crews assigned to Mixed Trains will be paid for not less than 2,800 miles per month, as above; when regular monthly mileage is less the Company will have the right to use such crews in road service up to 2,800 miles, but will not, in doing so, run them round other crews except in cases of Branch Line Mixed Crews on their own section.

Mixed Trains handling Way Freight at three or more stations will be paid Way Freight Rates.

RATES FOR YARDMEN.

Rates.	Day.	Night.
Yard foreman, per hour.....	\$.35	\$.37
Yardmen, per hour.....	.32	.34

Agreement between Toronto Railway Company and Employees.\*

This agreement made this, the 13th day of July, 1907, between the Toronto Railway Company and the committee representing the employees of the said company; whereas the parties above have met and adjusted all differences, and have recommended that the following agreement be executed. It is further agreed as follows:—

\* A special article dealing with the agreement previously in force between these parties was published in the *Labour Gazette* for July, 1904, page 71.

(1) That all matters in dispute between the company and the employees are hereby settled.

(2) For the term of three years, from the 16th day of June, 1907, the following wage schedule shall be in force; Motormen and conductors, for the first year 20 cents per hour; for the second year, 22 cents per hour; for the third year and thereafter, 23 1-2 cents per hour. Shed men (foremen), 23 1-2 cents per hour; assistant shed men, 21 cents per hour; carmakers, 20 cents per hour; motor and truck repair men, for the first year, 20 cents per hour; for the second year, 22 cents per hour; for the third year and thereafter, 23 1-2 cents per hour.

(3) The company will pay half the cost of uniforms of the motormen and conductors who have been in the company's service for a period of one year, and will provide free uniforms for motormen and conductors who have been in the company's service for a period longer than two years.

(4) The following regulations, are agreed upon as to discipline: Any employee against whom charges may be brought will be required to report when off duty to the Superintendent. His case will then be considered by the proper official of the company, and will be dealt with upon the following principle: For minor offences, he is to be warned, and after a second warning for the same offence may be suspended. For serious cases, including drunkenness, drinking in uniform or drinking on cars, destruction of property, accidents through carelessness or neglect, missing fares through neglect, or carrying friends free, using stools on portions of the route not allowed by the company, incivility to passengers and profanity upon cars, he may be suspended or dismissed at the discretion of the proper officials.

(5) Any employee against whom any charge may be brought shall have the right of appeal in person to the General Manager, and except as to a charge of dishonesty may bring with him in his interest a committee of employees.

Attendance in such capacity shall not operate to any employee's disadvantage. Any employee attending on such committee shall give due notice to his car starter or foreman, and if he be a motorman or conductor shall take his car upon reporting to his car starter and shall not be required to report in the usual course to the head roadmaster.

(6) The company will provide seats for motormen upon the cars, motormen to have the right to use such seats upon certain portions of the line.

(7) Having due regard to all the conditions of the service, the manager undertakes that the schedule shall be so arranged that the hours worked on the cars will be put in within the least number of hours practicable and consistent with the service performed by the company.

(8) It is agreed that regular and relief men as heretofore shall be paid for Sunday runs on the time schedule to them on the board for their week-day runs.

(9) The company will on application to the car starter or foreman give leave of absence to employees for a reasonable period of time when their services can be spared, and in the event of refusal of the car starter or foreman the matter to be settled by the superintendent.

(10) The company will not discriminate against employees by reason of their being members of any organization.

(11) On the lines where no office of the company is passed or adjacent an official of the company will collect and exchange fare boxes at points appointed for the purpose.

(12) It is understood that only the men in the shops required for the necessities of the service shall be compelled to work on Saturday afternoons, excepting when in the opinion of the management the services of all the men or any of them are required on Saturday afternoon to meet the necessities of the business.

(13) Tools necessary for work in the motor shops will be supplied to employees. The men shall not take away tools from the shops and shall be responsible for breakages

or loss occasioned by negligence. Men must return said tools in good condition. In default of doing so they must pay for the same.

(14) The men in the motor shops and its branches shall be given five minutes in which to wash before leaving work, and any employee abusing his privilege shall be subject to suspension or dismissal.

(15) The foregoing provisions shall be in force for a period of three years from 16th June, 1907.

(16) The following provisions of the agreement of May 22, 1903, are hereby reaffirmed and shall continue in force:—To prevent loss to the company and its employees and to preserve the interests and convenience of the public the company and the employees agree not to resort to lockouts or strikes, but in the event of the parties being unable to satisfactorily adjust any differences or grievances which may arise from time to time and which if not adjusted might cause a lockout or strike, a conciliation committee shall be appointed from time to time as such differences or grievances arise, to consist of three officers of the company named by the company and three of the employees to be named by the employees and such committee shall investigate and consider such differences, and make their report thereon. If such committee shall be unable to agree the differences or grievances shall be submitted to a board of arbitration consisting of one disinterested citizen of the Province of Ontario to be appointed by the company and one disinterested citizen of the Province of Ontario to be appointed by the employees, and a third arbitrator to be appointed by these two, who shall also be a disinterested citizen of the Province of Ontario; and such board shall investigate and determine all such differences or grievances and make their award, and the award of the said board of arbitration so constituted or majority thereof, shall be final and binding as to such differences or grievances for the period fixed by such award.

### Agreement between Master Builders and Bricklayers and Masons' Union at London, Ont.

It is mutually agreed by Mason Builders of London, Ont., and Bricklayers' and Masons' Union No. 5 of London, Ont., affiliated with the Bricklayers' and Masons' International Union of America, as follows:—

SECTION 1. That the wages of Bricklayers' and Masons' from date of this agreement, June 1st, 1907, shall be 43 cents per hour until May 1st, 1908; from May 1st, 1908 until May 1st, 1909 shall be 45 cents per hour; from May 1st, 1909 until May 1st, 1910 shall be 45 cents per hour.

SEC. 2. Eight hours to constitute a day's work, five days in a week, and four hours on Saturday.

SEC. 3. Except in extreme emergency no work shall be done between the hours of 5 p. m., and 8 a. m. Emergency work shall be paid at the rate of time and one-half. The shop steward and the employer shall determine what constitutes emergency work.

SEC. 4. On pay day all wages shall be paid before 12 o'clock noon, Saturday pay time to close night before pay day. All waiting time shall be paid at the rate of double time.

SEC. 5. Any member of the Journeymen's Union taking out a withdrawal card for the purpose of contracting, shall be entitled to membership only by paying an initiation fee of \$16.00.

SEC. 6. The Mason Builders shall, in the employment of workmen, give preference to the members of the B. & M. I. U., the Union to be composed of strictly journeymen.

SEC. 7. The classification of work as provided in the Constitution of the Bricklayers' and Masons International Union is hereby conceded as coming under the jurisdiction of Union No. 5.

SEC. 8. That members of the Union shall bind themselves at all times to pay strict attention to contemplated builders, and use every means and influence to have them employ none but Union builders.

SEC. 9. Any dispute arising between employer and employee, parties to this agreement, no strike or stoppage of work shall be permitted. Disputes that cannot be settled by the shop steward at once shall be referred to a joint arbitration committee whose decision shall be final, said decision to be rendered within 48 hours after all evidence has been presented, bearing upon the question in dispute.

SEC. 10. Where there is any dispute between a contractor and the proprietor no member of the Union when officially notified, shall continue to work on the job in dispute until otherwise instructed by order of the Joint Arbitration Committee.

SEC. 11. The Mason Builders shall be furnished with sufficient copies of the Union Constitution and By-Laws, so that each one may be in possession of one, the same to be at all times binding. The Contractor and members of No. 5 shall be furnished with a copy of the agreement, and the rules.

SEC. 12. All work done between 12 o'clock noon on Saturday and 12 o'clock midnight shall be paid time and a half; from then to 8 a. m. Monday morning also Labor Day and Christmas shall be charged double time.

SEC. 13. All repair work done by owners by the day shall be charged 10 cents per hour extra. This shall not apply to mills, factories, city or government work.

SEC. 14. Cutting of openings, etc., in brick or stone walls where a hammer or chisel are used shall be done by members of the Union.

SEC. 15. This agreement shall stand in full force and effect until May 1st, 1910; any changes desired by either party, notice thereof in writing shall be given three months previous to the date of its expiration.

### Agreement between the Master Plumbers and the Operative Plumbers, Steam-fitters, Gas Fitters and Steamfitter-Helpers of Calgary.

The following agreement was arrived at as a result of a reference to the Board of Arbitration of certain matters in dispute between the parties.\*

CLAUSE 1. The hours of labour shall be from 8 a. m. to 5 p. m. with one hour for dinner, during the months of January, February, March, April 1908, and November and December 1907, and nine hours a day, with one hour for dinner, except Saturday, which will be five, during the other months of this Agreement.

CLAUSE 2. The minimum rate of wage to all Journeymen shall be 51½ cents per hour. Steam-fitters' helpers to receive not less than 30 cents per hour R. A. B.

CLAUSE 3. All overtime to be paid at the following rates: From limit of time as agreed in clause 1, shall be time and one-half. Sundays and legal holidays, which shall be New Year, Good Friday, Victoria, Dominion, Labour, Thanksgiving and Christmas Days, double time.

CLAUSE 4. That employers sending men out of the city to work, pay all railroad and travelling fare, also any extra expenses that would be incurred in the way of board and lodging.

CLAUSE 5. Time travelling shall be paid at the same rate as regular days labour, and when travelling at night, day labor wages will be paid for number of hours up to 8 or 9, as per Clause 1.

CLAUSE 6. No apprentice to be allowed to use the tools until he has served three years and passed an examination satisfactorily to both parties to this agreement. That five years be deemed the term of apprenticeship, one apprentice to be allowed for the first three

Journeymen Plumbers, and one to each two additional Journeymen Plumbers.

CLAUSE 7. Steam-fitters' helpers to serve a period of four years, and must pass an examination before they are allowed to use the tools, and only one Steam Fitters' Helper to be employed to each Journeyman Steam Fitter and every employer, except in the case of heavy lifting, such as boiler and radiators, when required.

CLAUSE 8. Wages to be paid weekly.

CLAUSE 9. In case any grievance should arise as committee from the Union waiting on a committee of the employers to settle such grievance and failing an agreement said grievance to be submitted to the Board of Arbitration for settlement.

CLAUSE 10. That this Agreement comes into effect on the First day of July, 1907, and remain in force and binding until the First day of July 1908, and shall continue to be in force for terms of the same duration until notice has been given in December prior to the expiration of any such years Agreement.

### Agreement in the Allied Printing Trades, Toronto, Ont.

The following is a copy of the main features of an agreement which went into effect on July 1, 1907, between the employers and the allied printing trades of Toronto, Ont.:—

This agreement made this 22nd day of May, 1907, between the Master Printers and Bookbinders' Association of Toronto, of the first part, and the allied printing trades of Toronto, including therein, Toronto Typographical Union, No. 91; Bookbinders' Local Union, No. 28; Pressmen's Union, No. 10; Stereotypers' and Electrotypers' Union, No. 21; Feeders' and Assistants' Union, No. 1; Mailers' Union, No. 5, and Bindery Women's Union, No. 34, of the second part.

The offices now comprising the Master Printers' and Bookbinders' Association of Toronto, and any offices that may join that association during the currency of this agreement, and all offices, whether the association remain in existence during such term or not, which conform to the scale of wages and hours herein defined, are hereby guaranteed industrial peace in connection with the matters covered by this agreement by any of the unions included as above amongst the parties of the second part, so long as the conditions of this agreement are adhered to.

This agreement shall be and extend over the period of five years, commencing the first day of June, 1907.

The length of service for apprentices shall be five years, except feeders and bindery women, which shall be three years.

An apprentice's time may in any particular case be extended by arrangement with the union affected. It is agreed that during the term of his apprenticeship, it shall be the duty of the employer and employees to see to it that he shall have an opportunity to become proficient, any complaint shall be arranged under clause 11 of the agreement.

### MEN AND WOMEN.

The distinction between male and female labour shall be governed by the same conditions as heretofore.

The standard hours of work each week shall be 48 for compositors (hand and machine), bookbinders, bindery women, pressmen, feeders, stereotypers and electrotypers and mailers, and such work shall be completed between the hours of 7.45 a. m. and 5.30 p. m. each week day except Saturday, when work shall cease at 12 o'clock noon, it being understood that the employer is entitled to the full 48 hours' work per week.

\*For statement re nature of dispute see report of Calgary, Alta, correspondent, and article dealing with trade disputes of the month in present issue.

Work done on the following holidays shall be paid for at double rate; New Year's Day, Good Friday, Victoria Day, Dominion Day, Civic Holiday, Labor Day, Thanksgiving Day, and Christmas Day.

In case any difference should arise at any time during the currency of this agreement as to the true intent and meaning of any matter or thing covered or intended to be covered by it, or in case of discord or lack of harmony among employees, and which cannot be settled between the employer and a committee of two from the organization affected, the dispute shall be referred to an arbitration committee composed of three employers and three employees, only one of each which shall belong to the trade affected, and the decision of this committee shall be final and binding on both parties.

#### COMPOSITORS.

##### SCALE OF WAGES.

Compositors and all journeymen printers, not otherwise specially specified shall receive not less than from June 1, 1907, to January 1, 1909, \$15; from January 1, 1909, to June 1, 1911, \$16; from June 1, 1911, to June 1, 1912, \$17.

Proofreaders shall receive the same remuneration. (Copyholders shall be allowed to revise proofs that have been read by the proofreader.)

Piece composition (agate to small pica, 5½ point to 11 point), from June, 1907, to January, 1909, 40 cents per thousand ems; from January, 1909, to June, 1911, 43 cents per thousand ems; from June, 1911, to June, 1912, 46 cents per thousand ems.

Overtime shall be during the first four hours after quitting time, but no one shall work more than three hours at time and one-third rate on any particular day. After these hours double time.

All odd hours of temporary employees less than a day's work shall be paid at the rate of 45 cents per hour.

#### DOUBLE FOR HARD WORDS.

All work such as algebraical, euclid, medical, astronomical, arithmetical, dictionaries, spelling books and other than plain English, to be double price.

When compositors on piece are ordered to remain in the office unemployed, they shall be paid at the regular time or overtime rates, as the case may be.

All work by piece hands required after regular working hours to be paid for at rate of one-third extra over piece-work scale.

Any works printed with figures, accents or vowels, superior letters or figures, references (as in classical works or the Bible), and where capitals, small capitals, italics, display type or figures run in with the body of the matter are profusely used, shall be set on time.

Apprentices to compositors.—Two to the first five journeymen, and one to each subsequent four or major fraction thereof.

#### MACHINE SCALE.

For day work, book and job office operators, machines and casters, shall receive at rate of \$17.20 for each week's work from June 1st, 1907, to January 1st, 1909; from January 1st, 1909, to June 1st, 1911, \$18.35; from June 1st, 1911, to June 1st, 1912, \$19.50.

For all night staffs the rate shall be 15 per cent over day rates, and the night shift shall consist of 48 hours per week. If day men are required for less than a continuous week, they shall be paid at overtime rate of time and one-half.

Where three shifts are employed two of them shall be considered night work.

Overtime shall be during the first four hours after quitting time, but no one shall work more than three hours at the time and one-half rate on any particular day; after these hours, double time.

Any more liberal rules adopted by the I. T. U. during the life of this agreement with respect to apprentices on

composing machines shall become operative under this agreement.

A journeyman may, by mutual arrangement with his employer, go on the composing machine for six months at two-thirds the machine scale; the said six months need not be continuous, but must be completed during one year.

#### PRESSMEN.

The current rate of wages for a standard week's work shall be \$16.50 from June 1, 1907, to January 1, 1909; January 1, 1909, to June 1, 1911, \$17.50; June 1, 1911, to June 1, 1912, \$18.50.

Cylinder press feeders shall receive at the rate of \$10.50 per week from June 1, 1907, to January 1, 1909; January 1, 1909, to June 1, 1911, \$11.20; June 1, 1911, to January 1, 1912, \$12.25.

Overtime for pressmen and feeders shall be during the first four hours after quitting time on any particular day, but it shall be optional for the employer to take off time for a meal up to one hour.

The scale of wages for overtime to pressmen and feeders shall be paid for at the rate of time and one-third, after these hours double time.

All night staffs shall be paid for at the rate of 15 per cent. advance over the day rate, hours to be the same as in day work. A man changed from day to night staff to have a clear day off.

Apprentices to the pressmen, one to each four or fraction thereof, apprentices to the feeders, one to first five, and one to each six additional or fraction thereof.

#### THREE YEARS APPRENTICESHIP.

The Pressmen and Feeders' Union agree that no application for membership in their organization shall be considered unless three years' apprenticeship has been served at the business, and proved by the applicant.

It is agreed that in all future negotiations that the rate for feeders shall be established at two-thirds the rate paid to pressmen.

It is agreed that the operation of two Harris presses shall be the work of a journeyman pressman. A journeyman pressman may operate one Platen press in conjunction with one Harris automatic.

#### BOOKBINDERS.

The current rate of wages for a standard week's work shall be \$15.00 from June 1, 1907, to January 1, 1909; January 1, 1909, to June 1, 1911, \$16.00; June 1, 1911, to June 1, 1912, \$17.00.

Overtime for bookbinders and bindery women shall be during the first four hours after quitting time, but no one shall work more than three hours at the time-and-one-third rate on any particular day. After these hours, double time.

Apprentices to the bookbinders.—One to first three, two to first five, three to first nine, one to each additional four.

All night staffs shall be paid 15 per cent. over the day scale, and shall be for at least one week at a time, one clear day off to be taken between changing from day to night shift.

#### BINDERY WOMEN.

Bindery women shall be paid at the rate of \$5.50 per week, June 1, 1907, to June 1, 1909; January 1, 1909, to June 1, 1911, \$6; June 1, 1911, to June 1, 1912, \$6.50.

The above prices shall be paid from June 1st, 1907, to January 1st, 1909.

January 1st, 1909, to June 1st, 1911, increased in the ratio of 15 to 16.

June 1st, 1911, to June 1st, 1912, increased in the ratio of 16 to 17.

Apprentices to Stereotypers and Electrotypers—One to each branch of the business (*i. e.* one to the founder, one to the finisher). The helpers' duties shall be con-

fined to casting wax, sawing up casts, putting on the battery, cleaning plates, running roughing machines and Daniel's planer. There shall be no limit to the number of these helpers so long as their work is confined to these branches. When two or more men are continuously employed in any boiler-plate department one apprentice shall be allowed.

Forty-two hours shall constitute a week's work at night for stereotypers employed on boiler-plate work.

Overtime for electrotypers and stereotypers shall be paid for at the rate of time and one-half up to five hours after quitting time, but it shall be optional for the employee to take off time for a meal up to one hour; after these hours double time.

### MAILERS.

(BOOK AND JOB.)

The current rate of wages for a standard week's work shall be \$15 from June 1, 1907, to June 1, 1909; January 1, 1909, to June, 1911, \$16; June 1, 1911, to June, 1912, \$17.00.

Overtime for the mailers shall be paid for at the rate of time and one-half up to five hours after quitting time, but it shall be optional for the employee to take off time for a meal up to one hour; after these hours double time.

Apprentices to Mailers—One apprentice where one or more mailers are continuously employed.

The wages of stereotypers and electro-platers from June 1, 1907 to January, 1909, are \$20 per week for foremen; \$18 for finishers and moulders; \$15 for other moulders, and \$15 for stereotypers. From January, 1909 to June 1911, foremen will receive \$21.35; finishers and moulders \$19.20; moulders and stereotypers, \$16. From June, 1911 to June, 1912, the scale will be \$22.00 for foreman; \$20.40 for finishers and moulders; for other moulders and stereotypers \$17.00.

The agreement is signed on behalf of the Master Printers and Bookbinders' Association, by S. R. Hart, Atwell Fleming, A. F. Rutter, F. Diver, Richard Southam, and Douglas S. Murray.

The representatives of the several labour organizations signed in this order:—J. W. Hayes, First Vice-President of the International Typographical Union; Wm. Glockling, of the International Bookbinders' Union; Edward Randall of the International Printing Pressmen's Association, and W. S. McDougall, of the International Stereotypers' and Electroplaters' Union.

The following is the newspaper scale of prices which went into effect on the same date as the above:—

### MORNING NEWSPAPERS.

SECTION 1. Operators, "ad" men, make-ups, bankmen, heading men and head proofreader (no present head proofreader to be disturbed), shall receive not less than three dollars and fifty cents (\$3.50) per night or twenty-one (\$21.00) per week; seven and one half hours ( $7\frac{1}{2}$ ) to constitute a night's work; overtime, sixty cents (60c.) per hour. After an operator sets the following number of ems of type he shall receive the following bonuses on all further product:

*Brevier* (or larger types to be measured *Brevier*), 35,800 ems per night, or 215,000 ems per week, bonus price, nine and one half cents ( $9\frac{1}{2}$ c.) per thousand ems.

*Minion*, 39,000 ems per night, or 234,000 ems per week, bonus price, eight and one-half cents ( $8\frac{1}{2}$ c.) per thousand ems.

*Nonpareil*, 41,000 ems per night or 246,000 ems per week, bonus rate, eight cents (8c.) per thousand ems.

*Agate* (or smaller type to be measured *agate*), 45,000 ems per night, or 274,000 ems per week bonus rate, seven and one-quarter cents ( $7\frac{1}{4}$ c.) per thousand ems.

*Tabulated Matter* of more than one justification, double price.

SEC. 2. "Extras" put on to work after the regular starting time, and working 5 continuous hours, shall receive a full night's pay; if working less than 5 hours, they shall receive overtime rates. The regular quitting time of "Extras" shall be with the regular staff.

### EVENING NEWSPAPERS.

SEC. 3. Operators, "ad" men, make-ups, bankmen, heading men and head proofreader (no present head proofreader to be disturbed), shall receive not less than three dollars and seventeen cents (\$3.17) per day of eight hours, or nineteen dollars (\$19.00) per week; overtime, fifty cents (50c.) per hour. After an operator sets the following number of ems of type he shall receive the following bonuses on all further product:

*Brevier* (or larger types to be measured *brevier*), 39,500 ems per day, or 237,000 ems per week, bonus rate to be eight cents (8c.) per thousand ems.

*Minion*, 41,000 ems per day, or 247,000 ems per week, bonus rate to be seven and one-half cents ( $7\frac{1}{2}$ c.) per thousand ems.

*Nonpareil*, 45,800 ems per day, or 275,000 ems per week, the bonus rate to be seven cents (7c.) per thousand ems.

*Agate* (or smaller type to be measured *agate*), 51,100 ems per day, or 307,000 ems per week, the bonus rate to be six and one-quarter cents ( $6\frac{1}{4}$ c.) per thousand ems.

*Tabulated Matter* of more than one justification, to be double price.

SEC. 4. "Extras" put on to work after the regular starting time, and working 5 hours, shall receive a full day's pay; if working less than 5 hours, they shall receive overtime rates. The regular quitting time of "Extras" shall be with the regular staff.

### PLATE MATTER AND MATRICES.

SEC. 5. The interchanging, exchanging, borrowing, lending or buying of news matter or advertisements, either in the form of type, blocks, or matrices, between newspapers, parties to this agreement, and not owned by the same individual, firm or corporation, and published in the same establishment, shall not be allowed; provided that the reproduction within three months of such type, blocks, or matrices shall be deemed a compliance with this section. But no compositor who has been employed in the office for six successive days shall be laid off until all accumulated matrices, type, or blocks have been set. This section shall not be construed as prohibiting the loaning, borrowing, exchanging, purchasing or sale of matter or matrices or blocks on occasions of extraordinary emergency, such as fire, explosion, cyclone, or other unforeseen disaster, including the "pi" of a form or forms at a late hour, when it will be permitted without a penalty; and provided further, that this section shall not be construed as prohibiting the acceptance and use by newspapers of plates, blocks, and matrices of advertisements of establishments located outside of Toronto or of Toronto advertisers not properly considered purely local advertisers.

### APPRENTICES.

SEC. 6. Each office shall be entitled to have one apprentice for each five journeymen (receiving the scale or over) or fraction of five regularly employed—*i. e.*, entitled to six days' work, and in offices where over twenty-five men are employed one additional apprentice for each ten men employed. An apprentice who completes his time before his 20th birthday shall rank as an improver and shall not receive the scale until he reaches that age.

SEC. 7. It shall be the duty of the foreman and members to teach apprentices every part of the printing business, and the duty of the chairman to see that this is done;

and an apprentice may appeal to the Executive Committee if he deems an injustice is done him.

SEC. 9. Regularly employed apprentices in machine offices shall be privileged to practice on machines during all of the last three months of their apprenticeship at such times as the foreman approves.

#### GENERAL.

SEC. 10. Foremen must be active members of this Union, but existing conditions not to be interfered with.

SEC. 11. The foreman shall have full control of operators, machinists and other employees.

SEC. 12. Only journeymen members of this Union in good standing shall be employed in the composing room, in consideration of which the Union agrees to furnish on demand competent men to fill all office requirements.

SEC. 13. Six successive days' work shall constitute a situation; no situation of less number of days shall be allowed. [The selection by foremen of their forces from day to day, or not having any regular situation in an office, is prohibited. Foremen must give out such minimum number of situations as are needed to meet office requirements. Employment other than a regular situation shall be classed as extra work.—*I. T. U. Law.*]

SEC. 14. The foreman shall have the right to phalanx the staff in regular order. This clause to remain in-operative until the provisions of Section 5, with reference to setting matrices, have been complied with.

SEC. 15. No member of this Union shall act as operator-machinist in an office where more than three machines are run.

SEC. 16. An operator capable of setting 5,000 ems nonpariel, 4,500 ems minion, 3,500 ems brevier per hour per day shall be eligible to "sub."

SEC. 17. No person shall be eligible as a learner on machines (during working hours) who is not a journeyman printer and a member of Typographical Union, No. 91. The terms for learners on the machines shall be three months and the compensation not less than three-quarters of the regular scale.

SEC. 18. Compositors employed in office shall be privileged to practice on machines outside regular working hours, at such time as the foreman approves, for not more than two hours per day. The product of such machines shall belong to the office.

SEC. 19. An employee who desires to lay off shall not be compelled to work when a competent substitute can be had. Men may put on their own substitutes from the floor of the office, but shall give the foreman fair notice of such intention, except in case of sickness or emergency.

SEC. 20. Night work shall be between 6 p. m. and 6 a. m., and Day Work shall be between 7 a. m. and 6 p. m.; when men are required to work after 6 p. m. at least 30 minutes shall be allowed for lunch. Where an office works three shifts, two of them shall be considered night work.

#### MACHINE TENDERS' SCALE.

(1) The Wage Scale for Machine Tenders shall be as follows:—

For day Work (per week), 6 machines or over, \$21.00.  
For Night Work (per week), 6 machines or over, \$23.00.

Present machine tenders receiving more than the scale not to be reduced.

(2) Machine Tenders shall be required to work on but six (6) days—or nights—of the week.

(3) Machine Tenders employed in any office as regulars shall, under no consideration, be permitted to attend to machines in another establishment.

(4) Machine Tenders shall have jurisdiction over their assistants only.

This scale shall remain in operation for five years from July 1st, 1907.

#### OPPORTUNITIES OF EMPLOYMENT.

In order that skilled workmen and labourers may be made aware of opportunities of employment and the demand for labour in different parts of the Dominion, the *Labour Gazette* publishes herewith a statement of such opportunities of employment as have been furnished to the Department of Labour by employers, contractors and others. While exercising care and discrimination in the statements which it publishes, it is to be understood that the parties who have supplied the information are alone responsible for the accuracy of it, and that beyond publishing the same for the mutual benefit of employers and employees the Department assumes no responsibility in connection with the publication. The Department will be pleased to receive for publication from persons desirous of obtaining skilled or unskilled labour in connection with any industries or trades of the country, a statement of the nature and extent of their demand. Similarly, the Department will be pleased to receive and publish on behalf of persons out of employment, statements, from labour unions or bodies of skilled or unskilled workmen of the nature and extent of the supply of labour available.

Parties desirous of profiting by the information contained in this article are requested to communicate direct with the persons concerned for further particulars, exact terms, etc., the purpose of the Department in publishing the information being solely that of making better known the demand and supply of labour.

*Manufacturing.*—The Charles Fawcett Manufacturing Company, Limited, Sackville, N. B., recently advised the Department that there was a scarcity in the supply of labour in the neighbourhood of Sackville, which had existed for some months, and that the Company was desirous of engaging skilled stove fitters or mounters, and could give employment to several first-class men. It was also stated that there was a large demand for unskilled labour in the vicinity, there being several manufacturing plants in urgent need of labour.

IMMIGRATION AND COLONIZATION.

IT was estimated that the number of immigrants arriving in Canada up to the middle of July was already in excess of that during the calendar year, 1906, and that the total for the present year would be in the neighbourhood of 300,000. The increase was made up wholly in the number of arrivals through ocean ports, arrivals from the United States having shown a falling off amounting to 16 per cent. as compared with 1906

Recent Immigration Returns.

Immigration through ocean ports during April and May, 1907, declared for Canada, was as follows:

IMMIGRATION BY OCEAN PORTS DURING APRIL AND MAY, 1907.

	Male	Female	Children under 12.	Total
<i>During April:</i>				
Immigrants ..	24,952	5,072	4,414	34,438

British Immigration Returns.

During the month ended May 31, 1907, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING  
MAY 1907-1906.

Nationalities.	1907	1906
English.....	16,230	16,454
Scotch.....	6,296	2,892
Irish.....	1,316	806
Total of British origin.....	23,842	20,152
Foreign.....	3,523	3,678
Total.....	27,365	23,830

During the five months of the calendar year ended May 31, 1907, the total number of passengers leaving the United Kingdom for British North America was as follows:—

EMIGRATION FROM GREAT BRITAIN FROM  
JANUARY 1 TO MAY 31, 1907-1906.

Nationalities.	1907	1906
English.....	51,122	43,097
Scotch.....	17,702	9,898
Irish.....	3,309	2,015
Total of British origin.....	72,133	55,010
Foreign.....	10,907	9,016

FAIR WAGES SCHEDULE.

Class of Labour.	Rate of Wages.
------------------	----------------

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend, and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys, so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Railways and Canals and proof, thereof, satisfactory to the Minister is furnished, the Minister may pay such claim out of any moneys, at any time, payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

August 1st, 1907.

Construction of Concrete Dam and Highway Bridge at Buckhorn, Ont., Date of contract, July 2, 1907. Amount of contract, schedule rates. Contractors, E. Conroy and D. Conroy.

Making and repairing miscellaneous articles of postal stores.....	15.50
Making up and supplying articles of official uniform.....	3,902.30

E. R. ASCHINEGS,  
Asst. Deputy Postmaster General.

## INDUSTRIAL ACCIDENTS DURING THE MONTH OF JULY, 1907.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

**I**NDUSTRIAL accidents occurring to 391 individual workpeople in Canada during the month of July, 1907, were reported to the Department of Labour. Of these, 124 were fatal and 267 resulted in serious injuries. In addition, six fatal accidents were reported as having taken place prior to the beginning of the month, informa-

tion not having been received by the Department before July, 1907. The number of fatal accidents reported in July, 1907, was 32 less than in the previous month and 24 more than in July, 1906.

Of 203 returns received during the month giving the ages of the victims of industrial accidents, 39 referred to persons under twenty-one years of age, 41 to persons between twenty-one and forty-five; 13 to persons over forty-five; 110 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING JULY, 1907,  
BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed	Injured	Total
Agriculture.....	18	26	44

Miscellaneous.....	14	19	33
Unskilled labour.....	1	15	16
<b>Total.....</b>	<b>124</b>	<b>267</b>	<b>391</b>

Nature of Fatalities and Accidents.

The chief disasters of the month were the killing of eight persons by the collapse of a building in London, Ont; the drowning of six members of the crew of the steamer Mount Royal on the Skeena river, B. C.; the crushing to death of three miners by a runaway car at North Sydney, N. S.; the killing of an engine crew by an explosion near Simcoe, Ont.; the drowning of three river drivers in the St. John River, N. B.; the drowning of three loggers near Reed station, Que.; the crushing to death of two men in a plaster quarry near Windsor, N. S.; the drowning of two river men in the Kootenay river, B. C., and the drowning of two bridge builders at Kaminstiquia, Ont.

Collapse of Stores at London, Ont.

At London, Ont., on the afternoon of July 16, 1907, a building known as Reid's Crystal Hall, occupied as a crockery store and as a clothing store, collapsed while undergoing alterations, burying twenty persons in the ruins. In its fall, a neighbouring building, occupied in the upper stories as a photographic gallery and on the ground floor as a fancy store, was carried down. Eight persons were killed and twelve seriously injured. Among the killed were two merchants,

the manager of the fancy store and two clerks. Among the injured were seven employees.

Explosion of Engine near Simcoe, Ont.

On the evening of July 25, 1907, a Wabash engine, No. 1894, exploded a mile and a quarter east of Simcoe, Ont., instantly killing an engineer and a brakeman, and fatally injuring a fireman, who died on July 27. An investigation was in progress during the closing days of the month into the cause of the accident.

Wreck of the Steamer "Mount Royal" on Skeena River.

On July 8, the stern wheel steamer "Mount Royal," operated by the Hudson Bay Company on the Skeena river, B. C., between Hazelton and Essington, struck the rocks off Ring Bolt Island in Kitselas Canyon and went to pieces. The passengers were saved, but six members of the crew lost their lives.

Fatality at No. 4 Colliery, North Sydney, N.S.

On July 8, while three miners were working in colliery No. 4 of the Nova Scotia Steel Company, Sydney Mines, N. S., they were crushed to death by a runaway box which swept down the steep incline from the mouth of the pit to the deep, 400 feet, giving the victims no chance of escape.

Drowning of Three River Drivers in the River St. John, N.B.

On July 4, six employees of a lumber company embarked in a sail boat on St. Croix Lake, St. John River. When some distance from the shore, a squall arose and capsized the boat. Three of the men became entangled in the sail and were drowned, the three others escaping.

Fatality near Reed Station, Que.

On July 5, three loggers, in trying to escape from a forest fire near Reed station, sixty miles from Quebec, Que., rushed into a lake and were drowned.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE SERIES F., No. 45.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF JULY, 1907.

Trade or Industry.	Locality.	Date.	No. Killed	Cause of Fatality.
<i>Agriculture—</i>				
Farmer	Brighton, Ont.	July	5	1 Struck by train at crossing.
"	Tweed, Ont.	"	14	1 Run over by mowing machine.
"	Eastman's Springs, Ont.	"	12	1 Fell from train.
"	Wingham, Ont.	"	15	1 Drowned, canoe upset.
"	Kincardine, Ont.	"	20	1 Fell from load of hay.
"	Oka, Que.	"	19	1 Caught in gear of wind mill.
"	Albion Tp., Ont.	"	19	1 Struck by arm of steam capstan.
"	North Augusta, Ont.	"	22	1 Blown from load of hay in storm.
"	Lockport, Ont.	"	26	1 Found dead on hay rake.
"	Wetaskiwin, Alta.	"	23	1 Drowned.
"	Oberan, Man.	"	20	1 Fell from vehicle.
"	Bedford, Que.	"	23	1 Fell on head from vehicle.
Farm hand	Marquette, Man.	"	1	1 Drowned.
"	Ingersoll, Ont.	"	21	1 Struck by train.
"	Britannia, Ont.	"	23	1 Struck by train.
Farmer's son	Salisbury, N. B.	"	3	1 Kicked by a horse.
"	Brampton, Ont.	"	20	1 Kicked by a colt.
<i>Lumbering—</i>				
Logger	St. John River, N. B.	"	8	2 Drowned, sailboat swamped.
"	Reid Station, Que.	"	5	3 Drowned, rushed into lake from forest fire.
"	Wardner, B. C.	"	2	2 Drowned, boat capsized.
"	Wellington Channel, B. C.	"	4	1 Drowned, while log rolling.
"	Gilbert Island, B. C.	"	13	1 Struck by falling tree.
"	Menzie's Bay, B. C.	"	15	1 Struck by falling tree.
Saw mill hand	Montreal, Que.	"	9	1 Fell on circular saw.
Pulp mill hand	Brockville, Ont.	"	25	1 Fell into pulp digester.
<i>Mining—</i>				
Miner	Glace Bay, N. S.	"	4	1 Struck by runaway coal box.
"	Sydney Mines, N. S.	"	6	3 Crushed to death by runaway box car.
"	Fernie, B. C.	"	23	1 By explosion of gas.
"	Cumberland, B. C.	"	21	1 Fell off the trip.
"	Windy Arm, Y. T.	"	11	1 Fell down precipice.
"	Phoenix, B. C.	"	8	1 Fell down chute.
Engineer at mine	Tweed, Ont.	"	23	1 Caught between fly wheel and shafting.
Prospectors	Marysville, B. C.	"	16	2 Drowned, canoe upset.
"	Abitibi River, Ont.	"	18	1 Drowned, canoe upset.
Quarryman	near Windsor, N. S.	"	8	2 By fall of earth and stone.
<i>Building Trades—</i>				
Carpenter	Nicolet, Que.	"	15	1 Fell from 3rd story of building.
"	Welland, Ont.	"	8	1 Sunstroke.
<i>Metal Trades—</i>				
Riveter	Toronto, Ont.	"	30	1 Fell 20 feet to concrete pier.
Rolling mill employee	Hamilton, Ont.	"	26	1 Bar of iron fell on head.
Bridge workers	Kaministiquia, Ont.	"	11	2 Drowned, scaffold fell into river.
Electrical worker	Toronto, Ont.	"	8	1 Fell from 30 foot pole.
"	Toronto, Ont.	"	10	1 Fell 7 stories in elevator shaft.
"	Niagara Falls, Ont.	"	2	1 Derrick fell on him.
"	St. Joseph des Cedres, Ont.	"	19	1 Contact with live wire.
<i>Woodworking Trades—</i>				
Woodworker	Winnipeg, Man.	"	5	1 Fell down elevator shaft.
<i>Textile Trades—</i>				
Woolen mill hand	Midland, Ont.	"	17	2 Explosion of gas.

## FATAL ACCIDENTS HAPPENING IN PREVIOUS MONTH BUT ONLY REPORTED TO THE DEPARTMENT IN JULY.

Farmer.....	Caron, Sask.....	June	21	1 Struck by lightning.
Brakeman.....	St. Polycarpe, Ont.....	"	30	1 Head caught between two cars.
Delivery driver.....	London, Ont.....	"	28	1 Kicked by a horse.
Asylum attendant.....	Montreal, Que.....	"	28	1 Severed an artery in struggle with patient.
Labourer.....	Niagara Falls, Ont.....	"	30	1 Derrick boom fell on him.

**Accident in Eagle Swamp Plaster Quarry near Windsor, N.S.**

On July 8, three employees in the Eagle Swamp plaster quarry, near Windsor, N.S., were boring a hole in a wall of plaster under an overhanging bank when the latter fell and buried them under twenty tons or more of rock. Two were instantly killed, the third escaping with a broken leg.

**Double Drowning in Kootenay River, B.C.**

On July 2, a river foreman and gang of six men, while working in the Kootenay river, about a mile above Wardner, B. C., were upset from their boat. Two were drowned.

**Drowning of two Bridge Workers at Kaministiquia, Ont.**

On the morning of July 11, two iron workers, while working on a bridge across the Dog River, twelve miles east of Kaministiquia, Ont., fell with the scaffold

on which they were working into the river below and were drowned.

**Record by Trades and Industries.**

*Agriculture.*—There were 18 fatal and 26 non-fatal accidents during July, 1907, compared with 15 killed and 23 injured during June, and 13 killed and 31 injured during July, 1906. Five farmers were killed by falls, 4 by drowning, 4 by machinery, 3 by trains and 2 by live stock. Of the serious accidents, 9 were caused by falls, 5 by falling material, 3 by tools, 3 by lightning, 2 by runaways, 2 by live stock, 1 by a train and 1 by machinery.

*Lumbering.*—Twelve workmen met death by accident and 12 were injured. The record for the previous month was 32 killed and 18 injured, and for July, 1906, 12 killed and 21 injured. Of the 12 fatalities, 8 were due to drowning, 2 to falling trees and 2 to machinery. Eight of the minor accidents were caused by machinery, 3 by falls and 1 by a piece of wood projected from a saw.

*Mining.*—Fourteen mine workers were killed and 19 injured during July, 1907, compared with 24 killed and 23 injured in June last, and 8 killed and 11 injured in July of last year. Four of the deaths were caused by a runaway box, 3 by falls, 3 by drowning, 1 by an explosion, 1 by machinery, and 2 by falling material. Of the other accidents, 9 were caused by falling material, 5 by coal boxes, 2 by explosions, 1 each by live stock, tools and a fall, respectively.

*Building.*—There were 2 deaths by accident and 31 workmen seriously injured during July, 1907. In the preceding month the record was 2 killed and 32 injured, and in July, 1906, 16 killed and 29 injured. One of the deaths was due to a fall from a building and 1 to sunstroke. Twenty-two of the accidents were due to falls, 4 to falling material, 2 to tools, 2 to gas fumes, and 1 to machinery.

*Metal, engineering and shipbuilding.*—In this group there occurred 8 fatal and 53 non-fatal accidents in July. In the previous month 16 workmen were killed and 70 injured, and in July, 1906, 5 killed and 51 injured. Three of the deaths were caused by falls, 2 by falling material, 2 by drowning and one by a electric shock. Of the minor accidents, 19 were caused by machinery, 17 by falling material, 10 by falls, 3 by explosions, 2 by molten metal, 1 by being run over by a train, and 1 by electric shock.

*Woodworking.*—A woodworker at Winnipeg, Man., fell down an elevator shaft and was killed, and 12 workmen were injured during July. In the preceding month 16 workmen were more or less injured, and in July, 1906, 12 workmen were injured. Of the 12 injuries, 10 were due to machinery, 1 to wood flying from a saw, and 1 to falling into a vat of hot water.

*Printing.*—There were 2 minor injuries in these trades, compared with 1 in the previous month and 1 in July, 1907.

*Clothing.*—There were 2 non-fatal accidents, the same number as in June last, compared with 4 in July of last year. A garment worker at Toronto, Ont., swallowed a pin, necessitating medical

attendance, and another had his hand mangled by machinery.

*Textile.*—Two workers were killed and 4 injured during July, 1907, the deaths being caused by an explosion of gas, as against two minor injuries in the preceding month, and 7 in July, 1906.

*Food and tobacco preparation.*—Four were killed and 9 injured during July. In June last there were only 4 minor accidents, and in July of last year 5 were injured. A cigar maker at Toronto, Ont., was killed in a collision between an express wagon and a street car; a sugar refinery hand at Wallaceburg, Ont., was killed by being caught between cars; a chocolate factory hand in Montreal Que., fell down an elevator shaft, and a beer wagon driver at Hull, Que., was electrocuted in a cellar while tapping beer. Of the 9 accidents, 4 were due to machinery, 2 to falls, and 1 each to an explosion, to falling material and to being caught between cars.

*Railway service.*—Twenty-six railway employees were accidentally killed and 25 injured as against 28 killed and 26 injured in the month previous, and 20 killed and 30 injured in July, 1906. Of the 26 fatalities, 13 were caused by trains, 4 by explosions, 3 by derailments, 2 by falls, 2 by being struck by engines, 1 by drowning and 1 by being caught between cars. Of the accidents, 10 were caused by being run over, 5 by derailments, 3 by falls, 3 by falling timber, 2 by being caught between cars, 2 by stepping on nails or sharp iron, and 1 by sunstroke.

*Navigation.*—Twelve fatalities and 10 non-fatal accidents occurred in July, 1907, as against 16 killed and 9 injured in June and 6 killed and 2 injured in July, 1906. Seven of the fatalities were due to drowning, 4 to falls and 1 to sunstroke. Five of the accidents were due to falls, 3 to explosions, 1 to machinery and 1 to falling material.

*General transport.*—Eight workers were killed and 21 injured during July, as against 7 killed and 20 injured in June and 7 killed and 16 injured in July, 1906. Three of the deaths were caused by run-aways, 3 by being run over by vehicles,

1 by a cave-in of earth and 1 by a fall. Nine of the accidents were caused by falls, 3 by falling material, 2 by run-aways, 2 by being run over, 2 by electric shock, 1 by tools, 1 by live stock and 1 by being caught between cars.

*Civic employees.*—Two deaths by accident and 7 accidents was the record in this group, compared with 1 killed and 4 injured in June last, and 1 lesser accident in July last year. A city labourer at Halifax, N. S., was killed by a cave-in of earth, and a city labourer at Montreal, Que., fell into a sewer and was drowned. Four of the accidents were caused by explosions, 2 by falls and 1 by being run over.

*Miscellaneous.*—There were 14 killed and 19 injured during July, as against 4 killed and 13 injured in June and 8 killed

and 15 injured in July, 1906. The collapse of a building at London, Ont., caused 5 deaths. explosions caused 3, drownings 3, accidental discharge of a gun, 1, a runover 1, and asphyxiation by gas 1. The collapse of the building aforesaid caused injuries to 7, explosions caused injuries to 4, falling material 3, falls 2, machinery 2, and being struck by a prisoner 1.

*Unskilled labour.*—One labourer was killed and 15 injured in July, compared with 6 killed and 12 injured in June, and 3 killed and 15 injured in July last year. A labourer at Windsor, Ont., was killed by being run over by a railway train. Nine of the accidents were caused by falling material, 2 by falls, 2 by being run over, 1 by a cave-in of earth, and 1 by an explosion.

**TRADE DISPUTES DURING THE MONTH OF JULY.**

**A**LTHOUGH there was a diminution in the number of trade disputes in Canada during July, compared with the previous month, the loss to the community was much greater, owing to the large number of persons involved in several of the disputes. The chief points of disturbance were at Winnipeg, Manitoba, where building operations were at a standstill during the first three weeks of the month, and at Cobalt, Ont., where mining operations were impeded by a general strike of miners. In Toronto, building operations were also hampered through the continuance of a strike of plumbers, which had commenced in May.

**Analysis of Trade Disputes During the Month.**

*Number and magnitude.*—The total number of trade disputes in Canada which were reported to have been in existence during July was 30, a decrease of 12 compared with the previous month, but an increase of 11 compared with July, 1906. About 283 establishments and 6,751 employees were affected by these disputes, about 98 firms and 4,748 workpeople being involved in the disputes which began in July.

*Loss of time in working days.*—In the case of a strike of miners at Cobalt, Ont., it was found impossible to obtain an accurate estimate of the number of working days lost, owing to the fact that many of the strikers obtained employment in other localities in the course of the month, and an unknown number of other strikers obtained work at different times with companies who had conceded their demands. Placing the loss of time in this dispute at the low estimate of 8,400 working days, there were in all approximately 81,100 working days lost through trade disputes during the month, compared with 54,710 in June and 27,710 in July, 1906.

*Trades affected by new disputes.*—The following table shows the trades affected by new disputes during the month, and the number of workpeople affected in each group of trades.

Trades.	No. of Disputes.	No. of Workers.
Mining.....	1	3,000
Building trades.....	6	1,241
Metal trades.....	4	472
Clothing trades.....	1	19
Unskilled labour.....	1	16
<b>Total.....</b>	<b>13</b>	<b>4,748</b>

*Localities affected by new disputes.*—The new disputes of the month occurred in the following provinces of Canada:—

Province.	No. of Disputes.
Nova Scotia.....	2
New Brunswick.....	1
Quebec.....	1
Ontario.....	6
Manitoba.....	1
Alberta.....	2
Total.....	13

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages.....	4
For shorter hours.....	1
For higher wages and shorter hours	1
For higher wages and recognition of	
Union.....	1
For higher wages and other changes	2
Against employment of non-union-	
ists.....	3
Sympathetic.....	1
Total.....	13

*Methods of settlement.*—Of the 30 disputes in existence during the month, 18 were terminated either by definite settlements being reached or by the resumption of normal conditions without a settlement, leaving 12 still in existence at the close of the month. Of the disputes that were terminated, 12 were settled through negotiations between the parties concerned, 1 by reference to a Board under the Conciliation and Labour Act, 1 by arbitration, and 4 were terminated without any negotiations.

*Results of disputes.*—Of the 18 disputes that were terminated, one ended in favour of the employers, 5 in favour of the employees, in six cases a compromise was reached, and in 6 disputes the result was indefinite.

**Disputes which Commenced prior to the Beginning of the Month.**

The trade disputes in existence during July, which began prior to the first of the month, comprised strikes of plumbers

at Toronto, Ont, pulp and paper makers at Sturgeon Falls, Ont., carpenters at Hamilton, Ont., and Brantford, Ont., freight handlers at Halifax, N. S., coal miners at Joggin Mines, N. S., marble workers and machinists at Toronto, Ont., quarry workers at Graniteville, Que., iron moulders at New Westminster and Vancouver, B. C., shipwrights and ship labourers at Victoria, B. C., and harness and collar makers at Peterborough, Ont. A brief account of these disputes is given below.

**Strikes of Plumbers at Toronto.**

No settlement was reported with regard to a strike of plumbers at Toronto, which took place on April 13, affecting about 50 men, on account of the employment of non-unionists, and a general strike involving about 500 plumbers and 104 firms, which began on May 15, on account of a rejected demand of the men for an increase in wages and employment of union labour only. It was reported that by the end of July about half the strikers had left Toronto to seek work elsewhere, about 250 men being still out of work at the close of the month.

**Strike of Pulp and Paper Makers at Sturgeon Falls, Ont.**

On June 10, a strike of pulp and paper makers was declared at Sturgeon Falls, Ont., affecting the Imperial Paper Mills of Canada. According to the strikers 141 workpeople were affected by the dispute, but the Company placed the number at 216. Two local branches of the International Brotherhood of Paper Makers were involved. It was stated by the employees that the primary cause of the dispute was their refusal to work on Sundays. The management of the mills claimed that the paper makers went out in spite of a clause in an agreement between the company and the International Brotherhood of Paper Makers that there should be no strikes or lockouts. The pulp mills continued to operate until the management endeavoured to start the paper machines with non-union men, whereupon the man in charge of the generator shut down the mill. It was further alleged that the strikers gave out

a document setting forth the following demands:—

1. We must be recognized as a body of Union men and treated as such.

2. That we will not furnish stock for non-union paper makers.

3. Men on tours must be paid by the hour.

4. If there is any settlement between the management and workers, we must be represented by one of the International Board.

In regard to these demands the Management stated that the local union, the name of which was appended to these demands, had not been recognized, and that prior to the strike its existence had never been brought officially to their knowledge. With regard to the employment of non-unionists, it was stated that last year they made arrangements with the International Paper Makers as a result of a strike, but reserved to themselves the right to employ non-union help, if union help could not be obtained.

With regard to demand No. 3, it was claimed that men on tours have always been paid by the hour; that is, a man engaged at the rate of \$2.00 for a 12 hours' day, who works 14 hours, gets two hours pay credited to him.

With regard to No. 4, the management stated that while repeatedly agreeing to receive a committee of those who were working in the mill and who went on strike, they have always declined to enter into any negotiations with outsiders, alleging that the arrangements made with the International Brotherhood of Paper-makers last year, through their President, had been consistently broken.

It was reported that the sulphite plant was opened on Monday, July 29, and was kept running continuously, though not at its full capacity.

#### Strike of Carpenters at Hamilton, Ont.

A strike of 30 carpenters which took place at Hamilton, Ont., on June 10, on account of their objection to the employment of labourers in removing false work from concrete beams and floors, was terminated on July 23, the work upon which the labourers were engaged having been completed in the meantime. The

company agreed to take back all the strikers, and according to the Carpenters' Union, the non-Unionists were to be discharged as soon as Union carpenters could be procured.

#### Strike of Carpenters at Brantford, Ont.

No definite settlement was reported with regard to a strike of carpenters which took place at Brantford, Ont., on May 1, but general industrial conditions ceased to be affected by it. Out of about 120 strikers who went out, only about 10 were still out of work on July 1, over half the original number having secured work at the rate demanded, while others had sought employment elsewhere.

#### Strike of Freight Handlers at Halifax, N.S.

A strike of freight-handlers of the Intercolonial railway, which began at Halifax, N. S., on June 29, was terminated on July 8. Some of the strikers resumed work on July 6, the others returning on the following Monday. It had been agreed to refer the dispute to a Board of Conciliation and Investigation under the Conciliation and Labour Act and an application for a Board was accordingly forwarded to the Department of Labour.\*

#### Strike of Marble Workers and Stonecutters at Toronto.

A strike of 20 marble workers which took place at Toronto on May 29, on account of the employment of men who were not members of the Marble Workers' International Union, continued throughout the month. On July 3, about 40 stonecutters employed in the same shop, declared a strike on the refusal of their demand for an increase in wages from 40 to 50 cents an hour, the men alleging that the latter rate was promised in an agreement made a year ago between the employers and the Stonecutters' Union. This dispute was an outcome of the one which began on May 29, the non-Unionists, against whom objection had been taken,

\* An account of the action of the Department of Labour with reference to this dispute is given in a special article on another page of the present number

having decided to affiliate with the International Union.

### Strike of Plasterers at Winnipeg, Man.

No settlement was reported with regard to a strike of plasterers at Winnipeg, which began on May 1, on account of the refusal of the employers to grant a demand that work cease at noon on Saturdays, making a week of fifty hours, instead of fifty-five. In the course of the first month of the strike, about 10 firms, employing 40 men, conceded the demand, leaving 20 firms and 70 men still affected. During the first three weeks of July, building operations were practically suspended on account of a dispute between the bricklayers and contractors. On the termination of this dispute, normal conditions were resumed in the building trades.

### Other Disputes.

No change was reported in a strike of 400 *machinists* at Toronto, which began on June 8, on account of the refusal of the employers to grant a demand for a reduction of working hours from 10 to 9, without a corresponding reduction in wages.

No settlement was reported in a strike of 27 *harness* and *collar makers*, which began on April 22 at Peterborough, Ont., on account of the refusal of the firm to grant a demand for an increase in wages and recognition of the Union.

No settlement was reported in a strike of 75 *iron moulders* at Vancouver, B.C., which began on June 24, on account of a demand for an increase in wages from \$3.75 to \$4 per day and a reduction from 9 to 8 in working hours. A strike of 12 *iron moulders* at New Westminster, B.C., who went out on June 25, making the same demands as those at Vancouver, was terminated on July 5. The company affected conceded the demand for an increase in wages, to date from August 1, and agreed to pay for work done on Saturday afternoons at the rate of time and one half.

No settlement was reported in strikes of *shipwrights* and *shiplabourers* at Victoria, B. C., which began in November,

1906, but general industrial conditions had ceased to be affected by them.

A strike of 75 *fishermen* on the Fraser River, B. C., which took place on June 22, owing to the canneries declaring a reduction in the price of spring salmon from 5 to 4 cents per pound, ceased in July, on the opening of the sockeye salmon season.

### New Disputes.

The new disputes of the month comprised strikes of silver miners at Cobalt, Ont.; structural iron workers at Montreal, Que.; bricklayers at Winnipeg, Man.; plasterers at Edmonton, Alta.; plumbers at Calgary, Alta.; stonecutters and electrical workers at Toronto, Ont.; employees in the building trades at Galt, Ont.; brass moulders at London, Ont.; electrical workers at Halifax, N. S., and Toronto, Ont.; stonecutters at Fredericton, N. B., and civic teamsters and labourers at Fairville, N. S. A brief account of these disputes is given below.

### Strike of Silver Miners at Cobalt, Ont.

On July 8 a strike of silver miners took place at Cobalt, Ont., the dispute arising on account of a disagreement between the mining companies and their men with regard to wages and general conditions of employment. It was stated that about 30 companies and 3,000 men were directly affected by the dispute. No definite settlement was reached, but in the course of the month a large number of strikers sought employment in other parts of the country. Some of the companies granted the demands of the men, and others secured non-Unionists to replace the strikers.\*

### Strike of Structural Iron Workers at Montreal, Que.

On July 8 a strike of structural iron workers took place at Montreal, Que., spreading to other localities within a radius of 125 miles, wherever the firms involved were carrying on operations. According to a report received from the

\* A full account of this dispute is given in a special article on another page of the present number, of the *Labour Gazette*.

			Directly.	Indirectly.	Males	Females	Males	Females		
<i>Mining</i> Silver miners.....	Cobalt, Ont.....	For higher wages and better conditions of employment...	30	.....	3,000	.....	.....	.....	July 8	No settlement reported, but many strikers sought work elsewhere, places of others were filled, and many companies conceded the demands of the men.
<i>Building Trades</i> Bricklayers.....	Winnipeg, Man.....	For higher wages and shorter hours.....	40	.....	500	.....	600	.....	July 1	Work resumed at old rate, 55 cents an hour, Saturday afternoons off during July and August.
Plasterers.....	Edmonton, Alta....	For higher wages and recognition of union.....	.....	.....	30	.....	.....	.....	" 1	Agreement signed; union recognised, but no change in wages.
Plumbers.....	Calgary, Alta.....	For increase in wages from 45 to 55 cents per hour.....	8	.....	44	.....	.....	.....	" 2	Work resumed pending reference of dispute to arbitration.
Stone cutters.....	Toronto, Ont.....	For increase in wages from 40 to 50 cents an hour.....	1	.....	40	.....	.....	.....	" 3	No settlement reported during the month.
Bricklayers, masons plumbers, car- penters and labourers.....	Galt, Ont.....	Against employment of a non-unionist.....	1	2	20	.....	.....	.....	" 20	Work resumed, no change.

DISPUTES WHICH BEGAN DURING THE MONTH.

Carpenters, plumbers, labourers.....	Galt, Ont.....	Against employment of non-unionists.....	1	7	29	.....	.....	.....	.....	.....	.....	No settlement reported at end of month.
	Montreal, Que.....	Demand for higher wages, shorter hours and other changes..	5	315	8	.....	.....	.....	.....	.....	.....	No settlement reported at end of month.
<i>Metal Trades</i> — Structural iron workers.....	London, Ont.....	Against employment of non-unionist.....	1	16	10	.....	.....	.....	.....	.....	.....	22 Co. claimed to have continued operations with non-unionists, strikers alleged dispute settled by non-unionist being discharged.
	Halifax, N. S.....	Demand for increase in wages from \$12 to \$13.50 per week.	4	25	1	.....	.....	.....	.....	.....	.....	6 Increase in wages conceded, extra time to count time and one-half to midnight, and double time, thereafter.
Electrical workers..	Toronto, Ont.....	In sympathy with striking plumbers.....	5	16	18	.....	.....	.....	.....	.....	.....	No settlement reported at end of m nth.
	Fredericton, N. B..	Demand for reduction in hours from 10 to 9.....	1	19	4	.....	.....	.....	.....	.....	.....	12 Work resumed, no change in hours, but skilled workmen received \$1.00 more per week, and apprentices 50 cents more.
<i>Unskilled Labour</i> — Civic teamsters and labourers.....	Fairville, N. S.....	Demand of teamsters for increase in wages from \$2 to \$2.50 and labourers from \$1.25 to \$1.50 per day.....	.....	16	11	.....	.....	.....	.....	.....	.....	15 Teamsters' wages increased to \$2.30 per day, labourers' wages increased proportionately.

\* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned; mention, moreover, is not made of disputes involving less than six employees, or less duration than 24 hours.

Structural Iron Workers' Union, 5 firms were directly affected and about 15 were indirectly affected. and about 315 men were directly and 100 indirectly involved. The strikers claimed that the cause of the dispute was the refusal of the employers to grant a demand for an increase in wages, shorter hours, and recognition of the Union in a way to afford the necessary protection as to their right to belong to it, and to mitigate the danger to life and limb caused by the introduction of inexperienced men on erection. The grievance committee was received in the offices of the firms affected, but no overtures of a settlement were made. According to a report received from one of the companies, the demands of the men included advances in wages of 33 1-3 to 125 per cent., a 9 hour day, employment of none but Union men, with Union foremen, a weekly pay day with no piecework payment, right to stop work pending arbitration of differences or out of sympathy with other trades, no helpers to be employed, and one apprentice to every seven men.

#### **Strike of Bricklayers at Winnipeg, Man.**

A strike of bricklayers which began on July 1, at Winnipeg, Man., was terminated on July 22. It was reported by the Winnipeg Builders' Exchange that about 40 firms and 500 employees were directly affected by this dispute, and 600 men were indirectly affected by it. According to a report received from the Bricklayers and Masons' Union 30 firms and 300 employees were affected directly and 250 employees indirectly. While the dispute was in progress, building operations were practically suspended, but the amount of building increased as soon as there was a prospect of a settlement. It was reported by the Builders' Exchange that the men returned to work at the old rate of wages, 55 cents an hour, with Saturday afternoon off during July and August. The settlement was of the nature of a compromise, the strikers having demanded 60 cents an hour, with Saturday afternoon off.

#### **Strike of Plasterers at Edmonton, Alta.**

On July 1, a strike of about 30 plasterers

took place at Edmonton, Alberta. The cause of the dispute was the refusal of the employers to sign an agreement involving recognition of the Plasterers' Union, and an increase in wages. The strike was terminated on July 22, an agreement having been signed by which the Union was recognised. There was no change in the rate of wages, which remained 60 cents an hour, with a working day of 8 hours. While the dispute existed, the building trades were generally affected by it.

#### **Strike of Plumbers, Steam Fitters and Steamfitters' helpers at Calgary, Alberta.**

On July 2, about 40 plumbers steamfitters and steamfitters' helpers declared a strike at Calgary, Alta., on account of the refusal of the employers to grant a demand for an increase in wages from 45 to 55 cents per hour. A report received from the Plumbers' Union stated that 8 firms and 44 employees were affected by this dispute. An agreement had been in force since September, 1906, between the Calgary Builders' Exchange and the Building Trades Council, providing that differences relating to the building trades should be settled by a permanent board of three members from each body. When this strike was declared, only three of the master plumbers were members of the Builders' Exchange, and the journeymen considered that they would not be justified in submitting their claims to the board, until all the master plumbers would agree to abide by its decision. On July 10, all the master plumbers signed an agreement to accept the decision of the board, and work was resumed on the following day. The Board of Arbitration subsequently declared the plumbers entitled to an increase in wages from 45 to 51 cents per hour, and the steamfitters' helpers an increase from 25 to 30 cents per hour. An agreement was then signed by the two parties to the dispute, embodying the findings of the Board.\*

\* The terms of this Agreement are given in an article on "Recent Industrial Agreements" on another page of the present number of the *Labour Gazette*.

**Strikes in Building Trades at Galt, Ont.**

On July 20, a strike of masons and carpenters took place at Galt, Ont., on account of the employment of a non-Unionist labourer by a mason contractor. Two firms and about 20 men were affected by this dispute. According to the majority of the reports received, work was resumed on July 24, under the old conditions. The mason contractor concerned claimed that the non-Unionist against whom the objection had been raised was still working for him, and sometimes with the masons, having been in his employ as quarryman for some time. In a report received from the Bricklayers' and Masons' Union, dated July 29, it was claimed that the strike was still unsettled. On July 29, about 7 carpenters, plumbers and others employed on another building, refused to work on account of the foundation being built by non-Unionists. It was reported by the contractor involved that this dispute would probably spread to a general strike among building mechanics and labourers.

**Strike of Electrical Workers at Toronto, Ont.**

On July 18, a strike of electrical workers took place at Toronto, Ont., in which about 5 firms and 16 men were involved. According to reports received from employers, the strike was declared in sympathy with the striking plumbers. One of the firms claimed that the strike of electrical workers was in violation of an agreement which had been entered into about two years ago and which had not yet expired.

**Strike of Brass Moulders at London, Ont.**

On July 10, a strike of 16 brass moulders took place at London, Ont. The cause of the dispute was an objection by the men to the employment of a non-Union moulder in the foundry of the Labatt Manufacturing Company. According to a report received from the Company, immediate steps were taken by the management to start an "open shop" with non-Union moulders and

machinery. It was further claimed that some of their men had signed an agreement not to strike again without giving six days' notice, and also declaring in writing that they were not now members of any labour organization, and would not join any while in their employ. On the other hand, it was reported by the Brass Moulders' Union that the strike was terminated on July 22, when the non-Union man was told to leave.

**Strike of Electrical Workers at Halifax, N. S.**

On July 1, a strike of 25 electrical workers employed by 4 firms was declared at Halifax, N. S., on account of the refusal of the employers to grant an increase in wages from \$12 to \$13.50 per week. After several interviews between the men and their employers, a settlement was reached by which the increase in wages was conceded, and all extra time up to midnight was to count as time and one-third, and after midnight as double time. Boys holding certificates were to receive 14 cents an hour. The new scale of wages took effect on July 8. There were 4 firms and 25 employees affected by this dispute.

**Strike of Shoe Cutters at Fredericton, N.B.**

On July 4, a strike of 19 shoe cutters occurred at Fredericton, N. B., on account of the refusal of the Hartt Boot & Shoe Company to grant a demand for a reduction in working hours from 59 to 54 per week., with no corresponding reduction in wages. On July 12 work was resumed. No reduction in hours was conceded, but skilled workmen were granted \$1 more per week, and apprentices 50 cents more. No trade union was involved in this dispute.

**Strike of Teamsters and Labourers at Fairville, N. S.**

On July 11, a strike of 4 teamsters and 12 street labourers took place at Fairville, N. S. The cause of the dispute was the refusal of the municipal council to grant a demand for an increase in wages from \$2 to \$2.50 per day for teamsters, and from \$1.25 to \$1.50 for

labourers. The teamsters provided their own teams. On July 15, the strikers returned to work, an increase of 30 cents per day having been promised for teamsters and a proportionate increase for the labourers.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of July, and which have been reported to the Department:—

## REPORTS OF DEPARTMENTS AND BUREAUS.

The following Reports of departments and bureaus were received at the Department of Labour during July, 1907.

### ONTARIO REPORTS.

#### Protection of Children.

Fourteenth Report, Neglected and Dependent Children of Ontario, 1906. Toronto: King's Printer, 1907. Pages 121.

IN the Annual Report of Neglected and Dependent Children of Ontario, for 1906, it is stated that there are now 58 branch Children's Aid Societies in the Province, representing a volunteer force of six or seven hundred persons. The aim of these societies is to interest all classes in the social uplifting and betterment of neglected and dependent children, to mediate between parents and children and between judicial officers and youthful offenders with a view to bringing about reformation without the stigma of imprisonment, to provide homes in respectable families for homeless children, and generally to advocate all measures calculated to improve the home surroundings and add to the happiness of young people. Attention is called in the Report to an application which has been made to the Dominion Government to pass a Juvenile Delinquent Bill, providing a special children's court for all Canada, similar to the children's courts in Ontario, which have been in existence since 1894, and a probation system, like the one instituted by the Children's Aid Society of Ottawa, and in successful operation in many cities of the United States.

With regard to child labour, the views are expressed that the truancy laws are not enforced with sufficient thoroughness that a stringent regulation should be made by which all boys under sixteen but over school age must go to some

definite trade or business or else return to school; that the more general adoption of the apprenticeship system would probably have a beneficial effect on the industries, as well as being in the best interests of the boys themselves; that it might be well to bring the occupations carried on by children in shops under the general factory law, as to age; that the street selling of newspapers should be in the hands of men who are incapacitated for regular employment, and that boys, instead of selling papers, should attend school or learn a trade, but of course there is no need for interfering with boys carrying routes in the morning or evening; that it would probably be in the public interest to prohibit any child under sixteen from attending theatres and such places of amusement without their parents or guardians, excepting social gatherings designed to provide innocent amusement and moral instruction.

#### Water Power of Northwestern Ontario.

Hydro-Electric Power Commission of the Province of Ontario. Fifth Report, Algoma, Thunder Bay and Rainy River Districts, 1907. Pages, 55.

The Fifth Report of the Hydro-Electric Power Commission of Ontario deals with the water powers in the judicial districts of Algoma, Thunder Bay and Rainy River, with the exception of the area north of the height of land, where there is at present a lack of demand for power owing to the sparseness of the population. It is stated in the Report that at Port Arthur and Fort William, where coal is laid down at a very moderate rate, water powers have been developed somewhat commensurate with the present requirements, and a strong feeling exists for increasing the supply of electrical energy by further developments. The Com-

missioners consider that the outlook for a plentiful supply of electrical power at moderate rates will be of very great value in the establishment of industries at Port Arthur and Fort William. A large number of rivers and waterfalls exist in these districts, capable of producing a great quantity of electrical energy, and it is anticipated that they will be of great service in the development of the mineral and timber resources known to exist there.

### Lands, Forests and Mines of Ontario.

Report of the Minister of Lands, Forests and Mines of the Province of Ontario, for the year 1906. Toronto: King's Printer, 1907. Pages, 158.

The Report on Lands, Forests and Mines of Ontario, for 1906, states that during the year there were sold for agricultural purposes, 69,860½ acres of crown lands for agricultural purposes, for the sum of \$72,204.31, and 4,877 acres for mining purposes for \$11,988.05. There were leased for mining purposes 13,384 acres for \$13,177. The total area of land disposed of during the year was 91,367 acres, and the total collections on account of lands sold and leased was \$100,399.81. The mining industry in Ontario reached the highest point in 1906. The production of nickel in the Sudbury region amounted to 10,932 tons, valued in the matte at \$3,836,419, while the output of copper was 5,940 tons, worth \$998,548. The development of the silver cobalt area on the line of the Temiscaming and Northern Ontario Railway has gone on with great rapidity. In 1904 the yield of silver was 206,875 ounces. In 1905 it was 2,451,356 ounces, and in 1906, about 5,400,000 ounces.

### BRITISH COLUMBIA REPORT.

#### Mining Industry of British Columbia.

Annual Report, of the Minister of Mines for the year ending 31st December, 1906. Victoria, B. C.; King's Printer, 1907. Pages, 276.

In the Report of the Minister of Mines of British Columbia for 1906, it is stated that the value of mineral products of the province amounted in that year to \$24,980,546, compared with \$22,461,325 in 1905, and \$18,977,359 in 1904. There was a decrease in the production of gold,

silver and lead, compared with the previous year, but this was more than counterbalanced by the increase in coal and copper mined, there having been produced 42,990,488 pounds of copper, compared with 37,692,251 pounds in 1906 and 1,517,303 tons of coal compared with 1,384,312 tons in the previous year. The value of the copper produced was far more in excess of any other mineral product, having amounted to \$8,288,565, almost one third of the value of all the minerals combined.

### BRITISH REPORTS

#### Eight hours for Coal Miners.

Final Report of the Departmental Committee appointed to inquire into the probable economic effect of a limit of Eight Hours to the Working Day of Coal Miners. Part 1, Report and Appendices. London, Wyman and Sons. 1907. Pages, 87. Price, 9d.

A departmental committee appointed by the British Home Office a year ago to consider the probable economic effect of limiting the working of the coal miners to a day of eight hours, has presented its report. The report is presented under the following heads: Effect of an Eight Hour Day on Production; Effect of an Eight hour Day on Employment and Wages; Effect of an Eight hour Day upon Health; The Coal Export Trade; Labour Conditions in Foreign Mines; Effect of an Eight hour day on Other British Industries, and Summary of Conclusions. There are also two appendices to the Report, one a memorandum on the hours of labour in coal mines in foreign countries and legislation relating thereto, and the other statistics relating to the number of days worked per week by coal mines from 1897 to 1906. The following were among the principal conclusions arrived at by the committee:—

That the average time from bank to bank of an underground worker in British coal mines is 8 hours and 36 minutes, for hewers, and 9 hours and 28 minutes, for other underground workers, varying from 6 hours and 49 minutes in Durham for hewers to an average of 9 hours and 57 minutes in Monmouthshire for all underground workers. That the institution of an eight-hour day would reduce the

average theoretical full week's work by 10.27, assuming the customary short and idle days to remain the same as at present. This would mean a loss in production of 25,783,000 tons, calculated on the output of 1906.

This loss, however, would probably be mitigated by the diminishment of the practice of voluntary absenteeism of workmen on days when the collieries are open, by improvements in the efficiency of labour and in the mechanical equipment of collieries, by the extension of the use of labour saving machinery and of the multiple shift system, and by some increase in the flow of outside labour to the collieries.

That the health and physique of coal miners at the present time compare favourably with that of any other class of workpeople, and it is not believed that a legal limitation of hours underground to eight hours per day can be expected to produce any marked change.

That in both Germany and America, the countries which are the most effective competitors of Great Britain in the export trade, the present hours of labour underground in mines are shorter than in Great Britain; they are longer than they would be under an eight hour law.

That in certain classes of mines the difficulty of adapting the work to the reduced hours would be so great that it might be necessary to make special regulations for such cases, and if an eight hour law is passed, it may be considered advisable to reserve in the hands of the Department of the Government controlling mines, certain powers of suspension and of exception in the public interest, as it has been considered advisable to do in all other countries which have enacted such laws.

### Old Age Pensions.

Tables which have been prepared in connection with the question of Old Age Pensions, with a preliminary memorandum. London: Wyman and Sons, 1907. Pages, 54. Price 5½d.

The Local Government Board of Great Britain has issued a preliminary memorandum outlining the various schemes which have been considered by the Royal Commission on the Aged Poor, and by

parliamentary and other committees, with the object of providing pensions for aged persons. Accompanying the memorandum are tables giving estimates of the number of persons who would be entitled to pensions under these schemes, and of the probable cost which they would involve.

The first investigation of the subject of old age pensions referred to in this Memorandum is that of the Royal Commission on the Aged Poor, appointed in 1893. After examining a number of schemes, the commission reported in 1905, that "in view of the financial and economic difficulties involved," it was "unable to recommend the adoption of any of the schemes as yet suggested." In 1896 a Committee on Old Age Pensions was appointed by the Treasury to consider "any schemes that may be submitted to them for encouraging the industrial population by State aid, or otherwise to make provision for old age." More than one hundred schemes were brought before the committee, but the conclusion was reached that none of them would attain the objects which the Government had in view, nor could they devise a proposal free from grave inherent disadvantages.

A Select Committee of the House of Commons, appointed in 1899 to "consider and report upon the best means of improving the condition of the aged deserving poor," came to the conclusion that there was prima facie evidence that it was practicable to create a workable system of old age pensions for the United Kingdom, and that the general lines upon which such a scheme might be framed would be one under which any person 65 years of age, being a British subject, would be entitled to a pension, if he could satisfy the pension authority that (a) he had not within the previous 20 years been sentenced to imprisonment without the option of a fine; (b) he had not received poor relief (other than medical relief) unless under wholly exceptional circumstances, during the previous 20 years; (c) he was resident in the district of the pension authority; (d) he had not an income from any source of more than

10s. a week; (e) he had endeavoured to the best of his ability to make provision for himself and those immediately dependent on him. A departmental committee, appointed by the Local Government Board to investigate the financial aspects of this proposal, estimated that in 1901 the number of pensionable persons would have been about 655,000, and the total estimated cost would have been in round figures £10,300,000.

#### OTHER REPORTS RECEIVED.

*Canada.*—Reports of the Special Committee of the House of Commons, to whom was referred Bill No. 2, an Act respecting Industrial and Co-operative Societies.

*Ontario.*—Report of the Minister of Public Works for the year 1906.

Tenth Annual Report of the Provincial Municipal Auditor, 1906.

Thirty-ninth Annual Report of the Inspectors of Prisons and Public Charities upon the Lunatic and Idiot Asylums, being for the quarter ending 31st December, 1905, and for the year ending 31st December, 1906.

*Nova Scotia.*—Official Report of the Debates and Proceedings of the Legislative Council during the First Session of the Thirty-fourth Parliament, 1907.

*Great Britain.*—Annual Report of the Chief Inspector of Factories and Work-

shops for the year 1906 Report and Statistics.

Report of the Government Factories and Workshops Committee.

Minutes of Evidence taken before the Departmental Committee appointed to consider whether the Post Office should provide facilities for insurance under the Workmen's Compensation Acts.

Papers relating to a Federation of the South African Colonies.

Report to His Majesty's Secretary of State for the Home Department on an Explosion of Fire-damp and Coal Dust at Genwen colliery.

Return in pursuance of Section 4 of the Regulation of Railways Act, 1889, of Railway Servants of Certain Classes who were on one or more occasions during the Month of April, 1907, on Duty on Railways of the United Kingdom for more than Twelve Hours at a Time; or who, after being on Duty more than Twelve Hours, were allowed to resume Work with less than Nine Hours' Rest.

#### RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

##### ONTARIO CASES.

###### Trial of Union Labour Leader for Assault.

In connection with the strike of miners at Cobalt, James McGuire, president of the Cobalt Miners' Union, No. 116, Western Federation of Miners, was tried before Magistrate Brown on the charge of assaulting Detective McMullen, a police constable sworn in by the Nipissing Company.

On July 17th McGuire was found trespassing on the Nipissing Mine Property, and when ordered off by McMullen refused to go. It developed in the evidence that McGuire struck the detective, but in giving his testimony accused claimed that McMullen should have shown his authority before ordering him off the property.

There were five witnesses who saw the encounter, among whom was another police officer, who assisted McMullen in endeavoring to get McGuire to leave.

The manager of the mine swore that he had previously ordered McGuire off the property and warned him not to

come on it again. The latter in his evidence claimed that his purpose in visiting the property was to induce the men employed on the Nipissing to join the Union.

In his summary of the evidence, the Magistrate pointed out that the penalty for the offence might be ten years' imprisonment. He regretted very much that an officer of the Union should be brought before him on such a serious charge. He took into consideration, however, the good behaviour of the Union men since the strike was declared, and believing that the accused had exerted influence over the strikers in preserving the peace, and that it was McGuire's first offence, he allowed him to go on suspended sentence.

(*Rex v. McGuire*; 20th July, 1907; *Brown, P. M.*)

#### Railway Servant Pardoned.

In the case noted at page 1451 of the June number of the *Labour Gazette*, the G. T. R., conductor who was sentenced to three years' imprisonment for violation of the railway rules, resulting in the wrecking of his train and the loss of three lives, has been pardoned and released by order of the Minister of Justice.

#### Leave to Appeal to Privy Council without giving Security refused.

In the case of the Metallic Roofing Company vs. Jose, an attempt was made to obtain leave to appeal to the Judicial Committee of the Privy Council *in forma pauperis* by the Amalgamated Sheet Metal Workers' Union. The application was, however, refused, and the Union will have to give security for the costs of the appeal before the latter will be entertained.

(13th July, 1907; Privy Council.)

#### QUEBEC CASE.

##### Restraint of Trade.

In the case noted at page 1286 of the May, 1906, number of the *Labour Gazette*, the Court of Appeals sitting at Quebec has recently dismissed an appeal from the judgment at the trial.

Leave to appeal to the Privy Council has been granted.

(*United Shoe Machinery Co. v. Brunet*; 26th June, 1907.)

#### ENGLISH CASES.

##### Accident in course of Employment.

A workman who was employed in a colliery died from blood poisoning resulting from an injury to his finger. He was employed at night work, and on the evening of the accident left his home, which was over a mile from the pit, with his finger well. He arrived at the pit with his finger uninjured. He arrived home early next morning with his finger crushed. He continued to work for some days, when blood poisoning set in, and he died. His widow claimed compensation under the Workmen's Compensation Act, 1897, but the County Court Judge held that he was not entitled to draw the inference that the accident arose in the course of his employment, as it might have occurred on the way home.

On appeal, the Court of Appeal held that the Judge was at liberty to draw the inference that the accident arose in the course of the employment, one of the Judges saying that the probability was that the accident happened when the workman was at the pit, because accidents did happen there, rather than at a time when in the ordinary course of life accidents did not happen.

(*Mitchell v. Glamorgan Coal Company*; 7th June, 1907; Court of Appeal.)

##### Presumption that Wife is dependent on Husband.

There is a presumption that a wife is dependent upon her husband within the meaning of the Workmen's Compensation Act, 1897. That presumption can be rebutted, but it is not rebutted by the mere fact that the husband has deserted his wife, or by the fact that the husband was not contributing towards his wife's maintenance at the time of his death; nor is it sufficient to rebut the presumption that the wife was supported by her relatives, or that she was earning small sums by

her own work, or was in the workhouse at the time of his death. A child *en ventre sa mère* at the time of the husband's death and subsequently born alive is to be deemed to have been born at the time of the death, and is therefore a "dependant" within the Workmen's Compensation Act, 1897.

(Williams v. Ocean Coal Company; 5th June, 1907; Court of Appeal.)

### Independent Right of Dependants to Compensation.

A collier who was injured by an accident, by agreement with his employer was paid half the amount of his average weekly earnings during incapacity. He then returned to work, and was employed on different work in the same colliery, his former place having been filled. Nothing was said about continuing the weekly payments or their cessation, but his wages were higher than they were before. He worked for about a year, when he died from the effects of the accident. His widow having claimed compensation under the Workmen's Compensation Act, 1897, it was held that there was no evidence that the workman, by going back to work, had agreed to abandon his rights against his employer, and that, therefore, his widow was entitled to compensation. Held, further, that a workman's dependants had an independent right to claim compensation which the workman could not deprive them of, provided that the employer paid no more in all than the maximum sum as compensation.

(Williams v. Vauxhall Colliery Co.; 7th June, 1907; Court of Appeal.)

### Who are Dependants.

A widow and children of a deceased workman are none the less "dependants wholly dependent upon his earnings" within the meaning of Schedule 1, par. 1 (a) (i) of the Workmen's Compensation Act, 1897, because the workman has been enabled, by the receipt of moneys from his wage-earning sons, or of moneys coming to him from other channels, to augment the fund out of which he has maintained his household. If, however, a workman's wife has, at the time of

his death, independent means of support of any kind, which are not derived through him and which he could not have appropriated without her consent, such as private income or earnings of her own, the case is one of partial dependence on her husband's earnings.

(Senior v. Fountains; 20th June, 1907; Court of Appeal.)

### Weekly Payment terminated.

A workman having been injured by an accident, his employer agreed to pay him a certain sum per week, and a memorandum of this agreement was duly registered. Upon an application by the employer, more than a year afterwards, the County Court Judge ordered that the agreement "be this day terminated, and that the weekly payments to the workman thereunder be ended accordingly." The workman subsequently applied to the County Court Judge to review and increase the weekly payments. Held, that as the weekly payments had been ordered to be ended and the agreement terminated, the Court had no jurisdiction to increase the weekly payments.

(Nicholson v. Piper; 18th June, 1907; House of Lords.)

### Interpretation of "Undertakers."

Defendants were the tenants of a small hut in a dock, and they supplied horses, men and gear for hauling railway wagons loaded with coal for ships using the dock from the railway sidings to the quay where the ships lay. One of the men in the employment of the defendants, while engaged in hauling a wagon to the quay, with coal belonging to the plaintiffs' ship, fell, and the wagon went over his foot. He took proceedings against the plaintiffs under the Workmen's Compensation Act, 1897, and a third party notice was served on the defendants. An award of compensation having been made in his favour, the plaintiffs brought an action claiming an indemnity from the defendants under Sec. 4. Held, that the defendants had the actual use or occupation of the dock, which was a factory, for the purpose of carrying on their business there, and were therefore the occupiers thereof.

and so were "undertakers" and liable to indemnify the plaintiffs under Sec. 4.

(Pacific Steam Navigation Co. v. Pugh; 18th June, 1907; Court of Appeal.)

#### Negligence of Fellow Servant

The law that a master is not liable to his servant for the negligence of a fellow servant who is employed to super-

intend and direct the work, provided the master has selected a proper and competent person for that purpose, is not subject to an exception in the case of an infant where the accident to the infant has resulted from the want of proper instructions given to him by the person in superintendence.

(Young v. Hoffman Co.; 4th July, 1907; Court of Appeal.)

THE  
LABOUR GAZETTE

SEPTEMBER, 1907.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF  
AUGUST, 1907.

I.—GENERAL SUMMARY.

CONDITIONS of employment were very active throughout Canada during August. With the advance of the season, the demand for labour increased, and in many localities additional men could have been given employment. The labour scarcity, however, was less pronounced than at the corresponding period of 1906. Agriculturists became very busy during the month, harvesting having become general in Ontario, though in western Canada wheat cutting was not begun over a wide area until the closing days of the month. The western crop was officially estimated at about 75 per cent; in Ontario the yield will be below that of last year; but in Quebec and the Maritime Provinces conditions compare favourably with 1906. The number of men required for the western harvest was estimated at 21,000, compared with 24,000 last year. Railway construction crews made good progress, the supply of labour being better maintained than in August, 1906. Building and civic improvements continued to give employment to large numbers. In the lumbering, mining and manufacturing industries, the month was a busy one. The Atlantic fisheries have had an exceptionally favourable season; but in British Columbia the run of sockeyes has fallen considerably below expectation. Transportation employees of all classes had a very busy month, both freight and passenger traffic being very heavy. Reports from British Columbia

indicated a general scarcity of labour in that province. The demand for capital in almost every branch of industry exceeded the supply.

**Changes in Wages and Hours of Labour.**

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department during August:—

*Lumbering.*—In the Ottawa Valley the wages offered to shantymen for the coming winter season were considerably higher than last year, owing to the prevailing scarcity of men. (1)

*Metal, engineering and shipbuilding.*—Moulders at Victoria, B. C., were granted an increase in wages from \$3.50 to \$4.00 per day.

*Printing.*—Under the terms of a five-year agreement, stereotypers employed in newspaper offices at Toronto, Ont., had their wages increased to \$18 per week for journeymen and \$22 per week for foremen. About 24 men working in 7 offices were affected. The eight-hour day prevails.

*Textile.*—An increase of ten per cent. in wages was granted at Montmorency, Que., to a number of cotton mill employees previously receiving minimum rates.

*Civic employees.*—Civic firemen (12)

(1). See report of Hull correspondent.

at Brantford, Ont., had their wages increased 10-25 cents per day.

*Railway employees.*—An increase was granted to locomotive engineers in the employ of the Grand Trunk Railway Company as a result of an investigation conducted by a board under the Industrial Disputes Investigation Act, 1907, a three years' agreement being signed. (2) Freight handlers employed by the Intercolonial Railway also obtained an increase in wages as a result of the findings of a Board of Conciliation under the Act respecting Conciliation and Labour, 1906. (3) Machinists in the employ of the Intercolonial were also granted an increase in wages dating from April 1.

*Miscellaneous.*—Barbers (38) in London, Ont., received an increase of \$1.00 per week in wages.

*Unskilled labour.*—The rate for some 45 labourers at Halifax, N. S., was increased from 16 to 17 cents per hour. At Moncton, N. B., 300 labourers employed in the construction of the Intercolonial shops had their wages increased 10 cents per day as a result of the prevailing scarcity of workmen.

### Cost of Living.

Butter, eggs, fruit, vegetables and other produce throughout Canada were exceptionally high in price for the season. The new crop of hay sold at a high rate, and fodder was generally scarce and dear. Milk increased in price one cent per quart at London, St. Thomas, Ont., and other points. Flour was upward at Montreal. Coal advanced 50 cents per ton at Ottawa and other places. In western Canada some anxiety was felt with regard to the supply of fuel for the winter season of 1907-08. the prevailing car shortage preventing the accumulation of stocks. Canned goods, including fish, fruits and vegetables, were upward in tendency.

### Interruptions to Industry.

The number of trade disputes in existence during August was six less than in

(2). The report of the Board of Investigation, together with a copy of the agreement, is published elsewhere in the present issue.

(3). The report of the Board is published elsewhere in the present issue.

the previous month, but there was an increase of approximately 9,960 in the number of working days lost. Compared with August, 1906, there was an increase of one in the number of trade disputes and an increase of about 38,435 in the number of working days lost.

Among industrial establishments, etc., destroyed by fire or through other causes during August, 1907, the following, as reported in the press of the Dominion, may be mentioned:—

*New Brunswick.*—Cigar factory at St. John, loss \$4,000; sulphite paper mill at St. John, loss \$5,000; stores at Woodstock.

*Quebec.*—Lumber piles at Beloeil, loss \$1,000; tub factory at Foster, loss \$10,000; sash and door factory at Montreal, loss \$20,000; hardware warehouse at Montreal, loss \$25,000; seven stores and contents at St. Gregoire, loss \$46,300; furniture factory and hotel at Ste. Therese, loss \$100,000; sash and door factory at Scott Junction, loss \$7,000.

*Ontario.*—Pork factory at Aylmer, loss \$8,000; docks of Dominion Lumber Company and lumber at Blind River, loss \$100,000; business block at Dashwood, loss \$30,000; planing mill at Dundalk, loss \$6,000; sawmill at Hampden, loss \$7,000; paint plant at Hamilton, loss \$1,200; stores at Janeville, loss \$4,000; car barns of Southwestern Traction Company at London, loss \$100,000; bakery at London, loss \$1,000; stores at Neustadt, loss \$5,000; business block at Niagara Falls, loss \$4,000; two business blocks at North Bay, loss \$85,000; broom factory at Norwich, loss \$20,000; six tenements at Ottawa, loss \$12,000; grand stand and portion of exhibition buildings at Ottawa, loss \$25,000; oil tank and 18,000 gallons of oil at Sarnia; clothing factory and pumping derrick at Seaforth, 75 workpeople thrown out of employment; grain elevator at Simcoe; gasoline launch No. 13 at Toronto; lumber mill at Toronto, loss \$6,000; ferry "Shamrock" and sheds at Toronto, loss \$26,000; store at Toronto, loss \$1,000; organ factory at Uxbridge, loss \$25,000; steam roller and church at Welland, loss \$14,000; hotel near Warton, loss \$5,000; sawmills, camp supplies and lumber at Wingfield Basin.

Barns at Cayuga, Downeyville, East Zorra and Harvey.

Forest fires in the Parry Sound district caused some damage.

*Manitoba.*—Business blocks at Griswold, loss \$25,000; grain elevator and 1,200 bushels of wheat at Hamiota.

*Saskatchewan.*—Business portion of Oxbow, loss \$175,000.

*Alberta.*—Flour mill at Clarresholm, loss \$10,000; business block at Edmonton, loss \$12,000.

### Conditions in the Industries and Trades.

Conditions of employment during August in the several industries and trades throughout Canada, as indicated by the reports of correspondents to the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

### Agriculture.

Farmers were very busy harvesting throughout Canada. Haying was completed in Quebec and the Maritime Provinces, having been delayed by wet weather. In Quebec and Ontario the harvesting of the grain crops was begun. The western harvest was fully two weeks later than last year, and cutting did not become general until the closing days of the month, though the winter wheat harvest in Alberta was begun some two weeks earlier.

Weather conditions were on the whole favourable for the maturing of the crops, though frost and hail storms did some damage in certain sections of the North-west Provinces, the lateness of the harvest having exposed the grain to danger from the former cause. At the close of the month the opinion of experts was that the western wheat crop would be at least 75 per cent. of the average. In southern Manitoba, drought caused considerable damage, though an improvement took place in the early part of the month. In Saskatchewan, a three-fourths crop is expected. The Alberta winter wheat crop was heavy, and the outlook is that cattle exports from the Province this year will be extensive. Other crops in Alberta promised well, though the wool clip, owing to the exceptionally severe winter of 1907, was below the average. Reports received from Ontario varied considerably according to locality, but barley and peas were generally a fair crop, with oats, tobacco and potatoes below the average, and the yield as a whole showing a decline compared with 1906. Hay, though a light crop, was saved in good condition. Fall wheat turned out better than was anticipated. Cattle and dairying have suffered throughout the province from the prolonged dry weather. The honey crop will be small. Agricultural yields in Quebec will be larger than last year, the average crop being estimated at 80 per cent., or eight per cent. above that of 1906. In the eastern provinces crops are turning out better than promised earlier in the season. From British Columbia reports on the whole were favourable. There will be an average yield of fall and

winter apples throughout Canada, and the quality promises to be excellent; earlier varieties were light. Grapes will be a heavy crop, but pears are a failure and peaches scarce. Tomatoes are backward. High prices for produce of all kinds prevailed.

The supply of labour continued less than the demand in many localities, though the shortage was not felt to the same degree as in August, 1906. Wages for harvesters in Ontario ranged from \$1.00 to \$2.00 per day and from \$18 to \$30 per month with board, though skilled labourers received as high as \$50 per month during the harvest. A number of harvester excursions were conducted by the railway companies to western Canada, about 21,000 men being required, of which 11,000 were for distribution in Manitoba, 7,500 in Saskatchewan and the balance in Alberta. Last year about 24,000 extra men were employed in this connection. The influx of homesteaders of the poorer class who were able to assist in the gathering of the harvest accounts in part for the falling off in the demand for outside help.

### Fishing.

Some very heavy catches were reported by the deep sea fishing fleets of the Maritime Provinces. The coast fisheries showed further improvement as compared with the early months of the season, and the year promises a considerably larger return than 1906. In British Columbia the run of sockeyes on the Fraser river has been disappointing, but the northern canneries have put up a satisfactory pack.<sup>(4)</sup> The total pack for the entire province, up to the closing week of the month, was about 280,000 cases, compared with 460,000 for last year and 368,000 in 1903, the corresponding year in the cycle of four years. The run of humpbacks has been exceptionally heavy.

### Lumbering.

Sawmills were running to full capacity throughout Canada, with lumber shipments correspondingly heavy. The sup-

(4). See report of New Westminster correspondent.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and in dustries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

ply of logs was well maintained, the water in the streams in Ontario and the eastern provinces being considerably higher than during the corresponding period of 1906. There was a diminution in the output of some of the mountain mills in British Columbia owing to a decrease in the demand from the Prairie Provinces. Preparations had begun in Ontario and the eastern provinces for the coming season in the woods. In New Brunswick the outlook is that the cut will be smaller next year than in 1906-07 with wages about the same or lower. In Ontario and Quebec, however, a large cut is expected, men being in demand for the shanties and wages averaging 15 per cent. higher than last year. A scarcity of pulp wood was reported in the Ottawa Valley, and the demand for and output of paper were exceptionally heavy.

Informations were sworn out during August by the government of Alberta charging members of the executive committee of the Alberta Lumber Dealers' Association, numbering twelve in all, with conspiracy under the Criminal Code in relation to restraint of trade and trade combinations. Each of the defendants was charged with three conspiracies; first, with his company, directors and other members of the Alberta Retail Lumber Dealers' Association; second, with the members of the Mountain Lumber Manufacturers' Association of British Columbia; and third, with the British Columbia Lumber and Shingle Association. The action was taken as the result of the investigation held by a special committee of the House of Commons during the recent session of Parliament into the operations of an alleged combine of lumber dealers in western Canada. (5)

#### Mining.

Heavy outputs were reported from the Nova Scotia collieries, with the exception of those in the Springhill district, where labour disturbances curtailed operations. Shipments were also exception-

ally large. The supply of labour was somewhat diminished by the movement of harvesters to western Canada. In Quebec the mica and asbestos mines were producing heavily, and prospecting on an extensive scale was in progress. Favourable reports were received from eastern Ontario and from the oil regions in the southwestern portion of the province. At Cobalt the month compared favourably with July. A shortage of coke caused considerable inconvenience to smelters and metalliferous mines in the interior of British Columbia, Rossland and the Boundary district being particularly affected. The coal mines of Alberta and British Columbia were producing steadily, but were hampered in some localities by a shortage of cars. Men were in demand for the Crows' Nest Pass collieries and coke ovens.

The blast furnaces of the Antikokan Iron Co. were blown at Port Arthur, Ont., during July.

It was officially estimated that about \$64,000,000 of gold remained to be taken from the gravels in the Yukon, from which \$119,000,000 have already been secured.

#### Manufacturing.

Conditions remained about the same as in July. Manufacturing establishments were for the most part working full time with complete staffs, and in several branches and localities overtime was reported necessary in order to keep up with orders. Shipments of manufactured goods for the western market have been heavy, and the outlook is for an active autumn season.

The power plant at Chignecto mines, Cumberland county, N. S., from which electrical energy will be distributed to the industries of Amherst, N. S., was inaugurated August 1. This is the first plant in America for the generation of electrical power at the mouth of a coal mine, for distribution to distant centres.

#### Railway Construction.

Rapid progress was made during August in connection with the heavy contracts for railway construction throughout Canada. On the eastern sections of

(5). For statements relating to the appointment, proceedings and findings of this committee, see the March, April and May, 1907, issues of the *Labour Gazette*, at pages 935, 1051 and 1178 respectively.

the National Transcontinental line, additional gangs were given employment, while on the sections west of Lake Superior and Winnipeg, about four miles of track were being laid daily; grading, bridge building, track laying or other construction work being in progress throughout the route from Fort William to Edmonton. It was estimated that in addition to the branch from Fort William to Superior Junction, some 400 miles of track would be laid west of Winnipeg this year. Extensions of the Canadian Pacific railway system in western Canada were also being rapidly pushed forward (\*). There was a demand for labour in some localities, though the supply was much better maintained than at the corresponding period of 1906. The fact that fewer labourers will be required in connection with the western harvest will also tend to equalise the demand. In the other provinces conditions were active, particularly in connection with repair work, which was on an extensive scale in Ontario and Quebec. The new Gosford branch of the Quebec and Lake St. John railway in Quebec and the Guelph and Goderich branch of the Canadian Pacific Railway were opened for traffic during August.

On the 29th of August, the southern portion of Cantilever bridge, under construction across the St. Lawrence river, eight miles above Quebec, collapsed, killing 63 men and injuring 11 others. The monetary loss will be very heavy. †

#### General Transport.

Railway employees of all classes had a very busy month owing to the heavy tourist traffic and the large quantities of freight being moved. A shortage of rolling stock was reported in several sections, being particularly felt in the mining districts of Alberta and British Columbia, where the distribution of fuel was considerably delayed. The heavy westward movement of general freights during the summer has placed a supply of box cars in readiness for the eastward movement of the grain crops.

In connection with the moving of the 1907 grain crop, a report recently issued by the Department of Trade and Commerce, Canada, shows that on the C. P. R. there are 917 elevators and 32 warehouses, with a capacity of 28,538,200 bushels; on the Canadian Northern, 275 elevators and 20 warehouses, capacity 7,485,000 bushels; on the Midland and the Brandon, Saskatchewan and Hudson Bay, 13 elevators, capacity, 365,000 bushels; on the Alberta Railway and Irrigation line, 7 elevators, capacity, 209,000. The C. P. R. has 7 Ontario terminal elevators, capacity 11,625,000 bushels, and the C. N. R. has 2, capacity 7,000,000. In all there are 1,221 elevators and 52 warehouses, having a total capacity of 55,222,200 bushels.

Canals and port returns show an increase in traffic as compared with the season of 1906. Longshoremen, ship labourers, etc., had a correspondingly busy month.

From Fort William and Port Arthur, from the opening of navigation, April 30 to July 31, the following grain shipments were made: Wheat, 22,275,141 bushels; oats, 7,061,650 bushels; barley, 619,717 bushels; flax, 281,410 bushels; The bulk of these was carried in Canadian hulls. The total shipments to the points of destination were as follows: Owen Sound, 2,744,590 bushels; Midland, 1,305,918; Tiffin, 205,000; Depot Harbour, 3,662,456; Collingwood, 256,000; Point Edward, 1,272,038; Meaford, 741,771; Goderich, 2,193,594; Welland Canal, 59,500; Kingston, Prescott and Montreal, 18,656,805; Port Huron, 437,958; Buffalo, 8,607,506 bushels.

The proposed uniform code of rules for Canadian railways, in the preparation of which a committee of trainmen and railway officials have been engaged since February, 1907, was recently forwarded by the secretary of the Board of Railway Commissioners to representative railway employees throughout Canada, the latter being advised that the Board would receive suggestions in connection therewith on or before December 1 next. The rules will be considered by the Board at an early date in connection with suggestions received.

(\* See report of Brandon, Man., correspondent.

(†) A special article dealing with this disaster is published elsewhere in the present issue.

## The Trades.

*Building.*—The various branches continued active. In several of the larger cities, including Montreal and Toronto, the season has been more active than last year, though at Winnipeg and elsewhere the number of permits has shown a falling off. In western Canada the month has been quieter than was anticipated, owing largely to the scarcity of money.

*Metal, engineering and shipbuilding.*—Conditions were very active for moulders, iron workers, machinists, engineers, etc.

*Woodworking and furnishing.*—Woodworkers, carriage and wagon makers, employees in furniture establishments, etc., had a good month. Coopers were very busy.

*Printing.*—Trade was somewhat quiet in several centres from seasonal causes, though the month compared favourably with the corresponding period of previous years. Bookbinders, as a rule, were very busy.

*Clothing.*—Journeymen tailors were well employed for the season, and garment workers were busy. Employees of boot and shoe making establishments were quiet.

*Textile.*—Cotton mills were all very busy. Woollen mills were active.

*Leather.*—The month was quiet.

*Food and tobacco preparation.*—Confectioners were very busy. Bakers and butchers were busy. Cigar makers and tobacco workers had a good month.

*Miscellaneous.*—Barbers, hotel and restaurant employes, laundry workers, etc., were very busy owing to the tourist and holiday trade, which has been exceptionally heavy this year.

*Unskilled labour.*—This class was very busy throughout Canada, and there was a considerable demand for additional workmen at several points. The scarcity of men, however, will be less pronounced than that which prevailed during the autumn months of 1906, notwithstanding that operations in several branches of industry, including railway construction, mining and civic improvement work, are on an equally or more extensive scale than in 1906.

## Canadian Trade and Revenue.

*Foreign trade.*—During July, 1907, the total value of imports entered for consumption was \$34,557,998, compared with \$23,652,122 in July, 1906. Total domestic exports during July, 1907 amounted to \$27,723,599, compared with \$16,549,548 in July, 1906. The chief increases of the month were shown under the headings of The Mine, The Fisheries, The Forest, Agriculture and Manufactures, the only decrease being under the heading of Animals and Their Produce.

The commercial agent of the Dominion in Japan reported an improvement in the financial and commercial situation. Trans-Pacific freight rates were increased.

*Imperial trade.*—According to reports received from commercial agents at the Department of Trade and Commerce, Canada, excellent openings prevailed in the British market for Canadian pears, apples and other fruits. The cheese and cereal markets in Great Britain have also shown an improvement.

*Domestic trade.*—Retail trade was quiet from seasonal causes. Collections were fair. The money stringency continued, call loans showing a decrease, though current loans showed a heavy increase. The outlook for fall trade was regarded as satisfactory.

The Canadian bank statement for July, 1907, showed total assets of \$956,661,776, compared with \$958,342,255 in the previous month. The total liabilities for July, 1907, were \$780,030,584; in the previous month the liabilities amounted to \$781,075,593. The notes in circulation amounted to \$77,604,170 in July, 1907, and to \$75,510,402 in June. Deposits payable on demand totalled \$166,352,146 in July and \$170,042,326 in May.

*Canadian revenue.*—Canadian revenue during August, 1907, amounted to \$9,364,517.31. For the five months ending August 31, 1907, the total revenue was \$41,656,405.92. The expenditure on capital account for August amounted to \$2,448,258.21.

## Notes.

The first convention of Builders' Exchanges of Canada was held at Toronto.

An association to be known as *The Canadian National Association of Builders* was organized.

The first annual convention of the *Saskatchewan Municipal Union* was held at Regina, Sask. The *Ontario Municipal Association* also held its annual meeting at Toronto, Ont. The *Union of Canadian Municipalities* met at Port Arthur and Fort William, Ont. †

The Nova Scotia government has appointed a commission to investigate the subject of *old age pensions*. The commission, the appointment of which bears date of August 15, consists of the following gentlemen: Walter Crowe, Sydney, N. S., chairman; Stephen B. McNeil, Glace Bay, N. S., Robert Drummond, Stellarton, N. S., and William Hodge, Springhill, N. S.

The annual meeting of the Maritime

†A special report of proceedings is published elsewhere in the present issue.

Board of Trade was held at St. John, N.B., August 21-23. The subjects of immigration, technical education, the lobster fisheries, transportation and general industrial conditions were dealt with. Other conventions held during the month were as follows: The Photographers' Association of Canada, at Toronto, Ont.; the sixth annual Canadian convention of Master Bakers, at Toronto, Ont.; the annual meeting of the Boot and Shoe Manufacturers' Association of Canada, at Quebec, Que., the fifteenth annual convention of the International Railway Master Blacksmiths' Association at Montreal, Que.; the annual Canadian Union Meeting of the Brotherhood of Locomotive Firemen and Enginemen at Hamilton, Ont.; the annual convention of the Canadian Association of Stationary Engineers at Guelph, Ont., and the eighth annual convention of the International Union of Boot and Shoe Workers at Toronto, Ont.

## II. REPORTS OF LOCAL CORRESPONDENTS.

### SYDNEY, N. S., AND DISTRICT.

*Mr. John Moffatt*, correspondent, reported as follows:

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during August was active. The large industries were all busy, and activity was the rule in every trade throughout the district and province, Springhill excepted.

The steel industries were unusually active, four furnaces being in operation at the Sydney works during part of the month. This increased the output and kept every department in continuous operation. The ore supply, which for some time was suspended owing to the burning down of the piers at Wabana, is being delivered as before. The Nova Scotia Steel Works Company maintained a steady output. This company's coal output is about the same as in 1906.

The Dominion collieries were active, heavy shipments being made. The large

heaps at the banking stations have been filled away; this will affect fall shipments, but the output may increase from September 1 to the end of the shipping season. Inverness collieries were very active; and will probably show the largest gains of any in the Province. Port Hood has been running well up to 400 tons a day. The Mabou collieries were fairly active. Pictou collieries were very busy and are likely to continue so. All of the Cumberland collieries were active except those at Springhill, where a strike has existed since August 1.

Newcastle colliery at Port Morien will increase its output; new machinery has been installed and extensive repairs are being made to the breakwater and shipping piers. The Morien district has been thoroughly prospected during the summer and an abundance of coal was reported.

The building trades were busy, unusual activity prevailing in the Sydney Mines district. Besides the erection of public buildings, eighty private dwelling houses are being constructed there.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Crops were good and the harvest will be larger than was expected earlier in the season. During the latter part of the month good weather for hay-making prevailed.

*Fishing.*—The coast fisheries have slightly improved. Deep sea fishing yielded large returns, being the best in several years.

## CONDITION OF PARTICULAR TRADES.

The different skilled trades were active during the whole month. Traffic was very heavy, with unskilled labour in demand.

## WESTVILLE, N. S., AND DISTRICT.

*Mr. Thos. Hale, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were active, the mines being exceptionally busy, though the output was somewhat retarded by the holidays. Many left for the Western harvest fields, the majority being young men. This reduced the working force at the collieries, but the loss was to some extent made up by an influx of workmen from Springhill who are out on strike. There were no changes in rates of wages or hours of labour, and no strikes or lockouts reported.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy harvesting the hay crop. New potatoes, beets, turnips and other products of the farm were on the market, and met with ready sale at good prices. The hay crop in this district is light, but the grain and root crops, with a few exceptions, will be very good.

*Lumbering.*—The industry was somewhat quiet, with the usual staff employed preparing pit timber, etc., while others were employed hauling the winter cut of deals to the nearest ports.

*Manufacturing.*—The Trenton Steel works were very busy. The Sutherland Rifle Sight Manufacturing Company is being retarded by the non-arrival of machinery. The construction of the water extension is progressing fairly well, but is being delayed by a shortage of labour. The contractor is offering \$1.60 per nine hour working day.

*Mining.*—The mining industry was very busy, with the average output well maintained. The production of the Drummond colliery for the month of July amounted to 24,947 tons of coal; 614 tons of coke, and 110,000 fire bricks. The company's pay-roll was about \$40,000.

## HALIFAX, N. S., AND DISTRICT.

*Mr. A. J. Smith, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during August was very active, being fully as active as the previous month. Arrangements for the coming annual exhibition gave employment to a number, and the outlook was very favourable. A strike of longshoremen employed in loading a steamer at Pickford & Black's wharf, occurred at noon Monday, August 27th, because the company employed a non-union man. The men, sixty in number, were engaged in discharging cargo from the *Kathinka*, which arrived in port Sunday from Santiago, Jamaica, and the West Indies with a general cargo, including a large quantity of fruit and other perishable goods for the road. The men claimed that when the recent agreement was made, it was understood that non-union men were not to be employed, while on the other hand the company claimed that the agreement referred only to the question of pay. The men remained out until Tuesday morning, August 28th, when they returned to work, the non-union man who was the cause of the strike not being put to work.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Crops will be good.

*Fishing.*—Normal conditions prevailed.

*Lumbering.*—About the same conditions prevailed as during the previous month.

*Manufacturing.*—Conditions continued about normal.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, carpenters, masons and joiners were all well employed, while painters were very busy. Plumbers were active and stonecutters busy.

*Metal, engineering and shipbuilding.*—Boiler makers, iron workers and kindred trades have been normally active.

*Clothing.*—Journeymen tailors and garment workers were fairly busy. Boot and shoe workers reported conditions normal.

*Unskilled labour.*—This class was fairly active.

## AMHERST, N. S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the past month has been very active. Building operations were exceedingly brisk, giving employment to large numbers of mechanics and unskilled labourers. The contract for street paving was completed, but the men thrown out of employment were readily absorbed. The strike at Springhill of 1,600 men threw a large number of labourers on the market, but no reduction in rates of wages was caused thereby. Over 500 men have already left Springhill to seek employment elsewhere. In the coal trade, employment can be readily obtained. The fact, however, that one of the chief coal areas is not producing is causing a serious loss to the town and those directly interested. The municipality of Amherst has spent about \$40,000 this year on permanent

streets and sidewalks, and a similar sum on improvements to the waterworks system and extensions to sewers. Many substantial buildings are being erected, and it is estimated that approximately \$150,000 will be spent on buildings in Amherst this year, notwithstanding the stringency of the money market.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Wet weather seriously interfered with haying. The crop this year will not average over 85 per cent. All other crops are well up to the standard.

*Lumbering.*—Heavy shipments of lumber were being made to the European market.

*Manufacturing.*—Nearly all manufacturing establishments were working both day and night. There are general complaints concerning the stringency of the money market.

*Mining.*—With the exception of Springhill, the collieries were exceedingly active. Development work is going steadily on, and the outlook for the future is exceedingly bright.

*Other industries.*—The Maritime Coal, Railway and Power Company formally opened its electrical power plant this month; the waste products of its mine at Chignecto is used for the production of power to supply the industries of Amherst. This is the first plant of its kind installed on the continent. It is thus far working satisfactorily.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Building operations continued active. The Bank of Nova Scotia is preparing a site for a new building. The Royal Bank building is nearing completion. A number of other brick and stone buildings gave abundance of employment to all members of the trade.

*Metal, engineering and shipbuilding.*—Iron workers and helpers were in demand at good wages.

*Woodworking and furnishing.*—Employment in the works of the Rhodes-Curry Company has been exceedingly active. This firm has lately secured a

number of mechanics from England and Scotland.

*Printing.*—A few printers could obtain employment in different printing establishments of the city.

*Clothing.*—Trade was reported active, with a slight demand for journeymen tailors.

*Miscellaneous.*—There was a demand for several competent barbers and furriers.

*Unskilled.*—There has been a great demand for unskilled labour in Amherst and immediate vicinity. The Maritime Railway and Power Company recently advertised for a number of this class. Men are also required by the railways for construction work. Wages are higher than during any previous year.

## CHARLOTTETOWN, P. E. I., AND DISTRICT.

*Mr. F. J. Nash, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labor market during August was about the same as in July, with supply and demand well balanced. The building of the new car shops and freight shed for the Prince Edward Island railway, the enlargement of the railway wharf, the building of the new rifle range and the completing of the Prince of Wales College, were among the more important works in progress. Throughout the province there was a good demand for labour. At Summerside, work in connection with the railway was in progress. At St. Peters Bay a breakwater has been built. At Souris a new railway wharf is under construction; and at Georgetown repairs are being made to the Local Government wharf. Wholesale and retail dealers reported trade normal.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The close of the month saw hay-making finished. The following note concerning the hay crop is taken

from the report issued by the Provincial department of Agriculture:

*Hay.*—The hay crop is better in Prince County than in Queen's or King's, but over the whole of the province it is less than a three-quarters average crop. Very little clover survived the winter. Through June the outlook was for a failure, but the showers of July improved it very much. The weather was very unfavourable for saving the crop in good condition.

The report also stated that in most sections farm help is scarce, and wages have advanced somewhat and range from 65c to \$1 per day or from \$13 to \$20 per month, with board. The average wage is about 85c per day or \$16 per month. On the 20th of the month 450 men left on the harvest excursion to the West.

*Fishing.*—The season for lobster fishing on the North side of the Island and on a portion of the South side closed the middle of July, but over a portion of the South side the factories kept running till the 10th of August. A fair amount of cod were taken but comparatively few mackerel.

*Manufacturing.*—Factories were operated under normal conditions. The cheese factories had a good month, the price being the highest received this season.

*Railroad construction.*—Work was furnished to a large number of men.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, decorators and paper hangers, plumbers, gas and steam fitters, stone cutters were active. Builders' labourers were fairly active.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers, machinists and engineers, steam engineers, linemen, sheet metal workers, bicycle workers, jewellers and watch case makers were active.

*Woodworking and furnishing.*—Wood workers, upholsterers, carriage and wagon makers and car builders were active.

*Other trades.*—Printers, pressmen, bookbinders, tailors, garment workers, boot and shoe workers, bakers, confectioners, butchers, tobacco workers, tanners, curriers, saddlers, barbers, clerks, stenographers, hotel employees and rail-

road employees of all classes were active.

*Unskilled.*—There was a good demand for men.

## MONCTON, N. B., AND DISTRICT.

*Mr. J. C. Graves, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during August showed but little change compared with July. The unusual amount of wet weather somewhat retarded farm work and building operations, though good progress was made in the various undertakings about the City and the amount of work done was much in excess of that of the corresponding month of last year. The building trades were active, many houses being remodelled, while over sixty new residences, mostly of a high grade and well constructed, were in various stages of construction. Work on water and sewer extensions and on sidewalks was also under way. Excellent progress has been made on the Intercolonial workshops. The freight-car repair shop, the planing mill and the passenger repair shop were about completed, and considerable work has been done on the construction of the stores, office building and paint shop. The large machine shop, which contains two boiler shops, each 50x375 feet, a machine shop, 176x410 feet, a locomotive shop, 80 x375 feet, and a blacksmiths' shop, 75x375 feet, has its foundations laid. Shortage of labour has retarded the work. Four hundred workmen are now employed and as many more could be given employment. The labourers had their wages increased to \$1.60 per day, from August 19. Wholesale and retail trade was rather quiet, but the real estate business was active. Rents were high with collections fairly satisfactory. The Shopmen of the Intercolonial Railway have been granted a half-day on Saturday afternoons. Relations between employers and employees have been cordial.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Hay was an average yield and the crop from the marshes promises well. The season has been bad for curing. Grain and vegetables look well, but are later than usual. Blue berries were a heavy crop, and large shipments were made. Farm labourers were scarce, their wages being \$1.50 to \$1.75 per day with board. Prices of farm produce were high.

*Fishing.*—Lobster packing has closed for the season; although the spring was late the season's catch was a good one.

*Manufacturing.*—Local factories were all working full time with the usual complement of workmen. The Textile Manufacturing Company advertised for girl weavers.

*Railroad construction and employment.*—Seventy men were employed double tracking the Intercolonial Railway from Moncton to Painsec. A new station is being built at Sackville. A large amount of repair work was being done along the line.

### CONDITION OF PARTICULAR TRADE.

*Building.*—Employment was rather quiet with bricklayers. Masons and carpenters were very active and in demand. Painters and decorators were very busy, with the supply limited. Plumbers were active. Builders' labourers had steady employment.

*Metal, engineering and shipbuilding.*—Iron moulders and helpers, electrical workers and linemen were actively employed, with blacksmiths, horseshoers and boilermakers busy.

*Woodworking and furnishing.*—All were very active, the woodworking establishments being rushed with orders.

*Printing.*—Printers, pressmen and bookbinders reported trade good.

*Clothing.*—Employment was good for the season. Garment workers were busy.

*Food and tobacco preparation.*—Bakers and butchers had active employment.

*Leather.*—Conditions were somewhat quiet.

*Miscellaneous.*—Barbers, clerks and

stenographers reported a good month. Delivery, hotel, theatre, restaurant, and laundry employees were busy.

*Transport.*—The heavy tourist traffic and the large amount of freight moving made an active month for railway crews. Carters, teamsters and expressmen were active.

*Unskilled.*—Very active conditions prevailed, and high wages were offered for competent men, the demand being in excess of the supply. The harvesters' excursion on August 20th took a considerable number west, but not as many as last season, it being estimated that about 1,800 men from the Maritime provinces have left.

#### CHATHAM, N.B., AND DISTRICT.

*Mr. Theo. DesBrisay, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Less labour was employed during August shipping lumber, but more was required for the harvesting of the hay crop. The weather in July and the early part of August retarded haying, but for the past two weeks it was warm and dry. There were no changes in rates of wages or hours of labour and no strikes or lockouts reported.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy haying. The crop was reported a good one.

*Fishing.*—The catch has been large.

*Lumbering.*—The lumber mills were all running to full capacity.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Busy conditions prevailed. Gas and steam-fitters, stone cutters and builders' labourers were active.

*Metal.*—These trades were generally busy. Iron workers and helpers, metal polishers, and blacksmiths were active.

*Woodworking and furnishing.*—Coopers were active.

*Printing.*—Busy conditions prevailed.

*Clothing.*—Journeyman tailors, garment workers, boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers, meat cutters and ice handlers were active.

*Leather.*—Leather workers, saddlers, trunk and bag makers were busy, and tanners and curriers active.

*Miscellaneous.*—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees, and laundry workers were busy.

*Transport.*—Busy conditions prevailed in all branches.

*Unskilled.*—The supply exceeded the demand.

#### ST. JOHN, N. B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active. A scarcity of unskilled workmen and farm labourers has been felt. Messrs. Flood and Bates have been awarded the contract for the erection of a flour warehouse in connection with the I. C. R., at York Point Slip. The building will be 202 x 140 feet, and will be completed this fall. Rapid progress is being made with the work of rebuilding Union street, St. John West. A new warehouse is under construction, and it is expected that the new wharf and warehouse will be ready for the opening of winter port business. The Street Railway Company opened its new loop at St. John West on August 17. On the 20th of August, 2,500 young men from all parts of the Maritime Provinces left for the Canadian Northwest on the C. P. R., farm labourers' excursion. Bank clearings for the five weeks ending August 22nd were \$6,811,484, and for the corresponding period last year, \$6,195,667, being \$615,817 greater in 1907 than in 1906, and \$2,612,086 greater than for the three weeks ending July 18th of the current year.

## CONDITION OF LOCAL INDUSTRIES.

**Agriculture.**—The auction sale of horses imported by the New Brunswick government took place at Fredericton, July 31. Twenty animals were disposed of, including fourteen Clydes, five Percherons and one French coach mare. The total proceeds of the sale amounted to \$6,065, an average of \$303.25 for each animal. Under the terms of the sale the horses must be kept in the province for breeding purposes at least five years, and they can be sold to parties outside the province after that time only with the consent of the governor-in-council. The Deputy Commissioner of Agriculture has gone to the Toronto fair to purchase sheep for the provincial government. Men were scarce, and as high as \$35.00 was paid for good hay-makers. The continued wet weather interfered considerably with hay-making, and it is feared that the potatoe crop will suffer in consequence of so much rain.

**Fishing.**—The salmon fishing has closed, and the record of the season's catch is not yet obtainable, but the fishermen have not done so well as during the past few years.

**Lumbering.**—Employees of the St. John River Log Driving Co., at the Michel and Douglas booms, made, during the month of July, a record for rafting operations. The water conditions at the Michel boom aided greatly in the work there, but the exceptionally high water made the currents at the Douglas boom too swift for the fastest work. In all, 46,945,080 feet of logs were rafted during the month of July at the two booms and Springhill. This, added to 37,886,372 feet rafted up to the end of June, shows a total of 84,831,452 feet rafted this season to date.

Lumbermen unite in the opinion that there will not be more than sixty or seventy per cent of the lumber cut on the St. John river this coming winter, that there was last season. It is expected that \$30.00 will be the average wage paid.

## CONDITION OF PARTICULAR TRADES.

**Building.**—Bricklayers and masons, carpenters and joiners were busy. Pain-

ters, plumbers and gas fitters, and builders labourers were active.

**Metal, engineering and shipbuilding.**—Iron moulders, iron workers and helpers machinists and engineers, electrical workers and linemen, blacksmiths and boiler-makers were busy. Steam engineers and sheet metal workers were active.

**Woodworking and furnishing.**—Woodworkers and shingle weavers were busy.

**Printing and allied.**—Printers, bookbinders and pressmen were active.

**Clothing.**—Journeyman tailors were busy.

**Food and tobacco preparation.**—Bakers and confectioners were busy, and cigar makers active.

**Miscellaneous.**—Brush and broom makers were busy.

**Transport.**—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen, freight handlers, steamboatmen and firemen were busy. Ship labourers were active. Street railway employees were busy.

**Unskilled labour.**—This class was busy.

## DISTRICT NOTES.

**Fredericton.**—The Monitor Manufacturing Company is being organized to manufacture acetylene gas generators and other acetylene appliances. The company will have \$25,000 capital. Almost \$50,000 in taxes was paid in up to the close of the discount period. This is the best showing in the history of the city.

## QUEBEC, QUE., AND DISTRICT.

*Messrs. P. J. Jobin, and E. Little, correspondents, reported as follows:—*

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour of all classes was well employed during August, though outside work was interfered with by rainy weather in the early part of the month. The demand for unskilled labour was, on the whole, in excess of the supply. In the building trades also the only time lost

was occasioned by unfavorable weather and men were in demand. Skilled workmen in many cases were receiving more than the union scale. The number of tourists was exceptionally large, hotels being taxed to their full capacity. There was a disagreement between the structural iron workers employed on the Quebec bridge and the Phœnix Bridge Company; the men returned to work on the 12th of August the matter having been amicably adjusted. (\*). The royal mail steamer "Empress of Ireland" made the passage from Liverpool to Quebec in August in six days, 9 hours and fifty minutes, the fastest on record. The new detention hospital for immigrants, 150 feet by 50, with accomodation for 350 inmates, is expected to be completed within a few weeks, a large staff of men being at present employed on the building.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Hay was a very heavy crop, but the farmers had difficulty in saving it owing to the wet weather. Grain crops promise unusually well; the yield will exceed the average with favourable weather conditions. Root crops are promising.

*Lumbering.*—The large mills were working to full capacity and will have difficulty in completing the cut before the frost sets in. Men were reported scarce, though wages ranged from 15 to 25 per cent higher than last year. There has been a tendency in the mills towards the adoption of 10 or 10½ hours per day in place of the 11 hour day which prevails in the majority of the establishments.

*Railway construction.*—The new Gosford branch of the Lake St. John Railway was opened on August 1.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The various branches were busy.

(\*) A special article is published in the present issue dealing with the disaster which occurred at the Quebec bridge on August 29, and which resulted in the death of sixty-three workmen, the serious injury of eleven, and the destruction of the portion of the bridge which had been erected from the southern shore of the St. Lawrence.

*Metal, engineering and shipbuilding.*—All classes were active.

*Printing.*—Printers and pressmen were very busy; bookbinders were busy.

*Clothing.*—Tailors were active but boot and shoe workers were somewhat quiet, a number of the factories working less than full time.

*Food and tobacco preparation.*—A busy month was reported.

*Leather.*—Quietness prevailed.

*Miscellaneous.*—Barbers, delivery employees, hotel and restaurant employees, laundry workers, etc., were very busy.

*Transport.*—Railway employees and steamboatmen were busy. Ship labourers and longshoremen were on the whole quiet, though busy at intervals. Cab drivers, street railway employees, etc., were very busy.

*Unskilled labour* was very busy.

#### SHERBROOKE, QUE., AND DISTRICT.

*Mr. H. Logie, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was in demand during August. Unskilled labour in some cases could not be obtained. Machinists found ready employment at the Rand Drill and Jenckes machine shops. Carpenters were greatly in demand at the exhibition grounds where a number of new buildings were being erected for the coming Dominion Exhibition. The E. & C. Fairbanks Company, of St. Johnsbury, Vt., which will establish a branch of its industry here has staked off the ground for its shops, and expects to begin shipping goods by the first of next year. This company has been incorporated in Canada with a total capital of \$150,000, its chief place of business being Sherbrooke. In addition to a number of other dwellings, several houses are being erected in the south ward for workmen. The contract for the building of the Young Men's Christian Association has been let, and work commenced, the building will cost approximately

\$20,000. Wholesale and retail trade was busy. There has been no unrest in the labour market.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Wet weather greatly inconvenienced the farmers, and the hay crop suffered materially. The grain and root crops promise well. There was a great scarcity of farm help.

*Manufacturing.*—All branches were busy. The woollen mills, and Carpet Company were running full time with plenty of orders ahead.

*Mining.*—The industry was very busy and in need of more men.

*Railroad construction and employment.* The railway companies were giving full employment to a large number of men at repairing tracks. The Quebec Railway Company is building a new station at Thetford Mines.

#### CONDITION OF PARTICULAR TRADES.

The various skilled trades were very busy. Unskilled labour was busy.

#### DISTRICT NOTES.

*Cowansville.*—A by-law to encourage the establishment of the Celluloid Advertising Company was carried.

*Beebe Plain.*—The Canadian Granite Cutters' Union, organized lately with head-quarters at Beebe Plain, has been incorporated under a Dominion charter, granted under the Trades Union Act of Canada. The names on the charter were as follows: Arthur Jones; James Clarke; John Clarke; Joseph Earl; Hans Simonson; George Smith, and Charles Vezina. All of the granite cutters employed by the Stanstead Quarries Company, numbering between 70 and 80 workmen, are said to have joined the union, and the workmen employed in the other quarries in Beebe Plain and at Graniteville are reported to have made application to join the union. An interesting clause in the constitution of the union, is that which aims to prevent strikes and lockouts where the union is recognized. The clause in

question provides that "when an amicable arrangement cannot be reached after negotiations a Board of Arbitration shall be appointed in the usual way, the decision of which shall be binding on both parties." The charter gives to this Union powers to form branches throughout the Dominion. The officers of the Union are: Pres. John Clarke; Vice-pres. Hans Simonson; Treasurer, J. Johns; Secretary, A. Jones and assist. secretary, G. C. Mackie. It is noteworthy that the number of new charters issued under the act is eight to date.

#### ST. HYACINTHE, QUE., AND DISTRICT.

*Mr. V. Phaneuf, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Favourable conditions prevailed in the labour market, though the building trades were dull. Sash and door factories were very busy. Boot and shoe factories were somewhat quieter than in the preceding month. The organ factory was very active, overtime being necessary to keep up with orders. In the leather industry, the month was quieter than the previous one. The iron working establishments were very busy and had good prospects for the future. The corset factory was very active. Prospecting for petroleum and natural gas in the grand range of St. Francois was commenced in the last week of the month, and borings will be made by a large gang of men. Artesian wells in this locality have reached, at a depth of sixty feet, a supply of natural gas. Traces of natural gas were also found in the parish of St. Barnabé north of St. Hyacinthe and prospectors have secured prospecting permits from the owners of the land.

The draining of the King's highway in front of the dairy school and the property of the local government will be done in the fall. Business was generally active. Banks reported favourable conditions. There were no changes in wages or hours and cordial relations continued between employers and employees.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers expect a good crop. Harvesting made rapid progress the fine weather assisting operations. Garden produce brought good prices.

*Manufacturing.*—Manufacturing establishments of all kinds had steady work; activity is expected next month.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters and joiners had an active month. Painters and paper-hangers had a fair month. The other branches were dull.

*Metal, engineering and shipbuilding.*—Active conditions were reported.

*Woodworking and furnishing.*—Woodworkers, upholsterers, wood carvers and pattern makers were active. Carriage and wagon makers were busy.

*Printing.*—These crafts were very active, with overtime prevailing.

*Clothing.*—Journeymen tailors and garment workers were very busy; boot and shoe workers were dull.

*Food and tobacco preparation.*—Activity prevailed.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and restaurant employees, and laundry workers had a good month.

*Transport.*—Busy conditions prevailed.

*Unskilled labour.*—This class was fully employed.

## DISTRICT NOTES.

*Sorel.*—The steamer "Emelia" of the Canadian fleet was docked at St. Joseph for repairs. The steamer "Woburn" discharged during the last week of the month 2,400 tons of coal for the vessels of the fleet of the Marine Department at Sorel. The city council is giving employment to a number of men. The contract for repairing the wharf at the confluence of the Richelieu and St. Lawrence Rivers has been awarded, the amount being \$125,000.

*Acton.*—A new firm to be known as the "Acton Shoe Company" has been registered in the prothonotary's office.

*St. John.*—The construction of the

new post office building is being forwarded rapidly, the contractors being required to deliver the building next spring. The interior is to be completed before the fall. Activity has been general. The Singer Manufacturing Company has been in full operation.

*Roxton Pond.*—The building of the tool factory was commenced. The new industry will give employment to hundreds of men.

## MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Pelletier, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Mid-summer sales of realty on the Island of Montreal amounted to \$2,781,501 during July of which the major portion represented sales in the City of Montreal, transactions there amounting to \$2,198,434. Westmount sales amounted to \$160,100. In other localities the sales were as follows:—Longue Pointe, \$19,539; Maisonneuve, \$45,219; Delorimier, \$29,787; St. Louis, \$174,055; Outremont, \$31,244; Maplewood, \$61,632; Cote des Neiges, \$600; Notre-Dame de Grace, \$4,987; Westmount Plateau, \$2,398; Montreal West Junction, \$6,425; Verdun, \$29,571; and Cote St. Paul, \$17,010. There were 329 real estate transfers in the City ward and town of Westmount recorded at the registry office during July. These returns are in excess of those of any previous year. The firm of Viau & Brother has completed its establishment at Maisonneuve, and will give employment to over 300 workmen. The Slater Shoe Manufacturing Company has had improvements and additions made to its extensive factory.

## CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were busy, being more active than in the corresponding month of last year.

*Metal, engineering and ship building.*—These trades reported active employment.

*Woodworking and furnishing.*—All were well employed. There was a slight demand for skilled workmen in some of the woodworking branches of the trade. Carvers, cabinet makers, etc., had fairly active employment.

*Printing.*—Active conditions prevailed.

*Clothing.*—The Clothing Trades were affected by the strike of the garment workers, 500 of whom are out on strike for the abolition of the "Sweating System" and other causes. The strikers made the following demands:-

1. Abolition of the piece work system.
2. Fifty-five hours for men and fifty-one for women to constitute a week's work.
3. Work to be paid for on a sliding scale basis.
4. Wages to be made up by competent foreman, and all work to be taken out of the hands of contractors.

*Food, and tobacco preparation.*—All in these trades were busy.

*Leather.*—Tanners, trunk and bag makers had active employment.

*Miscellaneous.*—Hotel and restaurant employees were well employed owing to the large tourist traffic. Delivery employees were quiet.

*Transport.*—Work on the wharves was hampered by a strike of over 150 long-shoremen employed at unloading coal. They asked for the immediate payment of the bonus of 2½ per cent promised in the agreement of July. Their demand was granted and they returned to work.

*Unskilled.*—The demand for this class has fallen off somewhat.

## HULL, QUE., AND DISTRICT.

*Mr. Rodolphe Laferrrière, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

Very busy conditions prevailed during August, and prospects were for their continuance for several months, work being plentiful and no willing hands needing to be idle. The pulp and paper industry, of which Hull has perhaps the largest mills in Canada, has been very busy, but was hampered by the lack of motive power, owing to the low level of the

water. Factories were taxed to their utmost, and could not meet the demand for paper and pulp. A scarcity of raw material also prevailed. The production of cement has also been inadequate, and the International Portland Cement Company was endeavouring, by working 24 hours a day, with a full complement of hands, to meet the requirements of the market. Most of the production was supplied to the Canadian Northern Railway Company for building purposes between Rockland and Ottawa, and to the government contractor of the National Museum in Ottawa. The Eddy match shop, after the usual yearly two months' vacation, given to its staff of 200 hands, resumed operations during August

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farm hands were very scarce, \$15.00 per month being offered for boys.

*Lumbering.*—The lumber mills, both in Hull and throughout the district, were very busy, activity increasing as usual with the approach of fall. Shipments by water were increasing, having been rather dull owing to the increasing shipments by rail. The demand for lumber was very great, and stocks will be low in the local yards by the end of the year. Culls sell in Ottawa at \$16 and \$18 per 1,000 feet which sold last year at \$7.00. A good class of pine lumber for building purposes on the American market sells at \$27 per 1,000 feet. Although the opening of the cutting season was about two weeks late, the average cut of about 500,000,000 feet will be recorded in the Ottawa Valley. Wages for shantymen showed a 25 per cent. increase over last year, and are as high now as three years ago, when they reached the record. Hands are not easily available, but notification was received from a labour employment bureau in London, Eng., that squads of selected Englishmen would be sent over this fall. Winter wages for shantymen during the coming season will be \$28 to \$32 for road cutters, as against \$22 to \$26 last year. Teamsters, choppers and sawyers will be paid \$35 per month, and general hands \$34, which

is equivalent to \$2 per day, the price that is being paid on railway construction.

*Mining.*—Prospecting was very active throughout the whole district, about 200 prospectors from the cities of Hull and Ottawa, besides the country people, being at work. Operations were being carried on at present in the northern part of the County of Pontiac, adjoining the southern part of the County of Wright and good mica deposits have been discovered.

### OTTAWA, ONT., AND DISTRICT.

*Mr. W. Gilchrist, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The demand for farm help and shanty-men during August made the market active for unskilled labour. Wages on farms have gone as high as \$1.75 per day with board for temporary employment. Lumbermen are sending crews to the shanties at an average of \$32 per month. Manufacturers of lumber were giving their men steady work, even when they had to borrow logs to keep the mills fed, lest workmen would not be available when wanted. Building continued active. More than the usual quantity of corporation work was going on. Business men reported buying active, high prices ruling for all food products.

The Universal Skirt Company has assigned for the benefit of its creditors. The company was engaged in the manufacture of skirts, and during the several years it has been in business has employed about 40 hands, chiefly girls.

The Library Bureau of Canada, whose factory was destroyed recently by fire, will shortly begin the erection of a new factory.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The month was busy for farmers and market gardeners. Fruit and vegetables were about three weeks late, and the yield nowhere was large.

Apple trees promised better than in many other parts of Canada, and the crop in the Ottawa district will not likely fall much behind last year. The hay yield was light, but better than was expected earlier. There is some uncertainty still as to grain. In the meantime prices are very high, oats on the local market bringing 55 cents a bushel. Eggs are much above the usual price at this time of year. The condition of the dairy farms supplying Ottawa with milk is reported by the city health officer to have improved much since the public inspectors began to instruct the farmers and make regular visits.

*Lumbering.*—Manufacturers were favoured with a better water supply than a year ago. This helps both the drive and the mills depending on water falls for power. There are about eight million pieces of timber in the Ottawa river which is considerably more than last year. With one or two exceptions, all the mills have been evenly supplied, and none had to close down for want of logs. Shipping was very active, prices inclining upward. The pulp and paper industry was very active. The export of paper to Europe has increased greatly on account of strikes in the Scandinavian mills.

*Railroad construction.*—The Grand Trunk Railway Company has decided to build a central station and a hotel in this city, each to cost in the neighbourhood of \$1,500,000. Owing to the increase in business, the capital stock of the Ottawa Car Company has been raised from \$250,000 to \$1,000,000. The company is building 50 cars of the most modern type for the Montreal Electric Railway. There are also 12 single truck cars under construction for the Ottawa Electric Railway.

#### CONDITION OF PARTICULAR TRADES.

*Printing and allied.*—There was marked activity in these trades. Linotype operators were very scarce.

*Clothing.*—Journeymen tailors were busy. The supply of garment workers was scarcely equal to the demand. Boot and shoe workers had steady employment.

*Food and tobacco preparation.*—Hands employed in the preparation of food were busy all month.

*Leather.*—An improvement has taken place since early summer. Encouraging reports of the crops revived orders for harness, and few leather workers were idle.

*Miscellaneous.*—The scarcity of expert barbers was marked.

*Transport.*—The month was active in all classes. Lumber shipping became brisker, and those engaged in handling passenger traffic were in the busiest period of the year. There was corresponding activity in freight traffic. The local superintendent of the C. P. R., reported an increase in passenger and freight traffic compared with the corresponding period of last year. The holding of the Old Boys' Re-union in Ottawa, which was attended by 10,000 or 12,000, increased the activity of transportation employees.

*Unskilled labour.*—A keen demand was noticed for unskilled labour. The corporation had about 400 men engaged on street improvements, and others were employed in similar work by private contractors.

## KINGSTON, ONT., AND DISTRICT.

*Mr. Wm. Kelly, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was active during August. Work was begun on the erection of a number of new buildings; the season in the building trades promises to be above the average. The work of putting down new cement walks was steadily progressing, the City Engineer's Department having two gangs at work. Number of other public works were also under way. It is stated that the Grand Trunk Railway Company is about to proceed with the construction of a line between Kingston and Ottawa.

At the half yearly meeting of the Kingston and Pembroke railway direc-

tors it was decided that improvement work, will be continued to the end of the season.

Collections at the Inland Revenue office for July were as follows:—Spirits, \$5,580.25; malt, \$8,780; tobacco and cigars, \$402.20; bonded factory (Vinegar), \$95.68; methelated spirits, \$144.53.

The Temiscaming and Northern Railway Company Commission has let a contract for 6 new engines to the Kingston Locomotive Works.

During the year, great improvements have been made to the city's light plant. New machinery has been installed, a new building put up, and the list of gas and electric services greatly increased. A new telescope gas tank with a capacity of 150,000 cubic feet is now being installed, and will be ready for its final test in a few weeks. New electrical machines of the latest design have been put in to carry the increased load. During the past six months 140 new gas services have been put in. Among other new features, the prepaid meter has been introduced.

Never before in its history has the Government dry-dock been so busy as this year. Vessels have been docked steadily since April 2. When the dock was built provision was made for placing the gate 20 feet further out so that the largest boats plying here could be docked. For the first time the extreme length of the dock is being used. A vessel 339 feet long can now be docked. There were no strikes, lockouts or changes in rates of wages or hours of labour.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy. Hay will be a failure in this district, but splendid crops of grain, root, apples, etc., are reported.

*Fishing.*—Somewhat dull conditions prevailed.

*Lumbering.*—Quiet conditions prevailed.

*Manufacturing.*—Conditions were active.

*Railroad construction and employment.* Construction work was active.

## CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades continued to be actively employed in all branches. This condition applied to all branches of the *Metal, shipbuilding, woodworking and furnishing trades.*

*Printing and Clothing.*—These trades were busy.

*Food and tobacco preparation.*—Bakers, confectioners, butchers, icehandlers and cigar makers were active.

*Leather, miscellaneous, and transport.*—Active conditions prevailed in all branches.

*Unskilled.*—This class was in demand.

## BELLEVILLE, ONT., AND DISTRICT

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

August, 1907, was the most active month in many years for labour in nearly all branches of industry. Building operations on a large scale were being carried on in the City and surrounding district. At Ox Point, the new Cement plant provides employment for nearly 400 workmen. Prospects for both roots and grains were bright. The price of cheese has advanced. Mechanics and unskilled labourers had plenty of work at wages that have not been so high in years. Merchants reported trade in excess of former months. All the canning factories were running to full capacity, the crop of pease, corn and tomatoes being large. Much needed showers fell during the latter part of the month, and greatly improved the crops. Work on the new Isolation Hospital was begun giving employment to a large number. The rolling mills, the Belleville Hardware Company, and the various factories and machine shops were busy. Deacons' shirt factory was employing a large staff of workmen; the firm was advertising for men. Work on the new drill hall, the "Hotel Quinte", the Public Library and the Farmers' Bank kept large numbers of both skilled and unskilled labour

employed. A large number of workmen were renovating the City Hall building, both inside and outside. The hay and clover crops were poor this year, and prices are higher. There were no changes in rates of wages or hours of labour; and no unrest in the labour market.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Fruit of all kinds promises to be a splendid crop. Apples especially were looking well. All grains look well, except hay and clover, which will scarcely be up to the average.

*Fishing.*—Conditions were somewhat dull.

*Lumbering.*—This industry was very active, but is decreasing each year, only one drive came down the Moira river this season.

*Manufacturing.*—Active conditions prevailed in nearly all branches.

*Mining.*—This industry was very active.

*Railroad construction and employment.*—Fairly active conditions prevailed.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Every member of the trade was actively employed, with splendid prospects for a busy season.

*Metal, engineering and shipbuilding.*—Iron moulders, machinists, engineers, metal workers, rolling mill employees of all classes, boilermakers and blacksmiths had a very busy month. Horse-shoe makers, employed in rolling mills, were working day and night, a new furnace having been added. Bicycle workers were busy.

*Woodworking and furnishing.*—All branches had a busy month. Some factories were short handed and overtime was being worked in many shops. Coopers were busy making cheese boxes and apple barrels. Car builders at Deseronto were very active.

*Printing.*—Printers, both on job and newspapers, pressmen and bookbinders reported the month as busy as the corresponding month last year. All members of the craft were working.

*Clothing.*—Journeymen tailors reported a fairly busy month.

*Food and tobacco preparation.*—All branches reported a splendid month.

*Leather.*—Conditions were somewhat dull.

*Miscellaneous.*—Barbers were busy but clerks and stenographers found employment somewhat dull. Hotel, restaurant and laundry employees were active.

*Railroad construction and employment.*—Railway employees had an active month, and steamboatmen a very active one. Tourist and excursion parties kept all steamboats busy.

Vessel owners reported business the best in years. Cabmen, draymen, teamsters all had a busy month.

*Unskilled.*—This class was in good demand at high wages.

#### PETERBOROUGH, ONT., AND DISTRICT.

*Mr. W. J. Johnston, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour has not varied from that of last month. Building activity has somewhat declined especially on houses. The heavy influx of immigration has over-crowded the labour market. Later on work will become more brisk as a number of large buildings now underway will be ready for woodworkers. The dredging of the channel of the Otonabee river is still being carried on giving employment to a large staff of men. The Bell Telephone Company is busy building conduits under ground. The erection of the new Collegiate Institute, Normal school and armouries is being hurried to completion. The laying of granolithic sidewalks, the building of new sewers and the laying of waterwork piping provided work for the labourers. Goods for the fall trade were being imported by retail merchants.

The Cavan swamp drain work provides considerable employment. When completed large tracts of land will be drained and used for growing grain, and pasture.

Grafton & Company have decided to close their place of business on Saturday evenings at 10 o'clock instead of 11 o'clock, as heretofore. Wholesale and retail trade was active during August. Wages and hours of labour were unchanged, and no unrest was reported in the labour market. Banks reported business fair.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Work consisted mainly in harvesting the grain crop.

*Lumbering.*—The lumbering industry has been very active, the companies here doing a large export trade. The Charlton Lumber Company's season's cut consisted of 300,000 logs, equivalent to 12,000,000 feet of lumber.

*Manufacturing.*—All establishments were very busy, employing full staffs and running full time.

*Mining.*—The opening of the iron ore mines at Marmora will greatly increase mining activity in this vicinity.

*Railroad construction and employment.* The Ballasting of roadbed and general section work were employing large forces of men.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All were actively employed. Carpenters and joiners, painters, etc., were busy.

*Metal, engineering and shipbuilding.*—Iron moulders, workers and helpers, machinists and engineers, steam engineers, electrical workers and linemen were busy, and brass workers of all kinds very busy. Blacksmiths, boilermakers, shipworkers, on repairs and remodelling, sheet metal workers, bicycle workers, tool sharpeners, horseshoers, jewellers, etc., found employment active.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers were busy, and carbuilders, on repairs work, were actively employed, as were pattern makers and coopers.

*Printing.*—The allied trades were well employed, notwithstanding that August is always considered a slack month on account of the holiday season.

*Clothing.*—These trades had active employment, excepting hat makers, who found conditions dull.

*Food and tobacco preparation.*—All were actively employed, with ice-handlers very busy.

*Leather.*—Active conditions prevailed.

*Miscellaneous.*—All experienced active conditions. Theatre employees became active towards the end of the month. Laundry workers were very busy.

*Transport.*—Railway employees were never more active in every department, freight and tourist traffic being very heavy on all lines. Steamboat workers of every class had a very busy month. Street railway employees, cabmen, hackmen, carters and draymen were very busy, and teamsters busy.

*Unskilled.*—This class was actively employed.

#### DISTRICT NOTES.

Work throughout the district consisted mainly of harvesting and threshing the grain, the crops turning out well. The apple crop is expected to be a good one. Berries were 15 cents a quart, which is considered high. New potatoes were selling at 25 cents per peck; butter, 24 cents; eggs, 20 to 22 cents a dozen; chickens, 90 cents to \$1.00 a pair. Beef, which has been retailing at 15 to 17 cents a lb, has been reduced to 12½-15 cents a lb. There was abundance of vegetables of all kinds. Four thousand five hundred and ninety-five boxes of cheese sold for 10,  $\frac{13}{8}$  cents on the Peterborough Market. Saw and grist mills and general stores reported business very active.

*Lindsay.*—The Lindsay Cheese Board recently sold a quantity of cheese at 11 cents.

#### TORONTO, ONT., AND DISTRICT.

*M. Phillips Thompson, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Similar conditions of activity to those prevailing in the earlier part of the

season continued during August. Both skilled and unskilled labour was generally well employed, except as affected by strikes. The stringency in the money market and the disinclination of the banks to make advances except on the highest security has affected new enterprises adversely, causing delays in contemplated undertakings—and orders in some lines show a noticeable slackening. With the opening of the Canadian National Exhibition much of the unabsorbed general labour has found temporary employment, and business at the close of the month was very active.

The approximate value represented by building permits issued for July was \$1,219,435 as against \$1,193,435 for July 1906. The value of building permits issued during the seven months January-July, 1907, was \$10,239,330, as compared with \$7,391,905 for the corresponding term of 1906.

The Canadian General Electric Co., has taken out a permit for the erection of an office building and warehouse on the corner of Simcoe and King Sts. East, to cost \$180,000.

The Annual Convention of the Boot and Shoe Workers' International Union was held here during the latter part of the month. The amendment to the constitution providing that no reduction in wages should be made during the existence of the contract with their employers was repeated.

The Sixth Annual Convention of the Canadian Association of Master Bakers was held here commencing August 13th. The President's annual report approved of the establishment of a baking plant and testing apparatus in the Agricultural College at Guelph.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have been very busy harvesting, which was nearly finished by the end of the month, the season in this district being from ten days to a fortnight later than usual. Oats and hay as a rule turned out poorly, while wheat and barley were a good crop surpassing expectations. The condition of the root crops is not promising, owing

to the drought which has prevailed in most localities, and the outlook for the wintering of stock is unfavourable.

*Manufacturing.*—Activity prevailed in nearly all lines, the iron trade being especially busy and having large orders on hand. Shipbuilding was active, the Polson Co., having several large contracts under way, including a barge for the Cole-Boivin Co., of Chicoutimi, Que., to carry 350 tons, 124 ft. long and 24 ft. beam; a dipper dredge for the Dominion Government 110 ft. long 36 ft. beam, and drawing 10 ft. of water; and a new car ferry for the Canadian Pacific Railway, Company 280 ft. long, 40 ft. beam with a capacity for 16 loaded cars to ply between Brockville and Ogdensburg, N. Y. The city has also placed an order for a steel dredge.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were generally well employed, though in some cases delays were occasioned by the plumber's strike and other labour troubles. There was a surplus of labour in some branches due to immigration in the lesser skilled lines. About 250 of the striking plumbers and 25 of the electrical workers who struck in sympathy with them are still out. About 14 granite cutters employed by McIntosh & Co., struck on the 22nd claiming that they had been brought in to work for that firm under misrepresentations.

*Metal, engineering and shipbuilding.*—Blacksmiths, boilermakers, iron moulders, structural steel workers, street metal workers, electrical workers and ship builders were all busy. The members of the Machinists Union were still on strike in the larger shops and many of them have left the city. Brass workers, silversmiths and jewelry workers had plenty of work.

*Woodworking and furnishing.*—These trades had an active month.

*Printing.*—Printers and bookbinders were fairly well employed. On the 2nd the Stereotypers' Union effected an agreement with the employers, to run for five years, by which wages were increased to \$18 per week for journeymen, and \$22

per week for foremen, with an 8-hour day.

*Clothing.*—Garment workers and journeymen tailors had a good month. Boot and shoe workers, hat and cap workers had steady work.

*Food and tobacco preparation.*—These trades had continuous employment.

*Leather.*—Harness and saddlery workers were busy.

*Miscellaneous.*—Hotel and restaurant employees, barbers and laundry workers had plenty of work. and towards the end of the month were very busy. The supply of clerks, salesmen, porters and commercial help generally was in excess of the demand. On the 13th about 60 telegraph operators employed in the Great North Western office quit work, owing to the discharge of two operators who refused to receive American messages in sympathy with the strike in the United States. The Canadian Pacific Telegraph service was not affected, the operators being permitted to refuse to handle American Telegrams.

*Transport.*—Railway and steamboat employees, longshoremen, expressmen and street railway men were all busy.

*Unskilled labour.*—Was generally well employed but a number of immigrants were out of work, the tendency of many new arrivals to flock to the large centres of population was noticeable.

#### DISTRICT NOTES.

*Weston.*—G. H. Trethewey, who lately secured about 200 acres of land in York township for growing vegetables, is erecting a large canning factory to cost about \$100,000. He will also build 16 cottages for his employees.

#### NIAGARA FALLS, ONT., AND DISTRICT

*Mr. Ernest Green, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Employment was steady during August, at good wages. A building was

purchased by the Bissell Carpet Sweeper Manufacturing Company, which will establish a branch here. The building of permanent sidewalks was stopped temporarily; but other civic work was continued. Financial conditions were satisfactory, save for the general conditions ruling in the money market. Commercial conditions were also satisfactory. Another bank will be opened in this City. Traffic on the Welland Canal was very heavy. On the railways, freight traffic was heavy, and passenger traffic very large. A large plant for preserving and canning fruit and vegetables will be established here. Fires destroyed stores and barns in the City, the loss being estimated at \$5,000; cottages at Crystal Beach, loss \$12,000, and a boarding-house at St. Davids, loss, \$3,000, were also destroyed. Some damage was done at Humberstone by marsh fires.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The fruit crops will be light.

*Manufacturing.*—Industrial establishments were all running full time with full staffs.

*Transport.*—Railway employment was good. Not much construction was going on, but existing lines were being extensively improved. The Michigan Central Railway Company was ballasting its main line. The Niagara, St. Catharines and Toronto Railway Company purchased the right-of way from Welland to Port Colborne.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All were fairly busy, though at times there were a few carpenters out of employment.

*Metal, engineering and shipbuilding.*—Workmen were actively employed. Linemen were particularly busy.

*Printing.*—Printers found active employment.

*Food and tobacco preparation.*—Large numbers of men, women and children were working in the fruit canning factories. More people were being employed in these industries than ever before, but

the season will be shorter because of the small crop.

*Miscellaneous.*—Hotels and restaurants were very busy, with employment plentiful.

*Transport.*—Railway and steamboatmen were all actively employed. Trackmen were especially busy. Electric railway men were also busy.

*Unskilled.*—This class was well employed.

#### DISTRICT NOTES.

*Fenwick.*—A fruit evaporator is being erected.

*Port Colborne.*—A large number of men were employed on the new cement work's building. This plant is expected to be running early next year. The lime works were being enlarged.

*Pelham.*—Franchises for an electric power and light business have been granted by the Township Council to two companies.

*Bridgeburg.*—At the shipyards, the steel hull of a 9,000 ton vessel, 510 feet long, was ready for launching. About 400 workmen were employed.

*Welland.*—The foundry of the new plant of the Ontario Iron and Steel Company was put in operation; its capacity is estimated at 110 tons per day. Crowland Township proposes to bonus a bag manufacturing factory. Railway sidings were being built to the new factories. The concrete work of the turning basin was finished. The town tax rate for this year was fixed at 25 mills on the dollar. A trunk sewer system is being planned. Another bank will be opened here. Fire destroyed the Methodist church and damaged the street steam roller, the loss being about \$1,300.

#### ST. CATHARINES, ONT., AND DISTRICT.

*Mr. Jas. A. Wiley, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

During August the activity of the labour market was less pronounced than

in July. The stringency in the money market was felt in the lessened activity of many branches of business and industry. Building operations, which have been extensive during the past few years, are much less active this season. The high price of building material, it is stated, has checked work in this connection. Owing to the influx of immigration, the supply of labour has been greater than the demand in the building trades. The construction of the Lake street sewer was completed this month. The Ontario street pavement will furnish work for the fall. The Bell Telephone Company is removing the poles from St. Paul street, and adopting the underground system. A new company, the J. B. Dolin Woollen Company, has started operations, with about 40 hands employed. A branch of the Bank of Nova Scotia was opened. The contract for the building of a new business block was let. There was no unrest in the labour market.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were very favourable for an abundant crop of grapes and a fair yield of other products.

*Manufacturing.*—Most of the mills and factories were running full time, but a few were somewhat slack from seasonal causes. The canning factories were all busy, with full staffs employed.

*Railroad construction and employment.*—Construction work on the main and branch lines of the St. Catharines and Toronto railway still gives employment to large numbers of men.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades were quiet, the supply of labour more than equalling the demand.

*Metal.*—All branches were active.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers, carriage and wagon workers were active.

*Printing.*—The allied trades were active.

*Clothing.*—Journeymen tailors found

employment quiet, this being their slack season. Boot and shoe workers had active employment.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters, ice-handlers, cigar makers and tobacco workers reported trade conditions good.

*Leather.*—Tanners, curriers and leather workers were active.

*Miscellaneous.*—Barbers, clerks, stenographers, hotel and restaurant employees, and laundry workers were actively employed.

*Transport.*—All branches were active.

*Unskilled.*—Active conditions prevailed.

#### DISTRICT NOTES.

*Thorold.*—Labour, skilled and unskilled, was active, all mills and factories running full time. The Thorold cement works are to be reopened. Good progress is being made installing the new water-works system.

*Merriton.*—The condition of the labour market continued favourable.

*Port Dalhousie.*—All classes of labour were actively employed.

#### HAMILTON, ONT., AND DISTRICT.

*Mr. Samuel Landers, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The supply of labour was somewhat more plentiful during August owing to the large number arriving, among whom were a number of skilled workmen. There was a shortage of houses suitable for workmen at a nominal rental. The F. F. Bird Company, paper makers, has purchased building lots near its plant at a cost of \$2,500 upon which to erect houses for its employees. The Deering Harvester Company has built 150 houses and sold 75 of them to its employees at a trifle above cost. Assessment Commissioner, McLeod, is encouraging the building of workmen's houses to be rented at a reasonable rent. A new company to manufacture paint will be started shortly; it

is capitalized at \$50,000. The Eagle Knitting Company is contemplating the erection of another large factory; the new premises will cost in the neighborhood of \$75,000.

The International Brotherhood of Locomotive Enginemen and firemen held a convention in Hamilton at which over 400 delegates were present. Manufacturing, wholesale and retail trades were very active. Bank clearing, customs revenue, etc., were up to the average. There were no change in rates of wages or hours of labour.

#### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Active condition prevailed in all industrial establishments.

*Railroad construction and employment.*—Several hundred workmen are still being employed on the construction of the Hamilton and Brantford Electric Railway, grading and laying tracks; it is expected that the road will be opened for traffic before Christmas. A good deal of heavy blasting is being done. The Grand Trunk Railway Company is relaying its double track between Hamilton and Toronto, with extra heavy steel rails weighing 100 pounds to the yard.

#### CONDITION OF PARTICULAR TRADES

*Building.*—All branches were actively employed, excepting painters who were somewhat slack.

*Metal, engineering and shipbuilding.*—Iron and stove plate moulders, core-makers, machinists, engineers, metal polishers, stove mounters, blacksmiths and horseshoers were actively employed. Jewellers, engravers, electrical workers, and linemen were busy.

*Woodworking and furnishing.*—Furniture workers, pattern makers, carriage and wagon workers, and coopers reported fair conditions.

*Printing.*—These trades reported a very busy month.

*Clothing.*—These trades were somewhat inactive slackness prevailing with custom tailors. The trade in ready-made clothing was fair, and fair condi-

tions prevailed with shoe workers and hatters.

*Food and tobacco preparation.*—Bakers, butchers. Cigar makers and tobacco workers were active.

*Leather.*—Fair conditions prevailed.

*Miscellaneous.*—Barbers, broom makers clerks, waiters and laundry workers were busy.

*Transport.*—Railway employees, steamboatmen, shiplabourers and longshoremen were active, and street railway employees, cabmen and teamsters busy.

*Unskilled.*—Active conditions prevailed.

#### DISTRICT NOTES.

*Dundas.*—Active condition prevailed for trade and labour. Workingmen's houses were still scarce. The Clothing, glove, refrigerator, machine and canning factories were active. The firm of John Bertram & Company is endeavouring to organize an ambulance corps in connection with its establishment.

#### BRANTFORD, ONT., AND DISTRICT.

*Mr. J. C. Watt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Several factories were closed a short time for stock-taking and repairs, otherwise, labour was well employed. The building trades were particularly busy, but the shortage of brick affected operations. In the iron trades, the plow factories were not so busy, but the other factories continued very busy. The Penman Mfg. Co., has commenced to manufacture a special line of goods in the mills formerly owned by the Dominion Cotton Co., which have been closed for a number of years. There was a demand for operatives. The local fire department has been granted an increase in wages, as follows:—

First year men from	\$1.40 to	\$1.50 per day.
Second year men from	1.50 to	1.70 "
Third year men from	1.60 to	1.85 "
Fourth year men from	1.75 to	2.00 "
Foreman from	2.25 to	2.50 "
Asst. Foreman	2.00 to	2.25 "

About 12 men are affected.

Merchants, particularly grocers, had a satisfactory month.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were very busy. The crops are light in some sections. There has been some demand for farm labourers.

*Manufacturing.*—Several factories were not quite so busy during the month, it being between the spring and fall seasons. The Massey-Harris Co., is enlarging its moulding and blacksmith departments.

*Railroad construction.*—The Brantford and Hamilton Radial Railway Co. is pushing to completion the grading of its road. Cars are expected to be running by October.

#### CONDITION OF PARTICULAR TRADES.

The skilled trades were for the most part busy, with unskilled labour in demand.

#### DISTRICT NOTES.

*Blue Lake.*—There was a demand for labourers at the cement works.

*Paris.*—Labour generally was well employed.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

During August, labour was well employed. Outdoor labour had steady employment, and factory workers with some exceptions, were active. In the building trades there was a falling in the amount of new work started. This affected bricklayers, but the other trades were well employed on work already underway. Factory workers were slack in some shops, but a number of new shops took on help. The City Council is about to let contracts for building permanent roadways, but it is not expected that further progress than the laying

of a stone sewer will be made this fall. Active work commenced on the new factories of the Gibson Manufacturing Company, The Standard Valve and Fitting Company, and the Colonial Whitewear Company. The tendency has been to take on no new help except where unavoidable. There were no changes in rates of wages and no unrest in the labour market.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have been busy harvesting. There was only an average crop. Oats were nearly a failure owing to dry weather. On August 24, Guelph market quotations were as follows:—Butter, 24 to 27c per lb; eggs, 18 to 20c per dozen; potatoes, \$1 per bushel; and apples, 20 to 30 cents a basket.

*Railroad construction and employment.*—Through trains are now running on the Guelph to Goderich extension of the Canadian Pacific Railway. The City received \$5,000 as its share of the gross receipts of the earnings of the road from Guelph to Guelph Junction, a distance of 16 miles. The interest on the debentures for building the road amounts to \$10,000 a year.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—All branches except bricklayers, masons and helpers had an active month. A falling off in the number of contracts was noticed.

*Metal.*—Iron moulders, machinists and helpers and tube mill workers had active employment, with some demand for additional workmen in new shops.

*Woodworking and furnishing.*—Piano and organ workers had a quiet month, but woodworkers, upholsterers and carriage workers were active.

*Printing.*—Printers had a somewhat quiet month, but were more active towards the close.

*Clothing.*—Journeymen tailors had a quiet month, and female garment workers an active one.

*Food and tobacco preparation.*—Cigar makers, bakers and confectioners had active employment.

*Textile.*—Carpet weavers and textile workers were active.

*Unskilled.*—This class was in fair demand.

#### WOODSTOCK, ONT., AND DISTRICT.

*Mr. W. N. McElheran, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was steadily employed during August, all classes being in good demand. The stringency in the money market has not greatly affected this district. The new building for the Woodstock branch of the Canadian Bank of Commerce is about ready for occupancy. Harvesting and threshing have been completed in many districts. The crops on the whole were very good oats only being in some localities rather light and the straw short. Some specially good yields of wheat have been reported ranging from forty to forty-five bushels per acre. The country is badly in need of rain. Farm help was not in so much demand this year.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Several farmers were marketing their wheat from the separator, the price ranging from 83c to 85c per bushel. The hay crop turned out very well.

*Manufacturing.*—Orders have been normal and work fairly brisk in all lines. The creameries and cheese factories were very busy. Towards the latter end of the month, the milk supply was somewhat curtailed on account of the dry weather.

##### CONDITION OF PARTICULAR TRADES.

*Building.*—Masons, bricklayers, carpenters and joiners were all well employed. Work on the new Carnegie library is progressing rapidly, and the new addition to the Collegiate is nearly ready. Several new residences were completed during the month.

*Metal.*—Iron moulders and workers had a busy month. Machinists were extremely busy, and more expert workmen could readily find employment. Wire fence workers were very busy.

*Woodworking.*—The men laid off on account of the new addition to the local factory of the Canada Furniture Manufacturers were nearly all back at work. Furniture makers were well supplied with orders. Piano and organ manufacturers had a busy month, with special orders for exhibition purposes.

*Food and tobacco preparation.*—Confectioners and bakers were busy. Milk vendors had some difficulty in securing an ample supply of milk, but the quality was up to standard. Cigarmakers were fairly busy.

*Unskilled labour.*—Plenty of work was in progress during the month. The G. T. R., and C. P. R., did considerable section work.

#### STRATFORD, ONT., AND DISTRICT.

*Mr. Jos. T. Carlin, correspondent,* reported as follows:—

##### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during August was much the same as in July. The building trades and various factories were well employed, building permits being issued, from July 15th to the 31st, to the value of \$10,000. Work has started on the Grand Trunk Railway shops extension.

Free mail delivery has been begun in the city, giving employment to five men. Wholesale and retail merchants reported trade good.

The customs receipts of Stratford for July, 1907, were \$12,323.78, an increase over the corresponding month of 1906 of \$3,145.58. No change in the rate of wages or hours of labour, and no unrest in the labour market was reported.

##### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy harvesting and threshing, and reported

crops very good. A number of Indians were engaged in flax pulling. Market prices did not vary much from last month. Butter was 21c to 23c per lb.; eggs, 17c a doz.; chickens, 40 to 75c a pair; ducks, 50c each; potatoes, 25c a peck and 90c a bag, and tomatoes 5c per lb.

*Manufacturing.*—All establishments were well employed, especially the wood-working factories.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons and carpenters had a very busy month. Lathers, plasterers, painters and paper-hangers were active. Plumbers and builders' labourers were well employed.

*Metal.*—Iron moulders, workers and helpers and all engaged in foundries had a busy month. Blacksmiths and horse-shoers had a good month and jewellers reported trade active.

*Woodworking.*—Wood workers were busy. Upholsterers carriage and wagon makers were active. Coopers were very busy.

*Printing.*—Printers and allied trades reported conditions fair.

*Clothing.*—Employment was steady.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and cigar makers had active employment.

*Leather.*—Harness makers were well employed.

*Miscellaneous.*—Barbers, clerks and delivery employees were busy. Laundry workers were very busy.

*Transport.*—Railroad employees had a very busy month. Cabmen, draymen and teamsters reported an active month.

*Unskilled.*—This class was generally well employed with the exception of new arrivals.

#### DISTRICT NOTES.

*Goderich.*—The track laying on the Guelph and Goderich Railway is completed and the road open for regular passenger traffic.

*Mitchell.*—The flax mill has opened and gives employment to a number of men and boys.

#### LONDON, ONT., AND DISTRICT.

*Mr. Alex. Woonton, correspondent,* reported:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued in about the same condition as last month, with the exception of the building trades, which owing to no very large contracts being under way were not so active as usual. Unskilled labour was well employed. The London and South-western Traction Company had its barns, with several cars, destroyed by fire in the early part of the month, and was forced as a result to discontinue its service from London to St. Thomas. The Company is rebuilding. It has completed the laying of rails as far as Port Stanley and will soon be ready to operate its line to that point. The price of milk was increased to 6 cents a quart on August 1; it has formerly been 5 cents during the summer months. The strike of painters, which took place on April 1, has not been formally settled, although certain firms are paying some of their hands the new rate. A strike of barbers took place on July 29, the men asking for an increase from \$10 and half the receipts over \$16 taken at the chair to \$12 and half the receipts over \$18. On August 17, a compromise was reached and the men went back to work at \$11 per week and half the receipts over \$17. On August 13, a union of brewery workers was formed here with a charter membership of 35.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—About 600 young farmers and others left London, via a special C. P. R., train on Tuesday August 27, on a harvesters excursion to the North-West.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were all employed, but prospects are not so good as at this time last year. Carpenters, lathers and plasterers were

busy, but painters reported trade only fair, with some men out of employment. Plumbers and stone cutters were busy Builders' labourers were all working.

*Metal, engineering and shipbuilding.*—Iron moulders and iron workers were very busy, and machinists busy. Electrical workers reported a scarcity of first-class help. Metal polishers and stove mounters were very busy.

*Woodworking and furnishing.*—Woodworkers in sash and door factories reported a rush of business. Carriage and wagon makers were busy on fall work and reported a considerable number of orders booked for the West. Tenders have been called for the building of an addition to the Grand Trunk Railway Company's car shops, and a large number of extra hands are being taken on. The London and Petrolia Barrel Company was very busy.

*Printing.*—Printers were all busy, and pressmen and press-feeders were in demand. Lithographers were very busy.

*Clothing.*—Journeymen tailors were busier than is usual at this time of the year. Garment workers were also busy and boot and shoe workers were rushed.

*Food and tobacco preparation.*—The local biscuit and candy factories were working overtime three nights a week. Two new cigar factories opened during the month and business was brisk.

*Leather.*—Tanners were very busy. Leather workers on harness work were crowded with work.

*Miscellaneous.*—Broom makers were busy. Furriers have a number of winter orders on hand. Box makers were working over time.

*Transport.*—Extra work for passenger train crews has been occasioned through the large number of excursions run during the month. A large amount of freight was being moved. Teamsters were extra busy.

*Unskilled.*—This class continued in demand with good prospects.

ST. THOMAS, ONT., AND DISTRICT.

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during August, conditions being equal to those of the previous month. There were calls for extra labour in some branches of industry, but the supply was in most cases equal to the demand. In the building trades, mechanics and unskilled laborers were well employed, although this season cannot be said to compare favourably with past seasons, there having been no large contracts issued. An effort is being made by the promoters of the Car Works Company to raise stock to the necessary amount. It is not known precisely at what date the Traction Company will commence the operation of its cars over the line of the local Street Railway, but large gangs of men are hard at work putting the equipment in proper working order. A number of cars recently received from the Ottawa Car Company will be put in service at an early date. The committee representing the Trainmen employed on the various railroads entering the City, recently went over the proposed uniform code of train rules to be used in Canada. The Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Engine men, the Brotherhood of Railway Trainmen, and the Order of Railway Conductors, each had representatives at the meeting. A Committee from each of the above organizations left for Toronto August 26th for the purpose of conferring with other trainmen as to the stand they would like to see taken in reference to the proposed rules. The Strike of Telegraphers throughout the United States has affected the local office of the Great North Western Telegraph Company. Messages to be forwarded into United States territory are received at the risk of the sender, and no guarantee is made that the message will reach its destination promptly. On July 29th, all work-

ing men employed by the Michigan Central Railroad Company in this City, were put on a fifty hour per week schedule. They were previously working fifty-five hours per week. There is plenty of work in the shops at the present time. There appears to be no scarcity of unskilled labour. Men desirous of obtaining work could find employment.

The Port Stanley Elevator Company, Limited, was recently incorporated with a capital stock of \$100,000. It is the purpose of the Company to conduct an Elevator and Grain business throughout Canada. An elevator will be erected at Port Stanley, and should business warrant the expenditure, other elevators at Winnipeg, Fort William, and other Western points will be built to operate in connection with the Port Stanley elevator. It is expected that grain for the local mills will come via Port Stanley. The cars of the local Street Railway Company are being thoroughly overhauled preparatory for the winter service.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have been very busy. The crops are not as heavy as last season. Tomatoes will be plentiful if not injured by frosts. Potatoes are also a good crop. Plums are plentiful, but are falling from the trees. The fruit is very late this season.

*Manufacturing.*—Manufacturers had a good month. There have been few working men laid off or put on short time, and mechanics had no difficulty in getting work. It is expected that Fall business will be good.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Most mechanics had steady work, although all were not rushed. There was a scarcity of lathers and plasterers.

*Metal.*—Iron workers, moulders, machinists, and blacksmiths reported the month active.

*Woodworking.*—Upholsterers reported the month quiet.

*Printing.*—Printers and pressmen were well employed.

*Clothing.*—Journeymen tailors anticipate a busy Fall.

*Food and tobacco preparation.*—Bakers and confectioners had a busy month. Cigar makers and tobacco merchants were active.

*Miscellaneous.*—Barbers, clerks and delivery employees were fully employed. Hotel and restaurant employees were busy.

*Transport.*—Trainmen were active.

*Unskilled labour.*—There was sufficient labour to meet the demand.

### CHATHAM, ONT., AND DISTRICT.

*Mr. Alex. Gregory, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were fully as active as during the previous month, and very few were looking for work. A large number of immigrants arrived; those that wished to work had no trouble in finding employment; the only difficulty experienced being that of securing suitable accommodation. A large number of building permits were issued, and although none of them were for large amounts, they were well distributed amongst the different contractors, thereby giving work to a large number of mechanics and labourers. The Chatham, Windsor and Lake Erie Electric Railway Company has its rails laid to the city, but so far has not been able to arrive at a satisfactory understanding with the Canadian Pacific or Grand Trunk Railway Companies with reference to crossings. There have been no changes in rates of wages.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The hay crop was somewhat light, and potatoes will be scarce owing to the continued dry weather. Prices are expected to be very high, unless shippers import them.

*Railroad construction and employment.*—The Grand Trunk Railway Company is busy raising the roadbed of its line through the City.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, plasterers, carpenters and joiners have been very busy. Painters had a large amount of work under contract. Builders' labourers reported no time lost.

*Metal, engineering and shipbuilding.*—Moulders reported trade good. Machinists were busy, some working overtime. Electrical workers were very busy owing largely to many of the residents taking advantage of the reduced cost of placing electric lights in their homes before September 15, after which date the prices will be increased. Horseshoers reported trade somewhat slack.

*Woodworking and furnishing.*—Carriage body builders, and cutter makers were very busy.

*Printing.*—Printers reported busy conditions, with some scarcity of help. Pressmen had steady employment.

*Clothing.*—Tailors reported employment less active than during the corresponding period of 1906.

*Food and tobacco preparation.*—Bakers and confectioners were busy. Butchers reported country trade very brisk. Cigar makers reported trade fair.

*Miscellaneous.*—Barbers experienced active conditions, notwithstanding the recent increase in rates.

*Transport.*—The Grand Trunk Railway Company's trackmen were busy raising the company's roadbed. Teamsters and expressmen were busy.

*Unskilled.*—This class was fully employed, many having engaged with farmers.

## DISTRICT NOTES.

*Dresden.*—On August 2nd a by-law for the building of a new school and the laying of new street pavements, was defeated. There have been no new developments in the oil district. Very little building of any kind has been constructed throughout the district.

## WINDSOR, ONT., AND DISTRICT.

*Mr. D. Mitchell, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during August were active. There was a general demand for

female help, both in factories and for domestic service. The building trade improved somewhat, several buildings being under way. The Board of Works has let contracts for paving and concrete sidewalks, which will keep teamsters and unskilled labour well employed until cold weather.

Wholesale and retail merchants had a fair month. A gang of Italians employed laying concrete at 25 cents an hour quit work, but were replaced by the contractor without difficulty.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy harvesting. Crops in some parts of the county are turning out well. The fruit crop will be a failure with the exception of grapes.

*Railroad construction and employment.*—The Essex and Lake Shore Electric Railway Company expects to have the road in operation by the middle of September.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Conditions were not so active as a year ago, although all were fully employed.

*Metal, engineering and shipbuilding.*—There was great activity in the iron trades and a number of skilled and unskilled workmen could find steady employment.

*Woodworking and furnishing.*—These trades were active.

*Printing.*—Printers were fairly well employed.

*Clothing.*—Journeymen tailors and garment workers were busy.

*Food and tobacco preparation.*—Bakers, butchers, ice handlers and cigar makers had a good month.

*Leather.*—Employment was active with leather workers.

*Miscellaneous.*—Barbers, clerks, delivery employees, hotel and laundry workers were busy.

*Transport.*—Railroadmen, steamboatmen, cabmen, carters, teamsters, expressmen, &c., had active employment.

*Unskilled.*—This class was busy.

DISTRICT NOTES.

*Walkerville.* — Manufacturing establishments were all running to fullest capacity. Several firms are building large additions. Walker & Sons are building a large rack warehouse and a number of dwellings.

SAULT STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly well employed during August. Business was quiet from seasonal causes, and the banks reported money tight. The Algoma steel plant shut down from August 21 to September 9 for repairs and alterations. Only a few employees were affected, the majority being employed on the repairs in question. There were no changes in wages and no strikes or lock-outs.

Farmers reported crops short. Conditions in the other industries were normal.

In the various skilled trades, normal conditions prevailed. Passenger traffic was very heavy and hotels were full, giving very active employment to employees in these lines. There was a fair demand for unskilled labour.

Traffic during May, June and July through the Soo ship canals showed a heavy increase over last year. The falling off in July was owing to a number of boats being tied up on account of the strike of ore handlers, on the United States side. The following are the figures for the three months in tons:—

Month.	Canadian.	American.	Total.
May.....	1,880,671	5,963,593	7,844,264
June.....	2,522,205	6,343,237	8,865,442
July.....	1,777,315	5,415,921	7,193,236

WINNIPEG, MAN., AND DISTRICT.

*Mr. John Appleton, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been abundant employment for all desiring manual labor.

Skilled labor in the building trades has been plentiful, but in certain lines of manufacturing there was a demand for skilled help. Compared with July conditions were about the same. Many working on railroad construction are leaving that employment to assist in the harvest field. This disarranges work in the railroad camps and agents are making special efforts to keep the railroad contractors fully supplied with labor. This year, however, there is not as great a demand as in 1906 for men for the harvest fields. About twenty thousand may be required if the favorable weather continues.

Within the city of Winnipeg itself there has been very little public work done as compared with 1906. This has caused many laborers with homes in Winnipeg to seek work outside of the city. The building inspector has estimated that the total value of the buildings for which permits will be issued during 1907 will be \$7,500,000. Many buildings were projected but were not proceeded with on account of the high cost of building material and the money stringency.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Cutting has started in many parts of the West, but the season is fully two weeks later than in 1906. So far, however, there has been no serious damage reported from frost. In many places there has been damage from hail. Should the present weather continue, the crop will be a good average one.

Wheat is maturing fast and the heads are filling well. The temperature has been high enough, generally speaking, but there has not been as much sunshine as usual during the recent few weeks. Farmers are getting in stocks of binder twine that would indicate the usual crop. Early in July many of the binder twine dealers received many cancellations of orders, but during August most of these were renewed.

*Railroad construction.*—Railroad contractors are still asking for more men. No new plans have been announced but those entered upon in the spring will tax the resources of the labour market for the summer and the ensuing winter.

## CONDITION OF PARTICULAR TRADES.

*Building.*—The building trades in Winnipeg were not as busy as last month nor was the amount of work in progress nearly as large as during the corresponding month of last year. The largest building in course of erection is the new grain exchange. This will not be completed for a year. A new office is being erected for the Imperial Bank in Winnipeg, and the walls of a new postal station are going up rapidly.

The main post office for Winnipeg, on Portage avenue will be ready for occupation in the course of a few months. Some delay has been caused by inability to get material for some of the interior work. During August many new residences were commenced, but there are not so many being erected as in 1906.

*Metal.*—Some of the foundries were exceptionally busy, but others were not running to full capacity. In the railroad repair shops there was great activity in getting available rolling stock into condition before the heavy autumn traffic commences.

*Woodworking.*—Some branches were busy, but the demand for material was not as great as last year. Carriage workers and jobbers were well employed.

*Printing and Allied.*—These trades were not exceptionally busy. The rush of work which usually preceded the harvest has not been as pronounced as usual. Dulness in business has made the conditions in the printing trades correspondingly quiet.

*Clothing.*—Dulness prevailed except in the case of makers of coarse garments.

*Leather.*—Saddlers and trunk makers were busy. In the former trade, there was a demand for experienced help.

## BRANDON, MAN., AND DISTRICT.

Mr S. P. Stringer, correspondent, reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during the past month were satisfactory. The building

trade was very active. The city engineer was preparing plans for the construction of the bridge which the city and the Canadian Pacific Railway Company propose to build across the tracks and the Assiniboine river; it will be about one thousand feet long and will cost approximately \$80,000. Work has been commenced on the erection of a four-storey warehouse for the use of two firms engaged in the manufacture of fanning mills, etc. Considerable civic work was being done in the laying of water pipes, and the building of sidewalks and sewers. The exhibition of the Western Agricultural and Arts Association closed, after being very successful in every department. Wholesale and retail merchants reported trade very active. There were no changes reported in rates of wages or hours of labour, and no unrest in the labour market.

## CONDITION OF LOCAL INDUSTRIES,

*Agriculture.*—Reports received from provincial centres dealing with the condition of the crop in almost every instance stated that the outlook was promising. There was abundance of rain, and no further danger is expected from frosts. In some districts severe hail storms damaged the crops, and in others considerable harm was caused by thunder storms. Barley cutting and haying was general in Manitoba. Wheat was reported to be growing rapidly, but cutting is not expected to begin much before September 1; some light crops may be ready for the binder earlier. Crop experts say that there will be at least 75 per cent of an average crop. There are many weeds, but with the favourable weather of the past month the wheat is over-topping them. The coarse grains and root crop are exceptionally good everywhere, and farmers are hopeful.

*Lumbering.*—The lumbering industry was very active.

*Manufacturing.*—This industry was very active.

*Mining.*—The Provincial Inspector of Mines reported splendid prospects for the mining of coal at Eagle Lake, Sask. At Calder's mine indications are good and show coal fields of twenty-five miles

in extent. Coal of good quality has been discovered in the bank of the Saskatchewan river, near Prince Albert. The surface indications are good, but the extent of the deposit has not yet been ascertained.

*Railroad construction and employment.*

—The officials of the Canadian Pacific Railway Company stated that the present season has been favourable for railway construction work, and that rapid progress was being made at all points along the line. Three hundred miles of double track will be in use for the crop of 1907, eastward to Fort William. Steel will be laid this year on the Moosejaw-Edmonton line to a point 50 miles north from Tuxford, the present terminus. Grading on the new line from Walhall, N. D., to Morden is about completed, and is said to be the highest and widest railroad grade in Western Canada. The Grand Trunk Pacific Railway Company has now rails laid some 75 miles west of Portage La Prairie, to what will be the first divisional point. The gangs are laying two to two and one-half miles per day.

CONDITION OF PARTICULAR TRADES.

The different skilled trades were active.

*Transport.*—Employees of the different branches of transportation were busy, and traffic on the Canadian Pacific railway was heavy.

*Unskilled.*—There was a great scarcity of farm labour, and it seemed impossible to obtain the men necessary to meet the demand, which increased as the season advanced. The authorities of the Canadian Pacific Railway stated that twenty-one thousand harvesters will be required for the movement of the season's crop. There was a demand for teamsters in some districts.

DISTRICT NOTES.

*Abernethy.*—A farmer stated that he will have 15,000 bushels of wheat from 500 acres of land. All the land in the district looks equally well, and the average yield will not be less than 27 bushels per acre. The grain crop is about ten days late.

*Morden.*—The crop outlook in this district has brightened somewhat after the rain, and at Creelman, Man., cutting is expected to commence during the latter part of August. The crop will average 25 bushels to the acre.

REGINA, SASK., AND DISTRICT.

*Mr. Hugh Peat, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during August was active, and although the month did not compare favourably with the corresponding month of last year in the building trades, it showed a decided improvement on the preceding month. Very few bricklayers were unemployed, and carpenters were for the most part steadily employed. The King's Hotel, which was formally opened, cost with equipment over a quarter of a million dollars, and gave employment to a permanent staff of over sixty persons. It contains 110 bedrooms and eight large sample rooms. The civic expenditure for the year 1907 includes \$250,000 for pavements; \$50,000 for sidewalks; \$80,000 for waterworks, compensating basin and pump; \$120,000 for sewers, and \$65,000 for improvements and extensions to electric light plant. Last year the city put down over two miles of pavement and four miles of granolithic sidewalks. This year contracts have been let for between three and four miles of new pavement and for granolithic sidewalks, curbing and gutters to cost \$65,000. A large number of hands are being employed on this work, labourers receiving \$2 per day.

CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Weather conditions have varied considerably. No damage to any extent has been reported as a result of the heat, and the effect has been to hasten the ripening of crops that at the time were nearing maturity. In a few districts slight damage was done by

frost to crops in low places, but a very large percentage of the crops appear to have escaped. Hailstorms were unusually prevalent during the month and caused considerable loss to farmers throughout the province. Warm weather followed the period of low temperature. The rush has not yet commenced. Farm labourers do not seem inclined to accept less than \$40 per month. The Department of Agriculture is securing estimates of the number of harvesters required and arranging with the Canadian Pacific Railway Company to distribute them where their services are most required.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, stonecutters and masons were active, with carpenters and joiners fairly busy, though many were out of employment. Lathers and plasterers were active. Painters were all fully employed. Plumbers, gas and steamfitters were very busy. Builders' labourers were busy; a great number of this class were employed on street improvement work.

*Metal, engineering and shipbuilding.*—Electrical workers had a busy month.

*Printing.*—Printers had a very busy month, and bookbinders were exceptionally busy.

*Food and tobacco preparation.*—Cigar makers and tobacco workers had a busy month, and reported business steadily increasing.

*Miscellaneous.*—Barbers were actively employed.

#### MOOSEJAW, SASK., AND DISTRICT.

*Mr. J. R. D. Bastien, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during August has been one of great activity. There was a good demand for workmen, as was evidenced by advertisements for labour. Transportation was exceptionally busy. Traffic on the railways is on the increase, pas-

senger traffic on the Transcontinental trains being greater than ever before at this season of the year. The through trains were run in sections, which gave remunerative employment to all in the railway service. There has been a falling off in real estate business in outside subdivisions, though great activity in central property prevails. There is every indication of an abundant harvest, though considerable damage was done in some parts by hailstorms. The crops, though late, will be good. There has been to date no damage by frost. Harvesting is now general, with a good demand for labour. The excursions of harvesters have already started to arrive, and there is every indication that the farmers will be amply supplied with help. There were no changes reported in wages or hours' of labour, and no unrest in the labour market.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy harvesting and threshing.

*Railroad construction and employment.*—There was a very good demand among railway contractors, and the different railway companies for men. Up to the present, about 400 Japanese have been employed in western Saskatchewan.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Active conditions prevailed in all branches, with builders' labourers in demand.

*Metal, engineering and shipbuilding.*—The prevailing condition was active, with blacksmiths very busy.

*Woodworking and furnishing.*—Active conditions prevailed, with car builders busy.

*Printing.*—All branches were actively employed.

*Clothing.*—There was a slight falling off in employment.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters were busy, with ice-handlers and cigar makers active.

*Miscellaneous.*—Trade was active.

*Transport.*—All found employment active, with earnings high.

*Unskilled.*—There was a good demand for this class at wages of \$2.25 per day and upward.

## CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brocklebank, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during August was not as active as had been expected. The scarcity of money has had a tendency to hamper industry in the West. The building trades during August did not improve compared with July, though unskilled labour was better employed. Ranchers and farmers have engaged a number of men for the haying and harvesting season, the prospects for a heavy harvest being promising. The Public Works Department of the Provincial Government has commenced the erection of a steel bridge over the Bow river, connecting the Shepherd district with the eastern portion of the city. The City Council has awarded the contract for the erection of the new City Hall, the price being \$147,124. Building operations will be commenced shortly. The new hall will be fire proof, and the exterior walls will be constructed of Calgary sandstone, of which there is an abundant supply close to the city. The transportation companies were busy handling both passenger and freight traffic. Bank clearings for the week ending August 22 were \$1,325,519, being a large increase over the corresponding week of last year, when it amounted to \$945,000. The wholesale and retail merchants had a satisfactory month. There was a strike of workmen employed about the Galt mines at Lethbridge, Alta., owing to a misunderstanding of the agreement between the employers and the employees. The dispute was satisfactorily arranged after the men being out a few days.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers of southern Alberta had commenced harvesting, and

by the end of the month most of the wheat will be in stook. Oats and barley were coming on well. The Canadian Pacific Railway Company is building an addition to its freight shed, one hundred and sixty-five feet in length.

*Mining.*—A new colliery will be opened in Lethbridge by the Royal Collieries, Limited, with a capacity of fifteen hundred tons per day. The new mine will be situated about five miles down the Belly river from the city. The company has purchased the Barnes mine, and, in addition, has acquired the rights on seven thousand acres adjacent to it on the east side of the river. It is the intention of the company to open several collieries within this area as the market warrants, each of a capacity of fifteen hundred tons per day. The construction of the tippie, which will be of steel, and shaft, the installation of the machinery and equipment will total an expenditure of two hundred and fifty thousand dollars. Negotiations have been completed with the C. P. R., to construct a spur line from a point near Lethbridge on the Crow's Nest branch to the mine, and work will commence immediately.

The scarcity of cars was the cause of much complaint, and it was feared the railway companies would not be able to supply cars enough to the mines to remove the full daily production when the movement of grain begins. Almost all of Canada from Winnipeg west is dependent for its coal supply on the mines lying on the Crow's Nest branch from Taber to Fernie. The consumption of coal in western Canada during the last two years has increased out of proportion to the production. Up to four weeks ago cars were pretty well supplied.

### CONDITION OF PARTICULAR TRADES

*Building.*—The several branches found employment somewhat quiet.

*Metal.*—Iron moulders, machinists, engineers, steam engineers, linemen, blacksmiths, boilermakers, sheet metal workers, horseshoers and jewellers had active employment. Electrical workers found employment quiet.

*Woodworking and furnishing, printing, clothing, food and tobacco preparation, leather, and miscellaneous.*—These trades were active.

*Transport.*—Railway train crews, telegraphers, switchmen and freight-handlers were busy. Cabmen, teamsters and expressmen found employment active.

*Unskilled.*—This class was busily employed.

## EDMONTON, ALTA., AND DISTRICT.

*Mr. J. A. Kinney, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The demand for unskilled labour has increased during the past few weeks. This was due to the large number of men needed for railway construction and harvesting. The supply was not equal to the demand. Skilled labour was employed to about the same extent as last month, but the supply was more than equal to the demand. Work has commenced on the foundations of the Parliament buildings, and on the construction of the inclined railway, for the purpose of making the business portion of the city quickly reached by those residing in the valley, and as a means of conveying freight now hauled by teams up a long grade. The promoters have agreed to have the railway in operation by January 1st, 1908. The city is installing a fire alarm system, forty call boxes being connected. Postal receipts for the month of July totalled \$53,359.29, an increase of \$21,541.19 over July, 1906. The assessment of the city of Edmonton for 1907 is \$22,940,880, an increase of \$5,182,197 over 1906. Wholesale and retail trade was good. There were no changes in the rates of wages or hours of labour.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Grain is now ripening in the Edmonton district, and with favourable weather the largest crop in the history of Alberta will be harvested. From all points in Northern Alberta reports of

heavy yields are received. A degree of frost was registered on the 19th instant in some localities, but the weather since has been warm.

### CONDITION OF PARTICULAR TRADES.

*Building.*—Owing to the money stringency, there was not so much building being done as was anticipated, consequently a number of mechanics who came here expecting a large increase in building over last year were unable to obtain employment.

The *metal, printing, clothing, food and tobacco preparation, miscellaneous* and *transport* branches were active.

*Unskilled labour.*—The demand exceeded the supply.

## NELSON, B.C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The General condition of the labour market during August was not so active as in the preceding month, owing chiefly to shortage of coke supplied by the East Kootenay collieries to the smelters. The demand for lumber having fallen off slightly, a few men have been laid off at several of the sawmills. The coke shortage caused the Northport smelter to run at about half its usual capacity, while the Trail smelter shut down three furnaces, resulting in about 500 workmen at these two and subsidiary places being laid off pending a steady supply. The Nelson Board of Trade has referred the matter to the Hon. the Minister of Mines for the Province of British Columbia. Outside of this, the mining industry is in a most prosperous condition. The Hewitt mines situated near Silverton, owned by New York capitalists is being operated on a somewhat larger scale, about 35 men being on its payroll; it is said that 60,000 tons of ore is blocked out and that a car of the ore, which was recently sent to Trail smelter, assayed well. The work of constructing

the new Courthouse at Nelson is making fair progress, and the new building for the Canadian Bank of Commerce is expected to be completed by September 30. The district is enjoying a prosperous season.

#### DISTRICT NOTES.

*Fernie.*—The Provincial buildings are being removed to make room for a new structure to be built by the Provincial Government. Work on this structure is to be commenced immediately, and will be rushed to completion. The contractors engaged on the construction of the new post office and Customs office are making rapid progress. The installation of a sewerage system is going on; it has been difficult to secure the necessary number of workmen, though it is expected that the work will be completed before winter. The construction of the Great Northern Railway branch from Fernie to Michel is commencing; the material is on the ground and the work will be hurried to completion. The Crows Nest Pass Coal Company claims that it is short of men since the last strike, this being the reason given by the company for the coke shortage. The company promises a better supply for the future.

#### NEW WESTMINSTER, B.C., AND DISTRICT.

*Mr. D. J. Stewart, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during August was very active, and though no particular shortage was reported, all available men were employed. One new industry, the Crystal Glass Works, started operations during the month. Some of the expert workmen employed were brought from Montreal, Que., and other eastern points. From 8,000 to 10,000 pieces of glass are being turned out every twenty-four hours. Everything in the shape of glassware will be manufactured by this company

in a short time. Good progress is being made on the construction of various new business blocks, the weather having been favourable to outside work. Tenders were called for the erection of an addition to the Royal Columbia Hospital, to cost approximately \$20,000. The telephone factory, which commenced operations only a few months ago, is preparing plans for the enlargement of the plant at a cost of \$30,000. The Great Northern Railway Company proposes to build a passenger station, to cost about \$25,000. Good progress is being made on the construction of an electric line between this city and Eburne, situated on the north arm of the Fraser river. It is expected that tenders will shortly be called for the construction of the line to Chilliwack. The steamer "Hyderabad," which has been loading lumber at one of the local mills, left for Valparaiso with 1,850,000 feet of lumber.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy harvesting. A fairly good hay crop has been gathered. It will bring a good price, as most of last season's crop is already consumed.

*Fishing.*—The run of sockeyes on the Fraser has been very disappointing to both the canners and fishermen. The total pack up to August 15 was only 51,328 cases, and as the season is nearly over, this amount will not be very largely increased. The total pack last year was 183,007 cases. In 1903, the year corresponding to the present one in the cycle, the pack was 204,809 cases. The pack of Northern British Columbia, including all canneries in the province with the exception of those on the Fraser river, was 227,661 cases up to August 15. The pack for the North coast last year was 163,908 cases. The grand total pack for British Columbia to the 15th instant is only 278,989 cases. In 1906 the total pack was 459,679 cases, and in 1903 it was 368,077 cases.

*Lumbering.*—This industry was very active, the mills shipping all the lumber they could manufacture and leaving very little stock on hand.

## CONDITION OF PARTICULAR TRADES.

Busy conditions, with few exceptions, prevailed in the several skilled trades.

## DISTRICT NOTES.

*Eburne.*—General conditions are prosperous. A flour mill and two sawmills are in operation, while the erection of another sawmill is contemplated, a company having been incorporated with a capital of \$200,000.

*Stave Lake.*—About 400 workmen have been employed on the construction of the power plant. The company proposes working a night and day shift in order to hasten the work.

*Chilliwack.*—This town is progressing rapidly, being situated in one of the best farming districts of the Fraser Valely.

## VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

While a few complaints have been noted during August of a scarcity of help in certain lines, the shortage has not been general. Trade in all lines was above the normal state. In the building trades particularly, business has been very brisk; some contractors claimed that they could have employed many more men had they been available. Desirable farm help could have secured constant employment. During the past four months the Albion Iron Works Company, of this city, has been advertising for moulders, but as the trade was in an unsettled state, moulders have been scarce; the threatened trouble is now over, the moulders having received an increase of 50 cents per day. As an instance of the state of the unskilled labour market, it may be said that over three times as many men as were needed applied for positions when the call was made for help to build the trails on the west coast of this island, in connection with the erection of the life-saving station by the Dominion Govern-

ment. There is a scarcity of domestic female help, and many girls and women could find constant employment at good wages. A scarcity of school teachers is felt throughout the province; to overcome this, the Provincial Government has issued an order-in-council allowing teachers holding certificates in other provinces to fill positions here.

The total bank clearings for the month of July amounted to \$5,208,912. This is by far the largest amount recorded for July in the history of the city.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The season is now about over, all the crops being cut. Owing to the extremely dry weather, the grain crops will be about an average yield, but fruit will give a good return.

*Fishing.*—Although the run of fish has been fair, the pack will not be up to the average; it is expected that the shortage will cause an increase in prices in the London and Liverpool markets.

*Lumbering.*—The prevailing prices of lumber of all grades are the highest they have ever been here. All mills were running to their fullest capacity.

*Manufacturing.*—All establishments were working full time, and in some instances overtime was found necessary to keep up with orders.

*Railroad construction and employment.* Construction work on the extensions of the Esquimalt and Nanaimo railway is expected to begin at once. One of these extensions will be from Wellington across the Island to Alberni, and the other from Wellington North. This work, along with general repairs, will keep a large number of workmen employed for some time to come.

*Mining.*—Rich discoveries of free gold quartz have recently been made on a group of mines located on Tetaskins Sound, on the west coast of Vancouver Island. A stamp mill will be put in at once. The mines at Port Renfrew were active. On the Queen Charlotte Islands busy conditions prevailed. The first shipment of ore, 300 tons, came down last week to the Ladysmith smelter; others will follow at an early date.

*other industries.*—It is reported that the oyster beds planted at different places on the west coast of this island are proving satisfactory.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Never in the history of Victoria has the building trade been so active. The unprecedented demand for houses has kept contractors and workmen fully employed. There is a great demand for houses to rent. It is stated that no new contracts will be figured on until after the new year. House carpenters and builders have all the work that they can handle for a long time to come.

*Metal, engineering and shipbuilding.*—Both the British Columbia Marine Railway Company, and the Victoria Machinery Depot have been very busy keeping large forces of men employed, the boiler departments working overtime. Moulders were well employed. They have recently received an increase of 50 cents per day, making \$4.00 per day instead of \$3.50. Machinists and engineers were well employed. Linemen had a busy month putting things in order after the fire of July 23, which almost completely destroyed the electric and telephone system. All other branches of these trades were busy.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers reported work satisfactory and the outlook encouraging. Carriage and wagon makers have found that the automobile has not affected their trade to any extent, as they are constantly working at good wages. Pattern makers were busy, with all the work that they can do for some time to come. Coopers were kept busy.

*Printing.*—Both job and newspaper printers were busy. The membership of the Typographical Union in Victoria is 63, compared with about 40 a year ago. Bookbinders were well employed.

*Clothing.*—Journeymen tailors reported trade brisk.

*Leather.*—Leather workers and saddlers were working full time.

*Food and tobacco preparation.*—Bakers and confectioners found business brisk.

Cigar makers, fifty in number, had satisfactory employment.

*Miscellaneous.*—Barbers were fully employed. Clerks and stenographers were slightly in demand. Furriers were well employed, with hotel, restaurant and theatre employees exceptionally busy.

*Transport.*—Traffic has been very heavy, and all employed in the transportation service had a busy month. Street railwaymen, cabmen, automobilemen, carters and draymen reported that they had all that they could do.

*Unskilled.*—This class was well employed. Besides a large amount of new concrete sidewalks being laid by the city, sewers will be built on a number of new streets, giving employment to numbers of men. Anyone wishing work in this line would experience no difficulty in securing it.

#### NANAIMO, B. C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There has been little if any change in the general condition of the labour market since last report, there still being a shortage of men in nearly all of the industries in this district. Some large firms are waiting until the usual summer work is over to get men. There was still exceptional activity in the Lumber and Coal Industries with prospects of its continuing for some time to come. The merchants reported business increasing. There have been no changes in rates of wages.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers have been busy with the harvest, which is nearly completed.

*Fishing.*—The Whale Fishing Co., is rushing the work on its new station near this city so as to be ready for the winter on the West Coast. The company is having success with its Fishing and Oil Factory.

*Lumbering.*—The local Mills and the other saw mills in the District were working to their full capacity. Work in the woods was being rushed as much as the prevailing scarcity of men will allow.

*Mining.*—The coal mines were working steadily and increasing their output, but were unable to meet the present demand.

*Railroad Construction.*—The C. P. R. Co. has announced that work will be commenced at once on clearing the right of way from here to Alberni so that contracts for grading can be let.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons reported work quiet. Carpenters were well employed, there being a demand for more men. Painters report work active. Plumbers were very busy.

*Metal, engineering and shipbuilding trades.*—Engineers were very busy, there being a shortage of certificated men to meet the demand. Blacksmiths and Carriage Makers were active.

*Unskilled labour.*—There is still a steady demand in the principal industries.

#### INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF AUGUST.

ONE application for the establishment of a Board of Conciliation and Investigation was received at the Department during the month of August, namely:

On behalf of the employees of the Montreal Cotton Company at Valleyfield, Que., from locals 8, 9, and 10 of the Federation of Textile Workers of Canada.

In connection with the applications received prior to the beginning of the month of August, further proceedings remained on August 1 to be taken with regard to the following, viz., the second application on behalf of the employees of the Cumberland Railway and Coal Company, Limited, of Springhill, N. S., from Pioneer Lodge No. 1, P.W.A., and the application on behalf of the Grand Trunk Railway of Canada with reference to a dispute with the locomotive engineers employed on the system.

Further proceedings remained on August 1, to be taken also with regard to the application for a reference under the provisions concerning railway disputes in the Conciliation and Labour Act (Chap. 96, R.S.C. 1906) of the dispute between the Intercolonial Railway of

Canada and the Freight Handlers' of Halifax.

With regard to the first named of these, the second application on behalf of the employees of the Cumberland Railway and Coal Company Limited of Springhill, N.S., the Board as stated in the August issue of the *Labour Gazette*, began on July 31, its investigation into the subject of dispute, but a strike occurring in the mines on August 1 as a result of the refusal of the men to accept in full the findings of a Board established to enquire into a previous dispute between the same parties, as set forth in the *Labour Gazette* for August, the Board adjourned the enquiry indefinitely. In the case of the dispute between the Grand Trunk Railway Company and the locomotive engineers in its employment the findings of the Board were received during the month and will be found in the following pages. In the case of the dispute between the Intercolonial Railway and the Freight Handlers of Halifax, the findings were also received in the Department during the month and are printed as a portion of the present article.

A statement of the proceedings during the month of August in the various applications is printed herewith.

## I. THE DISPUTES AT SPRINGHILL, N. S.—BOARD ADJOURNS IN VIEW OF STRIKE BY EMPLOYEES.

THE circumstances attending the establishment of a second Board of Conciliation and Investigation for the adjustment of disputes between the Cumberland Railway and Coal Company, Limited, of Springhill, N.S., and its employees, were set forth in the August issue of the *Labour Gazette*, the application in this case as in that of the former application being made on behalf of the men by Pioneer Lodge No. 1. Provincial Workmen's Association. The Board, which was promptly established by the Minister, was composed of His Honour Judge Patterson, of New Glasgow N. S., chairman, and Messrs R. B. Murray of Springhill, N.S., and P.S. Archibald of Moncton, N.B., who were appointed on the nomination of the employees and employers respectively. Messrs Murray and Archibald being unable to agree on the nomination of a third member, Judge Patterson was appointed by the Minister.

As stated in the report printed in the *Labour Gazette* for August of the proceedings in connection with the Board

established for the investigation of the dispute between the same parties with reference to counter levels and local stone, the findings of this Board had not proved acceptable to the men on one of the two points involved, and the Secretary of Pioneer Lodge No. 1, P.W.A., informed the Department by letter that at a meeting of the lodge named the men had passed a resolution reserving to themselves the right to strike on August 1, in virtue of their non-acceptance of the award of the Board. The second Board proceeded on July 31, with the investigation of the disputes referred to it, but on August 1, the employees ceased work, and the Board thereupon adjourned its proceedings and its various members endeavoured for some days to effect an agreement of the disputing parties by conciliation. These efforts proving futile, the Board was not reconvened by the chairman. At the end of August the employees were still out and the situation was not reported to be otherwise changed.

## II.—AGREEMENT EFFECTED UNDER THE ACT BETWEEN THE INTERCOLONIAL RAILWAY AND THE FREIGHT-HANDLERS' UNION OF HALIFAX.

THE report of the findings of the Board of Arbitration established in connection with this dispute reached the Minister of Labour on August 12, and it is gratifying to be able to record that the findings have been accepted by the parties concerned, and that there is every indication that the adjustment of the differences has been to the satisfaction of both, as well as to the general interest of the public. The Freight-Handlers' Union of Halifax, which represented the men in the proceedings accepted the award unanimously on their behalf. The award of the Board was accepted by the Intercolonial Railway and by the men concerned for St. John as well as for Halifax.

It will be remembered that the diffe-

rences between the Intercolonial Railway of Canada and freight-handlers in its employ at Halifax, N. S., were referred for adjustment under the provisions relating to railway disputes in the Act respecting Conciliation and Labour (Chap. 96, R. S. C. 1906,) the application for the appointment of a committee of Conciliation, Mediation and Investigation having been received in the Department on July 10. The applicant was Mr. D. Pottinger, General Manager of the Intercolonial Railway, and the other party to the dispute was indicated as the Freight-Handlers' Union of Halifax. The number of employees directly concerned was placed at 55, and of those indirectly concerned at 150, besides all shippers and receivers of freight and the

public in general. The question at issue was stated to be the rate of wages and the classification of freight-handlers. Section 5 of the Industrial Disputes Investigation Act, 1907, provides that in the case of a dispute between a railway company and its employees the parties may refer the same for investigation either to a committee of Conciliation, Mediation and Investigation established under the provisions relating to railway disputes in the Act respecting Conciliation and Labour as indicated above, and in the event of a settlement not being reached before the Committee to a Board of Arbitration established under the same provisions; or to a Board of Conciliation and Investigation established under the Industrial Disputes Investigation Act, 1907. Procedure under the Conciliation and Labour Act was selected in the present case.

The Committee of Conciliation, Mediation and Investigation established under the Act consisted of Prof. Walter Murray, Halifax, Chairman; Mr. Henry Holgate, Montreal, nominated by the Intercolonial Railway, and Mr. R. E. Finn, M.P.P., Halifax, nominated by the Freight-Handlers' Union; the chairman of the Committee was named by agreement between the members recommended by the respective parties. The Committee met at Halifax on July 27 to endeavour to secure a settlement by means of conciliation but on July 30, the Minister of Labour received a telegram from the Chairman to the effect that it was impossible to effect an agreement in this way and recommending that the differences should be referred to a Board of Arbitrators. The parties to the differences having respectively informed the Minister that the members of the Committee of Conciliation and Investigation were acceptable as a Board of Arbitrators, the Minister duly established the three gentlemen named as a Board of Arbitrators, and the Board proceeded immediately to take evidence under oath and otherwise to enquire into the dispute that had been brought before it.

The Committee of Conciliation, Mediation and Investigation held sessions

on July 27 and 29, and the Board of Arbitrators met on July 31 and daily on week days until August 8. The subject of the dispute, while local in its origin, involved indirectly not merely the whole road but some questions of management and for these reasons the enquiry before the Board took a much wider range than it would otherwise have done. The enquiry was of a most careful nature and the acceptance by the management of the findings of the Board entails in some cases changes of considerable importance. The report presented to the Minister by the Board of Arbitrators was as follows:—

HALIFAX, Nova-Scotia Aug. 8th, 1907.

To The HONOURABLE RODOLPHE LEMIEUX,  
Minister of Labour,  
Ottawa.

Honourable Sir:—

In the matter of the Conciliation and Labour Act of 1906 and in the matter of the reference of certain differences between the Intercolonial Railway of Canada and certain of its employees, members of the Freight-Handlers' Union of Halifax, to the undersigned as a Board of Arbitration under the provisions of the said Act, your Board respectfully submits the following report:

On the 5th day of July, 1907, the following resolution was adopted by the Freight-Handlers' Union of Halifax:

Moved by James Clark, seconded by John Burns, that the Freight Handlers' Union of the I.C.R., at Halifax, N.S., agree to submit the case, which is the cause of the dispute with the I.C.R., as set forth in schedule submitted by them to Mr. G. M. Jarvis on the 18th day of June, to a Board of Conciliation and Investigation, which said Board shall be convened within fifteen days from the receipt of this resolution by the Management of the I.C.R., to be appointed under the provisions of the Conciliation and Labour Act provided that the question of the rates to be paid by the said I.C.R., and the date from which the same are payable are left to the said Board of Conciliation and Investigation to finally determine.

Passed unanimously.

Dated at Halifax, this 5th day of July, A.D., 1907.

(Signed) WILLIAM ALLEN,  
President.  
" J. W. CLARK,  
Secretary.

Through Mr. George M. Jarvis, the following answer was given by Mr. D. Pottinger, the General Manager of the Intercolonial Railway. "Moncton, July 5th 1907." The Department agrees to the proposal submitted by the Freight Handlers' Union, the men to return to work at old rates, and matter in dispute to be submitted to a Board of Conciliation and Labour Act.

In accordance with the provisions of the Conciliation and Labour Act of 1906, the Committee appointed by you on the 22nd, of July 1907, endeavoured to effect an amiable settlement by mediation and conciliation. Unfortunately it failed, and on the 29th, of July submitted its report.

The Board of Arbitration to which you then referred the differences met within the Province Building, Halifax on the 31st day of July, and concluded its sessions on the 8th day of August.

Mr. George M. Jarvis was present to represent the Intercolonial Railway and Messrs. William Allen and Aaron Mosher to represent the Freight Handlers.

The Board decided to conduct its proceedings in private and not to permit counsel to appear on behalf of either party. Several witnesses were examined and the parties fully heard.

The conclusions of the Board are unanimous and cover the various points in dispute.

In reaching its conclusions, the Board, while fully realising the indirect effects of any decision which it might reach, held to the principle, which is followed by other Railways and is recognized in the Fair Wages Schedule of the Department of Labour, that the rates of pay for similar services should vary in different localities, according to the local labour market and cost of living.

With reference to the contentions of the Freight Handlers of the Intercolonial Railway in the City of Halifax the Board holds.

1. That the foremen checkers in charge of the Outward and Inward Sheds and the yard should be paid at the rate of \$60.00 per month.

2. That a checker receiving outward freight or checking inward freight from car to shed should be paid at the rate of \$52.50 per month.

3. That a junior checker delivering inward freight should be paid at the rate of \$47.50 per month.

4. That porters, while temporarily doing junior checkers' work should be paid at junior checkers' rates, and in general that men doing the same kind of work be paid at the same rate.

5. That porters be paid for a day of 10 hours at the following rates for the first year of service at \$1.50 a day and subsequently at \$1.60 a day, but after five years of satisfactory work service they shall be paid \$1.65 a day. All over time to be paid pro rata.

6. That all promotions be determined primarily by efficiency and secondarily by length of service.

7. That the foregoing rates take effect from April 1st, 1907.

Respectfully submitted,

(Sgd.) WALTER C. MURRAY,  
*Chairman.*

" HENRY HOLTGATE.  
" R. E. FINN.

The full effect of the award of the Board of Arbitrators may be better understood with a brief explanation. The Intercolonial Railway had increased the pay of the porters from \$1.40 to \$1.50 per day, dating from April 1, 1907. The men claimed when they struck that they should receive \$1.75 per day. The Board decided that the porters should be paid for the first year of service at the rate of \$1.50 per day, and subsequently at the rate of \$1.60 per day, but that after five years of satisfactory service they should be paid \$1.65 per day, this sliding scale to take effect from

April 1st, last. There are, it is stated by the management of the Railway, no porters at Halifax, who have been in the service for only one year, the junior of all the porters having come into the service in March, 1905; the effect of the award, therefore, is that all the porters at Halifax have received an increase of ten cents per day from April 1 last. There are 13 checkers at Halifax. Of these three are foreman checkers who were, at the time of the strike, receiving \$57.50 per month, having received an increase of \$2.50 per month on April 1 last; by the decision of the Board these three will receive a further increase of \$2.50 each, from April 1 last, bringing their present pay to \$60.00 per month. The Board decided that the next grade of checkers shall receive \$52.50 per month. Eight of the checkers who are receiving \$52.50 and \$57.50 per month each receive an increase. Eighteen porters who have been engaged more or less doing the work of checkers, and who under the award of the Board must receive checkers' pay, have also received some increase in pay.

At a meeting of the Freight Handlers' Union at which the copy of the award, of the Board of Arbitrators, was received from the Department of Labour and read to the members, the following resolutions were passed unanimously by standing vote, viz.:

Moved by Avon Mosher and seconded by H. Mullaney:

"That the Freight Handlers' Union of Halifax of the I. C. R., accepting as they do the award of the Board of Arbitration, desire to express their sincere appreciation of the splendid services rendered by Mr. R. E. Finn as their advisor and true friend of the workingman, both before, and during the arbitration, and also their thanks to Prof. Walter Murray for the fair and impartial manner in which he presided over the Board of Arbitration which settled our differences so well."

Moved by John Curren, seconded by A. Simmons:

"That we earnestly thank our representative, President William Allen, and Treas. Avon Mosher, for the fine manner in which they helped to prepare our case and carry out our wishes, which materially assisted in the great advantages we have gained by the award of the Board of Arbitration."

### III.—DISPUTE BETWEEN THE G. T. R. CO., AND ITS LOCOMOTIVE ENGINEERS—REPORT OF BOARD AND TEXT OF THREE YEARS' AGREEMENT EFFECTED.

THE dispute between the Grand Trunk Railway system and the locomotive engineers in its employment, for the adjustment of which a Board of Conciliation and Investigation was established by the Minister of Labour early in the month of July, was satisfactorily settled during the month of August. The nature of the dispute in question was set forth in the *Labour Gazette* for August. The application for a Board of Conciliation and Investigation was received at the Department on June 27th, from Mr. W. D. Robb, Superintendent of Motive Power for the Grand Trunk Railway Company. The Board as established consisted of Professor Adam Shortt of Kingston, Ontario, chairman; Mr. Wallace Nesbitt, K. C., of Toronto, and Mr. John Cardell, of Calgary, Alta. Prof. Shortt was appointed to the Board by the Minister of Labour, the nominees of the respective parties to the dispute being unable to agree on a third member. The Board commenced its investigations at Montreal on July 23, and its findings were received by the Minister of Labour on August 16. It is gratifying to be able to state that the agreement, which governs the employment, duties and compensation of locomotive engineers on the Grand Trunk Railway system, and supersedes all previous rules, is effective for a period of three years from August 1st, 1907, and from year to year thereafter, subject to notice of revision or termination.

The agreement is signed for the Company by Messrs. Charles M. Hays, second Vice-President and General Manager, and W. D. Robb, Superintendent of Motive Power, and on behalf of the Locomotive Engineers by Messrs. D. C. Cameron, J. Battley, and J. S. Johnson.

The report of the Board of Conciliation is signed by Prof. Adam Shortt, chairman, and Mr. J. Cardell, the member of the Board appointed on the nomination of the men, Mr. Nesbitt, the member of the Board appointed on the nomination of the Grand Trunk Railway Company,

having been prevented from attending the final sessions of the Board. The dispute, as will be seen from the text of the agreement, included many intricate and difficult questions, concerning which it had been long impossible to arrive at a conclusion, and it is a matter for general congratulation that the respective parties to the dispute have been enabled by means of the facilities afforded under the Industrial Disputes Investigation Act to attain a state that promises complete harmony for so extended a period. Such an agreement is obviously the more valuable in that it concerns on the one hand a great railway corporation and on the other a body of employees representing in the Brotherhood of Locomotive Engineers one of the most powerful of labour organizations.

The complete text of the report of the Board of Conciliation and Investigation and of the agreement reached is as follows:—

QUEEN'S UNIVERSITY.

KINGSTON, ONT., August 15th, 1907.

Hon. Rodolphe Lemieux,  
Minister of Labour,  
Ottawa, Ont.

Dear Sir,—

As Chairman of the Board of Conciliation and Investigation appointed to deal with the dispute between the Grand Trunk Railway and their Locomotive Engineers, I have to report that a final settlement of the dispute was effected on August 13th. The enclosed memorandum of rules and rates of remuneration, applicable throughout the Grand Trunk System, was accepted and signed by both parties as effective for three years from August 1st, 1907.

In accordance with section 54 of the Industrial Disputes Investigation Act, I beg to report that immediately after being appointed Chairman of the Board of Conciliation, I entered into communication with both parties to the dispute. Going to Montreal on July 21st, the following day I completed arrangements for the first meeting of the Board on Tuesday, July 23rd, at 10 a. m., in the Board Room of the Grand Trunk Railway offices, which Mr. Hays had kindly placed at our service for the meeting of the Board. The first session was held, as arranged, at 10 a. m., July 23rd, there being present the members of the Board, Hon. Wallace Nesbitt, K. C., representative of the Grand Trunk Railway; Mr. John Cardell, representative of the Locomotive Engineers, and myself as Chairman. There were also present Mr. Charles M. Hays, Mr. E. H. Fitzhugh and Mr. W. D. Robb, on behalf of the Grand Trunk Railway, and Messrs. D. Cameron, J. Battley and J. S. Johnson, on behalf of the Locomotive Engineers.

As Mr. Nesbitt had just received notice that his presence was urgently required at Sydney, B C., in connection with the suit between the Dominion Steel and Dominion Coal companies, he found it impossible to remain more than a couple of days in Montreal. By prolonging our sessions, we endeavoured to complete the work before us in that time, and, indeed, we had reached a provisional agreement on practically all the matters in dispute except the schedule of wages, when the Board adjourned at the close of the sittings on July 24th. At the request of the Grand Trunk Railway, it was agreed to await Mr. Nesbitt's return, if that should take place within a reasonable time. Before leaving Montreal I pointed out to the representatives of the Engineers that if, in accordance with sections 23 and 24 of the Industrial Disputes Investigation Act, 1907, a settlement of the wage schedules could be effected in the meantime, it would be very desirable. After several interviews between the representatives of the Engineers and Messrs. Hays and Robb, Mr. Hays made an offer of a substantial increase on the existing schedule of wages for a three years' agreement. This being ultimately accepted by the representatives of the Engineers, the agreement was virtually completed. On being notified of the settlement of the wage schedules, I returned to Montreal on August 11th, Mr. Cardell, whose home is in Calgary, having remained there in the interval, but Mr. Nesbitt was still unable to leave Sydney. On Monday, August 12th, the sittings of the Board were resumed. The agreement between the parties was put in final shape, and on the following day, August 13th, it was signed on behalf of the Grand Trunk Railway by Messrs. Hays and Robb, and on behalf of their Locomotive Engineers by Messrs. Cameron, Battley and Johnson, as also by Mr. Cardell and myself for the Board of Conciliation and Investigation.

As further required by the Act, I am sending certified accounts as to the expenses of the Board.

I have the honor to be

Yours very sincerely,

(Sgd.) ADAM SHORTT,  
Chairman Board of Conciliation and Investigation re dispute between the Grand Trunk Railway and their Locomotive Engineers.

LIGHT TRAIN RUNS.

1. Passenger rates effective on the district travelled will govern.
2. If used for other service during the trip, such mileage or time will be paid at the rates governing for the class of service performed.

Rate for light running.  
Rate for other work in connection with light running.

PILOT OR PUSHER SERVICE.

1. Exclusive pilot or pusher service will be compensated for at regular road rates.
2. Engineers performing pilot or pusher service in connection with switching will be paid at the switching rate in effect at the station from which the work is done.

Exclusive pilot service.  
Pilot in connection with switching service.

## SHORT RUNS FROM TERMINALS.

- hort runs. 1. Short trips or turn arounds, fifty (50) miles or less, will be rated as fifty (50) miles, and paid for at the regular rate for the class of service performed; any additional service performed in the same day will be paid actual time made.
- Short return trips. 2. Short return trips, continuations of regular trips, will be paid actual mileage or time at the rate in effect for the class of service performed, but where men are held thirty minutes for special short return trip service, not part of their regular work, they will be allowed detention for the time so held.

## CONSTRUCTION AND WRECK SERVICE.

- Mileage for construction and wreck service. When a trip, single or return, exceeds fifty (50) miles, pay will be allowed at mileage and detention rates for the class of service performed. The time occupied spotting cars at ballast pits will be considered as distinct from any such trip, and will be paid for at the hourly rate.

## DETENTION.

- Passenger detention mileage. 1. On all passenger trains, not otherwise specified, detention will be paid for the time used in making the trip, in excess of the time necessary to complete the trip at an average speed of fifteen (15) miles per hour.
- Freight mixed and snow plow detention mileage. 2. On all through freight, mixed and snow plow runs, not otherwise specified, detention will be paid for the time used in making the trip, in excess of the time necessary to complete the trip at an average speed of ten (10) miles per hour.
- Way freight detention mileage. 3. On all way freight runs of over 100 miles, not otherwise specified, detention will be paid for the time used in making the trip, in excess of the time necessary to complete the trip at an average of nine (9) miles per hour.
- Computing detention. 4. Detention will be computed from the time a train is ordered to leave the point of departure until it is registered in, at the arriving terminal.
- Fractions of an hour. 5. Fractions of an hour thirty (30) minutes or less will not be counted as one (1) hour.
- Terminal delays before departure. 6. Terminal delays in road service before departure to be reported on a separate ticket, and will be paid for at detention rate. Delays of less than one hour and thirty minutes (1 hour, 30 minutes) will not be counted. The time so made will be deducted from any detention earned on the trip.
- Terminal delays after arrival. 7. Terminal delays in road service after arrival to be reported on a separate ticket, and will be paid for at detention rate. Delays of less than forty-five (45) minutes will not be counted. Delays of over one hour and thirty minutes (1 hour, 30 minutes) to count two (2) hours. Terminal delay will begin when train is registered in at arriving terminal and when engine is delivered in engine house yard.
- Rate per hour for detention. 8. Detention will be paid at mileage rates for the class of service performed, based on detention speed limits.

## MISCELLANEOUS SERVICE RATES.

- Piloting. 1. Engineers acting as pilots will receive the schedule rate for the class of service performed.

2. Authorized deadheading on the Company's business will be paid at Deadheading. half the passenger rate for the district travelled.

3. Engineers assigned to specified runs will be paid extra for work Specified runs. done outside of the regular run, and for work performed either before or after time card hours, at the rates effective for the class of service performed, and failing to make a full month will be paid pro rate for the service performed.

4. Shop time, including time as acting as hostler, will be paid at Shop time. the rate of \$3.00 for each day of ten (10) hours; five (5) hours or less will be paid half day, over five (5) and less than ten (10) hours, one day.

5. Watching locomotives under steam or in tow will be paid at the Watching locomotives. rate of thirty (30) cents per day.

6. When an engineer is called and cancelled twenty-five (25) miles Called and cancelled. at regular trip rate will be allowed if not stopped before leaving home. Having left home he will be entitled to a trip ticket, and should sign the appearance book, but if other work can be found, he will be employed and his compensation will be computed from the time first called for at the rate effective for the class of service performed.

7. At stations where no regular force is provided engineers will be Housing locomotives. paid thirty (30) cents for turning, and properly housing each locomotive, day and night.

8. Engineers attending court or Coroner's inquest on legal cases for Attending legal cases. the Company will be allowed four dollars (\$4.00) for each twenty-four (24) hours, or portion thereof, detention from from duty. When such service is done on a day on which regular work is also performed, payment will be made pro rate for the time so occupied; when such service is done on a lay-off day the full rate will be allowed. Expenses will be allowed at the rate of two dollars (\$2.00) for each twenty-four (24) hours away from home station. The court witness fees and mileage will be assigned to the Company.

9. Switch locomotive engineers will be allowed an hour for meals, Switch engineers' meal hour. between the fifth and seventh hours on duty. If not possible to allow meal hour between the hours named, it will be paid for. Twenty minutes will be allowed for lunch.

10. Engineers will be paid thirty (30) cents per hour for the author- Heating trains. ized heating of trains at terminals; fractions of an hour, thirty (30) minutes or less will not be counted.

11. Engineers ordered to leave Niagara Falls, Ontario, one hour Special service at Niagara Falls. previous to the schedule leaving time of the train from Suspension Bridge, N. Y., will be paid twenty-five (25) cents per hour; not more than one hour will be allowed.

12. Engineers when required by the Company to learn the road will Learning road. be paid the distance learned. This does not apply to newly employed or promoted engineers, who will learn the road in their own time.

13. Mileage will be allowed for light running to and from trains Light running between round-house and train. East and Dearing and Portland, Turcot and Bonaventure, London East and London, and Elsdon and Chicago.

GENERAL RULES.

1. The trip mileage will be computed from the train mileage. Trip mileage.

2. When engineers whose compensation is on a mileage basis are Doubling grades and running for coal or water. obliged to double grades on account of the train tonnage exceeding the rated capacity of the locomotive, or to run for supply of coal or water, such mileage will be paid for at the rating specified for the district,

- and at the rate effective for the class of service performed; the time so made will be deducted from any detention earned.
- Assisting trains.** 3. Engineers taken from trains on the road to assist other trains will be allowed actual mileage at the rate effective for the class of train assisted; the time so made will be deducted from any detention earned.
- Dummy engine, International bridge.** 4. Engineer on Dummy Engine, International Bridge, Port Erie, will be paid at switching rate.
- Time\*not allowed.** 5. When time is not allowed tickets will be returned to the Locomotive Foreman who will advise the engineer in writing why time is not allowed.
- Seniority list.** 6. Station seniority list will be posted at the beginning of each year at each locomotive station.
- Computing work done by hour.** 7. When computing work done by the hour, thirty (30) minutes or less will not be counted; over thirty (30) minutes to count one (1) hour.
- Delivering engines.** 8. When engineers deliver engines or are held at foreign stations, if no engine is available within twelve hours to return with, they will be furnished with trip ticket and pass to return to the home station.
- Time allowance in switching service.** 9. Engineers engaged in yard switching service will be paid five (5) hours for service performed less than five (5) hours, and ten (10) hours for service performed over five (5) hours and up to ten (10) hours.
- Road locomotives switching at terminals.** 10. Engineers of road locomotives will be paid at switching rates when they are required to switch for over thirty (30) minutes at a terminal before or after the departure time of the train called for, or after the time the train is registered in.

#### ASSIGNMENT OF SERVICE.

- Through freight runs.** 1. Through freight locomotives and engineers, not assigned to preferred freight runs, will be run first in first out on the district to which they belong as far as practicable, in the service to which they are assigned.
- Yard engineers.** 2. Engineers on yard locomotives will take turn about working the day and night shift for the period of two (2) weeks.
- Spare work.** 3. Spare work will be performed by spare men first in first out if competent for the service required. Where spare men by continuous service cannot make fifteen (15) days per month the spare list will be reduced by putting junior men firing.
- Application for temporary vacancies on regular runs.** 4. Upon application of the man entitled to the run, temporary vacancies of ten (10) days or more on regular runs will be filled by the qualified senior man in the freight service.
- Spare list.** 5. The spare list will be posted, it being the duty of the spare men to give continual attention to it, and be prepared for duty at any time, unless they shall have received permission to be absent.
- Spare men losing turn.** 6. Spare men not at home when called will lose their turn and fall to the bottom of the list.
- Engines for regular runs.** 7. Engineers assigned to regular runs will be regularly supplied with engines to make their regular trips; where the service demands it engines and men will be used as required.

#### CALLS.

- Responding to call for duty.** 1. Engineers must respond promptly to the call for duty. A grievance real or imaginary, should take the form of a complaint to be inquired into and dealt with at the proper time, but it does not justify refusal to comply with instructions.

2. A caller will be kept at stations where it is necessary to call en-Callers.  
gineers.

3. Men will be called at their regular registered residences, and as Time to be called.  
nearly as possible two (2) hours before the leaving time of the train.  
Each man when called must sign the call book, which will show the  
time called and the departure time of the train called for.

4. The distance limit for calling not to exceed one (1) mile, except in Calling distance  
cases where this rule would impose a hardship on engineers who at the limit.  
present time possess homes located outside this limit.

5. Engineers who are assigned to regular runs, will not be called for Calling men as-  
trains leaving between the hours of seven (7) a. m. and eight (8) p. m., signed to regular  
out, if request is made of the foreman in charge, men who may arrive runs.  
after eight (8) p. m. will be called for a regular run leaving at eight (8)  
a. m.

#### REST.

Engineers after a continuous service of twelve (12) hours or more, Time for rest.  
may have eight (8) hours rest before they are again called upon for  
service, except in case of emergency.

#### LEAVE OF ABSENCE.

Leave of absence must be obtained from the foreman in charge. In Leave of absence.  
the event of illness notice must be given immediately so that a sub-  
stitute may be provided.

#### PROMOTION.

1. Senior engineers will have the precedence for promotion, de-Qualification for  
pendent upon their general good conduct, faithful discharge of their promotion.  
duties, and ability to assume increased responsibility, the Master  
Mechanic to be the judge.

2. Vacancies on all regular runs will be advertised inside of ten (10) Vacancies on regu-  
days and filled inside of twenty (20) days, if possible to do so. lar runs.

3. Station and divisional promotion will prevail, the latter for en-Promotion.  
gineers only for first class trains. The first district will be considered as  
a division for promotional purposes.

4. Engineers who fail to pass the Motive Power and Transportation Examinations.  
Department requirements will be given an opportunity to pass a second  
examination, and failing will be dismissed.

5. When necessary to transfer engineer from one station or division Seniority of trans-  
to another, junior men only will be transferred. If it is necessary for ferred men.  
them to remain for one year at the station to which they are transferred,  
they will be classed as permanent men and retain their seniority.

#### DISCIPLINE.

1. Frequenting saloons, the use of intoxicating liquors or insubordina-Cause for dis-  
tion, will be sufficient cause for dismissal. missal.

2. Engineers will be dismissed or suspended from the service only by Dismissals, sus-  
the Superintendent, Master Mechanic, Assistant Superintendent or pensions and in-  
Trainmaster. They shall have a fair and impartial hearing and vestigations.  
investigation by the proper officials of the Company will be held as soon as  
practicable after the occurrence. An engineer may select another en-

gineer for the same division to attend the investigation and speak for him if he so desires. If not found guilty of the charge he will be paid for the time lost.

Motive Power Dept. representative at investigation.

3. Where engineers are concerned, a representative from the Motive Power Department will be present at the Transportation Department investigations.

#### GENERAL DUTIES.

1. To economically handle and use the oil, coal, sand, water, waste and stores.

2. At Richmond, Montreal, Brockville, York, Ottawa, Madawaska, Depot Harbor, Mimico, Hamilton, Niagara Falls, Fort Erie, London and Durand, engineers will place their locomotives for coaling and deliver them as close to the ashpit as circumstances will allow.

At other terminals engineers will, if the road is clear, place their locomotive opposite the coal chutes at the designated point at which it will be taken charge of and coaled by the shop staff.

3. To report for duty and register out forty-five (45) minutes previous to the time called to leave, and to be on hand and have the locomotive in readiness to start with the train at the time called to leave.

4. To examine the bulletin books and notice boards before leaving a terminal.

5. To enter rest required immediately on arrival at terminal in book provided for that purpose. If leave of absence on account of sickness or for any reason other than for rest is desired, to report personally to the Foreman or his substitute.

6. To lock all locomotive seat, tool and equipment boxes, and to deliver the keys of same before leaving the Company's premises, and to make report of all equipment missing or broken during the trip.

7. To assist in every manner possible in the event of a locomotive failure or casualty to avoid delay to the train and to clear the main line.

8. To make the light repairs which may be necessary to keep the locomotive in good condition for service during the period that branch train locomotives are kept from, and until they can be taken to round house terminal.

#### DUTIES AT ROUND HOUSE TERMINALS.

1. To make a thorough hammer test inspection of the locomotive both after arrival and previous to leaving a terminal, and engineers will be held responsible for any defects found inside of engine frames, except where they have booked inspection to be made, which must be only at points where and at times when there are no means of making the inspection.

2. To see that the locomotive has its proper equipment and a full supply of oil, sand, water, coal and stores before leaving the round house tracks to go out on a run. In the case of locomotives requiring to be equipped with tools before going into service, such work will be attended to by the shop staff.

3. To test the air pump, both injectors, lubricators and the steam heat equipment, and know that they are in proper working order previous to leaving the round house tracks to go out on a run.

4. To personally test the air brake and the signal whistle equipment by operating the engineer's brake valve and the angle cocks at the rear

end of the tender, and to see that this equipment is in good working order, previous to leaving round house tracks to go out on a run.

5. To adjust the feeds of all oil cups, and to close the feeds immediately on arrival at a terminal.

6. To see that the automatic coupler knuckles are closed and that the air and steam hose are coupled to their respective fastenings, before the locomotive is delivered at a terminal.

7. To see that heaters are applied during severe weather to all pipes requiring such and before locomotives are delivered at a terminal.

8. To drain the water of condensation from the main and auxiliary reservoirs, triple valves, drain cups and all other portions of the air brake equipment, to prevent its accumulation, and in addition to see that all parts of the engine and tender and air appliances that are liable to damage by frost are properly drained when an engine becomes disabled in service.

9. To see that a judicious amount of water is left in the boiler of locomotives before they are delivered at the round house after arriving at a terminal.

10. To register in immediately on arrival at a terminal, and to make out the trip tickets and the forms used in reporting train detentions, casualties, personal injuries, stock struck, fires, etc., when such reports are necessary, before leaving the Company's premises.

11. To make immediately on arrival at a terminal a complete written and intelligent report of all work necessary to be done by the round house force on the assigned locomotive.

12. To keep in adjustment the travel of the driver and engine truck brake cylinder pistons, when the same can be reached from the outside, and to test the air brake equipment, and to remedy or make prompt report of all irregularities.

13. To care for the trimming of the eccentric straps, also for the trimming of the top of the driver boxes where they can be conveniently got at. When this work is reported it will be attended to by the shop staff.

14. To pack the steam and air stuffing boxes on the boiler head and other steam throttles when it can be done with steam in the boiler, and can be conveniently reached. This work to be done by the shop staff when reported.

15. To pack the steam and air end stuffing boxes of the air pump piston rod.

16. To apply swabs to the valve stem, piston rod and air pump piston rod glands.

17. To pack the valve stem and piston rod stuffing boxes of locomotives not equipped with metallic packing.

18. To clean and care for the head lamp, reflector, burner, chimney and the glass to the cage.

19. To care for the locomotive equipment.

20. To care for the air pump and see that it is kept in a clean condition and properly lubricated.

21. To make a complete and intelligent report of work necessary to be done on locomotives going to the shops for repairs.

#### DUTIES IN SERVICE ON THE ROAD.

1. To make as many intermediate inspections of the locomotive as opportunity may afford

2. To renew the water gauge and lubricator glasses.
3. To tighten the nuts to all bolts found to be loose.
4. To close the feeds of all lubricators and oil cups when lying at stations or on side tracks for over five minutes.
5. To see that the heaters are applied properly to all injectors, steam heat, rail cleaner and other pipes requiring such heaters during severe weather.
6. To be responsible for the steam pressure and water in the boiler and the steam heat line, and the air pressure in the train and signal lines being maintained and not increased.
7. To prevent such firing of a boiler as will produce black smoke and cause the steam to be relieved through the pop valves ; all the surplus steam to be blown into the tender feed water.
8. To see that the firemen attend to the duties assigned to them and that they comply with the instructions in effect.
9. To handle the locomotive in such a manner as will give the best results, both as regards economy and efficiency; to make up all the time possible with trains that may be late or important and to handle the air brake and steam heat equipment in accordance with instructions, and to render the best of service.
10. To make a telegraphic report to the Master Mechanic of slid flat wheels under locomotive, and of accidents which result in damage to machinery or personal injury, and of causes for unusual delays to trains which may be chargeable to the Motive Power Department.
11. To immediately notify the Conductor in the event of a locomotive becoming disabled on the road so as to cause delay to trains, as to the reason of the failure, how soon the locomotive will be ready to proceed and with what portion of the train, so that the Trainmaster can be advised and issue the necessary instructions.

(Signed) W. D. ROBB,  
Supt. of Motive Power.

Second Vice-President & General Manager.

On behalf of the Locomotive Engineers of the Grand Trunk Railway System, we accept the above schedule as in force for three years from August 1st, 1907.

Members of Board of Conciliation  
and Investigation.

D. CAMERON  
J. BATTLEY,  
J. S. JOHNSON,  
ADAM SHORTT, (Chairman)  
J. CARDELL;

#### IV.—COTTON MILL EMPLOYEES AT VALLEYFIELD, QUE., INVOKE THE ACT UNDER CLAUSE 63.

THE first application for the establishment of a Board of Conciliation and Investigation under clause 63 of the Act, which allows a reference under its provisions of a difference in any industry other than that of a mine or public utility in the event of both parties to the said difference consenting to such reference, was received in the Department on August 26, on behalf of the operatives employed by the Montreal Cotton Company at Valleyfield, Que. The application was signed by Maurice Neveu, president of Local Union No. 10 of the Federation of Textile Workers of Canada, and by Joseph Chasle, general secretary of the same organization. The employees were designated as Local Unions 8, 9 and 10 of the Federation of Textile Workers of Canada, and the approximate estimate of the number of employees affected was 2,200, representing 950 males, of whom 250 were stated to be under the age of 21 years, and 1,250 females. The statement of differences showed the same to be mainly of a technical character or to relate to the internal economy of the mills. They were set forth formally as follows :—

"1. That all employees working beyond regular hours shall receive 20 per cent over their regular wages.

2. That the price list as arranged shall be posted in all departments at the door and in sight of the employees."

3. That the construction of cloth woven shall be a part of the warp put in looms.

4. That a new system be devised whereby the weaver shall have the benefit of the cloth woven on his looms at the expiration of the fortnight.

5. That certain foremen and other subordinate officials have treated the employees under their charge with partiality and have dismissed some employees unfairly.

6. That the ten per cent increase of wages promised by the company in May last was not granted to the whole of the employees and that in a number of cases where it was granted the character of the work was subsequently changed in such a way that the benefit of the increase was partly lost."

It may be added that prior to the agreement to refer these differences to a Board of Conciliation and Investigation, there had been a strike of ten days' duration on the part of the employees at Valleyfield. The ostensible cause of the strike had been a dispute with reference

to the wages paid to the mule spinners. The dispute would appear to have been on the eve of settlement, when, apparently through a misunderstanding on the one side or the other, the employees ceased work in a body. This occurred on Wednesday, August 14. The management then asked the assistance of the Department of Labour in reaching an agreement, and Mr. F. A. Acland, secretary of the Department, and Mr. V. DuBreuil, another official of the Department, visited Valleyfield for that purpose, having first ascertained from Mr. Wilfrid Paquette, president of the Federation of Textile Workers of Canada, that the employees were on their part willing to accept the good offices of the Department in the work of conciliation.

On the cessation of work by the employees at Valleyfield, a public meeting of the hands was held at which the differences were discussed and a resolution was passed setting forth various grievances on their part, in addition to that of the mule spinners, and including a demand for an increase of wages amounting to 10 per cent for all hands other than the mule spinners. In view of the reference of the dispute to a Board of Conciliation and Investigation, it is unnecessary to discuss the grievances as set forth at this stage of the proceedings, other than to state that during the negotiations that followed, for the most part through the medium of the officers of the Department, an agreement with regard to the mule spinners, the original cause of the dispute, was made with the Company acceptable to the employees; also with reference to the ten per cent. increase demanded, it was contended by the Company that an increase of five per cent had been given voluntarily by the Company in February last and a second increase of ten per cent. had been granted in response to the demands of the Union in May last, and that consequently a further increase for the present at least was impossible. Finally, it was agreed between the disputing parties to refer for adjustment before a

Board of Conciliation and Investigation, established under clause 63 of the Industrial Disputes Investigation Act, 1907, the list of grievances as set forth above. This decision was reached unanimously on the part of the employees at a mass meeting on the evening of Saturday, August 24, and the whole of the hands returned to work on the following Monday morning, August 26.

The establishment of the Board was at once proceeded with by the Minister of Labour, and the following appointments were made: nominated by the employees, Wilfrid Paquette, Montreal; nomin-

ated by the employers, Mr. Duncan McCormick, K. C., Montreal.

These appointments took place during the closing days of August, and the third member of the Board had not been named at the end of the month. It was expected, however, that the Board would be fully established and would begin its investigations during the early days of September.\*

\* The two members of the Board not being able to recommend the name of a third member the Minister of Labour, on September 4, appointed to the Board the Honorable Mr. Justice Fortin, of the Superior Court for the District of Montreal, and the Board proceeded thereupon to investigate the differences referred to it.

### INVESTIGATION INTO LABOUR CONDITIONS IN ALBERTA COAL MINES AND INTO THE FUEL SUPPLY OF THE WEST—FINDINGS OF THE ALBERTA COAL COMMISSION.

ONE of the consequences of the scarcity of coal in the West during the past winter was the appointment on May 17, by the Government of the Province of Alberta of a commission to enquire into the circumstances attending the production of coal in the province, the relations between employers and employed, the causes of difference between employers and employed, with suggestions for the fair settlement of the same, the general conditions of labour in the industry, and generally to secure information tending to throw light on or to explain the fuel scarcity above mentioned.

The members of the commission were the Honourable Arthur L. Sifton, chief justice of Alberta, Mr. Lewis Stockett, and Mr. Wm. Haysom, and the findings of the commission after an extended enquiry are as follows:—

EDMONTON, Saturday, June 29th 1907.

To His Honour,

THE LIEUTENANT GOVERNOR IN COUNCIL:

The undersigned Commissioners appointed by Your Honour by Commission bearing date the 17th day of May 1907, beg leave to report that they have held sessions of the Commission at Lethbridge, Frank, Coleman, Banff and Edmonton, and have examined eighty-eight witnesses, representing miners, operators, managers, medical men and railroad representatives, being in the estimation of your Commission a fair representation from practically all mines now in operation in Alberta and of the three railways at present doing business in this Province. We present herewith copy of the evidence taken or your careful consideration.

By the said Commission your Commissioners were authorized to enquire into, investigate and report upon all matters having to do with or concerning the relations of employers of labour to the labourers employed in the coal mining industry in the Province and more especially in relation to the wages paid to the labourers, the length of time constituting a working day, the conditions, sanitary and otherwise, under which such labour is performed, the precautions that are or should be taken to avoid accident or injury to the persons so employed, and the compensation of such persons or their dependents or representatives in the event of their injury or death while engaged in such employment and in this connection to enquire into, investigate and report upon all circumstances tending to the elucidation of the differences between employers and employed in this branch of industry with the purpose, so far as may be, of suggesting such solution or solutions for the fair settlement of such differences as the Commissioners may think proper to make; and further to make such enquiry and investigation as shall be found necessary by the Commissioners into all circumstances which may throw light upon or explain the scarcity in the coal supply which existed throughout some portions of this Province and the Provinces of Saskatchewan and Manitoba during the past winter.

With reference to the various points referred to us for investigation, we submit a synopsis of the evidence with our opinions based thereon for your consideration.

(1) In regard to the wages paid in the coal mining industry, we find that the employees of the mining companies are paid as follows:—

Ordinary unskilled outside labour \$2.25 per day.

Other outside employees' rate varying in accordance with skill from \$2.50 to \$3.67½ per day.

Inside employees are paid rates varying from \$2.50 to \$3.50 per day, in accordance with occupation.

The contract miners which includes the bulk of those employed in the actual coal mining work, are paid varying rates of wages settled by agreement between themselves and the employers and differing in accordance with the particular places and system of work, wages having been stated to range in individual cases from \$2.50 per day to \$12.00 per day, and as an average by the year the following list of mines report the rate of wages set opposite each one as being the average for the year:

Lethbridge.....	\$ 3.00 to \$5.00 per day.
<i>Taber Mines:</i>	
Reliance.....	4.00 per day room men. 5.00 per day entry men.
Consolidated Coal Co.....	3.50 to \$4.00 per day.
Domestic Coal Co.....	4.08.
Canada West Coal Co.....	52.00 a fortnight.
Lambton Mine, Woodpecker	4.00 to \$7.00 per day.
Frank.....	3.00 to \$4.00 per day.
Bellevue.....	4.79.
Lille.....	5.20½.
Coleman.....	4.85.
Bankhead.....	4.66.
Morinville.....	4.25.

Your Commissioners are of the opinion that legislation in regard to rates of wages would not be of any advantage in the present condition of affairs.

In regard to the frequency of payment of wages, the evidence given upon the part of the miners was practically unanimous in favour of payment being made at least every two weeks, which is the custom in a few of the mines.

Evidence was given in regard to other countries that the custom in England varied from a week upwards, Nova-Scotia two weeks, British Columbia monthly, and in the United States, fortnightly and monthly, but no evidence was produced in regard to Alberta that would show a distinction upon this question between miners and other classes of employees throughout the Province; and your Commissioners are of opinion that any legislation on this subject should be preceded by an enquiry into the conditions generally in regard to employees throughout the Province.

Evidence was given by the miners very largely in favour of a system of payment for coal by run of mine, while the evidence of the operators was generally speaking in favour of a system for screen coal where such coal was used for domestic purposes and sold upon a screened coal basis. In practice this system is only used, so far as the evidence shows, at the Lethbridge mine, and is said to be there taken into consideration in arriving at a basis of payment. The majority of your Commissioners do not feel justified in making a recommendation which could only apply to one class of coal, feeling that legislation in the interests of miners should be such as would be of general benefit to the miners in the Province, leaving matters which only refer to individual mines to be settled by an agreement.

(2) Your Commissioners beg to report that the evidence shows that the length of time constituting a working day in Alberta mines varies considerably. The large proportion of the men engaged in the work of getting out coal work not more than eight hours per day, those under contract to a certain extent regulating their own hours. In some mines this eight hours is reckoned from the time of entering the mine to the time of return to the surface, known among miners as a bank to bank day of eight hours. In others the eight hours is reckoned from the time of actually commencing work in digging coal or at such form of employment as they may be engaged in, and is exclusive of the time taken in entering the mines and getting to the place of actual work and returning from the same, which is known among miners generally as eight hours at the working face.

In other mines a half hour is taken in the middle of the day for eating dinner at a regular time, and the eight hours is calculated exclusive of this half hour. In some mines in the Edmonton and Taber districts an hour is taken in the middle of the day for dinner, these being generally speaking new mines where they have not gone to any special depth, and the men come to the outside to eat; and in one or two small mines the miners actually work nine hours per day. The other classes of labour inside the mine work from eight to ten hours per day. Outside employees generally work ten hours per day, and in some special cases they work eight or twelve.

The general bulk of the men engaged in the transportation of coal from the place where coal is cut to the outside of the mine work eight hours at the working face with an intermission at noon, but in some cases they work eight hours without an intermission for dinner, and in two or three mines the transportation men work only eight hours bank to bank. These hours are a matter of custom or agreement between the men and their employers.

The evidence given before your Commissioners by miners has been unanimously in favor of an eight hour bank to bank law for all persons engaged inside the mine, while the evidence given by operators, while generally favouring an eight hour bank to bank law for those persons engaged in the actual digging of coal, estimated to be from seventy-five to eighty per cent of those engaged in working inside the mines, has averaged from eight hours work at the face with a half hour intermission for dinner to ten hours work with one hour intermission for noon, and is applicable to the class of men generally known as transportation men, estimated from twenty to twenty-five per cent.

Your Commissioners regret they are unable to make a unanimous recommendation in regard to this matter.

(3) In regard to the sanitary conditions of the Alberta mines, your Commissioners find by the evidence that in all the larger mines the conditions are favourable to health so far as is consistent with the nature of the employment. In some of the smaller mines, which are ventilated by natural means, the air owing to the conditions of atmosphere outside varies considerably and is in some cases responsible for the temporary closing of those mines. In this respect your Commissioners recommend a closer inspection of some of the smaller mines with a view to the improvement of the conditions.

Your Commissioners also find by the evidence that some of the mines are not conducting bath houses for the use of the men, and would recommend an amendment to the Coal Mines Act making the erection of bath houses at the mine compulsory.

Your Commissioners would recommend in reference to the employment of boys in the mines that the minimum age should be sixteen years. Their conclusions being based upon evidence given by a large number of miners and the opinions of physicians who have had much experience in connection with the health of miners.

(4) In regard to the precautions which should be taken to avoid accidents or injuries to persons employed in or around mines, your Commissioners would recommend that the Coal Mines Act should be so amended as to provide that all necessary timber required for the use of miners should be brought as near the working face as practicable, and in no case further away than the nearest cross cut to the working face.

Your Commissioners would further recommend an amendment in regard to the distance between the first and second openings to the mine, which should not be less than one hundred feet.

Your Commissioners would further recommend that the Inspector upon each visit to the mine make a thorough inspection and post up immediately in a convenient place at the mouth of the mine a synopsis of his report, showing the places visited and the condition in which they were found, and that he insist upon the strict enforcement of the present provisions of the Coal Mines Act.

In regard to the advisability of issuing certificates to mines after examination, a large amount of evidence in the nature of opinions has been produced before your Commissioners, the miners being almost unanimously in favour of the system while the operators are just a unanimously opposed to it. No actual evidence has been produced to show whether accidents have been caused by the lack of such certificates, and therefore a majority of your Commissioners are not prepared to recommend legislation upon this subject.

(5) In regard to the compensation of persons injured in mines or the dependents or representatives of persons killed in mines, your Commissioners would report that the evidence taken demonstrates that the provisions of the present law, while they may be fair in theory, are in practice useless; that the expense necessary to conduct litigation under the present system of trial by jury and with the consequent appeals and long delays has in the past rendered it impossible in almost every case for any compensation to be recovered regardless of where the blame might rest and your Commissioners would therefore recommend that this class of cases be treated by a special compensation law, providing for the trial of accident or negligence cases by a special commission, appointed in such a way as to your Government may seem fit, whose duty it shall be to hear and determine finally all such cases as may be brought to their attention without appeal.

(6) In regard to the question of scarcity in the coal supply during the last year, your Commissioners have so far as possible enquired into the circumstances and find a number of different causes which have affected the supply. The strikes occurring in Alberta and the neighbouring Province of British Columbia, cut off the supply of a large quantity of coal that would probably under other circumstances have been available for use in the Provinces of Alberta, Saskatchewan and Manitoba. The exceptional severity of the weather last winter was also responsible for a portion of the shortage some of the mines having been compelled to close entirely for short periods and others could only operate with reduced tonnage and at a considerable extra expense, and also seriously interfered at times with the operations of the railways.

Your Commissioners also find that the lack of storage facilities at central points, not only increased the shortage of coal, but also militated against the profitable working of the mines in the summer and the earning of wages by the men regularly during the summer months.

Your Commissioners also find that the scarcity of mechanics and delays in getting material for the purpose of making needed improvements in connection with some of the larger mines was a serious factor in delaying development, and consequently prevented an increased supply of coal available for consumption.

Another reason given in partial explanation of the coal shortage was the fact that a large number of the miners, particularly in the prairie districts, have taken up homesteads and only work in the mines in the winter time.

Evidence was also given that a certain portion of the shortage from some mines was due to the habit of some miners taking religious and other holidays in addition to Sunday, and legal holidays.

Your Commissioners find in regard to a number of the newer mines, particularly in the Edmonton, Taber and Woodpecker districts, a serious complaint on the part of the mine owners in regard to lack of sidings for the economical loading and shipment of coal, many of these owners claiming that their capacity for profitable sale would be very largely increased if they had been able to have secured sidings promptly, thus accounting for a proportion at least of the shortage in the coal supply.

Your Commissioners find that in addition to these causes a very large proportion of the coal shortage during the past year has been due to the lack of cars furnished by the railways. This shortage in many mines has been not only a serious source of annoyance and danger to the consumers of coal, but a very heavy loss to the operators and the men engaged in mining, who in the larger mines have been kept idle for a period averaging at least two months of working days during the last year.

Your Commissioners find that although this state of affairs was a little more serious during the winter that at some mines it continued to almost an equal extent in

the summer, and is due to lack of transportation facilities, both cars and power on the part of the railways, as well as terminal facilities, and to a certain extent in some mines to the lack of bunker capacity which would have enabled the operators to have kept their mines working until cars could have been supplied them.

Evidence has been given upon behalf of the railroad companies that lack of transportation facilities was due to their inability to purchase equipment, and that the lack of terminal facilities and the building of spurs was largely due to their inability to secure men and material to do necessary work.

The railway people also claim that a strict observance of the Lord's Day Act would seriously interfere with the supply of cars in future, and in that way would curtail a supply of coal unless provided with a large additional equipment.

Your Commissioners would strongly urge in regard to the storing of coal that your Government should make every effort to induce individuals and companies, who are able so to do, to keep a supply of coal on hand stored during the summer for winter use. This has apparently in the past been absolutely neglected even during last year by large and constant users of coal the railroads even not keeping any supply for more than four or five days use, thus in case of any shut-down of mines, arising from any cause, apparently compelling the use of the daily output of domestic coal, which should be for the use of ordinary consumers unable to store their coal.

In addition to what can be done in this way, your Commissioners would recommend legislation in regard to the erection and licensing of warehouses, which would enable agents and dealers to better finance the purchase and storage of coal during the slack season.

In regard to the lack of sidings, your Commissioners would recommend that your Government take steps to investigate the several cases mentioned in the evidence, and where sidings are practicable, assist in placing a proper entrance before the railway authorities or railway commission to secure the erection of same.

In regard to the question of car shortage, your Commissioners would recommend that your Government should take all possible steps towards compelling the furnishing of cars to shippers in Alberta, and would recommend such legislation as may be necessary to accomplish that end. Evidence has been given upon the question of what is generally known as reciprocal demurrage, and your Commissioners are of the opinion that unless prompt compliance with the requirements of the mines of Alberta is otherwise made by the railroads operating therein that some such system is an absolute necessity and that your Government should take whatever measures as may be deemed expedient to accomplish the requisite purpose.

(7) COMPANIES' STORES.—Evidence was produced before your Commissioners that at two mines there were strong suspicions on the part of the miners that stores were operated in the interests of the Company. This was denied by the managers of the Companies in question, and your Commissioners do not feel that such evidence was produced as would warrant interference.

(8) INCORPORATION OF UNIONS.—Evidence has been given both in favor of and against a law compelling the incorporation of unions. Upon this point we refer your Government to the evidence taken and express no opinion.

All of which is respectfully submitted,

Signed ARTHUR L. SIFTON  
Chairman.

" LEWIS STOCKETT,

" WILLIAM HAYSON,

## LEGISLATION IN CANADA WITH REGARD TO MECHANICS AND WAGE EARNERS LIENS.\*

THE legislation in force in the several provinces of the Dominion with regard to liens of mechanics and others for wages or material is as follows:—\*\*

*Nova Scotia.*—Revised statutes, 1900, volume II, chapter 171: "Of liens of mechanics and others;" Nova Scotia Statutes, 1903-04, chapter 25: "An act to amend chapter 171 of the Revised Statutes of Nova Scotia, 1900, The Mechanics' Lien Act."

*Prince Edward Island.*—Statutes of Prince Edward Island, 1879, chapter 8, "The Mechanics' Lien Act;" Statutes of Prince Edward Island, 1882, chapter 11: "An Act to amend the Mechanics' Lien Act."

*New Brunswick.*—Consolidated Statutes of New Brunswick, 1903, chapter 147, "Respecting Mechanics' Liens."

*Quebec.*—Civil Code, Book 2, Title II, section 2, "Of the right of accession in relation to moveable property;" Book 3, Title XVII, "Of privileges and hypothecs." Revised Statutes of Quebec, 1888, Volume II, Part II, chapter 1, Section 14, article 5817, "Of payment of workmen;" Quebec statutes, 1894, chapter 46, "An act to amend the Civil Code with respect to privileges of builders, labourers, workmen and suppliers of material;" Quebec Statutes, 1895, chapter 42, "An act to amend the Civil Code, with respect to the privileges of architects, builders, labourers, workmen and suppliers of material."

*Ontario.*—Revised Statutes of Ontario, 1897, chapter 153, "An act respecting liens of mechanics, wage earners and others;" Statutes of Ontario, 1902, chapter 21, "An act to amend the Mechanics' and Wage Earners' Lien Act."

*Manitoba.*—Revised Statutes of Manitoba, 1902, chapter 110, "An act respecting liens of Mechanics, Wage Earners and others."

*Saskatchewan.*—Consolidated Ordinances of the North-West Territories of Canada, 1898, chapter 59, "An Ordinance respecting liens in favour of mechanics and others;" ordinances of the North-West Territories, 1903, chapter 18, "An ordinance to amend chapter 59 of the Consolidated Ordinances, 1898, intituled. An Ordinance respecting liens in favour of mechanics and others." Statutes of Saskatchewan, 1906, chap 26, "An act to amend the Mechanics' Lien Ordinance"

*Alberta.*—Statutes, 1906, chap. 21, "An act for the benefit of mechanics and labourers."

*British Columbia.*—Revised Statutes of British Columbia, 1897, Volume 2, chapter 132, "An act for the benefit of mechanics and labourers;" Statutes of British Columbia, 1900, chapter 20, "An Act to amend the Mechanics' Lien Act;" Statutes of British Columbia, 1903-4, chapter 35, "An act to amend the Mechanics' Lien Act."

## Definition of Terms.†

"Contractor."—In Nova Scotia, Prince Edward Island, Manitoba, Saskatchewan, and Alberta, the term "contractor" is interpreted as meaning a person contracting with, or directly employed by, the owner or his agent for the doing of work or further furnishing or placing of materials or machinery. In New Brunswick, Ontario and British Columbia, the

\* In an article published in the *Labour Gazette* for July and August, 1906, at pages 54 and 156, respectively, legislation defining the general relations of master and servant in Canada was dealt with. Special reference was made in the course of this article to the general terms of the law with regard to the obligations of employers in the matter of prompt payment of wages. In a subsequent article published in the October, 1906, issue, page 377, legislation of a special nature for the protection of workmen's wages was dealt with. The present article describes the extensive body of legislation granting to workmen engaged in certain classes of employment a specific claim, in addition to the rights and privileges described in the previous articles, to the extent of the amount owing for services or material, upon the value of the property on which their labour or material has been expended.

\*\* This statement does not include legislation relating to liens in favour of particular classes of employees, such as fishermen, woodmen, jewellers, threshers, etc., which will be dealt with subsequently in the *Labour Gazette*.

† See revised Statutes, N. S., Chap. 171, Sec. 2; P.E.I. Statutes, 1879, Chap. 8, Sec. 2; Revised Statutes, N. B., Chap. 110, Sec. 2; Revised Statutes, Ont., Chap. 153, Sec. 2; Revised Statutes, Man., Chap. 147, Sec. 2; Consolidated Ordinances, N. W. T., Chap. 59, Sec. 2; Alberta Statutes, 1906, Chap. 21, Sec. 2; Revised Statutes B. C., Chap. 32, Sec. 2; Statutes B. C., 1900, Chap. 20, Secs. 2, 3, 4, 5 and 6.

definition is identical with the above, except that no specific mention is made of machinery in connection with the furnishing of material.

"*Owner.*"—Under this term is included any person, firm, association, body corporate or politic, etc., having an interest in the land upon which the work or service for which a mechanic's lien is claimed, has been performed, or materials furnished or placed, and on whose behalf and interest the work is done. In New Brunswick and Ontario, municipal corporations are specifically included under the term; in the latter province, also, railway companies are specially mentioned.

"*Person.*"—The expression "person" is interpreted, in the case of Nova Scotia, New Brunswick and Ontario, as extending to and including a body corporate and politic, firm, partnership or association. In the statutes of the other provinces the term is not defined.

"*Material.*"—The term "material" or "materials," in Nova Scotia, New Brunswick, Ontario, Alberta and British Columbia, includes "every kind of moveable property."

"*Wages.*"—It is expressly stipulated in Nova Scotia, Ontario, Manitoba, Alberta and British Columbia, that this term shall mean money earned by a mechanic or labourer for work done, whether by the day or by piece work. Similarly, the term "labourers," "wage-earners," etc., includes all those working for wages by the day, hour, week, etc., or by piece work. In New Brunswick, however, it is stated that the term "wage earner" does not include labourers by the job. In Alberta and Saskatchewan, the term labourer includes "every mechanic, artisan, miner, builder, or other person doing labour for wages."

"*Registrar, registry office.*"—The term "registrar" is to be interpreted as meaning any Registrar of Deeds, in Nova Scotia. In Manitoba, the expression includes all district registrars, and the term "registry office" embraces Land Titles Offices in Ontario and Manitoba. In New Brunswick the term "registrar" means the Registrar of Deeds of the

county where the lands affected by the lien are situated. The term is not elsewhere defined.

"*Judge.*"—The term "judge" means, in New Brunswick, a judge of the county court of the county in which the lands affected by the lien are situated, or, in case he is interested in the lien, or is related to any of the parties, a judge of a county court acting in his place. In Alberta, a judge only of the Supreme Court of the North-West Territories, or of any court that may thereafter be constituted, having the same powers within the province, is included in the term.

#### Origin and Nature of Mechanics' Liens.

Unless an express agreement has been signed to the contrary, every person who performs work, or places or furnishes material in connection with the construction or improvement of a property, has by virtue thereof a lien for the price of the work or material upon the property in question, and upon the lands which appertain to it. In general, the lien is limited in amount to the sum justly due to the labourer or supplier of material, and justly owing by the owner of the property. The provisions setting forth this right are practically identical in the several provinces, with the exception of Quebec, the only difference in detail being in the enumeration of the different classes of construction on which liens may be levied (2).

In *Quebec*, labourers, workmen, suppliers of materials and builders have a right of preference over vendors and other creditors, upon an immoveable in connection with which they have rendered service, to the amount of the increased value given by the work done or the materials furnished. The privileges of

(2) R. S. N. S., Chap. 171. Sec. 3; P. E. I., 1879, Chap. 8, Sec. 3; R. S. N. B., Chap. 110, Sec. 4; R. S. O., 1897, Chap. 153, Sec. 4; R. S. M., 1902, Chap. 110, Sec. 4; C. O. N. W. T., 1898, Chap. 59, Sec. 4; A. S., 1906, Chap. 21, Sec. 4. and R. S. B. C., 1900, Chap. 20, Sec. 7. The enumeration in the Ontario statute is as follows— "The making, constructing, erecting, fitting, altering, improving or repairing of any erection, building, railway, land, wharf, pier, bulkhead, bridge, trestle-work, vault, mine, well excavation or fence, sidewalk, paving, fountain, fish-pond, drain, sewer, aqueduct, roadbed, way, fruit and ornamental trees, or the appurtenances to any of them.

the labourer, workman, architect and builder in this connection rank in the following order: First, labourer; second, workman; third, architect; fourth, builder<sup>(3)</sup>.

In *British Columbia* and *Alberta*, it is added to the above that mechanics' liens affect only such interest in the land involved as is vested in the owner at the time that the work or improvements are commenced, or any greater interest that the owner may secure during the progress of the work or improvements<sup>(4)</sup>. In the same province, material brought upon any land to be used for the purpose of improving it is subject to a lien for the unpaid price of it in favour of the person supplying it, until such time as it is worked into the building or other erection as a part of the same<sup>(5)</sup>.

The Mechanics' Lien Act in *British Columbia* is made *retroactive* to the extent of including any contract made or begun previous to its passage in 1891, in so far as regards any moneys remaining unpaid<sup>(6)</sup>. In *Ontario*, the act at the time of its consolidation was limited so as not to apply to liens arising prior to April 7, 1896<sup>(7)</sup>. Proceedings commenced under the act of 1879 in *Prince Edward Island*, and subsequently abandoned, were allowed under the amendments to the act passed in 1882 to be renewed without losing priority<sup>(8)</sup>. In *New Brunswick*, the act was framed so as not to apply to claims arising prior to August 1, 1894<sup>(9)</sup>.

In *Nova Scotia* and *Manitoba*, the commencement of a mechanic's lien, due formalities with regard to registration having been carried out, takes effect from the date of the commencement of the work, or the placing of the material, as against subsequent purchasers, mortgagees, etc.<sup>(10)</sup>

### Waiving of Mechanics' Lien Acts,

Special sections are inserted in the *Nova Scotia*, *New Brunswick*, *Ontario*, *Manitoba*, *Saskatchewan* and *Alberta* statutes to the effect that a person entitled to a mechanics' lien cannot be deprived, by any agreement or contract to which he is not a party, of the benefit of the lien.<sup>(11)</sup> In *Ontario*, moreover, an express provision makes any contract waiving the application of the act, null and void, except in the case of a foreman, manager, officer, or other person whose wages are more than \$3.00 per day.<sup>(12)</sup> In *Prince Edward Island*, an owner and contractor may by express agreement waive the application of the act.<sup>(13)</sup> In *Alberta*, certain defined proceedings, including the taking of security for a lien, is not to be deemed satisfaction or waiver of the lien, unless the lien holder agrees in writing.<sup>(14)</sup>

### Attachment of Mechanics' Liens.

Mechanics' liens attach directly upon the estate or interest of the owner in the land, building, improvement or other work in connection with which the labour has been performed or the materials furnished. In cases where the interest charged by the lien is *leasehold*, the fee simple may also, with the consent of the owner, be subject to the lien, provided that the consent of the owner is justified by his signature upon the statement of claim at the time of registration and duly verified. The provisions to the above general effect are identical in *Nova Scotia*, *Prince Edward Island*, *Ontario*, *Manitoba* and *Saskatchewan*;<sup>(15)</sup> in *New Brunswick*, *Alberta* and *British Columbia*, the provision with regard to liens on leasehold property is omitted.<sup>(16)</sup>

Attachment in *Quebec* is on the im-

(16) R. S. N. B., Chap. 147, Sec. 5; R. S. B. C. Chap. 132, Sec. 4.

moveable for the additional value given by the work done. In the event of the owner of the immovable erecting the building himself, without the intermediary of a contractor, suppliers of material may have recourse for payment to any person who may have lent money to the person building. <sup>(17)</sup>

In *Ontario, Manitoba, Saskatchewan, Alberta* and *British Columbia*, a special provision is inserted to include cases in which works or improvements are carried out upon mortgaged premises, in which cases the mechanics' lien is entitled to rank upon the increased value added by the work or material furnished, in priority to the mortgage or any other charge, though the latter has by implication priority up to the extent of the actual value of the land at the time the improvements were commenced. <sup>(18)</sup> In *Prince Edward Island*, also, mortgages contracted before the work have a prior claim to mechanics' liens. <sup>(19)</sup> In *New Brunswick*, as in *Quebec*, mechanics' liens have priority of claim to advances made under mortgages during the progress of the work and over the purchaser or mortgager of an unfinished building. <sup>(20)</sup>

In *Ontario*, where work is performed or materials furnished in respect of the lands of a *married woman*, with the consent of her husband, he is to be presumed to be acting for himself as well as for his wife for the purposes of the act. <sup>(21)</sup> In *New Brunswick* and *Saskatchewan* and *Alberta*, liens for wages in connection with buildings, etc., erected on property belonging to the wife of the person at whose instance the work is done, are attachable upon the interest of the wife in such property, as well as upon that of her husband. <sup>(22)</sup>

In *British Columbia* and *Alberta*, the owner of the land is deemed to have

authorized the erection of any buildings that are constructed thereon unless he has posted a notice within three days after obtaining knowledge of the work in some conspicuous place on the land where the improvements are being carried on, stating that he will not be responsible for the same. If the notice is posted after three days, the owner's immunity from claims for liens dates from the time of posting the notice. <sup>(23)</sup>

In *Nova Scotia, Ontario, Manitoba, Alberta* and *British Columbia*, where property upon which a mechanics' lien is given is wholly or partially destroyed by fire, any money received by reason of insurance thereon by an owner or mortgagee is to take the place of the property destroyed, and be subject to the claims for liens to the same extent as if the money had been realized by the sale of the property in an action to enforce a lien. <sup>(24)</sup>

In *Prince Edward Island, New Brunswick* and *Saskatchewan*, persons furnishing material to or doing labour for the holder of a mechanics' lien, are entitled, after giving 30 days' notice to the owner, to a charge pro rata upon any amount payable by the owner under the lien. <sup>(25)</sup>

In *New Brunswick*, mechanics' liens cannot be impaired by any garnishment, execution, etc., subsequent to the contract <sup>(26)</sup>, and wage-earners are entitled to enforce a lien on an unfinished building to the same extent as if the building were finished. <sup>(27)</sup>

In *Ontario*, mechanics' liens attach to the property of railway companies only in so far as the Legislature for the Province has authority or jurisdiction in regard thereto. <sup>(28)</sup>

#### Amount of Mechanics' Liens.

With regard to the maximum amount for which a mechanics' lien may be

claimed, this, as above implied, is commensurate in general with the sum justly owing to the wage earner or person furnishing the materials.

In *Nova Scotia*, *New Brunswick*, *Prince Edward Island*, *Ontario*, *Manitoba* and *Saskatchewan*, a mechanics' lien must not, in the absence of express provision to the contrary, attach so as to make the owner liable for a greater sum than that owing by him to the contractor. <sup>(29)</sup> In the same provinces also, in cases where liens are claimed by persons other than the contractor, the amount must be limited to the sum owing to the contractor or sub-contractor by whom the work has been done or the material furnished. <sup>(30)</sup>

In *Alberta*, the amount of the lien is limited to the sum actually owing to the person entitled thereto, <sup>(31)</sup> but mechanics employed on repairs or in installing machinery has a lien to the extent of six weeks' wages upon the owner. <sup>(32)</sup>

In *New Brunswick* and *Saskatchewan*, a mechanic's lien must not be for a greater sum than his wages for thirty days' work, or a balance equal to his wages for thirty days. <sup>(33)</sup>

The *British Columbia* Act, in specifying that a mechanic's lien must not make the owner liable for a greater sum than that which is payable by him to the contractor, makes an exception in the case of liens for not more than six weeks' wages. <sup>(34)</sup> Liens in general are limited to the sum actually owing to the lien holder. <sup>(35)</sup>

In *Quebec*, a privileged claim for wages is limited to the amount established as being the additional value given to the property by the work done. <sup>(36)</sup>

<sup>(35)</sup> R. S. B. C., 1897, Chap. 132, Sec. 5.

<sup>(36)</sup> Que. Stat. 1895, Chap. 42, Sec. 2;

*Manitoba* and *British Columbia* are the only provinces in which a minimum amount is fixed under which no lien for wages is allowed. The sum named in each province is \$20. <sup>(37)</sup>

#### Protection of Owners.

In the Provinces of *Ontario* and *Manitoba*, the person primarily liable upon any contract under which a mechanics' lien may arise, is allowed to deduct from his payments to the contractor a sum equal to 20 per cent of the value of the work performed or material furnished, and to retain this sum for a period of 30 days after the completion or abandonment of the contract. Where a contract exceeds \$15,000 the amount which he may thus retain is limited to 15 instead of 20 per cent, and mechanics' liens are to be a charge upon the amounts retained in favour of sub-contractors whose liens are derived under persons to whom the retained moneys are respectively payable. Payments up to 80 per cent (or 85 per cent where the contract price exceeds \$15,000) of the value of the contract made in good faith by any owner to a contractor or by a contractor to a sub-contractor, or by one sub-contractor to another sub-contractor before any written notice of a mechanics' lien is given, operate as a discharge *pro-tanto* of the lien. Payment of the percentage which is required to be retained as above, may be made so as to discharge all liens after the expiration of the period of 30 days mentioned, unless proceedings have been commenced in the meantime to enforce the liens against the percentage mentioned <sup>(38)</sup>.

In *Nova Scotia* a similar provision to the above is in force, except that the amount which may be retained by the owner is in no case to exceed 15 per cent of the value of the work or material; similarly, payments up to 85 per cent of the value of the contract, made in good faith by the owner before notice of the lien has been given, are to operate as a discharge *pro-tanto* of the lien. <sup>(39)</sup>

<sup>(37)</sup> R. S. Man., 1902, Chap. 110, Sec. 4; B. C., Stat. 1900, Chap. 20, Sec. 21.

<sup>(38)</sup> Ont, Chap. 153, Sec. 11; Man. Chap. 110, Sec. 9.

<sup>(39)</sup> R. S. N. S., Chap. 171, Sec. 8.

In *Prince Edward Island*, all payments up to 90 per cent of the price to be paid for the work or material made in good faith by the owner, operate as a discharge *pro-tanto* of a mechanics' lien, provided the payment has not been made for the purpose of defeating or impairing a claim for a lien. The lien is also operate as a discharge to the extent of 10 per cent of the price to be thus paid by the owner up to ten days after the completion of the work, but not for a longer period unless notice in writing has been given<sup>(40)</sup>.

In *New Brunswick* an owner, in the absence of any stipulation to the contrary, is allowed to retain for 30 days after the completion of the contract, 15 per cent of the price to be paid to the contractor when such price does not exceed \$1,000; 1½ per cent when the price is more than \$1,000 but does not exceed \$5,000; and 10 per cent in all other cases. The *pro tanto* discharge allowed embraces all payments up to 90 per cent made by the owner in good faith prior to notice of a lien being given. As in *Prince Edward Island*, a mechanic's lien operates as a charge to the extent of 10 per cent of the price of the work or material up to ten days after the completion of the work or the furnishing off he material. In cases however, where the contract price is less than \$1,000 the *pro-tanto* discharge is allowed for only 85 per cent of the amount and the lien operates as a charge to the extent of 15 per cent, and in cases where the total price exceeds \$1,000, but is less than \$5,000 the *pro-tanto* discharge is allowed for 87½ per cent and the lien operates to the extent of 12½ per cent<sup>(41)</sup>. In addition to this section the *New Brunswick* act provides that before a contractor is entitled to receive payment he must leave a statutory declaration with the owner stating that all persons employed on the work have been paid in full up to the 14th day preceding payment by the owner. If any wages are admitted to be unpaid the amount may be deducted by the owner. If this declaration is not required by the owner he is liable for the wages. Other-

wise, and if no notice has been received by him of wages remaining unpaid, the declaration is regarded as conclusive evidence in favour of the owner.

In *Quebec*, proprietors of immovables have the right to retain out of the contract price an amount equal to that mentioned in any notice of claims he may have received from workmen and suppliers of material, in order to meet these claims. In case there is a difference of opinion between the debtor and creditor as to the amount, the creditor must inform the owner of the fact without delay and in writing, mentioning the amount claimed and by whom, and the nature of the claim. The owner there upon retains the amount in dispute until a settlement is reached.<sup>(42)</sup>

In *Saskatchewan*, owners may retain 10 per cent of the contract price for thirty days after the completion of the work. All payments up to 90 per cent of the value of the work made in good faith by owners without notice of liens, operate as a discharge *pro tanto* of the liens. It is further provided that mechanics' liens are to operate as a charge to the extent of 10 per cent up to ten days after the completion thereof, without notice<sup>(43)</sup>.

In *Nova Scotia*, *New Brunswick*, *Ontario* and *Manitoba*, sections are added to the above for the further protection of owners, providing that in case an owner chooses to make payments to persons entitled to a mechanic's lien or his property for any debt justly due to them in connection with the work, he must give notice within three days to the contractor or sub-contractor and the payment is thereupon regarded as made to the contractor or sub-contractor, though not so as to affect the percentage to be retained by the owner as above described<sup>(44)</sup>.

In *New Brunswick*, *Prince Edward Island* and *Saskatchewan*, where an owner pays out money to persons who have furnished material or labour to lien

holders and who have therefore a charge on the amount owing to the lienholder, he is considered to have discharged his debt to the lienholder *pro tanto*.<sup>(46)</sup>

### Priority of Mechanics' Liens.

A feature\* which is of first importance in connection with the character of a mechanic's lien for wages is the priority of the claim it establishes over all other assignments, attachments, garnishments &c., applying to the property affected.

In *Nova Scotia, Ontario, and Manitoba*, the provisions of the statutes on this point are practically identical. Mechanics' liens, it is stipulated, have priority over all judgments, executions, assignments, attachments, garnishments, and receiving orders, recovered, issued or made after the lien arises, and over all payments or advances made on account of any conveyance or mortgage, after written notice of the lien has been given to the person making the payments, or after registration of the lien<sup>(47)</sup>. In *Quebec*, also, the sale of an immoveable does not affect the claim of persons having a privilege of this kind.<sup>(47)</sup> and where an agreement for the purchase of the land exists, but no money has been paid over or conveyance made, the purchaser is deemed a mortgagor and the seller a mortgagee<sup>(48)</sup>. Holders of mechanics' liens rank equally in their claims if of the same class, and the proceeds of any sale is to be divided *pro-rata*.<sup>(49)</sup>

In the case of mechanics and labourers in the above Provinces whose lien is for work done for wages, express right to priority of claim is granted to the extent of thirty days' wages over all liens derived through the same contractor or sub-contractor on any amount retained by the owner, as described

above, out of the contract price. It is further stipulated that all mechanics and labourers are to rank *pari-passu* on this account, and that wage earners are entitled to enforce a lien in respect of a contract not completely fulfilled. In such cases, the percentages to be retained by the owner are to be calculated on the work done or material furnished by the contractor or sub-contractor by which the wage earners claiming the lien are employed. Moreover, where a contractor or sub-contractor fails to complete his contract, the percentage which is required to be retained by the owner, must not be applied to the completion of the contract, nor to the payment of damages for non-completion of the contract, nor in satisfaction of any other claims against the contractor in any way that would injure the interests of the persons claiming the lien.

In *Nova Scotia, Ontario, Manitoba, Alberta and British Columbia*, an express provision is inserted in this connection, declaring that any device adopted by the owner or contractor to defeat the priority of right given to wage earners for their wages is to be null and void<sup>(50)</sup>. A similar provision in *New Brunswick* relates to the general subject of mechanics' liens and not simply to their priority<sup>(51)</sup>.

In *New Brunswick*, a mechanic's lien for wages for thirty days or for a balance equal to thirty days, is given priority over others liens to the extent of 10 per cent (or 12½ or 15 per cent, according to the amount of the contract) of the contract price, and over all claims by the owner against the contractor for failure to complete the contract.<sup>(52)</sup>

In *Quebec*, the right of preference granted to workmen over vendors and other creditors on immoveables is ranked as follows:—First, the labourer; second, the workman; third, the architect; and fourth, the builder. The right of preference is limited to the additional value

(45) C. S. N. B., Chap. 147, Secs. 11 & 13; C. O. N. W. T., Chap. 59, Sec. 11; P. E. I., 1879, Chap. Secs. 8-10.

given to the immovable by the work done, and dates from the registration of the claim. <sup>(53)</sup>

In *Saskatchewan*, a lien for wages of thirty days or a balance equal to thirty days, has priority to the extent of the 10 per cent of the contract price, which may be retained by the owner, over all other liens under the ordinance and over any claims by the owner against the contractor for failure to complete his contract <sup>(54)</sup>.

In *Alberta* and *British Columbia*, all moneys realized by proceedings under the Act, are to be distributed in the following order:—(1), law and judgment costs; (2), all wages owing for a period not to exceed six weeks to labourers employed by the owner, contractor or sub-contractor; (3), the several amounts owing for material; (4), the amounts owing sub-contractor and other persons employed by the owner and contractor; (5), the amounts owing the contractor. Each class of lien holders is to rank *pari-passu*, and the distribution of moneys is to be *pro-rata*, according to the several classes or rights of the lien holders, any balance that may remain after settlement of all claims to be payable to the owner, though, if a labourer has more than six weeks wages owing to him by a contractor or sub-contractor the court must deduct the extra sum from the money coming to the contractor or sub-contractor in question, under the above distribution, and order it to be paid to the labourer. <sup>(55)</sup>

#### Additional Security for Mechanics' Liens.

In *Nova Scotia* it is provided that during the continuance of a mechanic's lien no portion of any material or machinery affected thereby may be removed to the prejudice of the lien, and due provisions are added as to the proper steps to be taken in case such removal is attempted <sup>(56)</sup>. It is provided, however, that where materials are brought upon any

land to be used in connection therewith, they may be subject to a lien to the person supplying them until put in the building, erection or work <sup>(57)</sup>. Provisions substantially identical to these are included in the *Manitoba Act* <sup>(58)</sup>. In *New Brunswick*, the removal of any machinery or property lien is also forbidden, but no clause is added with regard to the attachability of materials prior to their use in connection with the building <sup>(59)</sup>.

In *Prince Edward Island* and *Alberta*, in addition to a clause forbidding the removal of materials to the prejudice of a mechanics' lien, it is provided that in cases where materials have been supplied by mechanics, contractors or other persons, they are not to be subject to execution or other process to enforce a debt other than for the purchase thereof, whether the materials have or have not been, in whole or part, worked into the building <sup>(60)</sup>. In *Ontario*, the removal of material is forbidden, and any material brought upon the land is not to be subject to execution or other process to enforce a debt due by the persons furnishing the same, other than for the purchase thereof <sup>(61)</sup>. In *Saskatchewan* and *British Columbia* it is simply provided that materials affected by a mechanic's lien must not be removed <sup>(62)</sup>.

In *Saskatchewan*, *Alberta* and *British Columbia* additional security to the wage earner is provided by a section requiring that contractors and sub-contractors on contracts exceeding \$500 in value shall not be entitled to demand payment unless receipted pay rolls have been posted on the works according to a specified procedure and the original complete and receipted pay rolls have been delivered to the person for whom the work of the contract is being performed. If an owner makes payment to a con-

<sup>(56)</sup> R. S. N., S., Chap. 171, Sec. 12.

tractor without demanding the delivery of the pay roll in this manner the property is still liable to a lien for any wages that may be due. Moreover, no assignment by the contractor of moneys due to him on account of his contract are valid against a mechanic's lien, but the contract price is payable in money in full and must not be dismissed by any off-set or counter claim in favour of the owner. (63).

#### Information at Disposal of Lien Holders.

In *Nova Scotia, Ontario and Manitoba*, lien holders are given the right to certain information with regard to the contracts in connection with which their claims have arisen. They may at any time demand to know the terms of the contracts in connection with which their work was performed, or materials fur-

nished, and if the owner does not within a reasonable time supply the information in question, including a statement of the amounts due and unpaid on the contract, or if he intentionally misleads the lien holder in these particulars so that loss is sustained, he is expressly held liable for the loss (64). Moreover, the court or officer having power to try an action for the recovery of a mechanic's lien, may if so requested at any time before or after the action is instituted make an order for the owner to produce his contract for the inspection of the lienholder, any costs incurred in this connection to be defrayed as the court decides (65).

#### FAIR WAGES ON PUBLIC WORKS.

A very important provision was enacted during August, by order-in-council of the Dominion government, with the object of furthering more effectively the purpose of the Fair Wages Resolution adopted by the House of Commons in March, 1900 (\*). It will be remembered that the Resolution, as passed, called for the payment of current wages to all competent workmen engaged in connection with contracts awarded by the Government of Canada, or on work aided by grant of Dominion public funds. For the enforcement of the Resolution, two officers of the Department of Labour, Canada, have been continuously employed, since 1900, in the preparation of schedules of fair wages for insertion in Government contracts, and in the investigation of cases in which, according to representations received at the Department, the terms of the schedules as prepared have been

departed from. The various schedules as inserted in the contracts have been published in the *Labour Gazette* at such time as the contracts were signed.

In connection with the carrying out of the resolution, it became apparent that additional force would be given thereto if the terms of the schedule were brought to the immediate attention of the workmen affected. This, it was thought, would be secured if the schedules prepared by the Department's officers were posted by the contractor in a conspicuous place on the works under construction. In connection also with the investigation of complaints under the resolution, experience proved that the work would be facilitated if contractors were required to keep a record of all payments made to workmen in their employ, the books or documents containing such record to be open for inspection by the Fair Wages Officers of the Department at such time as might be considered expedient by the Minister of Labour. Both of these suggestions have been embodied in the order-in-council passed during August.

The Order-in-Council is based on the

(\*) A special article dealing with the adoption of this Resolution on the motion of the Hon. Sir William Mulock, and with the appointment of the first Fair Wages Officer, was published in the *Labour Gazette* for September, 1900, (Vol. 1, No. 1), pages 15-27. See also the *Labour Gazette* for November, 1903, page 410.

following recommendations contained in the last annual report to Parliament of the Deputy Minister of Labour:—

“The fair wages officers of the department are very strongly of the opinion that the following recommendations made in previous reports of the department, if carried out, would render almost impossible any evading of the terms of their contracts by contractors who receive government contracts, and it is respectfully submitted that these recommendations are in the public interest, and would greatly further the purposes of the fair wages resolution of the House of Commons.

A clause to be inserted compelling contractors to post in a conspicuous place on the public works under construction the terms and conditions in their contracts framed for the protection of those in their employ.

A clause to be inserted obliging contractors to keep a record in books to be kept for the purpose, of payments made to workmen in their employ, such books to be open for inspection by the fair wages officers of the government at any time that it may seem expedient to any minister of the government, and in particular the Minister of Labour, to have the same inspected.”

The full text of the order-in-council is as follows:—

AT THE GOVERNMENT HOUSE AT OTTAWA.  
The 30th Day of August, 1907.

PRESENT.

HIS EXCELLENCY THE GOVERNOR GENERAL  
IN COUNCIL:

The Governor General in Council to more effectively further the purpose of the Fair Wages Resolution of the House of Commons, of Canada, of March, 1900, which reads as follows:

“That it be resolved that all Government contracts should contain such conditions as will prevent abuses, which may arise from the sub-letting of such contracts, and that every effort should be made to secure the payment of such wages as are generally accepted as current in each trade for competent workmen in the district where the work is carried out, and this House cordially concurs in such policy, and deems it the duty of the Government to take immediate steps to give effect thereto.”

It is hereby declared that the work to which the foregoing policy shall apply includes not only work undertaken by the Government itself, but also all works aided by grant of Dominion Public Funds”, is pleased to Order and it is hereby ordered that hereafter all Government contracts to which the said Resolution applies shall contain the following clauses.

1. Contractors shall post in a conspicuous place on the public works under construction, the Schedule of wages inserted in their contracts for the protection of the workmen employed.

2. Contractors shall keep a record of payments made to workmen in their employ, the books or documents containing such record shall be open for inspection by the Fair Wages Officers of the Government, at any time it may be expedient to the Minister of Labour to have the same inspected.

(Signed.) RODOLPHE BOUDREAU,  
Clerk of the Privy Council

#### UNION OF CANADIAN MUNICIPALITIES—SEVENTH ANNUAL CONVENTION.

THE seventh annual convention of the Union of Canadian Municipalities was held at Fort William and Port Arthur, Ont., August 12—16, 1907. The chair was occupied by the president Mayor Coatsworth of Toronto, Ont., and there was a large attendance of delegates. In the annual address of the president, the formation of a federal body consisting of representatives chosen by the provincial bodies as a whole for the purpose of directing legislation before the House of Commons was advocated, a similar duty with regard to the provincial legislatures to be assumed by the provincial unions. The report of the secretary treasurer showed that the union was growing in strength. A number of reports

and papers were read, among the former being reports from several of the provincial unions. In the latter a number of interesting municipal problems, especially those connected with municipal ownership, were discussed. The following were among the more important resolutions which were passed:—

The right to lay underground wires when desired is a thing that the union will seek legislation for at the next session of parliament.

Provincial regulations for the control of insurance rates will also be asked for. The following resolutions arising out of an address on public ownership by Controller Ward of Toronto, were all carried:

“That in the opinion of this convention, as public utilities are now so constituted that it is impossible for them to be operated by convention, they should be controlled and regulated by the government; they should be operated by the public and should not in any event be left to go as they pleased.”

Further resolved:—

"That the municipal ownership should not be extended to revenue producing industries which do not involve public health, public safety, public transportation or permanent occupation of public streets, and grounds, and that municipal ownership should not be taken solely for profit"

It was resolved:—

"That in the opinion of the convention all further grants to private companies for construction and operation of public utilities should be determinable at fixed periods and that meanwhile at certain stated times during such periods cities should have the right to purchase the property for operation, lease or sale paying its fair value."

"That in future provision be made for a competent public authority with power to require from all public utilities a uniform system of records and accounts giving all financial details and all information concerning the quality of service and cost thereof, such details to be published and distributed as official reports."

"Resolved, that in the opinion of the convention no stocks or bonds of public utilities should be issued without the approval of some competent authority thus setting the capitalization by municipal investigation."

Resolved:—

"That a standard rate of dividend should be fixed which may be increased only upon the price of the commodity sold or the rate of transportation is reduced and that where the management of public utilities is left with private companies they should retain in all cases an interest in the growth and progress either by securing a share of the profits or a reduction of the charges the latter being preferable as it inures to the benefit of those who use the utilities."

"That in the opinion of this convention, where the operation of public utilities is by the municipality there should be a complete separation of the finances of the undertaking from those of the rest of the city and bonds issued for such utilities should be the first charge upon the property and revenues of such undertaking."

R. T. MacIlreith, Esq., mayor of Halifax, N.S., was elected president for the ensuing year. The next meeting will be held at Medicine Hat, Alta.

### THE QUEBEC BRIDGE DISASTER.

ON the evening of August 29, an appalling disaster occurred at the steel cantilever bridge in course of erection across the St. Lawrence river, about eight miles above the city of Quebec. The disaster was caused by the collapse of the steel superstructure of the southern cantilever and anchor arms of the bridge, and involved the loss of over sixty lives and the serious injury of eleven other persons, nearly all being workmen employed on the bridge. The property loss was at first estimated to be in the neighbourhood of \$1,500,000, but later calculations would indicate a reduction in this amount. The magnitude of the loss, both in human lives and property, as well as the importance of the undertaking to the industrial development of the country, have given to the disaster the aspect of a national calamity.

Few details of an authoritative character concerning the accident were obtainable up to the close of the month. Over eighty men were at work on the bridge when the collapse took place, and as the accident occurred without warning, the majority of those were either crushed by the falling material or drowned in the waters over 150 feet below. Some forty of the employees were Indians from Caughnawaga, Que., while several of the killed were from Phoenixville, Pa., the

headquarters of the company having the contract for the superstructure of the bridge. The resident engineer and foreman of the company were among those killed. The delay which will occur in the completion of the bridge will be severely felt by the transportation interests of the country, it having been expected that the bridge would be open for traffic in about two years' time. It is now estimated that four years will be required to complete the bridge. No interruption to navigation was caused by the accident. It was announced by the Rt. Hon. the Prime Minister that the bridge would be rebuilt.

#### The Quebec Bridge Company.

The bridge has been in process of construction since 1900, in October of which year the corner stone of the masonry substructure was laid. The need of a bridge to cross the St. Lawrence in the vicinity of Quebec has been felt for many years past, and in 1897 a company was re-organized under the name of "The Quebec Bridge Company," to undertake the work, substantial aid to the enterprise being granted by the Dominion and provincial governments. The masonry having been completed at a cost of about \$1,400,000, work on the steel superstructure was begun in 1904, the con-

tract having been awarded to the Phoenix Bridge Company of Phoenixville, Pa. The total cost of the bridge when complete has been estimated to be between \$7,500,000 and \$8,000,000. Up to March 31, 1907, the total expenditures amounted to \$4,415,598.

When completed, the bridge will be in many respects the most remarkable structure of its kind ever erected. The cantilever span will be the longest in the world, namely, 1,800 feet, while the total length of the bridge will be 3,300 feet. The main span will be at a height of 150 feet above the water, while the tops of the cantilevers will be over 400 feet high. The bridge is designed to carry two lines of railway, two trolley lines, two highways and two sidewalks for foot passengers.

### Commission of Inquiry Appointed.

On August 31, a special commission was appointed by the Dominion government to make full investigation into the cause of the accident, and to report thereon to the government. The commission consisted of the following gentlemen: Henry Holgate, Esq., C. E., Montreal; Professor G. J. Kerry, of McGill University, and Principal Galbraith, of the School of Practical Science, Toronto.

A coroner's inquest was begun on August 30, on the bodies which had been recovered from the wreck. The majority of the bodies were still missing on August 31.

A fund was opened by the mayor of Quebec for the relief of the families of the victims of the accident. The sum of \$2,000 was voted for this fund by the city council of Quebec.

## IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of home-stead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

### Recent Immigration Returns.

IMMIGRATION through ocean ports during June, 1907, declared for Canada, was as follows:—

#### IMMIGRATION THROUGH OCEAN PORTS DURING JUNE, 1907.

	Male.	Female.	Children under 12.	Total.
Immigrants . . .	18,106	7,177	7,036	32,319
Returned Canadians . . . . .	1,045	221	103	1,369
Tourists . . . . .	535	211	33	777
Totals . . . . .	19,684	7,609	7,172	34,465

A summary of immigration proper through ocean ports, declared for Canada during April, May and June, 1906-07, is as follows:—

#### IMMIGRATION BY OCEAN PORTS APRIL-JUNE, 1906-07.

	Male.	Female.	Children under 12.	Total.
April . . . . .	24,972	5,052	4,414	34,438
May . . . . .	24,744	7,153	6,858	38,755
June . . . . .	18,106	7,177	7,036	32,319
Totals . . . . .	67,822	19,382	18,308	105,512
Corresponding mos. of 1906				73,431
Increase, 1907				32,081
Percentage of increase . . . . .				44%

The following is a statement of immigration from the United States during April, May and June, 1907, compared with the corresponding period of 1906:—

#### IMMIGRATION FROM THE UNITED STATES, APRIL-JUNE, 1906, 1907.

Through Montreal . . . . . April	140			
May	70

Total.....	3,690

Representing 9,514 souls.

Of a total of 1,090 entries made in July, by persons coming from the United States, there were 515 from North Dakota, 195 from Minnesota, 55 from South Dakota, 47 from Wyoming, 31 from Washington, 34 each from Iowa and Michigan, 28 from Illinois and 26 from Montana.

**Lands Patented During July, 1907.**

An abstract of letters patent covering Dominion lands situated in Manitoba,

Saskatchewan, Alberta, British Columbia and the Yukon Territories, issued from the Department of the Interior during the month of July, 1907, is as follows:—

LANDS PATENTED DURING JULY, 1907.

Nature of Grant.	July, 1907.	
	No. of Patents	No. of Acres.
Alberta Ry. and Irrigation Co.'s sales.....	11	11,052.02
British Columbia Homesteads.....	8	1,110.34
British Columbia sales.....	1	213.50
Coal Lands sales.....	.....	.....
Commutation grants.....	2	101.08
Homesteads.....	665	105,404.06
Hudson's Bay Co.....	1	160.00
Leases.....	1	.....
License of Occupation.....	1	.....
Military Homesteads.....	1	320.00
Mining Lands sales.....	1	5.34
Mineral rights (299.63 acres) ..	1	.....
North-west half-breed grants .....	16	2,262.75
<i>Railways:</i>		
Calgary and Edmonton Ry....	3	795.20
Calgary and Edmonton Ry. (Under rights, 2,001.32 acres) ..	9	.....
Canadian Northern Ry.....	30	10,901.10
Can. Pac. Ry. grants.....	10	1,709.89
Can. Pac. Ry. grants, Souris Branch.....	13	25,320.30
Can. Pac. Ry. roadbed and station grounds.....	1	.68
Manitoba & North-western Ry .....	.....	.....
Manitoba South western Col.Ry	31	6,967.44
Qu'Appelle Long Lake and Sask Railroad and Steamboat Co.	8	5,287.85
Sales.....	56	4,918.94
School Lands sales.....	15	1,458.46
Special grants.....	24	592.29
Yukon Territory sales.....	1	36.44
Totals.....	910	178,617.68

In July, 1906, the number of patents issued was 803, covering an area of 280,730.69 acres, showing an increase during the month of July, 1907, of 107 in the number of patents issued, but a decrease of 102,123.01 acres in the area patented.

Land Sales.

The following is a statement of the farm land sales made by the Canada North-West Land Company, Limited, during the month of July, 1907, compared with the sales in the corresponding month of 1906:—

LAND SALES OF CANADA NORTH-WEST LAND COMPANY.

	Acres.	Price obtained.
July, 1907.....	2,077.28	\$24,137.80
July, 1906.....	7,372.66	79,516.00
Decrease, 1907.....	5,295.38	55,378.20
From Jan. 1 to July 31, 1907..	13,554.72	152,600.28
From Jan. 1 to July 31, 1906..	46,864.44	438,842.09
Decrease, 1907.....	33,309.72	\$286,241.81

Notes.

The *health* of immigrants coming to Canada during the present season has been exceptionally good, owing to the strict enforcement of the regulations of the Immigration Department.

An influx of *Japanese* into British Columbia, by way of Honolulu, took place during the past month. An investigation into conditions in this respect and in connection with the disposal of lands in the railway belt of British Columbia, was conducted by the Hon. the Minister of the Interior.

The special sailings of vessels chartered by the *Salvation Army* for the conveyance of immigrants to Canada during 1907, were concluded during August. Weekly conducted parties, however, will be continued until October. In the neighbourhood of 13,000 immigrants had been brought out in this way up to the middle of August.

**FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING  
AUGUST, 1907.**

The following is a list of contracts awarded by the Department of Railways and Canals, the Department of Public Works and the Department of Marine and Fisheries, Canada, which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the work. A statement of orders for supplies given by the Post Office Department is added.

**Department of Public Works.**

**A**DDITIONAL front of crib work to high level wharf at Sorel, Que., date of contract, August 7, 1907, name of contractor, J. E. Beauchemin, Sorel, Que., amount of contract, \$125,000

## Post Office Department.

The following orders for supplies were given subject to the regulations for the suppression of the sweating system, the securing payment of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of Order.
Making metal dating stamps and type, and making other hand stamps and brass crown seals.....	\$ 435.35
Making and repairing rubber dating stamps and type; also other stamps.....	47.45
Supplying stamping material and wooden boxes, and repairing stamping pads:.....	836.70
Making and repairing Post Office scales.....	234.00
Supplying mail bags.....	367.60
Repairing mail bags.....	1,297.82
Making and repairing mail locks, and supplying mail bag fittings.....	431.35
Supplying portable steel letter boxes, street letter boxes and parcel receptacles, and repairing portable letter boxes, Railway Mail Clerks' tin travelling boxes and parcel receptacles.....	5,164.00
Making and repairing miscellaneous articles of Postal Stores.....	29.40
Making up and supplying articles of official uniform.....	6,845.50

INDUSTRIAL ACCIDENTS DURING THE MONTH OF AUGUST, 1907.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories' inspectors of the province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 436 individual workpeople in Canada during the month of August, 1907, were reported to the Department of Labour. Of these, 166 were fatal and 270 resulted in serious injuries. In addition, six fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before August, 1907. The number of fatal accidents reported in August, 1907, was 41 more than in the previous month and 41 more than in August, 1906.

Of 316 returns received during the month giving the ages of the victims of industrial accidents, 45 referred to persons under twenty-one years of age, 45 to persons between twenty-one and forty-five, 8 to persons over forty-five; 218 persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING AUGUST, 1907, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed	Injured	Total
Agriculture.....	19	27	46
Lumbering.....	5	8	13

Miscellaneous.....	6	21	27
Unskilled labour.....	2	18	20
<b>Total.....</b>	<b>166</b>	<b>270</b>	<b>436</b>

Nature of Fatalities and Accidents.

The chief and most appalling disaster of the month was caused by the collapse, on August 29, 1907, of a portion of the superstructure of the bridge being built across the St. Lawrence river at Cap Rouge, Que., in which over seventy workmen were killed or seriously injured. A special article on this calamity will be found elsewhere in the present issue. Among other disasters of the month were the killing of four men in a dynamite explosion at Canyon Lake, Ont.; the death of three railway men in a wreck near Fort Macleod, Alta.; the killing of three men by the falling of a derrick at Indian-town, N. B.; the asphyxiation of two homesteaders while digging a well at Buffalo Lake, Sask.; the killing of two members of a train crew and the injuring of others by the explosion of a carload of dynamite at Essex, Ont.

Explosion of Dynamite at Canyon Lake Ont.

On August 27, at the Grand Trunk Pacific construction encampment at Canyon Lake, Ont., a foreman and three quarrymen, while drilling rock for tracking, were blown to pieces, doubtless through a charge being exploded by injudicious handling.

Train Wreck at Macleod., Alta.

On the morning of August 13, the engine of the Soo-Spokane express train jumped the track one mile west of Macleod, Alta., killing the engineer, the fireman and the coal passer. The accident, it is supposed, was caused by a spreading rail.

Derrick Accident at Indiantown, N. B.

On August 16, while lifting stone, the boom of a steam derrick at Indiantown, N.B., fell, killing three workmen and injuring two others. A jury found that the cause of the accident was that the anchorage was not sufficient to hold the strain upon the derrick.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE SERIES F., No. 46.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF AUGUST, 1907.

Trade or Industry.	Locality.	Date.	No. killed.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer .....	Mount Denis, Ont.....	Aug. 2	1	Fell from load of lumber and was run over.
" .....	Woodstock, Ont.....	" 5	1	Bee-sting caused blood poisoning.
" .....	Ross, Ont.....	" 2	1	Struck by whiffle-tree.
" .....	Sunbury, Ont.....	" 6	1	Gored by bull.
" .....	Laprairie, Que.....	" 9	1	Struck by lightning.
" .....	Rouge River, Ont.....	" 9	1	Kicked by horse.
" .....	Hanley, Sask.....	" 18	2	Asphyxiated by gas in well.
" .....	Grahamston, Alta.....	" 19	1	Gored by bull.
" .....	Riverside, N. B.....	" 19	1	Thrown from vehicle.
" .....	Chatham, Ont.....	" 29	1	Kicked by horse.
" .....	Brampton, Ont.....	" 29	1	Struck by train at crossing.
" .....	Cornwall, Ont.....	" 31	1	Struck by train at crossing.
" .....	Harbor Beach, Ont.....	" 29	1	Scaffold fell at a barn raising.
" .....	Bresayler, Sask.....	" 28	1	In a runaway.
" .....	Hill End, Alta.....	" 16	1	Struck by section of bursting circular saw.
Farm hand .....	Milestone, Sask.....	" 5	1	Fell from a horse.
" .....	Mitchell, Ont.....	" 1	1	Fell 32 feet from cement sils.
Farmer's son.....	Near Saskatoon, Sask.....	" 8	1	Struck by lightning.
<i>Lumbering—</i>				
Saw mill hand.....	Tracadie, N. B.....	" 2	1	Caught in shafting.
Logger .....	Meskinac, Que.....	" 1	1	Drowned.
" .....	Saskatchewan River, Sask.....	" 16	1	Drowned.
" .....	Deep Cove, B. C.....	" 16	1	Drowned.
Millwright.....	Barachois, Que.....	" 12	1	Caught in belt.
<i>Mining—</i>				
Miner .....	Fernie, B. C.....	" 2	1	Asphyxiated by gas in mine.
" .....	Cobalt, Ont.....	" 3	1	Fell 70 feet in shaft.
" .....	Sydney Mines, N. S.....	" 8	1	By fall of stone.
" .....	Rossland, B. C.....	" 13	1	Fell 700 feet in shaft.
" .....	Rossland, B. C.....	" 17	1	Explosion of dynamite.
" .....	Cobalt, Ont.....	" 28	1	By falling rock.
" .....	Fernie, B. C.....	" 30	1	By fall of stone.
" .....	Fernie, B. C.....	" 30	1	Explosion of dynamite.
Plaster mill worker.....	Hillsboro, N. B.....	" 31	1	Caught in machinery.
Quarryman .....	Indiantown, N. B.....	" 16	3	Derrick fell on them.
" .....	Hillsboro, N. B.....	" 31	1	Run over by plaster car.
<i>Metal, engineering and Shipbuilding Trades—</i>				
Iron worker.....	London, Ont.....	" 7	1	Iron core weighing 1,200 lbs. fell on him.
Structural iron worker.....	Cap Rouge, Que.....	" 20	1	Fell 200 feet from bridge.
" .....	Cap Rouge, Que.....	" 29	65	Collapse of superstructure of bridge.*
Electrical worker .....	Beamsville, Ont.....	" 25	1	Run over by train.
" .....	Brantford, Ont.....	" 26	1	Electrocuted.
<i>Woodworking and Furnishing Trades—</i>				
Wood worker.....	Callander, Ont.....	" 7	1	Caught in shafting.
<i>Printing and Allied Trades—</i>				
Printer.....	Toronto, Ont.....	" 13	1	Crushed to death in elevator.
<i>Food and Tobacco Preparation—</i>				
Butcher boy.....	Port Hope, Ont.....	" 4	1	In a runaway.
<i>Railway Employees—</i>				
Conductor .....	Cobourg, Ont.....	" 8	1	Run over by a caboose.
" .....	Manvers, Ont.....	" 28	1	In rear end collision.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF AUGUST, 1907.

Trade or Industry.	Locality.	Date.	No. killed.	Cause of Fatality.
Engineer	Fort William, Ont.	" 19	1	Derailment of engine.
"	Macleod, Alta.	" 12	1	Derailment of train.
"	Kama, Ont.	" 14	1	Derailment of train, died Aug. 27.
"	Laurentide, Que.	" 30	1	Derailment of train, died Aug. 27.
Fireman	Westchester, N. S.	" 2	1	Run over by train.
"	Macleod, Alta.	" 12	1	Derailment of train.
"	Otter Lake, Ont.	" 27	1	Caught between cars.
Brakeman	Morien Jct., N. S.	" 6	1	Run over by train.
"	Niagara Falls, Ont.	" 16	1	Caught between cars.
"	Essex, Ont.	" 10	2	Explosion of dynamite.
"	Toronto, Ont.	" 13	1	Caught between train and platform.
"	Strathroy, Ont.	" 26	1	Caught between cars.
"	Levis, Que.	" 27	1	Caught between cars.
Yardman (switchman)	London, Ont.	" 3	1	Run over by engine.
"	Montreal, Que.	" 9	1	Run over by engine.
"	Winnipeg, Man.	" 13	1	Caught between cars.
"	Fort William, Ont.	" 17	1	Run over by cars.
"	Lethbridge, Alta.	" 20	1	Run over by cars.
"	London, Ont.	" 26	1	Run over by cars.
Building foreman	London, Ont.	" 22	1	Struck by train.
Car shop hand	Winnipeg, Man.	" 29	1	Run over by car in shop.
Coal passer	Macleod, Alta.	" 12	1	Derailment of train.
Construction hand	La Toque, Que.	" 22	1	Explosion of dynamite.
"	Merrickville, Ont.	" 20	2	Explosion of dynamite.
"	Parry Sound, Ont.	" 27	1	Fell off train.
"	Canyon Lake, Ont.	" 26	1	Explosion of dynamite.
<i>Navigation—</i>				
Longshoreman	Port Arthur, Ont.	" 1	1	Caught in rope of hoisting driver.
Engineer on tug	Port Arthur, Ont.	" 27	1	Drowned, fell overboard.
"	Georgian Bay, Ont.	" 27	1	Drowned, tug swamped.
Captain	Georgian Bay, Ont.	" 27	1	Drowned, tug swamped.
Diver	Windsor, Ont.	" 2	1	Suffocated, air hose parted.
Sailor	Toronto, Ont.	" 3	1	Drowned, fell overboard.
"	Georgian Bay, Ont.	" 27	1	Drowned, tug swamped.
"	Kingston, Ont.	" 29	1	Drowned, fell overboard.
Steward on S. S.	Quebec, Que.	" 11	1	Drowned.
<i>General Transport—</i>				
Teamster	Toronto Jct., Ont.	" 2	1	Run over by loaded wagon.
"	Quebec, Que.	" 8	1	Run over by coal cart.
"	Toronto, Ont.	" 8	1	Fell head first from load.
Street car conductor	Hamilton, Ont.	" 3	1	Struck by a street car on head.
Elevator boy	Toronto, Ont.	" 14	1	Caught between landing and elevator.
Hack driver	Toronto, Ont.	" 23	1	Run over by street car in a collision.
<i>Civic Employees—</i>				
Fireman	Woodstock, N. B.	" 1	1	Electrocuted at a fire.
<i>Miscellaneous—</i>				
Merchant	Granby, Que.	" 21	1	In a runaway.

**Death of Two Homesteaders near  
Buffalo Lake, Sask.**

On August 14, two homesteaders met death near Buffalo Lake, Sask., by asphyxiation while digging a well. They had bored down some fifty feet when the auger struck a large rock which necessitated blasting. The blasting was done, and one of the workers was lowered. Seeing that he did not return, his companion went to his assistance. Both were dead from asphyxiation when extricated by neighbours.

**Explosion of Carload of Dynamite  
Essex, Ont.**

On August 10, a Michigan Central railway freight car, containing 100 boxes of nitro-glycerine, standing at the railway depot at Essex, Ont., exploded, killing two brakemen and seriously injuring seven other workpeople.

**Record by Trades and Industries.**

*Agriculture.*—There were 19 fatal and 27 non-fatal accidents reported in August 1907, compared with 18 killed and 26 during July, and 23 and 34 injured in August, 1906. Five farmers

were killed by live stock, 4 by falls, 2 by being struck by lightning, 2 by being asphyxiated while digging a well, 2 by being struck by trains, 1 by blood poisoning due to a sting of a bee, 1 by machinery and 1 by a runaway. Of the injuries, 11 were caused by falls, 5 by live stock, 4 by machinery, 2 by runaways, 1 by a collision with a street car, 1 by sunstroke, 1 by falling material, 1 by an explosion and 1 by being caught between a loaded lorry and a wall.

*Lumbering.*—Five workmen were killed during August and 8 were injured. In the previous month there were 12 killed and 12 injured, and in August, 1906, 4 killed and 10 injured. Three of the deaths were due to drowning and 2 to the victims being caught in machinery. The 8 minor accidents were all due to machinery.

*Mining.*—Death by accident occurred to 13 workers in this group and injuries to 18 others in August last, compared with 14 killed and 19 injured in the preceding month, and 10 killed and 15 injured in August of last year. Six of the fatalities were caused by falling material, 2 by falls, 2 by explosions, 1 by asphyxiation, 1 by machinery and 1 by being run over by a coal car. Ten

of the injuries were caused by falling material, 5 by being struck or crushed by cars, 2 by machinery and 1 by an explosion.

*Building trades.*—There were no fatalities among these workers in August, but 12 were injured. In July the record was 2 killed and 31 injured, and in August, 1906, 7 killed and 37 injured. Eight of the injuries were due to falls, 2 being struck by a derrick, 1 to a glancing axe and 1 to machinery.

*Metal, engineering and shipbuilding.*—During August there were 69 metal workers killed and 64 injured, compared with 8 killed and 53 injured in the preceding month, and 7 killed and 44 injured in August, 1906. Sixty-three workers were killed by the collapse of a portion of the bridge at Cap Rouge, Que., as specially mentioned elsewhere in the present issue. One worker was killed by a fall, 1 by falling material, 1 by being run over by a train and 1 by electrocution. Of the injuries, 26 were caused by machinery, 21 by falls, 10 by falling material, 4 by molten metal, 2 by explosions and 1 by live stock.

*Woodworking.*—A woodworker at Calander, Ont., was killed by being caught in shafting, and 13 other workers were injured. In July, 1 worker was killed and 12 injured, and in August of last year 11 were injured. Ten of the injuries were caused by machinery, 2 to flying objects projected from saws, and 1 by a fall in an elevator shaft.

*Printing.*—In August, a printer at Toronto, Ont., was crushed to death in an elevator, and another printer had his hand mangled in a press. There were two workmen injured in July and 3 injured in August, 1906.

*Clothing.*—Four workmen were injured in this group, all through contact with machinery. There were 2 workmen injured in the preceding month, and none in August of last year.

*Textile.*—Three of these workers were injured by machinery in August, compared with 2 killed and 4 injured in July, and 2 injured in August, 1906.

*Food and tobacco preparation.*—A butcher boy was killed in a runaway at Port Hope, Ont., and 8 workmen were

injured. In July there were 4 killed and 9 injured, and in August, 1906, 2 killed and 9 injured. Three of the 8 minor accidents were due to machinery, 2 to falling material, 2 to explosions and 1 to being caught in an elevator.

*Railway service.*—In this group death by accident occurred to 33 workers and 42 others were seriously injured, compared with 26 killed and 25 injured in July, and 27 killed and 46 injured in August, 1906. Of the fatalities, 9 each were caused by explosions and by being run over by trains, 6 each by derailments and by being crushed between cars, and 1 each by a collision, by being struck by an engine and by falling from a tender. Ten of the non-fatal accidents were caused by falls from trains, 7 by being caught between cars, 6 each by explosions, by being run over by trains, and by falling material, 4 by derailments, 2 by collisions and 1 by being struck by a passing object.

*Navigation.*—Among these workers there were 9 fatal and 3 non-fatal accidents in August, 1907, as against 12 killed and 10 injured in the previous month, and 19 killed and 7 injured in August, 1906. Seven of the fatalities were due to drowning, 1 to being caught in rope of a hoisting engine, and 1 to being suffocated by air hose of diving suit becoming parted. The three non-fatal injuries were due to machinery.

*General transport.*—The record for the month was 6 killed and 20 injured, compared with 8 killed and 21 injured in July, and 5 killed and 23 injured in August of last year. Three deaths were caused by the victims being run over, 1 by falling, 1 by being struck by a street car and 1 by being caught between a landing and an elevator. Seven of the accidents were caused by falls, 4 by being run over, 4 by live stock, 3 by collisions, 1 by falling material and 1 by machinery.

*Civic employees.*—During August, a Woodstock, N. B., fireman, while at a fire, came into contact with a live wire and was killed. Eight civic employees were injured. In the preceding month the record was 2 killed and 7 injured, and in August, 1906, 1 killed and 6 injured. Six of the accidents were due to ex-

plosions, 1 to a fall and 1 to falling material.

*Miscellaneous.*—There were 6 killed and 21 injured in this group, as against 14 killed and 19 injured in July, and 1 killed and 19 injured in August, 1906. Three of the fatalities were caused by falls, 1 by a runaway, 1 by being caught in an elevator, and 1 by falling material. Nine of the accidents were caused by

explosions, 6 by machinery, 4 by falls, 1 by a runaway and 1 by falling material.

*Unskilled labour.*—Two labourers were killed and 18 injured during August, compared with 1 killed and 15 injured in the previous month, and 4 killed and 12 injured in August, 1906. One of the fatalities was due to a cave-in and the other to a fall. Thirteen of the accidents were due to falling material, 3 to falls, 1 to an explosion and 1 to machinery.

#### TRADE DISPUTES DURING THE MONTH OF AUGUST.

**W**HILE the number of trade disputes in Canada was less during August than during the previous month, the industrial conditions of the country were more seriously affected by them, when judged by the number of workpeople involved, and the loss of time in working days. The chief point of disturbance was at Springhill, Nova Scotia, where the mines of the Cumberland Coal and Railway Company were closed throughout the month. The building trades at Toronto continued to be affected by a strike of plumbers, which had been in existence since May. Outside of the strike of miners at Springhill, N.S., the only new dispute of the month involving large numbers of people was a strike of cotton mill hands at Valleyfield, Que. This was terminated a few days after its commencement by reference to a Board under the Industrial Disputes Investigation Act, 1907, and serious results arising from it were consequently averted.

#### Analysis of Trade Disputes during the Month.

*Number and magnitude.*—The total number of trade disputes reported to have been in existence in Canada during August was 26, a decrease of 6 compared with the previous month, but an increase of 1 compared with August, 1906. About 200 establishments and 6,144 employees were affected by these disputes, 14 firms and about 4,291 workpeople being involved in the disputes which began in August.

*Loss of time in working days.*—The loss of time through trade disputes during August was approximately 99,860 working days, compared with 81,100 in July and 52,625 in August, 1906.

*Trades affected by new disputes.*—The following table shows the trades affected by new disputes during the month, and the number of workpeople affected in each group of trades.

Trades.	No. of Disputes.	No. of Workers.
Mining.....	2	1,350
Building trades.....	3	38
Metal trades.....	1	130
Woodworking trades.....	1	9
Textile trades.....	1	2,200
Clothing trades.....	3	489
Miscellaneous trades.....	1	65
Total.....	14	4,281

*Localities affected by new disputes.*—The new disputes of the month occurred in the following provinces of Canada:—

Province.	No. of Disputes.
Nova Scotia.....	1
Quebec.....	4
Ontario.....	4
Manitoba.....	1
Alberta.....	1
Quebec, Ontario and Manitoba.....	1
Total.....	12

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages.....	2
For shorter hours (dispute over meaning of an agreement).....	1
For change in method of payment, shorter hours and other changes....	1
Against employment of non-unionists..	2
Against employment of persons other than non-unionists.....	1
Against discharge of an employee and for higher wages.....	1
Against conditions of employment, misrepresentations alleged.....	1
Alleged abolition of Union shop.....	1
Sympathetic.....	1
Unclassified.....	1
<b>Total.....</b>	<b>12</b>

*Methods of settlement.*—Out of the 26 trades disputes in existence during the month, settlements were reached in 7 cases, leaving 19 still unsettled at the close of the month. One dispute was settled by reference to a Conciliation Board under the Industrial Disputes Investigation Act, 1907, one by reference to arbitrators, in accordance with the terms of an Agreement, and one by negotiations between the parties concerned. In the remaining four disputes that were terminated, work was resumed by the strikers without any negotiations.

*Results of disputes.*—Of the 7 disputes that were terminated, the employers were successful in 3, a compromise was effected in 1, in another the occasion of the dispute was removed, and in 2 the results were indeterminate the matters in dispute being left to arbitration and conciliation boards.

**Disputes which Commenced Prior to the Beginning of the Month,**

The trade disputes in existence during August, which commenced in previous months, comprised strikes of plumbers, marble workers, stone cutters, machinists and electrical workers at Toronto, miners at Cobalt, Ont., pulp and paper makers at Sturgeon Falls, Ont.,

barbers at London, Ont., structural iron workers and cigarmakers at Montreal, Que., harness and collar makers at Peterborough, Ont., and carpenters, plumbers and labourers at Galt, Ont., A brief account of these disputes is given below.

**Strike of Plumbers and Electrical Workers at Toronto, Ont.**

The two strikes of plumbers at Toronto, one of which began on April 13 on account of the employment of non-unionists, and the other on May 17, on account of the refusal of the employers to grant a demand for an increase in wages and union shops, continued throughout the month.

A strike of about 25 electrical workers employed by 5 firms, who went out on July 20, in sympathy with the plumbers, also continued throughout August. It was claimed by Messrs Keith & Fitzsimons, one of the firms affected that the electrical workers by stopping work had violated an agreement existing between them and the Electrical Workers' Union, which provided that in the case of differences arising they should be referred to a committee of six, three members to be chosen by each of the parties. On the other hand it was claimed by the Union that the agreement had not been violated as they had never forfeited their right to declare a sympathetic strike, and further that the men had voluntarily quit work, rather than work in a shop with non-union plumbers, without receiving any orders from the Union.

**Strike of Pulp and Paper Makers at Sturgeon Falls, Ont.**

No settlement was reported in a strike of 216 pulp and paper makers of the Imperial Paper Mills at Sturgeon Falls, Ont., which began on June 10, but the Company reported that on July 29, their sulphite plant was reopened, and was kept running continuously from date, although not to its full capacity, and on August 2, the finishing room was reopened and was running partially. According to the strikers the primary cause of the dispute was their refusal to work on Sundays.

TABLE OF TRADE DISPUTES DURING THE MONTH OF AUGUST.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms -or Estab- lishments affected.		Approximate No. of Employees affected.				Date of termi- nation	Result.
			Di- rectly	Indi- rectly	Directly.		Indirectly.			
					Males	Fe- males	Males	Fe- males		
<i>Mining</i> Silver miners	Cobalt, Ont.	For higher wages and better conditions of employment	30*		300				July 8	No settlement reported at end of month, but normal conditions were restored in many mines.
<i>Building Trades</i> Marble workers	Toronto, Ont.	Against employment of non-unionists	1		20				May 29	No settlement reported at end of month.
Plumbers	Toronto, Ont.	Against employment of non-unionists	1		50		8		April 13	No settlement reported at end of month.
	Toronto, Ont.	Demand for increase in wages from 37½ to 45 cents per hour, apprentices from \$6.50 to \$8.50 per week, and closed shops	106		250				May 17	No settlement reported at end of month.
Stone cutters	Toronto, Ont.	For an increase in wages from 40 to 50 cents an hour	1		40				July 3	No settlement reported at end of month.
Carpenters, plumbers, labourers	Galt, Ont.	Against employment of non-unionists	1		7				" 29	No settlement reported at end of month.

DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.

\* This represents the number of mines reported to have been originally affected by the dispute. Normal conditions were reported to have been subsequently restored in many of them, but no definite particulars were received.

<i>Metal Trades—</i> Machinists.....	Toronto, Ont.....	Demand for reduction in working hours from 10 to 9, with no change in wages.	25	400	June 8	No settlement reported with 16 firms, others conceded demand.
Structural iron workers.....	Montreal, Que.....	Demand for higher wages, shorter hours and other changes.....	5	315	July 8	Aug. 10 One firm reported that nearly all strikers returned to work, no change in wages, hours or conditions.
Iron moulders .....	Vancouver, B. C.....	Demand for increase in wages from \$3.75 to \$4 per day, and reduction in working hours from 9 to 8.....	75	25	June 24	No settlement reported at end of month.
Electrical workers	Toronto, Ont.....	In sympathy with striking plumbers.....	5	25	July 20	No settlement reported at end of month.
<i>Food and tobacco preparation—</i> Cigarmakers.....	Montreal, Que.....	Employer alleged that strikers objected to use of Canadian tobacco.....	1	31	" 31	No settlement reported at end of month.
<i>Leather Trades—</i> Harness and collar makers.....	Peterborough, Ont.....	Demand for increase in wages and recognition of union.....	1	27	Apr. 22	No settlement reported at end of month.
<i>Miscellaneous Trades—</i> Pulp and paper makers.....	Sturgeon Falls, Ont.....	Against Sunday labour, and for recognition of union.....	1	214	June 10	No settlement reported, but places of some strikers were filled.
Barbers.....	London, Ont.....	For increase in wages from \$10 to \$12 per week, and 50 per cent. of all over \$18 taken at chair instead of 50 per cent. of all over \$16.....	10	20	July 29	Aug. 17 Wages increased to \$11 per week, and 50 per cent. of receipts over \$17.

DISPUTES WHICH BEGAN DURING THE MONTH.

<i>Mining—</i> Coal miners.....	Springhill, N. S.....	Demand for payment of 4 cents per inch per lineal yard for stone in pillar work, claim disallowed by Conciliation Board.....	1	500	750	Aug. 1	No settlement reported at end of month, but many strikers sought work elsewhere.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE, SERIES C, No. 80.

TABLE OF TRADE DISPUTES DURING THE MONTH OF AUGUST

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.				Date of commencement	Date of termination	Result.
			Directly.	Indirectly.	Directly.		Indirectly.				
					Males	Females	Males	Females			
Coal miners.....	Lethbridge, Alta...	Misunderstanding as to meaning of a clause in an agreement...	1		100				Aug. 12	Aug. 14	Work resumed pending investigation into the interpretation of the clause
<i>Building Trades—</i> Stonemasons.....	Galt, Ont.....	Against employment of non-union labourers.....	1		12				"	23	No settlement reported at end of month.
Bricklayers and labourers.....	Galt, Ont.....	Against employment of non-union carpenters.....	1		12				"	26	No settlement reported at end of month.
Granite cutters ...	Toronto, Ont.....	Men alleged they had been brought in to work under misrepresentations.....	1		14				"	22	No settlement reported at end of month.
<i>Metal Trades—</i> Structural iron workers.....	Cap Rouge, Que ...	Refusal of Co. to pay men return fares, when leaving on account of dissatisfaction with time lost on account of rain.	1		130				"	9	Aug. 12 Work resumed, conditions improved by weather becoming fine.
<i>Foodworking Trades—</i> Candy makers.....	Peterborough, Ont..	Co. allege men objected to appointment of a foreman without their being consulted....	1		9				"	13	Some strikers resumed work in 2 or 3 days, the others returned in the course of the month.

<i>Textile Trades—</i> Cotton mill hands..	Valleyfield, Que . . . . .	Refusal of spinners to accept a written agreement, other employees went out in sympathy. Strikers demanded advance of 10 per cent. in wages. . . . .	1	950	1250	Aug. . . . .	Aug. 24	Dispute referred to a Conciliation Board under Industrial Disputes' Investigation Act, 1907, work resumed August 26.
<i>Clothing Trades—</i> Garment workers..	Montreal, Que. . . . .	For re-instatement of a discharged foreman, and for recognition of union. . . . .	1	27	25	" . . . . .	9	15 Work resumed, factory conducted as an open shop, employees given choice of piecework or week work.
Garment workers..	Montreal, Que. . . . .	Demand for abolition of piece-work system, wages to be paid on a sliding scale basis, and to be made up by competent foremen. Hours of labour to be 55 per week for men and 50 for women. All work to be taken out of the hands of contractors. . . . .	3	1	276	10 Aug.	20	Settlement reached with one firm, employing 110 persons, on Aug. 24. No settlement in other shops at end of month.
Tailors . . . . .	Winnipeg, Man. . . . .	Employees paid off on account of stocktaking and dullness of trade, later refused to return unless all were taken back; reason for this discharge being misunderstood. . . . .	1	37	37	" . . . . .	17	No settlement reported, firm was advertising for new hands.
<i>Miscellaneous Trades</i> Telegraphers . . . . .	Quebec & Montreal, Que., Toronto, Ont. and Winnipeg, Man . . . . .	Refusal to receive messages from United States pending strike of telegraphers there. . . . .	1	38	37	" . . . . .	13	No settlement reported at end of month.

\*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned; mention, moreover, is not made of disputes involving less than six employees, or less duration than 24 hours.

**Strike of Miners at Cobalt, Ont.**

No settlement was reached with regard to the strike of miners at Cobalt, Ont., which began on July 8, on account of a difference as to wages and conditions of employment. In the course of the month, however, work was resumed in a number of the mines. In some cases, the demands of the strikers were conceded and in others new men were procured to take their places. It was reported that work was resumed in three mines, under a contract system, the contractors that undertook the work, employing the men on the terms of the Union. In connection with this dispute an injunction was issued on August 15, on behalf of the Buffalo Mines, Limited, restraining the Cobalt Miners' Union from molesting the company or their employees, the injunction to be in force until August 29.

**Strike of Cigar Makers at Montreal, Que.**

On July 31, a strike of cigar makers took place at Montreal, Que., and continued during August. According to the employer, the dispute arose from an objection on the part of the Cigarmakers' Union to the use of Canadian tobacco, although he claimed that several cigar manufacturers having the Union label were using Canadian leaf, and that it gave his customers good satisfaction. No report of this dispute was received at the Department from the Cigar Makers' International Union.

**Strike of Barbers at London, Ont.**

A strike of journeymen barbers which took place at London, Ont., on July 29, on account of the refusal of the employers to grant a demand for an increase in wages, was terminated on August 17, a compromise being effected. Before the strike, the men had been receiving \$10 per week, and 50 per cent on all over \$16 taken at the chair. They demanded \$12 per week and 50 per cent of all over \$18. By the terms of settlement they were conceded \$11 per week and 50 per cent of the receipts over \$17. According to a report received from the Journeymen Barbers' Union 10 shops and 20 men were affected by this dispute.

**Strike of Machinists at Toronto, Ont.**

With regard to a strike of machinists at Toronto, Ont., which began on June 8, on account of a demand for a nine hour day a report was received from the Machinists' Union in which it was stated that the request was presented to about 80 firms. About 50 or 52 shops at first opposed the request, but of these 26 made a settlement without their men leaving work. Some of the others conceded the demands of the men after the strike had begun, and there were left 16 shops and about 400 men still involved in the dispute.

**Other Disputes.**

No settlements were reported with regard to strikes of 20 *marble workers* and 40 *stonecutters* at Toronto, Ont. The former dispute arose from the employment of non-unionists, and the latter from the refusal of the employer to grant a demand for an increase in wages from 40 to 50 cents per hour.

A strike of *structural iron workers*, which took place at Montreal, Que., on July 8, on account of the refusal of 5 firms to grant a demand for an increase in wages, shorter hours and other changes, was reported by one of the firms affected to have ceased about August 10, at which time nearly all the strikers had returned to work under the conditions prevailing before the strike. About 5 firms and 315 employees were directly affected by this dispute, and 15 firms and 100 employees were indirectly affected.

No change in the situation was reported with regard to strikes of 27 *harness and collar makers* at Peterborough Ont., which began on April 22, on account of a demand for higher wages and recognition of the Union, 75 *Iron moulders* at Vancouver, B.C., which began on June 24, on account of a demand for higher wages and shorter hours, and a strike of 7 carpenters, plumbers and labourers at Galt, Ont., which began on July 29, on account of the employment of non-unionists.

**New Disputes.**

The new disputes of the month comprised strikes of coal miners at Spring-

hill, Nova Scotia, and Lethbridge, Alberta, cotton mill hands at Valleyfield, Que., garment workers at Montreal, Que., telegraphers at Montreal, Que., Toronto, Ont., and Winnipeg, Man., structural iron workers at Cap Rouge, Que., stonemasons, bricklayers and masons, at Galt, Ont., and canoe makers at Peterborough, Ont. There was also a strike of garment workers at Winnipeg, Man., following a general discharge, which employees thought was a lockout. Strikes of longshoremen also occurred at Montreal, Que., and Halifax, N.S., but as neither of them lasted for twenty-four hours, they have not been included in the statistics of the month. A brief account of these disputes is given below.

#### Strike of Coal Miners at Springhill, N. S.

On August 1, a strike of coal miners employed by the Cumberland Railway and Coal Company took place at Springhill, N. S., and continued throughout the month. The dispute arose on account of the miners' claim for payment of 4 cents per inch per lineal yard for stone in pillar work, being disallowed by the Board of Conciliation and Investigation which was established in June under the Industrial Disputes Investigation Act, to inquire into the differences existing between them and their employers.\* The Company claimed that the men were already being paid for the 'local stone'. According to a return received from the Company, 82 men were directly affected and 1,534 were indirectly affected, all of these being in its employ. It was stated that many others were indirectly concerned in other places, at St. John, N.B., about 100 men engaged discharging and handling coal being thrown out of employment. In a report received from the Miners' Union it was stated that 500 employees were directly affected and 750 were indirectly affected by the dispute. In the course of the month a number of the strikers obtained work elsewhere. In some collieries they took the places of men who had gone to the harvest fields of Western Canada.

#### Strike of Coal Miners at Lethbridge, Alta.

On August 12, about 100 employees of the Alberta Railway and Irrigation Company ceased work owing to a difference of opinion as to the interpretation of a clause in an agreement signed on June 4, which provided that "All miners and mine labourers shall work eight hours per day, it being definitely understood that this means eight hours work at their working place, exclusive of half an hour for noon-time, with the exception of miners working by contract, who are to work eight hours at their working place." It was claimed by the drivers that their time begins when they harness their horses, while the Company claimed that their working place is where they hitch to the car in the Mine. Similar claims were made by the shiftmen and grippers. It was stated in the press, that the men by stopping work acted contrary to the advice of the officials of their Union, who wished them to use the means provided by the agreement for the settlement of disputes. On Wednesday, August 14, the strikers returned to work, pending an investigation as to the interpretation of the clause, in the manner provided by the agreement.

#### Strike of Garment Workers at Montreal, Que.

On August 9, a strike of garment workers employed by Messrs H. Vineberg & Co., took place at Montreal, Que. According to a report received from the Company, the dispute arose through the discharge of a foreman, the employees demanding his reinstatement and recognition of the Garment Workers' Union. There were 52 workpeople affected, of whom 27 were males and 25 females. On August 15, work was resumed. The firm maintained an "open shop", but gave the employees the choice of receiving payment by the piece or by the week.

On August 20, another strike of garment workers was declared at Montreal. According to a report received from the secretary of the union there were 4 firms affected by it and about 400 employees, 3 firms and 366 workpeople being directly affected. The strikers included 182 males and 44 females over twenty-one

\* An account of the findings of the Board is given in the August number of the *Labour Gazette*, on page 174.

years of age, and 94 males and 46 females under twenty-one years of age. The cause of the dispute was the refusal of the employers to grant demands for a week of 55 hours for men and 51 for women, weekly payment of wages, and payment by the time instead of by the piece, abolition of the contracting system, and recognition of the union. One firm employing 60 male and 50 female workers reported that the strike in their factory was terminated on August 24, a satisfactory arrangement having been reached. No settlement was reported during the month with regard to the other firms involved.

#### **Strike of Cotton Mill Workers at Valleyfield, Que.**

On August 14, a strike of employees of the Montreal Cotton Company took place at Valleyfield, Que., and continued until the evening of August 24, when it was decided to refer the matters in dispute to a Board of Conciliation and Investigation under Clause 63 of the Industrial Disputes Investigation Act, 1907; and work was resumed on Monday August 26. The strike appears to have been the result of misunderstanding respecting an agreement between the male spinners and the management. In their application for a Board of Conciliation, several demands and claims were made by the employees relating chiefly to the working conditions in the mill. The Company stated that from 2,500 to 3,000 workpeople were affected by the strike, but the employees placed the number at 2,200, of whom 950 were males and 1,250 females. There were 250 males under 21 years of age.\*

#### **Strike of Structural Iron Workers at Cap Rouge, Que.**

On August 9, about 130 structural iron workers employed by the Phoenix Bridge Company on the Quebec bridge at Cap Rouge, Que., declared a strike. The men had been receiving 50 cents per hour, with their passage home and back, but on account of rainy weather they had

not been earning more than \$18 or \$20 per week for five or six weeks. Some of them, dissatisfied with the loss of time through rain, wished to leave, but the company refused under these circumstances to pay their return passage money. The other employees stopped work in sympathy. Work was resumed on August 12, the weather having become finer, and no further trouble of this nature arose.

#### **Strikes in the Building Trades at Galt, Ont.**

On August 23, a strike of 12 stonemasons working on the construction of the addition to the C. Turnbull Company's knitting mill took place at Galt, Ont. It was stated by the contractor that his men were ordered to stop work by the walking delegate of a local organization of building trades, not the masons' union, because he refused to discharge some labourers who did not belong to the labourers' union. After waiting until August 28 for his men to return, the contractor declared his intention to fill their places with non-unionists. On August 26, about 12 bricklayers and labourers working on the same job stopped work on account of the employment of non-union carpenters. No settlement of either of these disputes was reported at the close of the month.

#### **Strike of Telegraphers at Montreal, Toronto, and Winnipeg.**

A general strike of commercial telegraphers which commenced in the United States, spread to Canada on August 13, when telegraphers employed by the Great North Western telegraph Company at Quebec, Montreal, Que., Toronto, Ont., and Winnipeg, Man., refused to take messages from points in the United States where the strike was in progress. About 38 male and 37 female operators were involved in the dispute at these places. No settlement of the strike took place during the month, but a few days after the employees went out, the Company claimed that they had a sufficient number of operators to handle the business.

\* An account of this dispute is given in the article "Industrial Disputes Investigation Act, 1907. Proceedings under the Act during August," on another page of the present number.

**Other Disputes.**

A strike of 14 *granite cutters* took place at Toronto, Ont., on August 22, and continued during the rest of the month. The strikers alleged that they went out, because they had been brought to work under misrepresentations.

A strike of 9 *canoe makers* took place at Peterborough, Ont., on August 13. According to the company, the men objected to the appointment of a foreman without their being consulted. Some of the strikers returned to work after being out for two or three days, and the others returned in the course of the month.

On August 26, at noon, about 60 *longshoremen*, employed by Messrs. Pickford & Black, at Halifax, N.S., stopped work on account of the refusal of a man who had been hired to work with them to join the Halifax Longshoremen's Association. On the following day, according to a report received from the union, the employee, who was the cause of the strike, joined the Association and work was resumed.

On August 17, about 37 *garment workers*, of whom 15 were female employees, were paid off and discharged by the Scotland Woollen Mills Company, at Winnipeg, Man. According to a report received from the Garment Workers' Union, no reason was given for their dismissal, but it was

alleged that the employer had declared he did not want a union shop any longer. It was stated by the manager of the company that the employees were paid off on account of stock taking and dullness of business. When trade revived he endeavoured to get back his old employees as circumstances warranted, but they refused to return unless all were taken back, thinking that they had been locked out. The company then tried to procure other workpeople in their stead.

On August 6, at noon, about 140 *longshoremen* employed on the docks at Montreal in discharging coal, stopped work. These men were working for the Inverness Railway and Coal Company and the Nova Scotia Steel & Coal Company. The strike arose from their desire to be paid at once the bonus of 2½ cents per hour which had been promised at the end of the season by the Shipping Federation. As their employers did not belong to this Federation, they had not signed the agreement. The demand of the strikers was granted, and they returned to work the next morning.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of August, and which have been reported to the Department.

**REPORTS OF DEPARTMENTS AND BUREAUS.**

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during August, 1907.

**ONTARIO REPORTS.****Co-operative Experiments in Agriculture.**

Twenty-Eighth Annual Report of the Ontario Agricultural and Experimental Union, 1906. Toronto; King's Printer, 1907. Pages, 84.

The report of the Ontario Agricultural and Experimental Union for 1906, indicates steady progress in the movement for co-operation among the agricultural workers of the Province, with regard to scientific experiments in raising the products of their farms. These experiments were first undertaken systematically by 12 members of the Union in 1886. Twenty years later, in 1906,

there were about 3,700 experimenters in the division of agriculture alone. In 1894, the co-operative work was extended to horticulture, and in recent years experiments have also been undertaken in agricultural chemistry, farm forestry and pou'try raising. In 1906, material for co-operative experiments was furnished to 4,700 farmers in all, and including those still experimenting with material received a year or two before, there were about 5,700 persons in all conducting co-operative experiments under the direction of the Union in 1906.

The Report contains papers on the experiments conducted in the different branches of farming, and a few others

on miscellaneous subjects of interest to members of the Union which were read at their annual meeting.

## BRITISH REPORTS.

### Factory Labour in India.

Report of the Textile Factories Labour Committee, appointed by the Government of India, December, 1906, to enquire into the conditions of Factory Labour in India, with Appendices. London: Wyman and Sons. 1907. Price 9d.

In December, 1906, the government of India appointed a committee to investigate conditions prevailing in the textile factories in that country, and to consider especially the advisability of limiting the working hours of adult males, requiring the working children to have certificates of age and fitness, raising the minimum age of children in factories and appointing a separate staff of medical factory inspectors. With regard to these matters, the committee recommended that certificates of age and physical fitness for employment be required prior to half-time employment, and prior to employment as an adult; that the names of all persons under the age of 16 years be entered in the prescribed register, but that certificates of age and physical fitness be only required up to the age of fourteen years; that the period of employment be either between the hours of 5:30 a. m. and 6 p. m., or 6 a. m. and 6:30 p. m., or where the day shift system is in force between 5 a. m. and 8 p. m., but the actual time for male adults should never exceed twelve hours a day; and that medical inspectors whose whole time should be devoted to their duties under the Factories Act be appointed. Various other recommendations were made by the committee, including the prohibition of night work for women and provision for the instruction of half-time children on the mill premises by elementary teachers to be paid by the mill owners.

### Labour Legislation of British and Foreign Countries.

Bulletin of the International Labour Office. Vol. 1., Nos. 1, 2, 3, London, Eng.: The Labour Representation Printing & Publishing Co., Ltd. Page, 152.

The International Labour Office, an association with headquarters at Basle,

Switzerland, which has for one of its chief objects the periodical publication of labour laws of all countries, has just commenced to issue a bulletin in the English language dealing with this branch of legislation. Similar bulletins of the International Labour Office have been published in French and German since 1902. The English edition is merely a translation of these, the first volume corresponding closely with volume V. of the French and German bulletins.

In addition to synopses and lists of a large number of labour laws which have been recently enacted in various countries, the first English bulletin contains the text of the British Trade Disputes Act, 1906; the British Workmen's Compensation Act, 1906; the Natal Immigration Restriction Act, 1903, and the Apprenticeship Act, November 21, 1905, of Zurich, Switzerland. Among other features of the Bulletin, there is a chapter dealing with parliamentary action and proceedings on labour matters in the principal countries of the world, copies of resolutions of national and international congresses, a bibliography of recent publications on industrial questions, official and private, and notes concerning international labour treaties, which have appeared in recent French and German editions of the Bulletin.

## UNITED STATES REPORTS.

### Industrial Conditions of North Carolina.

Twentieth Annual Report of the Bureau of Labour and Printing of the State of North Carolina, 1906. Raleigh; State Printers, 1906. Page, 350.

In the Annual Report of the North Carolina Bureau of Labour and Printing for 1906, it is stated that the returns received show a material advancement along industrial lines in the State, and in the actual conditions among the labouring classes in the manufacturing districts. With reference to child labour, it is claimed that there is as little of it in North Carolina as in the New England States, and that the manufacturers, in the main, have co-operated with the State in carrying out the Child Labour Act of 1903, which prohibits the employment of any child under twelve years of age in any factory or manufacturing es-

establishment within the State, and declares that sixty-six hours shall constitute a week's work. It is recommended that this law be supplemented with a Compulsory Education Act, providing that all children between the ages of six and fourteen years should attend regularly the public schools. Other recommendations are that no child unable to read and write be permitted to work in any mill or factory, unless a widowed mother or totally disabled father is dependent upon the labour of such a child; and that no child under fourteen years of age be permitted to work in any factory between the hours of 7 p. m. and 6 a. m. That ten hours shall constitute the maximum day's work for all manufacturing establishments in the State, and that all manufacturers and others addressed for information by the Department for its annual report be required to answer promptly each question fully and accurately to the best of their knowledge and belief.

#### Industrial Conditions of Minnesota.

Tenth Biennial Report of the Bureau of Labour of the State of Minnesota, 1905-1906. Minneapolis: Harrison & Smith Co., 1907. Page, 534.

The subjects dealt with in the Tenth Biennial Report of the Minnesota Bureau of Labour comprise factory inspection, industrial accidents, child labour, inspection of foot block of railroad switches, labour organization, including statistics of wages and hours of labour; employment bureaus, iron ore mining in Minnesota, mine inspections, census of manufactures, and labour laws. The report contains the following recommendations: The passage of an act absolutely prohibiting the employment of children under 14 years of age, except during vacation, and prohibiting the employment of children under 16 years of age who have not completed the studies prescribed by law, unless the labour of such a child is necessary for the support of a dependent family, in which case a permit might be issued by the school authorities. The

prohibition under all conditions and circumstances of the use of basements of buildings for the manufacture of food products. Provision for the inspection of all railroad switches in the State oftener than once a year.

## RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

## PRIVY COUNCIL CASE.

## Appeal in damage suit dismissed.

IN the case noted at page 941 of the February, 1906, number of the *Labour Gazette*, the Privy Council has recently dismissed an appeal by the plaintiff from the judgment of the Court of Appeals, hereby an appeal by defendants, the Montreal Light, Heat and Power Company, was allowed and the action dismissed.

(Duffy v. Montreal Light, Heat and Power Co.; 1st August, 1907).

## ONTARIO CASES.

## Accident due to dangerous plant.

Plaintiffs were workmen in the employ of the defendants at their gas works in Toronto. The defendants use what is called the "oxide" method of purifying gas manufactured by them. This requires the use of large purifying tanks, through which the gas entering at the bottom forces its way upward through trays until it reaches the top or lid, and then passes down through an exit tube and out into the next purifier, or to be further dealt with. This "oxide" method is based upon "the property of the hydrated oxide of iron to decompose sulphuretted hydrogen, a portion of the sulphur forming a sulphide with the iron." When a sufficient quantity of gas has passed through this mixture in the tank, the tank is opened—either for the purpose of exposing the mixture to the air, so as to fit it for additional work, or for removing the mixture and putting in a fresh supply.

On 8th September, 1906, the plaintiffs with other workmen, and all under the direction of a Mr. Wright, were at work in and about the lifting of the large cover of one of these purifying tanks. When the cover or lid was raised 3 or 4 inches, the contents of the tank took

fire, flame burst out, enveloping the plaintiffs and other workmen, and the plaintiffs were all seriously injured. At the trial the jury found in favour of the plaintiffs with damages as follows:—Dodds, \$3,000; Mills, \$750; Heard, \$500, and Webster, \$2,000.

On motion for judgment upon the verdict of the jury, defendants contended that there was no evidence of negligence proper to be submitted to the jury and that the verdict was against the evidence and the weight of evidence. A question was further discussed whether the plaintiffs could recover at Common Law or were confined to their remedy under the Workmen's Compensation Act, the difference consisting in the amount of damages recoverable.

In giving judgment the trial Judge held that there was evidence of negligence which could not properly be withdrawn from the jury, and upon which the jury could find as they did. He further held that the tank with its contents was dangerous, that the danger of explosion or of fire coming from it was something the defendants ought to have known, that some means should have been adopted for the protection of the men, who were ignorant of the danger, and that the system was not a safe system. He further held that the plaintiffs were entitled to recover as at Common Law and entered judgment in favour of the plaintiffs in accordance with the verdict.

(Dodds and others v. Consumers Gas Co.; 6th May, 1907; Britton, J.)

## Accident due to breaking of lubricator glass.

Plaintiff was a locomotive engineer in the employ of the defendants, and on February 1st, 1907, while he was in the St. Thomas yards ready to go out on an express, the lubricator glass in his engine burst, the glass striking his left eye, and permanently injuring it, while his head was cut and bruised. The sight of his right eye was also affected. Plaintiff claimed that the defendants were

through negligence, responsible for the breaking of the glass. One of the reasons for this contention was that what is known as the "equal supply" oil can system is a bad practice. It provides that each engineer is to have his own can, with his name on it, and for each round trip is allowed three pints of oil. If any oil is left on arriving at the destination the oil is to be drawn out of the lubricator and returned to the can to be used on the next trip. It was claimed that this drawing off of the oil weakened the glass and made it liable to break. The glass, it was also contended, was of poor quality, being cut instead of needled at the ends, and was not covered with a shield.

At the trial several patterns of shields used on other roads were submitted, and it was asserted by the plaintiff in his evidence that if one of these had been in use on his engine it would have saved his eye. The jury found that the glass was not of the best quality and that defendants were negligent in not providing shields for the glasses, and awarded plaintiff \$3,600 damages.

(Fulton v. Michigan Central Railway; 26th April, 1907; Anglin, J.)

#### Fined for quitting post.

In connection with a strike of workmen at the plant of the Imperial Paper Mills Co. at Sturgeon Falls, William Murray, a dynamo tender, who went out on strike with the others, has been fined \$10. and costs for deserting his post and endangering the property of employers.

(Rex v. Murray; 15th August, 1907; Police Magistrate.)

#### Damages for loss of an eye

At the spring assizes at London, John Miles, who sued on behalf of his 16 year old son, was awarded \$600 damages against the defendants for the loss of an eye. The boy was running a planer in the defendants' factory when a small piece of wood was thrown from it, striking him in the eye and destroying the sight.

(Miles v. Sherlock-Manning Organ Co.; 5th May, 1907.)

#### Employee not liable to dismissal for mistakes.

In the course of a decision delivered in a case in the Division Court at Toronto in which Robert Forbes claimed a week's pay from the Russell Hardware Company for summary dismissal, the Judge held that "a man may be dismissed without notice for disobeying orders but not for making mistakes." Forbes was employed as shipper, and the company claimed they dismissed him on account of mistakes he made in connection with his duties.

(Forbes v. s., Russell Hardware Co.; 29th May, 1907, Morson, J.)

#### QUEBEC CASES.

##### Action for damages dismissed.

Plaintiff, the widow of a painter employed by defendants, brought action to recover \$10,000 damages for herself and infant child for the death of her husband, caused, as it was alleged, by the negligence of the defendants.

Plaintiff's husband who had been working on the outside of the elevator cage tinting the ceiling, was found hanging from the side of the elevator and dead, having had his head caught in an opening 7½ feet above the floor where the grating surrounding the elevator ceased.

Plaintiff claimed that there was negligence on the part of the defendant in having this opening at the top of the elevator cage near the ceiling in which deceased's head had been crushed by the counterpoise.

The Court found that this opening did not constitute a danger to the guests or employees of the hotel, at the distance it was from the floor; that it was not necessary for the deceased to insert his head therein for the purposes of his work and that some other motive must have induced his so doing. The defendant and its employees were exculpated from all responsibility in the premises.

(Bessette v. Queen's Hotel Company; 30th May, 1907; Dunlop, J.)

##### Responsibility of ship-owners for members of their crew.

An important judgment was rendered recently in the Superior Court of Mon-

treating dealing with the responsibility of shipowners. Actions for \$3,000 each were taken by the fathers of two young men who perished on board of the tug "Mersey" when that vessel foundered on her way from Quebec to Seven Islands last year.

Grenier, a cook by occupation, and Martel, a blacksmith, had seen engaged by defendant to go and work at Seven Islands, but were to form part of the crew of the tug on the way down. When the tug was within a few miles of Rimouski, she met with a storm, and soon commenced to leak to such an extent that the captain declared that they were lost. According to the allegations of the plaintiffs, the captain, named Gagnon, seemed to have lost his head from that moment. In the confusion that followed, Barros, the mate, and Lamothe, the engineer, were found to be in the life boat, and they called to the captain to join them, which he did. The three rowed away and were saved, while the five remaining inexperienced members of the crew perished with the boat when she foundered. On these allegations the actions were taken, the plaintiffs basing their claims on the ground that the vessel was unseaworthy and that the captain did not do his duty in the premises.

In rendering judgment the Court found these two contentions to be well founded. In the first place, the evidence showed the tug to have been old and rotten, some witnesses declaring they would not have trusted it to go from Quebec to Levis. As regards the other point, it was the duty of the captain to command the crew and organize some means of saving them all. Under those circumstances, the owner of the "Mersey" must be held responsible for the damage caused to plaintiffs by the death of their sons.

The Court assessed those damages at \$700, in the case of Grenier, and at \$400, in the case of Martel.

(Grenier v. Connolly; Martel v. Connolly; 15th June, 1907, Lafontaine, J.)

#### Value of instruction in automobiles.

The plaintiff was engaged by defendants to look after their workshop on

Stanley Street, Montreal. He gave up his place of business on Alexander St., in order to work for defendants. He was to make all the repairs to automobiles for the defendants and for their customers and for his own customers. He was to make up the bills for the value of his services and be paid by defendants, allowing them ten per cent on the value of his work. Before doing his own work he would have to do the work of the defendant Company. Among other things he was supposed to teach the manager of the company the theory of mechanical parts and how to run automobiles.

Plaintiff by his action claimed \$654, for his work and for teaching. He also claimed damages, alleging that he was dismissed in April, 1906. The Company contended that he was not dismissed, but had left of his own accord. One of the issues on which considerable expert testimony was made was the claim for teaching, for which plaintiff claimed \$2 an hour. The defendants offered him sixty cents per hour on this item. The Court, after hearing some of the leading automobilists on the point ruled that plaintiff should be allowed \$1 an hour for his teaching and for imparting to the manager his knowledge in connection with the science of automobiles.

The Court refused plaintiff's claim for damages but maintained the action in other respects and awarded him the sum of \$593.

(Lacombe v. Ross and Automobile Company; 2nd July, 1907; Martineau, J.)

#### Application of by-law re. masters and servants.

During the recent strike of longshoremen, at Montreal, ten men were arrested on the charge of deserting the service of the Shipping Federation, by whom the men were engaged in Scotland and brought to Canada to work on the wharves.

The charge was laid under Civic By-Law No. 20 relating to Masters and Servants.

It appeared by the evidence that although the men had been brought to Montreal by the Federation, they had

been turned over to the stevedore of the Dominion and Leyland lines, for whom they were working previous to the strike.

The Recorder discharged the accused and in doing so rendered the following judgment.

I find the agreement sufficiently proved, and also the desertion of service, but the facts disclose that the defendants, on their arrival, worked on the Dominion line of steamers, under and for the complainant personally, and not for the Shipping Federation of Canada. The interests of the Shipping Federation of Canada are the interests of the different shipping companies represented in it, and it serves a useful purpose in unifying in itself interests that are common to those different companies. Among other things, it has engaged labourers in Scotland for the convenience of shipping companies in Montreal. It contracted with these men to give them "any work which they have at their disposal" and the workman "will attend at Montreal or elsewhere upon vessels and wharves indicated" by it.

A general reading of the agreement gives the impression that the workmen were engaged to work for and under the direct supervision and direction of the Shipping Federation. The proved facts, however, do not co-incide with this impression. The Federation brings the men here and provides them with work. The men acquire new masters, who pay them, engage them, dismiss them, assign their duties and hours of labour. The men pass out of the employ of the Federation, if ever they were in it, and engage in other employ. Can it be said that there is now any *lien de droit* between these men and the Federation? It seems to me that it has ceased and lapsed by the Federation furnishing work which it had at its disposal, and that its relation to these men is precisely similar to that of a friendly organization bringing immigrants over to Canada and finding work for them.

But even if it is granted that the Federation still had some legal control over these men, the equally important question remains; Can the men be dealt with under By-Law 20? Let us put this question bearing in mind that the by-law is a penal one, and that under the well-known rule of law its scope cannot be widened.

The By-Law in question is one between masters, on the one hand, and apprentices, servants, journeymen, domestics and labourers on the other. It provides punishment for desertion of service and other offences. It only applies between the actual master and the servant. If the master ceases to be the direct employer, his rights under this by-law also cease. The by-law does not contemplate or provide for a dual responsibility by the servant. These men passed from the employ of the Shipping Federation to the employ of Peter Warwick Ferns, and the latter can only plead his own rights as a master. In any event, the company cannot now invoke this penal by-law, which only applies to the actual master and servant. The defendants are therefore discharged."

(Ferns v. Crichton et al.; 22nd May, 1907; Weir, Recorder.)

## MANITOBA CASE.

### Liability of directors of company for wages of employees.

The plaintiff was a workman who had been in the employment of the Drake Lumber Company, Limited. He recovered judgment against the Com-

pany for his wages, and execution having been returned *nulla bona* he brought this action against four of the directors of the Company under Section 33, chapter 30 R.S.M., 1902, which is as follows:

"The Directors of the Company shall be jointly and severally liable to the labourers, servants and apprentices thereof.....for all debts not exceeding one year's wages due for services performed for the Company, whilst they are such directors respectively.."

Two of the Directors, Stuart and Drake, defended the action on the ground that they never were directors within the meaning of Section 27 of the above Act, which is as follows:—

"No person shall be elected or appointed a director unless he is a shareholder owning stock absolutely in his own right and not in arrears in respect of any calls thereon."

The only stock held by Stuart was transferred to him pursuant to a written agreement as collateral security for a note he had endorsed for the Company. A certificate had been issued by the Company in Stuart's favour in the ordinary absolute form, but Stuart always held the stock under the agreement as collateral security only. Drake held the stock in trust for his father, and had no interest personally in it. Both so far as form was concerned, had been regularly appointed directors and attended meetings of the directors as such.

Defendants claimed that Section 33 is penal and should be strictly construed, and that as they were not directors *de jure* payment could not be enforced against them. The court held that as neither Stuart nor Drake held stock in their own right they were incompetent to be legally elected directors. Following *Huntingdon v. Attrill*, (1893), A.C., 150, it was held that Section 33 is not penal but remedial, being only the withholding from directors in respect of wages of the freedom which the Statute would otherwise give them from personal liability for all debts of the Company. Had these two directors not acted others would have been elected against whom plaintiff could have claimed. Stuart and Drake, having acted as Directors, were held to be estopped from disputing that they were legally qualified to hold the office they preten-

ded to hold, and the judgment of the County Court against them in plaintiff's favour was affirmed.

(Macdonald v. Drake, 22nd October, 1906, Court of Appeal).

### BRITISH COLUMBIA CASES.

#### What is an accident ?

An appeal was recently made from the judgment of Hon. Mr Justice Morrison on a case stated to him by Stipendiary Magistrate H. O. Alexander, arbitrator under the Workmen's Compensation Act, 1902, who had found in favour of the plaintiff, but reserved decision on a point of law for a supreme court judgment.

The applicant, Neville, was employed by Messrs. Kelly Bros, and Mitchell as a steel cutter, and while chipping steel plate with a cold chisel, a piece of the chipping flew up and struck him in the left eye, of which he lost the sight.

The arbitrator came to the conclusion that the occurrence was an accident within the provisions of the Act and entitled to relief accordingly.

At the request of the respondents, the question was submitted to Mr. Justice Morrison; Did the flying up of the piece of steel and its entrance into the applicant's eye, thereby doing serious injury, constitute an accident?

His Lordship, following a decision of the House of Lords, held that it was, and the Full Court, after hearing the evidence, were of the same opinion and the appeal was dismissed.

(Neville v. Kelly, 10th June, 1907, Full Court).

#### Accident due to breaking of rope tackle

Plaintiff was employed by the contractors for the new post office at Vancouver in connection with the handling of bricks and mortar on a scaffold. It was his duty to receive the mortar skip operated by a derrick, and while in the act of carrying out these duties the rope tackle broke and plaintiff was badly injured.

At the trial the jury took the view that the accident might have been avoided if the rope had been inspected at reasonable intervals, and awarded plaintiff \$5,000 damages.

(Dutton v. Kelly Bros. & Mitchell; 1st June, 1907).

### ENGLISH CASE.

#### Divulging secrets of master's business.

The defendant entered the service of the plaintiffs as a traveller under an agreement by which he agreed that he would not at any time thereafter "divulge or make known any of the trusts, secrets, accounts, or dealings of or relating to" the plaintiffs' business.

Upon leaving the plaintiffs' service, he entered the service of the co-defendants, who knew of the terms of the above agreement, and he kept a list of the plaintiffs' customers in the district in which he travelled and divulged to a considerable extent to his co-defendants the terms upon which the plaintiff did business.

The Court held that the plaintiffs were entitled to an injunction against both defendants, an order for delivery up of papers and books, and damages.

(Summers & Co. Ltd., v. Boyce et al.; 2nd July 1907, Swinfen Eady, J.)

# THE LABOUR GAZETTE

OCTOBER, 1907.

## INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF SEPTEMBER, 1907.

### I.—GENERAL SUMMARY.

EMPLOYMENT was very active throughout Canada during September. The demand for men in connection with the western harvest, and for railway construction and coal mining operations, was in excess of the supply. Compared with the corresponding period of 1906, however, the general shortage of help was less pronounced, as a result largely of the diminished agricultural yield and the continued stringency in the money market. The effect of the latter was felt especially in the manufacturing industry and in the building trades. In the remaining industries and trades, conditions continued very busy. The returns from the fisheries of the Maritime Provinces will be heavier than in many years past, though in British Columbia the pack of salmon has been very light. Metal-liferous mining was very busy throughout Canada, except in certain portions of British Columbia which were affected by a shortage of coke. In the lumbering industry, the outlook is for smaller cuts during the coming winter season than in the preceding year. As evidencing the general prosperity of trade and industry, the amount of freight handled by the railway and other transportation companies in the past few weeks has been greater than at any previous period in the history of the Dominion. The extensive railway construction operations at present in progress or protected will ensure employment to many thousands of work-people for some time to come, several

large contracts being withheld until facilities for carrying out the work have been increased.

#### Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department during September:—

*Mining.*—A two years' agreement was signed between the Western Fuel Company and coal miners in its employ. Under its terms, the men employed underground are not required to pay for transportation to work, amounting to about \$1.00 per month. The bonus of 10 per cent. per month which was granted some time ago was extended by the company for two years, and is in addition to the scale of wages mentioned in the agreement.<sup>(1)</sup>

*Metal, engineering and shipbuilding.*—Tinsmiths (40) in the employ of six firms at Calgary, Alta., had their wages increased from 40c. to 42½c. per hour.

*Printing.*—A three-years agreement was concluded at Guelph, Ont., between employing printers and the local Typographical Union, by which an increase of 50 cents per week will take effect on October 1, with a further increase of 50 cents per week on October 1, 1908, and

(1) A copy of this agreement is published elsewhere in the present issue under the heading "Recent Industrial Agreements."

a further increase of \$1.00 per week on October 1, 1909. (2) Stereotypers employed in newspaper offices at Toronto, Ont., received an advance in wages.

*Food and tobacco preparation.*—Malsters at Toronto, Ont., received an increase from \$11.50 to \$12.50 per week in their wages.

*Leather.*—Harness makers at Victoria, B. C., were granted an increase from a scale of \$2.50 per day of 10 hours to a scale of \$3.00 per day of 9 hours.

*Railway employees.*—Employees in the shops of the Père Marquette Railway Company at St. Thomas, Ont., to the number of 72, were increased 2 cents per hour in the case of machinists and boilermakers, and 1 cent per hour in the case of blacksmiths, machinists' helpers, carpenters and handymen. Boilermakers (140) and machinists (600) employed by the Canadian Pacific Railway Company west of Fort William, Ont., had their wages increased dating from September 1. (3)

I. C. R. freight handlers at Halifax received an increase in wages. (4)

C. P. R. firemen, west of Fort William, Ont., were granted a new schedule dating from July 1, 1907, and involving an increase in wages. (2)

*Transport.*—Street railway employees (9) at Peterborough, Ont., received an advance in wages of 10 cents per day. Teamsters and other fuel yard employees at Hull also received an advance.

### Cost of Living.

As a result of the high price of hay and other fodder, the price of milk was advanced at a number of points throughout Canada. At Montreal, Que., 10 cents per quart were asked, and in several other localities the price was higher than ever before reported. Coal advanced by 25 to 50 cents per ton at several points. Flour and bread were upward. It was estimated that in the city of Montreal alone an additional expenditure of over \$400,000 would be entailed by the ad-

vance in bread, milk and fuel during the coming winter season, bread being one cent more per loaf, coal 25 cents more per ton, and milk three cents per quart more than at the same period in 1906.

Owing to a crop shortage, the pack of canned vegetables, it was reported, will be small, and will be held at advanced rates. Fruit of all kinds has been exceptionally high in price.

A result of the high price of coarse grains was an increase in the supply of hogs and other live stock offered, and consequent decline in meat prices, farmers finding it more profitable to dispose of the grain direct than by feeding it.

The market for structural material continued active, with mills and factories producing to their full capacity and prices well maintained.

There has been a gradual recession in the prices of metals, including lead, tin, copper and antimony.

In connection with the return of students to the leading educational centres, it was reported that board and lodging showed a considerable advance compared with previous years.

### Interruptions to Industry.

The number of trade disputes in existence during September was one less than in the previous month, and there was a decrease of approximately 37,960 in the number of working days lost. Compared with September, 1906, there was a decrease of four in the number of trade disputes, and a decrease of about 35,240 in the number of working days lost.

Among industrial establishments, etc., destroyed by fire or through other causes during August, 1907, the following, as reported in the press of the Dominion, may be mentioned:—

*Nova Scotia.*—Warehouse at Amherst, loss \$1,000; brick and tile factory at New Glasgow, loss, \$100,000, 75 men thrown out of employment; dynamite magazine at North Sydney; building plant at Pugwash, loss \$20,000; church at Sydney, loss, \$22,000; stores and residences at Waterford.

*New Brunswick.*—Saw-mill at Grand Bay, loss, \$15,000  
*Quebec.*—Albert mills at Barachois; spice mill at Montreal, loss, \$10,000; Stores at Papineauville, loss \$6,000; barns of Macdonald College at St. Anne de Bellevue, loss, \$35,000; hospital and stores at St. Hyacinthe, loss, \$18,000; boardinghouse at St. Lambert, loss, \$6,000; store at Waterloo, loss, \$1,500.

(2) A copy of this agreement is published elsewhere in the present issue under the heading "Recent Industrial Agreements."

(3) See report of Winnipeg correspondent.

(4) See report of Halifax correspondent.

Barns at Martinville and Sutton.

A collision occurred on the St. Lawrence below Quebec, Que., between the steamers Mongolian and Horona, causing heavy damage to the former vessel.

*Ontario.*—Planing mill at Chatham, loss, \$12,000; separator at Dover; grain elevator at Fort William, loss, \$5,000; livery stable at Mount Forest; dye works at Peterborough, loss, \$7,000, 40 workmen thrown out of employment; barge mills at Port Hope; saw-mill at Stoney Lake, loss, \$2,000; Elskino hotel at Stony Creek loss, \$3,000; photograph gallery at Toronto; printing establishment at Toronto, loss \$30,000.

Barns at Belleville, Comber, Chatham, Cairo, Erin, Forest, Glencoe, Heward, Mallorytown, Middleport, Nissouri, Petrolea, Plympton, Raleigh, Sandwich, South Tavistock, West Williams and Wingham.

The steamer Edmonton laden with 75,000 bushels of wheat foundered in the St. Lawrence near Belleville. The steamer Picton was burned at her wharf at Toronto, loss, \$100,000.

*Manitoba.*—Offices and stores at Griswold, loss, \$25,000; Peat fuel works at Lac du Bonnet, loss, \$40,000 warehouse at Winnipeg, loss \$20,000.

*Alberta.*—Business block at Lacombe, loss, \$5,000.

*British Columbia.*—Business block at Vancouver, loss, \$100,000.

### Conditions in the Industries and Trades.

Conditions of employment during September in the several industries and trades throughout Canada, as indicated by the reports of correspondents to the *Labour Gazette*, and by information received at the Department from other sources, may be briefly summarized as follows:—

#### Agriculture

Agriculturists throughout Canada were very busy harvesting. Wheat cutting became general in the northwest provinces in the opening days of the month, and had been completed in many sections by October 1; threshing became general in the closing weeks of the month, the harvest being on the whole about 20 days later than last year. About 21,000 men from Ontario and the eastern provinces were engaged in this work. The supply of harvesters in Alberta and Saskatchewan was well maintained, but a scarcity was complained of in Manitoba.\* Reports of damage by frost to the standing crops, especially in the Province of Saskatchewan, were received and confirmed; but it was impossible to estimate the extent of the damage at the close of the month. Estimates made of the western wheat yield ranged between 75,000,000 and 82,000,000 bushels. The increase in the price of grain, it is thought,

will tend to equalize returns as compared with 1906. A further result of the lateness of the western harvest was a marked falling off in grain shipments, as compared with September, 1906, the decrease amounting to several million bushels. Cattle shipments from western Canada are also expected to show a falling off as compared with 1906. In Ontario, threshing was actively in progress, and the grain was being rapidly marketed owing to the prevailing high prices. Estimates of the yield did not vary from the previous month†. Corn and roots were turning out well. The high price of fodder and coarse grains has induced the marketing of live-stock on an extensive scale. Good progress with fall ploughing and seeding was made. In Quebec and the eastern provinces, wet weather and a scarcity of farm help impeded operations, and the hay and potato crops have suffered.

The drought in Ontario during August and September had the effect of diminishing the fruit yield by from ten to twenty per cent. Weather conditions were more favourable in Quebec, and were very favourable in Nova Scotia and British Columbia. Apples and plums suffered to an unusual extent from "drops." Pears and peaches will be a light crop. Insect pests were considerably fewer than last year. Prices will be well maintained, notwithstanding the curtailment of consumption in foreign countries. Apple barrels were selling at 35 to 40 cents each.

At a convention held in Toronto, Ont., the Farmers' Association of Canada and the Dominion Grange were amalgamated.

At a meeting held at Toronto, Ont., on August 31, a Dominion organization of milk producers was formed, the organization to be composed of the presidents and secretaries of local milk producers' associations, and the object being to secure united action in all matters affecting the interests of milk producers.

The annual meeting of the Pomological and Fruit Growing Society of Quebec was held at St. Jean Port-Joli, Que., September 24 and 25.

\* See report of Winnipeg correspondent.

† See *Labour Gazette* for September, p. 247.

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of the *Gazette* as published in the present issue several trades and in dustries throughout the Dominion. This table has reference only to the amount of employment headings in the *Gazette*. In tabulating the information in question the terms employed are divided into two groups, the busy, very busy, (2) quiet, dull, very dull.

### Fishing.

The quantity of codfish taken during the present season by the Nova Scotia fishing fleets, both on the banks and off the coast, has been more abundant than in several years past. Weather conditions have been very favourable for the boats, though the wet weather during September somewhat retarded curing operations, and a portion of the catch was reported to have deteriorated in quality as a result. Prices for prime cures held firm on an exceptionally high level, though the market for other qualities weakened somewhat with increasing arrivals. With the abundant catches and high prices prevailing, the daily earnings of boats during the present season have frequently reached \$60 and upwards.

Conditions in British Columbia were unchanged from last month, the pack of sockeyes having been very light. The price of canned salmon was upward in the British market. The traps off Vancouver Island were operated for cohoes and humpbacks, an extension of time having been granted by the Federal government. Good catches were reported.

Certain general and special fishery regulations in force in the Provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec and Ontario, since 1889, and in Manitoba and the Northwest Territories since 1894, were rescinded, and new regulations issued by Order-in-Council dated September 12, 1907. (\*)

A station for marine biological research will be established by the Dominion government on the Pacific coast.

### Lumbering.

In Ontario and the eastern provinces, the mills continued very busy, the supply of logs being sufficient to guarantee activity until the close of the season. In the Ottawa Valley, owing to the success of the drives, a considerable quantity of logs will be held in certain localities for the season of 1908. Booming and rafting operations in New Brunswick have been carried on under favourable conditions, the recent rains having main-

tained high water in the streams. Prices have remained very firm. In New Brunswick the outlook is that the cut during the coming winter season, both on the Miramichi and St. John rivers, will be smaller than last year, and that wages will be on a somewhat lower level. In Ontario, also, the increased cost of labour and supplies has had the effect of curtailing arrangements for the cut of 1907-08. The engagement of men for the camps was actively in progress throughout September.

In British Columbia there was a falling off in the demand for logs, and a lessening of the output from the mills, especially in the East Kootenay district, the market for lumber in the northwest provinces having been less active owing to the money stringency and the backwardness of the season. The production of logs during August showed a marked decline as compared with July, but was greater than in August, 1906.

The preliminary examination before the magistrate into the operations of the Retail Lumber Dealers' Association of Alberta was adjourned during September for future investigation and the securing of additional evidence.

In British Columbia, fines were imposed on a number of hand loggers convicted of using steam donkey engines in getting logs out of the woods, in contravention of official regulations.

### Mining.

A heavy output was reported from the Nova Scotia collieries, and additional labour of the less skilled classes was in demand at several points. Extensions and development work were actively in progress at several of the collieries. The asbestos and mica mines of Quebec were producing to their full capacity. Additional strikes of oil were reported from the Tilbury region in Southwestern Ontario. Employment at Cobalt, Ont., continued somewhat quiet, as compared with the earlier months of the season. In Northern Ontario and in the Lake Superior district prospecting was very active. The collieries of Alberta and British Columbia were producing to their full capacity, the demand for coal being

\* See supplement to Canada Gazette, Sept. 21, 1907.

in excess of the available supply. The monthly pay-roll of the Crows' Nest Pass Coal Company for September was upwards of \$189,000. The shortage of coke continued to affect injuriously the metalliferous mines and smelters of the interior of British Columbia, and several plants were forced to curtail operations, though in other respects conditions were very favourable. An official investigation by the provincial government into the cause of the shortage was in progress during September. Labour was in active demand in the several collieries of British Columbia.

### Manufacturing.

Conditions among manufacturers showed little change compared with August. Establishments were for the most part running full time, with full staffs and with orders well ahead. The stringency in the money market and the crop shortage in Western Canada had the effect of checking somewhat, in certain localities, the pronounced expansion in progress for some time past. Shipments of manufactured goods, however, have been heavier in the past few weeks than at any previous period.

Owing to the scarcity of fruit and vegetables, short runs were reported at some of the canneries in Ontario. Those of the Niagara district, however, were operating to full capacity, and labour was in demand.

### Railway Construction.

Railway construction was being pushed forward with all possible speed, labour being scarce and in demand, especially in the northwest provinces, where the harvest had the effect of diverting a portion of the supply. It was stated that a number of large contracts would be awarded as soon as existing facilities were increased, the majority of contractors being unable to take on additional work except on long-time engagements. Notwithstanding the severe weather of the winter season, and the backward spring, it has been estimated that upward of 1,500 miles of railway track will be completed during the present year, in

addition to some 3,011 miles under construction. Some delay was caused during September by a scarcity of structural iron. Railway ties were also scarce and high in price. It was stated that about 250 miles of the double track on the Canadian Pacific Railway line between Winnipeg and Fort William would be available for the grain traffic of the present autumn. A large increase in terminal facilities at the latter place will be begun shortly, the plans including a large elevator and six new freight sheds. Plans have been approved for grade revision on an extensive scale on the Canadian Pacific main line in British Columbia.

A new steamship built on the Clyde for the lake traffic of the Canadian Pacific Railway Company arrived at Quebec, Que., and will be cut in two in order to pass through the canals. A sister ship is to follow.

A system of telephonic marine signals was recently established between the cities of Quebec and Montreal whereby communication with vessels navigating the St. Lawrence between these ports will be continuously maintained, and their progress known to the owners and agents, while the condition of affairs in the river will be indicated to the vessels themselves. The installation and organization of this system has not yet been perfected, though four stations have been established in connection with Montreal and one in connection with Quebec. When completed, there will be eleven stations, all commanding a view of the river channel, and each having a mast for the display of signals. The long distance telephone lines for the service have been installed under contract with the Bell Telephone Company.

### General Transport.

The movement of general freight was reported heavier than at any previous time in the history of the Dominion. In Western Canada, receipts of in-bound packages and of coal and other coarse freight were particularly heavy, though out-bound grain shipments were considerably lighter than at the corresponding period of 1906, owing to the lateness of the harvest. Earnings of railway companies, in con-

sequence, were high. On the Inter-colonial railway, for example, the gross receipts for the month of August totalled \$859,000, an advance of \$55,000 on the receipts for the same month of 1906. The volume of traffic in the canals also continued to show increases compared with previous years. The result was a very busy month for transportation employees in all branches, the supply of railway telegraphers and of several other classes being less than the demand.

The statement of the Canadian Pacific Railway Company for the year ended June 30, 1907, shows a total mileage of all lines belonging to the company of 10,269, including 823 miles under construction. The total assets of the company are estimated at \$389,339,000. The total expenditure for the year was \$46,914,000. The total earnings were \$72,217,000. The working expenses amounted to 64.96 per cent. of the gross earnings, and the net earnings were 35.04 per cent., as compared with 62.75 and 37.25 per cent. respectively in the preceding year. The transfer of two steamships to the Pacific trade was advised by the directors.

The eighteenth annual report of the Intercolonial Railway Employees' Relief and Insurance Association for the year ended June 30, 1907, showed total receipts of the year from all sources of \$76,667.55, which, together with the aggregate balance on hand on June 30, 1906, made a grand total of \$95,920.85. Total expenditures were \$79,703.51, and the net surplus for 1907-08 is estimated at \$12,217.34. Seventy-one death claims were assessed and paid during the year, 61 being due to natural causes and 10 to accidental injuries. Eighteen claims for total disability allowances were passed, involving in all an outlay of \$31,500.

#### The Trades.

*Building.*—There was a decrease in activity in several localities during September, as compared with the preceding month and September, 1906. These conditions were most apparent in Toronto and the northwest provinces, the causes assigned being the prevailing stringency in the money market, the

backwardness of the season and the high price of material. Wet weather hampered outside operations in the eastern provinces. The inside branches, however, were well employed throughout Canada, with only local exceptions.

*Metal, engineering and shipbuilding.*—The various metal working trades were well employed, electrical workers and linemen having a busy month. Shipyards were all busy.

*Woodworking and furnishing.*—Employees in sash and door factories, planing mills, etc., were busy, and woodworkers generally had a good month. Carriage and wagon builders and car builders were especially busy. Coopers were busy on fruit packages in the opening weeks of the month, but became less active towards the close.

*Printing.*—The allied trades, including printers, pressmen and bookbinders, were active.

*Clothing.*—Tailors were more active than in August, but boot and shoe factory employees continued slack. Furriers were becoming very busy. Garment workers, hat and cap makers, etc., were active.

*Textile.*—Cotton mill employees were very busy, at advanced wages, compared with 1906. Employment in woolen mills varied according to locality.

*Leather.*—Tanners and curriers were somewhat quiet; other leather workers had a good month, trunk, bag and novelty workers being busy.

*Food and tobacco preparation.*—Bakers became more active with the advent of autumn. Butchers were well employed. Ice drivers and deliverers were concluding their busy season.

*Miscellaneous.*—Miscellaneous employees, including barbers and retail clerks, had a good month. The close of the tourist season caused a decrease in activity among hotel and restaurant employees at certain points. Theatre employees were entering upon their busy season. Laundry workers were active.

*Unskilled labour.*—This class was very busy throughout Canada, the demand in several localities and branches of industry being greater than the supply. This was especially felt in the coal mining

districts of Nova Scotia, in connection with railway construction, and in Manitoba and the other western provinces. Compared with the corresponding season of 1906, the stringency was less severe. Wages remained firm at the high level established in 1906.

### Canadian Trade and Revenue.

*Foreign trade.*—During August, 1907, the total value of imports entered for consumption was \$33,919,620, compared with \$28,192,791 in August, 1906. Total domestic exports during August, 1907, amounted to \$26,179,698, compared with \$24,050,561 in August, 1906. Increases in exports during the month took place under the headings of The Mine, The Fisheries, Agriculture and Manufactures, while under the headings of The Forest, and Animals and Their Produce decreases occurred.

*Imperial trade.*—According to reports received from commercial agents at the Department of Trade and Commerce, Canada, favourable market conditions prevailed in Great Britain for potatoes, apples and other fruits, and bacon. House furniture of good finish was also in demand. In Australasia, importations from Canada were reported to be increasing.

*Domestic trade.*—The cold weather stimulated fall trade, and a good turn over was reported during September. Fall sorting orders were of good volume, while orders for spring goods were fair. Fall millinery openings were well attended. Money continued tight, though somewhat easier in the closing days of the month than in August, less capital than was anticipated being required for the moving of the crops.

The Canadian bank statement for August, 1907, showed total assets of \$950,160,583, compared with \$956,661,776 in the previous month. The total liabilities for August, 1907, were \$773,370,268; in the previous month the liabilities amounted to \$780,030,584. The notes in circulation amounted to \$77,777,849 in August, 1907, and to \$77,604,170 in July. Deposits payable on demand totalled \$160,459,470 in August and \$166,352,146 in July.

The annual report of the Bank of British North America showed profits for the half year of \$331,153.10. Two branches and three sub-branches were opened within the year. The capital of the bank is now \$4,860,000, and the reserve fund \$2,235,600.

### Notes.

The annual meeting of the *Alberta Press Association* was held at Cranbrook, B. C.

The third annual convention of the *Fishermen's Union of Nova Scotia* was held at Halifax, N. S., September 26 and 27.

The second annual convention of the *Canadian Independent Telephone Association* was held at Toronto, Ont.

The first annual meeting of the *Booksellers' and Stationers' Association of Ontario*, was held at Toronto, Ont., August 29.

The annual convention of the *Canadian Electric Association* was held at Montreal, Que. September 11 to 13. The *Maritime Electric Association* also met at Montreal, Que., during September.

The commission appointed by the government of Ontario to investigate the question of *prison labour* visited a number of points in the United States during September for the collection of evidence.

The Royal Commission appointed to enquire into and report on conditions in the *Civil Service* of Canada held sessions during September. The commission appointed by the government of Saskatchewan to enquire into conditions in the *beef industry* also held sessions.

Sessions were held during September by the Commission appointed by the government of the Province of Quebec to conduct an enquiry into the question of *industrial accidents*, and the means best adapted to afford protection to the victims of such accidents and to the public in general. Representations to the commission were made by the *Chambre de Commerce* of Montreal and other bodies.\*

\* For statement of appointment of this commission see the *Labour Gazette* for July, 1907, page 12. For a reference to the provisions of the act under which the commission was appointed see *Labour Gazette* for June, 1907, page 1,384.

Sessions were held by the commission appointed by the government of the Province of Nova Scotia to enquire into the subject of *old age pensions*. The commission is made up as follows: Walter Crowe, K. C., Sydney, chairman; Hon. Robert Drummond, editor of Mining Record, Stellarton, N. S.; Stephen B. McNeil, Grand Master of the Provincial Workmen's Association, Glace Bay, and William Hodge, Springhill, N. S. (‡)

On September 25th, a deputation representing a number of organizations of railroad employees waited on the Hon. the Attorney-General of Ontario in regard to recent prosecution of employees in connection with *railway disasters*. A memorial was presented urging that the multiplicity of duties which at times fell on the shoulders of one employee, inevitably contributed to errors of judgment or lapses of memory, and that investigations were conducted in such a way that the men were treated as criminals and their interests not fully protected.

The *power and light plant* operated by the municipality of Orillia, Ont., has been conducted during the past year at a profit of upwards of \$9,000 to the municipality. The following is a statement of the receipts and payments for the year:—

*Receipts:*

Balance of profit, 1906, over estimates ..	\$ 961.12
Power receipts, 1907.....	9,240.00
Electric light receipts, 1907.....	19,000.00
Water rates.....	6,300.00
Street lights at \$40.00.....	2,350.00
Street hydrants at \$30.00.....	2,010.00
	<hr/>
	\$40,661.12

*Payments:*

Debentures principal.....	\$10,092.22
Debentures, interest.....	11,444.40
Electric and Power running expenses.....	8,400.00
Water running services.....	850.00
Balance.....	9,874.50
	<hr/>
	\$40,661.12

It will be noted that no sinking fund is allowed for the debentures being paid by annual instalments, repairs and extensions having been charged to expense account.

‡ For a statement with regard to the provisions of the act under which the commission was appointed see *Labour Gazette* for July, 1907, page 72.

The annual convention of the *Grand Council of the Provincial Workmen's Association* opened at Halifax, September 17. There were about 100 delegates, representing some 12,000 workmen, present. Among the measures discussed were old age pensions, the adoption of an eight-hour day for all underground workmen, the appointment of an organizer, a request to the government to induce managers of mines to supply suitable conveyance for workmen from the mouth of pit to their stations, a motion opposing the drawing of pillars by machinery, and a resolution opposing the employment of Asiatic labour, and requesting Provincial and Federal governments to co-operate with the P. W. A. to that end. The election of officers resulted as follows:

*Grand Master*.—Stephen B. McNeil.  
*Grand Secretary*.—John Moffatt.  
*Grand Sub-Secretary*.—Jos. Moss, Springhill.  
*Grand Associate Master*.—Duncan Blue, Springhill.  
*Grand Treasurer*.—Ronald Nicholson, Reserve Mines.  
*Grand Guardian*.—Thomas Scully, Stellarton.  
*Grand Past Master*.—Mark Conners, Pictou.  
*Inside Guard*.—A. B. McIsaac, Port Hood.  
*Outside Guard*.—Angus Nicholson.  
*Grand Chaplain*.—James Dorsey, Sydney Mines.

In the litigation between the *Dominion Iron and Steel Company* and the *Dominion Coal Company* with reference to the supply of coal furnished by the latter to the former under a contract signed in October, 1903, a decision was filed during September by Mr. Justice Longley, of the Nova Scotia judiciary. According to this decision, large quantities of coal unfit for the purpose of operating an iron and steel plant had been supplied to the Dominion Iron and Steel Company by the Dominion Coal Company. It was held, therefore, that the latter had committed a breach of the contract and was responsible to the former for any loss or damage resulting from this breach. It was recommended that a referee be appointed to ascertain how much coal it was necessary for the Steel Company to purchase in order to operate its works for three months, to enquire into the cost of coal obtained from other sources by the Steel Company since November, 1906, and to ascertain the actual loss and damage sustained by the Steel Company through its cessation of operations. The Coal Company was ordered to pay damages

and to carry out the terms of the contract. The amount of damage claimed by the Dominion Iron and Steel Company was upwards of \$1,700,000. It was stated that an appeal would be made from the decision. Owing to the magnitude of the issues involved, and their importance from an industrial and commercial standpoint, widespread interest has been felt throughout Canada during the past year in the dispute between the two companies. (†)

The royal commission appointed by the Dominion government to enquire into the causes of the collapse of the *Quebec bridge*\* held a number of sessions during September, and heard a large amount of evidence. No report had been made up to the end of the month. The coroner's jury, which took evidence in connection with the death of a number of the victims of the accident, brought in the following verdict:—

"That the deceased (Lafrance) died from injuries and nervous shock sustained in the collapse of the Quebec bridge. We have been unable to establish the real cause of the collapse, but we think it our duty to declare that according to the proof furnished during the inquest all necessary precautions were taken for the construction of the bridge without danger."

The treasurer of the fund organized by the mayor of Quebec for the relief

† For statement re origin of dispute see the *Labour Gazette* for December, 1906. p. 584.

\* A special article dealing with the accident appeared in the *Labour Gazette* for September, 1907, page 317.

of the widows and orphans of the victims reported subscriptions to the amount of \$11,569, of which \$2,250 had been distributed up to the middle of the month. The report of the committee recommended as participants of the fund eighteen widows, twenty-nine orphan children, and eleven single men, whose relatives were more or less dependent upon them for support. This is exclusive of twenty-four widows and the relatives of seven single men whose homes are at Caughnawaga. In addition to the amount already distributed, the committee decided to allow, for the present, one hundred and fifty dollars to each widow, and the same amount to parents who have lost their sole support, twenty-five dollars to each orphan child, and one hundred dollars to the relatives of single men, the same to be paid monthly, or in special cases in one sum, if deemed advisable. Further provision was also made for several widows whose homes are in Caughnawaga, but who are temporarily residing at St. Romuald. The following resolution was adopted by the committee:—

Whereas, the total subscriptions in favor of the families of the victims of the Quebec Bridge disaster, now amounts to \$11,569, and that this amount being considered sufficient for the more pressing needs of the said families, the subscription is now closed, and the secretaries are hereby requested to communicate this information to the public through the local press.

## II. REPORTS OF LOCAL CORRESPONDENTS.

**D**URING the month of August, Mr. Joseph J. Ryan was appointed correspondent to the *Labour Gazette* for Three Rivers, Que., and district, in place of Mr. John Ryan, Sr., deceased.

### SYDNEY, N. S., AND DISTRICT.

*Mr. John Moffatt, correspondent,* reports as follows:—

#### THE GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was active during September. All of the industries were producing to their greatest capacity. Workshops

foundries and factories were in continuous operation.

The coal industry was very active and the September output will equal that of August, which was above the average. With the exception of Springhill, all of the collieries of the Province were busy. The Allan shafts at Stellarton increased their output. The Dominion Coal Company is opening up a new colliery in the Victoria coal field. The surface is being graded for the surface plant and workmen's houses. The coal crops out on the surface and slopes will be driven with all possible speed. A railway will be built in connection with the works. The Victoria coal is of

excellent quality, and will stand handling with a small per cent of breakage. Work continued on the New Castle Colliery at Port Morien. Mabou slope has been straightened and graded which greatly facilitates the work of handling trips. A new seam five feet thick was found at Inverness. The steel industry was very active, though at Sydney, owing to lack of sufficient steam power, one of the four furnaces was closed. To increase this power, four batteries of boilers are being installed. Work is also progressing on the coke ovens under construction. Apart from the Bessemer converters, which for three weeks were idle awaiting material for repairs, all the other departments were very busy. The steel works at Sydney Mines were giving good results.

Transportation by rail and water was brisk. The building trades continued active. Wholesale trade was good, and retail trade normal.

A commission on Old Age Pensions appointed by the local legislature met in Glace Bay on Sept. 24th, for the purpose of gathering information. The commission will visit the various mining districts of the province.

Sydney has declared itself in favour of a first-class technical school, with a comprehensive course of instruction and proper facilities for practical work along the lines of local industries.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Crops were a good average, but broken weather has prevented the harvesting of them in the best condition.

*Fishing.*—Deep sea fishing has met with great success, nearly all the Gloucester vessels having full fares.

#### CONDITION OF PARTICULAR TRADES.

Activity was reported in the several skilled trades. Unskilled labour was in much demand.

#### WESTVILLE, N. S., AND DISTRICT.

*Mr. T. Hale, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was busy in all departments. There was a considerable scarcity of

help, specially about the collieries, where there was a sufficient supply of skilled miners but a marked scarcity of loaders and other unskilled hands. The output at the several collieries during August compared favourably with that of the preceding month, the Drummond Company producing about 2,000 tons more than in the preceding month, though the Acadia Company produced about 1,000 tons less. Compared with August 1906, the Acadia showed an increase of 5,000 tons and the Drummond a decrease of 1,000 tons. The increase at the Acadia for the eight months ended August 31, 1907, was 32,790 tons, while the Drummond has decreased some 9,000 tons compared with the corresponding months of 1906. Coke produced at the Drummond colliery during August amounted to 652 tons. The pay-sheet of the colliery for August was something over \$40,000. Connection between No. 1 and No. 2 shafts at the Allen workings is expected to be made shortly. This will involve extensions and the employment of an additional number of men. Wholesale and retail trade was active.

On petition of the employees, the store-keepers in this town and in New Glasgow granted a half holiday each week during July and August, in addition to the general rule of closing at 6 p.m., on Mondays, Wednesdays and Fridays, pay days and the month of December excepted. The barbers took a half day off on Mondays during the summer.

Good progress was made with the extension of the water service, and preparations were under way for work on the new post-office. Building the through-out the district was active, especially in connection with the erection and repairing of dwellings. The terra cotta company of Sylvester has about ceased brick making for the season, though five hands will be employed for some time yet.

On September 21, the boys of the Acadia colliery, Westville, caused a stoppage of work owing to a dispute concerning a short day on Saturday; about 250 were effected. (\*)

\* See statement in article dealing with trade disputes of the month in present issue.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy harvesting. Grain and root crops turned out well. Fruit and vegetables brought good prices on the markets. Milk is selling at six cents per quart.

*Lumbering.*—Employment was steady.

*Manufacturing.*—All branches were active.

## HALIFAX, N.S., AND DISTRICT.

*Mr. A. J. Smith, correspondent,* reported as follows:

## GENERAL CONDITION OF THE LABOR MARKET.

The labour market maintained its active condition during September. All branches were employed, and more activity prevailed than in the corresponding month of 1906. Good progress has been made on contracts, including the Silliper Car Works, the new round house for the Intercolonial Railway, the new athletic arena and the Telephone Exchange building. The prospects for the next month are more favourable than in previous years. The freight handlers and checkers employed by the Intercolonial Railway have had their wages increased in accordance with the following statement:—

	Old Rate.	Present Rate.
Foreman.....	\$55.00 per mo.	\$60.00 per mo.
Checkers (inward or outward.....)	1.40 per day	52.50 per mo.
Junior Checkers.....	1.40 per day	47.50 per mo.
Porters' checkers' work	1.40 per day	47.50 per mo.
*Porters (1st year)...	1.40 per day	1.50 per day
Porters (next 4 yrs.)	1.40 per day	1.60 per day
Porters after 5 yrs..	1.40 per day	1.65 per day

The advances were obtained as a result of the findings of a board appointed under the Conciliation and Labour Act.\*

\* See *Labour Gazette* for September, 1907, page 289.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture and Fishing.*—Have been firstly, up to the average. Lumbering has been more active than usual. Manufacturing and mining have been normal.

*Building trades.*—Brick layers, masons, carpenters and joiners, lathers and plasterers have been well employed. Painters and decorators have had a busier month than in several years. Plumbers and gas fitters have had an average month. Stone cutters were not as busy as in August. Builders' labourers were active.

*Printing.*—Printers, pressmen and bookbinders had a busy month, with good prospects.

*Clothing.*—Tailors and garment-makers were well employed, with a bright outlook.

*Unskilled labour.*—Activity continued.

## AMHERST, N.S., AND DISTRICT.

*Mr. A. D. Ross, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during September.

All of the factories were kept well employed, and there was a steady demand for men. Female employees for the woolen mills were advertised for during the month. The building trades were particularly active. Many large brick and stone structures are being erected, among others the Bank of Nova Scotia building, the Rhodes-Fillmore block, the Royal Bank building and the Black-Lusly block.

During the summer months nearly all industries, employing in all over two thousand men, granted their employees Saturday afternoon as a half holiday. This arrangement was terminated on the first of September. The Amherst Boot & Shoe Company is enlarging its capacity and expects to employ about one hundred and fifty hands as soon as the construction of the new building is completed.

The outlook for a busy winter is exceedingly bright. The only unfavourable features are the strike at Springhill and the poor crops which threaten to enhance the price of coal and farm produce. In Amherst itself the relations between labour and capital have been harmonious.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The wet weather that has prevailed almost constantly for two months has proven a serious handicap to farmers. Thousands of tons of hay have yet to be gathered. The grain crop in many places is still uncut and potatoes are rotting in the soil.

*Lumbering.*—There has been a decline in the price of lumber and many of the smaller operators have intimated that they do not intend to cut this winter.

*Mining.*—A strike affecting about sixteen hundred men has prevailed in Springhill Mines for the past nine weeks. It is estimated that fully 800 men have already left Springhill to seek employment elsewhere. All the other mines have been working briskly and coal is commanding a high price.

*Building.*—Bricklayers and masons have had a busy month. Carpenters and joiners have also had a prosperous month; operations having been fairly brisk, at good wages.

*Metal, engineering and building trades.*—Iron moulders have had a busy month. Machinists and engineers have also been well employed.

*Woodworking and furnishing.*—Steady employment was furnished to all branches. Car builders especially had a busy month.

*Printing.*—Business was reported brisk in all lines.

*Clothing.*—Work was fairly active.

*Miscellaneous.*—A few barbers could find employment.

*Unskilled labour.*—There was a steady demand for unskilled labour during the summer months. As the building season closed the demand was not so active, but any thrown out of work readily found employment as farm labourers.

#### CHARLOTTETOWN, P. E. I., AND DISTRICT.

*Mr. F. J. Nash, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Considerable activity was manifest in all branches of labour during the month. Operations were somewhat retarded by the almost continuous rains, harvesting and shipping both being delayed. During the past two years, there have been built in this city, about forty new houses; several have been greatly improved; and the P. E. I. Railway Station, Prince of Wales College, St. Dunstan's Cathedral, Charlottetown Club House, have been finished. The P. E. I. Car Shops and Freight Buildings, an enlargement to Nicholson's Tobacco Factory, and a new Provincial Infirmary, are now under construction. These create a demand for labour, which up to the present has been met without difficulty, although some of the contractors complain that good carpenters are becoming scarce in this province. It has been decided to build a new Presbyterian Church here, and the work will be begun in the near future.

Wages now in force in Charlottetown are as follows:

First class machinists.....	\$1.75 to \$2.00 per day.
Moulders.....	2.50 "
Pattern Makers.....	2.25 "
Labourers.....	1.25 to 1.50 "
Wood-work machine operators	1.75 "
Sash and door workers..	1.75 to 2.00 "
Carpenters.....	1.25 to 1.75 "
Bricklayers.....	2.00 to 2.75 "
Masons.....	2.00 to 2.75 "
Plasterers.....	1.75 to 2.00 "
Stone Cutters.....	2.00 to 3.00 "

All work 10 hours a day.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Although the grain yield is one of the greatest in the history of this province, owing to almost incessant rains the harvest has been very backward. There is a great quantity cut and in stock, but much of it is not ready to put in the barn. As the weather has been cold also, the grain has not ripened,

and the season is at least three weeks later than usual. With fine weather, it is hoped that almost the entire crop will be safely harvested. Should this be realized, the year ought to be an exceptionally prosperous one for farmers.

*Fishing.*—This year oyster fishing does not begin until October. The government last session passed an act giving it power to lease river bottoms and bars, and many leases have been taken out.

#### CONDITION OF PARTICULAR TRADES.

In both town and country, building operations have been active, the public works in course of erection employing the labour that is generally devoted to the erection of private houses. The metal working, printing, clothing, food and tobacco preparation, leather, miscellaneous, transport, woodworking and furnishing trades, have all been doing well, and are looking forward to increased activities in the fall season.

There was a good demand for unskilled labour.

#### MONCTON, N. B., AND DISTRICT.

*Mr. J. C. Graves, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

September has shown a continuance of the active condition of the labour market, which prevailed throughout the summer. All local industries and enterprises have been in active operation, and the demand for labour, both skilled and unskilled, was considerably greater than the supply. Carpenters, painters, plumbers and printers particularly, have been much sought but the greatest dearth has been in the unskilled class. The new I. C. R. shops, together with the extensive building, sewer construction and double tracking operations in progress have absorbed large numbers, and employers claim that the supply is insufficient. This condition will last until the cold weather sets in.

Building operations are still being

extensively carried on, much civic work is being done and good progress has been made on the I. C. R. shops, four of the buildings being now roofed. It is expected that the entire group of buildings for the freight and passenger car plant will be ready for the machinery by the time winter sets in. Real estate sales have been active, and prices firm. Rents are high and houses scarce. Cost of living is increasing, many staple articles having advanced in price. Merchants report retail trade good, and that wholesale trade has shown considerable expansion during the season. The half-holiday system has not been in effect here, and no particular change in the hours of labour or in rates of wages have been noted. Relations between employers and employees have been harmonious.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have been handicapped by bad weather which has delayed work and seriously damaged the hay and grain crops. Much marsh hay remains to be cut, and but little grain is harvested. Grain is also injured by rust, and potatoes are rotting badly. Farm produce is exceptionally high for the season. Loose hay sells at \$13.00 to \$15.00 per ton. Oats and potatoes at 60c. per bushel. Butter 25c. to 27c. per lb. Eggs 24c. per doz. Farm help was reported scarce.

*Lumbering.*—Indications point to a smaller cut of logs the coming winter, and as a consequence lumbermen's wages are likely to decrease.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers were quiet, but carpenters and joiners were very active. Plasterers, painters and plumbers were busy, and builders' labourers much in demand.

*Metal, engineering and shipbuilding.*—These crafts reported an active month.

*Woodworking and furnish ng.*—Employees were active. Operatives of the woodworking factories, and car shop hands being especially busy.

*Printing.*—These crafts were very active, newspaper and job hands being particularly busy.

*Clothing.*—Conditions were good.

*Food and tobacco preparation.*—Busy conditions prevailed.

*Leather trades.*—Quietness prevailed.

*Miscellaneous.*—Barbers were busy, with clerks and stenographers in good demand. Hotel, restaurant and theatre employees were very active. Laundry workers were busy.

*Transport.*—Tourist traffic was heavy, and much freight was moving. Railroad crews all had an active month. Trackmen were active, and carters, teamsters and express men very busy.

*Unskilled labour.*—The demand for this class was in excess of the supply and will continue so until cold weather.

## CHATHAM, N. B., AND DISTRICT.

*Mr. T. DesBrisay, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour during September was light, though wages have been maintained. This has been a quiet season, for labourers with the exception of mill hands. There have been no changes in rates of wages, and no strikes or lockouts.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers reported good crops, although the season has been very wet. The hay was nearly all saved. Potatoes are a good crop.

*Lumbering.*—The men have not yet started for the woods.

*Fishing.*—Fishing has been active during the past season. Lobsters were caught in great numbers, and are now at the highest price ever known here.

Active employment prevailed in the different skilled trades.

## ST. JOHN, N. B., AND DISTRICT.

*Mr. W. H. Coates, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active during September, and unskilled labour

was in great demand. A party of about 100 Italians arrived from Boston and left for Campbellton to work on the Inter-colonial railway. Ten masons who were working on the new building for the Royal Bank of Canada were reported for working in the city, not being ratepayers. The license fee for non-ratepayers is \$7.50; rather than pay this amount, the men returned to Boston. Work is progressing on the new Y. M. C. A. building, the new Salvation Army barracks, the cold storage building, and one or two private residences. Bank clearings for the five weeks ending September 26 were \$6,564,641, and for the corresponding period last year, \$6,195,716, being \$368,925 greater in 1907 than in 1906, and \$246,843 less than for the five weeks ending August 22 of the current year. The price of flour continued to go up, and bakers have decided to raise the price of all cakes and pies one cent a pound or dozen. Within the last five months, there has been a total advance of \$1.15 per barrel on both Manitoba and Ontario flour. All mill feed, including bran, shorts, middlings, etc., has advanced from \$2 to \$3 per ton. Oatmeal has also advanced from 50 to 60 cents per barrel.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The continued heavy rain fall has done damage to crops. The best of the hay crop has been housed in good condition, but a large quantity is still standing and may not be cut at all. Potatoes are suffering.

*Lumbering.*—The boomage sheet up to the 1st of September showed that at the Mitchell and Douglas booms and at Springhill, 117,338,462 superficial feet were rafted. Last year the amount was 106,194,279 superficial feet. At both booms and Springhill, 51,755 joints, containing 1,559,146 pieces, were handled up to September 1. The quantity rafted at the booms was 107,704,681 feet.

*Mining.*—Arrangements have been made with a large concern to start development work at once, at the Leireau iron mines. Upwards of \$200,000 will be spent.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons

were very busy. Carpenters and joiners were busy. Painters and plumbers were active. Builders' labourers were busy.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers were active. Machinists and steam engineers were busy. Electrical workers and linemen were very busy. Blacksmiths and horseshoers were active, with boilermakers and sheet metal workers busy.

*Woodworking and furnishing.*—Woodworkers and shingle weavers were busy.

*Printing.*—Printers, pressmen and book binders were busy.

*Food and tobacco preparation.*—Bakers and confectioners were busy. Cigar-makers were active.

*Leather.*—Tanners and curriers were very busy.

*Miscellaneous.*—Brush and broom-makers were busy.

*Transport.*—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen and freight handlers were very busy. Steamboatmen and firemen were busy. Ship labourers, teamsters and expressmen were active. Street railway employees were very busy, and hackmen active.

*Unskilled labour* was very busy.

#### DISTRICT NOTES.

*Fredericton.*—The sale of sheep imported by the government from Ontario took place September 18. Eighteen Leicester and 21 Cotswold sheep were sold. The 39 animals brought \$682, making an average of about \$17.41.

#### QUEBEC, QUE., AND DISTRICT.

*Messrs. P. J. Jobin and E. Little, correspondents,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during September, though considerable time was lost as a result of wet weather. Building was chiefly confined to repairs. Tourist traffic was well maintained, but

showed a falling off during the second half of the month. Freight traffic increased in volume. There were no strikes or lockouts during September.

The contract for the building of a breakwater at Limoilou has been awarded. The contractors for the extension of the breakwater at the mouth of the St. Charles river are making rapid progress, and expect to have all the concrete blocks in position by the 1st of November.

The Church Society of the Diocese of Quebec appointed the Rev. E. A. W. King to take charge of the immigration work which has been undertaken, a preliminary grant of \$200 being made. The immigration of persons of a desirable class will be encouraged, to be placed largely in the Eastern Townships, where the demand for farm labourers, domestic servants, etc., is pressing.

The Quebec and Levis Ferry Company is busily preparing and improving its steamers for the winter service. The company is expending over \$20,000 in alterations and improvements on the steamers. The number of men regularly employed by the company is 120, but at present about 150 are at work.

The Canadian Pacific Ry. Co. has started the demolition of the properties acquired for the enlargement of the Chateau Frontenac; the work is being carried on night and day, the design being to have this building completed for the tourist season of 1908. The building is to be of greater dimensions than the Chateau Frontenac.

Contracts have been let by the School Commissioners for a new convent in Jacques Cartier parish (\$55,000); for a new five-storey boys' school in St. Roch's parish (\$85,000); for a new wing to the boys' school in St. Jean Baptiste parish (\$18,000); and for a new wing to the girls' school in St. Jean Baptiste parish (\$20,000).

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy harvesting, though some delay was caused by rain and lack of help. Apart from these circumstances, conditions were favourable.

*Lumbering.*—The large mills were still running, the supply of logs being for the most part sufficient to last until the frost comes. There was a demand for men for the woods.

#### CONDITION OF PARTICULAR TRADES.

The *building trades* were active, with several of the branches busy. The *metal, leather, food and tobacco preparation* and *transport* branches were active. *Printers* and *bookbinders* were very busy, but *boot and shoe workers* were quiet. *Unskilled labour* was busy; about five days' time was lost by this class through rain.

### SHERBROOKE, QUE., AND DISTRICT.

*Mr. Henry Logie, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was very well employed during the month, with a good demand for all classes of skilled as well as unskilled workmen. There was a steady demand for machinists, and several of this class have lately arrived from Great Britain. Work has been commenced on the new shops of the Fairbanks Co., of St. Johnsbury, and on the new Y. M. C. A. building. The contract has been let to Messrs. Simoneau Dion for the new drill shed. At the Jenckes machine shops and Canadian Rand Drill factory, the orders are so heavy as to require night gangs. The wholesale and retail trades were very busy. The Dominion exhibition was held from the 2nd September to the 14th. It was well attended, but the weather was bad throughout. The first labour parade witnessed in Sherbrooke took place on Labour Day, September 2nd. The special light committee of the city council has engaged Messrs. Ross Holgate of Montreal to prepare plans for a dam and electric power plant at Westbury. Work on the crib work of the dam will be commenced this fall, so as to be ready for the general work in the spring. The city made a final offer

to the Sherbrooke Power, Light Heat Co. of \$260,000, but the company would accept nothing less than \$270,000.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Harvesting was three weeks later than last year, owing to the unsettled weather. The crop is not so good as was anticipated earlier in the season. There was a great scarcity of help, which retarded work considerably. The potato crop is only fair, and some are complaining of rot due to the heavy rains.

*Lumbering.*—Considerable work was done in the lumber camps getting out pulpwood. Men are already being engaged to go into the camps next month.

*Manufacturing.*—All manufacturing industries were running full time, with plenty of orders ahead. The Paton mill is exceptionally busy, as was also the Moore Carpet Co., both concerns advertising for help.

*Mining.*—A number of capitalists were in Sherbrooke looking over the ground with the view of erecting a smelter in East Hatley to deal with the copper ore from some new properties that have been opened up there. The asbestos mines were running to the limit, and more men would be engaged if they were obtainable.

*Railroad construction and employment.*—Work on the extension of the Quebec Central to St. Joseph gave employment to about 200 men. The usual staff of trackmen on the C. P. R. and Q. C. R. lines have been augmented. The men are engaged in repairing the track at various points.

#### CONDITION OF PARTICULAR TRADES.

The *building, woodworking, food and tobacco preparation and transport* branches were busy. The *metal, printing, clothing and miscellaneous* trades were very busy. *Unskilled labour* was very busy.

### ST. HYACINTHE, QUE., AND DISTRICT.

*Mr. V. Phaneuf, correspondent* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

During September activity in the labour market was well maintained, al-

though the building trades were dull. Sash and door factories were very busy. In the boot and shoe factories the month was somewhat quieter than the corresponding month of last year. One of the factories was closed for some days, stock taking. The Penman Manufacturing Company and the Duclos - Payen tannery were very active. The organ factory had to work overtime to keep up with orders. The boiler and engine works had a busy month. Civic labourers were very busy, with promise of further work, the corporation having voted the necessary money for the continuation of the main sewer. All other manufacturing establishments were very busy. A new company has been formed for the purpose of furnishing water to neighbouring municipalities, and of purchasing the rights and privileges of two other companies supplying water at present. The new company has been incorporated under the name of the Waterworks Company of the suburbs of St. Hyacinthe and has a capital of \$30,000 divided into 300 shares of \$100 each. Wholesale and retail trade was busy. The banks reported collections easy. There were no changes in wages and hours, and cordial relations existed between employers and employees.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Conditions were very favourable. Fruit was plentiful and good prices were received. The county exhibition took place on September 12, and was a success both as regards attendance and exhibits.

*Manufacturing.*—This industry was very active, full staffs being employed.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—These trades had a dull month.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers, engineers and machinists were very active. Blacksmiths, boilermakers and horseshoers were very busy. Electrical workers were fairly busy.

*Woodworking and furnishing.*—Activity prevailed in these trades, all hands working continuously.

*Printing.*—These crafts reported satisfactory conditions.

*Clothing.*—Tailors were very busy, but quietness was reported among boot and shoe workers.

*Food and tobacco preparation.*—Bakers, confectioners and butchers were active. Tobacco workers had a good month.

*Leather.*—These trades had a very active month.

*Miscellaneous.*—Railway employees were active. All cheese made in this district is shipped by rail. Cab drivers, teamsters and expressmen were very busy.

*Unskilled labour.*—Was in good demand at good wages.

#### DISTRICT NOTES.

*Sorel.*—The greatest activity prevailed in the St. Joseph dockyard where 600 men are employed. The construction of a steel pier 108 feet in length was commenced. The berths are being prepared for two new steel steamers, one of them to be used for inspection purposes in the river channel, and the other for service on Lake Ontario. These vessels will be completed during the winter and launched next spring. A large gang of men were finishing dredge No. 8. This is the largest vessel yet constructed in any Canadian dockyard, measuring 264 feet in length, 40 feet in width, with a tonnage of about 3,200 tons. It will be finished in a couple of weeks and will go immediately into commission. More than 3,600,000 pounds of steel were used in its construction and the cost will be about \$400,000. The engines and machinery were tested and found to work satisfactorily.

*St. Johns.*—The Federal Government will soon begin important improvements on the Richelieu River. The work is being done to protect farmers on the upper reaches of the river, whose farms are flooded every year.

#### THREE RIVERS, QUE., AND DISTRICT.

*Mr. Joseph J. Ryan, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was marked activity in all branches of employment during Sep-

tember. Factories were working full time. The Natural Oil Gas Company had a number of men employed laying pipes. A number of masons and bricklayers were employed on the new cotton factory. The establishment of this industry has caused an increase in the price of real estate in the neighbouring portion of the city. A number of men have been employed laying water pipes for the city and macadamizing several streets. A scarcity of cars was complained of by manufacturers and contractors. Harmony prevailed between employers and employees.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy harvesting, having been delayed by rain.

*Manufacturing.*—Manufacturers were busy, working full time. Additional employees would be put on if cars for the shipment of goods could be obtained.

*Railway construction.*—Work on the Transcontinental and Great Northern railways was being rushed. Additional men are required by the contractors.

*Lumbering.*—The mills were running full time, with the supply of logs greater than they will be able to cut before the close of the season.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons and carpenters had all they could do at wages higher than in any previous year. Painters, plumbers and gasfitters were equally busy.

*Metal, engineering and shipbuilding.*—Iron moulders, iron workers and helpers were busy.

*Printing.*—Conditions were favourable, but not so busy as in certain other lines.

The *clothing trades* were very busy, and the *food and tobacco, leather and miscellaneous trades* were busy. *Transport* employees had more work than they could handle.

*Unskilled labour.*—Men were scarce and in active demand. Wages were from \$1.50 to \$1.75 per day of 10 hours.

#### MAISONNEUVE, QUE., AND DISTRICT.

*Mr. E. Peletier, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been well employed during September, being more active than in the previous month. Owing to the large amount of buildings going up, including factories, dwellings, stores, etc., the demand for labour in the building trades has been very brisk, and will be to the end of the year. The other trades were not so well employed. Commercial activity has increased in this month, autumn sales being very satisfactory. No change has been made in rates of wages or hours of labour, and the labour market has been free from unrest.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The Ames-Holden Co., is having an extensive factory built. Bricklayers and masons were busy. Carpenters, joiners, lathers and plasterers have been well employed, but painters and decorators were somewhat slack. Among plumbers, gas and steam fitters and stone cutters activity prevailed. Builders' labourers were active.

*Metal, engineering and shipbuilding.*—All iron workers and helpers, machinists were busy. Electrical workers were very active. Some firms having to work overtime. Sheet metal workers were busy.

*Woodworking and furnishing.*—These trades have been very active, more so than last month, fancy and furniture being in great demands. Carriage and wagon makers and car builders reported activity prevailing.

*Printing.*—Activity prevailed.

*Clothing.*—These trades owing to partial settlement of the garment workers' strike have regained some activity. Boot and shoe workers were active.

*Food and tobacco preparation.*—Activity prevailed.

*Leather.*—Leather workers were active.

*Transport.*—Transportation has been

very active, longshoremen working night and day.

*Unskilled labour.*—The demand for unskilled labour has decreased.

## MONTREAL, QUE., AND DISTRICT.

*Mr. Gustave Audet, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

During the month of September, three increases in the price of the necessities of life have taken place. Bread has increased two cents per loaf, milk three cents per quart on August prices and coal merchants have raised the price of coal from \$6.75 cash or \$7.00 on credit per ton to \$7.00 cash or \$7.25 on credit. It was stated that the cause of the last increase was that mine owners had increased the price. This price will probably be maintained during the winter. With regard to milk, on September 1, in 1906, the price rose from six to eight cents per quart or 25 per cent. This year the summer price was advanced to seven cents per quart, an increase of one cent per quart over 1906, and ten cents per quart will be charged after October 1 and until next May.

Since September 2, the price of the six pound loaf of bread has increased two cents. This increase was decided upon at a meeting held by the master bakers, the reason given being the raise in the price of flour during the past six months. The master bakers further stated that with the increased price they do not make a fair profit owing to the higher price of help, horses, delivery wagons and oats. The increase of two cents per loaf gives the baker about 85 cents more per barrel of flour used.

During August, 119 permits were issued for new buildings, representing a value of \$411,925.00. Of these, 66 were for dwellings, 2 for warehouses, 2 for churches, 1 for an office building, 6 for stables and 18 for sheds. Permits for repairs during the month amounted to \$96,630, making a total of \$507,555 for the month.

Owing to wet weather in September building was less active, but as the buildings were in a great number of places nearing completion inside work was active. Bricklayers and masons owing to unfavourable weather lost considerable time during the month.

### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Notwithstanding unfavourable weather conditions, farmers were well satisfied, fruit and vegetables selling for 25 per cent. more than last year.

*Manufacturing.*—Boot and shoe workers were quiet,

### CONDITION OF PARTICULAR TRADES.

*Building.*—Painters were busy; the other branches were active.

*Metal, engineering and shipbuilding.*—Steam engineers, shipbuilders, shipwrights and caulkers were active. Other branches were busy.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers were active, carriage and wagon makers, etc. were busy.

*Printing and allied trades.*—Activity prevailed.

*Clothing.*—With the exception of boot and shoe workers, very busy conditions were reported.

*Food and tobacco preparation.*—Cigar-makers and tobacco workers were dull. Other branches were active.

*Leather.*—This group had an active month.

*Miscellaneous.*—Very active conditions were reported.

*Transport.*—Steamboat men, ship labourers, street railway employees, teamsters and expressmen were active; cab drivers and hackmen were busy.

*Unskilled labour.*—The supply exceeded the demand.

## HULL, QUE., AND DISTRICT.

*Mr. Rodolphe Laferrière, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The market of labour continued very busy during September. There was still

a scarcity of hands, and wages were on a higher level than ever previously reported. A number of branches of industry were unable to obtain a requisite supply of labour.

Payments of notes, mortgages etc., on St. Michael's day, the usual date on which arrangements of this nature are concluded during the half year were exceptionally well met. Money was apparently plentiful among the farmers, the unusually high price prevailing for farm produce having a tendency to make up for the falling off in the yield. Manufacturing was active, notwithstanding that some loss of time was caused by lack of water at the Chaudière. The difficulty has in part been met by an arrangement between the different mills by which operations are conducted by some by day and others by night. At the works of the Eddy Company there has been no cessation of employment among the 2,000 workpeople. The match shop of this concern as enlarged will produce 80,000,000 matches per day and employ 400 girls, about 150 more than heretofore. The cement company is expending about \$100,000 in extensions which will have the effect of about doubling the present capacity of 1,900 barrels per day. The Woods Limited factory is nearing completion; it will employ upwards of 200 hands mostly girls.

Common labour was being hired at \$2.00 per day for work in the mines throughout the county. Coal carters and wood sawyers were very scarce and dealers in some cases were unable to make deliveries on this account. Wood sawyers who were paid 75 cents per cord last year received \$1.00 this year. Fire wood has accordingly increased in price; maple, sawn and delivered, now costs \$7.00 per cord, an increase of 75 cents over last year. Hay has been selling at \$22 per ton and oats at 50 cents per bushel. Teamsters and other workers in fuel yards have obtained an increase of 15 cents per day. Rents throughout the city have increased 25 per cent. Farm produce has advanced from 25 to 35 per cent. A workingman's house which rented at \$8.00 in the spring now

commands \$10 to \$12, though the prevailing rates are in the neighbourhood of \$10 per month.

The building trades have been very active, with painters scarce. The Bank of Montreal building has made good progress.

The Canadian Pacific Railway Company has about 30 men employed filling in its trestle to the east of the city. Extensive expropriations have been made in this vicinity.

The erection of a large dwelling at Meech's Lake, to cost \$100,000 created a demand for labour at high wages in vicinity. For teamsters \$1.75 to \$2.00 is being paid while the rate for teamsters and horses is \$3.00 per day. A market is also being created for cordwood, lumber, etc.

A by-law will be submitted to the ratepayers on October 2 to authorize a loan of \$68,000 for improvements to the waterworks system, the erection of two new fire stations and the purchase of a steam fire engine and supplies. Several lime kilns will be erected by Mr. H. Dupuis who will employ, including teamsters, about one dozen men.

The Bank of Ottawa opened a branch on Bridge street.

#### OTTAWA, ONT., AND DISTRICT.

*Mr. Gilchrist, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOR MARKET.

The hiring of shanty men was the leading feature of the labour market in September. Employment agents received orders from many out side companies for men, and many large crews were sent away. Ottawa is a centre of employment for farmers' sons and labourers from small towns in a large portion of Ontario and Quebec. Toward the end of the month, \$40 was paid for some expert hands of this class, wages ranging generally between this and \$35. Building labour was actively employed and there is prospect of continued briskness in this line. The stonecutters

asked the city council to provide if possible that the Grand Trunk Railway Company have the store required for its new central station and hotel dressed in the city. The matter is still under consideration.

Unrest prevailed in Almonte as the result of a strike of five warpers in the Rosamond Woolen Mills on September 13. Two hundred other employees were thrown out of work. The disagreement arose out of the demand of the warpers for two dollars per day. Three of them had been receiving \$1.75 and two \$1.65.

Two substantial increases took place in the cost of living in Ottawa during September. Bread advanced to 12 cents a loaf on September 24, being an increase of one cent. On June 5 the price had been raised from 10 to 11 cents. The master bakers who made the new rate give as a reason that flour has increased \$1.20 per barrel since the first of May. The price of milk rose to seven cents about the middle of the month. The same rate went into effect last year about a week later. Dairymen assert that an eight cent rate will probably come into effect before the season is over. The high prices of fodder and the poor state of pasture during part of the summer were the reasons given for the advance.

The Ottawa Board of Trade on Sept. 11 discussed a resolution moved by Sir Sandford Fleming in favor of the nationalization of the telegraph service of Canada and the establishment of a state Atlantic cable both to be under government control, with a view to uniform and cheaper tolls throughout Canada.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—High prices ruled for all lines of farm produce. Hay brought \$22 per ton, oats 50 cents per bushel, pork \$9 per cwt, beef \$7 per cwt., eggs 25 cents per dozen and butter 30 cents per pound. These prices have been reached by steady advances. Market gardeners are very busy, sales being at prices somewhat better than last year.

*Lumbering.*—It is estimated that the increase in the price of labour and ad-

vanced cost of supplies will make operations 25 per cent dearer than last year. On this account most manufacturers are curtailing work in the woods. There are so many logs in the rivers that the mills of the Ottawa Valley will be able to cut as usual next summer. Shipping was active and lumbermen reported a marked scarcity of cars.

*Railroad construction.*—The Ottawa Electric Company was given permission by the city council to build a line to the Experimental Farm and another line on Mutchmor street. Heavy steel rails have been ordered for both these extensions.

#### CONDITION OF PARTICULAR TRADES.

*Printing.*—The allied trades were very busy.

*Clothing.*—Garment workers reported the usual quantity of autumn trade.

*Food and tobacco preparation.*—The presence of several thousand of visitors to the Central Canada Fair created unusual activity with bakers, confectioners and butchers.

*Miscellaneous.*—Male stenographers were scarce.

*Transport.*—Freight and passenger handlers had a busy month owing to the fair. Transportation on the Rideau Canal is affected by low water. Some boats have been taken out of commission much earlier than in other years.

#### KINGSTON, ONT., AND DISTRICT.

*Mr. William Kelly, correspondent, reports as follows:*—

#### THE GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in the condition of the labour market during September as compared with the previous month and the corresponding period last year. All branches of building, transportation, manufacturing, etc., continued to be actively employed. A number of new residences were completed and some were started. Two new places of amusement were fitted up and opened during the month. A military board took over

the Artillery Park barracks, which has been recently renovated. Fifty new concrete walks have been laid. There are twenty-one more on the list. It is not likely that all the walks on the schedule will be laid this fall, as work will cease about November 18th. On account of the drought there was very little interruption to the work during the summer. The local tax-collector reports collections about \$3,000 ahead of this time last year. The board of works commenced operations on many of the city streets looking to their improvement. Real estate agents report a great demand for all classes of houses. The re-opening of the schools has made the demand for houses heavy. There was in the summer a large demand for houses of the smaller kind. The assessment rolls show that Kingston's population had materially increased during the year 1907. It is estimated that about 700,000 or 800,000 picture post cards were sold in the city this year. On the 16th of September a committee representing the local union of the Journeymen Tailors' International Union of America, presented the merchant tailors with a new bill of prices which involved an average increase of about fifteen per cent. After negotiations a joint meeting of the committees representing both parties was arranged for. Before proceeding to a consideration of the new bill the employers produced a signed document declaring that hereafter their workrooms would be open shops, and that they would reserve the right to employ whom they pleased. As a result members of the union including about twenty-five men and fifty women, refused to return to work on Monday September 23rd. Seven tailoring establishments are involved. The union has been in existence about five years. No other strikes or lock-outs were reported during the month. There were no changes in rates of wages or hours of labour. Dry goods stores, boot and shoe stores etc., that closed at five p.m. during July and August, now remain open until 6 p. m., Saturday excepted, beginning September 18th.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were active.

A number of agricultural fairs were held in this district. In point of attendance and exhibits they were superior to last year. The late crops were turning out well.

*Fishing.*—This industry was dull.

*Lumbering.*—Operations were quiet.

*Manufacturing.*—Conditions were active.

*Mining.*—Was more active than last month.

*Railroad construction.*—Continued active.

#### CONDITION OF PARTICULAR TRADES.

All branches of the building, metal, engineering, woodworking and furnishing trades continued active. Printers, bakers, cigarmakers, tanners and curriers, barbers, broom makers, clerks, furriers, hotel and restaurant and laundry employees were actively employed. All branches of transportation and unskilled labour were active.

#### BELLEVILLE, ONT., AND DISTRICT.

*Mr. H. C. MacDiarmid, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during September were very active in nearly all branches. There were no workmen necessarily idle, and the wages paid were satisfactory. The iron and cement industries gave employment to large numbers of both skilled and unskilled labour; the latter was somewhat scarce, and not equal to the demand. The various industries were active, and in some overtime was worked. The Belleville Toronto Rolling Mills Company was running its plant night and day, with large staffs employed, the number being increased during the month. This company is turning out large quantities of horseshoes and bar iron for export. The Belleville Cement Company, and the Lehigh Cement Company experienced difficulty in securing sufficient unskilled labourers. A number of unskilled workmen were brought

from Toronto, Montreal and other points, but the supply is still inadequate. Nearly 400 workmen are employed at each of the cement plants. Many stone masons, bricklayers, carpenters and labourers were employed on the construction of the new drill hall, and many were busily employed in the erection of a new brass foundry, which was rapidly nearing completion. Marsh Henthornes, the Belleville Hardware Company, the Walker's foundry and Machine Company were rushed with work during the entire month. The new Standard Bank premises, which gave employment to many skilled workmen, were finished. Both wholesale and retail merchants reported an active month in consequence of the high prices received by farmers for their produce. There were no changes reported in rates of wages or hours of labour. A slight difficulty existed for a few days between the Belleville Hardware Company and its brass moulders, but it was amicably settled.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Hay was very scarce, with prices higher than for many years. Grain was a fair yield but the straw was short. Considerable ploughing was done.

*Fishing.*—There was little activity, though some rough fish were caught during the month.

*Lumbering.*—This industry was somewhat inactive in this district.

*Manufacturing.*—All industrial establishments reported active conditions.

*Railroad construction and employment.*—Railroad construction was active. The new extension of the Central Ontario Railway was completed from Bancroft to Maynooth, and trains commenced running this month.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Every branch reported an active month, with scarcity of help in many cases.

*Metal, engineering and shipbuilding.*—Iron moulders, helpers, machinists and engineers, electrical workers and line-

men had an active month. Brass moulders and brass workers were all busily employed, as were boilermakers, blacksmiths, bicycle workers and horseshoers. Shipbuilders had a dull month.

*Woodworking.*—Nearly all the branches reported an active month's work. Coopers were mainly employed in making cheese boxes and apple barrels. Car builders at Deseronto, were busy.

*Printing.*—Printers, both in job and newspaper offices, as well as pressmen and bookbinders, were busy on printed matter for the fall fairs.

*Clothing.*—Journeymen tailors had active employment.

*Food and tobacco preparation.*—Conditions were the best for September in many years.

*Leather.*—Harness makers and saddlers were busy.

*Miscellaneous.*—Barbers, stenographers, clerks, delivery employees, hotel, restaurant and laundry workers were active. Furriers were busy on the fall trade.

*Transport.*—Railway employees and steamboat men had an exceptionally active month, both passenger and freight traffic being heavy. Sailing vessels had a dull month compared with other years, although conditions began to improve towards the end of the month. Cabmen, hackmen and carters were active, but longshoremen were somewhat inactive.

*Unskilled.*—This class was in demand at higher wages than in many years.

#### PETERBOROUGH, ONT., AND DISTRICT.

Mr. W. J. Johnston, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour during September, was well employed, especially towards the latter part of the month. Outside work is being rapidly completed before cold weather sets in. Some work has been laid over until next spring on account of the lateness of the season. A \$12,000 surgical ward was being added to St.

Joseph's hospital. A large bakery was under way, and the staff of bakers will be increased to meet increasing trade. A large force of men was employed repairing the Auburn dam. The Sandstone and Lime Brick Company was very busy. It received an order for 1,000,000 brick to be used in the construction of the new armouries. A contract for the large power house and dam at Campbellford, Ont., to cost about \$60,000, was secured by a Peterborough firm. Extensive repairs were being made to the spur line bridge on the Canadian Pacific railway line, and a large number of men were employed. The Machine Telephone Company was installing its plant in Lindsay; 16 carloads of poles had arrived, and a large staff of men were employed. Large shipments of merchandise for the fall trade were made. Wholesale and retail trade was good. The labour market was free from unrest. The harvesting of wild rice by the Indians at Rice Lake was under way; a good crop was reported. A contract for section five, of the canal at Campbellford has been awarded and the work started. The amount of the contract was \$600,000 for a three-mile section, and with two years in which to complete it. The nine oldest street railway employees have received an increase of one cent per hour. After having served three years for the company, wages will in future be 17 cents per hour. A horseshoe, called the Diamond calk horseshoe, has been patented by Mr. G. H. P. Kennedy, of Peterborough. A company has been formed with a capital of \$100,000 to manufacture the shoe and place it on the market.

Steamboats were busy towing 100 tons of stone from Stoney Lake, to be used in the construction of the new Catholic church, also freighting 700 cords of wood from the north country. Six miles of new gas mains have been laid this year. The gas company has sold 250 new stoves. Postal delivery started in Peterborough on September 28. This will give employment to seven men, the city having been divided into seven districts. Parker's large laundry works were badly damaged by fire; loss \$5,000. The work of reconstruction had begun.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—The farmers were very busy harvesting, threshing and preparing for fall ploughing. The Lindsay cheese board sold 1,203 boxes at 12 1-16 cents per pound, and earlier in the month sold 1,396 boxes at 11½ cents per pound. New hay was selling at \$16 to \$17 per ton. The Peterborough cheese board sold 4,612 boxes at 12 3-16 cents per pound.

*Lumbering.*—Lumbering operations had begun in the camps and large numbers of men were employed. The Peterborough Lumber Company received 4,000 000 feet of logs. This made 8,000,000 feet altogether that this company brought to its mills this season. The saw mills were very busy.

*Manufacturing.*—The Quaker Oats Co. was very busy, having added new equipment to handle its growing trade. The G. W. Green foundry works have been very busy, as have also the J. J. Turner Company, the different canoe factories, the carpet works, the cordage factory, the cereal factory, the flour mills and other industries.

*Railroad construction.*—The Grand Trunk Railway Company has completed a siding, 2,400 feet in length, between Peterborough and Omeme, to facilitate work on the heavy grades at that place. Section labour and other repair work were being carried on on the different railway lines in the district.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, lathers, plasterers, gas and steamfitters and builders' labourers were active. The remaining branches were busy.

*Metal.*—Activity prevailed.

*Woodworking and varnishing.*—Car-builders and pattern makers were active; the other branches were busy.

*Printing.*—The different crafts were well employed.

*Clothing.*—Tailors and garment workers were active. Hat makers, boot and shoe workers were busy.

*Food and tobacco preparation.*—Cigar makers were active; butchers, confectioners, etc., were busy.

*Leather.*—Leather workers and collar makers were very busy.

*Miscellaneous.*—Furriers were active. Hotel, restaurant and theatre and laundry workers were very busy. The other branches were busy.

*Transport.*—All trades were very busy, passenger and freight traffic being heavy.

*Unskilled labour.*—Active conditions prevailed.

#### DISTRICT NOTES.

*Oshawa.*—The McLaughlin carriage and automobile factory was completed. This is a new industry and will employ additional men.

*Lakefield.*—The cement works were very busy.

#### TORONTO, ONT., AND DISTRICT.

*Mr. Phillips Thompson, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during September was quiet as compared with the earlier months of the season, with a large number of men out of work. This was largely due to the prevailing stingency in the money market, causing a general slackening of operations and the postponement of contemplated undertakings. The surplus immigration of classes who cannot find permanent employment was also a prominent factor. Building operations which were very active during the spring and summer, have shown a marked falling off of late.

The continuance of the machinists and plumbers' strikes has also had a depressing tendency. With the close also of the busy season in the country, many who have obtained temporary work with farmers naturally seek employment in Toronto.

The assessment for Ward 4 for 1908, shows a substantial increase as compared with the revised assessment for 1907. The total is \$37,585,500, being an increase of \$2,571,939. Land values are assessed at \$13,914,589, as

compared with \$13,177, 998, and buildings at \$20,305,693 as against \$18,965, 713. The population of the ward was given at 58,640, an increase of 2,541.

The receipts of the Toronto Street Railway Company for August were \$327,353 as compared with \$291,803 for August, 1906. The city's percentage was \$65,470, as against \$43,770, for August, 1906.

On September 14th, the electors by a vote of 1014 for, to 210 against, ratified a by-law to raise \$742,942 for water works extensions, including two new pump ing engines and the laying of larger mains. A number of men were put to work on the 12-inch main on Queen St. East.

The Toronto Ferry Co. intends to erect a double deck dock at the foot of Bay St. to replace that recently burned, and has ordered another large ferry steamer to accommodate over 2,500 passengers.

The annual report of the city engineer gives the population of Toronto, as 295,000. There are 277 miles of streets of which 197 are paved. There are 63 miles of asphalt pavement, 40 miles of cedar block, 18 miles of brick and 54 miles of macadam, in addition to several miles of scoria block, gravel, etc. There are over 227 miles of concrete side-walks and 205 miles of wood sidewalks. The water works system has cost \$4,000,000. The revenue from waterworks in 1906 was \$502,210, and the expenses, including \$70,195 for pipe-laying and renewals, \$517,438.

Building permits for August were issued to the approximate value of \$1,201,410, as compared with \$1,271,620 in August, 1906.

Messrs. Haney & Miller, contractors for the tunnel which is being put down under the Bay in connection with the waterworks system, have been forced to abandon work with the boring machine and resort to the usual method of drilling and blasting.

The asphalt plant operated by the city with a capacity of 1,500 square yards a day has been started at work.

The 20-oz. loaf of bread is now largely sold instead of that of 24-oz., the weight being stamped on each loaf as provided by law. The price charged is 5c. which

is equivalent to an increase in the price of the 24-oz., loaf to 6c., owing to the increased cost of flour, and the higher wages now paid.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Owing to the lateness of the season the farmers have been unusually busy. A good deal of threshing was done during September, farmers being desirous to market their grain owing to the good price obtainable. The open weather prevailing during the greater part of the month was favorable to fall plowing. Pasturage had not been as good as usual, and the flow of milk was poor. There will be a shortage of feed for stock during the winter. The Toronto Milk Producers Association, at a largely attended meeting on the 14th, passed a resolution fixing \$1.60 per 8-gallon can as the price of milk during the winter months, and \$1.30 as the price for the summer months. An increase in the price to the consumer is expected.

*Manufacturing.*—Manufacturers in some lines have not been so busy as earlier in the season. Orders have latterly been somewhat slack, but in most cases activity has been maintained owing to the amount of orders on hand to be filled. The difficulty of obtaining capital, coupled with uncertain crop reports from the West tended to check expansion.

The Laidlaw-Watson Shoe Co., of Aylmer, is removing to Toronto, and is putting up a factory to cost \$12,000.

The Rudd Paper Box Co. has established a large factory.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Many carpenters, bricklayers and builders' labourers were out of work owing to the noticeable lackening of activity.

*Metal, Engineering and shipbuilding.*—Blacksmiths, boilermakers, electrical workers, structural steel workers and sheet metal workers were generally well employed. The machinists found trade unsettled on account of the strike. Brass-workers, silversmiths and jewellers were busy.

*Wood working and furnishing.*—Furniture workers, cabinet makers and upholsterers were busy. Wood working machinists were slack. Coopers, carriage and wagon workers, had a fair month. Pattern makers reported some men out of work.

*Printing.*—Printers, bookbinders and allied trades were fairly well employed.

*Clothing.*—Journeymen tailors were active, garment workers found trade slack, as usual, between seasons. Boot and shoe workers were quiet. Hat and cap workers and furriers were generally well employed.

*Food and tobacco preparation.*—These trades were generally active. The maltsters have obtained an increase of wages from \$11.50 to \$12.50 per week.

*Leather.*—Leather workers had a good month.

*Miscellaneous.*—Hotel and restaurant employees, barbers and laundry workers were busy. Clerks, salesmen, warehousemen and porters were in excess of the demand.

*Transport.*—Sailors and longshoremen were well employed. Railway and street railway men, teamsters and expressmen had a busy month.

*Unskilled Labour.*—Many unskilled labourers, especially recent arrivals, were unable to obtain employment.

#### NIAGARA FALLS, ONT., AND DISTRICT.

*Mr. Ernest Green, correspondent.* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

September was quiet, but was satisfactory in most respects. A threatened slackness in some lines of employment was relieved towards the end of the month, and at the close the outlook was very good. A large metal-working concern signed an agreement with the city to erect a factory here to employ seventy-five hands at the start, and let the contract for a three-story brick building 60x175 feet in size. The contract was also let for the erection of a

large fruit and vegetable cannery. A plant for the electric smelting and refining of iron is being built. Experiments made here and elsewhere have proved the practicability of the new process and further researches are to be carried on in the new works. Machinery was being installed in the carpet sweeper and carriage mountings factories, and the new nut and bolt factory was running over-time.

Sewer and sidewalk building still employed many men.

Railway and lake traffic was heavy and business generally very good, despite unfavorable financial conditions.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Gathering the fruit crops afforded the chief employment. Plums, grapes and pears were very plentiful other fruits were light and high-priced.

*Manufacturing.*—All factories were busy. The Dominion Suspender Company advertised for ten, and the Niagara Neckwear Company for twenty-five female operatives. The nut and bolt works were running over time. The furnace factory had many orders on hand.

*Railroad construction and employment.*—Railway employment in all lines was steady. Many men were engaged in raising the grade of and re-ballasting, the Michigan Central main line. Construction work on the N. S. & T., line from Fonthill to Welland was resumed, and cars will be running over it in November.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were not so busy as in August. Concrete workers have more work in view. Carpenters were quiet, but became more active late in the month. Plasterers were active as were also painters, plumbers and steamfitters. Stonecutters found work dull.

*Metal.*—Foundry and machine shop work was still plentiful. Electrical workers were busy. Linemen were active, but the extra work which had been going

on for months, was practically completed.

*Printing.*—Printers were active.

*Food and tobacco preparation.*—Bakers were busy. Fruit and vegetable canneries were running to fullest capacity. The establishments at St. Davids, Queenston and Niagara-on-the-Lake employ nearly a thousand persons. Fruit evaporating plants also gave some employment.

*Miscellaneous.*—Some big summer hotels were closed, but business at others and in restaurants was good. It will be quieter in October and employees will be laid off. Laundry workers were busy.

*Transport.*—On all steam railways business has been good, and all classes of employees have been busy. A few summer passenger trains were cancelled. Electric railways have reduced their services.

*Unskilled labour.*—This class was well employed.

#### DISTRICT NOTES.

*Bridgeburg.*—A steel vessel 510 feet in length was launched at the shipyards, and another, 460 feet long, is being built.

*Welland.*—A by-law to aid the Bemis Bag Company in establishing a factory was carried in Crowland township. The first rolling of steel took place at the Ontario Iron & Steel Company's plant on September 14th. The price of natural gas, used almost exclusively for fuel and light, will be raised on October 1st from 25 to 30 cents per thousand feet.

*Port Colborne.*—On October 1st the price of natural gas will be raised from 20 to 25 cents per thousand feet. The concrete work was finished and the steel work of the buildings of the new cement works will go up in October.

#### ST. CATHERINES, ONT., AND DISTRICT.

*Mr. Jas A. Wiley, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in the general condition of the labour market during

September as compared with August. Employment in the building trades was quiet, the supply of labour being fully equal to the demand. All other branches of industry were active. The work of paving streets progressed favourably. The new buildings in course of erection, for the Sovereign and Toronto banks, are nearing completion. The Ontario Power Company is applying to the city for a franchise for the use of the streets for lighting purposes. The Whitman Barnes Manufacturing Company has secured a fixed assessment of \$45,000 for ten years, providing the company expends in improvements not less than \$35,000, employs 175 hands, exclusive of office help, and maintains a yearly payroll of \$75,000. The Packard Electric Company, of this city, is busy on the contract secured from the Dominion government some months ago for 100 five-horse power induction electric motors to be used in working the mechanism of the lock gates on the Welland Canal. The canal officials began the installation of the motors on the 21st of the month. When the new equipment is in working order, the lock gates can be opened and closed in 35 seconds and a lockage made in ten minutes as against 20 minutes, the time required now.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers and fruit growers were busy harvesting. While the fruit crops are short in some varieties, grapes are an unusually heavy crop, and of good quality. It is estimated that the crop will be 13,000 tons in the Niagara peninsula, or two and a half times the average crop of 5,000 tons. Peaches are short, and are bringing good prices, selling here at \$1.00 to \$1.75 per 11-quart basket.

*Manufacturing.*—Factories and mills were running full time, with one or two exceptions. Canning factories were running night and day, every available hand being employed. Owing to the shortage of local labour the factories have secured large numbers of foreign helpers. The Simcoe factory has shipped in several carloads of peaches from outside

sources, owing to shortage of local crop. This company is putting up in tomatoes alone some 40,000 cans daily. The Schank factory has been enlarged at a cost of \$4,000.

*Railroad construction.*—The work on the Welland division of the Niagara, St. Catharines and Toronto Railroad is about completed, and the company expects to be running over the line to Welland by October 1.

#### CONDITION OF PARTICULAR TRADES.

The several skilled trades were for the most part active. The transport branches and unskilled labourers were busy.

#### DISTRICT NOTES.

*Thorold.*—Labour was well employed. Good progress was made on the water-work system. Ground has been broken for the construction of a new smelter for the North American Cobalt Refining Company, Limited, and the work is to be pushed as rapidly as possible. A contract for a \$50,000 power station for the Niagara, St. Catharines and Toronto Railroad has been let to Newman Bros. The new station will produce 1,500 horse power and is expected to be in operation by November 1.

*Merritton.*—Labour was well employed, there being few idle men. The Niagara, St. Catharines and Toronto Railroad Company is building a new station 30x50 feet.

*Port Dalhousie.*—Labour was well employed and business good.

*Font Hill.*—The new line of the Niagara, St. Catharines and Toronto Railroad has materially improved business.

#### HAMILTON, ONT., AND DISTRICT.

*Mr. S. Landers, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during September, with trade, wholesale and retail, fair. Bank clearings were up to

the average of the previous month. There have been no strikes or lockouts.

Owing to the advance in the price of wheat from 80 to 85 cents a bushel, the millers have put flour up 30 cents a barrel.

The Atkins saw works of Indianapolis, Ind., has secured a large site in East Hamilton for a branch of its works in Canada. A charter has been granted the National Oxide Paint and Color Company Hamilton; capital, \$50,000.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Carpenters, plumbers, and bricklayers were well employed. Painters were a little slack. Builders' labourers were active.

*Metal.*—In the iron trades, moulders and stove mounters were active. Machinists, electrical workers and blacksmiths were busy. Bridge and tool workers were active. Horseshoers had fair employment.

*Woodworking.*—The woodworking trades were all fairly busy. Upholsterers, carvers, pattern makers, coopers, etc., were active.

*Printing.*—The allied trades, including bookbinders, stereotypers, engravers, etc., enjoyed a busy month.

*Clothing.*—Journeyman tailors were slack, while garment workers were active, and shoe workers fairly active.

*Food and tobacco preparation.*—Bakers were busy, and cigar makers and tobacco workers active.

*Leather.*—Leather workers were busy.

*Miscellaneous.*—Broom makers enjoyed a busy month. Hotel and laundry workers were fairly active.

*Transport.*—Steam railway and street railway employees were active. Teamsters and longshoremen were busy.

*Unskilled labour* was active.

#### DISTRICT NOTES.

*Dundas.*—Trade and labour had its usual activity, all industries having full staffs employed

BRANTFORD, ONT., AND DISTRICT.

*Mr. J. C. Watt, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was practically none seeking employment during September, which compared favourably with the month preceding, and the corresponding month of last year. The building trades were exceptionally busy, the permits issued representing \$430,000, an increase of \$25,500 over last year at the same date. Extensive sewerage and sidewalk construction employed a large force of men. The iron trades, with the exception of several of the agricultural shops, continued very busy. The Saturday half-holiday for factory employees and those engaged in the printing and building trades ceased on September 1st, after four months' duration, except in two factories which continued the arrangement for a short time longer. The Wednesday half-holiday for clerks, delivery employees, tailors and barbers, also ceased September 1st, after two months' duration. These holidays are very popular. The retail milk dealers have announced that after October 1st, milk will be 7c. per quart instead of 6c. The 12th bi-annual session of the Federated Association of Letter Carriers of Canada, convened here on September 5. Delegates were present from all cities in the Dominion where there is free delivery.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Agriculturists had exceptionally favourable weather and were very busy. Hay was sold for \$15.00 per ton, a remarkable price at this season. Farm products are high, potatoes being \$1.00 per bushel, butter 28c. to 30c. per lb., eggs 22c. per doz. and apples 25 to 30c. per peck.

*Manufacturing.*—Employment in some of the factories has not been quite so brisk. The Massey-Harris Company is closing part of its factory for stock-taking and repairs. A busy fall is anticipated in most of the factories.

*Railroad construction.*—Work on the Brantford and Hamilton radial railway continues.

#### CONDITION OF PARTICULAR TRADES.

The various skilled trades were all busy. There was ample employment also for unskilled labour.

#### DISTRICT NOTES.

*Paris.*—Labour was well employed. The Saturday half-holiday arrangement for factory employees ceased September 1st.

#### GUELPH, ONT., AND DISTRICT.

*Mr. O. R. Wallace, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour had a steady month during September. Conditions generally were much the same as in August. Outdoor workers are anticipating a short season and a falling off in the building trades. Factory workers have had steady employment. Considerable work burying telephone wires, and laying new gas mains has been done. Retail trade during the month was good. The price of meat dropped from 15-18c. to 12½-15c. Bread was reduced in weight from a 1½ lb. loaf to a 1¼ lb. loaf at the same price, 5c. Milk was advanced from 6c. to 8c. a quart. The opening of the Ontario Agricultural College showed such a large attendance that third and fourth year students will board in the city until the new dormitory building is completed. The estimate of the year's building shows a total of \$500,000.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have finished harvesting, and have been busy fall ploughing. Hay and all coarse feeds are high in price and scarce.

*Railroad construction.*—The official opening of the Guelph to Goderich ex-

tension of the C. P. R. was celebrated with an excursion of 2,700 people to Goderich. Surveys have been made by the G. T. R. for factory switches into St. Patrick's ward.

#### CONDITION OF PARTICULAR TRADES.

The *building trades* had a quiet month in some lines and a busy one in others. A falling off is noticed in new contracts, and it is expected the season will close early. *Bricklayers, masons and stone-cutters* had a quiet month. *Carpenters, painters and plumbers* had an active month. *Iron moulders, tube-mill workers, machinists and machinists' helpers* had an active month. *Woodworkers* had an active month, as did also *carriage workers and upholsterers*. *Piano and organ workers* reported a slight falling off from last month. *Printers* had a busy month. A new agreement was signed to go into October 1st and to last three years, under which all journeymen receive a weekly increase of 50c., Oct. 1st 1907; 50c., Oct. 1st, 1908, and \$1.00, Oct. 1st, 1909, making the scale on that date \$13 per week of 48 hours for ad., book and job men and \$14 for machine men. The increase was granted at a conference between the employing printers and the Typographical Union, and covers all the offices. *Journeymen tailors and garment workers* had a busy month. *Bakers and confectioners and cigar makers* had an active month. *Barbers, hotel employees, clerks and delivery employees* had a busy month, being influenced by the fall trade and the opening of the Agricultural College. *Unskilled labour* was in fair demand.

#### WOODSTOCK, ONT., AND DISTRICT.

*Mr. W. N. McEltheran, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

September was on the whole a quiet month. Farmers were in the midst of threshing operations, and by the end of the month, this was practically all com-

pleted. There is a shortage of straw. Hay also is a short crop, and indications are that feed will be high. With the much-needed rains, the dairy industry showed greater activity, the milk supply increasing in many sections. The St. Charles Condensed Milk Co. at Ingersoll contracted for the month of October at \$1.40; November, 1907, to February, 1908, at \$1.50 per cwt. They are behind with orders on account of the milk supply not being sufficient. Butter reached a price of 29c. per pound retail. Cheese sold on the local board at an average of about 12c.

#### CONDITION OF LOCAL INDUSTRIES.

*Manufacturing.*—Manufacturing establishments have had an unusually quiet month. In some cases firms with large export orders have had difficulty in making satisfactory financial arrangements.

*Railroad construction.*—Work on the Embro-Ingersoll section of the new C. P. R. line from St. Mary's is progressing favourably. The contractors had considerable difficulty buying hay and oats for their horses, the farmers asking high prices. About one hundred horses and a gang of men are expected before the first of October, and the work will be rapidly pushed along. The construction surveyors are laying out the construction plan of the road.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons reported no noticeable change from the preceding month. The contract was let for a new manual training building by the Collegiate Institute Board, to cost about \$20,000. It is expected this building will be ready by the 15th of December. The new addition to the Collegiate Institute proper has been completed. Work on the Carnegie library went forward faster, and the new Y. M. C. A. also is employing several men. The new Woodstock hotel is progressing favourably. All the available men were employed and a few more could have found employment. Carpenters and joiners were all employed. Factories getting out building supplies were very busy, and with the completing

of the mason work on the three buildings mentioned above, prospects are bright for a steady winter. Lathers and plasterers had rather a quiet month, no big work of any kind going on. Painters and paperhangers were not very busy, though one or two firms were rushed. Considerable outside painting was done. Plumbers were very busy, as were also steam and gasfitters, while furnace men had all they could do. Stonecutters, while few in number, had a busy month. Builders' labourers were well employed, though it was not difficult to supply the demand.

*Metal.*—Iron moulders were fairly busy, though there was a slackening in some of the shops. Machinists were very busy. More men competent to take a lathe could find ready employment at from \$2 to \$3 per day. Blacksmiths and horseshoers had a steady month. The Horseshoers' Association of Ontario held their annual convention of the Provincial Association in Woodstock on Labour Day, September 2nd. Those present were of opinion that something should be done to improve the condition of the trade. A resolution was adopted bearing on the subject, and embodying the suggestion that if possible, legislation be procured to compel all horseshoers to pass an examination as such before practising. The present prices for shoeing are \$1.20 per set for light shoes and \$1.40 for heavy, and setting shoes 50c. per set.

*Woodworking and furnishing.*—Workmen had a very poor month. Organ makers had a lay off of about two weeks, and when work resumed, went on short time. Piano workers were steadily employed, but found no difficulty in laying off for the fall fairs. The church organ makers were all very busy. Furniture and cabinet makers were all busy, but labourers for the several factories in Woodstock and Ingersoll were more plentiful than could find employment. Wire fence operators were fairly busy. Coopers had a busy month, this being the time of the year when they are busiest, getting out barrels for apples, etc.

*Unskilled labour.*—The market was overstocked.

## STRATFORD, ONT., AND DISTRICT.

*Mr. Jos. T. Carlin, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during September was not as busy as in August. The building trades were active, and permits to the value of \$195,700 have been issued. The work on the G. T. R. shops extension is progressing rapidly. A large gang of men were working on the John street sewer. The assessment roll shows the population of Stratford to be 14,062, an increase over last year of 843. The total value of real property is \$7,048,090, an increase over last year of \$619,435. Wholesale and retail merchants reported the beginning of the month as quiet, with an increase in trade the latter part. No change in rates of wages or hours of labour, and no trouble in the labour market was reported.

## CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busily engaged plowing, threshing and marketing. Prices of produce were as follows:

Wheat, 85 cts to 90 cts per bushel.  
Oats, 42 cts to 44 cts per bushel.  
Hay, \$14 to \$15 per ton.  
Apples, 75 cts to 90 cts per bag.  
Pears, 25 cts to 35 cts. per pail.  
Plums, 40 cts to 50 cts per pail.  
Potatoes, 90 cts to \$1 per bag.  
Eggs, 18 cts a doz.  
Butter, 25 cts to 27 cts per lb.

*Manufacturing.*—All establishments were doing a good business, especially woodworking factories.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were busy, as were carpenters, lathers and plasterers. Painters, paper-hangers and plumbers were active. Builders' labourers were busy, but the supply was equal to the demand.

*Meat.*—Iron moulders, workers and helpers were fully employed. Machinists were busy. Blacksmiths, boiler-makers and jewelers had a good month.

*Woodworking.*—Sash and door factories were busy. Carriage and wagon-makers were active. Coopers were very busy.

*Printing.*—Printers reported a good month, with no idle men. Ad. and job hands were very busy.

*Clothing.*—Journeymen tailors were busy. Garment workers at a few of the factories were somewhat dull.

*Food and tobacco.*—Bakers and confectioners were very busy. Butchers and cigar makers were busy.

*Leather.*—Harness makers were active.

*Miscellaneous.*—Barbers reported trade very good; another shop started business this month. Clerks and delivery employees were active. Hotel and laundry workers were rushed.

*Transport.*—Train crews had a very busy month. Cab drivers, draymen and teamsters were active.

*Unskilled labour.*—This class was well employed.

## DISTRICT NOTES.

*Mitchell.*—The Woolen Mills Co. is asking a loan of \$10,000 for ten years, in order to build an extension to its factory. The company guarantees to employ 40 hands, for 11 months of each year.

*Goderich.*—The town will levy a 25 mill tax rate for 1907.

*Palmerston.*—The council is negotiating with a manufacturing company to occupy the old carriage factory.

## ST. THOMAS, ONT., AND DISTRICT.

*Mr. J. A. Killingsworth, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in the condition of the labour market in this city as compared with the previous month. Labour was well employed in all departments, weather conditions being most favourable. There have been no large contracts issued, but repair work and the construction of dwellings have kept mechanics well employed. The supply

of unskilled labour has been equal to the demand, there being few idle men in the city.

A scarcity of houses has made itself felt. Rents have been advancing as a result. The prospects are that exceptionally high prices for winter supplies will prevail. The high cost of living has been the cause of numerous small families giving up housekeeping and going to hotels and boarding-houses.

The Southwestern Traction Company connected its line with the local street railway about Sept. 9th, and the cars of that company are now running along the main thoroughfare of the city.

The canning factory recently erected is now in full operation. The amount of produce offering is sufficiently large to meet all requirements. The scarcity of female help is severely felt. The factory now employs seventy-five hands all told, but could easily find employment for fifty additional women and fifteen men, whom it is impossible to get.

The Wednesday half-holidays which were continued throughout the months of July and August were discontinued on September 1st.

About September 1st, a new schedule of wages was put in effect in the Pere Marquette shops. About seventy-five men will be affected by the change in the rates of pay.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers had finished harvesting by the middle of the month. Oats will average about twenty bushels to the acre. The hay crop will be short. Fall wheat is fair, the cold weather in the spring being responsible for a shortage in this crop. Corn is a good yield where properly cultivated. Barley and peas are a good crop. Fruit, on the whole, is scarce. Apples are fair in some sections, but large prices have been paid for orchards. Peaches are reported scarce. Farm labour is not at all plentiful, and farmers have been obliged to pay a high price for help.

*Manufacturing.*—Local industries were actively employed on fall orders.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, plasterers, joiners and painters had a good month. Plumbers were fairly well employed:

*Metal, engineering and shipbuilding.*—Iron moulders and iron workers, machinists and boiler makers had a busy month.

*Woodworking and furnishing.*—Woodworkers, upholsterers and carriage makers while not rushed with work, had a fair month.

*Printing and allied.*—Printers and job workers had an active month. Machine men could find employment in this city, as there has been a scarcity of machine operators.

*Clothing.*—Journeymen tailors are commencing on the fall trade, which promises to be good.

*Food and tobacco preparation.*—Bakers reported the month an active one. It was rumoured that the price of milk would in all probability advance, but so far there has been no advance made. Cigar makers have been well employed.

*Miscellaneous.*—The cold weather has somewhat affected laundries, there having been a slight falling off of trade.

*Transport.*—Railway employees in the traffic department have had an active month.

*Unskilled labour.*—This class has been well employed. There were few idle men in the city, and no need for any one to be idle providing he is willing to accept rough work.

#### CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

There was no noticeable change in the condition of labour during September; all classes were well employed. A number of immigrants arrived and readily found work. Farmers have commenced harvesting sugar beets, of which the

country this year has a very large acreage.

There have been no building permits of any account issued during the month. All large contracts are being closed as fast as possible. On the 20th of the month the large planing mill of W. M. Drader was destroyed by fire, and on the 22nd, his sawmill and box factory suffered a like fate, and the result is that a large number of mechanics and labourers have temporarily been thrown out of work. Factories were running full time, and planing mills overtime. There has been no discontent among the labouring classes and no changes in hours or wages.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers have been particularly busy seeding and looking after the corn crop, which, notwithstanding the severe frost in June, will be abundant. Wheat was only a fair crop, while oats and barley were not up to last year. Hay was short, and as a result prices will rule considerably higher this coming winter.

*Railroad construction.*—The C. W. of E. electric railroad has so far been unable to obtain a crossing over either the G. T. R. or M. C. R.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, carpenters, joiners, plasterers and painters were well employed. Plumbers had plenty of work.

*Metal.*—Iron moulders were active, but engineers and machinists were quiet. Electrical workers reported a number of good jobs on hand. Blacksmiths were slack. Boiler makers were busy, a number working overtime on repairs.

*Woodworking.*—Woodworkers of all classes were busy. Carriage and wagon makers had a good month.

*Printing.*—Printers reported none idle.

*Clothing.*—Journeymen tailors had plenty of work.

*Food and tobacco preparation.*—Bakers and butchers had a good month.

*Miscellaneous.*—Barbers reported good men hard to get, and all busy.

*Unskilled labour.*—This class was well employed.

#### DISTRICT NOTES.

*Wallaceburg.*—A number of new buildings and a large amount of repairs and remodelling are going on. Houses for rent are scarce. The Sydenham glass works was again working to full capacity.

*Tilby.*—Activity prevails. The canning factory was running overtime on tomatoes and corn.

#### WINDSOR, ONT., AND DISTRICT.

*Mr. D. Mitchell, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market at the end of the month was active. Workmen in almost every branch of labour, both skilled and unskilled, were well employed. The C.P.R. Co., has about one hundred men at its warehouses on the docks loading and unloading freight; they will have employment until navigation closes. Manufactures in all branches had a very busy month, and where female help is employed it was very hard to keep up with orders, as that class of labour was in demand, both for factories and domestic work. It was almost impossible to secure a loan for building purposes. This has had an effect on the building trade. Wholesale and retail trade has been very good. Owing to the increase in barber's rates, the journeymen barbers working on a percentage have received a slight increase. There was a strike at the tunnel for an increase in pay, but the company filled the places of the strikers.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—There has been very few contracts let during the month owing to the tightness of the money market, although all connected with the building trades were fully employed and wages remained firm.

*Metal.*—Iron moulders, machinists, coremakers, electrical workers, linemen, blacksmiths, sheet metal workers, and

all connected with these trades were very busy.

*Woodworking and furnishing.*—Woodworkers, carriage and wagon workers were fully employed.

*Printing.*—Printers and pressmen were busy on newspapers and job work.

*Clothing.*—Journeymen tailors and garment workers were very busy.

*Food and tobacco preparation.*—Bakers, butchers and meat cutters were fully employed. Tobacco workers were very busy.

*Miscellaneous.*—Barbers have had a good month. Clerks, delivery employees, hotel and laundry workers were busy.

*Transport.*—Trackmen, freight handlers and street railway employees were busy, as well as teamsters and draymen.

*Unskilled labour.*—This class was fully employed.

DISTRICT NOTES.

*Sandwich.*—The canning factory started operations and was giving employment to a large number of hands.

*Walkerville.*—Trade was very active. Machine shops, furniture factories and bridge works were very busy. The building trades were very active.

SAULT. STE. MARIE, ONT., AND DISTRICT.

*Mr. F. A. Denman, correspondent,* reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during September. Machinists, blacksmiths

and moulders were scarce, at wages of \$2.75 to \$3.00 per day. Iron workers were also exceptionally busy.

The Algoma steel plant resumed operations on September 9, after a shut-down of three weeks for repairs, relining of blast furnaces, etc. The company operates two blast furnaces; during the shut-down, the capacity of one of these was increased from 150 to 200 tons per day. The rail mill has orders ahead.

The Lake Superior Corporation has about 800 men engaged in the woods, the supply of labour being fairly plentiful, but the quality poor, wages ranging from \$28 to \$37 per month with board.

Trade, wholesale and retail, was quiet, notwithstanding that local industries were working to full capacity. The Council has struck a rate of 21 mills for the current year, the estimated expenditure being \$127,165.

Crops in this neighbourhood will be short, owing to unfavourable weather conditions. In the other industries and skilled trades, normal conditions prevailed.

Reports of rich mineral discoveries were received from the district, especially from Michipicoten Island

Traffic through the canals showed an increase. The following is a summary for August:—

Articles.	U. S. Canal.	Can. Canal.	Total.
<i>Freight:</i>			
East Bound.....Net tons.....	4,800,753	1,896,554	6,697,307
West Bound.....Net tons.....	1,417,505	430,021	1,847,526
Total Freight.....Net tons.....	6,218,258	2,326,575	8,544,833
<i>Vessel Passages:</i>			
Registered Tonnage.....Number.....	2,117	896	3,013
Registered Tonnage.....Net.....	4,701,337	1,651,125	6,352,462

WINNIPEG. MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During September, there has been a marked scarcity of farm help. This, it is assumed, is the result of reports circulated to the effect that the crop of Western Canada was practically a failure. Such is far from being the case. Many of the farmers have been sending into Winnipeg applications for help that it is impossible to fill. Other reasons, however, existed for the scarcity of labour. All year there has been a steady demand for men for railroad work, and this has cleared the market of that class willing to leave the city. In the city itself a number of workmen have been looking for employment, but they do not wish to leave the city. The demand for manual labour locally has not been nearly as heavy this year as it was last year. The reason for this is the curtailment of the list of public improvements by the city, and the diminution in the amount of building being done. In trades connected with the transportation, there

has been very steady employment, and in factories, generally speaking, there has been a degree of activity quite as marked as last month and equal to that of the corresponding month of last year.

The money stringency said to exist is generally regarded as the cause of a slackening in trade. Wholesalers are not increasing their business, but the retailers are not making any complaint. The former appear to be waiting the results of the crop movement, and the storekeepers in the province show a decided disinclination to buy until they are fully satisfied as to what the condition of their farmer customers will be in when the crops are threshed.

During the month there have been several important changes in rates of wages. After conferring for about two weeks with the officials of the Canadian Pacific Railway in Winnipeg, the machinists employed by that road succeeded in making a new schedule, providing for a nine-hour day in place of a ten, the rate of pay remaining the same; that is, the men will get the same amount of pay for nine hours' work as they previously obtained for ten hours. The exact figures are shown on the table following:—

OLD SCHEDULE.			
	Working Day, Hours.	Hourly Wage.	Daily Wage.
<i>Division:</i>			
1st Division—Fort William to Broadview (not including Broadview) .	10	\$.37½	\$3.75
2nd Division—Broadview to Kamloops (not including Kamloops) . . . . .	10	.40	4.00
3rd Division—Kamloops to Vancouver (inclusive) . . . . .	10	.38½	3.85
NEW SCHEDULE			
1st Division . . . . .	9	.42½	3.82½
2nd Division . . . . .	9	.45	4.05
3rd Division . . . . .	9	.43½	3.91½

This new schedule came into force on September 1st., and will affect approximately 600 men located at the various divisional points of the Canadian Pacific Railway between Fort William and Vancouver.

About 140 boilermakers working for the same company obtained a similar advance; the bulk of these are employed at Winnipeg.

The secretary of the Winnipeg Industrial Bureau reported that several

new factories will probably be erected in Winnipeg shortly. A large building to serve as a central exchange for the government system of telephones in the Province of Manitoba is in course of erection. The contract for the building was let by the government on September 5th. Work will also be commenced immediately upon the construction of about fifteen miles of subways to cost \$83,000. The exchange building is estimated to cost \$97,172.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Threshing operations have been impeded by bad weather. Cutting may be said to have been completed. So far, but little of the new crop has been marketed, and it will not move in bulk until about the middle of October. In many parts frost did very considerable damage; in other districts, farmers who feared a few weeks ago that their crop was almost wholly a failure, have obtained a satisfactory yield. These varied conditions make it very difficult to form an opinion as to what the general result will be.

*Railroad construction.*—Railroad contractors are complaining of their inability to get men.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The number of men employed in the building trades during September was not nearly as large as during the same month last year. The amount of building being done is smaller than was anticipated, although plans for several large buildings have been approved by the building inspector during the past few days.

*Metal and engineering.*—All branches of the engineering trades were busy, although employers are economizing to their utmost in the matter of labour. Unless the crop turns out better than expected, it is possible that the staffs of some of the foundries and machine shops will be cut down during the winter months.

*Woodworking.*—The woodworking factories of all kinds were active. Orders were coming in steadily.

*Printing.*—The allied trades have experienced dullness during September, and some of the offices have not been able to keep their full staffs in steady employment.

*Clothing.*—There has been some dullness. One establishment laid off all their workpeople for some weeks. Towards the end of September there was a decided change for the better. The workpeople that were laid off claimed that they were entitled to a week's notice, and sued their employers for a week's wages in lieu of the notice. A test case was taken before the magistrate, and it was argued that inasmuch as the employer always retained a week's pay in hand, which was forfeited in case the employee left without notice, an understanding was created that the employer should give a week's notice when he discharged an employee. The magistrate dismissed the case on the ground that the employee had taken her wages in full. She ought not to have taken the cheque if she had intended to sue, was the opinion of the magistrate.

*Food and tobacco preparation.*—Conditions were normal.

*Transport.*—There has been a rush of freight in anticipation of the closing of navigation.

#### BRANDON, MAN., AND DISTRICT.

*Mr. S. P. Stringer, correspondent reported as follows:—*

#### GENERAL CONDITION OF THE LABOUR MARKET.

During the latter half of August and the beginning of September, labour generally was well employed. Bricklayers were somewhat quiet owing to a lack of bricks. There was a small demand for first class carpenters. The total number of building permits to date for this year is 221, with a value of \$471,230. Several large buildings have still to be erected, bringing the figures well over half million dollars.

The work on the large machine shops for the C.P.R. was progressing, and the outside walls of the winter fair build-

ing were nearly completed. The Government phone exchange will cost in the neighborhood of \$35,000; its foundation may be built this fall. The board of governors of the Brandon College were making preparation to add next year another large wing to the present college to cost about \$65,000.

The tax rate for this year is nineteen mills on the dollar. The boilermakers of the C.P.R., have secured a nine hour day and an increase in wages.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Harvesting was general. In the Elton district the farmers were busy cutting. To the south of Brandon cutting was also general. The wheat is in first-class condition. A sample picked at random was of a plump nature, the color is turning and will likely grade No. 1 hard, with ordinary weather ensuing for the rest of the harvest season. Reports are to hand from the southeast of Brandon and give promise of a much better crop than was expected earlier in the season. Crops are late and run the risk of frost. A crop expert estimates the crop as in the neighborhood of 80,000,000 bushels, which at the increased prices which are sure to rule this season would net a greater equivalent in cash than the crop of 1906.

*Railroad construction and employment.*—The G.T.P. has inaugurated its first train timetable from Portage la Prairie to Rivers, the first divisional point. A construction and several mixed trains make daily runs on schedule time. It is reported that the C.P.R. grade will be completed to Lanigan, Sask., this month. Good progress is being made on the Canadian Northern main line. Ballasting work on the line to Edmonton was being rushed forward very rapidly. Several steam shovels and a large gang of men were at work. Building operations in the way of depots and round houses were going on all along the line. The Canadian Pacific Railway Company has given the contract for grading seventy miles west of Tugaski, Sask., on the Moose Jaw and Edmonton branch. The operations have already commenced.

*Manufacturing.*—Flour mills and sash and door factories reported business very brisk. Seven large boilers have been placed in the new building of the Electric Light Company. The capital stock of the Brandon Electric Light Company was increased from \$125,000 to \$400,000.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Building employees were working full time with the exception of bricklayers, who were waiting for brick. Carpenters were busy finishing the season's work. Plumbers and steamfitters were brisk.

*Metal.*—Iron moulders, machinists, steam engineers, sheet metal workers and boilermakers were active.

*Woodworking and furnishing.*—Woodworkers, upholsterers and pattern makers were steadily employed.

*Printing.*—Printers and pressmen were active.

*Clothing.*—Journeymen tailors, garment workers, and boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters, cigar makers, ice handlers and tobacco workers were active.

*Miscellaneous.*—Trade with barbers, clerks, stenographers, delivery employees and laundry workers was active.

*Transport.*—Traffic on all the railways was very heavy. Cabmen, teamsters and expressmen were actively employed.

*Unskilled labour.*—The market is not overstocked. There was a shortage of harvest hands throughout the province.

#### DISTRICT NOTES.

Since the arrangement between the provincial government and the C.N.R., for a joint railway and traffic bridge at *Prince Albert, Sask.*, has been closed, it has become evident that the city will be built on both sides of the Saskatchewan River. A number of residences are now under contract, and a site has been purchased in Hazel Dell, on which a new \$30,000 hotel will at once be erected to be opened next spring.

## REGINA, SASK., AND DISTRICT.

*Mr. Hugh Peat, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during September has been fairly active, showing a slight improvement over the preceding month, although not comparing favourably with the corresponding month of last year. There has been a marked improvement among carpenters and a slight improvement in the brick-laying and building trades generally. Plasterers reported marked activity, and there will be a steady demand for some time. The rate of wages, per hour, among carpenters is 35c., whereas at the beginning of the season 27½c. was the minimum wage.

The past month has been an anxious time for the farmers. Dry, hot weather was required to ripen the crop rapidly, and in place of this, cold weather and a considerable amount of rain has been reported. Some damage was done by frost on the night of September 11th, but as far as this district is concerned, the damage has been much exaggerated. Not more than four degrees were recorded at any point in this district, and the bulk of the grain was sufficiently advanced to avoid being damaged by that amount. In some districts the wheat has been cut very green, and though every precaution was taken in the way of building large stooks and capping well, there is no doubt that in some cases the grain will shrink. Owing to the high price of wheat, however, the farmers anticipate netting as large an amount as in previous years.

The wholesale grocery firm of Messrs. Campbell Bros. & Wilson has purchased the warehouse of the H. W. Laird Co., Ltd., and will open here on Oct. 1st.

The Canadian Pacific Railway Co. has let the contract for the construction of the branch from Regina to connect with the Kirkella branch at Bulyea. This will enable Regina to control a large and highly productive country to the north.

## CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were fairly active, the condition of the former being slightly better than at the beginning of the month. Carpenters found employment considerably improved, very few men being out of work. Lathers were active, and plasterers exceedingly busy. Painters and decorators were active, and reported a steady improvement in employment. Plumbers, gas and steamfitters were very busy. Stonecutters were only fairly active, and builders' labourers were quiet.

*Metal.*—Electrical workers were active.

*Printing.*—Job and newspaper printers were exceedingly busy at the beginning of the month, but a general falling off in the job departments was reported later. Bookbinders were very busy.

*Food and tobacco preparation.*—Bakers and confectioners were busy. Cigar makers were active, and reported better conditions than in the preceding month.

## MOOSEJAW, SASK., AND DISTRICT.

*M. J. R. D. Bastien, correspondent,* reported as follows:—

## GENERAL CONDITION OF THE LABOUR MARKET.

All classes were exceptionally well employed and labour was in demand. Though a number of farm hands from Eastern Canada were distributed in this neighbourhood, additional men were required for threshing and harvesting. In railway construction, a busy month was reported. Locomotive firemen have had their wages increased. Staffs in the erecting shops and roundhouse, including boilermakers, machinists, blacksmiths and fitters also had their wages advanced, and were granted a nine-hour day. The construction of new freight yards in the west end of the city has been begun by the Canadian Pacific Railway Company, and will give employment to all available men and teams. The yards when completed will give storage and track room for 2,000 cars. The company is also erecting

an addition to the roundhouse for locomotives, to cost \$60,000. Civic improvements afforded considerable employment. The brick yards were busy owing to the increased demand for product. Coal dealers had a very busy month, a greater amount of fuel being delivered than in any previous year at this time.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Though the season is exceptionally late, farmers are receiving a higher price for their grain than last year. Little damage from frost was reported, and it is estimated that the yield of this district will average 25 bushels to the acre. Employment at good wages was active during September.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The month was active, with bricklayers, carpenters and painters. Plumbers were very busy and builders' labourers were in active demand.

*Metal and engineering.*—Machinists and horseshoers were active. Steam engineers, electrical workers, blacksmiths and jewelers were busy, with linemen very busy.

*Woodworking and furnishing.*—Woodworkers, upholsterers and varnishers had fair employment. Carriage and wagon makers were active. Car builders were very busy.

*Printing.*—The allied trades were well employed.

*Clothing.*—Tailors and garment workers were active. Boot and shoe workers were busy.

*Food and tobacco preparation.*—Bakers, butchers, etc., were well employed.

*Miscellaneous.*—Barbers were active. Hotel and restaurant employees and laundry workers were very active. Clerks and delivery employees were very busy.

*Transport.*—Traffic was heavier during the past month than at any previous time in the history of the province.

#### CALGARY, ALTA., AND DISTRICT.

*Mr. R. A. Brockbank, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour during September was better employed than in the preceding month, but not so busy as in the corresponding month of 1906. There was considerable improvement, especially in the building trades. Farmers have also employed a large number of hands. This increased the demand for unskilled labour, but the supply of all classes remained in excess. The public works committee, of the city council, commenced the erection of the new city hall to cost \$120,000. The council also called for tenders for the construction of 12 miles of street railway. Transportation continued heavy in passenger and freight departments. Bank clearings for the week ending September 21 were in advance of the corresponding week of last year. Wholesale and retail trade for September was fully as active as in the corresponding month of 1906. About 40 tinsmiths employed on city work went on strike on September 2 pending an adjustment of their wage scale. They returned to work eight days afterwards, receiving an increase of 2½ cents per hour.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers had the greater part of their grain in stook at the end of the month, and threshing had commenced in the southern portion of the province. Though the grain was slightly injured by frost it was conceded that the farmer will realize more for his crop than he has averaged for the last five years, on account of the increased prices.

*Manufacturing.*—The Alberta Biscuit Company has decided to spend \$100,000 on improving its plant. Another storey will be added to the mixing building, and a packing department installed. A \$2,000 cartoon packer will shortly arrive and with these additions the company expects to increase its capacity from 75,000 to 100,000 a day.

*Mining.*—There has been organized at Port Arthur, Ont., a company, known as the Great West Coal Company, which has purchased a large tract of coal lands in Alberta and the charter of the Great Western Railway Company which runs down through the coal lands to the international boundary line. It was stated that the Canadian Pacific Railway Company intended spending \$1,500,000 in developing six miles of coal lands near Fernie and Hosmer, B. C. The company has awarded contracts already, and has 200 men at the mines.

*Railroad construction.*—Work was commenced on the new Canadian Pacific Railway station, which when completed, will cost in the neighbourhood of \$300,000. The company has a large staff here and pays over \$1,000,000 per year in wages and salaries. The general superintendent's office has charge of 1,343 miles of railway, and thirty trains arrive at and leave Calgary daily.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, plumbers, steam and gasfitters and builders' labourers were active. Stonecutters were quiet.

*Metal, engineering and shipbuilding.*—Electrical workers, linemen, backsmiths, sheet metal workers, horseshoers and jewelers were active; the other branches were busy.

*Woodworking and furnishing.*—Activity prevailed.

*Printing.*—Printers, pressmen, etc., were busy.

*Clothing.*—Journeymen tailors, garment workers, boot and shoe workers were active.

*Food and tobacco preparation.*—Work was active.

*Leather.*—Leather workers and saddlers were active.

*Miscellaneous.*—Delivery employees, hotel, restaurant and theatre employees were active; the others were busy.

*Transport.*—All classes of railway employees were busy. Cab drivers teamsters etc., were active.

*Unskilled labour.*—Was busy.

#### EDMONTON, ALTA., AND DISTRICT.

*Mr. J. A. Kinney, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Labour was employed to about the same extent as last month. While the number of mechanics and labourers working is about the same as a year ago. The demand for labour does not show the usual increased activity evidenced in other years at this season. The supply of mechanics exceeds the demand. A permit was issued by the Provincial government recently, for the erection of a ten thousand dollar building to be used as a temporary legislative hall. Building permits issued from January 1st, 1907, to August 31st, total \$2,030,700, but owing to the stringency in the money market, a considerable part of this will not be undertaken this year.

Work on the government telephone system is progressing, and by the end of the year, about 400 miles will be in operation. The Lacombe-Stettler line is finished, as is the line from Wetaskwin to Daysland. The lines from Edmonton to Lloydminster, and Macleod to Blairmore are progressing favourably; so also is the rural line north from Vegreville, which will be of great convenience to the farmers. When the present season's programme is completed, the Public Works department will have built in the neighbourhood of 150 miles more than the Bell Company has in the past ten years.

The new packing plant being erected by the J. Y. Griffin Co. (Swift & Co.) will be one of the most important of its kind in the west. The equipment all through will be modern, with a capacity per day of 5,000 cattle, 3,000 hogs, 1,500 sheep.

The president of the Grand Trunk Pacific stated, that the line would enter Edmonton next spring or early summer. Grading between Clover Bar Bridge and Saskatoon was well under way. Steel will be on the ground for bridge building during the next 60 days.

During the beginning of the present month, the case preferred by the Provincial government against the Alberta Retail Lumbermen's Association for alleged combination in restraint of trade was instituted. The summons also included an indictment for combining with the British Columbia manufacturers to arrest the manufacture and transportation of lumber. A feature of the case was the destroying of certain documentary evidence by the Lumbermen's Association. The case has been, for the present, postponed by the Deputy Attorney-General.

A number of settlers (about 50) left Edmonton some time ago for the Peace River country. They are in charge of the Peace River Colonization and Land Development Company, with an office in Winnipeg. This company was organized to take over the grant of land made by the government some time ago to the Roman Catholic church. It comprises four townships, and is about 60 miles southeast of Dunvegan. It is the intention of the company to place a settler on each quarter section of government land in the block.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—Bricklayers and masons were fairly well employed, as were lathers and plasterers. Carpenters were not employed as fully as in other years at this season. This applied also to painters and paperhangers, a number of whom were unemployed. Plumbers and steamfitters and builders' labourers were quiet.

*Metal.*—Electrical workers and sheet metal workers were quiet, but horse-shoers and blacksmiths were busy.

*Printing.*—Printers and pressmen were quiet.

*Clothing.*—Journeymen tailors were busy.

*Food and tobacco preparation.*—Bakers and confectioners reported trade fair. Cigar makers were busy.

*Miscellaneous.*—Barbers and hotel employees were active.

*Transport.*—Teamsters and expressmen were fairly active.

*Unskilled labour.*—The demand was fair, with supply about equal.

## NELSON, B. C., AND DISTRICT.

*Mr. A. B. Dockstader, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market throughout the Kootenay district during September was active, except in the smelting industry. The shut-down of the smelter at Nelson, about the middle of the month, threw over 100 men out of employment. Conditions in the mines at Rossland were improving, the Le Roi having about 225 men at work, which number will be increased to over 300 as soon as a sufficient supply of coke is assured. At the Centre Star also, the force would be materially increased if the supply of coke justifies increased shipments. The fuel situation, however, is gradually improving, and is expected to be normal within a short time.

A rich strike of ore was reported from the Slocan district.

A disagreement between the company operating the St. Eugène mine at Moyie, B. C., and its employees, with regard to wages, was referred for adjustment to a board under the Industrial Disputes Investigation Act, the men returning to work pending the decision of the board. (\*)

## NEW WESTMINSTER, B. C., AND DISTRICT.

*Mr. D. J. Stewart, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in this district, continued active, and the weather being all that could be desired for outside work, good progress was made on the many new buildings under construction. Indications pointed to a continuance of activity, as long as the weather is suitable. About twenty-five per cent. more men

\* A statement in detail with regard to the appointment of the board is published in a special article elsewhere in the present issue.

were employed in this city and vicinity than was the case a year ago. No shortage was reported in any lines, although higher wages have been paid this year than last. Construction has commenced on the electric railway between this city and Chilliwack; about seventy-five men were employed, and this number will be largely increased in the near future. The distance to be covered by this line is sixty-two miles. It will pass through the municipalities of Surrey, Langley, Matsqui, Sumas and Chilliwack; the cost when completed is estimated in the neighbourhood of one million dollars. This line will be of great advantage to this district. Good progress is being made by the V., V. & E. Railway Co. in the building of the line of railway from this city to Blaine, Wash. The customs receipts at this port for the month of August last, show an increase of \$2,000 over the corresponding month last year. In freight, exports from this city headed the list in this province for the month of August, with \$86,889, Vancouver being second with \$34,170. A small strike occurred during the month on one of the river steamers, the deck hands of which demanded 40c. per hour for overtime after 9 p. m. The places of the men were filled by Japanese. The latter, however, are not strong enough to do the work, which at certain times of the year is very arduous.

#### CONDITION OF LOCAL INDUSTRIES.

*Agriculture.*—Farmers were busy getting their grain crops threshed and housed. The weekly market in this city has grown beyond all expectations, as shown by the fact that an addition to the present building is being constructed.

*Fishing.*—The sockeye season closed on August the 25th. It was expected that the cannery would ask for an extension of time, but they considered that it would not be advisable, as better results might be expected another year if the salmon, which might come later, were allowed to pass up the river to the spawning grounds. The season has been to a great extent, a failure, only about 55,000 cases being secured. The fishermen did

not make expenses. The price of salmon in the English market has advanced, and is expected to reach a higher figure this year than ever before, owing to the small pack in this province.

*Lumbering.*—The local mills were working to full capacity, and very little stock was on hand, the demand being fully equal to the supply. A large schooner cleared from this port during the month with a cargo of lumber for San Francisco.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The various branches were active, with builders' labourers busy.

*Metal and engineering.*—Activity prevailed, with electrical workers busy.

*Woodworking and furnishing.*—Car builders (electric) were busy. Shingle weavers were active.

*Printing and allied.*—Printers and pressmen were active.

*Clothing.*—Journeymen tailors were busy. Boot and shoe workers were active.

*Food and tobacco preparation.*—Bakers and confectioners, butchers and meat cutters, and cigar makers were active.

*Leather.*—Tanners and curriers were active.

*Miscellaneous.*—Barbers, clerks and stenographers, hotel and restaurant employees and laundry workers were active.

*Transport.*—Freight handlers, steamboatmen, street railway employees, teamsters and expressmen were busy.

*Unskilled.*—This class was busy.

#### VICTORIA, B. C., AND DISTRICT.

*Mr. W. E. Ditchburn, correspondent,* reported as follows:—

#### GENERAL CONDITION OF THE LABOUR MARKET.

Employment during the latter part of August and in September has been brisk, with the supply of labour well up to the demand, though there were a few complaints of shortage of skilled mechanics in the house carpentering line. During the early part of the month, the *Daily Times* had interviews with about twenty different contractors on the question of

the labour supply, and about four-fifths were of the opinion that they could always obtain the help they required at current wages. The Provincial Bureau of Immigration has received a number of inquiries from prospective immigrants who want positions as farm labourers.

The following number of immigrants were landed at the port of Victoria during July, August, and up to September 19:

<i>July:</i>	
Japanese.....	863
Chinese.....	121
First time Chinese.....	40
Hindoos.....	13
Total.....	1,037
<i>August:</i>	
Japanese.....	423
Chinese.....	249
First time Chinese.....	70
Hindoos.....	15
Total.....	757
<i>September:</i>	
Japanese.....	840
Chinese.....	203
First time Chinese.....	49
Hindoos.....	
Total.....	1,092
<i>July, August and September:</i>	
Japanese.....	2,126
Chinese.....	573
First time Chinese.....	159
Hindoos.....	28
Total.....	2,886

The total amount collected in payment for duties at the Victoria customs house during the month of August was \$17,285 in excess of the amount collected during August of last year.

At the Inland Revenue Department an increase of about \$800 is shown, which is not quite up to the average increases for the past few months. Local bank clearings for the month of August show an increase over the corresponding period in previous years. The total clearings for the month aggregated \$5,026,571 as compared with \$3,791,456 for August last year, an increase of \$1,235,115.

#### CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—The trap fishing season, which terminated on August 25, has been extended. The sockeye run this season

has been so small, and the business of the canneries so unremunerative, that following the action taken last year by the Fisheries Department, the trap season was extended for the taking of cohoes, humpbacks and dog salmon. By reason of the extending of the time of the trap season, it is expected that the small sockeye catch will be supplemented with a fair catch of cohoes.

*Lumbering.*—The lumbering industry is very brisk at present. The Jordan River Logging Company is putting in two large Climax locomotives. At present there is a crew of 90 loggers at work, with four donkey engines, and when the railroads are in operation, it is expected they will employ 150 men and will be able to get out 100,000 feet of fir and cedar per day. Next season the company proposes to erect a large sawmill at Jordan river, to cut about 150,000 feet of lumber per day.

*Shipbuilding.*—The British Columbia Marine Railway Company is keeping a large force of men employed in the construction of the hydrographic steamer for the Dominion government, and the building of a new tow boat for the Canadian Pacific Railway Company. Considerable repair work is also being done.

*Sealing.*—It is expected that the catch of the Victoria sealers will be small this season.

#### CONDITION OF PARTICULAR TRADES.

*Building.*—The building inspector has reported that the total cost of buildings erected during the year will pass the million dollar mark. Everyone employed in the building trade has been kept busy, and will continue so for many months. Many new residences are being erected in the adjoining suburbs, the cost of which is not estimated by the city officials.

*Metal, engineering and shipbuilding.*—Iron moulders were all working full time in the different shops, and in some instances, notably, the Albion stove works, have found it difficult to keep up with orders. The B. C. Marine Railway Co. keep about 25 moulders constantly employed. There are no idle machinists,

engineers or steam engineers. Electrical workers and linemen find no difficulty in obtaining work. Stove mounters were also well employed. The blacksmiths lost no time during the month. Boiler-makers and iron ship builders engaged in the different shipbuilding yards had plenty of work. Sheet metal workers found September a busy month.

*Woodworking and furnishing.*—Woodworkers, upholsterers, varnishers and polishers were well employed. Pattern makers and coopers were active.

*Printing and allied.*—Printers, pressmen and bookbinders were well employed. The Provincial government printing office still keeps a large force of men employed, principally on the *B. C. Gazette*, which has been very materially increased in size, owing to the publication of timber and other official notices.

*Clothing.*—Journeymen tailors and garment workers were extremely active.

*Food and tobacco preparation.*—Bakers, confectioners, butchers and meat cutters were all well employed. Cigar makers find local goods well patronized, and the regular number of employees were all busy.

*Leather.*—Leather workers and saddlers were all working full time. Harness makers have had their hours reduced and pay increased lately, now getting \$3.00 for a nine-hour day as against \$2.50 for ten hours in the past. Trunk makers were actively employed.

*Miscellaneous.*—Barbers were all active. Clerks, stenographers, delivery employees, hotel, restaurant and theatre employees reported a very busy month. White laundries here are doing a good business, notwithstanding Chinese competition.

*Transport.*—Work was very brisk, owing to the fine weather on the coast.

*Unskilled labour.*—Unskilled labourers had all the work they could do. This condition will prevail for some time.

## NANAIMO, B. C., AND DISTRICT.

*Mr. A. E. H. Spencer, correspondent,* reported as follows:—

### GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was unchanged as compared with August, the demand continued to exceed the supply, especially among unskilled labourers. The coal trade continued exceptionally active. The number of tourists and others visiting the city has been greater during the past month than in any previous season. Wholesale and retail trade was very active. There were no changes in wages reported.

### CONDITION OF LOCAL INDUSTRIES.

*Fishing.*—Fishermen were quiet, the run of herring not yet having begun. Work on the whale fishery in this neighbourhood was rapidly advanced, and the station is expected to be ready for the coming winter season, when the weather becomes too rough for operations on the outside coast.

*Lumbering.*—The local mill was working full time. One sawmill in the neighbourhood has shut down, owing to the falling off in the demand for lumber in the northwest provinces. Work continued active in the camps, though the demand for logs, except for those of first quality, was less than in the earlier months of the season.

*Mining.*—The coal trade was exceptionally active, and though the mines were increasing their outputs as fast as possible, they were unable to meet the increasing demand. A good deal of boring for coal was in progress in different parts of the city, and further development work on a large scale is expected.

*Railway construction.*—The clearing of the right of way for the extension of the Canadian Pacific Railway line to Alberni, a distance of about 60 miles, was in rapid progress. Grading will be commenced as soon as possible. The Western Fuel Company has arranged with the

Canadian Pacific Railway Company for the construction of a transfer slip and connection with the main line. The sandstone quarries were working steadily, there being a growing demand for the product.

#### CONDITION OF PARTICULAR TRADES.

The outside building trades were fairly active, but the supply of labour was

fully equal to the demand. Carpenters were busier than in several years past. Painters were active and plumbers were busy. There was a scarcity of certificated engineers of the higher grades. Blacksmiths, carriageworkers and printers were well employed. Teamsters and expressmen had more work than they could handle. Unskilled labour was in steady demand.

### REPORT OF THE ROYAL COMMISSION APPOINTED TO INQUIRE INTO DISPUTE BETWEEN BELL TELEPHONE COMPANY AND EMPLOYEES AT TORONTO.

**T**HE report of the Royal Commission appointed in February last to enquire into the dispute between the Bell Telephone Company, Limited, and operators employed in its offices at Toronto, with respect to wages and hours of employment, "and all matters affecting the merits of the said dispute and the right settlement thereof," was issued from the Department of Labour on September 12.

#### Nature of the Report.

The report of the Commission is in the form of a blue book containing 102 pages. The Commissioners, after stating the particulars of the dispute which led up to the appointment of the Commission, proceed to an examination of the evidence taken before the Commission. The subject is considered under the following aspects, namely: (i) the remuneration of work in its relation to the cost of living; (ii) the duration and intensity of the work involved; (iii) the methods of work and the elements of nervous strain; (iv) the opinions of many leading physicians placed before the Commission; (v) a comparison between the schedule as proposed at the time of the dispute and the schedule as revised before the Commission and made acceptable to the representatives of the employees. The closing chapter of the report contains the conclusions and recommendations of the Commissioners. These may be summarized briefly as follows:—

(i.) The appointment of a commission of medical experts to examine into the effect of the occupation of telephone operating upon the constitution of those engaged therein.

(ii.) The adoption of a new schedule of hours involving six hours work or the intervening periods of relief spreading work and reliefs over a total period of from eight to 8½ hours.

(iii.) Overtime to be absolutely prohibited.

(iv.) No young women to be employed at telephone operating until they have passed their eighteenth year.

(v.) No young women to be engaged as telephone operators until they have passed an examination as to their health, particularly as to their nervous system, throat, lungs, sight, hearing and tendencies towards tuberculosis.

(vi.) Changes in the mechanism of the apparatus employed, and in the style of seats, tending to increase the comfort or convenience of the operator.

(vii.) Improved ventilation of the operating room.

(viii.) The application to telephone companies of the criminal laws applicable to news improperly obtained or divulged by telegraph operators or officials.

(ix.) The establishment of a permanent Board of Conciliation composed of representatives of the officials of the Company and its operators, to which might be referred at stated intervals, points of difference between the officials and the operators with an appeal to the head officers of the Company, where matters in dispute fail of successful settlement before the Board.

#### Origin of the Dispute.

It will be remembered that the dispute to which the Commission had reference began on January 24 last, when notices were posted in the local exchange of the Bell Telephone Company in Toronto, stating that the operators were from February 1st to work under an eight-hour schedule instead of the five-hour schedule that had been for some time in vogue, and which was pronounced by the Company to be a failure; the notices also declared the wage schedule which would rule after the date named.

Many of the operators contended that the change indicated would occasion a physical strain of a severe character, and also that the proposed changes in wages were not at all commensurate with the increased working hours. A strike en-

sued as a consequence, and on January 30 the Mayor telegraphed to the Department of Labour requesting its intervention. The Minister of Labour requested Mr. W. L. Mackenzie King, the Deputy Minister of Labour, to proceed to Toronto and lend the good offices of the Department with a view to averting the threatened strike and to effecting an amicable settlement of the difference between the Company and its operators. Mr. King reached Toronto on January 31, and immediately entered into negotiations with the two parties; but in the meantime, the operators, having failed to obtain any concessions from the Company, had decided to strike on February 1, and about 400 operators, supervisors and monitors in the employ of the Company accordingly ceased work on that date. The employees, by resolution passed at a mass meeting on February 1, requested the Minister of Labour to institute a public inquiry into the matter in dispute, and promised, in case such an inquiry was undertaken, to return to work in the meantime. The Deputy Minister of Labour, after acquainting himself with the circumstances, recommended the appointment of a Royal Commission to make inquiry into the matter of the dispute, and a Royal Commission was appointed on February 2, constituted as above, and commenced an inquiry forthwith. On Monday, February 4, the Commission was received in Toronto. On the same day, the striking employees, who had promised to return to work to save public inconvenience in the event of an inquiry into the dispute being undertaken by the Minister of Labour, offered their services to the Company, and were in most cases immediately re-engaged, so that the strike was practically at an end. An account of the proceedings incident to these various phases of the dispute has been already printed in the *Labour Gazette*\*, and that portion of the Commissioners' report which relates thereto may be briefly summarized on the present occasion.

\* A full report of the incidents of the strike and of matters connected with and arising out of the same down to the settlement effected before the Commission was printed in the *Labour Gazette* in March, 1907.

### General Standing of the Company.

The Bell Telephone Company commenced business in Toronto 23 years ago under an Act of Incorporation from the Dominion Parliament passed in the year 1880. At the beginning of the present year the subscribers under the management of the Toronto office numbered 14,900, and the last annual statement shows a total expenditure for the year 1906 of \$329,714.82 for salaries and wages on account of the Toronto and Toronto Junction exchanges, and a total revenue of \$800,445.22. There is a main exchange on Temperance street, and branches in North Toronto, Parkdale, Toronto Junction and Balmy Beach, while a new one will shortly be opened in the northwest portion of the city. The total number of the employees of the Company on January 1, 1907, was 878, of whom 538 were operators, supervisors and monitors, the remainder being special service employees, linemen, instrument and switchboard men, and employees of the business office.

In October, 1903, the Company had occasion to introduce into the main exchange as a temporary expedient a day of five hours instead of one of eight hours with reliefs and intermissions such as had hitherto prevailed, the wage scale remaining unchanged so far as those in the employ of the Company at that time were concerned. The arrangement thus introduced as a temporary expedient was extended from time to time, until in January, 1905, it appears to have become the adopted and generally recognized practice of the Company, and the day of five consecutive hours was extended to the branch exchanges on or before January 1, 1905.

### Factors in Determining Time Schedule.

One of the chief determining factors in the arrangement of a time schedule for telephone operation is what is known technically as the "traffic curve," being the volume of necessary work. The strain of work is greatest at eleven o'clock in the morning and at five o'clock in the afternoon. Between the hours named

the work first slackens and then rises to what is termed "the peak of the load." By ten o'clock in the evening day operating is over and night work begins; from ten o'clock p. m. until seven a. m. the calling is intermittent, and save for emergencies can be handled by a greatly reduced staff. The normal curve is of course subject to periodic and special conditions and fluctuations caused by exceptional occurrences or conditions. Thus the nature of the calling requires that the operating staff should be divided, so to speak, and that extra or relief members should be constantly at hand. "To effect this division," say the Commissioners, "so as to economize operators both in the regular and the relieving staffs is the problem with which a business manager of a telephone company is confronted."

A further consideration to be kept in mind in the arrangement of the schedule is that the operators being young women, for the most part between the ages of 17 and 22 years of age, regard must be had for their protection and safety in going to and from work, which places a limit on the hours at which it is desirable for the day staff to leave and the night staff to come on, and similarly as to the hour when the day staff shall resume charge in the morning. The hours of the night staff have become generally accepted as from 10 p. m. to 7 a. m. The period from 7 a. m. to 10 p. m. is 15 hours, and represents an exact division of the day staff into groups of three, each group working for a period of 5 hours, or into two groups, each group working seven hours and a half. The five hour system appeared to render possible such a disposition of the staff as would meet the various emergencies of the work. No reliefs were allowed under this system, and it was contended on behalf of the Company that an advantage of the shorter hours to the operators would be that it would leave them more refreshed in taking up their work from day to day.

When it was decided to return to the eight-hour schedule, it was contended by the Company that the five-hour schedule had failed to meet the expectations of those who had favoured its introduction;

that instead of the operators being in better shape for work in consequence of a longer period of rest, many of them during this period engaged in some additional employment, such as assisting in housework, or the making of clothes, or other service which taxed their energies or else participated in amusements of one kind or another to such an extent that they were more fatigued at the time of beginning work under the five-hour schedule than they would have been had the greater part of the day been devoted to the work of operating, as would have been the case under the eight hours. It was further contended that the five-hour arrangement had failed to afford the efficient service which the public had a right to expect.

#### Official Investigation.

During 1906, the Company, whatever may have been the cause, experienced considerable difficulty in carrying on its service efficiently. Mr. J. K. Dunstan, the local manager at Toronto, was inclined to believe the inefficient service was due to the five-hour schedule, which he had never favoured, and he made representations to this effect to the head office at Montreal. In March, 1906, the head office decided to have a special report prepared upon the subject. Mr. James C. T. Baldwin, an American citizen residing at Boston, and employed by the American Telephone and Telegraph Company, was retained by the Bell Telephone Company to visit Montreal and Toronto and conduct an investigation. Mr. Baldwin visited Toronto in the latter part of June, 1906. He remained in the city not longer than two days, but arranged while there to have record sheets and other material sent to him for purposes of examination after his return to Boston. On November 30, 1906, he submitted his report, and this, with a report of Mr. Hammond V. Hayes, the chief engineer of the American Telephone and Telegraph Company, dated December 4, 1906, was forwarded from Montreal on December 17, 1906, by Mr. James A. Baylis, the electrical engineer of the Bell Telephone Company, to Mr. Dunstan.

Mr. Baldwin, in the course of his report, stated that "the underlying idea of the five-hour schedule is to have the operators work at an extremely high rate during a few hours of the day, and have them replaced by fresh operators, instead of having an ordinary system of relief during the longer day," and further, that "the results of this new method of handling the operating force in Toronto, when compared with the cost of handling calls in Montreal, shows up greatly in favour of the five hour schedule, if the cost of operating alone is considered." But Mr. Baldwin pointed out that "it is necessary to consider the quality of the service given to the subscribers in the two cities," and proceeded then to make a comparison as between Toronto and Montreal, on which he commented as follows:—

From the results shown, it would appear that the service given in Toronto costs much less than it does in Montreal, but on the other hand, the service given in Toronto is poorer than the service given to subscribers in Montreal. It is fair, however, to say, that by increasing the cost of service in Toronto, by reducing the number of calls per operator in the busy hours, there is no doubt but what the service could be put on a plane equal to that of Montreal, without increasing the cost proportionately.

Mr. Baldwin was not willing without further tests and investigation to say whether the five-hour system should be introduced into other offices than Toronto, or whether the Toronto office should revert to the eight-hour system.

#### Commissioners' Comments on the Proposed Change.

Mr. Dunstan discussed this report at some length in a letter to Mr. Baylis, dated December 20, 1906, printed in the report, and on which the commissioners make the following remarks:—

From Mr. Dunstan's letter of December 20, 1906, to Mr. Baylis it will be seen that Mr. Dunstan, while himself strongly favouring a return to an 8-hour schedule, felt at the time the letter was written that a return to the longer hours could not be made until the new exchange on College street was completed, and the company's plant enlarged so as to admit of an extension of equipment, and an increase in the number of operators sufficient to cope with the increase in the company's business. Nothing, he thought, could be done 'for about a year.' Mr. Dunstan, moreover, clearly realized that it was high pressure of work and low wages which were responsible for the inefficient service in Toronto, and he told the head office so very plainly. 'The faults,' he says, 'are those of too rapid operating. People cannot work at high

pressure forever, and this is now realized. The principle is wrong. It is impossible in an office like the Main to employ a plan which involves operators working at an extremely high rate' and, elsewhere in the same letter, 'as previously pointed out, from 30 to 40 per cent. of the staff board and this percentage must govern. They require a living wage and are now feeling it impossible to meet the increased cost of board.' The inevitable effect of the low rate of wages paid by the company was, as the local manager stated, the class of operators desired turned away, the applicants for positions fell off, and the company had great difficulty in obtaining either the number or class of operators required to properly carry on its business. It was necessary, therefore, to increase wages, and to do this immediately if the service were not to continue to suffer, and the alternative which apparently confronted the Montreal conference, in reference to the Toronto exchange, was whether the increase of wages should take place immediately, the hours remaining as they were, until, at least, after the College street exchange was completed, or whether there should be an increase in wages and at the same time a readjustment of hours which would help to offset any increased cost of service consequent upon the increase in salaries. 'If short hours are continued' wrote Mr. Dunstan on January 16, 'an increase in salary must be made and the present cost of service thereby advanced. It is very advisable to make the change in hours and wages coincide.'

It would appear that when the matter was discussed at the Montreal conference it was the evident desire of those present that the wages and hour question, so far as Toronto was concerned, should be dealt with at one and the same time, that any changes in wages might be accompanied by a change in hours. Also, that if at all possible, the change should be made without waiting for the completion of the College exchange. It was decided to increase the wages of the operators at Montreal, the change to take effect from the first of the year. A salary schedule applicable to the Toronto exchange was tentatively adopted and Mr. Dunstan was evidently instructed to go more fully into the question and see if it would not be possible to have the new schedule put into effect forthwith. It would appear that it had been represented to the conference that there was a considerable number of applicants for positions as operators in the company's office on the Toronto list; also, that notwithstanding his letter of December 20, 1906, Mr. Dunstan had conveyed the impression that it would be possible to so arrange matters at the Toronto Main exchange as to afford the necessary relief to the operators which would be required under the adoption of an 8-hour schedule. Mr. Macfarlane, the general manager, was emphatic in his statement before the commission that at the time of the conference he understood the then equipment at the Main exchange afforded sufficient means for providing the necessary relief. After Mr. Dunstan's return to Toronto he had a conference with Mr. Maw and Mr. Clarke, the inspector of service and superintendent respectively, and the chief operators. At this meeting he discussed with them the possible adjustment that could be made, and thereafter wrote Montreal stating that he found the number of applicants was far less than had been stated at the conference, that as a matter of fact there were only 7 out of 106 who could be counted upon as being of any real service. This letter contains the recommendation of the local manager for a change to the 8-hour schedule and sets forth the real reasons why the change was made to take effect at the time and in the manner it did, despite objections which were quite apparent to the company.

In his letter of Jan. 16, Mr. Dunstan states:—

I inclose schedule of hours recommended for the Main exchange, based upon the principle of an eight-hour day, one hour for lunch, no regular relief, shorter

hours for those who take the broken periods and unpleasant hours, the newer operators taking the greater portion of the evening work, but a sufficient rotation among the older ones to make the evening staff efficient.

It is here also that occur the sentences referred to by the Commissioners above, viz.:

It is beyond question that there is now much dissatisfaction because operators cannot earn enough to pay for their board and clothing. If short hours are continued an increase in salary must be made, and the present cost of service thereby advanced. It is very advisable to make the change in hours and wages coincide.

**The Formal Notice of Change of System.**

In a letter dated January 23, the head office authorized Mr. Dunstan to proceed with the change to the eight-hour system, and on the following day the notices announcing the change were posted in the various Toronto exchanges, as already stated.

The exact form of the notice, in the nature of a copy of a letter from the local manager to the local superintendent, was as follows:

THE BELL TELEPHONE COMPANY OF CANADA, LTD.,  
 LOCAL MANAGER'S OFFICE,  
 TORONTO, January 24, 1907.

W. J. CLARK,  
 Superintendent.

The experiment of an exceptionally short day, consisting of five hours, having proved a failure from many points of view, including that of the majority of the operators themselves and the advantages to the staff of increased wages to enable them to meet the higher cost of living, make it advisable to return to the ordinary day of 8 hours, with the payment of larger salaries.

You will therefore revert to the old schedule of hours and adopt the following scale of salary, both effective from February 1 next:

Local salaries—	
1 to 6 months.....	\$20 00
6 to 12 months.....	22 50
12 to 24 months.....	25 00
24 to 36 months.....	27 50
36 months and thereafter.....	30 00

(Signed) K. J. DUNSTAN.

At the main exchange a similar notice was also posted, giving the salaries for long distance operators, The notices were identical except that rates for long distance operators were \$2.50 higher in each case.

The strike followed, leading to the intervention of the Department of Labour on request of the Mayor of Toronto, and to the appointment of a Royal Commission as outlined above.

The Commission entered on its duties on Monday, February 4.

**Operators Called by Commission as Witnesses.**

The Commissioners continue:—

The company had, in anticipation of the strike, brought in operators from Ottawa, Montreal, Hamilton, London, Windsor, Peterborough and other centres. Over 100 in all appear to have come to Toronto, some of them arriving on the morning the strike took place and the remainder on the day following. Some 25 persons chosen at random from among the number of those who had been brought to the city were asked to appear before the Commission on Tuesday, February 7, at the beginning of the sittings of the commission. On that day a medical certificate from Dr. Alton Garratt was produced, in which it was stated that of the 25 persons selected, 13 were in too precarious a condition of health to permit of their giving evidence. Dr. Garratt, on being examined in reference to the certificate, stated that all were suffering from a good deal of nervousness, that some were suffering from sore throat, tonsillitis, laryngitis, etc. The 12 who gave evidence were examined at some length. They were all from among the highly remunerated employees of the company at the localities from which they came. Several of them were in positions of authority, commanding good salaries. Some had been in the service of the company for a number of years. They apparently understood, before leaving work at the points from which they came that they were being brought to Toronto to fill the places of those who were likely to go out on strike. They had been asked by the local managers in their several exchanges if they were willing to come, and appear to have consented without any undertaking other than that all expenses would be paid and their services remunerated at the rate of their regular salaries.

**Wages, Profits and Cost of Living.**

The Commissioners proceed to consider in Chapter III the remuneration of work and the cost of living, as these matters respectively affect the operators, also as to whether the wages paid bear any relation to the profits of the Company. In this connection special attention is paid to the statements of the Local Manager, setting forth reasons for a change from five to eight hours, as already mentioned, and to the inefficiency of service as described by Mr. J. A. T. Baldwin, and the Commissioners quote the statement of Mr. Hammond V. Hayes, Chief of the American Telephone and Telegraph Company, that "the system should be judged from the standpoint of cost, service and the ability to secure operators." On this last point the Commissioners comment as follows:—

That it was judged from these standpoints is abundantly apparent, as were also the results, viz., that (from

the standpoint of ability to secure operators) operators could not be secured because of the low rates being paid; that (from the standpoint of service), the service as a consequence was materially impaired; that to secure operators and improve the service it would be necessary to increase the wages and reduce the speed of operating, which would mean also an increase in the number of operators. Increase in wages and increase in the number of operators, other things remaining the same, would mean increased cost; (from the standpoint of cost then) to offset an increase in cost it would be necessary to increase the hours.

Had the company made the health of its operators a matter of first concern, it is difficult to see how it could have permitted operating being carried on at such a high rate of speed for so long a time after its ill-effects upon the health of the employees had become known, or how the company could have permitted its operators under any circumstances to work a certain number of days each month for a period of 10 hours, being two consecutive stretches of five hours each, as was the common practice under the five-hour system, when it had become apparent to the management that five hours, consecutive work at the high rate of speed which characterized the operations of the Toronto exchange was inimical or injurious to the health of its employees.

In the letter above referred to, of the local manager, recommending the changes as well as in other correspondence, and reports, one looks in vain for any reference which would indicate that the health or well-being of the operators was a matter of any consideration save where it was forced, so to speak, upon the company in its consideration of the three commercial tests above set forth, namely, cost, service, and ability to secure operators.

It was a question not of the health of the operators, but as Mr. Dunstan very tersely expressed it, a choice of evils, for commercial reasons.

In view of these facts, and taking into consideration the circumstances existing at the time, the fact that the change was not delayed until the other exchange had been completed, and what transpired at the conference in Montreal, we are forced to believe that it was for commercial and business reasons rather than because of any humanitarian considerations that the company decided to substitute for the five-hour schedule the schedule which it attempted to enforce on February 1. We are the more confirmed in this belief, inasmuch as the management does not appear to have considered any alternative other than the one of an eight as against a five-hour schedule. Had the lessening of the pressure under the 5-hour system been the main consideration, as was urged, this might have been effected if humanitarian considerations had been uppermost, by an increase in the number of operators and the lessening of the load which each operator was obliged to carry. Moreover, there were as alternatives all the possible arrangements both in the matter of time and reliefs which might have been made through an adjustment on any basis less onerous than that of the eight-hour system as proposed.

That commercial reasons rather than any consideration for the health and welfare of the operators were the motives which prompted the change was no less apparent from the testimony given before the commission than it was from the written records of the company, which were filed as exhibits. In his evidence in regard to the wages paid, and the inability of the company to secure operators as a consequence, Mr. Dunstan was very clear in the replies given to questions put by the commission:

Notwithstanding the low rates of wages paid to operators prior to the change, the operators without exception stated it was the question of hours, and not of wages which occasioned hostility to the new schedule, and was

responsible for the strike. Both the management and the operators admitted that under the old scale it would have been impossible for a self-supporting woman to maintain herself, the cost of living being what it was in Toronto. In view of this, the *bona fides* of the operators in making a protest against any change which meant increased remuneration can hardly be questioned.

### The Respective Wage Schedules Compared.

The Commissioners then examined the wage schedules associated with the respective systems, and pointed out particularly the extent to which the operators under the system of shorter hours had been able to supplement their income by overtime.

At the rate of 26 working days in the month, and working 52 hours overtime each month, an operator might supplement her regular wages to the extent of \$7.20 during the first 6 months of her employment, to the extent of \$8 between the 6th to the 18th month, to the extent of \$9 between the 18th to the 30th month, and to the extent of \$10 thereafter. Under the eight-hour schedule it was proposed that overtime should be done away with completely. In its stead was to be substituted an increased number of hours of regular work per day, with an increase in the monthly wage. The number of hours, increase in regular work under the new schedule as understood by the operators at the outset amounted to 78 per month, though under the schedule as modified before the Commission the actual increase in working hours per month came to 52 in the case of those working the regular hours; where operators were working on reliefs, as was the practice with beginners for the 6 months, the increase would be less, being an increase of 6 hours only. In the cases, though, where operators worked as reliefs, their day was more broken, the working time being at less regular periods and the intervals between more frequent or longer.

"What the change in the schedule as a whole meant," remark the Commissioners, "will be seen from the following:

5-Hour Schedule plus Overtime.		Total.	8-Hour Schedule.	Decrease to Operators.
1 to 6 months	\$18.00 plus \$7.20 per month	\$25.20	\$20.00	\$5.20
6 " 12 "	20.00 " 8.00 "	28.00	22.50	5.50
12 " 18 "	20.00 " 8.00 "	28.00	25.00	3.00
18 " 24 "	22.50 " 9.00 "	31.50	25.00	6.50
24 " 30 "	22.50 " 9.00 "	31.50	27.50	4.00
30 " 36 "	25.00 " 10.00 "	35.00	27.50	7.50
36 upwards	25.00 " 10.00 "	35.00	30.00	5.00

The Commissioners comment on the above comparative statement as follows:

It is not to be wondered at, therefore, that the operators who were dependent for their livelihood upon the earnings which they might make in the company's service and who required such spare time as they might have for doing work for themselves, should have preferred the old arrangement, notwithstanding the arduous overtime which it involved, while to operators who were living at home and who looked to their earnings from the company for a sum sufficient to enable them to supplement the family budget, or to earn something towards personal expenses, the increased hours of work and additional earnings derived therefrom, would appear to involve a greater sacrifice as compared with the shorter work day, than would be met by the total increase of earnings that might result under the eight-hour schedule from the month's work.

It is true that the commission was informed that the change had been made at an estimated increased cost to the company of \$1,300 per month. This, notwithstanding a reduction in labour cost, such as has been shown, may have been the case. The service had to be improved, and it was the improvement of the service which was aimed at in the change. It was quite conceivable that subscribers may have benefited, while the company and labour each sacrificed something, or subscribers and the company may have profited while financially the operators may have been left in a relatively worse condition. When it is remembered that the company's business was constantly increasing, through new phones being added month by month, increase on extension sets and in private branch exchange sets, some increase of expenditure would be the normal thing to expect, it by no means follows that this would mean an increase in cost per subscriber to the company, or any reduction in its net profits.

Nor were the possible benefits to be derived from such increases as were made in the schedule rates as considerable as might at first appear, for the reason that only a small percentage of the operators would ever reap the advantages of the more favourable changes. It will be observed that under the old schedule the highest rate fixed was \$25 per month at the end of two and a half years. Under the new schedule operators at the end of two years were to be increased to \$27.50, and at the end of three years to \$30. The evidence before the commission went to show that the time during which the majority of the operators remained in the company's employ did not exceed 2½ years or 3 years at the most. In other words, that the 'average life of an operator' was less than 3 years. Various reasons were ascribed for this.

#### Problem of Health and Wages.

After quoting various portions of the evidence of the officials of the Company

in its bearing on the question of the health of the operators and on the question of wages as compared with profits, the Commissioners continue:—

We have included these views of the company's officials because in our opinion too great stress cannot be laid, if due regard is to be had for the preservation of harmonious and satisfactory relations between employers and employed, upon a very full consideration of the relation of wages and profits, more particularly in the case of an industry which holds a public franchise and is conducting a public service, and which from the nature of things possesses by the tacit or expressed consent of the public, a limited or a complete monopoly. It was contended before the commission that there were 58 or 60 competing companies. While this may be, it is nevertheless true that so far as the City of Toronto is concerned, and many other localities throughout the Dominion in which the Bell Telephone Company operates this company has an absolute and complete monopoly. It enjoys this monopoly by the consent of the public. That this consent arises from a city's consideration of its own convenience rather than from any predisposition in favour of a particular company is not a matter of concern. The fact is that in the city of Toronto there is one company carrying on the telephone service for the entire city, and whether they like it or not the public generally of that city so far as it may wish to make use of the telephone, is obliged to pay the Bell Telephone Company for its service. Viewed in this light which we believe to be the right and proper one in regard to public service utilities where an absolute or quasi-monopoly exists, an element is introduced which justifies an insistence on the part of the public of a due regard for the welfare of employees which might be urged with less reason in the case of competitive industries. To the extent to which the citizens of Toronto have parted, either voluntarily, or involuntarily, with their right to choose between competing concerns and to that extent have parted also with their power to extend their patronage in the direction in which they believe the interests of justice and fair play may best be served, to that extent it is, we believe, not only their right but their duty, to know and to insist upon a company profiting by their patronage, treating its employees in a manner which is equitable and fair, in other words, giving to its employees, whether they be women or men, a fair day's wage for a fair day's work. To the extent to which the Bell Telephone Company has profited by the necessities of its operators, or has secured services at a rate which would not have enabled those who rendered them to have lived, but for the support received from members of their own families, or in ways other than those provided by the company, to this extent, the profits of the company have been deprived by a species of sweating or by the levying of a tax upon homes and individuals for which no compensation has been made.

That the company has profited in this manner is sufficiently proved by the admissions of its own manager that the wages paid were not sufficient to meet the cost of board and clothing and that notwithstanding the operators had been obliged to work at a pace which was absolutely detrimental to their health. The circumstance that these truths are lost to sight by the involved and intricate processes which obscure the workings of modern industry and commerce, or that by some they may be condoned as being in accord with common practice, is not a reason why in the public interest they should not be disclosed and a healthier and more equitable regard for just such situations established. Moreover, it is we believe, not more in the interests of justice and the maintenance of friendly relations between employers and employees, than it is likely to be in accord with the wishes of fair-minded investors who would hesitate to accept as profits, dividends which had been earned at the expense of either the health or well-being of those who had assisted in their making. And this leads us further to venture the opinion that in the interest of shareholders, employees and the general public alike, it is desirable that as much publicity as a due consideration for business secrets will permit, should be given to the manner in which public or quasi-public utilities of the class of the Bell Telephone Company, carry on their operations. Public opinion may be expected to safeguard the welfare of those who serve the public, however remote that service may be, and in this connection it may fairly be assumed that the interests of capital, no less than of labour, and of labour no less than of capital, will receive a due regard.

#### Duration and Intensity of Work.

In Chapter IV of the report the Commissioners devote themselves to a consideration of the question of the duration and intensity of work. Here they review briefly the experience of the operators under the five hour schedule and examine closely the motives of the Company in making the change to the eight hour schedule of February 1, and the views which the operators may have held as to the probable effect of the change on themselves from such information as was in their possession at the time they entered their protest. After a consideration of the evidence submitted on these points the Commissioners comment:—

To sum up: The five hour system, so far as quantity and duration of employment were concerned was shown by actual experience to be such only in name; the five-hour schedule was merely the basis of an arrangement under which the employees were obliged on a certain number of days each month to perform seven or six and a half hours service at the five-hour rate; on other days to work two continuous five-hour stretches or ten hours at exactly double the five-hour rate; at all times to be ready to work without remuneration an additional 15 minutes, either before or after the five-hour period, or both, and in at least one case, to give, on pain of dismissal, service without compensation for several hours each day over a period of two weeks or more.

The report goes on to consider the question of intensity of employment

or the rate of speed at which work was performed under the five hour system within the hours during which the operators were engaged each day, and to give an intelligent understanding of this side of the problem the Commissioners outline the nature of the duties of a telephone operator, describing in a general way the method of operating a switchboard in one of the exchanges, and quoting statistics from the record sheets of the Company, showing the number of calls per hour as recorded in peg tests made at Toronto and Montreal, which latter show, comment the Commissioners, a difference per operator as between Toronto and Montreal of 570 calls per day of 10 hours or a difference of 57 calls per hour, being an excess in the case of the calls answered per operator in Toronto of over 35 per cent over the number answered per operator in Montreal.

#### Methods of Operating Discussed.

How this high rate of operating was effected is shown in chapter V which is devoted to a consideration of the methods of work and elements of nervous strain. The system by which an operator not only looks after her own subdivisions, but also helps the operators at the adjacent sub-divisions on either side if they are pressed, is explained, and the comment of the Commissioners on the system is the following:—

Some of the rest or relaxation, therefore, which might come to an operator in one of the divisions because of a slackening in the number of calls upon the lines for which she is responsible, is in part offset by this assistance which she is expected to afford her neighbors. It will be seen, too, that under this arrangement the greatest strain is inevitably placed upon the more efficient and skilled operators. It would appear that where operating is carried on at a high rate of speed, the tendency is to tax the energies of operators to the maximum of their endurance and ability.

Of the system of overlooking by monitors and supervisors the Commissioners say:—

The duty of a supervisor is to walk up and down behind the operators who are under her supervision, and see that they properly attend to their work, at the same time to assist the operators where it appears they are unable to keep up with the calls coming in. It was admitted by the operators that the assistance rendered by the supervisors in this way was a substantial one. On the other hand, it was contended that their presence as constant watchers of the way in which duties were being performed added an element of strain

to the work, more particularly where the supervisor might not be as sympathetic with the operators as might be wished. It was stated for example, by one of the supervisors herself that she regarded it as a part of her duty to keep calling to the girls under her to 'Hurry, Hurry,' so as to keep them up to their work as much as possible.

It is explained that the glowing of a small lamp affords the operator the signal of a call, that several lamps glowing simultaneously would indicate that several calls had come in from different points at the same moment, and that if a subscriber does not receive a prompt answer and becomes impatient and indicates his impatience by moving the hook of the receiver of his phone up and down, as is a common practice, this impatience is reflected by the light glowing intermittently, the lamp going out each time the hook is lowered and relighting as soon as it is in the position it would be with the receiver off the hook. Moreover, a clicking or banging sound enters the ear of the operator each time the hook of the receiver is moved up and down.

The Commissioners comment on this system as follows:—

It was alleged by some of the operators that the glowing of these lamps caused a strain upon the eyes and that the clicking sound injured the ear but more particularly was the consciousness of a number of subscribers awaiting answers, and especially the consciousness of their impatience as reflected by the intermittent glowing of the lamp when calls were coming in at too rapid a rate to be properly overtaken, said to contribute an element of nervous excitement which enhanced the strain of operating, especially where an operator was conscientious in the desire to efficiently discharge her duties. The banging or snapping of the instruments into the ear, which is occasioned at times where connections are not promptly or are improperly made add, also, an element of aggravation.

Another element, kindred in a way, though perhaps more aggravating to a sensitive nature, is found in the hard words and occasional abuse to which operators are at times subjected by subscribers who may have become inconsiderate through being obliged to wait some little time for replies.

The possibility of injury arising from shocks is a feature also deserving of consideration. While it did not appear from the evidence given before the commission that much injury was occasioned from shocks on the Main local exchange, there was sufficient evidence to show that the possibility of such an occurrence must be more or less constantly present to the mind of an operator, while the evidence in regard to injuries received by operators engaged on the long distance lines was quite sufficient to demonstrate the inevitable risks which are run by young women in this work.

### The Strain Upon the Senses.

After quoting from the evidence submitted on these various points the

Commissioners take up the question of the strain upon special senses while operating, and following a brief statement of the calls made upon the various senses, make these comments:—

It is the fact that the special senses are called into operation so much in combination that the several activities are all at work at the same time, which perhaps, more than anything else, distinguishes telephone operating from that of any other employment in which women are engaged. It introduces for consideration elements of the first importance from the psychological and physiological standpoints. In most occupations in which women are employed it is the physical energies which are primarily taxed in the labour expended. This is the case with most of the work done in factories. It is so, too, with employment in shops and stores. No other calling has suggested itself to the commission in which the senses of hearing, speech and sight appear to be called into play simultaneously to the same extent or required to be so constantly on the alert. Even in typewriting and telegraphing, to which occupations references were made in this connection before the commission, there is a difference. In taking down shorthand a stenographer is required to use the senses of hearing and sight, but not that of speech. In transcribing shorthand notes upon a typewriter, neither hearing, nor speech are called into play, but merely the sense of sight. Similarly in telegraphing, a telegrapher in transmitting a message is not required to use his sense of speech, and may even transmit without using his sense of hearing, and in receiving a message does so without using his vocal organs. It is this peculiarity of the work of telephone operating, resulting from a combination of a new power with a series of new inventions which, as has been said, distinguishes this class of work from other occupations with which it might otherwise be compared, and which must be given a first consideration in considering the question of hours and the suitability of women for this class of employment. A fair comparison cannot be drawn in respect to the intensity of employment between this work and other classes of work in which the strain is mainly physical, inasmuch as telephone operating differs from most other female employments not so much in degree as it does in kind, and the exhaustion which it entails is not so much physical as mental and nervous, an exhaustion of nervous energy, a depletion of nervous force

### Testimony of Medical Men.

Chapter VI of the report contains a summary of the evidence of twenty-six medical practitioners, of which number six appeared at the instance of the parties concerned in the dispute, and the remainder were subpoenaed at the instance of the Commissioners. The physicians subpoenaed were nearly all selected from among the Medical Faculty of the University of Toronto, and are stated by the Commissioners to have been without exception among the leading members of the Profession in the City. The names of the physicians called were as follows:—*Dr. Murray MacFarlane, Dr. William Britton, Dr. Alexander Davidson, Dr. Charles Sheard. Dr. William*

*Oldright, Dr. Walter McKeown, Dr. James Forjar, Dr. James M. Anderson, Dr. William H. Alexander, Dr. Gideon Silverthorn, Dr. Richard A. Reeve, Dr. John F. Uren, Dr. G. Herbert Burnham, Dr. Charles Trow, Dr. William B. Thistle, Dr. William P. Caven, Dr. Charles R. Clark, Dr. J. M. McCallum, Dr. James M. Foster, Dr. Robert Dwyer, Dr. John Noble, Dr. Alexander McPhedran, Dr. Alexander Primrose, Dr. A. R. Pyne, Dr. Alton Garratt, Dr. Campbell Meyers.*

To secure a careful consideration of the matters on which it was specially desired to have an opinion, a memorandum containing mention of the following points was given to each witness some time prior to his examination.

The effect—

- (a) Under 5 hour system—high pressure.
- (b) Under 5 hour system—low pressure.
- (c) Under 8 hour system—high pressure.
- (d) Under 8 hour system—low pressure.

Upon—

1. Optic nerve—by lights—finding places for connections.
2. Auditory nerve—from calls, buzzing, shocks, &c.
3. Vocal organs—continuous calling of numbers.
4. Physical system—Length of sitting—head and chest gear, reaching.
5. Nervous system—from above cause operating together and continuously.

If accentuated by system of observation boards, monitors, supervisors, complaints of subscribers, &c.

The general effect of the medical evidence was to show that the operators were subjected to a severe nervous strain during, as a rule, the whole of the working hours, that the operators being usually young girls of 17, 18 or 19 years of age, were peculiarly liable to ill effects from such a strain, and that after a few years spent in the service of the Company, when they married, or for other purposes left the Company's employment, then, to quote from the evidence, "they turned out badly in their domestic relations. They break down nervously, and have nervous children, and it is a loss to the community." The opinion was expressed that the nature of the work disqualified one who had been employed thereat for five years continuously from becoming a wife and mother, and also that work under such conditions was laying the foundation for insanity, epilepsy and nervous diseases. Several physicians expressed the view that it was the duty of

the State to investigate the whole problem, and make regulations to govern the cases.

#### Effect of Change of Revision of Schedule

In Chapter VII the Commissioners consider the schedules respectively as proposed by the Company to take effect on February 1, and as revised before the Commission, together with all the attendant circumstances with respect to the attitude of the Company towards the change. Here also is included a statement of further incidents and information relating to the strike, the re-instatement of the employees who had ceased work, and the circumstances under which the schedule came up for revision before the Commission. On the general effect of the revised schedule the Commissioners comment thus:—

That the net result of the changes introduced by the company on February 1, and the modifications of these changes effected as the result of the present inquiry has been to insure for the operators conditions of employment more advantageous to their health than the conditions against which the operators protested, or the conditions as they existed prior to the strike, will be apparent from the following statement made by the commission at the conclusion of its sittings, and the concurrence expressed therein by counsel for the employees.

The COMMISSIONERS.—'You feel that the arrangement which the company has suggested this morning, and which has been come to as a result of this inquiry, is, so far as the condition and the health of the operators are concerned, more satisfactory than the arrangement that was in force before?'

Mr. CURRY.—'Somewhat more satisfactory. I won't say how much, but that is always conditional on the fact that there must be low pressure.'

This arrangement was accepted by the operators as that under which they would agree to continue at work on the understanding that it should be made the subject of consideration by the commission, and that the findings of the commission should have a reference thereto.

To what extent in the light of the evidence taken before us, the arrangement as come to may be viewed as satisfactory, due regard being had to the health of the operators, will appear from the opinions and recommendations which we now beg to express, and with which we conclude this already somewhat lengthy report. In this connection it might be added that counsel for the company agreed that the 7-hour schedule should also apply to the long distance operators, the half-hour intermissions or reliefs to be arranged to the satisfaction of the operators. In our opinion whatever schedule is ultimately made to apply to the local operators should, in a similar manner, be made to apply to the long distance operators.

#### Commissioners' Conclusions and Recommendations.

The eighth and concluding chapter of the report is devoted to the conclusions and recommendations of the Commis-

sioners. The Commissioners stated as follows:—

We have throughout the pages of this report expressed opinions on most of the general questions which the inquiry and evidence have raised for consideration; it remains, therefore, to only briefly summarize the more important conclusions, making such additions and recommendations as appear to be desirable and necessary.

The change in the wage and hour schedule which the Bell Telephone Company sought to put into effect at its Toronto Exchanges on February 1, and which was the occasion of the protest of the operators, and the strike commenced on the day previous, was made, we believe, under conditions which to the company itself were known to be unfavourable and likely to lead to trouble; it was a change from a condition of employment known to be oppressive and injurious to one conceded by the management as an alternative in 'a choice of evils.' Had the change been subsequently worked out as it appears to have been originally intended, it would, in our opinion, have been as oppressive and injurious from the point of view of the health of the operators as was the former condition, while financially, it meant to many of the operators a lessening of their total earning capacity. It was made, we believe, from motives of cost and service pure and simple, and without any real consideration for the health and well being of those whom it was most to affect. The company had found that its service was suffering; this, in the opinion of its officers and experts, was due to the high pressure at which those in its employ were obliged to work and the low wages paid, a pressure described by the local manager as 'extremely high,' and a wage characterized by him as too low to enable the operators 'to earn enough to pay for their board and clothing.' An increase in the wage schedule was a necessity, if the company was to maintain its service, for without an increase in wages, operators could not be obtained, and without operators the service could not be kept up. To offset the increase in cost occasioned by the increase in wages, the hours of service were lengthened, the percentage increase in the hours of employment being made considerably in excess of the percentage increase in the rate of wages. The company sought to bring about the change on the shortest possible notice, and in a manner which affords grounds for believing that it hoped to enforce the new schedule by taking advantage of the necessities of its employees, and the fact that as young women, many of whom were self-supporting, a threat of dismissal would be sufficient to prevent any general or prolonged resistance. With such knowledge as the operators had of the company's intentions, and the attitude assumed by the company towards its employees, and in regard to the efforts made to adjust the difficulties, a strike under the circumstances was all but inevitable; it was, moreover, we believe, precipitated by the action of the company in compelling its operators to agree in writing to be bound by the new schedule or resign immediately from its service.

Having regard for the knowledge which the operators had of the conditions as they had existed prior to the change, and such information as they possessed as to the company's intentions under the proposed 8-hour schedule there were, in our opinion, ample grounds for the contention of the operators as set forth in the communication of His Worship the Mayor of Toronto to the Department of Labour, that it was a physical impossibility with the enormous telephone business of the city of Toronto for the operators to stand the strain of such long hours. In this connection it is not necessary to more than mention that the company admitted before the Commission the limited extent to which the operators appear to have been informed of its intentions at the time of the change, and the company's ability to appreciate their right to protest under the circumstances; and the further fact that the statement presented to the Commission on February 13, favourable as it was, compared with what the operators had believed to be the company's intention,

was itself in the light of the medical evidence given before the Commission subjected to a further modification by a reduction in the total working time of twenty minutes and an extension of the reliefs by that amount of time. The statement of February 13, fixed the actual working time under the 8-hour system at 7-hours and 20 minutes, and contained provisions for morning and afternoon reliefs of 20 minutes each, which was a very different proposition to an eight-hour system, based on two consecutive stretches of four hours each, without reliefs, which was the system as the operators had conceived it to be according to the company's intentions. There is apparent conflict in the evidence as to what really was the intention of the company with regard to the proposed eight-hour schedule at the time of the change; as the matter is one which is no longer of any special concern, the evidence on this point may be left to speak for itself, for the purpose of the findings which are expected to be made it is perhaps sufficient to say that in our opinion the employees had reasonable grounds for holding the view they did.

As to the question what, all circumstances considered, are the conditions under which the work of telephone operating should be carried on, and as to whether in the present case the conditions as accepted by the operators are in the terms of our Commission, a *right settlement*, full regard being had to the health of the operators, we beg, before expressing an opinion, to enumerate some of the more salient facts which the present inquiry has disclosed, and some of the considerations which must be allowed to govern in attempting to form a judgment on a matter of so grave concern.

### The Strain on Operators.

It is to be remembered in the first place that the class of persons employed as operators is composed mostly of girls and young women between the ages of 17 and 23, that persons of these years are preferred to others because of the greater facility with which they learn the work and acquire dexterity, that these are years during which the nervous and physical system of a woman is peculiarly sensitive to strain and susceptible to injury, and that harm done to, or impairment of the system sustained at that time of life is apt to be more far reaching in its consequences than would be the effects received from similar causes in maturer years. The effects moreover upon posterity occasioned by the undermining or weakening of the female constitution cannot receive too serious consideration.

The work of telephone operating does not appear to be of a kind to fit a woman for any other occupation or calling; additional significance is therefore to be given to the fact that the average time spent by operators in the service is from two to three years, and that the period of service is usually given at the time when a young woman is best able to learn with advantage the trade or calling which is to put her in the way of acquiring a livelihood.

Secondly, the work of telephone operating under any conditions involves a considerable strain upon the nervous system. Some of the doctors maintained that it was not a fit work for any woman even where carried on at a moderate rate. The faculties are kept constantly on the alert, there is a high tension on the special senses, and a certain amount of mental worry. The strain is in proportion to the nervous force exhausted, and the exhaustion of nervous energy is a matter only of degree depending upon the duration and intensity of employment. Telephone operating in this particular differs from most other occupations in which female labour is employed, and where the strain is mainly physical. Comparisons, therefore, with other occupations are apt to be misleading. It is only necessary to mention some of the elements which contribute to the nervous strain of operating to see this, and to see why this particular class of work is deserving of special consideration.

The special senses of sight, hearing and speech are called into operation not only continuously but con-

stantly in a concerted manner; when not actually employed they are not resting because necessarily on the alert. The physical strain, save for the obligation of sitting continuously in one position over a considerable period of time, and the reaching and stretching entailed where switchboards are large in size, or operators expected to assist with the work on boards adjoining their own is not considerable, and, to a degree, helps, to offset the effect of the nervous strain; on the other hand where there is not a proper regard for these matters the strain may be increased rather than diminished. The liability to injury from shocks, the harsh words and abuse of subscribers, the irritation caused by the intermittent glowing of lights reflecting the impatience of subscribers, the occasional buzzing and snapping of instruments in the ear, the sense of crowding where work accumulates and the inevitable anxiety occasioned by seeking to make the necessary connections whenever a rush takes place, all combine to accentuate the strain upon an operator, and they are all factors more or less absent from other callings in which women are engaged.

Thirdly, the manner in which operating is carried on at the large exchanges adds to the strain which under almost any conditions, is considerable. 'Cost, service and ability, to secure operators, are, we believe, the main, they might, we think, be almost described as the sole determining factors in this connection. The last-mentioned—the ability to secure operators—is, we believe, chiefly a matter of wages, for few women know till they have been some time in the service, the full nature of the strain it involves. Hours are, of course, a factor also, but they operate in relation to wages, in determining the available supply, and only secondarily as a consideration in employment. The question of wages being left to the market, cost and service dictate the conditions under which operators are obliged to work, and this leads to the adoption of methods whereby a maximum of work may be had at a minimum of cost. In this connection enter all those elements which relate to switchboard economy and which affect the duration and intensity of employment; such as double work, overtime, services not paid for, team work, overloading, high pressure, and the like, which have been described in some detail in the body of this report; they are all, it is true, subject to regulation within certain bounds, but there is hardly a point at which the health and well-being of the operators does not come in this connection into direct conflict with the motive of gain which is more or less a part of every business enterprise.

From the testimony given it would appear that from the manner in which the Bell Telephone Company carried on operations during the past three years at the main exchange in Toronto, where this conflict between so-called business and health became apparent, in many cases, not only was the question of health a matter of small consideration, but the management knowingly permitted the work to be continued under conditions and in a manner absolutely detrimental to the health of its operators. We believe that where it is a question between the money-making devices of a large corporation and the health of young girls and women, business cupid-ity should be compelled to make way. The evidence given before us, and the facts of experience, as cited, go to prove that this is a matter which cannot with safety be entrusted to the parties concerned, but is one which in the interest of the protection of the health and well-being of persons engaged in this form of industrial pursuit calls for legislative interference on the part of the State.

Because, perhaps, of the comparatively recent introduction of industrial processes such as that of telephone operating, where the motive power is electrical, and where the whole trend of invention has been of a nature to intensify the strain by heightening the possible speed at which operations may be carried on, but little attention has thus far been paid to the possible inimical effects upon the constitutions of women engaged in such callings or the possible deleterious effects upon their offspring. The problem from this point of view is medical rather

than economic, and a full determination of the effect of this class of employment upon the health of those engaged in it can, therefore, be had only as the result of expert medical investigation.

### Appointment of Medical Commission Recommended.

Because of the fact that the number of young women engaged in telephone operating is already large and is increasing from year to year, and because it is the nervous system of operators rather than the physical which requires special consideration, we believe that the interests involved are of so grave concern as to warrant a further inquiry by a commission of medical experts, who could examine more particularly into this side of the question, and that the state should be guided in matters of legislation by the findings of such a commission, and we would recommend that such a commission should be forthwith appointed.

While the general and larger question of the extent to which women should be permitted to engage in occupations of this kind should in our opinion be made the subject of a careful and complete inquiry by medical experts, we believe that the evidence which we have had to consider in connection with the present investigation points clearly to the necessity of immediately restricting in certain particulars the conditions under which this employment is to be carried on, and that it is quite sufficient to justify the recommendations which we feel called upon to make.

We agree entirely with the view expressed by the local manager that *it is the pace that kills*, and the working of women at high pressure at work of this kind should be made a crime at law as it is a crime against Nature herself. On the other hand it is difficult to see where in it is possible for the State to effectively regulate the speed of operating. Happily, the solution is to be found, at least in part, in another way. The efficiency of the service is something which a company in its own self-interest is bound to protect, and it has been found that operating carried beyond a certain rate of speed leads to an imperfect service. Even from the company's standpoint the question in the words of one of its experts has come to be 'primarily one of service rather than of load,' 'There is much more question in my mind,' wrote Mr. Hammond V. Hayes, Chief Engineer of the American Telephone and Telegraph Company, Boston, who reported on the matter for the Bell Telephone Company. 'There is much more question in my mind, if an operator on a 5-hour schedule can carry appreciably more load than if she works 8 hours and gives an absolutely equivalent service. There is one point to be considered in this connection, and that is, that the load must be so adjusted as to leave a reasonable amount of spare time in each hour so that the unusual rush of business can be handled satisfactorily.'

Whatever may be urged to the contrary, the whole principle underlying the methods of operating is based, we believe, on having the 'operating curve' follow the 'traffic curve' as closely as possible and on an adjustment of the load to the ability of the operator. Under the 5-hour system as practised by the company the effort seems to have been to discover 'the breaking point,' and cause the load given to each operator to approach as nearly to it as possible. Experience, however, went to prove that what was 'the breaking point' with the operator was also a 'breaking point' in the service and a change was accordingly decided upon. Because, as Mr. Hammond V. Hayes says, 'the load must be so adjusted as to leave a reasonable amount of spare time in each hour so that the unusual rush of business can be handled satisfactorily.' There is always the possibility of a feeling on the part of those who have to do with the regulating of these matters, that 'the reasonable amount of spare time' provided as a protection against emergencies, is also a sufficient protection in the matter of health, while on the other hand what is a reasonable amount of spare

time for such a purpose is likely from motives of economy and cost to be confined within as narrow limits as possible. Unless then the speed of operating is to be arbitrarily fixed in some manner not altogether apparent as yet, the restrictions which it is necessary to make must be of a kind which will limit the period for which work shall be carried on at any one time, and the total amount which an operator shall be permitted to perform in any one day or week; in other words, there must be provision for intermissions and reliefs, and a limitation of the total hours of work.

The work of operating continued uninterruptedly over any considerable period of time is certain, we think, to prove injurious. The same quantity of work, where it exceeds a certain amount is better we believe spread over a period of time with intermissions and reliefs, than carried through at a stretch. We have only the strongest condemnation to offer for such a system as prevailed under the so-called 5-hour schedule, where work was continued for 5 hours at a stretch. It demonstrated conclusively, at least this fact, that 5 hours operating in a day under certain conditions was calculated to prove absolutely detrimental to the health of the operators.

The length of any one period should depend in part on the total number of working hours fixed for the day. The majority of the medical witnesses were of the opinion that a total working time of 5 hours divided into two periods of two and a half hours each, with an intermission of at least one hour for lunch was preferable to any other proposed scheme. The two and a half-hour periods were conceded in this case on account of the considerable length of that portion of the day during which there was freedom from actual or anticipated work and consequently greater opportunity for recuperation. Where such a condition does not obtain, two hours is, we believe, as long a stretch as should be permitted at any one time without a suitable period of relief being afforded, and from an hour and a half to an hour and three-quarters at one time, is, we think, as long a time as should be expected, where any considerable amount is to be covered in the course of a day.

### Question of Length of Working Day.

The length of time to be fixed for reliefs should depend in part on the amount of work preceding and following the relief period. It was the general opinion of the doctors who appeared before the commission that the longer the periods of relief the better, and that periods of less than fifteen and twenty minutes were of little value.

In the arrangement as come to before the commission, the total number of working hours was fixed at seven, spread over a period of nine hours, divided as follows: 2 hours work,  $\frac{1}{2}$  hour relief,  $1\frac{1}{2}$  hours work, 1 hour intermission, 2 hours work,  $\frac{1}{2}$  hour relief and  $1\frac{1}{2}$  hours work. The relief provided by this arrangement is, we think, sufficient. On the other hand, the total length of working day, all circumstances considered, is, we think, still too long. In our opinion a day of six working hours spread over a period of from 8 to 8 $\frac{1}{2}$  hours, and under as favourable conditions as may be expected in an exchange doing a large business is quite long enough for a woman to be engaged in this class of work, if a proper regard is to be had for the effect upon her health. We believe that medical men would favour a still shorter time, and would certainly contend that a longer period would prove injurious. If such a total working time were agreed upon the periods of work should be made not to exceed  $1\frac{1}{2}$  hours at a stretch, in which event the periods of relief might be fixed at twenty minutes, and the intermission for those who desired it placed at two hours or an hour and a half, instead of one. This arrangement would enable operators living at a distance from the exchange to go home for their meals instead of being obliged to take them hurriedly, to bring them with them to the exchange, or obtain them at a restaurant in the city. It would help too, to meet what is an objection to the half-

hour relief where operators are not provided with suitable accommodation in the way of grounds or rooms for recreation, by removing the temptation for operators to leave the company's premises to spend the time shopping or on the streets, while with the shorter work period the shorter reliefs would prove as adequate for rest. The day in this respect, while somewhat resembling, would exceed that of the school teacher by an hour, and the work would be carried over six instead of five days in the week. The element of strain is greater, we believe, in telephone operating than in teaching, and it is pretty generally admitted that the hours of teachers are quite long enough considering the work they are called upon to do. In addition, with this shortening of total hours and provisions for reliefs, we concur in the recommendation strongly made by nearly all of the physicians that there should be an adequate relieving staff present at all times to meet emergencies and for the purpose of giving quick relief for those needing it. We would recommend that an arrangement along these lines be forthwith adopted at the Toronto exchange.

Whatever the period of working hours may be, overtime, we believe, should be absolutely prohibited, as should also the practice of compelling operators to work a fraction of an hour either before or after the schedule time, with, or as has been customary at the Toronto exchange, without compensation.

In most occupations in which women are engaged, where payment is by the week or month, as is the case with many factory employees, shop girls and stenographers, there is no Sunday labour. It is, moreover, a common practice in these occupations for a portion of a day, in one day of the week, to be granted as a half-holiday. Where the remuneration is fixed at so much per week or month, this time, which the employee has for herself, is usually taken for granted. In the case of the telephone operators at Toronto, a half-holiday on one of the working days of the week does not seem to have been the regular practice, and Sunday labour appears to have been engaged in on a certain number of Sundays in the year by operators who received an additional allowance for this work. We believe that work on seven days in the week should be prohibited, and that in no case should an operator be permitted, after having worked six days, to enter upon a subsequent day's work until after a break of at least twenty-four hours. We believe, moreover, that the weekly half-holiday in addition, is, in every way, as necessary and desirable in this occupation as in any of the occupations in which it is to be found at the present time.

It was with regret that in looking over the exhibits we found a report from one of the officers of the company recommending the doing away with the customary two weeks' holiday during the year, as a means of effecting a further economy in the company's business. We were pleased to learn that this recommendation had not been acted upon, and that both the local manager and general superintendent strongly disapproved of the adoption of any such course.

We believe that seventeen is too young an age for a girl to enter upon the duties of telephone operating, and would recommend that young women should be prohibited from entering this class of employment until they have completed their eighteenth year. We would also recommend that before being accepted by the company, operators should be required to pass an examination as to their health, especially as to their nervous system, throat, lungs, sight, hearing and tendency towards tuberculosis. These recommendations are strongly supported by the medical testimony. We would also mention as matters deserving of special consideration by the company the following improvements suggested by some of the medical witnesses.

The construction of the switchboard so as to do away with the necessity of far reaching, the perfecting of the lighting of the switchboard and devices used for discovering the numbers; the sterilizing of the mouthpiece used by operators each day, instead of once in two or

three months, and the providing of each operator with headgear for her exclusive use; the construction of the seats so as to make them more comfortable, and so as to permit of an operator standing, the operators not to be required to be seated continuously; a more effective and better ventilation of the operating room.

### The Listening Board.

During the taking of evidence, it was stated that there was, in connection with the main exchange, a listening or observation board or desk where the operator could cut in on any line in the telephone office and listen to the conversation taking place on such line. This listener was used as a part of the telephone system for the sole purpose, it was alleged, of benefiting and perfecting the service, to ascertain whether the telephone obtained for purely private house purposes was, as a matter of fact, being used for business purposes; also to ascertain the causes of any defects in the service, in order that such might be remedied; the manner in which the operator answers, wrong numbers, bell clicking, persons rung up when not wanted, slow answering, slow disconnections, line out of order, and all matters relating to service. Mr. Dunstan claimed that this board was never used for improper purposes. It was, however, used in such a manner that the persons holding conversations were not aware that they were being listened to, and their conversations at times taken down and recorded.

Experienced operators were selected for this work, those who understood the system in all its details, and what troubles were likely to arise and able to detect them. It was stated that this operator was usually given from one to ten lines a day to attend to, while the operators on the local board had an average of 100 lines, the reason being that the operator on the listener was placed there for the express purpose of listening to conversations, and record the whole or parts of same in writing, while the operators on the other boards, if attending to their duties, had no time to listen to conversations. It was shown that operators could and did improperly use lines other than those given to them by Mr. Maw, and that conversations overheard in this way were repeated among the operators. Mr. Maw stated that he heard rumours of people thinking the operator had overheard something, but that he had been unable to trace it, although he had made the strictest investiga-

tion. While this work was stated as being a most important part of the telephone system, yet the five-hour system had not been made applicable to it.

The Commissioners quote from the evidence offered on this point by Mr. Maw, the Inspector of Service in Toronto, and proceed then as follows, these paragraphs being the final sentences of their report:—

Now that the fact that leakages of information obtained by means of the listener have been admitted, we would recommend that the criminal laws applicable to news improperly obtained or divulged by telegraph operators or officials be amended so as to apply to telephone companies.

### Permanent Board of Conciliation Recommended.

In conclusion we would say, that in our opinion many of the difficulties inevitable to the successful operation of a large telephone exchange might be overcome, and harmonious relations between the company and its employees promoted, were a permanent board of conciliation established, composed of representatives of the officials of the company and its operators, to which board questions concerning arrangement of hours, reliefs, overtime, discipline and the like might be referred at stated intervals, an appeal to be had to the head officers of the company where matters in dispute might fail of successful settlement before the board.

The evidence and our findings refer principally to the Toronto Main Exchange, the work of which is much heavier than that of the branch exchanges, and, in our opinion, heavier than that of exchanges in other cities in Canada.

The report is signed by W. L. Mackenzie King and John Winchester, as Commissioners, and is dated at Toronto, August 27, 1907.

### INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS UNDER THE ACT DURING SEPTEMBER, 1907.

FOUR applications were received in the Department during the month of September for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, being respectively as follows:

On behalf of the employees of the Canadian Mining and Smelting Company of Moyie, B. C.

On behalf of the employees of the Hillcrest Coal and Coke Company, Ltd., of Hillcrest, Alta.

On behalf of the employees of the Hosmer Mines, of Hosmer, B. C.

On behalf of the employees of the Rosamond Woollen Company of Almonte, Ont.

Of applications received prior to the beginning of September, proceedings in connection with which remained un-terminated at the close of the month, there were the following, viz.: the application on behalf of the employees of the Cumberland Railway and Coal Co., Limited of Springhill, N. S., from Pioneer Lodge No. 1, P. W. A.; the application on behalf of the employees of the Montreal Cotton Company at Valleyfield, Que. With regard to the first named of these, the application on behalf of the em-

ployees of the Cumberland Railway and Coal Company an interim report was received during the month from the Board established for the adjustment of the dispute; and in the case of the application received on behalf of the employees of the Montreal Cotton Company, the findings of the Board estab-

lished and an agreement effected before the Board between the parties to the differences were received during the month, and will be found below.

A summary of such proceedings as occurred during the month of September in connection with the various applications is contained in the present article:

### I. THE DISPUTE BETWEEN THE CUMBERLAND RAILWAY AND COAL COMPANY AND ITS EMPLOYEES.

IT will be remembered that a Board was established for the adjustment of the differences between the Cumberland Railway and Coal Company and its employees on July 30, and commenced its sittings on July 31, suspending them, however, on the following day because of a strike on the part of the employees concerned. The Board, after attempting to conciliate the disputing parties, and failing to do so, adjourned subject to the call of the Chairman. On September 9, the Board reconvened at the call of the Chairman, and proceeded to investigate the matters referred to it for adjustment.

Mr. P. S. Archibald, the member of the Board appointed on the nomination of the Company, notified the Chairman of the Board on September 12 that he considered the Board had no jurisdiction to proceed with the enquiry, and that he would not, therefore, continue to act as a member of the same. A number of witnesses were examined by the remaining members of the Board with regard to the matters which had been referred to it for adjustment and an interim report was prepared under date of September 13, which was duly received by the Minister of Labour.

### II. DISPUTE BETWEEN THE MONTREAL COTTON COMPANY AND THE EMPLOYEES AT VALLEYFIELD, QUE.—FINDINGS OF THE BOARD.

THE application for a Board of Conciliation and Investigation in connection with the differences above indicated was received in the Department on August 26, and reported in the issue of the *Labour Gazette* for September, the applicants being officers of the Federation of Textile Workers of Canada on behalf of the operatives concerned. It will be remembered that the application was made under Section 63 of the Industrial Disputes Investigation Act, 1907, which allows a reference under its provisions of a difference in any industry other than that of a mine or public industry, in the event of both parties to the said difference consenting to such reference, and the reference was made by the voluntary agreement of the parties concerned. The statement of differences referred for adjustment showed the same to be mainly of a technical character, and

to relate to the internal economy of the mill. The approximate estimate of the number of employees affected was 2,200, of whom 950 were males, including 250 below the age of 21. The reference to a Board of Conciliation and Investigation had been preceded by a strike of ten days' duration, which had been terminated by a joint invocation of the Act on the advice of officials of the Department, who had been requested to intervene in the dispute.

The establishment of the Board was proceeded with immediately, and was finally constituted as follows: Wilfrid Paquette, Montreal, recommended by the employees; Duncan McCormick, K. C., recommended by the employing company; and the Honourable Mr. Justice Fortin, of the Superior Court of Montreal, Chairman, appointed by the Minister, owing to the failure of

Messrs. Paquette and McCormick to agree on a recommendation. The Board met in Montreal on September 5, and decided to visit the premises of the Montreal Cotton Company at Valleyfield before proceeding with the enquiry, and accordingly visited Valleyfield on the following day. The enquiry was then proceeded with, occupying several days, and entailing the examination of a number of witnesses. The proceedings before the Board resulted in effecting an agreement between the parties to the differences, which was on September 17 signed by three representatives respectively of the employers and the employees. The signatories on behalf of the employing company were Messrs. S. H. Ewing, H. Markland Molson and Louis Simpson, President Vice-President and Manager respectively of the Montreal Cotton Company, and the signatories on behalf of the employees concerned were Messrs. Maurice Neveu, George Nightingale and Leandre Levack.

The report of the Board was dated at Montreal, September 20, and was unanimous, being signed by Thomas Fortin, Chairman, Duncan McCormick and Wilfrid Paquette.

A noteworthy feature of the agreement reached before the Board is the establishment of a permanent Committee of Conciliation "to avoid further differences between the employees and the Company, and to arrive at a prompt settlement of the same, if any should arise." To such Committee are to be referred from time to time all grievances that may arise between the employees and the Company, that are not disposed of to their satisfaction by reference to the foreman, superintendent or general manager, with the exception of a general increase or decrease of wages. With respect to the time during which the agreement shall hold, it was agreed that it should hold in any case until May 4, 1908, and subsequently until either party thereto should give to the other party a written notice of cancellation of the same. The agreement provided that "in case of disagreement as to the appointment of such third member then the two members shall submit three to

five names to the Minister of Labour, praying him to appoint such third member from the names submitted, and the person so appointed by the Minister of Labour shall be third member of the Committee." The Committee established by the Board consists of Mr. Maurice Neveu, weaver, representing the employees; Mr. H. Markland Molson, representing the employing Company; and Mr. James A. Robb, Mayor of Valleyfield; in case Mr. Robb cannot act as such member the following gentlemen to be successively requested to act, viz., Monseigneur Allard, Cure of Valleyfield, and Mr. Solyme Brodeur, Prothonotary, of the same place; the third member to be Chairman of the Committee.

The agreement reached before the Board was submitted before being signed to a general meeting of the employees at Valleyfield on September 17, and was unanimously approved in the following resolution, viz.

Whereas certain complaints had been submitted to Board of Conciliation under the Lemieux Law, and

Whereas a committee of representatives of the said workmen has followed the proceedings of the Board of Conciliation, and we have received explanations from them and from the member of the Board representing our interests.

It is therefore resolved unanimously that a Committee of representatives of the employees and the member of the Board representing our interests be authorized to sign the agreement concluded between the parties interested.

ISIDORE DION, *President.*

*Joint Secretaries* THOMAS CROOK

JOS. CHASLE.

It is a particularly gratifying fact that an agreement of so comprehensive a character, establishing machinery for the settlement of all differences that may occur in the future should have been reached in the case of an application referred for adjustment under the Act by consent of both parties concerned, and not relating to a dispute which comes directly within the scope of its machinery. The incident may well serve as a valuable precedent for the settlement by the same methods of other industrial differences, all of which can be brought within the scope of the Act by the mutual concurrence of the parties affected, leading thus to a wide extension of the usefulness of the Act.

The complete text of the report submitted by the Board and of the agreement effected is as follows:

**IN THE MATTER OF THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, AND OF A DISPUTE BETWEEN:**

**THE MONTREAL COTTON COMPANY, Valleyfield, Que.**

and

*Employer,*

**LOCAL UNIONS, NOS. 8, 9, AND 10, OF THE FEDERATION OF TEXTILE WORKERS OF CANADA.**

*Employees.*

To the Honourable Rodolphe Lemieux,  
Minister of Labour,  
Ottawa.

Sir:—

We, the undersigned, members of the Board of Conciliation and Investigation in the above matter, beg respectfully to submit the following report:

In pursuance of their appointment the members of the Board first met on the 5th instant, and, after being duly sworn and exchanging views as to the best method of dealing with the matter in dispute, they decided to visit the premises of the Company, in order to facilitate their understanding of the technical terms which might subsequently be used in the proceedings before them.

On the following day this visit took place, after which it was agreed that the Board should meet in Montreal, on the 10th instant, in order to see how far it was possible to dispose of the points in issue between the parties without an investigation.

At this meeting the Board went over all the matters in dispute, and after some discussion it appeared to them that it was hardly possible to come to any definite agreement upon any point without the presence of representatives of both parties, so an adjournment was made to the next day and summonses were sent to three representatives of the employees. It was further agreed that three representatives of the Company should also appear before the Board.

In the presence of these gentlemen every complaint was successively examined and discussed, and a proposed settlement upon each point was taken down.

This work was also continued the whole of the next day, when the 6th question was reached, and as it contained statements of fact which were not admitted it was agreed that witnesses should be examined on behalf of the employees the following day. On that day the proceedings were continued and 12 witnesses were examined by the members of the Board and the representatives of the parties.

The Board adjourned to meet again on the 16th inst. for the purpose of hearing more witnesses for the employees, and also whatever witnesses the Company might wish to produce on its behalf.

On the 16th instant the representatives of the parties declared that it appeared to them unnecessary to procure evidence upon points already established by the previous witnesses and after some discussion an agreement was finally reached upon the question then under examination, a result that consequently brought the investigation to a satisfactory termination.

The members of the Board had already informally discussed the suggestion contained in your letter of the 4th of September to the Chairman, with regard to the advisability of establishing a permanent Committee of Conciliation, and this was immediately taken up by the Board with the assistance of the representatives of the parties.

The result of the proceedings of the Board is to be found in the copy of the Agreement upon the whole

matter, duly signed by the parties, and which is transmitted to you with the present report.

You will find in that Agreement that the idea of the Permanent Committee has not only been adopted by the parties, but that the Committee has actually been established by the Board, with the consent of the parties and that it is at this moment in a position to act, if necessary.

Before being signed this agreement was submitted for approval to a full meeting of the employees, by Mr. Paquette, their representative on the Board, and was unanimously and heartily accepted.

All the proceedings have, by consent, been carried on privately and without the parties being represented by counsel as was at first proposed.

It was agreed that no information whatever should be given out to anyone before the conclusion of the proceedings before the Board and this understanding was observed by all.

The Board does not feel called upon to make any recommendation except perhaps to join in the prayer contained in the Deed of Agreement by which the Minister of Labour is asked to appoint a chairman to that Permanent Committee whenever it is necessary so to do.

Before concluding, the Board wishes to state that, although the proceedings were somewhat prolonged, they found that all parties seemed animated by a friendly spirit, and displayed great fairness in dealing with the matters involved in the dispute.

The Board feels justified in hoping that the settlement arrived at may be found satisfactory not only for the present but also, and possibly more particularly, for the future.

We have the honour to be Sir,

Your obedient servants,  
(Sgd.) THOMAS FORTIN,  
*Chairman.*

" DUNCAN McCORMICK,  
" WILFRID PAQUETTE.

Montreal, Sept. 20, 1907.

**IN THE MATTER OF THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, AND OF A DISPUTE BETWEEN:**

**THE MONTREAL COTTON COMPANY, Valleyfield, Que.**

*Employer.*

AND

**LOCAL UNIONS, NOS. 8, 9 AND 10, OF THE FEDERATION OF TEXTILE WORKERS OF CANADA.**

*Employees.*

**AGREEMENT OF THE PARTIES.**

**FIRST CLAIM.**—"That all employees working beyond regular hours shall receive 20 per cent. over their regular wages."

**AGREEMENT THEREUNDER.**—"That the following employees, to wit: those working in the cloth-room, bleachery, dyeing, finishing and mechanical department, which latter includes, blacksmiths, steam-fitters, tinsmiths, mechanics, carpenters, mill-wrights and painters, working beyond regular hours, shall receive 20 per cent. over their regular wages, from the day of the second pay after the signature of this agreement.

All employees in the other departments shall be subject to special arrangements with the management.

**SECOND CLAIM.**—"That the price list as arranged shall be posted in all departments at the door and in sight of the employees."

**AGREEMENT.**—"That the price lists for piece work shall be posted in all departments in sight of the employees."

THIRD CLAIM.—“That the construction of cloth woven shall be a part of the warp put in looms.”

AGREEMENT.—That the length, width, picks, counts and weaving price be stated upon the slasher ticket which accompanies the warp to the weaving-room.

FOURTH CLAIM.—“That a new system be devised whereby the weaver shall have the benefit of the cloth woven on his looms at the expiration of the fortnight.”

AGREEMENT.—That the new system as explained by Mr. Simpson whereby the weaver shall have the benefit of the cloth woven on his looms at the expiration of the fortnight is accepted.

FIFTH CLAIM.—“That certain foremen and other subordinate officials have treated the employees under their charge with partiality, and have dismissed some employees unfairly.”

AGREEMENT.—This complaint having been dismissed it was decided by mutual consent not to press the matter any further.

SIXTH CLAIM.—“That the 10 per cent. increase of wages promised by the Company in May last, was not granted to the whole of the employees, and that in a number of cases where it was granted, the character of the work was subsequently changed in such a way that the benefit of the increase was partly lost.”

AGREEMENT.—The parties having been fully heard on this complaint, and a certain number of witnesses having been examined on the part of the employees, it was agreed in order to avoid further expense and loss of time, as follows:—

(1) That the different cases mentioned by the witnesses with regard to the application of the increase of May last, be looked into by Mr. Paquette, on behalf of the employees and by Mr. Simpson on behalf of the Company and be adjusted by them.

(2) That in case of disagreement between Mr. Paquette and Mr. Simpson, the matters in disagreement be referred to the permanent Committee of Conciliation hereinafter established.

And in order to avoid further difference between the employees and the Company, and to arrive at a prompt settlement of the same, if any should arise, it is agreed that a permanent Committee of Conciliation be appointed, composed of three members, one of whom shall represent the Company and be a member of the Board of Directors of said Company; one member to be appointed by the employees from amongst themselves, and the third member to be chosen by the other two members, and to be a citizen of the County of Beauharnois.

In case of disagreement as to the appointment of such third member then the two members shall submit three to five names to the Minister of Labour praying him to

appoint such third member from the names submitted and the person so appointed by the Minister of Labour shall be third member of the Committee.

And it is hereby agreed that Mr. Maurice Neveu, weaver, be appointed a member of said permanent Committee of Conciliation to represent the employees, and Mr. H. Markland Molson, one of the Directors of said Company, be appointed a member of said Committee to represent the Company.

And it is hereby agreed by the said Messrs. Neveu and Molson that Mr. James A. Robb, Mayor of Valleyfield, be appointed third member of said Committee, and be respectfully prayed to act as such.

And in case Mr. Robb could not act as such member when necessary, the following gentlemen be successively requested to act; Monsiegnr Allard, Curé of Valleyfield, and Mr. Solyne A. Brodeur, Prothonotary, of same place. The third member shall be the chairman of the Committee.

To such Committee shall be referred from time to time all grievances that may arise between the employees and the Company, that are not disposed of to their satisfaction by reference to the foreman, superintendents, or general manager, with the exception of a general increase or decrease of wages.

It shall be the duty of said Committee to meet as promptly as possible, when called upon to do so, for the determination of any matter that will come before it

It is also decided that the present agreement shall remain in full force and effect between the parties until either of them shall give to the other party a written notice of cancellation of the same, but such notice shall not be given prior to May 4th, 1908.

Montreal, 17th September, 1907.

### III. METAL MINERS AT MOYIE, INVOKE THE ACT.

ON-September 11 the Department received an application on behalf of the employees of the Canadian Consolidated Mining and Smelting Company, working in and around the St. Eugene mine, a silver-lead mine situated at Moyie, B. C., for the establishment of a Board of Conciliation and Investigation to adjust differences between the said Company and its employees. The approximate number of men employed was placed at from 350 to 400. The nature and cause of the dispute was stated to be as follows: “That the said Company and its employees are unable to arrive at an agreement regarding the wages to

be paid for the different classes of labour in and around the above-mentioned mine.” The Board was duly constituted by the Minister as follows: viz.: Mr. S. S. Taylor, K. C., Nelson, B. C., recommended by the employees; Mr. J. A. Harvey, Cranbrook, B. C., recommended by the employing Company; and His Honor Judge Peter Wilson, Cranbrook, B. C., chairman, recommended by the foregoing members of the Board. Judge Wilson's appointment was dated September 23. The Department had not, at the end of the month, received information with regard to the proceedings before the Board.

#### IV BOARD ESTABLISHED TO ADJUST A DISPUTE AT HILLCREST, ALTA.

ON September 11 the Department received an application on behalf of the employees of the Hillcrest Coal and Coke Company of Hillcrest, Alta., for the establishment of a Board of Conciliation and Investigation to adjust differences between the said Company and its employees. The approximate number of men affected was placed at 70. The difference to be adjusted related to the wages and the hours of the men in the employment of the Company. On September 16 the Department received also an application on behalf of the employing Company for the establishment of a Board with respect to the same differences. The Minister considered the

two applications together and established a Board as follows: Mr. Frank H. Sherman, Taber, Alta., recommended by the employees; Mr. J. R. Macdonald, Hillcrest, Alta., recommended by the employing Company, and the Honourable C. W. Fisher, Speaker of the Legislative Assembly of Alberta, chairman, appointed by the Minister of Labour; the foregoing members of the Board having failed to agree on the recommendation of a third member. Mr. Fisher's appointment was dated September 24. The Department had not, at the end of the month, received information with regard to the proceedings of the Board.

#### V. DISPUTE AT HOSMER COAL MINES, B. C.

THE Department received on September 16 an application from the employees of the Hosmer mines, of Hosmer, B. C., for the establishment of a Board of Conciliation and Investigation for the adjustment of differences between the Company and its employees. The number of men concerned was estimated approximately at 100, and the questions at issue related to wages and conditions of labour generally in the mines named, in-

cluding the check-off system. The Minister in due course established a Board as follows, viz.: Mr. Frank H. Sherman, Taber, Alta., recommended by the employees; Mr. Frank B. Smith, Edmonton, Alta., recommended by the employing Company; His Honour Judge Wilson, Cranbrook, B. C., appointed on the recommendation of the foregoing members. The appointment of Judge Wilson was dated September 30.

#### VI. THE ROSAMOND WOOLLEN COMPANY DECLINE TO REFER DIFFERENCES UNDER THE ACT.

ON September 23, the Department received an application on behalf of the employees of the Rosamond Woollen Company, of Almonte, Ont., for the establishment of a Board of Conciliation and Investigation to adjust differences between the Company and its employees. The approximate number of men affected was placed at three hundred directly and indirectly. The dispute was stated to be as follows: A request by the warpers for an increase of wages was made on Tuesday, Sept. 10, which was ultimately refused. On the morning of Sept. 13, the warpers refused to go to work at the old wages, and the mill was practically closed down. The industry

concerned not being of a nature to allow of the direct application of the Industrial Disputes Investigation Act, 1907, the dispute in question could be referred for adjustment under the Act only by agreement on both sides, as provided by section 63. On receiving the application made on behalf of the employees, the Department communicated immediately with the employing company to ascertain if it was willing to refer the differences for adjustment in this way. The employing company, in a letter dated September 28, declined to consent to the differences in question being referred under the special provision of the Act.

## VII. CONVICTION UNDER PENAL CLAUSES OF ACT AT COBALT.

ON September 6 and 7, James McGuire, President of the Cobalt Miners' Union, was brought before the Police Magistrate at Cobalt, Ont., on a charge of inciting the employees of the Nipissing Mining Company to go on strike, contrary to section 60 of the Industrial Disputes Investigation Act. The case was heard before Mr. R. H. C. Browne, police magistrate at Cobalt, who has furnished a statement of the proceedings to the Department, in accordance with section 67 of the Act. Mr. Browne, in his communication, states as follows: "McGuire was found guilty and fined

\$500.00, and in default of payment, six months with hard labour. The proceedings before me were conducted by Crown Attorney Browning of North Bay. There was another charge against the said McGuire for inciting the employees of the Cobalt Lake Mining Company to go on strike; eleven charges against Robert Roadhouse for inciting employees of the different mines to go on strike, and two charges against William Hewitt for going on strike. In all these cases I have reserved decision pending the appeal to the High Court in the McGuire case."

#### Minister of Labour appoints Chairman of Joint Committee at Fernie, B.C.

ON September 9, the Honourable the Minister of Labour received a communication stating that the joint committee of Western Coal Operators' Association and the employees of the Association having failed to agree on certain questions, the Minister was requested to appoint a chairman of the said committee, as provided by clause c of the agreement reached between the Western Coal Operators' Association and the United Mine Workers of America, District No. 18, on May 4 last. That portion of the agreement in question relates to the settlement of disputes or grievances arising under the agreement or under any local agreement made in connection therewith, and provides that:—

"In case of any local dispute arising in any mine, and failure to agree, between the Pit Boss and any employee the Pit Committee and Mine Superintendent shall endeavour to settle the matter, and if they agree their decision shall be final."

Clause c of the agreement under which the Minister was requested to name the chairman of a joint committee is as follows:—

(c) In the event of the failure of the Pit Committee and the Mine Superintendent to settle any dispute so referred to them, as well as in the event of any other dispute arising, the matter in dispute shall be referred to the General Superintendent or General Manager of the Company and the Officers of District No. 18, U.M.W. of A., for settlement, and if they agree their decision shall be final. Should they fail to agree, it shall be referred to a Joint Committee, said Committee to be made up of three operators appointed by the Western Coal Operators Association and three miners appointed by District No. 18, of the U.M.W. of A., for settlement. If they agree their decision shall be binding upon both parties. A majority of the full Committee must vote in favour of any action before it can be declared carried. In the event of failure to agree, the Committee shall endeavour to select an independent chairman, and failing to agree upon an independent chairman, the Minister of Labour shall be asked to appoint such chairman; the decision of the Committee thus constituted shall be binding upon both parties. The Joint Committee, when necessary, shall meet on the second Monday of each month.

The Minister, on September 18, appointed Rev. Hugh R. Grant of Fernie, chairman of the joint committee.

LEGISLATION IN CANADA WITH REGARD TO MECHANICS' AND WAGE  
EARNERS' LIENS.\*

Registration of Mechanics' Liens.

THE Acts of the several provinces give full instructions as to procedure to be followed in registering a mechanic's lien. In *Nova Scotia*, claims for liens may be registered in the registry of deeds for the district in which the land is situated (1). A claim for a mechanic's lien must state, in *Nova Scotia*:—(a) the names and residences of the persons claiming the lien, of the owner of the property to be charged, and of the person for whom the work was performed or the material furnished; (b) a brief description of the work performed or the material furnished; (c) the sum claimed; (d) a description of the land to be charged; (e) the date of expiry of the period of credit, if any, agreed upon by the lien holder for payment of his services or materials. A schedule is appended to the Act setting forth the form in which the above particulars after having been verified by affidavit, must be filed. It is further explained that where the lien is against the lands of a railway company a sufficient description of the lands will be to state them to be lands of such company (2). Only a substantial compliance with these provisions is required and no lien is invalidated by reason of failure to comply with them to the letter, unless an owner, contractor, sub-contractor, mortgagee or other person is prejudiced thereby, and then only to the extent to which he is

prejudiced, though nothing in this provision is to be construed as dispensing with the need of registration (3). The claim when registered is to appear as an encumbrance upon the land (4). Where a claim for a lien is registered as above the person entitled to the lien is to be deemed a purchaser *pro-tanto*, but the Registry Act is not generally to apply to mechanics' liens (5).

The provisions of the *Prince Edward Island* act with regard to registration are identical with the above except that no mention of the date of expiry of the period of credit is required in the claim. The reference to the method of describing the lands of a railway company is also omitted. It is added, however, that when such a statement is registered the person entitled to the lien is to be deemed a purchaser *pro-tanto* and within the provisions of all acts relating to the registration of deeds (6). The registrar is required to enter the claim in a book kept for the purpose as an encumbrance against the land, but the Registration Act of the province does not generally apply to the recording of mechanics' liens (7).

In *New Brunswick* the contents and form of a claim for a mechanic's lien are the same as in *Nova Scotia*, except that the provision relating to the description of railway companies' lands is omitted (8). The claim is to be filed as an encumbrance against the land and entered in a special "Mechanics' lien book" (9).

The *Quebec* statute prescribes the form of the notice to be filed which must set forth the nature and amount of the claim and describe the immovable. In registering a claim of this character it is sufficient to enter opposite the official number of the *cadastre* which des-

(3) R. S., N. S., Chap. 171, Sec. 17.

(8) C. S. N. B., chap. 147, sec. 3.

(9) C. S. N. B., chap. 147, sec. 17.

(\*) In a previous article dealing with legislation in Canada with regard to mechanics and wage earners' liens, published in the *Labour Gazette* for September, 1907, at page 307, the origin and nature of mechanics' liens were described in detail, with special reference to the manner in which such liens attach to property, the amount to which liens are limited, the protection of the interests of owners, the priority of liens and the special security afforded for mechanics' liens. In the present article, the provisions of the law with regard to the registration of liens and the expiry, discharge, consolidation and transmission of liens are dealt with, leaving for treatment in a further article the procedure by which mechanics' liens may be realized in the several provinces.

(1) R. S., N. S., Chap. 171, Sec. 14.

(2) R. S., N. S., Chap. 171, Sec. 15.

cribes the immovable, if the *cadastre* be deposited or opposite the title of the registered deed, if the *cadastre* be not deposited, the name of the claimant and the amount due at the time the claim is filed. The claim is to be made out in duplicate, one copy to remain in the archives of the registry office and the other to be delivered to the creditor with the registrar's certificate thereon. The creditor within three days of the date of registration must give a written notice to the proprietor of the immovable, or to his agent, if he cannot be found<sup>(10)</sup>.

The provision of the *Ontario* act in this connection is identical with that of Nova Scotia, except that in providing for a description of the land against which the lien is to be charged, it is stipulated that the claim must state where the land is registered under the Land Titles Act and contain a reference to the number of the parcel of land and to the register in which the land is registered<sup>(11)</sup>. As in Nova Scotia, only a substantial compliance with the provisions of the act is required, though nothing in this proviso is to be construed as to dispense with the registration of the lien<sup>(12)</sup>. The lien is to appear as an encumbrance against the land. The registrar on filing the claim is not required to copy it in any registry book, but must number and index it under the description "mechanics' lien"<sup>(13)</sup>. The holder of a registered lien is to be regarded as a purchaser *pro-tanto*. In Ontario the Registry Act does not generally apply to mechanics' liens.<sup>(14)</sup>

In *Manitoba* a claim for a mechanics' lien may be registered in the Land Titles Office in which other instruments affecting the land are registered, if the lands affected have been brought under the operation of the Real Property Act. If otherwise the statement must be registered in the Registry or Land Titles Office for the district in which the lands are situated. If the land is partly under the operation of the Real Property Act

and partly not, each portion is affected only by the registration filed in the proper office. In all other respects the provisions of the Manitoba act in regard to registration are identical with those of Ontario, except that no special method of describing railway companies' lands is enjoined<sup>(15)</sup>.

In *Saskatchewan*, claims of mechanics' liens may be deposited in the Land Title Office in the registration district in which the lands are situated. The particulars set forth in the claims are to be substantially the same as in Nova Scotia and must be verified by the affidavit of the claimant or his agent<sup>(16)</sup>. Where a claim is so deposited the person entitled to the lien is to be deemed a purchaser *pro-tanto*. The registrar in filing the claim may describe it as a "mechanics' lien"<sup>(17)</sup>.

In *Alberta*, the person claiming a mechanics' lien must file in the Land Titles Office of the land registration in which the land is situate, or in the office of the Clerk of the Superior Court of the province in the judicial district in which the land lies, an affidavit stating the name and residence of the claimant, the owner of the property or interest to be charged, particulars with regard to the kind of works or improvements done or made, the time the work was discontinued, the sum owing and when due, and the description of the property to be charged. Registrars are instructed to keep printed forms for such affidavits in blank, with an alphabetical index of all claimants of liens and the persons against whom the liens are claimed. The lien is to be described as a "mechanics' lien", and must be for at least \$20. Upon the filing of an affidavit as above the claim must be entered as an incumbrance against the land therein described. As in Nova Scotia, only a substantial compliance with the above provisions is required<sup>(18)</sup>.

In filing a mechanics' lien in *British Columbia* particulars must be given under oath as to the name of residence

<sup>(10)</sup> Que. stat. 1895, chap. 42, sec. 3.

<sup>(11)</sup> R. S. Ont., 1897, chap. 153, sec. 19.

<sup>(12)</sup> R. S. Ont., 1897, chap. 153, sec. 20.

<sup>(13)</sup> R. S. Ont., 1897, chap. 153, sec. 20, sub.sec. 3.

<sup>(14)</sup> R. S. Ont., 1897, chap. 153, sec. 21.

<sup>(15)</sup> R. S. Man., 1902, chap. 110, secs. 14-19.

<sup>(16)</sup> C. O. N. W. T., 1898, chap. 59, sec. 16.

<sup>(17)</sup> C. O. N. W. T., 1898, chap. 59, sec. 19.

<sup>(18)</sup> Alberta statutes, 1906, chap. 1, secs. 13 and 14.

of the claimant<sup>(19)</sup> and of the owner of the property to be charged, the kind of work performed, the time at which the work was finished or discontinued, the sum claimed to be owing, together with a description of the property to be charged. This affidavit may be filed as a lien against the property, every County Court Registrar being required to have a supply of printed forms for the above affidavits and to keep an alphabetical index of all claimants of liens and of persons against whom liens are claimed to be open for inspection during office hours. It is further enacted, as in the case of Nova Scotia, Ontario and Manitoba, that only a substantial compliance with the provisions of the law in this respect is required and that no lien shall be invalidated by reason of failure to comply with any of the requisites thereof<sup>(20)</sup>.

An important additional provision of the British Columbia act is one requiring the owner and contractor where the work is over \$500 in value to file in the nearest county court registry office a signed statement setting forth the particulars of the work to be done, the names and addresses of the owner and contractor, the estimated price of the work and other details. Any affidavit made in filing a lien as above, which is in accordance with this statement, is to be deemed sufficient to sustain the lien even though the facts of the case should vary therefrom, and where a statement is not filed no affidavit is to be regarded as insufficient if it leaves no doubt upon the mind of the judge as to the persons and work it purports to describe<sup>(21)</sup>.

By a special provision in *British Columbia*, county court registrars are required to transmit copies of all lien records to the Land Registry Offices of the district in which the premises affected are situated<sup>(21)</sup>.

#### Time of Registration.

In *Nova Scotia* a claim for a lien by a contractor or sub-contractor may be

registered before or during the performance of the contract, or within 30 days of its completion. A claim for a lien for materials or machinery furnished may also be registered before or during the furnishing thereof, or within 30 days of furnishing the last materials. In the case of wages a lien may be registered at any time during the performance of the work for which the wages are claimed, or within 30 days after the last day's work for which the lien is claimed<sup>(22)</sup>.

In *New Brunswick* where a lien is for wages the claim may be registered at any time within 30 days after the last day's labour for which the wages are payable<sup>(23)</sup>. In other cases the claim may be registered before the commencement or during the progress of the work, or within 30 days after the completion thereof, or the supplying or placing of the machinery<sup>(24)</sup>.

The provisions of the *Ontario* act with regard to time of registering liens are substantially the same as in *Nova Scotia*, except that a special sub-section is inserted to the effect that a claim for a lien for services may be registered at any time during the performance of the service, or within 30 days after its completion<sup>(25)</sup>. By an addition to the act passed in 1902, it was provided that in the case of a contract carried out under the supervision of an architect, engineer or other person upon whose certificate payments are to be made, the claim for a lien by a contractor may be registered during the performance of the contract, or within 30 days thereafter, or within seven days after the architect has given his final certificate, or has upon application to him by the contractor refused to give a final certificate<sup>(26)</sup>.

In *Manitoba* all claims for liens by contractors or sub-contractors must, as a rule, be registered before or during the performance of the work, or within 30 days of its completion. Liens for materials must be similarly registered. Liens for services may be registered at any time during the performance of the

(19) R. S. N. S., 1900, chap. 171, sec. 20.

(20) C. S. N. B., 1903, chap. 147, sec. 19.

(21) C. S. N. B., 1903, chap. 147, sec. 20.

(21) R. S. B. C., chap. 132, sec. 29.

service, or within 30 days after its completion, and for wages at any time during the performance of the work for which wages are claimed, or within 30 days after the last day's work for which a lien is claimed.<sup>(27)</sup>

In *Saskatchewan*, liens for wages may be registered at any time within 30 days after the last day's labour, for which the wages are payable, or at any time within 30 days after the completion of the construction in question, so that the whole period shall not exceed 60 days from the last day's labour. In other cases the claim may be deposited before or during the progress of the work, or within 30 days of the completion thereof, or the date of supplying material.<sup>(28)</sup>

In *Alberta* and *British Columbia* a lien expires in 31 days after the completion of the work unless registered, except in case of a claim for wages in or about a mine, when the limit is extended to 60 days provided that a workman is not considered as having ceased work on a job, if he has been employed elsewhere by the same contractor in the meantime<sup>(29)</sup>.

In *Quebec*, the privilege of priority dates from the registration of a claim<sup>(30)</sup>

### Fees for Registration.

The fees to be charged by registrars for filing mechanics' liens are as follows: In *Nova Scotia* and *Man toba*, 25 cents<sup>(31)</sup>, in *Prince Edward Island*, \$1.00<sup>(32)</sup>, and in *New Brunswick* and *Ontario* 25 cents, except where several parties join in one claim when a further fee of 10 cents for every person after the first is charged<sup>(33)</sup>. In *Saskatchewan* the fee must be "a proper fee"<sup>(34)</sup>. In *Alberta* and *British Columbia* the amount of the fee is not stated in the act.

<sup>(27)</sup> R. S. Man., 1902, chap. 110, sec. 20.

<sup>(32)</sup> P. E. I. stat., 1879, chap. 8, sec. 5.

<sup>(33)</sup> C. S. N. B., 1903, chap. 147, sec. 17; sub-sec. 2; R. S. Ont., 1897, chap. 153, sec. 2.

<sup>(34)</sup> C. O. N. W. T., 1898, chap. 59, sec. 18.

### Expiry of Mechanics' Liens.

In *Nova Scotia*, liens which are not registered within the time above specified, absolutely cease to exist unless an action has been commenced in the meantime to realize the claim, and a certificate duly registered in the registry of deeds in the district in which the lands are situated<sup>(35)</sup>. Registered liens cease to exist at the expiration of 90 days after the service has been performed or the materials furnished, or the expiry of the period of credit where such is mentioned in the claim registered, unless in the meantime proceedings are taken to realize the claim and a certificate registered as required by the act<sup>(36)</sup>.

In *Prince Edward Island*, liens which have not been duly registered cease to exist after the expiration of 30 days after the work has been completed or materials furnished unless proceedings are instituted to realize the claim, and a certificate duly registered in the office of the Registrar of Deeds<sup>(37)</sup>. Registered liens cease to exist after the expiration of 90 days after the work has been completed or the material furnished, or the period of credit expired unless proceedings have been taken in the meantime to realize the claim under the provisions of the act and the certificate duly registered in the register of deeds<sup>(38)</sup>.

In *New Brunswick* liens which have not been registered absolutely cease to exist on the expiration of the time limit set for registration, unless proceedings have been instituted and are being prosecuted without delay to realize the claim and a certificate of the pending of such proceedings is duly registered<sup>(39)</sup>. Every lien which has been duly registered ceases to exist after the expiration of 90 days after the work has been completed or materials furnished, or the period of credit expired unless in the meantime proceedings are instituted, and are being prosecuted without delay and a certificate of such proceedings has

<sup>(35)</sup> R. S. N. S., 1900, chap. 171, sec. 21.

<sup>(36)</sup> R. S. N. S., 1900, chap. 171, sec. 22.

<sup>(37)</sup> P. E. I., stat., 1879, chap. 8, sec. 21.

<sup>(38)</sup> P. E. I., stat., 1879, chap. 8, sec. 22.

<sup>(39)</sup> C. S. N. B., 1903, chap. 147, sec. 21.

been duly registered <sup>(40)</sup>. After six months the registration of a lien in New Brunswick ceases to have any effect unless the lien is again registered within the same period, unless in the meantime proceedings have been instituted to realize the claim and are being prosecuted without delay, and a certificate of the pendency of such proceedings has been registered <sup>(41)</sup>. Where no period of credit is stated, the lien ceases to exist after 90 days unless proceedings have been instituted and a certificate filed <sup>(42)</sup>.

Liens in *Ontario* which have not been duly registered absolutely cease to exist after the time allowed for registration unless an action has been taken to realize the claim, and a certificate thereof, duly registered in the Registry Office of the registration division, or, where the land is registered under the Land Titles Act, in the Land Titles Office for the locality wherein the lands are situated <sup>(43)</sup>. Registered liens cease to exist after the expiration of 90 days after the work has been performed, as in *Nova Scotia* and *New Brunswick* <sup>(44)</sup>. Mechanics' liens expire at the end of six months unless renewed, except proceedings have been instituted in the meantime to realize the claim and a certificate duly registered in the proper registry office <sup>(45)</sup>. Where there is no period of credit named the lien ceases to exist after the expiration of 90 days after the work has been commenced or the material furnished unless an action has been instituted and a certificate registered <sup>(46)</sup>.

Liens which have not been registered in *Manitoba* cease to exist on the expiration of the time limit above defined unless an action to realize the claim has been instituted in the meantime and a certificate of *lis-pendens* with respect thereof registered in the proper office. Where liens have been duly registered they cease to exist after the expiration of 90

days following the completion of the work or the furnishing of material, or the expiry of the period of credit, unless an action is instituted and a certificate filed as in the above mentioned provinces <sup>(47)</sup>.

In *Saskatchewan*, liens for wages may be registered within 30 days after the last day's labour for which the wages are payable, or at any time within 30 days of the completion of the construction so that the whole period shall not exceed 60 days from the last day's labour. Liens for wages are not valid unless they have been duly registered. In other cases the claim may be disputed before or during the progress of the work or within 30 days after its completion or the date of supplying the material or machinery <sup>(48)</sup>.

In *Alberta* and *British Columbia*, mechanics' liens, unless registered, expire, as above stated, after 31 days after the completion of the work, or after the claimant has ceased to work thereon, though if the labourer has in the meantime been employed on any other work by the same contractor prior to the completion of the original work, he is not to be held to have ceased work. In the case of mines, the time limit is extended to 60 days. Registered liens expire after 30 days of the filing unless proceedings to realize have been begun <sup>(49)</sup>.

#### Discharge of Mechanics' Liens.

In *Nova Scotia*, *New Brunswick*, *Ontario*, *Manitoba* and *Saskatchewan*, liens may be discharged by a receipt signed by the claimant or his agent in writing acknowledging payment and verified by affidavit. The registration fees for the discharge are the same as for registering a claim <sup>(50)</sup>. In *New Brunswick* the receipt must be numbered and entered by the registrar in the Mechanics' Lien Book; in *Ontario* the receipt must be numbered and entered

<sup>(40)</sup> C. S. N. B., 1903, chap. 147, sec. 22, sub-sec. 1.

<sup>(41)</sup> C. S. N. B., 1903, chap. 147, sec. 22, sub-sec. 2.

<sup>(42)</sup> C. S. N. B., chap. 147, sec. 23.

<sup>(43)</sup> R. S. Ont., 1897, chap. 153, sec. 23; see also chap 138, sec. 69.

<sup>(44)</sup> R. S. Ont., 1897, chap. 153, sec. 24.

<sup>(45)</sup> R. S. Ont., 1897, chap. 153, sec. 24, sub-sec. 2.

<sup>(46)</sup> R. S. Ont., 1897, chap. 153, sec. 25.

<sup>(47)</sup> R. S. Man., 1902, chap. 110, secs. 21 and 22.

<sup>(48)</sup> C. O. N. W. T., 1898, chap. 59, secs. 21 and 22.

<sup>(49)</sup> R. S. B. C., 1897, chap. 132, sec. 8; B. C. stat., 1900, chap. 20, sec. 12; Alta., S. 1906, chap. 21, secs. 13 and 35.

<sup>(50)</sup> R. S. N. S., 1900, chap. 171, sec. 24, sub-sec. 1; C. S. N. B., 1903, chap. 147, sec. 25; R. S. Ont., 1897, chap. 153, sec. 27; R. S. Man., 1902, chap. 110, sec. 24; C. O. N. W. T., 1898, chap. 59, sec. 28; see also above.

but need not be copied in any book, though the registrar must enter against the entry of the lien to which the discharge relates the word "discharged" and state the registration number of the discharge. In *Saskatchewan*, the receipt must be numbered and entered but need not be copied in a book. In the same provinces and in *Prince Edward Island* the court or judge having power to try an action to realize a lien may, upon application, receive security or payment into court in lieu of the amount of the claim and costs, and may, thereupon, order that the registration of the lien be vacated. The court or judge is also given power to vacate the registration upon any other ground<sup>(51)</sup>. The statutes of *Nova Scotia* and *Ontario* also contain in this connection a section stating that where a certificate of proceedings taken to realize a lien has not been duly registered and an application is made to effect registration after the time for registration of such certificate has lapsed, the applicant shall not be required to give notice of the application to the person claiming the lien and the order vacating the lien may be made *ex-parte* upon production of the certificate of the registrar certifying the facts entitling the applicant to the order<sup>(52)</sup>.

In *Nova Scotia*, *Ontario*, *Manitoba* and *British Columbia*, the taking of any security, promissory note or other acknowledgment in recognition of the claim, or the giving of time for the payment of the claim, or the taking of any proceedings for the recovery of the claim, do not in any way prejudice the mechanics' lien unless an express agreement in writing, signed by the lien holder, is given to that effect. Provided, however, that no person who has extended the time for payment may obtain the benefit of this provision unless an action is commenced within the proper time and a certificate registered that such proceed-

ings have been duly taken, though no further proceedings may be taken until the expiration of the extension of time; and provided also that where an action is commenced by any person to enforce the lien upon the same property, payment of the claim may be insisted upon as if no extension had been given<sup>(53)</sup>.

In *New Brunswick* and *Saskatchewan*, the registration of all discharges of liens are to be at the cost of the contractor unless the court or judge otherwise orders<sup>(54)</sup>.

A person against whose property a lien has been registered in *Alberta* may, if hardship or inconvenience is experienced thereby, call upon the opposite party to show cause why the lien should not be cancelled upon sufficient security being given. On the return of the summons to this effect, cancellation of the lien may be ordered. Where proceedings to enforce a lien have arisen from the failure of an owner or a contractor to fulfill the terms of his contract, the latter may be ordered to pay the costs of the proceedings in addition to the amount of the contract or wages due<sup>(55)</sup>.

When the amount due in respect of a mechanics' lien has been ascertained and paid into court, in *British Columbia*, or the property has been sold in order to satisfy the claims of the lienholders, or if the lien has otherwise ceased to exist, the county court Registrar must cancel the lien<sup>(56)</sup>.

#### Consolidation of Liens.

The *Nova Scotia* and *Manitoba* statutes provide that claims for liens may include claims against any number of properties and that any number of persons claiming liens on the same property may unite for the purpose of bringing action. It is required, however, that when more than one lien is included in a claim in this manner each lien has to be verified

<sup>(51)</sup> R. S. N. S., 1900, chap. 171, sec. 24, sub-secs. 2 and 3; C. S. N. B., 1903, chap. 147, sec. 27; P. E. I. stat., 1879, chap. 8, sec. 24; R. S. Ont., 1897, chap. 153, sec. 27, sub-secs. 2 and 3; R. S. Man., 1902, chap. 110, sec. 24, sub-secs. a and b; C. O. N. W. T., 1898, chap. 59, sec. 26, sub-secs. 7 and 8.

<sup>(52)</sup> R. S. N. S., 1900, chap. 171, sec. 24, sub-sec. 4; R. S. Ont., 1897, chap. 153, sec. 27, sub-sec. 4.

<sup>(53)</sup> R. S. N. S., 1900, chap. 171, sec. 25; R. S. Ont., 1897, chap. 153, sec. 28; R. S. Man., 1902, chap. 110, sec. 24, sub-sec. c; B. C. stat., 1900, chap. 20, sec. 25.

<sup>(54)</sup> C. S. N. B., 1903, chap. 147, sec. 29; C. O. N. W. T. 1898, chap. 59, sec. 29.

<sup>(55)</sup> Alberta statutes, 1906, chap. 1, secs. 25, 26, 27 and 28.

<sup>(56)</sup> B. C. stat., 1900, chap. 20, sec. 19.

separately by affidavit <sup>(57)</sup>. Where more than one action is brought to realize liens against the same property the trial judge may, on the application of any interested party, consolidate them into one action, and may give the conducting of the consolidated action to any of the plaintiffs in his discretion <sup>(58)</sup>.

In *Prince Edward Island* and *Saskatchewan*, also, any number of lienholders may join in one suit, and all suits brought by a lienholder are understood as being brought on behalf of all lienholders of the same class. In the event of the death of a plaintiff, or his neglect to proceed the suit may, with the consent of the court, or on other terms that may be deemed just and reasonable, be continued by any other lienholder of the same class <sup>(59)</sup>.

In *New Brunswick* a claim for wages may include the claims of any number of wage earners who choose to unite for the purpose, each claimant being required to verify his claim by affidavit, though it is unnecessary in each case to repeat the facts set forth in the original claim <sup>(60)</sup>. Any number of lienholders may join in one action for the recovery of a lien, and proceedings brought by any lienholder must be regarded as having been brought on behalf of all lienholders of the same class who have registered their liens before or within 14 days after the commencement of the action, or who have within the same period, or any other time as may be allowed for the purpose, file with the judge of the County Court where the proceedings have been brought a statement of their respective claims <sup>(61)</sup>. Where separate proceedings have been instituted by lienholders the judge may consolidate them and give such directions as to carrying on the same as he may deem desirable <sup>(62)</sup>.

<sup>(57)</sup> R. S. N. S., 1900, chap. 171, secs. 16 and 28, sub-sec. 3; R. S. Man., 1902, chap. 110, secs. 16 and 28.

<sup>(58)</sup> R. S. N. S., 1900, chap. 171, sec. 32; R. S. Man., 1902, chap. 110, sec. 33.

<sup>(59)</sup> P. E. I. stat., 1879, chap. 8, sec. 16; C. O. N. W. T., 1898, chap. 59, sec. 17; C. S., 1906, chap. 21, secs. 18 and 15.

<sup>(60)</sup> C. S. N. B., 1903, chap. 147, sec. 16.

<sup>(61)</sup> C. S. N. B., 1903, chap. 147, sec. 71, sub-sec. 1.

<sup>(62)</sup> C. S. N. B., 1903, chap. 147, sec. 71, sub-sec. 2.

In *Ontario* it is provided that any number of lienholders claiming liens on the same property may join in an action, similarly any action brought by a lienholder is understood to be taken on behalf of all other lienholders of the same class on the property in question <sup>(63)</sup>. Judges are given power to consolidate actions as in *New Brunswick* and to give the conduct of the consolidated action to any plaintiff that may be thought suitable <sup>(64)</sup>.

The *Alberta* and *British Columbia* law provides for the consolidation of liens as in the other provinces; it is added, however, that any moneys realized in a suit must be distributed among the lienholders in the order and manner elsewhere provided in the statute, and that lienholders not originally joined may be made a party by order of the judge upon *ex-parte* application supported by affidavit stating particulars of the claim. Owners or contractors against whom suits in support of liens have been brought in *British Columbia*, must apply to have the cases consolidated or be liable for the costs of each additional suit, though if they have complied with the statute in this respect they are not to be liable for any greater sum than has been agreed upon to be paid by the contractor. In a case where two or more actions have arisen in connection with the same contract or work the court may, on the application of any interested person, consolidate all the actions and may make such order as to the cases as he may think fit <sup>(65)</sup>.

#### Transmission of Liens.

In the event of the death of a lienholder it is provided in *Nova Scotia*, *Prince Edward Island*, *New Brunswick*, *Ontario*, *Manitoba*, *Saskatchewan* and *Alberta*, that his right of lien shall pass to his personal representatives. It is also provided in these provinces that the right of a lienholder may be assigned by

<sup>(63)</sup> R. S. Ont., 1897, chap. 153, sec. 32.

<sup>(64)</sup> R. S. Ont., 1897, chap. 153, sec. 37.

<sup>(65)</sup> R. S. B. C., 1897, chap. 132, sec. 13, 14 and 15; Alta. S., 1906, chap. 21, secs. 18, 19, and 20.

instrument in writing <sup>(66)</sup>. In *Alberta* and *British Columbia* a similar provision with regard to the assignment of liens is made subject to the provision requiring contractors in cases where the contract price exceeds \$500 to post upon the works a copy of the receipted pay-roll between 12 and 1 p. m. on the first day after pay-day and to deliver the original pay-roll to the owner with a receipt in full from each labourer, no payment by the owner without the delivery of the pay-roll being valid for the purpose of diminishing a lien. Assignments by a contractor are not valid in this connection against a mechanics' lien <sup>(67)</sup>.

#### Payment of Woodmen's Wages in Alberta and British Columbia.

Special provisions are inserted in the *Alberta* and *British Columbia* Acts to govern contracts entered into for the furnishing of timber or logs in the getting out of which the employment of labour is involved. It is required that before any payment for the logs is made the contractor supplying the logs must produce a pay-roll showing the wages of the woodmen employed in getting out the timber. If it appears on this return that the wages of all labourers engaged in the work have not been paid in full, the person to whom the logs are furnished must retain out of his contract price a sufficient amount to meet the claims of the workmen. Persons making a payment on a contract without requiring the production of a pay-roll, as above des-

<sup>(66)</sup> R. S. N. S., 1900, chap. 171, sec. 23; C. S. N. B., 1903, chap. 147, sec. 24; P. E. I. stat., 1879, chap. 8, sec. 17; R. S. Ont., 1897, chap. 153, sec. 26; R. S. Man., 1902, chap. 110, sec. 23; C. O. N. W. T., 1898, chap. 59, sec. 27; A. S., 1906, chap. 21, sec. 15.

scribed, are held personally liable for the amount that is owing to any workman or labourer (68).

#### Mechanics' Liens on Chattels.

The statutes of *Nova Scotia*, *New Brunswick*, *Ontario*, *Saskatchewan*, *Alberta*, and *British Columbia* contain a provision whereby a mechanic or other person who has bestowed money, skill, or materials upon a chattel, by way of altering or improving it, or otherwise increasing its value, is entitled to a lien upon the chattel to the extent of the improvement in question. If the amount to which he is entitled remains unpaid for three months after the debt is justly due, he may sell the chattel by auction after a week's notice (two weeks' notice is required in *British Columbia*, and one month in *Saskatchewan* and *Alberta*) by advertisement in a local newspaper, or by posters in three or more public places adjacent to the place of sale. Any surplus left is to be paid over to the person entitled thereto. The right of selling in this manner continues only while the lien exists, and the owner must be duly notified in writing prior to the holding of the sale (69).

In *Quebec*, any one who has made improvements or additions to a moveable object for which he is entitled to be reimbursed may retain the object until he has been paid, without prejudice to his personal remedy (70).

(To be Continued).

### THE TRADES AND LABOUR CONGRESS OF CANADA—TWENTY-THIRD ANNUAL CONVENTION.

THE twenty-third annual convention of the Trades and Labour Congress of Canada opened in Winnipeg, Man., on Monday September 16th, in the assembly hall of the Provincial Legislature. At the opening session Mr.

Kempton McKim, president of the Winnipeg Trades and Labour Council, welcomed the delegates on behalf of the organized wage-earners of the city. Hon. R. P. Roblin, premier of Manitoba, extended greetings on behalf of the Pro-

vince of Manitoba, and a welcome from the City of Winnipeg was offered by acting Mayor Ald. Davidson. Mr. Robt. S. Maloney, of Lawrence, Mass., fraternal delegate from the American Federation of Labour, and Mr. R. C. Owen of Edmonton, Alta., fraternal delegate from the Canadian Society of Equity, addressed the convention at the opening meeting, as did also Mr. Horace J. Jaxon, of Chicago, Ill., representative of the Western Federation of Miners.

The report of the Credential Committee showed that 149 delegates were entitled to seats at the convention, and that all the provinces, with one exception, were represented. Twenty-nine delegates, representing sixteen trades and labour councils and 118 representing 89 trades unions, were present. There were also two fraternal delegates.

#### Executive Officers' Report.

The following is a summary of the report of the Executive Committee of the Congress as submitted to the convention:—

After referring to the progress of labour organization during the past year, the report dealt with the question of immigration into Canada, and called attention to instances of workingmen having been sent to this country under false representations as to the condition of the labour market.

An account was given of an interview held by the Committee with members of the Federal Government, at which the subjects of immigration, the appointment of a separate Minister for Labour, technical education, N. W. Mounted Police, the pay of letter carriers, fair wages, and the Lord's Day Act were dealt with, and arguments presented in favour of the 8-hour bill and against the bill to punish international union officers who interfere in Canadian industrial disputes. It was stated that the interview was a satisfactory one.

In reference to the Industrial Disputes Investigation Act, which was passed at the last session of the Dominion Parliament, the executive reported that after careful consideration hearty endorsement was given to the

principle of the measure, and that the act had already been successfully tested.

Attention was directed to the refusal of certain iron and steel firms to tender on public works because the specifications called for the "union or prevailing" rate of wages. The executive expressed the opinion in this connection that legislation should be sought that would make it impossible for firms to unfairly discriminate against organized labour.

The number of private detective offices operated as money making institutions was pointed out, and the necessity for legislation limiting the powers of these offices alleged. It was recommended that any information calculated to confirm the opinion that these agencies are the instigators of lawlessness be forwarded to the secretary.

Under the heading of "Union Label Legislation" the recommendation was made that trades and labour councils apply for legislation from the various provincial governments to grant power to municipal councils to pass by-laws making it mandatory to place the union label on articles required for use in public institutions, and that the executive committee of the various provinces cooperate as far as possible in such effort.

Reference was made to the success of the International Typographical Union in securing the 8-hour day for its members and to the election of a labour member to the Ontario Legislature.

The report concluded with references to the decease of four prominent members in the labour movement during the past year.

#### Report of the Provincial Executives.

*Nova Scotia.*—The past year was reported to have been a successful one for organized labour. Three unions were organized in the city of Halifax. The longshoremen of Halifax in May, 1907, secured an increase in wages to 25c. per hour for day work, and 30c. for night. The electricians also secured an increase in the wage rate. The demand of the freight handlers for increased remuneration had not been granted, but prospects were reported bright. The committee reported that about seven years

ago the provincial government passed a factory inspection law, but that up to the present time no inspector had been appointed to enforce its provisions; the recommendation was made that this matter be referred to the incoming executive committee. Reference was made to the Provincial Workmen's Association and the progress it had made during the year.

*New Brunswick.*—The committee referred to the condition of organized labour, and reported that the President of the Congress had visited the province and would place the condition of the workers of New Brunswick before the Congress.

*Quebec.*—After referring to the defeat of the labour candidate in the federal by-election in St. Mary's division of Montreal, and suggesting that election day be made a legal holiday and voting compulsory, the committee reported having waited upon the provincial government in February, 1907, when the following subjects were presented for consideration: The adoption of the 8-hour day on government works and contracts; the repeal of all laws requiring a deposit by nominees for federal, provincial or municipal offices; the creation of government labour employment bureaus; the providing of aisles in open street cars; the inadvisability of granting public lands to corporations; the amendment of the factories act; the appointment of inspectors of scaffolding and the laying of temporary floors in buildings in course of erection. With the first three matters the government refused to deal, but the others were promised consideration. The work of organization was referred to, as well as the introduction of the eight-hour day in the printing trades. It was reported that several actions have been taken for alleged violation of the alien labour law, and the recommendation was made that Congress either provide a prosecutor for violations of the law or urge the government to appoint an officer with full power to enforce the law. In closing, the committee stated that through the instrumentality of the Montreal delegate to the Printing Pressmen's

convention in New York, it was decided to affiliate the members of the Canadian branches of the union with the Congress.

*Ontario.*—On the 19th of February, 1907, the executive committee for Ontario waited on the Legislature and presented resolutions as follows: Against government by injunction, against prison contract labour, to increase the usefulness of the Ontario Labour Bureau, to abolish property qualification for municipal office, to include fair wage clause in Provincial Government contracts for public works, and with regard to provincial government labour employment bureaus. Other matters referred to were legislation regarding the housing problem, the placing of a label on ready-made clothing and the prevention of foreign detectives from coming into Canada and carrying firearms. The Premier in reply to the deputation stated that some of the requests were plainly in the public interests and would be granted, that the time was not far distant when prison labour contracts would be abolished; that if finances would permit, additional factory inspectors would be appointed, and that a fair wage clause would be inserted in the contracts for new normal schools. The Premier said also that the question of the abolition of property qualification for municipal offices would be considered and that he did not approve of foreigners coming into the country and interfering with the people. The committee further reported that government employment bureaus had been established at Hamilton, London, Ottawa, Peterborough and other centres. The committee also reported the formation on the 29th of March, 1907, in the city of Toronto, of the Independent Labour Party of Ontario, and the election to the Ontario Legislature in December, 1906, of Mr. Allan Studholme as a labour member in the constituency of East Hamilton.

*Manitoba.*—The Committee reported the formation of the Winnipeg branch for the Canadian Labour Party on October 15th, 1906, and referred to the part taken in elections subsequently held in the city. On the 19th of Janu-

ary, 1907, the provincial government was interviewed in reference to the following matters: The Manitoba factory act, the insertion of fair wage clauses in all government contracts, and the abolition of deposits in provincial elections. Favourable consideration was promised with regard to the appointment of another factory inspector. The government had also passed a fair wage law, and an officer to enforce its provisions had been appointed. The third request, however, was not approved by the legislature. The committee recommended the appointment of a permanent organizer for the Congress.

*Saskatchewan.*—The committee reported that little had been done towards the organization of an independent labour party, and that before anything of a permanent nature could be accomplished there must be better trade organization. In Regina and Moose Jaw much progress was reported in organizing the various crafts. On March 28th, 1907, the provincial government was interviewed in reference to the following: Fair wages and conditions on public works; the eight-hour day on public works; free text books in public and high schools, and union label on government printing. No action was taken with regard to these requests during the session, but subsequently the Premier announced that the following regulations would in future be inserted in all public building contracts:

"The contractor shall employ none but skilled, expert workmen and their apprentices, and shall pay not less than the established rate of wages as the Commissioner of Public Works may determine, and shall not request workmen to work more hours per day or week than is customary in the locality where the work is being done.

"So far as is possible and reasonable, as may be determined by the Commissioner of Public Works, none but resident Canadian workmen are to be employed on the works.

"In the event of default being made by the contractor from payment of any monies owing in respect of wages of any person employed on the works, or on any material that may be delivered on the works, and if claim therefor is filed in the office of the Commissioner of Public Works, together with satisfactory proof thereof, the said Commissioner may pay such claim out of any monies which may be due by the Province on the contract, and the amounts so paid shall be deemed payments to the contractor."

In reference to the coal famine of last winter, and the declarations of various organized bodies in favour of the principle of government control and operation of

coal mines, it was reported that a member of the provincial government had stated that this question was being considered.

*Alberta.*—The passage by the Provincial Legislature of an act in favour of the public ownership of the telephone system throughout the province was reported, and the statement made that there is a strong sentiment in favour of such legislation among the working classes. The city councils of Calgary and Edmonton were reported as being in favour of municipal ownership. The housing problem was brought to the attention of the Calgary council. Congress was urged to take up the matter of misrepresentations made to immigrants as to labour conditions in this country. The entry of Asiatics had been opposed. The success which had attended the work of organizing labour unions in the city of Edmonton was recorded, and the subject of the possible amalgamation of the labour party with the Canadian Society of Equity was mentioned.

*British Columbia.* — In accordance with the instructions of the Congress it was reported that a convention had been held in Vancouver on October 29th, 1906, for the formation of a branch of the Canadian Labour Party for the province. The committee waited on the provincial government and brought various resolutions to its attention as well as the question of assisted immigration. It was reported that the government had decided to have a fair wage clause inserted in the contract for the new court house in Vancouver.

#### Report of Fraternal Delegate.

The fraternal delegate to the American Federation of Labour reported that he had attended the convention held in Minneapolis, Minn., in November, 1906. He referred briefly to the more important matters that had been dealt with.

#### Contributions in Aid of Sheet Metal Workers Appeal.

Appended to the officers' report was a statement showing that contributions to the amount of \$1,492.90 had been received from labour organizations in response

to a request for financial assistance to enable the defendants in the case of the Metallic Roofing Co., of Toronto, vs. the Sheet Metal Workers' Union to carry an appeal to the Imperial Privy Council.

the parliamentary solicitor's report was recommended for concurrence, and the Congress was asked to reaffirm its position on the matters which had previously been before it and which had not yet been finally disposed of. This report was adopted.

**Report of Parliamentary Solicitor.**

**Report of Secretary Treasurer.**

The parliamentary solicitor of the Congress, Mr. J. G. O'Donoghue, submitted a report dealing with the 1906-7 session of the Dominion Parliament, and containing a resume of the various matters of direct interest to labour which had been discussed. The following subjects were mentioned in this review: The Industrial Disputes Investigation Act, 1907; the Intervention of International Officers in Industrial Disputes; Misrepresentations to Induce Immigration; Industrial and Co-operative Societies; the Admission of Hindus into Canada; Senate Reform; Old Age Pensions; Old Age Annuities; Contract Labour; Wages on the Grand Trunk Pacific; the Inspection of Barges; the Intercolonial Railway Pension Bill; Wages of Painters at Halifax; Prison Labour; Technical Education; Railway Legislation; the Masters' and Mates' Bill; the Inspection of Steamboats; the Eight-hour Bill; the Labour Investigation Committee; the Granting of Leave of Absence to Vote; Immigration; Letter Carriers' Salaries; the Fair Wages Resolution.

The secretary-treasurer, Mr. P. M. Draper, submitted a statement of receipts and disbursements during the past year, together with other data relative to the affairs of the Congress. The revenue from per capita tax showed an increase of \$554.40, while the membership increased by 5,330, making a total membership of 32,997 directly affiliated, representing 515 unions. The following table shows total receipts and expenditures for the year 1906-7:—

Balance on hand September 20, 1906.....	\$1,774.62
Receipts from per capita tax charters and supplies.....	5,000.17
American Federation of Labour for legislative purposes.....	500.00
Hotel and Restaurant Employees Int. Alliance and Bartenders Int. League of America for legislative purposes.....	100.00
Advertising.....	100.00
<b>Total receipts from all sources.....</b>	<b>7,474.49</b>
<b>Total expenditure.....</b>	<b>\$6,570.28</b>
<b>Balance on hand, September 20, 1907.....</b>	<b>\$904.53</b>

**Report of Committee on Executive Committees' Report.**

In order to show the growth in the finances of the Congress, the following summary of receipts and disbursements for the past nine years was submitted:—

The report of the committee on executive officers' and provincial executive committees' report submitted the references to the Industrial Disputes Investigation Act in the officers' report as well as in the solicitor's report, without recommendation, and these references were dealt with subsequently when resolutions on the subject were considered. The balance of the report was concurred in and the following recommendations made: "That the supplying of information by employers and trade unions to the Ontario Labour Bureau be made compulsory, and also that a government officer be appointed to have the alien labour law enforced." With the exception of that portion relating to the Industrial Disputes Investigation Act,

Year.	Receipts.	Expenditure.	Balance.
1899.....	\$ 611.71	\$ 547.95	\$ 63.76
1900.....	828.45	618.79	209.66
1901.....	1,009.88	908.00	101.88
1902.....	2,342.41	1,795.57	546.84
1903.....	3,858.34	3,363.38	494.96
1904.....	3,747.96	3,346.29	401.67
1905.....	4,700.29	4,001.36	698.93
1906.....	5,747.40	3,970.08	1,774.62
1907.....	7,474.79	6,570.28	904.53

The following table shows the number of unions affiliated with the Congress, together with the membership and revenue received:—

Province.	No. of Unions.	No. of members.	Amount received.
Ontario.....	100	7,642	\$ 1,462.94
Quebec.....	22	2,482	477.55
Manitoba.....	36	4,793	742.65
Alberta, Sask. and B. C. . .	54	3,017	582.67
New Brunswick and Nova Scotia.....	6	440	88.35
<i>Affiliations from Headquarters:</i>			
Int. Bro. Maintenance of way employees.....	91	2,200	396.00
Journeymen Tailors of Am.	41	1,000	180.00
Int. Bro. of Bookbinders..	7	304	54.72
U. Assn. Plumbers, Gas and Steamfitters and Helpers	26	1,001	180.18
Int. Typo. Union.....	27	1,895	341.09
Int. Bro. Brewery Workers	.....	472	84.96
United Bro. Leather Workers on horse goods.....	7	116	20.88
Int. Bro. Electrical Wrkrs.	14	450	81.00
Int. Assn. Bridge and Structural Ironworkers.	7	400	36.00
Bakery and Confectionery Workers.....	5	292	26.28
Carpenters and Joiners....	77	6,440	241.50
Unions from which a partial revenue only was received.....	2	53	3.30
	515	32,997	\$ 5,000.17

Brewery Workers, Leather Workers on Horse Goods, Electrical Workers, Bridge and Structural Iron Workers, Bakery and Confectionery Workers, and the United Brotherhood of Carpenters and Joiners.

The audit committee, to which the above report was referred, reported that the books were found to be in a satisfactory condition.

#### Report of Ways and Means Committee.

The ways and means committee recommended that the per capita tax remain as fixed by the 1905 convention; that \$600.00 be paid to the Secretary-Treasurer for his services during the year; \$300.00 to the fraternal delegate to the American Federation of Labour; \$200.00 to the Parliamentary Solicitor, and that the hotel expenses of the delegate from the American Federation of Labour be paid. These recommendations were adopted, together with an adverse report on a proposition to maintain a permanent paid secretary of the Congress.

#### Organization

Reports with regard to organization work were submitted by Mr. W. R. Trotter, for Western Canada, Mr. Allan Studholm, M. P., for Ontario, and Mr. Alphonse Verville, M. P., for Quebec and the Maritime Provinces. During the discussion, the proposition was advanced that the American Federation of Labour should give more financial support to the work of the Congress. It was pointed out that while that organization gave the Congress \$500.00 each year for legislative purposes, over \$3,000.00 were received by the American Federation of Labour from the Canadian membership of International Unions. The following resolution was finally introduced and approved:

"That the Executive Committee of the Congress be instructed to approach the Executive of the A. F. of L. to urge an arrangement whereby the monies devoted by that body for organization and legislative purposes in Canada be paid over to the Congress and expended under its supervision."

#### Fraternal Greetings.

Mr. Robert S. Maloney, of Lawrence, Mass., fraternal delegate from the American Federation of Labour conveyed fra-

In addition to the above affiliations, the following forty-two trades and labour councils hold charters from the Congress:

Berlin, Brantford, Brockville, Collingwood, Chatham, Fort William, Galt, Hamilton, Kingston, London, Midland, Niagara Falls, Ottawa, Peterboro, Stratford, Sarnia, St. Catharines, Toronto, Windsor, Woodstock, in the province of Ontario; Montreal, Grand Mere and Quebec and Levis in the province of Quebec; St. John and Moncton in the province of New Brunswick; Halifax in the province of Nova Scotia; Winnipeg and Brandon, in the province of Manitoba; Regina and Moose Jaw in the province of Saskatchewan; Calgary, Edmonton, Lethbridge and Medicine Hat in the province of Alberta; Victoria, Vancouver, Fernie, Revelstoke, Cranbrook and Nelson, in the province of British Columbia.

The Congress has, in all, a membership of approximately 150,000. The report further stated that five of the councils mentioned above were chartered during the year and that four federal labour unions were organized. Two federal unions failed to remit per capita tax for the year. The following international unions have affiliated the Canadian branches of their organization with the Congress during the year, and are paying per capita tax from headquarters:

ternal greetings to the Congress and gave an account of the growth of organized labour and the progress of legislation in favour of wage-earners in the United States.

Mr. Robert C. Owens of Edmonton, Alta., fraternal delegate from the Canadian Society of Equity, in extending greetings from his organization outlined the aims and objects of the society, which include the education of the farmers on economic lines, and stated that though the society was of recent origin, it has 3,000 members in the Province of Alberta.

Mr. Horace J. Jaxon, of Chicago, Ill., representative of the Western Federation of Miners, expressed the good will of the Federation to the Congress and recounted the proceedings before and during the recent trial of certain officers of the Western Federation of Miners.

Rev. Hamilton Wigle was received as the fraternal delegate from the Winnipeg Ministerial Association, and extended greetings from his organization.

#### Sabbath Observance.

A deputation from the Lord's Day Alliance, composed of Revs. J. G. Shearer and R. Rochester, was received by the Congress on the second day of the convention. Mr. Shearer, in referring to the Lord's Day Act, stated that in his opinion the Act as passed by the Canadian Parliament in 1906 was the best legislation of its character on the statute books of any country. The law, he explained, did not aim at limiting individual liberty, but gave every man the right to spend Sunday as he pleased, stopping short, however, where he encroached on the rights of others. Mr. Shearer informed the Congress that it was the intention of the Presbyterian Church in Canada to institute a bureau of information and come into close contact with the labouring class in this country. An invitation was extended to the Congress to appoint fraternal delegates to the church courts, and mention was made of meetings of the Presbytery of Manitoba and the general assembly of the Presbyterian church to which such delegates might be sent.

Rev. Mr. Rochester made a brief address, in the course of which he stated that the objects of the Lord's Day Alliance and the Congress were similar.

The following resolution having for its object the acceptance of the invitation of Mr. Shearer to send fraternal delegates to church courts was adopted:

That the Trades and Labour Councils be asked to send delegates to church assemblies in their various localities wherever advisable, and lay before them the aims and objects of organized labour.

A resolution asking the Congress to request the Dominion Government to repeal the clause in the Lord's Day Act prohibiting the sale of books and newspapers on Sunday was voted down.

#### Canadian Society of Equity.

The committee to which was referred the question of the relations of the Canadian Society of Equity to the Congress presented a resolution urging all wage-earners not organized to affiliate with organized labour, and asking unaffiliated farmers to unite with the Canadian Society of Equity in order to promote the best interests of both, and further recommending that local unions and city, provincial and Dominion bodies, when called upon by representatives of the Canadian Society of Equity, appoint committees to co-operate with the latter, and when possible arrange for affiliation upon equal terms with other branches of organized labour. This resolution was carried.

The question of appointing a fraternal delegate to the next meeting of the Canadian Society of Equity was referred to the general executive.

#### Memorial to the Late D. J. O'Donoghue.

A special committee was appointed to report on some suitable memorial to the late D. J. O'Donoghue. The committee recommended:

That the Trades and Labour Congress of Canada endow a room in the Sick Children's Hospital, Toronto, to be known as the D. J. O'Donoghue room, as a fitting memorial to our late lamented brother and worker who did so much for the cause of the working classes.

This recommendation was unanimously agreed to.

### Resolutions.

There were seventy resolutions submitted by delegates, all of which were referred to the Committee on Resolutions and Standing Orders, who, when several motions on the same subject were introduced, embodied them in one resolution. With few exceptions only those resolutions which were favourably considered were recorded.

#### Labour Agent for Great Britain.

On this subject the following resolution was submitted and was favourably reported by the committee:—

"That as the Canadian Manufacturers' Association have established a labour bureau in Great Britain, under the management of the notorious Louis Leopold, with a view to increasing the surplus labour in Canada, and that, as under the present immigration policy a large number of craftsmen are induced to come to this country under misrepresentations of the true conditions, that an agent of this Congress be appointed in Great Britain with a view to more effectually representing the true conditions of labour in this country."

A lengthy discussion took place on this subject during which it was pointed out that the appointment of a labour agent for Great Britain should be carried out for the definite purpose of stopping misrepresentation to British workmen, and not to hinder immigration to Canada. Several of the delegates gave instances of misrepresentation, which had been brought to their attention. It was finally decided that the incoming executive of the Congress submit a call to all trades councils and local unions in Canada asking that they pay a per capita of 10 cents per year toward this project and if sufficient funds are available a man should be sent; and that the executive of the Congress is to be empowered to select the man, said agent to be directly responsible to and under the direction and supervision of the executive of the Congress.

#### Independent Political Action.

The Committee on resolutions reported the following resolution to the Congress without recommendation, on the subject of independent political action:

"Resolved that the Trades and Labour Congress of Canada in convention assembled, declares that it stands for absolute independent political action on the part of the working class, with the collective ownership of the

means of life as its ultimate aim, and we believe the best interest of the working classes can be served by granting provincial autonomy in the matter of political affiliation, the functions of Congress' provincial executives being to carry out the policy formulated in their respective jurisdictions."

In amendment the following resolution was submitted:

"That the Trades and Labour Congress of Canada reaffirms its declaration for absolute independent political action on the part of the working classes, and that the platform of principles of this Congress be recommended as the platform to be adopted by those engaged in this independent effort."

The debate on the resolution and the amendment was taken part in by sixteen delegates. The amendment was finally withdrawn, and on the question being called the resolution was defeated by a vote on roll call of 39 in favour to 51 against.

#### Organized Labour and the Militia.

A resolution asking the members of labour organizations to refrain from joining the militia, was defeated after the subject had been discussed at length.

#### The Disturbances at Vancouver.

The Congress passed unanimously the following resolution:—

Whereas, on the evening of September 6 last an attack was made by some persons on the Chinese and Japanese quarters of the city of Vancouver, B. C., which was promptly ascribed to "the trades unionists of that city, led on by foreign labour agitators" and,

Whereas, from reliable sources of information we know positively that the trades unionists of that city were not responsible for nor engaged in the perpetration of these outrages.

Be it resolved, that this Congress condemns in unmeasured terms these disturbances and the parties responsible for them as being unworthy of an Anglo-Saxon people and,

Be it resolved, that we denounce the attempt to distort the facts of this case for the purpose of injuring the cause of International trades unionism.

#### Immigration.

Early in the proceedings of the convention the question of Japanese immigration into Canada was brought up, when it was decided that a special committee be appointed to draft a telegram to be forwarded to the Rt. Hon. Sir Wilfrid Laurier, Prime Minister, in reference to the matter. The committee submitted its report in the form of a resolution which read as follows:

"Rt. Hon. Sir Wilfrid Laurier, G. C. M. G., Premier of Canada:

"The Trades and Labour Congress of Canada in convention assembled, and representing organized labour from Halifax to Vancouver, unanimously passed the

following resolution, and ask if you can assure a favourable reply to the request embodied in it—

"1. Whereas, a crisis has arisen in British Columbia by reason of the unprecedented influx of Japanese;

"2. And whereas the Japanese have already usurped the opportunities for labour in the fisheries in British Columbia and are threatening to entirely supplant white labour in the mines and lumbering industries;

"3. And whereas, the expulsion of white labour from the mines, lumbering and other industries of British Columbia, will entail a shortage of fuel and lumber supplies this approaching winter for the people, more particularly of Western Canada;

"4. And whereas, the willingness of the Japanese to accept a lower standard of living, enables them to oust from employment citizens of Canada who, under higher and better conceptions of moral, social and industrial well-being, have trained themselves to conform to a standard of living more in accord with British, ideas and who are determined to maintain that standard as the surest guarantee of Canadian citizenship;

"5. And whereas, the continued influx of Japanese, constitutes a menace to the predominance of British institutions by driving white labour out of all industries and depriving them of the means to maintain themselves and their families and thus lessening the amount available for merchants, shopkeepers and other business people;

"6. And whereas, the continued importation or immigration of Japanese, inevitably means the departure of white labour from British Columbia to the utter loss and ruin, not only of British Columbia, but of all Canada;

"7. And whereas, the first consideration of the Dominion government should be the welfare of Canadians;

"8. And whereas, we believe that the best interests of Canada and the Empire will be served by respecting the autonomous rights of its component parts;

"9. And whereas, Canada has already sacrificed much for Imperial interests, as the recent generous contribution on Canada's behalf made by Lord Alverstone in the Alaskan Boundary award;

"10. And whereas, the continuance of the Japanese Treaty Act, 1906, means the depopulation of British Columbia of white people and possibly the loss of that province altogether, to the Dominion of Canada;

Therefore be it resolved:

"1. That we respectfully, but firmly, ask the abrogation of the treaty so far as Canada is concerned;

"2. That as a necessary preliminary to that end the Dominion government, be urged to immediately call upon the Imperial authorities to give the six months notice required to terminate the treaty with Japan;

"3. That pending the termination of the treaty the Japanese authorities be called upon to restrict the emigration of Japanese in accordance with the alleged convention that not more than 400 or 500 be allowed to come to Canada during any one year.

The resolution was adopted and ordered to be telegraphed to the Premier. \*

In reference to Chinese immigration the Congress reaffirmed the principle of the present poll tax imposed on the Chinese as an effective check on that class of immigration. The convention was further of the opinion that legislative measures ought to be enacted that would prevent the refunding of the said poll tax under any pretext.

\* A copy of the reply received from the Premier is published in a special article dealing with the question of Oriental Immigration published elsewhere in the present issue.

The following resolution on the question of the Hindus was agreed to:

Whereas, in the interests of the white race the settlement and development of Canada is necessary by a white race, and whereas, the material progress of a race can only be measured by the standard of living obtaining amongst its members, and whereas, the recent influx of East Indians, known as Hindus, into Canada has a pronounced tendency to lower the standard of living, of the different social and domestic customs, and by their being brought into competition for the opportunity of earning a living; therefore be it resolved, the Dominion government be asked to take such action as will prevent their entering Canada.

The Congress declared against bonuses being paid on emigrants sent to Canada in the following motion:

That this Congress is of the opinion that the bonus system on immigration is a detriment to the workers of this country, and calls upon the government to abolish same.

In a further resolution it was set forth that certain transportation companies shipping coolie labour into Canada evaded the law which required that each immigrant be in possession of sufficient capital to ensure that such immigrant should not become a burden on the community, by advancing the necessary amount until after inspection and then immediately collecting the same, thus leaving the immigrant without funds. The resolution which was adopted condemned this mode of evading the law, and called upon the proper authorities to investigate the cases recently reported as taking place at the port of Vancouver.

#### Industrial Disputes Investigation Act.

The following resolutions in reference to the Industrial Disputes Investigation Act were submitted and referred to the Committee on Resolutions, who reported them without recommendation:

Whereas, organized labour has from time to time expressed its disapproval of strikes except as a last resort in industrial disputes; and whereas, particularly in disputes in connection with public utilities the public have rights that must be respected and considered; and whereas, the Lemieux Bill is designed to avoid strikes and lockouts in connection with industrial disputes in certain public utilities until such time as the merits of the dispute are publicly investigated; and whereas, organized labour always courts investigation of its grievances by reason of the justice of its claims and its desire to be fair; be it resolved that this Trades and Labour Congress of Canada hereby express its approval of the principle of the Lemieux Bill as being in consonance with the oft expressed attitude of organized labour in favour of investigation and conciliation.

"Resolved, the Brotherhood of Railway Trainmen, as delegates to present Congress, are opposed to the Lemieux bill in its entirety."

"Resolved, the Brotherhood of Locomotive Engineers are against the Lemieux law in its entirety."

The first resolution endorsing the principle of the Act was moved for adoption. The debate which followed was taken part in by twenty of the delegates including the executive officers. The solicitor of the Congress explained certain provisions of the Act, after which a vote was taken on the first resolution which was carried by 81 to 19.

On the proposition to consider the Act clause by clause, it was decided to refer the matter to a special committee to confer with the solicitor. Any delegates having amendments to offer were requested to appear and submit them. The report of the committee which was subsequently presented approved of the following, which was adopted:

"That the executive carefully analyze the Act, and if it does not provide for the protection of workmen and their continuance in employment during the investigation that a proper amendment be made to secure that end.

A proposal to have the Act amended so as to exempt the employees of both steam and electric railways was voted down.

The committee reported unfavourably on an amendment to have all trades come under the operation of the Act. The Committee's report on this point was voted down by 62 to 23, and the amendment to have the law apply to all industries carried by 59 to 22.

A proposed amendment to section 26 of the Act, which refers to the form in which recommendation of investigation committee shall be made was not concurred in.

It was decided to ask that section 42, which provides that British subjects only shall be allowed to act as members of an investigation board, be stricken out, also that Section 58 (penalty for causing lockout) be amended so as to make an employer liable to fine for each employee locked out.

On a proposition to have section 60, which provides for a penalty for inciting to lockout or strike, eliminated from the Act, the committee reported unfavourably, but this clause of the report was defeated by a vote of 19 for to 63 against, and the proposed amendment was adopted.

A protest was made against the statement in the executive officers' re-

port that the settlement of the dispute between the machinists and the Grand Trunk Railway Company which was referred to an investigation board under the Industrial Disputes Investigation Act, was "highly satisfactory to all parties concerned". After hearing statements in reference to the matter and a full discussion thereon, it was decided by a vote of 45 to 44 to amend the report by substituting the following: "which was reported to be satisfactory to all those affected at the time the officers' report was prepared."

#### Minister of Labour.

The following resolution in favour of the establishment of a separate portfolio for the Minister of Labour was adopted without dissent:

"That this Congress records its appreciation of the valuable services rendered to the workmen of Canada by the Dominion Department of Labour since the establishment of the department in 1900. The Congress believes that the continuous growth and expansion in the department's work during the seven years of its existence is an evidence of the increasing importance of this branch of the administration. Whilst recognizing the able manner in which the present minister of labour and his predecessors have discharged the duties of their office as ministers of the department, the Congress believes that the scope of the department's work and its efficiency and usefulness would be greatly increased were a Minister of Labour appointed who could give undivided attention to the work of the department. In the interests of the country as a whole, no less than of its working classes, this Congress would recommend that the Dominion government add to the present portfolios that of a Minister of Labour, who shall be assigned control of the Department of Labour as a separate and distinct branch of the administration."

#### Shorter Work Day For Street Railway Employees.

The following resolutions in reference to the hours of employment of street and electric railway employees were approved:

"That the provincial executives place before the provincial governments the necessity of enacting laws that all street and electric railway employees work not more than nine hours per day, to be completed in twelve consecutive hours."

"That owing to the action of the employing street railway companies in extending the hours of labour on the Lord's Day, the provincial executives ask for legislation for eight hour day on Sunday."

The provincial executives were also instructed to place before the provincial governments the necessity of having all electric cars properly equipped with air brakes and approved sanders, and also that all future open street cars,

bought or constructed, be provided with centre aisles.

### Bell Telephone Enquiry.

In connection with the report of the Commission appointed by the Dominion Government to inquire into the Bell Telephone Company and the operators employed in its offices in Toronto, the following resolution was introduced and passed without opposition:

Whereas the Bell Telephone Co. some months ago adopted arbitrary measures to compel their operators, monitors and supervisors in the Toronto Exchange to accept an eight hour day as against a five-hour day, and thus precipitated a strike; and,

Whereas the Dominion government appointed a commission to investigate and report upon the conditions of work in the Toronto exchange of the Bell Telephone Co., and,

Whereas the said commission on Thursday of last week made public their findings and recommendations after conducting a thorough investigation;

Therefore, be it resolved that this Trades and Labor Congress of Canada, through its executive council and subject to the advice of its solicitor, be instructed to secure the necessary legislation in both the Dominion and Provincial parliaments to give effect to the recommendations of the commission.\*

### Resolutions Asking for Legislation.

The following resolutions with regard to proposed legislation were passed:

In favour of Manitoba executive endeavouring to secure legislation providing that all persons having charge of boilers in the province be in possession of qualifying certificates.

Instructing provincial executive committees to urge the passage of laws in their various provinces prohibiting private detective agencies.

Asking for a law requiring that all employees be paid weekly or fortnightly in coin, and not by cheque.

Asking Federal Government to appoint officers to inspect the gear of ships during loading or unloading operations

In favour of provincial executives asking for the appointment of competent scaffolding inspectors in the various provinces.

Instructing provincial executives to secure legislation against the imposition of fines by employers on employees for infractions of working rules.

Directing the attention of the Dominion Government to the necessity of enacting legislation providing for a Workmen's Compensation Act similar to that of the Imperial Government.

That the executives of the provinces be urged to ask from the provincial governments the passing of laws, requiring the examination and registration of steamfitters and plumbers in their respective jurisdiction.

In favour of old age pensions, and asking for a reservation of a sufficient portion of the public domain to create such a fund.

\* The full text of the recommendations of the Commission are given in a special review of the commissioner's report published elsewhere in the present issue of the *Labour Gazette*.

Approving of the bill respecting industrial and co-operative societies introduced in the House of Commons by F. D. Monk, M.P., and recommending that the Congress urge upon the Dominion Government and upon the members of the Dominion Parliament, the elimination of the exception made by the special committee (to which Mr. Monk's bill was referred) with respect to banking, and further recommending that Congress express the view that the act is one in the immediate interests of the working classes of Canada. \* \* \*

Disapproving of money deposits or property qualifications or any bar to the freedom of candidature for public office.

Instructing the provincial executives to endeavour to have more stringent laws passed regarding child labour, and also that factory inspectors be given larger scope and more power to enforce such laws as may be now in operation or in future enacted.

That as the present Manitoba Mechanics' Lien Act is not working satisfactorily, the Manitoba executive committee be instructed to endeavour to get amendments passed to the next session of the legislature which will make the act more workable.

That the following section be added to the Dominion fair wage resolution:

"That workmen employed in the performance of the said contract shall not be required or allowed to work longer hours than those fixed by the contract, except for the protection of life or property or in cases of emergencies."

Asking that the tariff be amended so as to make the duty on all cut stone being shipped into Canada, equal to that which is shipped into the United States.

### Miscellaneous Resolutions.

The following resolutions dealing with miscellaneous matters were approved:

Recommending all labour papers for support by trades unionists.

That the secretary furnish to those who wish them the list of manufacturers of union label goods so far as he is able to secure them.

Indorsing labels of the following unions: International Cigar-makers, International Typographical Union, International Tobacco Workers, and International Leather Workers on Horse Goods.

Reaffirming resolution re discontinuing grants of land to others than bona fide settlers.

Asking members of the Canadian Society of Equity to have work done by fair labour wherever possible.

Congratulating International Typographical Union on success of fight for an eight-hour day.

In favour of increase of salaries of letter carriers and asking the Postmaster-General to give the matter early attention.

That as the capitalists of the world create war they should do their own fighting.

That provincial executive committees be urged to look carefully after the preserving of fair wage clauses in all public contracts.

Calling attention to the strike of garment workers in Toronto, Ont., and informing the delegates that as soon as the difficulty had been adjusted they would be notified.

Referring to the libel suit of Mr. Martin against Mr. Verville, in which the latter was fined \$100.00, and stating that the case had been appealed by the Quebec Labour Party and asking Congress to endorse this action both morally and financially.

The question of extending the moral support of Congress to the labour unionists of London, who purpose placing a candidate in the field in the forth-coming federal bye-election, was referred to the Ontario executive.

## Officers for 1907-08.

The following officers were elected for the current year:

*President.*—ALPHONSE VERVILLE, M.P., Montreal, Que.

*Vice-president.*—JAMES SIMPSON, Toronto, Ont.

*Secretary-Treasurer.*—P. M. DRAPER, Ottawa, Ont.

## PROVINCIAL VICE-PRESIDENTS AND EXECUTIVE COMMITTEES:

*British-Columbia.*—

*Vice-Pres.*—J. C. WATTERS, Victoria, B. C.

*Executive-Com.*—S. KERNIGHAN, and A. G. PERRY, Vancouver.

C. SIVERTZ, Victoria, B. C.

*Alberta.*—

*Vice-Pres.*—J. F. LAHENEY, Coleman, Alta.

*Executive-Com.*—T. R. WESTMAN, Edmonton, Alta.

W. M. LEONARD, Edmonton, Alta.

JAS. H. DUNLOP, Calgary, Alta.

*Saskatchewan.*—

*Vice-Pres.*—HUGH PEAT, Regina, Sask.

*Executive Com.*—JAS. SOMERVILLE, Moosejaw, Sask.

T. A. STANLAKE, Regina, Sask.

T. MOLLOY, Regina, Sask.

*Manitoba.*—

*Vice-Pres.*—W. J. BARTLETT, Winnipeg, Man.

*Executive-Com.*—H. ALBERT, Winnipeg, Man.

S. W. MCKINNON, Winnipeg, Man.

W. H. HEAD, Brandon, Man.

*Ontario.*—

*Vice-Pres.*—F. BANCROFT, Toronto, Ont.

*Executive Com.*—C. C. HAHN, Berlin, Ont.

J. BARNETT, Toronto, Ont.

PETER GRAY, Fort William, Ont.

*Quebec.*—

*Vice-Pres.*—GUS. FRANCO, Montreal, Que.

*Executive Com.*—J. A. MASSE, Montreal, Que.

A. ANDERSON, Montreal, Que.

M. MOISAN, Quebec, Que.

*Nova-Scotia.*—

*Vice-Pres.*—JOHN T. JOY, Halifax, N. S.

*Executive-Com.*—JAS. FLANIGAN, Halifax, N. S.

P. RING, Halifax, N. S.

P. J. HALEY, Halifax, N.S.

The appointment of vice-presidents and executive committees for the province of New Brunswick and Prince Edward Island were referred to the general executive.

Mr. W. R. Trotter, Winnipeg, Man. was elected Fraternal Delegate to the American Federation of Labour.

It was decided that the next meeting of the Congress would be held at Halifax, N. S.

## THE NATIONAL TRADES AND LABOUR CONGRESS OF CANADA—FIFTH ANNUAL CONVENTION.

THE fifth annual meeting of the National Trades and Labour Congress of Canada convened at Glace Bay, C. B., N. S., on Tuesday, September 10.

Addresses of welcome were presented by His Worship the Mayor of Glace Bay, who referred at some length to the industrial development of the locality, especially in coal mining, Cape Breton possessing one of the most extensive coal fields in the world and being the first place on the continent of America at which coal was discovered. The Grand Master and Grand Secretary of the Provincial Workmen's Association also extended a welcome to the delegates on behalf of the workmen of Cape Breton. To these and other addresses the President and Secretary of the Congress replied on behalf of the delegates.

The President announced the appointment of the committees as follows:—On Credentials and Resolutions, on

President's Address, on Rules and Order, on the Executive Committee's Report, on Audit, on Ways and Means and on Thanks.

During the convention, the following additional committees of a special nature were appointed:—To meet a committee of the Provincial Workmen's Association with a view to affiliate that organization with the National Congress; to examine the Industrial Disputes Investigation Act and report thereon to the Congress.

In all 36 delegates were present at the convention 16 being from Montreal, Que., 17 from Quebec, Que., and 3 from St. John, N. B.

Mr. J. B. St. Laurent of Quebec acted as French Secretary during the sessions of the Congress.

## Address of the President.

In the annual address of the president of the Congress reference was made to

the progress of the Congress during the past year, especially in Ontario and Quebec. The following unions were reported as having been formed during the year:—Cooks of Montreal; waitresses of Montreal; wire and metal lathers of Montreal; cigar makers of Marieville, Que.; civic employees of Montreal; hackmen of Montreal; carriage and wagon makers of Montreal; head waiters and stewards at Montreal, Toronto, Ottawa, Hamilton, Winnipeg, Victoria and Vancouver. In addition to these, a charter was issued to the street railway employees at Hamilton, Ont., and an attempt made to organize the printers of Montreal, Que. On the whole, the outlook for securing additional organizations was regarded as favourable. Reference was also made to the establishment, under the personal supervision of the president, of a weekly labour journal known as "Justice," published at Montreal in both languages. The maintenance of foreign organizations on British soil was deprecated and the action of the president in connection with his nomination as a candidate for St. Mary's Division of Montreal described.

The committee on the president's address endorsed the remarks set forth as above.

#### Report of the Executive Committee.

The executive committee referred in its report to the election of Mr. Médéric Martin for the St. Mary's Division of Montreal during the past year, the president of the Congress having withdrawn his candidature in favour of Mr. Martin. The usual annual interview of the executive with the Federal government was omitted during the past year, as it was felt that the funds of the congress would not justify the expenditure involved. In January, 1907, at the request of the Canadian Typographical Union of Ottawa, the secretary of the Congress met a committee of this organization in conference, with the result that an attempt was made later to establish a National Typographical Union in Montreal. In accordance with a resolution passed by the last convention of the Congress, the president, secretary

and other members of the executive for Quebec had an interview with the Honourable the Minister of Public Works and Labour for the province, and presented a request that the government assist in the establishment of schools for workmen. It was reported that the deputation was cordially received and felt confident that as soon as workers show a more general interest in education of this character, assistance will be forthcoming from the department of education in Quebec. According also to a resolution passed last year, the National Hotel and Restaurant Employees affiliated with the National Congress called a convention of their craft at Montreal on April 21-22. Reference was also made in the report to the visit of the secretary of the Congress to Hamilton, for the purpose of organizing the Canadian Federation of Street Railway Employees National Union No. 2 of that city. The committee also referred to the establishment of a weekly labour paper "Justice" to advocate the cause of Canadian unionism. Copies of "Justice" were submitted to the delegates for consideration. Other events dealt with in the report were the visit to Canada of Mr. Keir Hardie, leader of the Independent Labour party in the British parliament, the increase in the amount of per capita tax paid in to the Congress, the number of charters issued, and the coming into effect of the Industrial Disputes Investigation Act. The report of the executive concluded with an appeal to the convention to find ways and means to meet the need for additional organization.

#### Report of the Executive Committee for the Province of Quebec.

The executive committee for the Province of Quebec was unable, for reasons explained to the Congress, to extend its report to the whole of the province, but was obliged to confine itself to the city of Quebec, Que., and vicinity. In that district all of the workers, according to the report, are organized, the committee stating that the city of Quebec was the best organized city not only in Canada but on the American continent. Moreover by a system of co-operation, in the

form of joint committees among the trades all difficulties that may arise are settled by conciliation without sacrificing the interests of any one. Measures for improving the position of the Congress were submitted. No serious disputes, it was reported, occurred during the past year, owing to the prompt and energetic action of the joint committees above mentioned. Reference was also made to the appointment of a royal commission by the government of Quebec, one of the members of which is president of the Central National Council of Quebec, for the purpose of investigating the causes of industrial accidents in manufacturing establishments.

The committee expressed the hope that the workmen of Nova Scotia would affiliate with the Congress and co-operate with it in its struggle for the betterment of the workingmen. The report concluded by expressing the hope that the meeting at Glace Bay might result in cementing a lasting and indissoluble union between the Congress and the workmen of Nova Scotia.

#### Report of Treasurer.

Receipts during the year were reported as follows:—

Per capita tax.....	\$ 501.93
Charters issued.....	80.00
Constitutions sold.....	3.75
Seals.....	2.00
Rituals.....	.50
Subscription to aid in organizing the Maple Leaf Association of Quebec.....	5.00
Subscription to aid in organizing the Union Nationale Secourable et Protectrice des Journaliers de Québec.....	5.00
Total.....	\$ 598.18

Expenses were as follows:—

General expenses amounted to.....	\$ 198.53
Balance due to Treasurer from last year.....	57.43
Paid to Treasurer for his salary for present year.....	180.00
Total.....	\$ 435.96
Total receipts.....	\$ 598.18
Expenses.....	435.96
Balance on hand.....	\$ 162.96

#### Report of Committee on Ways and Means.

The Committee on Ways and Means recommended that a special tax of five cents be levied in order to facilitate the

work of organization. It also recommended that a more practical method of collection be adopted, by which not only the executives, but the unions as a whole, should pay the per capita tax. It recommended that the sum of \$10.00 be paid to the French secretary for his work during the session. Reports of the proceedings of the convention were ordered to be printed as follows:—700 copies in French and 300 in English.

#### Amendments to the Constitution.

The following amendments to the constitution were recommended by the Committee on Rules and Order, and adopted by the Congress:—

Article IV. Section 2, requiring that the per capita tax be forwarded in two equal instalments, was struck out and replaced by the following:—

This per capita tax shall be forwarded to the secretary-treasurer in four equal payments, and shall become due in January, April, July and October of each year.

Article IV. Section 3 was replaced by the following:—

All associations affiliated to this congress shall pay their per capita tax in advance for each term, and shall not be entitled to representation if all arrears are not paid.

The section previously read as follows:

All organizations which have not contributed to the income of the Congress during the last past year, and wishing to be represented by delegates at any annual session will be required to pay to the Secretary-Treasurer the amount of one-half year per capita in advance, the same to count as the instalment due and payable on the 12th of October ensuing.

Article V, section 1:—This clause now reads as follows:—

The officers of this Congress shall be a President, a Vice-President, a Vice-President for each province of the Dominion, a Secretary-Treasurer and an Assistant Secretary. When the Secretary-Treasurer is English-speaking, the assistant shall be French speaking, and vice versa.

\*There was previously no provision for an assistant secretary.

Article VI, section 1:—The words after "deliberative body" in the following were struck out:—

The President shall preside at all meetings of the Congress, and shall perform such other duties as are usually within the province of a presiding officer of a deliberative, and replace any one officer who is lacking in any body respect in his duty towards the organization.

Article VI, section 3:— Was amended to read as follows:—

SEC. 3.—The Secretary-Treasurer shall keep a correct account of the proceedings of the Congress, and shall, at the close of each session, prepare and have printed a report which shall contain a record of the business transacted. He shall have printed special blank forms, and shall forward them to each organization; he shall receive all moneys payable to the Congress, giving his receipt for the same, and shall expend it in payment of the just debts of the Congress; shall issue to all labor organizations in the Dominion, so far as he may be able, circulars notifying them of the session of the Congress, together with blank forms of credentials, at least eight weeks prior to the date on which it is to meet, and shall arrange for reduced railway fares for delegates and forward to all whose election he may have notification the certificates which will enable them to obtain the same; he must also give a report financial and otherwise to the Executive of each Province where we are represented every three months.

The section did not contain previously the provision relating to the procuring and distributing of blank forms.

Article VI. Section 4 was amended to read as follows:—

The Executive Committee shall meet at the call of the President, and shall inform each organization of such meeting when requested, at such time and place as he may select, and shall act for the Congress during the intervals between its sessions; and shall have the prerogatives of a court when accusations are formulated against any officer, and shall decide on all appeals from organizations affiliated with the Congress, and shall watch the Provincial Legislatures and Dominion Parliament as to all measures and matters before those bodies which may specially affect the interest of labour, and shall, as far as possible, endeavour to further the legislation decided on by the Congress at each session, or such other legislation as shall by them be deemed advisable. They may appoint one or more of their members, if the revenue of the Congress will permit, to attend the Provincial Legislatures or Dominion Parliament, and press for legislation in the interests of wage-earners, or act in conjunction with the delegates of any other organization to that end.

The executive was not previously required to notify the organization of meetings nor did it possess the prerogatives of a court as above conferred.

The order of proceeding was also somewhat changed.

### Resolutions Adopted.

#### *Provincial Workmen's Association:*

The Congress passed a resolution thanking the members of the Provincial Workmen's Association at Glace Bay, C. B., for the reception accorded the delegates, and especially emphasizing the demonstration of Sept. 10. The resolution expressed the hope of the delegates that they might be enabled to reciprocate in kind if the P. W. A., would send delegates at the next meeting of the Congress at Quebec.

The following resolutions were also passed by the Congress:—

#### *Education:*

That owing to the increasing cost in procuring education for the children of the workingmen of Canada the government be requested to introduce legislation establishing free and compulsory education.

That the Congress do petition the government to enact a law to give uniformity in our school books.

That the government be asked to increase the salaries of school masters and mistresses.

That the government be petitioned to impose a higher tariff on vehicles imported from the United States, these vehicles being sold in Canada to the detriment of our wagon builders. The present duty is 3 and 45 per cent., but by other means adopted, the vehicles are shipped to Canada in such a way that they pass our frontiers as raw material, the consequence being that the actual duty does not exceed 20 per cent.

#### *Old Age Pensions:*

That in the opinion of this Congress the time has arrived when the workmen of this country should be paid pensions in their old age, or when they become disabled. We hereby petition the Federal Government to establish a fund to be known as the "Old Age Pension Fund", to be used for workingmen who have passed their working days, or are no longer able to support themselves.

#### *Oriental Immigration:*

That the government be asked to increase the head tax from \$500 to \$1,000 on all Asiatics and other undesirable immigrants coming to Canada.

#### *Department of Labour, Canada:*

That the government be urged to separate the Department of Labour from the Post Office Department. This has become necessary in the opinion of this Congress owing to the great increase of business in the Department of Labour, and, further, a Minister of Labour, acting solely in that capacity would be in a better position to give greater attention to the demands of the workmen.

That the Honourable, the Minister of Labour be asked to appoint another local correspondent for his Department in the City of Montreal, the nominee to be a representative of the National movement, and a member of a union affiliated with this Congress.

#### *Workmen's Compensation:*

That the different provincial governments be asked to pass an act for compensation in industrial accidents to workingmen in the discharge of their duties.

#### *D. J. O'Donoghue:*

Whereas it has pleased Almighty God in His infinite wisdom to remove to a higher sphere a man who has by his efforts and association endeared himself to every workingman in this Dominion who had the opportunity to know him. As a champion of labour rights, as a defender of the weak and oppressed, as a champion in the broad field of humanitarianism he may have had equals, but no superiors. We, the delegates, composing the National Trades and Labour Congress of Canada, assembled at its fifth annual convention, desire to express to the family of Daniel J. O'Donoghue our sorrow at their loss and ours. Lightly may the sod lay above him for his was a noble heart. He has left the world better for his having been in it, and he has left us a glorious example of true manhood.

*Engineers' Certificates:*

That this National Labour Congress recommends that the law in regard to the granting of masters' and engineers' certificates be more severe."

*Union-made footwear:*

That the Congress recommends that all the members of the National organizations and their friends shall purchase only shoes made in Canada, under National Union conditions, and that the government be asked to buy footwear for its employees from the same source.

*Shipbuilding:*

That the delegation authorized to interview the government be instructed to see that the following resolution, adopted at the last convention of this congress, be enforced:

Whereas this Congress considers it not only desirable but essential that Canada should have well equipped shipbuilding yards, so that she should not be dependent upon foreign or even British builders for the maintenance of her mercantile marine:

That proof of the decadence of this industry is furnished by the fact that while the water-borne commerce of the country during the last thirty years has increased from \$217,000,000 to \$473,000,000 the aggregate tonnage of vessels registered in Canada during the same period has decreased from 2,158,363 tons to 672,838 tons;

That the new vessels built in Canada during the year 1874 aggregated 190,756 tons, while last year the new tonnage only aggregated 18,554 tons, or less than one-tenth of the tonnage built thirty years ago;

That the foregoing statements prove that Canada is steadily losing control of her own carrying trade, and that her builders are unable to compete with the highly developed yards of other countries;

That nearly all other countries have found it necessary to grant financial aid to their own builders in order to secure a share of their own carrying trade, and that such aid has in most cases enabled them to build up well equipped shipbuilding plants that are now able to compete with foreign builders;

That an effort should now be made to resuscitate this industry, which would provide skilled labour for our artisans, keep in the country the enormous sums paid out in freights and enable Canada again to take her place as an important maritime power;

Therefore resolved, that we hereby urge the Dominion Government to take up this important question during the approaching session of Parliament, and grant such adequate bounty on tonnage launched in Canada during a term of years as would place our builders on an equality with their competitors elsewhere.

*Organization:*

Whereas the report of the committee on Ways and Means of last convention, recommending that a referendum be asked from all unions affiliated with this Congress, with the object of ascertaining the general opinion on the question of imposing a special tax to establish a fund for the purpose of organization throughout the Dominion;

Whereas such referendum was not submitted to the unions as decided;

Be it resolved, that the secretary be instructed to submit the referendum to all the unions affiliated with the National Congress within thirty days of this date, and that the different unions be asked to furnish the secretary with a report of their decisions before the first of December, 1907. The executive shall then dispose of these reports in the general interests of the National unions.

*Factory Inspection:*

That the government of Quebec be asked to appoint more factory inspectors for the district of Montreal, the

limited number of inspectors being unable to meet the demands of the public.

*Treasurer's Guarantee:*

That the treasurer be instructed to furnish an insurance guarantee to the satisfaction of the executive."

*Fair Wages on Public Works, Canada:*

That the thanks of this Congress are due, and are hereby tendered to the Honourable Rodolphe Lemieux, our worthy Minister of Labour, for his action in having passed through Council an Order dated August 30, 1907, concerning the enforcement of the Fair Wages resolution in public contracts; this being in accord with a resolution previously adopted by this Congress.

*Union Label:*

That this Congress adopt as its official label, to be known as the National Union Label, the one at present used by the Canadian Federation of Boot and Shoe Workers of Montreal.

That the use of the National label be granted to the Boot and Shoe Workers' Unions of Quebec, as some manufacturers of that city are desirous of adopting it on their goods, providing those manufacturers comply with the usual conditions laid down by this Congress in such cases.

*Quebec Bridge Disaster:*

That a committee be appointed to draft a suitable resolution of condolence to the families of the unfortunate victims who lost their lives in the recent Quebec bridge disaster.

*Protection of Manufacturers:*

That the government be requested to protect the manufacturers in cities against country ones who do not pay taxes.

*Improvements at Levis:*

That the government be asked to have deep sea quays and a larger dry-dock established at Levis, Que.

On report of a special committee resolutions of thanks were passed to a number of individuals and public bodies, including the mayor, councillors and citizens of the town of Glace Bay, N.S., for courtesies extended to the delegates; to the Dominion Coal Company for its invitation to visit its mines and other courtesies; to the warden of the County of Cape Breton; the mayor of Louisbourg; to the Grand Master and Grand Secretary of the Provincial Workmen's Association; to the press of Glace Bay and Sydney; to the Department of Labour, Canada, and the Department of Public Works and Labour Quebec, for sending officers to report proceedings of the congress; and to others.

### Report of Special Committee to Confer with the Provincial Workmen's Association.

A special committee which was appointed to confer with the Provincial Workmen's Association submitted a re-

port. The committee stated that it had been asked by the officers of the Provincial Workmen's Association with regard to the aims and objects of the Congress, and had replied that the principal object of the Congress was to secure legislative enactments from the different legislatures of Canada that would be in the interests of the workmen; to ask for the repeal of objectionable laws and to secure such amendments to defective laws as to make them effective. The principal aim of the Congress was to centralize the forces of workingmen so as to strengthen and increase their influence and to bring public opinion in their favor. The officers of the P.W. A. regarded these aims and objects as stated to be in accordance with their own, and they assured the delegates they would be pleased to submit the question of affiliation at the meeting of the Grand Council to be held in the following week.

#### Election of Officers.

Officers for the year 1907-08, were elected as follows:

<i>President</i> .....	GEORGE MAROIS, Quebec, Que.
<i>Vice-President</i> .....	WM. WANNOCOTT, St. John, N. B.
<i>Secretary-Treasurer</i> ....	THOS. J. GRIFFITHS, Montreal, Que.
<i>Assistant Secretary</i> .....	J. B. ST. LAURENT, Quebec, Que.

#### THE CANADIAN MANUFACTURERS' ASSOCIATION—THIRTY-SIXTH ANNUAL CONVENTION.

THE thirty-sixth annual convention of the Canadian Manufacturers' Association was held at Toronto, Ont., September 24-27. Upwards of 250 delegates were present from different sections of Canada.

#### President's Address.

The annual presidential address was delivered by Mr. Henry Cockshutt, of Brantford, on the opening day of the convention. After referring to the steady growth of Canadian industry during the past year, the president advocated a vigorous reforestation policy and the imposition of an export duty on pulp. Recent progress in the mining and fishing

#### EXECUTIVES.

##### QUEBEC.

<i>Vice-President</i> .....	GILBERT LECLERC, Montreal, Que.
	Z. BERUBE, Quebec, Que.
	C. DESROCHERS, Montreal, Que.
	F. LAROCHE, Quebec, Que.

##### NEW BRUNSWICK.

<i>Vice-Presidents</i> .....	HUGH BECK, St. John, N. B.
	J. S. BROWN, St. John, N. B.
	WM. STEWART, St. John, N. B.
	GEO. HAY, St. John, N. B.
<i>General Organizer</i> .....	THOS. J. GRIFFITHS, Montreal, Que.

The Executives of the other provinces will be appointed by the General Executive.

During the sessions of the Congress a demonstration in honour of the delegates was held by the citizens of Glace Bay on Labour Day. The delegates also visited the Phelan seam of Dominion No. 2 colliery at the invitation of the Dominion Coal Company. An excursion to Louisburg was later conducted for the entertainment of the delegates.

The next annual meeting of the Congress will be held at Quebec, Que., at a date to be fixed by the General Executive, to coincide with the celebration of the tercentenary of the foundation of that city.

industries was also noted. Discussing the manufacturing industry, statistics were quoted at length to illustrate the marked expansion which has taken place during the last five years. It was stated, however, that the share of Canadian manufacturers in the Canadian market was relatively the same as in 1901. Additional protection was advocated as a means of increasing the exports of the country which have increased much less rapidly than imports, and of fortifying Canadian industries against foreign competition. Dealing with the question of the existing financial stringency, the president expressed the opinion that it did not point to any inherent weakness

in Canadian financial institutions. Overdevelopment and a combination of other circumstances was, in the opinion of the president, the leading causes of the stringency. The immigration of skilled artisans on an extensive scale, and the establishment of a system of technical education was stated to be necessary in view of current conditions in the labour market. The recent increase in the number of industrial disputes was mentioned, and the association urged to devise means of reducing the number. In conclusion, the president drew attention to what he regarded as the inadequacy of present transportation facilities, and the tendency of railway companies to build new lines, instead of adding to the equipment of lines already in operation.

**Financial Statement.**

The total assets of the Association were estimated at \$22,769.70, or \$16,111.42 in excess of the liabilities. Cash receipts during the year ended July 31, 1907, were \$58,580.32, or \$10,298.38 greater than the cash expenditures. The expense account totalled \$18,375.77. The total income realized from "Industrial Canada" was \$13,339.30, allowing a profit of \$3,753.89. A deficit of \$2,575.42 was incurred by the Insurance Department.

**Membership.**

Some 231 applications and 146 resignations were passed during the year, a net gain of 85. Additional care was taken during the year in selecting new members, so as to guard against the possible admission of men whose chief interests lie in pursuits other than manufacturing.

The total membership on July 31, 1907, was 2,189, distributed as follows:—

By Provinces.		By Branches.	
Ontario.....	1,287	Toronto.....	558
Quebec.....	576	Montreal.....	431
Nova Scotia.....	94	Quebec City.....	68
New Brunswick.....	44	Nova Scotia.....	94
P. E. Island.....	3	Manitoba.....	103
Manitoba.....	103	British Columbia...	68
British Columbia...	68	General.....	867
Alberta.....	13		
Saskatchewan.....	1		

Classified on the basis of fees paid, the figures are:—

Class A. (up to 50 hands, \$10).....	1,549
Class B. (up to 100 hands, \$15).....	101
Class C. (over 100 hands, \$25).....	362
Class D. (additional representatives, \$10).....	177

**Reports of Standing Committees.**

The following is a brief resumé of the reports of the various standing committees of the Association, as considered and adopted at the annual meeting:—

*Railway and transportation.*—The report of the railway and transportation committee dealt at length with various matters of more or less technical interest of importance to members of the Association. Among the questions discussed were freight classification, reductions in classification, international rates, new schedules, uniformity in bills of lading, reciprocal demurrage, express companies' classification and rates, interswitching, rates to the northwest, joint tariffs, etc. With regard to railway equipment, the following statistics were given showing the expansion of transportation facilities in Canada during the past four years:—

RAILWAY MILEAGE AND EQUIPMENT IN CANADA.

Year.	Miles in Operation.	Locomotives, All kinds.	Freight Cars, including Cattle, Box, Refrigerator, Flat, Coal and Dump.
1903	18,988	2,587	80,252
1904	19,431	2,768	83,562
1905	20,487	2,906	86,296
1906	21,533	2,931	90,404

The committee was in constant communication with the Board of Railway Commissioners during the year. Resolutions were recommended by the committee and passed by the meeting, advocating the increasing of the membership of the Board of Railway Commissioners, and the specializing of the work of the commissioners; petitioning the commission to provide some plan of penalties against railway companies for failure to supply empty cars, to forward loaded cars, to secure prompt unloading, etc., and advocating the appointment of

independent weighers at the principal stations for the purpose of weighing car-load traffic.

*Parliamentary Committee.*—A review of legislation considered by the Dominion and Provincial governments during the year affecting the interests of manufacturers was presented by the parliamentary committee. Among the subjects dealt with, were the eight-hour day bill; the Taxation of Commercial Travellers; the Stationary Engineers' Act; the Joint Stock Company Act and the Assessment Act of Ontario, and other legislation. No recommendations were made with respect to the Industrial Disputes Investigation Act, the committee pointing out that it applies to lines of business in which members of the Association are but indirectly interested. The amendment, through the instrumentality of the Department of Labour, of the Merchants' Shipping Act, of Great Britain, was commended; it was suggested that false representations tending to maintain a scarcity of labour in Canada should also be made punishable. Factory inspectors, according to the opinion of the committee, should be chosen outside the membership of any association of employers or of any labour union. With regard to the supply of labour in Canada, the following statement was made by the committee:—

The scarcity of skilled labor continues to act as a serious obstacle to the natural expansion of Canadian industry. Development of all kinds is progressing at a rate which makes it difficult for manufacturers to keep pace with the swelling tide of orders. New factories are being erected. Old factories are being enlarged. In five years our output of manufactured goods has increased nearly 50 per cent. And yet, according to the blue books, our imports are growing more rapidly than ever before, while our exports for the four months ending July, have actually fallen behind. So far as machinery is concerned, Canada is well equipped to produce many millions of manufactured goods more than she is doing, but the wheels of industry are all too often left to rust in idleness, for no other reason than that it is impossible to procure skilled help to operate them.

A resolution was adopted requesting the Dominion government to encourage the immigration, not only of farm labourers, but of skilled mechanics. The case of the Metallic Roofing Company vs. the Sheet Metal Workers' Union was referred to at some length. A representative of the association's interests at Ottawa during the session of the Federal parliament, was appointed during the year.

*Insurance.*—The time of this committee was largely taken up during the year with the organization of mutual fire insurance companies, as provided at the last annual convention of the association. A full description was given of the committee's activities, which included a canvass of the members, with the result that all is now in readiness for the issuing of licenses. The department also examined 93 policies, inspected 38 risks and adjusted 7 losses. The total insurance, which has passed through the office since its inception in 1905, was estimated at \$50,000,000. The extension and development of the department was resolved upon.

*Commercial Intelligence.*—A review of recent developments in the foreign trade of Canada, was presented by this committee. The appointment of additional Canadian trade agents in the West Indies was recommended. A list of foreign agents of Canadian firms was prepared and distributed to government officers operating in foreign territories. The establishment of a department for the collection of overdue accounts was advised. A resolution was passed against the adoption of the metric system of weights and measures until a report of a royal commission had been received and an international conference held between the English speaking nations on the subject.

*Tariff Committee.*—The revision of the tariff effected at the recent session of the Dominion parliament was discussed at some length, regret being expressed that the new tariff did not embody more of the recommendations made to the government by the association. A preferential tariff treaty with Australia was advocated.

*"Industrial Canada" Committee.*—The largest surplus in the history of the journal, namely, \$2,853.89, was reported by the committee having the management of "Industrial Canada" in charge. The gross earnings of the journal are now slightly in excess of \$1,000 per month. Owing to the increase in the wages of printers, which became effective in June, 1907, about \$100 per month will be added to the cost of the journal.

*Technical education Committee.*—The action of the committee in requesting

the appointment of an expert commission by the Dominion government, to enquire into the needs of the country in the way of technical education, and to suggest means whereby these needs can be met, was described. Twenty-eight boards of trade co-operated with the committee in this connection, and a large amount of literature was distributed. A deputation representing the Canadian Manufacturers' Association and the Trades and Labour Congress of Canada waited during February upon the Honourable the Minister of Trade and Commerce and other members of the Cabinet, and met with a favourable reception. A series of illustrated lectures on the benefits of industrial training will be delivered under the auspices of the committee during the coming winter.

*The British Office Committee.*—The committee charged with making the necessary arrangements for the opening of an office in Great Britain reported that 26 applications had been considered from parties wishing to act as the association's British representative. The appointment, however, was deferred, and that of a special labour agent made instead. That officer subsequently came to Canada and personally visited a number of centres, in order to acquaint himself with the conditions surrounding employment. A scale of charges was adopted for securing help for members. Seventy applications for help had been received at the London office from 61 different members of the association, calling for 838 workpeople. Included among the latter were 136 weavers and spinners, 75 cigar makers, 75 labourers and 62 handy men. Up to September 1, 430 hands had been engaged by the London office. Twelve cases occurred where employees failed to report at destination. In the case of desirable artisans for whom no vacancies occurred among the lists supplied by employers, an arrangement was concluded by which mention of these cases is made in the association's official organ.

#### Other Resolutions.

Other resolutions passed were as follows:—

#### THE WOOLLEN INDUSTRY.

Whereas, It has been brought home to the members of the Canadian Manufacturers' Association that some important branches of the woollen industry of the Dominion have languished during the past ten years, throwing many hundreds of workpeople out of employment, closing up many factories and causing serious loss of invested capital:

And Whereas, The recently enacted tariff has failed to adequately provide for the protection and development of these industries;

Be it Resolved, That it is the opinion of this association in annual meeting assembled, that the Government of Canada should take immediate steps to fully investigate the needs of these industries, and to adopt such tariff measures as will again enable them to develop satisfactorily, and to compete on a fair basis with the products of other countries where the scale of wages and the standard of living are far below of our workpeople.

And be it further Resolved, That the tariff Committee and the Executive Council be hereby instructed to co-operate in every possible way with the woollen section in properly presenting the case to the Government for attention.

#### - THE ASIATIC PROBLEM.

Whereas, There can be no doubt that it is the desire of all intelligent people in Canada, that we should build up a trans-Pacific trade with Asia, from the results of which all parts of Canada, and especially British Columbia, would greatly benefit;

And Whereas, It cannot be doubted that the existence of the present treaty, favourable as it is in many respects to Canada, has already done a great deal towards the development of trade with Japan, and that the abrogation of the treaty would not only be disastrous, so far as the existing trade is itself concerned, but all hope of future extended relations with Japan would have to be abandoned.

Be it Resolved. That we do urgently recommend that the Dominion Government, while giving due consideration to all interests in Canada, should take no hurried action toward the abrogation of the treaty which stands to-day as a basis of the friendly alliance between Great Britain and Japan.

#### Officers, 1907-08.

The following officers were elected for the ensuing year:

*President.*—Hon. J. D. Rolland, Montreal.

*Vice-president.*—John Hendry, Hamilton.

*Ontario vice-president.*—R. Hobson, Hamilton.

*Quebec vice-president.*—D. L. McGibbon, Montreal.

*Nova Scotia vice-president.*—T. M. Cutler, Halifax.

*British Columbia vice-president.*—A. P. McLelland, Vancouver.

*New Brunswick vice-president.*—G. Macdonald, St. John.

*Prince Edward Island vice-president.*—F. E. Hazzard, Charlottetown.

*Alberta and Saskatchewan vice-president.*—A. G. Cross, Calgary.

*Treasurer.*—George Booth, Toronto.

*Secretary.*—G. M. Murray, Toronto.

#### Notes.

During the sessions of the convention, several papers dealing with subjects of interest to the association were read. Among these were the following: The Progress of Canada in the Twentieth Century, by Mr. Archibald Blue, chief census officer of the Dominion; The Cost of Power as a Fixed Charge, by L. G.

Read, C. E., of Montreal, and Industrial Education, by James A. Emery, of New York.

At the annual banquet of the association, held on Sept. 26, addresses were delivered by the Rt. Hon. Sir Wilfrid Laurier, Prime Minister of Canada, the Hon. J. P. Whitney, Prime Minister of Ontario; Mr. G. T. Blackstock, and others.

### THE TRADES UNION CONGRESS, GREAT BRITAIN, 1907.

**T**he Fortieth Annual Congress of the Trade Unions of the United Kingdom was held at Bath, September

2 to 7. The standing orders of the Congress provide that it shall consist only of representatives of Trade Unions who are actually working at their trades or are permanent paid officials of the Unions. Trade Unions may send one delegate for every 2,000 members or fraction thereof. Voting on important questions is by card, on the principle of one vote for every 1,000 members represented. The analysis into groups of trades given below shows the composition of the Congress, and the trade groups represented are compared with the corresponding figures for the Congress of 1906:—

Groups of Trades.	1906.			1907.		
	No. of Organisations.	No. of Delegates.	No. of Members.	No. of Organisations.	No. of Delegates.	No. of Members.
Building.....	9	23	133,950	9	23	133,714
Mining and quarrying.....	12	100	442,431	11	111	476,279
Engineering.....	17	31	132,317	15	29	135,418
Shipbuilding (including boiler-making).....	4	23	70,525	4	16	73,145
Other metal trades.....	19	36	61,093	19	38	68,975
Textiles.....	13	93	163,568	16	101	192,121
Clothing.....	8	25	55,506	8	23	49,901
Transport (land and sea).....	15	48	137,092	17	53	164,111
Chemical, gas and general labourers.....	8	23	62,371	8	25	69,707
Printing, bookbinding, etc.....	12	21	52,714	13	21	55,774

Woodworking and furnishing, etc.....	8	11	29,324	9	12	31,743
Baking and cigar making.....	2	4	7,000	2	4	6,871
Enginemmen.....	12	15	25,048	12	16	31,163
Post office employees.....	4	7	50,032	4	10	53,774
Miscellaneous.....	15	21	54,795	22	34	79,603
Total.....	165	489	1,484,101	173	521	1,627,958

Allowing for the number of distinct societies included in Federations and sending delegates of their own, members of about 236 separate Trade Unions attended Congress as delegates this year out of a total of 1,136 Unions in existence. The membership represented, however, comprised over 80 per cent. of the total membership of all Trade Unions.

Most of the groups of trades showed an increase in membership, especially the textile group, the mining group, the transport group and the miscellaneous group. In the Miscellaneous groups the increase is due to some extent to the establishment of new unions of women workers and of theatrical employees.

Among the principal industrial subjects on which the Congress passed resolutions were: Restriction of the hours of labour to eight per day for miners and workpeople generally; old age pensions; amendment of the Mines Regulation Act, the Factory and Workshop Acts,

the Shop Hours Act and the Cheap Trains Act; certificates of competency for persons in charge of steam engines and boilers; improved housing of the working classes; the wages and general conditions of labour of Government workers, and of workers employed by contractors for the Government; representation of trade unions at Board of Trade and at coroners' inquests; the establishment of a legal minimum wage in selected trades; State help for blind workpeople; abolition of the premium bonus system; abolition of night work in bakeries; and free secondary education. A resolution in favour of compulsory arbitration in trade disputes was rejected by a majority of 660,000, and a resolution in favour of the introduction of a Bill to secure the reference of all disputes to a Conciliation Board, with power to arrange settlements subject to consent of both parties, was rejected by a majority of 85,000.

### THE INSPECTION OF MEATS, CANADA—ENFORCEMENT OF THE MEAT AND CANNED FOODS ACT, 1907.

**D**URING the recent session of the Dominion Parliament, an Act was passed "respecting the Inspection of Meats and Canned Foods," which provided for the adoption of a system of inspection throughout Canada of the carcasses of animals slaughtered for food, and intended for export, and of all articles prepared for food and packed in cans or similar receptacles. Provision was also made for the appointment of inspectors, for the purpose of enforcing the law, under regulations to be issued under the Act. (\*)

#### Regulations Issued.

The Act was brought into operation for the first time on September 3, 1907, regulations having been issued under date of August 21. The regulations in question, apply only to the inspection of meats, no steps having been taken as yet to bring into force the provisions which relate to fish, fruits and vegetables. The regulations are of an extended nature and provide for the thorough and minute inspection of all animals, carcasses or products therefrom, and of the establishments in which the food is prepared. Full details are set forth as to the methods of inspection to be followed, the condition of animals before slaughtering, sanitary arrangements in establishments, the stamping of approved carcasses and products, with the device "Canada, approved" the transportation of meats, etc., the whole being of a stringent character and thoroughly ensuring the wholesomeness and purity of all products which have passed the

inspectors. In framing the regulations, the most careful consideration was given to all details affecting the meat trade of Canada, and a full discussion held with representatives of the various packing houses and transportation companies interested.

#### Appointment of Inspectors.

Under the section of the Act which deals with the appointment of inspectors, it is provided that no person shall be appointed to such office until he has passed an examination specified by the governor-in-council. As few of the veterinarians of the Dominion have had experience in meat inspection, it was decided to require a special course at Chicago of all applicants for a position as inspector. Some forty-one veterinary inspectors were recently appointed from among those who had taken this course, and had passed the required examination. One or more of these inspectors will be assigned to each meat packing establishment in Canada, and will remain the whole time on the premises during working hours, in order to have full supervision of the various operations carried on. It is probable that in addition to these veterinarians, ten or twelve lay inspectors will be selected on account of special qualifications, including experience in the various processes of packing and preserving meats for food purposes.

It was stated that the working of the act, up to the close of the month, had proved as satisfactory as could be expected in view of the large interests involved and the intimate manner in which they are affected by the legislation.

\* For a review of the Act in further detail see the Labour Gazette for May 1907, p. 1251.

### THE FUEL SUPPLY IN WESTERN CANADA—ACTION OF GOVERNMENT OF SASKATCHEWAN.

**D**URING the month of September, further action was taken by the government of the Province of Saskatchewan with the object of providing, in so far as possible, against the repetition, during the coming winter, of the scarcity

of fuel which prevailed at many points in western Canada during the winter season of 1906-07. It will be remembered that some weeks ago a circular communication was addressed by the Hon. the Commissioner of Agriculture for the

province, to the various wholesale coal dealers throughout the west in order to ascertain whether it would be possible in any way to encourage the accumulation of stocks of fuel at an early period in the season, at a time when transportation facilities were at their best. (\*) Replies have since been received to this communication from a number of large coal mining companies which supply most of the coal consumed in western Canada. With the view of giving full publicity to the arrangements that have been made as a result of the action of the government, the following statement, under the heading "Buy your coal now," was given during September to the various newspapers of the province for publication:—

During the last few months, the press throughout the West has endeavoured to point out that in order to avoid a repetition of the serious conditions that existed last winter, the people should lay in ample supplies of coal before the season was so far advanced as to make the transportation of it difficult if not impossible, as was the case in certain periods during the winter of 1906-07.

The sales agents of the western mining companies have complained that the retailers on the different lines of railway in the western provinces could not be persuaded to place their orders for winter fuel, almost all of them preferring to wait until their customers were prepared to buy their fall and winter supplies. Some weeks ago publicity was given to a communication addressed by the Commissioner of Agriculture to the wholesale coal dealers who supply the greater portion of the coal used in this province, asking them what special concessions they were prepared to make, so that their agents in Saskatchewan might be induced to lay in stocks early in the season. At the time it was stated that the Alberta Railway and Irrigation Co., which sells the well-known Galt coal, mined at Lethbridge, had announced, as a result of a conference with the Commissioner of Agriculture, that they were prepared to supply coal to agents on very favourable terms. In fact they offered to ship the coal freight prepaid and to wait until December next for their money.

The Commissioner of Agriculture has since received replies from a number of other large coal companies, in which they have expressed their willingness to extend to the people practically the same terms so as to induce them to order coal early.

The Canadian Coal & Commission Co., of Brandon, who control the sales of Banff hard coal for the Kirkella line of the C.P.R., are asking their agents to place orders for coal on which neither the freight nor the purchase money will be due until October 15th. Whitmore Bros, Regina, who are general agents for Saskatchewan for the Banff hard coal, are giving their customers similar terms.

The Canada West Coal & Coke Co. Ltd., of Taber, Alta., and their general sales manager, Mr. D. E. Adams of Winnipeg, are shipping their coal subject to similar terms; while the Reliance Coal Mining Co., Ltd., with mines at Taber are also stocking up their agents, and in some cases are asking payment for neither coal nor freight until the coal has been disposed of.

\* A special article dealing with the action of the government in this connection and containing a copy of the circular referred to was published in the *Labour Gazette* for August, p. 208.

The above arrangement, it must be confessed, is in the nature of an encouragement of the credit system, which already has been the bane of the West; but the peculiar conditions existing this year amply justify the steps that have been taken on behalf of the people to obtain the concessions above mentioned from the several coal companies operating in the province. The severe experiences of Western people during last winter have established this fact beyond the probability of question, that the only reliable safeguard against a possible fuel shortage in the prairie country is that people should lay in their winter fuel supplies during the summer and autumn months. Even if the supply of coal obtainable were unlimited, the difficulties attending transportation during severe winter weather are great and at times almost unsurmountable, which renders an absolute reliance upon the prompt delivery of supplies during the winter months exceedingly risky; in fact such a proceeding would be better described as fool-hardy.

The situation at present is such that if the railway companies supply the required rolling stock, which they have promised to do, every facility is given to the people of Saskatchewan to purchase their winter's supply of fuel. Retailers throughout the province who have not ordered a sufficient supply of coal to meet the requirements of their customers should at once do so; and consumers will assist greatly in the movement if they will buy, if not all, at least a portion of the coal that they are likely to require, and by removing it from dealers' sheds provide space for further shipments. Moreover, dealers themselves may assist in the movement of coal by promptly unloading cars and thereby keep them in circulation.

The following are extracts, at greater length, from certain of the communications referred to in the foregoing:—

Extract from letter received from *The Canadian Coal and Commission Co., Brandon*, July 22nd, 1907:

"Your letter of the 18th to hand, also copy enclosed. In regard to it, we wish to say that we are the agents for the Banff hard coal for the Manitoba and Kirkella branch only.

The enclosed order blanks speak for themselves. "We have been shipping as fast as possible since the first of May, paying the freight and also carrying the coal until October 15th. We have also a large quantity of coal at our docks in the south, and are in a better position than ever to look after the trade through Manitoba and Saskatchewan."

Copy of letter received from *The Reliance Coal Mining Co., Ltd., Taber, Alta.*, dated July 24th, 1907:

"We have your favour of the 20th instant, and may say in reply that we are doing all we can to ship as much coal as is possible. We have in some cases been advised by our Agents to cease shipments on account of lack of storing room. We have shipped some coal to agents, prepaid freight, and we are waiting until this coal is disposed of to receive our money; any way possible we intend to do all we can to supply our share of coal to the people of Alberta, Saskatchewan and Manitoba. Our mine is still young in the development stage. However we expect to be in a position to ship considerable coal this coming winter. We have an up-to-date plant, equipped with the latest screening devices and picking tables and of large capacity, and as soon as the development work, which we are prosecuting to the fullest extent has reached some proportions, we can then supply a large share of the fuel required in the West."

Copy of letter received from *The Canada West Coal & Coke Co., Ltd., Taber, Alta.*, dated July 27th, 1907:

"Answering your letter of the 20th instant in reference to having as much coal stored throughout the Province of Saskatchewan and adjoining provinces during the summer months as possible, will say that we are urging all our representatives to take on now all the coal they can possibly handle.

Whether we have another fuel shortage the coming winter such as we experienced last winter, largely rests with the public. If the public, so far as possible, will put in their supply early, the dealers will be better prepared to keep a supply on hand during the winter, but unless this is done, the end of the first cold snap this fall will find most dealers' sheds empty, with little possibility of their being again refilled during the winter.

To encourage dealers to fill their sheds and store all the coal they possibly can during the summer and to relieve them of the expense of carrying the stock until winter, we have arranged with our dealers to carry for them the freight charges as well as cost of coal until late fall.

This company is now getting out more coal daily than the mine has ever before produced, and we expect to more than double our present output before winter when we will have our new plant, equipped with the most improved mining machinery, in full operation.

We commend your action in putting this matter before the people early and reminding them of the seriousness of the situation."

Copy of letter from *The Canada West Coal and Coke Co., Ltd., Winnipeg*, dated July 31st, 1907:

Answering your letter of the 18th instant would say, that we are doing everything possible to induce dealers throughout the country to take in a supply of coal from our mines at Taber during the summer months. Up to the time your letter was received we had no special inducement to offer the dealers, such as one or two other mines were in a position to make, one concession being that we would allow the freight charges to remain unpaid till October or November 1st as well as the cost on coal on cars at the mines. We had been working on this question for some time, and only made arrangements with the railway company a few days ago.

We are now shipping out about 325 to 350 tons per day. The larger part of this is going to points in Saskatchewan, and wherever we are satisfied with the dealer financially we will ship coal and accept settlement Nov. 1st, for coal and freight.

Our Company is installing new plant and machinery which when completed, will enable us to load on cars at least 1,000 tons per day. I think these improvements will be completed by November, but we cannot, of course, expect to begin immediately loading that quantity. We hope to be able to load not less than 600 tons per day, which, with that mined by the Galt people, should go a very long way towards supplying the requirements of the people, if not being quite equal to the demand.

I might say that we do not find the dealers throughout the country to be any too anxious to lay in stocks, and we have to keep continually after them in that connection. We have pointed out to them that the indications are that coal supplies will be short when the cold weather comes around, and that the dealers in the country will have to assume the responsibility.

I might say further in regard to our offering to ship coal to the dealers and accepting settlement for same November 1st including freight charges, that it is not, in my opinion, good policy to do business in that way. It is quite impossible to buy coal in the eastern markets on such terms. In fact the only way hard and soft coal

can be bought is for cash or thirty days, and all freight charges have to be paid by the dealer as soon as he receives the coal. You will therefore see that the dealers in the West have privileges that cannot be obtained in the east, and, in view of the continued growth of this country, it seems to me that the consumer must be educated to take in coal or at least a good portion of their requirements during the summer months. Of course some coal is taken in early in the season, but almost always on credit. This means that the producer has to carry the whole load as the dealer cannot pay or does not care to put up the money in view of the small margin they claim they make out of it. I do not know that I am called upon to make these remarks, but I thought possibly it would not do any harm and might be used by you to advantage generally.

As a result of this discussion of the question, the public has been rendered more alert and the railway companies has been induced to give their best attention to supplying the rolling stock necessary for the transportation of fuel. The government has received few complaints from shipping points in the province in regard to the question of fuel supply, and it is stated that if the weather during the coming winter proves at all normal, a repetition of the serious conditions of the previous season is highly improbable.

#### THE INTERCOLONIAL AND PRINCE EDWARD ISLAND RAILWAYS EMPLOYEES' PROVIDENT FUND.

BY a special act of the recent session of the Dominion parliament, a fund was established to provide for the payment of life allowances to retired employees of the Intercolonial and Prince Edward Island Railways.\* Although arrangements in full detail looking to the organization of this fund had not been completed up to September, the following statement with regard to progress made has been supplied by courtesy of the Department of Railways and Canals, it being understood that the estimates given are approximate only.

The Board of Administration of the fund has been constituted, and meets on the first Wednesday of each month, the chairman being Mr. D. Pottinger, Manager of the government railways system. The other members are Mr. John H. Stewart and Mr. J. W. Nairn,

\* Statutes of Canada, 1907, chap. 22. A review of this measure was published in the *Labour Gazette* for April, 1907, page 1118.

representing the employees, and Messrs. W. A. Dube and T. C. Burpee appointed from among the officers of the railways, Mr. W. C. Paver being acting secretary.

The number of employees paying into the fund, was about 7,300 in the closing week of August, and the average total monthly amount contributed by the employees during the four months ended July 31, was \$7,500.

The number of employees who have applied and have been recommended to be retired as soon as possible after

the coming into force of the act, is in all about 270. Of this number the papers of about 235 have been sent in, and the remaining ones are asking to have them sent in as soon as possible. At the meeting of the Provident Fund Board held during August it was decided to recommend 41 of the above applicants to the Honourable the Minister of Railways for retirement and to be placed on the Provident Fund. The other applications will be brought before the board from time to time as the papers are prepared.

#### FALSE REPRESENTATIONS TO INDUCE IMMIGRATION—AN APPEAL TO BRITISH AUTHORITIES.

ON June 27th last, the William Buck Stove Company, of Brantford, Ont., was charged before the police magistrate of that city with an infringement of the "Act Respecting False Representations to Induce or Deter Immigration" (4 and 5 Edward VII, Chap. 16; R. S. C., 1906), by inserting an advertisement in a Scottish newspaper for stove mounters and moulders for the Company, and declaring that there was no strike or trouble in connection with the said company, whereas it was contended that a strike existed in connection with the said company at the time the advertisement appeared.\* The charge was preferred by a stove mounter previously in the employ of the Buck Stove Company who claimed to be on strike at the time of the action. The members of the firm and two stenographers testified that they had no knowledge of the advertisement, and that there had been no communication on the subject of the same between the firm and the secretary of the Manufacturers' Association, or the secretary of the Employers' Association. The case was accordingly dismissed.

Under date of August 9, Mr. J. G. O'Donoghue, solicitor for the Trades and Labour Congress of Canada, made representations to the Department of Labour to the effect that the case

came within the scope of the Merchants Shipping Act of the United Kingdom, as amended in 1906 on representations made by the Dominion government through the Deputy Minister of Labour, the effect of such amendment being to make it a penal offence to induce emigration by misrepresentation. On behalf of the Trades and Labour Congress of Canada it was urged that, in view of the injury the workmen of Canada suffered from conduct of the kind set forth, the British authorities should take up the prosecution under the terms of the said act.

#### British Authorities Requested to Prosecute.

The Honourable the Minister of Labour, after due enquiry submitted a memorandum on the subject to His Excellency the Governor-General in Council, setting forth the circumstances and recommending that the Home authorities take action in the matter. The memorandum was considered by His Excellency in Council, and on September 7, was reported on as follows:

EXTRACT FROM A REPORT OF THE COMMITTEE OF THE PRIVY COUNCIL, APPROVED BY THE GOVERNOR-GENERAL ON THE 7TH SEPTEMBER, 1907.

On a memorandum, dated 30th August, 1907, from the Minister of Labour, representing that in the course of proceedings before the Police Magistrate

\* A report of the proceedings in the Brantford Police Court was published in the *Labour Gazette* for July, 1907, page 111.

in the City of Brantford, on June 27th last, taken on behalf of the Stove Mounters' Local Union of Brantford against Mr. Charles N. Parker, as representing the Buck Stove Company of Brantford, under the "Act Respecting False Representations to Induce or Deter Immigration," (4 and 5 Edward VII; Chapter 16, R. S. C., 1906), it was shown that the following advertisement was printed on Saturday, May 11, 1907, in a newspaper called the Falkirk<sup>h</sup> Herald, published in Scotland, viz.:

#### STOVE MOULDERS FOR CANADA.

have been commissioned by the Buck Stove Company of Canada to obtain 15 or 20 stove moulders accustomed to stove work, and 15 or 30 handy young fellows to learn stove mounding and polishing business. Moulders must be Union men. This is a Union shop. No strike, no trouble. Applicants must pay their own passage to Brantford. For further particulars send stamp. Alexander Caven, 75 Jamaica Street, Glasgow.

The Minister further represents that, as a strike of the class of workmen indicated was in progress in the establishment of the Buck Stove Company of Brantford at the time the said advertisement appeared in the Falkirk Herald, the publications of the said advertisement would appear to be a contravention either of the Canadian law respecting false representations to induce or deter immigration, or of clause 353 of the Merchants' Shipping Act, 1906, of Great Britain, which declares "that if any person by any false representations, fraud, or false pretence induces or attempts to induce any person to emigrate or to engage steerage passage in any ship, he shall for each offence be liable on summary conviction to a fine not exceeding £50, or to imprisonment with or without hard labour for a period not exceeding three months."

The Minister states that it was contended for the defendant in the prosecution above named, that the advertisement above set forth was not inserted in the Falkirk Herald by authority of the

Buck Stove Company, and that the said Company knew nothing of the said advertisement, or of Alexander Caven, the signatory to the said advertisement, despite the fact that the said Alexander Caven claims in the advertisement to have received authority from the Buck Stove Company to procure men for employment at its works at Brantford, and the prosecution entered against the said Charles M. Parker, as representing the Buck Stove Company failed on it being proved that the said Alexander Caven had no authority to act, for the Company.

The Minister further states that the Trades and Labour Congress of Canada has made representations concerning this prosecution to the Department of Labour, and has requested that in the interests of the workmen of Canada the attention of the Home Authorities should be called to the matter, also that the Home Authorities should be requested to prosecute the said Alexander Caven under the Merchants' Shipping Act.

The Committee, on the recommendation of the Minister of Labour, advise that the request of the Dominion Trades and Labour Congress be forwarded to the Right Honourable the Secretary of State for the Colonies, with a recommendation that the matter receive the careful consideration of His Majesty's Government.

All which is respectfully submitted for approval.

(Signed) RODOLPHE BOUDREAU,  
*Clerk of the Privy Council.*

The above extract from the report of the Privy Council was accordingly on September 9, forwarded by the clerk of the Privy Council to His Excellency the Governor General to be then submitted to the colonial office.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

THE most recent official returns relating to immigration show a heavy increase in the number of European arrivals during the present season, as compared with that of 1906, with a slight falling off in the number of arrivals from the United States. The increase in the volume of the movement, as a whole up to July 31, was 32 per cent. There has been a considerable decrease in the number of homestead entries made during the present year. Land sales by private companies have also in some cases shown a falling off.

Recent Immigration Returns.

Immigration through ocean ports during July, 1907, declared for Canada, was as follows:—

IMMIGRATION THROUGH OCEAN PORTS DURING JULY, 1907.

	Male.	Female.	Children under 12.	Total.
Immigrants . . .	11,481	4,695	4,410	20,946
Returned Canadians . . . . .	1,067	302	108	1,477
Tourists . . . . .	425	185	46	656
Totals . . . . .	13,333	5,182	4,464	23,079

A summary of immigration proper through ocean ports, declared for Canada during April May, June and July, 1906-07., is as follows:—

IMMIGRATION BY OCEAN PORTS APRIL-JULY, 1906-07.

	Male.	Female.	Children under 12.	Total.
April . . . . .	24,972	5,052	4,414	34,438
May . . . . .	24,744	7,153	6,858	38,755
June . . . . .	18,107	7,171	7,041	32,319
July . . . . .	11,841	4,695	4,410	20,946
Totals . . . . .	79,664	24,071	22,723	126,458
Corresponding mos. of 1906				86,638
Increase, 1907				39,820
Percentage of increase . . . . .				46%

The following is a statement of immigration from the United States during April, May, June and July, 1907, compared with the corresponding period of 1906:—

IMMIGRATION FROM THE UNITED STATES, APRIL-JULY, 1906-07.

Through Montreal . . . . .	April	140	
	May	70	
	June	77	
	July	93	380
Through Winnipeg and out-ports . . . . .	April	8,966	
	May	6,254	
	June	4,625	
	July	4,703	24,548
Customs entries April to July . . . . .			2,310
Total . . . . .			27,238
Corresponding months of 1906			29,754
Decrease, 1907 . . . . .			2,516
Percentage of decrease . . . . .			8%

The total immigration to Canada during April, May, June and July, 1907, compared with the corresponding months of 1906, was as follows:—

TOTAL IMMIGRATION TO CANADA, APRIL-JULY, 1906-07.

1907.		
Ocean ports . . . . .	126,458	
From the United States . . . . .	27,238	153,696
1906.		
Ocean ports . . . . .	86,638	
From the United States . . . . .	29,754	116,392
Increase, 1907 . . . . .		37,304
Percentage of increase . . . . .		32%
Percentage of increase via ocean ports . . . . .		46%
Percentage of decrease via U. S. . . . .		8%

British Emigration Returns.

During the month ended August 31, 1907, the number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING AUGUST, 1907-06.

Nationalities.	1906	
English . . . . .	8,438	9,005
Scotch . . . . .	2,684	1,558
Irish . . . . .	707	354
Total of British origin . . . . .	11,829	10,917
F reign . . . . .	2,615	2,074
Total . . . . .	14,444	12,991

During the eight months ended August 31, 1907, the total number of passengers leaving the United Kingdom for British North America, according to official returns of the Board of Trade, was as follows:—

EMIGRATION FROM GREAT BRITAIN DURING EIGHT MONTHS ENDED AUG. 31.

Nationalities.	1907	1906
English.....	72,967	61,160
Scotch.....	25,366	15,485
Irish.....	4,855	2,639
Total of British origin.....	103,188	79,284
Foreign.....	12,623	12,375
Nationality not distinguished.....		21
Total.....	115,811	91,680

Homestead Entries During August, 1907.

The following statement shows the number of homestead entries made in August, 1907, compared with August, 1906:—

STATEMENT SHOWING THE NUMBER OF HOMESTEAD ENTRIES MADE DURING THE MONTH OF AUGUST, 1907, AS COMPARED WITH AUGUST, 1906.

Agency.	1907	1906	Increase.	Decrease
Battleford.....	449	593		144
Brandon.....	6	21		15
Calgary.....	95	128		33
Dauphin.....	65	45	20	
Edmonton.....	431	439		8
Estevan.....	65	192		127
Humboldt.....	289		289	
Kamloops.....	26	2	24	
Lethbridge.....	161	147	14	
Minnedosa.....		15		15
Moose Jaw.....	504		504	
New Westminster.....	4	5		1
Prince Albert.....	126	149		23
Regina.....	180	1,007		827
Red Deer.....	172	266		94
Winnipeg.....	86	77	9	
Yorkton.....	155	302		147
Total.....	2,814	3,388	860	1,434

It will be seen that there has been a net decrease in the number of homestead entries made in August, 1907, compared with August, 1906, of 574.

A statement of the homestead entries made during the first eight months of the present year compared with the corresponding period of the last calendar year, is as follows:—

STATEMENT OF HOMESTEAD ENTRIES, JANUARY-AUGUST, 1907-1906.

Month.	1907.	1906.	Increase.	Decrease.
January.....	1,111	1,903		792
February.....	1,033	2,036		1,003

**Note.**

It was reported that the *Salvation Army* would engage ten steamships for the transfer of immigrants from Great Britain to Canada during the season of 1908. It is expected that 25,000 immigrants will be brought in this way. The distribution of the immigrants will also be supervised by the Army, as in the past.

**ORIENTAL IMMIGRATION.**

A considerable number of immigrants from Oriental countries has reached the Pacific ports of Canada during the last few months, with the result that some friction has existed between the white race and the newcomers, culminating in a somewhat serious disturbance at Vancouver on September 7 and the few days immediately following. Some days prior to the date named, at Bellingham, a city in the neighbouring state of Washington, there had been an outbreak against Hindoo labourers who had been beaten and driven out of town, and this incident, is believed to have contributed to bring to a head the feeling in Vancouver. Mr. K. Ishie, Japanese Director of Trade and Commerce, who had arrived in Vancouver on the day of the disturbance, having proceeded there from Ottawa, where he had obtained several interviews with Sir Wilfrid Laurier, in the course of a telegram to Japanese Consul General Nosse of Ottawa relating to the disturbance, stated that Japanese property had been damaged to the following extent: "General stores, 13; hotels, 9; candy and confectionery shops; 7; bath houses, 2;

**Land Sales.**

The following is a statement of the farm land sales made by the Canada North West Land Company, Limited during the month of August, 1907, compared with the sales in the corresponding month of 1906, and also of the sales from the beginning of the calendar year to August 31, 1907, compared with the corresponding period of 1906:—

barber shops, 5; shoe makers, 2; banking office, 1; newspaper office, 1; employment office, 4; restaurant, 1; rice mill, 1; hatter's shop, 1; tailors, 2; watchmaker, 1. Of these 50 stores all the window and door glass was smashed. Two Japanese were wounded."

The following telegram was sent by the Premier of Canada to the Mayor of Vancouver in consequence of the disturbance:

OTTAWA, Sept. 9, 1907.

"His Excellency the Governor General has learned with the deepest regret of the indignities and cruelties which certain subjects of the Emperor of Japan, a friend and ally of His Majesty the King, have been the victims, and he hopes that peace will be promptly restored and all offenders punished."

(Sgd.) WILFRID LAURIER.

On Monday, September 9, the disturbance continued. The following telegram from Japanese Consul Norikana of Vancouver, to Consu General Nosse of Ottawa, relates to the events of the day:

"About 10.30 last night (Monday) the rioters set the Japanese primary school on fire, but the building was saved from destruction by the Japanese. I at once interviewed the Mayor at the police station and made demand to call out the militia whenever necessary."

On the same day twenty-four white men appeared in the police court in Vancouver to answer to charges of having been concerned in the disturbance, and one Japanese was charged with threatening to stab a white man. All the accused were remanded.

The following telegrams were subsequently exchanged between the Mayor of Vancouver and the Prime Minister, namely: From the Mayor of Vancouver to Sir Wilfrid Laurier, dated Sept. 11.

Nine hundred Hindoos arriving to-day by steamer Monteagle. Neither accommodation or employment for them, nor is it possible to house them under sanitary conditions. Shall we house them in drill hall at Dominion government's expense.

(Sgd.) A. BETHUNE, Mayor.

To this message, the Prime Minister sent the following reply:

"I have your telegram asking permission to house in drill shed at government's expense nine hundred Hindoos landed yesterday at Vancouver. I would understand from such request that these Hindoos are paupers, therefore liable to deportation. Minister of the Interior will send to-morrow special officer to deal with the question."

(Sgd.) WILFRID LAURIER.

In accordance with the promise of the Prime Minister, as set forth in the above telegram, Mr. W. D. Scott, Superintendent of the Department of Immigration, was sent to Vancouver to enquire into the subject.

On September 16 these additional telegrams passed between the Mayor of Vancouver and the Prime Minister:

From the Mayor of Vancouver to Sir Wilfrid Laurier:

"Hindoos not paupers, but health officers declare the situation serious from a sanitary standpoint. The drill hall is the only sanitary building available."

To this the Prime Minister replied as follows:

"I had understood from your telegram asking that the Hindoos be housed at the Government expense in the drill hall, that they were paupers. I am glad to hear that such is not the case. As I have already wired you a special officer is going west to investigate the matter."

The following telegram was also received by the Minister of the Interior from Dr. A. S. Munroe, immigration officer at Vancouver, in response to an enquiry as to the condition of the new arrivals mentioned in the dispatch from the Mayor of Vancouver, and as to the necessity for any deportations:

Hon. Frank Oliver,

"Hindoos ex Monteagle, subject to rigid physical examination. All old men and those physically unfit rejected and ordered deported, about twenty-five in all. About thirty-five detained for trachoma, some of whom will be deported. None destitute. Have in possession about twenty-five thousand dollars. No accommodation to be bought at any price, and Hindoos compelled to live in tents until they erect buildings, which they say they will do."

(Sgd.) A. S. MUNROE,

Victoria, Sept. 4.

The subject of the disturbance at Vancouver came up for discussion at the Trades and Labour Congress in annual convention, at Winnipeg, and a resolution was passed and a copy thereof forwarded to Sir Wilfrid Laurier by telegraph on September 18, which after setting forth at length the views of the Congress on the question of Japanese immigration, declared as follows:

"Therefore, be it resolved: (1) that we respectfully but firmly ask the abrogation of the treaty so far as Canada is concerned; (2) that as a necessary preliminary to that end the Dominion government be urged to immediately call upon the Imperial authorities to give the six months notice required to terminate the treaty with Japan; (3) that, pending the termination of the treaty, the Japanese

authorities be called upon to restrict the emigration of Japanese in accordance with the alleged convention that not more than 400 or 500 be allowed to come to Canada during any one year.

To the above telegram the Prime Minister sent the following reply under date of September 21:

"I have given due consideration to your request, that immediate steps be taken to terminate the treaty with Japan. I would observe that this treaty when brought into existence some fifteen years ago, did not apply to Canada, and that some years ago, in response to the repeated expressions of public opinion, and with a view of affording to Canadian producers an opportunity of taking their share of the growing Japanese trade, the Canadian Government became a party to this treaty, and that it was unanimously ratified by the Canadian Parliament. The treaty has proved of great advantage, as our trade with Japan under it has considerably increased. You base your appeal for denunciation of

the treaty on the allegation that a crisis has arisen in British Columbia by reason of the unprecedented influx of Japanese. Whilst it is true that most regrettable incidents have lately occurred in Vancouver, there seems reason to doubt that the cause was the influx of Japanese, as I am in possession of a telegram from the Mayor of Vancouver, which has been rendered public, which expressly avers that the disturbances were directed against Asiatics generally, rather than against the Japanese. Under such circumstances any precipitate action might be regrettable, and before committing themselves to such a course the Government think they should carefully inquire into the causes which within the recent past have caused a greater influx to our shores than previously of Oriental people.

(Sgd.) WILFRID LAURIER."

Since the date of this telegram the Government has had under consideration the sending of a special envoy to the Orient.

RECENT INDUSTRIAL AGREEMENTS.

Rates of Pay and Rules Governing Services of Firemen, Central Division, C. P. R.

THE following rates of pay and rules for locomotive firemen on the Central Division of the C. P. R. System went into effect, by agreement, on July 1, 1907.

This is the first agreement of the kind made between the parties concerned, the firemen on this division having been previously grouped with the locomotive engineers in arrangements of this nature. The increased number of the employees affected is the cause of the adoption of the separate agreement.

ARTICLE 3.

Overtime will be computed from 30 minutes before time engine is ordered for road until put in the hands of hostler or reported in roundhouse register.

ARTICLE 4.

Firemen hired will be placed on seniority list from date of starting. Men promoted to firing will be placed on seniority list on date of promotion.

## ARTICLE 5.

Actual mileage will be paid for doubling. Firemen will be paid not less than 10 miles when ordered to double or at regular doubling points.

## ARTICLE 6.

Firemen will be paid maximum through freight rates on rotary plows. Firemen ordered on pile-drivers will be paid minimum freight rates. Firemen in charge of dead engines will be paid minimum freight rates and overtime.

## ARTICLE 7.

Firemen on snow-plow trains will be allowed mileage for plowing out sidetracks, with a minimum of one mile for each sidetrack plowed out.

## ARTICLE 8.

When distance between roundhouse and train is one or more miles, firemen will be paid mileage therefor. Firemen required to run more than one mile off main line will be allowed mileage for same.

## ARTICLE 9.

The time of work trains will count from the time engine is ordered for, 10 hours or less to be one day.

Firemen on work trains, when laid up at any other than regular roundhouse with regular shopmen, will be allowed one hour after laid up by conductor to do necessary work and get engines ready.

Firemen on work train service, when away from home terminal points, will be paid 100 miles for each day held for service, men to be notified on Saturday if required for the following day.

When work trains run 40 miles or more to or from work, mileage at through freight rates will be allowed, time so occupied not to be included in time paid for at work train rates. When mileage in work train service exceeds 10 miles an hour, mileage will be paid.

Firemen on work train service will be given opportunity for meals at reasonable hours. Firemen will be given transportation and allowed to go home for Sunday when such leave will not interfere with work trains.

Work trains will be manned by junior firemen unless senior firemen not assigned to time-table runs, apply.

Suitable sleeping accommodation will be provided for firemen on work trains.

Reasonable provision will be made for firemen on work trains to obtain meals.

## ARTICLE 10.

Firemen held between terminals for work train service will be paid work train rate for time occupied in such service.

## ARTICLE 11.

Road firemen will be paid for switching at terminals and turn-around points at through freight rates, except on specified runs and as otherwise provided for. Time to count from time engine is ordered for until switching is completed, each six minutes to count as one mile. Switching tickets to be certified to by conductor.

Trains required to switch (except on specified runs) other than picking up and setting out cars belonging to their train, will be paid through freight rates for the time so occupied, each six minutes to count as one mile.

## ARTICLE 12.

Firemen called for duty and afterward cancelled or set back will be paid through freight minimum firemen's

rate, minimum of 25 miles. If held over two and a half hours, firemen will be paid at rate of 10 miles per hour.

## ARTICLE 13.

Firemen held away from home station for engines will be paid 10 miles per hour at minimum passenger firemen's rate for the last 10 hours, or portion thereof, in every 24 hours so held, less any mileage or time otherwise paid for during said 24 hours.

The company will arrange through freight crews to avoid, as far as possible, excessive lay-over at other than home terminals, 18 hours, excluding Sunday, however, not to be considered excessive.

## ARTICLE 14.

Firemen will be allowed time for watching engines when no watchman is employed, but engineer and fireman will not both be paid for same time.

## ARTICLE 15.

Firemen held off on Company's business will be paid schedule rates for mileage lost, and extra men will be paid a minimum of 100 miles for each day of 24 hours so held, and will be reimbursed expenses when away from home.

## ARTICLE 16.

Time of firemen will be reported by engineers. Firemen's tickets not allowed will be promptly returned and reasons given therefor.

## ARTICLE 17.

When a fireman is suspended or dismissed, he will be advised of reason for such action, and a full and impartial investigation will be held and fireman advised of decision within ten days. Fireman will be advised to be present at such investigation accompanied by another employee of his own selection, and will be permitted to hear evidence, and be given carbon copy of his evidence. Should the investigation prove him blameless, he will be reinstated and paid for time lost, one day for each consecutive 24 hours at through freight minimum firemen's rates. Any appeal from such decision must be made in writing by the fireman, through his locomotive foreman, within ten days after he has been advised of such decision.

## ARTICLE 18.

Firemen will be on duty 45 minutes before departure of trains, and will sign appearance book.

Engines will be ready for trains fifteen minutes before departure time, 30 minutes to be allowed for making engine ready. Engines to be ready to go on passenger trains on arrival.

## ARTICLE 19.

Firemen living within reasonable distance of terminal stations will be called.

Unless otherwise arranged, firemen on local passenger and mixed trains, which are not held for connections, due to leave between 8k. and 23k., will not be called, unless such trains are more than one hour late.

## ARTICLE 20.

Firemen will not be required to leave terminals until they have had at least eight hours' rest, if requested, but such rest must be booked on arrival.

Engines may be laid up between terminals for firemen to obtain rest after they have been 15 hours on duty, upon advice to train dispatcher.

## ARTICLE 21.

The running of trains (except work) tender first in inclement weather, or after dark, will be discontinued, except in case of accident.

## ARTICLE 22.

Coal will be broken to a reasonable size for road engines.

## ARTICLE 23.

Engines will be supplied with coal, sand, water, oil, waste and grease supplies by engine house staff at terminals, but firemen will be responsible for seeing that engines are supplied.

Engines running through terminals where roundhouse staff is employed, whether on round trip or more than one section, will have coal shovelled ahead, and fire and ash pan cleaned by roundhouse staff, when necessary.

## ARTICLE 24.

When a fireman's seniority entitles him to an engine or when an engine is sent to the shop for repairs, or is transferred, he will be assigned without delay to an engine suitable for his run, it being understood that he take the junior man's engine in the class of service to which his seniority entitles him.

## ARTICLE 25.

Firemen on freight trains will be given reasonable time for meals between terminals on advising despatcher an hour in advance, time occupied to be deducted in computing overtime.

Firemen on yard engines will, when possible, be allowed one hour for meals between 11.45 and 14k. and between 23.45k. and 2k. without pay, and will not be compelled to remain off duty more than one hour at meal hours. If yard firemen are allowed off for meals, later than 13.15k. or 1.15k., they will be allowed 45 minutes for meals and will be paid for one hour.

Firemen on switch engines, when required to work overtime or double shift, will be allowed reasonable time for supper or breakfast.

## ARTICLE 26.

Firemen called to do extra hostling will be paid for not less than 5 hours at regular hostler's rates. If on duty more than 5 hours, they will be paid for actual time at regular hostler's rates.

Hostlers will be given reasonable time for meals.

When two or more hostlers are employed at a station they will work alternate weeks, day and night.

Hostlers will do roundhouse and shop switching.

When firemen are used temporarily to relieve hostlers, the senior available freight firemen will be taken. Hostlers will be supplied from the engineers' and firemen's seniority list, seniority to have preference.

Positions of hostlers may be filled by hiring men for same, when such positions have been declined by men entitled to them on the division, provided they have had at least two years' experience as firemen, it being understood that men now in the service, as permanent hostlers, or that may hereafter be given such position, shall not be disturbed without their consent, providing their services are satisfactory.

## ARTICLE 27.

Firemen transferred from one division to another, or from another railway, will rank as junior men respectively. Promoted engineers put back firing will have choice of runs according to seniority.

In case of reduction of staff, hired engineers will not be

classed as firemen ahead of men who were firing or hostling at the time engineers were hired.

## ARTICLE 28.

Firemen will be examined for promotion in their turn, and placed on seniority list on day of passing examination. They will be notified in writing of result of examination within thirty days. Firemen who have not been examined will retain their original seniority rights. In the event of a fireman failing to pass examination, he will be examined again within six months. In the meantime, he will be assigned to freight service, retaining his original seniority rights.

Firemen failing to pass second examination will be placed at foot of seniority list, or their services dispensed with at the option of the Company.

## ARTICLE 29.

Engine cabs will be made comfortable. Engines will be furnished with seats and boxes suitable for storing clothing. Engines will be so maintained that excessive steam blowing will be obviated.

## ARTICLE 30.

Firemen taken over with another road will hold their seniority rights with men on the division to which said road has been added, from date of entering service of such road.

Firemen employed by contractors will have no seniority standing. Firemen assigned by the Company to contractors' services will retain their seniority.

## ARTICLE 31.

Firemen running spare will run first in first out.

## ARTICLE 32.

Unassigned freight engines, available for service, will run, first in first out of shop.

Firemen will be assigned to engines in every class of service, except when engines are pooled, in which case firemen will run, first in first out.

If run around avoidably, firemen in unassigned freight service, will be entitled to 50 miles at minimum road rates.

## ARTICLE 33.

Switch engines doing road work outside of regular terminals will be paid actual mileage or time for such work, such mileage being deducted from switching time.

## ARTICLE 34.

On runs of 100 miles or more, firemen will be paid five miles for housing engines and five miles for taking engines out at points where men are required to do such work.

## ARTICLE 35.

When firemen resign or are dismissed, they will be paid and given a service letter on request within reasonable time. When an offence is placed to the discredit of a fireman, he will be notified in writing of the same.

## ARTICLE 36.

Firemen taking engines from one station to another will be furnished transportation to return home at once, and will not be expected to run out of any other than their home station, unless agreeable to them, or in case of emergency, in which case they will not be held for more than one round trip.

Firemen will not be run off sections they are assigned to, except in traffic emergency.

ARTICLE 37.

Any fireman being physically unfit for duty will report same on report book so that he may not be called. When he reports for duty, he will go on his assigned engine or in his turn.

ARTICLE 38.

Firemen assigned to regular runs of 100 miles or more, or to yard service, will not be considered on duty from time relieved at engine house until again required for their regular run or shift.

ARTICLE 39.

The number of freight firemen shall be regulated so that they shall make not less than 2,600 miles per month. Firemen may make reasonable monthly mileage in excess of 2,600 miles, but not more than 4,000 miles per month while firemen are wiping.

ARTICLE 40.

On regularly assigned way freight runs, 15 cents per 100 miles, or per 10-hour day, will be allowed in addition to through freight rates.

Firemen on trains required to load or unload way freight will be paid overtime at weigh freight rates for the time so occupied, but not in excess of way freight rates for full trip.

Firemen on assigned way freight runs may run around crews at terminals to catch assigned run.

ARTICLE 41.

Firemen detained two hours or more on their engines at terminals before commencement of trip will be paid for same at schedule rates, such time to be deducted when computing overtime.

ARTICLE 42.

Complaints made by engineers against firemen must be in writing.

ARTICLE 43.

If men are available, one fireman will be hired for every three promoted.

ARTICLE 44.

A seniority list of firemen will be posted in booking rooms on January 1st and July 1st of each year.

ARTICLE 45.

When yard engines are double crewed, fireman will work alternate weeks, day and night.

Firemen will be relieved of all cleaning of engines.

In addition to the above, the duties of firemen are defined in the agreement, and a number of local rules for the Central and Western divisions appended.

Agreement Between C. P. R. Co. and Coal Dock Employees at Fort William, Ont.

The following agreement went into effect on April 1, 1907:

Agreement entered into with the Canadian Pacific Railway Company, and the employees of the coal dock at Fort William, Ontario, represented herein by the undersigned employees, which agreement shall be in force until the first day of April, 1908.

In case of any disagreement between the said railway and the said employees with regard to men being as they think wrongly dismissed or other causes, the case shall be adjusted by the proper officials of the said railway company, and for the men by the parties whose signatures are set hereto, and it is distinctly understood that no strike shall take place by the said employees until the matter under dispute has been referred to arbitration.

That the railway company will not discriminate against the employment of union labor.

That time and a half shall be paid for all overtime worked on week days.

That time and a half shall be paid for unloading and loading coal, or operating machinery on legal holidays, excepting Sundays, such legal holidays enumerated thus New Years Day, Good Friday, Empire Day, Dominion Day, Labor Day, Thanksgiving Day, Xmas Day.

That double time shall be paid for unloading and loading coal or operating machinery on Sunday.

That time and a half shall be paid for repair work on machinery on Sunday, but if specially called out it shall be understood that they be paid at not less than a maximum of five hours, but if any hours worked beyond this the total time worked, shall count as per agreement, viz., time and a half.

That as far as practicable, men be not called on to work overtime more than four nights per week after 18k., and they be released from working overtime the fourth Tuesday of each month.

That the scale of wages as per schedule attached, shall be in force until April first 1908.

That when reductions in the staff are necessary, men who have others dependent on them shall be given preference of employment seniority and proficiency to govern.

That in case of a change of the rates of pay enumerated in the said schedule is required at the termination of this agreement either by the railway company, its heirs and assigns, or on behalf of the men, due notice of such change shall be served on either of the parties herein represented, not later than March first, 1908.

### Agreement in the Printing Trades, Guelph, Ont.

The following is a specimen copy of an agreement signed by the employing printers of Guelph, Ont., and the Local Typographical Union, during September, to take effect Oct. 1, 1907:

THIS AGREEMENT made this . . . . . day of . . . . . 1907, to hold good until September 30, 1910, between . . . . . of the First Part and GUELPH TYPOGRAPHICAL UNION, No. 391, of the second Part:

WITNESSETH, that Party of the First Part, hereby covenants and agrees that he will employ in the mechanical departments of his business none but members of the International Typographical Union of America; that a minimum wage of eleven dollars and fifty cents (\$11.50) be paid to book and job compositors, advertisement compositors and floormen, from October 1st, 1907, to September 30th, 1908; of twelve dollars (\$12.00) from October 1st, 1908, to September 30th, 1909; and of thirteen dollars (\$13.00) from October 1st, 1909, to September 30th, 1910; that twelve dollars and fifty cents (\$12.50) be paid to machine operators, from October 1st, 1907, to September 30th, 1908; of thirteen dollars (\$13.00) from October 1st, 1908, to September 30th, 1909; of fourteen dollars (\$14.00) from October 1st, 1909, to September 30th, 1910; per week of forty-eight hours, i. e., eight hours per day.

And he further agrees that overtime shall be paid at the rate of time and one-half time, and that holidays be paid at the rate of double time.

And he do further agree that he will engage no more than one apprentice to each four journeymen, and that he will use the trade label of the said International Typographical Union of America, and furnish the same on all work requiring it, the cuts of the said trade label to be and remain the property of Guelph Typographical Union, No. 391, and subject to recall by them at any time.

And the said Party of the First Part and the said Party of the Second Part jointly agree that any differences arising between them shall be submitted to a Board of Arbitration, consisting of one representative of the Party of the First Part, and one representative of the Party of the Second Part, and the then Mayor of the City of Guelph, provided, that the said Mayor is satisfactory to both parties; or a third person satisfactory to both parties, and abide by the decision of the said Board of Arbitration.

Signed.

### Agreement Between Western Fuel Co., Nanaimo, B. C., and Employees.

The following agreement was entered into on September 29 between the Western Fuel Company, Nanaimo, B. C., and its employees. The agreement will govern conditions in the mines for two years from Oct. 1, 1907.

The main points of difference between the new agreement and the old one are that the men are given free transportation to and from Protection; and the 10 per cent. bonus, which they have been receiving for some time is made a perma-

nent thing for the next two years. In the following table the ten per cent. advance is not added.

MEMORANDUM OF AGREEMENT entered into this thirtieth day of September, A. D., 1907.

Between:

THE WESTERN FUEL COMPANY, hereinafter called "The Company," of the First Part.

And:

THE EMPLOYEES of the Western Fuel Company, represented by a committee of five elected at a duly called mass meeting held August 24th, 1907, hereinafter called "The Men", of the Second Part.

WITNESSETH.—That for and in consideration of the several conditions hereinafter mentioned, and the mutual advantages of the parties it is agreed by and between the parties hereto as follows:—

FIRST.—The rates, terms and conditions in effect at both Number One and Northfield Mines, during the month of September, 1907, shall continue in effect during the term of this agreement, except as hereinafter provided.

SECOND.—The Company agrees to continue the payment of the present bonus of ten per cent.

THIRD.—The Company will absorb the expense of operating the Protection ferry.

FOURTH.—The system of dockage inspection as practised at both Number One and Northfield Mines shall be continued with penalties for refuse matter as follows:—

No. 1 Mine:

Up to and including 50 lbs. of refuse per car, double dockage; over 70 lbs. and including 100 lbs. of refuse per car, confiscation of car; over 100 lbs. of refuse per car, dismissal after investigation.

Provided, that any party dismissed may have right of appeal to the Superintendent of Mines, whose decision shall be final.

FIFTH.—The Company agree to a minimum rate of three dollars (\$3) per shift for miners in the lower seam workings of Number One and Northfield Mines.

It being understood that the Superintendent of Mines shall be the judge as to the ability of the party to earn such minimum.

SIXTH.—The Company agrees that when a miner is taken from the face to perform day work he shall receive the miner's day rate.

SEVENTH.—The schedule for loading coal to be as follows:—

Upper seam, 30 cents per ton.

Lower seam, 35 cents per ton.

And for using buggies and loading roads:

At No. 1 Mine:

First 75 feet from dump to face line of 5 cents per ton additional.

Second 75 feet from dump to face line, 10 cents per ton additional.

At Northfield Mine:

First 50 feet from dump to face line, 5 cents per ton additional.

Second 50 feet from dump to face line, 10 cents per ton additional.

Third 50 feet from dump to face line, 15 cents per ton additional.

EIGHT.—The schedule for rock in coal of upper seam to be as follows:

When Rock is 1 foot thick, \$1.00 per yard.

When Rock is 2 feet thick, \$2.40 per yard.

When Rock is 3 feet thick, \$4.00 per yard.

Above schedule applies only to solid work with stalls 21 feet to 27 feet wide. Skipping pillars take one-half these rates.

NINTH.—The schedule for timbers to be as follows:

Stringers:	
50 cents each when 8 feet long and under.	
\$1.00 each when over 8 feet long.	
Sets:	
\$1.50 each for 9 feet collars.	
\$2.00 each for 11 feet 4 inch collars.	

TENTH.—The mining yardage, and day rates for No. 1 Mine shall be as shown on schedule A, hereto attached, and which schedule is made part of this agreement.

ELEVENTH.—The mining yardage and day rates for Northfield Mine shall be as shown on schedule B, hereto attached, and which schedule is made part of this agreement.

TWELFTH.—The Company agrees to meet the Committee of Five, or a sub-committee thereof, on matters relating to this agreement or any new matter changing the status thereof.

Any vacancy on the Committee of Five to be filled at a duly called mass meeting of the underground employees of the company, or by a pit head ballot at the mine from which the vacancy exists.

The Committee of Five to have the handling of the check-weighman's and gas committee funds.

THIRTEENTH.—The terms and duration of this agreement shall be for a period of two years, beginning October 1st, 1907, and terminating September 30th, 1909.

FOURTEENTH.—It is agreed to by the Committee that all Employees working for the Company during the month of September, 1907, and who continue to work for the Company after the execution of the agreement shall by such action be understood as agreeing to and endorsing the terms and conditions of this agreement.

All new men accepting employment after October 1st, 1907, shall endorse this agreement by their signatures in a book containing a copy of this agreement and kept in the Company's office.

FIFTEENTH.—This agreement to be effective shall bear the signature of the Manager and Superintendent of Mines for the Company, and the Committee of Five for the men and the approval signature of the President of the Company.

#### SCHEDULE A.

Mining, Yardage and Day Rates,  
No. 1 Mine.

#### MINING:

Upper Seam—68c per ton.  
Lower Seam—80c per ton.

#### YARDAGE—Upper Seam:

Levels, \$2.50 per yard and coal.  
Cross Cuts, \$2.00 per yard and coal.  
Levels when less than one-half of height is in white rock, \$7.50 per yard, coal to company.  
Levels, when more than one-half of height is in white rock, \$8.00 per yard, coal to company.

#### TURNING STALLS

5 yards long by 12 feet wide—\$10.00 and coal.

#### DAY RATES:

Fire Boss.....	\$3.25
Shotlighters.....	3.00

## INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1907.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureau of Mines of Ontario and British Columbia, to the office of the factories inspectors of the province of Ontario the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

**I**NDUSTRIAL accidents occurring to 340 individual workpeople in Canada during the month of September, 1907, were reported to the Department of Labour. Of these, 96 were fatal and 244 resulted in serious injuries. In addition, five fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before September, 1907. The number of fatal accidents reported in September, 1907, was 70 less than the previous month and 6 more than in September, 1906.

Of 206 returns received during the month giving the ages of the victims of industrial accidents, 24 referred to persons under twenty-one years of age, 66 to persons between twenty-one and forty-five; 4 to persons over forty-five; 102 to persons over twenty-one years of age, whose exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING  
SEPTEMBER 1907, BY INDUSTRIES  
AND TRADES.

Civic employees.....	2	1	3
Miscellaneous.....	1	10	11
Unskilled labour.....	2	17	19
Total.....	96	244	340

## Nature of Fatalities and Accidents.

The only disaster of the month involving the loss of more than one life was the drowning, on September 19, of a mine manager, a prospector and three miners, forty miles below Hazleton on the Skeena river, B. C., by the capsizing of their canoe.

## Record By Trades and Industries.

*Agriculture.*—There were 22 fatal and 36 non-fatal accidents reported in this industry during September, 1907, compared with 19 killed and 27 injured in the preceding month, and 17 killed and 22 injured in September, 1906. Five farmers met accidental deaths by falls, 4 by being struck by trains, 3 by runaways, 3 by live stock, 3 by being run over, and 1 each by an explosion, by drowning, by machinery and by being caught between a gate post and a wagon. Of the injuries, 16 were caused by machinery, 7 by falls, 4 by runaways, 3 by live stock, 3 by explosions, 2 by being run over and 1 by a collision with a street car.

*Fishing and hunting.*—During September, 1907, two fishermen were drowned by falling from their boats, one in Lake Winnipeg, Man., and one at Scatarie, N. S. There were no accidents in the previous month or in the corresponding month of 1906.

*Lumbering.*—Seven workmen in this group were killed in September and 10 injured, as against 5 killed and 8 injured in August, 1907, and 5 killed and 2 injured in September, 1906. Two of the fatalities were due to drowning, 2 to machinery, 2 to being struck by wood flying from saws, and 1 to a fall. Of the injuries 7 were due to machinery, 1 to a fall, 1 to falling material and 1 to wood projected from a saw.

*Mining.*—The record for September, 1907, among these workers was 16 killed and 27 injured, compared with 13 killed and 18 injured in August, and 10 killed and 11 injured in September of last year. Six of the fatalities were caused by drowning, 3 each by falls and explosions, 2 by being run over and one each to fall-

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1907.

Trade or Industry.	Locality.	Date.	No. Killed.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer .....	Picton, Ont.....	Sept. 16	1	While blasting in well.
" .....	Pierson, Man.....	" 6	1	In runaway.
" .....	Thamesville, Ont.....	" 12	1	Bursting of fly wheel of thresher.
" .....	Minto, Man.....	" 5	1	Fell from wagon.
" .....	Cobourg, Ont.....	" 15	1	In runaway.
" .....	St. Vincent, Ont.....	" 12	1	Trampled to death by horse.
" .....	Parrsboro, N. S.....	" 11	1	Fell from wagon.
" .....	Cloverdall, B. C.....	" 3	1	Fell from load of hay.
" .....	King's County, N. B.....	" 16	1	Found dead in field.
" .....	Cornwall, Ont.....	" 1	1	Struck by train.
" .....	Burnside, Man.....	" 18	1	Runover by loaded wagon.
" .....	Smith's Falls, Ont.....	" 21	1	Gored by a bull.
" .....	Hespeler, Ont.....	" 20	1	Struck by train.
" .....	East Selkirk, Man.....	" 24	1	Gored by a bull.
" .....	Parry Sound, Ont.....	" 24	1	Struck by train.
" .....	Kinmount, Ont.....	" 6	1	Fell off load of hay.
" .....	Cobourg, Ont.....	" 23	1	In a runaway.
" .....	Crowland, Ont.....	" 27	1	Runover by threshing engine.
Thresher.....	Brantford Tp., Ont.....	" 4	1	Traction engine fell on him.
Market gardener.....	Lambton Mills, Ont.....	" 4	1	Caught between gate post and wagon.
Farmer's son.....	Lethbridge, Alta.....	" 2	1	Drowned while trying to recover a boat that had drifted away.
Farmer's wife.....	Hespeler, Ont.....	" 20	1	Struck by train at crossing.
<i>Fishing and Hunting—</i>				
Fisherman.....	Lake Winnipeg, Man.....	" 6	1	Drowned, fell from boat.
" .....	Scatarie, N. S.....	" 10	1	Drowned, fell from boat.
<i>Lumbering—</i>				
Foreman.....	Prince Albert, Sask.....	" 22	1	Fell 70 feet from water tower.
Saw mill hand .....	Millside, B. C.....	" 4	1	Drowned, fell from scow he was loading.
" .....	East Templeton, Que.....	" 8	1	Struck by wood flying from saw.
" .....	Sault Ste. Marie, Ont.....	" 9	1	Caught in shaft.
" .....	Hawkesbury, Ont.....	" 20	1	Struck by wood from saw.
" .....	St. George, N. B.....	" 11	1	Caught in belt.
" .....	Dalhousie, N. B.....	" 8	1	Drowned, fell from lumber barge.
<i>Mining—</i>				
Miner .....	Burgess, Ont.....	" 9	1	Fell down shaft.
" .....	Ottawa, Ont.....	" 3	1	Struck on head by stone from blast.
" .....	Cobalt, Ont.....	" 9	1	Fell from bucket down shaft.
" .....	Sydney Mines, N. S.....	" 11	1	Struck by falling rock.
" .....	Cobalt, Ont.....	" 12	1	Struck by rock from blast.
" .....	Theftord Mine, Que.....	" 11	1	Crushed between engine and door post.
" .....	Cobalt, Ont.....	" 17	1	Fell 50 feet in shaft.
" .....	Beaverdam, B. C.....	" 20	1	Drowned, canoe upset.
" .....	Coal Creek, B. C.....	" 21	1	Premature blast.
" .....	Glace Bay, N. S.....	" 18	1	Run over by trip.
" .....	Cumberland, B. C.....	" 19	1	Caught in gear of electric pump.
Mine manager .....	Beaverdam, B. C.....	" 20	0	Drowned, canoe upset.
" .....	Cobalt, Lake, Ont.....	" 21	1	Drowned, canoe upset.
<i>Building Trades—</i>				
Bricklayer.....	Regina, Sask.....	" 29	1	Fell 60 feet from scaffold.
Carpenter.....	Toronto, Ont.....	" 30	1	Scaffold fell.
<i>Metal, Engineering and Shipbuilding Trades—</i>				
Lineman.....	Toronto, Ont.....	" 18	1	Contact with live wire.
Electric Light tender.....	Niagara Falls, Ont.....	" 14	1	By shock from switch.
Blacksmith.....	North Bay, Ont.....	" 6	1	Run over by train.
Sheet metal worker.....	Toronto, Ont.....	" 17	1	Crushed between bucket and wall of coal elevator.
Structural iron worker.....	Toronto, Ont.....	" 30	1	Fell from shed, derrick fell on him.

" .....	Toronto Junction, Ont.....	" 19	1	Run over by train.
Yardman .....	Montreal, Que.....	" 2	1	Steel rails fell on him.
" .....	Carleton Place, Ont.....	" 1	1	Run over by train.
" .....	North Bay, Ont.....	" 2	1	Run over by train.
Car shop hand .....	Winnipeg, Man.....	" 8	1	Struck on head by crane.
" .....	Stratford, Ont.....	" 18	1	Run over by engine.
Car inspector .....	Norwood, Ont.....	" 19	1	Run over by car.
" .....	Sherbrooke, Que.....	" 9	1	Struck by engine.
" .....	Sydney, N. S.....	" 29	1	Caught between engine and t.ain.
" .....	Fort William, Ont.....	" 29	1	Run over by yard engine.
<i>Navigation—</i>				
Deck hand .....	Campbellton, N. B.....	" 7	1	Drowned, fell from scow.
" .....	Walkerville, Ont.....	" 16	1	Drowned, fell from boat.
Sailor .....	Montreal, Que.....	" 29	1	Drowned.
" .....	Sorel, Que.....	" 16	1	Drowned, fell over board.
" .....	Off Nova Scotia.....	" 23	1	Drowned, swept over board.
Stevedore.....	Halifax, N. S.....	" 4	1	Fell from boat to wharf breaking neck.
Fireman .....	Toronto, Ont.....	" 2	1	Burned to death in S. S. Picton.
Longshoreman .....	Montreal, Que.....	" 16	1	Struck by arm of crane.
" .....	Montreal, Que.....	" 9	1	Fell into hold of vesse!.
Mate.....	Driftwood Cove, Ont.....	" 23	1	Drowned, boat capsized.
Captain.....	Cobalt Lake, Ont.....	" 21	1	Drowned, boat upset.
<i>Civic Employees—</i>				
City scavenger.....	Amprior, Ont.....	" 3	1	Struck by train at crossing.
Civic employee.....	Niagara Falls, Ont.....	" 15	1	Fell from pole.
<i>General Transport—</i>				
Hostler.....	East Toronto, Ont.....	" 20	1	Gored by bull.
Electric car motorman .....	Ottawa, Ont.....	" 29	1	In collision between two cars.
" conductor .....	Toronto, Ont.....	" 30	1	Head struck passing car.
Stableman.....	Toronto, Ont.....	" 30	1	Thrown when exercising a horse.
<i>Miscellaneous—</i>				
Grocer's clerk.....	Chaudière Curve, Que.....	" 23	1	Drowned, boat laden with vegetables upset.
<i>Unskilled Labour—</i>				
Labourer .....	Regina, Sask.....	" 18	1	Cave in of trench.
" .....	Walkerville, Ont.....	" 20	1	Run over by train.

## FATAL ACCIDENTS HAPPENING IN PREVIOUS MONTH BUT ONLY REPORTED TO THE DEPARTMENT IN SEPTEMBER.

Fisherman .....	Steveston, B. C.....	Aug. 26	1	Drowned, fell out of boat.
Miner.....	Michel, B. C.....	" 29	1	Struck by flying timber from blast.
Roperider.....	Fernie, B. C.....	" 28	1	Fell in front of moving cars.
Conductor.....	Hamilton Siding, N. B.....	" 31	1	Run over by train.
Sailor.....	Halifax, N. S.....	" 31	1	Drowned, fell overboard.

ing material and machinery. Fifteen of the injuries were caused by explosions, 5 by falling material, 5 by cars and 2 by falls.

*Building trades.*—Two were killed and 18 injured in September, compared with 12 injured in August and 3 killed and 20 injured in September, 1906. Both the fatalities were due to falls. Eleven of the injuries were due to falls, 3 to explosions, 2 to machinery, 1 to tools, and 1 to falling material.

*Metal, engineering and shipbuilding.*—During September, there were 5 metal workers killed and 46 injured. In the previous month there were 69 killed and 64 injured, and in September, 1906, 3 killed and 35 injured. Two of the deaths were due to electric shock and 1 each to being run over by train, to being caught in an elevator and to a fall. Seventeen of the injuries were due to machinery, 9 to falling material, 9 to fall, 6 to molten metal, 3 to flying objects, 1 to tools and 1 to being struck by a derrick boom.

*Woodworking.*—A woodworker at Meaford, Ont., was killed by being struck on the head by the fly wheel of an engine, and another at Chatham, Ont., was caught between an elevator and the landing. There were 11 workmen seriously injured by machinery. In August, there were 1 killed and 13 injured, and in September of last year 11 injured.

*Painting.*—There was 1 minor accident in September, 1907, compared with 1 killed and 1 injured in the preceding month, and 1 injured in 1906.

*Textile.*—Three workmen were injured in September, the same number as in August and in September, 1906, there were 4 injured.

*Food and tobacco preparation.*—The record for September was 6 injuries, of which 3 were caused by machinery, 2 by falls and 1 by an explosion. In the previous month there were 1 killed and 8 injured, and in September, 1906, 4 injured.

*Leather.*—In September, a leather worker at London, Ont., had his hand badly crushed in a machine. There were no accidents in the preceding month.

One workman was injured in September, 1906.

*Railway service.*—Twenty workmen killed and 31 injured was the record for September, 1907, compared with 33 killed and 42 injured in August, and 28 killed and 44 injured in September, 1906. Ten of the fatalities were due to the victims being run over by trains or portions thereof, 4 to being struck by engines, 3 to collisions, 2 to falling material, and 1 to being caught between cars. Of the injuries, 9 were due to falling material, 5 to collisions, 5 to explosions, 3 each to falls, and 1 to being caught between cars. 2 each to being run over and being struck by cars, and 1 each to a derailment and to being struck by passing objects.

*Navigation.*—In this group 11 workmen were killed and 10 injured in September, compared with 9 killed and 3 injured in the previous month, and 4 killed and 5 injured in September, 1906. Seven of the accidental deaths were caused by drowning, 2 by falls, 1 by being burned, and 1 by being struck by the arm of a crane. Six of the injuries were caused by falls, 3 by explosions and 1 by machinery.

*General transport.*—Four deaths by accident occurred among these workmen during September, and 16 injuries. In August there were 6 killed and 20 injured, and in September, 1906, 7 killed and 11 injured. Two of the fatalities were due to live stock, 1 to a collision, and 1 to the head of the victim striking a passing object. Of the accidents, 7 were due to falls, 4 to collisions, 2 to being run over, 1 to live stock, 1 to being struck by an engine, and 1 to a runaway.

*Civic employees.*—Two civic employees were killed during September and 1 injured, compared with 1 killed and 8 injured in August, and 3 injured in September, 1906. One of the fatalities was caused by a fall and one by being struck by an engine. A meter reader at Toronto had his face and hands severely burned by an explosion of gasoline.

*Miscellaneous.*—In these trades there were 1 killed and 10 injured, compared with 6 killed and 21 injured in the preceding month, and 8 killed and 23 injured

in September of last year. A grocer's clerk was drowned at Chaudière Curve, Que., while crossing the river with a boat laden with vegetables. Nine of the accidents were due to machinery and 1 to a fall.

*Unskilled labour.*—A labourer was killed by a cave-in of a trench and another by being run over by a train. Seventeen labourers were injured. In

August there were 2 killed and 18 injured, and in September, 1906, 4 killed and 12 injured. Of the 17 accidents, 4 were caused by the victims being struck by cars, 4 by falling material, 3 by machinery, 2 by the caving in of debris, and 1 each by a fall, by being caught between cars, by being caught in an elevator and by live stock.

### TRADE DISPUTES DURING THE MONTH OF SEPTEMBER, 1907.

Although there was no decrease in the number of trade disputes in Canada during September, compared with the previous month, the loss to the community, measured by working days, was not so great. The most serious dispute of the month was a strike of coal miners at Springhill, N.S., which had begun on August 1, and continued throughout September. The effect of the prolonged stoppage of work at these mines was felt throughout the province in the diminished supply of coal.

#### Analysis of Trade Disputes During the Month.

*Number and magnitude.*—The total number of trade disputes reported to have been in existence in Canada during September was 25, one less than in the previous month, but a decrease of 4 compared with September, 1906. About 95 establishments and 3,880 employees were affected by these disputes, 18 firms and about 959 work-people being involved in the disputes which began in September.

*Loss of time in working days.*—The loss of time to employees through trade disputes during September amounted approximately to 61,900 working days, compared with 99,860 in August and 97,140 in September, 1906.

*Trades affected by new disputes.*—The following table shows the trades affected by new disputes during the month, and the number of workpeople affected in each group of trades.

Trades.	No. of Disputes.	No. of Workers.
Mining.....	1	325
Building trades.....	2	90
Metal trades.....	2	229
Textile trades.....	2	240
Clothing trades.....	1	75
Total.....	8	959

*Localities affected by new disputes.*—The new disputes of the month occurred in the following provinces of Canada:—

Province.	No. of Disputes.
Nova Scotia.....	2
Quebec.....	1
Ontario.....	3
Saskatchewan.....	1
Alberta.....	1
Total.....	8

*Causes of disputes.*—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages.....	4
For shorter hours (continuation of short day on Saturdays).....	1
For recognition of union and employment of union foremen only.....	1
Against employment of non-unionists.....	1
Against conditions of employment.....	1
Total.....	8

*Methods of settlement.*—Out of the 25 trade disputes in existence during the month definite settlements were reached in 4 cases and in 4 others industrial conditions ceased to be affected, leaving 17 still in existence at the end of the month. Four of the disputes were settled through negotiations between the parties concerned. The remaining 4 ceased without any negotiations.

*Results of disputes.*—Of the 8 disputes that were terminated, the employers were successful in 3, the employees were successful in 1, and a compromise was reached in 2. In another, affecting a number of firms, the strikers were successful with respect to some of them, their places being filled in the case of others. Information with regard to the result of one dispute was not received at the Department.

#### Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes in existence during September, which commenced in previous months comprised strikes of coal miners at Springhill, N. S., garment workers at Montreal, Que., plumbers, electrical workers and machinists at Toronto, Ont. silver miners at Cobalt, Ont., and granite cutters, at Toronto, Ont., iron moulders at Vancouver, B.C., tailors at Winnipeg, Man., pulp and paper makers at Sturgeon Falls, Ont., carpenters, plumbers, stonemasons, bricklayers and labourers at Galt, Ont., telegraphers at Quebec, Montreal, Toronto, and Winnipeg, harness and collar makers at Peterborough, Ont., and cigarmakers at Montreal, Que. A brief account of these disputes is given below.

#### Strike of Coal Miners at Springhill, N. S.

A strike of coal miners at Springhill, N.S., which began on August 1, on account of the refusal of the Cumberland Coal and Railway Company to grant a demand for payment of 4 cents per inch per lineal yard for stone in pillar work, continued throughout the month, without a settlement. The number of men affected by this dispute was variously estimated, the Company stating that 82 were directly affected and 1,534 indirectly, all in the service of the Company as well as a large number employed

by other companies and firms dependent directly or indirectly upon the Springhill mines. According to the employees there were 500 men directly affected by the dispute and 750 indirectly. It was reported that about 600 strikers had left Springhill to seek work elsewhere.

#### Strike of Garment Workers at Montreal, Que.

A strike of garment workers at Montreal, Que., which began on August 20, was terminated in all the shops but one on September 4. The object of the dispute was to obtain better conditions of employment. The principal demands made by the workpeople comprised abolition of the piecework system, payment of wages on a sliding scale basis, the wages to be made up by competent foremen, hours of labour to be 55 per week for men and 50 for women, and all work to be taken out of the hands of contractors. According to a report received from the Garment Workers' Union, there were at first 4 firms and about 400 employees affected by the dispute. A settlement was reached with one firm employing 60 male and 50 female workers, on August 24, but on August 29, the employees of another establishment, about 133 males and 125 female workers went out for the same reason. This firm, with two others, reached an agreement with the garment workers on September 4, by which the female employees began work at 7.30 instead of 7 a. m. and left at 5 minutes to 12 and 5 minutes to six, and the men worked from 7 a. m. to 12, and from 1 to 6 p. m. A week was to consist of five days and a half. The employees were given the choice of working by the week or by the piece.

#### Strike of Plumbers and Electrical Workers, at Toronto, Ont.

A strike of plumbers, which began at Toronto, Ont., on May 17, continued throughout the month. According to a report received from the Employers' Association, the cause of the dispute was a demand on the part of the men for recognition of their Union, a minimum wage of 45 cents an hour, limitation of

apprentices, requirement that apprentices should learn the trade in the City of Toronto, and restrictions of use of tools with regard to apprentices. The Employers' Association estimated that 40 firms and 450 men were affected by this dispute. Many of the strikers, however obtained work elsewhere, and many firms came to terms with the union. At the end of the month it was reported that only 6 important firms were still affected and that about 300 men had returned to work. No settlement was reported with regard to a strike of 25 electrical workers, who went out on July 20, in sympathy with the striking plumbers. Another strike of plumbers, to the number of 50, who stopped work on April 13, on account of the employment of non-unionists, also continued throughout the month.

#### Strike of Machinists at Toronto, Ont.

A strike of machinists which was declared at Toronto, Ont., on June 8, on account of the refusal of the employers to grant a demand for a reduction in working hours from 10 to 9 per day, with no change in wages, continued throughout the month. In a report received from the Employers' Association of Toronto, it was stated that a number of the repair and jobbing shops, employing probably 90 men conceded the 9 hour day, but the manufacturing firms, employing about 625 hands had all refused the demand. A number of the large manufacturing shops, working the ten-hour day, and employing about 500 hands, were not affected. According to information received from the Machinists' Union, 9 firms out of 25 had conceded their demand; leaving 16 firms and 400 men, still affected by the dispute, in October.

#### Strike of Telegraphers of the Great North Western Company.

No definite settlement was reached with regard to a strike of telegraphers of the Great North Western Telegraph Co., which began on August 13, on account of the refusal of the employees to receive messages from the United States pending a strike of telegraphers there. It was

reported, however, by the Company, towards the end of the month, that all the places of the strikers were filled, and conditions ceased to be affected by the dispute. About 38 male and 37 female operators were affected by this dispute in the cities of Quebec, Montreal, Toronto and Winnipeg.

#### Dispute of Garment Workers at Winnipeg, Man

No settlement was reported with regard to a dispute of 37 garment workers at Winnipeg, Man., who had been paid off by the employers, and afterwards refused to return unless all were taken back together, their refusal being due, according to the Company, to a misapprehension as to cause of their discharge. In the course of September, the Company secured a number of new workpeople to fill the places of their former employees.

#### Other Disputes.

Although no definite settlement was reached with regard to the strike of *silver miners*, which began at Cobalt, Ont., on July 8, normal conditions were restored in the 30 mines originally affected by the dispute, in some cases through the demands of the men being conceded, and in others through their places being filled.

Though no definite settlement was reached in the case of a strike of *marble workers* at Toronto, who stopped work on May 29, on account of the employment of non-unionists, and of 40 *stone cutters* of the same firm who stopped work on July 3 on account of a dispute with regard to wages, the employees claimed that they had not made an agreement with another union in August and were no longer effected.

Conditions also ceased to be affected in the case of a strike of cigar-makers at Montreal, Que., who went out on July 31, on account of an objection to the tobacco used.

No settlement was reported in the strikes in building trades at Guelph, Ont., and granite cutters at Toronto, Ont., harness and collar makers at Peterborough, Ont., and pulp and paper makers at Sturgeon Falls, Ont.

DEPARTMENT OF LABOUR, CANADA,  
STATISTICAL TABLE, SERIES C., No. 81.

TABLE OF TRADE DISPUTES DURING THE MONTH OF SEPTEMBER.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employees affected.				Date of termination	Result.

\*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned; moreover, is not made of disputes involving less than six employees, or less duration than 24 hours.

### New Disputes.

The new disputes of the month comprised strikes of coal boys at Westville, N. S., mechanics and helpers at Halifax, N. S., woolen mill hands at Almonte, Ont., textile mill hands at Montmorency Falls, Que., journeymen tailors at Kingston, Ont., tunnel men at Windsor, Ont., and carpenters at Regina, Sask.

#### Strike of Coal Boys at Westville, N. S.

On Saturday, September 21, the coal boys at the Acadia Colliery, Westville, N. S., caused a stoppage of operations, owing to a dispute about a short day on Saturdays. About two months ago, it was agreed by the management of the company and the employees that work would stop on Saturdays at two o'clock, p.m. at all the company's collieries during the summer months, or until September 21. During the week ending on that day, the Company posted up a notice calling off the agreement. The boys then interviewed the Manager, asking him if he would still continue to put on the riding rake at two o'clock on Saturday. The manager replied in the negative, and the boys stopped work on that day. It was reported by the Company that on September 26 they resumed work without the concession being granted. According to the Company about 325 hands were affected by this dispute.

#### Strike of Mechanics and Helpers at Halifax, N. S.

On September 25, a strike of mechanics and helpers, employed by the Halifax Graving Dock Company, Limited, took place at Halifax, N. S. The cause of the dispute was the refusal of the Company to grant a demand for an increase in wages from \$2.50 to \$3.50 per day for mechanics, and from \$1.80 to \$2.50 per day for helpers. The strikers alleged that men had been imported from England to break their rules, and that they had learnt that they were working under the average wages of the trade. The strike affected contracts for repairs on two ships. The company claimed that they proposed to the men that they should return to work and refer matters in dispute to arbitration,

but up to the close of the month this proposal had not been acted upon and the strike was still in existence. According to the Company, the dispute affected 89 men directly and 100 indirectly. In a report received from the Boilermakers' Union, to which the strikers belonged, it was stated that about 150 men were affected by the dispute.

#### Strike of Woolen Mill Hands at Almonte, Ont.

On September 13, the warpers employed by the Rosamond Woollen Company stopped work, on account of the refusal of their employers to grant a demand for an increase in wages from \$1.65 and \$1.75 to \$2.00 per day. Although only 5 men were directly affected by the dispute, about 200 other factory hands were thrown out of work by it. Those employed in the worsted department of the mill, to the number of about 100, were the only ones who continued at work. No settlement of the dispute was effected in the course of the month.

#### Strike of Textile Mill Hands at Montmorency Falls, Que.
